

# University of Washington 2008-2010 General Catalog

Founded in 1861, the University of Washington is one of the oldest state-assisted institutions of higher education on the Pacific coast. From its original site on a 10-acre tract of wooded wilderness that is now located in downtown Seattle, the campus has grown to comprise 703 acres of trees, landscape, and buildings. Located between the shores of Lake Washington and Lake Union, it is in a residential section of the city that long has been considered one of the most attractive in the nation. Two additional campuses, one south of Seattle in Tacoma, and one north in Bothell, were opened in 1990.

Enrollment at the University in autumn quarter 2005 was almost 43,000, including its campuses in Bothell and Tacoma, of which 26,000 were undergraduates and the balance were in professional and graduate programs. Almost 90 percent of the undergraduates enter as freshmen from Washington high schools or as transfer students from Washington community colleges or other colleges and universities in the state. The grade-point average for the regularly admitted freshman class entering in autumn quarter 2005 was 3.69. In 2005, the full-time teaching faculty of the University numbered approximately 3,500 members.

## Message from the President Mark Emmert

**More than two centuries ago, Benjamin Franklin said, "An investment in knowledge always pays the best interest." Here at the University of Washington, a vibrant and diverse academic community makes that investment every day in an environment distinguished by innovation, collaboration, and a commitment to excellence.**

**As one of the nation's leading public research universities, the UW is uniquely positioned to take on the most complex challenges of our time. Our faculty, students, and staff work together across disciplines to make discoveries that transform and enrich the lives of people throughout our state, our region, and the world.**

# University of Washington Administration

Mark Emmert, President  
Phyllis M. Wise, Provost and Executive Vice President  
Paul G. Ramsey, Executive Vice President for Medical Affairs  
V'ella Warren, Vice President for Finance and Facilities  
Doug Wadden, Executive Vice Provost  
Ronald A. Johnson, Vice President for Technology  
Connie Kravas, Vice President for Development and Alumni Relations  
Scott Woodward, Vice President for External Affairs  
Mindy Kornberg, Vice President for Human Resources  
Sheila Edwards Lange, Vice President for Minority Affairs and Vice Provost for Diversity  
Johnese Spisso, Vice President for Medical Affairs  
Bruce Ferguson, Vice President for Medical Affairs  
Cheryl A. Cameron, Vice Provost for Academic Personnel  
David Szatmary, Vice Provost for Educational Outreach  
Suzanne T. Ortega, Dean of the Graduate School and Vice Provost  
Edward Taylor, Vice Provost and Dean of Undergraduate Academic Affairs  
Sara Gomez, Interim Vice Provost for Information Management  
Gary Quaforth, Interim Vice Provost for Planning and Budgeting  
Mary Lidstrom, Vice Provost for Research  
K.J. (Gus) Kravas, Vice Provost for Special Programs  
Eric S. Godfrey, Vice Provost for Student Life  
James A. Severson, Vice Provost for UW TechTransfer  
Todd Mildon, University Registrar

## ACADEMIC CALENDAR

2008-2009

### Autumn Quarter 2008

Classes begin ..... September 24  
Last day of instruction ..... December 5  
Final examinations ..... December 8-12

### Winter Quarter 2009

Classes begin ..... January 5  
Last day of instruction ..... March 13  
Final examinations ..... March 16-20

### Spring Quarter 2009

Classes begin ..... March 30  
Last day of instruction ..... June 5  
Final examinations ..... June 8-12  
Commencement ..... June 13

### Summer Quarter 2009

Full-term and term a classes begin ..... June 22  
Term a classes end ..... July 22  
Term b classes begin ..... July 23  
Full-term and term b classes end ..... August 21

2009-2010

### Autumn Quarter 2009

Classes begin ..... September 30  
Last day of instruction ..... December 11  
Final examinations ..... December 14-18

### Winter Quarter 2010

Classes begin ..... January 4  
Last day of instruction ..... March 12  
Final examinations ..... March 15-19

### Spring Quarter 2010

Classes begin ..... March 29  
Last day of instruction ..... June 4  
Final examinations ..... June 7-11  
Commencement ..... June 12

### Summer Quarter 2010

Full-term and term a classes begin ..... June 21  
Term a classes end ..... July 21  
Term b classes begin ..... July 22  
Full-term and term b classes end ..... August 20

University of Washington  
(Name of office and box number)  
Seattle, Washington 98195

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students follow University regulations and procedures as they are stated in the General Catalog. Appeals may be filed with the student's dean or with the Vice President for Student Affairs in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

## Role and Mission of the University

Founded 4 November 1861, the University of Washington is one of the oldest state-supported institutions of higher education on the Pacific coast. The University is comprised of three campuses: the Seattle campus is made up of seventeen schools and colleges whose faculty offer educational opportunities to students ranging from first-year undergraduates through doctoral-level candidates; the Bothell and Tacoma campuses, each developing a distinctive identity and undergoing rapid growth, offer diverse programs to upper-division undergraduates and to graduate students.

The primary mission of the University of Washington is the preservation, advancement, and dissemination of knowledge. The University preserves knowledge through its libraries and collections, its courses, and the scholarship of its faculty. It advances new knowledge through many forms of research, inquiry and discussion; and disseminates it through the classroom and the laboratory, scholarly exchanges, creative practice, international education, and public service. As one of the nation's outstanding teaching and research institutions, the University is committed to maintaining an environment for objectivity and imaginative inquiry and for the original scholarship and research that ensure the production of new knowledge in the free exchange of facts, theories, and ideas.

To promote their capacity to make humane and informed decisions, the University fosters an environment in which its students can develop mature and independent judgment and an appreciation of the range and diversity of human achievement. The University cultivates in its students both critical thinking and the effective articulation of that thinking.

As an integral part of a large and diverse community, the University seeks broad representation of and encourages sustained participation in that community by its students, its faculty, and its staff. It serves both non-traditional and traditional students. Through its three-campus system and through educational outreach, evening degree, and distance learning, it extends educational opportunities to many who would not otherwise have access to them.

The academic core of the University of Washington is its College of Arts and Sciences; the teaching and research of the University's many professional schools provide essential complements to these programs in the arts, humanities, social sciences, and natural and mathematical sciences. Programs in law, medicine, forest resources, oceanography and fisheries, library science, and aeronautics are offered exclusively (in accord with state law) by the University of Washington. In addition, the University of Washington has assumed primary responsibility for the health science fields of dentistry and public health, and offers education and training in medicine for a multi-state region of the Pacific Northwest and Alaska. The schools and colleges of architecture and urban planning, business administration, education, engineering, nursing, pharmacy, public affairs, and social work have a long tradition of educating students for service to the region and the nation. These schools and colleges make indispensable contributions to the state and, with the rest of the University, share a long tradition of educating undergraduate and graduate students toward achieving an excellence that well serves the state, the region, and the nation.

*BR, February 1981; revised February 1998; December 2001*

## Non-discrimination Policy

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran. This policy applies to all programs and facilities including, but not limited to, admissions, educational programs, employment, and patient and hospital services. Any discriminatory action can be a cause for disciplinary action. Discrimination is prohibited by Presidential Executive Order 11246 as amended; Washington State Gubernatorial Executive Orders 89-01 and 93-07; Titles VI and VII of the Civil Rights Act of 1964; Washington State Law Against Discrimination RCW 49.60; Title IX of the Education Amendments of 1972; State of Washington Gender Equity in Higher Education Act of 1989; Sections 503 and 504 of the Rehabilitation Act of 1973; Americans with Disabilities Act of 1990; Age Discrimination in Employment Act of 1967 as amended; Age Discrimination Act of 1975; Vietnam Era Veterans' Readjustment Act of 1972 as amended; other federal and state statutes, regulations; and University policy. Coordination of the compliance efforts of the University of Washington with respect to all of these laws and regulations is under the direction of the Assistant Provost for Equal Opportunity, Dr. Helen Remick, University of Washington, Equal Opportunity Office, Box 354560, 4045 Brooklyn Avenue Northeast, Seattle, WA 98195, 206-685-3263/V or 543-6452/TTY.

Additional information concerning the equal opportunity and affirmative action policies and procedures, including complaint procedures, is in the Operations Manual, D46.1, D46.2, D46.3, and D46.4, and the UW Handbook, Vol. IV, p. 44.

Information on reasonable accommodation for students with disabilities is available from the following offices: for classroom and academic-related accommodation, call Disabled Student Services, 206-543-8924/V, 206-543-8925/TTY, or email at [uwdss@u.washington.edu](mailto:uwdss@u.washington.edu); for other non-academic related information and accommodation, call Disability Services Office, 206-543-6450/V, 206-543-6452/TTY, or email at [access@u.washington.edu](mailto:access@u.washington.edu).

## Accreditation

The University of Washington is accredited by the Northwest Association of Schools and Colleges and is a member of the Association of American Universities. Individual schools and colleges are members of the various accrediting association in their respective fields. Currently enrolled or prospective students should contact the Office of the Registrar to review accreditation documents for the University and the respective departments to review programmatic accreditation documents.

## Contact Information:

1. *On the Internet/Email:* Search our website, or, to get connected and stay informed throughout the application process, sign up for HuskyPass — <https://admit.washington.edu/HuskyPass>.

Email and other contact information are available at <http://admit.washington.edu/Contact>.

2. *By Telephone:* To speak with office staff or to schedule an appointment, call 206-543-9686 during office hours (below).

3. *In Person:* Building address: 1410 NE Campus Parkway

The Office of Admissions is located in 320 Schmitz Hall, one block west of campus. If you wish to meet with an admissions counselor, please call ahead to make an appointment: 206-543-9686.

Schmitz Hall is bounded by 41st St. NE, 15th Ave. NE, Campus Parkway NE, and University Way NE (The Ave). <http://admit.washington.edu/Visit/Directions>

Wheelchair access is on NE 41st.

### Office Hours:

- Monday – Friday, 8:00 am – 5 pm Pacific Time (except state holidays)
  - Monday – Friday, 10:30 am – 5 pm Pacific Time (except state holidays) **during the application season** (~December through March)
4. *Postal Mail:*  
University of Washington  
Office of Admissions  
1410 NE Campus Parkway  
Box 355852  
Seattle WA 98195-5852

## Freshman Applicants

### Definition of Freshman Status

Apply as a freshman if any of the following statements describe you.

- You plan to enter the UW right after graduating from high school.
- You are in Washington State's Running Start Program and you plan to enter the UW right after graduating (regardless of how many college credits you have earned or will earn).
- You have never attended college since leaving high school (regardless of your age or whether you ever graduated).

### Admission Policy

#### Selecting the Freshman Class

The University of Washington seeks students who can benefit from its wealth of academic and cultural opportunities and contribute to its amazing energy and rich diversity of experience. Choosing students from a very able group of applicants requires a selection process that looks beyond grades and standardized

tests. While these factors are important, they tell only part of an applicant's story. The University uses an individualized application review more typically found at smaller, private universities and colleges. In addition to grade-point average (GPA) and test scores, the University takes into account many aspects of an applicant's achievements and personal history.

### Academic Preparation and Performance

While the UW looks at many factors in reviewing applications for admission, academic preparation and performance are still primary. Indicators of preparation and performance include:

- An overall strong level of academic achievement as demonstrated by GPA, rigor of curriculum, standardized test scores, and academic distinctions
- Taking advantage of college-preparatory courses during high school, such as Advanced Placement (AP), International Baccalaureate (IB), Running Start, or college in the high school; or core subjects beyond the minimum required for college entrance
- Taking full academic advantage of the senior year
- Demonstrating a positive grade trend
- Demonstrating habits associated with independent intellectual growth such as self-guided reading, engagement with other cultures, or research activities
- Demonstrating exceptional artistic talent and achievement

### Personal Achievements and Characteristics

In addition to academic preparation and performance, personal achievements and characteristics can also indicate promise to benefit from and contribute to the University of Washington. These include:

- Demonstrating a commitment to community service and leadership
- Exercising significant responsibility in a family, community, employment, or through activities
- Attaining a college-preparatory education in the face of significant personal adversity, economic disadvantage, or disability
- Demonstrating cultural awareness or unique perspectives or experiences
- Demonstrating notable tenacity, insight, originality, or creativity

The entire application, including the essays and short narrative of activities, is important in the individualized application review. Because the University receives about 20,000 freshman applications every year, this process takes time to complete. Some admission decisions are made as early as December, while others are made as late as the end of March. The University takes great care in assessing applications and does not rush the selection of future students. While this process requires patience on the part of many applicants, the benefit is that each applicant is reviewed as an individual.

### Minimum Requirements

To be eligible for full admission consideration, applicants must present the following:

1. Submit official admission test scores from either SAT or ACT
2. Complete a college-preparatory high school program to *minimally* include the following subjects:

| Core Subject Requirements        | Years Required |
|----------------------------------|----------------|
| ENGLISH                          | 4 years        |
| MATHEMATICS                      | 3 years        |
| SOCIAL SCIENCE                   | 3 years        |
| FOREIGN LANGUAGE                 | 2 years        |
| SCIENCE                          | 2 years        |
| FINE, VISUAL, OR PERFORMING ARTS | 0.5 years      |
| ACADEMIC ELECTIVES               | 0.5 years      |

Because these are admission requirements, all core subjects must be satisfactorily completed before the first quarter of enrollment at the UW. Almost all applicants will have satisfied these requirements through high school course work, which is generally defined as that completed in grades 9-12. There are, however, several ways to satisfy core requirements at the college level. In general, five quarter credits (or three semester credits) at the college level equals one year of high-school study. If you completed a portion of the core requirements in high school, you can supplement high school courses with college course work. For example:

|                    |   |
|--------------------|---|
| High School:       | 3 years of English  |
| Community college: | a 5-credit English composition or literature course is equivalent to one high-school year |
| Total:             | 4 year requirement satisfied  |

### Grading Restrictions

In general, you must attain at minimum a passing grade (including 'D') to satisfy a core subject requirement. Also acceptable is a grade of 'Pass' in a course taken on a 'Pass/Not Pass' basis. However, if you are completing core subjects through college course work you are strongly encouraged to choose a letter or numerical grade, because you may later want to apply core courses towards requirements for your major or University or college graduation requirements, for which grading restrictions pertain.

Applicants using a college course to satisfy the mathematics requirement: specific restrictions on grading apply. See the Mathematics section.

### English Composition/Literature

#### 1. IF TAKEN IN HIGH SCHOOL

Four years of study are required, at least three of which must be in college-preparatory composition or literature.

- One of the four years may be satisfied by courses in drama as literature, public speaking, debate, journalistic writing, business English, or English as a Second Language (ESL).
- Courses that are generally not acceptable include those identified as remedial or applied (e.g., acting, basic English skills, developmental reading, library, newspaper staff, remedial English, review English, vocabulary, yearbook/annual).

#### 2. IF SATISFIED BY COLLEGE COURSE WORK

College course work must be at the 100 level or higher. For the composition/literature component, generally any course with an English or Writing prefix is acceptable.

- One of the four years may be satisfied by a college course in speech, drama as literature, journalistic writing, business English, ESL, or engineering/technical writing.

- Courses such as developmental or speed reading, vocabulary, or remedial English are not acceptable.
- English courses are considered equivalent to ESL unless taken in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.

### 3. APPLICANTS WHOSE FIRST LANGUAGE IS NOT ENGLISH

Although the four-year English core requirement cannot be waived, there are some alternatives for meeting the English subject requirement for U.S. citizens, permanent residents or refugees

- whose first language is not English or,
- who attended school in a non-English speaking country.

English-speaking countries are defined as Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.

#### ALTERNATIVE ONE

To fulfill the English core subject requirement under this alternative, both A and B must be satisfied.

##### A: Test Score Requirement

Submit one of the following official test scores by the application closing date:

- SAT Critical Reading 430
- ACT English 17

A test score from the Test of English as a Foreign Language (TOEFL) or the Michigan Language Test (MLT) cannot be used to meet this requirement.

##### B: Coursework Requirement

A total of four years of study are required.

- Composition or literature courses in the student's first language may satisfy up to three years of the requirement.
- English composition or literature courses taken in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S. may satisfy up to four years of the requirement.
- These courses may satisfy no more than one year of the requirement:
  - English, if taken outside of Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.
  - ESL taken in the U.S.
  - Courses in drama as literature, public speaking, debate, journalistic writing, or business English that were completed in Australia, Canada, Ireland, New Zealand, the United Kingdom, or the U.S.

#### ALTERNATIVE TWO

This alternative is applicable only to students with a significant amount of transfer credit.

All three of the following must be satisfied:

- A minimum of 60 transferable quarter credits from a regionally accredited college or university in the U.S. or from an accredited college or university in Australia, Canada, Ireland, New Zealand, or the United Kingdom must be completed at the time of application. Transcripts showing 60 completed credits must be submitted by the application closing date.
- A minimum of two college-level English composition courses, for a minimum of six credits, taken at a regionally accredited college or university in the U.S., or from an accredited college

or university in Australia, Canada, Ireland, New Zealand, or the United Kingdom. All college-level English composition and literature courses must be completed with a minimum cumulative grade-point average (GPA) of 3.00 (B).

- Two additional units of English, which may be satisfied by high school or college courses.
  - The high school years must be in composition or literature courses, in English or the student's first (native) language.
  - The college courses must be in college-level composition and literature \*in English\*. A unit is five credits on a quarter system or three credits on a semester system.

## **Mathematics**

### 1. IF COMPLETED IN HIGH SCHOOL

Three years of study are required, at least at the level of algebra, geometry, and second-year algebra.

- An algebra course completed in the last year of junior high school may partially satisfy the requirement if the second-year algebra is completed in secondary school.
- Arithmetic, pre-algebra, business math, and statistics will not count toward the requirement.

### 2. IF SATISFIED BY COLLEGE COURSE WORK

If your high school preparation in mathematics was insufficient, you must complete one of the courses listed below:

- A course in intermediate algebra - At UW Extension, as well as at many community colleges in Washington, MATH 098 is the necessary course. The course must be completed with a grade of 'C' (2.0) or better, even though it does not transfer to the UW as college credit and the grade earned in the course is not used in computing the transfer GPA.
- MATH 104 (Trigonometry) or its equivalent - The course must be completed with a grade of 'C' (2.0) or better.
- MATH 107 (Mathematics: A Practical Art) or its equivalent - The course must be completed with a grade of 'C' (2.0) or better.
- Mathematics courses with intermediate algebra as a prerequisite (except statistics courses) - This includes any higher-level math courses such as elementary functions, calculus, and beyond.

## **Social Science**

### 1. IF COMPLETED IN HIGH SCHOOL

Three years of study are required in history or in any of the social sciences, e.g., anthropology, contemporary world problems, economics, geography, government, political science, psychology, sociology.

Credit for religion courses, consumer economics, student government, or community service will not count towards the requirement.

### 2. IF SATISFIED BY COLLEGE COURSE WORK

Courses in the social sciences-e.g., anthropology, economics, ethnic studies, history, philosophy, political science, psychology, sociology-will count toward the requirement.

## **Foreign Language**

### 1. IF COMPLETED IN HIGH SCHOOL

Two years of study are required. The two years must be completed in the same language.

Note: The foreign language requirement will be considered satisfied for applicants who complete their education through the seventh grade in school(s)

1. where English was not the language of instruction and
2. in countries other than Australia, Canada, Ireland, New Zealand, the UK, and the U.S.

International applicants who entered the U.S. education system prior to the 8th grade must satisfy the foreign language requirement.

Any natural language that has been formally studied may be used to satisfy this requirement, including American Sign Language (ASL, the language of the deaf community), and languages no longer spoken, such as Latin and ancient Greek. However, neither computer 'languages' nor forms of deaf signing aside from ASL are acceptable.

A foreign language course taken in the eighth grade may satisfy one year of the requirement if the second-year course is completed in high school.

### 2. IF SATISFIED BY COLLEGE COURSE WORK

For purposes of admission, each quarter of language in college is considered equivalent to one year in high school. Applicants who have never studied a foreign language will need to complete ten quarter credits of a single foreign language. However, an applicant who studied French for one year in high school needs to complete only the second quarter (e.g., FREN 102) or the second semester of a first-year language sequence. Of course, you may prefer to begin with 101 to refresh your memory.

## **Science**

### 1. IF COMPLETED IN HIGH SCHOOL

Two years of science are required. Applicants must complete one full year- both semesters in the same field-of the basic principles of biology, chemistry, or physics, with a laboratory experience. The second year of science may be completed in any course that satisfies your high school's graduation requirement in science.

Two years of agricultural science are equivalent to one year of science.

### 2. IF SATISFIED BY COLLEGE COURSE WORK

College science courses with a lab will count toward the laboratory science portion of the requirement. Any course in astronomy, atmospheric science, biological structure, biology, botany, chemistry, environmental science (but not environmental studies), genetics, geology, oceanography, physical anthropology, physical geography, physics, or zoology will count toward the second-year requirement, as will introductory courses in biological or physical science.

## **Fine, Visual, or Performing Arts**

### 1. IF COMPLETED IN HIGH SCHOOL

One-half year or one trimester of study is required in the fine, visual, or performing arts, to be chosen from art appreciation, band, ceramics, choir, dance, dramatic performance and production, drawing, fiber arts, graphic arts, metal design, music appreciation, music theory, orchestra, painting, photography, print making, or sculpture.

Courses that do NOT satisfy this requirement include architecture, color guard, creative writing, drafting, drill team, fashion

design, foreign languages, interior design, sewing, speech, web design or graphics, woodworking, and yearbook.

## 2. IF SATISFIED BY COLLEGE COURSE WORK

Two quarter credits (or 2 semester credits) chosen from any of the following subjects will satisfy the requirement:

- Art, art history, cinema/filmmaking, dance, music, or photography;
- Any course in drama except drama as literature courses.
- Courses in architecture are generally not accepted, except for those in architectural history.

### **Academic Electives**

#### 1. IF COMPLETED IN HIGH SCHOOL

Academic electives are courses in any of the six core subject areas — English, Mathematics, Social Science, Foreign Language, Science, and the Arts — beyond the minimum number of years specified. An additional half-year of study is required.

#### 2. IF SATISFIED BY COLLEGE COURSE WORK

Three quarter credits (2 semester credits), chosen from any of the six subject areas, satisfy this requirement.

### **High School Students Enrolled in Dual-Credit Programs**

The *Running Start Program* allows academically qualified 11th- and 12th-graders the opportunity to enroll in certain Washington colleges for college credit. College in the High School, which may go under names such as dual enrollment or dual credit, allows high school students to take college courses at their local high school and receive college credit. Some well-known dual enrollment programs include Seattle's Matteo Ricci College and Hawaii's Running Start program.

### **ADMISSION**

Dual-enrollment applicants are evaluated for admission on the basis of both quantitative (including high school and college grades and admission test scores) and qualitative factors. Dual-enrollment applicants must submit test scores and must satisfy the UW core subject requirements outlined above.

### **APPLICATION PROCEDURES**

- If you are applying for summer or autumn quarter after you graduate from high school, use the freshman application and apply by the freshman application deadline, January 15, regardless of the number of college credits you have taken or will have taken.
- December 1 is the priority date for scholarship consideration and the deadline to apply to the Honors Program.
- If you are starting college after you leave high school, contact Admissions for counseling. You may be a freshman or transfer applicant.

### **Recommendations for Academic Planning**

We encourage dual-enrollment applicants—particularly those with a significant number of college credits—to begin their academic planning as early as possible to ensure that they make the most of their college credit. The Transfer Admission & Planning booklet will be helpful in this regard, especially the academic planning section.

- Keep in mind that you have established a college record. Grades you earn now could affect admission to the University and to your intended major.
- If you anticipate entering the UW with 90 or more transferable credits, please know that you will be expected to declare a major at the end of your first quarter at the UW or request an extension from your adviser.

Two online tools will help you look ahead toward UW requirements—for your intended major and for graduation—while still completing course work at the college you are now attending:

- For transferable courses at Washington State community colleges and transfer credit policies, get to know the Equivalency Guide.
- Consult the Academic Planning Worksheets, to help you prepare for your intended major and UW graduation requirements.

### **TRANSFER CREDIT POLICY**

The UW will grant full transfer credit for Running Start courses if they are college level and recorded on a college transcript. All UW restrictions on transfer credit apply.

### **SCHOLARSHIPS**

You may be considered for freshman scholarships as long as you do not enroll in another degree-seeking program after leaving high school and before enrolling at the UW. Keep in mind the December 1 priority date for freshman admission.

## **Transfer Applicants**

### **Admission Policy**

#### **Selecting the Transfer Class**

The University seeks students who will enhance the intellectual and cultural vitality of the university community. Choosing students from an able group of applicants requires a selection process that looks beyond grades.

### **MINIMUM REQUIREMENTS**

Transfer applicants must meet the following minimum standards to be assured their application will receive a comprehensive review:

1. Completion of the core subject requirements (see Freshman Admission)
2. Transfer GPA of 2.50 or better
3. Submission of scores on the SAT or ACT unless the applicant has earned at least 40 reasonably distributed transferable quarter-credits after high school graduation

### **COMPREHENSIVE REVIEW**

The Comprehensive Review is a holistic assessment of an applicant's academic performance and personal qualities and achievements. The comprehensive review includes the following assessment areas:

- Level of academic achievement including cumulative transfer GPA based on all transferable college-level courses attempted; rigor of curriculum; and consistency in course completion
- Well-defined academic goals
- Preparation for intended major

- Plan for timely completion of a bachelor's degree
- Completion of foreign language through the 103-level, or equivalent, when applying to Arts and Sciences or Social Work
- Evidence of a need to enroll at the UW and the availability of the applicant's intended academic program at other Washington public educational institutions
- Academic or artistic awards and achievements, community service, work experience, or research that demonstrates success or potential contributions to the University and community
- Improved grades after an extended absence from college or evidence of a new maturity in approaching college work
- Cultural awareness
- Perseverance in attaining higher education in spite of personal adversity, disability, or economic disadvantage
- Admission test scores, if provided

### Enrollment Goals and Priorities

The University is committed to the following transfer goals and priorities to benefit students from Washington's community and technical colleges.

- The University of Washington Seattle will commit 30% of the spaces available annually for new undergraduates to qualified Washington community college transfer students.
- Among community college transfer students, the highest admission priority will be given to those with academic associate degrees and those with 90 transferable credits taken in preparation for a professional academic major. Applicants with fewer than 90 credits may also be admitted when early transfer is advisable, but the number of such transfers will remain small.
- The University accepts applicants who have completed fewer than 40 quarter credits (slightly less than one year of college) at the time of application. However, admission for these applicants is competitive and, due to enrollment pressures, priority is low.

## International Applicants

An applicant's academic performance, generally measured by grades, is a major factor in the admissions decision. We do not consider applicants with grades below a C average. Although there is no specific grade point requirement for admission to the UW, to be competitive, applicants should rank in the top fifteen percent of students successfully completing secondary school in your country. Transfer and postbaccalaureate applicants should present university or college records of high quality, at least a B average or better is recommended to be competitive.

- Students educated in the British system, in which grades are based on comprehensive national exams, must submit the official O-level, HKCEE, or GCSE Certificate by the application deadline of January 15. Students receiving official exam certificates in the spring of 2008 will not be eligible for admission consideration until the next year.
- Students who are completing an advanced level exam certificate (GCE A-levels, Abitur, IB Diploma, HKALE, STMP, etc) may be given admission priority over candidates who meet only minimum qualifications. Students submitting official advanced level exam certificates may also receive college-level credit upon admission to the University.
- For transfer applicants who have completed less than one year of college-level course work by the January 15 application deadline, the Office of Admissions will give the strongest weight to your high school records. To be competitive,

however, you will also need to show a strong academic performance in the college courses completed by the application deadline. Admission priority will be given to transfer students who have completed more than one year of college-level course work by the application deadline.

- If you have completed more than one year of college-level course work, the Office of Admissions will primarily consider grades in college-level courses from all accredited colleges and universities attended. All transfer applicants are still required to submit official secondary school transcripts, to verify that all core subject requirements have been completed.
- International transfer students attending WA state community colleges are encouraged to submit winter quarter grades. Although this is not a requirement, the information may help in the review of your application.
- For postbaccalaureate applicants, the Office of Admissions uses all grades earned at accredited institutions prior to the completion of the first bachelor's degree. Grades from community college course work, graduate study, or any course work taken after the first bachelor's degree are not included when the Office of Admissions calculates the GPA for admission consideration.

### ENGLISH PROFICIENCY FOR ADMISSION

All applicants must submit English proficiency exam scores that meet the University's minimum requirement to be considered for admission to the UW.

All international students are required to submit English proficiency scores that meet the University's minimum requirement for admission consideration (see table below). Previous ESL or English composition courses, even when taken in the United States, will not satisfy this requirement. Students enrolled in a U.S. or Canadian high school or college are still required to submit official exam scores to fulfill the English proficiency requirement.

- *Exception.* Non-U.S. citizens whose primary and secondary education took place in Australia, Canada, Great Britain, Ireland, New Zealand, or the U.S. are exempt from this requirement. Students who were born in any of these countries but educated elsewhere, however, will be required to satisfy the English proficiency requirement.
- *Official scores.* All exam scores must be sent directly from the testing agency. UW-administered MLT scores will be reported directly to the Office of Admissions. Always use your legal name when you take the exam and report any name discrepancies to the UW. Only the exams listed in the table below may be used to satisfy this requirement.
- Plan ahead to take the English proficiency exam. Test dates and locations are limited, so be sure to register for a test date early. Spaces fill quickly so do not wait to take an exam. Late test scores will not be accepted. December is the last month to take an exam before the January 15 application deadline.
- Applicants who have not met the minimum English proficiency requirement by the application deadline or have not taken one of the English proficiency exams will not be considered for admission.

## TEST SCORE REQUIREMENTS

| Test Title  | Minimum Requirements for Admission to UW Seattle | Minimum for Admission WITHOUT further AEP Requirement |
|---|--|---|
| TOEFL Internet-based                                  | 57* Reading, Writing, & Listening sections only  | 70* Reading, Writing, & Listening sections only       |
| TOEFL computer-based                                  | 207  | 237   |
| TOEFL paper-based                                     | 240  | 580   |
| UW Administered Michigan Language Test (MLT)          | 82   | 90  |
| International English Language Testing System (IELTS) | 6  | 7   |

\*For the internet-based TOEFL only, the minimum scores required are based on the combined total of the Reading, Listening, and Writing sections. We will not include the Speaking portion of the test in our admission review at this time.

### ACADEMIC ENGLISH PROGRAM (AEP) FOR UW ENROLLMENT AND GRADUATION

Students who meet the minimum English proficiency requirement for admission consideration but have scores lower than those listed in Column 3 of the table above will be required to enroll in the Academic English Program (AEP). Such students will be required to complete a sequence of one to five remedial courses beginning with their first quarter at the UW. The AEP requirement will be removed if, before registering for classes at the UW, students submit higher scores that exempt them.

A diagnostic exam is available to determine the appropriate level at which to start AEP course work within the five-course sequence. Students who choose not to take the diagnostic exam will automatically begin with the first course in the sequence. An extra fee is charged for each AEP course in addition to regular tuition. At least one AEP course will be required each quarter until all mandatory AEP classes are satisfactorily completed. Students required to take AEP must register first for AEP to be eligible to register for their other classes.

#### SAT I and ACT (optional)

The SAT and the ACT exams are not required for international students. As further evidence of your academic performance, however, we strongly encourage you to submit scores if you have taken either exam, especially if you are from a native English speaking country.

## Postbaccalaureate Applicants

### Admission Policy

Postbaccalaureate is a highly competitive status, reserved for students who are working toward a second bachelor's degree or preparing for entrance to graduate or professional school. Only a small number of applicants are admitted every quarter as postbaccalaureates because the University's primary commitment is to undergraduates who are completing the first bachelor's degree. The primary factors in the admission decision are the Statement of Purpose, the applicant's academic record from the first bachelor's degree and any relevant postbaccalaureate course work.

### Statement of Purpose

Applicants are expected to answer the following questions in their statements:

- Why are you pursuing further studies? How did you reach the decision to go into your particular field? What are your long term academic and professional goals? Be as specific as possible.
- If you are preparing to enter a second undergraduate, graduate, or professional program (such as medical, dental, or law school), what courses do you intend to take? If, on the other hand, you are ready to begin work in your major immediately, you do not need to list all of the courses comprising the major.
- For how many academic quarters do you plan to enroll? Why is it necessary for you to enroll at the UW? Do other four-year universities or community colleges offer what you need at this time? Can you meet your goal as a non-matriculated student, attending classes through UW Educational Outreach? (If you are planning to take specific courses in preparation for a graduate or professional program, be aware that access to courses in a particular quarter is not guaranteed.)
- If you are seeking admission to an undergraduate program with selective admission criteria: are you assured departmental admission? Your statement will be strengthened by a letter of support from the department. Applicants preparing for graduate school must meet with an adviser in the department for an assessment of their chances for future admission. It is your responsibility to contact directly the program(s) you are interested in well before applying for admission to the University. Please be aware that postbaccalaureate applicants who are not accepted to their major of choice will not be admitted to the University.
- If you feel your undergraduate GPA is low: why might it be an unreliable indicator of your academic potential? Those students with postbaccalaureate course work on record, be it from a community college, four-year school, or graduate program, may use this opportunity to point out subsequent high performance if it is relevant to their academic plans at the UW.

Statements of Purpose are reviewed by the Postbaccalaureate Review Committee. Decisions are made on a rolling basis: the earlier an applicant's file is complete, the earlier the file will be reviewed. Applicants will be notified in writing of the final decision after evaluation of transcripts and the Statement of Purpose.

# Transfer Credit Policy

## General Policy

To students pursuing a first bachelor's degree, the Office of Admissions awards transfer credit according to the guidelines discussed here. Admissions reserves the right to accept or reject credits earned at other institutions of higher education. In general, it is University policy to accept credits earned at institutions fully accredited by their regional accrediting association for colleges and universities, provided that such credits have been earned through university-level courses appropriate to the student's degree program at the University of Washington (UW). Exceptions are noted below.

## State Policy on Inter-college Transfer and Articulation

The UW subscribes to the statewide Policy on Inter-College Transfer and Articulation Among Washington Public Colleges and Universities, endorsed by the public colleges and universities of Washington as well as by the State Board for Community and Technical College Education, and adopted by the Higher Education Coordinating Board. The policy deals with the rights and responsibilities of students, and the review and appeal process in transfer-credit disputes.

## Class Standing

A student's class standing is determined by the total number of transfer credits awarded by the UW, not by the number of years of college study or by the completion of an associate degree.

|           |                  |
|-----------|------------------|
| Freshman  | 0 – 44 credits   |
| Sophomore | 45 – 89 credits  |
| Junior    | 90 – 134 credits |
| Senior    | 135+ credits     |

Satisfying UW graduation requirements depends not only on the number of credits completed – a minimum of 180 for most programs – but also on completing all College and major requirements.

## Quarter vs. Semester Credits

Colleges and universities that operate on a semester system award semester credit. The UW awards quarter credit. To convert quarter credits to semester credits, multiply by two-thirds. To convert semester to quarter credits, multiply by 1.5. For example, a student who has earned 30 credits at an institution on a semester calendar would earn 45 quarter credits at the UW.

## Applying Transfer Credit to Degree Requirements

Before a student first registers for classes at the University of Washington, s/he should meet with an academic adviser to plan a program of study. The adviser determines how the transfer credits shown on the transfer-credit evaluation may be used to meet UW degree requirements. For example, suppose that Admissions awards a student 120 transfer credits, but only 100 of those credits can be applied toward graduation requirements for that student's degree program. If selective credits are needed, credits that do not apply toward specific requirements may still be applied toward the minimum number of total credits required for graduation.

## Alternative Credit Options

The UW does not award general credit for work or life experience. However, two avenues exist for obtaining credit under selected circumstances.

Once enrolled at the UW, students may explore the possibility of obtaining departmental approval for transfer of credit earned through course work taken at institutions that do not have regional accreditation. For information concerning course work taken at non-regionally accredited institutions, contact the Office of Admissions.

Students may arrange to challenge specific UW courses via credit by examination if the same knowledge has been gained through independent study outside a formal educational setting. For credit by examination for independent study completed outside a formal educational setting, contact the Graduation and Academic Records Office at 206.543.1803 or [ugradoff@u.washington.edu](mailto:ugradoff@u.washington.edu)

## Transfer Credit Limit

The University allows a maximum of 90 credits of lower-division transfer course work to be applied toward a UW degree. Of the 180 credits required for graduation from the University (some majors require more than 180), a maximum of 90 lower-division transfer credits are allowed. Once you are enrolled at the UW, if your lower-division credit total exceeds 90, there will be a difference between the "total credits earned" and the "total credits allowed" under the Summary of Transfer Credit following the Detail of Transfer Credit.

Additionally, a maximum of 135 total transfer credits are allowed toward the 180 credit total. The University-wide residence requirement states that 45 of the last 60 credits must be taken "in residence" while enrolled as a matriculated student. Therefore, a student transferring 135 or more credits must complete a minimum of 45 more credits in residence at the UW.

Despite these restrictions, all of your transferable credit are listed under the Detail of Transfer Credit and may, with your adviser's approval, be used to satisfy individual requirements for graduation. It may be helpful to think of your transfer credits as a "bank account" of credits from which you may draw. All of your transferable credits remain in the bank, but no more than 90 lower division credits and no more than 135 total transfer credits may be "withdrawn" in order to be applied toward the 180 (or more) credits required for your degree.

## Extension Credit from Other Schools

Extension credit, including correspondence courses, earned at other schools may not exceed 45 credits. Military credit is included in this 45-credit limit.

## Foreign Language Courses

Students who have completed two or more years of a high-school foreign language receive no college credit for an entry-level course (e.g., FRENCH 101) in the same language when that course is completed after matriculation at the University. Transfer students who complete such a course before matriculation at the UW are eligible to receive transfer credit.

## Military Credit

Credits earned in Armed Forces Training Schools (AFTS) and through USAFI and DANTES may not exceed 30 credits and are included in the 45-credit limit for extension credit. Official transcripts, DD-214, or DD-295 forms must be submitted, and credit will not be awarded until after the student has enrolled at the University. Scores received in such course work are not included in the transfer GPA. No credit is awarded for Military Occupational Specialty (MOS) programs.

## Native Language

First-year (elementary) or second-year (intermediate) foreign-language credit is not granted either by examination or by course completion in a student's native language. "Native language" is defined as the language spoken in the student's home during the first six years of his or her life and in which he or she received instruction through the seventh grade.

## Out-of-Sequence Courses

Credit is not awarded for prerequisite courses in mathematics or foreign languages completed after a more advanced course has been completed. For example, students will not be awarded credit for Spanish 102 if taken after Spanish 103.

## Overlapping Content

If a department considers two of its courses to have overlapping content, credit will be awarded for only one. For example, credit is granted for either PHYS 114 or PHYS 121. Other departments in which such overlapping courses occur include Astronomy, Computer Science, Economics, Genetics, Geological Sciences, Linguistics, Psychology, and Statistics. Restrictions of this kind are noted in the course catalog.

## Physical Education

No more than three quarter credits will be allowed for physical-education activity courses.

## Restricted Transfer Credit

Transfer credit will not generally be awarded for vocational or technical courses. However, a maximum of 15 quarter credits will be awarded in transfer for college-level vocational-technical courses when they have been allowed as electives within the 90 credits comprising an academic associate degree from a Washington community college. Courses in this category are those that ordinarily provide specialized training for an occupation (e.g., allied health, bookkeeping, electronics, or physical therapy assistant). When allowed, these credits will apply only toward the elective credit component of a baccalaureate degree at the UW. Such courses are not included in the transfer GPA.

## ROTC Credit

Prior to autumn quarter 2007, credits earned in first- and second-year military training courses may not be counted in the basic 180 credits that are required for graduation. Some third- and fourth-year courses may count, depending on the institution the student attended previously.

## Senior Residency Requirement

To be recommended for a first or subsequent baccalaureate degree, a student must complete 45 of his or her final 60 credits as a matriculated student in residence at the University of Washington campus where the degree is to be earned.

## Appeal Procedure

If not all courses transfer as the student had anticipated, and it is not evident to the academic adviser is unable to answer questions about an individual student's transfer credit award, the student should first consult with an admissions specialist in the Office of Admissions. If appropriate, further appeal can be directed to the UW Transfer Officer in the Admissions Office.

## The Transfer Associate Degree Agreement

Several of the schools and colleges (see below) at the University of Washington have entered into the Transfer Associate Degree Agreement with the Intercollege Relations Commission of the state of Washington to aid in transfer from two-year schools to the University.

Transfer students who enroll in one of these schools or colleges with an academic transfer (not vocational-technical) associate's degree from a Washington community college may receive the following benefit:

Transferable courses used by the community college toward the general education requirement in the associate degree awarded will be accepted toward Areas of Knowledge at UW in the equivalent Area (humanities/VLPA; social sciences/I&S; natural sciences/NW), *even if they do not count that way for other students.*

Please note the following:

- The agreement does not apply to students who entered the UW before Autumn 1985.
- To qualify for the agreement, students must complete all the coursework required for the associate's degree before matriculating at the UW.
- Courses counted toward the UW's Language Skills (English composition and foreign language) requirement cannot also be counted toward Areas of Knowledge. In particular, students in the College of Arts and Sciences and the School of Social Work will have to count first-year foreign language courses toward the foreign language requirement rather than Areas of Knowledge. (Students with associate's degrees who first entered college before Autumn 1985 are exempt from the earlier version of the Language Skills requirement.)
- Students must meet the additional writing requirement (unless they started college before Autumn 1985). Many AA degrees require 10 credits of English composition, 5 of which can be counted toward the additional writing requirement (see <http://www.washington.edu/uaa/gateway/advising/degreeplanning/writreqs.php>) if similar to UW courses. Note that many community colleges count creative writing and verse writing as English composition, but the UW does not allow those courses toward either the English composition or additional writing requirement. (They do count toward VLPA at the UW — even if the community college did not allow them to count toward the humanities requirement of the Associate's degree.)
- Most community colleges do not require a 20-20-20 general education plan; the number of credits required in each area may be a combination such as 15-15-15, or 20-20-15, etc. Students must eventually complete the entire Areas of Knowledge plan required by the UW school or college in question.
- Students who do not meet the Areas of Knowledge requirement entirely with courses taken before transfer must select UW courses with the appropriate Area designations to complete the requirement.

The following UW schools and colleges honor the Transfer Associate Degree Agreement: College of Architecture & Urban Planning, College of Arts & Sciences, School of Business, School of Medicine, School of Nursing, School of Ocean and Fishery Sciences (Oceanography only), and School of Social Work.

# Advanced Placement Program (College Board)

## AP Credit Policies

Although AP scores range from 1 to 5, all departments at the UW require a minimum score of 3 or 4 to earn credit. In some cases, you must consult a departmental adviser for evaluation after entering the University.

| AP Subject | Score | Credit/Placement Awarded and Additional Information |
|------------|-------|---|
|------------|-------|---|

|                     |     |  |
|---------------------|-----|--|
| Art: History of Art | 4,5 | ART H 100 (5 or 10 cr., respectively). Art history elective credit. See Art adviser for placement. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. |
|---------------------|-----|--|

|                 |   |                                  |
|-----------------|---|----------------------------------|
| Art: Studio Art | - | Placement only. See Art adviser. |
|-----------------|---|----------------------------------|

|         |     |  |
|---------|-----|--|
| Biology | 4,5 | BIOL 161-162 (10 cr.) First two quarters of general biology. Counts toward Natural World general education requirement |
|---------|-----|--|

|             |   |  |
|-------------|---|--|
| Calculus AB | 5 | MATH 124,125 (10 cr.) First two quarters of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement. |
|-------------|---|--|

|             |     |  |
|-------------|-----|--|
| Calculus AB | 3,4 | MATH 124 (5 cr.) First quarter of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement. |
|-------------|-----|--|

|             |   |   |
|-------------|---|---|
| Calculus AB | 2 | Placement only into MATH 124. Placement into first quarter of calculus. |
|-------------|---|---|

|             |     |  |
|-------------|-----|--|
| Calculus BC | 4,5 | MATH 124,125 (10 cr.) First two quarters of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement. |
|-------------|-----|--|

|             |   |  |
|-------------|---|--|
| Calculus BC | 3 | MATH 124 (5 cr.) First quarter of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement. |
|-------------|---|--|

|             |   |   |
|-------------|---|---|
| Calculus BC | 2 | (Subgrade 3,4,5) MATH 124 (5 cr.) First quarter of calculus. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement. |
|-------------|---|---|

|           |   |  |
|-----------|---|--|
| Chemistry | 5 | CHEM 142, 152, 162 (5, 5, 5) General chemistry for science and engineering majors. Counts toward Natural World general education requirement for graduation. CHEM 142 also satisfies Quantitative and Symbolic Reasoning graduation requirement. |
|-----------|---|--|

|           |   |  |
|-----------|---|--|
| Chemistry | 4 | CHEM 142, 152 (5, 5) General chemistry for science and engineering majors. Counts toward Natural World general education requirement for graduation. CHEM 142 also satisfies Quantitative and Symbolic Reasoning graduation requirement. Note: Students with AP scores of 4 or 5 who plan to major in chemistry or biochemistry are strongly encouraged to discuss the option of enrolling in the honors introductory chemistry sequence, Chem 145-165, with the undergraduate advisers in the Chemistry department. |
|-----------|---|--|

|                  |       |   |
|------------------|-------|---|
| Chinese Language | 3,4,5 | CHIN 133, 231, 232 (5,10,15 cr., respectively) Courses are parallel to CHIN 103, 201, 202; cannot earn credit for both sequences. Credit for 133, 231, 232 does not imply placement into specific CHIN courses. |
|------------------|-------|---|

|                    |     |  |
|--------------------|-----|--|
| Computer Science A | 4,5 | CSE 142 (4 cr.) Computer programming for science/ engineering students. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement. |
|--------------------|-----|--|

|                     |   |  |
|---------------------|---|--|
| Computer Science AB | 5 | CSE 142, 143 (4, 5 cr.) Computer programming for engineering and science students. Counts toward Natural World general education requirements for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement. |
|---------------------|---|--|

|                       |             |   |                                      |       |  |
|-----------------------|-------------|---|--------------------------------------|-------|--|
| Computer Science AB   | 3,4         | CSE 142 (4 cr.) Computer programming for engineering and science students. Counts toward Natural World general education requirements for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.                                  | German Language                      | 3,4,5 | Also satisfies foreign language graduation requirement of the College of Arts and Sciences.<br>GERMAN 201,202,203 (5,10,15 cr., respectively) Intermediate German. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences. |
| Economics: Micro      | 4,5         | ECON 200 (5 cr.) Introduction to Microeconomics. Counts toward Individuals & Societies general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.   | Government and Politics: American    | 4,5   | POL S 202 (5 cr.) American politics. Counts toward Individuals & Societies general education requirement for graduation.   |
| Economics: Macro      | 4,5         | ECON 201 (5 cr.) Introduction to Macroeconomics. Counts toward Individuals & Societies general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.   | Government and Politics: Comparative | 4,5   | POL S 204 (5 cr.) Comparative politics. Counts toward Individuals & Societies general education requirement for graduation.  |
| English (either exam) | 4,5         | ENGL 109 (5 cr.) AP English. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.  | Human Geography                      | 3,4,5 | GEOG 100 (5 cr.) Introduction to geography. Counts toward Individuals and Societies general education requirement for graduation.  |
| English (both exams)  | 4,5 on both | ENGLISH 109 (10 cr.) AP English. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.  | Japanese Language                    | 3,4,5 | JAPAN 133, 231, 232 (5,10,15 cr., respectively) Courses are parallel to JAPAN 113, 211, 212; cannot earn credit for both sequences. Credit for 133, 231, 232 does not imply placement into specific JAPAN courses.   |
| Environmental Science | 3,4,5       | ESRM 100 (5 cr.) Introduction to environmental science. Counts toward Natural World general education requirement for graduation.   | Latin Literature                     | 4,5   | LATIN 305,306 (10 cr.) Latin literature courses. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.   |
| European History      | 4,5         | HIST 113 (5 cr.) Western Civilization history survey (modern). Counts toward Individuals & Societies general education requirement for graduation.  | Latin Literature                     | 3     | LATIN 103 (5 cr.) Third quarter of elementary Latin. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.   |
| French Language       | 3,4,5       | FRENCH 201,202,203 (5,10,15 cr., respectively) Intermediate French. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences. | Latin: Vergil                        | 4,5   | LATIN 305,307 (10 cr.) Latin literature courses. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.   |
| French Literature     | 3,4,5       | FRENCH 298 (5,10,15 cr., respectively) Does not imply a particular placement. French credit at the second-year college level. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.                                   | Latin: Vergil                        | 3     | LATIN 103 (5 cr.) Third quarter of elementary Latin. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.   |

|                                    |       |  |
|------------------------------------|-------|--|
| Latin Literature and Latin: Vergil | 4,5   | LATIN 305,306,307 (15 cr.) Latin literature courses. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.                                   |
| Latin Literature and Latin: Vergil | 3     | LATIN 103 (5 cr.) Third quarter of elementary Latin. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.   |
| Music Theory                       | -     | None Awarded. See Music adviser for placement.   |
| Physics B                          | 4,5   | PHYS 114/117, 115/118, 116/119 (15 cr.) First-year general physics sequence. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.  |
| Physics C: Mechanics               | 4,5   | PHYS 121 (5 cr.) First quarter of engineering physics sequence. Also satisfies Quantitative and Symbolic Reasoning graduation  |
| Physics C: Electricity & Magnetism | 4,5   | PHYS 122 (5 cr.) Second quarter of engineering physics sequence. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.  |
| Psychology                         | 4,5   | PSYCH 101 (5 cr.) Introductory psychology. Counts toward Individuals & Societies general education   |
| Spanish Language                   | 3,4,5 | SPAN 201,202,203 (5,10,15 cr., respectively). Intermediate Spanish. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences.                    |
| Spanish Literature                 | 3,4,5 | SPAN 298 (5,10,15 cr., respectively). Spanish credit at the second-year college level. Counts toward Visual, Literary, and Performing Arts general education requirement for graduation. Also satisfies foreign language graduation requirement of the College of Arts and Sciences. |
| Statistics                         | 3,4,5 | STAT 311 (5 cr.) Statistical Methods. Counts toward Natural World general education requirement for graduation. Also satisfies Quantitative and Symbolic Reasoning graduation requirement.   |

|               |     |  |
|---------------|-----|--|
| U.S. History  | 4,5 | HSTAA 101 (5 cr.) American history survey. Counts toward Individuals & Societies general education requirement for graduation. |
| World History | 4,5 | HIST 100 (5 cr.) AP World History. Counts toward Individuals & Societies general education requirement for graduation.         |

## International Baccalaureate Program

### Policy Overview

In most cases, five quarter credits (or more) are granted for Higher Level subjects in which a grade of 5 or higher is earned. Students who earn an IB diploma may be awarded up to 45 quarter credits for a combination of subject grades and 15 general education credits distributed equally among the three Areas of Knowledge (general education) areas: Visual, Literary, and Performing Arts (VLPA), Individuals and Societies (I&S), and The Natural World (NW). No credit is awarded for Standard Level subject grades. Consult the Higher Level Subjects table for detailed information about credit awards in particular disciplines.

### IB Credit Policies

| IB Subject                | Score | Course(s) and Credits Counts Toward/Comments   |
|---------------------------|-------|--|
| African History           | 7,6,5 | HIST 108 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.   |
| American History          | 7,6,5 | HSTAA 101 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.  |
| Anthropology              | 7,6,5 | ANTH 202 (5 cr.) Counts toward Individuals & Societies general education requirement for graduation.   |
| Arabic                    | 7     | ARAB 108 (15 cr.) Satisfies foreign language requirement, and credits count toward general education requirement for graduation. See department for placement. |
| Arabic                    | 6     | ARAB 108 (10 cr.)  |
| Arabic                    | 5     | ARAB 108 (5 cr.)   |
| Art/Design                | 7,6,5 | Policy to be determined.   |
| Biology                   | 7,6,5 | BIOL 161-162 (10 cr.) Counts toward Natural World general education requirement for graduation.  |
| Business and Organization | 7,6,5 | No credit  |

| Russian    | 6     | RUSS 301, 302 (10 cr.)   | Theater Arts | 7,6,5 | DRAMA 101, 201 (10 cr.) Counts toward Visual, Literary, and Performing Arts general education requirement for graduation.                  |

## Registration Policies

### Full-time Requirements

You should register for 12 or more credits to be considered full-time if you are an undergraduate or professional student. If you are a graduate student, you should register for 10 or more credits. It is important to note that differing criteria and standards for full-time enrollment exist for eligibility in certain programs. Consult the Financial Aid Office for its requirements on satisfactory student progress. The tuition schedule does not reflect full-time credit requirements for loan deferments, teaching assistantships or other programs.

### Class Attendance

If you do not attend regularly scheduled class meetings during the first week of the quarter, you are subject to being dropped at the discretion of the teaching department to allow enrollment space for other students. Affected courses should be identified in the Time Schedule and/or posted in departmental offices. Do not assume that departments will automatically drop you from the course if you do not attend. If you are not going to go to class, you should drop the course through the registration system. Students who are registered for a course section but do not attend will be assigned a failing grade by the instructor. You may not attend a University course in which you have not been officially registered after the first two weeks of the quarter.

An instructor may allow you to attend his or her class only if your name appears on the official class list from Office of the Registrar. A faculty member may attend informally with the approval of the instructor.

### Satisfactory Progress

If you are pursuing a baccalaureate degree, you are expected to make satisfactory progress toward the attainment of that degree and are expected to enter a major and graduate after completion of a reasonable number of credits.

### The 105-Credit Rule

Undergraduates must declare a major by the time they have earned 105 credits or a hold will be placed on their registration until they either declare a major, or meet with an adviser and receive a pre-major extension. The hold is placed on the student record when 105 or more credits have been completed. Transfer students who are admitted to the University with 105 or more credits are expected to declare a major before their second quarter at the UW, or obtain an extension from an adviser.

You will be granted a pre-major extension if your adviser decides that you are pursuing a reasonable goal, and have a good chance of gaining admission to your intended major. The extension will be granted for the number of quarters it should take you to complete the admission requirements of your major.

If your adviser feels that your choice of major is unrealistic, he or she will deny your request for an extension. You will not be allowed to register for subsequent quarters until you can present a reasonable degree plan. Since the intent of the rule is not to drop you from the University but to encourage you to meet with an adviser and plan for an attainable goal, if you need time to consider your options you will usually be given one or two quarters to do so, and then may be allowed additional time if necessary to meet the admission requirements of your new major.

You will receive a warning letter from the University as you approach 105 credits, if you have not yet declared a major. If you complete 105 credits and are still a pre-major, the registration system will not let you register for the next quarter. To avoid registration delays, meet with the appropriate adviser at least one quarter before you complete 105 credits.

### The 210-Credit Rule

The University's satisfactory progress policy requires students to complete their undergraduate degree programs within 30 credits

beyond the minimum required for the degree. Because most degrees require 180 credits, students generally must complete their programs by the time they earn 210 credits. Undergraduates who have completed over 210 credits will be notified by email the third week of the quarter that a hold is being placed on their registration due to lack of satisfactory progress. Students ineligible to graduate will be permitted to register for succeeding quarters only if they receive approval from their department and college after filing a graduation plan. Approval to enroll beyond 210 credits may not extend beyond two additional quarters.

Students receiving satisfactory progress registration holds should immediately contact their departmental academic adviser to file a graduation application or to initiate a satisfactory progress appeal.

### Postbaccalaureate Students

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree, or working toward a certificate. If you are admitted as "postbaccalaureate undeclared," you must declare a major by the time you have earned 30 credits beyond your last degree. Once a degree objective has been declared, you must make progress toward that degree as evidenced by courses satisfactorily completed. College advisers may grant extensions beyond the 30-credit limit.

### Excessive Course Repeats and/or Drops

The Committee on Admissions and Academic Standards may terminate your enrollment if you have demonstrated lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. You may be reinstated with the approval of your college and the Committee. EOP students may be reinstated in consultation with the Office of Minority Affairs.

### Registration Tampering

A student who tampers or attempts to tamper with the registration records of another student, including but not limited to dropping courses and adding courses, may be subject to disciplinary sanctions as defined in the Student Conduct Code (WAC 478-120).

### Registration Abuse

Web Registration is a personal service. The use of robots and other automated tools to submit registration requests is expressly forbidden.

## Grading System

### Standard Grading System

The UW uses a numerical grading system, with certain exceptions in the schools of Dentistry, Law, and Medicine. Instructors may report grades from 4.0 to 0.7 in 0.1 increments and the grade 0.0. The number 0.0 is assigned for failing work or if a student does not officially withdraw. Grades in the range 0.6 to 0.1 may not be assigned. Grades reported in this range are converted by the Office of the Registrar to 0.0. Numerical grades may be considered equivalent to letter grades as follows:

|    |         |
|----|---------|
| A  | 4.0-3.9 |
| A- | 3.8-3.5 |
| B+ | 3.4-3.2 |
| B  | 3.1-2.9 |

|    |         |                                     |
|----|---------|-------------------------------------|
| B- | 2.8-2.5 |                                     |
| C+ | 2.4-2.2 |                                     |
| C  | 2.1-1.9 |                                     |
| C- | 1.8-1.5 |                                     |
| D+ | 1.4-1.2 |                                     |
| D  | 1.1-0.9 |                                     |
| D- | 0.8-0.7 | Lowest passing grade.               |
| E  | 0.0     | Academic failure. No credit earned. |

Additional information on grades and scholarship rules may be obtained from the Graduation and Academic Records Office, 264 Schmitz.

The following letter grades also may be used:

**N** Indicates that the student is making satisfactory progress and a final grade will be given at the end of the quarter the work is completed. Used only for thesis, research, and hyphenated courses (courses not completed in one quarter) and courses numbered 600, 601, 700, 750, and 800. An "N" grade carries with it no credit or grade until a regular grade is assigned.

**I** Incomplete. An Incomplete is given only when the student has been in attendance and has done satisfactory work until within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student's control. A written statement of the reason for the giving of the Incomplete, listing the work which the student will need to do to remove it, must be filed by the instructor with the head of the department or the dean of the college in which the course is given.

To obtain credit for the course, an undergraduate student must convert an Incomplete into a passing grade no later than the last day of the next quarter. For Spring Quarter, the following quarter is considered to be Fall Quarter. *The student should never reregister for the course as a means of removing the Incomplete.* An Incomplete grade not made up by the end of the next quarter is converted to the grade of 0.0 by the Office of the Registrar unless the instructor has indicated, when assigning the Incomplete grade, that a grade other than 0.0 should be recorded if the incomplete work is not completed. The original Incomplete grade is not removed from the permanent record.

An instructor may approve an extension of the Incomplete removal deadline by writing to the Graduation and Academic Records Office no later than the last day of the quarter following the quarter in which the Incomplete grade was assigned. Extensions, which may be granted for up to three additional quarters, must be received by the Office of the Registrar before the Incomplete has been converted into a failing grade.

In no case can an Incomplete received by an undergraduate be converted to a passing grade after a lapse of one year.

In no case shall an Incomplete on the record at the time a degree is granted be subsequently changed to any other grade.

An Incomplete grade does not count for registered hours nor in computation of grade-point averages.

For DL-suffix courses that do not follow the quarter schedule, an Incomplete shall be given only when the student has done satisfactory work to within two weeks of the maximum term for completion of the course, as specified at the time of registration. In order to obtain credit for the course, a student must convert an Incomplete into a passing grade by the end of the quarter following the one in which the Incomplete was given. All other provisions and deadlines of subsections a. through d. shall also apply.

**S** Satisfactory grade for courses taken on a satisfactory/not-satisfactory basis. An S grade is automatically converted from a numerical grade of 2.0 or above for undergraduates. The grade S may not be assigned directly by the instructor, but is a grade conversion by the Office of the Registrar. Courses so graded can only be used as free electives and cannot be used to satisfy a University, college, or department course requirement. S is not computed in GPA calculations.

**NS** Not-satisfactory grade for courses taken on a satisfactory/not-satisfactory basis. A grade less than 2.0 for undergraduates is converted to NS. NS is not included in GPA calculations. No credit is awarded for courses in which an NS grade is received.

**CR** Credit awarded in a course offered on a credit/no-credit basis only or in courses numbered 600, 601, 700, 750, and 800. The minimum performance level required for a CR grade is determined, and the grade is awarded directly, by the instructor. CR is not computed in GPA calculations.

**NC** Credit not awarded in a course offered on a credit/no-credit basis only or in courses numbered 600, 601, 700, 750, and 800. The grade is awarded directly by the instructor and is not included in GPA calculations.

**W** Official withdrawal or drop from a course after the fourteenth calendar day of the quarter through the seventh week, to be followed by a number representing the week in which the course was dropped. An official withdrawal is not computed in GPA calculations. Students who do not officially drop a course(s) will receive a grade of 0.0. For DL-suffix courses that do not follow the quarter schedule, the grade W shall be assigned to any course dropped after the fourteenth calendar day after the start of the course and more than two weeks before the end of the maximum term for completion of the course, as specified at the time of registration. The date of withdrawal shall be noted on the transcript.

**HW** Grade assigned when a student is allowed a hardship withdrawal from a course after the fourteenth calendar day of the quarter. HW grades are not computed in GPA calculations.

## Nontraditional Grading Options

### Credit/No Credit—Only as a Course Option

With appropriate departmental review and approval, a course may be offered on a credit/no credit-only basis. The standard for granting credit in credit/no credit-only courses under this option is the demonstration of competence in the material of the course to the instructor's satisfaction.

### Satisfactory/Not-Satisfactory Grading Option

You may elect to take certain courses on a satisfactory/not satisfactory (S/NS) basis.

When registering through Personal Services on MyUW, select the Grade Option box. The S/NS grade option can be elected through the end of the Late Course Drop Period. A \$20 fee is charged beginning the eighth calendar day of the quarter.

As an undergraduate, a course in which an "S" is earned may not be used to satisfy any department, college, or University requirement, except that the credits may be applied to the minimum of 180 credits required for graduation. Each instructor will report numerical grades to the Registrar, who will convert satisfactory grades (2.0 or greater) to "S", and unsatisfactory grades (less than 2.0) to "NS" for the student's transcript. No more than 25 S/NS credits may apply toward an undergraduate degree.

If you are a graduate student and earn grades of 2.7 or above, you will receive a grade of "S" while 2.6 or below are recorded as NS. With the approval of your graduate program adviser or the Supervisory Committee Chairperson, you may elect to take any course for which you are eligible outside of your major academic unit on an S/NS basis.

In cases of withdrawal, the "W" is recorded. Neither "S" nor "NS" is included in the grade-point average.

### Grade-Point Average (GPA)

The University's cumulative GPA is based solely on courses taken in residence at the UW; this includes some, but not all, courses taken through UW Extension. The UW transcript also reflects grades for UW Extension course work that is not residence credit, and the grades for credit by examination. These latter grades do not affect the University cumulative GPA.

### Computation of GPA

The GPA for graduation is computed by dividing the total cumulative grade points by the total graded credits attempted for courses taken in residence at the University. Grade points are calculated by multiplying the number of credits by the numeric value of the grade for each course. The sum of the grade points is then divided by the total graded credits attempted. Courses elected on an S/NS basis are counted as follows: Satisfactory grades are printed on the permanent record as an S and do not count in the quarterly or cumulative GPA, but they do count as credits earned toward graduation. Not-satisfactory grades, NS, do not count in the quarterly and cumulative GPA and do not count as credits earned toward graduation.

#### EXAMPLE 1

| Course Points                          | Credits | Grade | Grade  |
|--|---------|-------|--------|
| CLAS 205                               | 3       | CR    |        |
| OCEAN 101                              | 5       | 2.7   | = 13.5 |
| HIST 111                               | 5       | 4.0   | = 20.0 |
| SCAND 100                              | 2       | 3.3   | = 6.6  |
| Total credits earned toward graduation | 15      |       |        |
| Total graded credits attempted         | 12      |       | 40.1   |

$$\text{GPA} = 40.1 \div 12 = 3.34$$

The total graded credits attempted, not the credits earned toward graduation, are used in computing the GPA.

#### EXAMPLE 2

| Course Points                          | Credits | Grade | Grade |
|--|---------|-------|-------|
| ENGL 121                               | 5       | 2.3   | 11.5  |
| OCEAN 101                              | 5       | 0.0   | = 0.0 |
| SPHSC 100                              | 3       | 2.7   | = 8.1 |
| ART 121                                | 5       | I     | = 0.0 |
| Total credits earned toward graduation | 8       |       |       |
| Total graded credits attempted         | 13      |       | 19.6  |

$$\text{GPA} = 19.6 \div 13 = 1.51$$

The student attempted 18 credits, but only 13 are graded, because the Incomplete (I) is not computed in the GPA. The 0.0 for OCEAN 101 is computed in the GPA, but no credit is awarded toward graduation.

If the work in ART 121 is not made up by the end of the next quarter, the I is converted to a numeric grade and the GPA is recomputed.

## Repeating Courses

### Undergraduates

With the approval of the academic department offering the course, an undergraduate may repeat a course once. Both the original grade and the second grade are computed in the GPA but credit is allowed only once. Veterans receiving benefits must receive approval from the Office of Special Services before a course is repeated.

### Graduates

Graduate students may repeat any course. Both the original grade and the second grade are computed in the GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once. Veterans receiving benefits must receive approval from the Office of Special Services before a course is repeated.

## Grading Procedures

### Change of Grade

Except in case of error, no instructor may change a grade that he or she has turned in to the Registrar. Grades cannot be changed after a degree has been granted.

## Grade Appeal Procedure

A student who believes he or she has been improperly graded must first discuss the matter with the instructor. If the student is not satisfied with the instructor's explanation, the student, no later than ten days after his or her discussion with the instructor, may submit a written appeal to the chair of the department, or in a nondepartmental college, to the dean, with a copy of the appeal also sent to the instructor. Within ten calendar days, the chair or dean consults with the instructor to ensure that the evaluation of the student's performance has not been arbitrary or capricious. Should the chair believe the instructor's conduct to be arbitrary or capricious and the instructor declines to revise the grade, the chair (or the dean in a nondepartmental school or college), with the approval of the voting members of his or her faculty, shall appoint an appropriate member, or members, of the faculty of that department to evaluate the performance of the student and assign a grade. The dean and Provost should be informed of this action.

Once a student submits a written appeal, this document and all subsequent actions on this appeal are recorded in written form for deposit in a department or college file.

### Grade Reports

Grades are not mailed. You may view and print a grade report through MyUW.

## Procedures and Fees

---

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students follow University regulations and procedures as they are stated in the *General Catalog*. Appeals may be filed with the student's dean or with the Vice Provost for Student Life in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

### Registration

[www.washington.edu/students/reg/regelig.html](http://www.washington.edu/students/reg/regelig.html)

Instructions for registration are available on MyUW ([myuw.washington.edu](http://myuw.washington.edu)) in the Student Personal Services menu by selecting Registration. Notification is emailed to each student quarterly with information about registration for the next quarter.

#### **Registration Period I**

[www.washington.edu/students/reg/addpolicy.html](http://www.washington.edu/students/reg/addpolicy.html)

Designed to accommodate currently registered matriculated students and students eligible to register under the Quarter Off Eligibility Policy, Registration Period I occurs during the latter half of the quarter preceding the quarter for which the student is registering. However, currently enrolled students registering for autumn quarter do so in spring quarter.

#### **Registration Period II**

Registration occurs after Registration Period I closes and is intended primarily to accommodate new and returning students. Continuing students who fail to register during Registration Period I may register during this period. Students who have not completed their initial registration by the end of this period (update and selection of address information, insurance/optional charges, and ASUW membership) are charged a Late Registration Fee.

#### **Registration Period III**

All students may register or make course changes during this period. Dropped courses do not appear on the transcript. Students are charged a Change of Registration service fee for registration changes made after Period III. One fee is charged for all changes occurring during the same day. A tuition forfeiture is charged for total credit reductions after Period III if applicable. See Fee Forfeiture section.

#### **Late Add Period**

All students may register or make registration changes during this period. All added courses require an entry code or faculty number. A Change of Registration service fee is charged.

#### **Unrestricted Drop Period**

[www.washington.edu/students/reg/wdpolicy.html](http://www.washington.edu/students/reg/wdpolicy.html)

Courses dropped during this period will not appear on the transcript. A Change of Registration fee is charged.

#### **Late Course Drop Period (Annual Drop)**

Students may drop one course each academic year (autumn through summer quarters) after the fourteenth calendar day of the quarter through the seventh week of the quarter. A course drop will be recorded on the transcript with a W followed by the number of the week of the drop (W3-W7). A Change of Registration service fee is charged.

### Credits Required for Full- or Half-Time Status Requirements

[www.washington.edu/students/reg/regpol.html](http://www.washington.edu/students/reg/regpol.html)

Some agencies require that a student have full-time status to receive maximum benefits. To be classified as a full-time student by the University, a professional student must register for and complete at least 12 credits per quarter and a graduate student must register for and complete at least 10 credits per quarter. To be classified as a half-time student by the University, a profes-

sional student must register for at least 6 credits per quarter and a graduate student must enroll for at least 5 credits per quarter.

### Restrictions on Attending Classes

[www.washington.edu/students/reg/regpol.html](http://www.washington.edu/students/reg/regpol.html)

No person, other than a faculty member attending informally with the approval of the instructor, may attend a University course in which that person has not been registered.

An instructor may allow a student to attend his or her class only if the student's name is on the official class list from the Office of the Registrar. An unregistered student may attend through the fourteenth calendar day of the quarter if the student is on an official wait list for the course.

### Adding Courses/Permission Guidelines

[www.washington.edu/students/reg/regopt.html](http://www.washington.edu/students/reg/regopt.html)

For reasons of public safety and instructional quality, it is important to limit course enrollment to the approved classroom capacity. The Office of the Registrar monitors course enrollment and accepts student registration in fully enrolled courses according to the following guidelines:

1. Through the second week of the quarter, departments may choose to overload courses up to 115% of the room capacity to offset anticipated student course drops and withdrawals as demonstrated by past registration activity.

Students must secure entry codes from instructors or departments to add closed courses. However, if enrollment is at 115% of room capacity, registration requests are denied. Students should be informed when receiving entry codes to overload courses that registration is not guaranteed if enrollment exceeds 115% of room capacity.

If centralized room-capacity records do not correctly reflect the actual seating capacity, notification should be made to the Room Assignments/Time Schedule Office in the Office of the Registrar.

2. Students may add courses during the Late Add Period or through the twenty-first calendar day of the quarter. Adds after the seventh calendar day of the quarter require an entry code or faculty number. Departments may also add students to departmental courses during this period through departmental registration screens. To add courses after this period, students must submit a faculty-approved Late Add Petition form to the Registration Office.
3. A course may not be changed to or from an audit registration after the first two weeks of the quarter. See below for transcript entry.

### Dropping a Course

[www.washington.edu/students/reg/wdpolicy.html](http://www.washington.edu/students/reg/wdpolicy.html)

Students dropping a course during the first two weeks of a quarter shall have no entry on their permanent academic transcript. If all courses are dropped, then a complete withdrawal date is recorded on the transcript.

A course drop made during the third through the seventh weeks of the quarter is recorded on a student's transcript with a W grade and a number designating the week of the quarter in which the course drop was transacted. Only one drop after the fourteenth day of a quarter is permitted each academic year (autumn through summer quarter).

A student who does not officially drop a course through the registration system or the offering department is given a grade of 0.0.

Students receiving or applying for financial aid should check with the Office of Student Financial Aid, 105 Schmitz, 206-543-6101, before dropping a class because it may affect their eligibility.

Students receiving veterans' benefits should contact the Office of Special Services, 460 Schmitz, when dropping courses.

### Complete Withdrawal from the University for a Registered Quarter

[www.washington.edu/students/reg/wdoffleave.html](http://www.washington.edu/students/reg/wdoffleave.html)

Once registered, a student must officially withdraw if he or she later chooses not to attend the University for the registered quarter. Official withdrawal must be made by the fifth day of the quarter for the student to avoid further financial obligation (see Tuition, Fees, and Special Charges for refund information on withdrawals).

1. To withdraw from a quarter, students may complete a Withdrawal Card and submit it in person to the Registration Office, 225 Schmitz, or write to the Registration Office, Box 355850, Seattle, WA 98195-5850. Withdrawal forms are available at advising offices and the Registration Office. An official withdrawal is effective the day it is received in the Registration Office, or if submitted by mail, the date of the postmark.
2. Students who drop the last course on their schedules will be considered withdrawn for the quarter. Students who drop courses beginning the eighth calendar day of the quarter are charged a Change of Registration service fee per day for any course drops.
3. Submission of a graduate On-Leave application does not constitute official withdrawal from the University.
4. Refer to the grading section in the Graduate School: Graduate Study section.
5. Students receiving veterans' benefits should immediately notify the Office of Special Services of withdrawal.
6. Students with a scholarship or loan awarded through the University should notify Student Fiscal Services.
7. Students who withdraw due to conscription into the armed forces or who are called to active duty military service may be entitled to either a full refund of tuition and fees or academic credit, depending on when in the quarter official withdrawal occurs. Students should contact the Registration Office for complete information.

## Additional Information

### Address Change

[www.washington.edu/students/reg/address.html](http://www.washington.edu/students/reg/address.html)

Students are responsible for notifying the Office of the Registrar when their address changes. Individual addresses may be viewed and updated through MyUW. (Select Change of Address under the Student Personal Services menu.) A confirmation message will be sent to the student's email address. *The mailing of notices to the last address on record constitutes official notification.*

## Residence Classification Requirements

[www.washington.edu/students/reg/residency.html](http://www.washington.edu/students/reg/residency.html)

Residence classification information is available from the Graduation and Academic Records Office, 264 Schmitz.

## Student Identification Cards

[www.washington.edu/students/reg/id.html](http://www.washington.edu/students/reg/id.html)

All new students should go to the Husky Account and ID Card Center, Ground Floor, Odegaard Library, to be issued a permanent student identification card. Photo identification (such as a driver's license, state ID card, or passport) is required to obtain a student ID card. Returning students who have not retained a previous ID card should obtain a new one. A quarterly validation sticker is mailed with the registration confirmation to each registered student. The student ID card with attached validation sticker is used for a variety of campus services. It is the student's means of identifying his or her status as a student at the University.

Registered students whose ID cards have been lost or stolen can have them replaced at the Student ID Card Center. Students who request such replacement are charged a nonrefundable fee. Replacement of cards made invalid by changes in a student's name or rendered unusable by normal wear and tear is provided without charge upon return of the original card to the Husky Account and ID Card Center. Two pieces of identification (one with a photo) are required to obtain a replacement card.

Cards that have been tampered with or misused may be confiscated by the University agency or department involved, and the incident may be referred to the Office of the Vice Provost for Student Life for appropriate University action.

## Transcripts

[www.washington.edu/students/reg/transcripts.html](http://www.washington.edu/students/reg/transcripts.html)

Official copies of student academic records at the UW must bear the official seal of the University, the signature of the Registrar, and the date of issue.

### *Transcript Fee*

A charge of \$4, paid to the Transcript Office in advance, is required for each transcript.

### *Transcripts from Other Schools*

A transcript covering a student's previous secondary and college education that has been submitted to the University as a requirement for admission becomes part of the official file and is not returned to the student. Any student who desires transcripts of his or her course work undertaken elsewhere must order official transcripts from the institution. The University does not issue or certify copies of transcripts from other institutions.

### **Veterans and Children of Totally Disabled Veterans and Personnel in the Armed Forces**

Information on educational benefits and tuition reduction programs for veterans and their dependents is available from the Office of Business Services and Veterans' Affairs, 520 Schmitz.

Veterans and members of the armed forces who apply for admission to the University are subject to the same minimum requirements as regular students and are expected to enroll in accordance with University requirements.

The University's academic programs of study are approved by the Washington State Higher Education Coordinating Board's State Approving Agency (HECB/SAA) for enrollment of persons eligible to receive educational benefits under Title 38 and Title 10 USC.

---

# Tuition, Fees, and Special Charges

---

## Estimated Expenses

The cost of a student's education at the University varies, the amount depending on his or her classification, status as resident or nonresident, and field of study. In computing college costs, a student should consider such additional expenses as insurance coverage, books, and laboratory supplies. Personal expenses (e.g., clothing, laundry, recreation, and transportation), which vary with each individual, as well as between-quarter expenses, should not be overlooked.

## Definitions

**Lives Away from Home** — All single undergraduate students without dependents (spouse or children) who are living away from parents' home; undergraduate married students without children, whose spouses are also students.

**Non-Traditional** — Undergraduates who have children; married students whose spouses are not also enrolled students.

**Tuition and Fees** — Figures presented here are for full-time enrollment, i.e., 10-18 credits per quarter; *however, for purposes of financial aid eligibility, full-time is defined as 12 or more credits.*

Tuition is due quarterly by Friday of the third week of the quarter.

The following figures are prepared and updated each year by the Office of Student Financial Aid and reflect modest, but adequate, probable costs for students attending the University during the

nine-month academic year. They should be used only as a guide in determining the year's expenses.

**Room and Board** — The Office of Student Financial Aid uses a figure of \$8,640 in determining students' financial need. This figure includes food, utilities, and housing. It is higher than the figure of \$7,488 charged by Housing & Food Services (for double-room occupancy and preferred dining allowance) because it includes the cost of meals not covered in the campus dining plan.

For students living on campus, room and board is paid quarterly. The first payment, approximately \$2,200, is due on September 1 for autumn quarter, except for financial aid recipients, who pay after aid is dispersed.

### **New Undergraduates — New Student Enrollment and Orientation Fee**

As a new undergraduate, you must return the *Enrollment Confirmation Form* and the \$250 nonrefundable New Student Enrollment and Orientation Fee (NSEOF) to confirm your intention to enroll at the University of Washington.

If you have applied for financial aid and you and your family cannot afford the \$250 NSEOF, you may apply for a fee deferral. Write to the Office of Admissions; include your name, Student Number, phone number, and reason for the deferral. Send your letter, along with the *Enrollment Confirmation Form*. Any deferral will be conditional on the verification of your financial aid status.

**Returning Undergraduates, Graduates and Professional Students — \$100 Enrollment Confirmation Deposit**

Returning undergraduates, new graduate students, and new students in a professional program are required to confirm his or her intention to enroll by paying a nonrefundable \$100 Enrollment Confirmation Deposit (not required of students admitted summer quarter). The \$100 is applied toward tuition and fees assessed for the quarter for which the student is determined to be admissible and subsequently enrolls. A student who pays the fee for a give quarter but does not register in that quarter is not entitled to a refund except by petition in the situation listed below.

1. A new or returning matriculated student who is unable to obtain courses required for the completion of the degree or certificate program, or courses which are determined by an appropriate academic adviser to be acceptable alternate courses. A written verification from the appropriate academic adviser must be attached to this petition. Such requests for refund must be submitted by Friday of the second week of the quarter. A new or returning matriculated student who, after meeting with an appropriate academic adviser, determines that the program for which admission was granted differs substantially from what the student was led to expect based upon earlier available information. This petition for refund must be submitted before the student registers for courses and in no case later than the first day of the quarter for which admission has been granted. A written verification from the appropriate academic adviser must be included.
2. A new or returning student who applies by the prescribed deadline for financial aid administered by the University's Office of Student Financial Aid, and who cannot be awarded financial aid adequate to his or her needs as determined by that office, and who is therefore unable to attend the University. This petition and a copy of the Notice of Award and Acceptance must be submitted no later than two weeks after receipt of notice of the financial aid award.
3. A new or returning student who is unable to attend the University because of pregnancy, disability, or death, or because of being called involuntarily into the military service of the United States or into civil duty. Documentation is required.

**Fee Payment**

[www.washington.edu/students/sfs/sao/ttnrates.html](http://www.washington.edu/students/sfs/sao/ttnrates.html)

An obligation to pay tuition and fees in U.S. dollars is incurred when a student registers. A fee statement is mailed to the student's address on file with the Office of the Registrar.

Payment of this obligation is due by Friday of the third week of the quarter. Nonpayment of tuition and fees by the due date results in a charge of \$120 for late payment. For balances under \$150, the late fee is \$50. There is no late fee for balances under \$50. One-half of tuition is assessed when registration is canceled for nonpayment of tuition and fees. The *Student Guide* should be consulted for fees and fee payment schedule applicable to summer quarter only.

When the payment is not in conformance with the tuition and fee billing, specific instructions on how the payment is to be applied must accompany the payment. In the absence of instructions, the University makes a reasoned interpretation of the student's intent and accounts for the funds accordingly. The student number must be specified on all payments.

Fees listed above do not apply to students registered through UW Extension. See the UW Extension Bulletin for their fee structure.

**Special Course and Laboratory Fees**

The amounts listed above cover normal University charges for course registration. Some courses, however, have extraordinary expenses associated with them, and in such cases the University may charge additional fees in amounts that approximate the added instructional or laboratory costs.

**Other Fees**

*Auditors:* There is no reduction in fees for auditors.

*Admission Application Fees:* Graduate, \$45(online); Medicine, Dentistry, \$35; Law, \$50. Former students returning in the same classification, \$38.

*On-Leave Registration Fee:* This fee of \$35, charged to graduate students only, provides for a maximum on-leave period of four successive academic quarters or any part thereof and is not refundable.

*Late Registration/Reregistration Fees:* A late registration service charge of \$25 is assessed when a student registers after the last scheduled day of Period II registration and through the fourteenth day of the quarter. Students registering after the fourteenth day pay a \$75 Late Registration Fee. Waiver or refund of the Late Registration Fee may be petitioned in the Registration Office. Waiver or refund of the \$75 reregistration fee may be petitioned in the Student Fiscal Services Office.

*Change of Registration Service Fee:* A charge of \$20 is made for any number of add, drop, or change transactions processed during a given day beginning the eighth calendar day of the quarter.

*Transcript Fees:* A charge of \$4, paid to the Transcript Office in advance, is required for each transcript.

*Thesis and Dissertation Fees:* Publication binding fee, \$25; dissertation microfilming fee, \$60\*; Microfilming for either the entire dissertation, or the abstract only; \$35 Optional copyright fee (*Not available to those microfilming only the abstract.*)

\* Part of the obligation of research is publication. In the case of doctoral research, this means microfilm publication of the dissertation and/or abstract. This is a Graduate School requirement in addition to any previous or planned publication of any or all the dissertation. Microfilming allows worldwide distribution of your work. More information about microfilming is provided in the Step 4 section of the Graduate School manual.

| Personal  | \$2,265                      | \$2,265                     | \$2,265          | \$2,265              | \$2,265             |
| Transportation                                      | \$396                        | \$1,524                     | \$396            | \$1,524              | \$1,524             |
| TOTALS  | \$6,573                      | \$7,872                     | \$12,336         | \$17,298             | \$17,469            |

*Replacement Fees:* Duplicate diploma, \$20; student identification card, \$10.

*U-PASS Fee:* A U-PASS validation sticker is mailed quarterly with a student's registration confirmation. The U-PASS is valid on all Metro and Community Transit routes at all times and provides parking privileges to carpoolers, riding privileges to vanpool and Night Ride passengers, and merchant discounts. The quarterly fee of \$41 (subject to change) is included on the tuition bill. Students who do not wish to participate in the U-PASS program must return the validation sticker to the University by the tuition payment deadline. The sticker can be returned by mail in the return envelope provided, mailed with the tuition payment, or returned in person to Student Fiscal Services.

All fees are subject to change without notice.

### **Cancellation of Tuition**

Registered students must pay full tuition and fees. Tuition may be canceled or reduced if a student makes an official withdrawal or drops a course during the period specified by state statute. Refunds are given when a cancellation or reduction results in an overpayment.

#### ***Continuing Students***

1. A student who withdraws on or before the seventh calendar day of the quarter does not pay tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition.
3. A student who withdraws after the thirtieth calendar day must pay full tuition.

#### ***New and Returning Students***

1. A student who withdraws on or before the seventh calendar day forfeits the \$250 New Student Enrollment and Orientation fee or the \$100 Enrollment Confirmation Deposit but does not pay the regular tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition. The \$100 Enrollment Confirmation Deposit is applied toward payment of tuition.
3. A student who withdraws after the thirtieth calendar day of the quarter must pay full tuition. The \$100 Enrollment Confirmation Deposit is applied toward payment of tuition.

#### ***Fee Forfeiture***

A student who does not completely withdraw but drops one or more courses may be eligible for lower tuition, depending on the total number of credits remaining after the course drop and on the time period when the drop was made. Tuition for students making a course drop on or before the seventh calendar day of the quarter is determined by the total credits remaining. Tuition for students making a course drop after the seventh calendar day through the thirtieth calendar day of the quarter is computed on the total credits remaining plus one-half the difference between the old tuition and the new tuition. There is no cancellation or reduction in tuition for courses dropped after the thirtieth calendar day of the quarter.

#### ***Fee Refund***

When a fee payment is made by check, a waiting period is required before a refund can be authorized. An application for refund may be refused, unless it is made during the quarter in which the fees apply. A student who withdraws for disciplinary reasons forfeits all rights to refund or cancellation of any portion of his or her fees.

### ***Financial Obligations***

The Comptroller is authorized to place a hold (administrative) on the records of any student who fails to pay amounts due the University.

Until this hold is cleared, the University (1) does not release the student's record or any information based upon the record, (2) does not prepare transcripts or certified statements, and (3) denies registration.

In cases of serious financial delinquency, the Comptroller, with the consent of the Associate Registrar, may order that a student's registration be canceled and that privileges of attendance be withdrawn.

An administrative hold or cancellation also may occur when a student has not complied with other University rules, procedures, or obligations. The hold may be placed on the student's record by the authorized University office responsible for enforcement of the rule, procedure, or obligation involved. The student is not permitted to register for any subsequent quarter or to obtain a transcript of his or her record or a certified statement except on the written release of the office that placed the hold.

### **Tuition Exemptions and Reductions**

[www.washington.edu/students/reg/tuition\\_exempt.html](http://www.washington.edu/students/reg/tuition_exempt.html)

#### ***Faculty/Staff, Washington State Employee, and Washington National Guard Member Tuition Exemption Programs***

Eligible faculty, staff, state employees, and Washington National Guard members admitted to the University may request an exemption for a maximum of 6 credits each quarter under these tuition exemption programs. Applicable tuition will be charged for credits that exceed the 6-credit limit. Because such students are registered on a space-available basis, they must register after other students. The quarterly *Time Schedule* lists registration dates when students enrolling under these exemption programs may register. Eligibility information may be obtained from either the Staff Training and Development Office, or the Registration Office.

#### ***"Access" Program for Older Adults***

[www.washington.edu/students/reg/access.html](http://www.washington.edu/students/reg/access.html)

The UW allows Washington residents who are 60 years of age or older to audit certain courses on a space-available basis. Students who attend the University under the Access Program are limited to two courses per quarter. There is a nominal registration fee. As auditors, students do not receive credit, participate in discussions, complete laboratory work, or take examinations.

#### ***Tuition Reductions***

The following categories of students may be eligible for reduced tuition and fees. Students in these categories may contact the offices shown for information or to obtain an application. The reductions are established by legislative mandate and may be revoked by the legislature at any time.

# Student Life and Student Services

---

## Freshman Convocation

Freshman Convocation is an academic ceremony involving the President of the University, other administrators, student leaders, and members of the Board of Regents and the faculty, to welcome and honor new freshmen and their families. It is held annually on the Sunday preceding the first day of autumn quarter. The President presides over the ceremony, which features remarks by a distinguished member of the faculty. Neither tickets nor reservations are required for the Convocation. Formal invitations are mailed in mid-August. A no-host brunch, which requires tickets, is held in the Student Union Building (HUB) and precedes the Convocation.

## Student Health Insurance Program

An accident and sickness insurance plan is available to matriculated University students (Seattle campus) and dependents on a voluntary basis. A student may enroll in the plan at the time of registration through the seventh calendar day of each quarter. The appropriate premium is paid by the quarterly tuition due date. Brochures describing the insurance eligibility, coverage, and costs are available at the Office of Business Services and Veterans' Affairs, 520 Schmitz, (206) 543-6122; Hall Health Primary Care Center; and the HUB.

The University also sponsors a field-trip accident insurance plan. Application forms may be requested from the Risk Management Office, 22 Gerberding, Box 351276, (206) 543-3419.

## Insurance for Foreign Students

All students from foreign countries are required to have a health-and-accident insurance policy in force while registered at the University. This may be achieved by purchasing either the student accident and sickness insurance offered through the University or other coverage, proof of which must be furnished to the International Services Office and for which an insurance waiver must be obtained. To avoid cancellation of registration, international students must pay tuition and either pay for the University-sponsored insurance or have a waiver on file by the tuition due date.

## International Services Office

The International Services Office provides assistance to international students, scholars, and faculty in meeting United States Immigration and Naturalization Service regulations dealing with such matters as maintaining lawful status, extensions of stay, transfers of schools/programs, and working authorizations. The office also provides a formal orientation to the campus and community for new international students and visiting faculty; advice and counsel for educational, financial, and personal problems; and dissemination of important and timely information through newsletters and workshops. The office is located in 459 Schmitz, (206) 543-0841.

## Office of Business Services and Veterans' Affairs

The Office of Business Services and Veterans' Affairs, 520 Schmitz, assists students eligible for veterans' educational benefits.

## Office of Student Financial Aid

The Office of Student Financial Aid, 105 Schmitz, administers federal, state, and private financial aid programs designed to help

students pay for their education. Assistance is offered in the form of grant aid, scholarships, long-term loans that must be repaid after leaving school, and work opportunities. Information describing the different programs, eligibility criteria, and application procedures may be viewed at [www.washington.edu/students/osfa](http://www.washington.edu/students/osfa) or may be obtained by calling (206) 685-9535.

To be eligible for financial aid, an individual must be a citizen or permanent resident of the United States and be admitted to the University as a matriculated, degree-seeking student. Priority consideration is given to students who apply before the University's financial aid application deadline of February 28 (e.g., February 28, 2008, for the academic year beginning in September 2008).

The Office of Student Financial Aid also administers a short-term loan program for full-time students who find themselves in temporary financial difficulty. University students may take advantage of the short-term loan program without applying for financial aid.

## Student Legal Services

Student Legal Services (SLS) provides legal advice, counseling, negotiating, and court representation in many civil and criminal matters. All currently enrolled undergraduate and graduate students at UW Seattle are eligible for a free initial consultation. If additional services are needed, there is an hourly charge of \$15, plus a \$10 office supply fee. Students are responsible for court costs, if any. The office is staffed by third-year law students supervised by licensed attorneys.

## Student Publications

*The Daily* is published Monday-Friday throughout the academic year and is distributed in the mornings on campus without charge. During summer quarter, *The Daily* is published once a week. Any student with an interest in journalism may serve on *The Daily* staff.

## Student Union Facilities

The Husky Union Building (Student Union Building) and the South Campus Center are the principal centers of student activities and programs on the campus.

### Husky Union Building

The Husky Union Building (HUB), located in the center of campus, houses a variety of facilities and services for students, and faculty and staff members. These include lounges, a 478-seat auditorium, a multipurpose ballroom, a barber and hair-styling shop, a branch of the University Book Store, several retail food operations, a study/music lounge with email access, a lost-and-found office, a ticket sales office, a newsstand, a self-service post office, a limited-service bank, three cash machines, a number of student-organization offices, and a games area which includes a twelve-lane bowling center. Meeting rooms accommodating from 10 to 175 persons are available for registered student organizations.

### South Campus Center

The South Campus Center, located on the shore of Portage Bay, serves as the central meeting place for students and faculty on

the southern end of campus. Facilities and services similar to those in the HUB are available and include meeting and conference rooms, display cases, a hair-styling shop, amusement games, a cash machine, a branch of the University Book Store, a newsstand, and lounges with beautiful views of Portage Bay.

## **Student Activities and Organizations**

### **Student Activities Office**

The services provided by the Student Activities Office (SAO) include assisting student organizations in understanding University policies and procedures, providing technical help in the planning and conduct of student events, and furnishing information and assistance in order that they may represent themselves and their interests in an effective manner. Advisers are available to assist students involved in group activities with budget and program planning, advertising, orientation to campus resources, and leadership and organizational skill development. Underlying the SAO service functions is a desire to provide an environment in which students can learn from their experiences in extracurricular activities as a supplement to their classroom experiences. Additional information about the services is available from the Student Activities Office, 207 HUB, (206) 543-2380.

### **Student Organizations**

Students at the University are encouraged to become active in at least one of the campus's approximately 450 voluntary student organizations, which include honorary, professional, and social organizations; service clubs; activity groups; and religious and fraternal organizations. Voluntary student organizations that register with the University receive various benefits and services to assist their respective activities. Additional information is available from the Student Activities Office, 207 HUB, (206) 543-2380.

### **Associated Students of the University of Washington**

The Associated Students of the University of Washington (ASUW) is a voluntary, nonprofit association of students designated by the University Board of Regents to carry out a variety of student activities and to represent student interests. In order to vote in ASUW elections, hold ASUW office, or be employed by the ASUW, a student must be a member of the ASUW. Membership is open to all students by providing an affirmative answer on the University registration form each quarter.

The ASUW's annual budget is supported by the services and activities fee paid as part of tuition and from program revenue. The government of the ASUW is headed by an eleven-member board of directors elected by the student body each year, and one representative from the Graduate and Professional Student Senate. The ASUW maintains agencies and service groups to provide students with a varied program of activities during the school year and nominates students for service on a number of University committees. ASUW services include the Experimental College, a bicycle repair shop, and an ongoing film and entertainment series. Questions regarding the ASUW and its services should be directed to either the ASUW Office, 204L HUB, (206) 543-1780, or the Student Activities Office, 207 HUB, (206) 543-2380.

### **Recreational Sports**

The Department of Recreational Sports Programs provides a comprehensive program of more than seventy sports and fitness

activities designed to meet the diverse needs and interests of students. To provide this service, the department manages recreation facilities that include the Intramural Activities Building (IMA), Golf Driving Range, Waterfront Activities Center (canoe rentals), outdoor facilities (Denny Field and tennis courts), Hutchinson Hall swimming pool and locker rooms, and the practice Climbing Rock. Programs and facilities are open to students with a valid student identification card (Husky card).

For additional information visit the Recreational Sports Web site at [depts.washington.edu/ima/](http://depts.washington.edu/ima/).

## **Student Rights and Responsibilities**

### **Student Conduct Code**

The University Board of Regents has adopted a *Student Conduct Code*, which applies to both the academic and nonacademic conduct of students while they are attending the University. The *Code* specifies standards of conduct, jurisdiction for hearing disciplinary matters, and due-process procedures. Students may obtain copies of the code through either their advisers or the Office of the Vice Provost for Student Life, 476 Schmitz.

### **Computer Use Policy**

All faculty, staff, and students who use any computer at the University are responsible for using computer resources in an ethical and legal manner. For example, it is not appropriate to share computer accounts or use them for commercial purposes, to send unwanted email, or to distribute copyrighted software, music, or images. Those who do not follow the rules could lose their UW computing privileges. For detailed information see the Web, or contact UWTechnology Information at (206) 221-5000.

### **University Policy on Student Education Records**

A copy of the University's policy on a student's right to inspect his or her education records and the University's responsibility to maintain the confidentiality of such records is located at each departmental reference station. The policy is filed under the Washington Administrative Code 478-140-010. Copies of the policy are available at the Registration Office, 225 Schmitz.

### **Sexual Harassment Complaint Procedure**

Students, staff, faculty, and other users of University services who have a concern or complaint regarding sexual harassment may contact either the Ombudsman for Sexual Harassment, (206) 543-6028, or the University Complaint Investigation and Resolution Office, (206) 616-2028. Personnel in these offices provide assistance in resolving concerns and complaints. Also, University staff may contact their human resources representative about sexual harassment concerns.

### **Office of Minority Affairs and Diversity**

Fostering diversity is the ongoing work of the entire University, but it is a special responsibility of the Office of Minority Affairs and Diversity (OMAD). To this end, OMAD provides a variety of services to undergraduates from underrepresented and economically and educationally disadvantaged backgrounds. These services include a statewide **Recruitment and Outreach Office** whose staff provides assistance with the admissions and financial aid process in high schools and community colleges throughout Washington state. Through its **Counseling Center**, OMAD offers academic advising, financial aid advocacy, housing assistance, and other services related to life on campus. OMA's services are available mainly to students

who, following admission, are invited to become members of the Educational Opportunity Program (EOP). Participation in EOP is limited to students who are U.S. citizens or permanent residents, with priority given to Washington state residents. OMAD's other services are open to EOP participants and other students as resources permit.

The Office of the Vice President for Minority Affairs and many of OMAD's services are located on the third floor of Schmitz Hall. For information about OMAD's program locations and services, call (206) 685-0774.

## Residence Halls

Students like the convenience of living in the residence halls (being close to classes and having access to a variety of dining options), but that's just the beginning. Those who live on campus are part of a community that offers opportunities for fun, friendships, personal development and academic success.

### Special Interest Houses

The UW residence halls offer several special interest houses-designated floors in certain halls where residents with common interests live. Residents are encouraged to plan and participate in activities for these houses. If you'd like to live in one of the special interest houses, indicate your preference on your housing application.

#### Special Interest Houses

- **Outdoor House** offers residents the opportunity to plan, participate in and learn outdoor activities such as hiking, biking, skiing, snowshoeing, camping and canoeing. Residents of Outdoor House also share an interest in environmental issues.
- **International House** provides a rewarding environment for those who seek opportunities to share cultural experiences with American and international students, in daily life and through participation in a variety of social and cultural activities.
- **SAFE House** (Substance and Alcohol Free Environment) offers residents the opportunity to live in a residential community where alcohol and tobacco products are not permitted by its members (regardless of a student's age). The community also features programming and activities that are specific to promoting a substance-free lifestyle. Residents work with Resident Advisers and Resident Directors to create a community that exemplifies an awareness of substance and alcohol abuse issues.

In the other residence hall communities, alcohol use is limited to those of legal age (21) and then only within the confines of a resident's room. The use of illegal substances is strictly prohibited in all residence halls. All halls are 100 percent smoke-free.

#### Residential FIG (Freshman Interest Group)

Residential FIG is a specialized program for freshmen which combines academics and life outside class. Students enrolled in a Residential FIG take classes together autumn quarter and live together in the same residence hall for the academic year. New freshmen who have received confirmation for a space in the residence halls are eligible to register. If you are interested in a Residential FIG, visit the FIG website or contact the First Year Programs Office at 206-543-4905.

### First Year Experience

First Year Experience offers an environment specifically designed to provide opportunities to assist first-year students in their adjustment to college, often through educational and social programs and floor activities.

### Honors House

Honors House is an option for University of Washington Honors Program students who wish to expand their intellectual lives beyond the classroom. Students who choose Honors House have the best of both worlds: close contact with other Honors students and the diversity of the residence halls.

### Safety and Security

The University of Washington is a relatively safe place; however, it can be subject to the same problems as the surrounding urban community. The following information describes programs and policies established to protect your safety and well-being.

#### Residence Hall Patrol

Plainclothes University Police patrol the halls each night from 7 p.m. to 5 a.m. Officers are fully commissioned and have the same authority as other law enforcement officers. RDs and RAs are on duty to handle security issues from 5 p.m. to 8 a.m. and RDs are on duty 24 hours a day on weekends and holidays.

#### Locked Halls

Residence halls are locked 24 hours a day, except those with food service operations, which remain open from 7 a.m. until 7 p.m. The residence hall desks are staffed from 8 a.m. to 7 p.m. Monday - Friday, 8 a.m. - 5 p.m. on Saturday and 10 a.m. to 5 p.m. on Sunday.

#### Fire Safety

The fire alarms for all residence halls comply with City of Seattle high-rise fire codes. The systems consist of area-sensitive and building heat and smoke detectors. Each student room contains a smoke/heat detector. Sprinkler systems exist in Terry, Lander, McCarty, McMahon, Haggett and Hansee Halls. Sprinkler systems will be added to Mercer Hall by autumn 2004. All heating and ventilating fans within a facility are interlocked with the fire alarm system for that facility. The system is hardwired directly into the University Police Department, which notifies the City of Seattle Fire Department if problems arise. The University of Washington's Environmental Health and Safety (EHS) department conducts a comprehensive annual inspection of all physical fire safety attributes. In addition, HFS is subject to random inspection by the City of Seattle Fire Department, and semiannual fire drills are conducted in every hall.

#### Other Safety Measures

- All residence hall rooms have peepholes.
- Women's restrooms are locked.
- Residence hall keys are high-security keys; duplicate keys can only be made using factory equipment.
- Throughout the year residents receive information about safety issues, and Resident Advisers offer programs on personal safety, property protection, emergency procedures and related topics.

---

# Undergraduate Study

---

## Office of Undergraduate Academic Affairs

[www.washington.edu/uaa/](http://www.washington.edu/uaa/)

The University of Washington established the Office of Undergraduate Academic Affairs (UAA) in 1992 (as the Office of Undergraduate Education) in order to make undergraduate education a more visible and central part of the University's work and purpose. UAA offers opportunities and resources for students and their families, faculty members, and academic departments and programs. UAA's unique mission of ensuring excellence in undergraduate teaching and learning is critical to the University's commitment to providing students a rich academic experience.

### Intercollege Programs

The following programs, described in detail in other sections of the catalog, are administered by the Office of Undergraduate Education.

### Individualized Studies

[www.washington.edu/students/genecat/academic/indivstudies.html](http://www.washington.edu/students/genecat/academic/indivstudies.html)

Individualized Studies provides students an opportunity to obtain an individually designed interdisciplinary degree through the College of Arts and Sciences. Students may also pursue a major in one of several existing interdisciplinary programs. Requirements for the Bachelor of Arts or Bachelor of Science degree are shown in the Arts and Sciences section of this catalog

### Center for Quantitative Science

[depts.washington.edu/cqs/](http://depts.washington.edu/cqs/)

The Center for Quantitative Science in Forestry, Fisheries, and Wildlife is an intercollege academic unit sponsored by the Office of Undergraduate Education, the College of Ocean and Fishery Sciences, and the College of Forest Resources. The Center offers courses in mathematics and statistical methods as applied to problems in biology, ecology, the environment, and renewable-resource management for undergraduate students. The faculty of the Center includes members of the College of Forest Resources and the School of Aquatic and Fishery Sciences, as well as other units. The quantitative science minor is designed to give undergraduates majoring in biology, ecology, the environment, and renewable-resource management programs a thorough grounding in relevant statistical and mathematical modeling methodology.

### Program on Africa

[depts.washington.edu/poa/](http://depts.washington.edu/poa/)

The Program on Africa (PoA) develops, co-ordinates, and disseminates information about inter-disciplinary, cross-college, Africa-related courses and activities at the UW. It aims to foster an interest in the African continent and its Diaspora, with the ultimate goal of involving knowledgeable, well-trained, and committed students and graduates in Africa's political, cultural, medical, technological, and economic future. PoA offers undergraduate students a minor in African Studies with courses drawn from disciplines as varied as fisheries, anthropology, social work, history, public health, art, and music.

### Program on the Environment

[depts.washington.edu/poeweb/](http://depts.washington.edu/poeweb/)

The Program on the Environment (PoE) fosters and promotes interdisciplinary environmental education at the UW by linking

scholars active in environmental fields from across the University to build a trans-disciplinary network of educators, students, and researchers. PoE offers an undergraduate degree in Environmental Studies, a minor in Environmental Studies, and three graduate certificate programs. The program provides students knowledge in four domains of inquiry: natural sciences; social sciences; law, policy, and management; and ethics, values, and culture. PoE merges these fields through rigorous coursework and hands-on learning to provide a unique opportunity for students and faculty to explore complex environmental issues from multiple perspectives.

### Undergraduate Majors

[www.washington.edu/students/ugrad/advising/majmenu.html](http://www.washington.edu/students/ugrad/advising/majmenu.html)

To graduate from the UW, students must complete one of the majors listed below. In many cases, the student need not make a final choice until the beginning of the junior year, although programs with considerable mathematics and science (e.g., engineering and premedicine) include lock-step requirements that must be started early on if the student expects to finish in four years.

Students can enter some majors directly (e.g., those in Ocean and Fishery Sciences, most in Forest Resources, and some in Arts and Sciences), but most students start out as premajors. As premajors, they take courses to fulfill general requirements and admission requirements for the major. Many majors require one or two years of pre-admission course work, although a few require more. Admission to many majors is competitive, which means students may not be accepted even if they complete all the prerequisite course work, depending on their grades and other factors.

The *General Catalog* shows requirements for all majors, but students should see an adviser to ask about changes, course sequences, or new options.

### Satisfactory Progress

[www.washington.edu/students/reg/satprog.html](http://www.washington.edu/students/reg/satprog.html)

Students admitted to the University to pursue baccalaureate degrees are expected to make satisfactory progress toward the attainment of the degree and are expected to enter a major and to graduate after completion of a reasonable number of credits.

By the time undergraduate students have completed 105 credits, they must either be accepted in their major or have their premajor status extended temporarily by an adviser. Extensions are normally granted only to students who are in the final phases of completing admission requirements for a major to which they have a reasonable chance of acceptance.

Students who do not either declare a major or have their premajor status extended by the time they have earned 105 credits will have a "hold" placed against registration for the following quarter.

Students must normally graduate with their first baccalaureate degree by the time they have completed 30 credits beyond the credits required for the first degree or concurrent degrees. Departmental advisers may grant extensions beyond the 30-credit limit.

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree. Students admitted as "postbaccalaureate undeclared" must declare a major by the time they have earned

30 credits beyond their last degree, and once a degree objective has been declared, must make progress toward that degree as evidenced by the courses they have completed satisfactorily. Advisers may grant extensions beyond the 30-credit limit.

The Faculty Council on Academic Standards may terminate a student's enrollment if the student demonstrates lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. The student may be reinstated with the approval of the student's college and the council. EOP students may be reinstated in consultation with the Office of Minority Affairs.

### Undergraduate Minors

Undergraduate students have the option of completing a minor. Minors require the completion of at least 25 credits, 15 of which must be taken in residence at the UW. There are no departmental admission requirements for minors. Students may declare an approved minor when they have earned 90 credits or more. A cumulative GPA of 2.00 is required for courses within the minor. Some departments do not offer minors. Requirements for minors established as of spring 2002 are shown in the academic programs section of this catalog. A list of currently offered minors is available at the Undergraduate Gateway Center, 171 Mary Gates Hall.

### Undergraduate Degrees

The UW grants the following degrees upon satisfactory completion of appropriate programs of study in the departments, schools, and colleges:

|   |               |
|---|---------------|
| Bachelor of Arts .....  | B.A.          |
| Bachelor of Arts in Business Administration .....                       | B.A.B.A.      |
| Bachelor of Clinical Health Services .....                              | B.C.H.S.      |
| Bachelor of Fine Arts .....   | B.F.A.        |
| Bachelor of Landscape Architecture .....                                | B.L.Arch.     |
| Bachelor of Music .....   | B.Mus.        |
| Bachelor of Science .....   | B.S.          |
| Bachelor of Science in Aeronautical and Astronautical Engineering ..... | B.S.A&A.      |
| Bachelor of Science in Aquatic and Fishery Sciences .....               | B.S.AFS.      |
| Bachelor of Science in Bioengineering .....                             | B.S.Bio.E.    |
| Bachelor of Science in Chemical Engineering .....                       | B.S.Ch.E.     |
| Bachelor of Science in Civil Engineering .....                          | B.S.C.E.      |
| Bachelor of Science in Computer Engineering .....                       | B.S.Comp.E.   |
| Bachelor of Science in Construction Management .....                    | B.S.C.M.      |
| Bachelor of Science in Electrical Engineering .....                     | B.S.E.E.      |
| Bachelor of Science in Engineering .....                                | B.S.E.        |
| Bachelor of Science in Forest Resources .....                           | B.S.F.        |
| Bachelor of Science in Health Information Administration .....          | B.S.H.I.A.    |
| Bachelor of Science in Industrial Engineering .....                     | B.S.I.E.      |
| Bachelor of Science in Informatics .....                                | B.S.Info.     |
| Bachelor of Science in Materials Science and Engineering .....          | B.S.M.S.E.    |
| Bachelor of Science in Mechanical Engineering .....                     | B.S.M.E.      |
| Bachelor of Science in Medical Technology .....                         | B.S.Med.Tech. |
| Bachelor of Science in Nursing .....                                    | B.S.Nurs.     |
| Bachelor of Science in Technical Communication .....                    | B.S.T.C.      |

### Freshmen Interest Groups

One FIG = 20-25 freshmen who have similar academic interests and share the same cluster of three or four courses for their first quarter at the UW. The FIG provides both a social support network and a learning community. More than 100 FIGs are offered in the autumn, spanning a range of topics and interests.

### Freshman Seminars

Taught by faculty members, many nationally and internationally recognized leaders in their fields, these seminars meet once a week, are limited to 15 students, and are graded credit/no credit.

Students can establish a rapport with a professor while learning about different fields of study, all in a low-pressure academic setting.

The University Honors Program offers the best of both worlds: the combined riches of a small learning community and the inexhaustible resources of a large research university.

### Phi Eta Sigma

A national freshman honor society with more than 300 chapters and 500,000 lifetime members. The UW chapter focuses on community service, campus service, and membership services.

### University Honors Program

The University Honors Program provides a special learning context for high-achieving students looking for a rigorous and enhanced educational experience.

Most Honors students enter the Full College Honors Program as incoming freshmen. This Honors option is a four-year track through our program consisting of an Honors Core followed by Departmental Honors and results in a degree earned "With College Honors." The rest of our students participate only in Departmental Honors (which students enter once they enter their department). Completion of Departmental Honors alone results in a degree earned "With Distinction."

The University Honors Program assists and encourages students to find ways to enrich their education and to create an experience that facilitates their long-term goals. Honors seeks to enhance the already rich experience available at the University of Washington by bringing students and the best opportunities of a large research university into close contact.

Honors students benefit from unique opportunities such as:

- Personalized and Comprehensive Honors Advising
- Small, Intensive, Interdisciplinary Honors Classes
- Continuous Contact with Honors Faculty
- Assistance in Finding Appropriate Research and Internship Opportunities
- Bonderman Honors Travel Fellowship
- Mary Gates Research Grants
- Mary Gates Leadership Grants
- Honors Peer Advisers
- Honors Computer Lab

### CLUE

The Center for Learning and Undergraduate Enrichment (CLUE) is a free late-night study center. It is designed to provide supplementary educational opportunities for and enhance the academic achievement of all UW undergraduates. The program places a strong emphasis on creating a rich learning community while supporting freshmen, sophomore, and transfer students who are enrolled in many of the UW's crucial lower-division courses.

CLUE services include **drop-in help sessions** for subjects like chemistry, math, biology, writing, economics, and foreign languages; **evening discussion and review sessions** with TAs and fellow students; and **exam reviews** for a variety of courses.

### Computing Resources

UW students have access to computers, email, the Internet (in campus labs or from home), MyUW, and other online resources, training, and Web services for publishing. You don't need to buy your own computer, although it's recommended. Regardless of your major or future career plans, learning how to navigate campus computing resources—and to make the most of them—will be a significant part of your UW education.

## Educational Opportunity Program

EOP provides educational opportunity and creates greater cultural diversity within the University. The program is open to underrepresented minority students from American Indian, Native American, African-American, Hispanic, and Asian/Pacific Islander backgrounds, and to economically disadvantaged students of all ethnicities whose parents do not have 4-year college degrees. EOP services include academic and personal counseling, advocacy and support with financial aid and housing, placement testing, academic tutoring, and special instruction.

## Libraries

The University of Washington Libraries received the 2004 Excellence in Academic Libraries Award, which recognizes the top university research library in the country. UW Libraries rank 12th among North American research libraries. Here are some more numbers: 5.9 million volumes, 6.9 million items in microform, and more than 50,000 periodical titles. Impressive, but what does all of this mean to you? Simple: the

chance to explore to the fullest extent of your interest and imagination. And in the process, you'll be acquiring valuable skills for navigating and analyzing information. There's no more important skill in the 21st century.

## Don't Study More, Study Smarter!

These 90-minute small-group sessions address topics such as Test-Taking and Test Anxiety, Time Management and Procrastination, Notetaking, and Stress Management. The workshops are free and offered at the Counseling Center.

## Study Skills on the Web

Offers study tips, information about time management, and links to many Internet resources.

## Women's Center

Located in historic Imogen Cunningham Hall, the Women's Center offers classes, workshops, and events. The Re-Entry Program offers free services to women and men who are considering returning to the University after a significant time away or who, for whatever reason, feel they need additional support and advice in making the transition into higher education.

---

# The Graduate School: Graduate Study

---

[www.grad.washington.edu](http://www.grad.washington.edu)

The University of Washington awarded its first graduate degree, a Master of Arts in classical languages, in 1885 and its first Doctor of Philosophy degree, in chemistry, in 1914. Since those beginnings, the University has conferred more than 65,000 master's degrees and 14,000 doctoral degrees, exclusive of medical, dental, and first legal doctorates.

Through its graduate programs, the University fulfills several functions vital to a healthy society: the advancement of human knowledge is facilitated through the development and conduct of scientific research; the education of scholars, teachers and a multitude of professionals in areas that cut across the academic spectrum insure that knowledge and information are communicated to the general public for the use and benefit of all. These functions ensure that some of the problems and needs confronting society are resolved.

To manage its developing graduate programs, the Graduate School was created as a temporary entity in 1899 and was permanently established in 1910. The purpose of the Graduate School is to define and support excellence in graduate education and the research and scholarly activities associated with it. Graduate study is guided by the Dean of the Graduate School and an ever-changing graduate faculty of more than 3,000 members who are selected for their interest in and concern for graduate education at the University of Washington. There are now more than 8,000 graduate students working toward master's or doctoral degrees in 100 separate University programs. A growing number of interdisciplinary graduate degree and graduate certificate programs that have been established through the efforts of interested faculty members.

Graduate School policy is enacted through an elected council of ten graduate-faculty members who are chosen from among the graduate-faculty population and who advise the Dean on matters of policy and procedure. Complementary to that input, each degree-offering unit within the University appoints a graduate program coordinator who serves as an important link between the unit and the Graduate School, advising students on questions concerning Graduate School and departmental degree requirements.

The Graduate School also has a number of responsibilities that relate to its primary ones, such as graduate program review, Graduate Opportunities and Minority Achievement Program, the administration of the Graduate School Fund and certain fellowship programs, as well as such central facilities as the University of Washington Press, and the Walker-Ames and the Jessie and John Danz distinguished visiting professorships.

As part of its commitment to excellence, the University is committed to providing opportunities for students to learn and grow through experiences rich in cultural, ethnic, and racial diversity. Within the Graduate School, the Graduate Opportunities and Minority Achievement Program (GO-MAP) works with the University to provide an innovative and inclusive graduate student community and experience. GO-MAP takes a leadership role in the recruitment and retention of ethnic and racial minority and underrepresented students, building community on and off campus, improving campus climate, and enhancing scholarship and research.

In addition, GO-MAP administers several scholarships and assistantships aimed at increasing diversity in the University's graduate programs.

## Graduate Degree Programs

The Office of Academic Programs in the Graduate School contributes to the University's educational and research mission by conducting quality assessment of proposed and continuing education programs at the graduate and undergraduate level as well as research institutes and centers. Through program review, it ensures academic program quality, including all aspects of an academic unit, and promotes communication among academic units throughout the three-campus system. The principle mechanism by which this is achieved is through a process of peer review. Reviews of degree programs are conducted on a ten-year cycle, or at predetermined shorter intervals. For further information, see Graduate School Memorandum No. 7: Periodic Review of Existing Degree Programs at [www.grad.washington.edu](http://www.grad.washington.edu) and the schedule of program reviews at [www.grad.washington.edu/Acad/Academicprograms.htm](http://www.grad.washington.edu/Acad/Academicprograms.htm), or contact the Office of Academic Programs in the Graduate School at 206-685-3519.

| Dentistry .....          | D.D.S.   |
| School of Law .....      | J.D.     |
| School of Medicine ..... | M.D.     |
| School of Pharmacy ..... | Pharm.D. |

## Graduate Admissions

Additional program information is available on the World Wide Web at [www.grad.washington.edu](http://www.grad.washington.edu).

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam-era veteran in accordance with University policy and applicable federal and state statutes and regulations.

Application to the UW through the Office of Graduate Admissions is available for three types of students. It is important to understand the distinctions between the categories.

A **graduate student** is a person working toward a master's or doctoral degree or earning a school administrator's credential. Students must be admitted to this status in order to earn a degree. Information about the Application for Admission to the Graduate School is obtained from the program to which you wish to apply.

A **visiting graduate student** is a person who plans to transfer a limited number of graduate credits earned at the UW to another institution where he or she is actively pursuing a graduate degree. Admission is based in part on availability of resources. Visiting graduate applicants must have been admitted to another recognized graduate school, be currently pursuing a graduate degree there, and be in good standing. A Certificate of Status signed by the home institution is required. The Application and Certificate are available online at <https://www.grad.washington.edu/application/>. Individual departments may require additional materials, such as transcripts, GRE/GMAT scores, a statement of purpose, or a list of desired course work.

Some graduate programs have chosen to offer admission to **graduate nonmatriculated students**. These students are not presently seeking a graduate degree but may apply a maximum of 12 credits earned in this category to degree requirements should they later be accepted into a graduate program. Applicants should meet minimum Graduate School admission requirements but *admission as a graduate nonmatriculated student does not imply admission to a graduate degree program*. The Application

to Graduate Nonmatriculated Status must be obtained from the program to which you wish to apply. Official sealed transcripts from all collegiate institutions previously attended must be sent to the Graduate Nonmatriculated Office, Box 84808, University of Washington, Seattle, WA 98124-6108. (Refer to Graduate School Memorandum No. 37 for further information.)

Admission to the UW is necessarily a selective process. The prospective student must hold a baccalaureate degree from an accredited college or university in this country or an equivalent degree from a foreign institution. The student's record should be a strong one with an average grade of "B" or a 3.00 grade-point, or better. The primary criterion and the priority for admission of new applicants into a graduate program is the applicant's ability, as decided by the appropriate faculty, to complete the graduate program expeditiously with a high level of achievement. One aspect of meeting this criterion is the matching of interests between applicants and faculty. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:

1. Priority for admission of applicants into a graduate degree program based upon the applicant's apparent ability, as determined by the University, to complete the program with a high level of achievement.
2. No practice may discriminate against an individual because of race, color, creed, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran.
3. Sustained efforts shall be made to recruit qualified applicants who are members of groups that are underrepresented in certain disciplines.
4. All applicants to a degree-offering unit shall be processed through the same set of procedures to assure that all applicants are evaluated on their individual merits.
5. Tests and criteria for admission should relate to the actual requirements of the graduate program. Reasonable accommodation for testing conditions may be made to compensate for relevant disabilities.
6. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors may vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:
  - a. Grades earned, especially for subjects in or closely related to the field of the applicant's proposed graduate work.
  - b. Scores on the Graduate Record Examination (GRE) Verbal, Quantitative, and Analytical Tests, on the GRE Advanced Test, on other tests related to the applicant's field, and on other aptitude tests which may be required.
  - c. Personal interviews of the applicant by the department admissions committee.
  - d. The career objectives of the applicant and the extent to which the graduate degree program may be expected to prepare the applicant for those objectives.
  - e. Written and oral recommendations from persons who are qualified to evaluate the applicant's academic record and promise.

- f. The applicant's degree objective (i.e., master's degree, doctoral degree, or a master's followed by a doctoral degree).
- g. Activities or accomplishments; educational goals; prior employment experience; living experiences, such as growing up in a disadvantaged or unusual environment; special talents.
- h. Academic accomplishments in light of the applicant's life experiences and special circumstances.. These experiences and circumstances may include, but are not limited to disabilities, low family income, first generation to attend college, need to work during college, disadvantaged social or educational environment, difficult personal and family situation or circumstances, and refugee status or veteran status.

Importance given to these factors will vary among degree programs.

Most Graduate School admissions are for summer or autumn quarters. Admissions for winter and spring quarters may be severely restricted due to considerations of space.

Each academic program at the UW has a graduate program coordinator who is responsible for providing advice, guidance, and assistance to applicants as well as to students working toward graduate degrees. Prospective graduate students are urged to contact the graduate program coordinator in their program of interest for information about any aspect of graduate study, including research, curriculum, faculty, and financial support in the form of teaching and research assistantships, grants, and scholarships. Information about graduate programs is available at [www.grad.washington.edu](http://www.grad.washington.edu).

#### **Admission Process**

Information about the application process for both graduate and graduate nonmatriculated status must be obtained directly from the department. Visiting graduate applicants should go to <https://www.grad.washington.edu/application/> for application information. *It is very important to submit all application documents in time to meet departmental deadlines as these will supersede graduate admissions deadlines.*

#### **Registration**

After successful applicants have been offered admission, the Registration Office sends a request for a \$100 Enrollment Confirmation Deposit to indicate the intent to register. This nonrefundable deposit will apply toward the first quarter's tuition.

Once admitted, graduate students are expected to maintain registered or on-leave status until the degree is conferred. (See section on Continuous Enrollment.)

#### **Financial Aid for Graduate Students**

Students applying for fellowships, traineeships, and assistantships or associateships must make certain that complete transcripts and other credentials are on file by February 15 (earlier submission of applications and supporting documents is urged by all departments and required by some). Awards and appointments are usually made about April 1. Application forms may be obtained by writing to the graduate program coordinator of the appropriate department.

#### **Fellowships, Traineeships, and Scholarships**

A limited number of fellowships, traineeships, and scholarships is available through individual departments to outstanding students in fields of study leading to advanced degrees. Application forms may be obtained from the graduate program coordinators in the departments.

The Graduate School and the University of Washington Libraries have collaborated to provide the Grants and Funding Information Services (GFIS) for University of Washington graduate students (and faculty) who are seeking any type of general research funding for use at the University of Washington. GFIS promotes awareness of external funding information resources by providing drop-in educational consultations, maintaining a print collection for grant seekers, and offering quarterly seminars highlighting Web-based grant-seeking tools. GFIS works with students and faculty to devise a search strategy, helping to focus efforts and locate available resources. GFIS also will demonstrate searching on several online databases and how to use its print collection of funding resource books so that students can perform future searches based on changing funding needs. GFIS also maintains resources to assist in the proposal-writing process, including grant-writing handbooks and links to online resources.

To set up a consultation, email [gfis@u.washington.edu](mailto:gfis@u.washington.edu), call 206-616-3084, or submit a research profile using GFIS's online form. For funding seminar schedules, check the Web at [www.lib.washington.edu/gfis/events.html](http://www.lib.washington.edu/gfis/events.html).

#### **Work Study Graduate Assistantships**

Graduate students who are eligible for the need-based college work-study program may qualify for work study graduate assistantships in teaching or research. Students must submit financial aid applications to the Office of Student Financial Aid by the February 28 deadline to be considered for these positions. Information is available from the Office of Student Financial Aid.

#### **Employment Opportunities**

The campus offers other job opportunities for graduate students. Students may apply directly to the chair of the department in which they hope to work or to the Student Employment Office. Students seeking part-time employment must be enrolled and on campus before they may obtain jobs.

Advisory positions in University residence halls paying room and board are available for single graduate students, both men and women. Additional information may be obtained from the Director of Residence Halls Programs, 301 Schmitz.

Spouses of students also may apply for regular full- and part-time University employment. These positions cover a wide range of occupations and offer pay comparable to the prevailing salaries in the community. Some carry such fringe benefits as vacations, sick leave, and opportunities to enroll in University courses. Inquiries may be directed to the Staff Employment Office, 1320 Northeast Campus Parkway.

#### **Loans**

Long-term educational loans are available to graduate students through the Federal Perkins Student Loan, the Federal Direct Stafford Loan, and the Federal Direct Unsubsidized Stafford Loan programs. An application form for these programs (the Free Application for Federal Student Aid, or FAFSA) is available in the office of Student Financial Aid, Box 355880, 105 Schmitz Hall, 206-685-9395, or from the U.S. Department of Education Web site at [www.ed.gov/offices/OPE/express.html](http://www.ed.gov/offices/OPE/express.html). The Office of Student Financial Aid may also be reached by email ([osfa@u.washington.edu](mailto:osfa@u.washington.edu)) or on the Web at [www.washington.edu/students/osfa/](http://www.washington.edu/students/osfa/). The application deadline is February 28 for the following autumn quarter.

Students should meet the application deadline even if they have not yet been admitted to the Graduate School.

The Federal Perkins Student Loan and the subsidized Federal Direct Stafford Loan are awarded to students who demonstrate financial need. Students who do not qualify for need-based

assistance may qualify for Federal Direct Unsubsidized Stafford Loans. For more detailed information on these loan programs, visit the Office of Student Financial Aid Web site at [www.washington.edu/students/osfa/](http://www.washington.edu/students/osfa/).

Short-term emergency loan funds also are available through the Office of Student Financial Aid. Several different types of short-term loans are possible. More information is available from the Office of Student Financial Aid, Short-Term Loans, 172 Schmitz, 206-685-1282. The Graduate School also has a short-term emergency loan available. For more information, call 206-543-5900.

### **Graduate Opportunities and Minority Achievement Program**

The Graduate Opportunities and Minority Achievement Program (GOMAP) works to develop and maintain a diverse and welcoming climate from which all students may benefit. As part of its duties, GOMAP oversees the Graduate School Fund for Excellence and Innovation (see Special Programs and Facilities) and assists University of Washington graduate programs in developing and maintaining efforts designed to increase the enrollment of students from ethnic minority groups that have been historically underrepresented in graduate programs.

Recognizing that financial aid in the form of scholarships, grants, and fellowships is important in achieving and maintaining diversity, the GOMAP administers a variety of need- and merit-based fellowships. Merit-based awards are generally made through the nomination and support of the department in which the student is enrolled. Need-based awards are based upon an evaluation of the student's need as established by the Free Application for Federal Student Aid (FAFSA) and the Office of Student Financial Aid. Students who have varied cultural experiences or educationally or economically disadvantaged backgrounds and who will therefore contribute to the intellectual and social enrichment of the University, are encouraged to apply. Students must be U.S. citizens or permanent residents to be eligible.

Financial assistance from individual departments may also be available. Students should apply directly to the chair of their department. Students are also encouraged to make use of the University's Grants and Funding Information Service located in Suzzallo Library.

Further information on fellowships administered by GOMAP may be obtained by writing to the University of Washington, Graduate School, Graduate Opportunities and Minority Achievement Program, Box 351240, Seattle WA 98195-1240, or emailing [gomap@u.washington.edu](mailto:gomap@u.washington.edu).

All awards are contingent upon the student's admission to the UW Graduate School.

## **Graduate Degree Policies**

Usually focused on a specific field of knowledge, graduate study is conducted through a variety of means, including lectures, seminars, independent advanced study, special reading courses, internships, and participation in research. Graduate programs leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees emphasize the development of the student's ability for independent scholarly work and the creation of new knowledge through research. Practice-oriented programs, which ordinarily lead to the degree of master or doctor in a particular professional field, emphasize preparation of the student for professional practice at the frontiers of existing knowledge.

Many master's and all doctoral programs culminate in the presentation of a thesis or dissertation conveying the results of

the independent study and research carried out by the student. A master's thesis contributes to knowledge, reviews or critiques the state of knowledge in a field, creates a new design or composition, or represents some other appropriate kind of independent contribution. A doctoral dissertation must set forth a significant contribution to knowledge or understanding in the student's field, be presented in scholarly form, and demonstrate that the student is competent to engage independently in the pursuit of solutions to important problems. The student must defend the doctoral dissertation in a Final Examination conducted by a faculty committee and open to all other graduate-faculty members. A member of the graduate faculty from some other discipline participates as an official representative of the Graduate School, including various major evaluations such as the General Examination and Final Examination.

### **Graduate Program Coordinator**

The graduate student's initial work at the University is guided by the graduate program coordinator in his or her field. The coordinator must be a senior tenured member of the graduate faculty and is the official representative of the academic unit that offers the graduate degree program. The graduate program coordinator maintains familiarity with policies and procedures of the Graduate School and provides overall coordination of graduate activities within the unit.

### **Graduate Courses**

Graduate courses are intended for, and ordinarily restricted to, either students enrolled in the Graduate School or graduate nonmatriculated students, and are given numbers from 500 through 800. Some courses at the 300 and 400 levels are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the supervisory committee, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only. Courses at the 300 level are not included in the calculation of grade-point average (GPA) and will not apply toward the minimum Graduate School requirement of 18 graded credits for the master's or doctoral degree. Approved 400-level courses are accepted as part of the major as well as minor or supporting fields. Courses numbered 498 and entitled Special Topics or Special Projects normally are not applicable to a graduate degree program if addressed primarily to introductory content and undergraduate students. Undergraduate research (499) is not accepted as part of the graduate program. Graduate School Memorandum No. 36 offers additional information on graduate courses. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of any combination of courses numbered 600, 700, or 800.

### **Repeating Courses**

Graduate students may repeat any course. Both the first and second grades will be included in the cumulative GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once.

### **Grading System for Graduate Students**

In reporting grades for graduate students, units that offer graduate degrees use the system described herein. Grades are entered as numbers, the possible values beginning at 4.0 and decreasing by one-tenth increments until 1.7 is reached. Grades below 1.7 are recorded as 0.0 by the Registrar. A minimum grade of 2.7 is required in each course that is counted toward a graduate degree. A minimum GPA of 3.00 is required for graduation.

Correspondence between number grades and letter grades is as follows:

| Numeric grade-point equivalent | Letter grade | Numeric grade-point equivalent | Letter grade |
|--------------------------------|--------------|--------------------------------|--------------|
| 4.0                            | A            | 2.8                            | B-           |
| 3.9                            |              | 2.7                            |              |
| 3.8                            | A-           | 2.6                            |              |
| 3.7                            |              | 2.5                            |              |
| 3.6                            |              | 2.4                            | C+           |
| 3.5                            |              | 2.3                            |              |
| 3.4                            | B+           | 2.2                            |              |
| 3.3                            |              | 2.1                            |              |
| 3.2                            |              | 2.0                            | C            |
| 3.1                            |              | 1.9                            |              |
| 3.0                            | B            | 1.8                            |              |
| 2.9                            |              | 1.7                            |              |
|                                |              | 1.6-0.0                        | E            |

The following letter grades also may be used:

**I Incomplete.** An incomplete may be given only when the student has been in attendance and has done satisfactory work to within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student's control.

To obtain credit for the course, a student must successfully complete the work and the instructor must submit a grade. In no case may an incomplete be converted into a passing grade after a lapse of two years or more. An incomplete received by a graduate student does not automatically convert to a grade of 0.0 but will remain a permanent part of the student's record.

**N No grade.** Used only for hyphenated courses and courses numbered 600 (Independent Study or Research), 601 (Internship), 700 (Master's Thesis), 750 (Internship), or 800 (Doctoral Dissertation). An *N* grade indicates that satisfactory progress is being made, but evaluation depends on completion of the research, thesis, internship, or dissertation, at which time the instructor or supervisory committee chair should change the *N* grade(s) to one reflecting the final evaluation.

**S/NS Satisfactory/not satisfactory.** A graduate student, with the approval of the graduate program coordinator or supervisory committee chair, may elect to be graded *S/NS* in any numerically graded course for which he or she is eligible. If a student does not so elect, then the student is graded on a numerical basis. If approval is granted, the student must elect the *S/NS* option either when registering or no later than the end of the seventh week of the quarter.

**CR/NC Credit/no credit.** With the approval of the faculty in the academic unit, any course may be designated for grading on the credit/no-credit basis by notice in the appropriate *Time Schedule*. For such courses, the instructor submits a grade of *CR* or *NC* to be recorded by the Registrar's Office for each student in the course at the end of the quarter. All courses numbered 600, 601, 700, 750, and 800 may be graded with a decimal grade, *CR/NC*, or *N* at the instructor's option.

**W Course Withdrawal.**

**HW Hardship Withdrawal.** Refer to the University of Washington *Time Schedule* for procedures and dates, or visit the Web at [www.washington.edu/students/reg/wdoffleave.html#Q3](http://www.washington.edu/students/reg/wdoffleave.html#Q3).

Of the minimum number of credits required for a graduate degree, a graduate student must show numerical grades in at least 18 quarter hours of course work taken at the UW. These numerical grades may be earned in approved 400-level courses and 500-

level courses.

The student may petition the Dean of the Graduate School to modify the procedures described above. The petition should be accompanied by comments and recommendations from the graduate program coordinator.

### Scholarship

A cumulative GPA of 3.00 or above is required to receive a degree from the Graduate School. A graduate student's GPA is calculated entirely on the basis of numeric grades in 400- and 500-level courses. The grades of *S*, *NS*, *CR*, *NC*, and *N* are excluded, as are all grades in courses numbered 600, 601, 700, 750, and 800, and in courses at the 100, 200, and 300 levels.

Failure to maintain a 3.00 GPA, either cumulative or for a given quarter, constitutes low scholarship and may lead to a change-in-status action by the Graduate School. Failure to maintain satisfactory performance and progress toward a degree may also result in a change-in-status action by the Graduate School.

(See Graduate School Memorandum No. 16 for additional information.)

### Withdrawal Policy

Refer to the University of Washington *Time Schedule* for procedures and dates, or look on the Web at [www.washington.edu/students/reg/wdoffleave.html](http://www.washington.edu/students/reg/wdoffleave.html)

### Language Competency Requirements and Examinations

Competence in one or more languages in addition to English is desirable for all fields of advanced study and is often required, especially in the scholarly and research-oriented programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy.

Requirements for foreign-language competence are established by the graduate faculty in the unit offering the graduate program. Language competence in certain languages other than English (i.e., languages that may have special significance to the field) may be specified as helpful or desirable or may be required. Students should consult the graduate program coordinator for information and advice about desirable or required competence in foreign languages.

When appropriate, students are urged to establish foreign-language competence as undergraduates before entering the Graduate School or as early as possible in their graduate careers. The University's language-competence requirements in French, German, and Spanish may be satisfied by successful completion of the standardized examinations given by the Educational Assessment Office. Other foreign language examinations are also given at the UW.

It is assumed that citizens of certain English-speaking countries who are admitted to the Graduate School are competent in the English language; citizens of non-English-speaking countries must demonstrate a satisfactory command of English, both for admission and for appointment as teaching assistants.

Refer to Graduate School Memorandum No. 8, *English Language Competence for Admission to the Graduate School* ([www.grad.washington.edu/Acad/gsmemos/gsmemo08.htm](http://www.grad.washington.edu/Acad/gsmemos/gsmemo08.htm)) for more information.

### Enrollment Requirement

The enrollment requirement for the master's degree is 30 credits at the University of Washington

For the doctoral degree, the enrollment requirement is 90 credits, 60 of which must be taken at the University of Washington. With

the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may substitute for 30 credits of enrollment. Doctoral study requires an immersion in an academic field and its intellectual community. Degree-granting units may require a period of full-time or on-site study.

Only courses at the 400-, 500-, 600-, 700-, and 800-levels can be applied to enrollment or course credit in the major field for advanced degrees (please see Graduate Courses earlier in this section regarding courses numbered 498 and 499). Courses at the 300-level are not applicable to enrollment or course credit toward advanced degrees except when applied by permission of the graduate program coordinator or supervisory committee toward the graduate minor or supporting courses. Courses numbered below 300 are not applicable to enrollment or course credit for advanced degrees.

### **Final Quarter Registration**

A student must maintain registration as a full- or part-time graduate student at the University for the quarter the master's degree, the Candidate certificate, or the doctoral degree is conferred.

A student who does not complete all degree requirements by the last day of exam week must be registered for the following quarter.

## **Continuous Enrollment and Official On-Leave Requirement**

### **Policy**

To maintain graduate status, a student must be enrolled on a full-time, part-time, or On-Leave basis from the time of first enrollment in the Graduate School until completion of all requirements for the graduate degree. The student must be registered when applying for the master's degree, the passing of the master's final examination, or doctoral General or Final Examinations, the filing of the thesis or dissertation, and the receiving of the degree. Summer quarter On-Leave enrollment is automatic for all graduate students who were either registered or on-leave the prior spring quarter. Failure to maintain continuous enrollment constitutes evidence that the student has resigned from the Graduate School.

A student's petition for On-Leave status must be approved by the departmental graduate program coordinator or alternate and submitted to the Registration Office no later than the fifth day of the quarter. To be eligible for On-Leave status, the student must have registered for, and completed, at least one quarter at the UW and have been registered and completed the previous quarter, or have been officially On-Leave (except summer quarter). An On-Leave student is entitled to use the University Libraries and to sit for foreign-language competence examinations, but is not entitled to any of the other University privileges of a regularly enrolled and registered full- or part-time student. The student pays a nonrefundable fee to obtain On-Leave student status covering four successive academic quarters or any part thereof. An On-Leave student returning to the University on or before the termination of the period of the leave must file a Returning Student Reenrollment Application (available at 225 Schmitz) by the deadline stated on the form and register in the usual way as a full- or part-time student (see Graduate School Memorandum No. 9 for procedures). A student who returns before the termination of the On-Leave period and maintains registration for any part of a quarter cancels On-Leave status. Please note: Periods spent On-Leave are included as part of the maximum time periods allowed for completion of a graduate degree.

## **Readmission**

A student previously registered in the Graduate School who has failed to maintain graduate student status but who wishes to resume studies must file an application in person or by mail for readmission to the Graduate School by the regularly published closing dates. If the student is readmitted, registration will occur during the usual registration period. If the student has attended any other institution during the period when not registered at the UW, official transcripts in duplicate of the student's work must be submitted. An application for readmission carries no preference and is treated in the same manner as an application for initial admission, including the requirement of payment of the application fee.

The Graduate School normally allows six years to complete requirements for a master's degree and ten years for a doctoral degree. Periods spent On-Leave or out of status are included.

## **Concurrent Degree Programs**

### **Formal Concurrent Degree Programs**

Concurrent programs are defined as a pair of programs that may be taken at the UW by a postbaccalaureate student resulting in the satisfaction of the requirements for either two graduate degrees or a graduate and a professional degree. Rather than sequentially completing first one degree and then the other, the student's time and the University's resources may sometimes be conserved by providing arrangements that permit the student to proceed in a coordinated way toward completion of the degree objectives.

These specific programs have been formally approved and students are coded with the concurrent codes.

To earn two master's degrees, a student must complete two separate sets of minimum Graduate School degree requirements of 36 credits each for a total of 72 credits. If a program requires more than 36 credits for the master's degree, a graduate student, with prior approval of both graduate programs, may apply a maximum of 12 credits beyond 36 earned in one program toward the master's degree in the second program. Thus, the minimum number of additional credits for the second degree, with these 12 approved credits, is 24. Up to 12 credits earned toward a Ph.D. degree may be counted toward a master's degree in another program with the approval of both degree-granting units.

### **Informal Concurrent Degree Programs**

Students in these programs pursue two degrees from different departments simultaneously. These programs have not been approved as formal concurrent programs, but students complete the same requirements as in the formal concurrent programs.

Students choosing this option must complete an Informal Concurrent Degree Application, which may be obtained from the Graduate Student Services Office, 229 Gerberding.

Graduate School Memorandum No. 35: Concurrent Degree Programs contains additional information and is available from the Academic Programs office in the Graduate School or may be found through the Graduate School homepage at [www.grad.washington.edu](http://www.grad.washington.edu).

# Master's Degree

## Summary of Requirements

It is the responsibility of each master's candidate to meet the following Graduate School minimum requirements:

1. Under a thesis program, a minimum of 36 or more quarter credits (27 course credits and a minimum of 9 credits of thesis) must be earned. Under a non-thesis program, a minimum of 36 or more quarter credits of course work must be earned.
2. At least 18 of the minimum 36 quarter credits for the master's degree must be for work numbered 500 and above. (In a thesis program, 9 of the 18 credits must be course credits and 9 may be for 700, Master's Thesis.)
3. Numerical grades must be received in at least 18 quarter credits of course work taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
4. A minimum of 30 credits must be earned at the University of Washington.
5. In a thesis degree program, a thesis, approved by the supervisory committee, must be submitted to the Graduate School. A student must register for a minimum of 9 credits of thesis (700). With the exception of summer, students are limited to a maximum of 10 credits per quarter of thesis (700).
6. A final master's examination, either oral or written, as determined by the student's supervisory committee, must be passed, if it is a departmental requirement.
7. Any additional requirements imposed by the graduate program coordinator in the student's major department or by the student's supervisory committee must be satisfied. A master's degree student usually takes some work outside the major department. The graduate program coordinator in the major department or the student's supervisory committee determines the requirements for the minor or supporting courses.
8. Students may now apply for the master's degree on the Web at [www.grad.washington.edu/stsv/mastapp.htm](http://www.grad.washington.edu/stsv/mastapp.htm). The online application period commences Monday, the third week of each quarter and closes Friday (midnight Pacific Time), the second week of the subsequent quarter (the quarter the student intends to graduate). For example, if competing in winter quarter, the earliest an online request can be submitted is the third week of autumn quarter and the latest is Friday of the second week of winter quarter. If degree requirements are not met in the requested quarter, students must complete another degree request for the quarter in which they expect to complete requirements. Students will receive an email confirming receipt of their Master's Degree Request.
9. The graduate student must maintain registration as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).
10. All work for the master's degree must be completed within six years. This includes quarters spent On-Leave or out of status and applicable work transferred from other institutions (see detailed information under Transfer Credit).

11. A student must satisfy the requirements for the degree that are in force at the time the degree is to be awarded.

## Second Master's Degree Requirement

A second master's degree may be earned at the UW by completing an additional separate set of requirements. Please refer to Concurrent Degree Programs earlier in this section and to Graduate School Memorandum No. 35 for more specific information.

## Transfer Credit

A student working toward the master's degree may petition the Dean of the Graduate School for permission to transfer to the UW the equivalent of a maximum of 6 quarter credits of *graduate level* course work taken at another recognized graduate school. These credits may not have been used to satisfy requirements for another degree. The petition must include a written recommendation from the graduate program coordinator and an *official* transcript indicating completion of the course work. Transfer credits are not entered on the UW transcript.

Approved transfer credits are applied toward the total credit count for the master's degree only. (Transfer credits are not applicable toward a doctoral degree.) The 18 quarter credits of numerically graded course work, and the 18 quarter credits of 500-level-and-above course work may not be reduced by transfer credit.

UW students who are within 6 credits of completing their undergraduate degree and who have met the requirements for admission to the Graduate School may register the quarter immediately preceding admission to Graduate School for up to 6 credits in 500-level courses in addition to the last 6 credits they require of undergraduate work. The graduate program which has admitted the student must approve registration for the courses. The student, after admission to the Graduate School, must file a petition with the Dean of the Graduate School to transfer the 6 credits.

The student must also provide a letter from the Office of Graduations and Academic Records stating that these credits have not been applied toward his or her undergraduate degree.

Credit taken as a nonmatriculated student or postbaccalaureate student at the UW may not be transferred into a graduate program. Credit by either independent study through correspondence or advanced credit examinations is not transferable.

## Thesis Program

The master's thesis should be evidence of the graduate student's ability to carry out independent investigation and to present the results in clear and systematic form. Two copies of the thesis, normally written in the English language, along with the appropriate forms signed by the members of the supervisory committee from the student's graduate program, must be submitted to the Graduate School by the last day of the quarter (last day of exam week) in which degree requirements are completed. The faculty in the graduate program may require that the student present an additional copy for its own use. The Graduate School publishes a booklet, *Style and Policy Manual for Theses and Dissertations*, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly *before* the student begins writing the thesis. The thesis must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School for consultation during the thesis preparation process.

A \$25 binding fee is payable at 129 Schmitz before the thesis is submitted to the Graduate School.

## Non-thesis Programs

The faculty in some graduate programs have arranged programs of study for the master's degree that do not require the preparation of a thesis. These non-thesis programs normally include a more comprehensive plan of course work for more extensive examinations than are required in thesis programs, or they may include some approved research activity in lieu of a thesis.

### Final Examination for Master's Degree

As soon as is appropriate, the graduate faculty in the student's graduate program appoints a supervisory committee, consisting of two to four members. The chair and at least one-half of the total membership must be members of the graduate faculty (see Graduate School Memorandum No. 13). The committee chair arranges the time and place of the final examination, the results of which must be reported to the Graduate School by the last day of the quarter (last day of exam week) in which degree requirements are met. At least two graduate-faculty members of the committee, including the chair, must sign the Master's Application (warrant). If the exam is not satisfactory, the committee may recommend to the Dean of the Graduate School that the student be allowed to take another examination after a further period of study.

### Application for Master's Degree

Students may now apply for the master's degree on the Web at [www.grad.washington.edu/stsv/mastapp.htm](http://www.grad.washington.edu/stsv/mastapp.htm). The online application period commences Monday, the third week of each quarter and closes Friday (midnight Pacific Time), the second week of the subsequent quarter (the quarter the student intends to graduate). For example, if competing in winter quarter, the earliest an online request can be submitted is the third week of autumn quarter and the latest is Friday of the second week of winter quarter. If degree requirements are not met in the requested quarter, students must complete another degree request for the quarter in which they expect to complete requirements. Students will receive an email confirming receipt of their Master's Degree Request. The filing of the application is the responsibility *solely of the student*. When the application is received, the student's record is reviewed in the Graduate School. All requirements for the degree must be met by the end of the current quarter if the application is to be approved. If this is not possible, the applicant is notified of deficiencies by the Graduate School. Once approved, the application is forwarded to the appropriate graduate program. Registration must be maintained for the entire quarter in which application for the degree is made. If a student should withdraw during the quarter, the application becomes void and a new one must be submitted at the appropriate time.

Upon completion of departmental requirements, the master's degree application is signed by the supervisory committee and returned to the Graduate School. It must be received by the last day of the quarter (last day of exam week) if the degree is to be conferred that quarter. If all requirements are completed after this deadline, registration for the following quarter is required.

The student and the graduate program coordinator should be thoroughly acquainted with the requirements for the particular degree.

### Master of Arts for Teachers

Master's degree programs for experienced teachers, which focus upon the fields of knowledge normally taught in the common school and the community college, have been established at the University. These programs provide alternatives to the research-oriented Master of Arts and Master of Science degree programs, which emphasize particular fields of knowledge. Programs leading to the M.A.T. degree are offered in Biology Teaching and English.

## Doctoral Degree

The doctoral degree is by nature and tradition the highest certificate of membership in the academic community. As such, it is meant to indicate the presence of superior qualities of mind and intellectual interests and of high attainments in a chosen field. It is not conferred merely as a certificate to a prescribed course of study and research, no matter how long or how faithfully pursued. All requirements and regulations leading to the doctoral degree are devices whereby the student may demonstrate present capacities and future promise for scholarly work.

### Summary of Requirements

In order to qualify for the doctoral degree, it is the responsibility of the student to meet the following Graduate School *minimum* requirements:

1. Completion of a program of study and research as planned by the graduate program coordinator in the student's major department or college and the Supervisory Committee. Half of the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the General Examination.
2. Presentation of 90 credits, 60 of which must be taken at the University of Washington.  
With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may substitute for 30 credits of enrollment.
3. Numerical grades must be received in at least 18 quarter credits of course work taken at the UW prior to scheduling the General Examination. The Graduate School accepts numerical grades in approved 400-level courses accepted as part of the major, and in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
4. Creditable passage of the General Examination. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.
5. Preparation of and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. *The Candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters.* At least one quarter must come after the student passes the General Examination. With the exception of summer quarter, students are limited to a *maximum* of 10 credits per quarter of dissertation (800).
6. Creditable passage of a Final Examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. The General and Final Examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the exam is taken and the degree is conferred.
7. Completion of all work for the doctoral degree within ten years. This includes quarters spent On-Leave or out of status as well as applicable work from the master's degree from the UW or a master's degree from another institution, if applied toward one year of resident study.
8. Registration maintained as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).

9. A student must satisfy the requirements that are in force at the time the degree is to be awarded.

### **Appointment of Doctoral Supervisory Committee**

A *Supervisory Committee* is appointed by the Dean of the Graduate School to guide and assist a graduate student working toward an advanced degree and is expected to evaluate the student's performance throughout the program. The supervisory committee should be appointed no later than four months prior to the General Examination. Appointment of the supervisory committee indicates that the graduate faculty in the student's field finds the student's background and achievement sufficient for admission into a program of doctoral study and research. "Preliminary" examinations, if required, should be completed prior to the request for appointment of the supervisory committee (see Graduate School Memorandum No. 13: Supervisory Committees for Graduate Students).

### **Admission to Candidacy for Doctoral Degree**

At the end of *two years of graduate study*, the chair of the supervisory committee may present to the Dean of the Graduate School, for approval, a Request for General Examination (signed by all supervisory committee members including the Graduate School Representative) permitting the student to take the General Examination for admission to candidacy for the doctoral degree. This means that, in the opinion of the committee, the student's background of study and preparation is sufficient to justify the undertaking of the examination. A warrant is issued to the department if the Graduate School requirements have been met. The Request for General Examination must be received at least three weeks prior to the proposed examination date. Written and other examinations prior to the oral are the responsibility of the graduate program and do not need Graduate School approval. At least four members of the committee (including the chair, GSR, and one additional graduate faculty member) must be present at both the General and Final Examinations. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.

If the student's performance is judged by the supervisory committee to be satisfactory, the signed warrant certifying successful completion of the General Examination is filed in the Graduate School. If the General Examination is unsatisfactory, the supervisory committee may recommend that the Dean of the Graduate School permit up to a maximum of two additional re-examinations, after a further period of study. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School.

Thereafter, the student is identified and designated as a *Candidate* for the appropriate doctoral degree and is awarded the Candidate's certificate. After achieving Candidate status, the student ordinarily devotes his or her time primarily to the completion of research, writing of the dissertation, and preparation for the Final Examination.

The Candidate's certificate and the doctoral degree may not be awarded in the same quarter.

### **Candidate's Certificate**

The Candidate's certificate gives formal recognition of the successful completion of a very significant step toward the doctoral degrees awarded through the Graduate School: Doctor of Philosophy, Doctor of Education, and Doctor of Musical Arts. Students who have passed the Graduate School General Examination and who have completed all requirements for the

degree except the dissertation and the Final Examination are awarded the Candidate certificate.

### **Dissertation and Final Examination**

The Candidate must present a dissertation demonstrating original and independent investigation and achievement. The dissertation should reflect not only mastery of research techniques but also ability to select an important problem for investigation and to deal with it competently. Normally the dissertation is written in the English language. However, if there are circumstances that warrant the dissertation be written in a foreign language, approval must be received from the Dean of the Graduate School. The Graduate School publishes a booklet, *Style and Policy Manual for Theses and Dissertations*, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly *before* the student begins writing the dissertation. The dissertation must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School, and students are encouraged to consult with them throughout the dissertation preparation process.

When the supervisory committee agrees that the doctoral Candidate is prepared to take the Final Examination, the Dean of the Graduate School should be informed of the decision and asked to designate a reading committee consisting of at least three voting members of the supervisory committee.

Once the reading committee is established officially with the Graduate School, a Request for Final Examination (signed by all members of the supervisory committee including the Graduate School Representative) is presented to the Graduate School three weeks prior to the Final Examination date, and if the Candidate has met all other requirements, a warrant authorizing the Final Examination is issued by the Graduate School. At least four members of the committee (including the chair, GSR, and one additional graduate faculty member) must be present at both the General and Final Examinations.

If the Final Examination is satisfactory, the supervisory committee signs the warrant and returns it to the Graduate School by the last day of the quarter in which the degree requirements are completed. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School. If the examination is unsatisfactory, the supervisory committee may recommend that the Dean of the Graduate School permit a second examination after a period of additional study.

After the Final Examination, the doctoral Candidate has 60 days in which to submit the dissertation to the Graduate School. Registration as a graduate student is required the quarter the dissertation is submitted and the degree is conferred.

### **Publication of Doctoral Dissertations**

Part of the obligation of research is publication of the results, and in the case of doctoral research, this means microfilm publication of the dissertation and/or abstract. This is a Graduate School requirement in addition to any previous or planned publication of any or all of the dissertation and provides worldwide distribution of the work. The Candidate submits the publication agreement when the dissertation is presented to the Graduate School. Publication in microfilm does not preclude other forms of publication.

The following fees for microfilming the doctoral dissertation are paid at the Cashier's Office, 129 Schmitz (all fees are subject to change): microfilming the entire dissertation, \$60; *optional* copyright fee (applicable only when the entire dissertation is microfilmed), \$45; or microfilming of only the abstract, \$60. *These fees are in addition to the \$25 binding fee.*

### **Individual Ph.D. Program**

The Graduate School maintains the Individual Ph.D. (IPh.D.) Program for exceptionally able students whose objectives for study are of an interdisciplinary nature that cannot be met within one of the University units authorized to grant the Ph.D. degree. The program is intended for dissertation topics that require supervision from two or more of the disciplines in which the University offers the Ph.D. degree. It is not intended as a mechanism for offering the Ph.D. degree within units that do not have their own authorized Ph.D. programs.

A graduate student may apply to the IPh.D. Program when he or she has completed the master's degree, or has been admitted to the Graduate School and has completed at least three quarters of full-time work at the UW, and has carefully planned an appropriate program of studies.

Proposals, including GRE scores, are due by December 15 of each year, and decisions on admission are made by May 31 of the following year. Information and application materials for the Individual Ph.D. Program are available at [www.grad.washington.edu/inter/iphd.htm](http://www.grad.washington.edu/inter/iphd.htm).

---

# Program Descriptions

## College of Architecture and Urban Planning

224 Gould  
www.caup.washington.edu

**Dean**  
Daniel Friedman

**Associate Deans**  
Katrina Deines  
Jeffrey Ochsner  
Douglas Zuberbuhler

The College of Architecture and Urban Planning (CAUP) comprises four departments that are directly concerned with the design and development of the physical environment: Architecture, Construction Management, Landscape Architecture, and Urban Design and Planning.

The College offers a variety of programs and degrees focusing on the environmental design disciplines within a liberal arts education. The undergraduate programs of the departments of Construction Management and Landscape Architecture lead to professional degrees that serve as the educational credentials for careers in their respective fields. The College also offers two Bachelor of Arts programs: A pre-professional undergraduate major in architectural studies which prepares students for professional programs as well as related roles in society, and a major in community, environment, and planning. Further, the College offers a dual major leading to a Bachelor of Arts in Architectural Studies and a Bachelor of Science in Construction Management, a program that requires 225 credits. Master's degrees are also offered in the College: Master of Architecture, Master of Science in Architectural Studies, Master of Science in Construction Management (evening degree), Master of Urban Planning, and Master of Landscape Architecture. Master's students may elect to work toward the Certificate in Urban Design or the Certificate in Historic Preservation. A Ph.D. program in built environment is offered as well as an interdisciplinary Ph.D. in urban design and planning, available through the Graduate School. All curricula encompass an appropriate level of design and technical understanding and include broader social, economic, and cultural issues fundamental to understanding, preserving, and enriching our built and natural environments.

As part of a major university and metropolis in the Pacific Northwest, the College is able to reinforce its program by using this setting as a laboratory for study. The College works closely with various professional communities to build curricula and a faculty attuned to the understanding and creation of an appropriate physical environment.

Research centers include:

- \* Runstad Center for Real Estate and Community Development
- \* Center for Environment, Education, and Design Studies
- \* Institute for Hazard Mitigation Planning and Research
- \* Urban Ecology Research Laboratory
- \* Institute for Collaborative Building
- \* Northwest Center for Livable Communities

Educational programs include:

- \* Architecture
- \* Community, environment, and planning
- \* Construction management
- \* Landscape architecture
- \* Real estate
- \* Continuing education/extension programs
- \* Historic preservation certificate program
- \* Urban design certificate program

### Institute for Hazard Mitigation Planning and Research

Robert Freitag, Director

The Institute for Hazard Mitigation Planning and Research was established in 1999 as a vehicle for research, teaching, and public service to address the mitigation of natural and man-made hazards through planning and design, and through the integration of mitigation principles into a wide range

of disaster and risk-management opportunities. The institute's approach is interdisciplinary, with close links to other academic research units in the University and to risk management organizations in government and industry.

The research agenda is aimed at developing practical mitigation solutions that can be incorporated into local government land-use planning, development regulation, infrastructure, and emergency management; state and federal response to disasters; planning for business continuity; and planning for post-disaster recovery and reconstruction.

The institute is also pursuing curriculum development to incorporate mitigation principles and methods into existing and new courses in the College's degree programs.

### Urban Design Certificate Program

410 Gould

Jeffrey Ochsner, Director  
Neile Graham, Program Coordinator

The College of Architecture and Urban Planning administers a special graduate-level program that leads to the Certificate of Achievement in Urban Design. Since 1968, this interdisciplinary program has provided a collective framework that allows students to specialize in the study and design of the urban environment as part of their professional education.

The 14-member faculty offers backgrounds in urban design as well as in architecture, landscape architecture, and urban planning. In addition, the communities of the Puget Sound region provide a unique learning laboratory for students to experience the issues and professional activities of urban design. A core curriculum and mandatory coursework in four substantive areas provide the student with a firm grounding in theory, methods, and practical skills. The program is normally seven quarters in length, concurrent with the master's program.

Students accepted for graduate work by the departments of Architecture, Landscape Architecture, or Urban Design and Planning are eligible for the program if they possess the necessary design abilities prior to enrollment in advanced studios.

### International Programs

224 Gould

The departments of the College offer many opportunities for foreign study in which participants earn academic credit while studying abroad. Programs in Rome and Mexico are sponsored on a regular basis. In addition, various study and exchange opportunities exist in such locations as Germany, the Scandinavian countries, Colombia, Mexico, India, and Japan. Faculty exchanges with foreign institutions occur regularly.

### University of Washington Rome Center

95 Piazza del Biscione, Rome, Italy

Katrina Deines, Director

The College maintains a permanent year-round facility in Rome. Studio and classroom spaces, a library, administrative offices, and housing accommodations for faculty are located in the Palazzo Pio on the Campo de Fiori. The Rome Center is used by UW programs in classics, Romance languages, art, art history, English, creative writing, and comparative history of ideas, as well as by the departments of the College of Architecture and Urban Planning. The Rome Center fosters interaction among students from the University and other institutions, together with practicing professionals residing in or visiting Rome. Several major universities regularly share studio critics and lecturers.

## Remote Sensing Applications Laboratory

12 Gould

Frank Westerlund, Director

The Remote Sensing Applications Laboratory (RSAL) is a facility for teaching, research, and public service applications of remote sensing and geographic information technologies in environmental planning and design. Remote sensing includes aerial photography and satellite systems that record earth-surface data in image or digital form for subsequent interpretation by visual or computer techniques and incorporation into geographic information systems. Research applications have included land-use mapping, urban form analyses, growth-management studies, development siting, natural-resource inventories, and environmental analysis. RSAL houses an extensive collection of air photo, satellite data, map, and documentary resources. In addition to optical photo interpretation equipment, the laboratory utilizes UNIX and NT workstation-based software systems such as ERDAS image processing and ArcInfo GIS.

### Facilities

#### Computing

Mark Baratta, Director

The CAUP Office of Computing provides a wide variety of specialized computing resources and support services for the College's students, faculty, and staff. These resources include the following:

- \* several networked Windows and Macintosh computing labs with a wealth of software, including CAD, GIS, multimedia, 2D/3D graphics, rendering, animation, scheduling, estimating, bid analysis, project management, modeling, design, spreadsheet, and document preparation packages;
- \* slide and document scanning facilities;
- \* printing and large-format color plotting;
- \* digital still and video cameras and processing software;
- \* Student Computing Loaner Program, which provides checkout of laptop computers, digital still and video cameras, and video/computer projectors to CAUP students;
- \* consulting office for in-person support, along with support via phone and email.

Additionally, students receive UWNetID computing accounts from the University's central computing organization, Computing and Communications. The UWNetID allows attachment to the campus network (either locally or via dial-up) and access to email, disk space for file storage and Web pages, and many computing, course scheduling, bibliographic, and library resources.

#### Lighting Applications Laboratory

The Lighting Applications Laboratory includes a variety of facilities for use by students and faculty members in conjunction with lighting classes, design-studio courses, and research work. Equipment in the lighting workshop includes lamps and lighting fixtures, sample models and model-building materials, a mirror-box artificial sky, a direct-beam sunlight simulator, assorted light meters and data loggers, cameras, and demonstration displays.

The Department of Architecture is a co-sponsor of the Lighting Design Lab. This lab, a 10,000-square-foot, half-million-dollar facility, was designed to demonstrate the energy conservation potential of state-of-the-art architectural lighting technology. It is operated by Seattle City Light in downtown Seattle. Students can take various positions in the lab as interns. It is also available to assist in their lighting design and testing, as it does with regional architectural offices.

#### Photography Laboratory

A large photography laboratory is provided with studio and darkroom facilities for use by photography classes, design-studio classes, special instruction, and independent activity.

#### Shop

A fully staffed and equipped wood-, plastic-, and metal-working shop provides students an opportunity to design and build selected projects. The shop is used as an instructional facility in conjunction with studio,

structures, and materials classes. Thesis and other individual activity also can be accommodated.

### Library

The Architecture-Urban Planning Library, 334 Gould, is the primary location for materials on architecture, landscape architecture, construction management, and urban design and planning. The collection contains 42,500 volumes, 7,500 microforms, and 300 currently received serial subscriptions. Access to its collection is provided through the UW Libraries Information Gateway, a single World Wide Web location which encompasses all the library's print and electronic resources as well as tools, services, and the ability to search the library's catalog and a wide range of Internet resources. The Gateway is available in all UW libraries and on the Web at [www.lib.washington.edu](http://www.lib.washington.edu).

### Visual Resources Collection

Heather Seneff, Director

The slide collection consists of approximately 100,000 images covering architectural, landscape, design and planning, and construction subject matter, supporting the curricular and research needs of the College. New materials for lectures and projects are continually added.

### Student Organizations

Chapters of American Institute of Architects Students, American Society of Landscape Architects, Associated General Contractors, Planning Students Association, and the Historic Preservation Association provide opportunities for undergraduate and graduate students to meet informally and to participate in a variety of projects and events.

## Undergraduate Degree Programs

### College Bachelor Degree Programs

- \* Bachelor of Arts in Architectural Studies
- \* Bachelor of Arts in Community, Environment, and Planning
- \* Bachelor of Landscape Architecture
- \* Bachelor of Science in Construction Management
- \* In addition, the College offers a minor in Landscape Architecture and a dual degree which combines the Bachelor of Arts in Architectural Studies with the Bachelor of Science in Construction Management

## Historic Preservation Certificate

The College of Architecture and Urban Planning offers education in historic preservation. This reflects a conscious choice to emphasize preservation within the context of individual design professions. The curriculum offers an awareness and familiarity with issues involved in identification, designation, interpretation, and preservation of historic places, as well as restoration, adaptive reuse, and design of sympathetic new construction in historic contexts.

Program Coordinator  
Box 355740  
206-543-5996

### Admission Requirements

Open to students accepted into a graduate program in the College of Architecture and Urban Planning. Application is made first for admission to a degree program within the college. Once accepted, a separate "Statement of Interest" form is required. Application is made within the first two weeks of classes for two-year degree programs, and by the end of the first year for three-year programs.

### Certificate Requirements

12-15 credits, as follows:

- \* Track I: Requirements for Students in the M.Arch. Degree Program
  - o Required courses: ARCH 500 (6), ARCH 582 (3), ARCH 590 (3); either ARCH 457 (3) or ARCH 488 (3); URB DP 587 (3); either URB DP 585 (3) or URB DP 586 (4); an advanced studio on preservation design or design in an historic context.

- o Elective courses: Two additional electives in areas related to preservation in architecture, planning, or related design.
  - o Thesis: Thesis topic with content in the area of preservation design or related issues in historic preservation. Thesis committee chaired by a member of the Preservation Planning and Design faculty.
- \* Track II: Requirements for Students in the M.L.A., M.U.P., and Ph.D. Degree Programs
- o Core courses: URBDP 585 (3), URBDP 586 (4), one graduate seminar in preservation planning, URBDP 512 (3)
  - o Mandatory course areas: either one graduate course in each of the following areas or a three-quarter sequence in one area: U.S. history; urban history/history of city planning; architectural history
  - o Preservation planning and design: 5 credits of a preservation studio or some combination of design-related courses
  - o Optional internship (5 credits)
  - o Thesis: Thesis topic with content in the area of preservation planning and design or related issues in historic preservation. Thesis must be chaired by a member of the Preservation Planning and Design faculty.

## Architecture

208 Gould  
depts.washington.edu/archdept

Architecture includes the study of design, graphics, computing, building structures, construction materials, environmental control systems, history, theory, and professional practice. It also draws from a broad range of fields including ecology, sociology, psychology, cultural studies, and law.

## Undergraduate Program

Adviser  
208 Gould Hall, Box 355720  
206-543-3043  
bainfo@u.washington.edu

Advising for the first two years of the program is done through the Undergraduate Gateway Center, 171 Mary Gates Hall.

The Department of Architecture offers the following programs of study:

- \* The Bachelor of Arts degree with a major in architectural studies
- \* A dual-degree program leading to the Bachelor of arts degree with a major in architectural studies and the Bachelor of Science degree in construction management
- \* A minor in architecture

The B.A. in architectural studies is a pre-professional degree that prepares candidates for admission with advanced standing to professional architectural programs. It is also good preparation for other roles in society, government, development, management, planning, art, graphic design, digital arts, and the like. These benefit from an understanding of and exposure to architectural design and problem solving.

Students may also choose a dual major in both Architecture and Construction Management and can receive both the B.A. with a major in Architectural Studies and the B.S. in Construction Management. Five years of study is usually the minimum necessary to complete the requirements for both degree programs.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* See Department Admission Requirements below.

### Department Admission Requirements

1. 90 credits to include the following:
  - a. *Preparatory Architectural Course Work (17 credits):* ARCH 350, ARCH 351, ARCH 352 (9 credits); ARCH 210, ARCH 211 (8 credits). Note: These courses can be taken through UW Extension on a nonmatriculated basis, prior to admission to the UW, or they can be taken in the sophomore year on campus.
  - b. *General Education Requirements (70 credits):* English composition (5 credits); Visual, Literary, and Performing Arts (VLPA) (20 credits); Individuals and Societies (I&S) (20 credits); Natural World (NW) (20

credits, including MATH 112, MATH 124, or MATH 145); additional Areas of Knowledge (5 credits).

### c. *Electives (3 credits)*

2. While the cumulative GPA is an important factor in the admission evaluation, the committee places emphasis on the evaluation of performance in the preparatory architectural course work the student has completed. It is to the student's advantage to take as many of these courses as possible before applying.
3. *Application deadline:* May 15 for autumn quarter only. Prerequisite courses must be completed by the time the student enters the program in autumn quarter.

## Major Requirements

90 credits as follows:

1. *Preprofessional Coursework (69 credits):* ARCH 300, ARCH 301, ARCH 302, ARCH 315, ARCH 320, ARCH 321, ARCH 322, ARCH 332, ARCH 380, ARCH 400, ARCH 401, ARCH 402, ARCH 431, ARCH 460. One selective course in each of the following areas: (1) graphics/media; (2) history/theory; (3) building science/materials. Selective courses to be chosen from approved lists maintained by the Department.
2. 21 credits of approved upper-division electives.
3. The final 45 credits must be completed as a matriculated student in residence at the UW.
4. Minimum 2.50 cumulative GPA for all work done in residence.

## Dual Degree Program

### Admission Requirements

Dual degree majors first apply to the architecture program and must meet architecture admission requirements. Admitted architecture students apply to the construction management program during spring quarter of their junior year (first year in the architecture program). For architecture students, construction management prerequisites are waived, but such students must take CM 313 and CM 323 prior to the construction management application deadline, April 1.

### Dual Degree Program Requirements

133 credits as follows:

1. *Architecture Foundation Courses (60 credits):* ARCH 300, ARCH 301, ARCH 302, ARCH 315, ARCH 320, ARCH 321, ARCH 322, ARCH 380, ARCH 400, ARCH 401, ARCH 402, ARCH 431, ARCH 460.
2. *Architecture Selectives (6 credits):* 3 credits of graphic/media selective chosen from among the following BIM-recommended courses: ARCH 316, ARCH 410, ARCH 412, ARCH 413, ARCH 415, ARCH 418, ARCH 478, ARCH 481, ARCH 482, ARCH 484, ARCH 485, ARCH 486, ARCH 498. 3 credits of history/theory selective from among the following courses: ARCH 441, ARCH 442, ARCH 450, ARCH 452, ARCH 455, ARCH 457.
3. *Construction Management Courses (64 credits):* CM 310, CM 311, CM 312, CM 313, CM 321, CM 322, CM 323, CM 331, CM 332, CM 333, CM 334, CM 410, CM 411, CM 412, CM 421, CM 422, CM 423, CM 431 (capstone experience), CM 432, CM 433, B CMU 301.
4. *Construction/Construction Science Electives (6 credits):* Two of the following courses: CM 415, CM 420, CM 425, or ARCH 420.
5. *Approved Electives (3 credits):* May be chosen from among CM or ARCH courses.
6. Minimum 2.50 cumulative GPA for all work done in residence.

Note: A minimum of 225 credits is required to complete a dual degree.

## Minor

*Minor Requirements:* 25 credits to include a minimum of 20 credits in ARCH courses (at least 9 credits at the upper-division level) and 5 additional upper-division credits from courses in the College.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The architectural studies program emphasizes a broad liberal arts foundation followed by a focus on entry-level courses in architectural design, theory, the technology of building, and materials. Specific goals for student learning include an understanding of the organization of three-dimensional space in response to specific human needs; the sequences and history of human building activities; various architectural theories and current thought

about the aesthetics of design; construction materials and their properties; building systems and their integration for human comfort; structural principles, relationships of buildings to their sites; social, political, legal, and economic influences of design and construction. Specific goals in the area of personal development include an ability to visualize three dimensions and think spatially; graphic, verbal, and written communication skills for design development and presentation; an ability to think critically and exercise self-criticism.

- \* *Instructional and Research Facilities:* Departmental and College facilities include the following:
  - o Design Machine Group, a collaborative design and computing research lab and studio aimed at fostering and developing ideas that will shape the future of design and information technology.
  - o UW Rome Center, housed in the Palazzo Pio on the Campo de' Fiori of Rome, provides studio and classroom spaces for students participating in Italian studies programs.
  - o The Lighting Applications Laboratory is operated by the department for use by students and faculty in conjunction with lighting classes, design studio, courses, and research work.
  - o Photography Laboratory: A large and well-equipped laboratory for black-and-white photography operated by the department for the College provides studio and darkroom facilities for use by photography classes, design studio classes, special instruction, and independent activity.
  - o Wood and Metal Shop: Large and well-equipped wood and metal working shops are available for student and class projects.
- \* *Honors Options Available:* None offered
- \* *Research, Internships, and Service Learning:* Internships are available and vary according to individual interests within the program. See adviser for details.
- \* *Department Scholarships:* A limited number of department scholarships are available to eligible students entering their final year of the major.
- \* *Student Organizations/Associations:* AIAS (American Institute of Architectural Students)

### Of Special Note:

Most states require that an individual intending to become an architect hold an accredited degree. Two types of degrees are accredited by the National Architectural Accrediting Board (NAAB): (1) the Bachelor of Architecture, which requires a minimum of five years of architectural study (this degree is not offered at the University of Washington), and (2) the Master of Architecture, which requires a minimum of three years of study following an unrelated bachelor's degree or two years following a related pre-professional bachelor's degree. These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects.

The UW's four-year, pre-professional degree is not accredited by NAAB. The pre-professional degree is useful to those desiring a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment options in fields related to architecture.

Architectural education at the University of Washington requires a minimum of six years of higher education to attain the first professional degree, the Master of Architecture. The curriculum is divided into three two-year segments of course work with a pre-professional Bachelor of Arts degree (with a major in Architectural Studies) awarded at the completion of the second two-year segment. The professional degree, Master of Architecture, is awarded only upon completion of the third segment. (Students with bachelor's degrees in unrelated fields take an additional year of course work.)

## Graduate Program

Graduate Program Coordinator  
208 Gould, Box 355720  
206-543-4180  
archinfo@u.washington.edu

The Department of Architecture offers two graduate level degrees: the Master of Architecture (M.Arch.) degree, a professionally accredited architecture degree; and the Master of Science (M.S.) degree in Design Computing, an advanced research-oriented degree for those who already

hold a professional or pre-professional degree in architecture or an allied design discipline (or can show evidence of equivalent preparation for work in design computing). Those interested in professional careers in architecture should apply to the Master of Architecture program.

## Master of Architecture

The Master of Architecture degree is the only professional degree offered by the Department of Architecture. Completion of the requirements of this nationally accredited degree program satisfies the educational requirement for licensing (registration) as an architect. The accredited M.Arch. program accommodates two groups of undergraduate degree holders: (1) persons holding a pre-professional four-year degree, such as a Bachelor of Arts in Architecture (or equivalent), who normally will require seven or eight quarters of study; (2) persons with an undergraduate degree in an unrelated field, who normally will require ten or eleven quarters, over a period of at least three years, to complete the requirements for the degree. This three-year program may vary somewhat in duration and specific course work required, depending on selection of concentration/study areas and prior academic and professional experience.

Candidates with a pre-professional four-year degree, such as Bachelor of Arts (in architecture) or the equivalent, usually undertake six full-time quarters of study including completion of a thesis for the M.Arch. degree. This program typically requires 91 credits of course work, including 30 credits of design studio, 30 credits of approved core courses, 9 credits of thesis, and 15 credits of electives. Special interests and certificate programs often can be accommodated within the 15 credits of electives and design-studio options.

Persons holding degrees in other fields normally take three quarters of preparatory course work to develop knowledge and skills equivalent to those of students who enter the program from undergraduate architecture programs. Upon completion of preparatory course work, the students merge with students in the two-year program described above.

The department offers an advanced M.Arch. degree program for persons holding an accredited professional five-year Bachelor of Architecture degree (and those already holding an accredited Master of Architecture degree). For these candidates the program represents a specialization or in-depth study of a specific area or interest in the field. Each student's program is developed on an individual basis in consultation with faculty advisers. The approved program of study becomes the student's curriculum, which must be completed for award of the degree. Typically this program involves a minimum of 45 credits of required course work, including a thesis, and can be completed in four or five quarters. Those seeking advanced study of design computing should apply to the Master of Science (M.S.) in Architecture degree program, not the post-professional M.Arch.

## Admission Requirements

- \* Scholastic record and aptitude as evidenced by transcripts from baccalaureate (or higher) degree and GRE test scores, to be taken within the last five years. Primary emphasis is placed on more recent and architecturally-related coursework.
- \* Minimum grade point average of 3.00 (B) or better in the last 90 graded quarter hours or last 60 semester hours.
- \* A portfolio of work in visual arts and/or design. The portfolio is of primary significance for candidates from design backgrounds who desire advanced standing; however, applicants from other fields must show some graphic evidence of interest and aptitude in the design arts as well.
- \* The applicant's Statement of Purpose for clarity, purpose and the extent to which the program can be expected to prepare him/her for those objectives.

The Statement of Purpose is particularly significant for those applying for the post-professional M.Arch. program. Where appropriate the candidate should include a proposed schedule of coursework and identify faculty that will be involved in the study.

- \* The applicant's background and experience in architecture and related fields.
- \* Written recommendations from three persons who can evaluate the applicant's past record and future promise of success in the program.

## Degree Requirements

91-145 credits, as follows:

- \* *For students without an architecture background a preparatory year is required (54 credits):* ARCH 303 (6), ARCH 304 (6), ARCH 305 (6), ARCH 310 (3), ARCH 311 (3), ARCH 312 (3), ARCH 320 (3), ARCH 321 (3), ARCH 322 (3), ARCH 331 (3), ARCH 332 (3), ARCH 350 (3), ARCH 351 (3), ARCH 352 (3), ARCH 360 (3)
- \* *First-year requirements:* ARCH 420 (4), ARCH 432 (3), ARCH 433 (3), ARCH 500 (6), ARCH 501 (6), ARCH 502 (6), ARCH 530 (3), ARCH 570 (3), ARCH 590 (3), ARCH 591 (3), electives (6)
- \* *Second-year requirements:* ARCH 503 (6), ARCH 504 (6), ARCH 595/599 (3), ARCH 700 (9), professional practicum selectives (6), graduate seminar selectives (6), electives (9)

## Master of Science

The Master of Science (M.S.) in Architecture program offers an advanced and specialized graduate degree in architecture. The M.S. in Architecture is currently offered with a single area of specialization, design computing. Applicants should hold a degree in architecture or an allied design discipline. Candidates from a wide range of disciplinary backgrounds who are interested in pursuing education in research and applications of design computing that include design methods, cognition and computation, design collaborations, human/computer interface in design, visual architecture, physical computing, and related areas are encouraged to apply.

## Admission Requirements

- \* Scholastic record and aptitude as evidenced by transcripts from baccalaureate (or higher) degree and GRE test scores (Graduate Record Examination) taken within the last five years
- \* A baccalaureate degree from an accredited United States college or university (or its equivalent in a foreign institution)
- \* Minimum grade point average of 3.00 (B) or better in the last 90 graded quarter hours or last 60 semester hours
- \* A portfolio of work in design in architecture or an allied discipline (or similar work appropriate to the program). The portfolio should include evidence of the applicant's preparation for the study in design computing.
- \* The applicant's Statement of Purpose for clarity, purpose and the extent to which the M.S. in Design Computing program can be expected to prepare him/her for those objectives
- \* The applicant's background and experience in architecture or an allied discipline (or related experience appropriate to the program), as well as preparation for advanced work in design computing, information technology, digital media or the like.
- \* Written recommendations from three persons who can evaluate the applicant's past record and future promise of success in the M.S. in Design Computing program

## Degree Requirements

45 credits, as follows:

- \* *Core Curriculum:* ARCH 587 (3), ARCH 588 (3), ARCH 599 (3)
- \* *Required Coursework:* One of the following: ARCH 402 (6), ARCH 403 (6), ARCH 503 (6), ARCH 504 (6), ARCH 505 (6); ARCH 481 (3); ARCH 484 (3); ARCH 486 (3); either ARCH 482 (3) or ARCH 483 (3)
- \* *Electives:* 9 credits to be chosen from Design Computing courses, or any other relevant courses.
- \* *Thesis:* 9 credits of ARCH 700

## Certificate Programs

Graduate students may elect to participate in the College-wide certificate programs in urban design and preservation planning and design. (See program descriptions in the preceding College section.) The department also offers a certificate program in lighting design.

## International Studies

The department offers the Architecture in Rome program at the University of Washington Rome Center, and the Design/Build Mexico program in Cuernavaca, Mexico. Other programs have included summer study of the Italian Hill Towns and in Portugal and Scandinavia, and numerous

exchanges including Scandinavia, England, Germany, Hong Kong, Colombia, Japan, and Australia.

## Financial Aid

Each spring quarter the department awards scholarships and assistantships for the following academic year. These are more typically available to students already enrolled in the architecture program at the time of the awarding, although some financial aid is offered to newly entering students. Other financial aid and assistantship possibilities may be found through the Graduate School Fellowship Division and the Office of Student Financial Aid in Schmitz Hall.

## Built Environment

410 Gould  
[www.caup.washington.edu/phdprograms/builtenv/](http://www.caup.washington.edu/phdprograms/builtenv/)

The Ph.D. in Built Environment is a college-wide, interdisciplinary degree program housed within the College of Architecture and Urban Planning. The Ph.D. program provides students with a common core of substantial, integrated knowledge concerning the multi-faceted built environment and then offers areas of specialization in three discrete fields of knowledge and practice:

- \* Sustainable Systems and Prototypes (across a range of scales, from building elements and assemblages, to buildings, site and neighborhood context, city, and region)
- \* Computational Design and Research (covering the spectrum of design, planning, and construction processes, practices, and pedagogy)
- \* History, Theory, and Representation studies (focusing on issues of regional-global modernity)

## Graduate Program

Graduate Program Coordinator  
410 Gould Hall, Box 355740  
206-543-5996

## Doctor of Philosophy

### Admission Requirements

- \* Three letters of recommendation (Please use this downloadable form.)
- \* Curriculum vitae
- \* An exhibit of work which best illustrates the applicant's interests and abilities in areas related to the built environment must be submitted. This may be an essay, a paper, a publication, a report, or a project for which the applicant has had major responsibility. The exhibit is not returned and should fit in letter-size files.
- \* Statement of Purpose
- \* Graduate Record Exam (GRE) scores
- \* Prospective international, immigrant and permanent resident students whose native language is other than English and who have not received a bachelor's or master's degree from an accredited institution where the native language is English must submit a satisfactory TOEFL score (Test of English as a Foreign Language). The minimum allowable TOEFL score is 500. Students admitted with scores below 580 are tested for English proficiency upon arrival and are required to complete any assigned ESL courses along with their regular academic program.

### Program Requirements

90 credits minimum, to include the following:

- \* *Core courses (21 credits):*
  - o B E 551 (3), B E 552 (3), B E 553 (3)
  - o B E 550 (6 quarters at 1 credit each)
  - o *Research methods and design:* choice of 6 credits from list, including both qualitative and quantitative coursework
- \* *Specialization (minimum 30 credits):* One of three fundamental areas (sustainable systems and prototypes; computational design and research; history, theory, and representation). Each student selects one of these areas, within which she or he takes advanced and specialized coursework and, eventually, conducts the dissertation research project. Each student must take 30 credits in the chosen area of specialization during the first several years in the program, before undertaking the

qualifying examinations. A broad selection of courses, both within the College of Architecture and Urban Planning and in other UW units, is available.

- \* *Examinations:* The qualifying examination consists of written responses to three questions, followed by an oral examination on the material. The written and oral examinations are composed, conducted, and evaluated by the student's formally appointed dissertation committee.
- \* *Dissertation (30 credits):* 30 credits, concluding with a final oral defense.

---

## Construction Management

120 Architecture  
depts.washington.edu/cmweb

Construction management is a diverse discipline focused on the delivery of projects that compose the world's built environment. Included are the determination of project requirements, management of design, procurement of materials, and management of the construction of the project within cost, time, and design parameters. In terms of dollar value output, the construction industry is the largest single production activity in the U. S. economy -- accounting for almost 10 percent of the gross national product. The construction industry is heterogeneous and enormously complex. The major classifications of construction differ markedly from one another: residential, commercial, industrial, and infrastructure, as well as specialties such as electrical, mechanical, framing, excavation, and roofing. Construction management is the study of how projects are conceived, designed and built; the types of materials and methods used; techniques for estimating the cost of construction; design and contract law; construction accounting; oral and written communications; safety requirements; project planning, and project management.

### Undergraduate Program

Adviser  
120 Architecture, Box 351610  
206-543-6377  
uwcm@u.washington.edu

The Department of Construction Management offers the following program of study:

- \* The Bachelor of Science in Construction Management degree
- \* A dual-degree program leading to the Bachelor of Arts with a major in architectural studies and the Bachelor of Science in Construction Management

Students complete the first two years of study as an undeclared major in the College of Arts and Sciences or a community college. During these two years, students complete program prerequisite requirements. Upon admission to the major, students take the prescribed curriculum shown below.

### Bachelor of Science

*Suggested First-and Second-Year Courses:* M E 123; PHYS 114, PHYS 115, PHYS 117, and PHYS 118; CHEM 120; ECON 100; ENGL 131, ENGL 281; ESS 101; MATH 112, MATH 124, or MATH 145; ACCTG 215 and ACCTG 225, CM 250, COM 220, MGMT 200, QMETH 201.

### Department Admission Requirements

1. Minimum 88 credits in the following categories (courses must be completed by the beginning of autumn quarter to be eligible for admission that quarter):
  - a. *Construction Science:* M E 123.
  - b. *Business and Management:* ACCTG 215 and 225; MGMT 200.
  - c. *Individuals & Societies (I&S):* ECON 100, 200, or 201; 10 additional I&S credits from UW Areas of Knowledge list (CM 250 recommended).
  - d. *Natural World (NW):* PHYS 114, PHYS 115, PHYS 117, and PHYS 118; MATH 112, MATH 124, or MATH 145 or Q SCI 291; ESS 101; QMETH 201; 10 additional NW credits from UW Areas of Knowledge list (CHEM 120 or environmental studies recommended).
  - e. *Language Skills:* 5 credits from English composition list; 5 credits from "W" courses or English composition list (ENGL 131 and ENGL 281 recommended).
  - f. *Visual, Literary & Performing Arts (VLPA):* COM 220; 5 additional VLPA credits (from UW Areas of Knowledge list).

2. Admission is competitive. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation. Completion of prerequisite requirements does not guarantee admission. Completion of prerequisite requirements is not required in order to apply, but is required prior to being admitted in autumn quarter.
3. *Departmental application deadline:* April 1, for the following autumn quarter. Selection for acceptance into the program is made by early May, and all applicants are notified of the admission committee's decision shortly thereafter. Because each application is valid only once, a student whose application for admission is denied must reapply if consideration is desired in any subsequent year.

### Major Requirements

92 credits as follows:

1. *Foundation Courses (73 credits):* ARCH 320, ARCH 321, ARCH 322; B CMU 301, CM 310, CM 311, CM 312, CM 313, CM 321, CM 322, CM 323, CM 331, CM 332, CM 333, CM 334, CM 410, CM 411, CM 412, CM 421, CM 422, CM 423, CM 432, and CM 433.
2. *Construction/Construction Science Electives (6 credits):* Two of the following: CM 415, CM 420, CM 425 or ARCH 420
3. *Approved Electives (8 credits):* Upper division courses offered by the College of Architecture and Urban Planning or by the School of Business. (CM 413 recommended.)
4. *Capstone Experience (5 credits):* CM 431
5. *Additional Degree Requirement:* Minimum 2.50 cumulative GPA in upper-division college courses.

### Dual Degree Program

For the requirements for the dual-degree program in architectural studies and construction management, see the Architectural Studies page.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The study of construction management requires an interdisciplinary curriculum that contains a mix of technical, managerial, and business courses to provide graduates with the essential skills needed to be successful in the construction industry. Oral and written communication skills are strengthened through written requirements and oral presentations. Construction management skill sets include the ability to read and interpret construction contract documents; the ability to determine appropriate methods for project construction and the proper sequence for each associated construction task; the ability to estimate project costs and time requirements; the ability to evaluate project site safety hazards and take action to minimize the potential for accidents occurring; an understanding of the legal framework associated with contract construction; and the ability to manage the myriad activities associated with constructing a project. Graduates pursue careers with construction companies, design firms, public agencies, homebuilders, consulting firms, real estate developers, and construction material suppliers.

- \* *Instructional and Research Facilities:* The Architecture-Urban Planning Library (located on the third floor of Gould Hall) houses construction management books and periodicals. Additional materials are located in the Engineering Library and the Foster Library (Business School). College resources include a 30-work-station computer laboratory in Gould Hall. Departmental resources include a student lounge in Room 242, Gould Hall. The lounge contains four computers and space for student collaboration.

- \* *Honors Options Available:* None offered.

- \* *Research, Internships, and Service Learning:* An internship is required for completion of the degree program. Every student is encouraged to seek summer employment in the construction industry, to provide a taste of real-world experience and an opportunity to work for a construction firm. While the department seeks to identify opportunities for internship positions, the responsibility for securing a position rests with each student.

- \* *Department Scholarships:* A limited number of scholarships are available to eligible students.

- \* *Student Organizations/Associations:*
  - o Sigma Lambda Chi is a national student honor society for recognition of outstanding students majoring in construction management.

Membership is offered only to those students who are in the top twentieth percentile of their class. Each year the student chapter conducts community service activities.

- o Associated Students in Construction (ASIC) is an umbrella organization for several student chapters of national organizations: Associated General Contractors of America, National Association of Home Builders, and Mechanical Contractors Association of America. Activities include professional guest lectures, field trips, attendance at professional meetings and seminars, and community service.

### Of Special Note

*Dual-Degree Program:* The Department of Construction Management, in conjunction with the Department of Architecture, offers a five-year dual-degree program to provide students education in both the design and construction disciplines. Students must consult an adviser and apply to the Department of Architecture upon completion of their architecture program prerequisites. To be admitted to the construction management program, students apply at the beginning of the spring quarter of the first year in the Architecture program. The five-year curriculum is a blending of the architecture and construction management programs. Graduates of the dual-degree program receive both a Bachelor of Science in Construction Management and a Bachelor of Arts in Architectural Studies. Students interested in the dual-degree program are encouraged to consult undergraduate advisers in both departments.

## Graduate Program

Graduate Program Coordinator  
120 Architecture Hall, Box 351610  
206-616-1917

## Master of Science in Construction Management

### Admission Requirements

- \* Baccalaureate degree (B.S. or B.A.) in civil engineering, construction management, building technology, architecture, or similar field from an accredited college or university in the United States, or its equivalent from a foreign institution. Students with undergraduate degrees in an area other than construction management or building technology must demonstrate an understanding of estimating, project planning and control, and project management either by transcript, validation examination, or successful completion of the following courses: CM 410 (5); CM 411 (3); CM 421 (3).
- \* Minimum GPA of 3.00, based on the last 60 graded semester hours or last 90 graded quarter hours of undergraduate and graduate study.
- \* Graduate Record Examination (GRE) scores
- \* Statement of goals and objectives
- \* Letters of recommendation
- l International applicants whose first language is not English must submit a valid Test of English as a Foreign Language (TOEFL) or Michigan Language Test (MLT) score. A minimum score of 580 (TOEFL) or 237 (TOEFLC), or 90 on the MLT, is required for admission.

### Degree Requirements

45 credits, as follows:

- \* *Core Courses (9 credits):* CM 500 (3), CM 535 (3), CM 575 (3)
- \* *Construction Management Elective Courses (15-21 credits):* 15 to 21 credits of the following: CM 505 (3), CM 510 (3), CM 515 (3), CM 520 (3), CM 525 (3), CM 530 (3), CM 540 (3), CM 545 (3), CM 550 (3), CM 555 (3), CM 565 (3), CM 570 (3), CM 580 (3), CM 582 (3), CM 584 (3), CM 586 (3), CM 588 (3), CM 590 (2), CM 598, B E 551 (3), B E 552 (3), B E 553 (3)
- \* *General Elective Courses (12 credits):* Other graduate-level courses approved by adviser.
- \* *Thesis or Research Paper (3 or 9 credits):* Research Paper -- CM 600 (3); or thesis -- CM 700 (9)

---

## Landscape Architecture

348 Gould  
[www.caup.washington.edu/html/larch](http://www.caup.washington.edu/html/larch)

Landscape architecture is a professional design discipline that addresses both the built and natural environments. It focuses on the design, analysis,

and planning of outdoor spaces across a wide range of scales, with the intent of creating places that are both meaningful and functional. Landscape architects design everything from infrastructure elements, such as roadways, drainage systems, and parks, to prominent cultural monuments and gardens for public and private housing units. The education of a landscape architect includes aesthetic design skills, the development of social and environmental ethics, technical design skills, knowledge of a wide range of natural processes, an awareness of design history, and skills for working with other people. At the University of Washington, the focus is on urban ecological design education, which allows students to make a difference in the future of cities and urban regions all over the world.

## Undergraduate Program

Adviser  
348 Gould, Box 355734  
206-543-9240, 206-685-4006

The Department of Landscape Architecture offers the following programs of study:

- \* The Bachelor of Landscape Architecture (B.L.A) degree
- \* A minor in landscape architecture

## Bachelor of Landscape Architecture

### Department Admission Requirements

1. Completion of 90 credits to include the following:

- \* *Departmental Pre-professional Requirements:* L ARCH 300\* (usually offered autumn and summer quarters). One of the following courses (two recommended): L ARCH 352\*, L ARCH 353\*, L ARCH 450/L ARCH 451\*. A drawing or painting course in art is also recommended.

\*Transfer students: These courses are offered through UW Extension.

- \* *General Education Requirements:* Skills Requirements: English Composition (5 credits); Areas of Knowledge: Visual, Literary, & Performing Arts (20 credits); Individuals & Societies (20 credits); Natural World (20 credits to include ESS 101 and BIOL 113); W courses (10 credits, may also count toward any other requirement except the 5-credit English composition requirement).

- \* Electives to bring the total to 90 credits.

2. Undergraduate students currently enrolled at the UW may apply for admission to the department after completion of a minimum of 60 general education credits. Major status is normally granted upon completion of 90 credits and requires formal application and admission to the department.

3. Admission is competitive. Completion of the above requirements does not guarantee admission. Admission is based on academic record, a portfolio of creative work, three letters of recommendation, and other application materials. Contact the department for application materials and detailed information on admission, prerequisites, and required coursework.

4. Application Deadline: February 15 for the following autumn quarter. Students are not admitted to the program at other times. Applications must include the BLA application forms. Students should apply during their second year with the expectation of having completed six quarters of General Education requirements by autumn quarter.

### Major Requirements

Minimum 135 credits

1. *Studio Classes:* L ARCH 301, L ARCH 302, L ARCH 303, L ARCH 402, L ARCH 403, L ARCH 474, L ARCH 475, L ARCH 406, L ARCH 476
2. *History:* L ARCH 352 and L ARCH 353; and one course of environmental history
3. *Theory:* L ARCH 322, L ARCH 341, L ARCH 361, L ARCH 362, L ARCH 363
4. *Graphics:* L ARCH 411, L ARCH 412
5. *Professional Practice:* L ARCH 473
6. *Construction:* L ARCH 331, L ARCH 332, L ARCH 433

7. Directed Electives in computer, urban design and planning, ecology, environmental legislation, environmental geology, soils, environmental horticulture, forest resources, and plant identification courses to bring the minimum total for the major to 135 credits.

## Minor

*Minor Requirements:* Minimum 25 credits, including 6 studio credits (L ARCH 300); 6 landscape architecture history credits, chosen from L ARCH 352, L ARCH 353, L ARCH 450, L ARCH 451, L ARCH 498; 3 credits in theory and practice, chosen from L ARCH 322, L ARCH 341, L ARCH 361, L ARCH 362, L ARCH 462; 5 credits in any L ARCH or EHUF prefixed courses, including all L ARCH summer offerings and up to 6 credits of L ARCH foreign study courses; 5 credits of courses with the prefix ARCH, CM, or URBDP. Minimum GPA of 2.00 in courses counted toward minor.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The B.L.A. program provides a professional, accredited degree which enables graduates to practice successfully in design firms, nonprofit organizations, and public agencies. Building from a liberal arts foundation, the program focuses on developing design knowledge, skills, and abilities through a series of nine environmental- and community-based design studios.

The goals of the program are to provide students with a broad academic and professional exposure to landscape architecture and design so that their creative potential and professional growth are realized, and so that they may become leaders in the field. The education includes learning to conceptualize and design through practice on studio projects, fostering creativity, developing graphic and verbal communication skills, facilitating cognitive abilities, and developing applicable computer skills in the design process. Studios use individual, team-oriented, and interdisciplinary projects to develop strong interactive and evaluative skills. Studio education applies knowledge gained in lecture courses which include historic and contemporary concepts in landscape architecture, design theory, site planning, construction, and communications, as well as elective courses in allied disciplines. The studio sequence addresses projects from detailed to regional scales, rural and urban contexts, and diverse cultures. Overall, the program focuses on the application of ecological design strategies to urban and urbanizing areas.

- \* *Instructional and Research Facilities:* The five-year, 225-credit degree is structured around nine studios augmented by lecture courses. The program includes some opportunities for independent studies and work in professional settings. Departmental courses are complemented by elective courses from other departments, including architecture, urban horticulture, soils, geology, urban design and planning, botany, and ecology.

Landscape architecture studios are led by departmental faculty or members of the professional community. Often studios are taught jointly with faculty from other disciplines. Studios address specific areas of inquiry including basic design principles and processes, planting design, materials and craftsmanship, landscape planning for parks or natural areas, neighborhood and housing design, urban landscape design, ecological restoration, and design for ethnic cultures. A capstone studio requires students to integrate their experience of design theory, practice, and construction in a design-build project for a local community. The department currently offers study abroad programs in Canada, Mexico, Guatemala, Europe, and East Asia as well as opportunities to work with local communities and public agencies.

- \* *Honors Options Available:* None offered.

- \* *Research, Internships, and Service Learning:* Departmental lecture courses address the functioning of natural systems, site planning issues, computer applications, and cultural and sociological forces that influence the profession's work. Students are encouraged to gain real-world experience through professional experience "practica" with professional firms, organizations, or agencies.

Students enter the three-year program in the department following completion of departmental prerequisites and two years of University requirements. In addition to required course work, the program encourages students to pursue personal interests through directed and independent study within and beyond the department.

- \* *Department Scholarships:* Limited availability.

- \* *Student Organizations/Associations:* None.

## Graduate Program

Graduate Program Coordinator  
348 Gould Hall, Box 355734  
206-543-9420, 206-616-3582  
cauplarc@u.washington.edu

## Master of Landscape Architecture

The Master of Landscape Architecture program, accredited by the American Society of Landscape Architects, is a professional program that offers training in design and inquiry. The design studios form the core of this program, which is supported by rigorous independent investigation in seminars and in a thesis project. Students are expected to develop a specialty within the discipline, under the professional guidance of the faculty. The curriculum emphasizes the following:

*Urban Ecological Design.* The rapidly changing environment of the Pacific Northwest offers an excellent opportunity for courses and thesis projects to explore the connections between culture and nature and to test ideas for how social and spatial conflicts between development and conservation might be addressed. The faculty are particularly interested in the changing roles of familiar urban and suburban landscapes, as these areas are increasingly expected to function as part of an ecological infrastructure. At the same time, diverse human cultural communities have developed with differing perceptions of and values for these changing landscapes. The department offers students the opportunity to study the rich cultural resources of these human communities as they develop new relationships to their environments, and to participate in this overlap between natural and cultural processes. The department currently offers study abroad programs in Canada, Mexico, Guatemala, Europe, and East Asia as well as opportunities to work with local communities and public agencies.

*Design Leadership.* The faculty is committed to training students to be leaders in design practice and education. This includes the education of both children and adults to understand the consequences of human transactions with the natural environment. Courses are offered and research is being conducted on designing outdoor educational environments. Graduate students are also encouraged to develop independent leadership skills which provide them with self-confidence and adaptability in a rapidly changing professional world. The primary areas in which students are encouraged to develop leadership abilities are in the definition and practice of design as a basis for interdisciplinary work, environmental education and the application of ecological concepts to urban design, the use of communication technology to develop creative solutions to cultural and environmental conflicts, and international design-build projects in which students confront the global nature of contemporary development issues.

The graduate program considers applicants with and without previous design education, and encourages applications from persons with diverse academic and professional backgrounds. The faculty is experienced in teaching mature students and seeks to admit those with a range of ages, backgrounds, and interests. Students are encouraged to benefit from the location of the department within a broad and excellent research university by adding elective courses in other disciplines to their core curriculum. In addition, graduate students may elect to participate in College-wide certificate programs in Urban Design, and Preservation Planning and Design. See program descriptions in the preceding College section.

## Program Requirements

Specific program requirements are arranged to fit each student's background. Seminar and field courses are selected to help students achieve their educational goals and develop a credible specialty area within landscape architecture. Students with a previous degree in landscape architecture begin coursework with the Required Graduate Curriculum studios, while students from other educational backgrounds begin with the Basic Core design studios. The Required Graduate Curriculum includes 72 approved credits. In addition, a specialization is developed in the area of a student's individual interests (12 credits), thus encouraging students to deepen their knowledge in a particular area, while maintaining substantial flexibility for each individual.

A thesis is required. This independent project is advised by a committee of faculty, but allows the student to develop greater intellectual maturity and satisfaction by pursuing a topic she or he has selected out of personal

interest. The thesis also allows students to demonstrate a professional level of mastery of a specialized subject area. Students complete either a written and graphic product or a purely written product for the thesis, depending on the thesis model they choose to follow. Four models are available: the professional project thesis, the design critique thesis, the research thesis, and the design thesis. Students make choices about the type of thesis and the methods they will use in conjunction with their faculty adviser and committee members.

### Admission Requirements

Candidates applying to the Master of Landscape Architecture program must apply both to the Graduate Admissions Office and to the Department of Landscape Architecture by January 15 to be considered for admission the following autumn quarter.

Admission to the Graduate School requires (1) a baccalaureate degree from an accredited U.S. college or university, or its equivalent from a foreign institution; (2) a GPA of 3.00 or higher in the last 90 graded quarter hours or the last 60 graded semester hours; and (3) a Graduate Record Examination (GRE) score taken within the past three years.

Admission is competitive with priority given to applicants whose abilities, as determined by the department's admissions committee, enable them to complete the program expeditiously and with a high level of achievement. Please contact the department for additional information.

---

## Urban Design and Planning

410 Gould  
[www.caup.washington.edu/html/URBDP](http://www.caup.washington.edu/html/URBDP)

Urban design and planning deals with critical issues of human settlement and urban development. It provides communities with an informed basis for coordinated public- and private-sector action. Urban design and planning constitutes a professional field of growing complexity, responding to the urban complexities of this century. The Department of Urban Design and Planning fosters an integrative approach to education and research in planning the physical environment. The academic program includes the social, behavioral, and cultural relationships between people and the form and quality of their built and natural environment; the financial, administrative, political, and participatory dimensions of planning, design, and development; and the informational base for making deliberate decisions to shape urban areas and regions, bringing analysis together with vision.

Departmental faculty are active participants in interdisciplinary research units of the College of Architecture and Urban Planning, including the Center for Community Development and Real Estate and the Institute for Hazard Mitigation Planning and Research. Faculty also participate in the Puget Sound Regional Synthesis Model (PRISM) University Initiative Fund program. The department also administers the Remote Sensing Applications Laboratory, concerned with applications in urban planning of remote sensing and geographic information systems (GIS) technology and the Urban Ecology Research Laboratory. In addition, the College has a wide array of facilities for computer-based instruction related to design, including CAD, GIS, and visualization technology, and runs a joint program in advanced computer technology and virtual reality with the Human Interface Technology Laboratory of the Washington Technology Center.

## Undergraduate Program

Urban Design and Planning offers the following programs of study:

- \* The Bachelor of Arts degree with a major in community, environment, and planning
- \* A minor in urban design and planning

## Community, Environment, and Planning

208Q Gould

Community, Environment, and Planning (CEP) is an interdisciplinary Bachelor of Arts degree program offered through the College as one of the University's interdisciplinary undergraduate programs. CEP has gained distinction as a model for a highly personalized, active, and relevant educational experience within a large research institution. CEP students draw liberally upon the entire range of courses, faculty, and programs at the UW.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* CEP 200.

### Department Admission Requirements

- \* Minimum 90 credits completed by beginning of autumn quarter of admission.
- \* While cumulative GPA is an important factor, the admissions committee places emphasis on written essays, academic work, and a final interview.
- \* Admission is once a year, for autumn quarter. Application deadline: February 15 for early consideration. Applications submitted later are considered, depending on when admission quotas have been met.

### Graduation Requirements

- \* *General Education Requirements*
  1. *Written Communication (15 credits):* 5 credits English composition; 10 credits additional composition or W courses. W courses, if applicable, may also be counted toward Areas of Knowledge or major requirements.
  2. *Quantitative or Symbolic Reasoning (4-5 credits):* One course from the University list (MATH 112 or MATH 124 recommended). The QSR course, if applicable, may also be counted toward an Area of Knowledge or major requirement.
  3. *Areas of Knowledge (60 credits):* 20 credits Visual, Literary, & Performing Arts (VLPA); 20 credits Individuals & Societies (I & S); 20 credits Natural World (NW). Required CEP courses and other non-CEP courses used to satisfy major requirements may also be counted toward Areas of Knowledge requirements, if applicable.
  4. *Diversity Course (5 credits):* One course from an approved list. See program advisers. The diversity course, if applicable, may be counted toward an Area of Knowledge or major requirement.
- \* *Major Requirements*
  1. *Core Seminars (30 credits):* CEP 301, CEP 302, CEP 303, CEP 460, CEP 461, CEP 462.
  2. *Methods Courses (25 credits):* Chosen with guidance of program adviser.
  3. *Internship (5 credits):* CEP 446
  - \* Electives to complete minimum 180 credits for degree, varies depending on how many general education courses apply to more than one requirement.

## Minor

*Minor Requirements:* 30 credits to include URBDP 300 (5 credits); minimum 13 additional credits in URBDP-prefix courses; and 12 additional credits in planning-related courses with Urban Design and Planning adviser approval. A 2.0 minimum grade is required for each course counted toward the minor. See departmental adviser for recommended courses.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* A CEP education is founded on the following: start where you are; articulate and embrace a vision of how you intend to make a difference in the world; construct a plan (with guidance from faculty and peers) of CEP seminars, cross-disciplinary courses, and field experiences; move deliberately with this plan in the final two years of undergraduate education; through first-hand experience and in the context of the CEP community of learners, become acquainted with effective ways for working constructively together to anticipate and address critical issues facing the complex communities and world we inhabit.

A CEP education is fully lived, not passively taken. CEP students actively make their education in community with others. Students learn in groups of seventeen. Each group comprises a community of mutual learning that requires commitment, personal investment, and strong teamwork strategies for two years. Through six interconnected, quarterly seminars students engage the core content of the major: community, environment, and planning. These contemporary academic fields and areas of research include the study of community as subject and practice, exploration of the ecological context of all societal life, and an investigation of the potentials of planning for developing strategies for positive change.

CEP students have gone on to careers in a variety of interdisciplinary fields such as community planning and organization, urban development, communications, work in for-profit and nonprofit sectors, public administration, education, community and environmental activism, ecology, and government/community relations.

- \* *Instructional and Research Facilities:* See College of Architecture and Urban Planning section, above.
- \* *Honors Options Available:* None offered.
- \* *Research, Internships, and Service Learning:* See College of Architecture and Urban Planning section, above.
- \* *Department Scholarships:* None offered.
- \* *Student Organizations/Associations:* See College of Architecture and Urban Planning section, above.

## Graduate Program

Graduate Program Coordinator  
410 Gould, Box 355740  
206-543-4190

The department offers the Master of Urban Planning (M.U.P.) degree and its faculty participate in the interdisciplinary Doctor of Philosophy (Ph.D.) in Urban Design and Planning. The M.U.P. is the professional degree, while the Ph.D. is primarily for students planning to enter research and teaching positions in urban planning and design.

The graduate program focuses on planning the physical environment and its socioeconomic and political determinants. Advanced students are encouraged to conduct research and studies in one of the following specializations:

- \* Urban design dealing with physical form, character, and quality issues
- \* Real estate, including public/private development processes
- \* Historic preservation
- \* Land-use planning, including its environmental, socioeconomic, legal, information systems, and administrative aspects
- \* Environmental planning

Graduate students may elect to participate in the College-wide Certificate Programs in Urban Design and Historic Preservation. See program descriptions in the College section.

The department also offers the Master in Strategic Planning for Critical Infrastructures degree, a fully online graduate program for those in charge of critical infrastructure protection in both the public and the private sectors.

### Master of Urban Planning

The Master of Urban Planning degree is the usual educational qualification for professional practice of city and regional planning, including generalist planning, research, urban design, and administrative positions in a wide variety of public agencies and private consulting firms. It is a two-year, or six-quarter, program requiring a minimum of 72 credits.

Requirements for graduate-level study include a satisfactory academic record and undergraduate training in one of a variety of disciplines, including urban planning and environmental design or in other appropriate fields, such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or architecture and landscape architecture. Students planning to enter the program should have completed at least one college-level course in each of the following areas: micro-economics, mathematics, statistics, American government, environmental systems, and cultural diversity. Students without sufficient background must take these prerequisite courses concurrently with their graduate studies.

The primary objective is to educate professional planners with a broad range of competence in planning and design; a second objective is to provide opportunities for individual studies in selected professional areas. Core course requirements include 33 credits covering the history and theory of planning and urban design, urban form, communication methods, quantitative methods, processes and methods of land use planning, comprehensive planning, planning law, research methods, and a planning studio. Also required are 14 credits of restricted electives, including a

course in advanced methods and a second studio; both may be in an area of specialization. In addition, a course in land-use planning, in urban development economics, and in history/theory of planning is required. A 9-credit thesis or professional project is required upon completion of all other degree course work. Of the 72 minimum credits required for the degree, 16 credits may be in open electives.

The core provides a foundation in urban design and planning for all students. An internship is encouraged for those without previous professional experience. A specialization in one area of planning is required. Five major specialized areas offered in the department include land-use planning and infrastructure planning, real estate, urban design, historic preservation, and environmental planning.

Students are admitted to the M.U.P. program primarily in autumn quarter and all application material should be received by the department no later than the preceding February 1 (November 1 for international applicants). Graduate Record Examination general test scores, three letters of recommendation, transcripts of previous degree programs and any additional academic study, and a statement of purpose are required. TOEFL is required for international applicants.

### Doctor of Philosophy

Some of the departmental faculty are part of an interdisciplinary faculty group which offers doctoral study in urban design and planning. The program is located administratively within the Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of the catalog.

### Certificate Programs

Graduate students may elect to participate in the College-wide certificate programs in urban design and historic preservation. (See program descriptions in the College section.)

### Master in Strategic Planning for Critical Infrastructures

The Master in Strategic Planning for Critical Infrastructures (MSPCI) is a fully accredited master's program for leaders in charge of protecting critical infrastructures and emergency services. Developed in partnership with the Washington State National Guard, the MSPCI program was specifically created for officials in public and private infrastructure systems, emergency management, and homeland security.

This fully online graduate program is designed to train managers in the strategic decision-making required to prevent and counter threats to critical infrastructures and public health.

The MSPCI program is offered each year beginning in autumn. The program is delivered entirely online, and classes begin for each cohort in late September. The MSPCI program is guided by an advisory board of UW faculty and professionals in the field.

A blend of strategic planning and systems theory, the program follows a distinctive analytic approach that enhances the conventional emergency management approach to hazards. Critical systems can be attacked through various means at different points within the system. The program's analytic approach seeks to make the critical infrastructures more resilient to breakdown, whether caused by terrorist acts, natural hazards, or normal accidents.

The MSPCI program offers courses that provide an understanding of vital infrastructure systems and instruction in systems thinking/systems analysis. The curriculum focuses on strategic thinking, leadership skills and the application of content and methods to cases and problems. It includes an emphasis on legal, constitutional and ethical issues, which are examined in relation to homeland security.

To earn the master's degree, students complete 16 courses (52 credits); two additional prerequisite courses (7 credits) are required for individuals needing to build specific background knowledge or skills, but may be waived depending on experience or other courses taken. Aside from the prerequisites, students take two courses per quarter and can expect to complete the program in eight quarters over two years.

Individuals not seeking the degree may enroll in single courses on a space-available basis with instructor permission. To learn more about single-course enrollment, see the single-course enrollment page.

Minimum requirements for admission include a baccalaureate degree (B.A. or B.S.), GRE scores, transcripts, a resume, three recommendations, a statement of purpose, and a departmental application form, as well as completion of the MSPCI prerequisite courses. Applicants must also be admitted to the UW Graduate School. International applicants must also submit their T.O.E.F.L. scores.

For more details, see the MSPCI Web site.

---

# College of Arts and Sciences

**Interim Dean**  
Ronald S. Irving

**Divisional Deans**  
Judith Howard -- Social Sciences  
Richard Karpen -- Research and Infrastructure  
Robert Stacey -- Arts and Humanities  
Werner Stuetzle -- Natural Sciences

50 Communications  
www.artsci.washington.edu/index.asp

The departments and schools of the College of Arts and Sciences offer nearly 100 curricula leading to the degrees of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, and Bachelor of Science, as well as graduate study leading to master's and doctoral degrees.

## Undergraduate Study

### Graduation Requirements

A liberal arts education entails mastery of certain basic skills, exposure to a broad range of academic disciplines, and concentration in a particular field of knowledge. To be awarded a baccalaureate degree a student in the College must fulfill requirements in the following areas: Language Skills, Reasoning and Writing in Context, Areas of Knowledge, and a Major (see table below). All required courses must be taken for a numerical grade. In addition, the student must present at least 90 credits outside the major department and must meet minimum GPA requirements as specified below. Detailed information on graduation requirements is provided in the

| Requirement*                     | Credits |  |
|----------------------------------|---------|--|
| Language Skills                  | 5-20    | # English composition (5 credits)<br># Foreign language (0-15 credits, depending on placement)   |
| Reasoning and Writing in Context | 15      | # Quantitative/symbolic reasoning (5 credits)<br># Additional writing courses (10 credits)   |
| Areas of Knowledge               | 75      | General-education courses to include at least 20 credits in each of the following three areas:<br># Visual, Literary and Performing Arts (VLPA)<br># Individuals and Societies (I&S)<br># The Natural World (NW) |
| Major                            | 50-90   | # An area of specialization, usually in a single department  |
| Minor (optional)                 | 25-35   | An additional area of specialization   |
| Electives                        | varies  | Free choice; as many credits as necessary to bring the total to 180  |

University of Washington (Seattle) Student Planner, a copy of which is given to each entering student.

\*Requirements of colleges other than Arts and Sciences are based on these, but may differ. Students who have not chosen a major are advised to follow the College of Arts and Sciences requirements.

### Language Skills

To receive a degree from the College of Arts and Sciences, students whose first enrollment in college (whether at the UW or elsewhere) was in autumn quarter 1985 or later are required to complete 5 credits of English composition with a minimum grade of 2.0. They must also complete coursework through the end of the first-year college sequence in a foreign language, with at least a 2.0 in the third-quarter course, or demonstrate equivalent proficiency by passing an examination or by receiving a passing grade in a qualifying course beyond the first-year level. Credits used for these two requirements (including the entire first year of foreign language, if taken) cannot also be applied to the Areas of Knowledge requirements described below.

### Reasoning and Writing in Context

Students who first entered college autumn quarter 1985 or later must complete a minimum of 5 credits in Quantitative or Symbolic Reasoning (Q/SR) and 10 credits of additional composition courses or courses that emphasize the development of writing skills in the context of an academic discipline (W courses). Q/SR and writing courses, if they apply, can also be counted toward Areas of Knowledge or major requirements. The writing

requirement is in addition to the English composition requirement mentioned in the preceding paragraph.

### Areas of Knowledge

The Areas of Knowledge requirement is the means by which the student develops a breadth of knowledge. Undergraduate courses are currently divided broadly into three categories: Visual, Literary, & Performing Arts; Individuals & Societies; and the Natural World. Each student must select at least 20 credits in courses from each of the three fields and an additional 15 credits from any courses in the three fields. Of the 75 total credits required, 15 may be from courses in the student's major department.

### Course Designators

The following symbols, included in course descriptions in this catalog, indicate which, if any, of the above requirements are fulfilled by certain courses:

- \* **VLPA** -- Visual, Literary, and Performing Arts (Area of Knowledge requirement)
- \* **I&S** -- Individuals and Societies (Area of Knowledge requirement)
- \* **NW** -- The Natural World (Area of Knowledge requirement)
- \* **QSR** -- Quantitative and Symbolic Reasoning

Courses that meet the foreign-language requirement and the additional-writing requirement are not marked. The third-quarter (or second-semester) course in any language meets the language requirement, so long as the entire first-year sequence totals at least 12 credits (regardless of whether the student earned credit for the earlier parts of the sequence). Consult the quarterly Time Schedule for writing-intensive courses that meet the additional-writing requirement.

### Major

In fulfilling the requirements for a major, the student engages in thorough study of a discipline or subject, aimed at developing knowledge in depth. This part of the student's program is determined by the department, school, or faculty committee with which the major study is pursued. Measured in academic credits, the "major" required of each student consists of 50 or more prescribed credits in a department of the College or a closely related group of departments. Descriptions of major programs are printed below.

### Minor

Completion of a minor, available through many departments, is optional. Requirements are shown under individual department undergraduate programs, below, or in a minors handout available in the Undergraduate Advising Center, 171 Mary Gates Hall. The following interdisciplinary minors are also offered: Disability Studies; Diversity; Education, Learning, and Society; Human Rights; Labor Studies; and Values in Society. Web sites for these minors may be found in the alphabetical listing of Arts & Sciences degree programs.

### Credits Required Outside Major Department

So that the student will not overspecialize, the College limits to 90 the number of credits from a single department that the student may elect to count in the 180 credits required for the baccalaureate degree. A department itself can require no more than 70 credits from courses within the department, and no more than 90 credits from within the department and related fields combined, as constituting its major program for the baccalaureate degree. Exceptions to these restrictions may be granted by the Dean.

### GPA Required for Graduation

To be eligible to receive the baccalaureate degree, the student must achieve at least a 2.00 cumulative GPA in the major (some departments prescribe a higher minimum GPA for the major), as well as a 2.00 cumulative GPA for all work done in residence at the University.

## Applying for Graduation

Students should apply for the baccalaureate degree no later than the first quarter of their final year. Seniors who apply by announced quarterly deadlines will receive Graduating Senior Registration Priority (GSP), allowing them to register first for the following quarter. GSP status is limited to two quarters.

All students may graduate under the College requirements published in this catalog. Students may use the department requirements in effect at the time they are admitted to the major, if they graduate within 10 years of that time. Otherwise, the department may insist on more recent major requirements. Students wishing to fulfill a previous set of requirements should see an adviser for details and options. All responsibility for fulfilling graduation requirements rests with the student concerned.

## Limits on Physical Education Courses Allowed Toward Graduation

A student graduating from the College of Arts and Sciences may count a maximum of three credits of 100-level physical-education activity courses taken at the University of Washington, or their equivalents at other collegiate institutions, as elective credits toward graduation. At present, physical-education courses are not offered at the University.

## Evening Degree Program

Students may earn a degree in communication, English, health informatics and health information administration, humanities, or social sciences through the Evening Degree Program. Admission to the program requires the following: 75 college credits, normally to include Arts and Sciences language-skills requirements (English composition and one year of a single foreign language), the reasoning-in-context requirement (quantitative/symbolic reasoning), and a substantial portion of the writing-in-context and general education requirements. Students who have only a few remaining prerequisite courses to complete may, under certain circumstances, be admitted as premajors. Admission and graduation requirements for communication (only the general communications option is offered) and English are identical to requirements for the day programs, shown under departmental listings.

## Major Requirements

The Humanities major and the Social Sciences major require a minimum 2.00 GPA for all courses taken in residence at the UW and a minimum 2.25 GPA for courses taken to satisfy the major requirements.

- \* *Humanities* -- 60 credits, including at least 30 credits from one of the following three options: communication and critical thinking; literature and culture; ideas and beliefs in social history. A 5-credit senior seminar. Remaining credits from courses outside the principal option.
- \* *Social Sciences* -- 60 credits, including 15 credits of social science survey courses (e.g., ANTH 202, SOC 271, POL S 202); 25 credits from one of the following four options: social and ethical theory; law, politics, and the state; culture and ethnicity; economy and ecology. 15 credits of program electives (selected from courses outside the principal option). A 5-credit senior seminar. Major requirements are to include at least 40 credits in 300- and 400-level courses.

For course lists, consult the Evening Degree Program adviser (at Evening Degree Program, 103 Lewis Hall) or the Undergraduate Advising Center, 171 Mary Gates Hall.

## Graduate Study

Students who intend to work toward advanced degrees must apply for admission to the Graduate School and must meet the general requirements outlined in the graduate and professional volume of the General Catalog, as well as the requirements established by the graduate faculty in the department or unit offering the degree program. Graduate students must satisfy the requirements for an advanced degree that are in force at the time the degree is to be awarded.

## American Ethnic Studies

B510 Padelford  
depts.washington.edu/aes

American Ethnic Studies exposes students to key content, methodologies, and theories in the comparative and interdisciplinary study of African Americans, Asian/Pacific Americans, and Chicanos in the United States.

## Undergraduate Program

Adviser  
B509 Padelford, Box 354380  
206-543-5403

The Department of American Ethnic Studies offers the following undergraduate program:

- \* The Bachelor of Arts degree with a major in American ethnic studies
- \* A minor in diversity

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* United States history, literature, drama, arts, sociology, political science, ethnic studies.

## Department Admission Requirements

Students in good academic standing may declare this major at any time.

## Major Requirements

60 credits as follows:

1. *Core courses (35 credits):*
  - a. 15 credits of AES 150, AES 151, AES 212
  - b. 15 credits of AFRAM 101, AAS 101, CHSTU 101
  - c. 5 credits of AES 495 or AES 496
2. *Concentration:* 25 credits in one of the following: African American Studies, Asian/Pacific American Studies, Chicano Studies, Comparative American Ethnic Studies. See department for list of concentration courses. Some concentration requirements may be met while fulfilling the core courses requirement.
3. *Electives:* Sufficient electives to reach 60 credits of approved courses applied to the major.

## Minor

*Diversity minor requirements:* 25 credits to include the following:

1. One foundation course (5 credits) chosen from the following: AES 151, ANTH 330, HSTAA 105, LSJ/CHID 332, PSYCH 250, WOMEN 200
2. A minimum of four additional courses, with at least one each from four of the five following categories (20 credits): arts/cultural; historical; global; contemporary/institutional; applications. A list of courses by category is available at <http://depts.washington.edu/divminor/>.
3. Minimum 15 credits must be completed in residence at the UW. Maximum 10 credits from one department and maximum 10 credits from the student's major department may be applied toward the minor.

Diversity minor students are strongly encouraged to complete an internship, volunteer project, research project, study abroad program, intergroup dialogue course, or some applied learning opportunity that promotes the goals of the minor.

Contact information for the minor is as follows: Address: B505 Padelford, Box 354380; Phone: 206-616-5789; Email: [divminor@u.washington.edu](mailto:divminor@u.washington.edu). Program director is Professor Rick Bonus at [rbonus@u.washington.edu](mailto:rbonus@u.washington.edu).

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The American Ethnic Studies curriculum prepares undergraduate students to understand the breadth, key content, methodologies, and theories in the field of ethnic studies as well as comparative interdisciplinary knowledge of African American, Asian/Pacific American, and Chicano issues. The major is designed to help students acquire the skills to think and write critically

about race, class, and ethnicity in social and historical contexts and multiple categories of social diversity.

- \* *Instructional and Research Facilities:* Writing Center
- \* *Honors Options Available:* None
- \* *Research, Internships, and Service Learning:* Students have the opportunity to become actively engaged in personalized research and discovery through independent study and research courses in each program concentration.
- \* *Department Scholarships:* None
- \* *Student Organizations/Associations:* Ethnic Studies Student Association

---

## American Indian Studies

C514 Padelford  
depts.washington.edu/native

American Indian studies surveys Indian cultural developments in art, music, history, medicine, media and film, language, and literature and offers performance and studio experience.

### Undergraduate Program

Adviser  
C514 Padelford, Box 354305  
206-543-9082

The American Indian Studies Center offers the following undergraduate programs:

- \* Bachelor of Arts degree in American Indian studies
- \* A minor in American Indian studies.

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Completion of two courses from AIS 102, AIS 201, AIS 202, AIS 203

#### Department Admission Requirements

1. 10 credits of college American Indian studies classes.
2. Minimum 2.00 cumulative GPA.
3. Upon satisfying items 1 and 2, above, students may declare the major any time. Transfer students must be enrolled at the UW before applying.

#### Major Requirements

55 credits as follows:

1. *Introductory courses (10 credits):* Two courses from AIS 102, AIS 201, AIS 202, and AIS 203. Other courses may be approved by the American Indian studies chair.
2. *American Indian studies electives (40 credits):* Chosen from AIS courses or a select list of courses from other departments. (See program adviser or departmental Web site for complete list.)
3. *Senior project (5 credits):* AIS 498 or approved alternative.
4. Minimum 25 credits for the major at the 300 level or above must be completed at the UW.

#### Minor

*Minor Requirements:* Minimum 30 credits to include:

1. 10 credits of introductory coursework in American Indian studies, chosen from AIS 102, AIS 201, AIS 202, AIS 203. Other courses may be allowed with the approval of the American Indian Studies program chair.
2. 20 credits of AIS electives, chosen from AIS courses or from a select list of courses in other departments (see program adviser or program website for complete list).

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* American Indian studies graduates possess a broad knowledge of historical and contemporary American Indian cultures, have the ability to develop both written and oral arguments, possess knowledge of American Indian philosophy and

world view, and possess an understanding of Native Nation sovereign status and treaty status.

- \* *Instructional and Research Facilities:* None
- \* *Honors Options Available:* None offered
- \* *Research, Internships, and Service Learning:* None offered
- \* *Department Scholarships:* None offered
- \* *Student Organizations/Associations:*
  - o American Indians in Science and Engineering Society (AISES), UW Chapter Office: Ethnic Cultural Center and 207 Loew Hall (MSEP), 206-543-5536 or 206-685-8688
  - o First Nations at the UW, Office: Ethnic Cultural Center, American Indian Room, 206-543-4635, ext. 12
  - o Medicine Wheel Society, Office: Ethnic Cultural Center and School of Medicine

---

## Anthropology

M32 Denny  
www.anthro.washington.edu

Anthropology is the study of human beings in all their cultural diversity. It includes the study of human evolution, the archaeological record, language and culture, the relationship between humans and their environment, and cultural modes of being as these differ in time and space. In studying anthropology, students can better understand how to find ways to live together in today's world, respecting cultural diversity while building upon common human values.

The study of anthropology at the University of Washington is comprised of three sub-disciplines:

- \* Archaeology is the study of the human past through investigation of material remains (artifacts, food remains, features, structures, etc.) and their relationships in space and time.
- \* Biocultural anthropology focuses on understanding human variation through the study of the ecological, demographic, genetic, developmental, and epidemiological dimensions of modern human adaptation and its evolutionary basis.
- \* Sociocultural anthropology is the study of human societies from the perspective of culture as a comparative frame.

### Undergraduate Program

Adviser  
243 Denny, Box 353100  
206-543-7772

The Department of Anthropology offers the following undergraduate programs:

- \* The Bachelor of Arts degree with a major in anthropology
- \* A minor in anthropology

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Any two of the following: ANTH 202, ANTH 203, ANTH 204, ANTH 206, ANTH 207, ANTH 208, ANTH 209, ANTH 210, or ANTH 228; ARCHY 205; BIO A 201; at least one from SOC 220, STAT 220, STAT 311, or Q SCI 381.

#### Department Admission Requirements

Students in good academic standing may declare this major at any time.

#### Major Requirements

55 credits as follows:

1. *Core courses (20 credits):* ARCHY 205, BIO A 201; any 200-level ANTH course; and one of the following: SOC 220, STAT 220, STAT 311, Q SCI 381
2. 35 additional ANTH, ARCHY, and BIO A credits distributed across the subfields or concentrated as suits the interests of the student. 20 of these credits must be in upper-division (300- or 400-level) courses. Students may count one 100-level ANTH, ARCHY, or BIO A course toward the major, but are not required to do so.

- a. The following AIS courses may apply toward this requirement: AIS 201, AIS 202, AIS 203, AIS 240, AIS 311, AIS 312, AIS 316, AIS 317, AIS 330, AIS 335, AIS 340, AIS 443.
- b. Maximum 12 credits from ANTH 499, ARCHY 499, and BIO A 499 combined can be counted toward the major.
3. *Additional major requirements:*
  - a. Courses with a grade of 1.9 or lower do not count toward the major.
  - b. At least 25 credits in the major must be completed with a minimum grade of 3.0.
  - c. Transfer students must complete a minimum of 15 upper-division credits in anthropology at the UW.

## Minor

*Minor Requirements:* 30 credits (at least 15 credits at upper-division level) from courses with the following prefixes: ANTH, ARCHY, BIO A. ANTH 100 may be applied to the minor but is not required. (Certain AIS courses may apply toward this requirement. See departmental adviser for list.) Minimum grade of 2.0 required in each course.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The study of anthropology develops skills in critical thinking, research, and writing, as well as technical skills specific to the different subfields (ethnographic field techniques, interpretation of data, statistical analysis, archaeological methods of data collection and interpretation). An undergraduate degree prepares students for many positions that involve working with people, as well as for academic studies in a variety of fields. Careers in anthropology can be developed through employment with government agencies, museums, teaching and research, private consulting firms, and nongovernmental organizations.
- \* *Instructional and Research Facilities:* Undergraduate students have access to the following facilities for classroom training in laboratory methods and for research experiences subject to faculty approval and supervision: the Burke Museum (ethnological, archaeological, natural history, and archival collection), Quaternary Research Center, Biodemography Lab, Luminescence Dating Laboratory, Electron Microscope Laboratory Cooperative, Geoarchaeology Lab, Digital Imaging and Microscopy Lab, Geographical Information System (GIS) Computer Lab. In addition, the department co-sponsors with the Department of Geography a writing center offering undergraduate writing support for anthropology classes.
- \* *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* The Department of Anthropology supports students who undertake community-based internships under faculty supervision.
- \* *Department Scholarships:*
  - o The Brett E Baldwin Scholarship, for approximately \$1,000, is awarded to an outstanding graduate or undergraduate majoring in anthropology.
  - o The Wienker Prize for Best Undergraduate Essay. Four awards are given each year, one in each subdiscipline for the best essay in an undergraduate anthropology class, and one for the best senior honors thesis.
- \* *Student Organizations/Associations:* The Anthropology Club is run by and for students in the department.

## Graduate Program

Graduate Program Coordinator  
M31 Denny Hall, Box 353100  
206-685-1562

The department recognizes three principal subfields of anthropology within its faculty, programs, and curriculum: archaeology, biocultural anthropology, and sociocultural anthropology (including linguistic anthropology). The department offers three distinct Ph.D. programs within the subdisciplines. Additionally, the department has an informal program in environmental anthropology which applicants may pursue within one of the traditional Ph.D. track programs. A concurrent degree program with Health Services offers an M.P.H./Ph.D. A Ph.D. program in sociocultural anthropology with emphasis in ethnomusicology is offered in cooperation with the School of Music. The M.A. degree may be earned within the Ph.D. programs.

Graduate students are admitted to, and specialize in, their chosen subfields from the beginning of their graduate studies.

## Admission Requirements

Applicants are admitted to begin study only during autumn quarter and are advised to have their application materials completed by the beginning of the prior January. A complete application file includes the online application to the Graduate School, official transcripts, the supplementary application to anthropology, three recommendations, a statement of purpose, and scores from the Graduate Record Examination (GRE). International students are required to take the TOEFL exam as well as the GRE.

## Program Requirements

For each of the respective graduate programs, completion of the core requirements and a reading knowledge of one foreign language are required. Under the guidance of a supervisory committee selected from the appropriate subfield, the student shapes an individual program. The major areas emphasized in the faculty and curriculum are the United States, Mexico, Africa, South Asia, Southeast Asia, China, Oceania, Middle East, and the post-Soviet states. The M.A. degree usually requires two years of graduate study; the Ph.D. programs usually require at least three years beyond the master's level, including a year of independent field research and a year to organize field materials and write a doctoral dissertation. The M.A. degree can be earned only within the Ph.D. programs as a thesis or non-thesis degree.

## Financial Aid

Two multi-year recruitment fellowships are awarded to outstanding entering students. A limited number of teaching and research assistantships and hourly positions are offered primarily to advanced students. Applicants should apply for Foreign Language Area Studies Fellowships if qualified. Work-study positions may also be available for eligible graduate students.

## Applied and Computational Mathematical Sciences

C36 Padelford  
[www.math.washington.edu/acms](http://www.math.washington.edu/acms)

Mathematics is the common language of modern science, engineering, and business. Techniques of mathematical modeling and data analysis are key instruments in the tool kit of modern practitioners and researchers in a wide array of disciplines. ACMS is an interdisciplinary program in the mathematical sciences that provides a sound training in mathematical modeling, scientific computation, mathematical reasoning, and statistical analysis. The program is jointly administered by the Departments of Applied Mathematics, Computer Science and Engineering, Mathematics, and Statistics, offering students access to their combined resources. An ACMS major is an excellent stepping stone to a career in engineering and the physical, life, and management sciences.

## Undergraduate Program

Adviser  
C36 Padelford, Box 354350  
206-543-6830  
[advising@math.washington.edu](mailto:advising@math.washington.edu)

The ACMS program offers a Bachelor of Science degree that builds on the strengths of the four mathematical sciences departments as well the many quantitatively oriented departments across campus. All students complete a core set of courses developing basic skills in modeling, computation, mathematics, and statistics. Students choose one of the eight option areas listed below for further training and specialization.

1. *Biological and Life Sciences* focuses on basic techniques of mathematical modeling and computing that are employed in the life sciences.
2. *Discrete Mathematics and Algorithms* gives students a broad background in mathematics and computation with special emphasis on discrete mathematics and its application to optimization and algorithm design.
3. *Engineering and Physical Sciences:* This option is an excellent choice for students with an interest in the physical world and classical areas of applied mathematics.

4. *Mathematical Economics*: Students in this option obtain a firm foundation in applied and computational mathematics as well as a basic grounding in economic theory.
5. *Operations Research* provides a firm foundation in the mathematical tools of operations research, particularly optimization and stochastic modeling.
6. *Scientific Computing and Numerical Algorithms* focuses on the design, mathematical analysis, and efficient implementation of numerical algorithms for such problems.
7. *Social and Behavioral Sciences* provides a foundation in commonly used statistical and computational techniques followed by flexibility in pursuing different sets of advanced courses.
8. *Statistics*: This option is designed to introduce students to theory, methodology, and applications of statistics.

## Bachelor of Science

*Suggested First- and Second-Year College Courses*: MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122, PHYS 123, CSE 142, CSE 143

### Department Admission Requirements

A GPA of at least 2.50 in the following courses, with a minimum grade of 2.0 in each course: CSE 142; MATH 124, MATH 125, MATH 126; one from MATH 307, MATH 308, MATH 310, AMATH 351, AMATH 352.

### Major Requirements

90 credits as follows:

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. *Core*: 43 credits to include MATH 124, MATH 125, MATH 126; MATH 308; MATH 307 or MATH 351; MATH/STAT 390; CSE 142, CSE 143; AMATH 352; AMATH/MATH 381, AMATH 383.
3. Completion of one of the following options:
  - a. *Biological and Life Sciences Option*. 47 credits to include option core (27 credits): PHYS 121, PHYS 122, PHYS 123; or BIOL 101 and 102 or BIOL 180 and 200; MATH 324, AMATH 353, AMATH 422, AMATH 423; and option electives (20 credits): outside area (12 credits or double major/double degree; see adviser for options) and 8 credits of approved courses at the 300 level or above, chosen from the four participating departments.
  - b. *Discrete Mathematics and Algorithms Option*. 47 credits to include option core and option electives. Option core: 33 credits for non-Computer Science and Engineering majors - PHYS 121, PHYS 122, PHYS 123, MATH 310, MATH/STAT 394, CSE 373, CSE 410, CSE 417 and one of CSE 413, CSE 415; 9 credits for Computer Science/Computer Science and Engineering double major/double degree - MATH/STAT 394, CSE 421, CSE 431. Option electives: 14 credits for non-Computer Science and Engineering majors, 23 credits for Computer Science/Computer Science and Engineering double majors, to include 9 credits from MATH 407, MATH 408, MATH 409, MATH 461, MATH 462, and remaining 15 credits from approved courses at the 300 level or above from the four participating departments.
  - c. *Engineering and Physical Sciences Option*. 47 credits to include option core (30 credits): PHYS 121, 122, 123, MATH 324, AMATH 401, AMATH 402, AMATH 403; and option electives (17 credits): outside area (11 credits or double major/double degree; see adviser for options) and 6 credits of approved courses at the 300 level or above, chosen from the four participating departments.
  - d. *Mathematical Economics Option*. 47 credits to include option core and electives. Option core (27 credits): PHYS 121, 122, 123 or ECON 200, 201, 300, MATH 310, MATH 327, MATH 407; and at least one of the following: MATH 408, STAT 423. Option electives: Either (1) or (2), below. (1) 20 credits including at least 15 credits from ECON 301, ECON 400, ECON 401, ECON 404, ECON 421, ECON 422, ECON 454, ECON 472, ECON 482, ECON 483, ECON 485; at least 5 additional credits at the 300 level or above from the four participating departments or from the department of Economics (taken from ECON courses listed above). (2) Complete a double major with a Bachelor of Science in Economics.
  - e. *Operations Research Option*. 47 credits to include option core and electives. Option core (30 credits): PHYS 121, 122, 123, MATH 310, MATH/STAT 394, MATH/STAT 395; and at least two of the following: MATH 407, MATH 408, MATH 409. Option electives: Either (1) or (2), below. (1) 17 credits, including at least 6 credits from MATH/STAT 491, MATH/STAT 492, STAT 421, 423; at least 8 credits from OPMGT 301, OPMGT 402, OPMGT 443, OPMGT 450, OPMGT 490, QMETH 450, QMETH 490, IND E 321, IND E 337, IND E 410, IND E 412,

- IND E 424, IND E 426, IND E 430, IND E 433, (with at least one course at the 400 level); at least 3 additional credits at the 300 level or above from the four participating departments or from the departments of Management Science and Industrial Engineering (taken from IND E courses listed above). (2) Complete a double degree in Management Science in the School of Business Administration or in Industrial Engineering in the College of Engineering.
- f. *Scientific Computing and Numerical Algorithms Option*. 47 credits to include option core (27 credits): PHYS 121, 122, 123, MATH 310, MATH 327, MATH 464, MATH 465; and option electives (20 credits), to include 11 credits from the following: AMATH 301; AMATH 353 or MATH 309; CSE 373 or CSE 326; CSE 410; AMATH 401, AMATH 402, AMATH 403; MATH 407, MATH 408, MATH 409; MATH 427, MATH 428; remaining 9 credits from approved courses at the 300 level or above from the four participating departments.
- g. *Social and Behavioral Sciences Option*. 47 credits to include option core (25 credits): PHYS 121, 122, 123, MATH/STAT 394, MATH/STAT 395, STAT 423; and option electives (22 credits): outside area (12 credits or double major/double degree; see adviser for options) and 10 credits of approved courses at the 300 level or above, chosen from the four participating departments.
- h. *Statistics Option*. 47 credits to include program core (37 credits): PHYS 121, 122, 123, MATH/STAT 394, MATH/STAT 395, STAT 341, STAT 342, STAT 421, STAT 423; option electives (10 credits): approved courses at the 300 level or above, chosen from the four participating departments.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted above.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: The ACMS degree emphasizes the development of advanced skills in discrete and contiguous mathematical modeling, computing and scientific computation, mathematical reasoning and analytic skills, and statistical reasoning and analytic skills. Students develop an expertise at an advanced level in an applications area. This set of skills provides the basis for careers in a wide array of quantitative disciplines including engineering; the physical, life, and social sciences; as well as business and management sciences. In addition, the ACMS program has developed partnerships with a number of departments on campus to facilitate the pursuit of double majors.
- \* *Instructional and Research Facilities*: The program has access to the combined instructional and research facilities of the four participating departments, as well as the Mathematics and Statistics library and the Math Study Center.
- \* *Honors Options Available*: With College Honors. With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning*: The program is provided with internship opportunities periodically, which are then passed on to students.
- \* *Department Scholarships*: None offered.
- \* *Student Organizations/Associations*: MAA Student Chapter, Actuarial Club, SIAM

## Applied Mathematics

414 Guggenheim Hall  
www.amath.washington.edu

Applied mathematics is concerned with mathematical modeling and analysis of problems from the physical, biological, and social sciences, and from engineering.

## Undergraduate Program

Adviser  
414 Guggenheim Hall, Box 352420  
206-543-5493

The Department of Applied Mathematics offers the following undergraduate programs:

- \* The Bachelor of Science degree in Applied and Computational Mathematics, offered in cooperation with departments of Computer Science and Engineering, Mathematics, and Statistics. See Applied and Computational Mathematical Sciences for specific degree information.
- \* A minor in applied mathematics.

## Minor

*Minor Requirements:* 27 or more credits as follows:

1. MATH 124, MATH 125, MATH 126 (5, 5, 5) or equivalent
2. 4 applied math courses at the 300 level or above (excluding AMATH 400, AMATH 498, AMATH 499)
3. Minimum grade of 2.0 required in each course

## Graduate Program

Graduate Program Coordinator  
414 Guggenheim Hall, Box 352420  
206-543-5493

The Department of Applied Mathematics offers graduate programs of study leading to the degrees of Master of Science and Doctor of Philosophy. These programs involve (1) broad training in those mathematical methods and techniques that have been found useful in applications, (2) in-depth study in at least one field of application, and (3) opportunities to explore various specialized aspects of applied mathematics.

## Master of Science

### Admission Requirements

Prospective students for the Master of Science program should hold an undergraduate degree either in mathematics with a strong background in applications such as the physical, engineering, biological, or social sciences with a strong background in applications-oriented mathematics. The student's record should be a strong one with minimum GPA of B (3.00) or better. Graduate Record Examination scores should be sent to the Graduate School. In addition to the other requirements for all applicants, a minimum score of 500 on the Test of English as a Foreign Language (TOEFL) must be presented by applicants who are not citizens of the United States unless they meet one of the following exceptions: citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or applicants holding bachelor's or advanced degrees from accredited institutions in the U.S. or in one of the countries listed above.

### Degree Requirements

36-45 credits, as follows:

- \* *Core Courses (20 credits):* AMATH 567 (5), AMATH 568 (5), AMATH 569 (5). (Substitution of any of these courses with AMATH 401 (4), AMATH 402 (4) and AMATH 403 (4), respectively, is permitted.) Either AMATH 581 (5) or AMATH 584 (5).
- \* *Applied Mathematics Courses:* Minimum 24 credits from the Applied Mathematics curriculum. Core courses are counted toward this requirement.
- \* *Applied Mathematics Seminar/Clinic/Independent Study (4 credits):* AMATH 501 (1, max. 6), AMATH 502 (1, max. 6) or AMATH 600 spread over at least two quarters.
- \* *Final Examination for Master's Degree:* Oral presentation by the candidate in the presence of his or her Graduate Committee on a current topic of interest from the literature or the results of original research.
- \* *Program Plan:* To be filled out by the student, signed by the adviser, and approved by the Graduate Committee. For full-time students, a Program Plan must be on file no later than the end of the third quarter of registration. Part-time students should file their Program Plan prior to the end of their first three quarters of registration.
- \* *Satisfactory Progress:* The student is expected to maintain a minimum 3.20 GPA. In addition, full-time students (whether self-supporting or under full scholarship or assistantship support) are normally expected to complete the requirements for an M.S. degree in one year and should not exceed two years. Exceptions are granted only by petition to the Graduate Committee.

## Doctor of Philosophy

### Admission Requirements

- \* Completion of course work equivalent to that described for the master's degree, with a minimum 3.40 GPA, and indication of the ability or

potential to perform independent research.

- \* Graduate Record Examination
- \* Three letters of recommendation are required in support of each application and should be sent directly to the department.
- \* Minimum score of 500 on the Test of English as a Foreign Language (TOEFL) for applicants who are not citizens of the United States unless they meet one of the following criteria: citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or applicants holding bachelor's or advanced degrees from accredited institutions in the U.S. or in one of the countries listed above.
- \* A graduate student is considered for admission to the Ph.D. program by the Graduate Committee after completing AMATH 567 (5), AMATH 568 (5), AMATH 584 (5), and AMATH 585 (5) with a grade of 3.4 or better in each course, as well as passing the Preliminary Examination.

### Degree Requirements

Minimum 90 credits, to include:

- \* *Course Requirements:* AMATH 567 (5), AMATH 568 (5), AMATH 569 (5); AMATH 584 (5), AMATH 585 (5), AMATH 586 (5); three of AMATH 570 (5), AMATH 571 (5), AMATH 572 (5), AMATH 573 (5), AMATH 574 (5), AMATH 575 (5); either AMATH 507 (5) or AMATH 515 (5); AMATH 506 (4); two applications courses; 2 credits of departmental seminars; 2 credits of departmental clinics.
- \* *Preliminary Examination:* Three written two-hour exams, covering a core of undergraduate material necessary for successful completion of the Ph.D. program. Core areas are differential equations, linear algebra, and advanced calculus.
- \* *Supervisory Committee:* Formed no later than the end of the spring quarter of the first year.
- \* *Candidacy Requirements:* Form a supervisory committee, select two specialization areas, satisfy course requirements, and design a doctoral research plan.
- \* *General Examination:* Administered after the student has passed the Preliminary Examination and sometime before the end of the student's second year.
- \* *Final Examination:* Oral presentation of the completed research in a seminar open to the public.

## Financial Aid

Both research and teaching assistantships are available to full-time students who qualify. In addition, fellowship funds for the study of applied mathematics are available and awarded on a competitive basis.

## Research Facilities

Students in applied mathematics have access to a departmental computing lab equipped with a DEC Alpha server, Alpha/AXP workstations, and X-terminals, with centralized file storage. Software for scientific visualization, numerical analysis, symbolic mathematics, programming, and document preparation is available. The lab is connected to the campus network and the Internet, providing access to supercomputing facilities and other resources.

---

## Art

104 Art  
art.washington.edu

The School of Art serves a dual role within the educational structure of the University of Washington. It is both a professional school and an academic department. As a professional school it trains students for active careers in the visual arts; as a school of the College of Arts and Sciences it offers studio and lecture courses. All of its course offerings and its curriculum requirements are based on the underlying philosophy that an awareness and understanding of the visual arts are necessary to a liberal education, and that a liberal education is necessary to the training of a professional artist.

## Undergraduate Program

Adviser  
104 Art, Box 353440  
206-543-0646  
uaskart@u.washington.edu

The School of Art offers the following undergraduate programs:

- \* The Bachelor of Arts degree with a major in art history, design studies (incorporates elements of the Bachelor of Fine Arts industrial design and visual communications design programs), interdisciplinary visual arts, or painting and drawing.
- \* The Bachelor of Fine Arts degree with a major in ceramics, fibers, industrial design, metals, painting and drawing, photography, printmaking, sculpture, or visual communication design
- \* *Note:* The printmaking and metals programs are not currently admitting new majors

### Bachelor of Arts

*Design Studies, Interdisciplinary Visual Arts (IVA), Painting and Drawing (Students may earn a Bachelor of Arts or a Bachelor of Fine Arts in Painting and Drawing, but not both.)*

#### Department Admission Requirements

The minimum GPA for application to the School of Art is 2.50.

*Admission to the Design Studies Major for Entering Freshmen, Currently Enrolled Students, or Transfer Students:* Students must complete ART 166 (or equivalent), then apply to the major using the appropriate application process. See the program guides on the department Web site for specific information: <http://art.washington.edu/undergrad/programguides/index.html>.

*Admission to the Interdisciplinary Visual Arts Major for Entering Freshmen or Currently Enrolled Students:* After completing 5 credits of introductory level art (100/200 level), students meet with an Art adviser to declare the major.

*Admission to the Interdisciplinary Visual Arts Major for Transfer Students:* Students complete the equivalent of 5 credits of introductory art (100/200 level) prior to transferring. Once admitted to the UW, they meet with an Art adviser to declare the major. Prior to transfer, students may address questions to [uaskart@u.washington.edu](mailto:uaskart@u.washington.edu).

*Admission to the Painting and Drawing Major for Entering Freshmen and Currently Enrolled Students:* After completing ART 190, students meet with an Art adviser to declare the major.

*Admission to the Painting and Drawing Major for Transfer Students:* Once admitted to the UW, students meet with an Art adviser to enroll in ART 190. Students who transfer with college credits in painting and drawing may wish to present a portfolio for advanced placement in the program. Prior to transfer, students may address questions to [uaskart@u.washington.edu](mailto:uaskart@u.washington.edu).

### Major Requirements

*Design Studies (80 credits)*

1. 5 credits prerequisite: ART 166
2. Successful completion of Design Admission Selection Process
3. 30 credits: ART 207, ART 208, ART 209, ART 210, ART 211, ART 212
4. 20 credits: ART 381, ART 481, ART 482 (repeated to 10 credits)
5. 15 credits electives from the following: ART 366, ART 368, ART 376, ART 377, ART 378, ART 467, ART 383, ART 483, ART 316, ART 317, ART 322, ART 446.
6. 10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337.

*Interdisciplinary Visual Arts (63 credits)*

1. 20 credits of introductory art selected from ART 120, ART 124, ART 126, ART 131, ART 133, ART 140, ART 166, ART 190, ART 201, ART 202, ART 226, ART 227, ART 234, ART 245, ART 246, ART 258, ART 272, ART 273, ART 290, ART 292.
2. 25 upper division credits in art selected from ART 328, ART 329, ART 330, ART 332, ART 333, ART 334, ART 335, ART 338, ART 339, ART 342, ART 345, ART 350, ART 353, ART 354, ART 357, ART 358, ART 390, ART 392, ART 428, ART 436, ART 450, ART 457, ART 458, ART

485, ART 490, ART 492, ART 496, ART 498, ART 499, ART H 498, ART H 499.

3. 18 credits in art history, with a minimum 8 upper division credits, to include one from ART H 203, ART H 380, ART H 381, or ART H 384; one non-western course from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART 313, ART H 315, ART H 318, ART H 321, ART 330, ART H 331, or ART H 337.

*Painting and Drawing (60 credits)*

1. 5 credits: ART 190
2. 15 credits drawing classes: 5 credits ART 290; 5 credits ART 390; 5 credits ART 490
3. 25 credits painting classes: 5 credits ART 292; 5 credits ART 293; 5 credits ART 392; 5 credits ART 393; 5 credits ART 492
4. 15 credits art history (with a minimum 5 upper division) to include one from ART H 203, ART H 380, ART H 381, or ART H 384; one non-western from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337.

### Bachelor of Fine Arts

*Ceramics, Fibers, Industrial Design, Metals, Painting and Drawing (Students may earn a Bachelor of Fine Arts or a Bachelor of Arts in Painting and Drawing, but not both), Photography, Printmaking, Sculpture, Visual Communication Design*

#### Department Admission Requirements

The minimum GPA for admission to School of Art BFA programs is 3.00.

*Note:* The printmaking and metals programs are not currently admitting new majors. Students may check with Academic Advising and Student Services ([uaskart@u.washington.edu](mailto:uaskart@u.washington.edu)) for updated information.

For entering freshmen or currently enrolled students

*Admission to Ceramics, Fibers, Painting and Drawing, and Sculpture:* Students complete the prerequisite art course unique to each major (ART 201 for ceramics; ART 226 or ART 227 for fibers; ART 190 for painting and drawing; ART 272 or ART 273 for sculpture), then meet with an Art adviser to declare the major.

*Admission to Industrial Design, Photography, and Visual Communication Design:* Students must complete prerequisite courses unique to each major (see Major Requirements, below). Students then apply to the major using the appropriate application process. Each major has its own unique application process; see Program Guides on department homepage for specific information: <http://art.washington.edu/undergrad/programguides/index.html>.

*For transfer students*

*Admission to Ceramics, Fibers, Painting and Drawing, and Sculpture:* Once admitted to the UW, students meet with an Art adviser to enroll in the appropriate art course (ART 201 for ceramics; ART 226 or ART 227 for fibers; ART 190 for painting and drawing; ART 272 or ART 273 for sculpture). Students who transfer with college credits in the proposed area of study may wish to present a portfolio for advanced placement in the program. Prior to transfer, students may address questions to [uaskart@u.washington.edu](mailto:uaskart@u.washington.edu).

*Admission to Industrial Design, Photography, and Visual Communication Design:* Students must complete prerequisite courses unique to each major (see Major Requirements, below). Students then apply to the major using the appropriate application process and submitting a portfolio. Each major has its own unique application process; see the program guides on the department Web site for specific information: <http://art.washington.edu/undergrad/programguides/index.html>.

*Admission Policy for Postbaccalaureate Applicants:* Postbaccalaureate study in studio art is limited; admission requirements vary within each major. See information concerning specific postbaccalaureate admission online at <http://art.washington.edu>.

## Major Requirements

### *Ceramics (85 credits)*

1. 10 credits of ART 201, ART 202
2. 15 credits of ART 353.
3. 20 credits of ART 485
4. 25 credits of art or related electives to include ART 120
5. 15 credits art history (with a minimum 5 upper division) to include one from ART H 203, ART H 380, ART H 384, or ART H 381; one non-western from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337.

### *Fibers (85 credits)*

1. 10 credits of ART 226, ART 227
2. 25 credits of ART 328, ART 329, ART 330
3. 15 credits of ART 428
4. 20 credits of art or related electives to include ART 120
5. 15 credits art history (with a minimum 5 upper division) to include one from ART H 203, ART H 380, ART H 381, or ART H 384; one non-western from ART H 204, ART H 205, ART H 206, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337.

### *Industrial Design (90 credits)*

1. 5 credits prerequisite: ART 166
2. Successful completion of Design Admission Selection Process
3. 30 credits: ART 207, ART 208, ART 209, ART 210, ART 211, ART 212
4. 30 credits: ART 316, ART 317, ART 318, ART 321, ART 322, ART 422
5. 15 credits: ART 445, ART 446, ART 447.
6. 10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337.

### *Metals (85 credits)*

*Note:* Major is not accepting new students.

### *Painting and Drawing (95 credits)*

1. 5 credits, ART 190.
2. 15 credits of drawing classes: 5 credits ART 290; 5 credits ART 390; 5 credits ART 490.
3. 45 credits of painting classes: 5 credits ART 292; 5 credits ART 293; 5 credits ART 392; 10 credits ART 492 or 5 credits ART 492 and 5 additional credits of ART 490; 15 credits ART 494.
4. 15 credits of studio art or related electives.
5. 15 credits of art history with a minimum 5 upper division to include one from ART H 203, ART H 380, ART H 384, or ART H 381; one non-western art history from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, ART H 337.

### *Photography (85 credits total)*

1. 15 credits of prerequisites: ART 140; ART 124, ART 126, ART 166, or ART 190; ART H 232.
2. Successful completion of Photography Portfolio Review.
3. 5 credits of ART 241 (autumn quarter only).
4. 25 credits: ART 340; ART 341; ART 342; 10 credits of ART 343.
5. 15 credits of ART 440 (spring, autumn, winter quarters).
6. 15 credits of studio art or related electives.
7. 10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337.

### *Printmaking (85 credits)*

*Note:* Major is not accepting new students.

### *Sculpture (85 credits)*

1. 10 credits of ART 272, ART 273
2. 25 credits of ART 332, ART 333, ART 334, ART 335
3. 10 credits ART 436.
4. 25 credits of art or related electives, to include ART 120.
5. 15 credits of art history (with a minimum 5 upper division) to include one from ART H 203, ART H 380, ART H 384, or ART H 381; one non-

western from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337

### *Visual Communication Design (100 credits)*

1. 5 credits of prerequisite: ART 166.
2. Successful completion of Design Admission Selection Process.
3. 30 credits: ART 207, ART 208, ART 209, ART 210, ART 211, ART 212
4. 30 credits: ART 366, ART 376, ART 367, ART 377, ART 368, ART 378
5. 25 credits: ART 466, ART 478, ART 467, ART 479, ART 480
6. 10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Students receiving an undergraduate degree in art can expect to develop strong writing, analytical, critical-thinking, and problem-solving skills. Students learn to recognize the power of the visual image and understand its importance in a world increasingly dependent on the aesthetic and technical skill of trained artists and designers to create images that communicate information and ideas across cultures and generations.

In addition to becoming practicing artists, art graduates find careers in fields such as gallery and museum management, arts education, arts administration, photojournalism, film making, graphic and product design, interior design, teaching, advertising, art therapy, and visual and digital technology.

- \* *Instructional and Research Facilities:* None.

- \* *Honors Options Available:* Photography Honors (see Academic Advising and Student Services for details).

- \* *Research, Internships, and Service Learning:* The School of Art has several programs that help students develop professional practices and expand their knowledge outside the UW: internships for credit, Artist in Residence programs, K-12 Educational Partnerships, and the Studio Art Rome program.

- \* *Department Scholarships:* None.

- \* *Student Organizations/Associations:* Students majoring in the studio arts have the opportunity to participate in several student associations: Hephhestium (metals), Zeeware (ceramics), Broadclothes (fiber), Printmakers Association (printmaking), a photo guild, and the Inter Arts Council. These organizations raise funds through the sale of members' work to support visiting artists and lectures and to sponsor student involvement in regional arts events.

## Graduate Program

Graduate Program Coordinator  
104 Art Building, Box 353440  
206-543-0646  
gradart@u.washington.edu

The Master of Fine Arts program offers an intense, two-year studio and seminar/classroom experience leading to an advanced degree in visual art. The program builds on prior, significant academic experience and studio work. Admission is on a competitive basis to any one of the following seven programs: Ceramics, Fibers, Metals, Painting, Photography, Sculpture, and Visual Communication Design.

The master's degree program in Art History at the University of Washington affirms that the M.A. degree is an independent degree useful in its own right. Successful applicants to the program normally have a broad undergraduate background in art history.

The Ph.D. program in the Division of Art History prepares graduates for university-level teaching, curator positions at major museums, and independent research in the field. Before beginning work for the Ph.D., students should have completed a Master of Arts degree in the history of art.

## Master of Fine Arts

### Admission Requirements

Applicants for admission to the Master of Fine Arts program are required to have a Bachelor of Fine Arts degree or equivalent (determined by the quality of the applicant's work and equivalent experience, based upon the UW B.F.A. requirements) with a minimum GPA of 3.00 in the undergraduate art major.

The Graduate Record Examination is not required. Admission is on a competitive basis. Annual deadline for applications is February 1, for consideration for admission the following autumn quarter.

### Degree Requirements

For each program, 90 credits are required, as follows:

#### Ceramics

- \* *Ceramics Studio*: 20 credits of ART 553
- \* *Interdisciplinary Seminar*: 25 credits of ART 590
- \* *Art History, Theory, and Criticism*: 10 credits of approved courses
- \* *Studio Electives*: 15 credits of approved electives
- \* *Thesis*: 20 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Ceramics graduates exhibit their thesis work in the annual M.F.A. exhibition at the Henry Art Gallery along with one person show at the Ceramics Gallery.

#### Fibers

- \* *Fibers Studio*: 20 credits of ART 540
- \* *Interdisciplinary Seminar*: 25 credits of ART 590
- \* *Art History, Theory, and Criticism*: 10 credits of approved courses
- \* *Studio Electives*: 20 credits of approved electives
- \* *Thesis*: 15 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Fibers graduates exhibit their thesis work in the annual M.F.A. exhibition at the Henry Art Gallery.

#### Metals

- \* *Metals Studio*: 20 credits of ART 558
- \* *Interdisciplinary Seminar*: 25 credits of ART 590
- \* *Art History, Theory, and Criticism*: 15 credits of approved courses
- \* *Studio Electives*: 20 credits of approved electives
- \* *Thesis*: 15 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Metals graduates exhibit their thesis work in the annual M.F.A. exhibition at the Henry Art Gallery.

#### Painting and Drawing

- \* *Drawing Studio*: 6 credits of ART 591
- \* *Painting Studio*: 25 credits of ART 592
- \* *Graduate Seminar*: 30 credits of ART 594
- \* *Art History, Theory, and Criticism*: 10 credits of approved courses
- \* *Studio Electives*: 9 credits of approved electives
- \* *Thesis*: 10 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Painting and Drawing graduates exhibit their thesis work in the annual M.F.A. exhibition at the Henry Art Gallery.

#### Photography

- \* *Photography Studio*: 20 credits of ART 515
- \* *Interdisciplinary Seminar*: 25 credits of ART 590
- \* *Art History, Theory, and Criticism*: 15 credits of approved courses
- \* *Studio Electives*: 15 credits of approved electives
- \* *Thesis*: 15 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Photography graduates exhibit their thesis work in the annual M.F.A. exhibition at the Henry Art Gallery.

#### Sculpture

- \* *Sculpture Studio*: 20 credits of ART 552
- \* *Interdisciplinary Seminar*: 25 credits of ART 590
- \* *Art History, Theory, and Criticism*: 10 credits of approved courses
- \* *Studio Electives*: 15 credits of approved electives

- \* *Thesis*: 20 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Sculpture graduates exhibit their thesis work in the annual M.F.A. exhibition at the Henry Art Gallery.

#### Visual Communication Design

- \* *Design Studio*: 25 credits of ART 580/ART 582
- \* *Design Seminar*: 20 credits of ART 581
- \* *Art History, Theory, and Criticism*: 15 credits of approved courses
- \* *Studio Electives*: 20 credits of approved electives
- \* *Thesis*: 10 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Design graduates exhibit their thesis work in the annual M.F.A. exhibition at the Henry Art Gallery.

## Master of Arts

### Admission Requirements

- \* B.A. degree with art history major or equivalent course work with a minimum GPA of 3.00 or B average in art history courses; students in other majors may apply if they have a strong background in art history.
- \* Official GRE General Test scores.

### Degree Requirements

The M.A. program offers both thesis and non-thesis tracks in Art History. The thesis track requires a minimum of 55, and the non-thesis (practicum) track 65, graduate-level credits, to include:

- \* A minimum of 5 numerically graded credits in four of the five major areas: 1) African and Native American; 2) East Asian; 3) Ancient, Classical, and Medieval; 4) Italian and Northern Renaissance, Baroque, and Rococo; 5) Western, late 19th c. to the present.
- \* A minimum of 15 credits in 500-level seminars, including at least one seminar each in a Western and a non-Western area; also, two methodology seminars to be taken in the first year.
- \* For students in the thesis track, at least 10 credits of ART H 700 (Master's Thesis); for the non-thesis track, at least 10 credits of ART H 598 (Master's Practicum)
- \* All degree candidates are required to demonstrate a knowledge of either French, German or Italian, or Chinese or Japanese where appropriate. Degree candidates specializing in Native American art may substitute Spanish for French or German. Students in the thesis track are required additionally to demonstrate knowledge in a second language appropriate to the student's area of study. Petitions for exemption from the second language requirement are considered as warranted by the needs of different fields or projects.
- \* The thesis may be an extension of a seminar paper and must demonstrate the student's ability to conduct rigorous research, indicate familiarity with bibliographical and reference materials, and show a capacity for the synthesis and critical evaluation of the material under consideration.
- \* The practicum must evidence the student's practical or theoretical knowledge of some aspects of art in historical or contemporary situations, and may take any of a variety of forms, either within or outside the academic offerings of the University, e.g., an internship in a public art museum or the publication of critical, educational or other writings. These are minimum M.A. requirements for the Division of Art History. To be eligible for a degree in the Graduate School, a minimum GPA of 3.00 in numerically graded courses numbered 400 and above is required.

## Doctor of Philosophy

### Admission Requirements

- \* M.A. degree in art history or a closely related field with a minimum 3.00 or B average in art history courses.
- \* Official GRE General Test scores.

### Degree Requirements

The Ph.D. program requires a minimum of 90 credits, as follows:

- \* A minimum of 60 credits in art history in numerically graded courses numbered 400 and above, beyond the M.A. Of these 60, at least 30 credits must be in 500-level art history or approved non-art history seminars

- \* A maximum of 20 credits in related fields (in numerically graded courses numbered 300 and above) may be approved for credit in place of art history courses
- \* A minimum of 10 credits must be taken in an area other than areas to be tested by the General Examination.
- \* All doctoral students are required to demonstrate a knowledge of either French, German or Italian, or of Chinese or Japanese where appropriate; to demonstrate a research capability in a second language appropriate to the student's area of study as determined by the faculty; and to demonstrate a knowledge of any further languages judged necessary by the faculty
- \* A minimum of 30 dissertation credits
- \* A General Examination, written and oral, is taken when in the opinion of the student's supervisory committee the student's background is sufficient to justify its undertaking. The fields to be covered are determined in accordance with the student's interests and the faculty's supervisory capabilities.
- \* These requirements are minimum Ph.D. requirements for the Division of Art History. To be eligible for a degree in the Graduate School, a grade point average of 3.0 in numerically graded courses numbered 400 and above is required.

## Scholarships and Teaching Assistantships

School of Art scholarships are awarded annually to new and returning students, based on merit. Applicants admitted to the M.F.A. program may be offered School of Art scholarships for the coming year on an individual merit basis. Further application is not required.

The School of Art offers a limited number of teaching assistantships to incoming graduate students on an individual merit basis, as determined by each program. Enrolled graduate students may apply for a limited number of additional, competitive teaching assistantships.

## Art History

209 Art  
art.washington.edu

Art history is the study of the creation, style, and meaning of works of art in relation to the artists and societies that created them. The history of art involves the interaction of styles, techniques, concepts, individual personalities, and social values from many places over long periods of time. This discipline is comparative in nature and requires many different skills, derived from the study of history and culture, foreign languages and literature, iconography, stylistic analysis, and connoisseurship.

## Undergraduate Program

Adviser  
104 Art, Box 353440  
206-543-0646  
uaskart@u.washington.edu

The Division of Art History offers the following undergraduate programs:

- \* The Bachelor of Arts degree with a major in art history
- \* A minor in art history

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* ART H 201, ART H 202, ART H 203, ART H 204, ART H 205, ART H 206. Courses to enhance writing skills, and courses in history, literature, anthropology, classics, and foreign languages.

## Department Admission Requirements

Entering freshmen and transfer students may declare an Art History major by scheduling an appointment with the Art History adviser on or after their orientation/registration date. Currently enrolled University students who wish to declare an Art History major must have a minimum 2.50 GPA and meet with the adviser anytime during the quarter except the first two weeks.

*Admission Policy for Postbaccalaureate Applicants:* Postbaccalaureate study in Art History is limited. Acceptance is competitive, based upon

transcripts of prior college work and a School of Art Supplemental Information Form.

## Major Requirements

55 credits in art history, including one course from each of the following four groups plus three 400-level art history courses:

1. ART H 201, ART H 202, ART H 290, ART H 340, ART H 341, ART H 342, ART H 343, ART H 351, ART H 352, ART H 361, or ART H 373
2. ART H 204, ART H 306, ART H 311, ART H 315, ART H 316, or ART H 321
3. ART H 205, ART H 206, ART H 230, ART H 330, ART H 331, or ART H 337
4. ART H 203, ART H 232, ART H 380, ART H 381, ART H 382, or ART H 384

## Minor

*Minor Requirements:* 30 credits of art history courses, of which 15 must be upper-division courses. Minimum grade of 2.0 required in each course applied to the minor. At least 15 credits must be completed at the UW.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Students studying in the field of art history can expect to develop strong writing, research, analytical, critical thinking, and problem-solving skills. Coursework is designed to allow students to comprehend the social, historical, ethical, and aesthetic significance of the visual realm that is our present environment and the heritage of many cultures. Art history graduates pursue careers in fields such as gallery and museum management, visual technology, teaching, arts administration, arts education, research, curating and restoration, interior design, and art and antique connoisseurship.
- \* *Instructional and Research Facilities:* None
- \* *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* The Art History Program is based in the School of Art where majors work side by side with students studying in the studio arts. They have direct access to the Art Library, Media Center, Writing Center, a state of the art Computer Center, and three active art galleries. Classes are taught in rooms equipped with the technology needed to address all the issues and complexities of a visual culture. Many art history classes are conducted at local galleries and museums where students receive first-hand knowledge of the visual arts. Enrichments outside the classroom include one quarter study abroad in Rome, opportunities to work one on one with faculty in research projects, and workshops and presentations by visiting artists and scholars.
- \* *Department Scholarships:* Art history majors compete each year for several major scholarships in the School of Art: Austin Award (\$3,000), Marsh Scholarship (\$3,000), and Milnor Roberts Award (\$4,000). They are also eligible for smaller awards of excellence that range from \$500 to \$1,000. Applications are made in early April and scholarship winners are announced at the annual School of Art Open House in late April.

In addition to these awards, students are also encouraged to apply for the Nordstrom Research and Recognition Awards that support special projects, research, and professional development.

The \$2,000 Lockitch Graduating with Excellence Award is presented each year at the School of Art Graduation Celebration to the top undergraduate in Art History.

- \* *Student Organizations/Associations:* Art history majors have opportunities to serve on School of Art committees which include: Open House, Gallery, Graduation Celebration, Curriculum, Space, and Career Discovery Week.

*Of Special Note:* Art history majors anticipating graduate study should acquire a reading knowledge of French, German, Chinese, Italian, or Japanese.

## Graduate Program

Graduate Program Coordinator  
209 Art, Box 353440  
206-543-4876  
uwah@u.washington.edu

### Master of Arts

#### Admission Requirements

1. Bachelor of Arts degree with major in the history of art, or equivalent course work
2. One copy of all academic transcripts (international applicants must submit two copies)
3. Three letters of recommendation
4. Statement of professional objectives in the field
5. Samples of the applicant's written work
6. Graduate Record Examination scores

#### Graduation Requirements

55 to 65 credits, to include:

1. 55 credits in the thesis track or 65 credits in the non-thesis track. Of these credits, a minimum of 45 credits in the thesis track or 55 credits in the non-thesis track must be numerically graded art history courses numbered 400 and above, exclusive of thesis or practicum credits. A maximum of 10 credits in related fields, in numerically graded courses numbered 300 and above, may be approved for credit in place of art history courses. No more than 12 credits of ART H 600 may be counted toward the minimum credit requirement for the Master of Arts degree.
2. A minimum of 5 numerically graded credits each in four of five major areas: African or Native American; East Asian; Ancient, Classical, and Medieval; Italian and Northern Renaissance, Baroque, and Rococo; or late eighteenth- to twentieth-first-century Western.
3. A minimum of 15 credits in 500-level seminars, in addition to ART H 500 and ART H 504, both of which must be taken within the first year of residence. At least one seminar each in a Western and a non-Western area is required.
4. Knowledge of French, German, or Italian, or of Chinese or Japanese if appropriate. Degree candidates specializing in Native American art may substitute Spanish for French, German, or Italian. Candidates in the thesis track are required, in addition, to demonstrate knowledge in a second language appropriate to the student's area of study as determined by the faculty. Petitions to the Faculty Graduate Committee for exemption from the second language requirement are considered as warranted by the needs of different fields or projects. Language requirements may be satisfied by passing graduate proficiency examinations (available in French, German, Italian, and Spanish), or by completing the third quarter of the second year of French, German, Italian, Chinese, Japanese, or other appropriate language as a graduate student at the University of Washington with a minimum grade of 3.0. Students are expected to satisfy at least one of the language requirements no later than the first quarter of residence in the program.
5. Students in the thesis track must take 10 thesis credits in ART H 700 in preparation for the written presentation and oral defense of a thesis that demonstrates the ability to conduct rigorous research, familiarity with relevant sources, and a capacity for synthesis and critical evaluation; students in the non-thesis track must take 10 practicum credits in ART H 598, a practical or theoretical program designed in conjunction with the faculty and defended by means of a final written report and oral examination.

### Doctor of Philosophy

#### Admission Requirements

1. Prior sound preparation in art history at a general level, which usually means having acquired the Master of Arts degree in the history of art
2. One copy of all academic transcripts (international applicants must submit two copies)
3. Three letters of recommendation
4. A statement of professional objectives in the discipline
5. Samples of written research work in art history. Taking the Graduate Record Examination is required.

## Graduation Requirements

Minimum 90 credits, to include:

1. 60 credits in numerically graded art history courses numbered 400 and above, beyond the Master of Arts degree or equivalent, and exclusive of dissertation credits; a maximum of 20 credits in related fields in numerically graded courses numbered 300 and above may be approved for credit in place of art history courses; a minimum of 10 credits must be in areas other than those tested by the General Examination; at least 30 credits must be in 500-level seminars
2. Knowledge of German, French, or Italian, or of Chinese or Japanese if appropriate; a research capability in a second language adjudged appropriate to the student's area of study; a knowledge of any other languages considered necessary by the faculty. Language requirements may be satisfied by passing graduate-proficiency examinations (available in French, German, Italian, and Spanish), or by completing the third quarter of second-year French, German, Italian, Chinese, Japanese, or other appropriate language as a graduate student at the University with a minimum grade of 3.0
3. General Examination, written and oral, taken prior to enrollment for dissertation credits; this examination covers three specific fields of art history chosen from the following general areas: African, Native American, Chinese, Japanese, Ancient, Medieval, Renaissance, Baroque and eighteenth century, Modern, and Contemporary; no more than two fields may be selected from the same area
4. 30 dissertation credits in ART H 800 taken after the General Examination in preparation and defense of the dissertation. These credits must be distributed over a minimum of three quarters
5. A dissertation demonstrating original and independent investigation and achievement

## Financial Aid

The Art History division offers certain scholarship funds, as well as teaching assistantships, for art history graduate students. A small number of grants are awarded to outstanding entering students, but it is otherwise a policy to award financial aid and assistantships only to students who have completed at least one year of graduate study.

---

## Asian Languages and Literature

225 Gowen  
depts.washington.edu/asianll

The Department of Asian Languages and Literature offers instruction in the principal languages and literatures of Asia, including East, Southeast, Central, and South Asia. Emphasis is placed on the roles of these languages within the cultures they serve as well as on linguistic, textual, and literary analysis. Courses on Asian literature in English are offered for majors and nonmajors alike.

## Undergraduate Program

Adviser  
223A Gowen, Box 353521  
206-543-4996

The Department of Asian Languages and Literature offers the following undergraduate programs:

- \* The Bachelor of Arts degree with majors in Chinese, Japanese (with either a linguistic or literature concentration), Korean, and South Asian languages
- \* Minors in Chinese, Hindi, Japanese, and Sanskrit

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* First and second years of the target foreign language(s): Chinese, Japanese, Korean, or South Asian (Hindi or Sanskrit). Any courses relating to the area or discipline of major study.

## Department Admission Requirements

1. Completion of at least 20 credits of college course work (or department-approved equivalent) in the intended primary language of concentration. The most recent course completed in the intended primary language of concentration must be a course taken at the UW, and the final grade in the most recent course in that language must be 2.5 or higher.
2. Completion of one writing course (W-prefix) taught in English with a minimum grade of 2.0.
3. The department prefers that prospective majors present a cumulative GPA of 2.50 or higher. Applicants may submit materials in addition to transcripts clarifying any aspect of past course work. Denied applicants may appeal.
4. Transfer students must be enrolled at the UW before applying to the major.

*Note:* A student entering the junior year without two years of the appropriate foreign language will not be able to complete the degree requirements in two years unless he or she takes accelerated courses such as Chinese or Japanese at the UW during summer quarter.

## Major Requirements

### Chinese

75 credits, as follows:

1. *Language Courses:* 30 credits required, including a minimum of 20 beyond the third-year level. Must include CHIN 451, plus other courses drawn from CHIN 411, CHIN 412, CHIN 413, CHIN 421, CHIN 422, CHIN 423, CHIN 452, CHIN 453, CHIN 470, and CHIN 482.
2. *Linguistics Courses:* 5 credits required (CHIN 342); an additional 5 credits optional (CHIN 443).
3. *Literature Courses:* 15 credits required (10 if the optional 5 linguistics credits are taken). Courses may be drawn from ASIAN 201, ASIAN 204, ASIAN 211, ASIAN 263, CHIN 373, CHIN 374, CHIN 380, CHIN 381, CHIN 385, CHIN 461, CHIN 462, CHIN 463, and Chinese literature courses offered in the Department of Comparative Literature.
4. *China-Related Humanities and Social Science Courses:* 25 credits required. Must include HSTAS 211, plus other courses explicitly related to China from such departments as Anthropology, Art, History, International Studies, Linguistics, and Sociology.

### Japanese

75 credits as follows:

1. 45 credits in language, including 30 credits beyond the second year, selected according to the student's choice of literature or linguistics concentration; 20 credits of a literature or linguistics sequence; and 10 credits of area-related humanities and social sciences, as follows:
  - a. *Literature Concentration*
    - i. *Language:* 45 credits, with a minimum of 30 credits beyond the second year. (Second year: JAPAN 211, JAPAN 212, JAPAN 213; third year: JAPAN 311, JAPAN 312, JAPAN 313; fourth year: 15 credits from JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, and JAPAN 473.) Students who, upon the determination of the faculty in Japanese, are permitted to begin their study of Japanese at the University at a level higher than JAPAN 211, substitute, in consultation with the undergraduate adviser, an equivalent number of credits in additional courses drawn from JAPAN 431, 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, JAPAN 473, and with prior approval, other Japan-related humanities or social science courses.
    - ii. *Literature Sequence:* 20 credits, including JAPAN 321, JAPAN 322, JAPAN 323, and 5 credits from JAPAN 395, JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 460, JAPAN 471, JAPAN 472, and JAPAN 473, if not used to satisfy the language requirement.
    - iii. *Area-Related Humanities or Social Science Courses:* 10 credits at the 300 level or above, at least 5 of which must be from outside the Department of Asian Languages and Literature; may be taken from JAPAN 342, JAPAN 343, JAPAN 395, JAPAN 440, JAPAN 442, JAPAN 443, and JAPAN 460; other Japanese literature courses not used to meet the literature requirement; and related courses from other departments.
  - b. *Linguistics Concentration*
    - i. *Language:* 45 credits, with a minimum of 30 credits beyond the second year. (Second year: JAPAN 211, JAPAN 212, JAPAN 213; third year: JAPAN 311, JAPAN 312, JAPAN 313; fourth year: 15 credits from JAPAN 421, JAPAN 422, JAPAN 423, JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, and

JAPAN 473.) Students who, upon the determination of the faculty in Japanese, are permitted to begin their study of Japanese at the University at a level higher than JAPAN 211, substitute, in consultation with the undergraduate adviser, an equivalent number of credits in additional courses drawn from JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, JAPAN 473, and with prior approval, other Japan-related humanities or social science courses.

- ii. *Linguistics Sequence:* 20 credits, including at least 15 credits from JAPAN 342, JAPAN 343, JAPAN 395, JAPAN 440, JAPAN 442, JAPAN 443; 5 of the 20 credits may come from JAPAN 321, JAPAN 322, JAPAN 323, JAPAN 460, JAPAN 471, JAPAN 472, JAPAN 473, LING 400, or related courses from other departments.
- iii. *Area-Related Humanities or Social Science Courses:* 10 credits at the 300 level or above, at least 5 of which must be from outside the Department of Asian Languages and Literature; may be taken from LING 400, JAPAN 321, JAPAN 322, JAPAN 323, JAPAN 395, JAPAN 460, JAPAN 471, JAPAN 472, and JAPAN 473; or related courses from other departments.

### Korean

75 credits as follows:

1. 45 credits in the Korean language, 15 beyond second-year level
2. 30 credits in literature and area-related humanities or social science courses

### South Asian Languages

75 credits as follows:

1. 60 credits in languages, of which 45 are in the major language, 15 in the minor language
2. 15 credits in area-related humanities or social science courses to be chosen in consultation with adviser and to include HSTAS 201 and ASIAN 401

## Minor

### Minor Requirements

*Chinese:* 30 credits as follows:

1. *Language Courses:* 15 credits at or above the third-year level. Must include CHIN 451, plus other courses drawn from among CHIN 212, CHIN 213, CHIN 301, CHIN 302, CHIN 303, CHIN 411, CHIN 412, CHIN 413, CHIN 421, CHIN 422, CHIN 423, CHIN 452, CHIN 453, CHIN 470, and CHIN 482.
2. *China-Related Humanities Courses:* 15 credits drawn from among the following: ASIAN 201, ASIAN 204, ASIAN 211, ASIAN 263 (when China is the topic), CHIN 342 (or CHIN 442), CHIN 373, CHIN 374, CHIN 380, CHIN 381, CHIN 385, CHIN 443, and CHIN 461, CHIN 462, CHIN 463.

*Hindi:* 30 credits as follows:

1. 15 language credits at the second-year level (HINDI 321, HINDI 322, HINDI 323) or above
2. 15 credits in area-related humanities courses to include either ASIAN 203 or ASIAN 206 and any of the following: ART H 306; HSTAS 201, HSTAS 202, HSTAS 401, HSTAS 402, HSTAS 403, HSTAS 404; PHIL 386, PHIL 412; RELIG 352, RELIG 354

*Japanese:* 30 credits as follows:

1. 15 language credits at the third-year level (JAPAN 311, JAPAN 312, JAPAN 313) or above
2. 15 credits in literature, linguistics, or humanities courses. Acceptable courses include: JAPAN 321, JAPAN 322, JAPAN 323, JAPAN 342, JAPAN 343, JAPAN 405, JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 440, JAPAN 442, JAPAN 443, JAPAN 460, JAPAN 471, JAPAN 472, JAPAN 473. 5 credits from the following may be applied toward the minor: ARCH 441; ARCH 453; ART H 317; ART H 318; ART H 321; HSTAS 423; HSTAS 424; HSTAS 441; MUSIC 495.
3. Minimum 2.0 grade required for each course applied to the minor.

*Sanskrit:* 30 credits as follows:

1. 15 language credits at the second-year level (SNKRT 401, SNKRT 402, SNKRT 403) or above

2. 15 credits in area-related humanities courses to include either ASIAN 203 or ASIAN 206 and any of the following: ART H 306; HSTAS 201, HSTAS 202, HSTAS 401, HSTAS 402, HSTAS 403, HSTAS 404; PHIL 386, PHIL 412; RELIG 352, RELIG 354

## Student Outcomes and Opportunities

- \* *Instructional and Research Facilities:* None
- \* *Honors Program:* With College Honors. With Departmental Distinction. See adviser for details.
- \* *Research, Internships, and Service Learning:* None offered
- \* *Department Scholarships:* None offered
- \* *Student Organizations/Associations:* None

## Graduate Program

Graduate Program Coordinator  
225 Gowen, Box 353521  
206-543-4996

The Department of Asian Languages and Literature offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees with specializations in (1) the languages and literatures of China; (2) the language and literature of Japan; (3) the languages and literatures of South Asia, subsuming Sanskrit and Hindi; (4) the language and literature of Korea. All graduate students in the department must affiliate themselves with one of these programs. The department does not offer degrees or specializations in language pedagogy.

## Master of Arts, Buddhist Studies

### Admission Requirements

- \* An undergraduate major in the language and literature of specialization (four years of language training for admission to the Chinese and Japanese programs; fewer years of language acquisition may be acceptable in South Asian languages), or the background and training equivalent to such a major. Students without such a background may be qualified for admission, but will need to acquire the program prerequisites during the earliest stages of their graduate study.
- \* A statement of academic goals
- \* Three letters of recommendation addressed to the Graduate Program Coordinator.

### Degree Requirements

45-54 credits plus language requirements, as follows:

- \* *Coursework Requirement:*
  - o *Non-thesis Program:* 45 course credits, 18 of which must be at the 500 level and above. Buddhist Studies seminars and text reading courses offered within the department must be included. Students are also required to complete language study through the fourth-year level in their major language and through the second-year level in a second Asian language.
  - o *Thesis program:* 45 course credits plus 9 thesis credits. At least 18 of the 45 credits must be taken at the 500 level or above. Buddhist Studies seminars and text reading courses offered within the department must be included. The language requirements in this program are the same as in the non-thesis program. In addition, the student must write an acceptable M.A. thesis according to the rules and policies of the Department of Asian Languages and Literature and pass an oral examination.
- \* *Foreign language requirements:* Students must demonstrate competence in their major language, and must complete the course requirements in their second Asian language as outlined above. These two languages may include one classical language and one relevant modern language, or two classical languages. In either case, one of the languages must be Sanskrit. In addition, students must demonstrate through a written examination reading knowledge of one foreign language relevant to their area of specialization, which must be other than English and the student's native language. It may be the student's second Asian language or a European or Asian research language.

## Master of Arts, Chinese

### Admission Requirements

- \* A minimum undergraduate GPA of 3.00 in the junior and senior years
- \* Three letters of recommendation and a statement of purpose.
- \* Strong undergraduate preparation in one of the following: Chinese language and literature, another foreign language and literature, Asian regional studies, comparative literature, linguistics, English, philosophy, or history. Applicants are also expected to have completed four years of modern Chinese and one year of classical Chinese, each with a minimum GPA of 3.00.
- \* Students lacking such preparation may be admitted to the M.A. program provisionally, and will be required to make up the deficiencies during their first year of residence.

### Degree Requirements

38-40 credits, as follows:

- \* *Degree Requirements:* Two options are available to the student in the M.A. degree program: (1) a thesis program, and (2) a non-thesis program which requires two seminar or research papers in lieu of a thesis, and two 500-level departmental courses in addition to the requirements specified below.
- \* *Coursework Requirements:*
  - o *Second-Year Classical Chinese, 15 credits:* CHIN 551, CHIN 552, CHIN 553 (5, 5, 5)
  - o *Methods and Materials, 5 credits:* CHIN 559 (5)
  - o *History of Chinese Literature, 5 credits:* Any one course of the following three-quarter sequence: CHIN 461, CHIN 462, CHIN 463 (5, 5, 5)
  - o *The Chinese Language, 5 credits:* CHIN 442 (5)
  - o At least one course from each of the following two groups, 8-10 credits:
    - + *Group I -- Literature:* CHIN 461, CHIN 462, CHIN 463 (5, 5, 5); CHIN 482 (5); CHIN 554, CHIN 555, CHIN 556 (5, 5, 5); CHIN 561, CHIN 562, CHIN 563 (5, 5, 5); CHIN 573 (5, max. 15); CHIN 575 (5, max. 15); CHIN 580 (5, max. 15); CHIN 582 (5, max. 15); CHIN 583 (5); CHIN 590 (5); CHIN 591, CHIN 592, CHIN 593 (5, 5, 5)
    - + *Group II -- Linguistics and Philology:* CHIN 443 (5); CHIN 531, CHIN 532, CHIN 533 (3, 3, 3); CHIN 540 (3, max. 9); CHIN 541 (3, max. 9); CHIN 542 (3); CHIN 544 (3, max. 9); CHIN 557 (5); CHIN 558 (3)
- \* *Foreign Language Requirement:* For the M.A. in Chinese, the additional language requirement must be fulfilled through a graduate reading examination. The additional language may be another Asian language or a European language, but may not be the student's native language, and must be relevant to the student's program of study.
- \* *M.A. Examination:* Examination in Chinese will cover Chinese literature, and the second part will focus on language (linguistics and philology) and texts. The examination should normally be taken no later than autumn quarter of the third year.

## Master of Arts, Japanese Language and Literature

### Admission Requirements

- \* A minimum undergraduate GPA of 3.00 in the junior and senior years
- \* Three letters of recommendation and a statement of purpose
- \* Strong undergraduate preparation in any of the following: Japanese language and literature, with the equivalent of at least four years' work in the language; another language and literature, Asian regional studies, comparative literature, linguistics, art history, English, philosophy, or history.
- \* While a student lacking such preparation may be admitted, the student will be expected to concentrate initially on compensating for deficiencies in background by taking course work chosen in consultation with the academic adviser. In the case of inadequate training in Japanese, intensive courses in the language are available.

## Degree Requirements

45-75 credits, as follows:

- \* *Coursework:* The M.A. program requires a minimum of 45 credits above the 300 level which are to be earned through a combination of course work and research. At least 18 credits of coursework must be completed in numerically graded courses at the 400 and 500 level, and 18 credits at the 500 level and above.

The following courses normally constitute a minimal level of training: JAPAN 321, JAPAN 322, JAPAN 323 (5, 5, 5, no graduate credit); JAPAN 411, JAPAN 412, JAPAN 413 (5, 5, 5); JAPAN 431, JAPAN 422, JAPAN 423 (5, 5, 5); JAPAN 471, JAPAN 472, JAPAN 473 (5, 5, 5). Students whose undergraduate training has provided them with a background comparable to this may enter more advanced courses. Less well prepared students may require a program considerably in excess of the minimum 45 credits.

The student may present research in either of two ways: (1) by submitting a thesis, in which case the student takes at least 36 course credits and 9 thesis credits, or (2) by submitting two research papers that have been written either independently or for courses or seminars, in which case all 45 minimum credits will be in course credits.

- \* *Foreign Language Requirement:* The student must fulfill one additional language requirement in addition to the language of specialization. The language can be either European or an Asian one; however, it should not be English. The language chosen must be relevant to the student's program of study, which is to say that the knowledge of it will provide him access to a body of critical literature on his field (as in the case of French or German) or will improve his grasp of the structure or etymological sources of Japanese (as in the case of Chinese or Korean). It may not be the student's native language.
- \* *M.A. General Examination:* Near the end of study, the student takes two written examinations, each of two hours' duration, one in pre-modern (pre-Meiji) literature, and the other modern. These are intended to examine the student's general mastery of the respective areas.

## Master of Arts, Japanese Language and Linguistics

### Admission Requirements

- \* A minimum undergraduate GPA of 3.00 in the junior and senior years
- \* Three letters of recommendation and a statement of purpose
- \* Strong undergraduate preparation in any of the following: Japanese language and literature, with the equivalent of at least four years' work in the language; another language and literature, Asian regional studies, comparative literature, linguistics, art history, English, philosophy, or history.
- \* While a student lacking such preparation may be admitted, the student will be expected to concentrate initially on compensating for deficiencies in background by taking course work chosen in consultation with the academic adviser. In the case of inadequate training in Japanese, intensive courses in the language are available.

### Degree Requirements

45-75 credits, as follows:

- \* *Coursework:* The M.A. program requires a minimum of 45 credits above the 300 level which are to be earned through a combination of course work and research. At least 18 credits of course work must be completed in numerically graded courses at the 400 and 500 level, and 18 credits at the 500 level and above.

The following courses normally constitute a minimal level of training: JAPAN 421, JAPAN 422, JAPAN 423 (5, 5, 5, if language training is necessary); JAPAN 342 (5, no graduate credit); JAPAN 343 (5, no graduate credit); JAPAN 440 (5); JAPAN 442 (5); JAPAN 443 (5). Students whose undergraduate training has provided them with a background comparable to this may enter more advanced courses. Less well prepared students may require a program considerably in excess of the minimum of 45 credits.

The student may present research in either of two ways: 1) by submitting a thesis, in which case the student takes at least 36 course credits and 9 thesis credits (ASIAN 700), or 2) by submitting two

research papers that have been written either independently or for courses or seminars, in which case all 45 minimum credits will be in course credits.

- \* *Foreign Language Requirement:* The student must fulfill one additional language requirement in addition to the language specialization. The language can be either European or an Asian one; however, it should not be English. The language must be relevant to the student's program of study, which is to say that knowledge of it will provide him access to a body of critical literature on the student's field (as in the case of French or German) or will improve the student's grasp of the structure or etymological sources of Japanese (as in the case of Chinese or Korean). It may not be the student's native language.
- \* *Linguistics:* Near the end of the course of study, each student takes two written examinations in Japanese linguistics, whether in descriptive linguistics, theoretical linguistics, applied linguistics, or sociolinguistics. These are intended to examine the student's general mastery of the respective areas.

## Master of Arts, Korean

### Admission Requirements

- \* A minimum undergraduate GPA of 3.00 in the junior and senior years
- \* Three letters of recommendation and a statement of purpose
- \* Strong undergraduate preparation in any of the following: Korean language and literature, another language and literature, Asian regional studies, comparative literature, linguistics, English, philosophy, history or an approved area in the humanities or social sciences
- \* Three years of Korean language training. Students lacking such preparation are required to take the necessary courses during their first year of residence.

### Degree Requirements

39 credits, as follows:

- \* *Coursework:* KOREAN 415, KOREAN 416, KOREAN 417 (5, 5, 5); ASIAN 498 (5) or KOREAN 462 (5); KOREAN 531 (5); KOREAN 532 (5); ASIAN 700 (9). The student must also either 1) submit a thesis, or 2) submit two research papers in lieu of a thesis.
- \* *Foreign Language Requirement:* The student must fulfill one additional language requirement in addition to the language of specialization. The language can be either European or an Asian one; however, it should not be English. The language chosen must be relevant to the student's program of study. It may not be the student's native language.
- \* *M.A. examination:* The student must take a written examination in two parts, each part to be two hours in length. One part is in pre-modern Korean literature, the other modern. The student should take the M.A. examination no later than autumn quarter of the third year.

## Master of Arts, South Asian Languages and Literature

### Admission Requirements

- \* Minimum undergraduate GPA of 3.00 in the last 90 quarter or 60 semester credit hours
- \* Three letters of recommendation and a statement of purpose
- \* Preference is given to students with prior preparation in a South Asian language and literature, in South Asian regional studies, or in a humanistic discipline pertinent to the study of South Asian civilization. Students lacking such preparation may be admitted to the M.A. program; however, they must remedy any deficiencies by adding, as early as possible, such courses as the academic adviser considers necessary. South Asian languages in which specializations are offered at the University are Sanskrit and Hindi.

### Degree Requirements

45-75 credits, as follows:

- \* *Coursework:*
  - o *Non-thesis Program:* 45 course credits, 18 of which must be at the 500 level and above. Language study through the fourth-year level in the student's major language and through the second-year level in a second South Asian language. In addition, the student must present two seminar papers which are approved by the student's adviser and at least one other faculty member in the department.

- o *Thesis Program:* 45 course credits plus 9 thesis credits. At least 18 of the 45 credits must be taken at the 500 level or above. The language requirements in this program are the same as in the non-thesis program. In addition, the student must write an acceptable M.A. thesis according to the rules and policies of the Department of Asian Languages and Literature and pass an oral examination.

- \* *Foreign Language Requirements:* Students must demonstrate competence in their major South Asian language, and must complete the course requirements in their second South Asian language as outlined above. In addition, students must demonstrate through a written examination reading knowledge of one foreign language relevant to their research, which must be other than English and the student's native language. At the M.A. level, this language may be the student's second South Asian language or a European language.

## Doctor of Philosophy, Buddhist Studies

### Admission Requirements

M.A. degree in Asian Languages and Literature at the University of Washington and a satisfactory evaluation by South Asian Language Program faculty. Students with sufficient background, usually the successful completion of a relevant M.A. degree at another institution, may be considered for admission into the Ph.D. program.

### Degree Requirements

90 credits, as follows:

For the Ph.D., students are expected to demonstrate the ability to do original research utilizing primary languages of Buddhist traditions in accordance with their chosen areas of concentration. Students are required to demonstrate competence in their major Asian languages and pass written examinations in two research languages other than English and the student's native language (that is, one written examination in addition to the examination completed at the M.A. level). Where appropriate, students are strongly encouraged to acquire competence in a modern research language in order to pursue research in the field: for example, in India, Nepal, Sri Lanka, Tibet, China, or Japan.

Students are also required to pass four written field examinations selected in accordance with the student's interests. Generally, at least two of these examinations are directly related to some aspect of Buddhist studies and a third falls within the general purview of South Asian languages and literature. A fourth field examination can have as its subject an adjacent field or discipline. Once these field examinations have been satisfactorily completed, the student is eligible to take a two-hour comprehensive oral examination, administered by the student's supervisory committee. When that has been passed, students are accorded candidate's status and are ready to submit a dissertation proposal. The Ph.D. is conferred once the completed dissertation has been defended successfully before the student's supervisory committee.

## Doctor of Philosophy, Chinese

### Admission Requirements

After successful completion of 45 credits (a minimum of three quarters) of graduate study in the department, a student wishing to enter the Ph.D. program with specialization in Chinese language and literature submits a formal petition to the Department stating post-M.A. academic plans and goals.

Ideally, the prospective candidate will have completed an M.A. degree in the field of Chinese language and literature prior to entering the Ph.D. program. If the student has an M.A. in another pertinent field, for example, in Linguistics, comparative literature, philosophy, history, or Asian regional studies, it is not necessary to take an additional M.A. in Chinese language and literature. The student, however, is required to satisfy all course and examination requirements for the M.A. program in this department. Upon admission to the program, the student should be prepared to take courses in modern Chinese at the 500 level, and should have at least two years of Classical Chinese.

A student who intends to go directly from the B.A. to the Ph.D. program must present an exceptionally strong background preparation in the disciplines of literary study or linguistics. The student is expected in the course of his or her work to satisfy all curriculum requirements for the M.A., and must petition the department for special permission to bypass the M.A.

## Degree Requirements

90 credits, as follows:

- \* *Course Requirements:* Students in the Ph.D. program must complete the course requirements for the M.A. in Chinese. Equivalent courses from other programs may be substituted subject to written approval by the regular instructor of the course in question. In addition, whichever quarters of the sequence CHIN 461, CHIN 462, CHIN 463 were not taken for the M.A. must be taken for the Ph.D. The student's post-M.A. course work should be designed, in consultation with the adviser, to fill in gaps or strengthen weaknesses in the student's background, and to establish and develop four fields of special study that the student pursues in some depth in preparation for the general examination.
- \* *Field Requirements:* The student is expected to familiarize himself or herself with both the original texts and the secondary scholarship of the field, and to show some potential for carrying out original research in the area or field in question. Each student must pursue four such fields of special study, and is examined separately by an appropriate faculty member prior to the general oral examination. The field examinations must be written.
- \* *Examinations:* The student is examined in each of the four fields separately by an appropriate faculty member. Prior to the General Examination the student must demonstrate a reading knowledge of an additional Asian language and a pertinent European language. (The student may apply the foreign language reading examination required for the M.A. to this requirement.)

## Doctor of Philosophy, Japanese

### Admission Requirements

Aside from having to complete at least two quarters of graduate study in the department, the student petitioning for admission to pre-candidacy status in the Ph.D. program must either hold the M.A. degree in Japanese language and literature or must have completed a minimum of 45 course credits and have satisfied the language requirement for the M.A. The student should also be taking at least 500-level courses in modern Japanese and should have studied classical Japanese for a minimum of one year. Any insufficiencies in background (e.g., in the case of a student holding an M.A. in an area other than Japanese language and literature) should be made up before the student petitions for admission to pre-candidacy. The petition indicates that the student feels he or she is prepared to take a written examination on the student's general knowledge of the field and an additional oral diagnostic examination on his or her background and plans for future study. The petition should only be submitted after consultation with the academic adviser.

### Degree Requirements

95 credits, as follows:

- \* *Course Requirements:* In addition to the minimum of 45 credits or its equivalent required for the master's program, the student must take at least 50 credits of course work on the graduate level. The following courses and dissertation credits are required: JAPAN 501 (5); JAPAN 505, JAPAN 506, JAPAN 507 (5, 5, 5); JAPAN 531, JAPAN 532, JAPAN 533 (5, 5, 5); JAPAN 571, JAPAN 572, JAPAN 573 (5, 5, 5); JAPAN 590 (15); ASIAN 800 (27)

Additional course work in related fields may be required to meet the needs of each program. In order to acquire the widest possible background, students are encouraged to take related courses in history, linguistics, religion, and the social sciences. Familiarity with Chinese literature and allied fields as well as with comparative literature is strongly recommended. Each student develops an individualized program of studies in consultation with the academic adviser.

- \* *Language Examinations:* In addition to a second language (usually European) required for the M.A., the student must demonstrate proficiency in a third language, usually Asian (Chinese is the usual choice for an Asian language, but the student should discuss other possibilities with the adviser). Proficiency must be demonstrated in the third language before the student may proceed to the General Examination.
- \* *Field Examination:* Upon becoming a precandidate, the student has completed a generalized study of the area of Japanese language and

literature, and should choose four specialized fields to study for the next one or two years under the guidance of the Supervisory Committee. The four fields must be sufficiently diverse, and at least one of them must be in language. As the supervisor for each field becomes satisfied that the student has attained sufficient mastery, the supervisor and the student decide on a time for the student to take a written examination.

- \* *General Examination:* When the four field examinations and the third language requirement have been satisfied, the academic adviser arranges with the Graduate School for the student to take the oral General Examination for admission to candidacy for the doctoral degree.
- \* *Dissertation and Final Examination:* After achieving candidate status, the student engages in research and the writing of the dissertation. When the Reading Committee has accepted the dissertation, the Dean of the Graduate School authorizes the Supervisory Committee to hold the Final Examination in defense of the dissertation, which completes the degree requirements for this program.

## Doctor of Philosophy, Korean

### Admission Requirements

A student shall petition for admission to the Ph.D. program with specialization in Korean literature after successful completion of at least two quarters of graduate study in the Department of Asian Languages and Literature. The student should either have the M.A. degree in Korean literature or the equivalent, or have satisfactorily completed all coursework required for the M.A. in Korean literature. The student should be prepared to take 500-level courses in Korean. The petition should be submitted after consultation with the student's academic advisor.

### Degree Requirements

90 credits, as follows:

- \* *Coursework:*
  - o *Korean Language and Literature:* In addition to the course requirement and examination for the M.A. in Korean literature, students in the Ph.D. program must complete the following courses: KOREAN 531 (5), KOREAN 532 (5), ASIAN 800 (27)
  - o *Chinese Language and Literature:* Students interested in pre-modern Korean literature are required to take two years of Chinese, at least one year of classical Chinese, and a survey course on pre-modern Chinese literature. Students interested in modern Korean literature are required to take either: (1) three years of Chinese and a survey course in Chinese literature, or (2) three years of Japanese and a survey course in modern Japanese literature.
  - o *Linguistics:* Students are encouraged to take linguistics courses that help the student prepare for the field exam in a language-related area. Courses to choose from include the following: ASIAN 401 (5), JAPAN 440 Linguistics (5).
  - o *Interdepartmental:* Students are encouraged to take Korea-related courses in other disciplines such as history and anthropology. Familiarity with other literatures and cultures, and course work in other departments such as Comparative Literature or other language and literature programs is also recommended.
- \* *Field Examinations:* With the guidance of an adviser, students develop a plan of study that concentrates on four areas of study, or "fields". A student may offer no more than one Korea-related field from outside the department; three of the fields must be prepared with department faculty. One of the fields may be in another Asian language or literature, depending on the student's interests. At least one of the fields shall be related to language.
- \* *Language Examinations:* Prior to the General Examination, students must demonstrate proficiency of an additional Asian language and a European language. (The student may apply the foreign language required for the M.A. to this requirement.)
- \* *General Examination, Dissertation, Final Examination:* When the four field examinations have been successfully passed, and the second language requirement met, the academic adviser arranges with the Graduate School for the student to take the oral General Examination for admission to candidacy for the Doctoral degree. This is usually a two-hour long oral examination, and covers principally, but not exclusively, the four fields that the student has prepared. Passing this examination, the student then writes a dissertation, under the direction of a dissertation adviser. An oral Final Examination in defense of the

finished dissertation completes the degree requirements for this program.

## Doctor of Philosophy, South Asian Languages and Literature

### Admission Requirements

Normally, entry into the program is contingent upon successful completion of the M.A. degree in Asian Languages and Literature at the University of Washington and a satisfactory evaluation by South Asian Language Program faculty. Students with sufficient background, usually the successful completion of a relevant M.A. degree at another institution, may be considered for admission into the Ph.D. program.

### Degree Requirements

90 credits, as follows:

For the Ph.D., students are required to demonstrate competence in their major South Asian language and pass written examinations in two research languages other than English and the student's native language (that is, one written examination in addition to the examination completed at the M.A. level). One of these two research languages must be a European language.

Students are also required to pass four written field examinations, at least three of which must fall within the general purview of South Asian languages and literature. A fourth can have as its subject an adjacent field or discipline, of the candidate's choice--an aspect of South Asian history or art history, for example. Once these field examinations have been satisfactorily completed, the student is eligible to take a two hour comprehensive oral examination, administered by his or her supervisory committee. When that has been passed, students are accorded candidate's status and are ready to submit a dissertation proposal. The Ph.D. is conferred once the completed dissertation has been defended before the student's supervisory committee.

### Financial Aid

Financial aid for graduate students newly entering the department is very limited and is awarded on a competitive basis. National Resource Fellowships are awarded for the study of Chinese, Japanese, and Korean. The department offers incoming graduate students limited opportunities for teaching assistant positions in Chinese, Japanese, and Korean. Since some financial aid is wholly or partially determined by need, all prospective students are urged to submit the Free Application for Federal Student Aid (FAFSA) with the College Scholarship Service in New Jersey, and to apply for other forms of aid mentioned in the department's cover letter to prospective students.

## Astronomy

C319 Physics-Astronomy  
[www.astro.washington.edu/](http://www.astro.washington.edu/)

Modern research in astronomy and astrophysics encompasses a large number of disciplines and specialties. Research areas include planetary systems and astrophysics, stellar structure and evolution, interstellar matter, binaries and compact objects, galactic structure and dynamics, galaxies and quasars, and large-scale structure and cosmology.

## Undergraduate Program

Adviser  
C311 Physics-Astronomy, Box 351580  
206-543-1988  
[office@astro.washington.edu](mailto:office@astro.washington.edu)

The Department of Astronomy offers the following undergraduate programs:

- \* The Bachelor of Science degree with a major in astronomy

## Bachelor of Science

*Suggested First-Year Courses:* MATH 124, MATH 125, MATH 126; MATH 308, MATH 324; PHYS 121, PHYS 122, PHYS 123. At community colleges it is better to take courses in physics, chemistry, mathematics, and computer science than the usual introductory astronomy courses.

### Department Admission Requirements

Enrolled students in good academic standing may declare the major at any time. Students must complete the necessary paperwork to declare by visiting the department advising office.

### Major Requirements

89 credits as follows:

1. ASTR 321, ASTR 322, ASTR 323
2. 9 credits of astronomy 400-level courses (with at least 3 credits in ASTR 480 or ASTR 499)
3. PHYS 121, PHYS 122, PHYS 123; PHYS 224, PHYS 225, PHYS 227, PHYS 228; PHYS 321, PHYS 322, PHYS 334
4. MATH 124, MATH 125, MATH 126; MATH 308, MATH 324
5. 12 additional credits in courses at the 300 level or above in physics (chosen from PHYS 315, PHYS 323, PHYS 324, PHYS 328, PHYS 331, PHYS 335, PHYS 421, PHYS 422, PHYS 423, PHYS 424, PHYS 425, PHYS 426, PHYS 431, PHYS 432, PHYS 433, PHYS 434) or engineering as approved by adviser. Data analysis (ASTR 480) and senior-year research (ASTR 499) are highly recommended, especially for students planning graduate work.
6. No grade lower than 2.0 is acceptable in courses fulfilling the above requirements.
7. Undergraduates interested in advanced work in astronomy are advised to take a double major in astronomy and physics. Undergraduates interested in immediate employment at an observatory or other scientific institution should include computing and electronics courses as part of their program.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* With this degree, students obtain a knowledge of the components of the universe, an understanding of the physics of its structure, and the technical skills to obtain and analyze data from telescopes. Graduates go on to graduate school or work at observatories or in industrial applications (lasers, x-ray, optical imaging) or in teaching applications.
- \* *Instructional and Research Facilities:* The department operates a 30-inch telescope with modern instrumentation at the Manastash Ridge Observatory near Ellensburg, primarily for students. The department is also part of a consortium of universities that operate a 3.5-meter optical/infrared telescope located on Sacramento Peak, New Mexico, and that are partners in the innovative Sloan Digital Sky Survey and the future Large Synoptic Survey Telescope. Students also have access to a variety of national facilities, such as the Kitt Peak and Cerro Tololo observatories and the Very Large Array. A variety of research is conducted with satellite instruments such as the Hubble Space Telescope. Data analysis and theoretical research are conducted on the department's cluster of computers, and on a variety of UW and national supercomputer facilities. Undergraduate majors often assist faculty members in acquisition, reduction, and interpretation of data.
- \* *Honors Options Available:* With College Honors. With Distinction (Departmental Honors): 3.70 GPA in all ASTR courses and 6 credits of ASTR 499.
- \* *Research, Internships, and Service Learning:* Space Grant
- \* *Department Scholarships:* Baer Prize. See adviser for details.
- \* *Student Organizations/Associations:* The Society of Physics Students. Undergraduate Astronomy Institute/Palen Radio Astronomy Group. League of Astronomers. See adviser for details.

*Of Special Note:* The first required astronomy course, ASTR 321, must be preceded by at least one year of college physics and mathematics. Any lower-division astronomy courses count as electives and not as part of the major. To finish in four years, the student must have completed PHYS 123 before autumn quarter of the junior year. Students are encouraged to take the capstone sequence: Spring: ASTR 480; Summer: ASTR 481 or ASTR 499 or an REU (Research Experiences for Undergraduates) program; Autumn: ASTR 482.

## Graduate Program

Graduate Program Coordinator  
C306 Physics-Astronomy, Box 351580  
206-685-2392  
grad@astro.washington.edu

A series of graduate courses in solar system, stellar, galactic, and extragalactic astrophysics is offered. The heart of the graduate program is the collaboration of students and faculty members in research at the frontiers of astronomy. Students work collaboratively with members of the faculty to develop the techniques and insight necessary for successful research and, subsequently, to define a thesis topic. The student's thesis research may use theoretical, computational, or observational material (obtained through the facilities of the UW or one of the national ground- or spacebased- observatories or a combination). Active research programs in observations and theory are being carried out in a variety of areas, including astrobiology and extrasolar planets, interplanetary dust and comets, stellar atmospheres and interiors, stellar evolution and populations, interacting binary stars and compact objects, interstellar matter and nebulae, computational astrophysics and data mining, galaxies and quasars, large scale structure and cosmology, and dark matter and energy.

## Doctor of Philosophy

### Admission Requirements

Most, though not all, entering students have a bachelor's degree in physics. Entering students are not required to have a background in astronomy, although some knowledge of general astronomy is expected of those to whom a teaching assistantship is offered. Undergraduates interested in a graduate program in astronomy are urged to concentrate on preparation in physics and mathematics before entering.

- \* Online application for Graduate Admission (AGA) form of the UW Graduate School
- \* Application fee
- \* A copy of the AGA to the Astronomy Department
- \* Resume
- \* "Statement of Goals and Achievements." This one-page, typed essay must address the reasons why the applicant wishes to pursue a graduate program in astronomy.
- \* Transcripts from all previous colleges and academic programs
- \* Graduate Record Examination (GRE) scores, both general and in the physics subject test, sent from the testing service
- \* Three letters of recommendation submitted online before the application deadline by the recommender.
- \* For international applicants:
  - o A second set of transcripts from all previous colleges and academic programs
  - o A paper copy of the AGA mailed to the Graduate School;
  - o TOEFL score report
  - o UW Statement of Financial Ability
  - o Test of Spoken English (TSE) scores, sent by the testing service
  - o Applicable visa documents (see Graduate School requirements)

### Degree Requirements

90 credits minimum, to include:

Typically Ph.D. students take formal courses during their first two years at the UW while at the same time sampling research projects with various faculty. The department offers a full set of graduate astronomy courses covering every major research area in astrophysics. Areas covered include planetary astronomy, stellar interiors and atmospheres, interstellar medium, galaxies, dynamics, cosmology, physical processes, observational astronomy, and a variety of special topics. Even in their first year, students are encouraged to embark on faculty-supervised research programs so they can make informed decisions about a thesis topic and a professional research career.

*Core Curriculum:* Each quarter of their first two years, students usually take at least two graduate-level core courses in astronomy, along with a third course emphasizing additional physical or mathematical science study or astronomical research. Typical core courses include ASTR 507, ASTR 519, ASTR 521, ASTR 557, ASTR 531, ASTR 561 in one year, and ASTR 508, ASTR 541, ASTR 509, ASTR 511, ASTR 512, ASTR 513 in the alternate year, along with ASTR 500 and ASTR 581 (latter two often offered annually).

Students must pass two examinations, the Qualifying Examination and the General Examination, before being admitted to Ph.D. candidacy. The Qualifying Examination, a written examination covering general knowledge, must be passed by the end of the third year of matriculation. The General Examination is an oral examination on a topic related to a student's proposed Ph.D. research topic. Students embark on their Ph.D. research program after passing the General Examination, typically in their third or fourth year at UW. Most students complete their Ph.D. thesis and defense two to three years later.

A Master of Science degree is offered but the department is not currently accepting students for a master's only program. Students typically earn the master's degree as part of the Ph.D. program. The departmental requirements for a master's degree are either (1) adequate performance on the Qualifying Exam or (2) an approved and supervised master's thesis.

## Assistantships

Normally all students making satisfactory academic progress receive financial support. More than three-quarters of the department's graduate students hold fellowships or research assistantships. A number of teaching assistantships are available, primarily in the elementary astronomy courses.

---

## Atmospheric Sciences

416 Atmospheric Sciences-Geophysics  
www.atmos.washington.edu

Atmospheric Sciences is a wide-ranging discipline that includes topics as diverse as weather forecasting, global warming, air quality, Pacific Northwest weather and climate, mountain weather, marine weather, El Nino, the ozone hole, ice ages, and the weather of Mars. It considers problems that are both scientifically challenging and critical for the welfare of modern society. These problems are addressed with theory, measurements, and computer simulations.

## Undergraduate Program

Adviser  
416 Atmospheric Sciences-Geophysics Building, Box 351640  
206-543-4576  
advise@atmos.washington.edu

The Department of Atmospheric Sciences offers the following programs of study:

- \* The Bachelor of Science degree with a major in atmospheric sciences
- \* A minor in atmospheric sciences

## Bachelor of Science

*Suggested First- and Second-Year Courses:* CHEM 142.

## Department Admission Requirements

Students in good academic standing may declare this major at any time.

## Major Requirements

90 credits as follows:

1. *Core requirements (71 credits for the major, plus 5 credits for QSR):* MATH 124, MATH 125, MATH 126; MATH 324; PHYS 121, PHYS 122, PHYS 123; AMATH 301, AMATH 351, AMATH 353; CSE 142; ATM S 301, ATM S 321, ATM S 340, ATM S 358, ATM S 370, ATM S 431, ATM S 441.
2. *Area of specialization:* 19 credits of additional coursework at the 200 level or above, selected in consultation with the faculty adviser. Suggested options include meteorology, atmosphere and environment, atmosphere and ocean, and teacher education.
3. A grade of 2.0 or better in each of the required courses and an overall GPA in these courses of 2.50.

## Pregraduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students

interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

## Minor

*Minor Requirements:* 25 credits to include ATM S 301 plus other approved courses. The minor may include a maximum of 6 independent study credits. Prerequisites include MATH 126 or MATH 136, and PHYS 123. Some courses may require further math or chemistry experience.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The degree program qualifies students for professional employment in weather forecasting, air-quality control and monitoring, and other areas of atmospheric sciences and related fields. The baccalaureate degree also is appropriate preparation for graduate study in atmospheric sciences.
- \* *Instructional and Research Facilities:* Extensive computer resources are available in the Departmental Computer Laboratory. The Department also maintains an extensive collection of weather data in graphical and numerical electronic format. A study area is provided for undergraduates. An instrument laboratory is maintained with a wide range of observing and data collection systems. Students also have access to a machine shop and an electronics laboratory.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- \* *Research, Internships, and Service Learning:* Internships are available either within the department or with outside organizations, providing a valuable opportunity to test a student's interests in various meteorological career paths and to extend the student's knowledge. A limited number of departmental scholarships are available each year, based on academic excellence or financial need. Employment opportunities are often available in one of the many departmental research groups, and some internships are paid.

Students majoring in atmospheric sciences may take advantage of a variety of opportunities to enhance their education. Undergraduate students are welcome at the department's many seminars and colloquia and are encouraged to join in the annual forecast contest. They may work on independent research projects under the guidance of a faculty member, or be an active participant in a field program.

- \* *Department Scholarships:* The Bruce Caldwell Memorial Scholarship and the Anonymous Donor Atmospheric Sciences Scholarship, which are both awarded annually, based on both academic excellence and financial need.
- \* *Student Organizations/Associations:* Student Chapter of American Meteorological Society, Puget Sound American Meteorological Society Chapter, Weekly Weather Discussion for all majors.

*Of Special Note:* The first required atmospheric sciences course is ATM S 301, which is offered autumn quarter only. Any lower-division atmospheric sciences courses will count as electives and not as part of the major.

## Graduate Program

Graduate Program Coordinator  
416 Atmospheric Sciences-Geophysics, Box 351640  
206-543-4576  
advise@atmos.washington.edu

Rapid growth of research in atmospheric sciences began in the late 1940s in response to needs and opportunities in weather forecasting. Extensive research is now underway to extend the time scale over which useful forecasts can be made and to increase the amount of regional and temporal detail in short-range forecasts. In addition, the atmospheric sciences now address a broad range of other problems of fundamental interest and importance. Examples include changes in climate that could result from increases in atmospheric CO<sub>2</sub> and other greenhouse gases, and the application of remote-sensing techniques to the monitoring and understanding of weather and climate.

Graduate students in the atmospheric sciences come from a variety of disciplines: physics, chemistry, engineering, atmospheric, or geophysical sciences, and applied mathematics. Opportunities are broad enough that each of these backgrounds is valuable for specific subfields within the

atmospheric sciences. However, students of atmospheric sciences should have in common a sound background in the fundamentals of physics and applied mathematics and an interest in complex natural phenomena. Research projects and graduate courses in the Department of Atmospheric Sciences are closely related, and the well-prepared graduate student may expect to begin research work rather quickly.

## Master of Science

### Admission Requirements

- \* Complete Graduate School application (a copy must be sent to the department)
- \* Official copy of transcripts
- \* Statement of interests -- a one-page essay which addresses the reasons why the student wishes to pursue a graduate program in Atmospheric Sciences.
- \* GRE General Examination scores sent from the Educational Testing Service
- \* Three letters of recommendation, either submitted online or, using the appropriate forms, sent directly to the department by the evaluators
- \* For international applicants: TOEFL scores, sent by the testing service
- \* *Deadline:* January 15. Autumn quarter is the only quarter for which the department accepts applications.

### Degree Requirements

45 credits, to include:

*Core classes (25-28 credits):* ATM S 501 (5), ATM S 502 (3), ATM S 535 (3), ATM S 532 (3), ATM S 558 (3). One of the following sequences: ATM S 505 (4), ATM S 509 (4), ATM S 542 (3); or ATM S 503 (3), ATM S 504 (5)

The two-course dynamics sequence (ATM S 503, ATM S 504) is intended for those whose research specialty is outside the realm of dynamic meteorology. Most students are encouraged to take the three-course sequence in dynamics (ATM S 505, ATM S 509, ATM S 542).

Master's students need 36 credits to graduate (excluding seminars and colloquia): 27 of the credits presented must be from graded courses numbered 500 or above, of which at least 3 credits must be in approved applied mathematics courses and 24 must be in core atmospheric sciences courses. The remaining 9 credits should be in the form of ATM S 700, Master's Thesis. However, students intending to pursue a Ph.D should take all of the courses required above.

## Doctor of Philosophy

### Admission Requirements

All students admitted into the Atmospheric Sciences graduate program are admitted initially to the M.S. track of study. Students in the M.S. track who seek entry into the Ph.D. program will be evaluated by the departmental Committee on Graduate Studies.

A student who wishes to be considered by the committee must first write a letter to the academic counselor and also to the student's M.S. committee, requesting admission into the Ph.D. program, and choosing one of the three following evaluation options:

- \* A student entering the department, having already earned an M.S. degree in the atmospheric sciences or a closely related discipline, may submit his or her M.S. thesis for evaluation in the first week of the autumn quarter of the student's second academic year in the department.
- \* A student may submit a draft of his or her University of Washington Department of Atmospheric Sciences M.S. thesis approved by the M.S. supervisory committee for evaluation.
- \* A student may submit for evaluation the manuscript of a peer-reviewed journal article on which the student is lead author.

### Degree Requirements

Minimum 90 credits, to include:

- \* *Coursework:*
  - o ATM S 501 (5), ATM S 502 (3)
  - o ATM S 505 (4), ATM S 509 (4) (Students whose anticipated research has minimal connection with atmospheric dynamics, such as those involved in laboratory or field work in atmospheric chemistry or cloud

microphysics, may take ATM S 503 and 504 in place of ATM S 505 and 509. See Graduate Program Coordinator before enrolling in ATM S 503.)

- o Either ATM S 532 (3) or ATM S 558 (3)
- o ATM S 535 (3), ATM S 542 (3)
- o Each of the following must be taken each quarter that coursework is taken: ATM S 520 (1), either ATM S 521 (1) or ATM S 524 (1), and ATM S 600 (up to 10 credits each quarter)
- o Electives: Students should take an appropriate number of elective courses in their areas of interest, as determined in consultation with adviser
- o Applied math: Either AMATH 401 (4), AMATH 567 (5), or AMATH 581 (5); either AMATH 402 (4) or AMATH 568 (5)
- o ATM S 700 (10 credits each quarter, beginning the second year of the program)
- \* General Examination
- \* Dissertation
- \* Final Examination

## Assistantships

Nearly all graduate students are supported by either research assistantships or fellowships. Students are usually a teaching assistant during at least one quarter, in the second year of study. Students are supported full-time during the summer.

---

## Biochemistry

109 Bagley  
[www.depts.washington.edu/biowww](http://www.depts.washington.edu/biowww)

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes.

## Undergraduate Program

Adviser  
109 Bagley, Box 351700  
206-616-9880, 206-543-9343  
[advisers@chem.washington.edu](mailto:advisers@chem.washington.edu)

The Biochemistry Program offers the following programs of study:

- \* The Bachelor of Arts degree with a major in biochemistry
- \* The Bachelor of Science degree with a major in biochemistry

## Bachelor of Science

*Suggested First and Second-Year Courses:* BIOL 180, BIOL 200 (or BIOL 201, BIOL 202); CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 with one physics lab course strongly recommended).

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

107 credits as follows:

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
2. PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116), with the PHYS 121 sequence recommended
3. CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); CHEM 452, CHEM 453 (or CHEM 455, CHEM 456, CHEM 457)
4. BIOL 180, BIOL 200 (or BIOL 201, BIOL 202)
5. GENOME 371
6. BIOC 426, BIOC 440, BIOC 441, BIOC 442
7. 11 credits chosen from a current department list (available in 109 Bagley) of upper-division science classes including math, biology, microbiology, chemistry, genome sciences, zoology. Up to 9 credits of approved advanced-level undergraduate research may also be applied to this requirement.

8. A minimum 2.80 GPA is required for all chemistry, biology, and biochemistry courses counted toward the major; a minimum 2.0 grade is required for all chemistry, biology, and biochemistry courses counted toward the major. A minimum 2.50 GPA is required for the BIOC 440, BIOC 441, and BIOC 442 sequence.

## Bachelor of Arts

90-92 credits as follows:

1. *Mathematics (15 credits)*: either MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136
2. *General Chemistry (15 credits)*: either CHEM 142, CHEM 152, CHEM 162, or CHEM 145, CHEM 155, CHEM 165
3. *Organic Chemistry (17 credits)*: either CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242, or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347
4. *Biology (10 credits)*: BIOL 180, BIOL 200
5. *Physics (12-15 credits)*: either PHYS 121, PHYS 122, PHYS 123, or PHYS 114, PHYS 115, PHYS 116
6. *Biochemistry (6 credits)*: BIOC 405, BIOC 406
7. *Physical Chemistry (6 credits)*: CHEM 452, CHEM 453
8. *Science Electives (9 credits)*: 9 credits to be taken from the following:
  - \* *Biology*: BIOL 220
  - \* *Chemistry*: Any 300- or 400-level course other than CHEM 498 or required coursework
  - \* *Genome Sciences*: GENOME 371
  - \* *Immunology*: IMMUN 441
  - \* *Mathematics/Applied Mathematics*: MATH 307, MATH 308, AMATH 351, AMATH 352. Limit of 3 credits allowed.
  - \* *Medical History and Ethics*: MHE 411
  - \* *Microbiology*: MICROM 402, MICROM 410, MICROM 411
  - \* *Research*: Up to 3 credits of advanced undergraduate research. Research conducted outside the Department of Chemistry or the Biochemistry Program must be approved first.
9. *Grade Requirements*: Minimum cumulative GPA of 2.00 for required coursework. Minimum grade of 1.7 in individual required courses. Overall GPA of 2.00 for work done resident at the UW. Required courses must be taken for a decimal grade unless the course is offered only on a credit/no-credit basis.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: At the conclusion of their studies, graduating biochemistry majors should possess a general working knowledge of the basic areas of biochemistry; be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of biochemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to biochemistry majors.

Students planning a career in biomedical research, the health professions, or biotechnology find the biochemistry degree to be an excellent choice. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

- \* *Instructional and Research Facilities*: Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately 52,000 square feet of research space, conference rooms, and a departmental library. In the immediate vicinity are the departments of Immunology, Genome Sciences, Microbiology, and Pharmacology, as well as programs in biomolecular structure, molecular medicine, neurobiology and molecular and cellular biology, with which the department has common research interests. Laboratories are equipped with modern research equipment and are supported by external, centralized research facilities. An emphasis on biomedical research is facilitated by the location of the department within the School of Medicine.
- \* *Honors Options Available*: With College Honors. With Distinction (Departmental Honors). See adviser for requirements.

- \* *Research, Internships, and Service Learning*: No formal internship program. Students are encouraged to pursue national and regional internships. See adviser for more information.

- \* *Department Scholarships*: Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department adviser for more information.

- \* *Student Organizations/Associations*:

- o Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
- o Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
- o The Free Radicals: a general undergraduate club for chemistry and biochemistry majors.

*Of Special Note*:

- \* This degree requires a minimum of 197 credits.
- \* Students are strongly encouraged to participate in undergraduate research.

## Biology

106 Kincaid  
depts.washington.edu/biology

Biology is the broadly based study of living organisms and has become an increasingly dynamic and wide-ranging discipline. It may be approached by focus on cell and molecular processes, development, organismal physiology and morphology, natural history, evolution, conservation, or ecology. The aim is to elucidate general principles applicable to many different sorts of organisms rather than to concentrate on any particular taxonomic group. Biology is often interdisciplinary in nature and may involve aspects of biochemistry, botany, genetics, microbiology, zoology, and many other natural sciences.

## Undergraduate Program

Adviser  
318 Hitchcock, Box 355320  
206-543-9120  
bioladv@u.washington.edu

The Department of Biology offers the following programs of study:

- \* The Bachelor of Arts degree with a major in biology.
- \* The Bachelor of Science degree with a major in biology. Students choose one of the following options: ecology and evolution; environmental and conservation; general; molecular, cellular, and development; physiology; and plant.

Designed for students desiring breadth of training, the Bachelor of Arts program does not require physics. Students do not select an emphasis, and hence have greater flexibility in upper division biology electives. An ideal degree for students wishing to double major in arts or humanities and in biology or who wish to design their own degree program.

The Bachelor of Science options are as follows:

1. *Ecology and Evolution*. Emphasizes ecological and evolutionary processes and relationships of those processes to systematics and biogeography of organisms. For students who wish to pursue graduate studies or seek employment in the fields of theoretical and applied ecology, evolution, systematics and biogeography, and mathematical biology.
2. *Environmental and Conservation*. Addresses conservation and restoration aspects of species, populations, and ecosystems, as well as related areas of law and environmental policy. While this is the most interdisciplinary program, it does require the same supporting and foundation courses in science as the other options.
3. *General*. Emphasizes breadth of training in biology. This is the most flexible program and offers a greater variety of advanced electives than other options. Attractive to students desiring K-12 teaching credentials or who otherwise wish to tailor their degree to their needs.

4. *Molecular, Cellular, and Development.* Designed for students who wish to pursue graduate studies in genetics, biochemistry, microbiology, cell biology, or developmental biology, as well as for candidates for professional schools such as medicine and dentistry.
5. *Physiology.* Emphasizes physiological processes from the cellular to the organismal levels, and across all groups of organisms. An attractive option for students interested in graduate and professional fields in animal and human physiology, medicine, and veterinary sciences.
6. *Plant.* Offers students both breadth and depth of training in the field of botany. Ideal for students desiring to enter graduate programs in botany or for those wishing to pursue careers in the plant biology or horticultural fields in state and federal agencies.

Each of the above bachelor's degree programs in the biological sciences can be combined with Washington State requirements to prepare students to teach biology in public schools at the secondary level. See the Biology Teaching Program adviser for specific requirements.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Same as for the Bachelor of Science degree as described below, except no physics is required.

### Department Admission Requirements

Same as for the Bachelor of Science degree as described below.

### Major Requirements

90 credits as follows:

1. Introductory biology, three to six quarters of chemistry, and mathematics are the same as required by the B.S., listed below. However, physics is not required and the remaining 36 upper division elective credits may be chosen from any biology course or any courses on the electives lists from the six options for the BS degree.
2. Additional Degree Requirements.
  - a. A minimum of 15 credits of 400-level biology electives must be taken at the UW.
  - b. Minimum GPA requirements are the same as for a B.S.

## Bachelor of Science

*Suggested First- and Second-Year Courses:* Students should concentrate on general chemistry and mathematics the first year, biology and organic chemistry the second year (see major requirements for specific courses). Transfer students: complete an entire sequence at one school if possible. It is not necessary, or even desirable, to complete the Areas of Knowledge requirement during the first two years.

### Department Admission Requirements

BIOL 180 or BIOL 201 with a minimum grade of 2.5; or BIOL 180, BIOL 200, BIOL 220 (or BIOL 201, BIOL 202, BIOL 203) with a cumulative GPA of 2.00 for the three courses. CHEM 142, CHEM 152, or equivalent. A minimum cumulative GPA of 2.00 is required for all courses which would apply toward major requirements (this includes all applicable chemistry, physics, mathematics, quantitative science, and introductory biological science courses).

### Major Requirements

90 credits as follows:

1. For all options the following basic coursework is required:
  - a. A one year sequence of introductory biology for majors (BIOL 180, BIOL 200, BIOL 220)
  - b. Three to six quarters of chemistry, covering general and organic chemistry: CHEM 120, CHEM 220, and CHEM 221; or CHEM 142, CHEM 152, CHEM 223, and CHEM 224; or CHEM 142, CHEM 152, CHEM 162\* and CHEM 237, CHEM 238, and CHEM 239
  - c. Two quarters of mathematics (calculus or statistics): MATH 124 and MATH 125, or MATH 144 and MATH 145, or Q SCI 291 and Q SCI 292, or Q SCI 381 (or STAT 311) and Q SCI 482
  - d. Two quarters of physics: PHYS 114 and PHYS 115, or PHYS 121 and PHYS 122
  - e. GENOME 371

- f. *Natural history/biodiversity:* one course selected from approved list (3 credits)
- g. *Option requirement:* 300- and 400-level courses selected from lists specific to each option. See department web site for additional information. (34 credits)

\*CHEM 162 is not required for this degree; however, CHEM 237, CHEM 238, and CHEM 239 are required by many professional programs and graduate schools, and the sequence does require CHEM 162.

### 2. Additional Degree Requirements:

- a. A minimum GPA of 2.00 for all UW courses applied toward major requirements, including required supporting courses, introductory biology, and upper division coursework. (A grade of 2.0 is not required in individual courses.)
- b. A minimum of 15 credits of 400-level biology electives must be taken at the UW.
- c. Two 300- or 400-level laboratory courses

Because of the differing specific requirements and choices for each option, it is extremely important for students to work closely with the Biology departmental advisers to insure completion of these 22-25 credits.

## Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes:* The department graduates between 350 and 400 students each year. Biology degrees are applicable to many different fields, depending upon student interests. Students in the program gain analytical and laboratory skills that prepare them for entry-level positions in a variety of biologically related areas, including, but not limited to, biotechnology, laboratory and/or field research support, health science support, wildlife biology, and ecology and conservation work with a variety of agencies, consulting firms, and research organizations in the northwest. Students may enter graduate programs that focus on some aspect of biological science (such as genetics, microbiology, immunology, ecology, environmental health, or cell and molecular biology), or enter a variety of professional programs, such as veterinary medicine, medicine, dentistry, pharmacy, laboratory medicine, nursing, and others.

\* *Instructional and Research Facilities:* The Department of Biology occupies 128,000 square feet in Hitchcock, Johnson, and Kincaid Halls. Extensive research laboratories, teaching laboratories, computer workstations, and support services are found throughout the department.

Specialized facilities include more than 16,000 square feet of greenhouse, seawater facilities, growth rooms, electron microscopes, and other specialized equipment. Undergraduates have access to most of these facilities, especially those engaged in undergraduate research.

Off campus, the internationally recognized Marine Research Station, Friday Harbor Laboratories, provides many opportunities for undergraduates, from courses to research apprenticeships.

\* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

\* *Research, Internships, and Service Learning:* Biology faculty welcome undergraduates into their research programs, often working closely with them. Approximately 40% of the 900 undergraduate Biology majors finish with undergraduate research experience.

UW proximity to such Seattle area organizations as the Fred Hutchinson Cancer Research Center, Swedish Hospital, numerous biotech companies, NOAA, National Marine Fisheries Research Center, the Seattle Aquarium, and the Woodland Park Zoo, as well as the close ties of Biology faculty to Friday Harbor Laboratories, the faculty in the College of Forest Resources, and the College of Ocean and Fishery Sciences provide opportunities for biology majors to develop internships within these organizations. See adviser for ways to get credit for such experiences.

\* *Department Scholarships:* Several scholarships are available, in a few cases to biology majors only. Most of these support students wishing to pursue an undergraduate research experience. They are competitive, sometimes highly so. They include:
 

- o Howard Hughes Undergraduate Research Internship: approximately 20 per year for freshmen and 20 per year for juniors and seniors.

- o Friday Harbor Laboratory (FHL) Apprenticeships: \$3,000 for one quarter, spring or autumn.
  - o Mary Gates Scholarships: very competitive, across all science disciplines.
  - o Herschel and Caryl Roman Scholarship: \$2,500-5,000 annually to one or two students who have an interest in genetics research.
  - o Porath/Johnson Endowed Scholarship: one-year, \$5,000 scholarship to an outstanding biology major.
- For qualifications, deadlines, and other details, see adviser or consult the Department of Biology Web site.

\* *Student Organizations/Associations:* Beta Beta Beta Biology Honor Society, tribeta@u.washington.edu; Pre Med Society (Alpha Epsilon Delta), aed@u.washington.edu.

## Chemistry

109 Bagley  
depts.washington.edu/chem

Chemistry is a branch of natural science that deals principally with the properties of molecules, the chemical reactions that occur between them, and the natural laws that describe molecular interactions. Chemistry is a central science, having strong interactions with biology, medicine, earth and environmental sciences, physics, and mathematics.

### Undergraduate Program

Adviser  
109 Bagley, Box 351700  
206-616-9880, 206-543-9343  
advisers@chem.washington.edu

The Department of Chemistry offers the following programs of study:

- \* The Bachelor of Arts degree with a major in chemistry
- \* The Bachelor of Science degree with a major in chemistry - ACS certified
- \* The Bachelor of Science degree with a major in chemistry
- \* A minor in chemistry

The Bachelor of Science degree is designed primarily for those who wish to pursue a career in chemistry or a career in which chemistry plays a central role.

The department offers two Bachelor of Science degrees. The Bachelor of Science with a major in chemistry (ACS certified) meets guidelines established by the American Chemical Society (ACS). It provides an extensive education in all branches of chemistry and also emphasizes laboratory training. The non-certified major does not emphasize laboratory work as strongly, offers more options among chemistry courses, and allows more flexibility in incorporating coursework outside of chemistry.

The Bachelor of Arts in chemistry fills the needs of students whose chosen career requires a strong background in chemistry with additional expertise in other disciplines.

### Bachelor of Science

*Suggested First- and Second-Year Courses:* CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course. PHYS 121 sequence recommended); courses in linear algebra and differential equations.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.  
Major Requirements

#### Chemistry (ACS-Certified)

95 credits as follows:

1. *Core Courses:*
  - a. *General Chemistry:* CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165)

- b. *Organic Chemistry:* CHEM 237, CHEM 238, CHEM 239, CHEM 241, and CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346 and CHEM 347)
- c. *Inorganic Chemistry:* CHEM 312, CHEM 317, CHEM 321, and CHEM 416 (students completing CHEM 165 are exempt from CHEM 312)
- d. *Analytical Chemistry:* CHEM 321, CHEM 426
- e. *Physical Chemistry:* CHEM 455, CHEM 456, CHEM 457, CHEM 461
- f. *Biochemistry:* BIOC 405 (students should contact adviser regarding alternative prerequisites for BIOC 405)
- g. 5 credits of numerically graded CHEM or BIOC 400-level courses (not previously listed) which must include CHEM 426 and CHEM 461 and one more course with laboratory (currently CHEM 462, CHEM 463, CHEM 464, and CHEM 465)
- h. Strongly recommended, research credits in CHEM 399 and CHEM 499.

2. MATH 124, MATH 125, MATH 126 and two additional math courses above 300 (recommended MATH 307 and MATH 308, or AMATH 351 and AMATH 352); (alternative math requirement: MATH 134, MATH 135, MATH 136)
3. PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.
4. Minimum grade of 2.0 is required in each chemistry course; a minimum GPA of 2.80 is required for courses used to satisfy the major degree requirements; a minimum overall cumulative GPA of 2.80 and minimum 185 credits required for graduation.

### Chemistry

92 credits as follows:

1. *Core Courses:*
  - a. CHEM 142, CHEM 152, CHEM 162, and CHEM 312 (or CHEM 145, CHEM 155, CHEM 165, and CHEM 416)
  - b. CHEM 237, CHEM 238, CHEM 239, and CHEM 241 (or CHEM 335, CHEM 336, CHEM 337, and CHEM 346)
  - c. CHEM 455, CHEM 456, CHEM 457
  - d. Two of the following three: CHEM 317, CHEM 321, or CHEM 461
  - e. 5 additional lab credits chosen from the following: CHEM 242, CHEM 317, CHEM 321, CHEM 347, CHEM 426, CHEM 461, CHEM 462, CHEM 463, CHEM 464, CHEM 465, and BIOC 426
  - f. 11 credits chosen from CHEM 242, CHEM 317, CHEM 321, CHEM 347, any 400-level numerically graded chemistry or biochemistry courses, or MATH 307 (or AMATH 351). Students with chemistry GPA of 3.30 or higher may apply up to 6 credits of CHEM 399, CHEM 496, or CHEM 499 of approved research (but CHEM 498 may not be used to satisfy this requirement).
2. MATH 124, MATH 125, MATH 126 and one course above 300 (recommended: MATH 308 or AMATH 352); alternative MATH requirement: MATH 134, MATH 135, MATH 136.
3. PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.
4. Minimum grade of 2.0 is required in each chemistry course; minimum GPA of 2.80 is required for all CHEM, MATH, and PHYS courses used to satisfy major requirements.
5. For graduation, a minimum of 182 credits is required with an overall cumulative GPA of 2.80.

### Bachelor of Arts

*Suggested First- and Second-Year Courses:* CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165) CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course; PHYS 121 sequence recommended).

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

79-82 credits as follows:

1. *Core Courses:*
  - a. CHEM 142, CHEM 152, CHEM 162, CHEM 312 (or CHEM 145, CHEM 155, CHEM 165)
  - b. CHEM 321
  - c. CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347)
  - d. Either CHEM 317 or CHEM 461

- e. 11 credits of numerically graded CHEM 400-level courses to include either CHEM 455, CHEM 456, CHEM 457 series, or CHEM 452, CHEM 453 series
- 2. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
- 3. One year of physics including at least 1 credit of laboratory (PHYS 114, PHYS 115, and PHYS 116 and at least one of PHYS 117, PHYS 118, or PHYS 119; or PHYS 121, PHYS 122, and PHYS 123; PHYS 121 sequence recommended).
- 4. Minimum GPA of 2.0 in chemistry courses counted toward major; and a minimum grade of 1.7 in all required chemistry courses.

## Minor

*Minor Requirements:* 35-44 credits as follows:

1. One of the following two sequences
  - a. CHEM 142, CHEM 152, CHEM 162 and one of CHEM 223, CHEM 237 or CHEM 335
  - b. CHEM 145, CHEM 155, CHEM 165, and one of CHEM 223, CHEM 237, or CHEM 335
2. MATH 124 (or Q SCI 291 and Q SCI 292)
3. PHYS 114 or PHYS 121
4. Three of the following four groups:
  - a. CHEM 312 (or CHEM 165)
  - b. CHEM 321
  - c. One of CHEM 452, CHEM 455, or CHEM 456
  - d. One of CHEM 224, CHEM 238, or CHEM 336
5. Minimum GPA of 2.00 for the minor and a minimum grade of 1.7 in each course presented for the minor.
6. A minimum of 15 credits taken for the minor must be taken in residence at the University of Washington.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* At the conclusion of their studies, graduating chemistry majors should have a general knowledge of the basic areas of chemistry with a working knowledge of at least one area: be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of chemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to chemistry majors.

Teaching high school chemistry, environmental or patent law practice, or working in the chemical industry in sales or management positions are career choices for which the B.A. in chemistry is generally useful.

- \* *Instructional and Research Facilities:*
  - o Departmental facilities include a spectroscopic and analytical instrumentation laboratory (NMR, GC-MS, X-Ray, IR), Chemistry Library, Center for Enabling New Technologies through Catalysis (CENTC), Center for Process and Analytical Chemistry (CPAC), Materials and Devices for Information Technology Research (MDITR), Center for Nanotechnology, and extensive computing capabilities.
  - o The department's local area network (LAN) is extended through a fiber optic cable to the university-wide network that is connected to Internet, HEPNET, SPAN, and other national and international computer networks.
  - o The Chemistry Study Center offers assistance to students in 100 level chemistry courses and has 40 Pentium computers available to undergraduates taking chemistry courses.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* No formal internship program. Students are encouraged to pursue national and regional internships. See advisers for information.
- \* *Department Scholarships:* Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department advisers for more information.

- \* *Student Organizations/Associations:*
  - o Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
  - o Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
  - o The Free Radicals: a general undergraduate club for chemistry and biochemistry majors

*Of Special Note:*

- \* The B.S. degree in chemistry requires a minimum of 182 credits to graduate.
- \* The B.S. degree in Chemistry, ACS-Certified Option, requires a minimum of 185 credits to graduate.
- \* The B.A. degree in Chemistry requires a minimum of 180 credits to graduate.
- \* Students are strongly encouraged to participate in undergraduate research.
- \* The maximum number of credits that may be earned combining CHEM 199 and CHEM 299 is 12; the maximum number of credits that may be earned combining CHEM 399 and CHEM 499 is 24.

## Graduate Program

Graduate Program Coordinator  
109D Bagley, Box 351700  
206-543-4787  
graduate@chem.washington.edu

The Master of Science and Doctor of Philosophy programs are designed to lead to positions of leadership and independent investigation in research institutes, industrial laboratories, and government agencies, and as teachers, researchers, or administrators in colleges and universities in chemistry or allied fields.

Students can pursue research in the following areas of chemistry: analytical, bioanalytical, bioinorganic, bioorganic, biophysical, environmental, inorganic, materials, medicinal, nuclear, organic, organometallic, physical, polymer, process analytical, and theoretical.

Thesis research for the Master of Science degree and dissertation research for the Doctor of Philosophy degree will constitute an original contribution of knowledge worthy of report in the scientific literature.

Refer to the Chemistry Department Web site for more detailed information regarding admission and graduation requirements.

## Master of Science

The Department of Chemistry offers primarily the Ph.D. degree. The Master of Science program is not open to master's-only students, except under specific conditions.

*Graduation Requirements:* With Thesis -- 36 approved credits with 18 in courses at the 500 level or above; 18 credits in courses at the 400 or 500 level taken for numerical grade with a 2.7 minimum grade in each course; 9 credits in thesis research. Without Thesis -- Same as with thesis, except that additional course work may be substituted for the required research. Minimum GPA of 3.00 required.

## Doctor of Philosophy

### Admission Requirements

- \* Baccalaureate degree with major in chemistry or allied sciences
- \* Graduate Record Examination scores

### Degree Requirements

90 credits, to include:

- \* *Required Coursework:* 18-27 credits of coursework to support the student's individualized program of study, approved by the Graduate Program Coordinator, at the 400 or 500 level, with a 2.7 grade minimum in each graded course, and a minimum 3.00 GPA
- \* *Seminars:* Participation in departmental seminars
- \* *Dissertation:* Minimum 27 credits of dissertation (CHEM 800) work
- \* Candidacy examinations covering area of specialization

# Classics

218 Denny  
depts.washington.edu/clasdept

The discipline of classics concerns itself with the cultures of ancient Greece and Rome from prehistoric times to the Middle Ages. The department is concerned with the Greek and Latin languages and their literatures, including poetry, drama, history, philosophy, rhetoric, and political theory, as well as with classical art and archaeology. The ancient cultures of Greece and Rome hold an extraordinary place in the American past and present, thanks to their central role in forming the basic conceptual categories that shape our intellectual, professional, and civic lives. The vast temporal and geographic gulf that divides these ancient cultures from modernity brings students and scholars of classics face to face with the otherness of antiquity and forces a critical examination of our own cultural roots.

## Undergraduate Program

Adviser  
218 Denny, Box 353110  
206-543-2266  
clasdept@u.washington.edu

The Department of Classics offers the following programs of study:

- \* The Bachelor of Arts degree with majors in classics, Greek, Latin, and classical studies.
- \* Minors in classical studies, Greek, Latin, and classics and ancient history.

The majors in classics, Greek, and Latin emphasize the development of expertise in Greek and Latin and can include coursework in the history, literature, philosophy, science, and the art and archaeology of these two contrasting but related cultures. Students who intend to continue their studies to the Ph.D. degree are advised to take the B. A. in classics or, alternatively, the B.A. in Latin or Greek with as many courses in the second language as possible.

A fourth major, the Bachelor of Arts in Classical Studies, is especially suited to students wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity primarily through English translations. The classical studies major demands less study of the classical languages of Greece and Rome than is required for the other majors. Students with no previous exposure to Greek or Latin can complete the classical studies major in two years. Students have often combined this major with another major such as English, history, or art history, and even with a non-humanities major such as computer science, biochemistry, or economics.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* First- and second-year Latin and/or classical Greek, classics in translation, ancient history, classical art and archaeology, ancient philosophy.

## Department Admission Requirements

Students in good academic standing may declare this major at any time.

## Major Requirements

66 credits in each of the majors, to include:

- \* *Greek:* 27 approved credits in Greek at the 400 level plus 9 credits chosen with department approval from courses in Latin, Greek at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. The major must include a minimum of 2 credits of CLAS 495.
- \* *Latin:* 27 approved credits in Latin at the 400 level plus 9 credits chosen with department approval from courses in Greek, Latin at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. The major must include a minimum of 2 credits of CLAS 495.
- \* *Classics:* 15 approved credits in Greek at the 400 level and 15 approved credits in Latin at the 400 level; 6 additional credits (including 2 credits

of CLAS 495) chosen from the following courses: Greek and Latin at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science.

- \* *Classical Studies:* Greek or Latin through 307 or the equivalent; 36 additional credits chosen with department approval from the following courses: Greek and Latin at 400 level (including a minimum of 2 credits of CLAS 495), classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. Classical studies is especially suited to students not preparing for graduate study in classics but wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity primarily through English translations.

## Minor

*Minor Requirements:* 25 credits as follows for each of the minors:

- \* *Classical Studies:* 25 approved credits from classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science.
- \* *Greek:* Minimum 25 credits in Greek, including at least 6 credits at the 400 level (excluding GREEK 490).
- \* *Latin:* Minimum 25 credits in Latin, including at least 6 credits at the 400 level (excluding LATIN 490).
- \* *Classics and Ancient History:* 30 credits from the following list, including at least 20 upper-division credits (15 of which must be taken at the UW). 100-level credit is not accepted. Minimum 10 credits from each department (Classics and History). A minimum grade of 2.0 is required in each course. Not available to students pursuing majors or other minors in classics.

*Courses:* CLAS 210, CLAS 320, CLAS 322, CLAS 324, CLAS 326, CLAS 328, CLAS 330, CLAS 424, CLAS 427, CLAS 428, CLAS 430, CLAS 432, CLAS 435, CLAS 445, CLAS 496 (except when topic is medieval); CL AR 340, CL AR 341, CL AR 342, CL AR 343, CL AR 442, CL AR 443, CL AR 444, CL AR 446, CL AR 447, CL AR 448; GREEK (all upper-division courses except GREEK 300 and GREEK 301); LATIN (all upper-division courses except LATIN 300, LATIN 301, LATIN 401, and LATIN 402); HSTAM 205, HSTAM 302, HSTAM 312, HSTAM 313, HSTAM 314, HSTAM 330, HSTAM 401, HSTAM 402, HSTAM 403, HIST 490 (when topic is ancient), HIST 498 (when topic is ancient).

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The undergraduate study of classics emphasizes critical analysis of language and culture and clear and effective writing. The B.A. with a major in classics is a respected terminal degree in itself. Like other degree programs in the humanities, it emphasizes the acquisition of those analytic and communications skills which are indispensable for careers in government, journalism, law, industry, medicine, and business. The Classics major (especially in its more language intensive forms) is often a mark of distinction when a graduate applies for admission to professional school.
- \* Many who take the bachelor's degree in classics go on to pursue graduate work in the subject at leading Ph.D. programs. Graduates include winners of prestigious national awards such as Mellon Fellowships for graduate study and the Rhodes Scholarship.
- \* *Instructional and Research Facilities:* The departmental office provides access to several computers for research and coursework. The Classics Department sponsors numerous lectures by distinguished speakers visiting from universities in this country and abroad; undergraduates are always welcome to attend.
- \* *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* None offered.
- \* *Department Scholarships:*
  - o Jim Greenfield Undergraduate Scholarship is intended for undergraduate majors in Classics. The object of the Jim Greenfield scholarship is to enable exceptionally well-qualified students to devote the maximum time and energy to their study of the Classics at the

University of Washington. While the first criterion is academic promise, an applicant's current means of support is also taken into consideration; therefore, the amount of the award may vary from partial tuition to full tuition and some expenses. Successful candidates may reapply for the following year.

- o Jim Greenfield Undergraduate Travel Bursaries: Jim Greenfield Undergraduate Travel Bursaries may be used for the department's Rome Program, for travel associated with participation in archaeological excavations, for independent travel to areas of classical interest, or for other kinds of study-related travel for which the applicant can make a cogent case. In some cases an award might allow a student to remain overseas for study travel in the wake of the department's Rome Program. Further information about applying for a Jim Greenfield Undergraduate Travel Bursary is available in the department office.

- \* *Student Organizations/Associations:* None

*Of Special Note:*

- \* CLAS 101, CLAS 102, CLAS 205, and HIST 111 may not be taken in fulfillment of major requirements for baccalaureate degrees in the Department of Classics.
- \* *Classical Seminar in Rome:* During spring quarter, the department offers instruction in classics for advanced undergraduate majors and graduate students at the University of Washington Rome Center, located in the Palazzo Pio on the Campo de' Fiori.

## Graduate Program

Graduate Program Coordinator  
218 Denny, Box 353110  
206-543-2266  
clasdept@u.washington.edu

The Department of Classics offers programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The M.A. degree may be in Greek, Latin, or Classics (a combination of Greek and Latin). The Ph.D. degree requires both Greek and Latin.

The program of formal instruction ensures comprehensive and thorough training in the basic disciplines needed for teaching and research. The department offers courses in the major writers and periods of literature, philosophy, and history, in classical art and archaeology, and in Greek and Latin linguistics. The courses in Greek and Latin literature include many works on the Ph.D.-degree reading list. Seminars introduce research techniques through the study of more specialized topics, which vary from quarter to quarter. Students may include in their programs courses and seminars given by other departments in such subjects as ancient philosophy, ancient and medieval history, comparative literature, and linguistics.

## Master of Arts

### Admission Requirements

Strong preparation in Latin and Greek, preferably a full undergraduate major. Although the M.A. may be attained with work in only one of the languages, students who plan to work toward the Ph.D. must be prepared to do graduate work in both Latin and Greek.

### Degree Requirements

36 credits, as follows:

- \* 27 credits in courses and seminars approved by the department as applicable toward an advanced degree and either a) 9 additional credits and a research paper or b) a thesis (9 credits). At least 18 of the total 36 credits must be at the 500 level or above.
- \* Competence in reading German, French, or Italian, demonstrated by passing a departmental examination.

## Doctor of Philosophy

### Admission Requirements

Strong preparation in Latin and Greek, preferably a full undergraduate major. Admission to the Ph.D. program is granted after completion of the M.A. degree.

## Degree Requirements

90 credits, as follows:

- \* Minimum three academic years of graduate study, of which at least two must be at the UW, and one in full-time residence at the University for three out of four consecutive quarters.
- \* 90 credits in courses approved by the department. At least half (which include dissertation credits) must be at the 500 level or above.
- \* Competence in reading German and French, or German and Italian, demonstrated by passing departmental examinations.
- \* Graduate courses (or the equivalent) in Greek and Latin composition.
- \* The Classics proseminar (or equivalent).
- \* Written preliminary examinations:
  - o Translation exams on Greek and Latin literature. Reading lists in each language guide the student's preparation for these exams.
  - o A written examination on a special field of Classical studies, e.g. a period of Greek or Roman history, Greek or Latin epigraphy, Athenian or Roman topography, Greek or Roman religion, Classical linguistics, metrics, or palaeography, an area of intellectual history, a literary theme or cultural institution. This examination must be taken before the doctoral orals but is preferably taken earlier in the student's graduate program.
  - o Written examinations on two special authors, one Greek and one Latin, which assume a deep familiarity with the text, a knowledge of the textual history, and the important secondary works and trends in scholarship. A special author examination may be taken only after the translation examination in that language has been passed.
- \* An oral general examination on Greek and Roman history, literature, philosophy, and related subjects.
- \* A dissertation approved by the student's Supervisory Committee, and an oral examination on the dissertation.
- \* Graduate students are expected to have teaching experience before completing their terminal degrees.

## Research Facilities

The Suzzallo Library has an extensive classics collection. The department's seminar room in Denny Hall, which is available to graduate students for their study and research, contains an excellent noncirculating library with such reference works as Pauly-Wissowa, L'Année Philologique, the Thesaurus Linguae Latinae, the Müller Handbuch series, the Teubner and Oxford texts, commentaries on the classical authors, standard collections of inscriptions and fragments, and a number of important serials. The department also possesses a license for the Thesaurus Linguae Graecae, Thesaurus Linguae Latinae, and other databases.

## Teaching Assistantships

A number of teaching assistantships as well as the Jim Greenfield Graduate Fellowship are available. Assistants teach sections of elementary Latin and Greek, a course in Latin and Greek derivatives, hold discussion sections in classical literature in translation, or assist faculty members with other courses. The teaching load is four to six hours a week throughout the academic year.

---

## Communication

102 Communications  
www.com.washington.edu

Communication is a process that creates and reveals meanings, relationships, and cultural patterns.

## Undergraduate Program

Adviser  
118 Communications, Box 353740  
206-543-8860

The Department of Communication offers the following programs of study:

- \* The Bachelor of Arts degree with a major in communication
- \* The Bachelor of Arts degree with a major in communication: journalism

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* COM 201, COM 202.

### Department Admission Requirements

1. Admission is competitive, based on information in the application packet, cumulative GPA, and grades in COM 201 and/or COM 202. Minimum cumulative 2.50 GPA ensures consideration, but not acceptance.
2. Students are admitted quarterly - autumn, winter, and spring. Applications are due Monday, the third week of autumn, winter, and spring quarters. Applications and additional information are available on the Web and in 118 Communications. Students are notified of acceptance by the end of the fifth week of the quarter. If accepted, they can register for the next quarter as majors.
3. Applications are available from the department Web site on the first day of the quarter. Applications should include application form, copies of transcripts and grade reports, and an essay explaining what led applicants to apply to the major.
4. Option requirements:
  - a. *Standard Option:* Minimum 45 quarter credits completed (transfer students must complete at least 10 graded credits at UW). Credits must include completion of COM 201 and COM 202 or completion of one of these and current enrollment in the other.
  - b. *Journalism Option:* Completion of COM 201 or COM 202 required before application.

### Major Requirements

*Communication:* 50 credits, to include the following:

1. *Introductory courses (10 credits):* COM 201 and COM 202.
2. *Methods in inquiry (5 credits):* Examples of courses that apply include COM 382, COM 405, and COM 485. For full list, see department adviser or Web.
3. *Area concentration (15 credits) in one of the following:* communication and culture, communication technology and society, international communication, political communication, rhetoric and critical studies, or social interaction. See advising office or Web for description of each area and lists of qualifying courses.
4. *Electives (20 credits)* from the Department of Communication and from selected courses outside the department. See advising office or Web for electives list.

Of the 50 required credits specified above, at least 20 must be Communication courses at the 300 level or above, and of those 20, at least 10 must be Communication courses at the 400 level (excluding COM 498/499).

*Journalism Option:* A minimum of 61 credits, including the following:

1. *Introductory courses (5 credits):* Either COM 201 or COM 202.
2. *Skills/Competencies core (13 credits):* COM 360, COM 361, COM 362.
3. *Law and Ethics core (10 credits):* COM 440, COM 468.
4. *Emphasis/Specialization (10 credits) in one of the following areas:* communication and culture, communication technology and society, international communication, political communication, rhetoric and critical studies, or social interaction. See advising office or Web for description of each area and lists of qualifying courses.
5. *Advanced Skills/Competencies (8 credits minimum)* selected from the following: COM 301, COM 460, COM 461, COM 463, COM 465, COM 466.
6. *Other requirements (15 credits):* 5 credits each in economics, political science, and history. See advising office for list of acceptable courses.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The Department of Communication prepares students for the challenges of a society that is informed, entertained, persuaded, and shaped by communication. The department seeks out and appeals to students from a variety of backgrounds and perspectives. It nurtures socially responsible, literate citizens who can interpret and evaluate images and messages they create and receive. It teaches students to think critically, respect diversity, communicate effectively, and develop the skills needed for the life-long learning that is central to successful careers and rewarding lives. Undergraduate study in communication has four pedagogical emphases: communication literacy, communication inquiry, theory and concepts, and community engagement.

- \* *Instructional and Research Facilities:* The Department of Communication has the following labs: Media Lab. News Lab. Observation Labs. It also has an Instructional Resources Center and video-editing facilities. Additionally, the department manages the following centers: The Dart Center, the Center for Communication and Civic Engagement, and the Resource Center for Cyberculture Studies. See the department Web site for further information.

- \* *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

- \* *Research, Internships, and Service Learning:* See adviser for details.

- \* *Department Scholarships:* None offered

- \* *Student Organizations/Associations:*
  - o Society of Professional Journalists
  - o Public Relations Student Society of America

## Graduate Program

Graduate Program Coordinator  
221 Communications, Box 353740  
206-543-7269  
cominfo@u.washington.edu

Graduate study in communication engages students in the complexity of modern communication and its centrality to society and, in doing so, prepares them to become thoughtful scholars, teachers, practitioners, and leaders related to this field. The Department of Communication offers graduate programs leading to the degrees of Master of Arts, Doctor of Philosophy, and Master of Communication (M.C.).

Graduate study in the Department of Communication is guided by four related principles: intellectual and cultural pluralism, interdisciplinary theorizing, collaboration, and public scholarship. Coursework brings together humanistic and social scientific intellectual traditions through a unified core curriculum and a wide selection of graduate seminars. Research and teaching in the department focus on six interrelated areas: communication and culture, communication technology and society, international communication, social interaction, political communication, and rhetoric and critical studies.

The M.A. degree program provides training in research and scholarship and can be either preparation for doctoral study or a terminal degree. The M.A. degree requires a minimum of 45 credits of approved coursework and a research thesis. The Ph.D. degree program develops conceptual and methodological capabilities in a substantive area of communication. The Ph.D. degree requires completion of a minimum of 45 post-master credits, general examinations, and a dissertation demonstrating an original scholarly contribution to the field.

The Department of Communication also offers three M.C. degrees, each of which has specific requirements tailored to that degree. The general M.C. degree is targeted for mid-career communication professionals who seek to develop an understanding of communication theory related to a special area of interest. The M.C. in digital media is a professional degree focused on digital media content creation, management, and policy. Native Voices is an M.C. degree offered in conjunction with American Indian Studies. It is designed for documentary filmmakers who focus their work on subjects relevant to the Native American Community.

## Master of Arts

### Admission Requirements

- \* Minimum 3.00 or B GPA over the two most recent years guarantees consideration. However, average GPAs for the students admitted have been higher.
- \* M.A. applicants must show proof of completion of a bachelor's degree prior to starting the program, though it is common for applicants to be in their senior year of college when they apply to the M.A. program.
- \* Full-time status is strongly encouraged, but domestic U.S. residents who do not receive assistantships can enroll half-time.
- \* Note to U.S. permanent residents/immigrants (green card holders): Applicants who are not native speakers of English must submit TOEFL scores taken within the past two years. Only the following applicants are exempt from the TOEFL requirement: citizens of the United States, Australia, Canada, Ireland, New Zealand or the United Kingdom and non-United States citizens who have received a bachelor's degree or higher

from a U.S. institution or from institutions in the countries listed here. Applicants who are not U.S. citizens must also submit a TSE score to be considered for departmental funding. Permanent residency/immigrant status or a degree from the U.S. does not exempt one from this TSE requirement.

### Degree Requirements

45 credits minimum, as follows:

- \* Three core courses (COM 500, COM 501, COM 502) during the first year of study.
- \* One additional methods course beyond COM 501
- \* Up to 5 credits of COM 594 in five different topics may count toward total, although COM 594 credits are not required for master's students.
- \* Up to 3 credits of COM 596 may count toward total. These credits are required for students with assistantships and optional for all others.
- \* Completion of the thesis (minimum 10 credits in COM 700) and oral defense.
- \* Specific courses should be selected in consultation with the supervisory committee.

### Master of Communication

#### Admission Requirements

Admission requirements are the same as for the Master of Arts program (above).

#### Degree Requirements

45 credits minimum, as follows:

- \* At least 12 credits in Communication courses at the 400 and 500 level.
- \* At least 15 credits outside the Department of Communication in a coherent substantive area of specialization.
- \* 10 credits in COM 600 to produce a professional project in an area of specialization for broadcast or publication.
- \* Passage of an oral defense of the project.
- \* The remaining credits necessary to meet the 45 credits for the degree should be selected in consultation with the supervisory committee.
- \* At least 21 credits must be at the 500- or 600-level.
- \* Up to 5 credits of COM 594 may count toward total, although COM 594 credits are not required for M.C. students.
- \* Up to 3 credits of COM 596 may count toward total. These credits are required for students with assistantships and optional for all others.

#### Digital Media

The Master of Communication (M.C.) in Digital Media is a professional degree focused in three concentrations: digital media content creation, management, and policy. 45 credits minimum as follows:

- \* Three core courses: COM 529 (5), COM 546 (5), and COM 558 (5).
- \* Students may choose either to complete 45 credits of course work or to complete 40 credits of course work (including three core courses) and a final project worth 5 credits. Specific courses should be selected in consultation with the supervisory committee.

#### Native Voices

45 credits, as follows:

- \* 20 credits in the Department of Communication:
  - o 10 credits of 500-level communication courses. This is typically two 500-level seminars.
  - o COM 600: 10 credits in Documentary Research and Production. To be taken for the completion of the final project.
- \* 25 credits in American Indian Studies/Native Voices: WOMEN 443 (5), AIS 501 (5), AIS 502 (5), AIS 503 (5), AIS 504 (5)

### Research Facilities

In addition to the University's research facilities available to all students, the Department of Communication houses a collection of specialized research laboratories, including the Digital Media Lab, Graduate Computer Lab, Observational Research Facility, Instructional Resources Center, and Video Editing Lab.

## Comparative History of Ideas

B102 Padelford  
depts.washington.edu/chid

Comparative History of Ideas is an interdisciplinary program that draws on a wide variety of disciplines within the College of Arts and Sciences to examine the interplay of ideas and their cultural, historical, and political contexts.

### Undergraduate Program

Adviser  
B102D Padelford, Box 354300  
206-543-2097  
chid@u.washington.edu

The Comparative History of Ideas program offers the following programs of study:

- \* The Bachelor of Arts degree with a major in comparative history of ideas
- \* A minor in comparative history of ideas

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Coursework in the history of relevant periods, areas, and themes. Introductory courses in philosophy, English, comparative literature, ethnic and gender studies, and other areas of the humanities and social sciences. CHID 110.

#### Department Admission Requirements

Students in good academic standing may declare this major after meeting with an adviser.

#### Major Requirements

55 credits as follows:

1. 10 credits in Group A: Introduction to the History of Ideas
2. 10 credits in Group B: History of Intellectual Cultures (5 credits in each subgroup)
3. 10 credits in Group C: History of Particular Ideas or Themes
4. CHID 390: Colloquium in the History of Ideas (5 credits)
5. A 5-credit senior project (CHID 491)
6. The remaining 15 credits are chosen from among approved electives (300 level and above).
7. At least half the credits presented for the major must be at the upper-division level.
8. Minimum 2.50 GPA in the classes presented for the major.
9. Students may expand the senior project to 10 or 15 credits if they choose (CHID 492/493). The 5 to 10 optional senior project credits are in addition to the 55 credits required of all CHID majors.

See program adviser for current lists of Group A, B, and C courses.

### Minor

*Minor Requirements:* 30 credits as follows:

1. 5 credits in Group A: Introduction to the History of Ideas
2. 10 credits in Group B: History of Intellectual Cultures (5 credits in each subgroup)
3. 5 credits in Group C: History of Particular Ideas or Themes
4. CHID 390: Colloquium in the History of Ideas (5 credits)
5. CHID 498: Special Colloquium (5 credits)

See program adviser for current lists of Group A, B, and C courses.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The program encourages students to adopt nuanced perspectives on their position relative to texts, cultures, societies, and historical periods. Program graduates have gone on to postgraduate studies in the humanities and social sciences, as well as professional training and careers in a wide variety of fields including law, administration and public policy, medicine, education, journalism, new media, and film.

- \* *Instructional and Research Facilities:* Computer workstations for students in Padelford B102 and C101.
- \* *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* CHID undergraduates participate in a variety of educational experiences outside the classroom. For example, many study abroad programs incorporate an "engaged community learning" project, which provides an opportunity for students to apply their analytical skills and understanding of the historical and cultural context to a close participation in the work of local organizations. The diversity of these community efforts allows students to engage their particular interests through participation in social welfare organizations, grassroots community groups, after-school programs, health clinics, theater and other performing arts groups, as well as video and other visual arts projects.
- \* *Department Scholarships:* None offered.
- \* *Student Organizations/Associations:* CHID students spearheaded the formation and development of the DIALOGUE Project, a group open to all UW students interested in international issues. The project serves to facilitate greater international and intercultural dialogue within our own community centered around topics germane to each student's own educational goals. Many students work directly to develop and help coordinate international clubs in high schools across the state.

*Of Special Note:* CHID also sponsors interSections, a student journal published annually by the Comparative History of Ideas program. interSections is organized and edited by undergraduate volunteers from the CHID program.

## Comparative Literature

B531 Padelford  
depts.washington.edu/complit

Comparative literature works across national and regional boundaries to explore the relationships among multiple literary traditions. Comparative literature also focuses on the relationship of literature to the other arts and to fields of knowledge such as philosophy, anthropology, history, and media or cultural studies.

## Undergraduate Program

Adviser  
B-534 Padelford, Box 354338  
206-685-1642

Comparative Literature offers the following programs of study:

- \* Bachelor of Arts with a major in comparative literature
- \* Bachelor of Arts with a major in comparative literature (cinema studies)
- \* Minor in comparative literature (literature minor only)

The literature option includes core course requirements in literary analysis (C LIT 300), literary theory (C LIT 400) and regional literatures (C LIT 320, C LIT 322, C LIT 323).

The cinema studies option is structured around two series of required core courses devoted to film theory and film history.

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Courses in foreign languages, classics, history, philosophy, literature, and writing. Sufficient preparation in a foreign language (completion of second year or higher) to enable the student to take a 300- or 400-level literature or national film course by the senior year.

### Department Admission Requirements

Minimum 2.00 overall GPA; completion of one course fulfilling either College of Arts and Science English composition requirement or the W (writing) requirement (5 credits).

*Cinema Studies:* Same as above, plus completion of C LIT 270 or the equivalent.

### Major Requirements

*Literary Studies Option:* (50 credits)

- \* C LIT 300, C LIT 400 (10 credits).
- \* Two differently numbered courses from among C LIT 320, C LIT 321, C LIT 322, C LIT 323 (10 credits).
- \* Two additional courses in comparative literature at the 300 or 400 level (10 credits).
- \* At least one foreign literature course, studied in the original language (3/5 credits). The minimum foreign language prerequisite to meet this requirement is completion of a second year (often higher) of the foreign language, e.g., GERMAN 203 for GERMAN 311; FRENCH 302 for FRENCH 304.
- \* Remaining (17/15 credits) to be earned, with few exceptions, in 300- and 400- level literature courses from among the offerings of Comparative Literature and the following participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Studies, and Slavic Languages and Literatures.

*Cinema Studies Option:* (50 credits)

- \* 15 credits from cinema studies core courses, with at least one course in film theory and one course in film history (C LIT 301, C LIT 302, C LIT 303, C LIT 310, C LIT 311, C LIT 312).
- \* 10 credits from C LIT core requirements (choice of either C LIT 300 or 400, and one course from C LIT 320, C LIT 321, C LIT 322, C LIT 323).
- \* One national cinema course (3/5 credits).
- \* Minimum two years of foreign language study (e.g., through GERMAN 203, or equivalent).
- \* Remaining credits to be earned in recommended 300- and 400-level cinema elective courses offered by Comparative Literature or any UW department.

### Minor

*Minor Requirements:* 30 credits to include C LIT 300, C LIT 400, and two differently numbered courses from among C LIT 320, C LIT 321, C LIT 322, and C LIT 323; at least one course in a literature, studied in the original language, other than English; and the remaining credits in upper-division literature courses offered through Comparative Literature and the following participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Studies, and Slavic Languages and Literatures.

A minor is not available for the Cinema Studies option.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The study of comparative literature provides training in the analysis and critique of varied kinds of social texts and discourses. It stresses the centrality of historical and cross-cultural awareness for effective interpretation of both verbal and visual texts. Students earning the degree in comparative literature may pursue advanced work at the M.A. and Ph.D. level in language and literature programs, or allied curricula in film studies, philosophy, intellectual history, and cultural studies. They may aim for degrees in education, specializing in language arts, foreign language teaching, or both. Comparative literature majors may also find jobs in fields where liberal arts skills, such as strong writing ability and fluency in foreign languages, are valued. Cinema studies majors often seek positions associated with film production and distribution.
- \* *Honors Options Available:* Departmental honors by invitation. See adviser.
- \* *Undergraduate Research, Internships, and Service Learning:* See adviser for internship information.
- \* *Department Scholarships:* Some financial support available for student film projects.
- \* *Student Organizations/Associations:*
  - o Film Club, film@u.washington.edu
  - o UW Film Colloquium, filmcol@u.washington.edu

*Of Special Note:* A maximum of 5 credits of internship (C LIT 491) may be applied toward the Cinema Studies major.

## Graduate Program

Graduate Program Coordinator  
B531 Padelford, Box 354338  
206-543-7542  
clitgrad@u.washington.edu

The Department of Comparative Literature offers a program of study with faculty members from the following participating departments: Asian Languages and Literature, English, French and Italian Studies, Germanics, Near Eastern Languages and Civilization, Scandinavian Studies, Slavic Languages and Literatures, Spanish and Portuguese Studies, and Women Studies. Study leads to a Master of Arts or Doctor of Philosophy degree. Students concentrate on graduate courses in comparative literature and specialize in two or more national literatures of major interest to them, studied in the original language. With permission, a Ph.D. aspirant may choose as a third area of study a field outside of literature (e.g., philosophy, religion, art, political thought). On receiving the advanced degree, the student is qualified for teaching and research in comparative and general literature, as well as the language and literature of specialization.

### Master of Arts

#### Admission Requirements

Bachelor of Arts degree in Comparative Literature, English, or any other literature, or equivalent background; advanced reading knowledge in one language other than English.

#### Degree Requirements

45 credits, as follows:

- \* *Coursework:* Minimum 45 quarter credits at the 400 and 500 level, of which at least 25 must be at the 500 level. Three courses must be taken in comparative literature. Remaining credits must include study in two or more literatures with at least three courses in each of two literatures.
- \* *Language Requirements:* Advanced reading knowledge in at least one language other than English and a basic reading knowledge of a second, demonstrated before starting to write the M.A. essay. Language competence is attested either by exams or by completion of satisfactory coursework in the language.
- \* *Essay:* Prepared after completion of coursework, under supervision of two faculty members.
- \* *Study Abroad:* Students are encouraged to study abroad by participating in exchange programs offered through the individual language and literature departments or through the UW's Office of International Programs and Exchanges.

### Doctor of Philosophy

#### Admission Requirements

Master of Arts degree in Comparative Literature, English, or any other literature, or equivalent background; advanced reading knowledge in two languages other than English.

#### Degree Requirements

90 credits, as follows:

- \* *Coursework:* Minimum 90 postbaccalaureate degree credits at the 400 and 500 level of which at least half in each section of the program must be at the 500 level. Credits must include: 1) at least 30 credits in comparative literature courses; 2) 30 credits in the literature of major interest to the student; 3) 20 credits in the student's minor field (or, if more than one minor field is chosen, at least 15 credits in each); 4) 10 elective credits chosen from any area of the student's choice. One of two minor fields may be extra-literary.
- \* *Language Requirements:* Advanced reading knowledge in two languages other than English and a basic reading knowledge of a third, demonstrated before Ph.D. examinations are administered. Language competence is attested either by exams or by completion of satisfactory coursework in the language.
- \* *General Examination:* The General Examination requires one quarter and is taken after completion of the 90 credit course requirement and

language requirements. The examination, taken within three quarters of completion of coursework, consists of the following two sections: 1) eight-hour written examinations in each of the following three areas: a) a period exam in the student's primary national literature; b) comparative literature exam; and c) comparative theory exam; 2) an oral comprehensive examination evaluating the student's overall preparation for dissertation work.

- \* *Dissertation:* Dissertation topics are chosen from a broad range of areas including: 1) the comparative study of authors or themes in different languages; 2) issues in the fields of theory of literature and history of criticism; 3) the study of literary authors or themes whose significance transcends national or linguistic boundaries; 4) the study of such phenomena as transmission, reception, and influence.
- \* *Final Examination:* Candidates must pass an oral examination devoted to the dissertation and to fields covered by their written exams.
- \* *Study Abroad:* Students are encouraged to study abroad by participating in exchange programs offered through the individual language and literature departments or through the UW's Office of International Programs and Exchanges.

### Financial Aid

The department awards teaching assistantships annually to qualified students and provides up to five years of support toward the Ph.D. to students who enter with a B.A. Teaching assistantships can be assigned in Comparative Literature, Cinema Studies, or in any of the national literature departments affiliated with Comparative Literature.

---

## Computer Science

AC101 Paul G. Allen Center for Computer Science and Engineering  
www.cs.washington.edu

Computer science is the study of information and algorithms within the context of real and abstract computing devices. Computer scientists are interested in such topics as the representation and storage of information; algorithms to access, display, edit, and transform information; programming languages to express algorithms; and hardware and software processors to execute algorithms. These concerns lead to practical developments in computer systems software, such as operating systems and compilers; in application areas, such as artificial intelligence, computer graphics, and computational biology; and also lead to theoretical investigations of computers, algorithms, and data.

### Undergraduate Program

Adviser  
101 Paul G. Allen Center for Computer Science and Engineering,  
Box 352350  
206-543-1695  
ugrad-advisor@cs.washington.edu

The Department of Computer Science and Engineering offers the following programs of study:

- \* The Bachelor of Science degree with a major in computer science
- \* The Bachelor of Science degree with a major in computer engineering (see Computer Engineering section)

The core requirements of the two undergraduate majors are identical. The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program, who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the theory, design, and implementation of software systems and applications (for example, the techniques of modern compilers or the algorithms behind computer graphics and animation).

The computer engineering major may be more appropriate for students who are interested in creating and building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints. The program includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole.

## Bachelor of Science

### Department Admission Requirements

Applicants are considered in three groups -- Direct Admission, Accelerated Admission, and Upper Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission.

1. *Direct Admission:* Computer Science and Engineering enrolls up to 20 percent of its incoming class directly out of high school, prior to the completion of university-level prerequisites. Freshman applicants to the University listing Computer Science or Computer Engineering as their intended major are automatically considered. Competitive applicants have taken calculus and at least one year of laboratory science (preferably physics) upon entering the University. Admission is for autumn quarter only.
2. *Accelerated Admission:* Intended as a fast track into the Computer Science and Engineering department for matriculated students who have excelled in the CSE introductory courses.
  - a. *Course Requirements:* CSE 142 or equivalent, CSE 143. At least five additional credits toward the Computer Science Upper Division Admission course requirements.
  - b. *Other Requirements:* Completion of at least 15 credits at the UW. 3.00 cumulative GPA. Competitive applicants for Accelerated Admission typically have received a high grade in CSE 143 at the UW on their first attempt.
  - c. Admission is considered for any quarter.
3. *Upper Division Admission*
  - a. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); at least five credits of Natural World, including one of the following: PHYS 121 or CHEM 142/CHEM 145 (or any approved science course that requires PHYS 121 or CHEM 142/CHEM 145 as a prerequisite); CSE 142, CSE 143; and at least five credits of English composition. In addition to any AP credit, at least one calculus or post-calculus mathematics course and one approved Natural World course must be completed prior to applying to the department.
  - b. Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.

Students may also declare into the Computer Science degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

### Major Requirements

84-87 credits as follows:

1. *Science (10 credits):* 10 credits from the list of approved natural science courses in the CS&E Handbook. Courses that meet the department's science requirement include PHYS 121, CHEM 142/145, and any course in biology, chemistry, physics, earth and space sciences, astronomy, and atmospheric sciences that requires PHYS 121 or CHEM 142/145 as a prerequisite.
2. *Mathematics (19-22 credits):* MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken); MATH/STAT 390 or MATH/STAT 391.
3. *Required Courses (35 credits):* CSE 142, CSE 143, CSE 303, CSE 321, CSE 322, CSE 326, CSE 341, CSE 370, CSE 378.
4. *Senior Electives (minimum of 20 credits):* At least 20 credits from the senior electives courses listed in the CS&E Handbook, including at least four of the following courses: CSE 401, CSE 403, CSE 421, CSE 431, CSE 444, CSE 451, CSE 455, CSE 457, CSE 461, CSE 466, CSE 471, CSE 473.
5. Minimum 2.0 grade for any course applied to the major. Transfer students must earn a minimum of 24 graded credits toward the major at the UW.

### Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes:* The computer science field has a broad base of private- and public-sector jobs suitable for the Bachelor of Science graduate: systems analyst, systems programmer, applications programmer, technical sales and marketing, and hardware or software engineering specialist. In addition, there are jobs for which graduate education may be appropriate: producers and developers of computer systems, and teachers and researchers. The field is also highly valued for practicing entrepreneurship.

\* *Instructional and Research Facilities:* In autumn 2003 the department moved to the new state-of-the-art Paul G. Allen Center for Computer Science and Engineering. The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

CSE general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. CSE special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center is one of the finest computer science and computer engineering facilities in the nation. All of its capabilities are available to all CSE students.

\* *Honors Options Available:* With Departmental Honors. See adviser for requirements.

\* *Research, Internships, and Service Learning:* Internships and co-op opportunities are available for computer science undergraduates. See <http://www.engr.washington.edu/coop> and <http://depts.washington.edu/careers> for information.

\* *Departmental Scholarships:* CSE has a limited number of scholarships available to current CSE majors. Scholarship information is listed at [www.cs.washington.edu/education/ugradscholars/scholarships.html](http://www.cs.washington.edu/education/ugradscholars/scholarships.html)

\* *Student Organizations/Associations:* A student chapter of the Association for Computing Machinery (ACM) operates within CSE.

---

## Dance

258 Meany  
[depts.washington.edu/uwdance](http://depts.washington.edu/uwdance)

Dance is part of a liberal arts curriculum and provides students with a foundation for future advanced work in performance or movement-related work. Faculty work closely with students to guide them on the educational track that best serves their career goals.

## Undergraduate Program

Adviser  
261 Meany, Box 351150  
206-543-0550  
[uwdance@u.washington.edu](mailto:uwdance@u.washington.edu)

The Dance Program offers the following programs of study:

- \* The Bachelor of Arts degree with a major in dance.
- \* A minor in dance.

## Bachelor of Arts

### Program Admission Requirements

Applications that meet the following requirements are accepted during autumn, winter, and spring quarters.

1. Minimum 2.00 cumulative GPA.
2. Interview with Dance Program adviser to assess applicant's dance background and preparation for the major to ensure proper placement in dance coursework.
3. Current enrollment in a UW dance technique course (ballet or modern) so faculty can determine a demonstration of minimum level of dance skill required to ensure timely completion of requirements, and to evaluate appropriate level for further dance study.

### Major Requirements

Minimum 67 credits in dance as follows:

1. *Core Curriculum Courses:* DANCE 166 (5 credits), DANCE 242 (3), DANCE 250 (5), DANCE 270 (2 credits, 1 crew minimum), DANCE 344

- or DANCE 345 (5), DANCE 390 (5), DANCE 480 (3), DANCE 493 (5). (33 credits)
- 28 credits from the following (12 credit minimum at the 300-level or above; 6 credits minimum in both ballet and modern dance): DANCE 104, DANCE 105, DANCE 106, DANCE 107, DANCE 108, DANCE 109, DANCE 110, DANCE 111, DANCE 112, DANCE 201, DANCE 202, DANCE 203, DANCE 204, DANCE 205, DANCE 206, DANCE 210, DANCE 211, DANCE 212, DANCE 230, DANCE 231, DANCE 301, DANCE 302, DANCE 303, DANCE 304, DANCE 305, DANCE 306, DANCE 310, DANCE 311, DANCE 312, DANCE 401, DANCE 402, DANCE 403, DANCE 404, DANCE 405, DANCE 406.
  - Minimum of two courses from the following dance electives: DANCE 234, DANCE 266, DANCE 366, DANCE 371, DANCE 420, DANCE 490. Up to 4 additional credits of DANCE 270 may be taken as electives and count toward completion of the dance major (minimum 6 credits).

## Minor

*Minor Requirements:* Minimum 25 credits to include 10 credits from DANCE 166, DANCE 234, DANCE 235, DANCE 242, DANCE 250, DANCE 270, DANCE 336, DANCE 344, DANCE 345, DANCE 390, DANCE 420, DANCE 490, DANCE 493; 15 credits from DANCE 102, DANCE 103, DANCE 104, DANCE 105, DANCE 106, DANCE 107, DANCE 108, DANCE 109, DANCE 110, DANCE 111, DANCE 112, DANCE 201, DANCE 202, DANCE 203, DANCE 204, DANCE 205, DANCE 206, DANCE 210, DANCE 211, DANCE 212, DANCE 230, DANCE 231, DANCE 301, DANCE 302, DANCE 303, DANCE 304, DANCE 305, DANCE 306, DANCE 310, DANCE 311, DANCE 312, DANCE 401, DANCE 402, DANCE 403, DANCE 404, DANCE 405, DANCE 406.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The Dance Program curriculum provides a balance between academic rigor and artistic development and serves as a basis for a broad range of career choices. Majors are encouraged to supplement their dance studies with coursework in other disciplines that provide a foundation for later specialization in dance ethnology, dance history and criticism, performance art, education, movement therapy, or movement science.
- \* *Instructional and Research Facilities:* Three spacious and well equipped dance studios in Meany Hall. Use of Meany Hall and the Meany Studio Theatre for Dance Program performances.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* See adviser.
- \* *Department Scholarships:* See adviser.
- \* *Student Organizations/Associations:* Dance Student Association, University Ballet Company

## Graduate Program

Graduate Program Coordinator  
258 Meany, Box 351150  
206-543-5594  
uwdance@u.washington.edu

The dance program offers graduate study leading to a Master of Fine Arts degree. This program is designed specifically for professional dance performers who wish to prepare for a transition into college teaching careers. All graduate students will comprise the Chamber Dance Company and will hold teaching assistantships.

## Master of Fine Arts

### Admission Requirements

1. A letter of application and resume.
2. An undergraduate degree.
3. A minimum of eight years of professional performing experience.
4. The ability to demonstrate movement skills at a professional level in at least one idiom, and an in-person audition or performance video tape.
5. Three letters of reference verifying success and responsibility in the professional dance arena. Neither a foreign language nor the Graduate Record Examination is required. Application deadline is January 15.

### Degree Requirements

During the two-year program, a student will be expected to enroll full-time (minimum of 10 credits/quarter) for three quarters each year (summer

quarter excluded). A student must complete at least 72 credits in order to earn the degree, 31 of which are in required courses.

- \* *Required Coursework:* Either PHIL 445 (5) or PHIL 446 (5); DANCE 510 (3), DANCE 515 (3), DANCE 520 (3), DANCE 521 (3), DANCE 530 (2), DANCE 531 (3), DANCE 595 (3)
- \* *Coursework or Competency:* Students must have taken the following courses as an undergraduate, or have mastered the content of the following courses through practical experience, or complete these courses during their two years in the program: DANCE 420 (3), DANCE 493 (3-5), DANCE 544 (3-5), DANCE 545 (3-5), DANCE 590 (3-5)

## Financial Aid

All graduate students will receive tuition waivers and teaching assistant stipends.

## Digital Arts and Experimental Media

207 Raitt  
www.washington.edu/dxarts

The processes of inquiry encompassing imagination, exploration, discovery, and reflection are universal among artists, scholars, scientists, and engineers. All seek to uncover new knowledge through innovations that will improve our lives and communicate new ways of understanding ourselves and the universe. The Center for Digital Arts and Experimental Media (DXARTS) is a creative research convergence zone for intrepid artists and scholars who are pioneers of an unfolding new era in the arts.

The DXARTS program embraces an expansive range of arts practice, theory, and research across multiple disciplines. The center is home to its own undergraduate and graduate degree programs, but welcomes into its facilities and courses many who are not directly affiliated with one of these programs. Faculty and students at DXARTS may focus their work in a particular area of experimental arts (digital video, digital media art, computer music and sound art, computer animation, design computing, mechatronics, and so on), or they may pursue areas of creative research that have no media allegiance overlapping with and drawing from several or many different areas. Whatever the case, artists and scholars working at DXARTS engage in teaching, learning, and research within the synergistic, multidisciplinary setting of the center's labs, studios, and classrooms.

A common thread running through all of the work at DXARTS is the implicit maxim that to discover new knowledge we must challenge all assumptions. DXARTS is a place where the ideas and outcomes of creative arts research are in an ongoing state of becoming.

## Undergraduate Program

Adviser  
207 Raitt Hall, Box 353414  
206-221-6085  
dxarts@u.washington.edu

The DXARTS program offers the following program of study:

- \* The Bachelor of Fine Arts degree with a major in digital arts and experimental media

## Bachelor of Fine Arts

### Program Admission Requirements

Admission is once a year. Application, normally during the sophomore year, is made during winter quarter for admission in spring. Admission is competitive. A minimum 2.50 GPA guarantees consideration, but the GPA of accepted applicants is normally considerably higher.

All applicants, regardless of background and proposed course of study, are expected to show a significant level of computing skill and general technology literacy.

Students must enroll in DXARTS 200 autumn quarter. Based on performance in DXARTS 200, students are selected to continue in DXARTS 201 winter quarter. Students enrolled in DXARTS 201 are eligible to submit an

application and supplemental materials to be considered for admission spring quarter. Supplemental materials include an electronic portfolio, a statement of interest in the program, and a proposed course-of-study plan. For details, see the program's Web page. Students must complete the following prior to application:

1. CSE 142
2. PHYS 114 or PHYS 121
3. MUSIC 120
4. ART H 203
5. Mathematics proficiency through the pre-calculus level. Proficiency may be demonstrated by completion of MATH 120 or equivalent, a minimum score of 68% on the UW Advanced Mathematics placement test, a minimum score of 2 on the mathematics AP exam, or completion of a college-level calculus course.

### Major Requirements

In addition to the courses required for admission as described above, major requirements include the following:

1. 64-74 credits of DXARTS courses, as follows:
  - a. DXARTS 202 (5 credits)
  - b. Three quarters of DXARTS 400 (6 credits total)
  - c. DXARTS 412 (3 credits)
  - d. Completion of two of the following four DXARTS core sequences (30 credits): DXARTS 441, DXARTS 442, DXARTS 443 (3D Motion and Graphics); DXARTS 451, DXARTS 452, DXARTS 453 (Video); DXARTS 461, DXARTS 462, DXARTS 463 (Sound); DXARTS 471, DXARTS 472, DXARTS 473 (Mechatronics).
  - e. Completion of a third core sequence as listed above or one of the following fundamentals courses dealing with a third content area (5 to 15 credits): DXARTS 440, DXARTS 450, DXARTS 460, or DXARTS 470.
  - f. Senior thesis in the form of 15 credits of DXARTS 491, DXARTS 492, and DXARTS 493, including the completion and exhibition of a BFA thesis project that is a significant and original contribution both aesthetically and technically.
2. 20-30 credits in additional DXARTS courses, or courses from a list of approved electives in other areas, to bring total major credits to 94. See department website or advising office for a list of approved electives.
3. A minimum 2.0 grade in all DXARTS courses counted toward the major. A cumulative GPA of 2.50 in all DXARTS courses and approved electives.
4. For complete information about the BFA program visit the program's Web page.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The program goal is to create opportunities for entering artists to discover and document new knowledge and expertise. Unlike other BFA degrees, which offer initial professional studio art education, this BFA is primarily a pre-graduate, research-oriented degree, signifying that an individual is professionally qualified to investigate fundamental problems in the nature and practice of digital arts and experimental media. Graduates are prepared to pursue original creative and technical research in the field and contribute to the development of knowledge and its consequences in society and culture.
- \* *Instructional and Research Facilities:* DXARTS houses extensive laboratories and advanced research studios with state-of-the-art computing, imaging, sound, networking, mechatronics, and electronics equipment to support a wide range of experimental art.
- \* *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* Some areas of research and professional opportunities within DXARTS include digital video art, computer music composition, Web site design and programming, 3D animation, motion graphics design, user interface design, sound design, interactive media production, multimedia art, electronic stage and set design, authoring of electronic online publications, special effects design, virtual environment design, sound art, and installations art (in galleries, public, and virtual spaces).
- \* *Department Scholarships:* Limited in number with competitive application processes. Please see adviser for details.
- \* *Student Organizations/Associations:* None.

## Graduate Program

Graduate Program Coordinator  
207 Raitt Hall, Box 353414  
206-543-4218  
dxarts@u.washington.edu

### Doctor of Philosophy

The goal of doctoral education in Digital Arts and Experimental Media is to create opportunities for artists to discover and document new knowledge and expertise at the most advanced levels higher education can offer. While creating new art is at the center of all activities in the program, the DXARTS Ph.D. is a research-oriented degree requiring a substantial commitment to graduate-level study and reflection. The Ph.D. degree prepares artists to pursue original creative and technical research in digital arts and experimental media and to pioneer lasting innovations on which future artists and scholars can build.

### Admission Requirements

- \* Master's degree or equivalent in a discipline or field related to the proposed doctoral work.
- \* Portfolio of artistic work.
- \* Statement of purpose
- \* Competence in computing, general technology literacy, and skill and imagination in the applicant's areas of interest.
- \* One copy of the Graduate School's Application Form
- \* One sealed official transcript from each collegiate institution attended.
- \* A digitally based portfolio of artistic work including any other documentation that can help the admissions committee make its evaluations. The portfolio should be thoughtfully organized in a digital format (CDROM, DVD, URL, etc.) that best represents the applicant's work. Non-digital supplemental materials should be included in the index on the digital portfolio.
- \* A complete curriculum vitae and narrative biography
- \* Three letters of recommendation from instructors or professors familiar with the applicant's academic qualifications
- \* International applicants must submit TOEFL and TSE scores

### Degree Requirements

90 credits, as follows:

- \* Prior to the General Examination which concludes Phase Two of the program, six quarters of full-time study (minimum of 10 credits per quarter). DXARTS 500 is required every quarter.
- \* 60 credits of DXARTS approved courses (not including DXARTS 800 credits). At least 30 of the credits earned must be at the 500 level. At least 30 must be in graded 400- and 500-level courses.
- \* Minimum 3.00 GPA in DXARTS courses.
- \* General Examination
- \* Final Project - a substantial and original contribution in both artistic and technical domains. At least 27 credits of DXARTS 800 over a period of at least three quarters before taking the Final Doctoral Exam.
- \* Two-part Final Exam. Registration as a doctoral student is required during the quarter the exam is taken.

---

## Drama

101 Hutchinson  
depts.washington.edu/uwdrama

Drama as an art form is a far-reaching discipline providing a humanistic approach to today's societal problems and issues. Drama wrestles with the most compelling issues of our time, to derive new understanding for the advancement of the human condition. It also fosters curiosity, invention, bravery, and humor, promoting practical innovation and personal revelation as lifelong practice for the artist.

Through mastery of skills, techniques and theories, people in drama nurture imagination, seek inspiration and fluent, authentic, original storytelling that reflects the complexity of the human spirit.

## Undergraduate Program

Adviser  
129 Hutchinson Hall, Box 353950  
206-543-4204  
uw драма@u.washington.edu

The School of Drama offers the following program of study:

- \* The Bachelor of Arts degree with a major in drama

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* See department admission requirements below.

#### Department Admission Requirements

DRAMA 201 and DRAMA 251; two of the following: DRAMA 210, DRAMA 211, DRAMA 212, DRAMA 213; one of the following: DRAMA 290, DRAMA 291, DRAMA 292; and a minimum GPA of 2.50 for the five courses.

No audition is required to enter the program.

#### Major Requirements

66 credits as follows:

1. DRAMA 201 (5 credits)
2. DRAMA 251, DRAMA 252 (10 credits)
3. Three courses from the following: DRAMA 210 (4 credits), DRAMA 211 (4 credits), DRAMA 212 (4 credits), DRAMA 213 (4 credits) (12 credits total)
4. DRAMA 290, DRAMA 291, DRAMA 292 (3 credits total)
5. DRAMA 302 (5 credits)
6. One course from the following: DRAMA 374, DRAMA 377, DRAMA 378, DRAMA 471, DRAMA 472 (5 credits)
7. One course from the following: DRAMA 473, DRAMA 475, DRAMA 476 (5 credits)
8. One course from the following: DRAMA 371, DRAMA 373, DRAMA 416, DRAMA 494 (5 credits)
9. One additional course from the above three groups (5 credits)
10. 300- and 400-level drama electives (10 credits)
11. DRAMA 401 (1 credit)

*Continuation Policy:* Drama majors who fall below a 2.00 GPA in drama courses are placed on academic probation for one quarter. Students who fail to raise their GPA to 2.00 in that time are dropped from the major and returned to premajor status. Students may petition the School of Drama for readmission.

#### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The faculty of the School of Drama considers the optimum preparation for the theatre artist to be comprised of a liberal arts undergraduate major in drama and a graduate conservatory education.

Learning objectives include enriched artistic expression, a foundation for further study, and cultivation of essential life skills: teamwork, communication, critical thinking, and imagination.

Students earning the Bachelor of Arts in drama are prepared to seek employment in the theatre industry, apply for advanced degrees in a specific area of theatre (e.g., MFA in acting or design) or transfer the skills gained through the program to broader career opportunities. Recent graduates have pursued careers in acting, design, directing, technical direction, stage management, dramaturgy, playwriting, literary management, teaching, and in such non-theatre occupations as real estate agent, fund-raiser, public relations staff, politician, librarian, academic counselor, lawyer, nurse, translator of foreign films, admissions counselor, trade show/convention production assistant, talent agent, casting director, music promoter, special events coordinator, tour guide, human resources coordinator, wedding coordinator, aerobics instructor, music promoter.

- \* *Instructional and Research Facilities:* Rehearsal and performance spaces include the Glenn Hughes Penthouse Theatre (the first theatre-in-the-round built in the United States), the thrust-stage Playhouse Theatre, the end-stage Meany Studio Theatre, and the proscenium in

Meany Hall. Other spaces include the Cabaret, Studio 201, and Hutchinson 218. School of Drama facilities include a Design Studio, Costume Shop, Scene Shop, and computer labs.

The Drama Library houses reserve books, plays, sound effects, dialect tapes, local audition and job notices, and a special collection of acting editions. Also available are specialized indexes and theatre databases. The librarian assists in the use of reference materials and indexes, bibliographic searches of on-line databases, and offers reference service and bibliographic instruction sessions for groups and individuals.

- \* *Honors Options Available:* Ad hoc honors only. See adviser for details.

- \* *Research, Internships and Service Learning:* Student participation in all aspects of dramatic art is provided through student productions, and faculty- and student-directed plays drawn from the full range of world dramatic literature and produced throughout the year. The School also produces operas in association with the School of Music

To enhance employability and gain hands-on experience, students are encouraged to participate in internships with regional theatres, and related organizations or businesses. Academic credit may be earned for internships under the course number DRAMA 493 (new course proposal being submitted). Internship credits count toward drama elective credits to graduate. A resource guide to drama-related internships is available at the drama undergraduate advising homepage.

Drama students are also encouraged to apply for undergraduate research, leadership and/or fellowship grants available through the Mary Gates Endowment.

- \* *Department Scholarships:* School of Drama scholarships are awarded annually every spring for the following academic year to students who have demonstrated academic merit and contributed significantly to the School of Drama. Applications are available from the advising office mid-January.

- \* *Student Organizations/Associations:* The Undergraduate Theatrical Society (UTS) is a student organization that produces undergraduate theatre works in the Cabaret performance space. Any UW student may audition for UTS productions. UTS members also participate in annual New Student Orientation and other school events on a volunteer basis.

A volunteer elected group of drama students, the BA Council, meets regularly with the Executive Director of the School of Drama to discuss issues relative to the undergraduate program.

## Graduate Program

Graduate Program Coordinator  
101 Hutchinson, Box 353950  
206-543-5140  
uw драма@u.washington.edu

The School of Drama offers professional training and scholarly programs leading to the Master of Fine Arts (M.F.A.) and Doctor of Philosophy (Ph.D.) degrees. Areas of study for the M.F.A. degree are acting, stage direction, scene design, lighting design, and costume design. Most students should expect to spend three intensive years completing the requirements for the M.F.A. degree.

The Ph.D. program provides students with training for scholarly research in theatre history, dramatic literature, theory, and criticism.

### Master of Fine Arts -- Acting

#### Admission Requirements

Admission is based on a private fifteen minute audition and interview with the head of the Professional Actor Training Program (PATP).

Applicants should prepare the following:

- \* A two-minute monologue from a modern prose play.
- \* A two-minute Shakespearean verse monologue.
- \* Approximately 16 bars of a song, a cappella or with auditioner-provided accompaniment.
- \* Auditioners should also be ready to detail their previous training.

Students who hold (or will hold by the time they enroll) a baccalaureate degree from an accredited institution may apply. Most applicants have undergraduate degrees in theatre, but it is not essential. All applicants must demonstrate outstanding talent to be admitted. The GRE is not required. International applicants must meet the minimum TOEFL and TSE scores and other requirements listed on the Graduate School's web site.

Applicants must submit the following to Graduate Programs, School of Drama, University of Washington, Box 353950, Seattle, WA 98195-3950:

- \* The School of Drama PATP application form (available for download from the School's Web site) with the preferred audition date indicated.
- \* A non-refundable audition fee, payable by check or money order to the School of Drama. Applications postmarked after the deadline must include a late application fee of \$10.00. Please note, this is a separate fee from the one due to the Office of Graduate Admissions.
- \* A photograph.
- \* A current résumé of training and experience in the applicant's field.
- \* One set of official transcripts.
- \* A statement of purpose including educational and professional goals.
- \* Three letters of recommendation.
- \* A copy of the Application for Admission to the Graduate School.

## Degree Requirements

A group of ten students enrolls each autumn quarter for the three-year program. In addition to performing in studio productions, first-year students join the acting pool in the winter quarter and, together with second and third-year students, perform in the School of Drama mainstage subscription season, directed by faculty, guest professionals supervised M.F.A. students in the directing program.

The studio classes include extensive work on Stanislavski based process, Suzuki training, voice (Linklater based), singing, speech (Skinner-based), stage combat (for certification), dance, trapeze and audition work. The Alexander technique is both taught as a class and is woven throughout most studio classes and productions.

Throughout the year PATP students have opportunities to audition for summer theatre festivals from around the region and country. We also maintain productive relationships with professional theatres in Seattle and the region such as the Seattle Repertory Theatre, Intiman, Empty Space, ACT, Seattle Children's Theatre, The Guthrie Theatre and the Oregon Shakespeare Festival.

In their third year, PATP students take an in depth class on "the business of acting" as well as an intensive course in acting for the camera. They rehearse and perform in a third year ensemble show with an outside professional director, create a twenty-minute solo performance of their own design and with the faculty develop a professional showcase that plays in Seattle, Los Angeles and New York.

All PATP students are evaluated by the acting faculty at the end of each quarter. Students are admitted with the expectation that all will graduate, although dismissal is possible given two unsatisfactory critiques.

Required coursework is 90 credits, to include:

- \* 36 credits of DRAMA 557 (12, max. 36)
- \* 36 credits of DRAMA 558 (12, max. 36)
- \* DRAMA 551 (1-3, max. 3)
- \* DRAMA 552 (1-3, max. 3)
- \* DRAMA 553 (1-3, max. 3)
- \* 6 credits of DRAMA 559 (6, max. 18)
- \* 9 credits of DRAMA 700 (1, max. 9)

## Master of Fine Arts -- Directing

### Admission Requirements

This program accepts only two MFA candidates every other year. While there is always room for the exceptional applicant, it is extremely difficult to gain admission directly out of a B.A. program with no other credentials. The program tends to choose candidates who show evidence of enterprising energy and accomplishment "out in the world," who may have successfully assisted seasoned directors, who have at least the beginning of a professional and artistic record.

#### 1. All Applicants

- a. Applicants submit the following to Graduate Programs, School of Drama, Box 353950, Seattle WA 98195-3950:

- i. The separate Directing application form (available for download from the School's Web site and fee, made payable to the School of Drama. This fee is separate from that due to the Office of Graduate Admissions (see B below).
- ii. A current résumé of training and experience in the field.
- iii. A statement of purpose including educational and professional goals.
- iv. Three letters of recommendation.
- v. A copy of the Application for Admission to the Graduate School.
- vi. One set of official transcripts.
- vii. A directorial analysis of a play or opera chosen from a preselected list (current list is in packet).

The résumé of theatre activity, statement of purpose and letters of recommendation are all important. The three letters of recommendation should not come from the same source (e.g., the student's B.A. program's faculty). Students may include a video (not required). For return of the video, please include a self-addressed stamped envelope for that purpose.

- b. All applicants for graduate study at the UW must also apply to the Office of Graduate Admissions. The GRE is not required for any applicant. International applicants must meet minimum TOEFL and TSE scores and other requirements as listed on the Graduate School's Web site, and should apply by November 1.

2. *Second step for selected applicants:* A short list of candidates (12-16) is invited to continue the application process and interview. Candidates are normally given a minimum three weeks' notice and should be prepared to cover travel costs and one to two nights' lodging.

- a. Candidates interview for 30 minutes with the head of the program and another faculty member of the program.
- b. Candidates present a two-minute monologue as a way of revealing, not acting talent, but the candidate's knowledge of what it is to speak dialogue, transmit thoughts and physically relate to space.
- c. Candidates are asked to respond to a two-page questionnaire provided by the School of Drama.

3. *Third step for final short listed applicants:* A small group of four to eight candidates is invited to Seattle to be interviewed in person by a group of faculty. As part of this interview each candidate conducts a rehearsal of one of three pre-selected scenes with actors provided by the School of Drama. These actors are familiar with the material and are ready to be on their feet. Candidates receive the scene options and any additional information when notified of their selection to this short list.

## Degree Requirements

*Coursework:*

90 credits, to include the following:

- \* 14 credits of DRAMA 563 (2, max. 18)
- \* 18 credits of DRAMA 567 (1-3, max. 12)
- \* Electives chosen from DRAMA 419 (3, max. 9), DRAMA 510 (3, max. 18), DRAMA 560 (2), DRAMA 561 (2-3, max. 12), DRAMA 562 (1-3, max. 12), and DRAMA 569 (3)
- \* 9 credits of DRAMA 700

*Additional Coursework:* After discussions with each student the faculty may advise additional coursework in such areas as Alexander technique, dialects, lighting design, combat, literature, or history of styles and costume.

All students are evaluated by all of the contact faculty each quarter.

*Internships:* One quarter of the program is devoted to a professional internship experience. MFA directors may intern either locally, nationally or internationally during winter or spring quarter of the third year.

## Master of Arts -- Design

### Admission Requirements

Applicants to the design program must submit a portfolio representative of their work and interview with design faculty. They may mail the portfolio to the School of Drama and interview with a faculty member on the phone. It is always preferable for applicants to bring the portfolio with them when they visit Seattle to interview with design faculty and sit in on graduate

design classes. Other required application materials and fees are detailed below.

The program generally accepts two students in each area every year. While there is always room for the exceptional applicant, it is extremely difficult to gain admission directly out of a BA/BFA program with no other credentials.

*Interviews:* A personal interview is highly recommended, preferably in Seattle. Interviews are held in Seattle from mid-January to the beginning of March, with a limited number scheduled each week. Interviews are held when possible on Wednesday afternoons and applicants are invited to visit classes Wednesday morning. Applicants fill out the M.F.A. design application form completely and indicate how and when they plan to both submit their portfolio and interview with faculty.

*Portfolios:* Portfolio materials need not be matted nor in a presentation case. The portfolio may include hand drafting, renderings, photographs of realized work or of models, costume sketches and other graphic work or high quality photocopies of same, blue lines and/or duplicate slides. Work should be presented in chronological order and should demonstrate strong graphic skills (including accurate rendering of the human figure) and the ability to devise effective design solutions to the problems posed by a script. It is particularly desirable for the portfolio to include examples of drawing or painting not intended as theatre design projects: figure drawing, landscape, architectural sketching or lighting, lighting installations, etc. Again, high quality photocopies are acceptable.

For lighting design applicants, the portfolio should include examples of hand or computer drafting, two or more complete projects including a one-page statement of conceptual approach, hook-up, plot and cue ideas. It should also include samples of set sketches and life drawing.

*Application Procedures:* Applicants submit material to both the Office of Graduate Admissions and the School of Drama. For any questions about the application procedure, contact the School of Drama's graduate program assistant at (206)543-0714 or email [uwdrama@u.washington.edu](mailto:uwdrama@u.washington.edu).

The GRE is not required for any applicant. International applicants must meet minimum TOEFL and TSE scores and other requirements as listed on the Graduate School's Web site.

1. Submit the following to Graduate Programs, School of Drama, Box 353950, Seattle WA 98195-3950:
  - a. Your portfolio (you can bring this with you if you interview in Seattle).
  - b. The separate design application form (available for download from the School's Web site) and fee. Please note, this fee is separate from the one due to the Office of Graduate Admissions (B below).
  - c. A current résumé of training and experience in the field.
  - d. Three letters of recommendation.
  - e. A statement of purpose including educational and professional goals.
  - f. A copy of the Application for Admission to the Graduate School.
  - g. One set of official transcripts.
2. All applicants for graduate study at the UW must also apply to the Office of Graduate Admissions.

## Degree Requirements

90 credits, to include:

The M.F.A. program is three years in length, requiring 90 credits of coursework. The first two years are devoted to class and studio work and production projects. In the third year, students complete an internship with a professional theatre before returning to the School of Drama for one quarter for a final thesis project. The program of study is intended to give the student the basic skills needed to work productively in his/her area of interest and to help the student develop his/her own individual artistic vision. The core of the program is a group of classes and seminars that bring designers and directors together to discuss the creation of works for the stage. Other studio and skills courses develop proficiency. Specific courses vary depending on design emphasis. Professionals working in Seattle are regularly invited to attend classes and offer critiques or discuss their work. Students regularly assist faculty on outside projects.

*Scenic Design:* Students in scenic design are expected to acquire acceptable proficiency in drawing and painting, drafting, model building, scene painting and scene and property construction through a rigorous succession of studio assignments and actual production work.

*Costume Design:* This course of study emphasizes the aesthetic as well as intellectual analysis of theatrical or operatic texts and how one turns these

impulses into three dimensional, unified designs. Students will have intensive exposure to this process as they are mentored through the production of their designs as well as through classes, which encompass design, construction, graphic skills, and history.

*Lighting Design:* The lighting design program emphasizes communication with the director and other designers and a complete understanding of the lighting design process. In advanced studio courses, students work in a light lab, in the school's various theatres, as well as site-specific venues encountering specific lighting challenges. Designing and assisting for UW and off-campus productions is an important part of the program. Lighting students study set and costume design in studio class as well.

## Doctor of Philosophy

### Admission Requirements

Preference is given to applicants with M.A./M.F.A. degrees and theatre experience but those who hold a baccalaureate degree from an accredited college or university are eligible to apply.

- \* An essay or thesis chapter representative of the applicant's best scholarly work.
- \* Graduate Record Examination (GRE) test scores.
- \* A current résumé of training and experience in the field.
- \* A statement of purpose including educational and professional goals.
- \* Three letters of recommendation. Each recommendation must state whether the letter is or is not available for review by the applicant. Forms for this purpose are available for download from the school's Web site. Letters of recommendation should evaluate the applicant's skills and accomplishments as a theatre artist and his or her potential for graduate study in theatre history, dramatic theory, and criticism.
- \* A copy of the Application for Admission to the Graduate School.
- \* One set of official transcripts.
- \* All applicants for graduate study at the UW must also apply to the Office of Graduate Admissions.

International applications must meet minimum TOEFL and TSE scores and other requirements as listed on the Graduate School's Web site.

### Degree Requirements

Three years of study, 99 credits of coursework, including a sequence of 18 seminars (nine in history and nine in theory) and annual examinations. These linked courses provide complete preparation in the major issues of historical study and contemporary critical practice. Students also enroll in a minimum of three courses outside the School of Drama and must complete an upper-level reading course in a foreign language. Specific course work includes DRAMA 571, DRAMA 572, DRAMA 573, DRAMA 575, DRAMA 576, DRAMA 577, DRAMA 581, DRAMA 582, DRAMA 583, DRAMA 585, DRAMA 586, and DRAMA 587, as well as 30 credits of DRAMA 800.

The sequence of drama seminars reflects the changing needs of students, the developing research of the faculty, and the conditions of contemporary scholarship. Special topics in the history sequence have included Restoration theatre, drama in the Industrial Age, communism and capitalism, and ancient theatre history. Seminars in criticism have included reading, interpretation and performance; mimesis and theatrical representation; the semiotics of theatre; and drama and Marxist theatre theory. Students are encouraged to develop original research in these seminars and to present their work at professional meetings or publish it in academic journals.

The fourth year of the program is devoted to writing a dissertation under the guidance of a faculty adviser. Recent doctoral dissertations have explored semiotics, feminism, American theatre history, contemporary English and German drama, ethnicity and performance theory.

---

## Earth and Space Sciences

070 Johnson Hall  
[www.ess.washington.edu](http://www.ess.washington.edu)

Earth and space sciences seeks to further the understanding of the Earth, the solar system, and their histories. The scope extends from the center of Earth to the rim of the solar system, and activities cut across traditional disciplines of physics, chemistry, biology, geology, and mathematics. The discipline examines Earth's interior structure, chemistry, motion, and dynamics; geologic hazards; processes affecting the surface environment

and climate; the surrounding space environment; planetary processes; and geobiology.

## Undergraduate Program

Adviser  
070 Johnson Hall, Box 351310  
206-616-8511  
advising@ess.washington.edu

The Department of Earth and Space Sciences offers the following programs of study:

- \* The Bachelor of Science degree with a major in earth and space sciences, with options in biology, physics, and environmental earth sciences
- \* The Bachelor of Arts degree with a major in earth and space sciences
- \* A minor in earth and space sciences

The Bachelor of Science degree is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector, where field and technology experiences and problem-solving skills are an important asset. The Biology Option enables B.S. students interested in paleontology and paleobiology to emphasize biology courses. The Physics Option allows for an emphasis in physics and geophysics. The Environmental Earth Sciences Option is designed for students interested in environmentally focused courses and careers. The Bachelor of Arts degree is designed for students who wish to obtain a broad understanding of earth sciences as a background for careers such as science journalism, environmental law, K-12 teaching, or environmental policy.

### Bachelor of Science

*Suggested First- and Second-Year Courses:* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

90 credits as follows:

1. *Science Core (35 Credits)*
  - a. *Basic Supporting Science (20 credits):* MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students wishing to pursue the ESS Physics Option must take PHYS 121.)
  - b. *ESS Required Core Courses (15 credits):* ESS 211, ESS 212, ESS 213. (Students in the ESS Physics Option may substitute ESS 205 for one of these.)
2. *ESS Options (Minimum 55 Credits)*
  - a. *Standard Option*
    - i. *Supporting Science (13-15 credits):* MATH 126 or equivalent; PHYS 115/PHYS 118 or PHYS 122; and one of PHYS 116/PHYS 119 or PHYS 123, CHEM 152, MATH 307, MATH 308, STAT 311.
    - ii. *ESS Required (22 credits):* Two of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400.
    - iii. *ESS Electives (18-20 credits):* ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered ESS 489 through ESS 499.)
  - b. *Biology Option*
    - i. *Supporting Science (21 credits):* CHEM 152, CHEM 162 or equivalent; BIOL 180, BIOL 200 (or two from BIOL 201, BIOL 202, BIOL 203).
    - ii. *ESS Required (22 credits):* Two of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400.
    - iii. *ESS Electives (12 credits):* ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered ESS 489 through ESS 499.)
  - c. *Environmental Earth Sciences Option*
    - i. *Supporting Science (10 credits):* STAT 311 or Q SCI 381; CHEM 152 or CHEM 220.

- ii. *ESS required (35 to 37 credits):* ESS 201; one of ESS 311, ESS 312, ESS 313, ESS 314, ESS 326; two from ESS 315, ESS 421, ESS 426, ESS 427, ESS 455, ESS 456, ESS 459; ESS 400.
  - iii. *Electives (10 credits):* Additional courses chosen from any ESS 311-series course not taken as a required course above, from ESS 400-level courses (may not include independent study or seminar courses numbered ESS 489 through ESS 499), or from an approved list of courses outside ESS.
- d. *Physics Option*
- i. *Supporting Science (32-35 credits):* MATH 126, MATH 308, MATH 324 or MATH 136, MATH 324; PHYS 122, PHYS 123, PHYS 227, PHYS 228, PHYS 321, PHYS 322.
  - ii. *ESS Required (5 credits):* One of ESS 311, ESS 312, ESS 313, ESS 314.
  - iii. *ESS Electives (15-18 credits):* ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered ESS 489 through ESS 499.)

All courses counted toward the major must be completed with a minimum grade of 2.0.

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121; CHEM 142.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

90 credits as follows:

1. *Supporting Science (35 Credits)*
  - a. *Basic Supporting Science (20 credits):* CHEM 142; Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121.
  - b. *Additional Courses:* 15 credits from department's approved list of courses in science and mathematics. See adviser for current list.
2. *ESS Courses (55 Credits)*
  - a. *Required Courses (15 credits):* Two of ESS 211, ESS 212, ESS 213. One of ESS 311, ESS 312, ESS 313, ESS 314.
  - b. *Elective Courses:* 40 upper-division credits (300- and 400-level) with at least 10 credits at the 400-level. (May not include independent study or seminar courses numbered ESS 489 through ESS 499.)

All courses counted toward the major must be completed with a minimum grade of 2.0.

### Minor

*Minor Requirements:* 30 ESS credits with at least 15 at the upper-division level (300- or 400-level) of which at least 3 credits must be at the 400-level. (May not include independent study or seminar courses numbered ESS 489 through ESS 499.) All courses must be completed with a minimum grade of 2.0.

### Student Outcomes and Opportunities

- \* *Instructional and Research Facilities:* See below.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser or department Web site for requirements.
- \* *Research, Internships, and Service Learning:* Job and internship possibilities are posted in the department and forwarded by email to all undergraduate students.
- \* *Department Scholarships:* A limited number of departmental scholarships are available. Scholarship applications are invited from all undergraduate students in the major during spring quarter. The awards are applicable to the following academic year.
- \* *Student Organizations/Associations:* Geo Club organizes field trips and social gatherings. Information about meetings and events is forwarded to undergraduate majors by email.

## Graduate Program

Graduate Program Coordinator  
070 Johnson Hall , Box 351310  
206-616-8511  
advising@ess.washington.edu

The Department of Earth and Space Sciences offers graduate programs leading to the Master of Science (M.S.) degree and the Doctor of Philosophy (Ph.D.) degree in both geological sciences and in geophysics. The programs emphasize a rigorous quantitative approach in conjunction with detailed in-situ and/or laboratory observations to address significant problems that will lead to a better understanding of the Earth and its environment.

Major areas of interest are the internal and surface structures and materials of the Earth and planets, dynamic processes within the earth, oceans, atmosphere, and space environments, their history and the interaction of life with these environments. The required curriculum is flexible to facilitate interdisciplinary research approaches. The department is also one of the core departments (with the Department of Atmospheric Sciences and the School of Oceanography) in the interdisciplinary graduate Program on Climate Change and a participant in the astrobiology program.

### Master of Science

#### Admission Requirements

1. Official test scores for the Graduate Record Exam (GRE)
2. Official TOEFL scores for international applicants Note: TSE scores are not required.
3. One copy of official transcripts for all colleges and universities attended, in sealed envelopes, if possible. International transcripts must be in the original language and accompanied by a certified English translation.
4. Three letters of recommendation (submitted via the UW World-Wide-Web Application for Graduate Admission)
5. Departmental application form (submitted via the UW World-Wide-Web Application for Graduate Admission)
6. Personal resume and personal statement (submitted via the UW World-Wide-Web Application for Graduate Admission)

#### Degree Requirements

36-45 credits, as follows:

Since the Department of Earth and Space Sciences encourages interdisciplinary courses of study tailored to each student, there are few formal requirements for the M.S. or Ph.D. degrees beyond those specified by the Graduate School.

Departmental requirements for graduate students in both geological sciences and geophysics include the following:

1. Courses determined in consultation with the student's advisory committee to insure both depth and breadth
2. ESS 594, each quarter of the first year
3. ESS 599, every quarter (except summer)
4. Preliminary Examination (see below)

*With Thesis:* 36 credits, of which 18 must be in courses at the 400 level or above and up to 9 may be for thesis (ESS 700). Final examination consists of oral presentation and defense of thesis.

*Without Thesis:* 45 credits, of which 18 must be in courses at the 400 level or above, which includes a 5-credit research paper (ESS 600). Final examination is oral and is administered by a supervisory committee.

*Preliminary Examination:* An ESS requirement for every graduate student in the department's program. Provides one component the department uses to evaluate admission to the Ph.D. program early in the student's second year. Along with the first-year research seminar sequence, the Preliminary Examination encourages students to learn how to develop and present a research project, and get an early, structured start on graduate research.

For the Preliminary Examination, a graduate student must demonstrate the ability to think critically, logically, and creatively and to communicate effectively; and must show knowledge of the disciplines that underlie the student's general area of interest (e.g., geology, geophysics, physics, math, chemistry, biology).

All entering graduate students (both M.S. and Ph.D.) must present and defend a research proposal before a Student Evaluation Committee (SEC) at the end of their first year or at the beginning of their second year in the department.

### Doctor of Philosophy

#### Admission Requirements

1. Official test scores for the Graduate Record Exam (GRE)
2. Official TOEFL scores for international applicants. TSE scores are not required.
3. One copy of official transcripts for all colleges and universities attended, in sealed envelopes, if possible. International transcripts must be in the original language and accompanied by a certified English translation.
4. Three letters of recommendation (submitted via the UW World-Wide-Web Application for Graduate Admission)
5. Departmental application form (submitted via the UW World-Wide-Web Application for Graduate Admission)
6. Personal resume and personal statement (submitted via the UW World-Wide-Web Application for Graduate Admission)

#### Degree Requirements

90 credits, to include:

Since the department encourages interdisciplinary courses of study tailored to each student, there are few formal requirements for the M.S. or Ph.D. degrees beyond those specified by the Graduate School.

Departmental requirements for graduate students in both geological sciences and geophysics include the following:

1. Courses determined in consultation with the student's advisory committee to insure both depth and breadth
2. ESS 594, each quarter of the first year
3. ESS 599, every quarter (except summer)
4. Preliminary Examination (see below)

*Preliminary Examination:* An ESS requirement for every graduate student. Provides one component the department uses to evaluate admission to the Ph.D. program early in the second year. Along with the first-year research seminar sequence, the Preliminary Examination encourages students to learn how to develop and present a research project, and get an early, structured start on graduate research.

For the Preliminary Examination, a student must demonstrate the ability to think critically, logically, and creatively and to communicate effectively; and must show knowledge of the disciplines that underlie the student's general area of interest (e.g., geology, geophysics, physics, math, chemistry, biology).

All entering graduate students (both M.S. and Ph.D.) must present and defend a research proposal before a Student Evaluation Committee (SEC) at the end of their first year or at the beginning of their second year in the department.

### Research Facilities

Extensive laboratory facilities are available for a wide range of experimental/field work. These include a wet chemistry laboratory, a JEOL 733 Superprobe with EDS/WDS and a high resolution laser Raman spectrometer for mineral analysis, a thermal-ionization mass spectrometer, a multi-collector inductively-coupled-plasma mass spectrometer and associated clean laboratories for analysis of stable and radiogenic isotopes, a computer laboratory, a remote-sensing laboratory with an image-processing system with LANDSAT tape library and spectral reflectance equipment, and high temperature controlled atmosphere furnaces. There is also field equipment for electromagnetic induction studies; a high-pressure/temperature laboratory, including a laser-induced phonon spectrometer and diamond anvil cells for studying such rock and mineral properties as compression, sound velocities, and thermal conductivity; a permanent, regional seismic network; a portable telemetered seismic network for studying volcanoes and active faults in western North America; geodetic-quality global-positioning-system receivers; a cold laboratory for studying problems in snow-cover geophysics, glaciology, and sea-ice research; a geophysical-fluids laboratory; two cloud microphysics laboratories; a space physics and aeronomy laboratory for preparing ground-based, balloon, rocket, and satellite experiments; and a laboratory for the study of

advanced plasma propulsion concepts. Additional facilities are provided by the Quaternary Research Center (which houses state-of-the art cosmogenic isotope and stable-isotope research laboratories, palynology, and ice research, and a periglacial laboratory) and the Burke Memorial Washington State Museum (which houses paleontological laboratories and extensive reference collections of invertebrate, vertebrate, and plant fossils, and minerals).

## Financial Aid

Most graduate students receive support in the form of teaching or research assistantships, and endowed fellowships and scholarships.

## Economics

401 Condon  
www.econ.washington.edu

Economics studies the institutions and arrangements that societies use to create and allocate productive resources and advances our understanding of the choices and behaviors of individuals, households, firms, and other organizations. Its deep intellectual roots, rigorous analytical methods, and powerful ability to explain social phenomena warrant the importance of economics within the social sciences.

## Undergraduate Program

Advisers  
413 Condon, Box 353330  
206-543-5794  
econadv@u.washington.edu

The Department of Economics offers the following programs of study:

- \* The Bachelor of Arts degree with a major in economics
- \* The Bachelor of Science degree with a major in economics

The Bachelor of Arts degree is designed to provide a general background in economics, and is the choice of most departmental majors.

The Bachelor of Science degree requires more mathematics for admission, and its graduation requirements have a more pronounced quantitative emphasis.

Applied fields of study available include money and banking, industrial organization, environmental and natural resource economics, labor economics, public finance, comparative systems and development, international trade, and econometrics.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* ECON 200, ECON 201 and MATH 120, MATH 124 or MATH 111, MATH 112. Courses that develop strong analytical and quantitative-reasoning skills.

### Department Admission Requirements

1. A minimum of 45 quarter credits completed, including ECON 200, ECON 201; STAT 311; MATH 112, MATH 124, MATH 134, or MATH 145;
2. A minimum cumulative GPA for all prior college work of 2.80;
3. GPA for four courses required for entrance must be at least 2.80 with a minimum of 2.0 in each course;
4. Transfer students must be enrolled at the UW before applying to the major;
5. Application deadline is the second Friday of each quarter (including summer). All applicants who meet the minimum admission requirements are admitted in time to register as economics majors for the following quarter.

### Major Requirements

55 credits as follows:

1. Admission to the major.
2. A minimum of 50 credits in economics, including ECON 200, ECON 201, ECON 300, ECON 301, STAT 311, and at least five other upper-division courses in economics at the 400 level, excluding ECON 496, ECON 497, and ECON 499.

3. Grades of 2.0 or better in ECON 300 and 301.
4. One calculus course (MATH 112, MATH 124, MATH 134, MATH 145, or equivalent).
5. Transfer students are required to complete a minimum of 25 upper-division economics credits in residence at the UW.

## Bachelor of Science

*Suggested First- and Second-Year College Courses:* ECON 200, ECON 201 and MATH 120, MATH 124 and STAT 311. Additional calculus preparation during the first year is strongly recommended since MATH 125 and MATH 126 are required for admission. Courses that develop strong analytical and quantitative-reasoning skills.

### Department Admission Requirements

1. A minimum of 45 quarter credits completed, including ECON 200, ECON 201; STAT 311, STAT 341, or STAT 390; MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136).
2. A minimum cumulative GPA for all prior college work of 2.80;
3. GPA for four of the five courses required for entrance must be at least 2.80 with a minimum grade of 2.0 for each course (highest math grade used in GPA calculation);
4. Transfer students must be enrolled at the UW before they may apply;
5. Application deadline is the second Friday of each quarter (including summer). All applicants who meet the minimum admission requirements are admitted in time to register as economics majors for the following quarter.

### Major Requirements

65 credits as follows:

1. Admission to the major.
2. 15 credits in MATH 124, MATH 125, MATH 126 or equivalent.
3. A minimum of 50 credits in economics, including ECON 200, ECON 201; ECON 300, ECON 301; ECON 400 (or equivalent) or ECON 401; at least 10 additional credits chosen from the following courses: ECON 400 (or equivalent) or ECON 401, ECON 424, ECON 435, ECON 473, ECON 481 (or equivalent), ECON 482, ECON 483, ECON 485, ECON 486; at least 15 additional credits at the 400 level, excluding ECON 496, ECON 497, and ECON 499.
4. Grades of 2.0 or better in ECON 200, ECON 201, ECON 300, and ECON 301.
5. Transfer students are required to complete a minimum of 25 upper-division economics credits in residence at the UW.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* For undergraduates, the role of the Department of Economics is to train students in a rigorous, analytical discipline that advances their problem-solving abilities and their understanding of important public issues.

The Bachelor of Arts program provides the flexibility and social science training to prepare students for employment in a variety of areas. Also, it is excellent preparation for many masters-level graduate programs in other disciplines and for professional schools such as law, business and medicine.

The Bachelor of Science program is designed to provide undergraduates a rigorous background in economic analysis. This degree is designed for students who plan to do graduate study in economics or who plan to enter certain technically oriented professions, such as actuarial science, demography, financial analysis, or environmental consulting.

- \* *Instructional and Research Facilities:* The department currently has a Resources Room (Condon 210), staffed during tutoring hours, which are posted in Condon 413 or at <http://depts.washington.edu/ecnboard/>.

- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements or visit [www.econ.washington.edu/instruction/undergrad/honorsrequirements.html](http://www.econ.washington.edu/instruction/undergrad/honorsrequirements.html).

- \* *Internships, Research and Service Learning:* Course credit available for internships and research. For more information, visit [www.econ.washington.edu/instruction/undergrad/beyond.html](http://www.econ.washington.edu/instruction/undergrad/beyond.html).

- \* *Department Scholarships:* Scholarship opportunities are available for application during spring quarter. See departmental advisers for details. Note: Students must have filed a FAFSA with the University of Washington's Financial Aid Office to be eligible.
- \* *Study Abroad Opportunities:* The department offers a variety of exchange programs. For more information, visit [www.ipe.washington.edu/](http://www.ipe.washington.edu/).
- \* *Student Organizations/Associations:* The Economics Undergraduate Board (EUB) serves as a liaison between Economics students, faculty and alumni, and also provide services to the general Economics undergraduate student body. The EUB provides free tutoring for ECON 200, ECON 201, ECON 300, and ECON 301; holds career seminars and faculty lectures, and publishes the quarterly newsletter "The Economist." For more information on these services, as well as others provided by the EUB, visit <http://depts.washington.edu/ecnboard/>.

*Of Special Note:*

- \* Courses accepted in transfer as ECON 1XX or ECON 2XX cannot be applied to the major requirements unless courses equivalent to ECON 200 and ECON 201 were required as prerequisites. ECON X courses not having these prerequisites may be applied to electives for the degree, but not to the 50-credit economics-course requirement.
- \* Internship and independent study ECON credits do not count towards the required ECON credits for the BA or BS degree.

## Graduate Program

Graduate Program Coordinator  
403 Condon, Box 353330  
206-685-1384  
[econadv@u.washington.edu](mailto:econadv@u.washington.edu)

The department offers a program of study leading to the Doctor of Philosophy degree. The academic program in economics is designed to develop trained economists for careers in teaching, private industry, government, and international agencies. Frequent seminars led by U.S. and foreign visitors as well as by faculty and students are conducted as an integral element of the department's graduate program.

## Special Requirements

Applicants should have completed undergraduate training that includes courses in at least intermediate-level microeconomic and macroeconomic theory. In addition, applicants must have had at least one year of calculus, one term of linear algebra, and one term of statistics. A course in differential equations is strongly recommended. Additional work in calculus, matrix algebra, and probability and statistics is also strongly recommended. An undergraduate major in economics is not required for admission to the graduate program provided that the above prerequisites have been met. All applicants are required to take the General Test of the Graduate Record Examination (GRE).

The department does not accept admission to a terminal master's (M.A.) degree. A sequential M.A. degree is offered for students already enrolled in the Ph.D. program.

Graduate requirements for the Ph.D. degree include ECON 500, 501, 502, 503, 508, 509, 580, 581, and 582. Ph.D. students are required to pass core examinations in microeconomics and macroeconomics. In addition to this core program, Ph.D. students must take eight other elective field courses in economics at the graduate level. Each Ph.D. student must satisfy the requirements for two fields of specialization. The fields of specialization include advanced macroeconomic theory, advanced microeconomic theory, comparative systems and development, econometrics, finance, health economics, industrial organization, international economics, labor economics, natural resource economics, and public finance.

The doctoral dissertation is the final major requirement for the Ph.D. degree. Each Ph.D. student chooses a dissertation topic and a doctoral supervisory committee is appointed. After the dissertation topic has been developed, Ph.D. students take the General Examination, an oral defense of the dissertation proposal. When the dissertation is completed, Ph.D. students take the Final Examination, an oral defense of the completed dissertation. A foreign language is not required. The doctoral program is designed to be completed in four years, although the average is five.

## Financial Aid

The principal form of financial aid available to graduate students in economics is a teaching assistantship. A number of such assistantships are available to entering graduate students with promising academic records. A small number of fellowships are also available.

## Research and Computing Resources

The department houses a computer laboratory that provides hardware and software for economic modeling, economic estimation, word processing, and other faculty and graduate student research functions. Access is restricted to economics graduate students and faculty. In addition, the Center for Social Science Computation and Research (CSSCR) maintains an extensive library of computer software and data, and offers free consulting services to aid faculty and students with computing problems.

## English

A101 Padelford  
[depts.washington.edu/engl](http://depts.washington.edu/engl)

The Department of English offers courses in English, American, and related literatures. Courses in literature emphasize techniques of literary analysis; theoretical problems in the interpretation of texts; the social, historical, and political context of literary production and reception; and the pleasures of reading. Most require significant written work and stress critical thinking skills. Courses in language study examine the structural, historical, social, and aesthetic dimensions of English. The Creative Writing Program offers workshops in verse, short story, novel, and expository writing. English majors are exposed to many critical perspectives, and pursue interests in literary history, critical theory, language studies, and creative writing.

## Undergraduate Education

Adviser  
A2B Padelford, Box 354330  
206-543-2634  
[engladv@u.washington.edu](mailto:engladv@u.washington.edu)

The Department of English offers the following program of study:

- \* The Bachelor of Arts degree with a major in English. A creative writing option is also available.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Foreign languages, classics, English history, American history, and philosophy.

## Department Admission Requirements

1. Completion of 10 credits in any English literature courses. Completion of ENGL 202 and the attached writing link, ENGL 197, may also fulfill this requirement.
2. Minimum cumulative GPA of 2.00.
3. Minimum cumulative English GPA of 2.50.
4. Students apply to the English Advising Office, A2B Padelford, during the first two weeks of autumn, winter, and spring quarters. Transfer students must be enrolled at the UW before applying.
5. Admission is competitive. Completion of the above requirements does not guarantee admission.

Additional requirements for admission to the creative writing option:

1. Admission to the English major.
2. Completion of ENGL 283 and ENGL 284 or transfer equivalents.
3. Submission of an unofficial transcript and a writing sample of 3-5 poems and 5-10 pages of fiction (preferably a complete story).
4. Students interested in the creative writing option should apply to the Creative Writing Office, B-25 Padelford, during the first three weeks of autumn and spring quarters.
5. Admission is competitive. Completion of the above requirements does not guarantee admission.

## Major Requirements

A minimum of 55 credits as follows:

1. ENGL 202 and writing link ENGL 197 (10 credits). It is recommended these courses be completed by the first quarter of admission to the major and no later than the second quarter after admission.
2. ENGL 302 (5 credits)
3. *English core (25 credits)*: At least 5 credits from each of the following categories: (1) Theories and Methodologies of Language and Literature; (2) Forms and Genres of Language and Literature; (3) Histories of Language and Literature. A list of approved courses is available from the department advising office or department website: <http://depts.washington.edu/engl/>.
4. *English electives (10 credits)*: Must be 200-level or above.
5. At least 15 credits must be in courses focused on pre-1900 literature.
6. Senior capstone course (5 credits) chosen from ENGL 407, ENGL 440, ENGL 442, ENGL 443, ENGL 444, ENGL 473, or ENGL 498.
7. A maximum of 20 credits of 200-level courses and a maximum of 5 credits of creative writing may be applied towards the major.
8. A minimum of 25 credits of English at the 200-level or above must be completed in residence at the UW.

The department strongly recommends, but does not require, 5 credits in one of the following English language courses: ENGL 370, ENGL 371, ENGL 373, ENGL 374, ENGL 478, ENGL 479, or LING 200.

*Creative Writing Option* - A minimum of 60 credits as follows:

1. ENGL 202 and writing link ENGL 297 (10 credits)
2. ENGL 283 and ENGL 284 (10 credits)
3. *English core (20 credits)*: At least 5 credits from each of the following categories: (1) Theories and Methodologies of Language and Literature; (2) Histories of Language and Literature. A list of approved courses is available from the department advising office or department website: <http://depts.washington.edu/engl/>.
4. At least 15 credits must be in courses focused on pre-1900 literature.
5. ENGL 383 and ENGL 384 (10 credits)
6. 10 credits of approved 400-level creative writing courses.
7. A maximum of 20 credits of 200-level courses may be applied towards the major.
8. A minimum of 25 credits of English at the 200-level or above must be completed in residence at the UW.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: Good writing, analytical ability, research skills, and broadened perspectives are among the practical accomplishments majors acquire, all of which can be applied to a range of careers, including, but not limited to advertising, business and marketing, law, library science, the media, public administration, publishing, the social services, and teaching.

The undergraduate program of study in English concentrates on developing students' critical and interpretive abilities with regard to literatures written in English. Students become familiar with the critical developments in the study of language and literary forms, including especially understanding the cultural and historical contexts of various forms of literature. Students are, accordingly, asked to cultivate a habit of self-conscious and careful reading of written texts. Honing a successful habit of reading depends on acquiring an early awareness of the broad range of critical and interpretive methods available to readers of literature, as well as comprehending the basic purpose and effects at stake in different reading methods. Finally, students develop the ability to compose effective and persuasive written analyses of texts in a manner that demonstrates comprehension of the complexities or nuances of language, literature, and culture.

- \* *Instructional and Research Facilities*: Computer labs in Mary Gates Hall for computer-integrated sections.
- \* *Honors Options Available*: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning*: The English Internship Program maintains an active list of over 200 local employers, including publishers, arts organizations, the media, advertising agencies, social service groups, schools, and businesses. Credit is available to declared English majors (ENGL 491).

- \* *Department Scholarships*:
  - o English Department scholarships are available to declared English majors enrolled at the UW for at least two quarters with a UW GPA of 3.50 and a UW English GPA of 3.70. Scholarship recipients must enroll for at least two quarters and carry at least 6 credits each quarter during the term of the scholarship. Applications, due in early March, are available in A11 and A2B Padelford.
  - o Additional scholarships and prizes in creative writing are open to UW English majors only. Applications, due in early March, are available in B25 and A2B Padelford.
- \* *Student Organizations/Associations*: Bricolage is a student literary arts annual published entirely by UW undergraduates and features the works of University students, faculty, staff, and alumni. Students from all majors welcome. Contact: [brico@u.washington.edu](mailto:brico@u.washington.edu) for details.

*Of Special Note*:

- \* Students considering teaching English at the secondary level should consult an English adviser regarding coursework for the English Language Arts endorsement required for entry into the Secondary Teacher Education Program (TEP).
- \* The Department of English offers study abroad opportunities in London and Rome. Students from all majors welcome. See department web site for more information.

## Graduate Program

Graduate Program Coordinator  
A105 Padelford, Box 354330  
206-543-6077  
[englgrad@u.washington.edu](mailto:englgrad@u.washington.edu)

The Department of English offers a complete program of graduate courses and seminars designed to provide aspirants for the Master of Arts and Doctor of Philosophy degrees with a knowledge of English literature and language and the necessary scholarship for training in literary criticism and theory, literary history, and English-language study, including rhetoric and composition. It is possible to pursue a literature- or language-study emphasis. The Master of Fine Arts program in creative writing emphasizes projects in imaginative writing in fiction and poetry, supported by courses in criticism and literary periods and types. A special degree program, the Master of Arts for Teachers, is offered for English teachers in secondary schools and community colleges and a Master of Arts for Teachers (of English to speakers of other languages) for those interested in teaching English to speakers of other languages. The graduate program permits completion of master's degree requirements in four to six quarters and doctoral degree requirements in five years (including the master's degree). In a typical five-year Ph.D. program, a student is encouraged to complete course requirements (75 credits) during the first three years, the General Examination for the doctorate in the fourth year, and the dissertation in the fifth year. Those admitted with a master's degree from another university can complete the doctorate in four years: two years of course work, exam year, and dissertation year.

## Financial Aid

The department annually awards 10 or more new teaching assistantships. To be considered for the following autumn, applicants must submit an assistantship application and supporting materials for admission to the graduate program by January 15. A statement of purpose, three recommendations, the GRE general test, and a critical-writing sample are required [except M.A.T. (E.S.O. L.)]. Teaching assistantship applicants who are not native speakers of English must submit as part of their application a score of 290 or better on the Test of Spoken English (TSE) or UW-administered SPEAK test.

## Master of Arts

*Admission Requirements*: Bachelor of Arts degree: Major in English equivalent to that awarded by the UW preferred. Graduate Record Examination general test [GRE (literature in English) subject test recommended]. Three letters of recommendation, statement of purpose, and a critical writing sample.

*Graduation Requirements*: Intermediate-level proficiency in a language other than English. 40 credits, including 30 credits in graduate English seminars. For students continuing to the doctoral program, a 10-credit master's essay. For a terminal master's degree, students may substitute 10 additional credits in graduate English seminars for the master's essay. A

maximum of 5 credits may be transferred from an accredited graduate program elsewhere.

## Master of Fine Arts

*Admission Requirements:* Bachelor of Arts degree, Graduate Record Examination general test, three letters of recommendation, statement of purpose, a critical-writing sample, and a creative-writing sample.

*Graduation Requirements:* 55 credits, including 20 credits in creative writing, 15 credits in graduate English seminars (5 credits must be from an approved course in criticism), 5 elective credits, 15 thesis credits (including a creative thesis, an MFA essay, and a final oral examination); demonstration of proficiency in a language other than English.

## Master of Arts for Teachers

*Admission Requirements:* Same as for the Master of Arts degree, but usually including prior teaching experience.

*Graduation Requirements:* 45 credits, of which 25 must be in courses numbered 500 or above; including at least one course each in English language or linguistics, rhetoric and/or composition, literary criticism or critical theory, and literature; three courses must have a stated orientation on teaching English; and 5 credits of M.A.T. essay. In addition to the 45 credits, a student with no regular or formal teaching experience is required to complete at least 6 credits of ENGL 601 (Internship). 15 of these may be taken outside the department in courses related to the teaching of English, subject to approval.

## Master of Arts for Teachers (of English to Speakers of Other Languages)

*Admission Requirements:* Bachelor of Arts degree, Graduate Record Examination general test, statement of purpose, three letters of recommendation. Students without training in linguistic method and theory must take LING 400 as a prerequisite for 400-level linguistics courses.

*Graduation Requirements:* 45-54 credits, including ENGL 571, 572, 574, 576; LING 446 or 450, ENGL 575 or LING 461; three courses from ENGL 471, 478, 479, 560, 561, 562, 563, 564, 567, 569, 575, LING 433/ANTH 464, LING 457/PSYCH 457, LING 451, 462; one elective course; 3-6 credits of ENGL 570. Intermediate-level proficiency in a language other than English.

## Doctor of Philosophy

*Admission Requirements:* By petition to the Graduate Studies Committee upon completion of the M.A. degree option in literature. Students with recent master's degrees from other institutions are admitted at the post-master's level following the guidelines for admission to the M.A. option and must complete two quarters before petitioning the Graduate Studies Committee for admission to the doctoral program. Students transferring with a master's degree from other institutions may be required to submit an equivalent to the master's essay. Students with M.F.A., M.A.T., or M.A.T. (E.S.L.) degrees from this University must complete course-work and language requirements for the M.A. degree option and submit an equivalent to the master's essay.

*Graduation Requirements:* 75 graded credits of electives in graduate English seminars. Students with a recent master's degree from another university may count up to 30 credits from their master's program, upon approval of the Director of Graduate Studies. Students with a master's degree from the UW may count up to 40 credits in courses taken before admission to the doctoral program. Fluency in at least one language other than English, plus whatever additional language study the supervisory committee advises. Written examinations for literature emphasis: (1) historical period, (2) specialized field of study, (3) second period, genre, or topic; written examinations for language emphasis: (1) major approach to English-language study, (2) second approach to language study, (3) textual focus (can be literary period); an oral General Examination; 27 credits of ENGL 800 (Dissertation) and a Final Examination based on the dissertation.

## Geography

408A Smith  
depts.washington.edu/geog

Geography is the science of understanding the relationships among people, spaces, and environments as they take place and shape place around the world. In the 21st century, these spatial relationships have become more globally integrated, more globally consequential, and more globally contested than previously, compelling renewed demands for understanding about the complexity of spatial relations. In this context, geography provides important insights into the spatial transformations associated with globalization, global environmental change, and migration, as well as the geographic reordering of governance, geopolitics, health, population, regional economic development, and rural and urban transformation. The discipline offers sufficient skills training to enable graduates to be competitive in many job markets.

Geography seeks to understand the complex processes that result in the patterns, trends and impacts of urbanization, migration, trade, and development. Geographers use interviews, statistical analysis, databases, scholarly research and observation, and secondary data to construct models, maps, and other tools for understanding.

## Undergraduate Program

Adviser  
415A/B Smith, Box 353550  
206-543-3246  
geog@u.washington.edu

The Department of Geography offers the following programs of study:

- \* Bachelor of Arts degree with a major in geography
- \* A minor in geography

Individual undergraduate programs are built around five program concentrations. Students are encouraged to develop a specific, individualized focus of study within their chosen concentration.

1. *Urban, Social, and Political Processes and Patterns.* Human population distribution, migration, settlement systems, and organization. Geographic facets of ethnicity, race, sexuality, and gender; wealth and poverty; and health and disease. Cultural landscapes; politics, nationalism, and identity formation; geopolitics. Location of urban services, including health-care systems, urban transportation, housing, neighborhood development and land use, as well as issues raised by questions of law and social control. Urban spatial policies. Courses include: GEOG 230, GEOG 245, GEOG 276, GEOG 277, GEOG 280, GEOG 310, GEOG 330, GEOG 342, GEOG 371, GEOG 375, GEOG 377, GEOG 378, GEOG 380, GEOG 401, GEOG 430, GEOG 431, GEOG 432, GEOG 440, GEOG 445, GEOG 461, GEOG 474, GEOG 477, GEOG 478, GEOG 480, GEOG 490.
2. *Economic Geography.* Key questions in this concentration include the following: Why do some cities and regions grow while others decline? What local characteristics attract businesses and employment? What determines the flows of goods, services, ideas, people, and capital that bind together the world economy and the regions within it? What can governments and non-governmental organizations do to affect these characteristics and flows? What are the relevant economic analysis tools to apply to questions of environmental regulation and land use? What effects do global corporations have on the economies of regions and nation-states? To what extent is international development driven by questions of political economy? Courses include: GEOG 207, GEOG 208, GEOG 230, GEOG 236, GEOG 302, GEOG 330, GEOG 336, GEOG 349, GEOG 366, GEOG 367, GEOG 370, GEOG 371, GEOG 430, GEOG 435, GEOG 440, GEOG 447, GEOG 448, GEOG 449, and GEOG 478.
3. *Regional Geography and International Development Studies.* Continental and global patterns of international relations and development. Political economy of development; development theory and practice; globalization. Analysis of geographic concepts in the regional context, especially on such topics as population growth and migration; development history, theory, and practice; hunger, resources, and poverty; and interconnections in the global economy. Special emphasis on East Asia, South Asia, Russia and the former Soviet republics, Latin America, Canada, and the United States. Courses include: GEOG 230, GEOG 236, GEOG 271, GEOG 302, GEOG 330, GEOG 335, GEOG 336, GEOG 349, GEOG 371, GEOG 375, GEOG 430, GEOG 431, GEOG 436, GEOG 436.

4. *Geographic Information Systems (GIS)*. Role, design, and use of geographic information systems for research, planning, management, and decision making. Use of computers in the collection, manipulation, analysis, and presentation of geographical data. Courses include: GEOG 360, GEOG 458, GEOG 460, GEOG 461, GEOG 463, GEOG 465, GEOG 471.
5. *Society and Environment*. Examines the key debates on the causes and outcomes of environmental change and degradation and the paths to sustainable development; the use of data in the formulation of human-environment interaction models; perceptions of nature; nature-culture relationships; and historical and contemporary societal responses to environmental degradation, health problems, and resource consumption. Courses include: GEOG 270, GEOG 280, GEOG 360, GEOG 370, GEOG 371, GEOG 380, GEOG 460, GEOG 461, GEOG 463, GEOG 471, GEOG 472, GEOG 480, GEOG 490.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Any 100- or 200-level GEOG course. Courses that develop strong writing, analytical, and qualitative- and quantitative-reasoning skills. Geography is inherently interdisciplinary, so exposure to many social science fields of study in the first two years is ideal.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

60 credits as follows:

1. *Core Courses, required for all majors (20 credits):* GEOG 205, GEOG 315, GEOG 326, GEOG 360
2. *Foundations (15 credits)*
  - a. *Societies, Cities, and Economies (10 credits):* Any two of the following: GEOG 100, GEOG 123, GEOG 200, GEOG 207, GEOG 208, GEOG 230, GEOG 236, GEOG 245, GEOG 276, GEOG 277, GEOG 280, GEOG 302.
  - b. *Environment and Society (5 credits):* One of the following: GEOG 270, GEOG 271, GEOG 343, GEOG 370, GEOG 371, GEOG 372, or GEOG 380.
3. *Research Methods (5 credits):* One of the following: GEOG 367, GEOG 425, GEOG 426, GEOG 440, GEOG 445, GEOG 458, GEOG 460, GEOG 461, GEOG 465, GEOG 471, GEOG 480
4. *Concentration (15 credits):* Students may choose from among five concentrations (GIS; economic geography; urban/social/political geography; development studies; society and environment), or customize their own hybrid focus along more thematic or issue-driven lines, such as migration studies, globalization, geography and health, sustainability, inequality, race/class/gender studies, etc. See advisers for details. Three upper-division (300- and 400-level) geography courses are required for this concentration, at least two of which must be at the 400 level.
5. *Electives (5 credits):* 5 credits of GEOG electives at the 200 level or above; 300- and 400-level courses preferred.
6. *Additional Degree Conditions and Program Features*
  - a. Transfer students must complete a minimum of 25 upper-division credits (300 and 400 level) in geography in residence at the University of Washington.
  - b. Individual geography course grades must be 2.0 or above to count toward major requirements; overall 2.50 GPA in geography courses counted toward the major required;
  - c. 5 credits of internship (GEOG 496) or independent study (GEOG 499) may apply toward the required 60 credits.

## Minor

*Minor Requirements:* 30 credits in geography, including 15 upper-division geography credits with at least 5 credits at the 400 level. No more than 5 credits applied to the minor may be from 100-level classes. Independent learning and internship credits (GEOG 494, GEOG 496, GEOG 497, GEOG 499) may not be counted as part of the 30 credits. A minimum grade of 2.0 for each course counted toward the minor. At least 15 credits of upper-division geography courses must be taken at the UW.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The study of geography emphasizes both technical and critical thinking skills. Geographers' skill sets include the ability to use Geographic Information Systems (GIS) software to produce maps; advanced technical skills in statistical analysis; the ability to use census and other demographic data; sophistication in locating data and interpreting it to help make an argument; sophistication in visual techniques for displaying data, including maps, charts, and graphs; advanced use of such software as spreadsheets, relational data bases, and Web page design; and the ability to present multiple models of land-use patterns for analysis in environmental and economic decision making. Graduates have pursued careers as urban planners, environmental planners and land-use analysts, GIS analysts, economic analysts (marketing, location, geodemographics), public health researchers, NGO specialists in developing nations, airline route analysts, import-export/international-trade specialists, real estate valuation specialists, economic development specialists, social studies teachers, and college professors.
- \* *Instructional and Research Facilities:* A map center in Suzzallo Library houses atlases, sheet maps, and aerial photographs. Departmental facilities include the Edward L. Ullman Geography Collaboratory and the John C. Sherman Laboratory, which houses a variety of computer workstations connected to the campus computer network. The Ullman Collaboratory in 415 Smith provides a unique collaborative classroom with networked computer work stations. The Geography Commons also provides computer work stations for students. The Department of Geography is a member of the Center for Social Science Computation and Research, which maintains an extensive data archive and offers many statistical and software consulting services.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* More than 125 geography students participate each year in internships. For lists of these opportunities, see the department's career site.
- \* *Department Scholarships:* None offered.
- \* *Student Organizations/Associations:* The Undergraduate Geography Association (UGA) organizes field trips, alumni career panels, public-service projects, and social gatherings.

*Of Special Note:* Students planning to study economic, transportation, or urban geography are advised to take ECON 200, 201 as early as possible. For those interested in international or area studies, foreign-language competence (i.e., at a level sufficient to be useful for elective, course-related reading and research) is highly desirable (Russian, Chinese, or Spanish). A working knowledge of a region's or nation's history, landscapes (including physical, urban, and cultural), and current role in world economics and politics will also be of great benefit. Students interested in GIS are encouraged to learn a high-level programming language such as C, C++, Java, or Visual Basic.

## Graduate Program

Graduate Program Coordinator  
415B Smith, Box 353550  
206-543-3246

The Department of Geography has flexible programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The aspirant to the master's degree is expected to complete all work for the degree in four to six quarters. The aspirant to the doctoral degree is expected to undertake two years of post-master's study and must take a departmental diagnostic examination upon entry, pass the General Examination, attain an appropriate level of competence in a foreign language or cognate field, and successfully complete a dissertation. Normally, doctoral program students complete all degree requirements in three to four years.

## Master of Arts

### Admission Requirements

Admission to the graduate program normally requires a minimum GPA of 3.00 (on a 4.00 scale), or "B." Students holding a master's degree must

meet this minimum scholastic requirement, but also should have achieved a GPA higher than 3.00 for graduate studies completed. All applicants must take the Graduate Record Examination. Specific information regarding application procedures may be obtained by writing to the graduate program adviser.

## Degree Requirements

45 credits, as follows:

- \* GEOG 512 (5)
- \* One of the following 400-level courses in analytical methods: GEOG 425 (5), GEOG 426 (5), GEOG 440 (5), GEOG 460 (5), GEOG 461 (5), or GEOG 471 (5).
- \* At least three quarters of GEOG 598 (1, max. 3), the departmental colloquium, usually taken during the first year in the program
- \* GEOG 597 (2). At the conclusion of GEOG 597, the student must write a revised statement of academic objectives.
- \* The completion of at least two departmental research seminars numbered 500 and above, but not including GEOG 502, GEOG 512, GEOG 513, GEOG 515 or other non-specialized seminars.
- \* Remaining credits to be determined in consultation with adviser.

## Doctor of Philosophy

### Admission Requirements

Admission to the graduate program normally requires a minimum GPA of 3.00 (on a 4.00 scale), or "B." Students holding a master's degree must meet this minimum scholastic requirement, but also should have achieved a GPA higher than 3.00 for graduate studies completed. All applicants must take the Graduate Record Examination. Specific information regarding application procedures may be obtained by writing to the graduate program adviser.

### Degree Requirements

90 credits, to include:

- \* *Core requirements:*
  - o GEOG 515 (5). Post-master's students who have not previously completed a course on the history of geographic thought (GEOG 512) must complete such a course before taking GEOG 515.
  - o At least three quarters of GEOG 598 (1, max. 3), the departmental colloquium, usually taken during the first year in the program
  - o GEOG 597. At the conclusion of GEOG 597, the student must write a revised statement of academic objectives.
  - o Two of the following 400-level courses in analytical methods: GEOG 425 (5), GEOG 426 (5), GEOG 440 (5), GEOG 460 (5), GEOG 461 (5), or GEOG 471 (5).
  - o Entering post-master's students who have already completed one of these courses or their equivalents need complete only one additional analytical methods courses, subject to the approval of the Graduate Program Coordinator.
  - o The completion of at least two departmental research seminars numbered 500 and above, but not including GEOG 502, GEOG 512, GEOG 513, GEOG 515 or other nonspecialized seminars. This requirement may be satisfied if the two seminars were taken while earning an MA degree in this program.
  - o Submission of a scholarly article to a professionally-reviewed academic journal; or successful application for research support from external agencies such as the National Science Foundation, the Social Science Research Council, the Ford Foundation, the Fulbright Commission, etc. Additional writing credits may be earned by registering for GEOG 599. The publication may be jointly authored with a faculty member or other graduate student.
- \* A minimum grade of 3.0 must be earned in all Geography courses, and a grade of 2.7 or higher must be obtained in all courses in related fields used to satisfy the doctoral degree credit requirement.
- \* Evidence of reading competence in one foreign language, or a sound level of competence in one cognate field of concentration as determined by the student's Supervisory Committee.
- \* A departmental written and oral Preliminary Examination, normally by the end of the third quarter in residence. Post-master's students seeking entry into the Ph.D. program must take the Departmental Preliminary Examination during their first year of enrollment. The Preliminary Examination, or designated parts, may be retaken once.
- \* Successful completion of a Graduate School General Examination, normally held at the end of two years (six quarters) of study. The Supervisory Committee will examine the student's qualifications and

competency to undertake dissertation research, and will evaluate the student's general training in geography and in the field of specialization. Normally, the oral examination will be preceded by a written examination.

- \* Preparation and acceptance by the Dean of the Graduate School of a dissertation. The candidate is expected to register for a minimum of 27 credits of dissertation (GEOG 800) over a period of at least three quarters.

## Financial Aid

The department usually awards approximately 15 to 20 teaching assistantships for the academic year. Most of the assistantships are for teaching quiz sections for a larger lecture class. A few of the more advanced doctoral candidates may teach a class. Normally, several research assistantships are also available. In recent years, approximately 85 percent of the department's graduate students have been funded by internal or external sources.

## Germanics

340C Denny  
depts.washington.edu/uwgerman

The Department of Germanics focuses on the language, literature, and civilization of the German-speaking countries; on the role of their history, literature, and philosophy in Western civilization; and on linguistic analysis, especially historic, of the Germanic languages.

## Undergraduate Program

Adviser  
331 Denny, Box 353130  
206-543-4580  
uwgerman@u.washington.edu

The Department of Germanics offers the following programs of study:

- \* The Bachelor of Arts degree with a major in Germanics with options in German language and literature, and German cultural studies
- \* A minor in Germanics with options in cultural studies, language and literature, and linguistics.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* First- and second-year German or equivalent. Courses in Central European history, literature and culture, GERMAN 150 and 250 (conversational German through film). Courses on broad cultural topics offered by Germanics.

### Department Admission Requirements

Admission to major status requires the completion of first- and second-year German or equivalent.

### Major Requirements

*German Language and Literature:* 53 credits as follows:

1. 15 credits to include: GERMAN 311, GERMAN 312, and either GERMAN 322 or GERMAN 323
2. 15 credits from the following: GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, or GERMAN 495
3. One of the following (for 5 credits): GERMAN 333, GERMAN 334, GERMAN 401, or GERMAN 403
4. 18 credits in any upper division Germanics courses not taken for requirements 1, 2, or 3, above. These may include no more than 4 credits from GERMAN 395 and GERMAN 396 combined, and no more than 5 credits each from GERMAN 446 and GERMAN 447. Up to two of the following lower division courses may also be counted toward this requirement: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, GERMAN 295.
5. *Specialization in Linguistics:* Students desiring this specialization must take GERMAN 451 and GERMAN 452 as part of the 18 elective credits shown in item 4, above, and may, with the adviser's permission, count relevant courses in linguistics outside Germanics as well.

*German Cultural Studies*: 50 credits as follows:

1. 15 credits as follows: GERMAN 322, GERMAN 323, and either GERMAN 311 or GERMAN 312
2. 15 credits from the following: GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, or GERMAN 495
3. 20 credits in any upper division Germanics courses not taken for requirements 1 and 2, above. These may include no more than 4 credits from GERMAN 395 and GERMAN 396 combined, and no more than 5 credits each from GERMAN 446 and GERMAN 447. Up to two of the following lower division courses may also be counted toward this requirement: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, and GERMAN 295. With the permission of the adviser, the student may also count toward this requirement courses relevant to German culture offered by other departments, such as history, political science, art history, music history, comparative literature, international studies, or comparative history of ideas.

For both options above, a grade of at least 2.0 must be earned in every upper-division German course; an overall GPA of 2.50 is required for all courses counted toward the major.

## Minor

*Minor Requirements*: Minimum 30 credits from one of the following three options:

- \* *Language and Literature*:
  - a. 15 credits as follows: GERMAN 311, GERMAN 312; either GERMAN 322 or GERMAN 323
  - b. At least one upper-division language course beyond 302
  - c. 10 credits in upper-division Germanics which may include (a) no more than 4 credits total of GERMAN 395 and GERMAN 396; (b) no more than 5 credits of GERMAN 446; and (c) no more than 5 credits of GERMAN 447. Credits from any two of the following may be included: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, and GERMAN 295.
- \* *Linguistics*:
  - a. 10 credits of GERMAN 451 and GERMAN 452
  - b. One 300- or 400-level language course (5 credits) beyond 302
  - c. One course from GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323
  - d. 10 upper division elective credits in Germanics or other departments offering linguistics.
- \* *Cultural Studies*:
  - a. 15 credits of GERMAN 322, GERMAN 323; and either GERMAN 311 or GERMAN 312
  - b. 5 upper-division credits in Germanics offered in English
  - c. 10 credits in upper-division Germanics which may include (a) no more than 4 total credits of GERMAN 395 and GERMAN 396; (b) no more than 5 credits of GERMAN 446; and (c) no more than 5 credits of GERMAN 447. Credits from any two of the following may be included: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, and GERMAN 295.

A minimum grade of 2.0 is required for each course counted toward the minor.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: The department's objective is the dissemination of the intellectual and artistic traditions of the German-speaking countries. Toward this goal the department offers courses conducted not only in German but also in English on aspects of German culture and history for general humanistic education.

The major in German language and literature offers training in verbal interpretation and analysis useful for any career that involves formulating and solving problems, especially for those with some special interest in Europe and Germany. It provides excellent preparation for students planning to do graduate work in German literature or linguistics, and also for those who wish to teach German in K-12 settings. Stress is placed on the critical analysis of texts, both in English and in German, and the development of high proficiency in language fluency, grammar, and style.

The major in German cultural studies also offers training in interpretation and analysis useful for any career that involves formulating and solving

problems. It is designed for students who wish to study the German-speaking countries and their culture in the broadest context and encourages students to develop critical skills to analyze various aspects of culture and society, such as literature, film, art, architecture, and political and social institutions.

- \* *Instructional and Research Facilities*: None
- \* *Honors Options Available*: With College Honors. With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning*: Undergraduates may count 5 credits of internship (conducted either here or in a German-speaking country) toward their major or minor in German. Students must sign up in GERMAN 446. A list of internships is available on the departmental Web page. They include local businesses and training sites, as well as internship options abroad. The Office of International Programs and Exchanges offers a number of different study abroad options for Austria and Germany. Students can consult their Web site at [www.ipe.washington.edu](http://www.ipe.washington.edu). The Department of Germanics offers a "Spring in Vienna" program. Students can consult the departmental Web site for more information, or pick up a brochure in the main office.
- \* *Department Scholarships*: The department's German Express program consists of a series of intensive courses able to take a student from no knowledge of German to fluency in one year. The best five students are awarded stipends of \$1,000 each to be applied toward study during spring quarter at a German university.
- \* *Student Organizations/Associations*: German Club.

*Of Special Note*: Qualified students are invited to take part in the department's Spring in Vienna program. Every spring quarter the department sends a group of approximately 20 students to Vienna to participate in a program of studies in German language and Austrian culture for which students are able to earn 16 credits. Program costs are commensurate with in-state tuition at the University of Washington.

## Graduate Program

Graduate Program Coordinator  
345 Denny, Box 353130  
206-543-6025  
[uwgerman@u.washington.edu](mailto:uwgerman@u.washington.edu)

The graduate program in Germanics offers a broad, flexible, yet integrated curriculum that allows students to organize studies according to their inclinations and professional needs. Although based upon objectives common to all aspects of study (such as the acquisition of a body of learning, training in technical skills, and development of critical judgment), the program offers a background for different professional pursuits: careers as scholars and teachers in literature, cultural studies, the humanities, linguistics and philology on the university level; the teaching of German language and civilization on the college and secondary school level; and professional writing, editing, and publishing. The master's curriculum requires a minimum of 40 credits, a critical M.A. paper, a textual analysis, and a final comprehensive examination. Study period of the doctoral program is two years (minimum number of post-master's course credits is 60). Completion of necessary coursework is followed by general written and oral examinations. A third doctoral year is reserved for writing the dissertation.

The M.A. and Ph.D. programs concentrate on German literature, civilization, cultural history, and philosophical traditions, with an option to include Germanic linguistics and courses outside the department.

## Master of Arts

### Admission Requirements

An undergraduate major in German, or equivalent. Superior German language skills.

### Degree Requirements

- \* 40 hours of coursework as determined in consultation with adviser
- \* One critical M.A. paper
- \* Text analysis in one of the M.A. areas of expertise (see below)
- \* Written comprehensive examination in one of the M.A. areas

Areas of expertise for the MA in Germanics are literary history; intellectual history; cultural studies; and linguistics/philology.

Students must demonstrate foundational competency in three of the four areas of expertise. Evaluation of this expertise is based on three procedures: one comprehensive examination (based on the M.A. reading list); one text analysis (text selected by the M.A. committee from the M.A. reading list); one critical M.A. paper (based on work in a graduate seminar). Students choose the way these three evaluation procedures are distributed across their selected areas of expertise.

## Doctor of Philosophy

### Admission Requirements

Undergraduate major in German, or equivalent. Superior German language skills. Reading knowledge of a second foreign language (in addition to German) is required before the student is admitted to the Ph.D. General Examination. Languages chosen are subject to approval by the department.

### Degree Requirements

90 credits, to include:

60 credit hours at the 500 level or higher (GERMAN 411, GERMAN 451, GERMAN 452, GERMAN 497, GERMAN 498, GERMAN 499 may be counted toward this requirement if not already counted toward the M.A.); knowledge of a foreign language other than German; two Ph.D. papers and a dissertation prospectus (or three Ph.D. papers); three written doctoral examinations; an oral examination; and a dissertation.

- \* The 60 hours of coursework are selected at the student's discretion with an eye toward developing distinct areas of specialization, though students are encouraged to define their areas broadly.
- \* *Ph.D. papers*: Students have the option of submitting either two doctoral papers and a dissertation prospectus (all to be submitted before the written examinations); or three doctoral papers with the prospectus submitted one quarter after the examinations. Any material submitted before the examinations must be in the candidate's file by the time the written examinations are scheduled. Doctoral papers should be in different areas. The first doctoral paper must be submitted by the beginning of the student's second doctoral year.
- \* *Reading lists*: Guided by the Ph.D. reading list, students prepare their own reading lists for each of the three doctoral examination areas in consultation with the members of the Ph.D. supervisory committee.
- \* Knowledge of a foreign language other than German, by completion of a literature course – with readings in the language and a grade of 3.0 or higher – or by standard examinations in the target language approved by the Graduate Program Coordinator, must be demonstrated.
- \* After students have completed the required 60 hours of coursework, met the language requirement, and had the dissertation prospectus approved they may register for 800-level coursework.
- \* Students write three four-hour examinations organized in consultation with the supervisory committee according to one of the following patterns: one period exam, one genre exam, one special topic exam; two period exams, one genre exam; two period exams, one special topic exam; one period exam, two special topic exams (for students specializing in linguistics).

### Financial Aid

A limited number of teaching assistantships and fellowships are available. The teaching load consists of a five-hour course on the first- or second-year level. Teaching assistants are supervised by experienced faculty members.

---

## History

315 Smith  
depts.washington.edu/history

History undertakes the study of human affairs in a manner that seeks to understand change and development rather than the state of things at a given moment, taking into account societies in diverse parts of the world from the earliest times for which written records exist to the present.

## Undergraduate Program

Adviser  
318 Smith, Box 353560  
206-543-5691  
histadv@u.washington.edu

The Department of History offers the following programs of study:

- \* The Bachelor of Arts degree with a major in history
- \* The Bachelor of Arts degree with a major in the history and philosophy of science, offered jointly with the Department of Philosophy
- \* Minors in history and history of science

### Bachelor of Arts

*Suggested First- and Second-Year College Courses*: Courses that develop writing skills.

### Department Admission Requirements

1. Minimum University GPA of 2.00.
2. Completion of 10 credits of college history with a minimum cumulative GPA of 2.50.
3. Completion of 10 credits of composition/writing courses with a minimum grade of 2.0 for each course. The requirement may be met by a freshman English composition course or a "W" course.
4. Students may apply to the major at any time in the quarter. Transfer students must be enrolled at the UW before applying.

### Major Requirements

60 credits as follows:

1. At least one 5-credit "broad" course (as designated by the department) in each of the following fields: (1) European, (2) United States, and (3) Asia, Middle East, Africa, or Latin America
2. At least 10 credits in pre-modern history and 10 credits in modern history (as designated by the department)
3. At least 30 upper-division credits completed in residence at the UW
4. 5 credits of HIST 388, to be completed no later than within two quarters of declaring the major
5. 5 credits of undergraduate senior seminar (as designated by the department)
6. Beyond the required subjects, the student may or may not specialize, depending upon personal interests and career plans
7. A minimum GPA of 2.25 for all history courses and minimum grade of 2.0 in all history courses taken to fulfill requirements for the major.

### Minor

*Minor Requirements*:

*History*: 30 credits of history, of which 20 must be upper-division, with a minimum grade of 2.0 in each course applied toward the minor. A minimum of 15 of the 20 upper-division credits must be completed in residence at the UW.

*History of Science*: 25 credits, including HIST 311, HIST 312, HIST 390, and HIST 490; plus one course from HIST 215, HIST 310, HIST 313, HIST 315, HIST 316, HIST 317, HIST 318, HIST 412, HIST 498 (when topic is relevant), MHE 401, MHE 422, MHE 424. A minimum grade of 2.0 is required in each course.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: The study of history enhances critical thinking and writing skills. It is a creative process in which students learn to use arguments and evidence to communicate a sound historical thesis. It is a liberal arts degree that encourages students to become well rounded, educated people. Graduates are prepared for a variety of careers in many professions and businesses. In addition to teaching, research, and museum and archives work, recent graduates have pursued careers as political lobbyists, journalists, and law enforcement officers. Many history majors pursue, and are well prepared for, further education and professional programs such as medicine, law, library science, and museum curatorship.

- \* *Instructional and Research Facilities:* The department funds a writing center for students enrolled in history courses. The department also has a small computer lab available for history majors.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* The department encourages students to participate in internships that include historical elements. Students work with a sponsoring organization and a history faculty member. See adviser for details.
- \* *Department Scholarships:*
  - o The Faye Wilson Scholarship is awarded to students emphasizing U.S. history and the Schwartz Fellowship to students pursuing historical study of a non-western civilization. The Freedman Remak Scholarship is awarded to non-resident history majors based on academic merit.
  - o History majors may compete for two paper prizes: The Thomas Power Prize for papers written in a history course of the last year, and the York/Mason Award for history papers written on African Americans in the West.
  - o The Millican Fund and the Willstadter Snow-Smith Award provide funding for travel in the course of historical research.
  - o In addition, the department allows students to nominate their high school history teacher for the Pressly Prize, which honors excellence in education.
  - o Scholarship and prize competitions run in February and March of each year. See adviser for details.
- \* *Student Organizations/Associations:* Phi Alpha Theta, a history honors society. See adviser for details.

## Graduate Program

Graduate Program Coordinator  
206C Smith, Box 353560  
206-543-8291  
histgrad@u.washington.edu

The Department of History offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in a large number of fields within the discipline. Students in the programs prepare for careers as college teachers who combine teaching with scholarship and professional writing. A few graduates enter government service, college administration, or publishing. The M.A. program is normally completed in five or six full-time academic quarters or their equivalent.

## Master of Arts

### Admission Requirements

- \* Completion of a strong undergraduate program in history, ordinarily as a history major.
- \* Usually a minimum GPA of 3.50 (A-), particularly in history and related subjects, and especially in the final two years of work, and in graduate work if any graduate studies have been completed prior to application.
- \* Ordinarily a score in the 80th percentile or higher on the verbal portion of the General Aptitude Test of the Graduate Record Examination (GRE).
- \* Evidence of genuine intellectual ability and interest beyond the routine performance of academic tasks.
- \* Reading knowledge of at least one language in addition to English is required for all graduate degrees. It is not a requirement for admission to the graduate program, but qualified applicants with knowledge of at least one foreign language may be favored over those who lack such knowledge. Moreover, and applicant who proposes to work for a degree in Greek, Roman, European, Russian, Medieval, Modern European, Latin American, Middle Eastern, or Asian history is expected to have begun to acquire a working knowledge in the foreign languages essential to research in the field.

### Degree Requirements

In addition to Graduate School requirements, 36 credits minimum, as follows:

- \* *Submission of the Proposed Course of Study:* Two Field MA form or Proposed Course of Study: Divisional MA form, as appropriate. This requirement must be met no later than the end of the second quarter of graduate study.

- \* Official establishment of the MA Committee and submission of the Request for Establishing a Masters Supervisory Committee form. This requirement must be met no later than the end of the third quarter of graduate study.
- \* Successful completion of all language requirements. This requirement must be satisfied no later than the quarter immediately preceding the quarter in which the student expects to complete the master's degree.
- \* Demonstrate by written examination mastery of a substantial body of historical knowledge. Students will be expected to construct their fields of study in consultation with their supervising faculty.
- \* Satisfactory completion of a graduate seminar which entails the preparation of a research seminar paper; or the satisfactory completion of an M.A. thesis. Most seminars are two- or three-quarter classes.
- \* Official submission of an application for the degree.
- \* All Graduate School requirements.

## Doctor of Philosophy

### Admission Requirements

- \* Completion of a strong masters program in history, or a closely related field.
- \* Usually a minimum GPA of 3.50 (A-), particularly in history and related subjects.
- \* Ordinarily a score in the 80th percentile or higher on the verbal portion of the General Aptitude Test of the Graduate Record Examination (GRE).
- \* Evidence of genuine intellectual ability and interest beyond the routine performance of academic tasks.
- \* Reading knowledge of at least one language in addition to English is required for all graduate degrees. It is not a requirement for admission to the graduate program, but qualified applicants with knowledge of at least one foreign language may be favored over those who lack such knowledge. Moreover, an applicant who proposes to work for a degree in Greek, Roman, European, Russian, Medieval, Modern European, Latin American, Middle Eastern, or Asian history is expected to have begun to acquire a working knowledge in the foreign languages essential to research in the field.

### Degree Requirements

In addition to Graduate School Requirements, 90 credits minimum, as follows:

- \* Submission of the Proposed Course of Study form. This requirement should be met no later than the end of the second quarter after entrance to the PhD program. For students promoting into the PhD program from the MA program, this form must be completed no later than the end of the first quarter of doctoral study.
- \* Official establishment of the Doctoral Supervisory Committee and submission of the Request for Establishing a Doctoral Supervisory Committee form. This requirement must be met no later than the end of the third quarter after entrance to the PhD program. For students promoting into the PhD program from the MA program, this form must be completed no later than the end of the first quarter of doctoral study.
- \* Language requirements must be satisfied no later than the quarter immediately preceding the quarter in which the student expects to take the Ph.D. General Examination.
- \* Satisfactory performance in the Ph.D. General Examination, which consists of four written examinations in four fields and an oral examination. Fields must be distributed among at least two divisions, such that at least one of these four fields lies clearly outside the student's primary division of concentration. Students are expected to construct their fields of study in consultation with their supervising faculty. Ph.D. students concentrating in the U.S. history division are required to offer at least one of the following three chronological fields: Early America, 19th Century, 20th Century. A grade of "honors" or "high pass" in a departmental field examination for the M.A. degree may exempt the student from the Ph.D. examination in that field at the discretion of the faculty member administering the Ph.D. examination.
- \* Satisfactory completion of a seminar paper while enrolled as a Ph.D. student. This paper must be completed before the student takes the Ph.D. General Examination. Students who have not completed a graduate seminar in this department for their M.A. are ordinarily expected to enroll in such a seminar as part of their coursework for the Ph.D., and to write their research paper in the context of this seminar.
- \* Official establishment of the Doctoral Reading Committee.
- \* Preparation of an acceptable doctoral dissertation.
- \* Satisfactory performance in a final oral examination in defense of the dissertation.

## Financial Aid

Entering graduate students are considered for any departmental fellowships and other funding for which they are eligible. Students with, or who expect to receive, the M.A. degree by the time they begin their studies may apply for teaching assistantships and may, with continued satisfactory scholarly progress, hold a T.A. appointment for a total of nine quarters, provided adequate funds are available.

## Honors

211 Mary Gates Hall  
depts.washington.edu/uwhonors

uwhonors@u.washington.edu

The honors program offers its participants a special curriculum featuring small classes, challenging instruction, and close contact with faculty and other honors students. An emphasis on writing is incorporated into the honors core curriculum and honors seminars. Directed and independent study are particularly encouraged for upper-division students, commonly leading to a senior honors thesis or project. For a description of honors program requirements and course descriptions, see the Honors Web site.

## Human Rights

The issue of human rights has attracted increased attention around the world. The tri-campus Human Rights minor at the University of Washington provides students the opportunity to learn about the political, philosophical, economic, cultural, and legal aspects of this complex subject.

## Undergraduate Program

Adviser  
42 Gowen, Box 353530  
206-543-2396  
lsjadv@u.washington.edu

111 Thomson, Box 353650  
206-543-6001  
jsisadv@u.washington.edu

The Human Rights minor is offered at all three University campuses, allowing students to take advantage of the expertise available on the campuses where they are not regularly in residence, although the minor can be completed on any one campus.

### Minor

*Minor Requirements:* 25 credits, to include the following:

- 10 credits from an approved list of courses\* concerned with human rights as a core concept.
- 5 credits from an approved list of courses\* concerned with human rights in a broad context.
- 10 additional credits drawn from the above approved lists of courses concerned with human rights.\*
- At least 3 credits of the required 25 credits must be in a human-rights-related internship, practicum, international study abroad, or demonstrated equivalent. Courses that satisfy this requirement include BIS 403, BIS 480; LSJ 310, LSJ 499, POL S 496, SIS 399, and similar practicum and study-abroad courses in other programs (on the Seattle campus); and TIAS 496. See adviser for faculty-approved alternatives. Courses used to satisfy this requirement must be approved/supervised by the faculty offering courses appropriate to the minor. Credits for the minor may be completed across the three UW campuses, or on any single campus. If the minor is completed by a Seattle-major student, no more than 10 credits applied to the minor may be in the student's major department.

\*The list of core courses and context courses is maintained by the Human Rights Advisory Committee. For the current list of such courses, see [depts.washington.edu/hrights/hrminor.html](http://depts.washington.edu/hrights/hrminor.html). Note: From time to time, the Advisory Committee adds, subtracts, or reclassifies courses on the approved list. Students who have planned their studies

on the basis of an earlier list may fulfill the requirements of the minor as specified in that earlier list.

## Humanities (Evening Degree)

103 Lewis Hall  
[www.evedegree.washington.edu/edp/majors/humanities.asp](http://www.evedegree.washington.edu/edp/majors/humanities.asp)

This multidisciplinary major includes upper-division humanities courses selected by faculty of the College of Arts and Sciences. Students explore diverse perspectives in thematically related courses from classics, literature, intellectual history, comparative religion, communications, and art history. Focus is on the ways human beings from different cultures understand their world through communication, literature, and the arts. Students discuss literary and artistic works from a variety of perspectives and approaches, as well as theories of interpretation and practical communication. Analytical, research, and communication skills which can enhance a person's career opportunities are emphasized. Coursework encourages greater understanding of issues, ideas, and themes in history and the contemporary world.

## Undergraduate Program

Adviser  
103 Lewis Hall, Box 353921  
206-543-6160  
advisers@extn.washington.edu

Humanities offers the following program of study:

- \* The Bachelor of Arts degree with a major in humanities

### Bachelor of Arts

*Suggested First- and Second- Year College Courses:* English composition and additional writing. Introductory courses in Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S). First-year foreign language study.

### Program Admission Requirements

1. Admission to the Evening Degree program (separate from admission to the UW day program).
2. Minimum 75 college quarter credits completed. Most students admitted have completed two years of lower-division college work.
3. See adviser for evaluation of applicable courses and credits.

### Major Requirements

60 credits from the approved list of humanities courses, as follows:

1. Not more than 15 credits in 200-level courses (some or all of which may have been completed prior to admission to the major).
2. At least 45 credits of 300- and 400-level courses, of which a minimum 15 credits must be at the 400 level.
3. Minimum 2.25 GPA for all courses counted toward the major.
4. For list of applicable courses, consult the adviser or go to [http://www.evedegree.washington.edu/edp/majors/humanities\\_courses.asp](http://www.evedegree.washington.edu/edp/majors/humanities_courses.asp).

### Additional Degree Requirements

1. English composition and additional writing (15 credits)
2. Quantitative and Symbolic Reasoning (Q/SR) (4-5 credits)
3. Foreign language – through the third quarter of a single foreign language (0 to 15 credits, depending on placement)
4. *Areas of Knowledge*
  - a. Visual, Literary, & Performing Arts (VLPA) (20 credits)
  - b. Individuals & Societies (I&S) (20 credits)
  - c. Natural World (NW) (20 credits)
  - d. Some credits in VLPA and/or I&S may count also toward the major
5. Additional work to complete a minimum 180 credits overall.

### Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes:* Students investigate the social, historical, ethical, and aesthetic meanings attached to and manifested in cultural texts and artifacts. These include visual, literary, performance, and philosophical works in different forms and genres, and

in different historical periods and cultural contexts. Students gain a critical understanding of developments in and approaches to the study of literary and cultural forms, as well as the processes by which they are produced, received, and used. They develop an appreciation for the complexities and nuances of language, literature, and cultural expression and communication. In learning to interpret and contextualize texts, to pose questions, to construct arguments, and to conduct effective research, students become better critical thinkers, speakers, and writers, capable of engaging cultural debates and producing new cultural knowledge.

Specific skills developed include writing in various genres; critical, analytic, and integrative thinking; textual and archival research in different media; argumentation; and effective public speaking.

Humanities majors pursue widely varied careers, including education, editing, private enterprise, public administration, creative writing, management, arts administration, museology, development and events planning.

- \* *Instructional and Research Facilities:* Students use all university library resources and facilities corresponding with their individual research needs. In addition, each of the contributing humanities academic departments offers individual resources to majors. Check with advisers for options.
- \* *Honors Options Available:* None offered.
- \* *Research, Internships, and Service Learning:* The program works collaboratively with students interested in pursuing independent study and research opportunities through academic departments that contribute to the major. Opportunities for work with the Carlson Center, Office of International Exchanges, and service learning are possible for all students.
- \* *Department Scholarships:* The Evening Degree program awards need-based financial aid assistance each year to students from a general fund. Two additional scholarship resources are the Rodney I. Straub Endowed Scholarship and the Nicole Snyder Dettmar Endowed Scholarship.
- \* *Student Organizations/Associations:* None at present.

---

## Individualized Studies

171 Mary Gates Hall  
depts.washington.edu/genstudy

Individualized Studies is an interdisciplinary major option for students who wish to create a program of study by combining selected courses from two or more departments. Students are required to identify a central organizing theme for their major and design it under the guidance and supervision of at least two faculty members and an Individualized Studies adviser.

## Undergraduate Program

Adviser  
171 Mary Gates Hall, Box 352805  
206-543-2550  
genstudy@u.washington.edu

The Individualized Studies program offers the following programs of study:

- \* Bachelor of Arts
- \* Bachelor of Science
- \* Degree depends on the theme and curriculum of the approved major.
- \* Ethnomusicology, technical writing, and public health are three faculty-designed major options also available through Individualized Studies. Ethnomusicology (B.A.) focuses on the study of world cultures through their musical expression. Technical writing (B.A. or B.S.) offers the study of writing and other modes of communication in a variety of technical environments. Public health (B.A. or B.S.) involves the study of historical and contemporary issues in public health, including social and behavioral determinants of health, the geography of health and illness, the etiology of chronic and infectious diseases, the relationship between environmental factors and health, and access to health care and modes of delivery of health services.

## Bachelor of Arts, Bachelor of Science

*Suggested First- and Second-Year College Courses:* Varies, depending on student's area of study.

### Program Admission Requirements

Before developing an Individualized Studies major, students should read *Designing an Individualized Studies Major*, or obtain a copy from the Gateway Center, 171 Mary Gates Hall. Particular attention should be paid to the sections defining restrictions on themes and restricted access to courses. Individualized Studies majors are not possible in a number of subjects because the UW does not offer sufficient coursework. Upper-division courses in departments with competitive admission are generally not available to students not in that major and ordinarily cannot be included in Individualized Studies proposals.

After reading the guidelines, the student must go through the following steps to design a major:

1. Identify the unifying interdisciplinary theme of the program of study.
2. Make a list of courses taken or planned to be taken toward this goal. This list should comprise between 50 and 70 quarter credits, all of which are related to the area of concentration. These courses must come from at least two departments, but may come from any number of areas, so long as interrelationships are discernible. Most of the courses must be 300- and 400-level courses. At least half of the 50-70 credits selected for the major must come from courses taught within the College of Arts and Sciences.
3. Draft a statement that describes the proposed major and discusses the interrelationships among the chosen courses. Propose a brief, descriptive title for the major.
4. Submit the proposal to the Individualized Studies Committee for initial approval. Prospective majors should submit proposals to the Individualized Studies Committee for review at least three quarters prior to graduation.
5. Identify at least two faculty sponsors for the major. The faculty sponsors attest to the intellectual soundness of the proposal and agree to provide whatever guidance is jointly decided upon. They may also suggest changes in the previously approved written proposal or list of courses.
6. Obtain final approval from an Individualized Studies adviser.
7. Transfer students must be enrolled at the UW before applying to the major.
8. Admission requirements for the three faculty-designed major options vary. See an adviser for more details.

### Major Requirements

55 to 70 credits, including completion of the approved curriculum and a 5-credit required senior study (minimum grade of 2.7 required for senior study). Awarding of the Bachelor of Arts or Bachelor of Science degree depends on the content of each student's program.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Varies, depending on student's area of concentration.
- \* *Instructional and Research Facilities:* None
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* None
- \* *Department Scholarships:* None offered
- \* *Student Organizations/Associations:* None

---

## International Studies

401 Thomson  
jsis.artsci.washington.edu

The Henry M. Jackson School of International Studies organizes and supports interdisciplinary teaching and research in international affairs. The school consists of a group of interdisciplinary area-studies programs on major world regions, as well as topical and comparative programs of study that transcend national and regional boundaries.

## Undergraduate Program

Adviser  
111 Thomson, Box 353650  
206-543-6001  
jsisadv@u.washington.edu

The School of International Studies offers the following programs of study:

- \* The Bachelor of Arts degree with a major in international studies with options in Asian studies, Canadian studies, comparative religion, European studies, international studies, Jewish studies, and Latin American studies
- \* Minors in Africa and the African diaspora, Canadian studies, China studies, comparative Islamic studies, comparative religion, European studies, international forestry, international studies, Japan studies, Jewish studies, Korea studies, Latin America studies, South Asian studies, and Southeast Asian studies.

### African Studies

Nancy Farwell, Chair  
Adviser  
501 Thomson, Box 353650  
206-616-0998  
africa1@u.washington.edu

African studies involves a multi-campus interdisciplinary group of faculty, staff, and students who share an interest in interdisciplinary questions relating to Africa and the African diaspora. Africa-focused courses are taught in a variety of scholarly disciplines and programs, including art, music, anthropology, forestry and fisheries, geography, history, international health, American ethnic studies, and the interdisciplinary arts and sciences programs at UW Bothell and UW Tacoma. The African studies program coordinates and disseminates information on Africa-related activities; facilitates research, internships, and study abroad opportunities; and administers the Africa and African diaspora minor.

### Minor

#### Minor Requirements:

30 credits from at least three departments whose approved courses are shown on the African studies Web site, including:

1. Minimum 15 credits at the 300 level or above.
2. Minimum 5 credits from the approved list of courses on the African diaspora.
3. Minimum 10 credits from the approved list of courses on Africa.
4. Maximum 10 credits of language courses, which may include 5 credits at the third-year level or above from the Africa-relevant languages of Arabic, French, or Portuguese and 10 credits of Swahili at the second-year level or above.
5. Other courses not on the Web site may be approved by the program office.
6. Minimum 15 credits completed at the UW.
7. Minimum 2.0 grade in each course applied toward the minor.

### Asian Studies

The undergraduate program in Asian Studies is directed by a committee consisting of the chairs of China Studies, Korea Studies, Japan Studies, South Asian Studies, and Southeast Asian Studies (see below under Minors), and a designated faculty coordinator.

The Asian Studies major combines language training with interdisciplinary study of an Asian region or single country. The program emphasizes social science approaches to the study of history, culture, and society, with provision for study of literature and the arts as well. Students may focus on China, Japan, Korea, South Asia (Bangladesh, India, Nepal, Pakistan, Sri Lanka, Tibet), Southeast Asia [Brunei, Burma (Myanmar), Cambodia, East Timor, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, Vietnam], or Asia as a whole. Five interdisciplinary minors on individual countries or regions also are offered.

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Either SISA 209 or SISA 210, and two introductory Asian civilization course (see major

requirements, below). Progress toward two years of a relevant Asian language. Courses that develop writing skills, especially in the social sciences.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

80 credits as follows:

30 credits or second-year equivalent language training in a language appropriate to student's concentration, plus 50 credits as follows:

1. Either SISA 209 or SISA 210 (5 credits)
2. SIS 201 (5 credits)
3. An Asian civilization course in student's concentration chosen from SISEA 212/HSTAS 212, SISEA 241/HSTAS 241, SISEA 242, HSTAS 201, HSTAS 202, HSTAS 211, SISA 200, SISSE 221/HSTAS 221 (5 credits)
4. 35 credits of approved coursework from one regional or country concentration, or from the general Asia concentration
5. Approved research paper required in one of the upper division concentration courses
6. Minimum grade of 2.0 in all courses counted toward the major (except first- and second-year language courses, where grades must average 2.00)
7. 30 of the 35 credits required for the concentration requirement must be taken in residence at the UW.

### Minor

#### Minor Requirements

The following are approved Asian civilization courses for the minors: SISA 209, SISA 210; SISEA 212/HSTAS 212 (Korea); SISEA 241/HSTAS 241 (Japan); SISEA 242 (Japan); SISSE 221/HSTAS 221 (Southeast Asia); HSTAS 201 (India), HSTAS 202 (India); HSTAS 211 (China).

#### China Studies

Madeleine Yue Dong, Chair

*Minor Requirements:* 30 credits, to include the following:

1. HSTAS 211 and either RELIG 202 or one additional introductory Asian civilization course from those listed above. (10 credits)
2. 10 credits of electives taken at the UW, chosen from the China history/social science electives list.\*
3. 5 credits of electives taken at the UW, chosen from the China history/social science list or the China arts/literature electives list.\*
4. 5 additional credits in Chinese language beyond second-year level, or in upper division transfer courses on China, or in additional electives chosen from the China history/social science electives list.\*
5. Minimum grade of 2.0 required in each course applied toward the minor.

\*The list of Asian civilization courses and China electives is maintained by the China Studies Program. For the current list of such courses, see <http://jsis.washington.edu/advise/catalog/minors.html>.

#### Japan Studies

Robert Pekkanen, Chair

*Minor Requirements:* 30 credits, to include the following:

1. SISEA/HSTAS 241 or SISEA 242, and one course on a different Asian civilization chosen from those listed above. (10 credits)
2. 10 credits of electives taken at the UW, chosen from the Japan history/social science electives list.\*
3. 5 credits of electives taken at the UW, chosen from either the Japan history/social science list or from the Japan arts/literature elective list.\*
4. 5 credits in Japanese language beyond second-year level, or in upper-division transfer courses on Japan, or in additional electives chosen from the Japan history/social science elective list.\*
5. Minimum grade of 2.0 required in each course applied toward the minor.

\*The list of Asian civilization courses and Japan electives is maintained by the Japan Studies Program. For the current list of such courses, see <http://jsis.washington.edu/advise/catalog/minors.html>.

*Korea Studies*  
Clark W. Sorensen, Chair

*Minor Requirements:* 30 credits, to include the following:

1. SISEA 212/HSTAS 212 and one additional introductory Asian civilization course from the list above. (10 credits)
2. 20 credits of electives, 15 of which must be taken at the UW, to include: (a) 10 credits chosen from the list of core courses\*; (b) 5 credits chosen from the list of core courses or the list of electives\*; (c) 5 additional credits in Korean language beyond second-year level, or in upper-division transfer courses on Korea, or from the lists of core courses and electives.\*
3. Minimum grade of 2.0 required in each course applied toward the minor.

\*The lists of Asian Civilization core and elective classes are maintained by the Korea Studies Program. For the current list of such courses, see <http://jsis.washington.edu/advise/catalog/minors.html>.

*South Asian Studies*  
Priti Ramamurthy, Chair

*Minor Requirements:* 30 credits, to include the following:

1. HSTAS 202 or SISSA 200. (5 credits)
2. One additional introductory Asian civilization course chosen from those listed above. (5 credits)
3. 15 credits of electives taken at the UW, chosen from the approved list.\*
4. 5 additional credits in a South Asian language beyond second-year level, or in upper-division transfer courses on South Asia, or in additional electives chosen from the approved list.\*
5. Minimum grade of 2.0 required in each course applied toward the minor.

\*The list of Asian civilization courses and South Asia electives is maintained by the South Asian Studies Program. For the current list of such courses, see <http://jsis.washington.edu/advise/catalog/minors.html>.

*Southeast Asian Studies*  
Laurie J. Sears, Chair

*Minor Requirements:* 30 credits, to include the following:

1. SISSE 221/HSTAS 221 (5 credits)
2. One introductory Asian civilization course chosen from those listed above. (5 credits)
3. 15 credits of electives taken at the UW, chosen from any SISSE-prefix course or its joint-listed equivalent, or from the approved list of electives.\*
4. 5 additional credits in a Southeast Asian language beyond second-year level, or in upper division transfer courses on Southeast Asia, or from the approved list of electives.\*
5. Minimum grade of 2.0 required in each course applied toward the minor.

\*The list of Asian civilization courses and Southeast Asia electives is maintained by the Southeast Asia Program. For the current list of such courses, see <http://jsis.washington.edu/advise/catalog/minors.html>.

## Canadian Studies

Daniel Hart, Chair

Canadian Studies provides a broad understanding of Canadian society, culture and communications, historical development, and contemporary problems.

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* ECON 200, ECON 201. Progress toward two years of French language. Canadian history courses. Courses that develop writing skills.

#### Department Admission Requirements

Students in good academic standing may declare this major at any time.

#### Major Requirements

30 credits or second-year-equivalent French language training, plus 53 credits as follows:

1. SIS 200, SIS 201, SIS 202; ECON 200, ECON 201; SISCA 356, SISCA 498
2. Minimum 18 credits from approved Canadian Studies elective course list.

#### Minor

*Minor Requirements:* 25 credits as follows:

1. SISCA 356 and SISCA 498 (10 credits)
2. 15 credits of electives chosen from an approved list\*
3. Minimum grade of 2.0 in each course applied to the minor
4. Minimum 15 credits completed at the UW

\*The list of Canada electives is maintained by the Canadian studies program. For the current list, see [jsis.washington.edu/advise/catalog/minors.html](http://jsis.washington.edu/advise/catalog/minors.html). Since the program from time to time adds, subtracts, or reclassifies approved courses, students who have planned their studies on the basis of an earlier list may fulfill the requirements of the minor as specified on that list.

## Comparative Islamic Studies

Comparative Islamic Studies provides a broad understanding of Islamic society, culture and communications, historical development, and contemporary problems.

### Minor

*Minor Requirements:* 30 credits as follows:

1. NEAR E 210/SISME 210 (5)
2. NEAR E 211/RELIG 211 or NEAR E 212/RELIG 212 (5)
3. 10 credits in Islamic religious traditions and texts, chosen from an approved list\*
4. 10 credits in history, society, and culture of Islam, chosen from an approved list\*
5. Minimum grade of 2.0 in each course counted toward the minor.

\*The approved list of Comparative Islamic studies electives is maintained by the School of International Studies. For the current list, see [jsis.washington.edu/advise/catalog/minors.html](http://jsis.washington.edu/advise/catalog/minors.html). Since the school from time to time adds, subtracts, or reclassifies courses on the approved list, students who have planned their studies on the basis of an earlier list may fulfill the requirements as specified on that list.

## Comparative Religion

James K. Wellman, Chair

The Comparative Religion major introduces students to broad theoretical issues in the academic study of religion, and encourages them to explore these issues through mastering details of the textual canons, historical traditions, social contexts, and cultural forms of religion.

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* RELIG 201, RELIG 202. Courses that develop writing proficiency. Courses in particular religious traditions such as Christianity, Judaism, Islam, Hinduism, and Buddhism. Courses in the history of civilizations such as Chinese, South Asian, and Western.

#### Department Admission Requirements

Students in good academic standing may declare this major at any time.

#### Major Requirements

55 credits as follows:

1. RELIG 201, RELIG 202; RELIG 380/CHID 380; SIS 201
2. 35 additional credits in RELIG or non-RELIG prefix courses, of which at least 15 must be at the 300 level or above, selected from the three rubrics of textual canons, historical traditions, and social contexts and cultural forms. The distribution must include at least 5 credits and no more than 20 credits in any particular rubric.

## Minor

*Minor Requirements:* 30 credits as follows:

1. RELIG 201, RELIG 202
2. 15 additional credits in RELIG-prefix courses or joint-listed equivalents
3. 5 additional credits chosen from RELIG courses or from an approved list of electives\*

\*The list of comparative religion electives is maintained by the Comparative Religion program. For the current list of such courses, see [jsis.washington.edu/advise/catalog/minors.html](http://jsis.washington.edu/advise/catalog/minors.html).

## European Studies

Carol G. Thomas, Chair

The curriculum in European Studies prepares students to pursue careers requiring an understanding of all the forces, both material and cultural, contemporary and historical, that are shaping Europe today (north, south, east, and west), taking into account transitions involved in the post-Soviet era and the movement toward greater political, economic, and cultural integration among the various nations involved. Students also may concentrate, within the major, on Hellenic studies, European Union studies, or Russian, East European, and Central Asian studies.

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Progress toward two years of a modern European language. A survey course on modern Europe.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

60 credits as follows:

1. 10 credits of a foreign language at the third-year level or beyond
2. 15 credits of core courses, including EURO 301 (5 credits), SIS 201 (5), and a survey course on modern Europe (5)
3. One quarter (10 credits minimum) of foreign study in Europe
4. 15 credits from approved list of electives
5. EURO 494-EURO 495, Senior Research Seminar (10 credits)
6. See adviser for specific course options.

## Minor

*Minor Requirements:* 25 credits as follows:

1. Foreign language through the sixth quarter
2. 15 credits of core courses including EURO 301 (5 credits), SIS 201 (5), and a survey course on modern Europe (5)
3. 10 credits from approved list of electives.

## International Studies

Sara R. Curran, Chair

The general program in International Studies gives students a comprehensive and interdisciplinary perspective on world problems and an ability to analyze the subtle interactions of politics, economics, and culture within the global system.

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* 30 credits of a single foreign language. ECON 200 and either ECON 201 or SIS 123/GEOG 123.

### Department Admission Requirements

1. Admission is competitive, based on overall GPA, grades in the social sciences, a written statement of goals, language background, and any international experience. Before applying, students must complete either ECON 200 or ECON 201, and either SIS 200 or SIS 201. Grades in these courses are given special consideration.
2. Application deadline is the third Friday of each quarter; students are notified by the sixth Friday of the quarter in which they apply. Transfer students must be enrolled at the UW before applying to the major.

## Major Requirements

Foreign-language competency through the second-year college level, plus 70 credits as follows:

1. ECON 200; either ECON 201 or SIS 123/GEOG 123; SIS 200, SIS 201, SIS 202, SIS 401, SIS 495, SIS 498
2. Three or four upper-division courses in an approved option
3. Three upper-division interdisciplinary courses in international studies from an approved core list
4. A research paper of approximately 25 pages to be completed in one of the courses in the student's approved option or in one of the approved interdisciplinary courses
5. Majors are required to maintain a GPA of at least 2.50, both overall and in the program, and to earn a minimum grade of 2.0 in all required SIS-prefix courses.

## Minor

### Minor Requirements:

*International Studies:* 30 credits as follows:

1. 10 credits chosen from SIS 200, SIS 201, SIS 202
2. 15 credits in SIS-prefix courses numbered 200 or above (courses with other JSIS prefixes are not eligible). These 15 credits must include at least 5 credits at 400 level (SIS 401 is recommended).
3. 5 additional credits chosen from SIS-prefix courses or from undergraduate courses having any of the following prefixes: SISA, SISAF, SISCA, SISEA, SISJE, SISLA, SISME, SISRE, SISSA, SISSE, EURO, RELIG
4. Minimum grade of 2.0 is required in each course applied toward the minor.

*International Forestry:* 30 credits as follows:

1. *Core courses (18 credits):* I BUS 300 or SIS 330; GEOG/SIS 335, F M 423, and F M 492
2. *Upper-division electives (12 credits)*
  - o For students majoring in forest management, wildland conservation, forest engineering, wildlife sciences, or environmental horticulture and urban forestry: SIS 401, SIS 430, GEOG 375/SIS 375, GEOG 372/SISA 372, and GEOG 308/SISCA 308, or any I BUS, SIS, SISEA, SISLA, SISRE, SISSA, or SISSE course.
  - o For students majoring in other programs: ESC 322, ESC 410, F E 368, F M 320, F M 360, F M 371, F M 470, or any F M, ESC, or F E course. See faculty adviser for other options.
3. Minimum grade of 2.0 required in each course.

## Jewish Studies

Paul Burstein, Chair

Jewish Studies takes an interdisciplinary approach to the global study of Jews, exploring the rich diversity of their cultures, their philosophies, their religious practices, their histories, their roles in politics, and other areas of contemporary life.

Areas of concentration include ancient cultures and sacred texts, modern literature and culture, Jewish languages, American Jewish studies, Sephardic studies, European Jewish studies, and Israel and Middle East studies.

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* RELIG 210, SISJE 250/HIST 250. Courses that develop writing skills. Courses in international studies and world history (ancient, medieval, and modern). Modern European languages, e.g., French, German, Italian, Spanish. Progress toward two years of Hebrew.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

52 credits as follows:

1. *Introductory courses (15 credits):* RELIG 210, SISJE 250/HIST 250, SIS 201

2. *Jewish Studies Track (20 credits)*: Approved courses in either the Judaic cultural tradition or the Jewish people in the modern world
3. *Jewish Languages and Texts (15 credits)*. A minimum of 15 credits selected from an approved list of courses. Students must be proficient in the Hebrew language through second-year level. Students in the Cultural Tradition track may study ancient or modern Hebrew. Modern Hebrew is required for students in the Modern World track. Under certain circumstances substitution of coursework in an appropriate Jewish lingua franca other than Hebrew may be approved by petition.
4. *SIS 494 (2 credits)*: Senior paper or project

The lists of Jewish Studies courses are maintained by the Jewish Studies Program as part of its Web site. For the current list of such courses, see <http://jsis.artsci.washington.edu/advise/catalog/Jewish-b.html>

## Minor

*Minor Requirements*: 30 credits as follows:

1. RELIG 210 (5 credits) and SISJE 250/HIST 250 (5). (10 credits)
2. 15 credits of Jewish Studies electives, chosen from the list of approved humanities/social science electives.\*
3. 5 additional credits chosen from the list of approved humanities/social science electives or from courses in modern or Biblical Hebrew.\*
4. 15 credits of the minor must be taken in residence at the UW.

\*The list of Jewish Studies electives is maintained by the Jewish Studies program. For the current list of such courses, see <http://jsis.washington.edu/advise/catalog/minors.html>.

## Latin American Studies

Jonathan Warren, Chair

The Latin American Studies major combines language study with work in history, the humanities, and the social sciences. It provides a comprehensive, interdisciplinary understanding of this major world region, emphasizing themes such as economic development, popular movements, cultural analysis, and hemispheric relations. At the same time, it gives students the option to develop their own particular disciplinary and thematic interests.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses*: Substantial progress toward completing the language requirement described below. Courses in any of the following disciplines that deal with Latin America: history, literature, economics, geography, sociology, political science.

## Department Admission Requirements

Students in good academic standing may declare this major at any time.

## Major Requirements

52 credits plus language training, as follows:

1. Training in two foreign languages of Latin America, to include the sixth quarter (or equivalent) of one language chosen from Spanish, Portuguese, or French, and the third quarter (or equivalent) of a second of these languages.
2. SIS 201 (5 credits)
3. *Latin American History (10 credits)*: Courses to be selected from an approved list.
4. *Contemporary Latin America (15 credits)*: Courses drawn from a range of disciplines including anthropology, comparative literature, geography, international studies, and Spanish. See program Web site for a complete list of courses.
5. *Electives (15 credits)*: Courses on Latin America and international studies selected from an approved list.\*
6. *Interdisciplinary Seminar (5 credits)*: SISLA 485, SISLA 486, SISLA 492, or another course chosen from an approved list of research seminars.
7. *SIS 494 (2 credits)*: Senior paper or project

\*Lists of Latin American Studies courses are maintained by the Latin American Studies program as part of its Web site. For the current list of such courses, see <http://jsis.artsci.washington.edu/advise/catalog/Latamba.html>.

## Minor

*Minor Requirements*: 30 credits as follows, plus foreign language:

1. One year of Spanish or Portuguese, or equivalent proficiency
2. At least 5 credits in history chosen from an approved list\*
3. At least 15 credits chosen from an approved list of courses on contemporary Latin America\*
4. At least 10 additional credits chosen from the history or contemporary Latin America lists, or from an approved list of electives\*
5. At least 20 of the 30 credits must be completed at the UW (UW Foreign Study programs included).
6. Minimum 2.0 grade required in each course applied toward the minor.

\*The list of Latin American studies courses is maintained by the Latin American studies program. For the current list, see [jsis.washington.edu/advise/catalog/minors.html](http://jsis.washington.edu/advise/catalog/minors.html). Since the program from time to time adds, subtracts, or reclassifies approved courses, students who have planned their studies on the basis of an earlier list may fulfill the requirements of the minor as specified on that list.

## Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes*: The majors offered in the School of International Studies emphasize development of critical thinking and provide a challenging framework for research and writing. Graduates attain competency in foreign language and an understanding of the political, economic and cultural underpinnings of the global system and specific world regions. This background lays a foundation for advanced study in professional and academic disciplines, and for careers in the evolving global community. Graduates work in a wide range of jobs, depending on their interests and skills, including: Foreign Service officers, international trade specialists, political analysts, human rights associates, research assistants, social studies and language teachers, international student advisers, foreign study coordinators, program officers/managers for international non-profits and NGOs, foreign exchange specialists, international sales representatives/managers, import/export brokers, marketing analysts, associate editors/publicists, international news writers/journalists.

\* *Instructional and Research Facilities*: More than 1.5 million volumes in the University library system are related to international studies. The library has a large current international and domestic newspaper collection, with an emphasis on Slavic, South, and Southeast Asian papers and a selection of European papers. Specialized facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. The University's library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

The University of Washington is also a major center for research on Eastern Europe, Russia, and the independent states of the former Soviet Union, notably the Baltics and the countries of Central Asia. In addition to extensive holdings in Russian, East European, and Baltic language materials, the library has one of the best Central Asian language collections in the country and the largest collection of Latvian books outside Latvia. The strengths of the program are complemented by strong programs in East Asian and Middle Eastern Studies.

Jackson School undergraduates can draw upon an extensive roster of more than 300 UW study-abroad programs and exchanges in 50 countries to enrich their studies.

\* *Honors Options Available*: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

\* *Research, Internships, and Service Learning*: The School's Office of Career Services provides resources for students exploring job and internship opportunities. The Jackson School sponsors the Asia Internship Program, through which students with language proficiency have served for three to nine months with organizations such as an international law firm in Seoul, a bank in Nagasaki, and large electronics companies in both Tokyo and Taipei. The School has limited funds available for students who serve as unpaid interns in nonprofit and governmental agencies. The Leslie Shedd Memorial Internship Fund honors a Jackson School alumna killed while serving with the State Department. The Dorothy Fosdick Internship Fund is sponsored by the

Henry M. Jackson Foundation in memory of the senator's foreign policy adviser. The George E. Taylor Internship Endowment supports students engaged in community-based internships.

\* *Department Scholarships:* George M. Beckmann Memorial Scholarship (undergraduate-Japan); Neal and Helen Fosseen Scholarship (undergraduate); Vincent H. Gowen Scholarship (undergraduate-China); Japan-America Student Conference Scholarship; Margaret Mykut Scholarships; Ayako Betty Murakami Scholarship (Japan); I. Mervin and Georgiana Gorasht Scholarship, Arthur A. Jacobovitz Scholarship, Richard M. Willner Memorial Scholarship, and Jewish Studies Advisory Board Scholarship (Jewish Studies); Katherine M. Tyler Endowed Fellowships (Asia); Eugene and Marilyn Domoto Webb Scholarship and Marilyn Domoto Webb Fellowship (Comparative Religion); Alice Wanmaker Scholarships (undergraduate). See also the funding opportunities described under Internships.

\* *Student Organizations/Associations:* Jackson School Student Association

## Graduate Program

Graduate Program Information  
111 Thomson, Box 353650  
206-543-6001  
jsinfo@u.washington.edu

The Jackson School offers eight programs that lead to a Master of Arts in International Studies degree: six world area-studies programs, a comparative religion program, and a comparative and thematic program in international studies that concentrates on the interaction of international, economic, political, and cultural processes with states and societies around the world. The area-studies programs include China Studies; Japan Studies; Korea Studies; Middle East Studies; Russian, East European, and Central Asian Studies; and South Asian Studies. The comparative and thematic International Studies program can be taken as a concurrent degree program with several professional schools. Specific requirements vary from one program to another, but all stress interdisciplinary study within the context of the historical cultures, contemporary situations, and languages either of the world areas or comparatively.

The Jackson School also offers a general program in International Studies that concentrates on the interaction of international economic, political, and cultural processes with states and societies around the world. This program was developed in conjunction with several professional schools and is designed as a concurrent degree program.

*Admission Requirements:* Applicants must meet the requirements of the Graduate School: a 3.00 GPA in the last 90 quarter (60 semester) graded credits and a baccalaureate degree from an accredited university. Submission of the scores of the general Graduate Record Examination is required. Applicants must also meet the requirements of the specific Jackson School program to which they are applying. Most of them require or strongly recommend previous study of an appropriate foreign language.

*Graduation Requirements:* Students must meet Graduate School requirements for the Master of Arts, as well as individual Jackson School program requirements. Programs are designed to be completed in two years.

*Financial Aid:* Financial support is available to U.S. citizens and permanent residents in the form of Title VI Foreign Language and Area Studies Fellowships. Some Jackson School programs have additional fellowships available for specific areas of study. Graduate students are also eligible for a limited number of teaching or research assistantships and readerships.

*Research Facilities (East Asia):* Research and training facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. In addition, the University is affiliated with the Inter-University Program for Chinese Language Studies in Beijing, language programs in Japan and the People's Republic of China sponsored by the Council on International Educational Exchange, the Inter-University Center for Japanese Language Studies in Yokohama, and other programs which provide intensive language training for advanced undergraduate and graduate students. The School has ongoing projects on China, Japan, and Korea in which advanced graduate students and recognized scholars from the United States and foreign institutions regularly participate.

See also descriptions of research facilities on Russia, East Europe, and Central Asia as well as South Asia under the appropriate headings below.

## China Studies

Madeleine Yue Dong, Chair

The China Studies program provides a broad understanding of the Chinese people and their culture, historical development, and contemporary problems. The curriculum emphasizes the attainment of facility in Chinese language, a grounding in history, and a familiarity with the approaches of the social sciences to China studies. The cultural aspects of China are covered through offerings of several departments, with special strengths in art history and literature. The breadth of offerings allows students to select courses to meet career goals in business, government, or other professions, or to prepare for further graduate study in an academic discipline.

*Admission Requirements:* See above under Graduate Program. While not required for admission, some previous study of Chinese language is highly recommended.

*Graduation Requirements:* Chinese language training through the third year; two seminars: SISEA 521-SISEA 522 (5 credits each) plus 26 credits in discipline study related to China from at least two different disciplines; two seminar papers or a thesis; comprehensive oral examination.

## Comparative Religion

James K. Wellman, Chair

The Comparative Religion program leading to the Master of Arts in International Studies offers an interdisciplinary curriculum in the study of religion, with several choices for areas of concentration. The required core seminars focus on methodology and comparative perspective in the study of religion. For the remaining course requirements, primary and secondary curricular concentrations are available in Buddhism, Hinduism, Judaism, Islam, Christianity, and religion and culture; further secondary curricular concentrations are available in Greco-Roman religions, East Asian indigenous traditions, and African religious traditions.

*Admission Requirements:* See above under Graduate Program. The Comparative Religion faculty reserve the right to determine in each case whether an applicant has sufficient language preparation and background in the study of religion for acceptance into the program.

*Graduation Requirements:* Completion of the third year in a language of the primary sources in the chosen concentration, and first-year reading proficiency in a secondary foreign language necessary for reading published research (e.g., German, French); certification of basic competency in the history of world religions; RELIG 501-RELIG 502; RELIG 510, a colloquium course, each quarter; one course focused on historical relations between religious traditions; at least four courses in a major concentration and two in a minor; one or two final research paper(s); and a comprehensive examination including both oral and written segments.

## International Studies

Sara R. Curran, Chair

The general program in International Studies provides students with broad knowledge and skills in analyzing international affairs. Designed for students entering many different professional fields, the program trains them in international and comparative studies in a multidisciplinary setting. Students are prepared to undertake sophisticated analyses of international affairs and typically will hold positions after graduation with the international divisions of federal and state governments, international divisions of banks, trading companies, policy-study institutes, corporations with international operations, and international development and educational organizations. More than half of all students are enrolled in a concurrent graduate professional-degree program. This adds approximately one year to the student's course of study.

*Admission Requirements:* See above under Graduate Program. Those applying concurrently to a professional program (Business Administration, Public Affairs, Marine Affairs, Forest Resources, Law, or Public Health and Community Medicine) must first be accepted by the professional school. For non-concurrent applicants, preference is given to those who have a professional interest, or previous professional experience or education. Prior study of a foreign language and preparation in intermediate-level microeconomics and macroeconomics are highly recommended.

*Graduation Requirements:* Japanese or Chinese language through the third year or any other modern foreign language through the second year; SIS

500, SIS 501, SIS 502, SIS 511, SIS 512, and SIS 522 (3 credits each); courses in two of the following three fields: a regional studies field, a professional field, or a special topics field (minimum three classes -- 9 credits -- for each field); two seminar papers; and an oral examination. Students in concurrent graduate-degree programs also must meet Graduate School requirements for the second degree.

## Japan Studies

Robert Pekkanen, Chair

The graduate program in Japan Studies gives students in-depth knowledge of many facets of Japan, including its history, political economy, society, and language. Course work helps prepare students for careers in business, government, journalism, secondary-school teaching, and a wide variety of other professional fields. The program is specifically designed (1) for students with bachelor's degrees in a discipline who need language and interdisciplinary training on Japan to pursue their career goals, and (2) as preparation for doctoral work in an academic discipline involving Japan for students who have had little or no training on Japan or in the language. A concurrent degree program with the Business School (MAIS/MBA) is offered and other combinations (e.g., with Public Affairs and Law) can be arranged.

*Admission Requirements:* See above under Graduate Program. At least one year of prior training in Japanese language is strongly recommended.

*Graduation Requirements:* Japanese language training through the third year (15 credits minimum training at the UW); SISEA 555 (5 credits); 31 credits in discipline study of Japan to include at least one history course and one social science course; two research papers or an essay of distinction; and an oral examination.

## Korea Studies

Clark W. Sorensen, Chair

The graduate program in Korea Studies offers courses in Korean language, history, and society. Regular offerings are supplemented by visiting faculty from political science, economics and economic development, folklore, and literature. The program emphasizes the study of Korea in the context of East Asian civilization and the modern world economy, not simply as a single country in isolation from its neighbors. The objective of the program is to provide students with a broad background which will be of use for further graduate study, or in a variety of professions such as teaching, business, and government.

*Admission Requirements:* See above under Graduate Program. Previous language training is recommended.

*Graduation Requirements:* Korean language through the third year of instruction; HSTAS 481-HSTAS 482, SISEA 584 (5 credits each), and SISEA 585 (6 credits); 15 credits in discipline study of East Asia or international studies; two seminar papers or an essay of distinction; comprehensive oral examination.

## Middle Eastern Studies

Philip D. Schuyler, Chair

The Middle East program is designed for students who wish to study the region within an interdisciplinary framework, focusing especially on the social, political, economic, and legal systems of the Middle East and/or Islamic Central Asia. To provide a thorough grounding in this region, students take courses in the social sciences, humanities, and a Middle Eastern or Central Asian language.

*Admission Requirements:* See above under Graduate Program. Although knowledge of a Middle Eastern or Central Asian language is not a prerequisite for admission, it is advisable applicants to have had at least the equivalent of one year's study of the language in which they plan to concentrate. Students accepted with no language training may wish to begin their language study in an intensive summer program.

*Graduation Requirements:* Three 3-credit or two 5-credit Middle Eastern language courses beyond the second-year (native speakers as well as non-native speakers); 20 credits on the modern Middle East from at least two social science or humanities disciplines; one approved Jackson School course; two courses in one social science discipline or in one professional school other than courses taken for preceding requirements; either a thesis and an oral examination, or two seminar papers and a four-hour written examination.

## Russian, East European, and Central Asian Studies

Stephen E. Hanson, Chair

Designed primarily for students with bachelor's degrees in a discipline, the program offers a background for professional pursuits in government and nongovernmental organizations, journalism, business, or teaching, or for advanced graduate study leading to the Ph.D. degree in a discipline. The program includes language training, a concentration of study in a chosen discipline, and a combination of courses in other disciplines that deal with aspects of the area. Students usually focus on one region (Russia, East Europe, the Baltics, or Central Asia), although the program provides flexibility to take courses on another region.

*Admission Requirements:* See above under Graduate Program. A prerequisite for all applicants is two years of college-level language courses or the equivalent. For those focusing on Russia the language must be Russian; for other regions of the former Soviet Union and East Europe, two years of a language of the region, or another relevant language.

*Graduation Requirements:* Including the two years required for entry, four years of a language of the region being studied or two years each of two relevant languages (four years of Russian required for Russian focus); SISRE 501 (5 credits); SISRE 502 and SISRE 503 (2 credits each); 30 credits in disciplines other than language, with 15-20 credits in a discipline of concentration; 5 credits in a minor field and 10-15 credits in other REECAS-related courses; a thesis (9 credits of SISRE 700); and an oral interdisciplinary examination.

*Research Facilities:* The University of Washington is a major center for research on Eastern Europe, Russia, and the independent states of the former Soviet Union, notably the Baltics and the countries of Central Asia. In addition to extensive holdings in Russian, East European, and Baltic language materials, the library has one of the best Central Asian language collections in the country and the largest collection of Latvian books outside Latvia. The strengths of the program are complemented by strong programs in East Asian and Middle Eastern Studies.

## South Asian Studies

Priti Ramamurthy, Chair

The South Asian Studies program is designed for students whose career objectives involve teaching and research in a traditional discipline with geographical interests within South Asia (i.e., India, Pakistan, Bangladesh, Sri Lanka, Tibet, and Nepal); those planning to enter professional-training programs (e.g., education, business administration, journalism, law, or public affairs); or students planning a career in government service (e.g., the foreign service) who wish to acquire a special understanding of the South Asia area.

*Admission Requirements:* See above under Graduate Program.

*Graduation Requirements:* Completion of the third year of a South Asian language to include at least 7 credits at the 400 level or above; SISSA 510 and SISSA 511 (5 credits each); 21 credits in coursework from at least two different departments, focused primarily on South Asia or in courses taught by South Asia faculty on topics relevant to the student's specializations (students may take a maximum of 10 credits not focused on South Asia, nor taught by South Asia faculty, to help fulfill disciplinary or professional objectives); two seminar papers or a thesis; and a comprehensive oral examination.

*Research Facilities:* The University of Washington library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

---

## Labor Studies

Adviser  
101 Smith, Box 353560  
206-543-7946  
pcls@u.washington.edu

## Minor

The Labor Studies minor brings together a series of courses on labor in core social-science departments. It provides students with an interdisciplinary program of study focusing on the importance of labor to the economic, social, political, and cultural evolution of modern societies.

*Minor Requirements:* 30 credits, including HIST 249/POL S 249/SOC 266 (5 credits). Additional 25 credits (no more than 10 from any one department) from the following: HIST 449, HSTAA 450, HSTAA 480, POL S 405, POL S 447, SOC 447, SOC 466, AES 361, CHSTU 354, ECON 443, ECON 444, HRMOB 420. A minimum grade of 2.0 is required for each course applied toward the minor.

---

## Law, Societies, and Justice

42 Gowen  
depts.washington.edu/class/lj

The program in Law, Societies, and Justice provides an interdisciplinary liberal arts education focusing on the unique forms of social control, institutionalized disputing, and justice that we identify with law or legality. Courses inquire into the historically embedded principles and institutional practices associated with diverse legal domains -- constitutional, criminal, administrative, and civil law as well as fundamental human rights -- in the United States and throughout much of the world. The program encourages complex assessments of the workings and implications of law in society according to standards that are both internal and external to the rule of law itself.

## Undergraduate Program

Adviser  
42 Gowen, Box 353530  
206-543-2396  
lsjadv@u.washington.edu

Law, Societies, and Justice offers the following programs of study:

- \* The Bachelor of Arts degree with a major in law, societies, and justice.
- \* A minor in law, societies, and justice
- \* A minor in human rights involving courses at the three UW campuses
- \* A minor in disability studies

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Courses that emphasize development of reading, writing, and especially analytical skills. Also, classes that provide background knowledge of modern world history, politics, institutions, and political theory.

## Department Admission Requirements

1. Admission is competitive, based on the following: GPA, with emphasis on grades received in courses required for admission (applicants accepted normally present cumulative GPAs considerably above 2.50); personal statement representing the student's interest in and commitment to becoming a Law, Societies, and Justice major; other evidence of a commitment to the study of society, justice, and law.
2. Completion of one of the following courses: LSJ 320/POL S 368 or LSJ 321/ANTH 323; LSJ 363/POL S 363 or LSJ 362/SIS 362; LSJ 367/POL S 367; LSJ 375 or SOC 372.
3. Completion of one research methods or statistics class. See the program's Web site or advising office for a list of approved courses.
4. Completion of one English composition course. (Further evidence of writing skills in the social sciences is encouraged.)
5. A minimum cumulative GPA of 2.00 at the University of Washington.
6. Students may apply in autumn, winter, or spring quarters. Applications for admission are due no later than the second Friday of each quarter. Students are notified of admission decisions by the sixth week of the quarter in which they apply.

## Major Requirements

Minimum 58 credits as follows:

1. Completion of the four LSJ core courses: LSJ 320/POL S 368 or LSJ 321/ANTH 323; LSJ/POL S 363 or LSJ 362/SIS 362; LSJ 367/POL S 367; LSJ 375 or SOC 372 (20 credits)
2. One research methods or statistics course from approved list (4-5 credits)
3. Three courses from one of the three designated subfields of study (crime, social control, and justice; comparative legal institutions and politics; rights, resistance, and reconstructions in law) and two courses from one of the other two subfields. See the program's Web site or adviser for list of approved courses. (23 to 25 credits)
4. One LSJ senior seminar; and one field experience/internship, LSJ 401. Senior seminar cannot also count as an LSJ subfield course. (10 credits)
5. Students may use only one 3- or 4-credit course toward completion of the major.

## Minors

*Minor Requirements (Law, Societies, and Justice):* 30 credits as follows:

1. Two courses from LSJ 320/POL S 368 or LSJ 321/ANTH 323; LSJ 363/POL S 363 or LSJ 362; LSJ 367/POL S 367; LSJ 375 or SOC 372 (10 credits).
2. Two courses from a single Law, Societies, and Justice major subfield. The major subfield areas are crime, social control, and justice; comparative legal institutions and politics; and rights, resistance, and reconstruction in law. Classes fulfilling the subfield requirement are outlined on departmental Web pages and handouts (6-10 credits).
3. One course from a second major subfield or from the Law, Societies, and Justice research methods list. The research methods list is outlined in departmental Web pages and handouts (3-5 credits).
4. Elective courses from the list of LSJ core courses or LSJ major subfields. Only one course from the research methods list can be used to reach the total of 30 credits.

*Minor Requirements (Disability Studies):* 30 credits

1. *Core courses:* LSJ 332/CHID 322; LSJ 433/CHID 433; LSJ 434/CHID 434 (15 credits).
2. *Internship or independent study:* (5 credits) LSJ 332/CHID 332 must be completed before this requirement is undertaken.
3. *Disability studies electives:* See LSJ adviser or Disability Studies program Web page for list of allowable classes (10 credits).

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The Law, Societies, and Justice curriculum emphasizes the development of a range of analytic and communicative skills. Courses challenge students to develop the capacities to: read and interpret texts, including theoretical, empirical and legal documents; comprehend and contrast arguments; develop and defend arguments; contrast theoretical arguments with empirical realities; assess contemporary practices of justice delivery against contemporary conceptions of justice. Students are required to express these skills in both verbal and written forms, through active class discussions and well-constructed writing assignments. The development of these skills assists students in a range of possible future endeavors, including a wide array of careers in law and justice.
- \* *Instructional and Research Facilities:* Students have access to the Political Science computer lab and writing center for most classes. Research opportunities are available on an individual and group basis with many professors.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* LSJ was the first program in the social sciences to require an internship as part of its major. The internship aims: (1) to provide students with insights into the workings of law in practice; (2) to scrutinize and 'test' some of the theories and concepts found in the literature against 'real world' practice; (3) to advance career development and goals, and (4) to provide 100 hours of local community service. Students work with a variety of governmental and non-governmental agencies and organizations, including private law firms, federal law enforcement agencies, and social service organizations (see the Internship Listings for complete information). It is the student's responsibility to find an internship, although the LSJ adviser can help find a suitable one. Students are required to write two papers according to specific guidelines for internship course credit.

Many of the LSJ faculty regularly invite majors to assist them in the development and execution of research endeavors. These provide students an unparalleled opportunity to understand the challenges and mechanics of high-level research.

- \* *Department Scholarships*: None available, although the program does provide several awards with modest cash stipends to graduating seniors.
- \* *Student Organizations/Associations*: Law, Societies, and Justice is a founding member of the National Consortium of Law and Society Programs. The program is presently reassessing the status of student associations and organizations.

*Of Special Note*: The required senior seminar emphasizes close reading of texts, active class discussions, and well-reasoned analytic writing, providing an opportunity to establish a close connection to faculty and other students, and to hone analytic and communicative skills.

---

## Linguistics

A210 Padelford  
depts.washington.edu/lingweb

Linguistics is the scientific study of language, which is one of the most characteristic human attributes. In contrast to other language-related disciplines, linguistics is concerned with describing the rule-governed structures of languages, determining the extent to which these structures are universal or language-particular, posing constraints on possible linguistic structures, and explaining why there is only a fairly narrow range of possible human languages.

## Undergraduate Program

Adviser  
A215 Padelford, Box 354340  
206-685-4846  
lingadv@u.washington.edu

The Department of Linguistics offers the following programs of study:

- \* The Bachelor of Arts degree with options in general linguistics and Romance linguistics
- \* A minor in linguistics

## Bachelor of Arts

### General Linguistics

*Suggested First- and Second-Year College Courses*: LING 400 or other introductory course in linguistics. One year of a foreign language that belongs to a different family from the student's native language.

### Department Admission Requirements

1. Completion of at least the third quarter, or equivalent, of a foreign language.
2. Completion of at least one writing (W) course and two quantitative and symbolic reasoning (Q/SR) courses, with a minimum grade of 2.0 in each course and a cumulative GPA of 2.50 in the three courses.
3. The department accepts students who meet the minimum requirements stated above, but recognizes that a GPA of 2.50 or higher is indicative of the motivation and academic skills needed for a reasonable probability of success in the program.

### Major Requirements

1. LING 400 or other introductory course in linguistics
2. LING 450, LING 451, LING 461, LING 462
3. At least one of LING 432, LING 442, or LING 481
4. At least one year of each of two languages, one of which must belong to a different language family than the student's native language
5. 20 additional credits of departmentally approved courses in linguistics.

### Romance Linguistics

*Suggested First- and Second-Year Courses*: Two college years of study in a Romance language; LING 400 or other introductory course in linguistics.

### Department Admission Requirements

1. Completion of at least one year of college work in a single Romance language.
2. Completion of at least one writing (W) course and two quantitative and symbolic reasoning (QSR) courses, with a minimum grade of 2.0 in each course and a cumulative GPA of 2.50 in the three courses.
3. The department accepts students who meet the minimum requirements stated above, but recognizes that a GPA of 2.50 or higher is indicative of the motivation and academic skills needed for the reasonable probability of success in the program.

### Major Requirements

1. LING 400 or another introductory course in linguistics
2. LING 450, LING 451, LING 461, and LING 462
3. ROLING 402
4. 15 credits at the 300 level or higher of one Romance language; ROLING 490; 20 additional credits of departmentally approved courses in linguistics.

### Minor

*Minor Requirements*: 32 credits to include LING 400 or another introductory course in linguistics; three courses from LING 432, LING 442, LING 450, LING 451, LING 461, LING 462, or LING 481; 12 additional credits from a list of departmentally approved courses in linguistics, 6 of which must be upper-division courses.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: The study of linguistics emphasizes formal reasoning and critical thinking skills. Linguists' skill sets include the ability to analyze sound, word, and sentence structures of individual languages; the ability to understand and account for how languages change in certain patterns; the ability to understand how social factors can affect language, how people learn their first or second languages; and the ability to find out and appreciate how apparently vastly different languages can be governed by the same set of rules. Linguistics is a valuable component of liberal education and vocationally can have applications wherever language itself becomes a matter of practical concern. Graduates have a good foundation for pursuing further training and careers in teaching languages, in areas of rehabilitative medicine such as audiology or speech therapy, in special education, in work with native peoples or with immigrant groups, in lexicographic work, in interpretation and translation, in work in computer science and artificial intelligence, or in academic disciplines such as psychology, philosophy, literature and language studies, where the contribution of linguistics is recognized. An undergraduate degree in linguistics from the UW also serves as preparation for graduate work in linguistics or language-related fields such as speech and hearing science or language teaching.
- \* *Instructional and Research Facilities*: The Language Learning Center located in Denny Hall provides audio and video services facilitating language learning. It also has a computer lab providing instructional software for linguistics and varieties of languages. Departmental facilities include a phonetics lab for students conducting phonetic experiments and doing digital acoustic analyses, a linguistics library that supplements the linguistics collection of the UW libraries and provides a quiet study place, and a computer lab for research in computational linguistics.
- \* *Honors Options Available*: With College Honors. With Distinction. See adviser for details.
- \* *Research, Internships, and Service Learning*: None offered
- \* *Department Scholarships*: None offered
- \* *Student Organizations/Associations*: The Linguistics Undergraduate Association (LingUA)

## Graduate Program

Graduate Program Coordinator  
A210B Padelford, Box 354340  
206-543-2046  
phoneme@u.washington.edu

The Department of Linguistics offers a program of study for graduate students leading to the degrees of Master of Arts and Doctor of Philosophy. The program is administered by the departmental faculty. The major interest of the core faculty lies in syntax, semantics, phonetics,

phonology, sociolinguistics, computational linguistics, and in theoretical aspects of second-language acquisition. Students may specialize in general or in romance linguistics.

Some course work is also available in various cooperating departments. Among those fields represented outside the department are psycholinguistics, philosophy of language, speech synthesis, and the structure and history of a number of individual languages and language families.

**Admission Requirements:** At least one previous course in linguistics is highly recommended, as is proficiency in one language other than the student's native language. For a specialization in Romance, substantial upper-division coursework in a Romance language or equivalent is required. Two to three letters of recommendation (M.A.) or three letters of recommendation (Ph.D.) and Graduate Record Examination scores are required for all applicants. Doctoral degree applicants should send the department a copy of their master's thesis or a paper of high quality, or both.

## Master of Arts

- General Linguistics Option**
  - Two courses each in syntax and phonetics/phonology.
  - One course in semantics and one course in sociolinguistics.
  - Three additional courses at the 500 level. At least two of these must be 500-level courses for which papers or projects are required.
- Romance Linguistics Option**
  - Three courses in syntax and phonetics/phonology.
  - ROLING 402, ROLING 551, LATIN 300
  - Six additional linguistics-related courses at the 400 or 500 level. One of these must be a 400-level FRLING or SPLING class and at least two of these must be 500-level classes for which papers or projects are required.
- No course fulfilling any of the above requirements can be taken for the 2-credit (no paper) option.
- Demonstrated ability to read the linguistic literature in a language other than English. (For the Romance option, the demonstrated ability must be in a Romance language.) This can be satisfied at any time during the program by arrangement with the Graduate Program Coordinator.
- An M.A. exam in any areas in which the grade point average for the required course work in that area is below 3.30.
- Choice of a faculty mentor by the second quarter; formation of a supervisory committee by the fifth quarter.
- A short M.A. thesis (30 to 50 pages), which will typically be an expansion of a term paper. Students must register for 9 credits of LING 700.
- All requirements must be completed within the equivalent of six full-time quarters.

## Doctor of Philosophy

Direct admission to the Ph.D. program will be considered on an individual basis for applicants holding a degree from a comparable M.A. thesis program in linguistics or a closely related field. Some such applicants may be granted admission directly into the Ph.D. program, with the stipulation that they make up one or more M.A.-level deficiencies.

Requirements for the Ph.D. degree are the following (which include requirements for an M.A. degree):

- 30 additional credits of course work. A minimum of five 500-level courses with a paper requirement must be completed before the General Exam, 9 credits of which must follow the M.A. A minimum cumulative GPA of 3.00 is required for graduate course work. A minimum of 90 credits of coursework is required for the Ph.D.
- During the course of the entire M.A.-Ph.D. program, the student must have completed at least three courses each in syntax and phonetics/phonology and at least two courses in semantics, and have taken a total of five 500-level classes for which papers or projects are required. There is also a major and minor requirement as follows: Major -- six courses in the student's primary area of specialization; Minor -- four courses in a second area (the major and minor together should form a coherent research area). The student's supervisory committee will be the final judge of what courses might qualify to meet these requirements. However, it is worth noting that (a) courses fulfilling these requirements do not necessarily have to be offered from within the Department of Linguistics; (b) non-language instruction courses in a language area can fulfill the major or minor requirement; and (c) no course fulfilling any of the above requirements can be taken for the 2-credit (no paper) option.

3. 27 credits of LING 800.

### 4. Language Requirement

- General Linguistics option:** A breadth language requirement as follows: (a) for native speakers of an Indo-European language, a year of a non-Indo-European language; (b) for native speakers of a non-Indo-European language, a year of a language that is not English or in the same sub-family as their language. The student has the right to petition the supervisory committee to allow a language excluded in (a) or (b) above.
  - Romance Linguistics option:** The completion of LATIN 301, as well as the demonstrated ability to read the linguistic literature in a Romance language.
- Two linguistic papers delivered at a colloquium or conference. Each will be evaluated by a member of the student's Ph.D. committee with expertise in the area of the paper. The evaluation may be either of the oral presentation or of the paper in written form. The student should request evaluation by a faculty member for any paper to be considered for this requirement.
  - By the end of the first quarter after admission to the Ph.D. program, the student will constitute a Ph.D. committee, in accord with Graduate School requirements. As part of this process, the student will work out with the committee members (by email or in person) a strategy for degree completion. The student's Ph.D. committee will administer a General Examination, which involves 2 parts:
    - Two general papers in different areas. At least one of the papers must be in grammatical theory.
    - An oral examination, in which the candidate is questioned on the two papers. The oral examination may not be scheduled until the committee has read the two papers and approved them as passing. The oral examination must be completed within the equivalent of 12 full-time quarters (excluding summer) after entrance into the M.A. program.
  - Within six months of the oral examination, the student will present a formal dissertation proposal to the subset of Ph.D. committee members who constitute the Reading Committee along with a proposed calendar for completion of the dissertation.
  - A Final Exam on the dissertation attended by the candidate's Supervisory Committee and open to others interested.

---

## Mathematics

C138 Padelford  
www.math.washington.edu

Mathematics is both a science and an art. Like any great art, mathematics has an intrinsic beauty and coherence that has attracted practitioners for centuries. Yet, unlike other arts, mathematics is a surprisingly effective tool for describing the natural world. Indeed, mathematics has come to serve as the foundation of modern science, through its language and results. Some mathematical results were initially developed in order to solve internally generated mathematical problems and only later found application in other disciplines; other mathematical results were inspired by the needs of these other disciplines. The two facets of mathematics -- tool of science and subject of inquiry for its own sake -- have come to be interwoven into a complex fabric.

## Undergraduate Program

Adviser  
C36 Padelford, Box 354350  
206-543-6830  
advising@math.washington.edu

The Department of Mathematics offers the following programs of study:

- \* The Bachelor of Arts degree with a major in mathematics - standard program
- \* The Bachelor of Arts degree with a major in mathematics - philosophy option
- \* The Bachelor of Arts degree with a major in mathematics with an option designed specifically for students who plan to pursue secondary teaching careers.
- \* The Bachelor of Science degree with a major in mathematics - standard program
- \* The Bachelor of Science degree with a major in mathematics - comprehensive option
- \* The Bachelor of Science degree with a major in applied and computational mathematical sciences (ACMS). The Department of Mathematics

cooperates with the departments of Applied Mathematics, Computer Science and Engineering, and Statistics in offering this major. (See ACMS for requirements.)

\* A minor in mathematics

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136.

### Department Admission Requirements

*Admission Requirements for Standard Option and Philosophy Option:*

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), and at least one 200- or 300-level mathematics course required for the degree, preferably MATH 307.
2. A minimum grade of 2.0 in each course to be offered as part of the major; a minimum overall GPA of 2.00 for all mathematics courses.
3. Application to the program should be made at the end of the sophomore year. Transfer students must be enrolled at the UW before applying to the major.

*Admission Requirements for Teacher Preparation Option:*

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136) and at least one 200- or 300-level mathematics course required for the degree, preferably MATH 307.
2. A minimum grade of 2.5 in each course to be offered as part of the major; a minimum overall GPA of 2.50 for all mathematics courses.
3. Application to the program should be made at the end of the sophomore year. Transfer students must be enrolled at the UW before applying to the major.

### Major Requirements

*Standard Option (50 credits):*

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 307; MATH 308; MATH 324; and 26 additional credits at the 300 level and above.
2. A minimum grade of 2.0 must be obtained in all mathematics courses presented to satisfy the mathematics requirement and in required related courses. A GPA of 2.00 or higher must be obtained in all mathematics courses taken at the UW.
3. At least 18 credits of graded mathematics courses numbered 300 or higher must be taken in residence at the UW.

*Philosophy Option (58 credits):*

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 310, MATH 318, MATH 327, MATH 328; five additional mathematics courses at the 300 or 400 level, including at least one two-quarter sequence at the 400 level other than MATH 407, MATH 408, MATH 409, or MATH 421, MATH 422.
2. PHIL 120 or an upper-level course in logic; PHIL 100, PHIL 160, or PHIL 240; one philosophy course at the 300 level; one philosophy course at the 400 level.

*Teacher Preparation Option (58 credits):*

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 307; MATH 308, MATH 318, or MATH 205; MATH 394, MATH 411, MATH 412, MATH 444, MATH 445, MATH 487; either MATH 354 and MATH 355 or PHYS 407, PHYS 408, PHYS 409; either STAT 311, MATH/STAT 390, or Q SCI 381; 6 credits of electives at the 300-level in MATH, AMATH, or STAT.
2. A minimum grade of 2.5 in all courses presented to satisfy the program requirements, with the exception of PHYS 407, PHYS 408, and PHYS 409, which require a grade of 3.0. At least 18 credits of graded mathematics courses numbered 300 or higher taken in residence at the UW.

## Bachelor of Science

*Suggested First- and Second-Year College Courses:* MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136.

## Department Admission Requirements

A minimum grade of 2.0 in the following courses: MATH 124, MATH 125, MATH 126; any 300-level mathematics course. (See departmental adviser for information on Advanced Placement exemption.) A student can substitute the following courses, with a minimum grade of 2.0: MATH 134, MATH 135, MATH 136.

### Major Requirements

*Standard Option (66 credits):*

1. A minimum grade of 2.0 in all courses applied toward the major.
2. A minimum GPA of 2.00 in all mathematics courses taken at the University. At least 18 credits from courses at the 300-level or higher, taken in residence at the University.
3. *Elementary Mathematics Core (21 credits):* MATH 124, MATH 125, MATH 126 (5, 5, 5); MATH 310 (3); MATH 324 (3). (MATH 134, MATH 135, MATH 136 may be substituted for MATH 124, MATH 125, MATH 126, MATH 307, and MATH 318.)
4. *Intermediate Mathematics Core (12 credits):* MATH 308 (3) or MATH 318 (3); MATH 326, MATH 327, MATH 328 (3, 3, 3). (MATH 334, MATH 335, MATH 336 may be substituted for MATH 309, MATH 310, MATH 324, MATH 326, MATH 327, and MATH 328.)
5. *Advanced Mathematics Core (21 credits):* At least seven courses from the following, from at least three different areas, and including at least two two-quarter sequences:
  - \* *Algebra:* MATH 402, MATH 403, MATH 404 (3, 3, 3).
  - \* *Analysis:* MATH 424, MATH 425, MATH 426 (3, 3, 3).
  - \* *Geometry:* MATH 441, MATH 442, MATH 443 (3, 3, 3).
  - \* *Other Analysis:* MATH 307, MATH 309 (3, 3); MATH 427, MATH 428 (3, 3); MATH 435, MATH 436 (3, 3).
  - \* *Probability:* MATH 394, MATH 395, MATH 396 (3, 3, 3); MATH 491, MATH 492 (3, 3).
  - \* *Other Mathematics:* MATH 381 (3); MATH 407, MATH 408, MATH 409 (3, 3, 3); MATH 461, MATH 462 (3, 3); MATH 464, MATH 465, MATH 466 (3, 3, 3).
6. *Electives (12 credits):* Four additional mathematics courses, including a two-quarter sequence at the 300- or 400-level (teacher-preparation courses not allowed). With approval, two of the four courses may be chosen from appropriate courses offered by the departments of Applied Mathematics, Statistics, and Computer Science, or from certain other departments. Courses from the additional mathematics core sequences not used to fulfill core requirements can be used to fulfill the elective requirement.

*Comprehensive Option (69 credits):*

Emphasizes the fundamental subjects of algebra, analysis, and geometry and is designed to provide a deep understanding of these basic areas of modern mathematics. It lays a good foundation for more advanced study. For this option, the grade, elementary core, and elective requirements remain unchanged, with the same substitutions permitted from the accelerated/honors sequences. (Items 1, 2, 3, and 6 shown for the standard option, above.) MATH 318 is required in the intermediate core and the advanced mathematics core becomes the following:

5. *Advanced Mathematics Core, Comprehensive Option (24 credits):* At least eight courses from the following, including at least two in each of the first three areas. If only six courses are chosen from the first three areas, then the two courses chosen from the fourth area must form a two-quarter sequence:
  - \* *Algebra:* MATH 402, MATH 403, MATH 404 (3, 3, 3).
  - \* *Analysis:* MATH 424, MATH 425, MATH 426 (3, 3, 3).
  - \* *Geometry:* MATH 441, MATH 442, MATH 443 (3, 3, 3).
  - \* *Other Analysis:* MATH 307, MATH 309 (3, 3); MATH 427, MATH 428 (3, 3); MATH 435, MATH 436 (3, 3).

### Minor

*Minor Requirements (33 credits):*

1. *Core (21-25 credits):* MATH 124, MATH 125, MATH 126, MATH 307, and MATH 308 (21 credits), or MATH 134, MATH 135, MATH 136 (25 credits, including 10 advanced-placement credits)
2. *Electives (8-12 credits):* Mathematics courses numbered 300 or higher.
3. At least 9 credits of courses numbered 300 or higher taken in residence at the UW. Minimum grade of 2.0 required for each course offered as part of the minor.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The study of mathematics emphasizes exposure to the core foundational areas of analysis, modern algebra, and geometry. A mathematician's skill set includes the technical tools specific to each area as well as the development of critical thinking skills necessary for logical reasoning. Graduates have pursued careers in teaching, finance, science, engineering, and professional fields such as law and medicine.
- \* *Instructional and Research Facilities:* Mathematical Research Library and Math Sciences Computing Center
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* When available, internship opportunities are passed on to students.
- \* *Department Scholarships:* None offered.
- \* *Student Organizations/Associations:* MAA Student Chapter, Actuarial Club.

## Graduate Program

Graduate Program Coordinator  
C36 Padelford, Box 354350  
206-543-6830  
grads@math.washington.edu

The degrees of Master of Arts, Master of Science, and Doctor of Philosophy are offered. Opportunities are available within the department for study of abstract and applied mathematics for each of these degree programs. The Master of Arts degree is appropriate for students who need a broad background in advanced mathematics and who expect to continue working with mathematics of approximately the same level in their careers. The Master of Science degree is appropriate for students who expect to be working with more specialized mathematics of increasing order of complexity in their careers. The Doctor of Philosophy degree is the highest professional degree in mathematics. It is appropriate for students who plan on a career of research and/or teaching of mathematics at the highest levels.

Of the master's degrees, the M.S. non-thesis program has the most demanding course requirements and most closely matches the early stages of the Ph.D. program. Most students who enroll in the department begin their studies with the Ph.D. or M.S. non-thesis program in mind. The M.S. programs with options in numerical analysis or optimization provide more focused training in these directions, which can be useful for students seeking employment in certain industries; however, students intending to do research in these areas would normally follow the requirements of the Ph.D. program. Note that the department does not offer a master's degree in mathematics education.

### Master of Arts

*Admission Requirement:* Bachelor of Arts degree with major in mathematics or equivalent background (minimum of 45 quarter credits or 30 semester credits of mathematics beyond college algebra).

### Graduation Requirements

*Master of Arts, Non-Thesis:* A minimum of twelve approved one-quarter courses at the 400 or 500 level, including two courses in each of algebra, analysis, and one other field. The course total must include six courses chosen from the designated core graduate courses or, with prior approval of the graduate program coordinator, from other 500-level sequences. The six courses at the 500 level should be distributed over no more than three sequences.

Written examination in an area agreed upon by the student and the chair of the examining committee. Oral examination may be substituted with prior approval of the graduate program coordinator.

### Master of Science

*Admission Requirement:* Bachelor of Science degree with major in mathematics, Bachelor of Arts degree with strong major in mathematics or equivalent background. In particular, at least one senior-level course in abstract algebra or real analysis is expected.

## Graduation Requirements

*Master of Science, Thesis:* A total of twelve numerically graded one-quarter courses from MATH 402, MATH 403, MATH 404; MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 441, MATH 442, MATH 443; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586; plus 9 thesis credits (MATH 700). Other courses may be included in the total with prior approval of the graduate program coordinator. Courses to include at least two quarters from each of two designated core graduate courses and one other 500-level sequence. Transfer credits are not accepted at the 400 level; other transfer credits and substitutions are at the discretion of the graduate program coordinator.

The thesis, which is defended in an oral examination, should demonstrate the ability to do independent research.

*Master of Science, Non-Thesis:* A total of fifteen numerically graded one-quarter courses from MATH 402, MATH 403, MATH 404; MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 441, MATH 442, MATH 443; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586. Other courses may be included in the total with prior approval of the graduate program coordinator. Courses to include at least two quarters from each of three designated core graduate courses, and in addition one three-quarter sequence of 500-level mathematics courses in an area of specialization approved by the graduate program coordinator and the chair of the student's examining committee.

Oral examination in the area of specialization on a topic agreed upon by the student and the chair of the examining committee, or the General Examination for the Ph.D. degree.

*Master of Science, Numerical Analysis and Optimization Options, Non-thesis:* A total of fifteen one-quarter courses, at least six of which are at the 500 level, chosen from MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 438, MATH 439; MATH 441, MATH 442, MATH 443; MATH 461, MATH 462; MATH 491, MATH 492; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586. Other courses may be included in the total with prior approval of the graduate program coordinator. Courses to include four from AMATH 584-AMATH 586 and MATH 594-MATH 596.

Oral examination in a special topic agreed upon by the student and the chair of the student's examining committee.

## Doctor of Philosophy

*Admission Requirement:* Mathematical training equivalent to a bachelor's degree with strong major in mathematics, including rigorous coursework in real analysis and abstract algebra.

*Graduation Requirements:* 90 credits minimum, as follows:

- \* *Courses:* six three-quarter sequences numbered 500 or above or equivalent, including three sequences from the department's list of core graduate courses. The list of core courses includes MATH 504, MATH 505, MATH 506 (5,5,5); MATH 524, MATH 525, MATH 526 (5,5,5); MATH 534, MATH 535, MATH 536 (5,5,5); MATH 544, MATH 545, MATH 546 (5,5,5); MATH 554, MATH 555, MATH 556 (5,5,5). At least two sequences from this list must be satisfactorily completed during year one, and the third must be satisfactorily completed by the end of year two. A student may substitute a passing performance in a preliminary examination for satisfactory completion of the corresponding designated core course.
- \* *Preliminary Examinations:* Pass three preliminary examinations by September of the beginning of the third year.
- \* *Foreign Language/Computer Requirement:* Pass either two foreign language examinations or one foreign language examination and a computer programming examination. A Ph.D. student is expected to pass one language or computer examination by the end of summer quarter after the second year, and the second by the end of summer quarter after the third year.
- \* *General Examination:* An oral examination on a special area of intended research, given by a committee after the student has passed the preliminary examinations and the language examinations. This exam can be given only after two years of graduate study. Normally, it should be taken by the middle of the student's fourth year. Thesis: An original contribution to knowledge. 27 credits of MATH 800 required.
- \* *Final Examination:* An oral exam given by a committee headed by the thesis supervisor.

## Financial Support

Most graduate students in mathematics are supported by fellowships, research assistantships, and teaching assistantships. The workload of teaching assistants allows ample time for graduate courses and thesis work.

---

## Microbiology

K353A Health Sciences  
depts.washington.edu/micro

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

## Undergraduate Program

Adviser  
K353A Health Sciences, Box 357242  
206-543-2572  
advmicro@u.washington.edu

The Department of Microbiology offers the following programs of study:

- \* The Bachelor of Science degree with a major in microbiology
- \* A minor in microbiology

## Bachelor of Science

*Suggested First- and Second-Year Courses:* PHYS 114, PHYS 115, PHYS 116, or PHYS 121, PHYS 122, PHYS 123; one of the following: MATH 112, MATH 124, MATH 144, Q SCI 381, or STAT 311.

MICROM 410, the first microbiology course for majors, is taken after completion of BIOL 200 and organic chemistry (CHEM 223 or CHEM 237). To graduate in four years, a student must complete introductory biology and organic chemistry before autumn quarter of the junior year.

MICROM 101, MICROM 301, and MICROM 302, offered to non-majors, serve as introductory courses, but cannot be used to fulfill graduation requirements for a major in microbiology. MICROM 301 is a prerequisite for students applying to nursing, physical therapy, or dental school.

## Department Admission Requirements

1. A minimum of 75 credits applicable to graduation, with a minimum cumulative GPA of 2.25 in prerequisite chemistry and biology courses.
2. Completion of the following prerequisite courses: BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224, or CHEM 237, CHEM 238, CHEM 239.

## Major Requirements

Minimum 94 credits (including microbiology courses) in the biological, physical, and mathematical sciences, as follows:

1. BIOL 180, BIOL 200, BIOL 220, or equivalent (15 credits/one year)
2. *Inorganic:* CHEM 142, CHEM 152, CHEM 162 (16 credits) (or CHEM 145, CHEM 155); *Organic:* CHEM 223, CHEM 224 (8 credits) (or CHEM 237, CHEM 238, CHEM 239; or CHEM 335, CHEM 336, CHEM 337)
3. MICROM 402, MICROM 410, MICROM 411, MICROM 412, MICROM 431, MICROM 441, MICROM 442, MICROM 443, MICROM 496, and MICROM 445 or MICROM 450 (31 or 32 credits)
4. Approved microbiology electives (5 credits, not to include MICROM 101, MICROM 301, MICROM 302)
5. PHYS 114, PHYS 115 (8 credits) (or PHYS 121, PHYS 122) (PHYS 116 or PHYS 123 recommended)
6. Either MATH 112, MATH 124, MATH 127, MATH 144, Q SCI 381, or STAT 311 (5 credits)
7. BIOC 405, BIOC 406 (6 credits) (or BIOC 440, BIOC 441, BIOC 442)
8. For all required and elective microbiology courses used toward graduation, a minimum 2.25 cumulative GPA and a minimum grade of 1.8 in each course.
9. Transfer students must complete at least 20 of the required and elective microbiology credits at the UW.

## Minor

*Minor Requirements:* 30 credits as follows:

1. 15 credits in biology and chemistry (BIOL 200 or BIOL 161-BIOL 162 or equivalent; CHEM 237 or CHEM 220, CHEM 221, or equivalent)
2. 15 credits in 400-level, graded microbiology courses, including at least one lab course (MICROM 402 or MICROM 431 or MICROM 443; MICROM 302 also acceptable), and both MICROM 410 and MICROM 496.
3. Minimum cumulative 2.00 GPA for all courses counted toward the minor.

## Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes:* The department's objective is to provide a major with the best instruction possible in broad areas of microbiology so students qualify for a wide variety of positions with a terminal B.S. degree or qualify to pursue advanced degrees in graduate or professional schools.

Microbiology offers students an excellent education in the biology of microorganisms, namely bacteria, fungi, protozoa, and viruses. Through learning about the biology of these microorganisms and viruses, students more fully understand the pivotal position they occupy in establishing and maintaining our biosphere, their effects on human, animal, and plant life, and how the biological properties of certain microbes are exploited for certain purposes. Microorganisms are important in drinking water, wastewater and sewage treatment, production and spoilage of foods, production of antibiotics, bioremediation of toxic compounds, and genetic engineering of organisms having unique characteristics. Students gain insight into strategies used by microorganisms and viruses to cause disease and the mechanisms used by their host to defend themselves.

Graduates have found research positions in biotechnology and pharmaceutical companies, as well as in state and government positions hiring microbiologists. Students interested in a health profession or graduate program benefit from this program.

- \* *Instructional and Research Facilities:* Microbiology courses are taught using state-of-the-art facilities in the teaching wing of the Health Sciences building. Research labs are located in the Health Sciences, Fred Hutchinson Cancer Research Center, NW Regional Primate Research Center, and UW Rosen building.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* MICROM 499, undergraduate laboratory research, is offered for credit. See adviser for details.
- \* *Department Scholarships:* The department offers four awards each year. More information is available at the department's Web site.
- \* *Student Organizations/Associations:* The Microphiles Club is open to all students. The club sponsors field trips to local biotech companies, speakers on topic such as research and career opportunities, graduate school, and peer teaching.

## Graduate Program

See the School of Medicine section of the General Catalog.

---

## Music

102 Music  
www.music.washington.edu

The foremost goal of the School of Music is the discovery, preservation, and transmission of the practice and knowledge of music, as well as the role of music in culture and history. The school expands the frontiers of artistic enterprise and cultural knowledge through research, scholarship, and creative production, in its publications, performances, and teaching.

Through its instructional offerings, the School of Music provides opportunities for all students of the University of Washington to explore the role of music in the cultural nature of the world, past, present, and future. The school teaches students to think creatively and critically. The

faculty provides professional training to musical performers as well as to academic scholars. The ultimate goal of the school is to instill the standards and ideals of excellence in both the artistic and scholarly endeavor of its students.

The School of Music is committed to furthering and transmitting technological advances through its research and instruction.

Because of its prominence in public performance, the School of Music has a unique external visibility, playing a vital role in the cultural life of the University, region, and beyond through the performance, creation, and study of music and culture. To that end, the school maintains strong links with professional arts organizations regionally as well as nationally.

## Undergraduate Program

Adviser  
116 Music, Box 353450  
206-543-1239  
musicadv@u.washington.edu

The School of Music offers the following programs of study:

- \* The Bachelor of Arts degree with a major in music (music theory-history track; vocal track; instrumental track)
- \* The Bachelor of Music degree with a major in composition, piano, string instruments, voice, organ, orchestral instruments, guitar, jazz studies, music education, and music history
- \* The Bachelor of Arts degree with a major in individualized studies (ethnomusicology) (See individualized studies adviser in 171 Mary Gates Hall for requirements.)
- \* A minor in music

## Information Applicable to All Music Majors

### Department Admission Requirements

All students must participate in an entrance audition and qualify at the MUSAP 320 level or better in their principal performance areas to be admitted as music majors and to receive private instruction. Entrance auditions are held in late September, late January, and as needed throughout the year. (See department Web site for more information.) Major status in performance areas is accorded when, after admission to the College of Arts and Sciences is acknowledged and the required School of Music audition is successfully completed, the student commences applied-music study in a performance medium (e.g., voice) with an approved faculty member of the School of Music. In music history, music education, and composition, additional entrance requirements apply.

All music programs require instruction on an instrument. Auditions into freshman-level applied-music instruction (private lessons) are based on the assumption that a student's background includes four to eight years of private study on an instrument. Completion of a further two years of college-level private instruction does not automatically guarantee entry at the junior level of private instruction; placement is determined by an audition.

Most degree programs in the School of Music require one to two years of basic piano, to be completed during the course of study at the University.

### Pre-Core Preparation

In preparation for beginning the music core coursework, all students must be evaluated by placement test to determine their levels in music theory and music history. Students who have minimal background in these areas may be required to take MUSIC 113/MUSIC 119 and MUSIC 120 before beginning the music core.

Transfer students who have had at least two quarters of music theory or music history are evaluated by a faculty member the quarter they are admitted to their program.

### Music Core Requirements

The music core (36 credits), required in each of the undergraduate program tracks, is as follows: MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206; MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course.

## Grade Requirements

Undergraduate music majors are required to earn a minimum grade of 2.0 in each course (core and elective) counted toward music major requirements. An overall minimum GPA of 2.50 in music course work is required for graduation.

## Bachelor of Arts

### General Requirements

A minimum of 180 credits, of which 90 must be taken in departments other than the School of Music. Piano proficiency at MUSAP 135 level. All College of Arts and Sciences graduation requirements must be met. Cumulative GPA of 2.50 for all music courses and a minimum grade of 2.0 for each music course counted toward the major. .

### Major Requirements

*Music Theory-History Track (63 credits):* Music core, plus 12 credits of approved upper-level MUSIC or MUHST electives, 10 credits of MUSAP vocal or instrumental private applied instruction, 5 credits of MUSEN (ensembles).

*Instrumental Track (69 credits):* Music core, plus 6 credits of approved upper-level MUSIC or MUHST electives, 18 credits of MUSAP instrumental private applied instruction, and 9 credits in ensembles.

*Vocal Track (75 credits):* Music core, plus 6 credits of approved upper-level MUSIC or MUHST electives, 18 credits of MUSAP vocal private applied instruction, 6 credits of vocal diction, and 9 credits in ensembles. Proficiency through the third quarter college level in two languages from French, German, and Italian.

## Bachelor of Music

*Admission Requirements:* All students must participate in an entrance audition as described above. Students admitted into the BA program have the option to jury into the BM program at the end of the freshman and sophomore years. The Composition and Music Education programs have additional application requirements as described below.

### General Requirements

A minimum of 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Knowledge, to include at least 20 credits each in two of the following three areas: Visual, Literary, & Performing Arts; Individuals & Societies; and the Natural World. Piano proficiency at MUSAP 235 level, a minimum grade of 2.0 in each music course counted toward the major, and a GPA of 2.50 in music courses is required for graduation.

### Major Requirements (and Additional Admission Requirements, as noted)

*Composition (114-120 credits)*

*Additional Admission Requirements:* MUSIC 302 and MUSIC 305; MUHST 212; and MUSIC 216, MUSIC 217, MUSIC 218. Prospective students must also submit a portfolio of recent compositions. See the adviser for more information on the application process.

*Major Requirements:* Music core (36 credits) plus MUSIC 216, MUSIC 217, MUSIC 218; PHYS 207; 18 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 380, MUSIC 381, MUSIC 382; MUSIC 400 or MUSIC 401; MUSIC 471 or MUSIC 472; MUSIC 490; 18 credits of private instruction in composition (MUSIC 391/MUSIC 491); 12-18 credits of MUSAP applied instruction; 6 credits of MUSEN ensembles; and one 400-level course in ethnomusicology. See the Music undergraduate adviser for more specific information.

*Guitar (120 credits)*

Music core (36 credits) plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487 or MUSIC 438; 36 credits of MUSAP applied instruction; 7 credits of electives; 2 credits of recitals; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434, MUSIC 435, MUSIC

436; MUSIC 380, MUSIC 381, MUSIC 382; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information.

#### *Jazz Studies (120 credits)*

Music core (36 credits) plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 319 or MUSIC 331; MUHST 425; MUSIC 336 and MUSIC 436; MUSIC 467, MUSIC 468, MUSIC 469; MUSIC 379, MUSIC 479; 6 credits of MUSIC 464; 10 credits of music electives; 30 credits of MUSAP applied instruction; 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information.

#### *Music Education (115-119 credits)*

**Additional Admission Requirements:** Students must complete a separate Music Education audition and interview. See the adviser for more information on the application process.

**Major Requirements:** Music core (36 credits) plus MUSIC 300, MUSIC 350, MUSIC 351, MUSIC 352 (or MUSIC 380, MUSIC 381, MUSIC 382); MUSED 301; MUSED 304, MUSED 305, MUSED 306; MUSED 340; MUSED 403; MUSED 405 (or MUSEN 303); MUSED 440; MUSED 442 (or MUSED 443); MUSED 452; MUSED 465; 18 credits of MUSAP applied instruction; 6-7 credits of MUSEN ensembles; 12-14 credits of techniques courses; 3 credits of approved jazz coursework; EDC&I 494; and 3 credits of education electives. See the Music undergraduate adviser for more specific information.

#### *Orchestral Instruments (116 credits)*

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSAP applied instruction; 18 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information.

#### *Organ (120 credits)*

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487; 36 credits of MUSAP applied instruction; MUSIC 454; MUSIC 473 and MUSIC 474; MUSIC 458 and MUSIC 459; MUSIC 350, MUSIC 351, MUSIC 352; 1 credit of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information.

#### *Piano (120 credits)*

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487; 36 credits of MUSAP applied instruction; MUSIC 434, 435, 436; MUSIC 326, MUSIC 327, MUSIC 328; 7 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information.

#### *Strings (117 credits)*

Music core (36 credits) plus 15 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSAP applied instruction; 6 credits of MUSIC 429; MUSIC 434, MUSIC 435, MUSIC 436; MUSIC 380; 3 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information.

#### *Voice (119 credits)*

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 307, MUSIC 308, MUSIC 309; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434; MUSIC 460, MUSIC 461, and MUSIC 462; MUSIC 379 and MUSIC 479; 36 credits of MUSAP applied instruction; 10 credits of MUSEN ensembles; and 3 credits of music electives. Proficiency through the third quarter college level in two languages from French, German, and Italian. See the Music undergraduate adviser for more specific information on these requirements.

### **Academic Options**

#### *Music History*

**Admission Requirements:** In addition to the admission requirements for all music majors, shown above, formal application to the Music History

division, to include verified completion of music core, 3.00 GPA in music core courses, 3.00 overall GPA, and a writing sample. Completion of minimum entrance requirements does not guarantee admission. The program of study and preparation of the senior thesis is developed in consultation with a Music History faculty adviser. Students who intend to pursue graduate studies are strongly advised to establish proficiency in German or French and to acquire some acquaintance with one or two additional foreign languages.

**Major Requirements:** 135 credits as follows: Music core (36 credits) plus 6 credits of 300-level MUHST electives; 36 credits of 400-level MUSIC or MUHST (minimum 12 courses); a 3-credit 400-level course in ethnomusicology; 3 credits of MUSIC 498; 18 credits of MUSAP applied instruction (3 years); 9 credits of MUSEN ensembles; and 24 credits of music electives.

### **Minor**

**Minor Requirements:** A minimum of 25 credits of music courses (MUSIC, MUHST, MUSEN, MUSAP, or MUSED prefixes). Maximum 10 credits at the 100 level, minimum 15 credits at the 200 level or above including:

1. At least 4 credits from courses dealing with the elements of music (chosen from MUSIC 116, MUSIC 117, MUSIC 118, MUSIC 113/MUSIC 119, or MUSIC 120).
2. 5 credits from courses for nonmajors that focus on a particular music area (MUSIC 121, MUSIC 122, MUSIC 160, MUSIC 162, MUSIC 316, MUSIC 317, MUSIC 318, MUSIC 319, MUSIC 331).
3. Maximum 10 transfer credits (including maximum 5 transfer credits in performance lessons and ensembles) may count toward the minor.

### **Student Outcomes and Opportunities**

- \* **Instructional and Research Facilities:** None.
- \* **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* **Research, Internships, and Service Learning:** None.
- \* **Department Scholarships:** None.
- \* **Student Organizations/Associations:**
  - o **Music Student Association (MSA):** A group of undergraduate and graduate students from various divisions of the School of Music, working to foster a stronger sense of professional community, serve the larger cultural community, and build practical tools for encouraging and promoting student musicians' endeavors. For more information, contact sonare@u.washington.edu.
  - o **Ethnomusicology Student Association:** A student association which deals with the concerns of the ethnomusicology division, as well as meeting socially. For further information, contact the division at 206-543-0949 or 64 Music Building.
  - o **Music Educators National Conference (MENC):** A local chapter of this national scholarly organization of music educators is directly involved in annual state and regional meetings and events. Contact Professor Patricia Campbell (pcamp@u.washington.edu) for further details.

#### *Of Special Note:*

#### *Continuation of Major Status*

Performance studies should begin after audition and acceptance, and continue each subsequent quarter of registration until the minimum program requirements for applied-music lessons have been met. Applied-music study should continue as long as the student is registered and in residence until the final approved recital is given. In order to retain major standing, the student must make and demonstrate consistent and acceptable progress at the annual required jury. Concurrent enrollment or participation in at least one School of Music ensemble is required during each quarter in which a student receives "MUSAP" applied-music instruction, at the 300 level and above, except for MUSAP 389/589. Also, basic piano proficiency is required for all majors. Non-keyboard majors must enroll in the MUSAP 133/235 series until appropriate proficiency is attained. Any departure from the above requirements must have the recommendation of the appropriate divisional chair and the written consent of the Director of the School of Music.

### **Graduate Program**

Graduate Program Coordinator  
116 Music, Box 353450  
206-543-2726  
musicadv@u.washington.edu

Graduate programs in the School of Music take into consideration the dual nature of music's subject matter. First, it is one of the creative arts, requiring constant renewal through the efforts of composers, performers, and teachers. Second, it is a branch of the humanities, subject to scholarly study and interpretation of its theoretical concepts and historical development. Each degree focuses on one of these areas.

#### **Master of Music or Doctor of Musical Arts**

- \* Choral conducting
- \* Composition
- \* Instrumental conducting
- \* Opera production
- \* Performance piano, organ, harpsichord, voice, strings, brass, woodwinds, percussion, harp

#### **Master of Arts or Doctor of Philosophy**

- \* Ethnomusicology
- \* Music education
- \* Music history
- \* Music theory

### **Master of Arts**

#### **Admission Requirements**

1. A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a bachelor's degree in music or the equivalent experience and training in the field.
2. Minimum GPA of 3.00 or B average in the most recent two years of study.
3. Scores from the Graduate Record Exam (GRE), unless the applicant holds an earned doctorate from an accredited institution.
4. International Applicants
  - \* International applicants must consult the online Preliminary Evaluation Process before proceeding with the application process.
  - \* International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores are 580 for the paper test and 237 for the computer test.

#### **Degree Requirements**

45 credits minimum, as follows:

1. 45 credits as specified for the student's particular degree program; of these credits, 18 credits must be numerically graded and 18 credits must be at the 500-level
2. Proficiency in a foreign language as required by the degree program
3. Thesis, to include passing an oral thesis defense or passing an examination based on approximately 10 topics
4. All work for the master's degree completed within six years, to include applicable work transferred from other institutions (max. 6 credits transferable) and time spent on leave.

### **Master of Music**

#### **Admission Requirements**

1. A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a bachelor's degree in music or the equivalent experience and training in the field.
2. A minimum GPA of 3.00 or B average in the most recent two years of study.
3. Scores from the Graduate Record Exam (GRE), unless the applicant holds an earned doctorate from an accredited institution.
4. International Applicants
  - \* International applicants must consult the online Preliminary Evaluation Process before proceeding with the application process.
  - \* International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores are 580 for the paper test and 237 for the computer test.

*Entrance Auditions:* Before acceptance into a performance-based School of Music graduate program, applicants need to pass an entrance audition in their major performance area.

#### **Degree Requirements**

All students in the performance degree programs (MM, DMA) are expected to enroll in music applied lessons (MUSAP courses at the 500-level) until all recital requirements are met. The School of Music requires that all students registered for music applied lessons must also be enrolled in an ensemble (MUSEN 5XX). Minimum 45 credits, to include:

1. Minimum of 45 credits as specified for the student's particular degree program; of these credits, 18 credits must be numerically graded and 18 credits must be at the 500-level
2. Proficiency in a foreign language as required by the degree program
3. Thesis, to include passing an oral thesis defense or passing an examination based on approximately ten topics
4. All work for the master's degree completed within six years, including applicable work transferred from other institutions (max. 6 credits transferable) and time spent on leave.

### **Doctor of Music Arts**

#### **Admission Requirements**

1. A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a bachelor's degree in music or the equivalent experience and training in the field.
2. A minimum GPA of 3.00 or B average in the most recent two years of study.
3. Scores from the Graduate Record Exam (GRE), unless applying to the Doctor of Musical Arts degree program in any area besides composition, or if the applicant holds an earned doctorate from an accredited institution.
4. International Applicants
  - \* International applicants must consult the online Preliminary Evaluation Process before proceeding with the application process.
  - \* International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores are 580 for the paper test and 237 for the computer test.

*Entrance Auditions:* Before acceptance into a performance-based School of Music graduate program, applicants need to pass an entrance audition in their major performance area.

#### **Degree Requirements**

All students in the performance degree programs (MM, DMA) are expected to enroll in music applied lessons (MUSAP courses at the 500-level) until all recital requirements are met. The School of Music requires that all students registered for music applied lessons must also be enrolled in an ensemble (MUSEN 5XX).

Minimum 90 credits, to include:

1. A minimum of 90 credits of resident study with at least 60 registered credits from the UW
2. Reading knowledge of one or more foreign languages as required by the particular degree program
3. Performance requirements as required for the specific degree
4. General Examination for admission to candidacy; may consist of written and oral examinations based on approximately twenty topics (depending on degree program)
5. Dissertation which is a significant contribution to knowledge in a specific field and which clearly indicates training and research
6. Final Examination devoted to the dissertation, in the field with which it is concerned
7. All work for the doctoral degree completed within ten years. Applicable work from the master's degree and work transferred from the other institutions must fall within the ten-year period, including time spent on leave and away from the program. Up to thirty credits from an approved master's degree may be counted toward the 90 credits required for the degree. (Master's degree credits are applied toward the general elective requirements of the degree plan.)

## Doctor of Philosophy

### Admission Requirements

1. A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a bachelor's degree in music or the equivalent experience and training in the field.
2. A minimum GPA of 3.00 or B average in the most recent two years of study.
3. Scores from the Graduate Record Exam (GRE), unless the applicant holds an earned doctorate from an accredited institution.
4. International Applicants
  - \* International applicants must consult the online Preliminary Evaluation Process before proceeding with the application process.
  - \* International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores are 580 for the paper test and 237 for the computer test.

### Degree Requirements

Minimum 90 credits, to include:

1. A minimum of 90 credits of resident study with at least 60 registered credits from the UW
2. Reading knowledge of one or more foreign languages as required by the particular degree program
3. Performance requirements required for the specific degree
4. General Examination for admission to candidacy, which may consist of written and oral examinations based on approximately twenty topics (depending on degree program).
5. Dissertation which is a significant contribution to knowledge in a specific field and which clearly indicates training and research
6. Final Examination devoted to the dissertation in the field with which it is concerned
7. All work for the doctoral degree completed within ten years. Applicable work from the master's degree and work transferred from the other institutions must fall within the ten-year period, including time spent on leave and away from the program. Up to thirty credits from an approved master's degree may be counted toward the 90 credits required for the degree. (Master's degree credits are applied toward the general elective requirements of the degree plan.)

### Financial Aid

A limited number of teaching and staff assistantships (including accompanying) are available. Competitive auditions for performance scholarships for new and returning students are held each year. See the School's Web site (above) for more information about applications and audition dates.

### Research Facilities

The Music Building contains the music library, an electronic composition laboratory, a listening center, and the ethnomusicology archives, as well as the studio, practice, and classroom facilities of a modern music department.

Ensembles available for student participation include University Symphony Orchestra, University Chorale, Opera Chorus, Contemporary Group, Wind Ensemble, University Symphonic Band, Studio Jazz Ensemble, Baroque Ensemble and Chamber Singers, as well as non-Western ensembles with visiting artists from around the globe.

---

## Near Eastern Languages and Civilization

229 Denny  
depts.washington.edu/nelc

Near Eastern Languages and Civilization focuses on the languages and civilizations of the Near East with an emphasis on the ancient and medieval roots of these civilizations as well as more recent cultural developments. Each language offered represents a major literary tradition. Arabic, Persian, Turkish, and Central Asian Turkic are the languages of the most significant literary manifestations of Islamic civilization. Hebrew and

Aramaic are the languages of the Bible and are central to Judaism and Jewish culture. Egyptian languages (Coptic, Hieroglyphic) and other Mesopotamian and Mediterranean languages (Akkadian, Ugaritic, Phoenician) are important to the ancient and Christian cultures of the Near East. These languages are taught in conjunction with courses on the social, cultural, and religious history of the Near East, providing students with a broad understanding and solid foundation for more advanced studies or professional career development.

## Undergraduate Program

Adviser  
219 Denny, Box 353120  
206-685-3743  
nelcua@u.washington.edu

The department offers the following programs of study:

- \* The Bachelor of Arts degree with a major in Near Eastern languages and civilization with options in Near Eastern languages and civilization, Near Eastern culture and civilization, comparative Islamic studies, and Biblical and ancient studies
- \* A minor in Near Eastern languages and civilization

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Courses in any discipline that deal with the Near East. Courses in writing, history, literature, comparative religion, French, and German are also recommended. Students should begin their studies of Near Eastern languages as soon as possible.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

*Near Eastern Studies -- Languages and Civilization*

69 credits as follows:

1. Two years of one Near Eastern language, or its equivalent as evidenced by examination
2. At least 9 credits in advanced literature or text courses in that language
3. NEAR E 210
4. One of the following: NEAR E 211, NEAR E 240, or RELIG 210
5. An approved program of 20 further credits in courses offered by the department or courses on the Near East offered by other departments, or both

*Near Eastern Studies -- Culture and Civilization*

73 credits as follows:

1. Two years of one Near Eastern language or its equivalent as evidenced by examination
2. NEAR E 210 or (with approval of adviser) NEAR E 220
3. One of the following: NEAR E 211, NEAR E 240, or RELIG 210
4. An approved program of 20 further credits in Near Eastern courses including at least one course from each of the following areas: Near Eastern civilization, Near Eastern religion, Near Eastern literature in translation
5. 8 credits in non-language, upper-division courses related to the Near East in the department or in other departments
6. A senior essay on a topic of Near Eastern civilization (5 credits).

*Near Eastern Studies -- Comparative Islamic Studies*

70 credits as follows:

1. Two years of one of the following languages or its equivalent as evidenced by examination: Arabic, Persian, Turkish, Uzbek, Kazakh, or other appropriate languages with approval of adviser
2. NEAR E 210
3. NEAR E 212 or NEAR E 240
4. An approved program of 10 credits in courses in Islamic religious traditions and texts, and 15 credits in history, society and culture of Islam
5. A senior essay on a topic in comparative Islamic studies (5 credits).

73 credits as follows:

1. Two years of Biblical Hebrew or its equivalent as evidenced by examination (alternatively, a student may satisfy this language requirement by combining a minimum of four quarters of Biblical Hebrew with two quarters of other ancient Near Eastern languages, including Aramaic, hieroglyphic Egyptian, Coptic, Akkadian, second-year Greek, or other appropriate languages as approved by adviser or faculty)
2. NEAR E 220 and NEAR E 240
3. An approved program of 20 credits in courses in ancient Near Eastern history, society and culture, and ancient Near Eastern literature in translation
4. 8 credits in non-language, upper-division Near Eastern courses related to the ancient Near East
5. A senior essay on a topic in biblical and ancient Near Eastern studies (5 credits).

## Minor

Minor Requirements: 25 credits as follows:

1. NEAR E 210 or NEAR E 220
2. One course from NEAR E 211, NEAR E 240, RELIG 210
3. Additional credits from Near Eastern civilization or language courses (may not include language courses at the beginning or intermediate level).

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The NELC undergraduate degree offers a liberal arts education with a particular focus on the study of cultures and languages of the Near East and Central Asia. Educational outcomes from this degree serve a broad spectrum of undergraduates, ranging from those intending to begin the acquisition of specific linguistic and cultural proficiencies for the purpose of pursuing some career, academic or otherwise, related to these regions, to students for whom the Near East and/or Central Asia are regions with histories and cultures that are of special intellectual or personal interest. Students often combine Near Eastern studies as a double major with some other degree program that may be in a quite different discipline. For these students the NELC undergraduate major offers the important opportunity, as a core element in a broader liberal arts education, for expanding their cultural vision and understanding in ways made possible only through serious study of a language and literature other than one's own. Graduates from the B.A. degree have followed a wide range of post-baccalaureate paths, including further graduate study in the humanities or social sciences, professional degree programs in law or medicine, and employment with government or non-governmental organizations.
- \* *Instructional and Research Facilities:* The department draws on collections of books, serials, and other resources in the UW libraries that are unusually rich in the quantity and quality of items relating to Near Eastern and Central Asian languages and cultures. Students in the department's language classes make use of the University's well-equipped Language Learning Center.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* Undergraduate research is carried out under the supervision of faculty members. Students can also undertake research and internship opportunities while studying abroad.
- \* *Department Scholarships:* See departmental Web site for most current information.
- \* *Student Organizations/Associations:* There are no formal student organizations in the department, but the department frequently sponsors educational and cultural events organized by students and faculty involved in interest groups such as the Central Asian Circle or the Persian Circle.

## Graduate Program

Graduate Program Coordinator  
M25 Denny, Box 353120  
206-543-6033  
neareast@u.washington.edu

## Master of Arts

The Department of Near Eastern Languages and Civilization offers a graduate program of studies leading to the Master of Arts degree. The program is designed to provide students with advanced training in at least one Near Eastern language and in a specific field of specialization. Students may concentrate in Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic and may choose as their field of specialization a civilization or literature related to their language of concentration. The program is intended not only for those students who wish to continue their studies at the doctoral level but also for students who wish to pursue careers in government or business.

### Admission Requirements

- \* Statement of purpose
- \* Sample of written academic work
- \* Three letters of recommendation, of which at least two must attest to scholarly ability
- \* Official transcripts from all collegiate institutions attended
- \* Although knowledge of a Near Eastern language is not a prerequisite for admission, applicants are generally expected to have had the equivalent of two years' study of the language in which they plan to concentrate.
- \* A bachelor's degree from an accredited institution
- \* A minimum GPA of 3.00 or B for last 90 quarter (60 semester) credits
- \* GRE scores
- \* TOEFL scores for International Students

### Degree Requirements

36 credits, as follows:

- \* Reading knowledge of French or German; or, with the prior approval of the student's M.A. Committee, any other language pertinent to the research in the student's field of study. Normally, to satisfy this requirement, the student must pass a reading exam before beginning the second year of study towards the M.A.
- \* A seminar paper representing the student's best work
- \* Coursework determined in consultation with M.A. committee to prepare for written examinations.
- \* A written examination consisting of four parts: (1) general culture of the Near East, (2) student's field of specialization, (3) student's language of concentration, (4) second Near Eastern language related to the language of concentration.

## Doctor of Philosophy

Some of the department faculty are part of an interdisciplinary faculty group which offers doctoral study in Near and Middle Eastern studies. The program is located administratively within the Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of this catalog.

## Summer Programs

The department offers summer intensive language programs in Arabic, Hebrew, and Central Asian languages (Uzbek, Kazakh, Tajik, and others).

## Research Facilities

The University of Washington Libraries holds an extensive collection of books and materials in the languages of the Near East, the Turkic regions of Central Asia, and in European languages on Near Eastern and Central Asian Turkic subjects. Candidates for the master's degree as well as doctoral students find in the collection adequate resources for their research. The library participated in the Library of Congress Middle East Cooperative program for the acquisition of Arabic serials, and the Library of Congress Cooperative program for Pakistan for the purchase of Persian books and serials. The library staff includes Near East and Central Asia specialists responsible for acquiring and cataloging the collection. The library maintains book exchanges with the Central Asian republics, some of these beginning as early as 1961. They are handled through the Near East and Slavic sections of the University's Suzzallo Library. Among its staff are an exchange librarian and a specialist trained in Central Asian Turkic languages. A book exchange with Xinjiang is administered through the East Asia Library.

## Financial Aid

A limited number of teaching assistantships are available for graduate students in the department who are fluent in speaking and writing a Near Eastern language. A limited number of graduate fellowships are also available.

## Exchange Agreements

The department participates actively in exchange programs involving institutions abroad, sending students for language and cultural study and research to a variety of locations, and training many students from institutions overseas. Students take advantage of existing formal UW exchange agreements with several universities in North Africa and the Middle East, such as American University in Cairo; Al-Akhawayn University in Ifrane, Morocco; Yarmouk University and Mu'tah University in Jordan; American University in Beirut; Hebrew University in Jerusalem; and Bogazici University in Istanbul. There have also been department-level exchange agreements with Xinjiang University in Urumchi, China (for Uighur, Kazakh, Kirghiz), or institutions in Central Asia such as Tashkent State University, the Humanities University of Bishkek, Kyrgyzstan, or Kyrgyz State National University, Bishkek. NELC students also study at other institutions in which there are not currently formal exchanges, such as the University of Damascus (for the study of Arabic and related subjects).

---

## Neurobiology

318 Hitchcock  
protist.biology.washington.edu/neurobiology

Neurobiology offers students an intense introduction to the study of nervous systems. Faculty in both the College of Arts and Sciences and the School of Medicine teach courses in the major. Students study the cellular and molecular properties of single nerve cells and the connections among them and learn how these properties determine animal behavior and human disease.

## Undergraduate Program

Adviser  
318 Hitchcock, Box 355320  
206-616-3982

The Neurobiology Program offers the following program of study:

- \* The Bachelor of Science degree with a major in neurobiology

## Bachelor of Science

### Department Admission Requirements

1. BIOL 180, BIOL 200, BIOL 220, with minimum 2.0 grade in each
2. Completion of most supporting course work in physics, math, and chemistry recommended (see specific course lists, below), with minimum 2.50 GPA in any such work completed at time of application
3. Admission is competitive; meeting minimum standards guarantees consideration but not acceptance. Early application is encouraged and may increase chances for acceptance. Since the program uses rolling admission, there is no specific deadline for applying. See adviser for details about applying.

### Major Requirements

Minimum 86 credits, as follows:

1. Supporting course work (minimum 48 credits):
  - a. *Chemistry*: Pathway 1 -- CHEM 120, CHEM 220, CHEM 221; Pathway 2 (recommended) -- CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165); and CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239) (or CHEM 335, CHEM 336, CHEM 337) (labs not required) (15 - 27 credits)
  - b. *Physics*: Pathway 1 -- PHYS 114, PHYS 115; Pathway 2 (recommended) -- PHYS 121, PHYS 122. (8 to 10 credits)
  - c. *Mathematics*: Two quarters of calculus (MATH 124, MATH 125, or MATH 144, MATH 145, or Q SCI 291, Q SCI 292)

- d. *Introductory Biology (minimum 15 credits)*: BIOL 180, BIOL 200, BIOL 220
2. *Introduction to Neurobiology (10 credits)*: NBIO 301, NBIO 302.
3. *Advanced courses in neurobiology (12 credits)*: NBIO 401, NBIO 402, NBIO 403, NBIO 404.
4. *Electives*: Minimum 16 credits from a wide variety of 400-level courses in the biological sciences. See adviser for list of courses. Courses not listed may be allowed with permission of program director. Students may apply up to 7 credits of undergraduate research toward the 16 elective credits.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: Throughout the core sequence of neurobiology, students gain a deep understanding of the basic concepts of nervous system function and learn many of the basic techniques used to study nerve cells. Students also learn how to analyze neurophysiological data, and compose and present results. Graduates pursue careers in medicine, public health, education, pharmaceutical sales, computing, and graduate study.
- \* *Instructional and Research Facilities*: Labs are required with introductory courses. NBIO 301 and NBIO 302. The program offers state-of-the-art facilities and equipment for each course.
- \* *Honors Options Available*: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning*: Most neurobiology students participate in undergraduate research with faculty from both the College of Arts and Sciences and the School of Medicine.
- \* *Department Scholarships*: None offered.
- \* *Student Organizations/Associations*: Beta Beta Beta, the honor society for biological study; Alpha Epsilon Delta, the national premedical honorary society.

---

## Philosophy

511 Condon  
www.phil.washington.edu

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value, and of the basic concepts, principles, and arguments of the major intellectual disciplines. Its fields include metaphysics, epistemology, logic, ethics, history of philosophy, political philosophy, aesthetics, philosophy of science, philosophy of mind, philosophy of language, philosophy of law, and philosophy of religion.

## Undergraduate Program

Adviser  
511 Condon, Box 353350  
206-543-5855  
philadv@u.washington.edu

The Department of Philosophy offers the following programs of study:

- \* The Bachelor of Arts degree with a major in philosophy
- \* The Bachelor of Arts degree with a major in history and philosophy of science, offered jointly with the Department of History
- \* A minor in philosophy

The Department of Philosophy also administers the interdisciplinary minor in values in society.

## Bachelor of Arts

### Philosophy

*Suggested First- and Second-Year College Courses*: Introductory courses in symbolic logic, social philosophy, major problems of philosophy, and history of philosophy. Courses to develop writing, language, and analytical skills.

### Department Admission Requirements

2.00 cumulative GPA and completion of 10 credits of philosophy coursework.

## Major Requirements

50 credits, to include:

1. PHIL 120 or an upper-division course in logic
2. One course from PHIL 320, PHIL 330, PHIL 335, or PHIL 340 (undergraduate adviser must approve substitutions)
3. One course from PHIL 322, PHIL 332, PHIL 342, or 400-level courses in the same areas (undergraduate adviser must approve substitutions)
4. At least four UW philosophy courses at the 400 level, excluding PHIL 484
5. At least 25 credits at the UW
6. Minimum cumulative GPA of 2.00 for all philosophy courses taken.

## History and Philosophy of Science

*Suggested First- and Second-Year College Courses:* PHIL 120, PHIL 160. Courses that develop writing skills. Introductory science courses and mathematics courses through calculus.

## Department Admission Requirements

1. HIST 311, HIST 312; PHIL 160 or PHIL 460; PHIL 120, each with a minimum grade of 2.0.
2. Completion of 10 credits toward the Natural World (science) requirement (see below), each course with a minimum grade of 2.0.
3. Minimum UW GPA of 2.00.
4. Completion of 10 credits of composition/writing courses with a minimum grade of 2.0 for each course. This requirement may be met by a freshman English composition course, a "W" course, or any course in which the student has written a graded paper (to be reviewed by HPS faculty) of at least 10 pages.

## Major Requirements

85 credits as follows:

1. *Core Courses:* HIST 311, HIST 312, HIST 390; PHIL 160 or PHIL 460; PHIL 120 (25 credits). A minimum grade of 2.0 in each course and an overall minimum GPA of 2.50.
2. *Electives:* 25 credits from the following, of which at least 10 must be PHIL courses and at least 5 must be HIST courses (or others upon petition): ESS 404, HIST 211, HIST 215, HIST 310, HIST 313 (or ASTR 313), HIST 314, HIST 315, HIST 316, HIST 317 (also MHE 422), HIST 318 (also MHE 424), HIST 412; PHIL 243, PHIL 350, PHIL 360, PHIL 406, PHIL 450, PHIL 460 (if PHIL 160 has been taken), PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, PHIL 483. A minimum grade of 2.0 in each class.
3. *Capstone:* Completion of HPS 400, with a minimum grade of 2.0 (5 credits).
4. *Science Component:* 30 credits of Natural World (NW) courses from anthropology, astronomy, atmospheric sciences, biology, chemistry, computer science, earth and space sciences, economics, environmental studies, mathematics, physics, psychology, and sociology, with a minimum GPA of 2.50 in these courses and a minimum grade of 2.0 in each course. At least 15 of the credits must be outside mathematics.

## Minor

*Minor Requirements:* 30 credits, to include:

1. PHIL 115 or PHIL 120, or an upper-division course in logic
2. At least 15 UW philosophy credits at the 300 level or above, excluding PHIL 484.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Graduates of the Department of Philosophy acquire considerable skills in abstract thinking, analysis, and critical writing (constructing and critiquing arguments). Because of these skills, philosophical training is invaluable in almost any area of life. Recent graduates have been successful in software development, financial planning, journalism, teaching, and law. A few go on to graduate school and become professional philosophers.

Students' work is subjected to careful critical scrutiny. As a result, students benefit from philosophy courses with an increased competence in expository clarity, logical rigor, and analytical skill.

Philosophy is an excellent undergraduate major for pre-professional students. It is perhaps ideal for those who aspire to work in the legal

profession. The History and Philosophy of Science major is of particular interest to those planning careers in the sciences. Courses in ethics offer students in any field the opportunity to think clearly about the normative dimensions of their career choices. Because the skills of philosophical analysis can be applied widely, philosophy is always a good complementary second degree for any major, whether it is in the physical sciences, social sciences, arts, or humanities.

- \* *Instructional and Research Facilities:* The Philosophy Writing Center provides a free tutoring service to any student writing a philosophical paper. The Philosophy Commons includes a computer lab for students and a small conference room that can be reserved for study groups.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* The department offers internship credits for students leading its new majors seminar. Students may also arrange for internship credit with individual faculty. See adviser for details.
- \* *Department Scholarships:* Kenneth R. Parker Award for Excellence in Community Service. The KRP award honors an undergraduate philosophy major or minor who has blended her or his studies in philosophy with a volunteer-based community project. The recipient receives a \$250 scholarship. A donation of equal value is made on behalf of the recipient to a community organization of the student's choice. See adviser for details.
- \* *Student Organizations/Associations:* The Society for Undergraduate Philosophy Students (SUPS) is dedicated to the informal discussion of philosophical issues.

*Of Special Note:* The department offers a new majors seminar for those wishing to explore the major.

## Graduate Program

Graduate Program Coordinator  
511 Condon, Box 353350  
206-543-5855  
philinfo@u.washington.edu

The Department of Philosophy offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees, the M.A. program serving as the initial stage of the Ph.D. program. The department's Program on Values in Society offers an interdisciplinary graduate certificate.

The Master of Arts program option is a two-year non-thesis program which may be extended to three years depending on the outcome of the spring research papers. The student must take twelve courses in philosophy, satisfy a logic requirement, and at the end of the second year, submit three research papers for evaluation by the graduate faculty of the department. The courses and the papers must satisfy a distribution requirement. The departmental evaluation of the student's papers and coursework determines whether an M.A. degree is awarded and also whether admission to the Ph.D. program is granted. The M.A. portion of the program serves as the initial stage of the Ph.D. program.

The Ph.D. program, which normally requires at least two years of study beyond the M.A., has three general requirements: (1) General Examination, (2) dissertation, and (3) Final Examination.

## Master of Arts

### Admission Requirements

In evaluating applications, the Department of Philosophy takes the following factors into account: the philosophical potential displayed in a sample of the applicant's written work, letters of recommendation, undergraduate record, and GRE scores.

1. Three letters of recommendation written on the recommender's departmental letterhead and addressed to the Graduate Admissions Committee (address below). Recommenders may send their letters directly to the department, or the applicant may include the letters in sealed envelopes with the other application materials.
2. A sample of the applicant's written philosophical work, normally an essay or paper (approximately 8-15 pages) written for a course in philosophy. Applicants are allowed one writing sample only.

3. Official GRE scores (verbal, quantitative, and analytic).
4. A 200-300 word statement of the applicant's reasons for doing graduate work in philosophy and his/her professional objectives.
5. A complete set of official college transcripts.

#### International Applicants

- \* *TOEFL.* A minimum official TOEFL score of 600 (TOEFLC score: 250) is required unless the applicant is a citizen of Australia, Canada, Ireland, New Zealand, or the United Kingdom, or has earned a bachelor's degree or higher in the U.S. or one of the countries listed above.
- \* *TSE.* An official TSE score of 55 is required to receive departmental assistantships involving classroom duties unless the applicant is a citizen of one of the countries listed above. A degree from the U.S. or one of those countries does not exempt the applicant from this requirement.
- \* *Degree Requirements.* The equivalent of a four-year U.S. bachelor's degree. This is based on the following criteria: the country's national system of education, type of institution attended, field of study, and level of studies completed. Policies at other institutions may differ.
- \* *Financial Responsibility.* The University of Washington requires official certification of adequate financial support from each international applicant. The total annual cost (12 months) of study is \$47,076 in U.S. funds. (This cost is subject to change without notice.) Even if a graduate program is able to offer some funding, the applicant may need to provide a portion of these funds personally.
- \* *ESL Requirements.* Policy for students for whom English is a second language: All such students must meet the Graduate School requirements for the admission of international students.
- \* *Additional Requirements.* In addition, the Philosophy Department has the following admission requirements:
  - o An 8-15 page paper in English.
  - o A letter of recommendation addressing the applicant's ability to speak and write English. (This letter may count as one of the three required for all applicants.)
  - o Some students may be required to spend up to three additional quarters improving their English writing and speaking skills. Students who do not have adequate preparation in Western Philosophy may be required to take Ancient Philosophy (PHIL 320), Modern Philosophy (PHIL 322), Contemporary Philosophy (PHIL 326), and Introduction to Symbolic Logic (PHIL 120). Graduate credit is not normally given for these remedial courses.

#### Special Requirements

An undergraduate major in philosophy is recommended, although not required, for admission to the M.A. program. An applicant's philosophical potential is assessed primarily on the basis of a sample of his or her written work in philosophy and secondarily on the basis of his or her undergraduate record, Graduate Record Examination scores, and letters of recommendation.

#### Degree Requirements

*Please Note:* The Philosophy Department at the University of Washington does not offer a terminal M.A. degree.

This is a non-thesis program. There is no language requirement for the M.A. degree.

The following requirements supplement the general requirements set forth by the UW Graduate School in the General Catalog (see the Graduate School Admissions page for further information). All students, whether or not they have earned an M.A. at another institution, must complete the M.A. requirements before entering the Ph.D. program.

36 credits minimum, as follows:

- \* *Logic Requirement:* Either a grade of 3.0 or better in one of the graduate-level logic courses or a passing score on the departmental logic examination. The department offers the departmental logic exam once annually upon request. Part-time students must satisfy this requirement by the time they submit master's papers.
- \* *Distribution Requirement:* Graduate courses are divided into three areas. Students must take at least three courses in each of the following three areas:
  1. Area One:
    - o Greek Philosophy -- PHIL 430 (3), PHIL 431 (3), PHIL 433 (3), PHIL 520 (5)

- o Medieval Philosophy -- PHIL 421 (3), PHIL 434 (3), PHIL 521 (5)
- o Modern Philosophy -- PHIL 422 (3), PHIL 436 (3), PHIL 437 (3), PHIL 438 (5), PHIL 522 (5), PHIL 525 (5)
- o Recent Philosophy -- PHIL 425 (3), PHIL 426 (5), PHIL 439 (3), PHIL 458 (5), PHIL 469 (3), PHIL 526 (5)

#### 2. Area Two:

- o Logic and Philosophy of Mathematics -- PHIL 470 (5), PHIL 471 (5), PHIL 472 (5), PHIL 473 (5), PHIL 474 (5), PHIL 570 (5)
- o Philosophy of Science -- PHIL 459 (5), PHIL 460 (5), PHIL 466 (5), PHIL 481 (5), PHIL 482 (5), PHIL 560 (5), PHIL 566 (5), PHIL 574 (4)
- o Philosophy of Mind -- PHIL 463 (5), PHIL 464 (5), PHIL 563 (5)
- o Philosophy of Language -- PHIL 443 (3), PHIL 444 (3), PHIL 453 (5), PHIL 479 (3), PHIL 553 (5)
- o Epistemology -- PHIL 450 (5), PHIL 490 (5), PHIL 550 (5)
- o Metaphysics -- PHIL 456 (5), PHIL 556, PHIL 587 (5)

#### 3. Area Three:

- o Ethics -- PHIL 416 (5), PHIL 417 (5), PHIL 440 (5), PHIL 540 (5)
- o Philosophy of Art -- PHIL 445 (5), PHIL 446 (5), PHIL 447 (3), PHIL 449 (5), PHIL 545 (5)
- o Philosophy of History -- PHIL 465 (3), PHIL 565 (5)
- o Social and Political Philosophy -- PHIL 406 (5), PHIL 407 (5), PHIL 408 (5), PHIL 409 (5), PHIL 410 (5), PHIL 411 (5), PHIL 414 (3), PHIL 461 (5), PHIL 510 (5), PHIL 514 (5)
- o Philosophy of Religion -- PHIL 467 (5), PHIL 567 (5)

\* Courses numbered below 400 cannot be used to satisfy graduate degree requirements.

\* *12-Course Requirement:* Students must complete twelve graduate courses in philosophy, with a minimum grade of 3.0 in each course. At least four of these twelve courses must be seminars.

\* *Master's Papers:* At the end of their second year, in lieu of a master's thesis, students submit three papers, one in each distribution area. (Part-time students will submit their papers for evaluation upon completion of twelve courses in philosophy. A change of status from full-time to part-time student requires departmental approval.)

\* *Evaluation:* The graduate faculty of the department evaluates the students' progress on the basis of coursework in philosophy and the papers submitted. The graduate faculty then decides whether the students are (a) awarded an M.A. and admitted to the Ph.D. program; (b) awarded an M.A. and invited to submit papers a second time; (c) awarded a terminal M.A.; or (d) dropped from the program without a degree. Students resubmitting papers must submit completely new ones that satisfy the distribution requirements. A completely new paper is one that has not been previously submitted and is not a revised version of one that has been previously submitted. These papers are due the following year.

\* *Satisfactory Progress:* Students not yet admitted to the Ph.D. program must have at least two courses (10 credits) per quarter with a grade of 3.0 or better to be in good standing. An excessive number of incompletes may jeopardize a student's good standing. If a student does not make satisfactory progress in a given quarter, the director of graduate studies recommends to the dean of the Graduate School that the student be placed on probation.

\* *Other Courses:* Students may use three courses outside philosophy in determining whether they are making satisfactory progress. The courses must be approved by the director of graduate studies as part of a program of specialization. Courses in areas other than philosophy do not normally satisfy the twelve-course requirement.

## Doctor of Philosophy

### Admission Requirements

Admission to the Ph.D. program is based on the level of performance with the M.A. requirements. (See above.)

### Degree Requirements

60 credits minimum beyond the master's degree, as follows:

- \* *General Requirements:* There are four general requirements for the completion of the doctoral degree:
  1. General Written Examination
  2. General Oral Examination

3. Dissertation
4. Final Examination

The master's papers constitute the written portion of the general examination. The general oral examination is normally a presentation and defense of the student's dissertation proposal.

- \* *Course Requirement:* The only departmental course requirement is that the student must complete a total of at least six seminars with a grade of 3.0 or better in each before being awarded the Ph.D. (seminars taken to fulfill the M.A. requirements may count toward this total). A student's supervisory committee may, however, require additional courses.
- \* *Language Requirement:* There is no departmental language requirement. However, in writing a dissertation a student must be able to deal with primary sources in the original language of the source. All language requirements are determined by the student's supervisory committee. A student should develop the needed language skills as early as possible in his/her career. The student should consult with the director of graduate studies during the first and second year in the M.A. program to insure that he/she is developing any needed language skills.
- \* *Satisfactory Progress:* A student's supervisory committee determines whether a student in the Ph.D. program is making satisfactory progress. Satisfactory progress for the Ph.D. program includes steady and substantial progress toward the completion of the dissertation. Sanctions for failure to make satisfactory progress are the same as described for the master's requirements.

## Graduate Certificate in Values in Society

The program on Values in Society aims to facilitate graduate research in ethics as it arises across the disciplines. The program is designed to provide students with the knowledge and skills necessary for integrating ethics and ethics scholarship into their chosen field.

The graduate certificate program is open only to students already enrolled in other graduate degree programs at the University of Washington. Successful completion of the certificate program will be noted on official transcripts.

### Certificate Requirements

1. Selection of a faculty adviser from the Values in Society core faculty.
2. Completion of VALUES 511 and VALUES 512 (10 credits).
3. Completion of two other graduate level values-laden courses specific to the student's field of study (6 credits). Courses from the student's home department are eligible. All courses must be approved by the student's faculty adviser and the program director.
4. Completion of VALUES 513 (2 credits).

### Financial Aid

The department has some teaching assistantships available to incoming students and the Graduate School offers some non-teaching assistantships.

## Physics

C121 Physics-Astronomy  
www.phys.washington.edu

Physics is the study of the fundamental structure of matter and the interaction of its constituents, with the goal of providing a quantitative description of nature based on a limited number of physical principles.

## Undergraduate Program

Adviser  
C139A Physics-Astronomy, Box 351560  
206-543-2772

The Department of Physics offers the following programs of study:

- \* The Bachelor of Science degree with a major in physics
- \* A minor in physics

## Bachelor of Science

*Suggested First- and Second-Year College Courses:* MATH 124, MATH 125, MATH 126 (or MATH 144, MATH 145, MATH 146), MATH 308, MATH 324; PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227, PHYS 228. (Note: MATH 134, MATH 135, and MATH 136 can be used in place of MATH 124, MATH 125, MATH 126, and MATH 308.)

These physics and mathematics courses are required prerequisites for junior-level work in physics not only at the UW but also at most colleges and universities in the United States. Students who do not complete them during the first two years in college will either need to take more than four years to earn a degree or will be limited to a minimal course of study for graduation in four years.

### Department Admission Requirements

Students in good academic standing may declare the major at any time by visiting the department advising office to complete the necessary paperwork.

### Major Requirements

Minimum 86 credits, including the following:

1. *Core courses (38 credits):* PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227, PHYS 228, PHYS 321, PHYS 322, PHYS 334.
2. *Upper-division lecture courses in modern physics (3-4 credits):* Either PHYS 315 or PHYS 324.
3. *Upper-division physics laboratory courses (6 credits):* Two courses from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, or PHYS 434.
4. *Research and seminars (3 credits):* Choices include PHYS 401, PHYS 402, PHYS 403; or PHYS 485, PHYS 486, PHYS 487; or PHYS 491, PHYS 492, PHYS 493; or PHYS 494, PHYS 495, PHYS 496; or ASTR 480. 1-3 credits of independent research that has significant physics content in a cognate subject (astronomy, chemistry, etc.) may be substituted for 1-3 credits of the above choices with approval of the adviser.
5. *Upper-division lecture courses:* Two courses from an approved list of upper-division lecture courses in physics or cognate subjects.
6. *Mathematics (21 credits):* MATH 124, MATH 125, MATH 126, MATH 324, and one from MATH 308, MATH 318, or AMATH 352.
7. *Related sciences (9 credits):* Selected from physical or biological sciences (other than physics, mathematics, or computer science) or from the history or philosophy of science, in addition to any courses in these fields taken to satisfy requirement 5, above.
8. At least 12 credits of the physics courses presented to satisfy requirements 1 through 5, above, shall be in physics courses numbered 300 or above taken at the UW.
9. A minimum grade of 2.0 is required in all courses presented in fulfillment of requirements 1 through 5, above.
10. Students who plan graduate study in physics are strongly advised to complete PHYS 323, PHYS 324, PHYS 325, PHYS 328, as well as several of the following: PHYS 231, PHYS 232, PHYS 331, PHYS 421, PHYS 422, PHYS 423, PHYS 424, PHYS 425, PHYS 426, PHYS 431, PHYS 432, PHYS 433, and AMATH 401, AMATH 402, AMATH 403.

### Minor

*Minor Requirements:* 30-36 physics credits as follows:

1. *Core courses:* PHYS 121, PHYS 122, PHYS 123, PHYS 224, and PHYS 225
2. One of the following options:
  - a. *Physics Education:* PHYS 407, PHYS 408, PHYS 409 (total 36 physics credits) Experimental Physics: PHYS 231, PHYS 334 and one course from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, or PHYS 434 (total 30 physics credits)
  - b. *Mathematical Physics:* PHYS 227, PHYS 228 (MATH 308 required), and one course from PHYS 321 or PHYS 324 (MATH 324 required) (total 30 physics credits)
3. Minimum grade of 2.0 required for each physics course counted toward the minor.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The program is one of the largest in the nation, with approximately 60 majors graduating every year. Graduates may join the work force in a variety of technical occupations where analytical, computational, and problem-solving skills are highly valued, both in government and the private sector. They may also continue further studies in physics or in other fields (such as astronomy, medicine, law, business, biology, or engineering).
- \* *Instructional and Research Facilities:* The Physics and Astronomy departments share a modern building which contains excellent instructional and research facilities. Undergraduate students are strongly encouraged to participate in ongoing research in the department.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* Most undergraduate physics majors participate in a research experience, either on campus or off. Research internships in physics and related departments are available for both pay and course credit. Many students participate in national programs, typically the summer after their junior year. The department also maintains an exchange program with Universitat Justus-Leibig in Geissen, Germany.
- \* *Department Scholarships:* None available
- \* *Student Organizations/Associations:* Society of Physics Students, [www.phys.washington.edu/~sps/](http://www.phys.washington.edu/~sps/); Career Development Organization for Physicists and Astronomers, <http://students.washington.edu/cdophys/CAREER/>

### Of Special Note:

- \* One year of high school physics is strongly recommended before taking PHYS 121.
- \* *Progress Requirement:* In each academic year, every undergraduate physics major who either has completed the required 200-level courses in physics or has begun physics courses beyond the 200 level must (1) complete at least 15 credits of coursework acceptable in fulfillment of the departmental major requirements, exclusive of credits earned by repeating courses in which acceptable credit has been earned previously, or (2) satisfactorily complete an approved part-time program of study. Students who do not satisfy the above requirement will be dropped as physics majors unless exempted explicitly by the Physics Undergraduate Majors Committee. Students dropped for this reason may petition the committee for readmission to the major.

## Graduate Program

Graduate Program Coordinator  
C139 B Physics-Astronomy, Box 351560  
206-543-2488

The Department of Physics offers studies leading to the degrees of Master of Science and Doctor of Philosophy. The department has a permanent faculty of 46 members, about 14 research faculty, and about 56 adjunct, affiliate, and emeritus faculty. An average of twenty Ph.D. and thirty M.S. degrees in physics have been awarded annually in recent years.

## Research Facilities

The department is well equipped, both in staff and facilities, for instruction and research in a discipline that emphasizes fundamental problems in the understanding of the physical universe. Areas of research available to the Ph.D. student within the department include atomic physics, astrophysics, condensed-matter physics, elementary-particle physics, nuclear physics, and physics education. In addition, students may do research in physics with adjunct faculty members whose primary appointment is in another department such as Aeronautics and Astronautics, Astronomy, Biochemistry, Bioengineering, Chemistry, Earth and Space Sciences, Materials Science and Engineering, or Physiology and Biophysics.

Experimental work in atomic physics is concentrated on the measurement of fundamental physical properties through laser, ion trap, and radiofrequency techniques. The emphasis on fundamental measurements is continued in experiments on the gravitational force, carried out by faculty and students in atomic physics, nuclear physics, and astrophysics. Condensed-matter experiment includes research on surfaces, interfaces, nanotubes, lower-dimensional and bulk matter, with materials as diverse as high-temperature superconductors and low-temperature hydrogen monolayers. Facilities used range from synchrotron radiation and

neutron sources in the United States and abroad to on-campus laboratories with low-temperature, high-pressure, scanning-probe microscopy, x-ray and light scattering, and surface-physics equipment.

Members of the high-energy and particle astrophysics experimental groups are heavily engaged in experiments at the European Center for Nuclear Research in Geneva, Kamiokande, KEK in Japan, and Fermilab in Illinois. Faculty and students of the nuclear physics group are involved in a broad spectrum of research including studies of neutrino properties, relativistic heavy ions, fundamental symmetries and nuclear astrophysics. Researchers use the on-campus accelerators of the Center for Experimental Physics and Astrophysics (CENPA), as well as major facilities in the United States, Canada, and Europe.

Theorists in the department are concerned with problems in the theories of elementary particles and quantum fields, string theory, nuclear and high-energy reactions from the very lowest to the very highest energies, phase transitions and statistical mechanics, condensed-matter physics from localization in disordered systems to electron transport in mesoscopic systems, atomic physics, general relativity, and astrophysics. The Institute for Nuclear Theory, a national facility closely associated with the department, offers a unique opportunity for students to pursue research with distinguished permanent and visiting staff. Students in physics have the opportunity to obtain a physics degree in a number of interdisciplinary and applied physics areas through research with faculty members in other departments.

Department facilities are housed in the Physics-Astronomy Building and the Center for Experimental Physics and Astrophysics (CENPA).

## Master of Science (Applications of Physics)

*Admission Requirements:* This option is designed for students who are currently employed and whose background is in physical science, engineering, mathematics, or computer science. Admission is based on course grades in physics and related fields, adequacy of preparation in physics, and interest in areas of instruction offered in the physics department. Entering students are expected to have an undergraduate background equivalent to a B.S. degree in physical science, engineering, mathematics, or computer science. This program is part-time, with classes offered evenings.

*Graduation Requirements:* As part of the standard Graduate School requirements, students are expected to complete the sequence of core courses PHYS 441, PHYS 541, and PHYS 543, and to select appropriate elective courses. In addition, students must complete an independent-study project in consultation with a faculty member. This project may be carried out at the University or at the student's place of employment. A written report as well as an oral presentation of the project are required. Students must take at least 3 credits of PHYS 600 while completing the project, and must complete a total of 36 credits of work at the 400 level or above, with at least 18 of those credits at the 500 level or above. Of the 36 credits, at least 18 credits must be from numerically graded courses. No thesis is required.

## Master of Science, Doctor of Philosophy

*Admission Requirements:* Undergraduate preparation should include upper-division courses in mechanics; electricity and magnetism; statistical physics and thermodynamics; modern physics, including an introduction to quantum mechanics; and advanced laboratory work. Preparation in mathematics should include vector analysis, complex variables, ordinary differential equations, Fourier analysis, boundary-value problems, and special functions. Admission is determined by the applicant's undergraduate program, undergraduate grades, Graduate Record Examination aptitude and advanced physics scores, letters of recommendation, and a statement of educational and professional objectives.

## Master of Science

*Graduation Requirements:* Students must take at least 3 credits of PHYS 600 while completing the project, and must complete a total of 36 credits of work at the 400 level or above, with at least 18 of those credits at the 500 level or above. Of the 36 credits, at least 18 credits must be from numerically graded courses. A qualifying examination is required. No thesis is required.

## Doctor of Philosophy

**Graduation Requirements:** The student is expected to obtain here, or elsewhere with a master's degree, a background in physics equivalent to that contained in the following basic graduate courses: PHYS 505, PHYS 506, PHYS 511, PHYS 513, PHYS 514, PHYS 515, PHYS 517, PHYS 518, PHYS 519, PHYS 520, and PHYS 524; specialized courses appropriate to each student's interests; and two advanced elective courses outside the student's area of research. The student is required to pass, successively, a written qualifying examination (typically at the beginning of the second year), an oral General Examination for admission to candidacy, and an oral Final Examination. In order to take the General Examination, the student must have been accepted by a graduate faculty member as a research student and have completed the graduate studies outlined above. This examination concentrates on the area in which the dissertation research is planned. Teaching experience is required of all candidates. Courses in teaching techniques in physics, PHYS 501-PHYS 503, are required of students holding teaching assistantships.

## Financial Aid

Most graduate students are supported by fellowships and assistantships. Applications for the Ph.D. program are automatically considered for these fellowships and assistantships.

---

## Political Science

101 Gowen

Political science, broadly conceived, is the study of governments and other political actors, including their origins and foundations, interactions with groups and individuals, and interactions with nations. Within this larger framework political scientists study power, authority, conflict, economic relationships, culture, laws, policy, values, ethics, justice, equality, rights, legitimacy, and representation, to list only a few. Using these and other concepts, they analyze the political impacts of social issues such as war, peace, poverty, crime, education, the environment, race, gender, and globalization. Modes of inquiry are highly interdisciplinary.

## Undergraduate Program

Adviser  
215 Smith, Box 353530  
206-543-1824  
polsadvc@u.washington.edu

The Department of Political Science offers the following programs of study:

- \* The Bachelor of Arts degree with a major in political science with an option in political economy
- \* A minor in political science

Coursework in the discipline covers four major fields of political science: American politics, comparative politics, international relations, and political theory. Students may pursue faculty-supervised independent study projects and an optional senior thesis.

## Bachelor of Arts

**Suggested First- and Second-Year College Courses:** Courses that develop writing skills and breadth of knowledge. Introductory statistics.

### Department Admission Requirements

1. Sophomore standing (completion of 45 college credits).
2. Minimum 2.00 cumulative GPA.
3. Three introductory political science courses (15 credits) with a grade of at least 2.0 in each from the following: POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205.
4. Students are admitted all quarters and there are no quarterly deadlines. Applications and additional information available from advisers in 215 Smith.

### Major Requirements

50 credits in political science as follows:

1. **Introductory Requirement (15 credits):** Three courses from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205
2. **Field Requirement (15 credits):** One course numbered POL S 210 or above in three different fields of political science chosen from political theory, comparative politics, international relations, American politics, and research methods, with a grade of at least 2.0 in each.
3. **Electives (20 credits):** Four courses numbered POL S 210 or above with a grade of at least 2.0 in each.
4. **GPA Requirement:** Minimum cumulative GPA of 2.25 in political science courses at graduation and a minimum grade of 2.0 in each political science course taken to fulfill requirements for the major.
5. Transfer and postbaccalaureate students must meet all the above requirements and complete a minimum of 10 political science credits numbered 210 or above at the UW.

**Political Economy:** The department also offers the political economy option, a specialized program that combines study of political science and economics. Students who wish to pursue this interdisciplinary option should consult with a political science adviser. A list of recommended coursework is available.

## Minor

**Minor Requirements:** 30 political science credits as follows:

One introductory course (POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, or POL S 205), 25 elective credits numbered POL S 210 and above.

## Student Outcomes and Opportunities

- \* **Learning Objectives and Expected Outcomes:** The study of political science arms students with substantive knowledge of the discipline, including its concepts and theories. It also prepares them to be knowledgeable and active citizens. Through their study, students develop critical thinking, analytical, research, writing, interpersonal, and communication skills.

Graduates of political science pursue careers in many fields, including government (federal, state, and local), business, trade, public service (including non-governmental and international organizations), law, journalism, and teaching.

- \* **Instructional and Research Facilities:**

- o **Political Science Collaboratory:** This facility has 25 computer stations. It functions as a computer classroom and also as a general lab, primarily for political science majors and students enrolled in political science classes.
- o **Center for Social Science Computation and Research** maintains an extensive data archive and offers many statistical and software consulting services.
- o **Political Science/Jackson School/Law, Societies, and Justice Writing Center:** The Writing Center is staffed by peer tutors and provides free help to students seeking feedback about their writing. The Writing Center director works with instructors to design workshops to help students with assignments.
- o The Department of Political Science is affiliated with a number of research centers:
  - + The Center for American Politics and Public Policy is a focal point for the study of politics and policy processes in the United States. Research relates to public policy processes, including issues of agenda setting, decision making, implementation, quantitative and qualitative measures of policy change, and the role of ideas and dialogue in policy change. Policy arenas include education reform, health care, environmental regulation, and building code enforcement.
  - + The University of Washington's *Institute for the Study of Ethnicity, Race, and Sexuality* is an interdisciplinary research center dedicated to bringing the tools of contemporary social science inquiry to the careful examination of issues of social, economic, and political exclusion and disadvantage of marginalized minority populations in the United States, and their potential solutions.
  - + *The Center for Communication and Civic Engagement* investigates how innovative communication can improve the quality of civic life. The center's primary focus is to understand how new information technologies can supplement more traditional forms of communication to facilitate civic engagement.
  - + *Harry Bridges Center for Labor Studies* promotes the study of labor as a central concern in higher education and focuses on labor's contribution to society -- locally, nationally, and worldwide. The center supports research, teaching, and community outreach.

- + *The Comparative Law and Society Studies Center* is committed to promoting interdisciplinary research and teaching as well as community service regarding law, justice, and human rights throughout the world.
- + *European Union Center* promotes the study of the European Union and trans-Atlantic relations.

\* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

\* *Research, Internships, and Service Learning:* The department offers three internship programs that range from part-time, 5-credit assignments to full-time, 15-credit programs. Students may work in local agencies (POL S 496), in the state legislature (POL S 497), and in Washington, D.C. (POL S 498).

Listings of local internships and applications are available in 215 Smith.

The Washington State Legislative Internship Program is a winter-quarter program in Olympia and is open to students from all majors. Students earn 15 credits for the internship and attend a class taught by a political science faculty member. Applications are available from departmental advisers in 215 Smith and are due by the end of October.

Students in all majors may apply for the Washington Center, a comprehensive internship that places students in Washington, D.C. Students earn 15 credits for the internship. Additional information is available from departmental advisers in 215 Smith.

\* *Department Scholarships:*

- o *Hugh Bone Scholarship:* The endowed Hugh A. Bone Scholarship was established by the Department of Political Science in 1986 to recognize Professor Bone, a former department chair, and to continue his commitment to a "participative citizenry." Professor Bone founded the Washington State Legislative Internship Program and many of the students who studied with him continue active political lives due to his stewardship and interest. The scholarship was established in his name to help students with financial need to study and intern away from the UW-Seattle campus.
- o *Agnes C. Nelson Memorial Scholarship:* The departments of Political Science and Economics make annual full-tuition awards to students who demonstrate interest in the interrelationship of politics and economics and who meet financial eligibility requirements. To apply for the scholarship, students must have completed a minimum of 25 credits in political science and economics with at least 10 credits in each discipline. Deadlines are posted early in spring quarter.

\* *Student Organizations/Associations:* Pi Sigma Alpha (Political Science Honor Society), Phi Alpha Delta (pre-law fraternity). See adviser for details

*Of Special Note:*

#### Department Awards

- \* *The Robert A. Dahl Award:* The Department of Political Science recognizes an outstanding graduating senior with the Robert A. Dahl Award. To be eligible for consideration, a student must demonstrate scholarship excellence as well as interest in political science as a discipline.
- \* *Daniel C. Lev Award:* The Department of Political Science created this award to recognize the contribution of Professor Dan Lev to the department's honors program. The award recognizes an exceptional Senior Honors Thesis.
- \* *Sharon S. Redeker Award for Public Service:* The Department of Political Science created this award in honor of Sharon Redeker, who served for many years as the department's Director of Academic Services. This award recognizes the exceptional public service of a political science senior while at the University of Washington.

## Graduate Program

Graduate Program Coordinator  
215 Smith, Box 353530  
206-543-1898  
polsgrad@u.washington.edu

Graduate study in political science integrates traditional education in political science's primary fields with other fields in the social sciences, allowing an eclectic, interdisciplinary approach.

The department has an outstanding reputation in comparative politics, international relations, American politics, political theory, international relations, political economy, public policy, public law, political communication, and methodology. Graduate students can incorporate study in other campus units, such as the School of Marine Affairs, the Daniel J. Evans School of Public Affairs, the Henry M. Jackson School of International Studies, and the Department of Communication.

Graduate work in political science prepares students for the Doctor of Philosophy degree. The Master of Arts program serves as the initial stage of the Ph.D. program; the department does not offer a terminal Master of Arts degree.

## Doctor of Philosophy

### Admission Requirements

- \* Statement of Purpose detailing academic background, including research experience and methodological skills; plans and goals for study, intellectual interests and areas of specialization; and reasons for interest in studying at the University of Washington.
- \* *Writing Sample:* A relatively short paper (not to exceed 20 pages) or excerpts from a larger work (e.g., Honors thesis) demonstrating ability to write critically and analytically.
- \* Resume
- \* Letters of recommendation
- \* Transcripts
- \* *Test Scores:* GRE General Test scores sent directly by the Educational Testing Service (ETS). TOEFL score of at least 580 (237 for the computer-based TOEFL) for international students, sent directly by the Educational Testing Service (ETS)

### Degree Requirements

Minimum 124 credits, to include the following:

The department recognizes four "general fields" in political science: American politics, comparative politics, international relations, and political theory. The department requires each student to select one general field, in which the student must become familiar with the main body of literature and major intellectual issues, and develop competence in that field's mode of analysis. To meet this requirement, students must take the core course in their chosen general field. All students are required to take at least one additional core course in another general field.

Before a student earns the master's degree, a student must also prepare in a second general field or in one of the specialized fields: area study (Chinese politics, Russian, East European, and Central Asian studies, etc.), public law, political communication, political economy, political methodology, public policy processes, and minority and race politics. Specialized fields are periodically redefined given faculty/student interests.

All graduate students are required to achieve a minimum level of competence in political research methods. During their first year, students complete POL S 500, POL S 501, and POL S 502 or POL S 503. Demonstration of competence in a foreign language is not required for the Ph.D. Students who select a field(s) where the Supervisory Committee believes that competence in a language would be beneficial are so advised.

Students entering the program are expected to complete the M.A. degree (46 credits minimum) within two years. The M.A. student completes an essay of distinction and a final oral examination to demonstrate substantive field knowledge and the ability to synthesize and apply that knowledge to new problems.

The doctoral student continues preparation in the first two chosen fields and in a required third field. The third field can be another general field and/or one or more of the specialized fields listed above, and/or at most one non-designated field. A non-designated field is constructed from another academic discipline such as anthropology or sociology, or individually defined by the student. International law, public administration, urban politics, political psychology, and philosophy of social science are examples of recent non-designated fields.

The doctorate usually takes at least an additional three years beyond the M.A. (124 credits minimum, including at least 27 credits for the dissertation). Students must pass comprehensive written and oral examinations in each of the three fields. They must also write and defend their dissertation prospectus for what is termed the General Examination. Successful completion of the General Examination constitutes advancement to

candidacy. Approval of the prospectus leads to the research and writing of the dissertation. A final oral examination and committee approval of the doctoral dissertation complete the degree requirements.  
Research Facilities

Access to computing facilities and extensive data holdings is available through the Center for Social Science Computation and Research and the Political Science Collaboratory. The Department of Political Science is also affiliated with several research centers, including the Center for American Politics and Public Policy, the Center for Communication and Civic Engagement, the Center for Statistics and Social Sciences, the Comparative Law and Society Studies Center, the Harry Bridges Labor Studies Center, the Center for Comparative and Historical Analysis of Organizations and States, and the UW's Institute for the Study of Ethnicity, Race, and Sexuality. The University is also a member of the Inter-University Consortium for Political and Social Research.

## Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students, including those in their first year of study. Provided they make satisfactory progress, students are eligible for departmental financial assistance for five consecutive years.

---

# Psychology

119 Guthrie  
web.psych.washington.edu

Psychology involves the scientific study of behavior and its causes and the understanding of human and animal behavior in a variety of settings. Psychology is studied both as a natural science, which stresses physical and biological causes of behavior, and as a social science, which stresses the effects of the social setting on human and animal behavior. Major areas of emphasis are human cognition and perception, animal behavior, behavioral neuroscience, developmental, social and personality, and clinical psychology.

## Undergraduate Program

Adviser  
119 Guthrie, Box 351525  
206-543-2698  
psyadvis@u.washington.edu

The Department of Psychology offers the following programs of study:

- \* The Bachelor of Science degree with a major in psychology
- \* The Bachelor of Arts degree with a major in psychology

The Bachelor of Science program prepares students for doctoral programs in psychology, leading to careers in teaching, research, or clinical psychology. The program emphasizes laboratory/research experience and statistics.

The Bachelor of Arts program provides a general background in psychology for students preparing for master's-level graduate programs or professional schools, seeking employment at the baccalaureate level, or wanting to apply the principles of psychology in other disciplines.

The department does not have formal programs in educational, school, or counseling psychology; engineering psychology; or industrial psychology.

## Bachelor of Science

*Suggested First-Year College Courses:* MATH 120 and MATH 124, or MATH 120 and MATH 144. (MATH 120 and MATH 144 is the recommended sequence.) PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

*Suggested Second-Year College Courses:* PSYCH 202 and 209 should be completed as soon as possible during this year; BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology Department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

## Department Admission Requirements

Students apply to the Department of Psychology under the same admission requirements, regardless of the degree they will pursue.

1. Minimum cumulative UW GPA of 2.00.
2. Completion of one of the following math courses with a minimum grade of 2.0: MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. (Students may fulfill this requirement with test scores that place them in MATH 112 or MATH 124 or higher.)
3. Completion of the following psychology courses with a minimum grade of 2.0 in each course and a cumulative GPA of 2.50 in the three courses: PSYCH 101, PSYCH 202, and PSYCH 209.
4. Admission is competitive based on the following criteria:
  - a. Preparation for a major in psychology as indicated by the grades earned in courses required for admission
  - b. GPA, with an emphasis on grades earned in psychology courses
  - c. Other evidence of a commitment to becoming a psychology major
  - d. Personal statement reflecting an interest in and commitment to becoming a psychology major
  - e. Copies of unofficial transcripts from all schools attended (UW and transfer).Meeting the above criteria does not guarantee admission to the department.
5. The application deadline is the first Friday of autumn, winter, and spring quarters; no applications are accepted summer quarter. Applications and additional information are available in 119A Guthrie.

## Major Requirements

84-86 credits as follows:

1. PSYCH 101, PSYCH 202, PSYCH 209 (with a grade of 2.5 or higher), PSYCH 317 and PSYCH 318
2. One lab course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
3. One course from PSYCH 300, PSYCH 333, or PSYCH 355
4. One course from PSYCH 303, PSYCH 305, PSYCH 306, or PSYCH 345
5. One additional course from PSYCH 300, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, or PSYCH 355
6. Three additional graded upper-division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
7. PSYCH 499 (3 credits)
8. PSYCH 496, PSYCH 497, or PSYCH 498 (3 credits) or 3 additional credits of PSYCH 499
9. Up to 6 credits in 200- to 400-level electives to make a minimum total of 66 psychology credits
10. (Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)
11. *Courses in related fields:*
  - a. One of the following MATH sequences: MATH 120 and 124, or MATH 120 and MATH 144 (MATH 120 and MATH 144 preferred). Students may satisfy this requirement by testing out of MATH 124 or MATH 144
  - b. One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
  - c. One of the following philosophy courses: PHIL 120, PHIL 160
  - d. One social science course (3 to 5 credits) from anthropology or sociology
12. Cumulative minimum GPA of 2.50 in all PSYCH courses applied toward the degree (UW and transfer), with a minimum grade of 2.0 in each course presented for the major. Note that a grade of 2.5 or higher is required in PSYCH 209 in order for students to progress to the PSYCH 317/PSYCH 318 statistics series.
13. Transfer students must meet all of the above requirements and are required to complete at least 15 graded credits in psychology at the 300 and 400 level at the UW.

## Bachelor of Arts

*Suggested First-Year College Courses:* MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

*Suggested Second-Year College Courses:* PSYCH 202 and 209 should be completed as soon as possible during this year. BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

## Major Requirements

66 to 68 credits as follows:

1. PSYCH 101, PSYCH 202, PSYCH 209, PSYCH 315 (or PSYCH 317 and PSYCH 318)
2. One lab course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
3. One course from PSYCH 300, PSYCH 333, or PSYCH 355
4. One course from PSYCH 303, PSYCH 305, PSYCH 306, or PSYCH 345
5. One additional course from PSYCH 300, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, or PSYCH 355
6. Two additional graded upper division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
7. 3 credits from the following list: PSYCH 494, PSYCH 496, PSYCH 497, PSYCH 498, PSYCH 499; or credit from an approved study abroad program
8. Up to 4 credits of PSYCH 200- to 400-level electives to make a minimum total of 53 psychology credits
9. (Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)
10. Courses in related fields:
  - a. One MATH course from MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. Students may satisfy this requirement by testing out of any of the specified classes.
  - b. One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
  - c. One social science course (3 to 5 credits) from anthropology or sociology
11. Cumulative minimum GPA of 2.50 in all psychology courses applied toward the degree (UW and transfer), with a minimum grade of 2.0 in each course presented for the major
12. Transfer students must meet all the above requirements and must to complete at least 15 graded credits in psychology at the 300 and 400 level at the UW.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Students understand and apply scientific methods and principles, receive an excellent preparation in the theoretical explanations of human and animal behavior, and understand the introductory concepts underlying the biological basis of behavior.
- \* *Instructional and Research Facilities:* The psychology faculty have extensive research facilities and research laboratories on the UW campus and nearby buildings.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* The Department of Psychology offers academic credit for approved field work experience. The advising office maintains internship listings which are updated regularly.
- \* *Department Scholarships:* None offered.
- \* *Student Organizations/Associations:* Psi Chi (national honors society for undergraduate psychology students).

*Of Special Note:* A student may earn either a Bachelor of Science or a Bachelor of Arts degree in psychology, but not both.

## Graduate Program

Graduate Program Coordinator  
306 Guthrie, Box 351525  
206-543-2563  
psygrad@u.washington.edu

Graduate work in psychology is organized primarily as preparation for the Doctor of Philosophy degree. The optional Master of Science degree is taken by some doctoral students in the course of their work toward the doctorate.

For graduate instruction, the department is organized into six major areas of study: animal behavior, adult and child clinical, cognition and perception, developmental, physiological, and social psychology and personality. Specialization groups also exist in the sub-areas of diversity and self-regulation, and in community, sport, and quantitative psychology.

The program in clinical psychology is accredited by the American Psychological Association and provides scientific and professional training.

## Master of Science (Optional)

A master's-degree-only program is not available. Doctoral students have the option of obtaining a master's degree while working toward the Ph.D.

*Graduation Requirements:* Completion of first-year graduate program (see Doctor of Philosophy degree requirements below) and an appropriate research program, including a research thesis.

## Doctor of Philosophy

### Admission Requirements

An undergraduate degree in psychology is desirable, but not required. Some preparation in biological, social, or quantitative sciences is strongly advised. Applicants are judged on a number of criteria, including academic and research backgrounds, Graduate Record Examination scores, and written evaluations submitted by former professors or supervisors. Admission of new students occurs in autumn quarter. The deadline for receipt of admissions material is December 15.

### Degree Requirements

Minimum 90 credits, as follows:

- \* *Coursework:*
  - o *Orientation Week:* PSYCH 500 (1)
  - o *Psychology Colloquium:* PSYCH 500 (1)
  - o *Statistics and General Methodology:* During the first year, students must complete each of the following with a minimum grade of 2.7: PSYCH 522 (2), PSYCH 523 (2), PSYCH 524 (4), PSYCH 525 (4).
  - o *Area Course Requirements:* All students are required to take a set of six or more courses as required by the individual areas (see below)
  - o *Seminars and Advanced Seminars:* All students are strongly encouraged to attend a seminar as specified by their area (see below), and to attend the departmental colloquium (PSYCH 550).
  - o *Substitutions:* Potential substitutions should be discussed with the student's adviser and Area Head or Area Representative.
- \* *Area Requirements:*
  - o *Animal Behavior:*
    - + *Core courses:* PSYCH 502 (3), PSYCH 503 (4), PSYCH 562 (3)
    - + Three additional courses chosen in consultation with adviser. The following courses may be particularly appropriate for Animal Behavior students: PSYCH 504 (3), PSYCH 505 (4), PSYCH 513 (4)
    - + All Animal Behavior students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.
  - o *Adult Clinical Area:*
    - + *Core courses:* PSYCH 517 (3), PSYCH 518 (5), PSYCH 519 (5), PSYCH 511 (3) (PSYCH 594 (5) may be substituted), PSYCH 515 (4) (PSYCH 571 (5) or PSYCH 572 (4) may be substituted)
    - + Six additional out-of-area courses. These six courses must meet the APA curriculum guidelines for "breadth of scientific psychology," covering biological, affective-cognitive, and social aspects of behavior as determined by mutual agreement between the student and adviser. Courses should be selected toward developing cohesive themes of subspecialty expertise pertinent to the student's future research and clinical endeavors.
    - + One course each in social, affective/cognitive, and biological psychology is required. Core concepts courses that can be used to meet the APA breadth requirements are as follows: Affective-Cognitive Breadth: PSYCH 507 (3); Social Breadth: PSYCH 510 (4); Biological Breadth: PSYCH 502 (3), PSYCH 503 (4), PSYCH 504 (3), PSYCH 506 (3)

- + *Note:* PSYCH 594, PSYCH 571 and PSYCH 572 cannot be used as out-of-area courses.
- + One course in community psychology of minority mental health: PSYCH 574 (4), PSYCH 580 (3), or other approved courses.
- + Three courses in clinical issues and methods: PSYCH 591 (1, max. 3), PSYCH 587 (2), PSYCH 588 (2)
- + Two courses in assessment: PSYCH 586 (3); one of the following three courses: PSYCH 576 with PSYCH 590 practicum (5/2), PSYCH 578 with PSYCH 590 (4/2), PSYCH 579 (4)
- + *Clinical practica on a continuing basis:* PSYCH 589 (4), PSYCH 593 (1-6, max. 24), PSYCH 597 (1-5, max. 36)
- + *Seminars and advanced seminars:* PSYCH 550 (1-2, max. 30)
- + All clinical students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.
- + Other requirements for clinical students: A one-year predoctoral internship
- o *Behavioral Neuroscience:*
  - + *Core courses:* PSYCH 421 (5), PSYCH 504 (3), NEUBEH 502 (4); two of the following three courses: NEUBEH 501 (3), NEUBEH 503 (4), CONJ 531/CONJ 532 (1.5/1.5)
  - + Three additional psychology courses: PSYCH 565 (3); not more than one of the following: PSYCH 423 (5), PSYCH 424 (5), PSYCH 426 (4), PSYCH 427 (5), PSYCH 430 (4); one or more of the following: PSYCH 502 (3), PSYCH 503 (4), PSYCH 506 (3), PSYCH 513 (4)
  - + *Seminars and advanced seminars:* All BNS students are required to take at least three quarters of PSYCH 522 (2). In addition, all BNS students are required to take at least one advanced seminar (usually PSYCH 542), chosen in consultation with the student's adviser.
  - + All Behavioral Neuroscience students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their area, throughout their graduate careers.
- o *Child Clinical Area:*
  - + *Research methods:* PSYCH 529 (5), PSYCH 531 (4)
  - + Four courses in child clinical psychology: PSYCH 571 (5), PSYCH 572 (4), PSYCH 576 with PSYCH 590 practicum (5/2), PSYCH 573 (5)
  - + Four core concepts courses: PSYCH 513 (4), PSYCH 514 (4), PSYCH 515 (4), PSYCH 517 (3)
  - + One course in minority mental health: PSYCH 580 (3)
  - + Three courses in clinical issues and methods: PSYCH 591 (1, max. 3), PSYCH 587 (2), PSYCH 588 (2)
  - + *Clinical practica on a continuing basis:* PSYCH 589 (4), PSYCH 593 (1-6, max. 24), PSYCH 597 (1-5, max. 36)
  - + One treatment seminar: PSYCH 543 (3-5, max. 30), PSYCH 553 (1-2, max. 30), PSYCH 550 (1-2, max. 30)
  - + All Child Clinical students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.
  - + Other requirements for Child Clinical students: A one-year predoctoral internship
- o *Cognition and Perception:*
  - + *Core courses:* PSYCH 506 (3), PSYCH 507 (3), PSYCH 508 (3)
  - + Three additional courses, selected to broaden and deepen the student's understanding of his/her research specialty. These courses should be chosen in consultation with the adviser. They can be additional core concepts courses in any area, or other courses chosen from anywhere on campus, within or outside the Psychology Department. The following out-of-area core concepts courses may be particularly appropriate for cognition: PSYCH 504 (3), PSYCH 510 (4), PSYCH 514 (4), PSYCH 515 (4)
  - + *Seminars and advanced seminars:* PSYCH 555 (1-2, max. 30)
  - + All Cognition/Perception students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.
- o *Developmental Psychology:*
  - + *Research Methods:* PSYCH 529 (5)
  - + *Area course requirements:* PSYCH 513 (4), PSYCH 514 (4), PSYCH 515 (4)
  - + Three additional courses, selected to broaden and deepen the student's understanding of his/her research specialty. These courses should be chosen in consultation with the adviser. They can be additional core concepts courses in any area, or other courses chosen from anywhere on campus, within or outside the Psychology Department. The following out-of-area core concepts courses may be particularly appropriate for Developmental students, depending on the student's research specialty: PSYCH 503 (4), PSYCH 504 (3), PSYCH 507 (3), PSYCH 510 (4), PSYCH 511 (3)

- + In lieu of a core concepts course in Child Clinical Psychology, PSYCH 553, Seminar in Child Clinical Psychology, is also recommended for Developmental graduate students.
- + *Seminars and advanced seminars:* PSYCH 556 (1-2, max. 30)
- + All Developmental students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.
- o *Social Psychology and Personality:*
  - + In addition to the four statistical courses required by the department, Social/Personality students are required to take one additional quantitative course, within or outside the department.
  - + *Core courses:* PSYCH 510 (4), PSYCH 511 (3)
  - + Four additional courses, selected to broaden and deepen the student's understanding of his/her research specialty. These courses should be chosen in consultation with the adviser. They can be additional core concepts courses in any Area, or other courses chosen from anywhere on campus, within or outside the Psychology Department.
  - + *Seminars and advanced seminars:* PSYCH 557 (1-2, max. 30), one additional departmental seminar (PSYCH 550 through PSYCH 558) every quarter throughout the student's graduate career
  - + All Social/Personality students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.

## Assistantships, Fellowships, or Traineeship Opportunities

Research and teaching assistantships are generally available. Traineeships and fellowships are also available.

## Romance Languages and Literature

The department consists of two divisions: French and Italian Studies and Spanish and Portuguese Studies. The divisions offer programs designed to develop competence in the reading, speaking, and writing of the languages and in the study of the literatures and cultures.

## French and Italian Studies

C254 Padelford  
<http://depts.washington.edu/frenital/>

## Undergraduate Program

Adviser  
 C252 Padelford, Box 354361  
 206-616-5366

The Division of French and Italian Studies offers the following programs of study:

- \* The Bachelor of Arts degree with a major in French or Italian
- \* Minors in French and Italian

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* Community college students should take as many lower-division language courses as possible before transferring to the UW.

## Department Admission Requirements

Students in good academic standing may declare this major at any time.

## Major Requirements

*French:* 60 credits beyond FRENCH 203, as follows:

- \* FRENCH 301, FRENCH 302, FRENCH 303, FRENCH 304, FRENCH 305, FRENCH 306, FRENCH 378
- \* Three 400-level courses
- \* Two approved 300- or 400-level literature/culture courses

Transfer credits at the 400 level are accepted only by petition to the Undergraduate Studies Committee.

*Italian:* 60 credits beyond ITAL 203, as follows:

- \* ITAL 301, ITAL 302, ITAL 303
- \* Two from ITAL 341, ITAL 342, ITAL 351, ITAL 352
- \* ITAL 401 (or ITAL 470), ITAL 402 (or ITAL 403), and ITAL 404 (or ITAL 405)
- \* 20 additional credits in literature/culture/film courses at the 300 or 400 level, with at least 10 of these credits at the 400 level.

Prerequisite for all 300-level courses is ITAL 203 or approved equivalent. A minimum 2.0 grade is required in any course applied toward the major.

## Minor

*Minor Requirements:*

*French* -- 30 credits beyond FRENCH 203, as follows: FRENCH 301, FRENCH 302, FRENCH 303, FRENCH 304 (or FRENCH 305), FRENCH 306 (or a 400-level course, with permission of instructor), FRENCH 378.

Up to 5 credits taken abroad may be counted toward the minor.

*Italian* -- 30 credits beyond ITAL 203, as follows: ITAL 301, ITAL 302, ITAL 303, ITAL 401, ITAL 402 (or ITAL 403), ITAL 404 (or ITAL 405), or equivalent 400-level courses).

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Employment related to foreign languages is sometimes in specialized fields, but in general could be in many areas. The combination of studies in foreign languages and international affairs is ideal for students seeking job opportunities in government (foreign service and diplomatic fields, intelligence agencies, immigration and customs, Department of Labor, law enforcement, armed forces, legal agencies, public aid, social and community work, and international agencies, such as the United Nations and UNICEF), business (airlines, marketing, banking/finance, multi-national corporations, shipping industry, travel and hotel industries, import/export firms, publishing houses, and consulting) and related fields (journalism, radio and television, fashion enterprises, teaching/counseling, translation, bilingual office work, library/museum work, nursing, phone companies, art and cultural affairs, and film and theatrical industries).

Students with substantial foreign language fluency who combine their language skills with a solid foundation in liberal education and adequate job preparation and internships find fulfilling occupations. The department's commitment is to impart to our students a genuine desire to learn throughout their lives, a flexibility that lends itself to changes, and a seriousness of purpose to apply to whatever they undertake in life.

- \* *Instructional and Research Facilities:* UW Rome Center in Rome, Italy.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* Rome Center offers one intern position per year, providing room and board and a modest stipend. Interns work in the administrative Rome/UW office and are required to follow an independent course of language and literature study or other proposed course of study.
- \* *Department Scholarships:* None available.
- \* *Student Organizations/Associations:* Italian Club.

*Of Special Note:* The department sponsors study-abroad programs in France and Italy. See adviser for details.

## Graduate Program

Graduate Program Coordinator (French)  
C233 Padelford, Box 354361  
206-616-4444

Graduate Program Coordinator (Italian)  
C259 Padelford, Box 354361  
206-616-3940

The Division of French and Italian Studies offers programs of graduate study leading to the degrees of Master of Arts in French or Italian and Doctor of Philosophy in French. Students who wish to complete their doctoral studies in Italian may do so through the Department of Comparative Literature.

## Master of Arts in French Studies

### Admission Requirements

Applicants should present an undergraduate major or its equivalent in French literature and culture. Preparation should be equivalent to the requirements for the Bachelor of Arts degree in French at the University of Washington. All applicants must prove proficiency in the speaking and writing of the French language.

Before their enrollment in French Studies, all incoming M.A. students must complete a list of period and critical readings.

### Degree Requirements

55 credits, as follows:

A total of 45 applicable credits (400-level and above) in coursework; an additional 10 credits in FRENCH 600 for examination preparation. 15 credits of the coursework must be taken at the 500 level. 5 coursework credits are given for the required pedagogy methods seminar for first-time TAs. To remain in good standing the student must maintain a cumulative minimum GPA of 3.60. The minimum acceptable grade for any given course is 2.7.

Students fulfill four of the department's seven period distributions. In addition, they take one class in the history of criticism/critical theory rubric.

Students are encouraged to take up to 15 credits in disciplines outside their major field of study. These credits must be approved by the Graduate Program Coordinator at the time of registration. Credits in supporting or related fields are allowed only for courses numbered 400 or above.

The M.A. examinations (written and oral) are taken in the sixth quarter of study.

## Master of Arts in Italian Studies

### Admission Requirements

Applicants should present an undergraduate major or its equivalent in Italian literature and culture. Preparation should be equivalent to the requirements for the Bachelor of Arts degree in Italian at the University of Washington. All applicants must prove proficiency in the speaking and writing of Italian language.

1. Application for Graduate Admission, along with supporting documents
2. Three letters of recommendation
3. Autobiographical statement
4. CD or audio cassette recording of the applicant reading the autobiographical statement mentioned above, together with any other informal comments the applicant wishes to make.
5. Writing sample
6. Graduate Record Examination (GRE) scores.
7. Foreign students should note that the Graduate School requires proof of proficiency in the English language in the form of the TOEFL (Test of English as a Foreign Language) or its computerized version (TOEFLC) or the Michigan Test and also the TSE (Test of Spoken English). A TOEFL score of 500 (or a TOEFLC score of 173) is required for admission, and a score of 580 (or 237 on the computerized form) is required for Teaching Assistant eligibility. Alternatively a Michigan Test score of 80 is required for admission and 90 for Teaching Assistantship eligibility. A minimum score of 55 is required on the TSE.

### Degree Requirements

60 credits, as follows:

A total of 50 applicable credits (400-level and above) in coursework, 30 of which are at the 500 level. An additional 10 credits in ITAL 600 is required for examination preparation. To remain in good standing the student must maintain a minimum cumulative GPA of 3.60. The minimum acceptable grade for any given course is 2.7.

Students are encouraged to take up to 10 credits in disciplines other than their major field of study. Credits in such supporting or related fields are allowed only for courses numbered 400 or above.

M.A. candidates must pass a foreign language reading ability examination in a language other than the major or their native language. Students stipulate their choice at the time of first enrollment, after consultation with the graduate adviser.

The Graduate Program Coordinator, in consultation with the student and appropriate faculty members, appoints a committee of three Italian and Italian adjunct faculty members. The supervisory committee should be formed no later than the first week of the quarter prior to the examination.

The M.A. examinations (written and oral) are taken in the final quarter of study.

## Doctor of Philosophy in French Studies

### Admission Requirements

Applicants for the doctorate in French studies are normally required to present the M.A. degree in French or to demonstrate its equivalent for admission into the Ph.D. program. Students with a background in comparative literature or with a specialization in French within another national literature and language program will be admitted to the Ph.D. program on a case-by-case basis. All incoming doctoral students must have demonstrable, broad knowledge in French literature and culture as well as a general background in critical theory (i.e. course work in critical theory and/or course work that incorporates a strong component of critical theory).

### Degree Requirements

Minimum 77 credits (beyond the 45 required for the French Studies' M.A.), of which 25 should be taken in applicable 500-level courses (graduate seminars both inside and outside the division) and 27 as dissertation credits (FRENCH 800). The other 25 credits of 400-level and above courses should be chosen in collaboration with the Graduate Program Coordinator. 10 of these credits may be 600-level independent studies. Students work closely with the Graduate Program Coordinator in the selection of graduate seminars within French studies and of courses outside French studies that correspond to the students' cross-disciplinary interests. The doctoral coursework should normally be completed in six full-time academic quarters, after which the student advances to Ph.D. candidate status and completes the minimum 27 hours of dissertation credits. Upon completion of the requisite course credits and the other departmental requirements, the student proceeds, with the approval of the Doctoral Supervisory Committee, to the written general examinations and then to the oral general examinations.

### Financial Aid

The department awards annually a number of teaching assistantships. Research assistantships are available on a limited and competitive basis. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the 10 weeks of the quarter.

## Spanish and Portuguese Studies

C104 Padelford  
depts.washington.edu/spanport

The educational philosophy of Spanish and Portuguese studies is that knowledge and understanding of other cultures is fundamental in an increasingly global world, and that competence in the languages of those cultures is an indispensable gateway to them. Spanish studies provides students with the four basic language skills (listening, speaking, reading, and writing) in increasing levels of sophistication so that they may read and analyze works of literature written in Spanish as well as understand complex cultural structures and artifacts from Spain, Latin America, and the Latino populations of the U.S. The UW offers beginning and intermediate Portuguese and all levels of Spanish.

## Undergraduate Program

Adviser  
C104F Padelford, Box 354360  
206-543-2075  
spanport@u.washington.edu

The Division of Spanish and Portuguese Studies offers the following programs of study:

- \* The Bachelor of Arts degree in with a major in Spanish
- \* A minor in Spanish

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* First year: SPAN 101, SPAN 102 (or SPAN 110) and SPAN 103; or SPAN 121, SPAN 122, SPAN 123; or SPAN 134; Second year: SPAN 201, SPAN 202 (or SPAN 210) and SPAN 203. Spanish, Latin American, and Chicano literature. Courses related to history and culture. Courses in English literature and comparative literature.

### Department Admission Requirements

1. Completion of SPAN 203, with a minimum cumulative GPA of 2.70 for all Spanish course- work completed and a minimum grade of 2.5 in each Spanish course.
2. Completion of at least 5 credits of English composition with a minimum grade of 2.5.
3. Applications are available outside C-104F Padelford and online beginning the first day of autumn, winter, spring, and summer quarter. To assure registration priority, applications should be reviewed with the Spanish adviser and filed ideally during the first three weeks of the quarter.

### Major Requirements

58 credits beyond SPAN 203 as follows:

1. SPAN 301, SPAN 302, SPAN 303 (or SPAN 314, SPAN 315, SPAN 316; or SPAN 310; or SPAN 330); SPAN 321, SPAN 322, SPAN 323.
2. One 300-level literature elective course (chosen from SPAN 304 through SPAN 308, SPAN 319, SPAN 340, SPAN 350 through SPAN 352).
3. Five 400-level courses (only one course numbered from SPAN 400 through SPAN 406 may apply to the major).
4. Participation in an approved study abroad program (one quarter minimum, any level) or one or more experiential learning experiences (minimum 3 credits of SPAN 392) which involve significant engagement with the Spanish-speaking community. Students are strongly encouraged to do both.
5. Other than SPAN 400 through SPAN 405, only one course whose instructional materials are primarily in English may apply toward the major.

### Minor

*Minor Requirements:* Seven courses (minimum 31 credits) above the 203 level to include the following:

1. SPAN 301, SPAN 302, SPAN 303 (or SPAN 314, SPAN 315, SPAN 316; or SPAN 310; or SPAN 330).
2. Two of the following three core courses: SPAN 321, SPAN 322, SPAN 323.
3. Two 300-level electives. (400-level courses may be substituted for one or both electives.)
4. Only one course whose instructional materials are primarily in English may apply to the minor. SPAN 327 does not apply to the minor and is not open to heritage/native speakers.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The study of Spanish and Portuguese is both skills- and content-based, i.e., it has practical and cognitive elements. Students learn to communicate in Spanish or Portuguese, refining their language skills as they acquire a body of knowledge about the literary and cultural history of Spain, Latin America, and the Spanish-speaking populations of the United States. Graduates have found these skills extremely useful as they pursue careers in teaching, business, NGOs and human rights organizations, law, and politics.

- \* *Instructional and Research Facilities:* Departmental facilities include a Writing Center for students registered in third-year Spanish. The Center for Spanish Studies, housed in the department, is a joint initiative of the University of Washington, the Education Office of the Embassy of Spain, and the Office of Superintendent of Public Instruction. This center provides services that include workshops for K-12 teachers of Spanish, sponsorship of cultural events, and a lending library of books as well as audio and visual materials.

The department directs two study abroad programs, in Mexico (Oaxaca) and Spain (Cadiz). These programs are "living laboratories." Approximately 75 students participate each year.

- \* *Honors Options Available:* With College Honors. With Distinction. See adviser for details.
- \* *Research, Internships, and Service Learning:* Internship opportunities are posted on the department Web site as they become available. Also, students may participate in service learning, in which they combine study with service to the community. Students must volunteer two to five hours per week (a minimum of 20 hours per quarter) in organizations that provide services primarily, although not exclusively, to Spanish speakers. Alternatively, they may volunteer in public schools as tutors of different academic themes. Some of the organizations and schools involved include CASA Latina, The Mexican Consulate, El Centro de la Raza, Our Lady of Mt. Carmel, Northwest Immigrant Rights Project, Cascade People's Center, Center for Spanish Studies, John Stanford International School, Bryant Elementary School, John Hay Elementary School, Hamilton Middle School, Nathan Hale High School, the Pipeline Project, and the East Side Literacy program. Students apply and increase their knowledge of the Spanish language in a real context. They are exposed to Hispanic multiculturalism and become active agents of social change in the community. Approximately 18 students participate each year.
- \* *Department Scholarships:* An annual scholarship, the Susan B. Johnson Memorial Endowment Fund, is awarded to a student of Spanish for foreign study in Spain.

- \* *Student Organizations/Associations:* None.

*Of Special Note:* 100- and 200-level Spanish courses do not count toward major/minor requirements.

## Graduate Program

Graduate Program Coordinator  
C104 Padelford, Box 354360  
206-543-2075  
spanport@u.washington.edu

The Division of Spanish and Portuguese Studies offers programs of graduate study leading to the Master of Arts degree.

The Master of Arts degree program in Hispanic Literary and Cultural Studies was reformed and updated in 2001 to foster study of Hispanic culture, literature, and language together. The program calls attention to the rich diversity of Hispanic cultural texts and to their interdisciplinary study while also promoting broad understanding of Spanish and Latin American literature. The program gives careful attention to acquainting students with the traditions of scholarship in the field as well as a range of current textual theory, criticism, and research methods. Study of Portuguese and other Romance literatures and cultures, comparative literature, Romance and Spanish linguistics, and other related disciplines may be included in the Master's degree program. The degree is earned normally in six academic quarters.

Students who wish to pursue advanced study in Spanish and Portuguese in a post-Master's degree program may do so by entering the doctoral studies programs of Comparative Literature or other departments of the University.

## Master of Arts

### Admission Requirements

- \* Application for admission to the Graduate School
- \* Three letters of recommendation
- \* A Waiver Form, on which the applicant waives the right to have access to the letters of recommendation.

- \* Academic autobiographical statement composed by the applicant in Spanish
- \* A cassette recording (no micro-cassettes) of the applicant reading the autobiographical statement mentioned in above, together with any other informal comments the applicant wishes to make.
- \* A sample of the applicant's written work in Spanish in some area of Hispanic literature and culture. This may be a copy of a paper written for a course in the area of the applicant's major.
- \* Graduate Record Examination (GRE) scores
- \* Foreign students should note that the Graduate School requires proof of proficiency in the English language in the form of the TOEFL (Test of English as a Foreign Language) or its computerized version (TOEFLC) or the Michigan Test and also the TSE (Test of Spoken English). A TOEFL score of 500 (or a TOEFLC score of 173) is required for admission, and a score of 580 (or 237 on the computerized form) is required for Teaching Assistant eligibility. Alternatively a Michigan Test score of 80 is required for admission and 90 for Teaching Assistantship eligibility. A minimum score of 55 is required on the TSE.

## Degree Requirements

- \* A total of 60 applicable credits (400 level and above), 25 of which must be at the 500 level. To remain in good standing the student must maintain a cumulative grade point average of 3.00. The minimum acceptable grade for any given course is 2.7.
- \* SPAN 577 (5). Note: SPAN 510 (3) is required of all teaching assistants and is to be taken during or before a student's first quarter of teaching.
- \* *Distribution requirement:* A minimum of 5 credits (normally one course) must be earned in each of the following areas: medieval and "Golden Age" Spain; Spain of the eighteenth and nineteenth centuries; twentieth-century Spain; colonial and nineteenth-century Latin America; and twentieth-century Latin America.
- \* M.A. candidates must pass an auxiliary language reading ability examination in a language other than English and Spanish. Normally this language will be selected from among the Romance Languages and German. Students stipulate their choice at the time of first enrollment, after consultation with the Graduate Program Coordinator, and is examined no later than the fourth quarter of enrollment. The student consults first with the division's academic adviser and then completes arrangements with the language department administering the examination or with the Educational Assessment Center.
- \* *The M.A. examination:* The M.A. examination is written in the sixth quarter of study, ordinarily in spring quarter.
- \* *Thesis or essay:* Students may elect to include in the required 60 applicable credits 10 credits of M.A. thesis (SPAN 700) or 5 credits of M.A. essay (SPAN 590). Neither the thesis nor the essay is a degree requirement. The M.A. thesis (minimum 40 pages of text) and M.A. Essay (minimum 20 pages) are directed by a graduate faculty member and submitted to the Graduate Studies Committee for its approval.

## Financial Aid

The department awards annually a number of teaching assistantships. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the ten weeks of the quarter.

## Scandinavian Studies

318 Raitt  
depts.washington.edu/scand

Scandinavian studies is concerned with the study of languages, literature, history, politics, and cultures of Denmark, Finland, Iceland, Norway, Sweden, and the Baltic States of Estonia, Latvia, and Lithuania. Emphasis is placed both on contemporary literature and culture and on historical development. Although most courses designed for majors are taught in the original languages, a broad spectrum of courses designed primarily for nonmajors is offered in English.

## Undergraduate Program

Adviser  
305Z Raitt, Box 353420  
206-543-6099

The Department of Scandinavian Studies offers the following programs of study:

- \* The Bachelor of Arts degree with a major in Danish, Norwegian, Swedish, or Scandinavian area studies.
- \* Minors in Danish, Finnish, Norwegian, Swedish, Baltic studies, and Scandinavian area studies.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* First- and second-year Danish, Estonian, Finnish, Latvian, Lithuanian, Norwegian, or Swedish.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

*Danish, Norwegian, or Swedish:* 65 credits, of which 35 are in upper-division courses. The 65 credits include 30 credits in first- and second-year language training, 15 credits in literature courses in the chosen language, one course in Scandinavian area studies, a course in the history of Scandinavian languages, a course in Scandinavian literature in translation, and a senior essay (SCAND 498).

*Scandinavian Area Studies:* 65 credits, of which 30 are in upper-division courses. The 65 credits include 30 credits in the chosen Scandinavian or Baltic language (normally first and second year), a minimum of one course from each of four area-studies fields (Scandinavian folklore and film; literature in translation; history and mythology; society and politics), and a senior essay (SCAND 498).

### Minor

*Minor Requirements:*

*Baltic Studies:* 35 credits as follows:

1. 15 credits of first year Estonian, Latvian, or Lithuanian
2. 20 credits of upper division Scandinavian coursework, including at least one Baltic studies course from the following: SCAND 344, SCAND 345, SCAND 454, SCAND 455
3. Students entering the UW with language proficiency in Estonian, Latvian, or Lithuanian beyond the first year of language training must take an additional 10 credits of upper division language courses and must earn a minimum total of 25 credits in relevant coursework

*Danish, Finnish, Norwegian, or Swedish:* 35 credits as follows:

1. 15 credits of first year Danish, Finnish, Norwegian, or Swedish
2. 15 credits of second year Danish, Finnish, Norwegian, or Swedish
3. 5 credits of upper division Scandinavian coursework or 5 credits of an upper division language course
4. Students entering the UW with language proficiency in Danish, Finnish, Norwegian, or Swedish beyond the first year of language training must take an additional 10 credits of upper division language courses and must earn a minimum total of 25 credits in relevant coursework.

*Estonian, Latvian, Lithuanian:* 35 credits as follows:

1. 15 credits of first year Estonian, Latvian, or Lithuanian
2. 15 credits of second year Estonian, Latvian, or Lithuanian
3. 5 credits of Baltic studies coursework (SCAND 344, SCAND 345, SCAND 454, or SCAND 455), or 5 credits of an upper division language course.
4. Students entering the UW with language proficiency in Estonian, Latvian, or Lithuanian beyond the first year of language training must take an additional 10 credits of upper division language courses and must earn a minimum total of 25 credits in relevant coursework.

*Scandinavian Area Studies:* 35 credits as follows:

1. 15 credits of first year Danish, Finnish, Norwegian, or Swedish
2. 20 credits of upper division Scandinavian coursework
3. Students entering the UW with language proficiency in Danish, Finnish, Norwegian, or Swedish beyond the first year of language training must take an additional 10 credits of upper division language courses and must earn a minimum total of 25 credits in relevant coursework.

## Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes:* Graduates of the Department of Scandinavian Studies have an advanced level of proficiency in a Scandinavian, Fenno-Ugric, or Baltic language. They can talk about a wide range of concrete topics in a sustained conversation and have the ability to interpret and write about literary texts, non-fiction, and other media. Graduates also have knowledge of major figures, ideas, and institutions in Baltic or Nordic culture, history, literature, and politics that enriches a global perspective. They have the ability to research and synthesize source material in the target language and can produce a scholarly essay in English on a topic within their area of concentration.

Graduates of the Scandinavian studies program have the qualifications to embark on careers that require skills in the interpretation of information in various media, critical analysis, and effective communication and to continue in graduate programs and professional schools that value an international perspective.

\* *Instructional and Research Facilities:* None

\* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

\* *Research, Internships, and Service Learning:* Internships at museums or with Scandinavian businesses are possible. Exchange program opportunities with Aarhus, Copenhagen, Linköping, Stockholm, Uppsala, Bergen, Oslo, Åbo/Turkku, and Helsinki also exist.

\* *Department Scholarships:* The department offers several scholarships for students of Danish, Finnish, Norwegian, and Swedish.

\* *Student Organizations/Associations:* The Danish Club, the Norwegian Club, the Swedish Club, and the Finnish Club.

## Graduate Program

Graduate Program Coordinator  
318 Raitt, Box 353420  
206-543-0645  
uwscand@u.washington.edu

The Department of Scandinavian Studies offers graduate programs of study leading to the Master of Arts and Doctor of Philosophy degrees. For the M.A. degree, the emphasis may be placed on Old Icelandic (Old Norse), Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies. Ph.D. degree aspirants must complete one quarter's study of Old Icelandic and concentrate their studies primarily within one of five areas: Danish language and literature, Finnish language and literature, Norwegian language and literature, Swedish language and literature, or Scandinavian area studies.

For the graduate student, programs in Scandinavian studies open several areas of inquiry: medieval, particularly Old Icelandic; modern, including the eighteenth century; Romanticism; the Modern Breakthrough; and the twentieth century. Attention is paid to the history of the Scandinavian languages, prose, drama, and poetry. Opportunities for supervised study and specialization also exist in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies, as well as in comparative-literature study.

## Master of Arts

Two options are available, each allowing the student to emphasize a target language while pursuing courses in Scandinavian languages, literature, or area studies.

1. An emphasis on Scandinavian languages and literature includes acquisition of a working knowledge of literary history, critical theory and text analysis, plus study of one secondary area.
2. An emphasis on Scandinavian area studies includes the study of Scandinavian folklore, mythology, history, politics, society, and Baltic studies, with an emphasis in one of these areas.

*Admission Requirement:* Bachelor of Arts degree with major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies, or equivalent background, including advanced language proficiency in one Nordic language.

*Graduation Requirements:* Minimum of 40 credits in courses or seminars in Scandinavian and related subjects approved by the department, of which at least 20 credits must be in courses numbered 500 and above; reading knowledge of French or German (another non-Scandinavian language may be substituted with faculty approval); written and oral examination; option between thesis and non-thesis program. Candidates in Scandinavian languages and literature must satisfy the departmental requirement in Old Icelandic.

## Doctor of Philosophy

For the Ph.D. degree, the student concentrates primarily on one of two areas: Scandinavian languages and literature, or Scandinavian area studies, with an emphasis on the student's target language. Major attention is given to the history of the Scandinavian languages, literary history and theory, and genre study. Opportunities exist for graduate work in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies.

*Admission Requirement:* Master of Arts degree with major in Scandinavian languages and literature or equivalent background.

*Graduation Requirements:* 40 credits beyond the master's degree in courses or seminars in Scandinavian languages and literature and related subjects approved by the department, one quarter's study of Old Icelandic, a reading knowledge of French and German (other non-Scandinavian languages may be substituted with faculty approval), General Examination for admission to candidacy, 27 credits of SCAND 800 (dissertation) taken over at least three quarters, and a Final Examination on the dissertation.

## Financial Aid

Teaching assistantships in Danish, Finnish, Norwegian, Swedish, and Scandinavian Area Studies are usually available, as well as occasional research assistantships. If funding allows, a Baltic-language teaching assistantship may be available.

---

## Slavic Languages and Literatures

M253 Smith  
depts.washington.edu/slavweb

Slavic languages and literatures include the principal East European languages and literatures and Slavic linguistics. Languages include Bulgarian, Czech, Polish, Romanian, Russian, Bosnian/Croatian/Serbian, and Ukrainian.

## Undergraduate Program

Adviser  
M253A Smith, Box 353580  
206-543-6848  
slavicll@u.washington.edu

The Department of Slavic Languages and Literatures offers the following programs of study

- \* The Bachelor of Arts degree with a major in Slavic languages and literatures with options in Russian, and East European languages and culture
- \* Minors in Russian language, Russian literature/Slavic literatures, and Slavic languages.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* First- and second-year Russian. Courses that develop writing skills.

## Department Admission Requirements

Students in good academic standing may declare this major at any time.

## Major Requirements

*Russian Option (60 credits beyond second year):*

1. RUSS 301, RUSS 302, RUSS 303, or the equivalent
2. RUSS 401, RUSS 402, RUSS 403, or the equivalent
3. RUSS 321, RUSS 322, RUSS 323, RUSS 451
4. 10 credits from the following: RUSS 324, RUSS 351, RUSS 352, RUSS 420, RUSS 421, RUSS 422, RUSS 423, RUSS 424, RUSS 425, RUSS 430, RUSS 461, RUSS 490, SLAV 351, SLAV 420, SLAV 423, SLAV 425, SLAV 426, SLAV 490; HSTEU 444, HSTEU 445.
5. Minimum 2.50 cumulative GPA in all RUSS and SLAV courses completed (UW and transfer), with a 2.0 minimum grade in each course presented for the major. Transfer students are required to complete at least 15 graded credits in Slavic department courses at the UW.

*East European Languages and Culture Option (55 credits):*

1. Two years of a principal East European language, or the equivalent
2. SLAV 351
3. 20 credits of literature, culture, linguistics, and history, as appropriate.
4. Minimum 2.50 cumulative GPA in all BCS, BULGR, CZECH, HSTEU, POLSH, SISJE, SISRE, and SLAV courses completed (UW and transfer), with a 2.0 minimum grade in each course presented for the major. Transfer students are required to complete at least 15 graded credits in Slavic department courses at the UW.

## Minor

*Minor Requirements:*

Transfer students are required to complete at least 15 graded credits in Slavic department courses at the UW. Minimum 2.0 grade required in each course presented for the minor.

*Russian Language:* 25 credits to include RUSS 301, RUSS 302, RUSS 303 and 10 credits from RUSS 351, RUSS 352, RUSS 401, RUSS 402, RUSS 403, RUSS 451, SLAV 351, SLAV 425.

*Russian Literature/Slavic Literatures:* 25 credits to include RUSS 321, RUSS 322, RUSS 323 and 10 credits from RUSS 420, RUSS 421, RUSS 422, RUSS 430, RUSS 461, RUSS 490 (Russian-literature option), or 10 credits from BCS 420, CZECH 420, POLSH 420, SLAV 420, SLAV 423, SLAV 490 (Slavic-literatures option).

*Slavic Languages:* 25 credits to include language courses in a Slavic language (other than Russian) numbered 404, 405, 406; SLAV 351; and 5 credits from BCS 420, CZECH 420, POLSH 420, SLAV 423, SLAV 490.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Graduating majors in Slavic languages and literatures have a solid command of a Slavic language with speaking, listening, reading and writing, and translation skills at the intermediate high or advanced level. They have a broad knowledge of the history of the relevant country, and of its modern culture. Students in the literature and culture option have a general knowledge of major periods and detailed knowledge of two or three particular authors or genres. Students in the linguistics option have a good understanding of Slavic languages in general and the language of their specialization in particular, as well as knowledge of major issues in contemporary phonology, morphology, and syntax. All students develop good general analytical skills and the ability to explore and understand another culture through mastery of its language.
- \* *Instructional and Research Facilities:* None.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* None.
- \* *Department Scholarships:* Vadim Pahn Scholarship for continued study of Russian in an intensive summer language program.
- \* *Student Organizations/Associations:* Rodnoi Ugolok, the Russian student society

## Graduate Program

Graduate Program Coordinator  
M268 Smith, Box 353580  
206-543-6848

The Department of Slavic Languages and Literatures offers a complete program of courses and seminars leading to the Master of Arts and Doctor of Philosophy degrees in Russian and East European languages, literatures, and cultures. Languages taught in the department include Czech, Old Church Slavonic, Polish, Russian, and Bosnian/Croatian/Serbian.

The graduate program is organized to permit completion of the master's degree in four to six quarters and the doctoral degree in three additional years. The duration of each program, however, will depend on the extent of the student's preparation upon entrance into the program.

## Master of Arts

### Admission Requirements

A student seeking admission to the M.A. program should have a bachelor's degree in Russian or Slavic Studies which includes four years of Slavic language study. Applicants with equivalent experience and basic coursework in Slavic literatures, cultures and history are considered. A student not meeting these requirements may be given conditional admission but is expected to make up any deficiencies. Consideration will be given to those with three years of language who enroll in fourth-year Summer Intensive Russian the quarter before entry into the program.

All students entering the program take a diagnostic language test to establish their level of proficiency and determine what further instruction may be necessary.

### Degree Requirements

45 credits minimum, as follows:

- \* *Required Slavic core courses, 11 credits:* RUSS 501 (2), RUSS 502 (3), SLAV 501 (2), SLAV 519 (3)
- \* *Required Slavic linguistics courses, 10 credits from the following:* SLAV 550 (5), SLAV 551 (5), SLAV 570 (3-5, max. 15)
- \* *Required Slavic literature courses, 10 credits:* RUSS 542 (5), RUSS 543 (5)
- \* *Second Slavic language, 5 credits:* one of the following: BCS 403, BULGR 403, CZECH 403, or POLSH 403 (implies completion of 401 and 402)
- \* *Elective courses, 10 credits from above or from the following:* BCS 406 (5), BCS 420 (5), CZECH 406 (5), CZECH 420 (5), POLSH 406 (5), POLSH 420 (5), RUSS 420 (5), RUSS 421 (5), RUSS 422 (5), RUSS 423 (5), RUSS 425 (5), RUSS 426 (5), RUSS 430 (5), RUSS 512 (5), RUSS 520 (5, max. 20), RUSS 521 (5), RUSS 522 (5), RUSS 523 (5), RUSS 526 (5, max. 15), RUSS 570 (5), RUSS 577 (5), SLAV 420 (5, max. 15), SLAV 423 (5), SLAV 425 (5), SLAV 426 (5), SLAV 470 (5), SLAV 490 (3-5, max. 15), SLAV 520 (5), SLAV 561 (5), SLAV 562 (5), SLAV 563 (5), SLAV 565 (4), SLAV 566 (4), URK 420 (5)

### Examinations

- \* *Russian Language:* This examination is based on texts given to the student on the day before the examination. For the examination itself, clean copies of the texts are supplied and the student has three hours to translate specified passages and write an essay. After the examination, the student discusses (in Russian) the content and language of the texts with two examiners. The examination is graded High Pass, Pass, and Fail. Students failing the examination must repeat RUSS 501 and/or RUSS 502 before taking the exam again. A High Pass is normally required for admission to the Doctoral Program.
- \* *Other Slavic Languages:* Students whose programs center around a Slavic language other than Russian must make special arrangements for further study and eventual testing in their target language.
- \* *M.A. Comprehensive Exams:* Normally in three fields and taken within a period of two weeks, the examinations are four hours long taken in situ. With permission of adviser, students may request three-day take-home essays (usually from Friday morning to Monday morning).

## Doctor of Philosophy

### Admission Requirements

Applicants to the doctoral program in Slavic Languages and Literatures are expected to possess an M.A. or equivalent degree. They are admitted by vote of the graduate faculty on the basis of their language skills (Slavic and English), general background in Slavic cultures, and a comprehensive statement of purpose.

## Degree Requirements

- \* *Coursework:* At least 90 credits, including graduate course credits taken toward the M.A. Degree, and at least one full year of residence at the UW.
- \* *Readings:* Many post-M.A. credits are satisfied with individually arranged readings courses. Courses are mutually agreed upon by the student and the Committee Chair and are organized with an eye to the comprehensive examinations. Students whose emphasis is Slavic linguistics may include a third Slavic language as a field. Ph.D. students with a literature focus should take one year of a second Slavic language (401-403 sequence) or test out of 403. Ph.D. students with a linguistics focus should take two years of one language (401-406 sequence) or at least one year of two different second Slavic languages. The student may also satisfy this requirement by demonstrating appropriate proficiency in the language(s). Students majoring in language pedagogy follow the linguistics guidelines.
- \* *Comprehensive Examinations:* Students schedule their Ph.D. exams no later than the end of the sixth quarter of full residency after receiving their M.A. As a prerequisite for scheduling the General Examination, the candidate must demonstrate reading ability in a language appropriate for research purposes. This requirement may be fulfilled either by taking a standardized examination in the appropriate language or by an in-house examination given by a member of the Graduate Faculty of the Slavic Department. The two-hour exam consists of a journal article (5-7 pages), which the student summarizes and a portion of which she or he translates. The particular language may be negotiated by the student with his or her adviser on the basis of the research interests of the student.

The student takes four Written Field Examinations, followed two weeks later by the General (Oral Comprehensive) Examination. One of the Field Examinations may be in a third Slavic language or in a field from another department at the University. At the discretion of the examiner, the examinations may be either four-hour examinations in situ or three-day take-home essays. A student may be excused from one field examination if the Committee accepts a paper published in a reviewed journal in lieu of that examination.

The student discusses each potential examination with the examiner for that field, presenting, where required, a personal reading list for the field.

Upon completion of the Written Examinations, the examinations and the comments prepared by each examiner are made available to all members of the Committee as well as to the student. The examinations are kept in the student's permanent file in the departmental office.

The General (Oral Comprehensive) Examination must be set up with the Graduate School at least three weeks before the examination is scheduled. The procedure is described in the Graduate Student Services' how-to instructions on the Web.

Part of the Oral Comprehensive Examination is usually a presentation of the dissertation proposal.

- \* *Dissertation and Defense:* After the successful completion of the General Examination, the candidate submits a detailed dissertation prospectus to be approved by the Supervisory Committee. The candidate must register for a minimum of three quarters of Slavic 800 at a maximum of 10 credits per quarter before submitting a dissertation for defense. With the approval of the Dissertation Reading Committee (usually a subset of the Supervisory Committee), the candidate defends the dissertation in a Final Examination open to the graduate faculty of the university and invited guests.

## Research Facilities

The Suzzallo Library holdings include some 400,000 titles in Slavic languages and in other languages on Slavic subjects. It subscribes to all important periodicals and newspapers in Russian and other languages and has exceptionally strong holdings in rare and antiquarian Slavic titles on microfilm and microfiche.

## Assistantship Opportunities

The department regularly offers a number of teaching assistantships. In conjunction with the Henry M. Jackson School of International Studies, students in the department are eligible for several other types of fellowships.

---

## Social Science (Evening Degree)

103 Lewis Hall  
www.evedegree.washington.edu/edp/majors/social.asp

This multidisciplinary major includes upper-division social science courses selected by faculty of the College of Arts and Sciences. Students explore diverse political, social, environmental, gender, ethnic, and cultural perspectives in pursuit of their degrees. Coursework encourages greater understanding of issues, ideas, and themes in history and in the contemporary world. Analytical, research, and communication skills which can enhance a person's career opportunities are emphasized.

The coursework in social science is organized into three tracks:

- \* Social and Environmental Issues
- \* Law, Politics, and the Economy
- \* Gender, Ethnicity, and Culture

*Social and Environmental Issues* addresses key ecological, environmental, and social issues of tribal, peasant, industrial, and post-industrial societies from around the world. This track includes assessments of how technological, ecological, environmental, economic, cultural, and sociopolitical factors interact to affect the form and function of social, cultural, and political systems and institutions. It also features courses which explain classical and contemporary theories of anthropology, economics, geography, history, political science, and sociology bearing on these issues.

*Law, Politics, and the Economy* deals with the role and function of government, legal institutions, and economic and political processes, focusing on the complex interaction of political and economic forces which shape social life. Important areas of study include the character of political power and inequality, law and other sources of state legitimacy, international relations and the economic interdependence of nation-states, and the role of the state in maintaining social order and ameliorating conflict within and between societies.

*Gender, Ethnicity, and Culture* studies the cultural, geographic, historical, political, psychological, and social factors which define, shape, and change the various peoples of the United States. Racism, age and sex discrimination, the status and role of women, the treatment of immigrants, the emergence of classes and sociocultural interest groups, and aspects of religious movements and religious conflict are core topics. Courses assessing theories that examine and explain these issues are also essential.

## Undergraduate Program

Adviser  
103 Lewis Hall, Box 353921  
206-543-6160  
advisers@extn.washington.edu

Social Science offers the following program of study:

- \* The Bachelor of Arts degree with a major in social science

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* English composition and additional writing. Introductory courses in Individuals & Societies (I&S); Visual, Literary, & Performing Arts (VLPA); and Natural World (NW). First-year foreign language study.

### Program Admission Requirements

1. Admission to the Evening Degree program (separate from admission to the UW day program).
2. 75 college quarter credits. Most students admitted have completed two years of lower-division college work.
3. See adviser for evaluation of applicable courses and credits.

## Major Requirements

60 credits from the approved list of social science survey and track courses, as follows:

1. Survey courses (15 credits maximum). Normally at the 200 level.
2. Primary track (25-35 credits from one track).
3. Track electives (10-20 credits). From courses in other than the primary track.
4. Of the 60 credits, not more than 15 in 200-level courses, at least 45 in 300- and 400-level courses, and at least 15 in 400-level courses.
5. For list of applicable courses, consult the adviser or go to [http://www.evedegree.washington.edu/edp/majors/social\\_courses.asp](http://www.evedegree.washington.edu/edp/majors/social_courses.asp)

### Additional Degree Requirements

1. English composition and additional writing (15 credits)
2. Quantitative and Symbolic Reasoning (Q/SR) (4-5 credits)
3. Foreign language – through the third quarter of a single foreign language (0 to 15 credits, depending on placement)
4. Areas of Knowledge
  - a. Visual, Literary, & Performing Arts (VLPA) (20 credits)
  - b. Individuals & Societies (I&S) (20 credits)
  - c. Natural World (NW) (20 credits)
  - d. Some credits in I&S and/or VLPA may count also toward the major
5. Additional work to complete a minimum 180 credits overall.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Social science graduates are prepared to think critically and communicate effectively about the interplay among political, demographic, cultural, and social dynamics in considering domestic and international legal, media, environmental, gender, and ethnicity issues. They are able to examine complex issues in a contemporary and historical context. Majors develop the ability to analyze and evaluate issues from varied disciplinary perspectives. A greater respect for diversity and the ability to integrate knowledge when applying learning to the challenges of living in a complex global society results.

Specific skills acquired include writing, critical thinking, research, analytical thinking, integrative cognitive abilities, and effective public speaking.

Social science majors pursue widely varied careers, including labor relations, human resources, law, social work, broadcast journalism, corporate training, private enterprise, education, public administration, mental health, marketing, and non-profit management.

- \* *Instructional and Research Facilities:* Students use all university library resources and facilities corresponding with their individual research needs. In addition, each of the contributing social science academic departments offers individual resources to majors. Check with advisers for options.

- \* *Honors Options Available:* None offered.

- \* *Research, Internships, and Service Learning:* The program works collaboratively with students interested in pursuing independent study and research opportunities through academic departments that contribute to the major. Opportunities for work with the Carlson Center, Office for International Exchanges, and service learning are possible for all students.

- \* *Department Scholarships:* The Evening Degree program awards need-based financial aid assistance each year to students from a general fund. Two additional scholarship resources are the Rodney I. Straub Endowed Scholarship and the Nicole Snyder Dettmar Endowed Scholarship.

- \* *Student Organizations/Associations:* None

# Sociology

223J Condon  
www.soc.washington.edu

The Department of Sociology has a strong commitment to research, publication, and training and is dedicated to providing a rich undergraduate program, both for students majoring in sociology and for others who wish to learn about human society and social relations.

## Undergraduate Program

Adviser  
223E Condon, Box 353340  
206-543-5396  
asksoc@u.washington.edu

The Department of Sociology offers the following program of study

- \* The Bachelor of Arts degree with a major in sociology

### Bachelor of Arts

*Suggested First- and Second-Year College Courses:* SOC 110, SOC 212, SOC 240, SOC 270, SOC 271, or any 200-level sociology courses. General coursework developing critical thinking or analytical skills.

### Department Admission Requirements

1. Any two of the following completed, with grades posted: SOC 110 (or SOC 111), SOC 212, SOC 240, SOC 270, SOC 271.
2. Minimum cumulative GPA of 2.50 for all courses applied to major requirements at time of application. Special circumstances are reviewed on a case-by-case basis.
3. Minimum grade of 2.0 in each course applied to major requirements.
4. Minimum cumulative GPA of 2.00 for all prior college work.
6. A one- to two-page personal statement.
6. Application deadlines are the second Friday of each quarter. See department Web site for information required as part of application packet. All applicants who meet the qualifications stated above are admitted in time to register as sociology majors for the following quarter.

### Major Requirements

50 credits as follows:

1. *Introductory courses (10 credits):* Two courses from SOC 110 (or SOC 111), SOC 212, SOC 240, SOC 270, and SOC 271.
2. *Sociological methods and theory (10 credits):* SOC 220 (5) and SOC 316 (5).
3. *Upper division sociology electives (20 credits):* Chosen from any 300-level or 400-level sociology courses, excluding SOC 316, SOC 395, and independent study courses (SOC 399, SOC 499).
4. *Sociology electives (10 credits):* Chosen from any other sociology courses. A maximum of five credits of independent study (SOC 399, SOC 499) can be counted.
5. Minimum grade of 2.0 in any course applied to major requirements. Minimum cumulative GPA of 2.50 for courses applied to major requirements. 25 of 50 required sociology credits completed in residence at UW.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The Department of Sociology's undergraduate degree is designed to teach majors to think systematically about the relationships among individuals, groups, organizations, and societies. Sociology majors engage current research in political sociology, social stratification, race and ethnicity, deviance and social control, demography, and other areas, and develop quantitative and analytical skills in research methods and social theory courses.
- \* *Instructional and Research Facilities:* The department is a member of the Center for Social Science Computing and Research (CSSCR). CSSCR maintains an extensive data archive, and offers consulting support and computer lab access to students in Sociology courses. Sociology is also affiliated with the Center for Studies in Demography and Ecology (CSDE) and the Center for Statistics and the Social Sciences (CSSS), providing interdisciplinary courses, seminars, and research opportunities for Sociology students.

- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* Sociology majors participate in a variety of internships each quarter. Students can receive academic credit under the supervision of a Sociology faculty member. See adviser for details.
- \* *Department Scholarships:* None offered.
- \* *Student Organizations/Associations:* A chapter of the Alpha Kappa Delta International Sociology Honor Society organizes events involving undergraduates with faculty and graduate students.

## Graduate Program

Graduate Program Coordinator  
223J Condon, Box 353340  
206-221-3280  
socadvis@u.washington.edu

Sociology seeks to explain social structure, social institutions, and social interaction. There are three emphases in the graduate training program at the University of Washington: understanding and critically evaluating social theory and empirical research; doing theoretically guided research that explores, assesses, and further develops explanatory theories; and developing communication skills (with emphasis on teaching and scholarly writing) that are useful in transmitting sociological knowledge. The department has graduate program specialization in demography and ecology, deviance and social control, race and ethnic relations, family systems, gender studies, institutional analysis, quantitative research methodology, sociological theory, and stratification.

Emphasis is on empirical research aimed at developing explanatory theories. Students are trained in problem formulation, research design, data gathering and analysis, and bringing data to bear on significant questions. Instruction is offered on various methods: statistical, survey, demographic and ecological, field research, and historical. Students learn social research by participating in faculty projects or developing their own studies. The program also offers instruction on effective teaching techniques.

### Master of Arts

#### Admission Requirements

- \* Applicants are evaluated on undergraduate performance, Graduate Record Examination scores, statement of educational plans, recommendations, and samples of written work.
- \* *Application Deadlines:* December 15. Admission offers are made for autumn quarter only. The UW Graduate Admissions Office strongly recommends that international applicants submit required application materials by November 1
- \* *Application Materials:* All information about the University of Washington Department of Sociology graduate program and the application materials are online. The Department of Sociology no longer sends out printed information or application materials. All applicants use the Web-based application. Applying to the sociology graduate program involves application to both the University of Washington Graduate School and the Department of Sociology. See departmental Web site for more information.

#### Degree Requirements

The master's program, designed primarily as preparation for Ph.D. work, is not a terminal degree, although it may serve as good training for non-academic research. The M.A. program consists of three elements:

- \* *Substantive training:* Coursework in substantive areas and social theory.
- \* *Methodological training:* Work in social statistics, general social science methodologies, and a data analysis practicum.
- \* *The master's thesis:* Independent empirical research conducted under the supervision of the M.A. Committee.

Students working toward an M.A. degree must complete 45 graduate credits or more with a minimum cumulative GPA of 3.30:

- \* *Sociological Theory* -- SOC 510 (3)
- \* *Statistics* -- SOC 504, SOC 505, SOC 506 (3, 3, 3)
- \* *Logic of Social Inquiry* -- SOC 508 (3)
- \* *Proseminar* -- SOC 501 (1, 1, 1)

- \* *M.A. Thesis* -- SOC 700 (9)
- \* *Electives* -- 18 credits.

A minimum of 12 graded elective credits must be in courses offered by the sociology department. All courses should be at the 500 level or above, although a student may petition for inclusion of a 400-level course. No more than 3 elective credits may be assigned a letter grade (e.g., S or CR) in place of a numerical grade. Minimum GPA of 3.30.

## Doctor of Philosophy

### Admission Requirements

Completion of an M.A. degree in sociology in the UW Sociology Department or elsewhere. Occasionally, M.A. degrees in other fields are accepted. The department encourages applications from minority students.

See above under Master of Arts section for admission requirements.

### Degree Requirements

45 credits beyond the Master of Arts requirements (above) as follows:

- \* 3 graded credits in theory
- \* 6 graded credits in approved methods courses
- \* 9 elective credits
- \* 27 dissertation credits

Additionally, students must maintain a GPA of 3.30, pass a minor area examination, pass a major area examination, pass the General Examination (prospectus defense), pass the Final Examination, and submit approved dissertation to the Graduate School.

### Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of training.

## Speech and Hearing Sciences

210 Eagleson  
depts.washington.edu/sphsc

Speech and hearing sciences concern the processes and disorders of human communication. This includes the study of normal hearing, speech, and language development, speech acoustics, speech physiology and perception, hearing, the nature of language, speech and hearing disorders in children and adults, social and cultural aspects of communication disorders, and the clinical processes involved in identification, prevention, and remediation of those disorders.

## Undergraduate Program

Adviser  
210 Eagleson, Box 354875  
206-685-7403  
sphscadv@u.washington.edu

The Department of Speech and Hearing Sciences offers the following program of study:

- \* The Bachelor of Science degree with a major in speech and hearing sciences

### Bachelor of Science

*Suggested First- and Second-Year College Courses:* PSYCH 101, BIOL 118, LING 200, introductory math and statistics courses.

### Department Admission Requirements

Admission is competitive. The admissions committee reviews all applicants based on the following criteria: GPA (minimum 2.50 overall GPA guarantees consideration but not admission), personal statement reflecting an interest in and commitment to speech and hearing sciences; other evidence of a commitment to becoming a speech and hearing sciences major. Students

may apply any time after they have earned 60 credits. The application deadline for current UW students is Monday of the third week of the quarter for admission the next quarter; transfer students may apply to the department (if they are at or near junior standing) and to the University concurrently. Admission is for autumn, winter, or spring quarter. Only students admitted to the UW are eligible for admission to the major. Applicants will be notified of the department's decision within four weeks. Applications and additional information are available outside 210 Eagleson and on the department's Web site.

Students who meet admission requirements are eligible for one of two options: Option 1, General Academic, is intended to provide broad perspectives of the discipline, but not to prepare students specifically for careers in clinical speech pathology and audiology. It is appropriate for students with interests in education, health care, and communication. Option 2, Speech and Hearing Sciences and Disorders, is intended for students interested in graduate study in speech and hearing sciences and clinical speech-language pathology and audiology. (Note that graduate study is required for the professions of speech language pathologist and audiologist.)

### Major Requirements

*Core Requirements for Both Options:* 33 credits in the following courses: SPHSC 250, SPHSC 261, SPHSC 302, SPHSC 303, SPHSC 304, SPHSC 320, SPHSC 371, SPHSC 461. A cumulative GPA of 3.00 is required in core courses for students following Option 2.

*Option 1, General Academic:* 72-74 credits as follows:

1. Core requirements listed above (33 credits)
2. 22 credits from the following: SPHSC 305, SPHSC 308, SPHSC 405, SPHSC 406, SPHSC 425, SPHSC 445, SPHSC 462, SPHSC 499 (6 credits maximum)
3. BIOL 118 (5 credits)
4. A 3-5 credit college-level mathematics course (excluding MATH 098, MATH 100, MATH 102, MATH 103, MATH 104, MATH 170, MATH 198, or other remedial, historical, or methodology math course) or statistics course (excluding STAT 111). MATH 120 or MATH 144 recommended.
5. Minimum 9 credits at the 200 level or above in psychology, educational psychology, or special education, or 300 level or above in linguistics.

*Option 2, Speech and Hearing Sciences and Disorders:* 82-84 credits as follows:

1. Core requirements listed above (33 credits)
2. SPHSC 305, SPHSC 308, SPHSC 405, SPHSC 406, SPHSC 425, SPHSC 445, SPHSC 471, SPHSC 481 (32 credits)
3. BIOL 118 (5 credits)
4. A 3-5 credit college-level mathematics course (excluding MATH 098, MATH 100, MATH 102, MATH 103, MATH 104, MATH 170, MATH 198, or other remedial, historical, or methodology math course) or statistics course (excluding STAT 111). MATH 120 or MATH 144 recommended.
5. Minimum 9 credits at the 200 level or above in psychology, educational psychology, or special education, or 300 level or above in linguistics.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The graduate will (1) have knowledge of the following: mechanisms involved in speech, language, and hearing; societal implications of language differences and of disorders of speech, language, and hearing; opportunities in, and requirements for, careers available to those in the speech and hearing sciences. (2) understand the following: normal acquisition of speech and language; the etiology and nature of communication disorders across the lifespan; principles and procedures for diagnosis and treatment of speech, language, and hearing disorders; the manner in which context (specifically, situation, social/interpersonal, and culture context) influences communication and disorders; social-cultural aspects of communication development and disorders. (3) have the following abilities: to analyze language in terms of its auditory, phonetic, phonological, morphological, and syntactic properties; to utilize strategies for solving scientific problems; to read and understand relevant literature; (4) have experience with a research project
- \* *Instructional and Research Facilities:* Research labs, computer lab, and clinic located in the department.
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* None offered
- \* *Department Scholarships:* None offered

- \* *Student Organizations/Associations:* The National Student Speech Language Hearing Association (NSSLHA) UW chapter, 153 Eagleson.

## Graduate Program

Graduate Program Coordinator  
205 Eagleson, Box 354875  
206-685-7402  
sphscadv@u.washington.edu

The Department of Speech and Hearing Sciences offers the Master of Science in Speech Language Pathology, Doctor of Audiology, and Doctor of Philosophy degrees. The program consists of a wide range of coursework and seminars providing opportunities for the development of scholarly and professional competence in various areas of specialization: speech and language acquisition, phonetics, speech production, hearing, hearing development, psychoacoustics, physiological acoustics, speech perception, and assessment and treatment of human communication disorders related to language, speech, and hearing. At the Doctor of Audiology (Aud) and speech-language pathology master's (SLP MS) level, the specific focus is on the clinical procedures involved in the identification, prevention, and remediation of communication disorders. To complement departmental curricula in various specialization areas, close interdisciplinary relationships are maintained with other University departments and off-campus centers. Advanced degrees in the speech and hearing sciences equip the student to do research, to teach at the college and university level, and to provide clinical services to the communicatively impaired.

## Master of Science in Speech-Language Pathology

### Admission Requirements

Admission to the program is during summer and autumn quarters only.

- \* GRE scores
- \* A minimum GPA of 3.00 during the last 90 quarter credit hours of study (60 semester)
- \* Bachelor's degree with a major in Speech-Language Pathology (Speech and Hearing Science, Communication Disorders, or a similarly named major) or other major with postbaccalaureate certification in Speech-language Pathology.
- \* Personal statement
- \* Completed application. Deadline February 1.

### Degree Requirements

Minimum 114 credits, to include:

- \* Principles of biological sciences, physical sciences, mathematics, and the social/behavioral sciences
- \* Basic human communication and swallowing processes
- \* Nature of speech, language, hearing, and communication disorders and differences, and swallowing disorders
- \* Principles and methods of prevention, assessment, and intervention for people with communication and swallowing disorders
- \* Standards of ethical conduct
- \* Processes of research and the integration of research principles into evidence-based clinical practices
- \* Contemporary professional issues
- \* Knowledge about certification, specialty recognition, licensure, and other relevant professional credentials
- \* Specialized oral, written and other forms of communication for use in professional practice.
- \* Additional program requirements: Minimum 36 credits of non-practicum graduate work at the 400 level or above. Minimum 18 of the 36 quarter credits in courses numbered 500 and above. No more than 9 credits of courses 500 level and above can be thesis credits. Satisfactory completion of all didactic and practicum requirements detailed above. Satisfactory completion of written thesis and oral defense of the thesis. Minimum 9 quarter credits of thesis (SPHSC 700) for students taking thesis option. Students completing the thesis must take a course in statistics at the 400 level or above.
- \* Students also satisfactorily complete requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association by registering for the required coursework and practica, pre-internship and internship credits.

## Doctor of Audiology

### Admission Requirements

- \* Graduate School application
- \* Departmental application
- \* Transcripts for all colleges and universities attended
- \* Personal statement
- \* Three recommendation forms

### Degree Requirements

203 credits as follows:

- \* *Year 1 (62 credits):* SPHSC 509 (3), SPHSC 521 (4), SPHSC 523 (4), SPHSC 570 (4), SPHSC 571 (4), 572 (3), 574 (4), SPHSC 575 (3) or SPHSC 503 (3), SPHSC 577 (3), SPHSC 582 (4), SPHSC 583 (4), SPHSC 588 (3), SPHSC 591 (4) each quarter, 592 (3)
- \* *Year 2 (56 credits):* SPHSC 462 (3) or SPHSC 580 (3), SPHSC 490 (3), SPHSC 504 (3), SPHSC 542 (3), SPHSC 575 (3) or SPHSC 503 (3), SPHSC 576 (2), SPHSC 578 (2), SPHSC 581 (2), SPHSC 585 (2), SPHSC 588 (1, 1, 1) for three quarters, SPHSC 591 (4, 4, 4, 4) for four quarters, SPHSC 593 (3), SPHSC 594 (2), SPHSC 595 (2), SPHSC 600 (3), electives (4).
- \* *Year 3 (55 credits):* SPHSC 462 (3) or SPHSC 580 (3), 522 (2), SPHSC 579 (2), SPHSC 584 (3), SPHSC 587 (2), SPHSC 588 (1, 1, 1) for three quarters, 590 (1), SPHSC 591 (4, 4, 4, 4) for three quarters, plus 10 credits for summer quarter), SPHSC 600 (3, 3, 3) for three quarters, electives (8).
- \* *Year 4 (30 credits):* Full-time clinic (SPHSC 591) for three quarters.

## Doctor of Philosophy

### Admission Requirement

Students who wish to work toward the Ph.D. degree must have completed a bachelor's or master's degree depending upon area of interest. Since the doctoral program does not lead to clinical or professional certification, students who wish to satisfy minimum standards of clinical competence in speech-language pathology or audiology typically complete the majority of this preparation before entering the doctoral program.

### Degree Requirements

The academic programs for students in the Ph.D program are planned on an individual basis in consultation with the student's faculty committee. Concentration can occur in basic and applied research. Courses, seminars, laboratory experiences, and assistantships are selected to provide preparation for careers in research and university or college teaching. Opportunities for additional clinical work in the area of communication disorders are provided to those having such interests.

### Financial Aid

A number of teaching and research assistantships are available for qualified graduate students. In addition, the department has traineeships/fellowships supported by the National Institutes of Health.

### Research Facilities

The department's research laboratories, as well as those of the Virginia Merrill Bloedel Hearing Research Center, contain sophisticated equipment for the collection and analysis of data related to the study of human communication and its disorders. The University Speech and Hearing Clinic and the Center on Human Development and Disability also provide laboratories to support basic and applied research in speech, language and hearing development and disorders, across the life span.

# Statistics

B313 Padelford  
www.stat.washington.edu

Probability provides the conceptual foundation and mathematical language for the logic of uncertainty and induction. Statistics is concerned with procedures for the acquisition, management, exploration, and use of information in order to learn from experience in situations of uncertainty and to make decisions under risk. Statistical practice includes design of experiments and of sampling surveys; exploration, summarization, and display of observational data; drawing inferences, and assessing their uncertainty; and building mathematical models for systems with stochastic components.

Instruction is enriched through academic contacts with the School of Business Administration; the College of Engineering; the departments of Applied Mathematics, Atmospheric Sciences, Biology, Cardiology, Computer Science, Earth and Space Sciences, Economics, Genetics, Mathematics, Psychology, Radiology, and Sociology; the Quantitative Ecology and Resource Management program; the Center for Statistics and the Social Sciences; the Applied Physics Laboratory; the Applied Statistics Division of the Boeing Company; Microsoft Research; and Insightful Corporation. The department has an especially close relationship with the Department of Biostatistics; for example, the two departments are jointly developing new curricula in statistical genetics.

## Undergraduate Program

Adviser  
B309 Padelford, Box 354322  
206-543-8296

The Department of Statistics offers the following programs of study:

- \* The Bachelor of Science degree with a major in statistics
- \* In conjunction with the departments of Applied Mathematics, Computer Science and Engineering, and Mathematics, the Bachelor of Science degree with a major in applied and computational mathematical sciences.
- \* A minor in statistics

## Bachelor of Science

*Suggested First-and Second-Year College Courses:* CSE 142; CSE 143; MATH 307, MATH 308, MATH 309, MATH 327, MATH 328. Additional courses in the sciences and quantitative methods. It is recommended that the student declare the major only after completion of STAT 341.

## Department Admission Requirements

1. Completion of 45 credits, including MATH 124, MATH 125, MATH 126; a minimum 8 credits from one of the following groups of courses: ASTR 101, ASTR 102, ASTR 190, ASTR 201, ASTR 301; CHEM 120, CHEM 142, CHEM 145, CHEM 152, CHEM 155; GENOME 351, GENOME 372, GENOME 453; PHYS 114, PHYS 115, PHYS 116, PHYS 117, PHYS 118, PHYS 119, PHYS 121, PHYS 122, PHYS 123, PHYS 210, PHYS 211, PHYS 212; and one course from STAT 220, STAT 311, STAT 390, or an approved substitute. The 8 credits must be from within the same group (e.g., CHEM 142, CHEM 152).
2. Minimum grade of 2.0 in each of the above listed prerequisites and a cumulative GPA of 2.80 for these courses.
3. Students wishing to declare a statistics major must apply by contacting the adviser after prerequisites are completed and graded.

## Major Requirements

Minimum 74-75 credits, as follows:

1. MATH 124, MATH 125, MATH 126; MATH 307, MATH 308, MATH 309; MATH 327, MATH 328 (the honors sequences in calculus may replace the corresponding regular sequences)
2. CSE 142, CSE 143
3. One course from STAT 220, STAT 311, STAT 390, or approved substitute (STAT 311 is recommended)
4. STAT 394, STAT 395, followed by STAT 341, STAT 342, STAT 421, STAT 423.
5. Electives (at least 9 credits): one upper-division course in statistics, mathematics, or computer science, plus two upper-division courses in any discipline (including but not limited to statistics, mathematics, and

computer science), all subject to prior approval by the Statistics adviser. The first elective defines the flavor of the major within these interrelated mathematical fields, and the other two give a chance to broaden the basis of the major into a special-interest area, chosen from the full range of upper-division courses offered at the University. However, three Department of Statistics courses is the most common choice. Any other choice must fit into an approved coherent plan.

6. A minimum grade of 2.0 in all courses used to satisfy major requirements.
7. A minimum cumulative GPA of 2.50 for all courses used to satisfy major requirements.

## Minor

*Minor Requirements:* minimum 38 credits, as follows:

1. MATH 124, MATH 125, MATH 126
2. STAT 311 or approved substitute
3. STAT 394, followed by STAT 341, STAT 342, STAT 421 (or STAT 423)
4. One elective from the following choices: STAT 395 (strongly recommended), STAT 396, STAT 403, STAT 423, STAT 427, STAT 428, CSE 142, MATH 307, MATH 308, AMATH 351, AMATH 353.
5. Minimum 2.0 grade in each course used to satisfy minor requirements. Minimum cumulative 2.50 GPA in all statistics courses (including whatever elective is taken) counted toward the minor.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Statistics emphasizes decision making in the face of uncertainty. Tools developed by the major include probability theory, mathematical statistics, experience with data analysis, and use of statistical tools via the computer. Graduates have pursued careers in actuarial science, financial planning, drug development, statistical consulting, teaching, public health, military science, aerospace, computer technology, and forest resources.
- \* *Instructional and Research Facilities:* Computer workstations are available on a drop-in basis through the College of Arts and Sciences Instructional Computing Lab. Tutoring in a set of introductory statistics courses is currently available at the Statistics Tutor and Study Center.
- \* *Honors Options Available:* None offered.
- \* *Research, Internships, and Service Learning:* Some students receive limited support and the opportunity to participate in the VIGRE program which, funded by the National Science Foundation, encourages undergraduates to participate in research; sometimes students function in teams with faculty and graduate students. A special seminar series for undergraduates is offered in conjunction with the ACMS program.
- \* *Department Scholarships:* None offered.
- \* *Student Organizations/Associations:* The Actuary Club at the University of Washington, <http://students.washington.edu/actuary>

## Graduate Programs

Graduate Program Coordinator  
B312 Padelford, Box 354322  
206-685-7306

The graduate programs emphasize both the theory and application of statistics, including probability theory, mathematical statistics, data analysis, statistical computing, and scientific applications. Computing facilities in the Department of Statistics rank among the best of any statistics programs in the country and reflect the department's expertise in the field of statistical computing. An ongoing statistical consulting program provides the students with practical experience in using statistics and in communicating with clients. Under faculty supervision, participants in the program assist members of the University community in applying statistical methodology. The department offers Master of Science and Doctor of Philosophy degrees.

## Admission Requirements

Background in mathematics, statistics, or a quantitative field, with 30 or more quarter credits in mathematics and statistics, to include a year of advanced (second-year) calculus, one course in linear algebra, and one course in probability theory; Graduate Record Examination scores (the Advanced Mathematics subject test is encouraged but not required); and three letters of recommendation from appropriate former or current faculty.

## Master of Science

*Graduation Requirements:* In addition to Graduate School requirements, at least twelve approved courses numbered 400 or above with a value of 36 credits or more; of these, at least six courses must be numbered in the 500 series (exclusive of STAT 512, 513) with a value of 18 credits or more, and with a coherent theme. Approved proficiency in statistical computing. Satisfactory participation in statistical consulting and the departmental seminar. Passage of an appropriate final master's examination or successful completion of a master's thesis which can count as up to three courses worth 9 credits but cannot replace any of the six courses in the 500 series mentioned above. All programs must be approved in advance by the departmental Graduate Program Coordinator.

## Doctor of Philosophy

### Graduation Requirements

Minimum 90 credits, to include:

In addition to Graduate School requirements, appropriate training in statistics and related sciences. Appropriate General Examinations of basic graduate-level knowledge in statistics and probability (including two preliminary examinations). Satisfactory performance in MATH 574, MATH 575, MATH 576. Satisfactory performance in three approved core-course sequences chosen from STAT 570, STAT 571, STAT 572; STAT 581, STAT 582, STAT 583; STAT 521, STAT 522, STAT 523; STAT 534, STAT 535, STAT 538; and STAT 516, STAT 517, STAT 518. (In some circumstances, other graduate-level mathematical science courses may be used as a substitute.) Approved performance in statistical consulting (typically STAT 598 and STAT 599). Demonstration of proficiency in computing. 1 credit of STAT 590 per quarter. Final Examination.

The graduation requirements for the Ph.D. tracks in statistical genetics and statistics in the social sciences may replace or be in addition to some of the requirements listed above.

### Financial Aid

The department annually awards a limited number of teaching and research assistantships and fellowships for the support of new and continuing graduate students on the basis of academic promise.

---

## Women Studies

B110 Padelford  
depts.washington.edu/webwomen

Women studies is an interdisciplinary discipline that offers students a cohesive framework for the study of women's and men's lives within historical and contemporary contexts, and from multi-disciplinary, multi-cultural, and international perspectives. As a field of inquiry, women studies challenges traditional scholarship about human societies and fosters the construction of new theoretical and methodological approaches to understanding diverse experiences and realities.

## Undergraduate Program

Adviser  
B110C Padelford, Box 354345  
206-543-6902  
wsadvise@u.washington.edu

The Department of Women Studies offers the following programs of study:

- \* The Bachelor of Arts degree with a major in women studies
- \* A minor

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* WOMEN 200, and any of the following: WOMEN 206, WOMEN 257, WOMEN 283, WOMEN 290.

### Department Admission Requirements

Any student with a cumulative GPA of at least 2.00 can declare this major at any time.

## Major Requirements

Minimum 62 credits, as follows:

1. WOMEN 200 or equivalent, 2 credits of WOMEN 299, and one additional WOMEN 200-level course
2. WOMEN 322 or WOMEN 456; WOMEN 357
3. One course in feminist theory (WOMEN 455 is recommended for those planning to pursue graduate study. See department adviser for a complete list of acceptable courses.)
4. Minimum 3 credits of WOMEN 497 fieldwork
5. 25 additional Women Studies upper-division credits
6. Senior capstone, WOMEN 494

## Minor

*Minor Requirements:* 30 credits as follows:

1. WOMEN 200 or equivalent; one additional WOMEN 200-level course (10 credits)
2. WOMEN 322 or WOMEN 456 (5 credits)
3. Additional upper-division credits in women studies (excludes independent-study courses, only 5 credits of WOMEN 490 allowed) (15 credits)

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* A Bachelor of Arts in Women Studies helps students prepare for careers in human, health, legal, or civil service, as well as in the private sector. Some women studies graduates develop careers that focus directly or indirectly on women and women's issues. Many others move into careers that entail understanding the dynamics of gender, race, class, and sexuality. Such positions exist in politics, business, education, government, medicine, and the arts. Recent graduates of women studies have found employment in public agencies, community services, health services, private businesses, and legal firms.
- \* *Instructional and Research Facilities:* The Women Studies Technology Center (WSTC)
- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* Students intern in local agencies or businesses to develop skills in an area of specialization appropriate to their area of interest. For lists of these opportunities, see adviser.
- \* *Department Scholarships:* None offered.
- \* *Student Organizations/Associations:* Students can join the National Women's Studies Association (NWSA), as well as a local student group, Feminism on Campus (FOC).

## Graduate Program

Graduate Program Coordinator  
B110 Padelford, Box 354345  
206-543-6900  
womenst@u.washington.edu

The Department of Women Studies offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in interdisciplinary women studies as well as in a chosen discipline. The core faculty represent the following disciplines: anthropology, American Indian studies, economics and development, history, international studies, English, sociology, and psychology. Although students are required to work primarily with a core faculty member in Women Studies, they have the opportunity to study with more than 60 faculty members from a wide range of disciplines who are adjunct faculty to Women Studies. M.A. students must complete a thesis or practicum. Ph.D. students must complete a dissertation.

## Admission Requirements

Applicants are admitted to begin study during autumn quarter only and are required to have their application materials completed by the beginning of the prior January. A complete application file includes the Graduate School application, one copy of official transcripts, three recommendations, a statement of purpose, and scores from the Graduate Record Examination (GRE).

## **Program Requirements**

All students are required to complete 15 credits of the core seminars: History of Feminism (WOMEN 501), Problems in Feminist Theory (WOMEN 502), and Feminist Research and Methods of Inquiry (WOMEN 503). Under the guidance of a core faculty mentor and advisory committee, the student shapes an individual program of study. The master's program usually requires two years of graduate study; the doctoral program usually requires three years of study beyond the master's level, including independent field research and preparation of a dissertation. Ph.D. students must exhibit proficiency in a language relevant to their theoretical and regional areas of specialization. Students are urged to establish foreign language competency as undergraduates before entering the graduate program or as early as possible in their graduate careers.

## **Financial Aid**

A limited number of teaching and research assistantships are offered to Ph.D. students.

Thomas Lee

116 Mackenzie  
depts.washington.edu/bschool

busadmin@u.washington.edu

Men and women embarking on business careers have the opportunity to influence many of the social, political, and economic forces in today's world. The Business School prepares students for professional careers in management and related disciplines in both the private and public sectors.

The Business School offers an undergraduate program leading to the degree of Bachelor of Arts in Business Administration (BABA) and graduate programs leading to the degrees of Master of Business Administration (MBA), Executive Master of Business Administration (EMBA), Technology Management Master of Business Administration (TMMBA), Master of Professional Accounting (MPAcc), and Doctor of Philosophy (PhD). An evening MBA program is also offered. Additionally, the Business School offers a Master of Science degree in Information Systems (MSIS).

Business Administration became an independent unit within the University system in 1917. It has been accredited by the American Assembly of Collegiate Schools of Business (now known as the International Association for Management Education) since 1921. It also has had EQUIS accreditation by the European Foundation for Management Development (EFMD) since 2002, being one of only a few North American university business schools to have such designation.

## Facilities and Services

Most Business School classes and activities are in four buildings. Balmer Hall, named for Thomas Balmer, former president of the University Board of Regents, contains classrooms and computer labs. Four computer labs in Balmer Hall are available to Business School students. Mackenzie Hall, named in memory of Prof. Donald Mackenzie, Chair of the Department of Accounting from 1949 to 1955, contains the Dean's Office, the Undergraduate Program Office, the Graduate Program Office, the PhD Program Office, Business Administration Computer Services (BACS), Office of Development and External Relations, faculty offices, five department offices, and other business administration program offices. Nearby Lewis Hall contains the Business Connections Center and other faculty and administrative offices. A fourth building, on the north side of Balmer, has three distinct components: the Bank of America Executive Education Center (which includes the James B. Douglas Executive Forum), the Boeing Auditorium, and the Albert O. and Evelyn Foster Business Library.

To serve the continuing education needs of middle- and senior-level managers, the Business School offers a number of certificate programs, either University-initiated or co-sponsored with various community and industry organizations. The Management Program, a nine-month, one night per week program, strengthens understanding and skills in all areas of management and provides an opportunity for successful managers to learn from a distinguished faculty and each other. Short courses and seminars are offered throughout the year, focusing on topics such as leadership, finance and accounting for non-financial executives, and negotiation skills. In addition, the School develops and runs custom programs under contract with individual companies and organizations. Information on continuing education programs may be obtained from the Office of Executive Programs, 206-543-8560, fax 206-685-9236, uwexp@u.washington.edu.

## International Business Programs

International business programs are coordinated and developed by the School's Global Business Center. These activities include special graduate and undergraduate certificate programs, the Global Business Program, seminars, internships, business foreign-language programs, special guest-speaker programs, and study tours. Although the Marketing and International Business Department offers a general curriculum in international business, each of the five academic departments within the School maintains faculty with special international teaching and research expertise. Internationally oriented courses are offered by each department.

At the undergraduate level, the School offers the Certificate of International Studies in Business (CISB) Program. Students in the program complete the same demanding business curriculum as other students and enhance this training with foreign language study, area studies, and an international experience. The program requires that students have a solid foundation in one of five language tracks: Chinese, French, German, Japanese, and Spanish; a sixth custom track for other languages is also an option.

At the MBA level, the Business School offers the Global Business Program (GBP) that provides opportunities for MBA students to build on the international business foundation that every MBA develops through the first year of the program. In addition to international business electives, the GBP includes overseas travel through study tours, quarter-long exchange programs, and international internships. GBP students also participate in the weekly Global Business Forum, which brings top international business leaders to campus to discuss important issues facing their companies and industries.

Questions regarding these programs may be directed to the Program Assistant, CIBER, 303 Lewis, 206-685-3432, fax 206-685-4079, uwciber@u.washington.edu.

## Entrepreneurship Programs

The focus of the Business School's entrepreneurship programs is on nurturing skills that generate creative ideas, innovative processes, and new business growth. These skills are developed through special academic certificate programs, a high-tech entrepreneurship speaker series, internships, a business plan competition, club activities, and consulting opportunities with area businesses.

The Center for Innovation and Entrepreneurship (CIE) is open to both undergraduate and graduate students from the Business School as well as other schools and colleges of the University. Undergraduates who wish to complete the option must be admitted to the Business School. Graduate students who wish to complete this specialization must participate in the CIE consulting club, attend the High-Tech Entrepreneurship Speaker Series, complete several CIE core classes, and participate in the Business Plan Competition. Contact CTE for more information at 206-685-9868, cte@u.washington.edu.

The Business and Economic Development Center (BEDC) matches undergraduate and graduate student consulting teams with small-business owners in Seattle's inner city to implement business development projects. Through courses, independent study options, summer internships, and hands-on projects with inner-city entrepreneurs, students explore the challenges faced by central city businesses, while also providing valuable assistance. Questions about the Business and Economic Development Center can be directed to the program office at 206-543-9327.

The University of Washington Retail Management Program (RMP) prepares interested students for first-line management careers in the retail industry. This interactive program includes visiting speakers, executives-in-residence, and store visits. Participating students complete a series of courses and a summer internship. The various facets of the program are designed to provide students with a comprehensive background in retail management. Questions about the Retail Management Program can be directed to the program office at 206-685-2755.

## Business Career Center

The Business Connections Center coordinates all MBA and MPAcc career services. These include career counseling and career management workshops, the administration of special career events such as career fairs, company presentations, on-campus MBA and MPAcc recruitment, and a job-listing service. The Business Connections Center also administers alumni and executive mentoring programs. Questions regarding these programs and services may be directed to the center's office, 202 Lewis, 206-685-2410.

Undergraduate business-career counseling and on-campus recruitment is provided by the UW Center for Career Services, 134 Mary Gates Hall, 206-543-0535.

## Instructional Resources Office

The Instructional Resources Office promotes excellence in teaching by providing resources in current practice and research in teaching and learning. The office serves faculty and teaching assistants with individual consultations, coordinates a teaching preparation program for doctoral students, and offers assistance with instructional innovations. Questions can be directed to the Instructional Resources Office, 317 Lewis, 206-685-9608.

## The Business Writing Center

The mission of the Business Writing Center is to help undergraduates develop the writing skills essential to professional success. The center offers one-on-one tutoring, workshops and peer feedback for special class projects, and opportunities for advanced students to be peer tutors. Questions can be directed to the center's office, 337 Lewis, [bwrite@u.washington.edu](mailto:bwrite@u.washington.edu).

## Honor Societies

Beta Gamma Sigma is the national scholastic honor society in the field of business. Election to membership is available to both undergraduate and graduate students in business. Selection is based on outstanding scholastic achievement.

Beta Alpha Psi is the accounting honor society. Membership is based primarily on scholastic achievement, but some community service is also required. Beta Alpha Psi provides a mechanism for students, professionals, and educators to meet on both formal and informal bases.

The goals and interests of graduate students are served by the MBA Association, Business Consulting Network, Challenge for Charity, Entrepreneurship and Innovation Club, Graduate Consulting Club, MBA Finance Club, Global Business Association, Graduate and Professional Student Senate, MBA Marketing Club, Net Impact, High-Tech Club, MBA Speakeasy, Women in Business, and the Doctoral Association.

206-685-3400  
[bizinfo@u.washington.edu](mailto:bizinfo@u.washington.edu)

The Business School offers the following programs of study:

\* The Bachelor of Arts in Business Administration degree with options in accounting, entrepreneurship, finance, human resources management, information systems, and marketing.

## Bachelor of Arts in Business Administration

*Suggested First- and Second-Year College Courses:* English composition, calculus, ECON 200, ECON 201. In addition, classes to fulfill general education requirements which develop strong writing and analytical skills. ACCTG 215, ACCTG 225, MGMT 200, and Q METH 201 are suggested second-year college work.

## Department Admission Requirements

The Business School offers admission to upper division applicants for autumn and winter quarters. Those UW students who are prepared, as freshmen, to apply for early admission, may do so only for autumn quarter. Students admitted for autumn may elect to take classes during the prior summer quarter.

Applicants are considered in three admission groups, the Freshman Admission Program (FRAP), the Early Admission Group (EAG), and the Upper-Division Admission Group (UAG), described below. The following requirements apply to the Early Admission Group, and the Upper-Division Admission Group:

1. A minimum cumulative 2.50 GPA for all college coursework.
2. A minimum cumulative 2.50 GPA for all required business courses.
3. A student who has previously attended the UW also must have GPAs of at least 2.50, both UW cumulative and in UW business courses.
4. Since eligible applicants exceed the space available, acceptance is competitive. Admission is based on evaluation of five factors:
  - a. for Early Admission Group, pre-college test scores from SAT or ACT
  - b. overall scholastic record
  - c. grades in pre-application courses, described below
  - d. written communication skills
  - e. evidence of leadership skills, community activities, and the promise of achievement in a business or professional career.

Consideration is also given to such factors as economic and educational disadvantage, significantly higher recent grades, and exceptional extracurricular activities or work experience.

Admission for UAG is offered twice a year, for autumn and winter quarters. Admission for FRAP and EAG is offered once a year, for autumn quarter only. A Business School application, together with all supporting materials, must be on file by April 5 for autumn quarter admission or October 5 for winter quarter admission. Records of all coursework completed by the deadline must be submitted at the time of application, regardless of admission group.

### Freshman Admission Program (FRAP)

The Business School enrolls a small number of students each year directly out of high school, prior to completion of any university-level prerequisites. Freshmen applicants to the University listing Business Administration as their intended major are automatically considered. Admission is offered to students with exceptionally competitive academic records, including but not limited to high school GPA and SAT or ACT scores.

### Early Admission Group (EAG)

This admission path is open to students who began their studies at the UW as freshmen, have been enrolled no more than three quarters, and have completed 30 numerically graded credits at the UW. Courses completed prior to applying must include ECON 200; MATH 112, MATH 124, MATH 134, or MATH 145; an approved English composition course chosen from C LIT 240, ENGL 104-ENGL 105, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281; and pre-college test scores (ACT or SAT). General education or elective courses can be taken to complete the minimum 30 graded credits.

### Upper-Division Admission Group (UAG)

Students must present a minimum 60 academic credits at the time of application including the following graded credits: ACCTG 215; ECON 200 or ECON 201; MATH 112, MATH 124, MATH 134, or MATH 145; an approved English composition course, chosen from C LIT 240, ENGL 104-ENGL 105, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. In addition, the following courses must be completed prior to admission in autumn quarter: ACCTG 225; ECON 200 and ECON 201; MGMT 200; QMETH 201. Applicants should take general education or elective courses to complete the minimum 60 graded credits.

Students admitted to the UW as freshmen are expected to take ACCTG 215, ACCTG 225; MGMT 200; and QMETH 201 in residence.

Qualified applicants with at least 45 credits and a minimum 2.85 GPA who meet University admission requirements, but not Business School requirements, are eligible to be placed in the College of Arts and Sciences as pre-business majors.

The University of Washington provides equal opportunity in education without regard to race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam veteran in accordance with UW policy and applicable federal and state statutes and regulations.

## Graduation Requirements

180 credits, to include the following:

**General Education Requirements:** The following must be selected from the University Areas of Knowledge courses: 20 credits in Visual, Literary, & Performing Arts; 20 credits in Individuals & Societies, including 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201); 20 credits in the Natural World, including 5 credits in calculus (MATH 112, MATH 124, MATH 134, or MATH 145); most students need precalculus before taking college calculus (some precalculus courses qualify for the Natural World requirement); 5 credits in English composition.

Students from community colleges in Washington should check the Transfer Guide or consult with their community college adviser for equivalent courses. Students from other four-year schools should see an adviser at their school. Students entering the Business School under the terms of the Associate Degree Agreement may apply courses selected from the community college's breadth list toward the general education requirements.

**Business School Requirements:** ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300; MGMT 320; MGMT 430; and 300- or 400-level business electives (or area of concentration) to bring the total number of business credits to 72; two writing-intensive courses, one from B CMU 301, B CMU 302, B CMU 410, ENGL 281, ENGL 381; one from English composition, or from the remaining three courses listed immediately above, or from any W course. No more than 6 lower-division business elective credits; a minimum of 90 non-business credits, which may include up to 14 credits economics and up to 9 credits of statistics but not GEN ST 350; a cumulative GPA of at least 2.50 in all business credits earned at the UW; and a cumulative GPA of 2.50 for all UW credits. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework are applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits at the UW. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Business School Undergraduate Program Office prior to applying.

**Accounting Option:** The notation "Accounting" is indicated on the permanent record, or transcript, of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: ACCTG 301, ACCTG 302, ACCTG 303, ACCTG 311, ACCTG 320, ACCTG 411, ACCTG 421, ACCTG 440, and at least one 400-level accounting elective, excluding ACCTG 401, ACCTG 490, ACCTG 495, and ACCTG 499. Students who have completed ACCTG 505 may not apply to the Accounting Option.

**Finance Option:** The notation "Finance" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: one course from FIN 450, FIN 453, FIN 454, or FIN 457; either FIN 460 or FIN 461; four additional courses chosen from the 400-level FIN courses, B ECON 301 or ECON 301, or the 400-level B ECON courses, excluding FIN 490, FIN 495, FIN 499, B ECON 490, and B ECON 499.

**Human Resources Management Option:** The notation "Human Resources Management" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: MGMT 311, MGMT 411, MGMT 412, and two of the following courses: MGMT 323, MGMT 401, MGMT 402, MGMT 403, MGMT 404, or MGMT 413.

**Information Systems Option:** The notation "Information Systems" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: I S 310, I S 320, I S 410, I S 445, and I S 460.

**Marketing Option:** The notation "Marketing" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: MKTG 450, MKTG 460, and three additional MKTG electives, excluding MKTG 490, MKTG 495, and MKTG 499. It is recom-

mended that students take MKTG 450 and MKTG 460 before they take the other electives.

**Center for Technology Entrepreneurship (CTE):** The notation "Entrepreneurship" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes one of two pathways with a minimum cumulative GPA of 2.50.

All students are required to complete ENTRE 370 and two of the following three courses: MKTG 455, FIN 457, or MKTG 335. Entrepreneurship students must take MGMT 430 to complete one of the core requirements for the Business School.

Students in the Business Creation pathway must complete ENTRE 472 and ENTRE 473. Students in the Business Growth pathway must complete ENTRE 475 and ENTRE 476.

**Admission to the options:** Students can apply to one option at the same time they apply to the Business School. Continuing Business School students can apply during publicized application periods. If demand for the option exceeds the number of spaces available, students are considered based on the factors identified for admission to the Business School and on their GPA in all previous option-specific courses.

## Student Outcomes and Opportunities

\* **Learning Objectives and Expected Outcomes:** A business education develops important communication and interpersonal skills. The ability to express an idea, negotiate a settlement, motivate others, manage time, and build collaborative networks distinguishes the most successful business people. UW Business School students learn to recognize and define problems, examine data, and persuasively communicate their ideas to achieve results in organizations and people's lives. Regardless of post-graduation path -- be it climbing up the corporate ladder, starting a company, joining the Peace Corps, entering law school, or becoming a doctor -- a business education will help immeasurably.

\* **Instructional and Research Facilities:** The Foster Business Library houses an extensive collection of books, reference tools, and journals necessary to the study of business. Balmer Hall has wireless capabilities for faculty and student use and houses three computer labs with 120 workstations. The virtual NASDAQ trading room equipped with trading and analytical software allows students to simulate stock transactions using real-time market data and stock quotes so they can study diversification, hedging, and other investment strategies. The New Venture Creation Lab represents a new paradigm for integrating entrepreneurial education with technology development and hands-on experience. The lab features computer workstations, proprietary software, online technology and market assessment tools and data to assist student entrepreneurial efforts. The Business Writing Center provides free consultations on business class writing assignments, cover letters, and resumes.

\* **Honors Options Available:** Honors students benefit from a sense of community generated by honors seminars, as well as from the academic challenge associated with more rigorous study. The program requirements are flexible, challenging students to explore business topics in greater depth. Students entering the Honors program become candidates for the degree "With College Honors" or "With Distinction."

\* **Research, Internships, and Service Learning:** The Business School encourages student participation in internships to supplement in-class learning experiences. For more information about internship guidelines and a list of undergraduate internship opportunities, visit [depts.washington.edu/bschool/internships/](https://depts.washington.edu/bschool/internships/).

\* **Department Scholarships:** The Business School awards approximately 90 undergraduate scholarships. Some are general scholarships while others are specific to options or areas of concentration. Only students admitted to both the UW and the Business School are eligible to receive awards. Applicants are considered for all scholarships for which they meet the minimum qualifications and specific criteria. Although financial need is not a requirement for all business scholarships, most are awarded on the basis of need. (The FAFSA must be filed with the Office of Student Financial Aid.) The Business School scholarship application is due April 5.

\* **Student Organizations/Associations:** Chapters of Alpha Kappa Psi, Association of Black Business Students, Undergraduate Entrepreneurship Club, International Association of Students in Economics and Business (AIESEC), American Marketing Association, Business

Information Technology Society, Dow Dawgs Investment Club, Hispanic Business Association, Society for Human Resources Management, Business and Economic Development Program Leadership Team, Undergraduate Finance Club, Undergraduate Management Consulting Association, University Sales Club, and Undergraduate Leadership Forum provide opportunities for undergraduate students to meet informally and to participate in a variety of projects and events.

*Of Special Note:*

### **Double Baccalaureate and Second Baccalaureate**

Students who wish to earn more than one baccalaureate degree simultaneously should consult an academic adviser in the Business School Undergraduate Program Office, either during or before their junior year. Persons seeking a second baccalaureate after finishing a first should apply at the University's Office of Undergraduate Admissions. To be considered, applicants must complete by quarter of entry the same prerequisites for admission as applicants for the first baccalaureate degree. Since the number of eligible applicants exceeds that for which space is available, acceptance is competitive, based on the criteria listed above for selection of first baccalaureate degree applicants. The Business School uses the GPA for the last 90 credits earned.

### **Undergraduate Diversity Services**

Director, Jai-Anna Elliott

Recruitment, admissions counseling, advising, and support services are available for minority students underrepresented at the University, and students from educationally and economically disadvantaged backgrounds. Special scholarships are also available for underrepresented minority students. Academic advisers have information on the Business Educational Opportunity Program.

## **Graduate Programs**

### **Associate Dean for Master's Degree Programs**

David Burgstahler

### **Admission**

Qualified students who are graduates of the University of Washington or other accredited colleges or universities may be admitted to graduate degree programs. GPA, Graduate Management Admission Test score, work experience, educational and professional objectives, and other factors are considered in the admission process. Inquiries concerning the details of admission should be made to the specific degree program of interest, University of Washington, Graduate School of Business Administration, Mackenzie Hall, Box 353200, Seattle, WA 98195.

### **Application Procedure**

Applications to the MBA, EMBA, and PhD programs are considered for entry in autumn quarter only. Applications to the Technology Management MBA and Master of Science in Information Systems program are considered for entry in winter quarter only. The formal deadlines for application are February 1 for the PhD program; December 1, January 1, February 1, and March 1 for domestic applicants for the MBA; February 1 for international applicants for the MBA; April 1 for Evening MBA; and April 15 for the Executive MBA and MPAcc programs. Students are encouraged to apply as early as possible for the programs.

The Graduate School of Business Administration offers programs of study leading to the advanced degrees of Master of Business Administration, Master of Professional Accounting, Master of Science in Information Systems, and Doctor of Philosophy. Four programs can lead to an MBA degree: the full-time program, the evening program, the Technology Management (TMMBA) program, and the Executive MBA program.

## **Master of Business Administration**

### **Executive Director**

Dan Poston  
110 Mackenzie Hall, Box 353200  
206-543-4661  
mba@u.washington.edu

The full-time Master of Business Administration degree program has been designed for students who are preparing for a professional career in

management. A period of two academic years, or 96 academic credits, is required for most students to complete the MBA program. The first year of the program consists of 48 credits of required courses: B A 500 (16), B A 501 (16), B A 502 (10); three of the following bridge elective options: EBIZ 509 (2) (required for EBIZ certificate), ENTRE 509 (2) (required for CIE certificate), FIN 509 (2) (prerequisite for most finance electives), I BUS 509 (2), MGMT 579 (2-4, max. 12), or MKTG 509 (2). The second year of the program is 48 credits of elective courses. The student may take no more than 24 credits in any one elective area.

The evening MBA program is targeted toward fully employed college graduates who seek a management degree that can be earned outside their regular working hours. Instruction takes place two evenings per week and students typically take two courses per quarter. The program consists of 80 academic credits, with normal completion of degree requirements in ten quarters. The course requirements are as follows: ACCTG 500 (4), ACCTG 501 (4), B ECON 500 (4), B ECON 501 (4), FIN 502 (4), I S 504 (4), MGMT 500 (4), MGMT 502 (4), MGMT 505 (2), MKTG 501 (4), OPMGT 502 (4), QMETH 500 (2), QMETH 501 (2), 34 credits of electives

### **Special Programs**

Within the MBA program, there are options for special study: Global Business Program; E-Business Program, and the Program in Entrepreneurship and Innovation. The following concurrent degree programs are also available: MBA/JD with the School of Law, MBA/MAIS with the Henry M. Jackson School of International Studies, MBA/MSE with the College of Engineering's Program in Engineering and Manufacturing Management, and MBA/MHA with the School of Public Health and Community Medicine.

## **Executive Master of Business Administration**

### **Director**

Louise Kapustka  
206-685-1333  
emba@u.washington.edu

Since the autumn of 1983, the Executive MBA Program has provided an additional pathway to the Master of Business Administration degree. The EMBA program provides an intensive executive-development experience to a select group of midcareer managers who continue to work full-time while pursuing the MBA degree. Candidates for this two-year program should have seven or more years of increasingly successful work experience including three to four years in management, and currently hold mid- or top-level management positions. They are typically sponsored by their organizations and have been identified as employees with high potential to advance as general managers. Students are selected to ensure diversity of industry, functional areas and organizational size.

The Executive MBA degree program is offered in two scheduling options. Both run for two academic years, September through June. (1) The Regional Program meets on campus for a full day once a week, on alternating Fridays and Saturdays. In addition, students attend spring and fall residence sessions each year. (2) The North America Program meets on campus once a month, generally for three consecutive days, Thursday through Saturday. Between monthly sessions, students continue to interact with faculty and classmates online via the Internet and interactive groupware. This format is designed for individuals from the greater Northwest as well as those from the Puget Sound area whose schedules preclude weekly attendance.

While the scope of the curriculum is comparable to that of the regular MBA program, the pace is more intense and the perspective is that of a general manager. There are 21 required courses and no electives.

### **Admission Requirements**

- \* *Letter of Endorsement:* Candidates must be sponsored by their employing organizations and endorsed by senior management as potential general managers. In sponsoring EMBA candidates, organizations agree to release them on class days and, in some cases, to cover the program fee. Individuals not sponsored by a company need to submit an additional letter of recommendation in place of the Letter of Endorsement.
- \* Three letters of recommendation
- \* Graduate Management Admission Test (GMAT) scores
- \* Two sealed copies of official transcripts from all degree-granting institutions attended

Applications are accepted throughout the year, with an application deadline of April 15 for the class beginning each autumn. Late applications are handled on a space-available basis.

## Degree Requirements

The 21-month, 68-credit curriculum builds a solid foundation of business fundamentals. Case studies and group projects link theory with current business practice. Themes based on current trends in business, including the impact of technology and globalization, are threaded through the entire curriculum.

Students frequently use their own organizations as laboratories, applying lessons learned in the classroom and then bringing the results back to the class for further discussion.

The following are the required courses: EMBA 502 (2), EMBA 503 (2), EMBA 504 (4), EMBA 505 (5), EMBA 506 (3), EMBA 510 (3), EMBA 511 (1), EMBA 512 (4), EMBA 520 (5), EMBA 521 (4), EMBA 529 (2, 2), EMBA 530 (3), EMBA 531 (5), EMBA 532 (5), EMBA 533 (4), EMBA 534 (2), EMBA 540 (2), EMBA 551 (4), EMBA 552 (2), EMBA 558 (4).

## Technology Management Master of Business Administration

### Director

206-221-6995  
tmmba@u.washington.edu

The Technology Management MBA program is designed for professionals who are employed in technology companies or who work in technology jobs in more traditional businesses. The curriculum combines the essential components of management education with a specialized focus on high-tech industries. It is structured for individuals who want to play a broader role in management and are seeking the necessary management skills and business knowledge. The program is focused on real-world projects and analyses, collaborative learning in study groups and extensive participant interaction in the classroom. Candidates for this 18 month program have technology experience and upward career progression.

The Technology Management MBA program provides an intensive educational experience to professionals who will continue to work full-time while pursuing their MBA degree. The TMMBA program runs six consecutive quarters of instruction-beginning every January and ending the next year in June. Three-hour sessions are held once a week on a mid-week evening and six-hour sessions are scheduled two Saturdays per month. There are 68 required credits of which 6 are electives. Additionally, two residential sessions are offered one at the beginning of the program and one at the end. Candidates may be sponsored by their organizations or apply on their own.

## Admission Requirements

- \* Applicants should hold a professional position and have a minimum of five years of work experience. Applicants must demonstrate a career trend of increased responsibilities or promotions. Supervisory or management experience is not required, but applicants should demonstrate leadership potential. Candidates' work accomplishments and letters of recommendation should provide evidence of their potential for senior management.
- \* Applicants must hold a baccalaureate degree from an accredited college or university.
- \* Personal statement
- \* Three letters of recommendation and evaluations
- \* Resume
- \* Interview
- \* GMAT scores
- \* Two sealed copies of official transcripts
- \* Additional requirement for permanent residents: Proof of English language proficiency (if applicable)
- \* Additional requirements for international applicants: International Graduate Admissions Application, Proof of Financial Ability form, photocopy of current visa (if applicable), notice of action (if applicable), proof of English language proficiency (if applicable)

Each year approximately 50 students are accepted into the TMMBA Program. Applications are accepted throughout the year. Please contact the TMMBA office to find out the applications deadlines for the upcoming class.

## Degree Requirements

TMMBA 500 (1, 1), TMMBA 501 (5), TMMBA 502 (4), TMMBA 503 (2, 2), TMMBA 505 (4), TMMBA 507 (4), TMMBA 510 (4), TMMBA 512 (4), TMMBA 515 (4), TMMBA 516 (4), TMMBA 517 (4), TMMBA 520 (4), TMMBA 521 (2), TMMBA 522 (4), TMMBA 528 (2, 2), TMMBA 530 (1), TMMBA 551 (4), 6 credits of electives

## Master of Professional Accounting

### Managing Director

Francine Shafer  
231 Mackenzie  
206-616-4964

The Master of Professional Accounting (MPAcc) prepares students for high-level careers with major accounting and consulting firms, governmental agencies, and industry. Students with undergraduate degrees in accounting may complete the program in three quarters. Students with no prior business background must take an expanded version of the program. Enrollment is limited to 25 to 30 students in each of two tracks-Accounting and Assurance (A&A) and Taxation. MBA students with a strong interest in accounting and taxation may earn a joint MBA/MPAcc degree.

## Admission Requirements

- \* Satisfactory completion of prerequisite courses (see Web site for list of prerequisite courses)
- \* Scores from the GMAT exam
- \* International TOEFL scores
- \* Well written essays
- \* Work experience
- \* Volunteer and student activities

## Degree Requirements, Auditing and Assurance Pathway

48 credits, as follows:

- \* ACCTG 521 (4), ACCTG 523 (4), ACCTG 527 (4), ACCTG 576 (2), ACCTG 566 (4), ACCTG 577 (4), ACCTG 579 (4, 4, 4)
- \* *Internship*: ACCTG 575 (14). If no internship, complete four approved elective classes: ACCTG 420 (3), ACCTG 524 (3), ACCTG 525 (4), ACCTG 562 (4) ACCTG 564 (4)

## Degree Requirements, Taxation Pathway

48 credits, as follows: ACCTG 530 (4), ACCTG 531 (3), ACCTG 533 (3), ACCTG 534 (3), ACCTG 535 (3), ACCTG 536 (3), ACCTG 537 (3), ACCTG 538 (3), ACCTG 539 (4), ACCTG 541 (4), ACCTG 541 (4), ACCTG 543 (3), ACCTG 547 (3)

## Doctor of Philosophy

### Program Coordinator

Jaime Banaag  
102 Mackenzie  
206-543-4111  
baphd@u.washington.edu

The Ph.D. program in business administration is a research-based program designed to train scholars interested in academic careers, although this training is also useful for individuals seeking research positions in business and government, as well as in consulting firms.

With the guidance of faculty members who have similar interests, Ph.D. students complete a program of formal coursework (a minimum of 18 courses) and participate in doctoral seminars, independent study, and research. A faculty supervisory committee is appointed early in the program to assist each student in constructing a course of study that fits that individual's background and interests. Students select one major area of specialization and complete requirements in two or three additional minor areas that support their major area of specialization (including areas outside the Business School, such as economics, psychology, and mathematics). Throughout the program, doctoral students receive support and training that hone their skills as teachers and course developers.

Major areas of concentration include accounting, finance, human resource management and organizational behavior, marketing, information systems, operations management, operations research, and strategic management. All doctoral students are required to have research methods as one of their minor areas.

Doctoral study is full-time and year-round, and students are admitted autumn quarter only. Most candidates require four to five years to complete the program. The School's goal is to make financial aid available, in the form of research and teaching assistantships, to all of its doctoral students. In addition to service appointments, fellowships are available on a competitive basis to support students engaged in their dissertation research during the final part of their programs.

---

## Special Requirements

Applicants to graduate business programs are required to submit scores on the Graduate Management Admission Test. Those admitted to the MBA program must demonstrate understanding of the fundamental concepts of calculus.

---

## Accounting

[foster.washington.edu/departments/acctg](http://foster.washington.edu/departments/acctg)

Accounting involves development and communication of financial and operational information for business and nonprofit economic entities. The curriculum includes understanding accounting information systems, using accounting information in managerial decision making, preparing and auditing financial statements under generally accepted accounting and auditing standards, and understanding the fundamental aspects of personal and corporate taxation. Elective courses provide in-depth instruction in managerial and financial accounting, not-for-profit accounting, and taxation. Courses provide a foundation for careers in accounting (public, industrial, private, or governmental), for a general business career, or for other professions such as law.

For more information, see the Department of Accounting Web site. See also the Course Catalog for course descriptions.

---

## Finance and Business Economics

[foster.washington.edu/departments/finance](http://foster.washington.edu/departments/finance)

Finance and Business Economics address the financial and economic aspects of business decision making. The Finance curriculum focuses on financial management and the financial markets within which firms and individual investors operate. Business Economics courses concern the economic behavior of firms, including factors that determine costs and prices, and real and monetary forces (such as government policies) that affect the national and international economic environment.

For more information, see the Department of Finance and Business Economics Web site. See also the Course Catalog for course descriptions.

---

## Management and Organization

[foster.washington.edu/departments/mo](http://foster.washington.edu/departments/mo)

Management and Organization provides an understanding of the processes and structures of organizations through three distinct programs. The Human Resource Management and Organizational Behavior (HRMOB) courses address personnel and industrial-relations topics such as selection, performance appraisal, compensation, and negotiations, as well as behavioral topics such as leadership, motivation, and group dynamics. They prepare students for managing an organization's human resources effectively. The Organization and Environment (O E) courses examine organization theory, organization design, and management of technology and innovation, as well as the social, political, legal, and ethical environments in which organizations operate. They give students the knowledge,

perspective, and analytical tools to deal effectively with organization-environment interactions. The Business Policy (B POL) courses focus on organizational effectiveness from the viewpoint of top management. Emphasis is placed on an integrated view through strategic management and control, planning, decision making, and entrepreneurship.

For more information, see the Department of Management and Organization Web site. See also the Course Catalog for course descriptions.

---

## Information Systems and Operations Management

[foster.washington.edu/departments/isom](http://foster.washington.edu/departments/isom)

The Department of Information Systems and Operations Management consists of three subareas: Information Systems (I S), Operations Management (OPMGT), and Quantitative Methods (QMETH). The Information Systems area focuses on the management of computer-based information systems. The IS curriculum is designed to give students a basic understanding of IS technology and its impact on all phases of an organization. Specific areas of study include data communications and networks, systems analysis and design, database management, expert systems, and applications programming. The Operations Management (OPMGT) area of study refers to the functional area of management which produces goods or services in an organization. Specifically, the OPMGT curriculum focuses on the many changes which have occurred in the past ten years in the way that managers think, plan, and operate manufacturing and service facilities. The area includes courses in logistics, quality, inventory and supply-chain management, project management, and waiting lines, among others. The Quantitative Methods (QMETH) area focuses on the theory and application of mathematical and statistical tools in the modeling and analysis of business problems. The QMETH curriculum includes courses in statistics and data analysis as well as courses in operations research (e.g., linear programming, forecasting, using spreadsheets to construct decision support models).

For more information, see the Department of Information Systems and Operations Management Web site. See also the Course Catalog for course descriptions.

---

## Marketing and International Business

[foster.washington.edu/departments/mib](http://foster.washington.edu/departments/mib)

Marketing (MKTG) provides knowledge of concepts and relationships in the areas of consumer behavior, channels of distribution, measurement and analysis of markets, pricing, physical movement of goods, product development, promotion, and sales administration. Marketing careers may involve specialization in Internet marketing, product or brand management, advertising, selling, sales management, marketing research, retailing, wholesaling, and international marketing for a wide spectrum of firms and industries. International Business (I BUS) includes trade, payments, and multinational corporate systems and activities. The area prepares students for international responsibilities in domestic business firms, governmental agencies, and overseas business. Courses in Business Communications (B CMU) stress writing in organizations to accomplish goals, oral reporting, business plan presentation, and the use of computer graphics in communication.

For more information, see the Department of Marketing and International Business Web site. See also the Course Catalog for course descriptions.

# School of Dentistry

---

## Dean

Martha Somerman  
D322 Health Sciences

www.dental.washington.edu

Established in 1945, the University of Washington School of Dentistry offers courses leading to a Doctor of Dental Surgery (D.D.S.) degree, and advanced education leading to a Master of Science in Dentistry degree and/or a certificate of proficiency in endodontics, oral medicine, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Residency training is available in oral and maxillofacial surgery and general practice. The Department of Oral Biology offers a Master of Science (M.S.), an M.S. non-thesis degree for dental hygiene educators, and a doctoral degree (Ph.D.). Postdoctoral study is available in various disciplines. The School also offers a baccalaureate degree completion program in dental hygiene.

Opportunities to earn other degrees concurrently (M.S. or Ph.D. in the School of Dentistry's Department of Oral Biology and other schools) may be arranged on an individual basis.

These educational programs are enriched by the School's strong commitment to research and the presence of a Regional Clinical Dental Research Center, a Comprehensive Center for Oral Health Research, a Dentist-Scientist program, and a fellowship research training programs for predoctoral and postdoctoral students. The mission of the Regional Clinical Dental Research Center is to foster clinically relevant research that will advance dentistry's knowledge base, improve patient care, and promote oral health. The Comprehensive Center for Oral Health Research is focused on children's dental health and is one of only six such programs to be funded nationally by the National Institute of Dental and Craniofacial Research. State-of-the-art clinical research facilities are available for faculty and student use.

*School of Dentistry Mission Statement:* "The School of Dentistry shares the University's overall mission to generate, disseminate, and preserve knowledge and serve the community. The School is an integral part of the Health Sciences Center and is an oral health-care center of excellence serving the people of the state of Washington and the Pacific Northwest. Our primary mission, through educational, research, and service programs, is to prepare students to be competent oral health-care professionals. The School's research programs contribute to the fundamental understanding of biologic processes and to the behavioral, biomedical, and clinical aspects of oral health. The service mission is to improve the health and well-being of the people of the community and the region through outreach programs that are especially attentive to minority and underserved populations. The School values diversity in its students, staff, faculty, and patient populations. It seeks to foster an environment of mutual respect where objectivity, imaginative inquiry, and the free exchange of ideas can flourish to facilitate personal development, professionalism, and a strong sense of self-worth." (August 2002)

The following departments participate in the curriculum for the School's programs:

- \* *Dental Public Health Sciences* is concerned with the social, legal, political, economic, and psychological aspects of dental health-care delivery as well as the epidemiology of oral diseases and the application of biostatistical methods in studying them.
- \* *Endodontics* offers training in the diagnosis and treatment of diseases and injuries of the tooth pulp and periradicular tissues.
- \* *Oral and Maxillofacial Surgery* trains students in the procedures used for all types of operations in the oral cavity and all phases of dental pain control.
- \* *Oral Biology* encompasses the study of basic biological mechanisms in normal and diseased oral tissues and structures.
- \* *Oral Medicine* provides training in diagnostic techniques and nonsurgical treatments of oral disease.
- \* *Orthodontics* provides training in the prevention and correction of malocclusion of the teeth.
- \* *Pediatric Dentistry* provides students with a broad understanding of prevention, diagnosis, and treatment of most dental needs from infancy through adolescence with emphasis on the psychological and educational requirements of the patient and parent.

- \* *Periodontics* offers training relative to the periodontium and dental implants, with emphasis placed on diagnosis, prevention, treatment, and maintenance.
- \* *Prosthodontics* provides instruction in the fabrication and maintenance of removable, complete, and partial dentures, and dental implants.
- \* *Restorative Dentistry* offers training in the restoration or replacement of tooth structure and study of the form and function of the masticatory structures.

## Undergraduate Program

Dental hygiene seeks to understand why some people get preventable oral diseases and why others do not. Risk factors, such as poverty, ethnicity, and education, as well as environment, contribute to perpetuation of these diseases. The dental hygienist observes and defines dental diseases, assesses potential outcomes of interventions, and manages conditions that compromise oral health. As an applied discipline, dental hygiene links its theoretical foundation to behavioral and natural sciences. Using evidence-based science, the discipline seeks to facilitate holistic assessments of individuals and communities and to find solutions to oral health problems. Students in the discipline learn to transfer learning from clinical to community contexts as a means of improving the oral health status among people.

Adviser  
D583 Health Sciences, Box 357475  
(206) 543-5820  
dhgy@u.washington.edu

The Dental Hygiene Degree Completion Program offers the following program of study:

- \* Bachelor of Science degree with a major in dental hygiene.

The UW has no prelicensure program in dental hygiene.

*Please note:* The dental hygiene program is currently undergoing a major revision. Please contact the program for further details.

## Bachelor of Science

*Suggested First- and Second-Year Courses:* Students desiring entry into the dental hygiene profession may take their first year general studies courses in chemistry, psychology, sociology, public speaking, English language composition, mathematics, nutrition, microbiology, and liberal studies at the UW, or another community, technical, or four-year institution. Having successfully completed a pre-licensure dental hygiene program and obtained a license to practice dental hygiene, students are eligible to return to the UW to complete the Bachelor of Science degree with a major in dental hygiene.

## Department Admission Requirements

The dental hygiene program is currently undergoing a major revision and is not accepting new applicants. Please contact the program for further information.

## Major Requirements

Students must complete University requirements as well as dental hygiene major requirements. University requirements include a 45-credit senior residency; English, writing, and quantitative reasoning proficiencies; and Areas of Knowledge. The dental hygiene major requirements include a sequence of three dental-hygiene core courses and a minimum of one path.

Completion of the required major and University requirements takes one to two years. Students planning to graduate in one year must have a faculty-approved plan of study within the first quarter of enrollment. Students planning a two-year program must have a faculty-approved plan of study within the first two quarters of enrollment. All students must meet with a program adviser yearly and are encouraged to meet with a program adviser quarterly.

## Core Requirement

Students complete a year-long core requirement founded on significant oral health problems and probable solutions within the context of specific communities. Behavioral change, community development, health education models, and scientific literature provide a theoretical foundation for study in the core courses. The core curriculum focuses on real problems in real places. Using a people-places-problems approach, students use Internet and library resources to research, analyze, discuss, and make evidence-based decisions relevant to oral health promotion and dental disease prevention. Further, they explore core values, ethics, laws, and issues related to care access, health promotion/disease prevention approaches, and healthcare delivery models. Included are field activities linked to education, government, business, and health resources. Additionally, dental hygiene majors complete requirements in at least one path and may take electives of their choice to complete the senior residency requirement. All students must complete the three core courses, D HYG 465, D HYG 492, and D HYG 493 (3 credits each, total 9) in the prescribed order.

## Path Requirement

Students must select at least one of two pathways to fulfill the path requirement. The options are:

**Dental Hygiene Care.** This path is for dental hygienists who desire to work as clinicians in hospitals, clinics, long-term care facilities or other healthcare services that require advanced clinical and management skills. Students take courses in interdisciplinary health sciences, along with courses that focus on dental hygiene care and management of persons with physical, mental, developmental, and complex medical disabilities. Required courses in oral medicine augment this path. Major requirements include a minimum of 11 or 12 credits beyond the core: 10 credits in ORALM 460, or approved alternatives that focus on care of special clients; 3 credits of approved interdisciplinary health science courses; and 2 credits of approved research.

**Oral Health Promotion.** This path is for dental hygienists who desire to work in multicultural and multidisciplinary settings at the local, state, national, or international levels and who require skills beyond clinical expertise. Students learn about the framework within which societies organize and manage their healthcare services and learn to link health with the environment, people's beliefs, ways of life, and kinship. They learn about differences between Western, Eastern and Shamanistic philosophies of health as prerequisites to developing educational strategies for oral health promotion and dental disease prevention. As students build skills essential for working with health agencies, they participate in community health projects as educators, advocates, or researchers. Activities focus on the health of children and families in rural and remote areas of Washington state. Major requirements for this path include a minimum of 15 credits beyond the core, to include 3 credits in approved interdisciplinary health sciences courses, 3 credits in healthcare delivery systems, D HYG 402 or substitute; 3 credits in health promotion strategies (D HYG 403) or approved substitute; and a minimum of 4 credits in at least 2 sections of D HYG 404 or approved substitutes.

## Academic Standards

The School of Dentistry requires that a minimum numerical grade of 2.5 be earned in dental hygiene courses counted toward satisfaction of graduation requirements with a dental hygiene major. Graduation with a dental hygiene major also requires a minimum cumulative GPA of 2.00 for all work done in residence at the University. A student whose cumulative GPA falls below 2.00 in any quarter will be placed on academic probation. While on probation, the student must attain at least a 2.50 GPA for each succeeding quarter's work until the cumulative GPA is raised to 2.00.

## Student Outcomes and Opportunities

\* **Learning Objectives and Expected Outcomes:** The UW Dental Hygiene Completion Program emphasizes the health of populations rather than of individuals. Dental hygienists conduct community assessments; develop networks that engage community partners; set priorities; obtain baseline measures; set targets; and measure progress toward solutions to community oral health problems. Dental hygiene core skills include the ability to search and retrieve information from the Internet; use census, geographic, and demographic data; critically assess scientific literature; analyze and interpret data; and apply new scientific knowledge to solutions of health problems. In addition to the core knowledge set, dental hygienists select from two paths of study: care of special

populations and oral health promotion. Depending upon area of interest, graduates pursue careers as business managers, marketing specialists, clinic administrators, hospital and nursing home dental hygienists, public health planners, program managers, research assistants, and teachers of dental hygiene.

\* **Honors Options Available:** None.

\* **Research, Internships, and Service Learning:** Students in the undergraduate program take off-campus service-learning courses related to their path of study. Generally, sites are located in rural and underserved health provider shortage areas of Washington state, but may include regional, national, or international locations.

Students are eligible for international programs and exchanges following completion of their core course requirements. An applicant who is a dental hygienist from an affiliated international institution may be eligible for a tuition waiver during one or more quarters of the regular academic year (autumn, winter, spring). Students interested in these opportunities need to contact the program's academic adviser at least six months in advance.

Majors may be eligible, following the completion of prerequisite courses, to participate in study-abroad programs that focus on health care delivery, oral health promotion, or dental disease prevention. The University and its affiliated sites provide the settings for fieldwork, service, and research activities, and interdisciplinary learning experiences.

\* **Department Scholarships:** Students may apply for scholarships offered by the Dental Hygiene Education fund.

\* **Student Organizations/Associations:** The Washington Rural Health Organization, Washington State Public Health Association, Washington State Dental Hygienists' Association, American Dental Education Association, and International Association of Dental Research are among many from which to select.

**Of Special Note:** The 90-credit community college transfer limit does not apply to students admitted to this program. The last 45 credits for the degree must be earned in residence at the UW.

## Graduate Programs

Through their respective departments, the graduate faculty members of the School offer programs leading to the degrees of Master of Science in Dentistry, Master of Science, and Doctor of Philosophy, as well as postgraduate certificate programs.

### Master of Science in Dentistry/Postgraduate Certificates

Fields of study for the M.S.D. programs include endodontics, oral pathology, oral medicine and orofacial pain, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Although students may enroll in a graduate certificate program only, they may elect to pursue an M.S.D. The programs are planned to prepare students to think independently, to evaluate their own services and the literature of the programs, and to develop clinical skills to a level to permit successful clinical practice, teaching, or research in their chosen specialty. Emphasis is placed on the basic principles of diagnosis and treatment. The purpose of the programs is not only to train students in their respective specialties but also to encourage preparation for academic careers or for research. Research may be undertaken in basic or applied science. Opportunities for collaborative research are available with the cooperation of other colleges, schools, or departments of the University.

Postgraduate certificate programs are not administered by the Graduate School, and no thesis is required. The course content may vary somewhat from the M.S.D. program, although the same academic standards are applied in both programs. Tuition and fees are assessed at the graduate level for both programs.

### Master of Science in Dentistry

#### Admission Requirements

\* Either a baccalaureate or a professional degree from a dental or medical school.

- \* Completed application and application fee of \$50
- \* Three letters of recommendation
- \* 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals. Optional - a personal statement that addresses the relationship between personal background and aspirations
- \* A brief biographical sketch in a resume/CV format
- \* Official transcripts, sent directly to the Department of Oral Biology
- \* GRE General Test scores
- \* TOEFL required for international students. The minimum TOEFL score required for acceptance is 237 computer, 580 paper, iBT 70 (based only on listening, reading and writing sections)

### Degree Requirements

50 credits, to include the following:

- \* *Required courses:* ORALB 564 (1-3, max. 10), ORALB 565 (1-3, max. 10), ORALB 566 (2-4, max. 16), ORALB 569 (2), PERIO 575 (1-3, max. 10), ORALB 570 (1-3, max. 9), ORALB 575 (1-3, max. 10), ORALB 579 (2); either ORALB 591 (1-2, max. 2), ORALB 592 (1-2, max. 2), or DPHS 568 (3); for foreign-trained dentists and non-dentists: ORALB 572 (3), PATH 544 (2/3, max. 5)
- \* *Recommended electives:* DPHS 569 (2), MEBI 520 (2), ORALB 562 (1-5, max. 10), ORALB 574 (3), PATH 501 (1, max. 9), PATH 535 (\*, max. 20), PATH 552 (2-5, max. 30)
- \* *Research:* Fulfilled by either a report on experimentation carried out by the student in one of the laboratories, or a case report with review of the literature. Students interested in a more research-intensive experience should consider enrolling in the M. S. in Oral Biology (thesis) program.
- \* *Teaching:* Students are encouraged to take elective courses offered through the Department of Medical Education and Graduate School.
- \* *Note:* At present, this program is not certified by the American Board of Oral Pathology.

### Master of Science in Dentistry, Endodontics

#### Admission Requirements

- \* Professional degree from a dental school
- \* Completed application and application fee of \$50
- \* Three letters of recommendation
- \* A personal statement that addresses the relationship between the student's personal background and aspirations
- \* Brief biographical sketch in a resume/CV format
- \* Official transcripts, sent directly to the Department of Endodontics (international applicants must also send official transcripts to the Graduate School)
- \* GRE General Test, required only from applicants who graduated from a non-ADA-accredited dental school
- \* TOEFL, required for international students. The minimum TOEFL score required is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections)

#### Degree Requirements

Minimum 122 credits, to include the following:

- \* Students who have adequate backgrounds in required courses may, on presentation of appropriate documentation, be excused from required courses at the discretion of the program director.
- \* *Required Core Courses:* ENDO 561 (2), ENDO 580 through ENDO 587 (2 credits each), ENDO 590 (2, max. 16), ENDO 593 (1, max. 3), ENDO 594 (1), ENDO 600 (var.), ENDO 658 (1), ENDO 660 (4, max. 32), DENT 565 (2), DENT 568 (1-3, max. 6), DPHS 568 (3), DPHS 569 (2), ORALB 569 (2), ORALB 574 (3), ORALB 579 (2), ORALB 591 (1-2), ORALB 592 (1-2), ORALM 580 (2), ORTHO 580 (3), PERIO 567 (1, max. 3), PERIO 582 (1, max. 12), PERIO 585 (1, max. 12), PERIO 586 (1, max. 9).
- \* *Non-Thesis Research:* A non-thesis research study is required. During the first year, each student is encouraged to gain familiarity with research in progress and to help identify an area of special interest. Then, a preceptor and research advisory committee is appointed and the student begins research work. The master's defense is concerned with the research subject matter and is conducted as an open seminar followed by examination by the advisory committee.
- \* *Teaching:* Students audit predoctoral lecture courses in endodontics, assist with teaching in the predoctoral endodontics laboratory course, and supervise predoctoral dental students working in the endodontic clinic.

### Master of Science, Oral Biology

#### Admission Requirements

- \* Either a baccalaureate or a professional degree from a dental or medical school
- \* Completed application and application fee of \$50
- \* Three letters of recommendation
- \* 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals. Optional – a personal statement that addresses the relationship between the student's personal background and aspirations
- \* Brief biographical sketch in a resume/CV format
- \* Official transcripts, sent directly to the Department of Oral Biology
- \* GRE General Test
- \* TOEFL required for international students. The minimum TOEFL score required for acceptance is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections)

#### Degree Requirements

- \* Minimum 70 credit hours (including at least nine credits of thesis), of which at least 7 credits must be from science courses outside the Department of Oral Biology. Students who have adequate backgrounds in required courses may, on presentation of appropriate documentation, be excused from required courses; up to six hours of transfer credit may be granted at the discretion of the Graduate School.
- \* *Required core courses:* ORALB 569 (2), ORALB 575 (1-3, max. 10), ORALB 578 (2-4, max. 15), ORALB 579 (2), ORALB 581 (1-3, max. 3), ORALB 591 (1-2, max. 2), ORALB 592 (1-2, max. 2), ORALB 600, ORALB 700, DPHS 568 (3)
- \* *Electives:* 7 credits from science courses outside oral biology
- \* *Recommended:* One class on educational methods
- \* *Thesis research:* A research thesis is required. During the first year, each student is encouraged to spend time in several laboratories to gain familiarity with research in progress and to help identify an area of special interest. Then, a preceptor and thesis advisory committee is appointed and the student begins thesis work. The Final Examination is concerned with the subject matter of the thesis and is conducted as an open seminar followed by examination by the advisory committee.
- \* *Teaching:* Students are encouraged to take elective courses offered through the Department of Medical Education and Graduate School.

### Master of Science, Dental Hygiene

#### Admission Requirements

- \* Either a baccalaureate or a professional degree from a dental or medical school
- \* Completed application and application fee of \$50
- \* Three letters of recommendation
- \* 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals. Optional – a personal statement that addresses the relationship between the student's personal background and aspirations
- \* Brief biographical sketch in a resume/CV format
- \* Official transcripts, sent directly to the Department of Oral Biology
- \* GRE General Test
- \* TOEFL required for international students. The minimum TOEFL score required for acceptance is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections)

#### Degree Requirements

70 credits, as follows:

- \* *Coursework:* 48 credits, as follows: CONJ 401 (4), CONJ 402 (4), CONJ 403 (4), PATH 544 (2-3, max. 5), PERIO 575 (2), ORALB 520 (3), ORALB 561 (3, max. 6), ORALB 572 (3, max. 6), ORALB 575 (1-3, max. 10); at least one of the following: PERIO 517 (2), DPHS 568 (3), DPHS 569 (2), or O S 532 (2); at least two of the following: MEBI 520 (2), MEBI 521 (3), GRDSCH 630 (2, max. 6), ORALB 562 (2, max. 10)
- \* *Electives:* 22 credits of electives. Recommended electives: ORALB 569 (2), ORALB 574 (3), ORALB 578 (2-4, max. 15), ORALB 579 (2), ORALB 600 (\*), DENT 534 (1, max. 2), DPHS 550 (\*, max. 6), DPHS 569 (2), ORTHO 580 (2), O S 520 (2), PHCOL 434 (2), PHCOL 435 (2), ORALM 520 (2)
- \* Clinical opportunities may be available in the DECOD (Dental Education in Care of Persons with Disabilities) and the Dental Fears Clinics.

## Doctor of Philosophy

### Admission Requirements

- \* Either a baccalaureate or a professional degree from a dental or medical school
- \* Completed application and application fee of \$50
- \* Three letters of recommendation
- \* 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals. Optional – a personal statement that addresses the relationship between the student's personal background and aspirations
- \* Brief biographical sketch in a resume/CV format
- \* Official transcripts, sent directly to the Department of Oral Biology
- \* GRE General Test
- \* TOEFL required for international students. The minimum TOEFL score required for acceptance is 237 computer, 580 paper, iBT 70 (based only on listening, reading, and writing sections)

### Degree Requirements

Minimum 90 credits (including at least 27 credits of thesis). Through coursework, students are expected to gain proficiency in one or more basic biological sciences and to master modern biological approaches in addition to gaining expertise in the subject area of oral and craniofacial sciences. At least 15 credit hours must come from science courses in departments other than oral biology. These include courses offered through the School of Medicine and courses selected to match the basic science interests of the student. Cross-disciplinary training in bioengineering is also available. All graduate students attend and participate in departmental seminars (ORALB 575).

- \* *Required core courses:* ORALB 569 (2), ORALB 575 (2-4, max. 15), ORALB 578 (2-4, max. 15), ORALB 579 (2), ORALB 581 (1-3, max. 3), ORALB 591 (1-2, max. 2), ORALB 592 (1-2, max. 2), ORALB 600, ORALB 800, DPHS 568 (3)
- \* At least 6 credits from the School of Medicine: CONJ 524, CONJ 551 (1.5, 1.5) or PABIO 536 (3).
- \* *Strongly recommended:* At least one class on educational methods

### Residency Training

Residency training programs are available in oral and maxillofacial surgery and the general practice of dentistry. Both programs provide for rotation through several of the University-affiliated hospitals. Each is a fully accredited program that grants a certificate upon successful completion of the training. Stipends are provided.

The oral and maxillofacial surgery program is four years in duration and provides broad exposure to all aspects of the practice of oral and maxillofacial surgery. Application, selection, and administration of this training program is provided through the Department of Oral and Maxillofacial Surgery. Applicants to the program must be graduates of an accredited U.S. or Canadian Dental School, demonstrate proficiency in the English language, submit National Dental Board Examination scores for Part 1, and register and participate in the Postdoctoral Dental Matching Program. Further information can be obtained by contacting the Residency Program Coordinator, Department of Oral and Maxillofacial Surgery, Box 357134, University of Washington, Seattle, WA 98195-7134, 206-543-7722.

The General Practice Residency (GPR) is a one-year training program that emphasizes the general dentist's role in a hospital and the management of medically, physically, and mentally compromised patients. Application, selection, and administration of the General Practice Residency is provided through the Department of Restorative Dentistry. Further information can be obtained by contacting Dr. Barton S. Johnson, Division of Hospital Dentistry, Department of Restorative Dentistry, Box 357456, School of Dentistry, University of Washington, Seattle, WA 98195-7456; (206) 543-7496; or visit the General Practice Residency Web site.

### Postdoctoral Fellowships

Postdoctoral training fellowships are available in behavioral or public-health research in dentistry in addition to those in oral biology. Programs vary in duration and many accommodate degree-seeking or research fellows pursuing an academic career. NIH-sponsored partial tuition and a stipend for up to three years are provided for U.S. citizens, noncitizen nationals, and those foreign nationals with permanent-residency status in the United States. Members of ethnic minorities and women are especially invited to

apply. Application, selection, and administration of the program are provided through the Departments of Dental Public Health Sciences and Oral Biology.

## Graduate Training in Dental Public Health

Opportunities exist for pursuing graduate degrees in public health which emphasize applications to research in dentistry. Master of Public Health (M.P.H.) programs in the Departments of Epidemiology and Health Services of the School of Public Health and Community Medicine can be pursued in conjunction with postdoctoral training in the School of Dentistry's Department of Dental Public Health Sciences. Didactic coursework is taken in the School of Public Health and Community Medicine, augmented with independent study and thesis research on selected topics in the School of Dentistry. Similar opportunities exist for pursuing the Ph.D. in epidemiology or biostatistics with an emphasis on research in dentistry. Further information may be obtained from the Office of Academic Affairs, Box 357480, School of Dentistry, University of Washington, Seattle, WA 98195-7480, (206) 221-6887.

The Office of Continuing Dental Education, School of Dentistry, offers programs and courses throughout the year to provide dentists, auxiliary personnel, and others involved in health care with current scientific knowledge and methodology of patient treatment. Utilizing local, national, and international experts, these programs provide a broad spectrum of information relevant to the needs of dental-health professionals. The instructional program consists of lectures, clinical courses, study clubs, extended clinical training, correspondence, and participation courses, some of which are offered in the new simulated-patient laboratory. Various programs are presented throughout the year in the Pacific Northwest, Alaska, and Hawaii.

A list of courses offered may be obtained from the Office of Continuing Dental Education, Box 357137, University of Washington, School of Dentistry, Seattle, WA 98195-7137, 206-543-5444, [www.dental.washington.edu/conted/index.php](http://www.dental.washington.edu/conted/index.php).

## Professional Programs

### Doctor of Dental Surgery

The Doctor of Dental Surgery (D.D.S.) curriculum provides students with opportunities to learn the fundamental principles significant to the entire body of oral health. Students (approximately 63 per class) learn the basic health sciences, attain proficiency in clinical skills, develop an understanding of professional and ethical principles, and develop reasoning and critical decision-making skills that enable implementation of the dental knowledge base. The first year is divided among lecture, laboratory, and preclinical activities in basic sciences, dental anatomy, occlusion, and dental materials. There are also early clinical experiences in preventive dentistry and periodontics. In the second year, students develop additional preclinical skills, learn how basic science principles are applied to the clinical setting, and begin clinical patient treatment in the school's clinics. In the third and fourth years, students primarily concentrate on providing clinical treatment and attend lectures that refine diagnostic and technical skills. Additionally, students are required to participate in elective clinical and didactic courses. Students choose elective courses offered by all departments, including opportunities in independent study, research, seminars on various topics, and specialty clinical topics.

The D.D. S. curriculum extends for 42 months or 14 quarters, including two summer quarters. Twelve of the academic year quarters are ten weeks of instruction and one week of examination, while the two required summer quarters following years two and three are each nine weeks long. If needed, students may be allowed additional time to complete required course work beyond 42 months.

### Admission

To be considered for admission to the predoctoral program, a student must have completed the required courses listed below, have taken the Dental Admission Test, and have attended a personal interview. The School does not select or give preference to a particular undergraduate major field. The Admissions Committee encourages diversity in majors. Courses in the social sciences and the humanities are also important and are reviewed by the committee, as are non-cognitive factors, including community service.

The School of Dentistry is a state supported institution and participates in the student exchange program provided by the Western Interstate

Commission for Higher Education (WICHE) which supports students from western states without dental schools. Although all applications are carefully reviewed, preference in admission is given to residents of Washington and WICHE states, followed by residents of other states.

*Required courses:* general chemistry -- two quarters or one semester; organic chemistry -- two quarters or one semester; general biochemistry -- two quarters or one semester; general physics -- three quarters or two semesters; general biology or zoology -- three quarters or two semesters; general microbiology -- two quarters or one semester.

*Transfer Applicants:* The School rarely, and only under exceptional circumstances, admits transfer students from other dental schools.

*Foreign Applicants:* The School does not provide a special program for foreign-trained dentists.

*Health Sciences Minority Student Programs:* To increase diversity of students, the School participates in the Health Sciences Minority Student Program. In addition to advising and career counseling, this office works with health sciences schools to provide student development and support programs, networking opportunities, and summer research programs. The HSMSP Office activities include participation on several health sciences and campus-wide committees for purposes of collaborating and exchanging strategies on effective methods for recruiting and retaining a diverse student body, as well as promoting and celebrating diversity.

Regional Initiatives in Dental Education (RIDE) is a strategic expansion of the University of Washington School of Dentistry in conjunction with Eastern Washington University, designed to help meet the oral health needs of rural and underserved communities in the Northwest. RIDE creates regional training sites in areas lacking dental schools by partnering with regional universities, dentists and dental associations, community health centers, and others. Student admission to the RIDE program in Spokane is limited to residents of Washington State.

The School belongs to the American Association of Dental Schools Application Service (AADSAS), the national application service used by most U.S. dental schools. The School has established November 1 as its AADSAS priority filing deadline. This means that only those applications received in the AADSAS Washington, D.C. office by the priority filing date will be forwarded to the University of Washington for consideration by the Admissions Committee. There are no exceptions. AADSAS applications are available online at [www.adea.org](http://www.adea.org). Information regarding the Dental Admission Test may be found at <http://www.ada.org/prac/careers/dat-01.html>.

For information on admission to the University of Washington School of Dentistry contact either Kathleen Craig, Office of Student Admissions, School of Dentistry, University of Washington, Box 356365, Seattle, WA 98195-6365, 206-543-5840, fax 206-616-2612, [askuwsod@u.washington.edu](mailto:askuwsod@u.washington.edu), or [www.dental.washington.edu](http://www.dental.washington.edu). University of Washington undergraduates may contact the Predental Advising Office, University of Washington, 171 Mary Gates Hall, Box 353760, Seattle, WA 98195-3760.

Once the AADSAS application has been received, a preliminary screening determines if an applicant meets the Admissions Committee's criteria to receive a supplemental application and request for the following materials:

1. A supplementary application which includes a short personal statement
2. A non-refundable application fee of \$35.
3. Three letters of recommendation. Letters of recommendation must include one from a science instructor who can evaluate the applicant's academic and intellectual qualifications, a second from a dentist who is familiar with the applicant's knowledge of and motivation toward the dental profession, and the third (character reference) from someone who can indicate the applicant's contribution to fellow man, community, etc. If a predental committee exists on the applicant's campus, a combined recommendation from that committee may be used to replace all three recommendations. The School of Dentistry accepts letters of recommendation processed by AADSAS, or directly from recommenders.
4. Dental Admission Test scores. Test must be taken by October 31 of the year prior to entry.
5. Transcripts from all higher education institutions attended.
6. A list of current and future courses.
7. Acknowledgment of having read, understood, and being able to meet, with or without reasonable accommodation, the Essential Requirements of Dental Education at the University of Washington School of Dentistry (to be sent with the supplemental application form).

8. Conviction/criminal history information. Washington state law requires that all faculty, students, and staff disclose background information concerning crimes and offenses against vulnerable populations. A complete copy of the law is available from the School's Office of Student Services and is forwarded upon request. Applications are not considered until completed disclosure forms have been returned to Student Admissions.

The application is considered complete once all materials noted above (1-8) are returned. Upon receipt of the completed application, invitations for an interview are sent to applicants based on a preliminary screening of grades, DAT scores, and noncognitive factors. The interview is an opportunity for an open and friendly discussion of the applicant's interests, background, and reasons for selecting dentistry as a profession. The interview allows the applicant to ask questions about the School, faculty, and student life, and is conducted by members of the Admissions Committee. In addition to the interview, the applicant will have an opportunity to hear information about financial aid, meet and have lunch with enrolled students, take a tour of the School, and meet one of the School's deans, and hear presentations about research and outreach opportunities.

Following the interview, the Admissions Committee, which is composed of faculty and community dentists, will make a decision concerning admission status. The following seven areas are considered in their deliberations:

1. *Grades.* Overall grade-point average (GPA) and GPA of predental required science courses are reviewed. College grades are an important indicator of dental school performance and success. The Committee members review these grades for a strong, consistent GPA without withdrawals, incompletes, repeated courses, or non-graded options. Grade trends are reviewed.
2. *DAT (Dental Admission Test).* The test, sponsored by the American Dental Association, covers several areas: quantitative reasoning, survey of natural sciences (including biology, general, and organic chemistry), and perceptual ability (including form development, apertures, angles, cubes, and orthographic projections). At the University of Washington the scores are reviewed to identify an applicant's areas of strength. The test must be taken no later than October 31, one year prior to admission.
3. *Level of Pre-professional Education.* The majority of applicants will have a baccalaureate degree by the time of entry. Admission may be offered to applicants without a baccalaureate degree, but only to those applicants who have completed all predental requirements and have an extremely competitive academic record. A minimum of three years' full-time coursework is required.
4. *Dental Knowledge.* Knowledge of the field of dentistry through volunteer experience in a dental setting (dentist's office, clinic, etc.), introductory dental coursework, and exploration of the dental literature are considered as admission factors. A qualified applicant will have a clear understanding of the profession, a demonstrated interest in the field, and a minimum of 100 volunteer hours in a dental setting.
5. *Contribution to Diversity.* Diversity in the student body contributes to the development of oral health care professionals prepared to address the needs of society.
6. *Unique Life Experiences.* Research and teaching efforts, travel, and work experience are some of the life experiences that are considered important. Such experiences demonstrate the breadth and level of maturity of a candidate.
7. *Personal Attributes.* In addition to motivation, the applicant's poise and communication skills are examined by the Admissions Committee. Personal attributes such as integrity, responsibility, leadership, initiative, community service, perseverance, and diversity of interests are important.
8. *Demonstrated Community Service.*

Although interviews begin in October, the earliest the Admissions Committee notifies applicants of its decision is December 1. The School uses a "rolling admission" format, so interviews and committee decisions will continue to be made between December and March.

The Admissions Committee makes one of three decisions regarding all applications:

1. *Offer of Acceptance.* Admission application has been accepted. The applicant has a specified time to reply to reserve enrollment in the entering first-year class. In addition, enrollment is contingent on timely submission of the following requirements: required registration deposit, transcripts showing completion of all required predental courses, registration for autumn quarter of the upcoming academic year, and completion of required immunizations.

2. *Alternate Status.* Applicant is offered a position on the Alternate List. The applicant has a specified time to reserve a position on this list which is maintained until the beginning of the school year.
3. *Denial of Admission.* The Committee has considered the application but cannot offer a position or alternate status.

Accepted applicants receive follow-up letters and information. Letters detailing registration procedures and providing financial aid information will be sent in early summer. In late summer, new students receive a packet of materials welcoming them to the School and describing the orientation program, also called Prep Weeks. Attendance is mandatory and provides an opportunity for the newly enrolled student to learn about the upcoming curriculum, student rights and responsibilities, financial aid information, student organizations, and to begin course work. Orientation begins in late August. New students attend an off-campus student retreat to meet classmates and relax in an informal setting.

Western Interstate Commission for Higher Education (WICHE): The School participates in the program administered by WICHE for students who reside in Western states not served by a dental school (Alaska, Arizona, Hawaii, Montana, Nevada, New Mexico, North Dakota, and Wyoming). Such students should seek requests for certification and information about benefits of the program from the WICHE commission office in their state of residence.

- \* *Electives:* A minimum of two elective courses must be taken during the course of the program. Elective credits may not exceed a total of 50 credits.

## Facilities

School clinics, teaching laboratories, and lecture halls are up-to-date, well maintained, and periodically renovated. Clinical modules are assigned to students for use in patient treatment. The D-1 Simulation Clinic is a state-of-the-art teaching facility used for preclinical and laboratory courses. School Accreditation and Licensure

The School is fully accredited by the Commission on Dental Accreditation, the recognized accrediting body for dentistry and the related dental fields. For information, write to the Commission on Dental Accreditation, 211 East Chicago Ave., Chicago, IL 60611-2678. Admission to the practice of dentistry in any state is conditional upon meeting the requirements of the individual state dental licensure requirement. In order to practice in the State of Washington, the candidate for licensure must have a dental degree from a U.S. or Canadian dental school, and have successfully completed the American Dental Association National Board Examinations and the Western Regional Examining Board Examination. Additional information about licensure requirements should be requested from the Washington State Department of Health, Dental Quality Assurance Commission, PO Box 1099, Olympia WA 98504-1099, 360- 586-6898.

## Health Care and Immunization Policy

Enrolled students at the UW School of Dentistry are eligible for healthcare services provided by the Hall Health Primary Care Center. In addition, the University has arranged for an Accident and Sickness Insurance Plan specifically designed for students, their dependents, and their domestic partners for which the Hall Health Primary Care Center is the preferred provider. The UW Health Sciences Center requires that its students, staff, and faculty show documentation of protection against a number of vaccine-preventable diseases. Additional information is available via the Hall Health Primary Care Center Web site at [depts.washington.edu/hhccweb/index.php?ClinicID=1](http://depts.washington.edu/hhccweb/index.php?ClinicID=1)

| Projected Costs for 2007-2008       | First Year | Second Year | Third Year | Fourth Year | Total   |

Patricia Wasley  
222 Miller

## Associate Deans

Deborah E. McCutchen  
Tom Stritikus

education.washington.edu

The College of Education is primarily a graduate and professional school dedicated to equity and excellence in education through the preparation and on-going renewal of education professionals, the promotion of social justice, the advancement of knowledge through research, and the connection of research to inform policy and improve practice. The College has four broad curricular areas: Curriculum and Instruction, Educational Leadership and Policy Studies, Educational Psychology, and Special Education. Degrees conferred are M.Ed., Ph.D., Ed.D., and M.I.T. Certificates can be earned in teaching (elementary, secondary, and special education), school administration (principals, program administrators, and superintendents), and school psychology. In addition, the College offers a B.A. in Early Childhood and Family Studies. In collaboration with the College of Arts and Sciences, the College offers a minor in Education, Learning, and Society.

The College of Education at the University of Washington believes that an effective public education system for a diverse citizenry is the cornerstone of a democratic society. To that end, the College dedicates its resources to helping make an excellent education an everyday reality for every student in every community across the state and country. As part of a major university located in a metropolitan area, the College is able to work in collaboration with a number of school districts in the area to provide teaching, research, and field experiences for its students.

## Special Offices and Services

The College of Education maintains a number of specialized offices to assist in the fulfillment of its goals. Among these are the Office of Teacher Education, the Office of Student Services, and the Office of Minority Recruitment and Retention. In addition, the College of Education maintains formal relationships with a number of school districts in the area to provide research and field experience opportunities for students in the various programs. Individuals interested in teacher certification or in graduate degree programs may visit the College's Web site at [education.washington.edu](http://education.washington.edu) or email [edinfo@u.washington.edu](mailto:edinfo@u.washington.edu).

## Undergraduate Program

Adviser  
206 Miller, Box 353600  
206-543-7834  
[edinfo@u.washington.edu](mailto:edinfo@u.washington.edu)

The College of Education offers the following programs of study:

- \* The Bachelor of Arts degree with a major in early childhood and family studies
- \* An interdisciplinary minor in education, learning, and society

## Bachelor of Arts

*Suggested First- and Second-Year Coursework:* A course in human development (NURS 201, PSYCH 206, PSYCH 306, or similar); a course in biological sciences (BIOL 100, BIOL 104, or similar); a course in biological bases of development (BIOL 118, B STR 301, PSYCH 202, or similar); a course in mathematics or statistics (MATH 170, STAT 22, or other college-level mathematics or statistics course; ECFS 200.

## Admission Requirements

1. Students are admitted for the junior year, in autumn quarter only. Application deadline is April 15. Admission is competitive, based on student's academic performance and personal statement. Minimum 2.50 overall GPA guarantees consideration but not acceptance. Courses taken should include those mentioned in suggested coursework, above.

Personal statement should reflect student's interest in and commitment to the field of early childhood and family studies.

2. Prior to admission, students should complete most of the Arts and Sciences General Education Requirements, to include English composition and additional writing, Quantitative and Symbolic Reasoning, foreign language, and Areas of Knowledge (Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Natural World (NW)). See adviser or UW Student Planner for details of these requirements.

## Major Requirements

81 credits, to include:

1. *Year 1: Didactic Core:* ECFS 300, ECFS 301, ECFS 302, SPHSC 308, NUTR 300, EDSPE 419. *Service Learning and Research:* ECFS 303 (prior to this course, students must provide evidence of a state and national fingerprint background check); ECFS 304, ECFS 305.
2. *Year 2*
  - a. *Didactic Courses:* ECFS 401, ECFS 402, EDPSY 304, EDUC 305, EDSPE 404.
  - b. *Service Learning and Research:* ECFS 454, ECFS 455, ECFS 456.
  - c. *Electives:* 20 or more credits to complete minimum UW requirement of 180 credits. Courses are in theoretical foundations of early childhood development, methodology, and social policy and organization. Minimum one course in each area. See adviser for current lists of electives.

## Minor

The minor in education, learning, and society, jointly sponsored by the College of Education and the College of Arts and Sciences, provides a strong background in how human beings learn, and how society, environment, and culture shape learning. Requirements for the minor are listed in the Undergraduate Interdisciplinary Programs section of the General Catalog.

## Other Undergraduate Study

Undergraduate students from outside the College of Education may take courses offered to help them explore the field of education and prepare for graduate study. Fieldwork courses in local schools or social service agencies give students the opportunities to make informed career and academic choices. Students may also complete prerequisites for graduate programs. Further, requirements to meet endorsement (subject) guidelines for secondary teaching may be completed by undergraduates.

## Professional Certification

The College of Education is authorized by the State Board of Education to offer professional certificate programs in education for administrators, educational staff associates, and teachers. Program-design specialists are available to help with pre-program counseling, long-range planning, applications, registration, referrals to other campus resources, general program advising, and continuing/professional certificate requirements.

## Administrator Certificates

Administrator Certificate preparation programs for superintendents, principals, and program administrators are offered through the College of Education. The following Web sites contain specific information about admissions, curriculum, faculty, and general advising:

For principals and program administrators, the Danforth Educational Leadership Program, [depts.washington.edu/k12admin/danforth/](http://depts.washington.edu/k12admin/danforth/).

For superintendents, the Leadership for Learning Program, [depts.washington.edu/k12admin/l4l](http://depts.washington.edu/k12admin/l4l).  
Educational Staff Associate Certificates

Educational Staff Associate Certificate preparation programs are offered for the school psychologist. Information concerning requirements and admission may be obtained from the Area for Educational Psychology, 312 Miller, Box 353600, University of Washington, Seattle, Washington 98195-3600.

The College of Education is authorized by the State Board of Education to prepare and recommend individuals for Residency and Professional Teaching Certificates. Title II of the Higher Education Act requires institutions of higher education and states that approve such programs to develop and publish an annual report on their teacher preparation programs. The University of Washington report may be requested via email from edinfo@u.washington.edu.

### Residency Teaching Certification Program

The College of Education offers residency teaching certification for individuals desiring careers as elementary or middle/secondary school teachers, or as special education teachers working with students with severe disabilities or emotional and behavioral disorders, and with infants, toddlers, and preschool children with disabilities. Candidates may also select a teacher education/special education option which provides initial certification in elementary education with coursework in special education. All programs are offered at the master's level. For additional information, email edinfo@u.washington.edu, or visit the College's Web site at education.washington.edu.

An undergraduate or postbaccalaureate program leading to certification in music education, grades K-12, is offered through the School of Music. For additional information contact the School of Music Advising Office, 116 Music, Box 353450, University of Washington, Seattle, WA 98195-3450.

### Professional Teaching Certificates

For information on the OSPI guidelines and where programs exist, contact any Educational Service District or the Office of Professional Licensing and Certification, OSPI, Box 47200, Old Capitol Building, Olympia, Washington 98504, or visit [www.k12.wa.us/certification/](http://www.k12.wa.us/certification/). For information about Professional Teacher Certificate programs at the University, contact Center Connect at 206-543-7834.

### Endorsements on Teaching Certificates

Teachers holding an initial/residency or continuing/professional teaching certificate may add endorsements to their certificates which qualify them to teach additional subjects. Information on endorsement requirements is available on the Web at [education.washington.edu/areas/tep/pathways/endorsements.html](http://education.washington.edu/areas/tep/pathways/endorsements.html), or contact the Office of Admissions and Academic Support, 211 Miller, Seattle, WA 98195-3600, or email edinfo@u.washington.edu.

### Graduate Degree Programs

Graduate Program Coordinator  
206 Miller, Box 353600  
206-543-7833  
edinfo@u.washington.edu

The College of Education currently offers four advanced degrees: Master in Teaching, Master of Education, Doctor of Education, and Doctor of Philosophy. The M.I.T. degree will be awarded to elementary and secondary certification students at the completion of their program. Graduate students working toward other degrees may specialize their degree studies in curriculum and instruction, educational psychology (including cognitive studies), educational leadership and policy studies, or special education. A focus on higher education leadership and policy leading to Master of Education or Doctor of Education degrees is offered through Educational Leadership and Policy Studies. Questions regarding graduate study in education should be directed via email to edinfo@u.washington.edu, or visit the College's Web site at education.washington.edu.

### Master in Teaching

The Master in Teaching (M.I.T.) degree program results in a Washington residency teaching certificate for elementary or secondary (specific subjects) school teaching. The program is an integrated sequence of full-time, daytime course work and field experiences spanning five quarters. Field experiences are in partner schools in the Seattle/Puget Sound area chosen to provide experience working with children from racially and culturally diverse communities.

### Admission Requirements

1. A baccalaureate degree from an accredited institution with at least a 3.0 GPA for the last 90 quarter (60 semester) credits.

2. Goal statement
3. 60 or more hours in a classroom that most closely matches the subject and age level the applicant wishes to teach. A supervisor completes the Evaluation of Educational Experience form.
4. Two letters of recommendation from faculty or professional references.
5. Passing scores from all three sections of the West-B exam scores, sent to UW.
6. Passing score of the Praxis II exam in applicant's specific content area. Refer to Web or brochure for specific information.
7. Official transcripts from all community colleges and universities attended.
8. Secondary applicants must contact the appropriate department adviser to have coursework evaluated using the Endorsement Evaluation form. Refer to the endorsement sheet in the M.I.T. packet for department information and locations. Social Studies applicants may drop off unofficial transcripts and course descriptions to 206 Miller for evaluation.
9. Elementary applicants must have coursework evaluated by a Program Design Specialist in 206 Miller. This is done by submitting transcripts (and course descriptions from schools other than UW) along with the Prerequisite Evaluation form to 206 Miller. The evaluation is completed within two weeks and mailed to the applicant.

### Degree Requirements

60-101 credits, to include:

1. *Elementary Education Focus*
  - a. *Courses:* EDC&I 324 (2); EDC&I 494 (1); EDC&I 586 (1, 1, 1); EDLPS 496 (3); EDSPE 526 (3); EDTEP 501, EDTEP 502, EDTEP 503 (2, 3, 4); EDTEP 505 (2); EDTEP 511 (3); EDTEP 521, EDTEP 522 (3, 3); EDTEP 523 (3); EDTEP 531, EDTEP 532, EDTEP 533 (3, 3, 3); EDTEP 541 (4); EDTEP 542 (3); EDTEP 543 (3); EDTEP 551 (3); EDTEP 552 (3); EDTEP 601 (10); UCONJ 510 (4).
  - b. *Note:* The current Washington state endorsement for elementary teachers is "elementary education." Graduates of this program may be hired to teach specific or multiple subjects in middle or junior high school through grade 8. Those interested in teaching in the middle schools are encouraged to discuss this option with advisers in the Office of Student Services.
2. *Elementary Special Education Focus:* EDC&I 324 (2); EDC&I 494 (1); EDC&I 586 (1, 1, 1); EDLPS 496 (3); EDSPE 404 (3); EDSPE 414 (3); EDSPE 496 (3); EDSPE 496 (3); EDSPE 500 (3); EDSPE 513 (3); EDSPE 514 (3); EDSPE 526 (3); EDSPE 545 (3); EDSPE 601 (3); EDTEP 501, EDTEP 502, EDTEP 503 (2, 3, 4); EDTEP 505 (2); EDTEP 511 (3); EDTEP 521, EDTEP 522 (3, 3); EDTEP 523 (3); EDTEP 531, EDTEP 532, EDTEP 533 (3, 3, 3); EDTEP 541 (4); EDTEP 542 (3); EDTEP 543 (3); EDTEP 551 (3); EDTEP 552 (3); EDTEP 601 (10); UCONJ 510 (4).
3. *Secondary Education Focus:* EDC&I 494 (1); EDC&I 586 (1); EDTEP 551 (3); EDTEP 561 (5); EDTEP 562, EDTEP 563 (3, 3); EDTEP 564 (3); EDTEP 565 (3); EDTEP 571 (3); EDTEP 573 (3); either EDTEP 580, EDTEP 582, EDTEP 584, EDTEP 586, or EDTEP 588 (5); either EDTEP 581, EDTEP 583, EDTEP 585, EDTEP 587, EDTEP 589 (3); EDTEP 591 (3); EDTEP 592 (3); EDTEP 593 (3); EDTEP 595 (3); EDTEP 601 (10); elective outside Education (2)

### Master of Education

The Master of Education (M.Ed.) degree requires a minimum of 45 credits, including at least 15 credits in a specialized area of study in education; 9 credits related to, but outside of, the specialization, some coursework outside education; 9 thesis credits or, for the non-thesis option, 9 credits in a field study or other approved project; and a final examination.

### Admission Requirements

1. A baccalaureate degree from an accredited institution with at least a 3.0 GPA for the last 90-quarter (60 semester) credits.
2. GRE Scores
3. Goal statement
4. Prerequisites stipulated by the area of specialization within the College

### Degree Requirements, Curriculum and Instruction Pathway

45 credits, to include:

1. *Common Area Requirements*
  - a. *Foundations of Education (9 credits):* Students gain an understanding

of the complex issues that influence teaching and learning. Students work with advisers to select from courses such as: history of education, education as a moral endeavor, human learning, curriculum design, special topics in curriculum and instruction..

- b. *Thesis, non-thesis, or project option (9 credits)*: The non-thesis option may be satisfied by a 9 credit culminating project or 9 credits at the 500 level or above related to the student's teaching and research interests.
  - c. *Colloquium Presentation*: At the end of the program, students present their work at the Curriculum and Instruction colloquium. Students prepare a visual representation of their work (usually a poster). During the colloquium, students talk to faculty and students about and answer questions about their thesis, project, or other work conducted during the program. In addition, students attend one other colloquium prior to presenting.
2. *Educational Communication and Technology Study Option*
    - a. *Required courses (9 credits minimum)*: EDC&I 510 (3), EDC&I 511 (3); either EDC&I 551 (3), EDC&I 552 (3), or EDC&I 553 (3)
    - b. *Related courses (6 credits minimum)*: Courses on the design, development, and use of instructional systems, materials, and approaches in a variety of educational settings, chosen in consultation with adviser.
    - c. *Courses outside Curriculum and Instruction (3-12 credits)*: Selected with the student's adviser, these courses may include courses from any other Area in the College and from departments across the University. At least 3 credits must be taken outside the College.
    - d. *Additional foundations courses (3-6 credits)*: Students may take additional foundations courses, chosen from the following categories with the approval of the adviser: psychological foundations, educational policy studies, research foundations, or curriculum foundations.
  3. *Language, Literacy, and Culture Study Option*
    - a. *Core studies (9 credits)*: Selected from the following: EDC&I 453 (3), EDC&I 455 (3), EDC&I 457 (3), EDC&I 460 (3), EDC&I 462 (3)
    - b. *Assessment and inquiry (3 credits)*: In consultation with their adviser, students select one course that focuses on issues of assessment and inquiry
    - c. *Concentrations (15 credits)*: Literacy specialists, in consultation with advisers, select a minimum of three courses in the literacy strand and a minimum of one course in each of the other strands. ESL specialists, in consultation with advisers select a minimum of three courses in ESL and a minimum of one course in each of the other strands.
  4. *Mathematics Education Study Option*
    - a. At least 27 credits in mathematics and mathematics education. Courses, selected in consultation with the student's adviser, should be appropriate for future career goals. Of the 27 credits, 9 credits should be chosen from mathematics education courses (below).
    - b. *Mathematics Education Courses*: EDC&I 475 (3), EDC&I 476 (5), EDC&I 477 (5), EDC&I 478 (2-9), EDC&I 479 (1-6), EDC&I 575 (3), EDC&I 576 (3), EDC&I 577 (1-6).
  5. *Multicultural Education Study Option*
    - a. *Ethnic Diversity Outside the College of Education (15 credits)*: Selected from ethnic diversity subject matter fields outside of the College of Education. Courses can be taken from those offered by various departments in the College of Arts and Sciences. All course choices are negotiated with advisers.
    - b. *Multicultural Education (15 credits)*: EDC&I 424 (3), EDC&I 569 (4); remainder to be chosen from the following: EDC&I 456 (1-6); EDC&I 464 (3); EDC&I 469 (3); EDC&I 474 (3); EDPSY 536 (3); EDLPS 566 (3); EDC&I 573 (3); EDC&I 574 (3).
  6. *Science Education Study Option*: At least 21 credits, approved by faculty adviser, in fields such as, biology, chemistry, physics, earth science, oceanography, or other science-related courses.
  7. *Social Studies Education Study Option*: 12-15 credits of core social studies courses, negotiated with adviser. 15-21 credits of history/social science courses related to teaching interests, or additional educational courses.
  8. *Teaching and Curriculum Study Option*: 27 credits, including 9-18 credits of required study in teaching and curriculum, to be chosen in consultation with adviser.

## Degree Requirements, Educational Psychology

Minimum 45 credits, to include:

1. *General Requirements*
  - a. Minimum 45 quarter credits, exclusive of prerequisites and specific requirements listed for each study option.
  - b. Written or oral examination upon completion of coursework.
  - c. *Research*: Two options available, thesis, or non-thesis. Thesis option requires design and accomplishment of an empirical study. Non-thesis option requires preparation of a scholarly paper of publishable quality (9 credits minimum).
2. *Foundations of Education courses (12 credits)*: Either EDLPS 521 (3), EDLPS (3), EDLPS 540 (3), or EDPSY 580 (3); either EDPSY 501 (3) or EDPSY 510 (3); EDPSY 490 (3); EDPSY 591 (3)
3. *Measurement, Statistics, and Research Design Study Option (50 minimum total credits)*
  - a. *Required courses*: One or more from each of the following content fields with options to consist of courses listed below or alternative courses (including courses outside of Education) approved by the faculty adviser.
    - i. *Measurement and Evaluation*: EDPSY 495 (3), EDPSY 512 (3), EDPSY 584 (3), EDPSY 592 (3), EDPSY 595 (3), EDPSY 596 (3), EDPSY 597 (3)
    - ii. *Human Development*: EDPSY 502 (3), EDPSY 531 (3), EDPSY 532 (3), EDPSY 582 (3)
    - iii. *Cognition and Learning*: EDPSY 510 (3), EDPSY 524 (3), EDPSY 525 (3), EDPSY 583 (3), PSYCH 414 (5)
    - iv. *Language Processes*: EDPSY 520 (3), EDPSY 521 (3)
  - b. *Research (9 credits)*: Thesis option: Report of a research investigation that requires the student to design and execute an empirical study. Non-thesis option: Preparation of a scholarly review of the research literature; should be of publishable quality.
4. *Human Development and Cognition Design Study Option (45 minimum total credits)*
  - a. *Required courses*: One or more from each of the following content fields with options to consist of courses below or alternative courses (including courses outside of the College) approved by the faculty adviser:
    - i. *Human Development*: EDPSY 502 (3), EDPSY 509 (5), EDPSY 531 (3), EDPSY 532 (3), EDPSY 533 (3), EDPSY 534 (3), EDPSY 582 (3)
    - ii. *Cognition and Learning*: EDPSY 510 (3), EDPSY 524 (3), EDPSY 525 (3), EDPSY 583 (3), PSYCH 414 (5)
    - iii. *Reading and Language Processes*: EDPSY 425 (3), EDPSY 507 (5), EDPSY 520 (3), EDPSY 521 (3), EDC&I 532 (3), PSYCH 447/LING 447 (4), PSYCH 457/LING 457 (5), ENGL 472 (5)
    - iv. *Measurement and Evaluation*: EDPSY 495 (3), EDPSY 512 (3), EDPSY 513 (3), EDPSY 584 (3), EDPSY 592 (3), EDPSY 595 (3), EDPSY 596 (3), EDPSY 597 (3)
  - b. *Research (9 credits)*: Thesis option: Report of a research investigation that requires student to design and execute an empirical study. Non-thesis option: Preparation of a scholarly paper of publishable quality.
5. *School Psychology Specialization (73 credits)*
  - a. *Statistics and Research (6 credits)*: EDPSY 490 (3), EDPSY 591 (3)
  - b. *Cognition and Learning (3 credits minimum)*: EDPSY 501 (3); EDPSY 502 (3)
  - c. *Social and Developmental Bases of Behavior (6 credits minimum)*: EDPSY 502 (3), EDPSY 531 (3)
  - d. *Exceptionality (6 credits minimum)*: EDSPE 525 (3); and EDSPE 505 (3) or EDSPE 526 (3)
  - e. *Biologic Bases of Behavior (5 credits)*: EDPSY 577 (5)
  - f. *Specialization Seminars (2 credits minimum)*: EDPSY 570 (2)
  - g. *Individual Differences and Personality (8 credits minimum)*: EDPSY 548 (5), EDPSY 552 (3)
  - h. *Assessment (21 credits minimum)*: EDPSY 507 (5), EDPSY 564 (5), EDPSY 540 (5), EDPSY 572 (3), EDPSY 573 (3)
  - i. *Intervention (16 credits minimum)*: EDPSY 544 (5), EDPSY 546 (5), EDPSY 550 (3), EDPSY 551 (3)
  - j. *Ethics and School (3 credits minimum)*: EDPSY 568 (3)
  - k. *Courses with Practicum Requirements (3 credits minimum)*: EDPSY 500 (3)
  - l. *Consultation (3 credits minimum)*: EDPSY 549 (3)

The school psychology M.Ed. degree is awarded upon successful completion of the above course requirements, and successful completion of a portfolio examination of applied and clinical work. At least one course relevant to the student's field of study must be taken from a unit other than the College. Certification: The Washington State approved internship program at the University of Washington is open only to graduate students

who have successfully completed the master's program in school psychology at the University of Washington and are currently matriculated as full time students at the post-master's or doctoral levels. Washington State Certification is awarded by successfully passing the Praxis Exam and by successfully completing a 9-month internship of 1200 hours or more (half of which must be in a school setting) and 6 credit hours of university case study supervision and 30 hours of internship credit. Students who successfully complete the internship may also apply for National Certification as a school psychologist.

### Degree Requirements, Education Leadership and Policy Studies

48 credits, as follows:

1. *Common area and distribution requirements (18 credits minimum)*: A minimum of 18 credits of coursework in EDLPS. Of these 18 credits, 12 credits are distributed as follows:
  - a. Social and Cultural Foundations, 6 credits minimum
  - b. Organizations and Policy, 6 credits
2. *Specialization requirement (9 credits minimum)*: In conjunction with the adviser, students develop an area of specialization.
3. *Breadth requirement (6 credits minimum)*:
  - a. At least 3 credits in one or more other areas in the College of Education (EDC&I, EDPSY and/or EDSPE)
  - b. At least 3 credits outside the College of Education.
4. *Research/inquiry requirement (6 credits minimum)*:
  - a. At least 3 credits in basic statistics (EDPSY 490 or the equivalent).
  - b. At least 3 credits in research/inquiry methods (e.g., EDPSY 588, EDPSY 591, EDLPS 524, EDLPS 535, EDLPS 543, EDLPS 568, or the equivalent)
5. Completion of thesis or non-thesis option (9 credits minimum)
6. Specific courses determined in consultation with adviser

### Degree Requirements, Special Education

48 credits, as follows:

1. *Foundations of Education (6 credits)*: A minimum of 6 credits in courses in or out of the College of Education, or the equivalent as determined in consultation with the adviser.
2. *Special Education Major Field (21 credits)*: The specific sequence of courses is determined by the adviser, depending on the student's background, educational goals, and type of disabled individual that the student wishes to teach.
3. *Assessment and Research Methodology (9 credits)*: Courses selected in consultation with adviser, to develop competency in assessment of learners with disabilities and familiarity with research tools.
4. *Special Assignments in Special Education (12 credits minimum)*: A minimum of 12 credits divided among at least two of the following options: EDSPE 500 (1-6, max. 6), EDSPE 600, EDSPE 601 (3-9, max. 9), EDSPE 700 (max. 9). Students entering an Ed.D or Ph.D. program should select a thesis option.

### Doctor of Education

The Doctor of Education (Ed.D.) degree is designed to prepare professionals whose primary interest is to deal directly with problems of educational practice. The program of study leading to the Ed.D., as a professional degree, focuses on the utilization of research and practitioners' knowledge, rather than on the production of research knowledge.

This professional degree requires at least two years of resident study, a program of specialized study with credit in education and related fields, sufficient preparation in research methodology to interpret research findings for use in practice, an internship and leadership training, a General Examination, a dissertation on a problem of educational practice, and a Final Examination.

### Admission Requirements

1. Graduate Record Exam (GRE) scores
2. Master's degree or equivalent from an accredited institution
3. Minimum GPA of 3.00 for the most recent 90 (60 semester) credits
4. Transcripts (sealed) from each college or university attended.
5. Goal statement
6. Three letters of recommendation
7. Resume/curriculum vita
8. Writing sample(s)
9. Interviews

10. Specific programs may have additional admission requirements. Visit the Web site or contact the program for further information.

### Degree Requirements

102 credits, as follows:

1. *Educational Specialization (24 credits)*:
  - a. Courses in one specialty within the area of specialization designed to provide student with knowledge of the field: 9 credits
  - b. Courses in the General Area or in the student's special interests within the area of specialization other than those selected to fulfill the 9 credits above: 15 credits
2. *Related Field(s) (24 credits)*: Courses selected from within education (minimum of 12 credits) or outside of education which complement the student's educational specialization and include multidisciplinary learning experiences.
3. *Research/Evaluation Preparation (9 credits)*: Courses selected to enhance a student's ability to conduct field-based research/evaluation studies.
4. *Leadership Training (9 credits)*: EDLPS 520 (3), EDLPS 550 (3), EDLPS 560 (3)
5. *Supervised Internships and Field Experiences (9 credits)*: The internships and field experiences are designed to work in education and the related field(s), and to conduct field-based research and evaluation studies.
6. *Dissertation (27 credits)*

### Doctor of Philosophy

The Doctor of Philosophy (Ph.D.) in education is a research degree. It offers preparation for a career of research on issues fundamental to education -- issues that range from fairly narrow questions about human learning to macroquestions regarding the form of societies' educational institutions. The scope of the Ph.D. degree in education is broad. It is possible to pursue a degree organized around traditional study areas such as educational psychology, curriculum and instruction, special education, or educational leadership and policy. A student may develop a course of study that integrates various elements of more than one study area (e.g., multiethnic education and literacy). One of the study options in the Ph.D. program is school psychology, which prepares students for the professional practice of psychology with school-age children, as well as for research.

### Admission Requirements

1. Graduate Record Exam (GRE) scores
2. Master's degree or equivalent from an accredited institution
3. Minimum GPA of 3.00 in the most recent 90 (60 semester) credits
4. Transcripts (sealed) from each college or university attended.
5. Goal statement
6. Three letters of recommendation
7. Resume/curriculum vita
8. Writing sample(s)
9. Interviews

### Degree Requirements

The course of study consists of six academic areas and the dissertation. The Ph.D. is specialized and highly individualized. Although the department prescribes a limited number of required courses, it does require that students demonstrate in-depth knowledge of education and selected related fields. For most students, this means studying in a broad area, a specialization within that area, two cognates and a specialization outside of the department.

Degree requirements include a minimum of two years of resident study, a program of specialized study with credits both in education and in other academic units, preparation in research methodology adequate to design and assess research in the field of specialization, sufficient study in cognate fields inside and outside of education to ensure that the candidate can place the specialized research in a broader context, a General Examination, a research dissertation, and a Final Examination.

### Accreditation

Within the College of Education, a number of degree programs have formal accreditation. The school psychology Ph.D. program is accredited by the American Psychological Association (APA) and approved by the National Association of School Psychologists (NASP). The school psychology M.Ed. program is also accredited by NASP and the Washington State

Board of Education for Initial Residency and Continuing/Professional teaching Certificates and Initial/Residency certification. Graduates qualify for certification in all states party to the Interstate Certification Compact.

## Financial Aid

The College of Education offers a limited number of awards with varying stipends for graduate students in education. Primary consideration is given to doctoral students with a background of successful teaching or administrative experience. Specific information on the various types of remunerative appointments for graduate students in education, amounts of stipends, and application procedures may be obtained via email at [edinfo@u.washington.edu](mailto:edinfo@u.washington.edu) or via the College's Web site at [education.washington.edu](http://education.washington.edu). The annual application deadline is March 1.

## Special Research and Service Facilities

Within the College of Education opportunities exist for students to gain research and service experience.

The Center for Multicultural Education focuses on research projects and activities designed to improve practices related to equity issues, intergroup relations, and the achievement of students of color. Visit the center's Web site at [depts.washington.edu/centerme/home.htm](http://depts.washington.edu/centerme/home.htm).

The Clinical Training Laboratory, operating under the aegis of Educational Psychology, offers observation rooms equipped with video recorders where school psychology trainees and their clients can be observed and taped through one-way mirrors (under faculty supervision).

The world-renowned Experimental Education Unit offers an interdisciplinary approach to research, training, and service, providing integrated classes for 150-200 young children, toddlers, and infants with disabilities and their typically developing peers, and services for their families. Learn more

about the EEU by visiting [www.eeuweb.org](http://www.eeuweb.org).

The Multidisciplinary Learning Disabilities Center conducts research on preventing and treating reading and writing disabilities and on the biological basis of learning disabilities. The center disseminates its findings to teachers through workshops and presentations at regional, national, and international meetings, and at a unique teacher mentoring program during the summer program for students with dyslexia and dysgraphia.

The National Center for the Study of Teaching and Policy, a consortium of five universities headed by the University of Washington, conducts a wide range of studies aimed at local, state, and national policy strategies to promote teacher excellence. For more information, visit the center's Web site at [depts.washington.edu/ctpmail/](http://depts.washington.edu/ctpmail/), or email [ctpmail@u.washington.edu](mailto:ctpmail@u.washington.edu).

The Institute for the Study of Educational Policy promotes interdisciplinary studies that bring together research and practice for the benefit of children and youth, educators, policy makers, and the larger community. The institute includes (a) The Center for Educational Renewal, which responds to a growing nationwide interest in the renewal of schools and teacher education by creating partnerships, promoting innovative programs and policies for the education of educators, and reforming leadership and governance structures; (b) The Center for Effective Schools, which is committed to engaging in research and service activities designed to promote instructionally effective schools through collaboration and self-evaluation; (c) The Center for the Study and Teaching of At-Risk Students, which was established to foster interprofessional projects to encourage students to stay in school; and (d) The School Law Division, which deals with the improvement of professional practices of school administrators, including superintendents, principals, and program directors. Additionally, the institute conducts policy research pursuant to grants and contracts with school districts, state and federal agencies, and other educational organizations.

## Dean

Matthew O'Donnell  
371 Loew

## Associate Deans

Greg Miller, Infrastructure  
Eve Riskin, Academic Affairs  
Dan Schwartz, New Initiatives

[www.engr.washington.edu](http://www.engr.washington.edu)

Engineering is the science and art of applying scientific and mathematical principles, experience, judgment, and common sense to design devices and systems that benefit society. Engineers are fascinated by questions of how and why things work. They use their training in mathematics, physics, and chemistry to understand the physical world and develop creative solutions to society's complex needs. Engineers may be designers, planners, managers, analysts, researchers, consultants, sales specialists, and more. Engineering graduates have many career possibilities open to them.

The primary goal of the College of Engineering educational programs is to prepare students for a professional career in engineering by providing the technical foundation required for success in industry, government, or academia. Other goals of the College are to instill within its students the highest ethical standards, the capability for lifelong learning, and a curiosity about the world. Excellence in undergraduate and graduate academic programs remains the College's highest priority.

For undergraduates, the College of Engineering offers a flexible curriculum that not only accommodates varied student needs, both in established departmental programs and interdisciplinary studies, but also culminates in a major and meaningful design experience. (See Interdisciplinary Engineering Studies Program for interdisciplinary undergraduate programs.)

For graduate students, the College of Engineering offers master's and doctoral programs in aeronautics and astronautics, bioengineering, chemical engineering, civil and environmental engineering, computer engineering, electrical engineering, industrial engineering, materials science, mechanical engineering, and technical communication.

The College offers active educational and research programs, both departmental and interdisciplinary, at the graduate levels. (See Interdisciplinary Engineering Studies Program for interdisciplinary graduate programs.)

The College of Engineering has been a major unit of the University since 1899. The first engineering degrees were authorized in mining engineering and metallurgical engineering in 1898. Degrees were added for civil engineering (1901), electrical engineering (1902), mechanical engineering (1906), chemical engineering (1907), ceramic engineering (1919), aeronautical engineering (1929), bioengineering (1983), industrial engineering (1986), and computer engineering (1987). A degree program in technical communication was implemented in 1991. In 2003, 1,669 upper-division undergraduate majors and 1,306 graduate students were enrolled in engineering programs taught by a faculty of 191 members.

## College Facilities

Teaching and research activities of the College are conducted in thirteen major campus buildings (and portions of others), which contain the College's offices, classrooms, and research and teaching laboratories. The Engineering Library, a branch of the University Libraries, provides outstanding collections of books, periodicals, technical reports, and patents of interest to engineers. Computers and terminals are available in all departments and through the Student Access and Computing Group (SACG).

## Student Organizations and Activities

All of the major professional engineering societies have student chapters on campus, and all engineering students are encouraged to join the chapter that represents their field of interest. The College also has student chapters of the Society of Women Engineers, American Indian Science and Engineering Society, National Society of Black Engineers, the Society of Hispanic Professional Engineers, and the Phi Sigma Rho engineering sorority. Students are encouraged to join the university-wide Science and Engineering Business Association (SEBA).

The honor society open to engineering students is Tau Beta Pi.

Students serve with faculty members on engineering policy committees which make recommendations concerning instructor evaluation, curriculum revisions, advising, grading systems, and other matters of interest to students and faculty.

## Undergraduate Program

Engineering Adviser  
301 Loew, Box 352180  
206-543-1770  
[engradv@engr.washington.edu](mailto:engradv@engr.washington.edu)

The College of Engineering provides curricula that offer a variety of educational experiences to its students. The curricula also facilitate transfer from community colleges and from other four-year colleges and universities.

## Engineering Advising and Diversity Center

301 Loew

Students are encouraged to contact the Engineering Advising and Diversity Center for program, course, or career information and discussion. The center assists any student interested in planning the initial portion of an engineering degree program, and distributes information about prerequisites for application to all the departments in the College. A student interested in engineering should identify engineering as the intended major while still in the College of Arts and Sciences and seek advice in the center.

For more information, visit the Engineering Advising and Diversity Center Web site.

## Financial Aid

The College offers financial assistance to undergraduates through industrial scholarships and loan funds. Scholarship information is available at the College of Engineering Advising and Diversity Center (301 Loew), and at the Office of Student Financial Aid, 105 Schmitz. Most scholarships are given after a year or more in residence by the student.

## Honors Program

301 Loew

The College of Engineering Honors Program offers students of outstanding performance and achievement a course of study designed to provide intellectual challenge in a stimulating learning atmosphere which draws on the resources of a large, diversified university. Students entering the Honors Program become candidates for the degree "With College Honors" or "With Distinction (Departmental Honors)."

## The College Honors Degree

Students who complete this program receive a degree "With College Honors."

The College honors degree requires that students participate in the University Honors Program while taking engineering prerequisites in the College of Arts and Sciences. When these students are admitted to engineering departments, they may be nominated to enroll in the Engineering Honors Program. Completion of the College Honors degree involves both an honors general-education component and advanced honors work completed after students have been admitted to the College of Engineering.

*Admission Requirements:* Minimum cumulative GPA of 3.30, minimum departmental GPA, and participation in the University Honors Program as a pre-engineer.

*Graduation Requirements:* The College honors curriculum consists of two parts: a general-education component and a component in the student's major department. The general-education component is completed during the student's freshman and sophomore years. Students select three

sequences, each three quarters long, from honors, mathematics, natural science, and civilization offerings.

The second component occurs during the junior and senior years. Students then select a total of 9 credits of College honors courses with a minimum of 3 credits of departmental 499H Special Projects (or ENGR 499H). The additional honors credits can be fulfilled with either special projects or ad hoc courses.

### The Departmental Honors Degree

Students who complete this program receive a degree "With Distinction."

*Admission Requirements:* Minimum cumulative GPA of 3.30, minimum departmental GPA (varies from department to department).

*Graduation Requirements:* Students are nominated for the Departmental Honors Program when they have been in their department for a minimum of one quarter. Students select a total of 9 credits of college honors courses with a minimum of 3 credits of departmental 499H Special Projects (or ENGR 499H). The additional honors credits can be fulfilled with either special projects or ad hoc courses.

Departmental honors degrees are offered in the following degree programs: Aeronautics and Astronautics, Bioengineering, Chemical Engineering, Civil and Environmental Engineering, Computer Engineering, Electrical Engineering, Industrial Engineering, Materials Science and Engineering, Mechanical Engineering, Technical Communication, and Paper Science and Engineering. The paper science and engineering major is offered in the College of Forest Resources and is a joint program with the College of Forest Resources and the College of Engineering.

### International Study

Given the increased likelihood that engineering students will have overseas work experiences or will do business with international clients and competitors, the College encourages students to study foreign languages in addition to their engineering course work and to take advantage of opportunities for study at foreign universities either at the undergraduate or graduate level. The College has active exchange agreements with approximately forty-three universities in twenty-four countries. Foreign-language courses at the third-quarter level or above (e.g., GERMAN 103) may be applied toward the VLPA general education requirement. Students may contact the Engineering Advising and Diversity Center, 301 Loew, for information about opportunities for international study. Engineering students can also participate in the Global Engineering Education Program (through the Center for Workplace Development) for opportunities to study abroad, located in 101 Wilson Annex.

### Recommended High School Preparation

Substantial high school preparation in mathematics, physical science, and communication is essential for entrance to engineering studies. Required and recommended courses may be determined from the Engineering Advising and Diversity Center (301 Loew).

### Admission

There are a variety of pathways students follow in gaining admission on programs in the College of Engineering. Details on the processes and information on prerequisite course work are available on the individual department Web sites or from the Engineering Advising and Diversity Center in 301 Loew Hall. The information below provides an overview of the admission processes.

#### Department Direct Admission

Incoming freshmen who indicate bioengineering, chemical engineering, computer engineering, electrical engineering, industrial engineering, or materials science and engineering as their intended area of study on their University application are considered for direct admission to these programs. The number of students directly admitted to the programs varies from approximately 10 to 20 percent of the incoming class. Direct admission is for autumn quarter only.

#### College Advanced Admission

Students who indicate an interest in engineering on their University admission application are considered for the College of Engineering Advanced Admission program, a special program for high-achieving

incoming freshmen. Students accepted to the Advanced Admission program may declare the engineering major of their choice (limited to participating departments) at the conclusion of the first academic year provided eligibility requirements are met.

To maintain eligibility for Advanced Admission, students must maintain a cumulative GPA of 3.00 in prerequisite courses in mathematics, chemistry, physics, engineering fundamentals, English composition, and technical writing; maintain a minimum quarterly GPA of 2.00; and complete a minimum of 25 credits of the prerequisite and other specified courses per academic year. Advanced Admission students are also required to enroll in at least one College of Engineering (or related) introductory seminar in their first year. The purpose of this requirement is to promote the exploration of the engineering disciplines, preparing the students to make an informed choice of major. The full list of eligible seminars is maintained by the advising staff in the Engineering Advising and Diversity center in 301 Loew Hall.

### Regular Admission

All students not admitted directly to an engineering department are admitted to the College of Engineering with pre-engineering status. Students without pre-engineering status who wish to pursue an engineering degree may have their coding changed to pre-engineering upon request at the Engineering Advising and Diversity Center (301 Loew Hall). To retain pre-engineering status, students must maintain a cumulative GPA of 2.50 in prerequisite courses in mathematics, chemistry, physics, engineering fundamentals, English composition and technical writing; maintain a minimum quarterly GPA of 2.00; and complete a minimum of 25 credits of the prerequisite and other specified courses per academic year. A detailed description of pre-engineering continuation requirements is available from the Engineering Advising and Diversity Center, 301 Loew Hall.

Most engineering programs offer an Early Admission option at the end of the freshman year. In general, Early Admission application requirements include one year of calculus, English composition, and 10 to 20 credits of required chemistry or physics. Early Admission is for autumn quarter only.

All engineering programs offer an upper-division admission process. In general, upper-division admission occurs at the end of the sophomore year. Typical application requirements include one year of calculus, differential equations or linear algebra, one or two quarters of general chemistry, two to three quarters of physics, English composition, and several engineering fundamentals courses. The Engineering and Advising Diversity Center or the individual department or program has a list of specific entrance requirements. All departments offer upper-division admission for autumn quarter and some also offer a spring-quarter option.

To apply for admission to an engineering program, enrolled students must submit the online College of Engineering application. The application deadline for autumn admissions is July 1. For those programs that accept students for spring quarter, the application deadline is February 1.

### Transfer Students

After completing the University transfer-student application, transfer students who have completed all upper-division application requirements for their desired program also need to submit the online College of Engineering application by the specified deadline. Transfer students who have not completed upper-division application requirements may apply for admission to the University as pre-engineering students.

### Types of Programs

The College offers three basic programs leading to Bachelor of Science degrees:

*Departmental Major:* This program leads to a Bachelor of Science degree in a designated field of engineering (e.g., Bachelor of Science in Civil Engineering). It is designed for students who intend to practice as professional engineers in a standard branch of engineering or who plan to undertake graduate study in that field. The curricula for these degrees are accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. Accreditation requirements stipulate certain course-distribution requirements for the undergraduate degree. A description of how each of the accredited baccalaureate programs meets the ABET requirements is available from the department office and from the College office. Accredited four-year curricula leading to baccalaureate degrees are offered in aeronautics and astronautics, chemical engineering, civil and environmental engineering, computer engineering, electrical engineering, industrial

engineering, mechanical engineering, materials science, and paper science and engineering. (The paper science and engineering major is offered in the College of Forest Resources and is a joint program with the College of Forest Resources and the College of Engineering.)

The following programs are accredited by the Engineering Accreditation Commission of ABET:

- \* Aeronautical and Astronautical Engineering
- \* Chemical Engineering
- \* Civil Engineering
- \* Computer Engineering
- \* Electrical Engineering
- \* Industrial Engineering
- \* Materials Science and Engineering
- \* Mechanical Engineering

Curricula leading to baccalaureate degrees are offered in bioengineering and technical communication. The bioengineering program was reviewed for accreditation in autumn 2007. Bioengineering will be notified by ABET of the final accreditation action in summer 2008.

Application to a department or program at the upper-division level is made at the time lower-division requirements are satisfied. Currently, enrollment limits imposed by faculty size and available laboratory/classroom space are such that entry into a specific department or program may be competitive. In general, a student applicant must demonstrate scholastic aptitude, as evidenced by the attainment of grades averaging a minimum 2.50 or above (depending upon the program) in mathematics, the natural sciences, English composition, and other courses. A 2.50 GPA is a minimum only. In reality, the GPA of those offered admission is higher. The student is urged to plan ahead by learning the intended department or program requirements and particularly noting which requirements must be fulfilled by the time application is made.

*Non-departmental Professional Program:* This program leads to a Bachelor of Science in Engineering degree and is designed for students who have well defined, special educational objectives that departmental programs do not satisfy. Graduates can practice as professional engineers in newly developing fields, or they may embark on graduate study in these or allied fields (see Interdisciplinary Engineering Studies Program).

*Non-professional Program:* Leading to a Bachelor of Science degree, this program is intended for students who wish to have significant exposure to science and engineering courses, but do not plan to engage in professional engineering practice (see Interdisciplinary Engineering Studies Program).

## Graduation Requirements

To graduate, students must meet or exceed the requirements of the University, the College, and their particular program or department. College requirements are listed in this section, and program or departmental requirements are given in the specific section that describes that program or department.

All departments of the College have continuation policies that specify a minimum rate of progress as well as minimum academic-performance levels. These policies may be more restrictive than those generally applied by the University and may change with time. Information on current policy is available at the departmental offices.

Selecting courses that fulfill graduation requirements is the responsibility of each student. Students are urged to check carefully the course and credit requirements of the program in which they are enrolled.

### Continuation Policy

While the University has general regulations governing scholastic eligibility for continuance, departments and programs in the College of Engineering have adopted additional requirements in order to make the best use of the limited facilities and resources available and to provide reasonable assurance of academic success. The following criteria and procedures are applied to all undergraduate students for determining continuance in the major program.

1. Full-time students are expected to complete 12 or more credit hours per academic quarter applicable toward the degree program. (An average of 15-16 hours per quarter is required to complete the graduation requirements in 12 quarters.)
2. Part-time attendance may be allowed. Refer to written departmental guidelines for criteria. Written permission must be obtained from a

departmental undergraduate adviser for a student to attend on a part-time basis. Students who have received permission to attend part time must complete at least one course each quarter applicable toward their degree. Application for part-time students should be made prior to the first day of the quarter in which the student wishes to attend part time.

3. A student who withdraws from the University without prior written approval or is dropped for non-payment of fees must obtain approval of the departmental admissions committee before registering or maintaining pre-registration for the following academic quarter. In such cases the department registration may be disallowed or canceled if the student's academic record is not competitive with the admission requirements prevailing at the time.
4. All undergraduate students who have exceeded the graduation requirements of the degree program for which they have been accepted by more than 10 credits are transferred by their department to the College of Arts and Sciences.
5. Students are required to maintain a minimum GPA of 2.00 in all departmental and professional program courses. The GPA is computed by considering all engineering college departmental courses of 300 level or higher, including repeated courses, but excluding Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) distribution requirements. If the GPA in these courses does fall below 2.00, a student is placed on departmental probation and must achieve a quarterly GPA higher than 2.00 the following quarter or be dropped from the department and transferred to the College of Arts and Sciences.
6. The minimum acceptable grade for any course required for each major is set by the individual department. If a grade received is less than the minimum, a student may repeat the course without loss of course entry priority. Otherwise, the decision to admit a student to a course depends upon space available.
7. The progress of each student is reviewed each quarter. If a student's performance fails to meet the standards outlined above, the student is placed on probation the following quarter. The student is notified in writing of the reason for probation and is told what must be done for removal from probation. If the student does not show progress toward removing the deficiencies in the following quarter, the student is notified in writing, dropped from the department, and transferred to the College of Arts and Sciences.

The College recognizes that inequities can result from any continuation policy. If students are placed on probation or dismissed and believe that their record has been misunderstood, they may request reconsideration of the probation or dismissal by writing a letter to the department chairman. The letter should include any additional supporting or relevant material. The letter and supporting material are transmitted to the department faculty committee. The faculty committee reviews carefully all available information and then decides whether or not academic probation shall be continued for another quarter or whether the dismissal was appropriate and valid. Any student appeal must be made within 30 days of the notification of placement on probation or dismissal. The committee responds to the student appeal within 30 days.

## College of Engineering Graduation Requirements

### General Education Requirements

The College requires a minimum number of credits within certain areas of study and some specific courses within certain areas. All programs require the following:

- \* *Visual, Literary, & Performing Arts and Individuals & Societies:* The University requires a minimum of 10 credits of coursework designated Visual, Literary, & Performing Arts (VLPA) and 10 credits of coursework designated Individuals & Societies (I&S). Most engineering departments require additional VLPA or I&S coursework beyond the University minimum. See individual department information for details. Visual, Literary, & Performing Arts (VLPA) includes courses such as literature, art, music, and drama which stress the essential qualities of individual forms of expression. First- and second-quarter language courses may not be counted toward the VLPA requirement. Individuals & Societies includes courses in subjects such as history, economics, psychology, and sociology which stress the social nature of mankind, and the development and analysis of societies and social institutions. Courses that count toward these requirements are identified as VLPA or I&S in the Course Descriptions and in the quarterly Time Schedule.
- \* *Natural Science:* 20-25 credits. Most departments within the College require chemistry (10 credits): CHEM 142, CHEM 152 (some departments do not require CHEM 152); and physics (15 credits): PHYS 121, PHYS 122, PHYS 123. See departmental list for specific natural science requirements.

- \* *Mathematics*: Specifically required are MATH 124, MATH 125, MATH 126, and MATH 308. Additional credits are specified or recommended by the department or program.
- \* *Written and Oral Communication*: One 5-credit English composition course from the approved University list. T C 231, Introduction to Technical Writing (3 credits), and T C 333, Advanced Technical Writing and Oral Presentations (4 credits, or department-approved alternative).

### Engineering Departmental Course of Study

Each engineering department specifies a number of sophomore level engineering fundamental courses followed by a yearlong series of junior level core courses. During the senior year students complete technical elective and design courses that culminate in a major, meaningful design experience. See departmental list for specific degree requirements.

## Special Programs

Engineering Co-op Program (three to six month internships)  
 Program Coordinator, Dawn Wiggin  
 301 Loew, Box 352180  
 coop@enr.washington.edu

The Co-op Program provides an opportunity for pre-engineering and engineering students to combine practical, full-time, on-the-job engineering experience with full-time academic study. Students typically take a break from their studies for six months to work full-time and return to full-time academic status upon completion of the co-op assignment. In addition, students receive academic credit for the co-op experience. Advantages of participation include assistance in deciding which field of engineering to follow, additional income to help defray college expenses, relevance and motivation for study based on real engineering work, and work experience and employment contacts that may result in regular employment after graduation.

Information may be obtained from the Co-op Program Office, College of Engineering, Box 352180 (301 Loew), or by visiting the Co-op Program Web site.

## Educational Outreach

Fulfilling a commitment to lifelong learning, the College of Engineering offers courses, workshops, and conferences to respond to the professional development needs of practicing engineers and related technical professionals worldwide. Thousands of practicing engineers update their technical knowledge or pursue advanced degrees each year through UW Educational Outreach's Engineering Professional Programs (EPP) and Education at a Distance for Growth and Excellence (EDGE). For more information, contact Engineering Professional Programs at 206-543-5539, or Education at a Distance for Growth and Excellence at 206-685-2242.

For more information, see the Engineering Professional Programs and Education at a Distance for Growth and Excellence Web sites.

## Special Facilities

Office of New Initiatives  
 Director, Mary J. Heusner  
 372 Loew, Box 352180

The Office of New Initiatives promotes, stimulates, and coordinates research in all fields of engineering. Its primary role is to encourage and develop interdisciplinary research programs and national research initiatives. The Office of New Initiatives also reviews grant and contract proposals, tracks awards, and provides information on funding opportunities. This office allocates limited matching funds to College units to increase the quality of research in the College of Engineering. The College currently has the following research programs or centers:

- \* Center for Design of Analog-Digital Integrated Circuits (CDADIC)
- \* Center for Engineering Learning and Teaching (CELT)
- \* Center for Intelligent Materials and Systems (CIMS)
- \* Center for Nanotechnology (CNT)
- \* Center for Surfaces, Polymers, and Colloids
- \* FAA Center of Excellence for Advanced Composite Materials (AMTAS)
- \* Intelligent Transportation Systems (ITS)
- \* Institute of Advanced Materials & Technology (i-AMT)
- \* NSF Center for Institutional Change (UW ADVANCE)
- \* NSF Center for the Advancement of Engineering Education (CAEE)

- \* NSF Engineered Biomaterials Research Center (UWEB)
- \* NSF Genetically Engineered Materials Science & Engineering Center (MRSEC)
- \* NSF Integrative Graduate Education and Research Traineeship Program (IGERT - Bioresource-based Energy for Sustainable Societies)
- \* NIH Microscale Life Sciences Center (MLSC)
- \* Pacific Earthquake Engineering Research Center (UW-PEER)
- \* Washington State Transportation Center (TRAC)
- \* Transportation Northwest (TransNow)
- \* Turing Center

Collaborating centers outside Engineering:

- \* Center for Process Analytical Chemistry (CPAC)
- \* The Water Center

For more information, see the Office of New Initiatives Web page.

## Interdisciplinary Engineering Studies Program

301 Loew

The College of Engineering directly administers nondepartmental undergraduate and graduate degree programs. Some engineering fundamentals and writing courses required for admission to the departments are managed by specific engineering departments.

## Undergraduate Programs

301 Loew

The Interdisciplinary Engineering Studies (IES) Program is intended for students whose desired course of study does not fall within one of the traditional engineering departments. An interdisciplinary program combines coursework from at least one engineering department as well as other department(s) on campus (Engineering or other) to allow students to create a program of study not available through the existing undergraduate degree programs. Although coursework may involve departments outside the College of Engineering, the major thrust must be in engineering.

The IES Program offers a nonprofessional degree program leading to the Bachelor of Science (B.S.) and a professional degree program for the Bachelor of Science in Engineering (B.S.E.).

Due to the uniqueness of each interdisciplinary student's program of studies, the B.S. and B.S.E. degrees are not accredited by the Accreditation Board for Engineering and Technology (ABET). The experience requirement to obtain a professional engineering license is two years longer for a B.S.E. graduate, except in surveying, than for a graduate of an accredited program. A B.S. graduate is not eligible for a professional engineering license.

Interdisciplinary students develop personal programs of study approved by a faculty adviser with similar interests. Programs are reviewed and approved by the Interdisciplinary Committee, which oversees all undergraduate interdisciplinary-study programs. Contact the Engineering Advising and Diversity Center, 206-543-1770, for information on established procedures and applications for entry into the B.S.E. and B.S. programs. Entrance requirements and the continuation policy for participation in these programs are consistent with those of other departments in the College.

## Bachelor of Science in Engineering

Admission to this program (usually after completion of 90 credits) is competitive with a minimum GPA of 2.80 in technical courses required for entry. A minimum of 75 credits must be completed after entering the program before a B.S.E. degree is awarded. Detailed information regarding the B.S.E. degree can be obtained from an adviser in the Engineering Advising and Diversity Center (301 Loew).

## Bachelor of Science

The nonprofessional Bachelor of Science degree provides greater flexibility than does the Bachelor of Science in Engineering degree. It can be an excellent base for subsequent professional studies in law, medicine, or business. It may also be the primary educational objective in such fields

as technical writing, engineering sales, or environmental studies. Detailed requirements are available from the adviser in the Engineering Advising and Diversity Center (301 Loew).

## Graduate Programs

### Master of Science in Engineering/Master of Science

The College offers graduate programs leading to the Master of Science in Engineering and Master of Science degrees, without designation of a specific major. For graduate degrees within specific majors, see the individual departmental listings.

Approved programs lead to the M.S.E. degree in civil, mechanical, chemical, and inter-engineering, and to the M.S. degree in civil engineering, inter-engineering, and materials science and engineering.

The Inter-engineering Master of Science in Engineering (M.S.E.) and Master of Science (M.S.) program is intended for students whose desired course of study does not fall within one of the traditional engineering graduate programs. An inter-engineering program combines coursework from at least one graduate engineering department as well as other graduate department(s) on campus (engineering or other) to allow students to create a program of study not available through the existing graduate degree programs. Applications and files of students entering the M.S./M.S.E. option are handled by the designated department. Admission to the inter-engineering option requires a statement describing the applicant's objectives. This statement should state why the student wants to enter the M.S./M.S.E. program rather than one of the traditional engineering graduate programs. Applicants to the M.S./M.S.E. program must have well-defined educational objectives which cannot be satisfied by established engineering programs.

#### Admission Requirements

M.S.E./M.S. applicants are required to have a bachelor's degree in engineering, mathematics, or science with a minimum GPA of 3.00 in courses taken in the junior and senior years. Students entering without an accredited engineering undergraduate degree and seeking an M.S.E. degree must satisfy the minimum general requirements of the College of Engineering baccalaureate degree. Students are expected to complete the degree within two years. Situations requiring longer than this must be approved by the student's faculty adviser.

**Development of the Plan of Study:** When applying to the M.S.E./M.S. program, the applicant must submit a plan of study that sets out the intended 400- and 500-level course work and proposed thesis topic. Before applying to the M.S.E. program, the student must consult with a faculty member from each department in which the student intends to work, and identify at least one to serve as the student's faculty adviser. The other faculty members can serve on the student's supervisory committee if the student is admitted. Working with the faculty adviser(s), each student must develop a plan of study and research that meets the general degree requirements (below) and satisfies the student's own program objectives. The program of studies must include in-depth coursework from two or more departments and be approved by the faculty adviser(s). The proposed program is then set out on the student's Application to the Interengineering M.S.E./M.S. Program.

**Development of the Statement of Objectives:** Students must submit a one-page statement of study, degree, and career objectives for seeking the Interengineering M.S.E./M.S. degree. This statement should explain why the student wants to enter the M.S.E./M.S. program rather than one of the traditional engineering graduate programs. Also, students should include in this statement any additional information to be considered as part of the application. This information may include work experience, outside interests, and unusual circumstances that may contribute to a better understanding of the student's record. Applicants to the M.S.E./M.S. program must have well-defined educational objectives that cannot be satisfied by established engineering programs.

#### Degree Requirements

Students develop their own plan of study for the M.S. or M.S.E. degree in consultation with faculty adviser(s) as a requirement for admission to the program. The plan of study must contain at least 39 credits of coursework, with no more than 9 credits of engineering courses at the 400 level and at

least 21 credits of engineering courses at the 500 level. The plan of study must also include at least 9 credits of thesis study/preparation.

## Aeronautics and Astronautics

211 Guggenheim Hall  
www.aa.washington.edu

Aeronautics and astronautics deals with the design and analysis of air and space vehicles and a broad spectrum of related engineering science, such as aerodynamics, structural mechanics, automatic controls, flight mechanics, space dynamics, propulsion, plasma dynamics, and related topics.

### Undergraduate Program

Adviser  
211C Guggenheim Hall, Box 352400  
206-616-1115  
ugadvising@aa.washington.edu

The department offers the following programs of study:

- \* The Bachelor of Science in Aeronautical and Astronautical Engineering degree

### Bachelor of Science in Aeronautical and Astronautical Engineering

*Suggested First- and Second-Year College Courses:* During the first year, students should take the required calculus, chemistry, English composition, and computer programming. If possible, begin taking the physics sequence. It is recommended that some VLPA and I&S courses be taken to balance the course load.

#### Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Upper-Division Admission. Admission is competitive. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; application deadline is July 1.

*Early Admission (Limited number of students admitted through this process)*

1. *Course requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical science courses plus accompanying laboratory at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142 or above; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.
3. *Grade requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.
4. Early admission students may start the autumn-quarter, junior-year program after meeting the requirements and standards for upper-division admission.

Completion of the minimum requirements does not guarantee admission.

*Upper-Division Admission*

1. *Course requirements:* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, MATH 324\*, PHYS 121, PHYS 122, PHYS 123, CHEM 142, A A 210, AMATH 301\*, CEE 220, M E 230, CHEM E 260, T C 231, and 5 credits of English composition.

\*AMATH 301 and/or MATH 324 may be taken as late as the autumn quarter of admission but would create an extremely heavy course load if both are taken the same quarter.

2. *Grade requirements:* At least 75 credits completed, with a minimum GPA of 2.50 in courses required for admission and a minimum grade of 2.0 in each course required for admission consideration.

Completion of the minimum requirements does not guarantee admission.

Students may also declare into the Aeronautical and Astronautical degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

## Graduation Requirements

180 credits as follows:

1. *General Education Requirements (85 credits)*
  - a. *Areas of Knowledge:* 49 credits as follows: Visual, Literary, and Performing Arts (VLPA), and Individuals & Societies (I&S): 24 credits to include minimum 10 credits in VLPA and minimum 10 credits of I&S, plus four additional credits in either area. Natural World: 25 credits, to include CHEM 142 (5) and PHYS 121, PHYS 122, PHYS 123 (15 credits). An additional 5 credits of natural-world courses. (See department for list of approved courses.)
  - b. *Mathematics:* 24 credits to include MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 324.
  - c. *Written and Oral Communication:* 12 credits, to include one 5-credit English composition course from the University list; T C 231; and T C 333 (or department-approved alternative).
2. *Major Requirements (95 credits)*
  - a. *Engineering Fundamentals:* 16 credits, to include A A 210, CEE 220, M E 230, and CHEM E 260.
  - b. *Professional Courses:* 75 credits. Junior-year professional program courses are all required. The senior year consists of A A 409, A A 410-A A 411 or A A 420-A A 421, A A 447, and 15 credits of senior technical electives. With approval, 3 credits of the latter may be chosen from another area of engineering.
  - c. *Electives:* 4 credits of free electives, which may be used to meet the 180 credits required for graduation.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The goals and objectives of the undergraduate program are to provide a challenging and comprehensive education, to develop necessary functional skills and an understanding of the societal context in which engineering is practiced, to provide a solid foundation in the engineering sciences related to aerospace engineering, to provide a strong systems perspective, to develop engineering creativity through design experience, and to prepare graduates to succeed in engineering careers and lifelong learning.

Graduates of aeronautics and astronautics are skilled in engineering fundamentals, engineering design, laboratory skills, synthesis of various engineering disciplines, and working in a team environment. Graduates are highly regarded by employers in aeronautics, astronautics, energy systems, and related fields. They develop interpersonal skills and a desire for life-long learning that helps them succeed in their chosen careers. Graduates have been successful and valued at local, national, and international industries, as well as at government organizations and institutions of higher learning.

The B.S.A.A.E. program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7000. The above student outcomes follow closely the ABET suggested outcomes:

1. An ability to apply knowledge of mathematics, science and engineering
2. An ability to design and conduct experiments, as well as to analyze and interpret data
3. An ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability
4. An ability to function on multi-disciplinary teams
5. An ability to identify, formulate and solve engineering problems
6. An understanding of professional and ethical responsibilities
7. An ability to communicate effectively
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
9. A recognition of the need for, and an ability to engage in life-long learning
10. Knowledge of contemporary issues
11. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice

The outcomes are attained by ensuring that the students have the following attributes, skills, and abilities upon graduating from the program that map to the above ABET program outcomes.

1. Graduates will demonstrate a solid mastery of fundamentals in the following aerospace engineering disciplines: fluids, structures, controls, propulsion, flight mechanics, orbital mechanics and energetics.
2. Graduates will have a combination of analytical, computational, and experimental skills.
3. Graduates will learn to work and communicate effectively both as individuals and in teams.
4. Graduates will demonstrate an ability to perform and communicate the results of a multi-disciplinary systems design.
5. Graduates will show that they can make decisions based on societal need and implications, contemporary issues and ethical considerations.
6. Graduates will be aware of the need for and will have the skills necessary for life-long learning.

- \* *Instructional and Research Facilities:* Visit the department Web page to view current research activities. Undergraduates are encouraged to participate in research activities.

- \* *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for details.

- \* *Research, Internships, and Service Learning:* Internships are arranged individually. See adviser for details.

- \* *Department Scholarships:* Scholarships are limited and are usually reserved for students who have junior and senior standing in the department. Deadline for scholarship applications is April 1.

- \* *Student Organizations/Associations:* American Institute of Aeronautics and Astronautics (AIAA) student chapter. Sigma Gamma Tau

## Graduate Program

Graduate Program Coordinator  
211B Guggenheim Hall, Box 352400  
206-616-1113  
gradadvising@aa.washington.edu

The Department of Aeronautics and Astronautics offers programs that provide a foundation in the aerospace engineering sciences and expertise in various specialized application areas. Three graduate degree options are offered: Master of Science in Aeronautics and Astronautics, Master of Aerospace Engineering, and Doctor of Philosophy.

## Master of Science in Aeronautics and Astronautics (M.S.A.A.)

### Admission Requirements

- \* *Grade Point Average:* The Graduate School requires that applicants hold a GPA of at least 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate course work to be considered for admission. Applicants admitted by the department normally have a minimum GPA of 3.30. Applicants with less than a 3.30 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
- \* *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* Each transcript is individually reviewed. The department recognizes that some academic institutions are more competitive and high grades are more difficult to obtain.
- \* *GRE General Test:* The department requires applicants to take the general portion of the Graduate Record Examination. Although the department does not have minimum GRE scores, the typical successful applicant to the program has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 5.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15th.
- \* *Two Letters of Recommendation:* Confidential letters may be submitted electronically by recommenders indicated on the on-line application, or placed in sealed envelopes and included with application materials, or sent directly to the department by the recommenders. Writers should be able to rank the applicant's performance as a student and/or researcher.

A referer should send the recommendation in letter format; no special form is used.

- \* *Statement of Objectives:* A statement of objectives should be written, providing the department with information about the applicant not found in the transcripts and other official documents. For example, statements can include personal histories, professional and academic goals, and specific research interests if applicable.
- \* *English Requirements for Foreign Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam are required for foreign students whose native language is not English.
- \* *Prior Degrees:* Prospective students should hold an undergraduate degree in aerospace or mechanical engineering. Applicants with strong grades (3.5 and above) in related disciplines (physics, other engineering disciplines) are considered.

## Degree Requirements

39-45 credits, as follows:

- \* All M.S.A.A. degree candidates must have a program of study plan approved by the Graduate Committee of the Department of Aeronautics and Astronautics.
- \* Before completing 12 credits of graduate course work, file a program of study plan which has been prepared with the assistance of the adviser or with the Graduate Program Adviser. This program is submitted to the Graduate Committee for approval.
- \* The minimum M.S.A.A. program may consist of either ten courses plus 9 thesis credits, or 13 courses. No more than three of the courses may be at the 400 level (though not in a student's depth area). All courses counted toward the degree must be graded. In addition, each student must enroll in the graduate seminar (A A 520) during each quarter of full-time studies.

The student's program of study is tailored to the needs and interests of the student. However, each program must include depth in a field of specialization, breadth to include at least one course in each of two different subject areas outside the field of specialization, and analytical strength to include three mathematical courses. Senior sequences in engineering, science, or other appropriate professional fields may be used to make up part of the individualized graduate program. However, only three undergraduate courses are counted toward the minimum requirements (and none in the student's depth area).

- \* The thesis, if that degree option is chosen, is approved by the student's adviser and second reviewer and submitted to the Graduate School. After submitting one copy of the thesis to the department, two signed, unbound copies of the thesis and receipt for binding fee must be submitted to the Graduate School by the last day of the quarter.

It usually takes one and a half to two years of full-time study to complete the requirements for an M.S.A.A. degree. The Graduate School imposes a time limit of six years for any master's degree.

## Master of Aerospace Engineering (M.A.E.)

The M.A.E. program is intended for recent graduates or engineers who wish to expand their knowledge in multidisciplinary areas while also learning other aspects of aerospace engineering, such as business, management, manufacturing, or technical communication.

### Admission Requirements

- \* *Grade Point Average:* The Graduate School requires that applicants hold a GPA of at least 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate course work to be considered for admission. Applicants admitted by the department normally have a minimum GPA of 3.30. Applicants with less than a 3.30 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
- \* *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* Each transcript is individually reviewed. The department recognizes that some academic institutions are more competitive and high grades are more difficult to obtain.
- \* *GRE General Test:* The department requires applicants to take the general portion of the Graduate Record Examination. Although the department does not have minimum GRE scores, the typical successful applicant to the program has scores in excess of 450 Verbal, 700

Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15th.

- \* *Two Letters of Recommendation:* Confidential letters may be submitted electronically by recommenders indicated on the on-line application, or placed in sealed envelopes and included with application materials, or sent directly to the department by the recommenders. Writers should be able to rank an applicant's performance as a student and/or researcher. A referer should send the recommendation in letter format; no special forms are used.
- \* *Statement of Objectives:* A statement of objectives should be written providing the department with information about the applicant not found in the transcripts and other official documents. For example, statements can include personal histories, professional and academic goals, and specific research interests if applicable.
- \* *English Requirements for Foreign Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam are required for foreign students whose native language is not English.
- \* *Prior Degrees:* Prospective students should hold an undergraduate degree in aerospace or mechanical engineering. Applicants with strong grades (3.5 and above) in related disciplines (physics, other engineering disciplines) are considered.

## Degree Requirements

45-54 credits.

Students create their own programs of study based on departmental distribution requirements and subject to departmental approval, to include courses in a specialty area, technical and non-technical electives, analytical courses, and a group or independent project. The M.A.E. program includes twelve courses plus 8 credits for the project, or ten courses and one of three business certificate programs.

## Doctor of Philosophy (Ph.D.)

The doctoral program consists of lectures, seminars, discussions, and independent study, enabling the student to master and to make original contributions to a particular field.

### Admission Requirements

- \* *Grade Point Average:* The Graduate School requires that applicants hold a GPA of at least 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate course work to be considered for admission. Applicants admitted by the department normally have a minimum GPA of 3.40. Applicants with less than a 3.30 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
- \* *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* Each transcript is individually reviewed. The department recognizes that some academic institutions are more competitive and high grades are more difficult to obtain.
- \* *GRE General Test:* The department requires applicants to take the general portion of the Graduate Record Examination. Although the department does not have minimum GRE scores, the typical successful applicant to the program has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15th.
- \* *Two Letters of Recommendation:* Confidential letters may be submitted electronically by recommenders indicated on the on-line application, or placed in sealed envelopes and included with application materials, or sent directly to the department by the recommenders. Writers should be able to rank the applicant's performance as a student and/or researcher. A referer should send the recommendation in letter format; no special forms are used.
- \* *Statement of Objectives:* A statement of objectives should be written providing the department with information about the applicant not found in the transcripts and other official documents. For example, statements can include personal histories, professional and academic goals, and specific research interests.
- \* *English Requirements for Foreign Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam are required for foreign students whose native language is not English.
- \* *Prior Degrees:* Prospective students should hold undergraduate and graduate degrees in aerospace or mechanical engineering with a minimum GPA of 3.40. Applicants with strong grades (3.4 and above) in related disciplines (physics, other engineering disciplines) are considered.

## Degree Requirements

In addition to the formal steps for obtaining the degree listed below, students must complete an approved program of study consisting of 18 credits of coursework beyond that required for the Master of Science in Aeronautics and Astronautics, for a total of 90 credits for the Ph.D.

- \* *The Departmental Qualifying Examination:* To take the department qualifying examination, students must have a 3.40 GPA in technical course work at the graduate level. In addition, they must have an M.S.A.A. degree or its equivalent, must have a faculty member accept them into their research program and agree to serve as their thesis advisor, supervise their Ph.D. research, and chair their Qualifying Exam Committee.
- \* *The General Examination:* Upon successful completion of the qualifying examination, a Ph.D. supervisory committee chaired by the student's major adviser is appointed. The general examination is expected to be taken within one year after the qualifying examination, but no sooner than two years after the beginning of graduate study. At least three weeks prior to the exam, students provide the members of their committee a document outlining their proposed research.
- \* *The Completion of Coursework:* The department requires at least 18 credits of course work in addition to that for the M.S.A.A. degree. A form listing the courses to be taken must be approved by the student's adviser and placed in the student's file.
- \* *The Preparation of the Dissertation:* The dissertation requires a substantial effort, generally equivalent to at least one year of full-time study, and must demonstrate original and independent research and achievement.
- \* *The Final Examination:* When the dissertation is completed to the satisfaction of the chair of the Supervisory Committee, a reading committee of three is appointed from the student's committee. If the reading committee agrees that the dissertation is satisfactory, then the final examination is scheduled. That examination is generally devoted to a presentation and defense of the dissertation.

## Research Activities

Current areas of research in the Department of Aeronautics and Astronautics include guidance and control systems, aerodynamics and fluid mechanics, propulsion and energy systems, advanced composite materials and structures, and plasma dynamics and fusion reactors. Research in controls includes autonomous systems involving spacecraft, aircraft, and underwater vehicles, flight systems integration, and development of unmanned aerial vehicles. Among fluid dynamics research topics are turbulent mixing, vortex dynamics and flow control, compressible flow, fluids in microgravity, and advanced fluid flow diagnostics development. Research programs in the areas of propulsion and energy include hypervelocity mass launchers, advanced technologies for generating space and terrestrial energy, combustion, and studies of planetary resources utilization. Structural mechanics research involves damage tolerant composite structures, structural dynamics, fatigue, and fracture, and multidisciplinary design optimization. Experimental and computational research in plasma science has an emphasis on advanced, alternative concepts for achieving controlled fusion, as well as plasma propulsion for space applications.

## Facilities

Facilities that support research activities in controls include unmanned aerial vehicle (UAV) and autonomous flight systems laboratories, and laboratories for underwater vehicle and distributed space systems research. Fluids, propulsion, and energy facilities include the Kirsten 8 x 12 foot low-speed wind tunnel, two water tunnels, a Mach 5, enthalpy blow-down wind tunnel, the Ram Accelerator hypervelocity launcher, a combustion laboratory, and a Mars environment simulation facility. Research in structures is conducted in a composite-material laboratory with material and structural test machines. Various plasma and fusion-research and engineering physics laboratories, including the Redmond Plasma Physics Laboratory (RPPL), exist to support research in plasmas. Lastly a variety of computer facilities is available, including a single 20-processor and two 8-processor servers, and a 16-computer heterogeneous cluster, as well as several stereographic visualization systems.

## Additional Information

Most students are financially supported by the department as teaching or research assistants, or by their employers. For further information on this or other aspects of department programs, contact the Graduate Program Coordinator, 211B Guggenheim Hall, Box 352400, or visit the department's Web site.

## Bioengineering

N107 William H. Foege Building  
depts.washington.edu/bioe

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the health care system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as a leading bioengineering programs in the world. Major areas of research and education include distributed diagnosis and home healthcare (d2h2), molecular bioengineering and nanotechnology, engineered biomaterials and tissue engineering, medical imaging and image-guided therapy, and computational bioengineering.

## Undergraduate Program

Adviser  
N107 William H. Foege Building, Box 355061  
206-685-2000  
bioeng@u.washington.edu

The Bioengineering Program offers the following programs of study:

- \* The Bachelor of Science in Bioengineering degree

## Bachelor of Science in Bioengineering

*Suggested First- and Second-Year College Courses:* CHEM 142, CHEM 152, CHEM 162, CSE 142, English Composition, MATH 124, MATH 125, MATH 126, PHYS 121.

## Department Admission Requirements

Admission is competitive. Students may be admitted at three different points. Consult the department's Web site for more information.

1. *Direct Admission.* The department enrolls up to 25 percent of its incoming class directly from high school. Students accepted to the University who indicate Bioengineering as their preferred major on their freshman application are considered. Strong applicants have completed chemistry, biology, and calculus in high school. Admission is for autumn quarter only.
2. *Early Admission.* Students enrolled at the University are eligible to apply at the end of the freshman year if they have completed the following courses: MATH 124, MATH 125, MATH 126, CHEM 142, CHEM 152, CHEM 162, and 5 credits of English composition. The application deadline is July 1 for autumn quarter admission.
3. *Upper Admission.* Upper admission requires 59 credits of coursework with at least a 2.50 GPA: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; PHYS 121, PHYS 122; BIOL 180, BIOL 200; CSE 142; and 5 credits of English composition. A 2.50 GPA guarantees consideration but does not guarantee admission. Application deadlines are February 1 for spring quarter and July 1 for autumn quarter. Consult the department's Web site or adviser for more details.

## Graduation Requirements

Students follow the requirements that are in effect at time of entry into the department.

180 credits as follows:

*General Education Requirements (105 credits):*

1. *Areas of Knowledge:* 24 total credits in Visual, Literary, and Performing Arts (VLPA) and Individuals and Societies (I&S), with at least 10 credits in each area.
2. *Written and Oral Communication (8 credits):* 5 credits of English composition, from the approved University list; T C 231. Additional writing credits are built into the major core courses.
3. *Mathematics (25 credits):* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; STAT 390.
4. *Natural Science (47 credits):* CHEM 142, CHEM 152, CHEM 162, and CHEM 223 or CHEM 237; PHYS 121, PHYS 122, PHYS 123; BIOL 180, BIOL 200; BIOC 405.
5. *General Elective (1 credit)*

*Major Requirements (75 credits):*

1. *Engineering Fundamentals (17 credits):* CHEM E 260; CSE 142, CSE 143; E E 215.
2. *Bioengineering Core (38 credits):* BIOEN 201, BIOEN 301, BIOEN 302, BIOEN 303, BIOEN 304, BIOEN 305, BIOEN 357; BIOEN 481; 8 credits of BIOEN 482.
3. *Bioengineering Senior Electives (15 credits):* 15 credits chosen from BIOEN 420, BIOEN 440, BIOEN 455, BIOEN 457, BIOEN 467, BIOEN 485, BIOEN 490, BIOEN 491, BIOEN 492. One of these courses must be "design-designated" (see department for current list).
4. *Approved Electives (5 credits):* 5 additional credits chosen from an approved list of mathematics, science, and engineering courses (see the department's Web site for further information), or from the Bioengineering senior elective list.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Bioengineering students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials. A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department's cutting-edge research. Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department's goal is to prepare students to be leaders and innovators in improving human health and health care. Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and biology; the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interactions between living and non-living materials and systems.
- \* *Instructional and Research Facilities:* The department is housed in the newly constructed Foege North building. Amenities include instructional laboratories, an advanced computing lab for class instruction and student use, a general computer lab for student use, a student work room, a seminar room, and meeting space. Departmental offices are also located in this building. Other laboratories are located in the College of Engineering and the School of Medicine. The Department of Bioengineering houses UWEB (University of Washington Engineered Biomaterials), participates in the Center for Nanotechnology, and sponsors many other research centers relating to our five thrust areas in Computational Bioengineering, Distributed Diagnosis and Home Healthcare, Engineered Biomaterials, Medical Imaging and Image-guided Therapy, and Molecular Bioengineering and Nanotechnology.
- \* *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for requirements.

- \* *Research, Internships, and Service Learning:* Many undergraduate bioengineers are involved in internships. The department participates in the College of Engineering Co-op Program and maintains an internship Web site for majors.

- \* *Department Scholarships:* Several scholarships are available for majors.

- \* *Student Organizations/Associations:* The Biomedical Engineering Society (BMES), the campus chapter of the national professional organization, organizes social events as well as events that support student interest in medical school, graduate school, and industry.

*Of Special Note:* Courses on technology commercialization are available to seniors.

## Graduate Program

Graduate Program Coordinator  
N107 William H. Foege Building, Box 355061  
206-685-2000  
bioeng@u.washington.edu

The Department of Bioengineering offers programs of study which lead to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees.

## Master of Science

The Master of Science degree program provides breadth of knowledge of engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree prepares students for careers in academic, industrial, or hospital environments.

## Admission Requirements

All application materials must be received in the appropriate office by the deadline. International applications are due by December 1; domestic applications are due by January 15. Late and/or incomplete applications are not reviewed. Required application items include the following:

- \* Graduate School application
- \* Department of Bioengineering Admissions Form
- \* Statement of purpose
- \* Resume/curriculum vitae
- \* Three letters of recommendation
- \* One set of official transcripts
- \* Official GRE scores
- \* Official TOEFL scores (international applicants only)

More information about the application is online at [depts.washington.edu/bioe/programs/phd/phd-apply.html](http://depts.washington.edu/bioe/programs/phd/phd-apply.html). Materials sent in addition to those listed above are considered non-essential and do not enhance the application.

Applicants are expected to have the following courses as part of their undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, rate processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the M.S. program.

## Degree Requirements

Course requirements for the M.S. in Bioengineering are detailed below. All core and elective courses must be taken for a numerical grade. Students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

*Note:* A single course may not count for two separate requirements.  
36 credits as follows:

- \* *Molecular Bioengineering:* BIOEN 501 (4)
- \* *Cellular Bioengineering:* BIOEN 502 (4)
- \* *Systems Bioengineering:* BIOEN 503 (4)
- \* *Biostatistics (4 credits)*
- \* *Bioengineering seminar:* BIOEN 510 (1)
- \* *Bioengineering elective courses, chosen in consultation with faculty adviser:* 10 credits
- \* *Master's thesis:* BIOEN 700 (9 credits)

## Doctor of Philosophy

The objective of the Ph.D. program is to train individuals for careers in bioengineering research and teaching. The program has three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the Ph.D. program does not require prior completion of the M.S. degree and may be made directly after the B.S. An optional dual Ph.D. degree in bioengineering and nanotechnology is available. See [www.nano.washington.edu](http://www.nano.washington.edu) for more information.

### Admission Requirements

See the application process detailed in the M.S. section.

While it is not required to complete an MS degree before beginning the Ph.D., every graduate student is expected to have the following courses as part of his or her undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the Ph.D. program.

### Degree Requirements

Minimum 90 credits, to include the following:

The Ph.D. program consists of a rigorous set of core courses, elective courses, and a focused research project. Three major milestones punctuate that work: the Qualifying Examination, the General Examination, and the Final Examination (dissertation defense). Additionally, students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

All core and elective courses must be taken for a numerical grade. A single course may not count for two separate requirements. Required courses include the following:

- \* *Molecular Bioengineering*: BIOEN 501 (4)
- \* *Cellular Bioengineering*: BIOEN 502 (4)
- \* *Systems Bioengineering*: BIOEN 503 (4)
- \* *Biostatistics* (4)
- \* *Bioengineering seminar*: BIOEN 510 (1)
- \* 16 credits of bioengineering elective courses, chosen in consultation with faculty adviser
- \* 27 credits of dissertation writing (BIOEN 800)

Ordinarily, a student progressing well and on schedule follows this schedule:

- \* *First Year*: Complete one to three lab rotations and select a thesis adviser no later than the end of spring quarter.
- \* *Second Year*: Pass the Qualifying Examination and form a Supervisory Committee by the end of the second year.
- \* *Third Year*: Pass the General Examination.
- \* *Fourth Year (and subsequent years)*: Make an annual progress report to, and receive feedback from, the Supervisory Committee.
- \* *Fifth Year*: Defend the dissertation.

## Medical Scientist Program

A Medical Scientist Training Program exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the M.D. and Ph.D. degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at 206-685-0762.

## Research Facilities

As the Department is established within the College of Engineering and the School of Medicine, bioengineering students have access to all engineering and health science departments and facilities. A wide range of technologies and virtually all aspects of biomedical research tools are available.

## Financial Aid

Financial support is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the adviser.

## Chemical Engineering

105 Benson  
[www.cheme.washington.edu](http://www.cheme.washington.edu)

The chemical engineering profession is a close-knit group with a common background in chemical processes, systems analysis, and systems economics. Chemical engineering training occurs through course and laboratory work addressing mathematical, scientific, and engineering fundamentals. With a strong background in mathematics, chemistry, and physics, chemical engineering students study transport phenomena (the description of momentum, heat, and mass transfer in chemical processes); chemical kinetics and reaction engineering; process control and design; and optimization of chemical processes. These subjects are common throughout the traditional chemical industry, applying as well to other industries such as electronics manufacture and biological and biochemical engineering. Chemical engineers find industrial employment in areas of electronics, petroleum, consulting, chemical, automotive, forest products, biotechnology, and energy. Chemical engineers also find careers in academia and government and military service.

## Undergraduate Program

Adviser  
105 Benson, Box 351750  
206-543-2252  
[advising@cheme.washington.edu](mailto:advising@cheme.washington.edu)

The Department of Chemical Engineering offers the following program of study:

- \* The Bachelor of Science in Chemical Engineering degree.

## Bachelor of Science in Chemical Engineering

*Suggested First- and Second-Year College Courses*: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, PHYS 121, PHYS 122, PHYS 123, ENGL 131 (or equivalent), CSE 142, CHEM E 260.

### Department Admission Requirements

Applicants are considered in three groups -- Direct Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive. Thus, completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; the deadline for Early Admission and Upper-Division Admission is July 1. The application is available at [www.engr.washington.edu/advising/engrapplications.html](http://www.engr.washington.edu/advising/engrapplications.html).

1. *Direct Freshman Admission*
  - a. Open to freshman students formally admitted to the UW.
  - b. Minimum high school GPA of 3.80; minimum SAT (or equivalent) scores of 1400.
  - c. Indication on the UW freshman application of chemical engineering as the student's first choice of major.
2. *Early Admission*
  - a. *Course requirements*: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; PHYS 121; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.
  2. *Credit requirements*: Applicants must be completing their freshman year at the UW and must have completed a minimum of 15 credits taken in residence at the UW.
  - c. *Grade requirements*: A minimum grade of 2.0 in each prerequisite course and a minimum GPA of 2.50.

3. *Upper-Division Admission*
  - a. *Course requirements:* MATH 124, MATH 125, MATH 126, MATH 307 (18 credits); CHEM 142, CHEM 152, CHEM 162, CHEM 223 or CHEM 237 (19); PHYS 121, PHYS 122, PHYS 123 (15), CSE 142 (4), CHEM E 260 (4); and one 5-credit English composition course. In addition, it is strongly recommended that students complete CHEM 224 or CHEM 238.
  - b. *Credit and grade requirements:* 75 credits completed by July 1 application deadline, with a minimum overall 2.50 GPA and minimum 2.0 in all courses required for admission.
  - c. Students with a GPA lower than 2.50 for these specified courses or an overall GPA lower than 2.50 for all courses applicable to the B.S.Ch.E. degree seldom succeed in the department. Historically, a GPA of 2.80 or higher in these categories is required for admission to and success in the department.
4. Factors included in the admission decision include the course record as indicated above and qualitative considerations such as difficulty of completed courses, frequency of incomplete or withdrawal grades, number of repeated courses, applicable work experience and maturity of attitude, record of honors, a demonstrated ability to take at least 12 credits per quarter, and special circumstances disclosed by the applicant.

Students may also declare into the Chemical Engineering degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

### Graduation Requirements

180 credits, as follows:

#### General Education Requirements (108 credits)

1. *Written and Oral Communications (12 credits):* One 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).
2. *Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (24 credits):* A minimum of 10 credits required in each area.
3. *Natural World (72 credits)*
  - a. *Physics (15 credits):* PHYS 121, PHYS 122, PHYS 123
  - b. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 309 (or MATH 390 or IND E 315)
  - c. *Chemistry (33 credits):* CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 455, CHEM 457, CHEM 461

#### Major Requirements (68 credits)

1. *Engineering Fundamentals (8 credits):* CHEM E 260; CSE 142
2. *Chemical Engineering Core Courses (44 credits):* CHEM E 310, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. *Engineering Elective Courses (16 credits)*

#### Unspecified Electives (4 credits)

A minimum GPA of 2.00 in core chemical engineering courses, based on the first time each course is taken, is required for graduation.

Many engineers design new equipment and processes or design modifications to them. The design experience is integrated throughout the curriculum, with open-ended problems (sometimes involving economic constraints) in several courses: design of heat exchangers (CHEM E 340) and distillation towers (CHEM E 435), design of piping and pumping systems (CHEM E 330), design of chemical reactors (CHEM E 465). The design experience culminates in two capstone design courses (CHEM E 485 and CHEM E 486 or CHEM E 497) which involve the design of an integrated chemical system. An optional 9-credit specialty area allows each student to develop special competence in a selected subject by taking a minimum of three courses in that area. Engineering and free electives may be used for this purpose. The areas are biotechnology; fuel cells and energy; polymers, composites, colloids, and interfaces; computers applied to chemical engineering; environmental engineering; and nuclear engineering.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The B.S.Ch.E. program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700.

Chemical engineering graduates possess knowledge (including safety and environmental aspects) of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; and process design.

They also gain ability to apply knowledge of mathematics, science, and engineering; ability to design and conduct experiments, as well as to analyze and interpret data; ability to design a system, component, or process to meet desired needs; ability to function on multidisciplinary teams; and ability to identify, formulate, and solve engineering problems. They also possess an understanding of professional and ethical responsibility; an ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; a knowledge of contemporary issues; and an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

- \* *Instructional and Research Facilities:* The chemical engineering building, Benson Hall, contains classrooms, offices, stockrooms, computer rooms, machine and electronics shops, and laboratories. The Unit Operations Lab holds a variety of experiments designed to give undergraduate students the experience of using real chemical process equipment and to deepen their understanding of chemical engineering fundamentals of fluid flow, heat transfer, separation processes, and reactor behavior. Departmental computer facilities include a network of PCs located in a keyed room for the exclusive use of chemical engineering students. Ten of these machines have hardware for computer data acquisition (to collect experimental data and support experiments on process automation). All have fast connections to the Internet and to larger UW computers.

- \* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- \* *Research, Internships, and Service Learning:* Students are encouraged to participate in internships, which are generally facilitated through the Engineering Co-op Office.

- \* *Department Scholarships:* The department awards 20-25 full-tuition scholarships per year. Application deadline is April 1.

- \* *Student Organizations/Associations:* The undergraduates in the department run a dynamic chapter of the American Institute of Chemical Engineers.

#### Of Special Note:

Entrance into most chemical engineering courses is ordinarily limited to majors in chemical engineering and paper science. Other students who wish to take departmental courses must meet the prerequisites and obtain instructor approval (except for CHEM E 485 and CHEM E 486, which are open to majors only).

## Graduate Program

Graduate Program Coordinator  
105 Benson, Box 351750  
206-543-2250  
grad.admissions@cheme.washington.edu

The department offers studies leading to the degrees of Doctor of Philosophy, Master of Science in Chemical Engineering, and Master of Science in Engineering. The doctoral degree is centered on the dissertation with a foundation in coursework; it is generally completed in four to five years beyond the baccalaureate degree. In the master's program primary emphasis is placed on coursework, and the degree generally requires 21 months of study. Thesis and non-thesis options are available.

The program of study includes basic subjects of importance to all chemical engineers, such as thermodynamics, transport phenomena, kinetics, and applied mathematics. In addition, students are invited to take more-specialized courses in chemical engineering or in other departments. Students usually take three courses during their first quarter. In subsequent quarters, less time is spent on coursework, and more on research and independent study.

The department has about seventy full-time graduate students, most of whom are working toward a doctorate. They study and collaborate with

faculty members in an atmosphere that is informal, friendly, and intellectually vigorous. Faculty interests are broad, so students become familiar with a variety of areas while receiving individual guidance in a specialty.

## Master of Science in Chemical Engineering

### Admission Requirements

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements. To be competitive, applicants must be:

- \* Highly ranked (top 10%) in a respected chemical engineering program.
- \* Score at least 750 on the quantitative portion of the GRE.
- \* Score at least 600 (paper-based), 250 (computer-based), or 70 (Internet-based, not including speaking score) on the TOEFL, if an International applicant.

### Degree Requirements

#### Thesis Option

39 credits, to include as follows:

- \* At least 18 credits in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Numerical grades must be received for at least 18 credits of coursework. These must be 500-599 or approved 400-level courses. They must include five courses from at least four of the following five categories. (The courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
    - o *Math/Computer/Statistics*: CHEM E 481 (3), CHEM E 482 (3), CHEM E 510 (4), CHEM E 512 (3), CHEM E 575 (3), CHEM E 526 (3, max. 9), STAT 421 (4)
    - o *Thermodynamics*: CHEM E 455 (1/3, max. 3), CHEM E 525 (4), CHEM E 526 (3), CHEM E 552 (3)
    - o *Transport Phenomena*: CHEM E 530 (4), CHEM E 531 (3), M E 533 (3), M E 534 (3)
    - o *Reaction Phenomena*: CHEM E 461 (3), CHEM E 560 (3), CHEM E 564 (3), CHEM E 565 (3)
    - o *Materials and Biotech*: CHEM E 467 (3), CHEM E 554 (3), CHEM E 558 (3), CHEM E 570 (3, max. 6), CHEM E 590 (3)
- Approved 400-level courses presented for the 18 graded credits include 400-level CHEM E courses not required for the B.S. degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.
- \* A minimum cumulative GPA of 3.00 in the graduate program.
  - \* At least 30 credits must be taken at the UW.
  - \* Submit a thesis describing original research. At least 9 credits of thesis credits are required (CHEM E 700).
  - \* Pass a Final Exam consisting of an oral presentation of the thesis.
  - \* Serve as TA for at least one quarter.

#### Non-Thesis Option

The non-thesis allows a student to receive graduate-level training with the primary focus on coursework. The degree requirements can be completed in four quarters (completion in three is possible).

39 credits to include, as follows:

- \* At least 18 credits in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Numerical grades must be received for at least 18 credits of coursework. These must be 500-599 or approved 400-level courses. They must include five courses from at least four of the following five categories. (The courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
  - o *Math/Computer/Statistics*: CHEM E 481 (3), CHEM E 482 (3), CHEM E 510 (4), CHEM E 512 (3), CHEM E 575 (3), CHEM E 526 (3, max. 9), STAT 421 (4)
  - o *Thermodynamics*: CHEM E 455 (1/3, max. 3), CHEM E 525 (4), CHEM E 526 (3), CHEM E 552 (3)
  - o *Transport Phenomena*: CHEM E 530 (4), CHEM E 531 (3), M E 533 (3), M E 534 (3)

- o *Reaction Phenomena*: CHEM E 461 (3), CHEM E 560 (3), CHEM E 564 (3), CHEM E 565 (3)
- o *Materials and Biotech*: CHEM E 467 (3), CHEM E 554 (3), CHEM E 558 (3), CHEM E 570 (3, max. 6), CHEM E 590 (3)

Approved 400-level courses presented for the 18 graded credits include 400-level CHEM E courses not required for the B.S. degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.

- \* A project consisting of at least 6 credits of CHEM E 600 (i.e., with a numerical grade of 2.7 or above, or an S grade). A member of the Chemical Engineering graduate faculty must supervise and grade the work. A written report is required.
- \* Thesis research (i.e., CHEM E 700 or 800) cannot count toward the 39 credits.
- \* A minimum cumulative GPA of 3.00 in the graduate program.
- \* At least 30 credits must be taken at the UW.
- \* A Final Exam consisting of an oral presentation of the CHEM E 600 project.

## Master of Science in Engineering

### Admission Requirements

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

To be competitive, applicants must be:

- \* Highly ranked (top 10%) in a respected chemical engineering program.
- \* Score at least 750 on the quantitative portion of the GRE.
- \* Score at least 600 (paper-based), 250 (computer-based), or 70 (internet-based, not including speaking score) on the TOEFL, if an International applicant.

### Degree Requirements

The requirements are the same as for the M.S.Ch.E. thesis option, except that the research adviser considers the student's background and research objectives and tailors the course requirements accordingly (subject to Graduate Program Coordinator approval). Relative to the M.S.Ch.E. options, usually less emphasis is on chemical engineering, more on engineering science and related subjects.

## Doctor of Philosophy

### Admission Requirements

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

To be competitive, applicants must be:

- \* Highly ranked (top 10%) in a respected chemical engineering program.
- \* Score at least 750 on the quantitative portion of the GRE.
- \* Score at least 600 (paper-based), 250 (computer-based), or 70 (internet-based, not including speaking score) on the TOEFL, if an International applicant.

### Degree Requirements

90-108 credits, as follows:

- \* *Minimum Graduate School Requirements*: Satisfy Graduate School minimum requirements, summarized below. NOTE: Graduate School policy imposes the requirements in force at the time of graduation (not at the time of program entry).
  - o Complete at least 18 credits of courses numbered 500-600 at the University of Washington.

- o Complete at least 18 numerically graded credits of 400- and 500-level UW courses prior to the General Examination. Any 400-level courses must have departmental approval.
- o Complete a minimum of 90 credits, at least 60 of which are UW credits.
- o Compile a minimum of 27 dissertation credits (CHEM E 800) over a period of at least three quarters. With the exception of summer, students may take a maximum of 10 dissertation credits per quarter.
- o Maintain a minimum cumulative GPA of 3.00.
- o Pass the General Examination.
- o Pass the Final Examination (includes approval of the dissertation by the student's supervisory committee).
- o Maintain full- or part-time graduate student registration at the UW for the quarter in which the above examinations are completed and the degree is conferred.
- o Complete all work for the doctoral degree within ten years.
- \* Students with a chemical engineering undergraduate degree: In addition to the requirements listed above, doctoral students must:
  - o Complete the non-thesis M.S.Ch.E. degree prior to the General Examination. (Students with an M.S. in chemical engineering from another university may petition the Graduate Program Coordinator for an exemption.)
  - o Serve as a TA for at least three quarters. Students should plan on one quarter per year in years 2-4.
  - o Complete at least six graded courses numbered 500-599 or approved 400-level courses to satisfy the following:
    - + Five courses from at least four of the following five categories. (Courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
      - \* *Math/Computer/Statistics*: CHEM E 481 (3), CHEM E 482 (3), CHEM E 510 (4), CHEM E 512 (3), CHEM E 575 (3), CHEM 526 (3, max. 9), STAT 421 (4)
      - \* *Thermodynamics*: CHEM E 455 (1/3, max. 3), CHEM E 525 (4), CHEM E 526 (3), CHEM 552 (3)
      - \* *Transport Phenomena*: CHEM E 530 (4), CHEM E 531 (3), M E 533 (3), M E 534 (3)
      - \* *Reaction Phenomena*: CHEM E 461 (3), CHEM E 560 (3), CHEM E 564 (3), CHEM E 565 (3)
      - \* *Materials and Biotech*: CHEM E 467 (3), CHEM E 554 (3), CHEM E 558 (3), CHEM E 570 (3, max. 6), CHEM E 590 (3)
    - + One CHEM E course in a topic outside the student's main research area.
- \* *Non-Chemical Engineering Undergraduates*: Students whose undergraduate degree is in engineering or science (e.g., B.S. in Chemistry or Materials Science) but not Chemical Engineering must pass or serve as a TA in the following courses in addition to the requirements listed in the previous section: CHEM E 330 (5), CHEM E 340 (4), CHEM E 435 (4), CHEM E 465 (4), CHEM E 485 (4)

Students lacking a strong background in thermodynamics are advised (but not required) to take CHEM E 326 (4) prior to attempting CHEM E 525 (4). It is possible to take some graduate courses while completing the required undergraduate courses.

## Research Facilities

The department is fortunate to have outstanding facilities. Benson Hall contains classrooms, offices, stockrooms, a machine shop, laboratories, and a variety of specialized research equipment. Each graduate student is provided desk space in a small laboratory or office as well as access to larger laboratories in the building. Students also may use the services of the Academic Computer Center, instrument-making shops, research centers (e.g., biomaterials, nanotechnology, chemical analysis), and the Chemistry and Engineering Libraries.

## Financial Aid

The department has various sources of support for qualified graduate students. Those interested in applying for admission and support should visit the department's Web site at [www.cheme.washington.edu](http://www.cheme.washington.edu), which provides details on application procedures. Offers of admission with financial support are usually made in January through March.

# Civil and Environmental Engineering

201 More  
[www.ce.washington.edu](http://www.ce.washington.edu)

Civil and environmental engineering is a profession which interfaces closely with society in the planning, design, construction, and management of facilities serving the needs of people. These activities focus on: transportation infrastructure and construction; heavy construction; water resources, hydrology, and environmental fluid mechanics; structures, mechanics, and geotechnical engineering; wastewater treatment, and water-quality management; solid- and hazardous-waste disposal; and air quality management.

A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The work frequently provides close associations with the legal profession, urban and regional planners, economists, public officials, biologists, chemists, financial consultants, architects, and system analysts. Education and practice require a consideration not only of the technological-science aspects of a particular problem but also of its relationship to social, economic, political, and environmental constraints. Civil and environmental engineers create and maintain infrastructure in a heavily human-influenced ecosystem.

To accommodate these wide interests, the department is organized into six academic areas: construction engineering; transportation engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and water resources, hydrology, and environmental fluid mechanics.

## Undergraduate Program

Adviser  
 201 More, Box 352700  
 206-543-5092  
[ceadvice@u.washington.edu](mailto:ceadvice@u.washington.edu)

The Department of Civil and Environmental Engineering offers the following program of study:

- \* The Bachelor of Science in Civil Engineering degree

The B.S.C.E. degree is appropriate for students interested in civil and environmental engineering. The B.S.C.E. program is accredited by the Engineering Accreditation Commission of ABET (Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, Tel: 410-347-7700).

## Bachelor of Science in Civil Engineering

*Suggested First- and Second-Year Courses*: MATH 124, MATH 125, MATH 126, MATH 308; CHEM 142; PHYS 121, PHYS 122; AMATH 301 (preferred) or CSE 142; A A 210; CEE 220; M E 230; English composition.

## Department Admission Requirements

Students typically apply during the sophomore year for admission in the junior year. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; application deadline is July 1. Applications are accepted through the College of Engineering online application form. For more information, see information for prospective students on the department Web site.

1. *Course Requirements*: MATH 124, MATH 125, MATH 126, MATH 308; CHEM 142; PHYS 121, PHYS 122; AMATH 301 or CSE 142 (AMATH 301 strongly recommended); AA 210; CEE 220; M E 230; and 5 credits of English composition.
2. *Grade Requirements*: Minimum grade of 2.0 in each course and a minimum cumulative GPA of 2.50.

Students may also declare into the Civil and Environmental Engineering degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements). The department also admits a

small number of qualified freshmen directly into the major through its Freshman Direct Admission program (see the department Web site for additional information).

## Graduation Requirements

180 credits as follows:

### General Education Requirements (85-87 credits)

1. *Written and Oral Communication (8 credits)*: English composition (5); TC 231 (3)
2. *Visual, Literary, and Performing Arts (VLPA) and Individuals & Societies (I&S) (24 credits)*: A minimum of 10 credits in VLPA and a minimum of 10 credits of I&S plus 4 additional credits in either area.
3. *Economics (4-5 credits)*: ECON 200 or IND E 250. ECON 200 may also be applied toward the I&S requirement. IND E 250 may also be applied toward the requirement for an additional Engineering Fundamentals course.
4. *Natural World (49-50 credits)*
  - a. *Mathematics (21 credits)*: MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352)
  2. *Statistics (3-4 credits)*: IND E 315 (preferred) or STAT 390
  3. *Science (25 credits)*: CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

### Major Requirements (94 credits)

1. *Engineering Fundamentals (19 credits)*: AMATH 301 or CSE 142, AA 210, CEE 220, and ME 230. Students who complete STAT 390 must complete an additional Engineering Fundamentals course from CHEM E 260, IND E 250, IND E 280, M E 123, or MSE 170. Students who complete IND E 315 must complete either an additional Engineering Fundamentals course from the above list, or an additional 300-level math course other than statistics.
2. *Civil Engineering Core (45 credits)*: CEE 306, CEE 316, CEE 320, CEE 342, CEE 345, CEE 350, CEE 363, CEE 366, CEE 379, CEE 380, CEE 390, CEE 391, CEE 392
3. *Professional Practice and Capstone Design (6 credits)*: CEE 440 and one course from CEE 441, CEE 442, CEE 444, or CEE 445. Minimum grade of 2.0 required for both courses in this two-course sequence.
4. *Civil Engineering Technical Electives (15 credits)*: A minimum of 12 credits of CEE 400-level coursework selected from an approved list, with at least one core course from four separate areas of concentration within the department. Plus any additional CEE 400-level course (except CEE 423 and courses taken to fulfill requirement c, above). Minimum grade of 2.0 required for each of the four courses used to fulfill the core courses requirement.
5. *Upper-Division Engineering and Science (9 credits)*: Choice of additional CEE 400-level courses or courses from an approved list from outside the department.
6. *Grade Requirements*: Minimum 2.00 GPA in all engineering courses with no grade below 1.0 in these courses.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: The B.S.C.E. program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700.

To fulfill its instructional mission, the undergraduate program is based on specific educational objectives. In particular, upon completion of the undergraduate program our students will have:

1. demonstrated proficiency in applying fundamental mathematical, scientific, and engineering principles in formulating and solving civil engineering problems;
2. demonstrated sufficient mastery of core civil engineering topics suitable for entry into the profession and/or for graduate study;
3. gained significant experience in designing systems and components in civil and environmental applications in both individual and team contexts;
4. acquired up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation;
5. developed an understanding of professional and social issues suitable for participation and leadership in their communities.
6. developed the capacity to think critically and communicate effectively to a broad audience through a foundation in the humanities and sciences offered through the University.

Achieving the above program objectives requires a series of measurable outcomes consistent with the program objectives as well as the mission of the department, college, and University. The department has adopted the ABET Criterion 3 Program Outcomes as its own program outcomes, and has augmented them to include outcomes based on the required ASCE Curriculum Program Criteria. The resulting program outcomes are that students have:

1. an ability to apply knowledge of mathematics, science, and engineering
2. an ability to design and conduct experiments, as well as to analyze and interpret data
3. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
4. an ability to function on multi-disciplinary teams
5. an ability to identify, formulate, and solve engineering problems
6. an understanding of professional and ethical responsibility
7. an ability to communicate effectively
8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
9. a recognition of the need for, and an ability to engage in life-long learning
10. a knowledge of contemporary issues
11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice
12. proficiency in mathematics through differential equations, probability and statistics, calculus-based physics, and general chemistry
13. proficiency in a minimum of four recognized major civil engineering areas
14. an understanding of professional practice issues such as procurement of work, bidding versus quality-based selection processes, how the design professionals and the construction professions interact to construct a project
15. an understanding of the importance of professional licensure and continuing education

- \* *Instructional and Research Facilities*: The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental science and hazardous waste research laboratory facilities include more than 7,000 square feet of lab space, well equipped with sophisticated research instruments, including state-of-the-art analytical capability for trace organic compounds. The lake-stream laboratory is equipped with limnological equipment, as well as an autoanalyzer, bench-top incubators, and research microscopes. The structural research laboratory contains an earthquake simulator, a modern MTS testing system, and a 2.4 million pound capacity Baldwin universal hydraulic testing machine. The geotechnical engineering laboratory contains soil testing equipment, including triaxial testing devices, a computer-controlled GDS pressure control system, a Bishop-Wesley cell, a recently developed cuboidal shear device, a CKC cyclic triaxial device, and a SBEL (Stokoe) resonant column.

- \* *Honors Options Available*: With College Honors. With Distinction (Departmental Honors). See adviser for requirements.

- \* *Research, Internships, and Service Learning*: Students typically work at internships in private companies and government agencies in the summer after their junior year, with some part-time internships continuing during the academic year. Many companies advertise internship and job openings through the department and meet with students for on-campus recruiting sessions.

- \* *Department Scholarships*: The department offers numerous annual scholarships. The application deadline for departmental scholarships is April 1. For more information, see department Web site. Scholarships are also available through the College of Engineering, the UW Scholarship Office, and external sources, including professional associations and industry.

- \* *Student Organizations/Associations*: American Society of Civil Engineers. Chi Epsilon, national honor society for civil engineering undergraduate and graduate students. See adviser for details.

## Graduate Program

Graduate Program Coordinator  
201 More, Box 352700  
206-543-2574

The Department of Civil and Environmental Engineering offers programs of study leading to the degrees of Master of Science in Civil Engineering (M.S.C.E.) and Doctor of Philosophy. The department also provides authorized options leading to the College-wide Master of Science (M.S.) and Master of Science in Engineering (M.S.E.) degrees.

The three master's programs are intended to accommodate the needs of three categories of students: the M.S.C.E. degree is for those who have completed an undergraduate degree in civil engineering and plan to continue with their professional training; the College-wide M.S.E. degree is for other engineering graduates who wish to do graduate work in civil and environmental engineering; and the College-wide M.S. degree is for those whose bachelor's degree is not in engineering, but who desire to apply their training in science to the solution of problems in some specific sector related to civil and environmental engineering. The non-engineer may be required to take additional course work to obtain an M.S.E. degree.

Graduate work is offered in most fields of civil and environmental engineering, including transportation and construction engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and water resources, hydrology, and environmental fluid mechanics.

### Master of Science in Civil Engineering

#### Admission Requirements

Priority for admission is based on an applicant's apparent ability to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance; usually, at least a "B" or 3.00 GPA in the junior and senior years is required. Consideration is also given to Graduate Record Examination scores and other information.

*Graduate Online Programs:* The Department of Civil and Environmental Engineering, in collaboration with the Department of Construction Management in the College of Urban Planning and Architecture, offers an online master's degree program in construction engineering. Designed for working professionals, this program can be completed entirely online and at the student's own pace. Areas covered include heavy construction project management, infrastructure construction, and qualitative construction management. Each of these areas may also be completed separately as part of a graduate-level certificate program. For more information on the master's degree in construction engineering or construction engineering certificates, see [www.outreach.washington.edu/cenr/about.asp](http://www.outreach.washington.edu/cenr/about.asp)

#### Degree Requirements

42 credits, as follows:

Three options are available -- thesis, non-thesis, and internship. All three options allow for strong flexibility in coursework so that the student may individualize the coursework to an area of research, determined in conjunction with the faculty adviser.

- \* *Thesis option:*
  - o 30 credits of coursework with at least 15 credits at the 500 level
  - o 3 credits (maximum) of CEE 500
  - o 9 credits of master's thesis, CEE 700
- \* *Non-thesis option:*
  - o 36 credits of coursework with at least 18 credits at the 500 level
  - o 3 credits (maximum) of CEE 500
  - o 3 credits (maximum) of CEE 600 with a minimum grade of 3.0
- \* *Internship option:*
  - o 30 credits of coursework with at least 15 credits at the 500 level
  - o 3 credits (maximum) of CEE 500
  - o 3 credits (maximum) of CEE 600 with a minimum grade of 3.0
  - o 6 credits of internship, CEE 601

### Doctor of Philosophy

#### Admission Requirements

Priority for admission is based on an applicant's apparent ability to progress satisfactorily in a research-based graduate degree program. The

applicant's scholastic record is of major importance; usually, at least a "B" or 3.00 GPA in the junior and senior years is required. Consideration is also given to Graduate Record Examination scores and other information.

#### Degree Requirements

90 credits, as follows:

- \* Students with a master's degree from outside the U.W. or from outside the CEE department or Ph.D. topic area:
  - o Master's degree credit waiver (30 credits)
  - o Numerically graded credits (30 credits)
  - o Dissertation (27 credits)
  - o CEE seminar (3 credits)
- \* Students with UW CEE master's degree in Ph.D. topic area:
  - o Numerically graded credits from master's degree plus Ph.D. graded credits (63 credits)
  - o Dissertation (27 credits)

With the approval of the department, an appropriate master's degree from an accredited institution may be applied towards 30 of the 90 quarter credits.

Because the degree is a research-based degree, course requirements are individualized depending on student's background and Ph.D. topic area.

#### Financial Aid

Research and teaching assistantships are available on a competitive basis. The number of positions depends upon the current level of funding. Additionally, there are a limited number of fellowships, scholarships, and traineeships.

#### Research Facilities

More Hall has structural, concrete, bituminous materials, soil mechanics, computer, water-quality, solid-wastes, and air-quality laboratories as well as an air-monitoring station and equipment for fieldwork in the construction, water, air, and solid-waste programs. Facilities for experimental studies in hydraulics and environmental fluid mechanics are located in the Harris Hydraulics Laboratory.

---

## Computer Science and Engineering

AC101 Paul G. Allen Center for Computer Science and Engineering  
[www.cs.washington.edu](http://www.cs.washington.edu)

Computer science is the study of information and algorithms within the context of real and abstract computing devices. Computer scientists are interested in such topics as the representation and storage of information; algorithms to access, display, edit, and transform information; programming languages to express algorithms; and hardware and software processors to execute algorithms. These concerns lead to practical developments in computer systems software, such as operating systems and compilers; in application areas, such as artificial intelligence, computer graphics, and computational biology; and also to theoretical investigations of computers, algorithms, and data.

Computer engineering is a closely related field concerned with the design and practical application of computer hardware and software systems to the solution of technological, economic, and societal problems. The computer engineer analyzes a problem and selects from a variety of tools and technologies those most appropriate for its solution. A computer engineer can expect to be involved in hardware design, software creation, and systems integration.

### Undergraduate Program

Adviser  
101 Paul G. Allen Center for Computer Science and Engineering, Box 352350  
206-543-1695  
[ugrad-advisor@cs.washington.edu](mailto:ugrad-advisor@cs.washington.edu)

The Department of Computer Science and Engineering offers the following programs of study:

- \* The Bachelor of Science in Computer Engineering degree
- \* The Bachelor of Science degree with a major in computer science (see Computer Science section)

The core requirements of the two undergraduate majors are identical. The computer engineering major may be more appropriate for students who are interested in creating and building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints. The program includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole.

The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program (for example, mathematics or economics), who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the theory, design, and implementation of software systems and applications (for example, the techniques of modern compilers or the algorithms behind computer graphics and animation).

## Bachelor of Science in Computer Engineering

*Suggested First- and Second-Year College Courses:* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CSE 142, CSE 143; English composition.

### Department Admission Requirements

Applicants are considered in three groups -- Direct Admission, Accelerated Admission, and Upper Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission.

1. **Direct Admission:** Computer Science and Engineering enrolls up to 20 percent of its incoming class directly out of high school, prior to completion of university-level prerequisites. Freshman applicants to the University listing Computer Science or Computer Engineering as their intended major are automatically considered. Competitive applicants will have taken calculus and at least one year of laboratory science (preferably physics) upon entering the University. Admission is for autumn quarter only.
2. **Accelerated Admission:** Intended as a fast track into the Computer Science and Engineering department for matriculated students who have excelled in the CSE introductory courses.
  - a. **Course Requirements:** CSE 142 or equivalent, CSE 143. At least 5 additional credits toward the Computer Science Upper Division Admission course requirements.
  - b. **Other Requirements:** Completion of at least 15 credits at the UW. 3.00 cumulative GPA. Competitive applicants for Accelerated Admission typically have received a high grade in CSE 143 at the UW on their first attempt.
  - c. Admission is considered for any quarter.
3. **Upper Division Admission**
  - a. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); at least five credits of Natural World, including one of the following: PHYS 121 or CHEM 142/CHEM145 (or any approved science course that requires PHYS 121 or CHEM 142/CHEM 145 as a prerequisite; CSE 142, CSE 143; and at least five credits of English composition. In addition to any AP credit, at least one calculus or post-calculus mathematics course and one approved Natural World courses must be completed prior to applying to the department.
  - b. Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.

Students may also declare into the Computer Engineering degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

## Graduation Requirements

180 credits as follows:

### General Education Requirements (81-84 credits)

1. **Written and Oral Communication (12 credits):** 5-credit course in English composition from the University-approved list; T C 231; T C 333, or department-approved alternative.
2. **Visual, Literary, and Performing Arts (VLPA) and Individuals and Societies (I&S) (30 credits):** A minimum of 10 credits in each required area.
3. **Natural World (39-42 credits):**
  - a. **Mathematics (19-22 credits):** MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken); MATH/STAT 390 or STAT 391 (or STAT 394, STAT 395).
  - b. **Science (20 credits):** PHYS 121, PHYS 122, and 10 additional credits from the list of approved natural science courses in the CS&E Handbook. Courses that meet the department's science requirement include any course in biology, chemistry, physics, earth and space sciences, astronomy, or atmospheric sciences that requires PHYS 121 or CHEM 142/CHEM 145 as a prerequisite.

### Major Requirements (74-75 credits)

1. **Required Courses (47 credits):** CSE 142, CSE 143, CSE 303, CSE 321, CSE 322, CSE 326, CSE 341, CSE 370, CSE 378, CSE 451, CSE 461; E E 215
2. Either a hardware or a software specialization
  - a. **Hardware Specialization (28 credits):** E E 233; CSE 466, CSE 467; CSE 471; 5-credit course chosen from the list of CSE hardware capstone courses in the CS&E Handbook; and 6 credits from courses on the approved computer engineering senior elective course list in the CS&E Handbook.
  - b. **Software Specialization (27 credits):** CSE 403; 18 credits from the approved computer engineering senior elective course list in the CS&E Handbook, including at least three courses from CSE 401, CSE 421, CSE 444, CSE 466, CSE 471, CSE 484; 5 credit course chosen from the list of CSE software capstone courses in the CS&E Handbook.
3. Minimum 2.0 grade for any course applied to the major. Transfer students must earn a minimum of 24 graded credits toward the major at the UW.

### Free Electives (21-25 credits)

## Student Outcomes and Opportunities

- \* **Learning Objectives and Expected Outcomes:**
  - a. **Engineering Quality:** Graduates will engage in the productive practice of computer engineering to identify and solve significant problems across a broad range of application areas.
  - b. **Leadership:** Graduates will engage in successful careers in industry, academia, and public service, providing technical leadership for their business, profession and community.
  - c. **Economic Impact:** Graduates will enhance the economic well-being of Washington State through a combination of technical expertise, leadership and entrepreneurship.
  - d. **Lifelong Learning:** Graduates will adapt to new technologies, tools and methodologies to remain at the leading edge of computer engineering practice with the ability to respond to the challenges of a changing environment.

The computer engineering undergraduate degree is housed in the College of Engineering and is thereby accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. The department has adopted the following student outcomes. Upon graduation from the computer engineering program, students will have:

1. An ability to apply knowledge of mathematics, science, and engineering
2. An ability to design and conduct experiments, as well as to analyze and interpret data
3. An ability to design a computing system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
4. An ability to function on multi-disciplinary teams
5. An ability to identify, formulate, and solve computer engineering problems

6. An understanding of professional and ethical responsibility
7. An ability to communicate effectively
8. The broad education necessary to understand the impact of computer engineering solutions in a global, economic, environmental, and societal context
9. A recognition of the need for, and an ability to engage in life-long learning
10. Knowledge of contemporary issues
11. An ability to use the techniques, skills, and modern computer engineering tools necessary for engineering practice.
12. Knowledge of probability and statistics
13. Knowledge of discrete mathematics

\* *Instructional and Research Facilities:* In autumn 2003 the department moved to the new state-of-the-art Paul G. Allen Center for Computer Science and Engineering. The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

CSE general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. CSE special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center is one of the finest computer science and computer engineering facilities in the nation. All of its capabilities are available to all CSE students.

\* *Honors Options Available:* With College Honors. With Distinction (Department Honors). See adviser for requirements.

\* *Research, Internships, and Service Learning:* Internships and co-op opportunities are available for computer science undergraduates. See [www.engr.washington.edu/coop](http://www.engr.washington.edu/coop) and [careers.washington.edu](http://careers.washington.edu) for information.

\* *Departmental Scholarships:* CSE has a limited number of scholarships available to current CSE majors. Scholarship information is listed at [www.cs.washington.edu/education/ugradscholars/scholarships.html](http://www.cs.washington.edu/education/ugradscholars/scholarships.html).

\* *Student Organizations/Associations:* A student chapter of the Association for Computing Machinery (ACM) operates within CSE. The ACM helps to coordinate new student orientations, research nights, technical talks, and various tutorials.

## Graduate Program

Graduate Program Coordinator  
AC101 Paul G. Allen Center for Computer Science and Engineering, Box 352350  
206-543-1695  
[grad-admissions@cs.washington.edu](mailto:grad-admissions@cs.washington.edu)

The Department of Computer Science and Engineering offers programs of study leading to the degrees of Master of Science and Doctor of Philosophy. Students can pursue full-time graduate study leading to a Ph.D. with an integrated M.S. Students can also pursue part-time graduate study in the evening, leading to an M.S. Programs are designed to provide considerable breadth of knowledge, as well as depth in an area of specialization.

The department has 40 faculty and is authorized to grow over the next few years. In addition, there are nearly 40 adjunct, affiliate and emeritus faculty members. The faculty is currently conducting research in the following areas: embedded systems and reconfigurable computing; computer architecture; networking; operating systems and distributed systems; programming systems; information retrieval, database systems, and intelligent Internet systems; software engineering; computer graphics, vision, and animation; human interface to computing; artificial intelligence; theory of computation; and computing and biology.

## Master of Science

### Degree Requirements

40 credits, as follows:

- \* *Non-Thesis Option:*
  - o Of the 40 credits required, 20 credits must be in courses numbered 500 or above, 30 credits must be in CSE courses, and 10 credits may be in one or more supporting fields.
  - o Satisfactorily pass an M.S. Qualifying Evaluation. The faculty as a whole assesses whether the student has satisfactorily completed a breadth requirement and an independent project requirement as described below.
  - o A breadth requirement, satisfied through coursework. The required course list may change from time to time to reflect changes in the curriculum and faculty research interests. Students may choose to meet the requirements in place when they were admitted. Students must take one course in each of the four groups below and one additional course from two of the groups (18 credits) for graded credit (a waiver is possible for graduate courses taken elsewhere):
    - + Either CSE 521 (3), CSE 525 (3), or CSE 531 (3)
    - + Either CSE 548 (3), CSE 551 (3), CSE 561 (3), or CSE 567 (3)
    - + Either CSE 501 (3), CSE 503 (3), CSE 505 (3), or CSE 544 (3)
    - + Either CSE 510 (3), CSE 546 (3), CSE 557 (3), CSE 573 (3), or CSE 576 (3)
  - + Two additional courses from two of the groups above
  - o An independent project completed under the supervision of a primary and a secondary faculty adviser. A written summary and an oral presentation are required.
- \* *Thesis option:*
  - o 9 credits CSE 700, Master's Thesis
  - o Of the 31 remaining credits,
    - + At least 16 credits must be in courses numbered 500 or above
    - + 24 credits must be CSE courses
    - + 7 credits may be in one or more supporting fields such as: engineering, mathematics, natural sciences, business administration, linguistics, philosophy, psychology, or medicine.
  - o *Thesis:* Preparation of a written thesis acceptable to a CSE Supervisory Committee and satisfactorily passing an oral examination on the thesis work.

## Professional Master's Program

### Degree Requirements

To satisfy the requirements of the Professional Master's Program (PMP), students must successfully complete eight 4-credit PMP courses (determined in consultation with an adviser) and other courses providing 8 additional credits. The additional credits may be earned through participation in the department's colloquium series, which features leading-edge researchers and developers in computer science from around the world. This series airs throughout the Puget Sound region on UWTV and is available live and archived on the Internet. Students who take one course per quarter, plus 1 credit of colloquium, complete the program in two-and-a-half years.

## Doctor of Philosophy

90 credits, to include:

- \* Satisfactorily passing a Ph.D. Qualifying Evaluation. The faculty as a whole assesses whether the student has satisfactorily completed a breadth requirement and an independent project requirement as described below.
  - o A breadth requirement satisfied through coursework. The required course list may change from time to time to reflect changes in the curriculum and faculty research interests. Students may choose to meet the requirements in place when they were admitted. Students are required to take one course from each of the four groups below and one additional course from two of the groups (18 credits) for graded credit (a waiver is possible for graduate courses taken elsewhere):
    - + Either CSE 521 (3), CSE 525 (3), or CSE 531 (3)
    - + Either CSE 548 (3), CSE 551 (3), CSE 561 (3), or CSE 567 (3)
    - + Either CSE 501 (3), CSE 503 (3), CSE 505 (3), or CSE 544 (3)
    - + Either CSE 510 (3), CSE 544 (3), CSE 546 (3), CSE 557 (3), CSE 573 (3), or CSE 576 (3)
  - + Two additional courses from two of the groups above

- + Four additional courses taken for credit from CSE or related areas with approval.
- o An independent project completed under the supervision of two faculty advisers. A written summary and an oral presentation are required.
- \* Satisfactorily passing the General Examination. In this examination, the applicant must demonstrate depth of knowledge in a principal area acceptable to the Ph.D. Supervisory Committee.
- \* Completion of at least 90 credits of course work, at least 40 of which are to be in courses numbered 500 or above. 45 credits should be in courses chosen from the Computer Science course list. At least two CSE courses numbered 500 or above (or approved courses in related disciplines) must be taken for graded credit in addition to those courses taken to satisfy the breadth component of the qualifying evaluation. Coursework taken toward the M.S. degree is applicable toward the Ph.D. degree.
- \* Completion of two quarters of teaching assistantship within the department.
- \* Preparation of a dissertation that must be acceptable to the Supervisory Committee. Students must register for at least 27 credits of CSE 800 (Dissertation).
- \* Satisfactorily passing an oral examination on the dissertation work.

## Application Requirements

Most entering graduate students are expected to have a solid background in computer science, including programming, machine organization, data structures, discrete mathematics, automata theory, and programming systems (i.e., the equivalent of CSE 378, CSE 326, CSE 321, CSE 322, and either CSE 401 or CSE 451). Some exceptions to these requirements are made for otherwise-promising students. Graduate Record Examination scores are required. Scores should be earned within the preceding five years. The Computer Science and Engineering Graduate Program homepage for perspective students gives full details of application procedures.

Complete applications must be received by December 15 for both U.S. and international students for autumn-quarter admission.

## Assistantships

Research and teaching assistantships are available and are allocated on the basis of scholastic excellence and potential. All students accepted to the program are awarded three years of funding. Students who are applying for assistantships to start in autumn quarter should have all applications to the Graduate School and the department completed by December 15.

# Electrical Engineering

AE100R Paul Allen Center  
www.ee.washington.edu

Electrical engineering is concerned with the understanding and utilization of electricity and with providing society useful, efficient, and economic products and services. It encompasses everything from batteries and power supplies to crystal fabrication, autonomous robots, and devices that can recognize human speech. Electrical engineers design, produce, study, and operate all manner of devices and systems that use electric and electromagnetic energy. They also work on systems at the macro scale of electric power grids and at the micro scale of nanotechnology.

Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical engineering. Rapid improvements in communication technologies, computer visualization, and information access continue to have a significant impact on manufacturing, medicine, transportation, and environmental monitoring. Dramatic advances in personal communication services, digital imaging, and network hardware and software are changing the texture of everyday life for an increasing portion of the world's population.

## Undergraduate Program

Adviser  
AE 100R Paul Allen Center  
206-543-2142  
undergrad@ee.washington.edu

The Department of Electrical Engineering offers the following program of study

- \* The Bachelor of Science in Electrical Engineering degree

## Bachelor of Science in Electrical Engineering

*Suggested First- and Second-Year Courses:* MATH 124, MATH 125, MATH 126; CHEM 142; English composition; PHYS 121 (and beyond if possible). Students should start in math courses right away and follow with physics, chemistry, computer programming, etc. as soon as possible. The department publishes a sample four-year plan of study for fulfilling all degree requirements, including those to be taken during the first year, online at [www.engr.washington.edu/score/EEPlan.pdf](http://www.engr.washington.edu/score/EEPlan.pdf).

## Department Admission Requirements

Because resources are limited, students must apply for admission to the electrical engineering program. Application forms and a comprehensive booklet, *The Electrical Engineering Handbook for Undergraduates*, can be obtained from the undergraduate adviser for electrical engineering. The department classifies applicants by admission group; the specific requirements for each are described below. Admission to the department is competitive and completion of the requirements does not guarantee admission. All applicants have the right to petition and appeal the admissions decision of the department. Please see the undergraduate adviser for more information.

Applicants are considered in three groups -- Early Decision, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision.

### Early Decision

The Department of Electrical Engineering enrolls up to 10 percent of its incoming class directly out of high school, prior to the completion of University-level prerequisites. Freshman applicants to the University of Washington who list Electrical Engineering as their intended major are automatically considered. Competitive applicants will have taken or be taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

### Early Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical science plus accompanying laboratory at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or equivalent; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW. Early Admission is available autumn quarter only. Application deadline is July 1.
3. Grade requirements: Minimum 2.50 GPA in courses required for admission, and minimum 2.50 overall GPA.

### Upper-Division Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CHEM 142; 5 credits of English composition.
2. 64 credits completed by application deadline (July 1 for autumn admission; February 1 for spring admission).
3. Grade requirements: Minimum overall 2.50 GPA and minimum 2.50 GPA in courses required for admission.

Students may also declare into the Electrical Engineering degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

## Graduation Requirements

### General Education Requirements (81 credits)

1. *Written and Oral Communications:* 12 credits, to include one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).
2. Visual, Literary, and Performing Arts (VLPA), and Individuals & Societies (I&S) (25 credits): A minimum of 10 credits is required in each area.

3. *Natural World (44 credits)*:
  - a. *Mathematics (24 credits)*: MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), and MATH 324.
  - b. *Science (20 credits)*: CHEM 142; PHYS 121, PHYS 122, PHYS 123

#### Major Requirements (80-81 credits)

1. *Computer Programming (9 credits)*: CSE 142, CSE 143
2. *Electrical Engineering Core (13 credits)*: E E 215, E E 233, E E 235
3. *Electrical Engineering Pathways (21 credits minimum)*
4. *Electrical Engineering Electives (up to 24 credits)*: See adviser for list of acceptable courses. Total number of credits of the pathway and electives should total 45.
5. *Engineering Electives (10 credits)*: See adviser for list of acceptable courses.
6. *Statistics (3-4 credits)*: STAT/MATH 390 or IND E 315
7. *Grade Requirements*: Minimum 2.00 GPA in all E E courses with no grade below 1.0 in any of these courses.

#### Electives (18-19 credits)

1. *Approved Non-Electrical Engineering Electives (10 credits)*: Selected from courses listed in the departmental handbook.
2. *Free Electives (8-9 credits)*

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: The objective of the Department of Electrical Engineering at the University of Washington is to produce alumni who contribute to society and to the economic base of the region and beyond to the best of their abilities. The department recognize that its students have diverse interests and talents, and although the majority may find employment in one of the many specialties or interdisciplinary activities in industry or academe to which electrical engineers traditionally gravitate, the department also expects some of its alumni to build careers in business, law, health care, government or other professions. Regardless of the intended career, the educational objective is to see students succeed, to use the analytical discipline and problem-solving skills of their undergraduate education in creative endeavors as professionals and to avail themselves of opportunities to learn new skills and advance their careers through continuing education.

The B.S.E.E. program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:

1. An ability to apply knowledge of mathematics, science and engineering
2. An ability to design and conduct experiments, as well as to analyze and interpret data
3. An ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability
4. An ability to function on multi-disciplinary teams
5. An ability to identify, formulate and solve engineering problems
6. An understanding of professional and ethical responsibilities
7. An ability to communicate effectively
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
9. A recognition of the need for, and an ability to engage in life-long learning
10. Knowledge of contemporary issues
11. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice
12. Knowledge of probability and statistics, including applications appropriate to electrical engineering
13. Knowledge of differential equations, linear algebra, complex variables and discrete mathematics
14. Knowledge of mathematics through differential and integral calculus, basic sciences, computer science, and engineering sciences necessary to analyze and design complex electrical and electronic devices, software, and systems containing hardware and software components, as appropriate to program objectives.

- \* *Instructional and Research Facilities*: The department maintains a number of instructional and research labs to support courses and independent study activities. There are three general-purpose computing labs. Instructional labs include a large instrumentation lab supporting

numerous electronics courses; individual labs for digital design courses; a power lab to support the power/energy systems classes; and labs that support capstone design classes. Students participating in undergraduate research and independent study generally have access to the research labs of their supervising faculty member.

- \* *Honors Options Available*: With College Honors. With Distinction. See adviser for details.
- \* *Research, Internships, and Service Learning*: Many electrical engineering students participate every year in internship and co-op (cooperative education) programs. The Engineering Co-op Office is one source for companies recruiting for internship and co-op students. The Center for Career Services also lists a variety of internship opportunities.
- \* *Department Scholarships*: Many scholarships specifically for electrical engineering majors and based on merit and financial need are awarded each year. Students interested in applying for these and other College of Engineering scholarships may obtain information from the Department of Electrical Engineering Scholarship Award Committee Chair.
- \* *Student Organizations/Associations*: The Institute of Electrical and Electronics Engineers (IEEE), UW student chapter organizes social activities, workshops, field trips and other professional development opportunities. Eta Kappa Nu (HKN) is an invitation-only honor society for electrical engineering students. HKN organizes tutoring services, tutorial workshops, social activities, and community services projects.

*Of Special Note*: The departmental policy on continuation is consistent with the continuation policy of the College but also includes supplementary requirements specific to the department. Details may be obtained from the department advising office.

## Graduate Program

Graduate Program Coordinator  
 AE100R Paul Allen Center, Box 352500  
 206-543-2142  
 grad@ee.washington.edu

The Department of Electrical Engineering offers graduate programs leading to the degrees of Master of Science in Electrical Engineering (M.S.E.E.) and Doctor of Philosophy (Ph.D.). Graduate courses and research programs are offered in biosystems, circuits and network theory, computational intelligence, computer networks and distributed systems, computer architecture, digital systems, software engineering, operating systems, microprocessors, VLSI design, control systems, electromagnetics (including optics and radio science), electronic materials (including devices and micro-electronics), energy systems (including power electronics and electric drives), signal and image processing, telecommunications, and virtual reality. Numerous interdisciplinary research opportunities exist, including projects relating to bioengineering, computer engineering, and marine acoustics. The department does extensive research in coordination with the University of Washington's Applied Physics Laboratory and Washington Technology Center.

The M.S.E.E. degree may be earned in three ways, each of which requires the accumulation of 45 credits. A student may perform research and write a thesis; a student may pursue a one-quarter project as part of their studies; or a student may simply accumulate a suitable distribution of 45 credits of course work. Course work for each of the options is developed with the advice of faculty advisers as well as through the department advising staff.

For the Ph.D. degree, students must pass the departmental qualifying examination, pass an advanced General Examination, pursue an original research problem, and report the results of that research in a dissertation that must be a contribution to knowledge. At least one year of course work beyond the M.S.E.E. degree is usually desirable.

## Master of Science in Electrical Engineering

### Admissions Requirements

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required of all students. Official test scores must be submitted, along with a formal application, a statement of purpose, and a minimum of two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following some additional preparation. Such applicants are strongly encouraged to contact the department for further information.

For more information on admissions qualifications, visit the department's Web site at [www.ee.washington.edu/graduate/admitcriteria.html](http://www.ee.washington.edu/graduate/admitcriteria.html).

## Degree Requirements

Masters students have the option of choosing between three different pathways for pursuing their degree:

- \* *Thesis option:* The thesis option is best intended for students who wish to pursue an in-depth research experience with intended preparation for pursuing a Ph.D.
- \* *Project option:* Students who wish to combine the written work of a thesis with a more hands-on approach to individual problems may choose the project option.
- \* *Coursework option:* A student whose main goal is to work in industry immediately upon graduation may find the coursework option more suitable to their needs.

These three options have several related requirements:

- \* Students must complete a plan of study by their second quarter of study.
- \* Students must complete a minimum of 45 credits.
- \* Students must be registered full time (10 credits) per quarter (less in summer)
- \* Students may apply no more than 3 credits of E E 500. 1 credit is required.
- \* Students may apply no more than 5 credits of E E 599 to the degree.
- \* Students are required to take 1 credit of E E 592, offered autumn quarter.

### Thesis Option

45 credits, as follows:

- \* 9-12 credits of E E 700
- \* At least 20 credits in E E courses numbered 500 and above
- \* No more than 12 credits in E E 400-level courses
- \* No more than 9 credits from non-E E courses

The thesis option is an opportunity to pursue an individual problem in depth and in close collaboration with a faculty member. Typical problems involve basic research or application of classroom principles to a professional problem beyond the routine practice of electrical engineering. Students who choose the thesis option must complete a written thesis and oral examination based upon the thesis material before their degree is granted.

### Project Option

45 credits, as follows:

- \* A minimum of 4 credits E E 600
- \* At least 25 credits in E E courses numbered 500 and above
- \* No more than 12 credits in E E 400-level courses
- \* No more than 9 credits from non-E E courses

The required 4 credits of E E 600 must be completed in one quarter and receive a minimum grade of 3.0. Students must complete a written report and an oral presentation to faculty. A student's supervisory committee may permit the student to conduct a second project, allowing a total of 8 credits of E E 600 credits. However, students may not continue project work from one quarter to another.

### Coursework Option

45 credits, as follows:

- \* At least 25 credits in E E courses numbered 500 and above
- \* No more than 12 credits in E E 400-level courses
- \* No more than 9 credits from non-E E courses

The coursework option allows students to pursue the M.S.E.E. by taking a prearranged course load specific to each of the seven curriculum areas. A generic coursework option is also available. The curriculum group chair and

the Graduate Program Coordinator must approve deviation from these prearranged plans.

## Doctor of Philosophy

### Admissions Requirements

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required of all students. Official test scores must be submitted, along with a formal application, a statement of purpose, and a minimum of two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following some additional preparation. Such applicants are strongly encouraged to contact the department for further information.

For more information on admissions qualifications, visit the department's Web site at [www.ee.washington.edu/graduate/admitcriteria.html](http://www.ee.washington.edu/graduate/admitcriteria.html).

### Degree Requirements

The Ph.D. is awarded based on general proficiency and distinctive attainments in Electrical Engineering, particularly on the demonstrated ability of independent investigation. As evidence of ability, the student must produce a doctoral dissertation embodying original research yielding a new contribution to knowledge and presented with a satisfactory degree of literary skill. The majority of Ph.D. students hold master's degrees within the same field, although students with degrees in the physical sciences and other engineering fields are also admitted. To earn a Ph.D., students must:

- \* Pass the department Qualifying Examination
- \* Complete an individualized course of study approved by the student's Ph.D. Supervisory Committee
- \* Pass the University General Examination
- \* Prepare and defend a satisfactory dissertation based on original research
- \* Complete at least 90 credits of course work, independent study, and dissertation (60 of which must be completed at the UW), 18 of which must be graded credits
- \* Maintain a cumulative minimum GPA of 3.00.
- \* Complete 30 credits of dissertation credits (E E 800)

## Research Groups

Facilities in the Department of Electrical Engineering include research laboratories for advanced digital systems, advanced power technology, applied electromagnetics, optics, remote sensing, applied signal and image processing, mechatronics and intelligent control, modern sensors, and semiconductor technology

## Financial Aid

Research assistantships, teaching assistantships, scholarships, and graduate fellowships are available to qualified graduate students in all areas of electrical engineering. Most awards include a monthly stipend plus payment of tuition and fees.

---

## Industrial Engineering

G-7 Mechanical Engineering Building  
[depts.washington.edu/ie](http://depts.washington.edu/ie)

Industrial engineering (IE) prepares students for careers in an increasingly diverse, dynamic and technological world. Industrial engineers focus on the integration of humans, machines, materials and information to achieve optimum performance of operating systems. This focus on the "big picture" makes industrial engineering one of the most people-oriented and customer-focused of the engineering disciplines.

Industrial engineering involves the study of engineering design, system integration, optimization, quality and reliability, supply chain management, virtual reality, and manufacturing.

Being an industrial engineer is about choices. Industrial engineers have the opportunity to work in many different kinds of businesses and nonprofit organizations. The most distinctive aspect of industrial engineering is the flexibility it offers. Many industrial engineers eventually move into supervisory or management positions where they continue to draw on their technical background. Demand for industrial engineers has grown dramatically over the past two decades.

## Undergraduate Program

Adviser  
G7 Mechanical Engineering, Box 352650  
206-543-5041  
ieadvise@u.washington.edu

The Industrial Engineering program offers the following program of study:

\* The Bachelor of Science in Industrial Engineering degree

## Bachelor of Science in Industrial Engineering

*Suggested First- and Second-Year College Courses:* MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; English composition; courses to fulfill VLPA and I&S requirements.

### Department Admission Requirements

Applicants are considered in three groups -- Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive and completion of the minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision.

#### Freshman Admission

The UW Industrial Engineering program enrolls up to 10 percent of its incoming class directly out of high school, prior to the completion of university-level prerequisites. Freshman applicants to the University of Washington who have listed Industrial Engineering as their intended major are automatically considered. Competitive applicants have taken or are taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

#### Early Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical-science courses plus accompanying laboratory, at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. Admission is for autumn quarter only.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.
3. *Grade requirements:* Minimum grade of 2.0 in each prerequisite course and a minimum overall GPA of 2.50.

#### Upper-Division Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; and at least 5 credits of English composition.
2. 45 credits completed by application deadline, which is July 1 for autumn admission and February 1 for spring admission.

Students may also declare into the Industrial Engineering degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

### Graduation Requirements

180 credits as follows:

#### General Education Requirements (91 credits)

1. *Written and Oral Communications (12 credits):* 5-credits in English composition from the University-approved list; T C 231; T C 333 (or department-approved alternative).
2. *Visual, Literary, and Performing Arts (VLPA) and Individuals and Societies (I&S) (30 credits):* A minimum of 10 credits is required in each area.

#### 3. *Natural World (49 credits)*

- a. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; IND E 315
- b. *Science (25 credits):* CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

#### Major Requirements (89 credits)

1. *Engineering Fundamentals (28 credits):* CSE 142, MSE 170, A A 210, E E 215, CEE 220, M E 230, IND E 250
2. *Industrial Engineering Core (24 credits):* IND E 316, IND E 337, IND E 410, IND E 411, IND E 494, IND E 495
3. *Technical Electives (37 credits):* At least one class from approved courses in each of the following areas: operations research, statistics, production/operations, design, and general engineering. See adviser for list of approved technical electives.
4. *Grade Requirements:* Minimum 2.00 GPA in all engineering courses with no grade below 1.0 in these courses.

## Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes:* Industrial engineering graduates are proficient in mathematics, sciences, engineering fundamentals, and the use of computers; use a broad knowledge of industrial engineering methods and tools associated with operations research, quality engineering, and human factors; apply engineering design methods and tools to represent, integrate and solve problems, including the ability to recognize problem context and integrate knowledge and skills from allied disciplines; communicate effectively; and possess the professional characteristics of leadership, ethics, and the ability to motivate and work with others.

IE prepares students to serve as the efficiency experts of organizational change. Students are encouraged to take a systems view when solving problems, recognize the organizational and societal impact of technical decisions, develop good oral and written communication skills, participate in teams, and take initiative. Industrial engineers draw upon specialized knowledge and skills in math, the physical sciences, and social sciences together with the principles and methods of engineering analysis and design.

The B.S.I.E. degree is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4021, telephone: (410) 347-7700. The goal of the undergraduate program is to provide a comprehensive education to prepare students for the profession, resulting in the following outcomes:

1. An ability to apply knowledge of mathematics, science and engineering.
2. An ability to design and conduct experiments, as well as to analyze and interpret data.
3. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. An ability to function on multi-disciplinary teams.
5. An ability to identify, formulate, and solve engineering problems.
6. An understanding of professional and ethical responsibility.
7. An ability to communicate effectively.
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9. A recognition of the need for, and an ability to engage in life-long learning.
10. A knowledge of contemporary issues.
11. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice.
12. An understanding of the integrated, interdisciplinary nature of the discipline.

\* *Instructional and Research Facilities:* Industrial Engineering provides designated computing facilities for undergraduate students. Research facilities include the Human Interface Technology Laboratory, the Production Systems Laboratory, the Manufacturing Laboratory, and the Center for Engineering Learning and Teaching.

\* *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for requirements.

\* *Research, Internships, and Service Learning:* Students have the opportunity to pursue cooperative and internship programs at the

College level through the College's Engineering Co-op Program ([www.engr.washington.edu/coop/](http://www.engr.washington.edu/coop/)).

- \* *Department Scholarships:* IE offers scholarships to outstanding undergraduate students. All applicants to the BSIE program are considered for these scholarships. Awards are made based on both merit and financial need.
- \* *Student Organizations/Associations:* Students are actively involved in the UW student chapter of the Institute of Industrial Engineers (IIE); the IE National Honor Society, Alpha Pi Mu; and the IE Student Advisory Board.

## Graduate Program

Graduate Program Coordinator  
G7 Mechanical Engineering, Box 352650  
206-543-5041  
[ieadvise@u.washington.edu](mailto:ieadvise@u.washington.edu)

Industrial Engineering offers graduate programs leading to the Master of Science in Industrial Engineering (M.S.I.E.) and Doctor of Philosophy (Ph.D.). Graduate courses and research programs are offered in manufacturing, operations research, large-scale assembly, experimental statistics, production planning, quality control, reliability engineering, computer-integrated manufacturing, simulation, supply chain, human factors, virtual reality, and human interface technology.

## Master of Science in Industrial Engineering

### Admission Requirements

To be eligible for consideration to the M.S.I.E. degree, applicants are expected to have a bachelor's degree in engineering, mathematics, or science, with a minimum GPA of 3.00.

### Degree Requirements

41 credits, as follows:

- \* *Coursework Only Program:*
  - o 21 graded credits in industrial engineering (500 level or above) courses
  - o 17 graded credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
  - o 3 credits of Industrial Engineering seminar: IND E 591, IND E 592, IND E 593 (1, 1, 1)
- \* *Thesis Program:*
  - o 18 graded credits in industrial engineering (500 level or above) courses
  - o 11 graded credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
  - o 9 credits of master's thesis (IND E 700)
  - o 3 credits of Industrial Engineering seminar: IND E 591, IND E 592, IND E 593 (1, 1, 1)

## Doctor of Philosophy

### Admission Requirements

To be eligible for consideration to the Ph.D. in Industrial Engineering degree, applicants should have, or be close to completing, their master's degree in any discipline of engineering when applying, with a minimum GPA of 3.00.

### Degree Requirements

90 credits, as follows:

- \* 3 credits of Industrial Engineering graduate seminar: IND E 591, IND E 592, IND E 593 (1, 1, 1)
- \* 60 credits of coursework, with at least 18 credit hours of 500-level courses. A master's degree from the UW or another institution may be used as a substitute for 30 of these 60 credits.
- \* General examination
- \* *Dissertation:* 27 credits of dissertation (IND E 800) over a period of at least three quarters.
- \* Final examination

## Materials Science and Engineering

302 Roberts  
[depts.washington.edu/mse](http://depts.washington.edu/mse)

Materials science and engineering is an interdisciplinary field that addresses the structure, processing, and property relationships in materials for engineering applications. Basic principles of chemistry and physics are applied to provide an understanding of the structure of materials and the manner in which the structure determines the properties. Scientific processing methods are then applied to yield the necessary properties, which then can be integrated with, and designed to accommodate the needs of, modern technology.

Advances in materials enable technological progress in many fields. Historically, this connection between materials and technology has been so intimate that major periods in civilization have been named after the dominant material used in that era (e.g., Bronze Age, Iron Age). In the past few decades, at the core of the progress in such diverse fields as transportation, communication, electronics, energy and environment are significant advances in materials. Materials science and engineering is a broad and growing discipline.

Materials Science and Engineering at the University of Washington has recently experienced rapid expansion into new research areas, including polymers, hybrids, biomaterials, biomimetics, nanomaterials, photonic and magnetic materials. These areas have applications in current and emerging industries, and complement existing strength in ceramics, metals, electronic materials, and composites.

## Undergraduate Program

Adviser  
302A Roberts, Box 352120  
206-543-2600  
[mse@u.washington.edu](mailto:mse@u.washington.edu)

The Department of Materials Science and Engineering offers the following programs of study:

- \* The Bachelor of Science in Materials Science and Engineering degree
- \* A minor in materials science and engineering

## Bachelor of Science in Materials Science and Engineering

*Suggested First- and Second-Year College Courses:* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; English composition; CSE 142; MSE 170; A A 210; CEE 220; T C 231.

### Department Admission Requirements

Applicants are considered in three groups - Direct Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to appeal the department's admission decision. Application information is available from the department adviser.

#### Direct Freshman Admission

1. Open to freshman students formally admitted to the UW.
2. High school GPA of 3.70 or higher; SAT (or equivalent) scores of 1300 or higher.
3. Indication on the application that Materials Science and Engineering is the first choice for the major.

#### Early Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or above; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. (T C 231 and M E 123 must be taken no later than the academic year of admission.)

2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW. Applications are accepted for autumn quarter only. Application deadline is July 1.
3. *Grade requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

### Upper-Division Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122; CHEM 142, CHEM 152; CSE 142 or AMATH 301; MSE 170; 5 credits of English composition.
2. 64 credits completed by application deadline. Applications are accepted for autumn quarter (July 1 deadline) and spring quarter (February 1 deadline).
3. *Grade requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Students may also declare into the Materials Science and Engineering degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

### Graduation Requirements

180 credits as follows:

#### General Education Requirements (85 credits)

1. *Written and Oral Communications:* 12 credits, to include one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).
2. *Visual, Literary, and Performing Arts (VLPA), and Individuals & Societies (I&S) (24 credits):* A minimum of 10 credits is required in each area.
3. *Natural World (55-60 credits):*
  - a. *Mathematics (24-25 credits):* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308 (or MATH 318); one from MATH 309, MATH 324, IND E 315, or STAT 390
  - b. *Science (31-35 credits):* CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; two of the following: PHYS 224, PHYS 225, CHEM 162, CHEM 223, CHEM 224, CHEM 237, CHEM 238, CHEM 455, CHEM 457

#### Major Requirements (89-90 credits)

1. *Engineering Fundamentals (24 credits):* CSE 142 or AMATH 301, MSE 170, A A 210, CEE 220; two of the following: E E 215, M E 123, CHEM E 260, IND E 250.
2. *Materials Science and Engineering Core (49-50 credits):* MSE 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499
3. *Technical Electives (16 credits):* See department advising office for list of acceptable courses.
4. *Grade Requirement:* Minimum 2.00 departmental cumulative GPA.

### Minor

*Minor Requirements:* 30 credits as follows: MSE 170, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362. A minimum grade of 2.0 is required for each course.

The following courses serve as prerequisites for the departmental courses in the minor: MATH 124, MATH 125, MATH 126, MATH 307, and MATH 308 or MATH 318; CHEM 142 or CHEM 145, CHEM 152 or CHEM 155; PHYS 121, PHYS 122, PHYS 123; MSE 170; English composition. Students should take these courses before beginning the minor program.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Undergraduate students are offered both broad core and in-depth courses. The broad core provides the needed background and understanding of all types of engineering materials, including metals, ceramics, polymers, electronic materials, and composites. The curriculum provides an opportunity to use basic knowledge in science and engineering fundamentals to synthesize and design materials for engineering applications. The undergraduate curriculum emphasizes hands on experience, oral and

written communication, and team-work, and encourages participation in research. Graduates with a degree in materials science and engineering find employment in a broad range of industries including aerospace, biomedical, electronic manufacturing, materials processing, and transportation.

The Bachelor of Science in Materials Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:

1. An ability to apply knowledge of mathematics, science and engineering
2. An ability to design and conduct experiments, as well as to analyze and interpret data
3. An ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability
4. An ability to function on multi-disciplinary teams
5. An ability to identify, formulate and solve engineering problems
6. An understanding of professional and ethical responsibilities
7. An ability to communicate effectively
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
9. A recognition of the need for, and an ability to engage in life-long learning
10. Knowledge of contemporary issues
11. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice
12. An ability to apply advanced science (such as chemistry and physics) and engineering principles to ceramics, metals, polymers and composite materials systems
13. An integrated understanding of the scientific and engineering principles underlying the four major elements of the field: structure, properties, processing and performance related to material systems
14. An ability to apply and integrate knowledge from each of the four major elements of the field to solve materials selection and design problems
15. An ability to utilize experimental, statistical and computational methods consistent with the goals of the program
16. Experience in laboratory work and in research and/or design problem solving
17. Preparation, as appropriate to the student and the area of interest, to enter graduate degree programs.

- \* *Instructional and Research Facilities:* Facilities include equipment for electron and optical microscopy, x-ray diffraction, high-temperature heat treatment and mechanical testing, specialized processing equipment, including hot and cold isostatic presses, nitrogen reaction furnaces, and automated TGA, DTA analysis systems. Equipment for analyses of particle size, surface areas, and pore size is also available. Students have liberal access to University computing facilities.

- \* *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

- \* *Research, Internships, and Service Learning:* Materials Science and Engineering students interested in paid internship experiences should contact the Engineering Co-op Program, 301 Loew Hall, Box 352180, 206-543-8711, coop@enr.washington.edu.

- \* *Department Scholarships:* In addition to need-based aid provided through the University's Office of Student Financial Aid, companies and individuals with interest in developing materials science and engineering students have provided scholarships for students admitted to the program. Specific information and application forms are available from the academic counselor in 302 Roberts.

- \* *Student Organizations/Associations:* Keramos (materials honor society); American Ceramic Society (ACerS); ASM/TMS (the joint student chapter of ASM International and TMS); Society for the Advancement of Materials and Process Engineering (SAMPE).

*Of Special Note:*

#### Combined B.S./M.S. Degree Program

The goal of the combined B.S./M.S. program in Materials Science and Engineering is to provide a more direct route to the master's degree for well-qualified undergraduate students who wish for more in-depth graduate-

level work in preparation for work in industry or for a Ph.D. program. It creates a more efficient and continuous academic program that leads directly to the Master of Science degree. Students earn both the B.S. and M.S. degrees in five years. This program is available to students after they are admitted to the department. Information is available below.

## Graduate Program

Graduate Program Coordinator  
302 Roberts, Box 352120  
206-543-2600  
mse@u.washington.edu

The Department of Materials Science and Engineering offers programs of study leading to the Master of Science in Materials Science and Engineering (M.S.M.S.E.) and the Doctor of Philosophy in either Materials Science and Engineering and Materials Science and Engineering/Nanotechnology.

In addition, the degree of Master of Science (without designation) is offered through the College of Engineering. This degree is intended to accommodate students with undergraduate majors outside physical science or engineering who desire a special graduate program to encompass a broad range of materials science studies.

The primary goals of the master's and doctoral programs are to prepare students for industrial employment and research/development careers and to generate new knowledge. The specific objectives are:

- \* Deepen knowledge and capabilities broadly and in a chosen specialty area: A student's knowledge, attained through coursework and scholarly investigation of literature relevant to thesis project, should be commensurate with leading researchers in the field.
- \* Master and develop state-of-the-art research techniques appropriate to specialty: Analytical, computational, and experimental tools are learned via instruction by advisor(s) and peers in conjunction with maintaining currency with literature.
- \* Contribute new knowledge of lasting value to the field by creative and independent research: A student's thesis research must demonstrate originality and high quality, as judged by faculty committee
- \* Broaden candidate's knowledge of field and societal issues: Through coursework, department and group seminars, and attendance at professional meetings, a student learns to appreciate context of specialty within materials science and engineering and gain ability to apply knowledge and methods to a spectrum of engineering and scientific challenges.
- \* Learn to work effectively with colleagues and contribute to professional community: Attained by cooperation in team research projects, presentation of research and professional meetings.

## Combined Bachelor of Science/Master of Science

### Admission Requirements

Students may apply to enter the combined BS/MS program any time after they are accepted into the MSE department as an undergraduate major. Requirements for application include:

- \* Overall minimum GPA of 3.20 in the last 90 credits before application.
- \* At least 15 credits of MSE courses completed with a minimum GPA of 3.40.
- \* Statement of interest and goals for the M.S. degree.
- \* Interview with admissions committee

Students accepted into the combined BS/MS program by the department will then apply to the Graduate School in December of their senior year. These students will normally enroll in the Materials Science option for the M.S. degree.

### Degree Requirements

216 credits.

Requirements are the same as for the current BS and MS programs. However, up to 7 credits of 400- or 500-level courses taken as an undergraduate over and above the BS requirement may be counted towards the MS degree. These credits would be transferred to the graduate program when the student enters as a graduate student, subject to the approval of the MSE Graduate Program Committee. The graduate school will waive the restrictions on transfer credits for this purpose.

Students admitted into the BS/MS program will combine their BS senior project requirement (MSE 499) with the MS thesis requirement (MSE 700) and will begin the research starting summer or autumn quarter of their senior year. The student will receive 4 credits of MSE 499 for the undergraduate portion of the research program, and then register for 9 or more credits of MSE 700 for the thesis. Written and oral reports are required to complete the 499 credits, to be submitted before the end of the senior year. The thesis is required for the completion of the MS degree.

## Master of Science in Materials Science and Engineering

### Admission Requirements

The applicant must have a minimum undergraduate grade point average of 3.00 in the last 90 graded quarter hours or the last 60 graded semester hours. Graduate Record Examination (GRE) results are also required for the general test.

Students with backgrounds in engineering and the physical sciences are admitted into the M.S.M.S.E. program. After admission, students with a minimum of three years' industrial experience in an engineering position may apply for the Engineering Materials (practice-oriented, non-thesis) option.

Specific program pre-requisites, which may be satisfied after entry into the program, are:

- \* Knowledge of fundamentals of Materials Science and Engineering equivalent to MSE 170
- \* Knowledge of crystallography equivalent to MSE 331
- \* Background in materials properties equivalent to MSE 362 and MSE 351
- \* Knowledge of kinetics equivalent to MSE 322
- \* Understanding of thermodynamics equivalent to the level of MSE 421

### Degree Requirements

36 credits, as follows:

At least 27 credits must be for course work, including 3 credits of MSE 520 seminar (see below). Of these 27 credits, 18 must be in courses numbered in the 500 series (these 18 may include the 3 seminar credits). Numerical grades from approved 400 level and all 500 level courses must be received for at least 18 quarter credits of course work taken at the University of Washington. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University. Required courses may not be taken on a S/NS option. The S/NS option in other courses must have the approval of the student's faculty advisor.

- \* *Thesis Option*
  - o Three required core courses (9 credits): MSE 510 (3), MSE 525 (3), MSE 541 (3)
  - o Three optional core courses
  - o 3 credits of seminar (MSE 520)
  - o 9 credits of thesis work (MSE 700)
  - o 6 credits of electives (400- or 500-level physical science or engineering courses) to meet the 36 credit requirement.
- \* *Non-Thesis Option*
  - o Three required core courses (9 credits): MSE 510 (3), MSE 525 (3), MSE 541 (3)
  - o Four practice-oriented materials or related engineering courses, 12 credits minimum, chosen to complement the student's program.
  - o Materials Engineering Project, MSE 598, 4 credits. This is taken during the last quarter of the master's program.
  - o Electives to meet the 36 credit requirement.
  - o Of the above credits, all must be at the 400 or 500 level, with a minimum of 18 at the 500 level, and other graduate school requirements must be met. Numerical grades are also required for at least 18 credits of 400- or 500-level coursework.

## Doctor of Philosophy

### Admission Requirements

The applicant must have a minimum grade point average of 3.00 in the last 90 graded quarter hours or the last 60 graded semester hours. Graduate Record Examination (GRE) results are also required for the general test.

In general, entering graduate students with only the B.S. degree will be required to enroll as M.S. students.

*Prerequisite:*

- \* Knowledge of fundamentals of Materials Science and Engineering equivalent to MSE 170
- \* Knowledge of crystallography equivalent to MSE 331
- \* Background in materials properties equivalent to MSE 362 and MSE 351
- \* Knowledge of kinetics equivalent to MSE 322

The department also requires that all entering graduate students have an understanding of thermodynamics equivalent to the level of MSE 421. If the student does not have two undergraduate thermodynamics courses upon entry to the graduate program, then MSE 421 is required for the Ph.D. degree.

Students interested in the Materials Science and Engineering with the Nanotechnology option must make formal application to the UW's Center for Nanotechnology after being admitted to the MSE graduate program.

### Degree Requirements

90 credits as follows:

- \* 30 credits from M.S.M.S.E. degree or equivalent
- \* Three required core courses (9 credits): MSE 510 (3), MSE 525 (3), MSE 541 (3)
- \* 6 credits of seminar (MSE 520)
- \* 9 credits of elective MSE courses
- \* 36 credits of MSE 800
- \* Qualifying Exam
- \* General Exams
- \* Portfolio Review
- \* Dissertation
- \* Final Exam

### Advising and Progress to Degree

The graduate coursework is designed to provide a higher level expertise than a BS in both core topics and specialty areas chosen by the student. This is accomplished by requiring all the students to take three required core courses (MSE 510, MSE 525, and MSE 541) and a series of elective courses. Students are also required to enroll for the department seminar series.

Graduate students are advised by their supervisory/thesis committee chair, members of the supervisory/thesis committee, and the academic counselor, each with a specific advising role. The department also maintains a Graduate Study Program book, given to each graduate student upon entry. Graduate students work closely with their committee chairs. Through this interaction, students develop a professional identity including learning how to do research, defining research problems, research supervision, data analysis and synthesis, presentation and participation in professional meetings, writing papers and reports, writing research proposals, information and advise regarding career options and help with placement.

### Financial Support

Graduate students are eligible for a variety of competitive financial awards while they pursue their MSE degrees. Awards include teaching and research assistantships and a broad spectrum of internal and external fellowships. Almost all graduate students receive some financial support. Further details are on the departmental website and in the Graduate Study Program book.

### Engineering Materials Option for the Master of Science

The Engineering Materials option for an M.S. in Materials Science and Engineering is a non-thesis program designed for students with substantive industrial experience who want a master's degree to further their career goals or to meet work requirements. Students selecting this degree option should be practicing materials engineers with a Bachelor of Science degree. This program contains practice-oriented courses in addition to the usual graduate core courses. In place of a research-oriented thesis, students carry out a complete analysis and develop recommended solutions to an engineering materials problem. This project is industrially oriented,

undertaken at an industrial site and supervised by an experienced engineer in industry and an MSE faculty member. Written and oral final project reports are required. The Engineering Materials option is designed to be completed in one year (four quarters) for on-campus students; it is also available for part-time students through the Education at a Distance for Growth and Excellence (EDGE) program.

---

## Mechanical Engineering

143 Mechanical Engineering Building  
www.me.washington.edu

Mechanical engineering is one of the broadest and oldest of the engineering disciplines and therefore provides some of the strongest interdisciplinary opportunities in the engineering profession. Power utilization (and power generation) is often used to describe the focus of mechanical engineering. Within this focus are such diverse topics as thermodynamics, heat transfer, fluid mechanics, machine design, mechanics of materials, manufacturing, stress analysis, system dynamics, numerical modeling, vibrations, turbomachinery, combustion, heating, ventilating, and air conditioning. Degrees in mechanical engineering open doors to careers not only in the engineering profession but also in business, law, medicine, finance, and other non technical professions.

### Undergraduate Program

Adviser  
143 Mechanical Engineering Bldg., Box 352600  
206-543-5090  
meadvise@u.washington.edu

The Department of Mechanical Engineering offers the following program of study:

- \* The Bachelor of Science in Mechanical Engineering (B.S.M.E.) degree

### Bachelor of Science in Mechanical Engineering

#### Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Upper Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; application deadline is July 1.

#### Early Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or higher; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.
3. *Grade requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Students may also declare into the Mechanical Engineering degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements). Upper Division Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122; CHEM 142, CHEM 152; A A 210; CEE 220; M E 230; T C 231; 5 credits of English composition.
2. 65 credits completed by July 1 application deadline
3. *Grade requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

## Graduation Requirements

180 credits as follows:

### General Education Requirements (85 credits)

1. *Written and Oral Communications*: 12 credits, to include one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).
2. *Visual, Literary, and Performing Arts (VLPA), and Individuals & Societies (I&S)* (24 credits): Minimum of 10 credits in each area.
3. *Natural World* (49 credits):
  - a. *Mathematics* (24 credits): MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), MATH 309 (or AMATH 353 or MATH 324)
  - b. *Science* (25 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

### Major Requirements (95 credits)

1. *Engineering Fundamentals* (31 credits): A A 210; ; CEE 220; E E 215; IND E 315 (or MATH 390); M E 123; M E 230; MSE 170
2. *Mechanical Engineering Core Courses* (45 credits): M E 323, M E 331, M E 333, M E 354, M E 355, M E 356, M E 373, M E 374, M E 395, M E 495
3. *Mechanical Engineering Option Courses* (19 credits)

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*:
1. *Success in the Profession*. The department's goal is success for its graduates in industry, research, and academic careers by virtue of skills and attributes learned in the program. Graduates succeed in their professional and academic positions by:
    - a. using fundamental science and analysis to solve engineering problems,
    - b. successfully executing engineering designs, and
    - c. performing effectively in design teams, in the use of management tools, and through effective oral, written, and graphical communication.
  2. *Contribution to Society*. Graduates should be critical thinkers in the tradition of the broad liberal arts education. They succeed in this goal by being able to:
    - a. think critically, in the sense of broadly educated individuals (i.e., be informed evaluators/consumers of information),
    - b. perform independent, informed analysis on issues inside and outside of technology, and
    - c. continue lifelong learning.

The B.S.M.E. program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:

- a. An ability to apply knowledge of mathematics, science and engineering
- b. An ability to design and conduct experiments, as well as to analyze and interpret data
- c. An ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- d. An ability to function on multi-disciplinary teams
- e. An ability to identify, formulate, and solve engineering problems
- f. An understanding of professional and ethical responsibilities
- g. An ability to communicate effectively
- h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- i. A recognition of the need for, and an ability to engage in, life-long learning
- j. Knowledge of contemporary issues
- k. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Each student's success is measured by demonstration of the following learning outcomes:

1. Background in mathematics, science, and engineering principles. Ability to apply this knowledge to the formulation and solution of mechanical engineering problems.

2. Ability to design thermal and mechanical components to achieve a desired goal. Ability to develop, conduct, and analyze experiments or tests that may aid in this design process.
3. An understanding of the necessary professional abilities of a practicing engineer including ethical conduct, teamwork in the pursuit of a goal, and effective communication.
4. Ability to conduct computer-based design and analysis in engineering applications.
5. Exposure to a general education program that aids in the understanding of and increases the appreciation for the "non-technical" world.
6. Realization of the business environment in which engineering is practiced.
7. Awareness and necessity of continuing education, graduate study, and other lifelong learning experiences.

Interest groups within the faculty provide instruction in four areas: design; energy and fluids; mechanics, materials and manufacturing; and systems and dynamics. Departmental thrust areas for graduate and undergraduate research include: environment; health care; information technology; and manufacturing. Several on-going senior capstone design projects provide both undergraduate and graduate students with hands-on, interdisciplinary, team-driven opportunities that encompass such diverse topics as Formula SAE car; human-powered submarine, mechatronics, and fuel cell technology.

\* *Instructional and Research Facilities*: The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department Web site to view faculty research areas.

\* *Honors Options Available*: With College Honors, With Distinction (Departmental Honors). See department advisers for requirements.

\* *Research, Internships, and Service Learning*: The department participates in the College of Engineering Co-op Program. The Center for Career Services also lists internship opportunities.

\* *Department Scholarships*: The department offers approximately forty scholarships each year. Scholarship applications are available on the College of Engineering Web site. The deadline for scholarship applications is April 1. Sophomores may apply for scholarship consideration before being admitted to the department.

- \* *Student Organizations/Associations*:
- o American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE)
  - o American Society of Mechanical Engineers (ASME)
  - o Pi Tau Sigma - Mechanical Engineering Honor Society (PTS)
  - o Society of Automotive Engineers (SAE)
  - o Society of Manufacturing Engineers (SME)
  - o Society of Naval Architects and Marine Engineers (SNAME)
  - o Society of Women Engineers (SWE)

## Graduate Program

Graduate Program Coordinator  
143 Mechanical Engineering Bldg, Box 352600  
206-543-5090  
megrad@u.washington.edu

The Department of Mechanical Engineering offers graduate programs leading to the degrees of Master of Science in Mechanical Engineering (M.S.M.E.) and Doctor of Philosophy (Ph.D.). The department also provides authorized options leading to the College-wide Master of Science in Engineering (M.S.E.) degree. These degrees provide balanced combinations of formal instruction and independent research or design experience. Although there are thesis and non-thesis options for the M.S.M.E., completion of a thesis is highly recommended.

Individual projects may be drawn from a wide spectrum of topics, which include mechanical and energy conservation systems, heat transfer,

combustion, fluid mechanics, applied mechanics, computational mechanics, computer-aided design and manufacturing, production systems, materials behavior, robotics, controls, vibrations, and applications of mechanical engineering science to a variety of such interdisciplinary fields as bioengineering, ocean engineering, environmental engineering, nanotechnology, micro electro-mechanical systems, and acoustics. Flexible requirements for coursework provide opportunities both for a broad scientific and professional background and for specialty training.

## Master of Science in Mechanical Engineering

### Admission Requirements

- \* *Grade Point Average:* The Graduate School requires a GPA of at least 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework to receive consideration. The department prefers an overall undergraduate GPA of at least 3.20. In addition, the department prefers that Ph.D. applicants have an M.S. GPA of 3.50 or better.
- \* Quality and difficulty of courses taken and universities and colleges attended.
- \* *GRE General Test:* Minimum GRE scores of 450 Verbal (350 if English is not a native language), 650 Quantitative, and 4.0 Analytical Writing.
- \* Three letters of recommendation
- \* Statement of purpose
- \* Official transcripts from all colleges/universities attended
- \* Professional experience, if applicable
- \* English requirements for foreign nationals: TOEFL scores for foreign nationals whose native language is not English, with a minimum score of 580 for the paper examination and 237 for the computer-based examination.

### Degree Requirements

42 credits, as follows:

- \* Thesis-option students must register for 12 credits of thesis research and 30 credits of related numerically graded coursework. Non-thesis option students must take all 42 credits in numerically graded courses.
- \* Course grades must be 2.7 or above
- \* At least 12 credits for the thesis option and 18 credits for the non-thesis option must be taken in 500-level mechanical engineering courses, including 6 credits of mathematical and engineering analysis requirements: M E 564 and M E 565.
- \* At least 3 credits of computational or numerical analysis must be taken from the following list of approved courses (or from an approved plan of individual study conducted as part of thesis research): M E 535, AA 543, A A 540, CEE 504, E E 578, AMATH 581 and AMATH 584
- \* The remaining credits (18 for thesis-option students and 24 for non-thesis option students) may be from other departments, and may include a maximum of 9 credits (12 credits for non-thesis) at the 400 course level (excluding M E 498 and M E 499).
- \* Non-thesis option students may substitute up to 6 credits of M E 599 Special Projects (not to be confused with the class M E 599) for 6 credits of classroom courses. Permission forms for project proposals can be obtained from the Mechanical Engineering Student Services Office. The student must write a research paper under the supervision of a faculty member and the credits must be taken for a numerical grade.

*Please note:* For thesis-option students, special projects course such as M E 599 and M E 600 do not count toward the 42-credit total unless the project is recommended by the student's faculty supervisor and pre-approved by the Graduate Program Coordinator. Seminar Requirement: All full-time students must register for a seminar course every quarter while in the master's program. Quarterly registration for seminars is necessary for satisfactory progress in the program, but does not count toward the 42 credits of numerically graded coursework and thesis research required for graduation.

## Doctor of Philosophy

### Admission Requirements

- \* *Grade Point Average:* The Graduate School requires a minimum GPA of 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework for admission. The department prefers an overall minimum undergraduate GPA of 3.20. In addition, the department prefers that Ph.D. applicants have a minimum M.S. GPA of 3.50.

- \* Quality and difficulty of courses taken and universities and colleges attended
- \* *GRE General Test:* Minimum GRE scores: 450 Verbal (350 if English is not a native language), 650 Quantitative, and 4.0 Analytical Writing.
- \* Three letters of recommendation
- \* Statement of purpose
- \* Official transcripts from all colleges/universities attended
- \* Professional experience, if applicable
- \* English requirements for foreign nationals: TOEFL scores for foreign nationals whose native language is not English, with a minimum score of 580 for the paper exam and 237 for the computer-based exam.

### Degree Requirements

90 credits, to include:

- \* *Advisory Committee:* During the first year of post-master's study, the student should select a two- to three-person Advisory Committee from the Mechanical Engineering department.
- \* *Coursework:* All new post-master's students must successfully complete two to three graduate courses per quarter in their first year of study, as approved by the Advisory Committee. Normally this includes a sequence in advanced applied mathematics.
- \* *Seminar Requirement:* Post-master's students register for the Mechanical Engineering seminar (M E 520), in the autumn quarter of their matriculation year. Otherwise, students are encouraged to register for engineering seminar courses offered by other UW engineering programs, i.e. M E 518, M E 523, M E 591, AMATH 501, IND E 591/IND E 592/IND E 593, MSE 520. Seminar must be taken on a quarterly basis throughout the entire Ph.D. program.
- \* *Research:* Post-master's students must conduct initial research in their first year of study under the direction of the Advisory Committee. This requirement applies even if the student holds a teaching assistantship.
- \* *Qualifying Exam:* Every full-time student in the department's Ph.D. program is required to take the examination within one calendar after entry into the program.
- \* *Supervisory Committee:* A graduate student is not considered a doctoral student until a Supervisory Committee has been appointed by the Dean of the Graduate School. Students need to provide the name of the committee chair, Graduate School Representative (GSR), and at least two mechanical engineering faculty for approval to the Graduate Program Coordinator (GPC). The department requires that at least three members of the committee be Mechanical Engineering faculty, two of whom must be core Mechanical Engineering faculty. This committee, established before the end of the second year of Ph.D. study and no less than four months prior to scheduling the General Examination, replaces the first-year Advisory Committee.
- \* *Dissertation Proposal:* Prepared after the student has conducted one or two quarters of in-depth research, during which time the student should meet frequently with the Committee chair. Submit copies of the proposal to all members of the supervisory committee prior to the examination. The proposal must be approved by the Committee Chair before scheduling the General Examination.
- \* *Dissertation Research:* Registration for a minimum of 27 credits of dissertation research is required over a period of at least three quarters - and at least two quarters after the General Exam.
- \* *Reading Committee:* The Reading Committee, consisting of three members drawn from the Supervisory Committee, must include at least two core Mechanical Engineering faculty.
- \* *Final Examination*
- \* *Dissertation Defense*

### Research Facilities

The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD

research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department Web site to view faculty research areas.

## Financial Aid

Financial aid is offered to full-time graduate students as funds permit. Funds, however, are limited and the assignment of assistantships and fellowships is highly competitive. Aid may be in the form of a research assistantship for sponsored programs, a fellowship provided by the University or industry, or a teaching assistantship.

---

## Technical Communication

14 Loew  
www.uwtc.washington.edu

Technical communicators use their language, visual, and analytical skills, as well as training and research in electronic and other media, to create and enhance communication in scientific and technical environments. Technical communication prepares students to design, create, edit, and evaluate technical and scientific discourse. The department provides coursework in the development of online help systems and in the design of general-audience content for delivery by means of advanced communication technologies such as the Web.

The complexities of modern life have greatly increased the number of people who need to communicate about technical and other specialized topics. Scientific journal articles, manuals, proposals, and other genres are important for a vast array of readers. With the Information Age, gaining and sharing technological understanding and capability has become a crucial human activity. We communicate in more genres, address broader (often global) audiences, and face more complex rhetorical problems than ever before.

To achieve success in their communication activities, progressive organizations are employing sophisticated planning and development methods, including user-centered design and evaluation, content management, and systems-based analyses. In addition, they undertake research projects and apply existing research to their own needs. Contemporary research in technical communication ranges from controlled empirical research on the processing of text, graphics, and multimedia content to observational research on how meaning is created and negotiated in business environments and virtual communities.

Other major interests include the human-computer interface, hypermedia, communications technology, the rhetoric of technical discourse, international communication, visual communication, publications and communications management, policy analysis of technological systems, and research and testing.

## Undergraduate Program

Adviser  
211 Engineering Annex, Box 352195  
206-543-1798 or 206-616-0797  
tcadvise@u.washington.edu

The Department of Technical Communication offers the following programs of study:

- \* The Bachelor of Science in Technical Communication degree
- \* A minor in technical Japanese

## Bachelor of Science in Technical Communication

*Suggested First-Year College Courses:* T C 231, approved math or statistics (see list on T C Web site), approved science (see list on T C Web site)

### Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Upper-Division Admission. Admission is competitive. Completion of minimum

requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision.

### Early Admission

1. *Course requirements:* 38 credits to include 10 credits of approved mathematics or statistics; 15 credits of approved natural science; and 13 credits of approved written and oral communication (including T C 231). All courses must be completed prior to the July 1 application deadline.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW. Application deadline is July 1 for autumn quarter only.
3. *Grade requirements:* Minimum 3.00 GPA in written and oral communications courses and minimum 2.00 cumulative GPA.

### Upper-Division Admission

1. *Course requirements:* 10 credits of approved mathematics or statistics; 15 credits of approved natural science; and 13 credits of approved written and oral communication (including T C 231). All courses must be completed prior to the July 1 application deadline.
2. 60 credits completed by application deadline, which is July 1 for autumn quarter and February 1 for spring quarter.
3. Students applying in the senior year must spend a minimum of four quarters in the program.
4. *Grade requirements:* Minimum 3.00 GPA in written and oral communications courses and minimum 2.00 cumulative GPA.

Students may also declare into the Technical Communication degree program through the College of Engineering Advanced Admission program (see the College of Engineering section for Advanced Admission entrance and continuation requirements).

### Graduation Requirements

180 credits as follows:

#### General Education Requirements (93 credits)

1. *Written and Oral Communications (13 credits):* 5 credits of English composition from the University list; T C 231; 5 credits of oral/written communication from T C list (see adviser).
2. *Visual, Literary, & Performing Arts (VLP), and Individuals & Societies (I&S) (30 credits):* A minimum of 10 credits is required in each area.
3. *Math and Natural Science (50 credits):*
  - a. Mathematics (minimum 15 credits; see list of qualifying courses on T C Web site)
  - b. Science (minimum 15 credits; see list of qualifying courses on T C Web site)

#### Major Requirements (82 credits)

1. *Technical Communication Core (51 credits):* T C 310, T C 400, T C 401, T C 402, T C 403, T C 407, T C 411, T C 412, T C 437, T C 493, T C 495
2. *Technical/Analytical (12 credits):* Must include either CSE 142 or PHIL 120.
3. *Approved Electives (19 credits):* Must demonstrate a coherent and relevant area of specialization.

#### Free Electives (5 credits)

#### Minor

*Minor Requirements:* Technical Japanese: Minimum of 25 credits to include T C 461 (5), T C 462 (5), T C 463 (5), plus 10 credits from the approved list of elective courses. For more information, contact the Technical Japanese Office, 13 Engineering Library.

## Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes:* The department has identified several areas of competency for students. By achieving mastery in all these areas, upon graduation TC students are well prepared to advance to careers in technical communication, apply to top graduate programs, and conduct research in the field.

- Graduates are able to:
- o Understand the TC field
  - o Write and edit at a professional level

- o Analyze communication situations and problems in scientific and technical settings
- o Identify and work with the major genres of technical communication
- o Use appropriate tools and technologies to develop communication solutions
- o Understand and use principles for effective display of information
- o Understand and practice effective content development
- o Manage TC projects effectively
- o Work effectively on teams
- o Be sensitive to relevant larger contexts and environments

The Department of Technical Communication prepares students to assume positions of intellectual leadership in industry, government, and non-profit organizations. Students also specialize in science writing or Web site design. The Technical Japanese program provides a unique opportunity to develop cross-cultural experience and expertise.

Whatever their professional direction, technical communication students learn the newest communication technologies and practices, the most effective information-design strategies, and the research skills appropriate to their interests. They also learn the enduring theory and principles that enable them to understand the constant changes they will encounter throughout their careers. Finally, their coursework takes place in the context of social and political issues and human needs.

- \* *Instructional and Research Facilities:* Department facilities include the T C Computer Lab, Technical Japanese Computer Lab, Laboratory for Usability Testing and Evaluation (LUTE), and the Engineering/School Writing Center (EiWC).
- \* *Honors Options Available:* With College Honors. With Distinction. See adviser for details.
- \* *Research, Internships, and Service Learning:* All Technical Communication undergraduates are required to complete at least one 3-credit internship. The supervised internship in a publications organization must be approved by the faculty adviser. As an internship substitution, students may elect to take part in a six-month co-op, sponsored by the Engineering Co-op program. Additionally, undergraduates are invited to work in research groups with TC grad students and faculty.
- \* *Department Scholarships:* Annually, T C selects one recipient of a College of Engineering Scholarship. The criteria for this scholarship are the applicant's prior academic history and likelihood for success in the technical communication field. Additionally, the Society for Technical Communication (STC) offers annual scholarships open to all students enrolled in a T C-related program.
- \* *Student Organizations/Associations:* Students in the Technical Communication degree program often participate in the Student Chapter of the Society for Technical Communication (STC), the Minority Science and Engineering Program (MSEP), and Women in Science and Engineering (WISE).

*Of Special Note:* The T C department is a small, academic community. Students generally call their professors by their first name and have the opportunity to work individually on projects and research supervised by T C faculty. Undergraduate students are encouraged to work in research groups and to attend conferences and professional meetings.

## Graduate Program

Graduate Program Coordinator  
14 Loew, Box 352195  
206-543-2567  
tcadvise@u.washington.edu

## Master of Science in Technical Communication

Technical Communication offers a Master of Science in Technical Communication (M.S.T.C.). (An evening program is offered through UW Educational Outreach.) A total of 41 credits is required for the M.S.T.C. degree, which includes 29 credits of required T C graduate courses and 11 credits of approved electives. M.S.T.C. students may elect to pursue a master's thesis or project report with the approval of their supervisory committee.

### Admission Requirements

In making recommendations for admission, the faculty consider the following from an applicant's record: (1) undergraduate GPA; (2) under-

graduate degree program and work experience; (3) the Graduate Record Examination (GRE) Verbal score; (4) the Test of English as a Foreign Language (TOEFL) score (if applicable); (5) letters of recommendation; and (6) Statement of Goals and Career Objectives. A limited number of prerequisite undergraduate courses may be required.

### Degree Requirements

41 credits, as follows:

The course of study must include:

- \* Two courses in Theory (min. 8 cr)
- \* Two courses in Research Methods (min. 8 cr)
- \* Coursework in Society and Systems (min. 4 cr)
- \* Coursework in New Media Design and Applications (min. 8 cr)
- \* Electives (no minimum)
- \* One seminar (min. 1 cr)

Students must complete the M.S.T.C. program within three years of admission; most finish within one to two years. Students who wish to propose a master's thesis (T C 700) or internship with report (T C 601) should consult with the adviser.

The required T C graduate courses include the following: T C 501 (4); T C 502 (4); T C 510 (4); either T C 516 (4) or T C 517 (4); either T C 505 (4), T C 512 (4), or T C 520 (4); T C 521 (1-2, max. 3).

Other courses that fulfill requirements in the four categories (Theory, Research Methods, Society and Systems, and New Media Design and Applications) must be approved by the student's supervisory committee chair. Courses may include coursework not only in engineering, but also in fields such as computer science, cognitive science, psychology, linguistics, behavioral science, as well as other disciplines at the UW.

## Inter-Engineering Master's in Technical Japanese

The Inter-Engineering Master's in Technical Japanese is a two year inter-engineering master's degree program that combines the study of engineering and technical Japanese in a high-tech learning environment. It is the only program of its kind in the country.

Students take classes in an engineering specialty and in advanced Japanese. They spend summer quarter after their first year in Japan doing a required internship in a Japanese company or research lab. Some internships are longer. Students graduate with an Inter-Engineering M.S.E. or M.S. degree.

Applicants who do not have an engineering or other high-tech background can follow the technical communication track and graduate with the inter-engineering M.S. degree.

### Admission Requirements

To be admitted, students should have at least three years of college-level Japanese language study or the equivalent. The Japanese Proficiency Test is required for all applicants and should be taken no later than two weeks before the application deadline. If applicants are unable to make arrangements to take the test before the application deadline, they need to contact the program coordinator.

### Degree Requirements

54 credits, as follows:

- \* *Engineering Fields:* Students must select an engineering field (usually the same as your undergraduate area of concentration) from among the following: Aeronautics and Astronautics, Bioengineering, Chemical Engineering, Civil and Environmental Engineering, Computer Science and Engineering, Electrical Engineering, Materials Science, Mechanical Engineering, Technical Communication
- \* *Credit Requirements:*
  - o *Distribution:* 24 credits in one engineering specialty, 27 credits of coursework in Technical Japanese, and 3 credits of summer internship in Japan. Note: 3 credits of internship may be substituted for 3 credits of coursework.
  - o *Technical Japanese coursework:*
    - + *Oral Communication in Technical and Business Settings:* T C 471 (3), T C 472 (3), T C 473 (3)
    - + *Reading Techniques in Technical Japanese:* T C 461 (3), T C 462 (3), T C 463 (3)

- + *Advanced Japanese for Technical and Business Professionals*: T C 561 (3), TC 562 (3), T C 563 (3)

- \* Successfully defend the dissertation itself before a Reading Committee (Final Exam).

## Doctor of Philosophy

The goals and objectives of the T C Ph.D. program are as follows:

- \* To prepare individuals for a career as researchers, teachers, and intellectual leaders in the discipline of technical communication
- \* To foster the development and dissemination of new knowledge in technical communication
- \* To foster the development of an international, multi-cultural perspective and a diverse, inclusive student body and workforce in technical communication
- \* To invent new technical and strategic solutions to technical communication problems

By completion of the course of study, technical communication doctoral students are able to:

- \* Analyze a communication situation in its full complexity
- \* Select or develop an appropriate theoretical framework to motivate an understanding of the situation
- \* Select an investigative method from a broad range of methods and effectively use it for conducting an inquiry.
- \* Confront specific communication problems and create solutions for them that can be defended theoretically
- \* Translate theory and research findings into technical or strategic inventions for solving communication design problems

### Admission Requirements

Students may be admitted to the T C Ph.D. program after completing either an undergraduate degree or a master's degree in T C or a relevant field (up to 30 credits of master's work may be applied toward the 105-credit requirement). Because T C is a relatively new discipline, applicants can be expected to represent a wide range of backgrounds.

Applicants must submit the following:

- \* UWTC Ph.D. admission forms
- \* Official transcripts of all academic study
- \* Evidence of a minimum GPA of 3.00
- \* Three letters of recommendation
- \* A curriculum vitae
- \* A personal statement of objectives and research area of interest.

International students will also be required to submit a TOEFL test score of at least 600, obtained within the last two years.

### Degree Requirements

105 credits, as follows:

To be awarded a Ph.D. in Technical Communication from the Department of Technical Communication at the University of Washington, the following requirements must be met:

- \* After having completed 30 credits of coursework, pass a Preliminary Exam. (Those who do not pass the preliminary exam for Ph.D. study may proceed to finish a terminal master's degree.)
- \* Select Committee Chair within two quarters of passing Preliminary Exam.
- \* Successfully complete all course distribution and credit-hour requirements.
- \* Successfully complete the requirements for directed research.
- \* After having completed 60 credits, pass a General Examination to attain formal candidacy for the Ph.D. program (Candidate's Certificate).
- \* Successfully defend a dissertation proposal before a Supervisory Committee.

Students are encouraged but not required to teach; if they do teach, they are required to take the teaching seminar, T C597.

### Course Distribution

The coursework exposes students to the literature and multidisciplinary perspectives of the field; the coursework requirements are distributed across four main thematic areas: theory, research methods, media design and applications, and society and systems. In their coursework, students encounter the main themes and intellectual diversity of the field and learn to reason about the claims of the main perspectives. Students use elective credits to broaden their perspectives or gain more depth in disciplines closely related to TC. The specific required core courses and other coursework requirements in the four thematic areas that all TC Ph.D. students are expected to take include the following:

- \* *Theory*: Four courses that are 3 or more credits, as follows: T C 501 (4), T C 502 (4), additional approved theory courses
- \* *Research Methods*: Three courses that are 3 or more credits, as follows: T C 516 (4) or T C 517 (4); additional approved research methods courses
- \* *Media Design and Applications*: Three courses that are 3 or more credits, as follows: T C 510 (4), T C 511 (5), additional approved media design courses
- \* *Society and Systems*: Three courses that are 3 or more credits, from the following: T C 505 (4), T C 512 (4), T C 520 (4), other approved society and systems courses

The following tables present a summary of the credit-hour requirements for the TC Ph.D., a list of courses that meet the coursework category requirements, and a sample full-time and part-time pathway.

### Credit-Hour Requirements

- \* 46 credits minimum of core distribution requirements
- \* 12 credits of directed research (T C 596)
- \* 20 credits minimum approved electives (30 credits max.)
- \* 27 credits minimum dissertation

A student entering with a master's degree in Technical Communication may use up to 30 credits from that degree towards the Ph.D. requirements. These 30 credits may be applied toward the core distribution requirements or toward the elective credits, as appropriate and as approved by the graduate adviser.

### Research Facilities

The Department of Technical Communication has a well-equipped computer laboratory that effectively supports its courses and research projects. In addition, there are two specialized departmental research laboratories: the Technical Japanese Lab and the Laboratory for Usability Testing and Evaluation (LUTE). An award-winning magazine, Northwest Science and Technology, is produced in the department and serves as a laboratory for science-writing students. Finally, technical communication graduate students can utilize significant College of Engineering and University-level research facilities.

### Financial Aid

A limited number of teaching and research assistantships and scholarships are available for the financial support of graduate students in technical communication. More information and application forms can be obtained by contacting the department.

# College of Forest Resources

---

## Dean

B. Bruce Bare  
107 Anderson

## Associate Dean for Academic Affairs

Stephen West  
123 Anderson

[www.cfr.washington.edu](http://www.cfr.washington.edu)

The College of Forest Resources generates and disseminates knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services. Its vision is to provide internationally recognized knowledge and leadership for environmental and natural resource issues.

Founded in 1907, the College holds a position of national and international leadership in both instruction and research. Its location in one of the world's largest forest regions provides students access to a unique urban-to-wildland world-class laboratory in which to study. Approximately 250 undergraduate and 175 graduate students are enrolled, taught by more than 50 faculty members. Students enjoy small classes and close association with faculty, as well as the diversity and superior facilities of a large research university.

The College's programs focus on the sustainability and functionality of complex natural resource and environmental systems using an integrated, interdisciplinary approach across multiple scales involving the urban-to-wildland gradient. Its programs serve society generally, and natural resource professions in particular, with graduates well equipped to contribute to discussions and solutions to resource problems facing the region and the world. Interdisciplinary research and outreach centers and cooperatives include the Center for International Trade in Forest Products (CINTRAFOR), the Water Center, the Center for Urban Horticulture (CUH), the UW Botanic Gardens (UWBG), the Olympic National Resources Center (ONRC), the Rural Technology Initiative (RTI), Stand Management Cooperative (SMC), and the Precision Forestry Cooperative. For current information on all these centers and cooperatives, please visit [www.cfr.washington.edu/research/index.html](http://www.cfr.washington.edu/research/index.html).

## Facilities

The College occupies three central Seattle campus buildings: Alfred H. Anderson Hall, the Hugo Winkenwerder Forest Sciences Laboratory, and Julius H. Bloedel Hall. In addition, the Center for Urban Horticulture, a part of the University of Washington Botanic Gardens, is located near the Union Bay natural area on the east side of the Seattle campus.

The Center for Urban Horticulture maintains a library that serves students, faculty, landscape professionals, and the public. The Center's herbarium supports fieldwork in urban horticulture, restoration ecology, and dendrology. Containing representative plant material from all parts of the United States, the collection includes dried, mounted specimens of shrubs, hardwood trees, and conifers. Another herbarium, complete in plants native to the Pacific Northwest and maintained by the Department of Biology, is available for use by the College's students.

The College's laboratory facilities represent an extensive array of modern equipment for research, including optical equipment, electronic instrumentation for a wide variety of uses, gas chromatographs, spectrophotometers, and physical-test equipment. Specific laboratories are designed to study soil chemistry and soil physics, hydrology, polymer chemistry, tree physiology, genetics, wood and extractives chemistry, physics of fibrous composites, applied mechanics, wood process technology, silviculture, ecology, paleoecology, pathology, entomology, wildlife, landscape management systems, horticultural physiology, and horticultural plant materials.

The College computing facilities include computer systems dedicated to specific research areas, a student computer laboratory, a geographical information systems (GIS) laboratory, and a local-area network with several servers offering access to the Internet and local printers.

## Office of Student and Academic Services

Director, Student and Academic Services  
Michelle M. Trudeau  
130 Anderson  
[cfradv@u.washington.edu](mailto:cfradv@u.washington.edu)

The Office of Student and Academic Services in the College of Forest Resources assists prospective students with admission to the College and advises current students, including interpretation of College and University requirements and assistance in course planning. At the graduate level, faculty advisers assist students in creating a course plan to help build an appropriate academic background for their research area.

The office keeps job listings and employer resources to help students obtain summer employment and internships while in school and permanent employment upon graduation. The office also sponsors a career fair every January. Although work experience is not required for graduation, students are strongly urged to seek summer employment relevant to their career goals.

## Research Programs

Areas of research are closely tied to the College's graduate program research areas. These include forest ecology, forest soils, forest systems and bioenergy, paper science and engineering, restoration ecology and environmental horticulture, social sciences, sustainable resource management, and wildlife science.

## Outreach Programs

The College, through its interdisciplinary centers and through collaboration with Cooperative Extension of Washington State University, undertakes and promotes continuing public and professional education for citizens of the state.

## Field Facilities

College field facilities include two major forested areas covering more than 4,000 acres, an arboretum, a natural area, and several cooperative research centers and stations. These lands offer a wide variety of terrestrial and aquatic characteristics favorable to a full range of scientific investigations. They also provide a natural-science laboratory for the many disciplines in the College concerned with the research and teaching of natural resources science and management.

The 4,200-acre Charles Lathrop Pack Experimental Forest is located 65 miles south of the University, near Eatonville, Washington. Broad forest and soil diversity in this area has led to extensive biological, management, and engineering research. A full-time resident staff manages this facility, harmonizing its public-education objectives with academic and research objectives. Rustic but comfortable facilities which provide housing and support to research programs are also used extensively for conferences both within and outside the University. The College is establishing a new Center for Sustainable Forestry at Pack Forest to be charged with discovering, teaching, and demonstrating the concepts of sustainable forestry, with special emphasis on the College's strategic themes of sustainable forest enterprise and sustainable land and ecosystem management in an urbanizing world.

The Olympic Natural Resources Center (ONRC) is a 19,000-square-foot research and education facility located on the west side of the Olympic Peninsula. The mission of the center is to conduct research and education on natural-resources management practices which integrate ecological and economic values. Innovative management methods that integrate environmental and economic interests into pragmatic management of forest and ocean resources are demonstrated. A forest management program as well as a marine program are in place to study the relationship between the terrestrial and marine environment.

The Wind River Canopy Crane is a 250-foot research crane set in old-growth forest canopy in southwestern Washington state. It is the largest canopy crane in the world and the first in a temperate forest. A research partnership between the College of Forest Resources and the U.S. Forest Service, it provides graduate students and faculty opportunities for on-site research and field trip opportunities for undergraduates.

The Lee Memorial Forest, approximately 160 acres, is located about 22 miles northeast of the University, near Maltby. This forested property provides valuable academic and research opportunities near the campus. Characterized by forest types and soils common to western Washington lowlands, Lee Forest is used extensively for short field trips and for long-term research and demonstration projects especially related to changing land uses.

The Allan E. Thompson Research Center and the Joe E. Monahan Findley Lake Reserve and Research Area in the Cedar River watershed are utilized by the College in cooperation with Seattle Public Utilities for studies in forest physiology and mineral cycling in the forest ecosystem.

The Center for Urban Horticulture, a part of the UW Botanic Gardens, has offices, laboratories, public-education resources, and field sites for teaching and experimentation along the shore of Union Bay. Its 10-acre Union Bay Gardens emphasize unusual ornamental and native woody landscape plants. The 60-acre Union Bay Natural Area, a former dumpsite now a naturalized habitat, is used by University classes and the public to study principles and practices of restoration ecology. The Douglas Research Conservatory is a modern plant-growing facility with greenhouses, growth chambers, nursery, and classrooms. The Otis Douglas Hyde Herbarium is an herbarium dedicated to plants of urban horticultural significance. The Miller Seed Vault stores seeds of Washington's rare and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Horticultural Library is the Northwest's foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center also conducts courses, lectures, and special events for the public and professionals as part of the College's outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the Center.

The University of Washington Botanic Gardens' largest facility is the Washington Park Arboretum, a 230-acre collection of trees and shrubs in a naturalistic setting on the south shore of Lake Washington. Managed in cooperation with the City of Seattle Department of Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about woody plants' diversity, natural ecology, and urban landscape use, as well as conserving endangered natural and cultivated plants. Classes in botany, dendrology, horticulture, wildlife, and landscape architecture make use of the collections, while the grounds are used for studies in soil science, ecology, and various research projects, including many independent student projects. The arboretum, established in 1934, also serves as an important public-service area to the University, offering numerous formal and informal classes for the general public and, in addition, serving the community as a public park and open space.

## Undergraduate Program

Adviser  
116 Anderson  
206-543-3077  
cfradv@u.washington.edu

The College of Forest Resources offers the following programs of study:

- \* The Bachelor of Science in Forest Resources degree with a major in environmental science and resource management. Within this major, options in landscape ecology and conservation, restoration ecology and environmental horticulture, sustainable forest management, and wildlife conservation are offered.
- \* The Bachelor of Science in Forest Resources degree with a major in paper science and engineering.
- \* Minors in environmental science and resource management; and streamside studies.

## Bachelor of Science in Forest Resources

*Suggested First- and Second-Year College Courses:*

- \* *Environmental Science and Resource Management:* T C 231, ENGL 131 (or other 5-credit English composition course); COM 220; BIOL 161-BIOL 162; CHEM 120, CHEM 220; any 5-credit VLPAs course; MATH 120 or Q SCI 291; ESRM 210.
- \* *Paper Science and Engineering:* CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238; ECON 200; ENGL 131 (or other 5-credit English

composition course); T C 231; CHEM E 260; MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122, PHYS 123; Q SCI 381; PSE 201, PSE 202, PSE 248, and PSE 450.

## Department Admission Requirements

- \* *Environmental Science and Resource Management:* Students in good academic standing may declare this major at any time.
- \* *Paper Science and Engineering:* Students may apply for freshman admission or upper-division admission. Applications are available in Student and Academic Services, 116 Anderson, or through the College of Engineering, 356 Loew, or by visiting the College Web site. Departmental deadlines are July 1 for autumn quarter, October 15 for winter quarter, and January 15 for spring quarter. Admission is competitive; completion of requirements does not guarantee admission.

## Graduation Requirements

*Environmental Science and Resource Management*

180 credits as follows:

1. *General Education Requirements (67-68 credits)*
  - a. *Written Communication (12 credits):* 5 credits English composition (ENGL 131 preferred); T C 231; and four additional credits, which are satisfied by core courses shown below.
  - b. *Quantitative and Symbolic Reasoning (20 credits):* Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
  - c. *Natural World (24-25 credits):* BIOL 161 and BIOL 162, or BIOL 180 and BIOL 200; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS/OCEAN 230 or ESS 201 or ATM S 211.
  - d. *Visual, Literary, & Performing Arts (VLPAs) (10 credits):* COM 202 or COM 220; five additional credits from the University VLPAs list.
  - e. *Individuals & Societies (I&S) (10 credits):* ENVIR/ECON 235 or ECON 200 or ECON 201; and five additional credits, which are satisfied by core courses shown below.
2. *Major Requirements (62 credits for the major):*
  - a. *Core Courses (17 credits):* ESRM 200, ESRM 201, ESRM 300, ESRM 304.
  - b. *Restricted Electives (Minimum 35 credits of 300- or 400-level courses from within the College of Forest Resources for the major; 29 to 36 such credits may come from one of the specified option course lists described below):* 15 of the credits must be at the 400 level.
  - c. *Capstone (10 credits):* ESRM 462 and ESRM 463 and ESRM 464; or ESRM 494 and ESRM 496; or ESRM 494 and ESRM 495.
3. *Free electives:* As needed to bring minimum total to 180 credits.

*Environmental Science and Resource Management with one of the following voluntary program options:*

All requirements for any of the four voluntary options are the same as for the major shown directly above.

1. *Landscape Ecology and Conservation Option (35 credits, including 29 credits from the following list):* ESRM 350, ESRM 425, ESRM 427, ESRM 430, ESRM 441, ESRM 465, ESRM 470. Minimum 6 additional credits of 300- or 400-level courses from within the College of Forest Resources to reach 35 total.
2. *Restoration Ecology and Environmental Horticulture Option (36 credits from the following list):* ESRM 331, ESRM 362, ESRM 411 or ESRM 412, ESRM 415, ESRM 444 or ESRM 451, ESRM 473 or ESRM 302, ESRM 478, ESRM 480.
3. *Sustainable Forest Management Option (35 credits from the following list):* ESRM 368; ESRM 461; ESRM 323; ESRM 470; ESRM 430; ESRM 311 or ESRM 328 or ESRM 350 or ESRM 409 or ESRM 410 or ESRM 425 or ESRM 426 or ESRM 428; ESRM 315 or ESRM 381 or ESRM 420 or ESRM 435 or ESRM 444 or ESRM 455 or ESRM 468; ESRM 320 or ESRM 321 or ESRM 400 or ESRM 403 or ESRM 427 or ESRM 465.
4. *Wildlife Conservation Option (35 credits from the following list):* ESRM 350, ESRM 351, ESRM 450, ESRM 455 (to be taken at least twice), Q SCI 477, Q SCI 482, Q SCI 483.

*Paper Science and Engineering*

1. *General Education Requirements (91 credits)*
  - a. *Written Communication (8 credits):* 5 credits English composition (ENGL 131 preferred); T C 231 (3 credits). (Additional 5 credits satisfied by PSE courses shown below.)

- b. *Mathematics and Statistics (23 credits)*: MATH 124, MATH 125, MATH 126, MATH 307; Q SCI 381 or STAT 311.
  - c. *Supporting Sciences (43 credits)*: CHEM 142, CHEM 152, CHEM 162; CHEM 237, CHEM 238; CHEM E 260; PHYS 121, PHYS 122, PHYS 123.
  - d. *Visual, Literary, & Performing Arts (VLPA) (10 credits)*: Chosen from the University VLPA list.
  - e. *Individuals & Societies (7 credits)*: ECON 200; 2 credits from the University I&S list; (3 additional credits satisfied by required PSE courses.)
2. *Major Requirements (64-65 credits)*
- a. *Chemistry and Chemical Engineering (18 credits)*: CHEM 455; CHEM E 310, CHEM E 330, CHEM E 340, CHEM E 436.
  - b. *Paper Science Courses (46-47 credits)*: PSE 201, PSE 202, PSE 248, PSE 402, PSE 404, PSE 406, PSE 450, PSE 476, PSE 477, PSE 478, PSE 479, PSE 480, PSE 481, PSE 482, PSE 487, PSE 497. All required PSE courses must be completed with at least a 2.0 grade.
3. *Electives*
- a. Technical Electives or Business Option (12 credits minimum).
  - b. Free electives to bring minimum total to 180 credits.

## Minors

### *Environmental Science and Resource Management*

*Minor Requirements*: Minimum 25 ESRM credits, 20 of which must be upper division. A maximum of 5 credits from PSE courses allowed.

### *Streamside Studies*

*Minor Requirements*: Minimum 28 credits with a grade of at least 2.0 in each course:

1. *Core courses (minimum 15 credits)*: ESS 210, ESS 230, ESS 326 or ESS 401; CEE 476 or ESRM 426; ESRM 303, BIOL 356, or FISH 447; and FISH 450, ESRM 328/FISH 328, or FISH 311.
2. 3 credits of ESRM 429
3. 10 credits from the following (extra courses not applied to the core may also count): CEE 462, CEE 476; ESRM 210 or ESRM 311; ESRM 371/ENVIR 379/SOC 379, or ANTH 457; ESRM 465, ESRM 470, ESRM 472; FISH 312, FISH 428, FISH 438/BIOL 438; GEOG 370.

## Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes*: Forest resources emphasizes interactions between biotic and human systems at landscape to regional scales. It also provides a knowledge base to answer critical questions about how individual organisms and biotic systems respond to perturbations and stresses imposed by human activities, as well as how the environment affects human behavior and institutions. This knowledge enables the design of methods for the conservation, restoration, and sustainable use of biotic systems, and is critical for environmental decision making.

The goal of the paper science and engineering curriculum is to provide students with the training, tools, and experiences needed to be successful professionals in the pulp, paper, and allied industries. At the same time, it provides a comprehensive education so graduates can effectively work and live in the world's complex society.

The goal of the environmental science and resource management curriculum is to present fundamental knowledge and problem-solving experiences that enable students to understand the interdisciplinary dimensions of natural resource and environmental sciences and management. The structure of this curriculum provides great flexibility for students to pursue specialized fields through the formal program options, which include landscape ecology and conservation; restoration ecology and environmental horticulture; sustainable forest management; and wildlife conservation; or to construct individual coursework to fit their educational goals.

Career opportunities abound in the area of environmental science and resource management in both private and public sectors. One example is the projected need in the U.S. Forest Service, where it is estimated that one-third of the workforce will be retiring within the next five years.

The Bachelor of Science in Forest Resources degree with a major in paper science and engineering. The paper science and engineering major is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, which is recognized by the Council on Postsecondary

Accreditation and the U.S. Department of Education as the accrediting agency for engineering in the United States. The program has adopted the following objectives and outcomes:

1. Graduates of the PSE program will have strong technical capability. They will have the essential knowledge and basic skills required for technical careers in the Pulp, Paper, and Allied Industries.
  - a. Students will have the ability to apply knowledge of mathematics, science, and engineering.
  - b. Students will have the ability to apply knowledge of fiber and paper physics, chemistry, and chemical engineering as it pertains to the pulp and paper industry.
  - c. Students will have the ability to design and conduct experiments, as well as to statistically analyze and interpret data.
  - d. Students will have the ability to design a system, component, or process to meet desired needs with realistic constraints.
  - e. Students will have the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
  - f. Students will have the ability to communicate effectively, both orally and written.
2. Graduates of the PSE program will be excellent problem solvers. They will be able to creatively resolve problems and exercise sound professional judgment in open-ended projects such as designing processes or solving product and production problems.
  - a. Students will be able to pose well-defined, solvable problems from complicated and loosely defined scenarios similar to those found in the pulp and paper industry.
  - b. Students will be able to apply scientific and engineering principles in open-ended projects, such as designing processes or solving product and production problems.
  - c. Students will be able to generate alternative solutions and designs, and then use sound professional judgment to choose between alternatives in open-ended projects.
  - d. Students will be able to evaluate and communicate the results of completed tasks in open-ended projects.
3. Graduates of the PSE program will have the intellectual maturity to work well within their professional organization and to contribute to society at large.
  - a. Students will be able to contribute to and lead multidisciplinary teams.
  - b. Students understand professional and ethical responsibilities.
  - c. Students will have the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
  - d. Students will know contemporary issues relevant to the pulp and paper industry.
  - e. Students will understand that life-long learning is a necessity for maintenance of professional competency.

\* *Instructional and Research Facilities*: See the main College section (above) for details.

\* *Honors Options Available*: With College Honors; With Distinction (Departmental Honors). See adviser for requirements, or link to [www.cfr.washington.edu/acad/undergrad/honors.htm](http://www.cfr.washington.edu/acad/undergrad/honors.htm)

\* *Research, Internships, and Service Learning*: The Office of Student and Academic Services regularly receives internship announcements, which are forwarded to all CFR students via email and placed in the office's Career Corner. Students are strongly encouraged to pursue these opportunities, which include work experience with federal, state, and private organizations in environmental science, forestry, engineering, conservation, wildlife, horticulture, and other related fields.

Undergraduate research opportunities are available. Students should contact faculty members in their areas of interest. There are also foreign study and field opportunities within the College. Some are formal study with faculty members, others are through other agencies. Contact the Office of Student and Academic Services for more information.

\* *Department Scholarships*: The College of Forest Resources has a strong scholarship program for majors which provides in-state tuition to students, based on merit or need. Application information can be found at [www.cfr.washington.edu/Acad/Scholarship.htm](http://www.cfr.washington.edu/Acad/Scholarship.htm).

The Washington Pulp and Paper Foundation provides scholarships for students enrolled in the Paper Science and Engineering curriculum. For information about these scholarships, contact Professor Rick Gustafson in Bloedel 364, or visit the foundation Web site.

\* *Student Organizations/Associations*: The College has student organizations which organize student symposia, field trips, parties, slide shows

and talks, public service projects, and other social activities. Current CFR student organizations can be found at [www.cfr.washington.edu/People/organizations.htm](http://www.cfr.washington.edu/People/organizations.htm).

*Of Special Note:* Some college classes include field trips or require laboratory supplies or material duplication at student expense.

## Graduate Programs

Graduate Program Coordinator  
116 Anderson, Box 352100

Graduate programs in forest resources are designed to accommodate a wide range of education and career objectives. A student may concentrate on development of advanced professional skills and knowledge or on exploration of forest-related science.

Graduate programs offered in forest resources lead to the degrees of Master of Environmental Horticulture, Master of Forest Resources in Sustainable Forest Management, Master of Science, and Doctor of Philosophy. Graduate students may center their study in one of the special fields of study within the College divisions.

## Master of Environmental Horticulture

### Admission Requirements

- \* Evidence of academic readiness for the program.
  - o Minimum 3.00 GPA in last 60 semester or last 90 quarter hours.
  - o Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
  - o Scores on the GRE (550-Verbal, 600-Quantitative, 5.0 Writing recommended).
  - o *International applicants only:* Minimum TOEFL score of 580 (237 for computer based test).
- \* Evidence of knowledge of the intended area of study.
  - o Clearly written statement of objectives in pursuing further education.
  - o Ideally, work or field experience in the planned area of study.
- \* Supporting evidence from reference persons.
  - o Recommendations from references familiar with applicant's academic ability and potential.
  - o Letters of recommendation from employers in field related to applicant's educational goals.

### Degree Requirements

45 credits, as follows:

- \* CFR 500 (1), CFR 503 (6), CFR 549 (2), CFR 561 (2), ESRM 411 (3), ESRM 451 (5), ESRM 480 (5), ESRM 481 (2); one course in policy, planning or administration (3 credits)
- \* *Internship/independent research:* A formal public presentation and written professional paper are required. A member of the EHUF faculty will advise the student on his/her project, which will be completed as CFR 601 (9 credits minimum)
- \* Electives (7 credits)

## Master of Forest Resources in Sustainable Forest Management

### Admission Requirements

- \* Evidence of academic readiness for the program.
  - o Minimum 3.00 GPA in last 60 semester or last 90 quarter hours.
  - o Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
  - o Scores on the GRE (550-Verbal, 600-Quantitative, 5.0 Writing recommended).
  - o *International applicants only:* Minimum TOEFL score of 580 (237 for computer based test).
- \* Evidence of knowledge of the intended area of study.
  - o Clearly written statement of objectives in pursuing further education.
  - o Ideally, work or field experience in the planned area of study.

- \* Supporting evidence from reference persons.
  - o Recommendations from references familiar with applicant's academic ability and potential.
  - o Letters of recommendation from employers in field related to applicant's educational goals.

### Degree Requirements

45 credits, as follows:

- \* CFR 500 (1), CFR 509 (3), CFR 526 (3)
- \* *Directed electives:* 24 credits distributed among the following four areas, with at least two classes required in each area: forest biology/ecology, forest management, forest measurements, forest policy and administration. See adviser for list of approved courses for each area.
- \* *Unrestricted electives:* 9 credits
- \* *Capstone project:* CFR 600 (5) or CFR 601 (5)

## Master of Science

### Admission Requirements

- \* Evidence of academic readiness for the program.
  - o Minimum 3.00 GPA in last 60 semester or last 90 quarter hours.
  - o Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
  - o Scores on the GRE (550-Verbal, 600-Quantitative, 5.0 Writing recommended).
  - o *International applicants only:* Minimum TOEFL score of 580 (237 for computer based test).
- \* Evidence of knowledge of the intended area of study.
  - o Clearly written statement of objectives in pursuing further education.
  - o Ideally, work or field experience in the planned area of study.
- \* Supporting evidence from reference persons.
  - o Recommendations from references familiar with applicant's academic ability and potential.
  - o Letters of recommendation from employers in field related to applicant's educational goals.

### Degree Requirements

Minimum 45 credits, to include as follows:

- \* *Orientation:* CFR 500 (1)
- \* *Social and Natural Sciences Applied to Natural Resource and Environmental Issues:* CFR 509 (3)
- \* *Disciplinary Knowledge:* Minimum 10 credits from list of approved courses according to interest area
- \* *Research Design and Quantitative Analysis:* Minimum 8 credits from list of approved courses according to interest area
- \* *Current Topics:* 2 credits (500 level), topics vary from year to year
- \* *Thesis Research:* CFR 700 (9 credits minimum)

Current interest groups are:

- \* Forest Ecology
- \* Forest Soils
- \* Forest Systems and Bioenergy
- \* Paper Science and Engineering
- \* Restoration Ecology and Environmental Horticulture
- \* Social Sciences
- \* Sustainable Resource Management
- \* Wildlife Science

## Doctor of Philosophy

### Admission Requirements

- \* Evidence of academic readiness for the program.
  - o Minimum 3.00 GPA in last 60 semester or last 90 quarter hours.
  - o Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
  - o Scores on the GRE (550-Verbal, 600-Quantitative, 5.0 Writing recommended).
  - o *International applicants only:* Minimum TOEFL score of 580 (237 for computer based test).

- \* Evidence of knowledge of the intended area of study.
  - o Clearly written statement of objectives in pursuing further education. Ph.D. applicants should have earned a master's degree, most apply for the master's and then continue on to the Ph.D.
  - o Ideally, work or field experience in the planned area of study.
- \* Supporting evidence from reference persons.
  - o Recommendations from references familiar with applicant's academic ability and potential.
  - o Letters of recommendation from employers in field related to applicant's educational goals.

### **Degree Requirements**

90 credits, to include as follows:

- \* Same as for Master of Science degree (above) with one additional course in each of the categories:
  - o Disciplinary Knowledge
  - o Research Design and Quantitative Analysis
  - o Current Topics

- \* Qualifying examination
- \* General examination
- \* Dissertation research: CFR 800 (27 credits minimum)
- \* Final examination

### **Financial Assistance**

The College has a limited number of appointments for teaching and research assistantships that provide a stipend, tuition waiver, and benefits. Teaching and research assistant responsibilities are half-time, allowing time to pursue a full academic load. Students may contact faculty directly about available research assistantships.

Fellowships without teaching or research obligations are also available. Requests for consideration must be submitted by January 15 for the following academic year. Applications are in the College's admissions packet available on the College's Web site at [www.cfr.washington.edu/Acad/grad.html](http://www.cfr.washington.edu/Acad/grad.html).

---

# The Information School

---

370 Mary Gates Hall  
Box 352840

**Dean**  
Harry Bruce

**Associate Deans**  
Robert Mason, Research  
Matthew Saxton, Academics

[www.ischool.washington.edu](http://www.ischool.washington.edu)

Never in our society's history has there been such a great need to manage so much information quickly and efficiently. The Information School is dedicated to preparing a rising generation of information leaders to embrace the challenges associated with the way we create, find, store, manipulate and share information.

The School offers four degree programs, leading to the Bachelor of Science in Informatics, Master of Library and Information Science, Master of Science in Information Management, and Ph.D. in Information Science. The School also offers certificate programs, continuing education opportunities for professionals, and service courses for undergraduates in information fluency, research strategies, and technology. Graduates of the School assume a variety of professional roles in the public, private and non-profit sectors, with positions that span from information architects to children's librarians, from Web developers to information technology (IT) managers, from network and information assurance professionals to researchers and faculty in the information field.

Our community is interdisciplinary, bringing together a variety of social science traditions, including: library and information science, computer science, sociology, communication, philosophy, and engineering. Most of our research addresses topics in the following broad categories:

- \* Ethics and Information
- \* Personal Information Management
- \* Human-Computer Interaction and Design
- \* Information Management
- \* Knowledge Organization
- \* Information Literacy
- \* Access to Information
- \* Information in Everyday Life

The School's work remains focused on the human impact of information. The research and curriculum of the school examines information systems and technology from a user-centered perspective. By retaining a focus on the human impact of information systems and technology, we build on our community values of trust, transparency, and mutual respect.

## History

Originally established in 1911, the Information School has the oldest library and information science program west of the Mississippi, and continues to offer the most extensive American Library Association-accredited library and information science degree in the Northwest region of the United States.

In 1998, the University set out to transform the School by charging it with a new mission, to become what it is today: a broad-based information school that meets the challenges and opportunities of the information age. With the addition of three new degree programs, a new dean, an esteemed faculty, and state of the art facilities, the Information School became the University's sixteenth independently organized school/college in 2001.

The School seeks to explore the theoretical and applied cutting edges of the information field and to nurture the best of both worlds: traditional library values and ever-changing information frontiers.

## Passion

The School is inspired by information, wanting everyone to know how vital information is in all aspects of life.

## Vision

The School envisions a world where more effective use of information helps everyone discover, learn, innovate, solve problems, have fun, and make a better world. Information changes lives.

## Mission

The School prepares information leaders through researching the problems and opportunities of information, designing solutions to information challenges, and making information work.

## Undergraduate Program

Informatics refers to the study of information systems and technology from a human perspective. It features the Information School's emphasis on a human-centered approach to systems design.

Informatics students study a range of information constructs, from simple systems that support personal information management to complex systems that involve vast databases of distributed information manipulated in real-time by high-speed computer technologies. They analyze national and global information policy, the management of formal information systems in organizations, and the subtleties of everyday information behavior. Also, they invent methods for representing, classifying, and retrieving information and design new information systems responsive to people's needs and values.

Adviser  
470 Mary Gates Hall  
Box 352840  
206-543-1794  
[informatics@ischool.washington.edu](mailto:informatics@ischool.washington.edu)

## Bachelor of Science

Suggested First- and Second-Year College Courses: INFO 100, an English composition course (selected from the University list), CSE 142, CSE 143, and STAT 311, courses that develop strong analytical, qualitative and quantitative reasoning, and written and oral communication skills as well as courses that provide exposure to a variety of social science fields.

## Program Admission Requirements

### Regular Admission

1. INFO 100 (5 credits); CSE 142 (4); STAT 311 (5) or QMETH 201 (4); one English composition course selected from the University list (5), with a minimum grade of 2.0 in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses. (Students may not receive credit for INFO 100 taken after CSE 142. Therefore, INFO 100 will be waived for students who have already completed CSE 142 or equivalent. If INFO 100 is waived, students make up the 5 credits by taking additional elective credits in the major.)
2. Minimum 2.00 cumulative college GPA.
3. Admission is competitive, based on the following criteria:
  - a. Overall academic performance
  - b. Grades in courses required for admission to the major
  - c. Personal statement reflecting an interest in and commitment to becoming a major in this field
  - d. Other evidence of interest in and commitment to the field (e.g., work experience, internships).Meeting the above criteria does not guarantee admission.
4. Application deadline is April 15. Students apply online at [www.ischool.washington.edu](http://www.ischool.washington.edu). Admission is for autumn quarter only.
5. Transfer students should contact the Information School as soon as they become interested in the informatics major. The School will consider courses equivalent to CSE 143 and may allow a student to be admitted provisionally on the condition that the student completes CSE 143 or equivalent with a minimum grade of 2.0 during the summer before matriculating in the program.

## Freshman Direct Admission Program (FDAP)

1. Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.
2. The number of early admission (FDAP) students will not exceed 10% of the number of majors admitted each year.

## Major Requirements

92 credits as follows:

1. Courses required for admission to the program (24 credits, as shown above)
2. *Human Centered Strand (20 credits)*: INFO 310, INFO 311, INFO 320, and INFO 380
3. *Technical Strand (13 credits)*: CSE 143, CSE 373, INFO 340, and INFO 341
4. *Integrated Strand (23 credits)*: INFO 300, INFO 370, INFO 440, and INFO 490 or INFO 491
5. *Major Electives (12 credits minimum)* selected from upper-division electives from the Information School and approved courses from outside departments.

*General Education*: Beyond the 92 credits required for the major, students must also satisfy the following:

1. English composition (5 credits)
2. Quantitative/Symbolic Reasoning (5 credits)
3. Writing courses (10 credits)
4. Natural World (20 credits)
5. Individuals & Societies (20 credits)
6. Visual, Literary, & Performing Arts (20 credits)

With courses required for the major, students automatically satisfy requirements for English composition (pre-admission English composition requirement), Quantitative/Symbolic Reasoning (STAT 311), Writing (INFO 310, INFO 311, and INFO 320), and Natural World (CSE 142, CSE 143, and INFO 340, INFO 341, and INFO 440). In addition, students satisfy a good portion of the requirements for Individuals & Societies (INFO 310, INFO 311, and possible electives). They satisfy requirements for Visual, Literary, and Performing Arts by taking courses outside the major. (INFO 424, an elective in the major, also counts towards the VLPA requirement.) Students must earn a minimum 180 credits to graduate.

## Continuation Policy

Students are expected to make satisfactory progress towards attainment of the Bachelor of Science in Informatics degree. Under normal circumstances, an informatics major attending full-time would make satisfactory progress by completing the major requirements in approximately two years after admission to the major, or within three years for students admitted to the major as sophomores. Lack of academic progress may be evidenced by low scholarship as well as excessive course repeats, course drops, or University withdrawals and cancellations. For more details, see adviser.

## Student Outcomes

- \* *Learning Objectives and Expected Outcomes*: The Informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science.

Graduates of the Informatics program are qualified for jobs in the information and technology industry and in business, public service, and other various professions. Possible job titles include security and performance analyst, Web developer, information management specialist, network administrator, product developer, business analyst, usability engineers, and many others.

The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information and management

science, information science, biomedical informatics, business and accounting, and information technology.

Informatics student learning outcomes include the ability to assess people's information needs and behavior; ability to design information systems to meet people's information needs; ability to work with information technologies (e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of information technologies on people; ability to communicate effectively in writing and speaking; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All Informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- \* *Instructional and Research Facilities*: Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia, Web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

- \* *Honors Options Available*: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- \* *Research, Internships, and Service Learning*: Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.

Informatics students are extensively engaged in faculty research and internships. Over half of all informatics students participate in the University's Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).

- \* *Departmental Scholarships*: The Henry Scholarships, in the amount of approximately \$1500 each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.
- \* *Student Organizations/Associations*: Undergraduates participate in a number of the School's many student organizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technology (ASIST).

*Of Special Note:*

*Capstone Projects*: Students often use their capstone projects (INFO 490) to identify interest areas, develop skills, and prepare for future pursuits. The capstone projects, with titles such as "Making Environmental Policy: Human Centered Analysis of Knowledge Sharing Between Cross-Functional Groups" and "Project Management in an Open Source Developing Community," encompass a wide range of topics. Through capstone projects, students demonstrate the skills, understandings, and competencies they can successfully use to prepare for employment and graduate studies.

*Information Sessions*: Prospective students are encouraged to attend an Informatics information session. For a schedule of information sessions, visit the School's Web site.

## Graduate Programs

Graduate Program Coordinator  
370 Mary Gates Hall, Box 352840  
206-543-1794  
mlis@ischool.washington.edu

The School offers graduate programs leading to the Master of Library and Information Science (M.L.I.S.), the Master of Science in Information Management (M.S.I.M.), and the Doctor of Philosophy in Information Science.

### Master of Library and Information Science

#### Admission Requirements

The MLIS program is offered in two delivery modes: residential (on-campus, 2 year program) and distance (online with quarterly residencies, 3 year program). When applying applicants must indicate for which program they are applying. Applications should include the following:

- \* A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
- \* Three letters of recommendation
- \* Three letters of recommendation
- \* Personal statement of educational and professional goals and responses to two supplemental questions
- \* Official transcript from each relevant institution attended
- \* GRE Scores. Applicants with an earned doctorate (Ph.D., M.D., J.D.) are not required to submit GRE scores.
- \* TOEFL score (for international students)

#### Degree Requirements

63 credits, as follows:

- \* *Core curriculum (34 credits)*: LIS 500 The Life Cycle of Information (2), LIS 510 (4), LIS 520 (4), LIS 530 (4), LIS 540 (5), LIS 550 (4), LIS 560 (3), LIS 570 (4), LIS 580 (4)
- \* *Electives (29 credits)*
- \* *Portfolio or Thesis Option*: MLIS students must complete either a portfolio or thesis in order to graduate.
- \* *Directed Fieldwork*: LIS 590 (2-4, max. 8) is an elective course designed to provide students with an opportunity to work in an information environment under the supervision of an experienced professional mentor.

### Master of Library and Information Science, Law Librarianship

The Law M.L.I.S. program is designed to prepare lawyers with an existing JD degree to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms.

#### Admission Requirements

- \* A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
- \* Three letters of recommendation
- \* Personal statement of educational and professional goals and responses to two supplemental questions
- \* Official transcript from each relevant institution attended
- \* Earned J.D. prior to enrollment in the M.L.I.S. program
- \* TOEFL score (for international students)

#### Degree Requirements

44 credits, as follows:

- \* *Core curriculum (23 credits)*: LIS 500 (2), LIS 510 (4), LIS 520 (4), LIS 530 (4), LIS 540 (5), LIS 550 (4)
- \* *Law librarianship courses (17 credits)*: LIS 591 (3), LIS 592 (3), LIS 593 (3), LIS 594 (4), LIS 595 (4)
- \* *Directed fieldwork*: LIS 590 (4)

## Master of Science in Information Management

#### Admission Requirements

- \* A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
- \* Three letters of recommendation
- \* Personal statement of educational and professional goals
- \* Official transcript from each relevant institution attended
- \* GRE or GMAT Scores. Applicants with an earned doctorate (Ph.D., M.D., J.D.) are not required to submit GRE or GMAT scores.
- \* TOEFL score (for international students)

#### Degree Requirements, Day Option

65-71 credits, to include:

- \* *Core curriculum*:
  - o *Foundational core courses*: IMT 480 (4), IMT 440 (1-5, max. 5), IMT 500 (1)
  - o *Technology core courses*: IMT 540 (4), IMT 541 (5), IMT 542 (3)
  - o *Management core courses*: IMT 580 (4), IMT 581 (3), IMT 582 (4)
  - o *Integrating core courses*: IMT 598 (3), IMT 595 (3-5)
- \* *Electives (24 credits)*: Beyond the required core courses, students have the option of crafting a program of study, in collaboration with their faculty adviser, specific to their interests and career goals. M.S.I.M. course electives include, among others, principles of information retrieval systems, strategic planning and evaluation, and marketing foundations for information professionals.
- \* *Internship*: M.S.I.M. internships are structured around a course (IMT 590) and are designed to provide students with an opportunity to work in an information environment under the supervision of an experienced professional mentor. During the internship placement (lasting a minimum of two academic quarters), the student works to meet meaningful learning objectives that have been mutually defined by student and internship supervisor.

#### Degree Requirements, Executive Option

47-53 credits, to include:

- \* *Core curriculum*:
  - o *Foundational core courses*: IMT 480 (4), IMT 440 (1-5, max. 5), IMT 500 (1)
  - o *Technology core courses*: IMT 540 (4), IMT 541 (5), IMT 542 (3)
  - o *Management core courses*: IMT 580 (4), IMT 581 (3), IMT 582 (4)
  - o *Integrating core courses*: IMT 598 (3), IMT 595 (3-5)
- \* *Electives*: Students complete a minimum of 11 credits of electives, which includes advanced M.S.I.M. courses, relevant upper level coursework in other academic disciplines, or an Independent Study (IMT 600).

## Doctor of Philosophy

Ph.D. Adviser  
370 Mary Gates Hall  
206-543-1794  
phd@ischool.washington.edu

#### Admission Requirements

- \* Current curriculum vitae highlighting any academic and/or work experience, honors, publications, presentations, and research experience
- \* Three letters of recommendation
- \* Personal statement of educational and professional goals
- \* Official transcript from each relevant institution attended
- \* GRE Scores. Applicants with an earned doctorate (Ph.D., M.D., J.D.) are not required to submit GRE scores.
- \* TOEFL score (for international students)

#### Degree Requirements

90 credits minimum, to include:

- \* *Required courses*: INSC 501 (3), INSC 570 (4), INSC 572 (5), INSC 500 (2); two research practica; two teaching practica; at least one of the following quantitative methods courses: BHOST 502 (4), BHOST 517 (4), COM 520 (5), CS&SS 507 (3), PSYCH 524 (4)
- \* Additional elective coursework selected in consultation with the faculty advisers

- \* 18 graded credits in courses at the 500 level and above (taken prior to General Exam)
- \* 60 credits taken prior to General Exam
- \* 27 dissertation credits (INSC 800)
- \* Preliminary Review determined by a School-based Advisory Committee at the end of the required first-year of full-time study
- \* General Examination upon completion of coursework and practica components to attain formal candidacy for the Ph.D. program (Candidate's Certificate)
- \* Successfully defend a dissertation before a Supervisory Committee (Final Examination)

## Financial Aid

The University of Washington Financial Aid Office administers a variety of government and University funded financial aid programs for which applicants must submit the Free Application for Federal Student Aid form (FAFSA). For more information, contact the UW Financial Aid Office, 105 Schmitz Hall. Information on the FAFSA is also available online. Graduate Assistantships and Scholarships

Financial aid options for full-time students may include graduate assistantships and scholarships. Graduate assistants generally work 220 hours per quarter, and receive a tuition waiver as well as a monthly salary and medical benefits. Prospective M.L.I.S. and M.S.I.M. students are encouraged to apply during the admissions process and throughout the year as other positions become available. Please visit the Student Employment Opportunities page to apply for open positions. Ph.D. students are automatically considered for graduate student service appointments.

M.L.I.S. scholarships are awarded on a basis of financial need, based on information from the Free Application for Federal Student Aid (FAFSA), and academic merit.

Information regarding additional sources of financial aid, from sources outside the Information School, is available at the Information School Financial Aid Resources Web page.

## Special Research Facilities

Located on the third and fourth floors of Mary Gates Hall, one of the University's high-technology buildings, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia, Web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 10,000 square feet of offices, workstations, research labs, and meeting spaces.

For more information, please visit the School's Web site at [www.ischool.washington.edu/technology/](http://www.ischool.washington.edu/technology/).

## Continuing and Professional Education

The Information School works with University of Washington Educational Outreach to offer classes, workshops, and certificate programs for continuing education and professional development. Current certificate programs include Web Solutions, Information Assurance and Cybersecurity, and School Library Professional. Those interested in continuing education or certificate programs should contact UW Educational Outreach, 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105. Phone: 206-543-2320 or see [www.extension.washington.edu/ext/](http://www.extension.washington.edu/ext/).

---

# Interdisciplinary Graduate Programs

---

These programs are administered by interdisciplinary groups of the Graduate School. Certain courses carrying the particular program prefix appear below; other courses with the same prefix appear elsewhere as indicated. Other courses included in these programs are selected from many disciplines throughout the University and carry the prefix of the respective discipline.

---

## Astrobiology

C319 Physics-Astronomy Building  
depts.washington.edu/astrobio

Astrobiology -- the study of life in the universe -- investigates the wide range of multidisciplinary factors that may influence the origin and evolution of life on Earth and beyond.

This investigation demands an intense interdisciplinarity, and the Astrobiology Program at the University of Washington is creating a new community of scholars, investigators, and educators. This community is skilled in multidisciplinary methods and thinking and pushes the boundaries beyond the commonplace with intellectual vigor, creativity, and rigorous method.

Astrobiology at the University of Washington builds on the strengths of traditional academic structure to transcend the limits of specialization through the synergy of multidisciplinary cooperation in both research and education.

The internationally recognized graduate certificate program offers a rigorous, interdisciplinary curriculum in cooperation with the Ph.D. programs of the participating departments. The program's unique features that bond students and faculty from widely disparate departments. Participating graduate students gain the personal and professional skills necessary to successfully engage in multidisciplinary collaborations.

The emerging field of astrobiology benefits from and is shaped by the perspectives of multiple disciplines directed at a common problem. So, too, does the astrobiology community of scholars and researchers at the University of Washington benefit from the breadth of perspective offered by diversity in culture and race among the program's participants.

## Graduate Program

Graduate Program Coordinator  
C304 Physics-Astronomy, Box 351580  
206-685-2392  
office@astro.washington.edu

## Graduate Certificate Program

### Admission Requirements

The University of Washington academic departments participating in the Graduate Certificate Program in Astrobiology provide expertise in all the primary disciplines collaborating in the study of Astrobiology:

- \* Aeronautics and Astronautics
- \* Astronomy
- \* Atmospheric Sciences
- \* Biochemistry
- \* Biology
- \* Genome Sciences
- \* Earth and Space Sciences
- \* History (of Science)
- \* Microbiology
- \* Oceanography

Students wishing to participate in the Astrobiology Graduate Certificate Program must be accepted for admission in the usual way by the Ph.D. program of one of these departments.

Please contact the participating departments of your choice for Ph.D. program application requirements and deadlines.

## Certificate Requirements

15 credits minimum, as follows:

- \* ASTBIO 501 (4), ASTBIO 502 (4)
- \* Three astrobiology-only seminar series (1 cr)
- \* One cognate course approved by the student's advisory committee to ensure sufficient breadth (see program Web site for current list of cognate courses)
- \* One quarter of a research rotation in an area outside the student's home discipline (3 to 10 credits)
- \* Participation in a minimum of three workshops comprising the capstone experience (non-credit)
- \* Astrobiology ethics seminar (variable credits)

A minimum of 15 credits are required. Additional credits may be earned through:

- \* Other approved cognate courses
- \* Astrobiology public lecture series (1 credit)

Successful completion of the program requires a minimum cumulative GPA of 3.00 for all courses required for the certificate and a grade of 2.7 or higher for each elective course counted toward the certificate.

---

## Biomedical Structure and Design

J405 Health Sciences  
depts.washington.edu/bmsdwp

## Graduate Program

Graduate Program Coordinator  
G514 Health Sciences, Box 357420  
206-543-5474

The department's graduate program is directed toward the education of doctoral students who anticipate careers that will involve teaching or research in the biomedical sciences. Graduates from the program have a broad knowledge of biological structure at all levels, from the molecular to the human anatomical, with a major emphasis on the cellular level.

Graduate students select research and teaching options in their program. The research options are designed to provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. Teaching options prepare the student to teach in one of the anatomical subdisciplines: human anatomy, neuroanatomy/neurobiology, histology, embryology/developmental biology, cell biology, and macromolecular structure.

## Master of Science

### Admission Requirements

- \* A minimum GPA of 3.00
- \* A bachelor's degree in one of the following or a related area: chemistry, biology, physics, biochemistry, or biophysics.
- \* GRE and advanced GRE in either Chemistry, Biochemistry, Biology or Physics.
- \* The minimal course requirements for successful applicants are:
  - o *Chemistry*: General, organic, and physical
  - o *Physics*: One year
  - o *Mathematics*: One year of calculus; multivariable calculus and/or linear algebra are strongly recommended
  - o *Biology and/or Biochemistry*: One year general biology plus one advanced course in biology or biochemistry
- \* Undergraduate research experience is strongly recommended.
- \* International students must have a minimum TOEFL score of 600.
- \* International students hoping to study with BMSD faculty in the Chemistry Department must have a minimum TSE score of 55.

## Degree Requirements

36 credits, as follows:

- \* *Required courses:* BIOC 530 (3); BMSD 540, BMSD 541, BMSD 542 (2, 2, 2); BMSD 520 (0.5) to be taken every quarter
- \* 12 graded credits of elective courses covering at least three of the four BMSD categories of topics: Biomolecular Structure, Techniques in Biomolecular Structure, Molecular and Cellular Biology, and Chemistry
- \* At least one sequence of Biomedical Research Integrity workshops in the first or second year of the program. The Biomedical Research Integrity (BRI) Series is a sequence of lectures and workshops offered during summer quarter each year.
- \* *Teaching:* In order to gain practical teaching experience, students in the program will serve as teaching assistants for two quarters.
- \* *Research:* Students rotate through a minimum of two and a maximum of three participating laboratories during their first year. The opportunity exists for students to do an early rotation during summer quarter.

---

## Biology Teaching

protist.biology.washington.edu/teachers

## Graduate Program

Graduate Program Coordinator  
222 Hitchcock, Box 355320  
206-543-1689

The Graduate School Biology Teaching Group offers an interdisciplinary program that leads to the degree of Master of Science in biology for teachers. Although designed specifically for biology teachers in K-12 schools and community colleges, other life science educators, such as those in environmental learning centers, may find the program especially worthwhile. The program emphasizes broadening the student's understanding of the various fields of biological science, with the improvement of the student's effectiveness as a teacher as the primary goal. Opportunities for course work within the departments of the University in biological science and science education are provided. Each student is asked to perform an in-depth study of a biological science problem in the context of its relevance to the teaching of biological science. Facilities and guidance are provided by a sponsoring professor and advisory committee drawn from the Biology Teaching Group and the several biological science departments of the University.

## Master of Science

### Admission Requirements

- \* Secondary teaching certificate. (Uncertified teachers employed in private schools, community colleges, or other educational facilities must provide evidence of professional involvement in teaching.)
- \* Bachelor's degree in biology or closely related field. Students in related fields must have adequate preparation in science.
- \* Minimum GPA of 3.00 in the most recent 90 graded quarter credits (60 semester credits)
- \* Graduate Record Examination Test scores
- \* Two or three letters of recommendation.
- \* Statement of professional experience and objectives.

### Degree Requirements

- \* 36 credits, 18 of which must be graduate level and 18 must be graded. These categories are not mutually exclusive.
- \* All coursework must be at or above the 400 level.
- \* Each student plans a program to meet his or her own educational objectives, selecting at least one course from each of the following areas: botany, genetics, microbiology, zoology, and from the College of Education. One course in biochemistry is also required unless already completed in prior academic work. Courses in biomedical history, fisheries, forest resources, environmental studies, etc. may be appropriate for the student's interests. The Graduate Program Coordinator assists the student in this planning.

## Environmental Management

274 Mary Gates Hall  
depts.washington.edu/poeweb/gradprograms/envmgt

The graduate certificate in environmental management (EM) is an interdisciplinary program designed to prepare students to contribute to sustainable utilization and enhancement of the natural and human environment. Through coursework, seminars, and a capstone consulting project, students acquire the tools to solve real-world environmental problems via the three avenues of science, policy, and business. The program provides an excellent education and training opportunity for a diverse array of graduate students preparing for careers in the broad field of environmental affairs.

Key benefits of the program are:

- \* Students participate in a community of faculty and students from a multitude of departments who share the common goal of environmental stewardship and sustainability.
- \* Students explore environmental problems, and develop solutions, in a multidisciplinary environment, incorporating a wide range of perspectives and priorities.
- \* Students receive a printed certificate and record in their transcript from the Graduate School to document completion of the interdisciplinary program in Environmental Management.

The flexible curriculum is suitable for students from many backgrounds, such as engineering, physical and natural sciences, public policy, economics, geography, public health, and political science, to name a few.

There is no other such interdisciplinary educational experience available to graduate students at the University of Washington at this time.

### Eligibility

All students enrolled in graduate and professional degree programs in any school of the University of Washington are eligible to apply.

Prior to admission, students must have completed a one-quarter upper-level or graduate-level course in applied quantitative methods (e.g., microeconomics, numerical modeling, applied statistical methods) or pure quantitative methods (e.g., mathematics or statistics); and social or natural science.

Facility with written argument and communication is a prerequisite. This requirement is demonstrated in the letter of application.

### Steering Committee

The program is governed by the Steering Committee for Environmental Management.

## Graduate Program

Graduate Program Coordinator  
274 Mary Gates Hall  
Box 352802  
206-221-6129  
envirmgt@u.washington.edu

The certificate's courses and projects have been chosen to prepare students to contribute legal, scientific, social science, and technical expertise to environmental decision making at the local, national, and international scales. Students are required to broaden their knowledge and skills base beyond their home discipline; to read material from other fields with critical facility; to understand and appreciate the goals and analysis methods common to other fields; and, perhaps most importantly, to appreciate, communicate with, and collaborate with experts from other fields, who have different perspectives and priorities.

### Certificate Requirements

21 credits, as follows:

- \* Three core courses (10 total credits, actual courses vary by year)
- \* Completion of a team-based keystone project (ENVIR 491, 8 credits)
- \* Participation in the Henry Luce Environmental Management speaker series (included with keystone credits)

\* 3 credits of electives selected in consultation with the Graduate Program Coordinator and approved by the EM Admissions Committee

---

## Global Trade, Transportation, and Logistics Studies

313 Loew  
depts.washington.edu/gttl

The aim of the graduate certificate program in Global Trade, Transportation, and Logistics (GTTL) is to enable graduate students to augment their degree programs in preparation for careers that demand the combined knowledge of trade, transportation, and logistics. Particular attention is directed to the study of activities involved in the flow of goods from point of origin to point of consumption on a global scale. The wide range of issues addressed include the management of the intermodal connections among maritime, aviation, and overland modes of transport; environmental and energy concerns; advancements in telecommunications; and the legal, regulatory, and technological infrastructures that facilitate global commerce and transportation.

The GTTL graduate certificate program is responsive to the needs of government and industry for trained university graduates. The program is overseen by the Interdisciplinary Committee on Global Trade, Transportation, and Logistics. Members come from the University and the private and public sectors. GTTL works with leaders in business and government organizations to develop internships and jobs, in addition to offering a number of scholarship opportunities for graduate students. The GTTL certificate is based on a set of course requirements to be fulfilled in conjunction with the student's existing graduate degree program.

### Interdisciplinary Committee

The Interdisciplinary Committee periodically reviews the content of the core courses, recommends instructors, maintains the list of eligible electives, and coordinates with course instructors regarding scheduling and prerequisites. The committee is assisted in these tasks by the lead core-course instructor, the program director, the program assistant director, and the Graduate School staff, as appropriate. The committee also oversees the policy on admission to the graduate certificate program.

## Graduate Program

Graduate Program Coordinator  
313 Loew, Box 352193  
206-616-5778  
gttl@u.washington.edu

Students associated with GTTL receive the Graduate Certificate upon completing the program's requirements and obtain their degrees through cooperating academic units. Students admitted into graduate degree programs in the following units are eligible for the GTTL graduate certificate: Aeronautics and Astronautics, Business Administration, Civil and Environmental Engineering, Communications, Economics, Education, Forest Resources, Geography, International Studies, Law, Marine Affairs, Political Science, Public Affairs, Technical Communication, and Urban Design and Planning. Graduate students from other departments may be admitted on an ad hoc basis. GTTL prepares students for careers in international trade, transportation, and logistics by offering a comprehensive program encompassing selected courses from the aforementioned separate disciplines. Those students completing the graduate certificate receive an appropriate notation on their transcript and a Letter of Achievement, signed by the head of the student's academic unit and the Dean of the Graduate School.

### Certificate Requirements

A minimum of 20 credits: two core courses (8 credits) and four elective courses (at least 12 credits).

The core courses -- GTTL 501 and GTTL 502 -- provide a basic overview of the academic theories, political-economic structures, industrial dynamics, public policies, and strategic issues concerning the study, business, and regulation of global trade, transportation, and logistics.

Students select electives from a continually updated list. Most electives (and core courses) may also satisfy a student's home department

requirements. At least one elective must come from outside the home department to reinforce the interdisciplinary objective of the certificate program. A substitution policy developed by the committee assures that an appropriate mix of electives can be found for each student. GTTL 600 (Independent Study) and GTTL 601 (Internship) provide an alternative means to gain elective credits.

---

## Health Services Administration

depts.washington.edu/mhap

### Graduate Program

Graduate Program Coordinator -- In-Residence and Executive Programs  
H660 Health Sciences, Box 357660  
206-543-8778  
mhap@u.washington.edu

The Graduate Program in Health Services Administration Group offers two programs of study leading to the Master of Health Administration (M.H.A.) degree: an in-residence program and an executive program. The M.H.A. degree is accredited by the Accrediting Commission for Education in Health Services Administration. It provides the educational foundation for careers in management, planning, consulting and policy-making in ambulatory care organizations, hospitals, long-term care facilities, mental health care organizations, government agencies, planning agencies, and other organizational settings in the health field. The curriculum is designed to be interdisciplinary with a faculty drawn from the Graduate Schools of Public Health and Community Medicine, Business Administration, Public Affairs, Nursing, Medicine, and Law. Concentrations of study may vary according to the student's academic interests and career objectives. In addition to academic work, in-residence M.H.A. students are strongly encouraged to participate in an internship experience in a health facility or agency typically under the preceptorship of the administrator or director of that organization.

Concurrent degree programs combining health administration with business administration, medicine, law, or public administration are also offered. These curricula (with the exception of the M.H.A./M.D. and M.H.A./J.D.) typically require three years of intensive academic study and culminate in joint degrees (M.H.A./M.B.A., M.H.A./M.D., M.H.A./M.N., M.H.A./M.P.A., M.H.A./J.D.).

The Executive Master of Health Administration program, launched in January 1998, is designed primarily for mid-career physicians and other clinical practitioners, as well as experienced health services managers, who have demonstrated interest or competency in administration or management. It offers advanced curriculum in planning, organizing, and implementing programs that improve the cost-effectiveness and quality of patient care. Courses meet once each month for three-day sessions (typically Thursday through Saturday) for 24 months (October to September). This program structure allows practicing professionals to continue their careers while gaining a graduate degree.

Course listings may be found under the School of Public Health and Community Medicine, Department of Health Services section of this catalog.

### Application Requirements

Applicants to the in-residence program must submit, in addition to Graduate School admission requirements, a supplemental program application, four narrative statements, a resume, a self-assessment, three recommendations, and scores from either the GRE or the GMAT. MCAT or LSAT scores are accepted for relevant concurrent degree applicants. Informational interviews with members of the program faculty may be requested but are not required for the formal admission review process. Relevant health services experience is preferred. Applicants are accepted for autumn quarter only of each year.

Application deadline is January 15. Applications received after this date (U.S. and Canadian only) are considered on a space-available basis.

Applicants to the executive program must submit the same application materials as listed above for the in-residence program. Priority for admission is given to applicants with medical/clinical training and professional experience. Applicants are accepted for autumn quarter only of each year. Applications are reviewed following the preferred deadline of

April 30. Applications received after this date (U.S. and Canadian only) are reviewed on a space-available basis.

Applicants can expect to hear about the status of their application within approximately four weeks of the application deadline. Those interested in applying should contact the program office as soon as possible to inquire about availability and the application process.

Earlier application deadlines and additional documentation are required for international applicants.

## Financial Aid

Financial support for current M.H.A. students may be available from several sources: loans, work study positions, internships, possible outside fellowships, and possible teaching or research assistantships outside the program. For more information on financial aid, contact the UW Office of Student Financial Aid (105 Schmitz Hall, Box 355880, 206-543-6101, [osfa@u.washington.edu](mailto:osfa@u.washington.edu)) or the M.H.A. program office.

## Research Facilities

In addition to its University facilities, the program makes extensive use of community health facilities and agencies for research and training.

---

# Molecular and Cellular Biology

[depts.washington.edu/mcb](http://depts.washington.edu/mcb)

## Graduate Program

Graduate Program Coordinator  
T466 Health Sciences, Box 357275  
206-543-0253  
[mcb@u.washington.edu](mailto:mcb@u.washington.edu)

The Molecular and Cellular Biology Program (MCB) is a leader in applying the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The goal of the doctoral program is to broadly train students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. This program is appropriate for students interested in future careers in research and teaching in academia as well as biotechnology and pharmaceutical companies.

Twelve departments across three schools have faculty members actively pursuing research in molecular and cellular biology. The departments participating in the program include Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genome Sciences, Immunology, Microbiology, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics.

At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of Basic Sciences and Molecular Medicine participate in the joint Molecular and Cellular Biology graduate program. Shared FHCRC facilities are available for electron microscopy, flow cytometry, tissue culture, and image analysis. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide further support for the research effort.

Recently the MCB Program has established a relationship with the Institute for Systems Biology. This collaboration allows access for students to labs conducting research using a systems approach to biology.

Faculty Interests

Over 250 faculty members from the UW and FHCRC are researching molecular and cellular biology and are skilled in the training of graduate students. Faculty research interests encompass both prokaryotic and eukaryotic cells in the following general areas: genetics, cell biology, neurobiology, immunology, virology, molecular structure, developmental biology, cancer biology, plant biology, genomics/proteomics, and microbiology.

## Doctor of Philosophy

### Admission Requirements

- \* Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.
- \* GRE scores. General Test. A Subject Test (e.g., Biology, Biochemistry, Chemistry) is not required but highly recommended.
- \* Letters of recommendation
- \* Statement of purpose

### Degree Requirements

90 credits, to include:

- \* *Credit Requirements:* MCB students complete 21 graded credits of coursework with 9 credits of the CONJ series and 12 credits of graded elective courses. M.S.T.P. students receiving a Ph.D. through the MCB Program are required to have 18 graded credits, and should petition the MCB directors to accept medical school courses in lieu of the remaining 3 credits.
- \* *First Year:* Students complete most of their formal course requirements, select a permanent adviser, and establish a Doctoral Supervisory Committee. A typical first-year class schedule includes six five-week modules of the MCB conjoint series, three lab rotations, three quarters of literature review and one or more graded elective classes. Following the third rotation, students generally choose a permanent adviser in whose lab they will pursue research for the rest of their educational career, generally three to four years. During the summer, students complete the Biomedical Research Integrity Lecture Series.
- \* *Second Year:* Students form their Doctoral Supervisory Committee by the end of December, define their doctoral projects, take additional elective courses, participate as teaching assistants for a minimum of one quarter, complete either a second academic teaching assistantship or a science education experience, and hold their committee meeting. Students form their doctoral Supervisory Committees by the end of December, define their doctoral projects, take additional elective courses, participate as teaching assistants for two quarters, and hold their committee meetings.
- \* *Third Year and Beyond:* By the end of spring quarter of the third year, the student completes the General Examination and is conferred official Ph.D. Candidacy by the Graduate School. The student then focuses on the dissertation research and continues to meet with the Supervisory Committee each spring quarter to report on research progress and plans for the coming year. When the Supervisory Committee agrees that a student is ready, the Final Examination is scheduled. Upon successful completion of the Final Examination and acceptance of the completed dissertation by the Graduate School, a student is conferred the degree of Doctor of Philosophy.

## Financial Aid

The MCB Program provides a stipend plus tuition for the first year of study. At the end of the first year of study, students choose a doctoral committee, and subsequent years of support are provided by the department of the committee chair. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

---

# Museology

[www.museum.washington.edu/museum](http://www.museum.washington.edu/museum)

## Graduate Program

Graduate Program Coordinator  
Burke Museum, Box 353010  
206-616-8280

The Museology graduate program is designed to provide the generalized training, knowledge, and skills necessary to pursue a professional career in museum work. The program is directed toward the training of a broad range of museum professionals interested in curation and management of collections in anthropology, art, botany, geology, history, and zoology as well as in interpretive programs and museum administration.

Courses include required core museology subjects as well as a range of classes offering students the chance to specialize in interest areas. Coursework is divided between the theoretical and practical aspects of museum operations. Classes take the form of lecture courses, seminars, special lectures by guest speakers, field trips, laboratory and collection management courses, practicums and internships.

Practical experience, an essential component of the program, is provided by several museological institutions at the University of Washington, including the Thomas Burke Memorial Washington State Museum, the Henry Art Gallery, the Herbarium, the Arboretum, the Fish Collection, and the University Libraries. The Burke Museum acts as the host of the Museology program. Located on the campus of the University of Washington, the Burke Museum is Washington state's natural-history and anthropology museum, and is the oldest and largest natural-history museum in the Northwest. It has nationally and internationally ranked collections focusing on the anthropology, geology, and zoology of the Pacific region and Pacific Rim.

## Program Requirements

The Museology graduate program takes two years to complete, consisting of six quarters of academic study and research. During the first year, students carry on average between 10 and 15 credits each quarter; during the second year, the number of credits may vary depending on research, practicum, and internship work. Students may enroll part time with permission from the program director.

Requirements for successful completion of the Master of Arts degree include:

1. Completion of a minimum of 36 quarter credits, including 27 course credits and 9 thesis or thesis-project credits, with at least 18 credits of coursework numbered 500 or above, including a thesis or thesis project.
2. A minimum of three quarters of full-time residence credit or part-time equivalent.
3. Demonstration of reading competence in one foreign language, if required by the student's supervisory committee due to the student's area of specialization.
4. Completion of an internship in an off-campus museum or related agency approved by the supervisory committee prior to submission of the student's thesis or thesis project.
5. Presentation of a thesis proposal by the beginning of the fourth quarter of study.
6. Successful completion of an oral examination, covering both the thesis topic and the field of museology in general, following submission of the thesis or thesis project.
7. Completion of all degree requirements within six years.

The following courses are required of all students unless exempted by petition to the Program Coordinating Committee or credited for relevant course work completed at other universities: MUSEUM 480, MUSEUM 481 or MUSEUM 490 or MUSEUM 491, MUSEUM 482, MUSEUM 483, MUSEUM 498, MUSEUM 590, MUSEUM 591, MUSEUM 592, MUSEUM 593 or MUSEUM 594, MUSEUM 595, MUSEUM 600, MUSEUM 700 or MUSEUM 710. In addition, two or more courses are required in an academic discipline relevant to the area of specialization.

The Museology program also offers a Graduate Certificate in Museum Studies as an option for graduate students in other degree programs at the University. To qualify, students must take a specified minimum set of key courses in areas that emphasize either collection research and management, or museum administration and interpretation, to include hands-on work experience. Information and application materials for the certificate can be obtained from the Museology program office.

## Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications completed and postmarked on or before this date will be reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

# Near and Middle Eastern Studies

[www.grad.washington.edu/inter/nme.htm](http://www.grad.washington.edu/inter/nme.htm)

## Graduate Program

Graduate Program Coordinator  
311 Loew Hall, Box 352192  
206-543-6398

The interdisciplinary Ph.D. program in Near and Middle Eastern Studies is designed for students who wish to pursue research with a comparative perspective in Near Eastern languages and literature: Arabic, Hebrew, Persian (or Dari or Tajik), Turkish and Central Asian Turkic languages; Near Eastern linguistics; Islamic topics, namely, Islamic law, history, institutions, theology, and mysticism; comparative religion: Judaism, Christianity, and Islam; and interdisciplinary investigations of modern topics using the social sciences. The program is administered by an interdisciplinary Graduate School faculty group. The program of studies includes courses offered in the Department of Near Eastern Languages and Civilization, the Jackson School of International Studies, and other departments on campus. Students in the program must take courses in both the humanities and social sciences.

## Degree Requirements and Satisfactory Progress

Specific course work and areas of concentration will be determined by the student's interests within the framework of the degree and satisfactory progress requirements listed below.

1. Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization; Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination administered by the program.
2. Within three years of admission, completion of two advanced courses in the humanities, one of which must be in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one of which must be in the Department of History. These courses are in addition to work the student may have done at the B.A. and M.A. level.
3. Within three years of admission, completion of a graduate seminar. Two graduate seminars are required if none was taken at the M.A. level.
4. A student will be expected to have studied three languages, two of which must be regional languages and one of which must be a "Western" European language other than English, such as French, German, Italian, Russian, or Spanish. The student's Supervisory Committee will decide whether a fourth language will be required and whether the fourth required language will be European or regional. Students pursuing language-related work may anticipate a fourth required language, whereas those pursuing social-science-related studies may not. Before the General Exam listed below may be taken, the student must complete the language requirements including the second-year level in a regional language different from the two languages offered at the time of admission if both were not regional languages.
5. *Disciplinary Method and Theory Requirements.* For all students conducting field work or working with documents, whether social science or humanities focused, and for all social science-oriented students, the following courses are strongly encouraged: (a) ANTH 550, Field Techniques of Anthropology, and (b) POL S 491, Political Research Design and Analysis; or (c) their equivalents in appropriate disciplines.  
  
For those students doing both humanities-oriented research and not conducting field work, two method and theory courses in the appropriate discipline or disciplines (e.g., comparative literature, philosophy) are required.
6. *Disciplinary Core Courses.* Each student is required to take two disciplinary core courses in the appropriate fields. Core courses (or field courses) survey the literature, methods, and theoretical issues involved in a broad field of inquiry, as opposed to elective topical courses, which cover a much smaller area. Core courses should be chosen according to the anticipated research interests and fields for preliminary examination of each student. For example, these core disciplinary courses might focus on comparative politics, comparative religion, feminist theory,

ethnicity and nationalism, analysis of linguistic structures, seminar in cognitive anthropology, comparative legal institutions, or international political economy. Courses on a narrow field of inquiry (such as Arab-Israeli conflict) do not constitute field or core courses, though they may contribute to a student's general field.

### Annual Review

A subcommittee of the Near and Middle Eastern Studies program faculty will meet each spring to review the progress of all students in the Ph.D. program. Either the chair of the student's committee, the program's graduate adviser, or the program's director will inform students of the results of this annual review.

### Ph.D. Examinations and Dissertation

The student will be expected to take the following examinations: (1) preliminary exams consisting of an area of specialization exam and a theory and discipline exam; (2) a General Examination, consisting of a take-home part and an oral part; and (3) a Final Examination, which is the Ph.D. thesis defense.

Students must meet the general University requirements concerning admission to candidacy for the doctoral degree, the dissertation, and final examinations, including an oral examination.

A student's Ph.D. supervisory committee shall consist of no less than three members of the University of Washington's Graduate School faculty as well as a representative of the Graduate School (GSR). The chair of the committee must be an active member of the Graduate School faculty. At least two members of the committee must be members of the Near and Middle Eastern Studies faculty group. Additional members may be asked to join the committee.

Students will write a dissertation as the final requirement for the Ph.D. degree. The topic of the dissertation will be set in consultation with the Ph.D. candidate's supervisory committee.

### Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications which are completed and postmarked on or before this date will be reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

---

## Neurobiology and Behavior

depts.washington.edu/behneuro

### Graduate Program

Graduate Program Coordinator  
T471 Health Sciences, Box 357270  
206-685-1647  
neubehav@u.washington.edu

Understanding the brain represents both a major scientific challenge and a wonderful research opportunity. Investigations into the mechanisms of neural function require an interdisciplinary approach using the knowledge base and techniques of anatomy, biochemistry, molecular biology, physiology, pharmacology, and the behavioral sciences. Neuroscientists and their students must use these different approaches in their research and training if they are to make inroads to solving the major questions in neuroscience.

The University of Washington has met this challenge by establishing the interdisciplinary graduate program in Neurobiology and Behavior. The laboratories of more than 100 faculty members in more than 20 departments have combined efforts to form the doctoral training program, continuing a long history of collaborative efforts that cross both departmental and University boundaries.

The program is designed to allow students to obtain both broad training in the neurosciences and more intensive coursework in specific areas of interest. The program emphasizes flexibility and encourages students to take responsibility in the design of their own curriculum. Students have the opportunity to work with faculty whose interests span the breadth of

neuroscience research. Graduates of the program are well prepared for a variety of careers involving academic, research, industrial, and public policy positions.

Key aspects of the graduate program that are common to all students include (1) a year-long course which provides core knowledge in the neurosciences, (2) quarterly first-year laboratory rotations, each one of which culminates with a research presentation to students and faculty in the program, (3) a biweekly seminar series featuring both visiting and local scientists, (4) a biweekly journal club designed to provide students an introduction to the subsequent week's seminar, and (5) a program-wide retreat, and (6) a campus-wide poster session where students and postdoctoral candidates present their Society for Neuroscience Annual Meeting posters. Thus, the program exposes students throughout their graduate career to the most exciting and current research and concepts covering all areas of neuroscience.

### Application Process

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record; GRE scores, including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology; and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

### Research Facilities

Extensive research facilities in all areas of neurosciences are available to the student. The University maintains two major natural and health-sciences libraries in addition to individual departmental libraries. Facilities in the participating departments include electronics and machine shops, instrumentation for synthesis and sequence determination of nucleic acids and proteins, calcium imaging, confocal microscopy, and computer facilities. Equipment for ultrastructural studies is readily available. The resources of the Regional Primate Research Center, the W. M. Keck Center for Advanced Studies in Neural Signaling, and the Friday Harbor Laboratories are also available to the student.

### Financial Aid

The program offers stipend and tuition support to students through traineeships derived from NIH training grants and private foundation support and through research assistantships supported by the University or research grant funds. Students with satisfactory academic progress can anticipate that funding will continue for the duration of their program.

---

## Nutritional Sciences

depts.washington.edu/nutr

### Graduate Program

Graduate Program Coordinator  
305 Raitt, Box 353410  
206-543-1730  
nutr@u.washington.edu

The Interdisciplinary Graduate Program in Nutritional Sciences offers programs of study leading to Master of Science (M.S.), Doctor of Philosophy (Ph.D.), and Master of Public Health Nutrition (M.P.H.) degrees. The graduate program is designed for the needs of students with a strong science background who wish to pursue (1) advanced training in nutritional science or clinical research, (2) advanced training in nutritional epidemiology and diet-disease interactions, or (3) training in public health nutrition practice. Additional training in clinical and community nutrition is provided to those students who wish to satisfy the didactic and internship requirements of the American Dietetic Association, prior to obtaining Registered Dietitian (R.D.) status.

The principal areas of study are biochemical and molecular nutrition, clinical nutrition, and community or public health nutrition. Members of the core faculty represent the School of Public Health and Community Medicine,

the Fred Hutchinson Cancer Research Center, and the University of Washington Medical Center. The program also draws on a larger group of interdisciplinary faculty from the College of Arts and Sciences, Schools of Medicine and Nursing, other units on campus, and from affiliated institutions in the Seattle area.

Each program of study is designed by the student in consultation with, and with the approval of, a supervisory committee. All students begin working on a research project under the supervision of an appropriate faculty member in the early stages of their graduate experience. Public health field placements, which follow the first year of required coursework, are an integral part of the M.P.H. curriculum.

The research environment at the UW includes research facilities in Raitt Hall, a student computer facility, and library. Students also have access to faculty mentors and research facilities through the Medical Center, the South Lake Union Research Hub, the Fred Hutchinson Cancer Research Center, the Clinical Research Center, and the Clinical Nutrition Research Unit. Additional clinical facilities include Harborview Medical Center, Northwest Kidney Center, Children's Hospital and Regional Medical Center, Pacific Medical Center, the Cancer Care Alliance, and the Center for Human Development and Disabilities.

Students may enter the graduate degree program after completing a bachelor's or a master's degree. Previous coursework in chemistry, biochemistry, and human physiology is required. Students who wish to supplement their degree program with ADA-approved training leading to R.D. status must complete all didactic requirements before applying to the supervised dietetic internship.

The internship specialty areas are clinical and community nutrition. Applicants should contact the Dietetic Internship Director for detailed admission requirements.

## Master of Science in Nutritional Sciences

### Admission Requirements

- \* Bachelor's degree, preferably with science emphasis
- \* Completion of the following courses:
  - o General chemistry (one quarter)
  - o Organic chemistry (one quarter)
  - o Biochemistry (two quarters at the 400 level)
  - o Human anatomy/physiology (two quarters or one semester)
  - o Basic human nutrition (one quarter)
- \* Minimum GPA of 3.00 for the final 90 quarter credit hours or 60 semester credit hours completed
- \* GRE (general examination) -- minimum score of 1,000 on the verbal and quantitative sections (combined) preferred

### Degree Requirements

Minimum 40 credits, as follows:

- \* *Nutritional Sciences Courses (23 credits):* NUTR 500 (3), NUTR 520 (3), NUTR 521 (3), NUTR 522 (3), NUTR 529 (3), NUTR 531 (4), NUTR 562 (4)
- \* *Non-nutrition Courses (4 credits):* BIOST 511 (4)
- \* *Electives in Nutrition (4 credits)*
- \* *Thesis (9 credits):* NUTR 700

## Master of Public Health in Nutrition Sciences

### Admission Requirements

- \* Bachelor's degree, preferably with science emphasis
- \* Completion of the following courses:
  - o General chemistry (one quarter)
  - o Organic chemistry (one quarter)
  - o Biochemistry (two quarters at the 400 level)
  - o Human anatomy/physiology (two quarters or one semester)
  - o Basic human nutrition (one quarter)
- \* Minimum GPA of 3.00 for the final 90 quarter credit hours or 60 semester credit hours completed
- \* GRE (general examination) -- minimum score of 1,000 on the verbal and quantitative sections (combined) preferred

## Degree Requirements

Minimum 63 credits, as follows:

- \* *Nutrition Courses (20 credits):* NUTR 500 (3), NUTR 520 (3), NUTR 521 (3), NUTR 522 (3), NUTR 531 (4), NUTR 562 (4)
- \* *MPH Courses (17 credits):* BIOST 511 (4), ENV H 511 (3), EPI 511 (4), HSERV 510 (3), HSERV 511 (3)
- \* *Nutrition Public Health Courses (16 credits):* NUTR 532 (2), NUTR 538 (3), NUTR 595 (3); either NUTR 526 (3), NUTR 527 (3), NUTR 528 (3), or NUTR 530 (3)
- \* *Electives in Nutrition (1 credit)*
- \* *Thesis (9 credits):* NUTR 700

## Doctor of Philosophy

### Pre-admission Requirements

- \* Students entering the program must have completed a basic course in foods and a basic course in Human Nutrition prior to or during the first year of this program. In addition, at least 9 quarter credits or equivalent of advanced nutrition and diet therapy are required, and, either prior to entry or during the graduate program, courses must be completed in laboratory methods in nutrition and/or biological sciences.
- \* Students entering the program must also have completed the following within seven years prior to admission or during their first year: 3 quarter credits or equivalent in statistics; 4 quarter credits in biochemistry with an appropriate laboratory experience; 6 quarter credits in physiology. Evidence of success in advanced level science must be presented prior to admission.
- \* Students applying for admission must complete the Graduate Record Examination and provide scores in verbal and quantitative tests. Where appropriate, other test results indicative of proficiency in the English language must be provided.
- \* Other factors that are considered in review of applicants are appropriate GPA in previous academic work, past work experience, personal recommendations and quality of the letter of intent.

It is expected that most applicants hold a master's degree in nutrition; however, students wishing to bypass the master's degree, or qualified holders of graduate degrees in related disciplines, may apply to the program. Students enrolled in the University's master's degree program in nutrition have the option to complete a qualifying examination to enter into the doctoral program after approximately a year.

### Admission Requirements

- \* Master's degree, preferably with science emphasis
- \* Completion of the following courses:
  - o General chemistry
  - o Organic chemistry
  - o Biochemistry (two quarters at the 400 level)
  - o Human anatomy/physiology (two quarters or one semester)
  - o Basic human nutrition (one quarter)
  - o Above-listed Preparation
- \* Minimum GPA of 3.00 for the final 90 quarter credit hours or 60 semester credit hours completed
- \* GRE (general examination) -- minimum score of 1,000 on the verbal and quantitative sections (combined) preferred

### Degree Requirements

Minimum 99 credits, to include:

- \* *Nutrition Courses (32 credits):* NUTR 500 (4), NUTR 520 (3), NUTR 521 (3), NUTR 522 (3), NUTR 529 (3), NUTR 531 (4), NUTR 562 (4); 8 credits of additional 500-level nutrition courses
- \* *Other Sciences (Related to Specific Interests) (24 credits)*
- \* *Biostatistics (8-12 credits)*
- \* *Research Methods (8-12 credits)*
- \* *Dissertation (27-30 credits):* NUTR 800

# Quantitative Ecology and Resource Management

depts.washington.edu/qerm

Graduate Program Coordinator  
304 Loew Hall, Box 352182  
206-616-9571  
qerm@u.washington.edu

The Quantitative Ecology and Resource Management (QERM) Interdisciplinary Graduate Program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program is designed to attract mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to develop or enhance their quantitative skills. QERM offers a program of study leading to the M.S. and Ph.D. degree.

As an interdisciplinary program, QERM draws its faculty from several academic units on campus. The faculty shares a common interest in the application of quantitative techniques in the analysis and solution of resource management and conservation problems.

## Admission Requirements

Applicants are expected to possess an awareness and keen interest in applying quantitative methods to natural resource management, marine, and mathematical biology problems. Minimum requirements for admission include:

- \* Background in probability and mathematical statistics, linear algebra, and differential equations. Students entering the program with little or no statistical background are advised to take additional coursework during their first year of study.
- \* Bachelor's degree from an accredited institution,
- \* Minimum GPA of 3.00 in the most recent 90 graded quarter credits (60-semester credits).
- \* Graduate Record Examination test scores.
- \* Three letters of recommendation.
- \* Statement of professional experience and objectives.
- \* International applicants must have a minimum TOEFL score of 580.

Admission is also dependent upon program resources and fit between student interests and faculty research. Potential applicants should review faculty research interests to determine if their area of research is being conducted at the UW. The application deadline for autumn quarter is January 15.

## Degree Requirements

Required coursework reflects the expectation that the student has a fundamental understanding of the principles of statistical inference and ecological modeling. Required courses include: STAT 512 and STAT 513, QERM 550, AMATH 422, QERM 514, and QERM 597.

Students with little or no statistical background should take one or more of the following courses in their first year: STAT 421, STAT 394 and STAT 395, and possibly STAT 341-342 or STAT 481.

Students select elective coursework in an area of emphasis ranging from biometry, mathematical modeling, and resource management. Additional elective coursework in basic biology and ecology gives students greater insight into the environmental systems in which they expect to apply their quantitative training.

Requirements for successful completion of the M.S. degree include:

1. Passing the applied methods and statistical theory qualifying examinations at the M.S. level.
2. Completing a minimum of 36 quarter credits, including 27 course credits and 9 thesis credits, with at least 18 credits of coursework numbered 500 or above, including a thesis.
3. Receiving numerical grades in at least 18 quarter credits of course work taken at the UW.
4. Completing a seminar on results of the research and oral defense of the thesis.

5. Satisfying all University requirements for graduation.

Requirements for successful completion of the Ph.D. degree include:

1. Passing the applied methods and statistical theory qualifying examinations at the Ph.D. level.
2. Completing a minimum of 90-quarter credits, including 27 dissertation credits. Completion of an M.S. degree may be applied toward one year of the Ph.D. program. The core QERM courses must be taken if the student has obtained an M.S. from another program.
3. Taking a seminar on results of the research and completing an oral defense of the dissertation.
4. Satisfying all University requirements for graduation.

## Financial Aid

Funding opportunities include fellowships, teaching, and research assistantships and are available for each year of study. The Graduate School or the home department of the QERM faculty adviser provides this funding. Tuition is normally included as part of the financial package. Funding decisions are made yearly; attempts are made to continue support for students making satisfactory progress.

---

## Quaternary Research Center

19 Johnson  
depts.washington.edu/qrc

Quaternary studies focus on the processes that presently shape the natural environment and have operated over approximately the past two and a half million years (Quaternary period). A knowledge of Quaternary events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to present-day and future environmental changes.

Quaternary research is typically interdisciplinary, and thus it commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.

The center has the following goals:

1. To understand environments and climate changes of the past two and a half million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events.
2. To serve as a catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology/anthropology, botany, engineering, fisheries, forestry, geology, geophysics, oceanography, pedology, and zoology.
3. To provide a scientific perspective on the scale of modern and man-made environmental changes, including climate changes, in the context of recent earth history.
4. To conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies.
5. To seek applications of Quaternary studies to modern environmental problems that will help predict consequences of policy decisions.

## Graduate Program

Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Quaternary-related subject.

## Research Facilities

The research laboratories of the center provide an array of modern facilities for investigation of Quaternary problems.

QRC Resource Center. This specialized collection, dealing with a wide range of Quaternary topics, is among the most extensive in North America. It includes books, monographs, theses, journals, and maps, and houses a large, diverse reprint collection. Searches for library material can be conducted via the QRC Web page.

## Cosmogenic Nuclide Laboratory

John Stone, Director

The UW Cosmogenic Nuclide Laboratory analyses rare radionuclides produced by cosmic ray bombardment of the Earth's surface. These nuclides are useful for surface exposure dating and the study of geomorphic rates and processes. Current projects include work on quaternary glaciations of Antarctica, Europe, and North America; dating of landslides and volcanic eruptions; and studies of erosion in both tectonically active and ancient, stable landscapes. The laboratory has sample preparation facilities and clean labs for extraction of Al-26, Be-10, and Cl-36. For additional information, visit the laboratory's Web site.

## Geochemistry Library

Ronald S. Sletten, director

The Geochemistry Library conducts analyses of natural waters, soil, and sediment. Instrumentation includes ICP-OES, ICP-MS, laser diffraction particle size analyzer, and total organic/inorganic carbon analyzer for water samples. The library also conducts C-13 CP-MAS-NMR for natural organic and pulsed field gradient PFG-NMR for diffusion studies of water in porous media. The primary research foci are weathering, elemental cycling, and studies of permafrost soils. Current projects include investigation of biocomplexity of carbon cycling in Arctic soils in Greenland and physico-chemical soil processes in Antarctica and Alaska.

## Periglacial Laboratory

Bernard Hallet, Director

Research in the Periglacial Laboratory focuses on diverse processes at the interface between glaciology and geomorphology that are fundamental to understanding landscapes and soils in alpine and polar regions. Founded by Link Washburn, the laboratory has a long history of experimental research on periglacial processes with special attention given to the complex phenomena associated with freezing soils and rocks. Recently the lab has also served as a base of support for extensive field work involving electronic instrumentation to monitor surface processes in the Arctic, Antarctica, the Himalayas, southeast Tibet, and other regions across the globe.

## Stable Isotope Laboratory

Eric J. Steig, Director

The Stable Isotope Laboratory is the main center for stable isotope studies for the QRC. The current emphasis in the laboratory is the development of high-resolution climate records covering the last ten millennia, from ice cores in the Canadian Arctic, Greenland, and Antarctica. Facilities in the laboratory (now undergoing renovation) include off-line and online preparation systems for D/H and 18/16O on water 13C/12C on carbonates and organic materials, and 15N/14N on nitrate and organics. Additional information, data, and other resources are available via the laboratory's Web site.

---

# Urban Design and Planning

depts.washington.edu/urbdpphd

Graduate Program Coordinator  
311 Loew, Box 352192  
206-543-6398

The Ph.D. in Urban Design and Planning at the University of Washington is one of 39 Ph.D. programs in urban and regional planning in North America, and one of the oldest, founded in 1967. This program brings together faculty from disciplines ranging from architecture to sociology to focus on the interdisciplinary study of urban problems and interventions. Covering scales from neighborhoods to metropolitan areas, the program addresses interrelationships between the physical environment, the built environment, and the social, economic, and political institutions and processes that shape urban areas. The breadth of this program permits students to pursue doctoral studies in the various aspects of urban design and planning as well as in a number of related social science, natural resource, and engineering areas.

The program seeks to prepare scholars who can advance the state of research, practice, and education related to the built environment and its relationship to society and nature in metropolitan regions throughout the world. The program provides a strong interdisciplinary educational experience that draws on the resources of the entire University, and on the laboratory provided by the Seattle metropolitan region and the Pacific Northwest. The program emphasizes the educational values of interdisciplinarity, intellectual leadership and integrity, and the social values of equity, democracy and sustainability. It seeks to promote deeper understanding of the ways in which public decisions shape and are shaped by the urban physical, social, economic, and natural environment. The program envisions its graduates becoming leaders in the international community of researchers, practitioners and educators who focus on improving the quality of life and environment in metropolitan regions.

## Doctor of Philosophy

### Admission Requirements

Admission to the Ph.D. program is based on evidence of promise of high scholarly achievement and research orientation. The applicant's statement of purpose, Graduate Record Examination (GRE) test results, letters of recommendation, and examples of past work constitute the basis for the admissions evaluation.

Applicants typically have a master's degree in fields ranging from planning and public affairs to natural and social sciences. Students interested in a professional degree in urban design and planning should apply to the master's program in urban design and planning.

*Application Deadline:* All application materials are due by February 1. International applicants are encouraged to submit the Graduate School on-line application form by November 1.

For more information, see the program's Web site.

### Degree Requirements

90 credits, divided into three main phases.

#### Phase I: The Core Curriculum

The core curriculum defines the intellectual foundation of the program. While the program retains considerable flexibility in defining a research agenda within urban and environmental planning and policy, it provides a common foundation for all students to build upon. Students enter the program with a master's degree, in fields ranging from planning and public affairs to natural and social sciences. Depending on the academic preparation of the student, the core requirements can be met within one to two years.

*Required Courses:* Five courses, normally completed during the first year, unless schedule conflicts make this infeasible. Courses from Phase II requirements may also be taken in the first year.

- \* *Core Sequence:* URDBP 591, URBDP 592, URBDP 593
- \* *Restricted Electives (before completion of Phase I):*
  - o *Qualitative Research Methods* - One of the following: URBDP 598, GEOG 425, HIST 598, HSERV 526, POL S 493.
  - o *Quantitative Research Methods* - One of the following: CS&SS 594, CS&SS 504, CEE 584

#### Phase II: Area of Study

Students develop with their supervisory committee a description of their proposed areas of study. These areas of scholarship must demonstrate an interdisciplinary research approach to an application within urban and environmental planning and policy. The description should develop a curriculum proposal approved by the supervisory committee that addresses the following advanced study requirements:

*Curriculum Requirements:* Seven courses and a teaching seminar, in addition to advanced courses directly related to the area of study selected by the student. Some courses may be taken in the first year.

- \* *Urban Processes and Patterns:* Three of the following: URBDP 479, URBDP 498, URBDP 561, URBDP 598, URBDP 598, GEOG 440, GEOG 448, GEOG 450, GEOG 466, GEOG 477, GEOG 478, GEOG 479, GEOG 578, SOC 490, POL S 481.
- \* *Research Design and Methods:* Two of the following: CS&SS 536, CS&SS 560, CS&SS 567, CS&SS 594, CS&SS 529, CS&SS 544,

CS&SS 566, URBDP 422, URBDP 525, URBDP 530, URBDP 571, GEOG 460, GEOG 461, PB AF 526, SOC 526, SOC 529

- \* *Urban and Environmental Design and Planning*: Two of the following: URBDP 465, PB AF 513, PB AF 517, PB AF 518, URBDP 598, URBDP 598, POL S 574, CFR 592, ARCH 561, PB AF 565.
- \* *Teaching Methods*: One teaching seminar and experience as a TA for at least one quarter, before completion of Phase III. The following courses or a suitable alternative satisfy this requirement: GEOG 599, GRDSCH 630

*General Examination*: A critical review of the literature in the area of study must be developed by the student, which integrates interdisciplinary research on that area of study, and identifies areas of potential research opportunity that may subsequently form the basis for a dissertation proposal. The review should demonstrate broad familiarity with relevant research in the chosen area, and with the range of theory and methods applied within the reviewed literature.

### **Phase III: Dissertation**

Once the student passes the General Examination, he/she is advanced to the level of doctoral candidate, and is expected to build on the critical review of the literature to develop a dissertation proposal. The dissertation proposal should demonstrate the characteristics of interdisciplinarity, relevance to urban and environmental planning and policy, and potential for contribution to scholarship.

### **Financial Aid**

The Interdisciplinary Ph.D. program in Urban Design and Planning attempts to provide funding for doctoral program applicants in a way that makes the program attractive to the strongest potential applicants, ensures their effective mentoring while in the program, and actively engages and energizes faculty to improve the program and to bring research funding to support students.

---

# Interdisciplinary Undergraduate Programs

---

## Education, Learning, and Society

### Undergraduate Program

Adviser  
206 Miller, Box 353600  
206-543-7834  
edinfo@u.washington.edu

#### Minor

The Education, Learning, and Society (ELS) minor -- sponsored jointly by the College of Education and the College of Arts and Sciences -- provides a strong background in how human beings learn, and how society, environment, and culture shape learning.

*Minor Requirements:* 31 credits, as follows:

1. One of the following (5 credits): PSYCH 206 (prerequisite, PSYCH 101), NURS 201, or EDPSY 304.
2. One of the following (5 credits): CHID 210, EDUC 305, EDUC 310, or SOC 292.
3. *Field Experience (5 credits):* EDUC 401. (Other courses that may fulfill this requirement, with approval, include GEN ST 350, EDC&I 499, EDPSY 499, EDSPE 499, CHID 497, GEN ST 470.
4. *Colloquium (1 credit):* GEN ST 300
5. *Electives (15 credits):* Selected from an approved list, available from the program adviser. While taking GEN ST 300, students create a curricular plan to provide a rationale for their choice of electives.
6. Up to 10 credits may overlap with a student's major and up to 5 credits may overlap with another minor.
7. Minimum 10 credits in upper-division courses.

---

## Marine Biology

depts.washington.edu/marbio

The minor in marine biology is sponsored jointly by the College of Ocean and Fisheries Science and the College of Arts and Sciences, and is designed to immerse students in the study of marine organisms and ecosystems, starting in the freshman year. Because the experience of marine sciences cannot be taught entirely within the classroom, the minor is structured to provide ample opportunity for field work and research within the coursework.

Adviser  
116 Fishery Sciences Building, Box 355020  
206-543-7457  
marbiol@u.washington.edu

#### Minor

*Minor Requirements:* 35 credits, as follows:

1. *Introductory Courses (18 credits):* FISH 250/OCEAN 250/BIOL 250, OCEAN 210, BIOL 161 or BIOL 180, Q SCI 381.
2. *Integrative Experience (3 credits):* FISH 478/BIOL 478/ENVIR 478. (3 credits of FISH 492 may be approved on an individual basis, if the particular apprenticeship satisfies the integrated marine biology requirement).
3. *Electives (14 credits):* Selected from an approved list available from a program adviser. Additional courses may be approved by program adviser. (A minimum of one elective course must be taken from each of the following units: Biology, Aquatic and Fisheries Sciences, and Oceanography.)
4. Up to 17 credits may overlap with credits applied to a student's major and up to 5 credits may overlap with credits applied to another minor.
5. Minimum 15 credits in upper-division courses.
6. Minimum 2.00 cumulative GPA for courses presented for the minor.

## Program on the Environment

274 Mary Gates Hall  
depts.washington.edu/poeweb

The Program on the Environment (PoE) fosters and promotes interdisciplinary environmental education at the UW. As an interdisciplinary program merging multiple fields of study, PoE draws faculty from a wide array of disciplines, providing a unique opportunity for students and faculty to explore complex environmental issues from multiple perspectives.

### Undergraduate Program

Adviser  
274 Mary Gates Hall, Box 352802  
206-616-1208 or 206-616-2461  
poadv@u.washington.edu

The Program on the Environment offers the following programs of study:

- \* The Bachelor of Arts degree with a major in environmental studies
- \* A minor in environmental studies

#### Bachelor of Arts

*Suggested First and Second-Year College Courses:* ENVIR 100, ENVIR 200, and all foundational courses listed below.

#### Department Admission Requirements

Students in good academic standing can declare this major at any time.

#### General Education Requirements

All majors must satisfy the College of Arts and Sciences general education requirements.

#### Major Requirements

88-90 credits as follows:

**Core Courses (15 credits):** ENVIR 100, ENVIR 200, ENVIR 300

#### Foundational Courses (33-35 credits)

- \* *Biology (10 credits):* BIOL 161, BIOL 162
- \* *Chemistry (5 credits):* CHEM 120
- \* *Earth Systems Literacy (3-5 credits):* One course from among ATM S 211, ESS 201, ESS/OCEAN 230, GEOG 205, OCEAN 200
- \* *Statistics (5 credits):* One course from among Q SCI 381, STAT 220, STAT 311
- \* *Values and Cultures (10 credits):* Two courses from among ANTH 210, HSTAA 221, and PHIL 243

#### Environmental Perspectives and Experiences (30 credits)

- \* Minimum 30 credits from the list of approved courses (see department Web site or advising office for list). Courses must satisfy the perspectives and experiences sub-requirements shown below. At least 20 of the 30 credits must be at the 300 or 400 level. Courses listed under both perspectives and experiences may count toward either, but not both. Environmentally related independent study courses, study abroad programs, and other courses not on the approved list may count toward this requirement if approved in advance by the PoE adviser.
- \* *Perspectives:* Minimum three credits in each of the following: natural sciences; human and social dimensions; policy and decision making; and tools and technologies.
- \* *Experiences:* Minimum three credits in each of the following: bioregional studies and experiences; global studies and experiences; fieldwork.

**Capstone Experience (10 credits):** ENVIR 490, ENVIR 491, ENVIR 492

**GPA Requirements:** Minimum 2.0 grade in each course presented for the major, except that courses taken to fulfill the biology, chemistry, and statistics requirements under foundational courses may be satisfied by an overall 2.00 GPA for the four courses combined.

## Minor

*Minor Requirements:* 30 credits, including ENVIR 100 and ENVIR 200. Remaining 20 credits drawn from the environmental perspectives course list (see program Web site or adviser for list). At least one course (minimum three credits) in each environmental perspectives course category, i.e., natural sciences; human and social dimensions; policy and decision making; and tools and technologies. Ten of these 20 credits must be at the 300 or 400 level. Minimum 2.0 for each course presented for the minor.

## Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes:* The environmental studies major offers a rigorous, interdisciplinary, experiential curriculum designed to prepare future environmental leaders to respond to bioregional and global environmental opportunities and challenges. It takes advantage of the extraordinary environmental research at the UW, and makes that social, scientific, humanistic, and professional expertise accessible to students in innovative ways.

Students completing the B.A. in environmental studies have developed skills in the following:

- Earth Systems Knowledge:* Understand the structure, function, and integration of the Earth, its inhabitants, and its four major spheres: land, water, living things, and air.
  - Interdisciplinary Approach:* Apply an interdisciplinary approach to the study of the environment, integrating multiple kinds of information, tools, methods, and scholarship from a variety of disciplines, in order to analyze and construct arguments about complex environmental issues.
  - Experiential Learning:* Understand the connections between classroom and experiential learning and successfully practice multiple forms of hands-on, real world applications.
  - Communication:* Demonstrate proficiency in multiple modes of communication (writing for different audiences and purposes, using a range of disciplinary norms; oral presentations and public speaking; online publishing; and visual display of environmental information).
  - Public Policy and Decision Making:* Understand how uncertainty, risk, law, politics, ethics, economics, and culture interact with environmental public policy and decision making.
  - Teamwork:* Collaborate as members of teams, effectively working with multiple stakeholders from various backgrounds to address environmental issues.
  - History of Environmental Inquiry:* Understand and reflect critically on the intellectual and cultural history of environmental studies including the history of environmental preservation and conservation.
  - Temporal Scales:* Understand various temporal scales inherent in environmental studies and situate themselves on the continuum of geologic time, evolutionary history, human environment history, and decision making for future generations.
  - Spatial Scales:* Understand various spatial scales inherent in environmental studies spanning the continuum from the local/bioregional to the international/global.
  - Diversity:* Understand how environmental perspectives, policies, and decisions are related to issues of diversity, privilege, and power.
  - Technical Knowledge:* Be familiar with some of the technological tools commonly used to address environmental challenges.
  - Professional Development:* Understand how their education will serve them as environmental professionals.
- \* *Instructional and Research Facilities:* The Program on the Environment Multipurpose Room, centrally located in 258 Mary Gates Hall, houses a small library of environmental resources and serves as a meeting and study space. Because PoE is an interdisciplinary program, its students access resources, laboratories, and field stations across a range of UW departments, colleges, and schools.
- \* *Honors Options Available:* Departmental Honors. See adviser for requirements.
- \* *Research, Internships, and Service Learning:* All environmental studies majors complete a senior capstone experience, which includes an

internship with a community-based organization or government agency, an undergraduate research project, and/or international fieldwork or study abroad. Program on the Environment students receive a weekly email listing of internship and career opportunities. For information on identifying internship, research, and career opportunities, see the "Undergraduate Resources" section of the department's Web site.

- \* *Student Organizations/Associations:* The UW Earth Club organizes the annual UW Earth Week events and year-round activities such as public-service projects, panel discussions, and social gatherings.

## Quantitative Science

depts.washington.edu/cqs

Adviser  
005 Anderson Hall, Box 352100  
206-543-1191  
cqs@u.washington.edu

The Center for Quantitative Science is an interdisciplinary program administered jointly by the College of Ocean and Fishery Sciences and the College of Forest Resources. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resources management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the College of Forest Resources and the School of Aquatic and Fishery Sciences.

Students in environmental, biological, ecological, and resource management majors may wish to complete a minor in quantitative science to document their understanding of the mathematical and statistical methods used in these competitive and increasingly quantitative fields.

## Minor

*Minor Requirements:* A minimum of 26 credits, as follows:

- Core courses (20 credits):* Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCI 482
- Electives (6-10 credits):* Two Q SCI courses at the 300 or 400 level to include one course from Q SCI 480, Q SCI 483, Q SCI 486
- A minimum grade of 2.0 is required in each course taken as part of the minor

---

## Values in Society

345 Savery  
Undergraduate Program  
Adviser  
345 Savery, Box 353350  
206-616-1488  
philinfo@u.washington.edu

## Minor

*Minor Requirements:* 27 credits, to include:

- Three courses from the approved list of courses in which normative thinking and conceptual analysis of values and frameworks are central; at least one at the 300 level or above.
- Two courses from the approved list of courses in which values-laden issues are central; at least one at the 300 level or above.
- VALUES 498 (2 credit capstone)
- Minimum 15 credits outside student's major.
- Minimum 15 credits completed at UW.
- Minimum 2.00 GPA in courses used for the minor.

# School of Law

## Interim Dean

Gregory A. Hicks

## Associate Deans

Penny A. Hazelton

Lisa Kelly

Lea Vaughn

## Assistant Deans

Sandra E. Madrid

Naomi Sanchez

Stephanie Cox (Interim)

[www.law.washington.edu](http://www.law.washington.edu)

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association's list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current School of Law catalog.

## Facilities and Services

The School of Law, housed in William Gates Hall since 2003, is equipped with classroom, clinical, library, lounge, and office facilities. Eleven classrooms are equipped for multi-media presentations, wireless internet connection, and assistive-listening systems.

The Marian Gould Gallagher Law Library, one of the finest in the country, is among the largest university law collections on the West Coast. The collection currently contains more than 450,000 bound volumes and volume equivalents of microform. In addition to the extensive main collection, it houses important materials that support the Asian, marine, sustainable international development, and tax law graduate programs and serves as a federal depository for selected United States government documents. The library is equipped with the latest in microreaders and printers in order to make full use of the growing microform collection. The library is a subscriber to LEXIS, WESTLAW, the Western Library Network, and other research databases.

## Juris Doctor Program

The Juris Doctor degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As with most law schools in the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills.

Except for a required course in professional responsibility, the public service requirement, and an advanced writing project requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. J.D. candidates are required to perform 60 hours of public-service legal work during the second or third year.

## Admission

New students may enter the School of Law only in autumn quarter. For first-year students, instruction begins earlier than for upper-class students. Students must have earned a baccalaureate degree from an accredited college or university prior to commencing the study of law.

All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Data Assembly Service (LSDAS). Registration packets and test information are available at most law schools and from Law School Admission Council, Box 2000, 661 Penn Street, Newtown, PA 18940-0998, [www.lsac.org](http://www.lsac.org).

No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in The

Official Guide to U.S. Law Schools (2000 Edition). Applications for admission to the next entering class must be postmarked no later than January 15. To be assured of consideration for admission, an applicant must have complete credentials, including the LSDAS report, filed in the School of Law by February 1. An application fee (at this writing, \$50) also is required.

## Transfer Applicants

Students who have completed at least one year at a member school of the Association of American Law Schools may apply for admission with advanced standing with credit for no more than one year of such work. A student who has completed or expects to complete at least two years of work at a member school of the Association of American Law Schools and who expects to graduate from that member school may apply to this school for admission as a non-degree candidate.

Applicants should request application forms and instructions from the admissions office in time to permit filing of all application materials by July 10.

Applications are considered only if vacancies exist. Selection is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body.

Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the general University policy on the registration of nonmatriculated students.

## Financial Aid

Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all of these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December at most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Box 355880, University of Washington, Seattle, WA 98195, 206-543-6101, [offa@u.washington.edu](mailto:offa@u.washington.edu). Applicants for admission should not wait until they have been admitted before applying for financial aid.

School of Law grants are awarded primarily on the basis of financial need, although scholarship or other factors may be considered for certain awards. Inquiries concerning School of Law aid should be addressed to Financial Aid Coordinator, School of Law, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-3020; [uwlawaid@u.washington.edu](mailto:uwlawaid@u.washington.edu).

## Inquiries

A more detailed statement on admission policy and application procedure is available from the School of Law. Requests for application materials and the University law school bulletin should be addressed to Law School Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-4617; [admissions@law.washington.edu](mailto:admissions@law.washington.edu); 206-543-4078.

## Graduate Program

Graduate Program Coordinator  
William Gates Hall, Box 353020  
206-543-4937  
[gradlaw@u.washington.edu](mailto:gradlaw@u.washington.edu)

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LL.M.) in Asian and comparative law, the law of sustainable international development, intellectual property law and policy, and taxation. The School of Law offers the Doctor of Philosophy (Ph.D.) degree in Asian and comparative law only.

## Master of Laws

### Admission Requirements

- \* Minimum GPA of 3.00 or B in the most recent two years of study.
- \* U.S. applicants must have completed their first degree in law (J.D. or equivalent) at a school accredited by the American Bar Association.
- \* International students must have a first degree in law (LL.B., B.Law) or equivalent and a minimum TOEFL score of 580 or 237 (TOEFLC).

### Degree Requirements, Asian and Comparative Law

36 credits, as follows:

- \* *Required courses:* LAW B 551 (6), LAW 600 (6), LAW B 550 (3-4); two courses in Asian and comparative law
- \* *Elective courses:* Additional courses, chosen in consultation with adviser, to bring total credits to 36.

### Degree Requirements, Intellectual Property Law and Policy

40 credits, to include:

- \* *Required core courses:* LAW P 501 (8), LAW P 510 (6)
- \* *Additional requirement for students not trained in the common law system:* LAW P 503 (3)
- \* At least 16 additional credits drawn from a list of approved elective courses.
- \* Research project and thesis

### Degree Requirements, Law of Sustainable International Development

40 credits, as follows:

- \* 15 credits in Law School classes. The remaining 25 credits may be earned in any other departments of the University. Sustainable International Development students are required to take courses in at least three departments other than the Law School.
- \* *Writing and Research Requirement:* Completion of a research paper is required and is generally satisfied by LAW B 578 (6).
- \* LAW A 545 (4)

### Degree Requirements, Taxation

36 credits, as follows:

- \* *Required courses:* LAW T 501 (3), LAW T 502 (3), LAW T 503 (2/3), LAW T 504 (3), LAW T 510 (3), LAW T 511 (1-4)

- \* *Core electives:* Two of the following courses: LAW T 515 (3), LAW T 516 (3), LAW T 521 (3), LAW T 530 (3)
- \* *Electives:* Additional courses, chosen in consultation with adviser, to reach 36 credits for degree

## Doctor of Philosophy

### Admission Requirements

Admission to the Ph.D. program is limited to exceptional scholar-lawyers who are fluent in English and in another language. Prospective Ph.D. students must normally complete the LL.M. program before being accepted as Ph.D. students. The School does, however, welcome applications from candidates with equivalent academic standing and a demonstrated capacity for advanced research and writing.

### Degree Requirements

90 credits, to include:

- \* An LL.M. degree is counted toward the credit necessary for the Ph.D. program.
- \* Doctoral thesis seminar (4 credits)
- \* *Other coursework (26-29 credits):* Coursework varies according to student's research interest areas and is determined in consultation with supervising committee
- \* Doctoral dissertation (27-30 credits)

## Financial Aid

Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195, U.S.A.; gradlaw@u.washington.edu; 206-543-4937.

## Inquiries

Requests for applications and program brochures for all School of Law LL.M. programs except the LL.M. in taxation, as well as information regarding application procedures, should be addressed to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195, U.S.A.; gradlaw@u.washington.edu.

Requests for applications and program brochures for the LL.M. in taxation should be addressed to Law School Graduate Tax Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@u.washington.edu.

Sylvia J. Moore, University of Wyoming  
Dwight E. Phillips, Montana State University (interim)

[www.uwmedicine.org](http://www.uwmedicine.org)

Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Wyoming, Alaska, Montana, and Idaho (WWAMI). Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School's basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Children's Hospital and Regional Medical Center, and the Veterans Affairs Puget Sound Health Care System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits 178 medical students to its first-year class and has a total enrollment of about 750 students pursuing the Doctor of Medicine degree. The full-time faculty numbers approximately 1,700 members. The affiliated University residency-training network enrolls approximately 900 house officers. Enrollment in the graduate programs in the basic sciences exceeds 500 students, and approximately 800 postdoctoral fellows are enrolled in various advanced training programs. The School has baccalaureate and graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. The School participates in training a broad spectrum of other allied health professionals. The School is also home for the Physician Assistant Training Program known as MEDEX.

## Academic Programs

### Doctor of Medicine

Upon completion of the curriculum of the School of Medicine, the M.D. degree is awarded to those candidates who (1) have given evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

### Bachelor of Science

A program leading to a baccalaureate degree with a major in microbiology is offered through the College of Arts and Sciences.

### Bachelor of Science in Medical Technology

A curriculum in medical technology is offered by the Department of Laboratory Medicine. This program provides study in basic laboratory science that includes clinical laboratory training and is designed to prepare knowledgeable and skilled laboratory scientists for a variety of employment opportunities. Information concerning admission to the medical technology program appears under Laboratory Medicine in this catalog.

### Bachelor of Science in Prosthetics and Orthotics

The Department of Rehabilitation Medicine offers a Bachelor of Science degree in prosthetics and orthotics. The curriculum provides professional training in the basic sciences and the clinical application, design, and fabrication of prostheses and orthoses. Information concerning admission to the curriculum in prosthetics and orthotics may be found under Rehabilitation Medicine in this catalog.

### MEDEX Northwest Physician Assistant Training

MEDEX Northwest, UW School of Medicine, is a program designed to train physician assistants. The program has been in existence since 1978 and is accredited by ARC-PA, the Accreditation Review Commission on Education for the Physician Assistant. MEDEX currently trains approximately 80 students annually in three didactic training sites (Seattle, Yakima, and Spokane). Discussions are currently underway to have a fourth training site in Anchorage, AK. Students return to their home communities in the WWAMI region ( Washington, Wyoming, Alaska, Montana, Idaho) plus a variety of sites in Oregon and Nevada for their clinical year of training. MEDEX Northwest is currently an eight-quarter program. The first four quarters consist of intense clinical and didactic instruction at one of didactic training sites. The final four quarters are spent in clinical experiences throughout the Northwest region. At the completion of the program, students are eligible to sit for the National Certifying Examination for Physician Assistants.

### Admission Requirements

Students applying for either the bachelor's option or the master's option must have a minimum two years of recent, full-time equivalent, hands-on experience in delivery of medical care to patients, or current professional credentials and at least two years of recent experience in an allied health field. Since academic prerequisites are different for those applying for the bachelor's option and the master's option, applicants should refer to the MEDEX Web site for current academic prerequisites:  
[www.medex.washington.edu](http://www.medex.washington.edu).

### Bachelor of Clinical Health Services and Master of Clinical Health Services

MEDEX Northwest will offer both a Bachelor of Clinical Health Services degree and a Master of Clinical Health Services degree beginning in 2009. The bachelor's option will be available at MEDEX training sites in Yakima, WA and Anchorage, AK. The master's option will be available to students in the Spokane and Seattle training sites. Approval is currently being requested to proceed with offering both degree options.

*Bachelor's Option:* Candidates without a prior bachelor's degree apply to the sites offering a bachelor's completion option. They must meet both MEDEX prerequisite requirements and UW admission requirements applicable to transfer students. Students pursue an eight-quarter sequence of prescribed studies in the MEDEX Northwest Physician Assistant Training Program. Admission to the professional program is competitive and administered by MEDEX Northwest within the School of Medicine. Because of the program's emphasis on prior medical experience, the great majority of applicants are working adults who have completed their pre-professional undergraduate coursework at other colleges and universities.

MEDEX students must be admitted into the bachelor's option during their time in physician assistant training in order for their MEDEX coursework to be considered as matriculated credits. Matriculation in the Bachelor of Clinical Health Services degree option is dependent upon both acceptance by MEDEX and admission to the University of Washington. For more information regarding application procedures, academic and clinical prerequisites, call 206-616-4001 or refer to the MEDEX Web site.

## Master's Option

Available in 2009:

Candidates applying for the master's option must meet both MEDEX and UW Graduate School requirements. Requirements include a prior baccalaureate degree (no major preference), MEDEX specific academic prerequisite courses (see Web site), an overall GPA minimum of 3.0 or higher for the last two years of coursework, and scores from the GRE. TOEFL is required by the Graduate School of foreign applicants who did not complete a bachelor's degree at an institution in the United States, United Kingdom, Ireland, Australia, New Zealand, or Canada.

Students in the master's option continue to participate in the same core physician assistant curriculum, which focuses on primary care and improving health care access for the medically underserved. In addition, students in the master's level program select a specific pathway, which offers advanced skills and knowledge in their chosen focus area. The four pathways:

- \* Rural and underserved health care
- \* Public health and healthcare administration
- \* Specialty practice and PA education
- \* Global health

With faculty guidance, students develop and complete an individual capstone project within their selected pathway. Projects are presented to faculty and fellow students before graduation. The master's option expands the program to a total of nine quarters, requiring students to be enrolled summer quarter between the first and second years of the program.

Master's specific curriculum content is being developed and no course numbers have been assigned. Content will cover investigative skills, leadership development, current PA issues and trends, master's project design, implementation, and presentation.

## Master of Occupational Therapy

The Department of Rehabilitation Medicine offers graduate degrees in occupational therapy. The curriculum provides professional training in the health sciences and in the theory and practice of occupational therapy as it impacts occupational performance across the life span and in the various arenas of practice. Occupational therapy addresses daily living skills including self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under Rehabilitation Medicine in this catalog.

## Doctor of Physical Therapy

The Department of Rehabilitation Medicine offers graduate degrees in physical therapy. The curriculum provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to the physical therapy program appears under Rehabilitation Medicine in this catalog.

## Master of Science and Doctor of Philosophy

Work leading to master's and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of Biochemistry, Bioengineering, Biological Structure, Immunology, Microbiology, Pathology, Pharmacology, and Physiology and Biophysics. Master's degree programs are offered by the departments of Laboratory Medicine, Medical History and Ethics, and Rehabilitation Medicine. Students may work toward these degrees concurrently with the M.D. degree, taking additional years beyond the typical four-year medical curriculum.

Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in the basic sciences of medicine and the School of Public Health and Community Medicine. A student who intends to work toward a graduate degree should confer with the chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show evidence of being able to take on this additional work load.

## Doctor of Medicine

### Admissions

(These procedures and policies described are subject to change. Information regarding changes is available from the School of Medicine Admissions Office.)

### Selection Factors

Candidates for admission to the University of Washington School of Medicine are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of, and exposure to, the needs of individuals and society and an awareness of health-care delivery issues are desired. Extenuating circumstances in an applicant's background are evaluated as they relate to these selection factors.

Applicants must submit scores from the Medical College Admission Test (MCAT). This exam must be taken no later than autumn of the year before matriculation and cannot be more than three years old at the time of matriculation. MCAT registration blanks are available through premedical advisers or through the Office of Admissions. Under exceptional circumstances, to be determined by the Admissions Committee, the GRE may be considered during the admissions process; however, if accepted, the applicant will be required to take the MCAT prior to matriculation.

The following science course requirements must be completed before matriculation but preferably should be completed by the time of application: A total of 32 semester hours or 48 quarter hours of undergraduate courses divided into (a) Chemistry, 12 semester/18 quarter hours, which can be satisfied by taking any combination of inorganic or organic chemistry, biochemistry, or molecular biology courses; (b) Physics, 4 semester/6 quarter hours; (c) Biology, 8 semester/12 quarter hours; and (d) Other ("open") science subjects, 8 semester/12 quarter hours, which can be met by taking other courses in any of the three categories above.

Although a biochemistry course is not absolutely required for admission to the medical school, it is very strongly suggested for entering students. The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and it is taught with the presumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism. A comprehensive undergraduate biochemistry course is the most expedient way to gain this knowledge.

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in the required courses. Candidates should be proficient in the use of the English language and basic mathematics and are expected to have a basic understanding of personal computing and information technologies.

Those students who entered in the fall of 2003 had a mean GPA of 3.69 and the following mean MCAT scores: Verbal, 10.0; Physical Science, 10.3; Biological Science, 10.8; and a median Writing Sample of P.

Completion of three years of course work at an accredited college or university is the minimum required before possible matriculation; however, all entrants in recent years have earned bachelor's degrees. No specific major is advised. A broad background in the humanities and liberal arts is encouraged, indeed expected.

### Application Procedure

The University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1 and no waivers are granted. After receiving the application from AMCAS, the School of Medicine will ask qualified individuals to submit a \$35 application fee and supplemental application materials. Every attempt will be made to notify applicants of the final action by the end of March of the year of matriculation.

Residents of the states of Washington, Wyoming, Alaska, Montana, or Idaho are eligible to apply. Individuals with a demonstrated interest in research may apply for the M.D./Ph.D. program (MSTP) regardless of residency. Applicants from outside this five-state region who come from disadvantaged backgrounds or who have demonstrated a commitment to serving underserved populations will be considered. Foreign applicants, in

addition to the above requirements, must also have a permanent-resident visa. Applications will not be considered from persons who have failed to meet minimum standards at another medical or dental school.

The deadline for submitting the additional application materials is January 15. These supplemental materials include:

1. A supplemental application form. This will be sent to qualified applicants after the School of Medicine has received the AMCAS application.
2. A 300-word autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician and any other issues of importance to the candidate. The applicant may request that the Personal Comments section of the AMCAS application be used to fulfill this requirement.
3. A concise statement, not exceeding 200 words, as to why the candidate wants to attend the University of Washington School of Medicine.
4. A premedical-committee letter of recommendation or three letters from instructors from whom the candidate has taken courses. These letters should be critical evaluations of the candidate's academic ability, strengths and weaknesses, the difficulty of course work undertaken, motivation for medicine, personal maturity, and special attributes and assets.
5. A \$35 fee. This will automatically be waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Admissions Office.
6. Acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Medical Education at the University of Washington School of Medicine: Admission, Retention and Graduation Standards to be sent with the supplemental application form.
7. Conviction/Criminal History Information Form. Washington state law requires that all individuals who have access to children under 16 years of age, developmentally disabled people, and other vulnerable persons, disclose background information concerning crimes and offenses against these populations.

Candidates from Wyoming, Alaska, Montana, and Idaho will be required to submit residency certifications from their respective state certifying officers. Proof of legal residence for Washington residents also may be requested. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at the time of application. Those who enter as residents of Wyoming, Alaska, Montana, and Idaho are expected to spend their first year at the university site in their particular state. Twenty Washington students begin their medical education by spending the first year at Washington State University in Pullman. Offers of acceptance, therefore, are conditional upon agreement to participate in the WWAMI Program.

Inquiries, address changes, or other information regarding the application should be transmitted in writing and directed to the Committee on Admissions, Office of Admissions, Box 356340, School of Medicine, University of Washington, Seattle, Washington 98195-6340; or email [askuwsom@u.washington.edu](mailto:askuwsom@u.washington.edu).

## Office of Multicultural Affairs

The Office of Multicultural Affairs assists students from disadvantaged backgrounds who are pursuing M.D. or M.D.-Ph.D. degrees. The program nurtures interests in medical careers by providing a variety of support services and enrichment activities in the areas of recruitment, education, admission, retention, and professional development. The School considers applicants from disadvantaged backgrounds or those who have a demonstrated commitment to work with underserved populations. Students should contact the Office of Multicultural Affairs for assistance during the application process. The program offers counseling and advocacy, referrals to University and community resources, tutoring, financial-aid information, and numerous opportunities to interact with other minority health-care professionals within the community. Various student organizations also provide minority medical students a means to interact socially and pursue shared interests, to offer peer support, and to assist with community-outreach activities.

U-DOC is a high-school summer-enrichment program offered by the Office of Multicultural Affairs. It is a six-week program for students who have completed their junior year in high school. U-DOC's goal is to foster, affirm, and encourage high school students' interest in the medical profession by allowing them to further explore medical careers and to obtain a valuable introduction to college life. U-DOC is offered in each of the five WWAMI states.

The Western Consortium Summer Medical Education Program (SMEP) offers undergraduate and some qualified postbaccalaureate students a six-week summer academic-enrichment program that includes biology, chemistry, physics, communications, study skills, and MCAT preparation. Structured clinical and research activities are also offered. Housing, stipends, and travel assistance are available.

A Prematriculation Program for entering minority or disadvantaged medical students is offered for six weeks during the summer. The program is designed to facilitate students' entry into medical school by providing instruction in histology as well as enrichment activities in areas such as study skills, stress management, test-taking skills, research, clinical practice, and community health. Stipends and travel assistance are available to students who qualify.

During the regular school year, the Office of Multicultural Affairs serves as a support network for both the academic and nonacademic needs of students, and facilitates students' access to the multiple resources in the School of Medicine, the WWAMI region, and the community.

The Native American Center of Excellence was established in 1992 as part of the Office of Multicultural Affairs to encourage Native American students to pursue medicine as a career, to promote research on Native American health issues, and to foster the preparation of Native American students for faculty roles in academic medicine. The Center of Excellence provides educational experiences that integrate western medicine with the Native American way of life, offers a variety of support services to promote the academic development of students, and sponsors a variety of educational opportunities within the Native American community.

Inquiries and requests for additional information may be obtained from the Office of Multicultural Affairs, Box 357430, School of Medicine, University of Washington, Seattle, Washington 98195-7430; 206-685-2489.

## Medical Scientist Training (M.D.-Ph.D.) Program

A limited number of highly qualified candidates who wish to pursue both the M.D. and Ph.D. degrees are considered annually. M.D./Ph.D. students are permitted a wide choice of research specializations from among numerous disciplines and interdisciplinary areas of biomedical sciences. The program emphasizes continuity of both clinical and basic sciences exposure. Among participating graduate departments and interdepartmental disciplines are biochemistry, bioengineering, chemistry, environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, physiology and biophysics, and zoology. The participating interdepartmental and affiliate programs are neurobiology and behavior, molecular and cellular biology. Students can also conduct their research at the Fred Hutchinson Cancer Research Center.

Applicants who wish to be considered for the M.D./Ph.D. program must submit the Medical Scientist Training Program application as soon as possible. Both the application and any supplemental material requested must be completed by January 15. Serious consideration is rarely given to applicants with minimal research experience and/or a cumulative GPA of less than 3.50 or MCAT scores of less than 10 in each category.

Applicants should correspond directly with the administrator of the Medical Scientist Training Program: MSTP  
University of Washington  
Health Sciences Building, Room 1264  
Box 357470  
Seattle WA 98195-7470  
206-685-0762  
[mstp@pathology.washington.edu](mailto:mstp@pathology.washington.edu)  
[www.pathology.washington.edu/mstp/](http://www.pathology.washington.edu/mstp/)

## Financial Information

### Fees and Other Charges

All fees and extra service charges are payable in U.S. dollars and due at the time specified for such fees and charges. The University reserves the right to change any of its fees and charges without notice. Resident tuition for 2003-2004 is \$4,149 per quarter; nonresident tuition is \$9,796 per quarter.

## Financial Assistance

Financial aid awards are based on the demonstrated need of the students. All applicants for aid must submit the Free Application for Federal Student Aid (FAFSA). This requires disclosure of financial information from the student and the student's parents. The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and the Primary Care Loan are the primary sources of aid. Institutional loans are also available from the School of Medicine. Limited amounts of grant funds are available to Washington state residents who meet specific funding criteria. Parental information is not required for grant funds, the Stafford Loan, or the Perkins Loan.

Scholarships are available through the School of Medicine scholarship fund. These awards vary in amount and require financial information from the student and the student's parents. There is a separate application for the School of Medicine scholarship, which has a May 31 due date.

Financial aid information is distributed to all accepted applicants. The FAFSA form may be obtained at [www.fafsa.ed.gov](http://www.fafsa.ed.gov) or from the UW Office of Student Financial Aid or the School of Medicine Financial Aid Office. The deadline for receipt of the financial-aid application by the processor is February 28. Applicants must meet this deadline to be considered for all available aid sources regardless of the status of their admission file. Late applicants are awarded only Stafford and Unsubsidized Stafford loans.

Outside employment is discouraged while the student is enrolled in medical-school course work.

## Medical Curriculum

### Basic Science Curriculum (148 Credits)

The first two years of the medical-student curriculum is identified as the Basic Science Curriculum. It consists of three phases, or groups, of courses in the human biology series: courses in the sciences basic to medicine, organ systems courses taught by basic and clinical disciplines, and introduction to clinical medicine. The first phase is designed to provide the background in basic disciplines required for the organ-system courses. In the second phase, emphasis is placed upon learning the normal and pathophysiologic properties of several human organ systems, and upon correlating these properties with clinical methods of data collection and problem formulation. Students pursue the Introduction to Clinical Medicine course throughout the first two years, learning to interview patients, obtain a medical history, and perform the physical examination.

Students pursue the Basic Science Curriculum during their first two years in the School of Medicine. The academic demands of the Basic Science Curriculum are scaled so that most students also will be able to take elective courses that will broaden the student's background.

#### First-Year Required Courses

Microscopic Anatomy (Histology)  
Gross Anatomy and Embryology (including trunk and head and neck anatomy)  
Mechanisms in Cell Physiology  
Biochemistry  
Systems of Human Behavior I  
Cell and Tissue Response to Injury (Pathology)  
Microbiology and Infectious Disease  
Introduction to Immunology  
Nervous System  
Critical Reading and Evaluation of Medical Literature  
Introduction to Clinical Medicine

#### Second-Year Required Courses

Cardiovascular System  
Respiratory System  
Principles of Pharmacology I  
Endocrine System  
Systemic Pathology  
Genetics  
Skin System  
Gastrointestinal System  
Epidemiology  
Hematology  
Musculoskeletal System  
Medicine, Health, and Society  
Urinary System  
Systems of Human Behavior II

Principles of Pharmacology II  
Reproduction  
Nutrition for Physicians  
Introduction to Clinical Medicine

### Clinical Curriculum (148 Credits)

The clinical curriculum is pursued in the third and fourth years of medical school. It includes prescribed clerkships to be completed by all students (84 credits or 42 weeks) in family medicine, internal medicine, obstetrics and gynecology, pediatrics, psychiatry, and surgery, plus clinical electives (32 credits or 16 weeks) in four clinical areas including clerkships in rehabilitation medicine/chronic care, emergency care/trauma, neurology, and surgery electives. Additional clinical or non-clinical selectives (a minimum of 32 credits or 16 weeks) are also required.

During the clinical curriculum, students gain clinical knowledge and gradually increase their clinical problem-solving abilities while working as junior members of the medical-care team. Each team is headed by a faculty clinician working in one of the medical school-affiliated hospitals, clinics, or practices.

### Independent Investigative Inquiry

In addition to the basic and clinical curricula, each student must complete 8 credits in independent study and investigation in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. The purpose of this requirement is for the student to gain an understanding of the philosophy and methods of scientific investigation.

## WWAMI Program

The WWAMI Program was initiated in 1971 as an effort to decentralize medical education to provide a broader range of educational opportunities for students, and to address the need for primary-care physicians oriented toward rural practice. It is an integral part of the undergraduate medical curriculum and is a fully accredited program of the School of Medicine. The WWAMI Program is named for the five states (Washington, Wyoming, Alaska, Montana, and Idaho) that share resources and responsibilities in the regional educational program. Funds appropriated to the WWAMI Program by the Wyoming, Alaska, Montana, and Idaho legislatures assure each state of positions for its students in the entering medical class each year.

### First-Year Training

In the first year of the WWAMI Program, approximately 40 percent of the students admitted to the University's School of Medicine receive the first year of medical school training at Washington State University, the University of Wyoming, the University of Alaska, Montana State University, or the University of Idaho. Washington State University positions not filled by volunteers are assigned by lottery. Every Washington-resident applicant should recognize the opportunity of assignment to Washington State University during the first year. Students from Wyoming, Alaska, Montana, and Idaho attend their home-state institutions. While at these institutions, they enroll in prescribed one-year medical school basic-science courses taught by on-site science faculty and are provided supplemental resources from the University of Washington's School of Medicine faculty. These students join their classmates at the University of Washington's campus in Seattle for their second year of medical studies.

### Third- and Fourth-Year Training

At the conclusion of the second year, students enter the portion of the curriculum that is predominantly clinical. Required, selective, and elective clerkships are described above. As part of the clinical training, students complete clerkships at the University of Washington, at its affiliated hospitals, or at community clinical units located in the five-state region. During the third and fourth year clerkships, School of Medicine full-time and clinical faculty members provide supervised clinical training in required as well as elective clerkships throughout the WWAMI region.

## Enrichment Opportunities

Students may enhance their medical education through a variety of sponsored activities that offer students an opportunity to explore areas of special interest, such as working in rural or urban clinics that serve medically underserved communities, undertaking medical research

projects, or participating in an international exchange program with a developing country. Brief descriptions of three of the more formally structured programs follow.

### **Rural/Underserved Opportunities Program (RUOP)**

This program exposes students to rural medicine and utilizes clinical training sites in all five states. For one month during the summer between the first and second years, students work with physicians in small communities, offering a chance to better understand the challenges and opportunities in these settings. Students receive a stipend supported by the Family Health Foundation, the Academy of Family Physicians, Area Health Education Centers, and the School of Medicine.

### **Medical Student Research Training Program**

Summer research opportunities are offered to UW medical students interested in gaining valuable experience from training in medical research. This research is planned and carried out under the supervision of a faculty sponsor and is undertaken during the summer between the first and second years. Student trainees in the program receive a stipend supported largely by gifts given by donors specifically to fund student research. The project is ten weeks, full-time, on a working schedule of forty hours per week, and the student may not be enrolled in courses for credit during this time. At the conclusion of the summer, the students prepare posters that are presented as part of the Medical Student Research Forum.

## **Student Evaluation and Promotion**

The awarding of the Doctor of Medicine degree is contingent upon satisfactory completion of academic and noncognitive requirements. The latter includes the acquisition of behavioral patterns and attitudes consistent with the School's professional standards and the oath that all students take at the time of graduation. As such, student evaluation is based upon observations by the faculty and others involved in teaching of the student's behavior and conduct as well as papers and examinations. Every student is required to pass Steps 1 and 2 of the United States Medical Licensing Examination, all University of Washington examinations, and complete an approved Independent Investigative Inquiry project before receiving the Doctor of Medicine degree. Periodic reviews of student performance are conducted by the School's Student Progress Committee. Students are informed of their deficiencies and the remedial requirements, if any, for these deficiencies. Dismissal from the School may occur if the student fails to maintain an acceptable academic record, fails to follow academic directives provided by the School's committees, or fails to develop attitudes and behavioral patterns appropriate to a career in medicine.

The Faculty Council on Academic Affairs reviews the Student Progress Committee's actions, and the Dean of the School of Medicine has final approval of the committee's and council's recommendations. A review mechanism is available within this process. Once dismissal or withdrawal from the School has occurred, the student may petition for reinstatement through the Faculty Council on Academic Affairs. Reinstatement will not be considered without substantial evidence that the problems causing the dismissal or withdrawal have been resolved. Only one reinstatement petition through the Faculty Council on Academic Affairs is allowed. If more than one year elapses after the withdrawal or dismissal, the individual may be required to apply for readmission through the admissions process. If a reinstatement petition is denied by the Faculty Council, the decision is final with no further avenue for review. Subsequent requests for admission must be directed through the standard admissions procedures.

### **Honor Society**

Alpha Omega Alpha (AOA) is a national honor medical society. A charter as Alpha of Washington was granted to the School of Medicine in 1950 by Alpha Omega Alpha. Members are elected by the membership of Alpha Omega Alpha on the basis of high scholarship and good moral character. The purpose of AOA is to recognize and perpetuate excellence in the medical profession. Its goals are to promote scholarship and research in medical school, to encourage high standards and conduct, and to recognize high attainment in medical science, practice, and related fields. Its motto is "Worthy to serve the suffering."

### **Grading System**

For students entering in 2002 and subsequent years, the grades awarded in each course in the M.D. curriculum are Pass or Fail in the first-year basic-science curriculum; Honors, Pass, or Fail in the applied-science curriculum;

and Honors, High Pass, Pass, or Fail in the clinical curriculum. The School's goal is to provide a curriculum that defines the competencies to be achieved by the student at each level. However, a pattern of documented evaluator concerns about a student's performance may indicate unsatisfactory performance when the record is viewed as a whole, even though passing grades have been assigned. Honors may be awarded in a course on predetermined criteria that may involve additional work in the subject as selected by the student. The grading system precludes the ranking of students and no class standing is assigned.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

### **Graduation with Honors**

A degree of Doctor of Medicine with Honors may be awarded to students with high achievement who, in addition, have demonstrated initiative and success in clinical and scholarly pursuits related to medicine. Candidates for graduation with honors are nominated by the departments each year and are selected on the basis of a review of their academic records by the Honors and Awards Committee.

## **Graduate Medical Education and Postdoctoral Training**

The University of Washington School of Medicine offers a broad array of residency and fellowship programs. Training occurs at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Puget Sound Health Care System, Children's Hospital and Regional Medical Center, and other affiliated training sites in Seattle and throughout the VVWAMI region. Postdoctoral research fellowship opportunities in the basic sciences are also offered.

## **Continuing Medical Education**

The Office of Continuing Medical Education, School of Medicine, offers a wide variety of courses for physicians and health-care professionals in the Pacific Northwest and throughout the nation.

Offerings include short courses of one to three days, one- to two-week board-review courses, visiting professorships, preceptorships, and mini-residencies. Other offerings include lecture series at hospitals, video-tape presentations, self-directed instructional materials, and other specific courses requested by members of the medical community throughout the VVWAMI region. Information on offerings is available from its Web site at [www.uwcmce.org](http://www.uwcmce.org).

All physicians also are invited to participate in continuing medical education programs offered by clinical departments, such as grand rounds and regular conference series.

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians. All programs sponsored by the Office of Continuing Medical Education are applicable to physician relicensure requirements of the Washington Board of Medical Examiners and for Category I credit of the Physician's Recognition Award of the American Medical Association. Prescribed credit for the American Academy of Family Physicians and other types of credit are included in the program offerings when appropriate.

Brochures and calendars for courses are available for more detailed information. For information concerning Continuing Medical Education programs, contact:

University of Washington School of Medicine  
Office of Continuing Medical Education  
Box 358220  
1325 4th Avenue, Suite 2000  
Seattle, Washington 98101-8220

## Anesthesiology

BB1459 Health Sciences  
depts.washington.edu/anesth

The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding medical student clerkships may be directed to Dr. John Bramhall at 206-231-2847 or bramhall@u.washington.edu. Other training questions may be directed to the Residency Coordinator at 206-543-2773 or lfg@u.washington.edu.

---

## Biochemistry

109 Bagley  
depts.washington.edu/bioe

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes.

For more information on the Biochemistry program, please see its entry in the College of Arts and Sciences section of the General Catalog.

---

## Bioengineering

N107 William H. Foege Building  
depts.washington.edu/bioe

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the health care system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as a leading bioengineering program in the world. Major areas of research and education include distributed diagnosis and home healthcare (d2h2), molecular bioengineering and nanotechnology, engineered biomaterials and tissue engineering, medical imaging and image-guided therapy, and computational bioengineering.

For more information about the Bioengineering program, please see its entry in the College of Engineering section of the General Catalog.

---

## Biological Structure

G514 Health Sciences  
www.biostr.washington.edu

The department promotes an understanding of biological processes through the study and analysis of structure-function relationships. The research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, biomolecular structure, and quantitative biology with an emphasis on computer-graphic representations of biological structures. This diversity creates a lively atmosphere in the department that provides a stimulating environment for the training of scientists with a variety of backgrounds.

The Department of Biological Structure recruits students through interdisciplinary Ph.D. programs at the University of Washington. Faculty of the Department of Biological Structure are affiliated with one or more of

these programs that provide high quality training in a wide range of scientific research areas. These multidisciplinary programs include faculty from the departments of Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genetics, Immunology, Microbiology, Molecular Biotechnology, Oceanography, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics, as well as research groups in the Fred Hutchinson Cancer Research Center.

The department does not offer a specific course of study leading to a Master of Science degree. An M.S. degree may be awarded, however, for students who meet the following requirements: One year of coursework (30 credits), concentrating in one or more areas that include neurobiology, cell and molecular biology, or developmental biology. Minimum 30 credits of research. Basic knowledge of statistics. One quarter of teaching as an assistant. A thesis committee approves the course of study, administers a general examination and reviews the research proposal prior to the thesis defense.

---

## Comparative Medicine

T142 Health Sciences  
depts.washington.edu/compmed

The Department of Comparative Medicine provides education and research opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (C MED 407) for biomedical graduate students, zoonotic diseases, and training in laboratory-animal medicine for veterinary medical students and veterinarians, combined with a Master of Science degree program in comparative medicine. Areas of current research interests include enteric disease, lymphocyte biology, biology of aging, mouse genomics, generation and characterization of transgenic animal models, somatic cell gene transfer, and animal models of gene therapy.

## Graduate Program

Graduate Program Coordinator  
T136 Health Sciences, Box 351790  
206-685-3261

## Postdoctoral Program

Postdoctoral training in the areas of laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of a combination of course work, clinical residency rotations, and research leading to a Master of Science degree in comparative medicine. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Financial assistance is normally provided. A detailed description of the postdoctoral program is available on the department's Web site at [depts.washington.edu/compmed/department/](http://depts.washington.edu/compmed/department/).

## Master of Science

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission to the degree program requires acceptance into the department's Postdoctoral Training Program. The degree option involves additional elective courses, the completion of a more-involved research project, and a thesis.

## Predocotrinal Program

This program is designed to acquaint veterinary medical students with laboratory-animal medicine as a veterinary specialty. Specific areas covered include control/treatment of the principal diseases of common laboratory animals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students year-round. Stipend support is normally provided.

## Family Medicine

C408 Health Sciences  
depts.washington.edu/fammed

Family medicine is the medical specialty which provides continuing, comprehensive health care for the individual and family. It is a specialty in breadth that integrates the biological, clinical, and behavioral sciences. The scope of family medicine encompasses all ages, both sexes, each organ system and, every disease entity. The prime instructional goal of the department is the education and training of physicians who will apply the knowledge and skills of this and other medical disciplines in family practice. Implicit in this goal is the necessity for continual development of new knowledge and its application in the clinical activities of the department.

The Department of Family Medicine was founded in 1971 and is involved with instruction of medical students in several ways. These include presentations in the basic curriculum of the first two years, clinical clerkships as part of the clinical core curriculum, and other elective courses and programs, including an underserved, interdisciplinary service-learning program, a four-week rural or urban underserved experience, an introductory continuity preceptorship, and independent investigative inquiry and research opportunities. A graduate residency program in family medicine provides clinical training meeting the standards of the American Board of Family Practice and the Council on Graduate Medical Education of the American Medical Association. Active affiliations are maintained throughout the WWAMI region in predoctoral, residency, fellowship, and continuing medical education in clinical care, teaching, and research.

---

## Genome Sciences

S-250 Foege Building  
www.gs.washington.edu

The Department of Genome Sciences was created in 2001 with the merger of the Department of Genetics and the Department of Molecular Biotechnology.

### Graduate Program

Graduate Program Coordinator  
S-340 Foege Building, Box 355065  
206-616-7297  
gensci@u.washington.edu

The Department of Genome Sciences offers a graduate program leading to Doctor of Philosophy degree.

The faculty and students of the Department of Genome Sciences study a broad range of topics, including the genetics of *E. coli*, yeast, *C. elegans*, *Drosophila*, and mouse; human and medical genetics; mathematical, statistical and computer methods for analyzing genomes and theoretical and evolutionary genetics; and genome-wide studies by such approaches as sequencing, transcriptional and translational analysis, polymorphism detection, and identification of protein interactions. Successful completion of the graduate program, generally over a period of five years, leads to the Ph.D. in Genome Sciences.

The department's goal is to address leading edge questions in biology and medicine by developing and applying genetic, genomic, and computational approaches that take advantage of genomic information now available for humans, model organisms, and a host of other species.

### Doctor of Philosophy

#### Admission Requirements

- \* Baccalaureate or advanced degree, either in a science such as biology, biochemistry, or related field, or in a computational area such as computer science or mathematics. The ideal candidate has experience in both areas. The most competitive applicants have excellent GRE scores as well as extensive laboratory research experience.
- \* Personal statement describing the applicant's academic and scientific background, research goals, and motivation for applying
- \* Curriculum vitae
- \* Unofficial copies of transcripts.

- \* Unofficial copies of GRE scores (and TOEFL scores, for international applicants). Applicants who have provided official scores to the UW Graduate School need not send additional copies.
- \* Three letters of reference from professors or others who are able to provide insight on the applicant's qualifications. Reference letters may be submitted online or by hard copy.
- \* Applicants still in school who will be taking additional courses not yet listed on the transcript should send a list of additional courses to be taken before graduation.

#### Degree Requirements

90 credits, to include:

- \* *First year:* Core courses, covering such topics as gene regulation, genomics, genetic analysis, genomic informatics, computational biology, proteomics, and population genetics, as well as literature review. Students rotate through a minimum of three laboratories before selecting a thesis lab at the end of the first year. Actual courses are determined in consultation with adviser.

Electives focused on specific areas of interest. Students have the option of selecting mentors from core faculty members in the Department of Genome Sciences as well as from adjunct and affiliate faculty members from several UW departments and the Fred Hutchinson Cancer Research Center.

- \* *Second year:* Thesis research and additional electives. At the end of the second year, the student takes the General Exam for Ph.D. candidacy.
- \* *Third year:* Students serve as teaching assistants for two undergraduate courses.
- \* *Final years:* Most students complete their research and defend their dissertation during their fifth year.
- \* During all years, students participate in the departmental Journal Club and Research Reports functions, and attend presentations of well-known researchers via the departmental seminar series.

#### Financial Aid

Genome Sciences provides full funding, including a competitive twelve-month salary, tuition waiver, and health insurance. Support is contingent upon satisfactory academic progress.

#### Research Facilities

The department is located in the William H. Foege Building. Students are assigned space in the laboratories of faculty members with whom they do their rotations or dissertation research. State-of-the-art research facilities are available in the department for cellular, protein, and DNA analysis. Extensive computer and library resources are available to students.

---

## Immunology

H564 Health Sciences  
depts.washington.edu/immunweb

For those contemplating careers in biomedical research, immunology provides challenging and exciting intellectual opportunities. Progress in the discipline in the past decade has been extraordinary, a fact that is nowhere more visible than at the University of Washington. The Department of Immunology, launched in 1989, now boasts more than 200 scientists, students, and technicians, all engaged in elucidating mechanisms underlying immune recognition and responsiveness. Current members of the department have distinguished records in the area of lymphocyte signaling, T and B cell development, macrophage function, antigen processing, immuno-tolerance, and the structure of antigen receptors.

Consider for a moment the fundamental processes that underlie immune function. First, millions of potentially injurious macromolecules must somehow be recognized. Second, recognition of these macromolecules, generally structures associated with potential pathogens, must trigger powerful effector mechanisms that permit elimination of the offending microorganisms. Finally, these recognition and effector systems must somehow distinguish the universe of potentially harmful molecules from an equally diverse repertoire of structurally similar 'self' components. How is

such exquisitely specific molecular recognition achieved? How do the cells responsible for mediating host defense develop, and what signaling systems direct their responses? These questions can now be productively addressed using biochemical, genetic, and cell biological techniques.

## Graduate Program

Graduate Program Coordinator  
H564 Health Sciences, Box 357650  
206-685-3955, fax 206-543-1013

The Department of Immunology continues to grow and includes more than 25,000 square feet of laboratory space housed on three floors of the H and I wings of the Health Sciences Center. Joint faculty members (those holding primary appointments in other departments) have laboratory facilities in adjacent buildings. Individual laboratories are well equipped for modern biomedical research, and there are central departmental facilities for fluorescence-activated cell sorting, confocal microscopy, and the production of transgenic animals. Students have access to all the instruments and to state-of-the-art microcomputer-based data manipulation. The departmental library maintains recent copies of all major immunology journals and many more are available online or in the nearby University of Washington Health Sciences Library, which is one of the premier scientific libraries in the United States, providing access to scientific literature in all relevant disciplines.

Students are admitted for autumn quarter; the application deadline is January 1 for U.S. citizens, and November 1 for international applicants. The requirements for admission are flexible; however, most successful applicants will have completed survey courses in biology, chemistry, and physics, one year of organic chemistry, and mathematics through integral calculus. Prior exposure to immunology through formal course work or laboratory research is desirable. All immunology graduate students are assured of financial support for the term of their studies.

## Master of Science

Students are not admitted to the department specifically as candidates for a master's degree. A terminal master's degree can be awarded if the faculty deems the student has made some progress in the program but not enough to be consistent with earning the Ph.D.

## Doctor of Philosophy

### Admission Requirements

Requirements for admission are flexible. However, most successful applicants have completed survey courses in biology, chemistry, and physics; one year of organic chemistry; and mathematics through integral calculus. Prior exposure to immunology through formal coursework, or especially through laboratory research, is desirable. A bachelor's degree is required, as is evidence of superior scholarship and above average performance on the GRE General Test. A GRE subject test is not required.

International students must take the Test of English as a Foreign Language (TOEFL); 250 is the minimum acceptable score on computer test.

### Degree Requirements

90 credits, as follows:

- \* 18 graded credits in the first two years of study, First-year coursework consists of consecutive 5-week long courses taken autumn through spring quarters - two per quarter; in winter quarter, all first year students also take Immunology 532 (4 graded credits), for a total of 13 or 13.5 graded credits the first year, depending on course choices (see below). In the second year, 4.5 or 5 additional graded credits are required, earned by taking electives during winter and/or spring quarters. As part of their first- and second-year coursework, students take two 5-week courses that specifically focus on cancer immunology.
- \* In autumn quarter of the first year, students may take an elective and attend selected lectures of the undergraduate immunology course, IMMUN 441. Students are required to attend the departmental seminar series, Journal Club, and research -in-progress talks beginning the first quarter and continuing throughout enrollment in the program.
- \* All elective courses must be relevant to biomedical research, and be rigorous enough to include either a final exam or required written paper for a grade. Elective classes must be at the 500 level, and receive a numerical grade.

- \* Each graduate student takes the Qualifying Exam during July immediately following his or her second year of classes. (M.S.T.P. students take their Qualifying Exams following their first year of graduate classes.) The qualifying exam itself is two parts - written and oral.
- \* Students who pass the Qualifying Exam then begin preparing for the General Exam, which must be taken within 15 months of the Qualifying Exam.
- \* The dissertation must meet all format requirements before being accepted by the Graduate School.

---

## Laboratory Medicine

NW 120, UW Medical Center  
depts.washington.edu/labweb

Medical technology, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of health care, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease.

## Undergraduate Program

Adviser  
NW 120, UW Medical Center  
206-598-6131  
medtech@u.washington.edu

The Department of Laboratory Medicine offers the following program of study:

- \* Bachelor of Science degree in Medical Technology

## Bachelor of Science

1. *Pre-professional Phase.* During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.
2. *Professional Phase.* The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable them to function effectively in the clinical laboratory.

The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.

*Suggested First- and Second-Year College Work:* Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include: CHEM 321, MICROM 301, GENET 351, GENET 371, B STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH 410, UCONJ 420. Begin taking admission requirements, shown below.

### Department Admission Requirements

BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239); MATH 124 or MATH 144 or STAT 220. BIOL 118 is recommended, but not required.

Complete all general education requirements including 10 credits of Individuals & Societies, and 10 credits of Visual, Literary, & Performing Arts, as well as all required English and writing courses.

Students admitted to the Medical Technology program must be exempt from or have successfully completed any required English as a Second Language (ESL) courses no later than August 31 of the application year or admission will be cancelled.

*Application Procedure:* See program adviser for application form. Application deadline is February 15, to begin the following autumn quarter.

## Major requirements

142-146 credits as follows:

1. *Courses Required for Admission (44-47 credits)*: See list above.
2. *Didactic Courses (52-53 credits)*: BIOC 405, BIOC 406; MICROM 440, MICROM 441, MICROM 442, MICROM 443, MICROM 444, MICROM 445; LAB M 321, LAB M 322, LAB M 418, LAB M 419, LAB M 420, LAB M 421.
3. *Clinical Rotations (46 credits)*: LAB M 423, LAB M 424, LAB M 425, LAB M 426, LAB M 427.
4. A minimum grade of 2.0 in all LAB M courses and a minimum GPA of 2.00, both cumulative and in required courses, are required for graduation.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes*: Graduates of the Medical Technology Program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience troubleshooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations.

Successful medical technologists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical technologist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical technologists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out research in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- \* *Instructional and Research Facilities*: The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Children's Hospital and Regional Medical Center, Dynacare Northwest, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans' Affairs Puget Sound Health Care System, and Virginia Mason Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington. These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialties in these divisions. In addition, students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.
- \* *Honors Options Available*: None offered
- \* *Internship Opportunities*: One or two internships per year in Japan available to graduates of the Medical Technology Program.
- \* *Department Scholarships*: None offered.
- \* *Student Organizations/Associations*: None currently active.

*Of Special Note*: The Medical Technology Program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 8410 W. Bryn Mawr Avenue, #670, Chicago, Illinois 60631-3415, (312) 714-8880. Graduates are eligible for certification by the Board of Registry of the American Society for Clinical Pathology and by the National Credentialing Agency for Laboratory Personnel, Inc.

## Medical Education and Biomedical Informatics

E312 Health Sciences  
www.mebi.washington.edu

The Department of Medical Education and Biomedical Informatics (MEBI) is comprised of three units: the Division of General Medical Education, the Division of Biomedical and Health Informatics, and MEDEX Northwest-the Division of Physician Assistant Studies. The Division of General Medical Education serves the medical school and health sciences community through program support, evaluation, and research in the field of medical education (www.mebi.washington.edu). The Division of Biomedical and Health Informatics consists of a research and training program that emphasizes both basic and applied aspects of informatics with a view toward making a difference in people's lives through interdisciplinary collaboration between faculty and students (www.bhi.washington.edu). MEDEX Northwest is a regional program that selects experienced health care providers for training as physician assistants and is dedicated to improving access to medical care and emphasizes delivery of health care services to medically underserved populations in the Northwest (www.medex.washington.edu).

The Department of Medical Education and Biomedical Informatics offers courses in the theory and application of medical education and biomedical and health informatics. Courses are designed for faculty, graduate and undergraduate students, postgraduates and fellows in the health sciences who desire further training in the methods, issues, research, and technology of medical education and biomedical informatics. MEBI offers masters and doctoral degrees, as well as certificates and fellowship training, in biomedical and health informatics. MEDEX Northwest offers a program of study leading to a certificate with an optional degree available (a Bachelor of Clinical Health Services). MEDEX also offers an optional masters degree pathway link with the Extended Degree Program in Public Health. MEDEX provides full-time training in three sites (Seattle, Spokane, and Yakima) and offers part-time training in Seattle and Spokane.

## Graduate Program

Graduate Program Coordinator  
1264 Health Sciences, Box 357240  
(206) 616-0369  
informat@u.washington.edu

## Master of Science

### Admission Requirements

1. Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States.
2. A minimum undergraduate GPA of 3.00, for the last 90 graded quarter credits or 60 graded semester credits.
3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
4. GRE scores are required unless the applicant holds an earned doctorate (such as Ph.D., D.D.S., M.D., Ed.D., J.D.) from an accredited U.S. institution. GRE scores must be from testing within the past five years.
5. GRE scores are required for all international applicants, including holders of foreign doctorates (such as Ph.D., D.D.S., M.D., Ed.D., J.D.).
6. A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

### Degree Requirements

60 credits, as follows:

1. *Foundational courses*: MEBI 530 (3), MEBI 550 (3), MEBI 552 (3); either LIS 510 (4) or LIS 544 (3); two of the following courses: MEBI 534 (3), MEBI 535 (3), HSERV 503/EPI 503 (3); a graduate-level statistics class
2. *Elective courses*: Four additional courses to establish depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.

3. *Research seminars*: At least 3 credits of MEBI 591 and at least 3 credits of MEBI 590
4. *Thesis and final exam*: All students must complete an M.S. thesis and pass a final exam for the master's degree.

## Doctor of Philosophy

### Admission Requirements

1. Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States.
2. A minimum undergraduate GPA of 3.00, for the last 90 graded quarter credits or 60 graded semester credits.
3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
4. GRE scores are required unless the applicant holds an earned doctorate (such as Ph.D., D.D.S., M.D., Ed.D., J.D.) from an accredited U.S. institution. The GRE scores must be from testing within the past five years.
5. GRE scores are required for all international applicants, including holders of foreign doctorates (such as Ph.D., D.D.S., M.D., Ed.D., J.D.).
6. A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

### Degree Requirements

90 credits, to include:

- \* *Foundational Courses*: MEBI 520 (2), MEBI 530 (3), MEBI 550 (3), MEBI 552 (3); either LIS 510 (4) or LIS 544 (3); two of the following: MEBI 534 (3), MEBI 535 (3), HSERV 503/EPI 503 (3); a graduate level statistics class
- \* *Courses for Depth of Knowledge*: Five additional courses to establish the necessary depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.
- \* *Research Seminars*: 12 credits of research seminars that must include at least 6 credits of MEBI 591 and at least 3 credits of MEBI 590
- \* *Oral Presentations*: All students must satisfactorily present material in an oral format. Students should present at least once per year. This requirement is fulfilled by journal club and research seminar (MEBI 590 and MEBI 591) presentations.
- \* *Formal Examinations*:
  - o *The Qualifying Examination*: All students must pass a qualifying examination (oral and written) that covers breadth of knowledge prior to formally creating a Ph.D. supervisory committee and proceeding with their dissertation research.
  - o *The General Examination*: The general examination includes an oral and written part. The oral portion is a public presentation of the student's area of research, and includes an oral examination covering the student's in-depth knowledge of his/her area.
  - o *Final Examination (dissertation defense)*: A candidate for the Ph.D. must present a dissertation demonstrating original and independent investigation and significant achievement in the field of Biomedical and Health Informatics.

## Medical History and Ethics

A204 Health Sciences Building  
depts.washington.edu/mhedept

### Undergraduate Program

Adviser  
A204 Health Sciences Building, Box 357120  
206-543-5145  
mhinfo@u.washington.edu

The Department of Medical History and Ethics offers the following programs of study:

- \* A minor in medical history and ethics

## Minor

*Minor Requirements*: 25 credits, as follows:

1. *Core Requirement*: One of the following: MHE 411, MHE 474/PHIL 411, PHIL 240, or PHIL 242. One of the following: MHE 401, MHE 417, or MHE 481.
2. *Additional courses from the following to total 25 credits (15 credits must be MHE courses)*: MHE 401, MHE 402/PHIL 412, MHE 404/PHIL 413, MHE 411, MHE 417, MHE 440/PHIL 459, MHE 474/PHIL 411, MHE 481, MHE 483, MHE 485, MHE 497, MHE 498, MHE 499; ANTH 308, ANTH 375, ANTH 474, ANTH 475/HSERV 475, ANTH 476, ANTH 477; CHID 332, CHID 433; GEOG 280, GEOG 380, GEOG 480; HIST 311, HIST 312, HSTAA 316; NURS 200, NURS 410; PHIL 102, PHIL 160, PHIL 240, PHIL 242, PHIL 345, PHIL 360, PHIL 409, PHIL 410, PHIL 415, PHIL 460, PHIL 481, PHIL 482. Any of the core requirement courses listed above may be used as an elective if not counted toward the core requirements. If an MHE course is jointly offered with another department's course, MHE credits toward the required 15 credits is accepted.
3. A minimum grade of 2.0 is required in each course presented for the minor.

## Medicine

RR512 University of Washington Medical Center

domchair@u.washington.edu

Active programs in teaching, research, and patient care are carried on at the University of Washington Medical Center, Veteran's Administration Puget Sound Health Care System (VAPSHCS), Harborview Medical Center, Pacific Medical Center, the Puget Sound Blood Center, the Northwest Kidney Center, and the Fred Hutchinson Cancer Research Center. Major affiliations for clinical teaching also exist with Providence Medical Center and Swedish Hospital Medical Center. There are many additional affiliations with community hospitals in Seattle, the state of Washington, and the WWAMI region. Medical students, interns, medical residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

## Microbiology

K353A Health Sciences  
depts.washington.edu/micro

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

### Undergraduate Program

For details of the undergraduate program in microbiology, see the College of Arts and Sciences section of the General Catalog.

### Graduate Program

Graduate Program Coordinator  
K335A Health Sciences, Box 357242  
206-543-2572  
advmicro@u.washington.edu

The Department of Microbiology offers a graduate program leading to the Doctor of Philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

### Admission Requirements

Students can be admitted to the Ph.D. program with a background in any biological science discipline. Selection is based on the evaluation of a student's undergraduate record for indications of the ability to excel in independent, creative research. The department strongly recommends that undergraduate preparation include courses in biochemistry, physics, general and organic chemistry, microbiology, molecular biology and cell

biology. To be competitive with the applicant pool, prospective students are also strongly advised to seek opportunities to carry out undergraduate research.

Required background courses (generally satisfied prior to entry into the graduate program):

1. A one year course in biochemistry (equivalent to BIOC 440, BIOC 441, and BIOC 442)
2. A course in classical and molecular genetics (equivalent to GENOME 371 or GENOME 372)
3. A course in general microbiology (equivalent to MICROM 410)
4. A course in medical microbiology and basic immunology is recommended for those considering research in the area of medical microbiology or virology

## Degree Requirements

90 credits minimum, as follows:

- \* *Conjoint courses (6 credits):* 6 credits from the following conjoint courses: CONJ 524, CONJ 531, CONJ 532, CONJ 533, CONJ 534, CONJ 535, CONJ 537, CONJ 538, CONJ 539, CONJ 541, CONJ 543, CONJ 544, CONJ 545, CONJ 546, CONJ 547, CONJ 548, CONJ 549 (1.5 credits each). It is recommended that students take additional conjoint courses or choose one or more of the Genome Sciences modules: GENOME 551, GENOME 552, GENOME 553, GENOME 554, GENOME 555, GENOME 556, GENOME 559 1.5 credits each).
- \* *Virology and Bacteriology courses (6-7 credits):* Three of the following courses; one virology and one bacteriology course must be among those selected: MCB 532 (3), MCB 542 (3), MICROM 441 (4), MICROM 450 (3), MICROM 510 (3), MICROM 530 (3), MICROM 553 (3)
- \* *Faculty Research Presentations for first-year students:* MICROM 599 (2)
- \* *Lab Rotation:* MICROM 500, minimum of three quarters
- \* *Journal Club:* MICROM 522, continuous enrollment
- \* *Seminar:* MICROM 520 seminar series or attendance at Fred Hutchinson seminars. Students at Fred Hutchinson are also encouraged to attend the Microbiology seminars. To be taken every quarter unless a conflict with teaching exists.
- \* *Research Discussion Groups:* To be taken every quarter. Students should register for the appropriate course number for credit.
- \* *Additional requirements:*
  - a. Teaching assistantship in at least two lab courses for undergraduates (usually satisfied in the first and/or second year).
  - b. Give at least two formal lectures in an undergraduate course (third or fourth year).
  - c. Be first author on multiple papers related to thesis research which are published or accepted for publication in refereed journals. Under some circumstances, one first-author publication would satisfy this requirement.
- \* General examination, dissertation, final exam

---

## Neurological Surgery

700 9th Avenue, Harborview Medical Center  
depts.washington.edu/neurosurg

askuwns@u.washington.edu

The Department of Neurological Surgery is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction in this area is provided for medical students and postgraduate physicians.

The department's medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, University of Washington Medical Center, Veterans Affairs Puget Sound Health Care Center, and Children's Hospital and Regional Medical Center. The department also has several course offerings correlating research and clinical problems of the nervous system, including the research seminars in neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.

Selected medical students also may elect research experience within the Department of Neurological Surgery. The department research facilities are housed in the Medical Research Tower of the University of Washington Medical Center, at Harborview Research and Training Building, and at Veterans Affairs Puget Sound Health Care System. Investigations are

under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year program emphasizes preparation for a career in academic neurosurgery.

---

## Neurology

RR650 University of Washington Medical Center  
depts.washington.edu/neurolog

neurolog@u.washington.edu

Neurology, previously a division of the Department of Medicine, became an independent department at the University of Washington School of Medicine in autumn of 1995. The four-year residency program (including an internship) offers superb training in all facets of neurology in a setting of great institutional strength in fundamental neuroscience research. In addition, the Department of Neurology offers exceptional training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical-clerkship program provides basic training in neurology patient care. The Neurology Department is active in teaching, research, and patient care at the University of Washington Medical Center, Seattle Veterans Affairs Medical Center, Harborview Medical Center, Children's Hospital and Medical Center, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

---

## Obstetrics and Gynecology

BB667 Health Sciences Building  
depts.washington.edu/obgyn

The Department of Obstetrics and Gynecology is involved with teaching, patient care, and research in the areas of normal and abnormal human reproduction: growth and development of the fetus, normal and complicated obstetrics, and surgical and medical diseases of the female reproductive system, including endocrinology, oncology, infectious disease, urogynecology, psychosocial problems, primary and preventive health care, and ethics.

---

## Ophthalmology

RR801 University of Washington Medical Center  
depts.washington.edu/ophthweb

The Department of Ophthalmology is responsible for the instructional and research programs in diseases of the eye and visual system and its adnexae.

Medical-student instruction is provided, including multiple electives in the clinical years. Graduate physicians are provided with three years of residency training at the affiliated hospitals. An optional internship is available in ophthalmology. A two-year ophthalmic plastics and orbit fellowship, and a two-year surgical retina fellowship are offered. Patient care is provided under the supervision of full- and part-time faculty physicians at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Medical Center, and Children's Hospital and Regional Medical Center.

Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/physiology of the orbit. Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact Ingrid Noe at [ingrid@u.washington.edu](mailto:ingrid@u.washington.edu). For more information on medical student clerkships, contact Dorrie Quirante at [dorrieq@u.washington.edu](mailto:dorrieq@u.washington.edu).

## Orthopaedics

BB1043 University of Washington Medical Center

The Department of Orthopaedics is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the Master of Science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

---

## Otolaryngology -- Head and Neck Surgery

BB1165 University of Washington Medical Center

The Department of Otolaryngology -- Head and Neck Surgery provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major portion of departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

---

## Pathology

C516 Health Sciences

Pathology is the study of disease; its causes, mechanisms, and effects on the body. Pathology is both a basic biological science and a specialty of medicine. As a medical specialty, practiced by M.D.s, it includes the laboratory evaluation of organs, tissues and fluids to assist other physicians in reaching a diagnosis. As a basic science, practiced by Ph.D.s, pathology focuses on the experimental investigation of the molecular processes of disease, using techniques of cell and organ culture, biochemistry, molecular biology, and genetics.

## Graduate Program

Graduate Program Coordinator  
C516 Health Sciences, Box 357470  
206-616-7551

The Department of Pathology offers graduate training in experimental pathology, with an emphasis on the cellular and molecular biological basis of disease, leading to the Doctor of Philosophy degree in cellular and molecular pathology. The primary goal of the graduate program is to train individuals for careers as practicing scientists in biomedical research, investigating basic disease mechanisms. Emphasis is on development of skills in hypothesis generation and testing, including the design, accomplishment and critical interpretation of experiments. Experimental pathology uses the full range of biomedical research techniques (including biochemistry, molecular biology, cell biology, animal modeling) to attempt to elucidate the mechanisms underlying human disease. Graduates of the program usually continue research careers at biotechnology companies or universities/research institutes.

## Doctor of Philosophy

### Admission Requirements

- \* Copy of the Graduate School Application
- \* Official transcripts
- \* Official GRE scores. The department also recommends that applicants take the Subject Test in Biology or related area.

- \* Statement of purpose and research interests
- \* Three or more letters of recommendation
- \* Personal statement that addresses the relationship between personal background and aspirations

### Special Requirements

Prospective candidates should have taken undergraduate courses in the sciences, and have acceptable scores on the Graduate Record Examination, including advanced biology or chemistry. Some experience in a research laboratory is strongly recommended. Those wishing to matriculate toward both the M.D. and Ph.D. degrees must gain admission to both the Graduate School and the School of Medicine.

### Degree Requirements

90 credits, to include:

- \* *Required coursework:* PATH 500 (3), PATH 501 (1), PATH 507 (2), PATH 512 (1.5), PATH 513 (1.5), PATH 515 (1.5), PATH 516 (3), PATH 520 (1), PATH 551 (2-5); BIOST 511 (4); CONJ 538 (1/1.5), CONJ 539 (1.5)
- \* *Research before the General Examination:* PATH 600
- \* *Research after the General Examination:* PATH 800
- \* *Recommended courses:* CONJ 531 (1.5), CONJ 532 (1.5)
- \* General Examination
- \* Dissertation
- \* Final Examination

### Financial Aid

Funding for students is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

### Research Facilities

The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of disease in mammalian species. Special facilities exist for training in electron microscopy; cell, tissue, and organ culture; recombinant DNA techniques; histochemistry and cytochemistry; analytical biochemistry; immunology; and molecular and cell biology.

### Residency Training Program

The department supervises a residency-training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Subspecialty training is also available through clinical fellowships. Persons who complete the residency program are eligible for certification by the American Board of Pathology. For additional information, contact the Resident Program Director, Department of Pathology, Box 356100 or visit the Residency Program Web site.

---

## Pediatrics

RR314 Health Sciences  
[www.washington.edu/medicine/pediatrics/home](http://www.washington.edu/medicine/pediatrics/home)

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 20 electives, in addition to the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives as well as the traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Children's Hospital and Regional Medical Center, University of Washington Medical Center, and Harborview Medical Center.

# Pharmacology

E401 Health Sciences  
depts.washington.edu/phcol

Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

## Graduate Program

Graduate Program Coordinator  
E-417 Health Sciences, Box 357280  
206-685-9252  
phcoladm@u.washington.edu

The Department of Pharmacology offers the Doctor of Philosophy degree.

### Doctor of Philosophy

#### Admission Requirements

A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, pharmacy, physics, physiology, psychology, or zoology. Students are selected from the applicant pool based on several criteria, including academic records, recommendations, and previous research experience.

#### Graduation Requirements

Minimum 90 credits, to include:

PHCOL 510, PHCOL 511, PHCOL 512, and PHCOL 513 (2 credits each) with a grade of 2.7 or above for each class. Enrollment in PHCOL 507 throughout graduate school. PHCOL 514 in the first, second, and third years of graduate study.

PHCOL 519 (laboratory rotations) for autumn, winter, and spring quarters of the first year with the purpose of acquainting the student with various areas of pharmacology and research under investigation within the department. During each quarter, the student carries out a research project in the laboratory of a faculty member. At the end of the quarter, the student gives a presentation on the rotation research project that is evaluated by the faculty, using the criteria of scientific content, delivery, knowledge of the subject, and organization of material. The student receives a grade and academic credit for PHCOL 519. Students entering the Ph.D. program with an M.S. degree or equivalent may petition to enroll in only one quarter of PHCOL 519 before selecting a lab. Rotations may occur outside the department by special permission only.

Four advanced 2-3 credit graded elective courses in pharmacology in addition to the 510-513 series. Nine graded credits (non-seminar) in graduate-level courses in physiology, biochemistry, molecular biology, immunology, cell biology, or other relevant areas. The courses should strengthen the foundation of the student's thesis proposal.

Creditable passage of a comprehensive written exam on general pharmacology, to be taken during summer quarter of the second year. During the first quarter of the third year of study, students take the oral General Examination. This examination is given by the Supervisory Committee. The examination is based in part on an evaluation of the student's proposed research for the dissertation and on his or her knowledge of the major disciplines important to the research. Based on the result, the committee may recommend termination, further work and subsequent re-examination, or approval of the student's performance and candidacy for the Ph.D. degree.

After successful completion of the General Examination, the student devotes most of his or her time to thesis research in the third and subsequent years of study.

The research project for the Ph.D. dissertation is chosen by the candidate and faculty sponsor and approved by the candidate's Supervisory Committee. Research must represent a worthy and fundamental contribution showing originality in concept and implementation.

When the candidate has concluded the research project and prepared a complete copy of the dissertation, the sponsor will obtain approval of the

Graduate School and set a date for the Final Examination. The Final Examination is concerned principally with the subject matter of the dissertation, but may include the background and origins of the dissertation problem as well as its practical applications and extrapolations.

### Financial Aid

Financial support is offered to students who maintain satisfactory academic progress. Tuition and stipends are provided by National Institutes of Health training grants, University of Washington teaching assistantships, individual research grants, and fellowships from private sources.

# Physiology and Biophysics

G424 Health Sciences  
depts.washington.edu/pbiopage

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences—anatomy, molecular biology, immunology, biochemistry, pharmacology, and pathology—and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

## Graduate Program

Graduate Program Coordinator  
G424 Health Sciences, Box 357290  
206-685-0519  
pbiop@u.washington.edu

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the M.S. degree are rarely accepted. Students pursuing a Ph.D. degree in physiology and biophysics may emphasize molecular and cellular physiology, biophysics, neurobiology, respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years to complete. The first year is spent acquiring a broad knowledge of physiology via a sequence of courses and laboratory rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter years are spent pursuing the area in depth and completing an original-research project.

Individuals with graduate degrees in physiology and biophysics often pursue careers in teaching and research in colleges and universities and in biotech industries. With additional training, graduates have been successful in medicine, law, creative writing, and high-level computer programming.

The department participates in interdisciplinary Ph.D. degree programs in Neurobiology and Behavior, and in Molecular and Cellular Biology.

### Master of Science

The Master of Science degree is normally granted as part of the path of study leading to the Doctor of Philosophy degree. Students are normally admitted only to the Doctor of Philosophy degree.

### Doctor of Philosophy

#### Admission Requirements

To apply for admission, a student must provide academic transcripts, Graduate Record Examination (GRE) scores, four letters of recommendation, and a statement of purpose. Because of the broad scope and interdisciplinary nature of the graduate program, there are no specific prerequisites for admission. However, most students have backgrounds in the physical and/or biological sciences. These include majors in biology, physics, mathematics, engineering, computer science, chemistry, and psychology. The most important requirement is a strong motivation and excitement about doing science.

## Degree Requirements

90 credits minimum, as follows:

Due to the broad nature of the research interests in the department and the diversity of graduate-student backgrounds, formal course requirements are kept to a minimum and are completed in the first year. Students are encouraged to shape their own graduate education, as they choose the majority of their coursework and the scientific direction for their research. The courses available include those offered by other departments, both in the Medical School and elsewhere on campus. Electives may be chosen from a list of mini-courses whose topics reflect the current interests of faculty and students. Students are required to take at least six mini-courses.

Required Courses:

- \* CONJ 531 (1.5), CONJ 532 (1.5), P BIO 532 (2), NEUBEH 501, NEUBEH 502 (3, 3), P BIO 508 (2-5, max. 5, must be taken three times), P BIO 513 (4), P BIO 519 (1)
- \* Six departmental mini-courses to be completed prior to the General Exam, taken from the following: P BIO 509 (3), P BIO 545 (3), P BIO 550 (1), P BIO 551 (1), P BIO 552 (1), P BIO 553 (2), P BIO 554 (1), P BIO 555 (1), P BIO 556 (1), P BIO 557 (1), P BIO 559 (3)
- \* P BIO 600 (before General Examination)
- \* P BIO 800 (after General Examination)
- \* *Note:* P BIO 503 (4) is highly recommended, but not required

### General Exam

The General Exam must be taken by the last day of autumn quarter of the third year. After passing the General Exam the student is advanced to candidacy for the doctoral degree. The student then registers for P BIO 800 and continue working on thesis research.

### Final Exam

The culmination of the program is the submission of a written doctoral thesis and the presentation of this work in a public lecture attended by members of the department and the University.

## Research Facilities

The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, respiratory physiology, muscle biophysics, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.

---

# Psychiatry and Behavioral Sciences

BB1644 Health Sciences  
www.uwpsychiatry.org

pbsci@u.washington.edu

The department offers course work, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

## Graduate Program

The medical school curriculum is divided into a core (basic) curriculum and an elective curriculum. Within its core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning

theory, cognition, memory, perception, neuropharmacology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsychiatry and behavioral medicine, as well as training in interviewing skills and assessment techniques. Its elective program includes a variety of clinical experiences and advanced didactics and seminars designed to further the knowledge and skills developed within the basic curriculum. In addition, the department encourages research and other scholarly pursuits by students in areas of interest to them. Stipends are available for research studies.

## Residency Training in Psychiatry

Contact: Deborah Cowley

A four-year residency for medical school graduates and a three-year post-internship residency prepares physicians for Specialty Board Certification in Psychiatry. Clinical rotations on inpatient, outpatient, emergency, and consultation/liason services are augmented by individual supervision and didactic lectures. With the program's integrative orientation, residents become proficient in psychotherapy, psychopharmacology, and community liaison with patients of all ages. Fellowships in child, geriatric, addiction, community, forensic and consultation-liason psychiatry, and psychiatric neuroscience are available.

## Clinical Psychology Internship Program

Contact: Joan Romano

The one-year internship in clinical psychology, accredited by the American Psychological Association, offers advanced clinical training to candidates for the doctorate in clinical psychology from graduate programs accredited by the American Psychological Association. Training tracks with the internship in general adult, general child, rehabilitation and health psychology, and public behavioral health and justice policy (adult and child). Advanced research skills training is also available as part of an INH-funded training grant for selected internship participants.

## Postdoctoral Fellowship Training

Contact: Richard Veith

Postdoctoral fellowships for advanced clinical and research training in behavioral medicine, broadly construed, are also offered.

---

# Radiation Oncology

NN106 University of Washington Medical Center  
www.radonc.washington.edu

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the Department of Radiation Oncology are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

---

# Radiology

RR215 University of Washington Medical Center  
www.rad.washington.edu

Diagnostic radiology is that branch of clinical medicine that specializes in the interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology's major subspecialties, radionuclides are

employed for both diagnostic and therapeutic purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The Department of Radiology consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both divisions are ably supported by technologists and faculty members in the field of radiation physics. Instruction in radiology is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each of the hospitals affiliated with the University.

---

## Rehabilitation Medicine

BB919 Health Sciences  
depts.washington.edu/rehab

The Department of Rehabilitation Medicine provides education for medical students, interns, residents, and allied health students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.

The department offers curricula leading to the following degrees: Master of Occupational Therapy, Doctor of Physical Therapy, and a Bachelor of Science in the field of prosthetics and orthotics. The department also offers post-professional degrees in rehabilitation science (M.S. and Ph.D.) with options for individuals with previous rehabilitation-related training to pursue academic or research careers.

## Occupational Therapy

**Head**  
Elizabeth M. Kanny

Occupational therapists provide services related to occupational performance in everyday life in the areas of self-care, work and productive activities, and play/leisure. Occupational therapists work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventive strategies that promote well being. They work with people in all age groups from diverse cultural and ethnic groups and socioeconomic levels.

Occupational therapists help people with impairments or limitations to live as productive a life as possible. They work with people to increase independent function in life activities, enhance development, and to minimize or prevent disability. They use a variety of therapeutic methods including training in self-care activities; design, fabrication, and application of splints; sensorimotor activities; therapeutic group activities; selection and use of adaptive equipment; adaptation of physical environments in the home, school, work, or community; activities to enhance functional performance in everyday life; and work evaluation, work hardening, and workplace adaptations.

Today's occupational therapists work in clinical and community practice, administration, education, and research. Work settings include rehabilitation centers and hospitals; public and private schools; home health agencies; mental health centers and psychiatric hospitals; private practice; vocational rehabilitation centers and industrial clinics; private industry, wellness and prevention programs; and hospices.

The curriculum is designed to link theoretical and technical knowledge in occupational therapy with professional values, attitudes, and skills. The education of each student is based on the philosophy that "occupational performance" (including self-care, work, and leisure/play) is central and provides a purpose and meaning to one's life. Professional standards of practice, ethics, and continued professional growth are emphasized throughout the program. Program requirements include seven quarters of professional coursework and six months of full-time fieldwork training. Fieldwork training must be completed within 24 months after completion of professional course work. Completion of all program requirements leads to a Master of Occupational Therapy degree awarded by the School of Medicine, Department of Rehabilitation Medicine.

The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220, phone 301-652-2682. Graduates of the program are eligible to sit for the national certification examination for the occupational therapist. The National Board for Certification in Occupational Therapy (NBCOT) is the certifying agency responsible for the development and implementation of this exam. Most states, including Washington, require state licensure in order to practice.

## Master of Occupational Therapy

### Admission Requirements

Applicants must have completed a bachelor's degree in any major and taken the Graduate Record Exam (GRE) within the past five years. Eight prerequisite courses must be completed prior to admission to the program. In addition, applicants must have volunteer or work experience in at least two practice areas of occupational therapy. The admission process occurs once a year for entry autumn quarter of each year; applications are evaluated starting January 15 of each year.

Specific prerequisite courses at the UW include the following. For students who have attended schools other than the UW, comparable courses must be taken:

- \* *Natural Sciences*: ZOO 118 (5 credits), B STR 301 (4), CHEM 120 (5), PHYS 114 (4), PHYS 117 (1), EDPSY 490 (3).
- \* *Social Sciences*: PSYCH 305 (5 credits), PSYCH 306 (5), either SOC 110 (5) or ANTH 202 (5).

To apply, students must have completed five of the prerequisite courses, with three courses in the natural sciences. They must have earned a minimum GPA of 3.00 in the prerequisite courses with no single course graded less than 2.0; and have a GPA of 3.00 on the most recent 60 semester or 90 quarter credits. Admission is based on academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information may be obtained by calling 206-598-5392, from the program's Web page, or by sending an email to [ot@u.washington.edu](mailto:ot@u.washington.edu).

### Degree Requirements

The following courses must be completed satisfactorily in the scheduled sequence, beginning autumn quarter only, at the UW: REHAB 400, REHAB 401, REHAB 403, REHAB 414, REHAB 442, REHAB 444, REHAB 445, REHAB 448, REHAB 451, REHAB 452, REHAB 566, REHAB 570, REHAB 571, REHAB 572, REHAB 573, REHAB 574, REHAB 575, REHAB 576, REHAB 577, REHAB 578, REHAB 579, REHAB 580, REHAB 581, REHAB 582, REHAB 584, REHAB 585, REHAB 587, REHAB 591, REHAB 594, CONJ 480, and HUBIO 563.

*Student Evaluation:* The University grade-point system is used in student evaluation. A student must maintain a cumulative GPA of 3.0 in all required professional coursework to retain satisfactory standing and to graduate. Detailed scholastic requirements are available on the program's Web page.

If at any point the OT curriculum cumulative GPA falls below 3.0, the student is placed on academic probation and the student must raise it to 3.0 by the end of two subsequent quarters. If a student is unable to remove his/her probation status, he/she is subject to dismissal from the program. If a student receives a grade below 2.7 in a required course, continuation in the program is reviewed and determined by the Occupational Therapy Advisory and Evaluation Committee.

The student must satisfactorily complete all academic coursework before taking the two required Level II Fieldwork placements (REHAB 594). Both placements must be satisfactorily completed within two years following completion of the academic portion of the program in order to graduate from the program.

For more information on the Master of Occupational Therapy program, visit the department's Web site.

# Physical Therapy

## Head

Mark Guthrie

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal or neuromuscular problems.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is rebuilding self-confidence and creating a desire to return to a normal, active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.

As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, evaluate, and direct patient care in outpatient clinics, rehabilitation centers, health maintenance organizations, developmental centers, home-health agencies, schools, extended-care facilities, voluntary health programs, industry, and private practices. The physical therapist may be found anywhere quality health care is needed. Increasingly, physical therapists are becoming involved in basic and clinical research, such as the academic community, either as full-time faculty members or as supervisors of clinical education, and as consultants in local, state, and federal health-planning activities.

Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. The steps to licensure as a physical therapist vary slightly from state to state, but all physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including an emphasis on physical and social sciences. The physical therapist evaluates the patient's problem by testing such factors as range of joint motion, muscle strength, posture and gait, pulmonary function, sensation and sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Some intervention procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and training in the use of orthotic, prosthetic, and other assistive devices, such as crutches, canes, and wheelchairs.

As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formalized mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.

The University of Washington program in physical therapy is accredited by the American Physical Therapy Association Commission on Accreditation in Physical Therapy Education.

## Doctor of Physical Therapy

### Admission Requirements

Enrollment is limited to 30 students each year and admission is competitive.

Application is restricted to those who are U.S. citizens or U.S. permanent residents by the autumn program entrance date.

Applicants are required to submit scores from the General Test portion of the Graduate Record Examinations (GRE).

Prior to the application deadline of December 15, the student must have met the following minimum academic requirements:

- \* Minimum 3.00 GPA on all college-level courses
- \* Minimum 3.00 GPA on PT prerequisite courses
- \* Minimum 2.0 (C) grade on each PT prerequisite course
- \* 22 quarter credits (or 50%) of PT prerequisite courses completed. For a list of PT prerequisite course descriptions, see the program Web site at [http://depts.washington.edu/rehab/pt/dpt\\_apply.html](http://depts.washington.edu/rehab/pt/dpt_apply.html)

Minimum requirements above must be maintained until program entrance and all prerequisite courses must be finished at that time. Applicants must complete a bachelor's degree before they start the program.

Most clinical internship placement sites require potential trainees to undergo a Washington State Patrol criminal history background check for crimes against vulnerable populations. To ensure that all students offered positions in the PT program have no such history and therefore will be able to finish the clinical portion of the curriculum, the completion of a criminal background check is required of applicants accepting admission.

### Degree Requirements

148 credits, as follows:

#### Year One

- \* *Autumn Quarter:* MEDEX 452 (6), REHAB 403 (2), REHAB 444 (4), REHAB 451 (1), REHAB 504 (2), REHAB 509 (1), REHAB 517 (2)
- \* *Winter Quarter:* CONJ 480 (5), REHAB 400 (4), REHAB 445 (4), REHAB 452 (1), REHAB 506 (2), REHAB 517 (2)
- \* *Spring Quarter:* REHAB 401 (4), REHAB 442 (4), REHAB 448 (1), REHAB 507 (3), REHAB 517 (2), REHAB 536 (1)
- \* *Summer Quarter:* REHAB 500 (4), REHAB 508 (4), REHAB 517 (2), REHAB 537 (2), REHAB 538 (2), REHAB 540 (2)

#### Year Two

- \* *Autumn Quarter:* REHAB 414 (2), REHAB 476 (2), REHAB 511 (5), REHAB 523 (4), REHAB 566 (1)
- \* *Winter Quarter:* REHAB 502 (4), REHAB 512 (4), REHAB 527 (3), REHAB 529 (2)
- \* *Spring Quarter:* REHAB 502 (4), REHAB 503 (3), REHAB 513 (3), REHAB 566 (1)
- \* *Summer Quarter:* REHAB 416 (2), REHAB 505 (2), REHAB 514 (3), REHAB 591 (3)

#### Year Three

- \* *Autumn Quarter:* REHAB 591 (1), REHAB 595 (10)
- \* *Winter Quarter:* REHAB 591 (1), REHAB 595 (10)
- \* *Spring Quarter:* REHAB 591 (2), REHAB 595 (10)

## Prosthetics and Orthotics

### Director

Ann Yamane

The prosthetist-orthotist is a member of the rehabilitation health care team, which also includes physicians, surgeons, physical and occupational therapists, psychologists, vocational rehabilitation counselors, and other appropriate specialists. Team members work together with physically challenged individuals to enhance their daily life and increase their functional abilities.

The two groups of prosthetic-orthotic devices which can potentially enter into the rehabilitation of an individual are (1) prosthetic devices, which replace or substitute for a missing limb or part of a limb, and (2) orthotic devices, which help with the control of motion and the support of a weakened body segment.

Practitioners provide direct patient care and management. Practitioners work in conjunction with physicians, surgeons, and therapists to evaluate the prosthetic or orthotic needs of the patient. They design the appropriate device, supervise technicians who fabricate them, and evaluate the fit and functional use for each patient. To evaluate function, the prosthetist-orthotist must have a detailed knowledge of anatomy and kinesiology, joint range of motion, muscle strength and human locomotion.

Before designing a prosthesis or orthosis, the prosthetist-orthotist examines a patient to find any conditions that might affect the future success of the orthosis or prosthesis. Following the evaluation, the prosthetist-orthotist obtains an impression of the affected segment along with the appropriate measurements. A technician fabricates the prosthesis or orthosis, and the prosthetist-orthotist fits the patient and makes changes as necessary.

### Adviser

BB810A Health Sciences Center  
206-616-8586  
pando96@u.washington.edu

The prosthetics and orthotics division offers the following program of study:

\* The Bachelor of Science degree with a major in prosthetics and orthotics

## Bachelor of Science

*Suggested First- and Second-Year Courses:* Courses fulfilling the general education requirements including proficiency and areas of knowledge (20 VLPA, 20 I & S) should be completed during the first two years prior to entry into the program. Prerequisite coursework (general biology, general physics, human anatomy and physiology, general chemistry, psychology) is also completed during this time. Suggested courses include SOC 110, STAT 220, COM 201, COM 220, PSYCH 203, PSYCH 306, and courses using computer applications.

### Department Admission Requirements

1. Minimum 2.70 cumulative GPA
2. Prior to admission, students must complete the following prerequisites with a minimum combined GPA of 2.70: BIOL 161-BIOL 162 or MICROM 301-MICROM 302; PHYS 114, PHYS 117, PHYS 115, PHYS 118; PSYCH 101; CHEM 120; B STR 301; BIOL 118; STAT 220.
3. Completion of the University writing and reasoning requirements (5 credits of English composition and 5 credits of quantitative and symbolic reasoning with a minimum grade of 2.0; two additional writing courses totaling a minimum of 10 credits with a minimum grade of 0.7; and the College of Arts and Sciences Areas of Knowledge requirements (20 credits in Visual, Literary & Performing Arts, 20 credits in Individuals & Societies, and 20 credits in the Natural World). Courses listed above may apply to Areas of Knowledge requirements. Postbaccalaureate (fifth-year) students are exempt from the writing and reasoning requirements but not from the Areas of Knowledge requirements.
4. Admission to the program is competitive based on scholastic achievement, written skills, references and involvement in activities or work related to the health professions.
5. Departmental Application Deadline: January 15 for entry autumn quarter.

### Major Requirements

90 credits as follows:

1. *Courses:* The following courses must be taken in the scheduled sequence beginning autumn quarter only at the University of Washington: REHAB 340, REHAB 341, REHAB 342, REHAB 343, REHAB 400, REHAB 401, REHAB 402, REHAB 403, REHAB 414, REHAB 420, REHAB 421, REHAB 423, REHAB 424, REHAB 427, REHAB 428, REHAB 430, REHAB 442, REHAB 444, REHAB 445, REHAB 451, REHAB 452, REHAB 448, REHAB 499; CONJ 480.
2. *Grade Requirements:* A student must maintain a minimum cumulative program GPA of 2.50, and "credit" grades in all courses that are graded credit/no credit, to maintain good standing in the program and be eligible for graduation. A minimum grade of 2.0 is required in each course. A grade below 2.0 in a required course must be repeated at the next offering with a minimum grade of 2.0 received in the repeated course.
3. *Continuation Policy:* If at any point the cumulative grade point in the curriculum courses falls below 2.50, the student is placed on academic probation. In order to be taken off probation, the student must achieve a curriculum grade point average of 2.50 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his/her probation status, he/she is subject to dismissal from the program.

### Student Outcomes and Opportunities

\* *Learning Objectives and Expected Outcomes:* The prosthetics-orthotics degree is recognized as a broad, undifferentiated degree requiring the acquisition of general knowledge and basic skills in applicable domains of medicine. The educational process of a prosthetist-orthotist includes the assimilation of knowledge, acquisition of technical skills, and development of judgment through patient care experiences in preparation for independent analysis and problem solving required in clinical practice. Prosthetists and orthotists are employed in private practices and hospitals. There are also a limited number of opportunities in research positions throughout the country.

Upon successful completion of the prosthetics and orthotics program, the student has learned the skills necessary to function as an entry-level resident in prosthetics-orthotics, and is awarded a Bachelor of Science degree by the University of Washington School of Medicine. The practitioner program is accredited through the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park

Street, Clearwater FL 33756, 727-210-2350 (phone), 727-210-2354 (fax), [www.caahep.org](http://www.caahep.org).

The degree in prosthetics-orthotics gives the student eligibility to enter a one-year clinical residency for each discipline at a National Commission on Orthotics and Prosthetics Education (NCOPE) approved site. This residency requirement must be completed for eligibility to apply for the National Certification Boards administered by the American Board for Certification in Orthotics and Prosthetics, Inc. (ABCOP).

National Commission on Orthotic and Prosthetic Education  
330 John Carlyle Street, Suite 200  
Alexandria, VA 22314  
phone: 703-836-7114  
[www.ncope.org](http://www.ncope.org)

American Board for Certification in Orthotics and Prosthetics, Inc.  
330 John Carlyle Street, Suite 210  
Alexandria, VA 22314  
phone: 703-836-7114  
fax: 703-836-0838  
[www.abcop.com](http://www.abcop.com)

\* *Instructional and Research Facilities:* Much of the didactic and patient clinical instruction occurs in the ninth-floor classroom areas in the "BB" wing of the Health Sciences Building. A student fabrication laboratory on the eighth floor of the Health Sciences Building accommodates the technical laboratory components of the curriculum.

Students are placed throughout the curriculum in eighteen facilities in the surrounding Seattle area for their required 500 hours of clinical experience.

\* *Honors Options Available:* None

\* *Research, Internships, and Service Learning:* None available

\* *Department Scholarships:* None offered

\* *Student Organizations/Associations:* Prosthetics-Orthotics Student Association

## Post-Professional Programs

### Master of Science in Rehabilitation Science

The Master of Science in Rehabilitation Medicine has three primary pathways: occupational therapy, physical therapy, and rehabilitation medicine. This program is designed for rehabilitation practitioners who want to pursue a program of coursework and research to enhance their professional growth. For selected students lacking appropriate post-professional training, it is the degree that precedes the Ph.D. in Rehabilitation Science.

### Doctor of Philosophy in Rehabilitation Science

**Director**  
Deborah Kartin

Rehabilitation science is an interdisciplinary field that focuses on human function and disability. Basic and applied research from health sciences, social sciences, engineering, and related fields are directed toward (1) enhancing physical and psychosocial functioning, participation in life situations, and quality of life of people with disabilities; and (2) informing relevant social and health care policy.

The program targets students from diverse backgrounds in rehabilitation-related fields including occupational therapy, physical therapy, speech and language pathology, rehabilitation counseling, medicine, nursing, prosthetics and orthotics, and engineering.

The goal of the Ph.D. program in rehabilitation science is to prepare researchers, educators, and leaders in the area of rehabilitation science to contribute to the development of rehabilitation practice, research, and policy. Graduates of the Ph.D. program in rehabilitation science are prepared as researchers, educators, and leaders in the field of rehabilitation science, who work in academic institutions, service delivery systems (e.g., hospitals, public schools), government agencies, and the private sector. These individuals are prepared to address research, education, service

delivery, and policy issues from an interdisciplinary perspective. Following are three overarching outcomes for graduates of this program:

1. Demonstrate advanced knowledge and productivity in rehabilitation science specific to research, education, service delivery, and/or policy.
2. Demonstrate leadership in interdisciplinary collaboration for the purpose of optimizing research, education, service delivery, and/or policy.
3. Generate and extend knowledge that is innovative and rigorously tested within a focused area of rehabilitation science.

### Admission Requirements

- \* Baccalaureate degree from a college or university of recognized rank.
- \* Official Graduate Record Examination (GRE) General Test Scores.
- \* Copy of current professional certification/licensure to practice (as appropriate).
- \* Recent sample of scholarly writing. This may include a published or unpublished manuscript such as in-depth literature review in a focused area; a research report; or a concept analysis.
- \* Letters of recommendation from three persons knowledgeable about the individual's potential for doctoral-level work in rehabilitation science.
- \* Letter of application in response to specific questions listed on the application related to the pursuit of doctoral studies.
- \* Resume/CV.

### Degree Requirements

100 credits minimum, as follows:

Core course series (21 credits), coursework and practicum experiences in teaching (minimum of 5 credits), and coursework in research methods (minimum of 18 credits). Relative to the latter, credit requirements may partially be met through independent study. In addition, each student must complete three cognates (minimum of 6 credits each) specific to the student's goals. The student's committee and the core faculty in the rehabilitation science doctoral program must approve the entire course of study.

In addition to meeting all requirements of the UW Graduate School, all students are expected to meet the following general requirements.

- \* Minimum cumulative and quarterly GPA of 3.00
- \* 100 credits minimum, of which 30 are dissertation credits
- \* Completion of at least one teaching practicum (3 credits minimum)
- \* Satisfactory completion of a Research and Scientific Inquiry Day manuscript and presentation
- \* Satisfactory completion of General Examinations
- \* Dissertation
- \* Final Examination

For more information on the Ph.D. Program in Rehabilitation Science, visit the program's Web site at <http://depts.washington.edu/rehab/phd>.

---

## Surgery

BB487 University of Washington Medical Center  
[depts.washington.edu/surgery](http://depts.washington.edu/surgery)

The Department of Surgery carries out instruction during all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency-room clerkship is also a required part of the curriculum. The department offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department's clinical activities, including but not limited to trauma, cardiothoracic surgery, plastic surgery, vascular surgery, transplantation, surgical critical care, pediatric surgery, and the management of burn patients.

---

## Urology

BB1115 Health Sciences  
[depts.washington.edu/uroweb](http://depts.washington.edu/uroweb)

Urology is the surgical discipline concerned with diseases of the urinary tract in males and females, and the genital system in the male. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal diseases, reproductive biology, neuropathology, renal stone formation, and transplantation.

Clinically, the field encompasses a large variety of technical skills including real-time imaging and manipulation, endoscopy, laparoscopy and robotics, and open surgery. Medical diagnosis and treatment are a large part of the discipline.

The department is actively involved in patient care, instruction, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator at 206-731-3205 for further information.

www.son.washington.edu

Nurse professionals are members of interdisciplinary teams in clinics, hospitals, and community settings, and work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. Nurse practitioners fill critical health care needs in both urban and rural settings, often for portions of the population who have not received adequate health care. Nurse scientists conduct important research about a variety of health problems and how best to promote health, prevent disease, and care for people who are ill. Nurses also teach in colleges and universities throughout the world.

## Undergraduate Program

### Adviser

T310 Health Sciences, Box 357260  
206-543-8736  
sonas@u.washington.edu

The School of Nursing offers the following programs of study:

- \* Bachelor of Science in Nursing degree with eligibility to take the licensure examination to become a registered nurse.
- \* A four-quarter modification of the basic curriculum is available for the registered nurse who is able to validate selected nursing courses through written examination and who intends to complete a master's degree program. This B.S.N. completion program is available at UW Bothell and UW Tacoma.

## Bachelor of Science in Nursing

*Suggested First- and Second-Year College Courses:* See below, under Admission Requirements.

### Admission Requirements

Admission to the nursing major occurs once a year, for autumn quarter, with an application deadline of January 15. Selection is competitive.

### Application

1. To be considered for admission, applicants must satisfy one of the following requirements at time of application.
  - a. Three out of the total prerequisite science courses completed with a minimum GPA in these three courses of 3.00
  - b. Four out of the total prerequisite science courses with a minimum GPA in these four courses of 2.80.The science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students, two quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118/BIOL 119; B STR 301; MICROM 301 (Microbiology lab strongly recommended - MICROM 302 for UW students. Non-UW applicants should take a separate microbiology lab if lab is not included in the general microbiology course.); NUTR 300.
2. Together with the application and college transcript(s), applicants submit a personal statement; a resume outlining volunteer/paid health-care experience, community service, and cultural awareness; and a recommendation from a health care provider (employer or volunteer coordinator).
3. Applicants are expected to have 100 hours of health care experience in a paid or volunteer position in one setting for three months or more. The majority of applicants present health care experiences of several hundred hours for nine months or more.
4. After an initial review of all applications, some applicants are asked to attend a proctored essay session. The proctored essay dates are

published in the admissions publication. Eligible applicants are invited via email.

*Entrance Requirements:* Prior to beginning the nursing program in the autumn, students must meet the following requirements:

1. A minimum of 90 credits to include the following courses:
  - a. *Written Communication (10 credits):* English composition and W-courses.
  - b. *Problem-solving (8 credits):* One QSR course, chosen from MATH 107, MATH 111, MATH 112, MATH 120, MATH 124, MATH 134, MATH 144, PHIL 115, PHIL 120, PHIL 470, or Q SCI 291. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490.
  - c. *Visual, Literary, & Performing Arts (VLPA) (15 credits).*
  - d. *Individuals & Societies (I&S) (15 credits):* To include NURS 201 or equivalent.
  - e. *Natural World (NW) (26-33 credits):* To include CHEM 120, CHEM 220, CHEM 221 (three quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 (Microbiology lab strongly recommended - MICROM 302 for UW students. Non-UW applicants should take a separate microbiology lab if lab not included in general microbiology course.); NUTR 300.
  - f. Electives to complete 90 credits.
2. A minimum 2.00 cumulative GPA is required, and a minimum grade of 2.0 for each prerequisite course. Because admission is competitive, the GPA for admission is usually significantly higher.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, contact the Office of Academic Services, School of Nursing, (206) 543-8736 or 1-800-759-NURS. Monthly information sessions are offered in the School of Nursing, Health Sciences Building T310, on the first Thursday of each month from noon to 1 p.m. as well as evening sessions from 5:30 to 6:30p.m. on the first Thursday of January, May, September, and November.

### Major Requirements

Students need a minimum of 180 credits to graduate with a bachelor's degree from the University of Washington. The required credits in the nursing curriculum total 90; thus 90 credits must be earned through general education, nursing prerequisite, and elective courses.

#### Year One of Program

- \* *Quarter 1 -- Autumn (15 credits):* NCLIN 302 (3), NCLIN 306 (4), NURS 301 (3), NURS 304 (3), NURS 309 (2)
- \* *Quarter 2 -- Winter (15 credits):* NCLIN 402 (4), NURS 308 (3), NURS 310 (3), NURS 401 (5)
- \* *Quarter 3 -- Spring (17 credits):* NCLIN 406 (4), NURS 303 (3), NURS 404 (2), NURS 405 (5), NURS 407 (3)

#### Year Two of Program

- \* *Quarter 4/5\* -- Autumn (15 credits):* NCLIN 416 (4), NMETH 403 (3), NURS 410 (3), NURS 415 (5)  
\*Half of senior class completes courses listed above in Quarter 4, followed by those in Quarter 5; the other half of the class completes courses listed under Quarter 5, followed by those listed in Quarter 4.
- \* *Quarter 4/5\* -- Winter (13 credits):* NCLIN 409 (6), NCLIN 418 (4), NURS 417 (3)  
\*Half of senior class completes courses listed above in Quarter 4, followed by those in Quarter 5; the other half of the class completes courses listed under Quarter 5, followed by those listed in Quarter 4.
- \* *Quarter 6 -- Spring (15 credits):* NCLIN 411 (12), NURS 412 (3)

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The School of Nursing prepares its graduates to function as generalists in professional nursing practice and to collaborate with other health-care providers. The six-quarter undergraduate curriculum emphasizes theory and clinical practice to ensure critical thinking, human caring, and clinical expertise. Clinical experiences are provided in institutional and community settings for preventive and acute care. The ten goals of the BSN program are online at [http://www.son.washington.edu/eo/bsn\\_description\\_goals.asp](http://www.son.washington.edu/eo/bsn_description_goals.asp).
- \* *Instructional and Research Facilities:* Learning Laboratory
- \* *Honors Options Available:* With College Honors; With Distinction (Program Honors). See adviser for requirements.

- \* *Research Internships and Service Learning:* Students complete eight clinical courses during the B.S.N. program beginning with the first quarter of the program. Each student experiences placements in medical-surgical nursing, pediatric, family nursing, psychosocial mental health, and community-based nursing. Clinical hours per course range from six hours/week during the first quarter to 24 hours/week during the final quarter.
- \* *Department Scholarships:* Limited scholarships based on student need established by FAFSA. Students are invited to apply after they have been admitted to the program by completing the School of Nursing Financial Aid application.
- \* *Student Organizations/Associations:* Students may join the Professional Organization of Nursing Students (PONS) after admission to the program. PONS' involvement spans all aspects of the undergraduate program: recruitment, orientation, education, fund raising, and social events.

## Graduate Program

Graduate Program Coordinator  
T310 Health Sciences, Box 357260  
206-543-8736  
sonas@u.washington.edu

The School of Nursing offers graduate study leading to the degrees of Master of Nursing, Master of Science, and Doctor of Philosophy in nursing science. At the master's level, programs are designed to meet the many needs of a diverse student body by providing opportunities for advanced study, practice, and research in nursing.

The Masters Entry Program in Nursing (M.E.P.N.) is a Master of Nursing (M.N.) option for students without previous nursing preparation who have a baccalaureate degree in a non-nursing field, and who wish to earn a Master of Nursing degree. It is a two part program. The first five quarters of M.E.P.N. are full time, provide a generalist foundation in nursing, and qualify the student to take the state RN licensure (NCLEX) examination. Once students have completed the first five quarters of M.E.P.N., they begin regular graduate course work in one of 18 M.N. focal areas (see below).

The Master of Nursing program develops increased competence in selected areas of advanced practice nursing. The following focus areas are available: adult acute-care nurse practitioner (cardiovascular/AIDS/oncology), adult/older adult nurse practitioner, advanced practice community-health systems nursing (cross-cultural nursing/occupational health nursing/healthy aging/communities for youth, rural health), advanced practice in care systems management, advanced practice forensic nurse specialist, adult nurse practitioner and home care, advanced practice genetics nursing, advanced practice options in bio-behavioral nursing, family-centered pediatric nursing, infectious disease nurse practitioner, nurse midwifery, perinatal nursing/neonatal nurse practitioner, psychiatric-mental health nurse practitioner, family nurse practitioner, pediatric nurse practitioner, adult and women's health nurse practitioner, rural adult nurse practitioner, and an independent M.N. Research is an integral part of all programs. A thesis is required in the Master of Science program. The Master of Nursing program provides the option of a thesis or non-thesis project.

Part-time study is available in most focus areas of the M.N. program. Course work may be started prior to formal admission to a program as a graduate nonmatriculated student (GNM). GNM status allows the student to earn up to 12 graduate-level credits which may be applied to a graduate program if the student is later admitted. Time limits for acceptance of courses taken as a GNM student are six years for a master's degree and ten years for a doctoral degree from the first course to completion of the degree.

The Doctor of Nursing Practice (DNP) program enhances evidenced-based, culturally competent, innovative, interdisciplinary, outcomes-effective, quality health care for patients throughout the country and globe. It prepares RNs for advanced practice in health and illness, with expanded expertise in clinical inquiry, leadership, and informational technology utilization. The term "practice," specifically nursing practice, refers to any form of nursing intervention that influences health care outcomes for individuals or populations, including direct care, management of care, administration of nursing and health care organizations, and development and implementation of health policy. Preparation at the DNP level is based on nursing science and is at the highest level of nursing practice.

The Doctor of Philosophy in Nursing Science program prepares scientists capable of advancing nursing practice and education through research and

scholarly activity. The program provides for rigorous research training designed for individuals interested in careers in academia or for other types of leadership positions in health-service agencies in which the ability to design, plan, and implement research in nursing is a significant expectation.

## Master Entry Program in Nursing

### Admission Requirements

M.E.P.N. applicants apply to a specific Master of Nursing focal area at time of application, and have the option of specifying a first and second choice of Master of Nursing focal area.

- \* Baccalaureate degree from a regionally accredited institution of higher learning with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits by date of enrollment.
- \* Minimum 3.00 GPA for all college level work.
- \* Completion of required prerequisite courses, including:
  - o Chemistry (three-quarter CHEM 120, CHEM 220, CHEM 221 for all UW students; two-quarter sequence – one general chemistry and one organic - for non-UW applicants), anatomy, physiology, nutrition, and microbiology. In addition, microbiology lab strongly recommended - MICROM 302 for UW students (non-UW applicants should take separate microbiology lab if lab not included in general microbiology course). A minimum grade of 3.0 is required in each prerequisite course. Three of the six or seven courses must be completed at the time of the application. A fourth course must be completed by the end of autumn quarter (i.e., students applying for summer 2008 admission must complete the fourth course by the end of fall quarter 2007), and all six or seven courses before enrollment, with at least a 3.0 grade in each.
  - o A 5-credit course in life span growth and development with a grade of at least 3.0, to be completed before enrollment.
  - o A 3-credit basic course in descriptive and inferential statistics with a grade of at least 3.0.
- \* GRE (General Exam) scores
- \* International applicants, as well as immigrants to the United States and U.S. permanent residents, whose native language is not English, and who have not received a bachelor's degree or higher in the U.S., Australia, Canada, Ireland, New Zealand, or the United Kingdom, must submit both TOEFL and TSE scores.
- \* Resume and background summary.
- \* Three letters of reference consisting of one health care reference, one academic reference, and one character reference (cannot be completed by a family member). School of Nursing forms for each of these reference letters must be used and are provided with the online application form.
- \* Goal statement relevant to the M.E.P.N. program and to the Master of Nursing focal area selected. Students who choose a first and second choice of master's focal areas must submit a separate goal statement for each one. M.E.P.N. applicants may apply to any of the Master of Nursing focal areas, with the exception of adult and women's health care nurse practitioner and neonatal nurse practitioner.
- \* Criminal history/background check clearances: From Washington State and, for students who have lived outside Washington during the past three years, a background check from each state in which they resided.
- \* One official transcript from each collegiate institution attended.
- \* School of Nursing interview(s). Applicants considered competitive for M.E.P.N. after an initial review are invited for group interviews to determine if the applicant (1) is a potential match for the profession of nursing; (2) is a match for the Master of Nursing focal area(s) applied to; (3) demonstrates breadth of understanding; (4) is an effective and sensitive communicator; and (5) demonstrates emotional maturity, insight, sound judgment, and critical thinking skills. Group interview invitations are sent out no later than December 15; interviews are scheduled the first week in January. Several focal areas require individual interviews in addition to the M.E.P.N. committee group interviews; selected applicants to those areas are contacted directly to arrange the additional interview.

### Degree Requirements

117-120 credits, as follows:

- \* *Pre-licensure Coursework:* NCLIN 302 (1-5, max. 5), NCLIN 306 (4), NCLIN 402 (4), NCLIN 406 (1-10, max. 10), NCLIN 409 (6), NCLIN 411 (12-20, max 20), NCLIN 416 (4), NCLIN 418 (4), NURS 303 (2/3), NURS 304 (3), NURS 308 (3), NURS 309 (2), NURS 310 (2/3), NURS 401 (5), NURS 405 (5), either NURS 407 (3) or NURS 579 (3), NURS 412 (3), NURS 415 (5), NURS 417 (3), NURS 522 (3)

- \* M.N. Portion: Students who have made satisfactory progress in the first five quarters of M.E.P.N., i.e., earning a minimum 2.0 in all graded classes and "Credit" in non-graded classes; earning a minimum 3.00 cumulative GPA; meeting essential qualifications; and who have taken the NCLEX, may begin regular graduate coursework in one of 18 M.N. focal areas. Time required to complete the M.N. portion of M.E.P.N. varies between four and seven quarters of full time study. Focal areas within the M.N. program must comply with the following minimum requirements: nursing science and professional foundations (15 credits); clinical practice (6 credits); scholarly inquiry (11 credits with scholarly project or 14 credits with thesis); related coursework (6 credits). Many focal area requirements exceed this minimum. Part-time study is available for some programs.

## Master of Nursing

### Admission Requirements

- \* Baccalaureate degree from a nationally accredited nursing program with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits, or
- \* Associate of arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing, acceptable to the UW. In addition, RN's with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
- \* A 3-credit basic course in descriptive and inferential statistics with a grade of at least 2.0.
- \* Official Graduate Record Examination (GRE) General Test Scores.
- \* International applicants, as well as immigrants to the U. S. and U. S. permanent residents whose native language is not English, and who have not received a bachelor's degree or higher in the U.S., Australia, Canada, Ireland, New Zealand or the United Kingdom, must submit TOEFL and TSE scores. A minimum official TOEFL score of 580 (or a TOEFLC score of 237) and a minimum TSE score of 55 are required. Test scores must be less than two years old from the test date. No waivers are allowed.
- \* Resume and background summary.
- \* Three letters of recommendation, one academic, one clinical, and one other.
- \* Admission essay relevant to the program objectives. (If applying to another focal area as a second choice, a second goal statement must be submitted.)
- \* Criminal history/background check clearances: Forms required to perform a background check in Washington State, and a check against the federal register of persons excluded from participation in federally funded health programs, are included in the application packet and must be completed and submitted with the application. In addition, students who have resided outside Washington State over the past three years are asked to submit an official criminal history background check from each state in which they have resided.
- \* Resume describing relevant work, professional, and volunteer experiences.
- \* Applications to both the School of Nursing and to the UW Graduate Admissions Office. The School of Nursing application must be accompanied by one official transcript from each collegiate institution attended.
- \* All applicants to the Master of Nursing program must have an active, unrestricted U.S. RN license at the time of application. If the applicant does not have such a Washington State license, he/she must obtain one prior to beginning the UW Master of Nursing program, should the applicant be admitted.

### Degree Requirements

38-41 credits, as follows:

Nursing science and professional foundations (15 credits); clinical practice (6 credits); scholarly inquiry (11 credits with scholarly project or 14 credits with thesis); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

## Master of Science

### Admission Requirements

- \* A baccalaureate degree in any discipline from a regionally accredited institution of higher learning with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits by date of enrollment. Applicants to the Master of Science need not have a previous degree in nursing.
- \* A 3-credit basic course in descriptive and inferential statistics with a grade of at least 2.0. Click here for a list of Approved Statistics Courses.
- \* Official Graduate Record Examination (GRE) General Test Scores.
- \* International applicants, as well as immigrants to the U.S. and U.S. permanent residents whose native language is not English, and who have not received a bachelor's degree or higher in the U.S., Australia, Canada, Ireland, New Zealand or the United Kingdom, must submit official TOEFL scores. Test of Spoken English (TSE) scores for international Master of Science applicants are not required. More information for international applicants is found under International Applicants.
- \* Three letters of recommendation, two from persons qualified to comment on the applicant's academic abilities and one from a person who can provide work-related (practice) information.
- \* Admission essay relevant to the program objectives. (If applying to another focal area as a second choice, a second goal statement must be submitted. The application is reviewed for the second choice after a decision has been made on the application to the first choice and after the application deadline.)
- \* Criminal history/background check clearances: Forms required for a background check in Washington State, and a check against the federal register of persons excluded from participation in federally funded health programs, are included in the application packet. Students who have resided outside Washington State over the past three years submit an official criminal history background check from each state in which they have resided.
- \* Resume describing relevant work, professional, and volunteer experiences.

For students planning to take clinical nursing courses as part of their program of study, an active, unrestricted Washington RN license. Other applicants to the Master of Science program are not required to have an active RN license or to have a previous degree in nursing.

### Degree Requirements

49 credits, as follows:

Nursing science (15 credits); professional foundations (3 credits); theory development (5 credits); modes of inquiry (11 credits); thesis (9 credits); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

## Master of Nursing/Master of Public Health Concurrent Degree Program

### Admission Requirements

See admission requirements for M.N. and M.P.H. individual degrees. Students must apply separately to, and be accepted by, each school. Students already enrolled in one school may apply for admission to the other and to the concurrent degree track. Students are encouraged to complete up to one year of studies in one school before entering the other.

### Degree Requirements

See M.N. and M.P.H. individual degree requirements; differences are as follows:

At least 18 quarter credits for the master's degree in each program must be numbered 500 and above. Numerical grades must be received in at least 18 quarter credits of coursework for each degree and all required courses must be taken graded. Up to 12 credits taken in one school can be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.

One thesis is required. The nine required thesis credits can be taken in either school, which then becomes the home school and the source of the thesis committee chair as well as the program authorized to approve the

thesis. Each school agrees to accept the other school's thesis as meeting its thesis requirement. Faculty from each school should be involved in development of the thesis and sit on the thesis committee.

## Doctor of Nursing Practice

### Admission Requirements

- \* A baccalaureate degree from a nationally accredited nursing program with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits (or)
- \* An associate of arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field, other than nursing, acceptable to the UW. In addition, RNs with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays (or)
- \* A Master of Nursing degree from an accredited nursing program. Applications are accepted both from Post-Master of Nursing students already credentialed to their chosen area of DNP study and from those applicants who wish to apply to an area of study different from any in which they are already credentialed.
- \* Completion of a 3-quarter credit basic course in descriptive and inferential statistics with a grade of at least 2.0. post-Master of Nursing applicants are exempt from this requirement.
- \* Official Graduate Record Examination (GRE) General Test Scores. All applicants, including Post-Master of Nursing students, must submit GRE scores. The School of Nursing accepts scores, so long as they are official, from any year.
- \* International applicants, as well as immigrants to the U.S. and U.S. permanent residents whose native language is not English, who have not received a bachelor's degree or higher in the U.S., Australia, Canada, Ireland, New Zealand, or the United Kingdom, must submit TOEFL and TSE scores. A minimum official TOEFL score of 580, A TOEFLC score of 237, or a TOEFLIBT score of 70 (average of listening, writing, and reading section scores only; speaking section score not included in score average) and a minimum TSE score of 55 are required for admission to the Master of Nursing program. Test scores must be less than two years old from the test date. No waivers of this English competency requirement are given.
- \* Three letters of recommendation. Highly recommended is one academic reference, one from a current clinical nursing supervisor, and a third either academic or clinical. Current references or those written within the last two years are preferable.
- \* Admission essay question responses relevant to program objectives (five double spaced pages). If applying to another focal area as a second choice, a second set of essay question responses must be submitted. The application is reviewed for a second choice after a decision has been made on the application to the first choice and after the application deadline.
- \* Short scholarly paper on a topic related to nursing to provide an example of the student's current skills in scholarly writing. This formal paper is used to evaluate academic writing skills and the cognitive abilities these skills can reflect. The topic can be any subject related to nursing. Possible examples include clinical, policy, health, inter- or intra-professional issues, health disparities, and a proposed clinical inquiry project. The paper must be written solely by the applicant and be a maximum of five double spaced pages. The paper is evaluated on multiple factors including clarity, logical consistency, insight, and creativity or innovation.
- \* Detailed resume describing educational, professional, and community experiences.
- \* Criminal history/background check clearances. Completion and submission of forms required to perform background check in Washington State and a check against the federal register of persons excluded from participation in federally funded health programs. In addition, submission of official criminal history background check from each state outside Washington resided in over last three years is required.

- \* Applications to both the School of Nursing and to the UW Graduate Admissions Office. The School of Nursing application must be accompanied by one official transcript from each college or university the student has attended (not solely schools from which the applicant received degrees). International applicants must submit a second set of these official transcripts with Graduate Admission application at time of application. All other applicants, at the time they are admitted to the UW, must submit one set of official transcripts from each school which awarded them degrees in the past.

- \* All applicants to the DNP program must have an active, unrestricted U.S. RN license at the time of application. If the applicant does not have such a license, she/he needs to obtain one prior to beginning the UW Doctor of Nursing Practice program, should the student be admitted.

### Degree Requirements

90 credits minimum, as follows:

1. Advanced practice - minimum 45 credits
2. Leadership - minimum 15 credits
3. Practice inquiry - minimum 30 credits (coursework, 18 credits; capstone project, 12 credits)

## Doctor of Philosophy

### Admission Requirements

- \* A baccalaureate degree from a college or university of recognized rank. Though a master's degree in nursing is the background of the majority of applicants, neither a nursing background nor RN licensure is required.
- \* Official Graduate Record Examination (GRE) General Test Scores.
- \* International applicants, as well as immigrants to the U.S. and U.S. permanent residents whose native language is not English, and who have not received a bachelor's degree or higher in the U.S., Australia, Canada, Ireland, New Zealand, or the United Kingdom, must submit official TOEFL scores. More information for international applicants is found under International Applicants.
- \* An example of applicant's scholarly writing (25 pages or less). Examples are a published or unpublished manuscript illustrative of concept analysis, an in-depth literature review in a focused area, or a research report. These are not accepted. The paper is reviewed for clarity and thoroughness, its articulation with relevant published literature, and the degree to which it raises important issues for the development of nursing science. (International students whose original scholarly writing is not in English should submit a copy of the writing translated into English);
- \* Letters of recommendation from three persons knowledgeable about the individual's potential for a research career in nursing;
- \* Personal statement in response to specific questions listed on the application related to the pursuit of doctoral studies. The statement is used to evaluate the applicant's ability in written self-expression and the congruency of goals and research interests with the program objectives.

Criminal history/background check clearances: Forms required for a background check in Washington State, and a check against the federal register of persons excluded from participation in federally funded health programs, are included in the application packet and must be completed. In addition, applicants who have resided outside Washington State over the past three years are asked to submit an official criminal history background check from each state in which they resided.

### Degree Requirements

93 credits minimum, as follows:

*Theory and Domain of Knowledge (minimum 43 credits):* Courses include: NURS 588 (3); NURS 589 (3) NURS 590 (5); NURS 592 (4); NURS 591 (3); NURS 595 (3); NURS 587 (2, 2); graduate nursing courses (6 credits); related fields (12 credits).

*Scholarly Inquiry (minimum 50 credits):* Courses deal with the means of developing knowledge. There is exposure to a variety of approaches with encouragement to develop advanced skills in at least one methodology. Courses in this category are grouped into four required sub-categories:

- \* *Methodological Perspectives in Nursing Science:* NMETH 580 (5 credits)
- \* *Design/Methods/Analysis Sequence:* 18 credits

- \* *Advanced Methods*: 8 credits minimum, from the following: NMETH 581 (2-6); NMETH 582, NMETH 583 (4, 4); NMETH 591 (4); NMETH 592 (2-4); NMETH 593 (4); NMETH 584 (4); NMETH 586 (4); NMETH 587 (4)
- \* *Statistics*: 10 credits minimum, from the following: BIOST 511, BIOST 512, BIOST 513 (4, 4, 4); EDPSY 593 (5), EDPSY 594 (5), PSYCH 513 (4), PSYCH 514 (4), PSYCH 515 (4); SOC 424, SOC 425 (3, 3); NMETH 590 (2). Optional advanced statistics courses include BIOST 524 (3), BIOST 574 (3), SOC 526 (3), SOC 529 (3)
- \* *Dissertation*: 27 credits of NMETH 800
- \* *Optional Elective Colloquium*: NURS 596 (2-6 credits)

## **Financial Aid**

A limited number of nurse traineeships are available for premaster's study. Other financial aid is available on a limited basis. Teaching assistantships and research assistantships are available to a limited number of students. Priority for these appointments is given to predoctoral students.

Contact the Academic Services Office, School of Nursing, for current information.

# College of Ocean and Fishery Sciences

---

## Dean

Arthur R.M. Nowell  
207 Ocean Sciences

## Associate Dean

Ken Chew

[www.cofs.washington.edu](http://www.cofs.washington.edu)

The marine environment has been a dominant factor in the history of the Pacific Northwest from the time of the first Native American settlements to the modern days of aquaculture, container ships, and waterfront condominiums. It is not surprising, therefore, that the University of Washington has a long tradition of commitment to teaching, research, and public service in subjects related to marine and freshwater activities.

The College of Ocean and Fishery Sciences comprises five major units of the University in the marine and freshwater sciences: the Applied Physics Laboratory; the Schools of Aquatic and Fishery Sciences, Marine Affairs, and Oceanography; and the Office of Marine Environmental and Resource Programs, which includes the Washington Sea Grant Program. Each of the units of the College focuses on a different aspect of the aquatic environment, but there is much overlap of interests.

The College offers both undergraduate and graduate instructional programs in fisheries and oceanography, and graduate programs in marine affairs. Undergraduates may pursue complementary joint undergraduate degrees with departments such as Biology, Chemistry, and Earth and Space Sciences in the College of Arts and Sciences. College faculty, staff, and students carry out research in oceans, estuaries, and freshwater lakes and rivers all over the world. Facilities for research and teaching range from ocean-going vessels to well-equipped laboratories and classrooms.

The College also supports career-oriented resources for students to complement traditional course work and research. An annual Career Fair, held each February, brings more than 30 potential employers to campus to meet with students and discuss career possibilities and employment opportunities. A well-equipped Career Center is available for students, providing information about career planning and job opportunities in the marine and freshwater sciences. Northwest WaterWork, a publication of current employment opportunities and internships available in water-related areas, is published by the College as a service to students. Internships are encouraged as a way to help students bridge the transition from the classroom to employment after graduation. The College also supports educational outreach activities and innovative learning technologies.

In 2003, the College had 200 undergraduate and 250 graduate students enrolled, a faculty of 198 members, and a total budget of \$60 million, making it one of the largest institutions of its kind in the nation.

The School of Aquatic and Fishery Sciences provides nationally recognized learning experiences in applied aquatic sciences, with an emphasis on fisheries management and conservation. Faculty, staff, and students have access to the region's wealth of aquatic habitats and living resources as well as synergistic partnerships with other academic programs throughout the nation and the world. Critical program areas in aquatic sciences include aquaculture, physiology and genetics, habitat and species ecology, and quantitative fisheries analyses, management, conservation, and restoration.

The School of Oceanography was established in 1930 for teaching and research focused on coastal and blue-water oceanography. Faculty, staff, and students explore ocean-climate interactions, biological, chemical, and geophysical aspects of deep-sea hydrothermal systems, the oceanography of coastal ecosystems, and other interdisciplinary topics. The School offers graduate degrees and is the only leading oceanography program to offer a bachelor's degree, with approximately 100 undergraduate majors currently enrolled.

The School of Marine Affairs fosters comprehensive, long-term, and anticipatory approaches to marine policy and ocean and coastal management. An interdisciplinary curriculum and interactions with public and private organizations, environmental groups, and regulatory agencies enrich student understanding of contemporary issues in ocean and coastal management. The school provides guidance to all levels of government in the U.S. and abroad; to non-governmental organizations that promote resolution of ocean and coastal issues; and to the marine trades, shipping, and transportation industries.

The Applied Physics Laboratory (APL) is a self-sustaining research center within the College established in 1943 at the request of the U.S. government to address urgent wartime problems. Today, as one of only four Navy University Affiliated Research Centers in the country, it is a premier center for research, development, and advanced education in science and engineering. About half of APL's programs are devoted to developing innovative solutions to complex technical problems, primarily related to naval operations. The remaining programs are committed to fundamental research in ocean physics, ocean acoustics, polar science, remote sensing, and medical and industrial ultrasound.

The Washington Sea Grant Program (WSGP) supports a broad range of research, education, outreach, and technology transfer activities on coastal and marine issues, placing particular emphasis on those situations where resources, the environment, and people interact. It works extensively with university and external partners to identify needs and opportunities in the marine environment and to develop projects and partnership programs that address them. WSGP is nationally recognized for its quality, innovation, and positive impact.

---

## Aquatic and Fishery Sciences

116 Fishery Sciences  
[www.fish.washington.edu](http://www.fish.washington.edu)

The School of Aquatic and Fishery Sciences (SAFS) encompasses multi-disciplinary programs at the interface between the traditional fields of natural history, environmental biology, and natural resource management. Primary foci are the management of sustainable fisheries of commercially important species; biocomplexity and ecosystem-based management; and sustainable aquaculture. In addition, human-induced effects on natural ecosystems, including habitat change and restoration, impacts of climate change, emerging diseases, the effects of invasive species, and processes affecting endangered species and declining populations, are major areas of research. In pursuit of these objectives, a variety of basic sciences are used, including ecology and evolution, population biology, behavior, physiology, microbiology and genetics. The scope of aquatic systems ranges from watersheds, rivers and lakes, to estuarine and near-shore shelf, open ocean systems and culture facilities. Graduates of the School of Aquatic and Fishery Sciences are uniquely qualified for careers in universities as well as other educational settings, natural resources management agencies at the local to international levels, environmental consulting, and non-profit organizations with an environmental focus.

## Undergraduate Program

Adviser  
116 Fishery Sciences, Box 355020  
206-543-7457  
[safs@u.washington.edu](mailto:safs@u.washington.edu)

The School of Aquatic and Fishery Sciences (SAFS) offers the following programs of study:

- \* The Bachelor of Science in Aquatic and Fishery Sciences
- \* A minor in aquatic and fishery sciences
- \* An interdisciplinary minor in marine biology
- \* An interdisciplinary minor in quantitative science

The School's undergraduate program has been substantially modified in recent years to reflect student and faculty interests in ecology and conservation biology, as well as more traditional fields such as stock assessment and fishery management. Faculty dedication to teaching, substantial benefit gained in close faculty contact within a relatively small program, and significant experiential training and research have made SAFS an appealing major that has doubled in recent years. The Bachelor of Science degree provides an underpinning in sciences such as biology, chemistry, and mathematics/statistics, then adds a core curriculum within aquatic sciences. Students study within areas of individual interest, grouped in three primary areas: aquatic ecology, conservation and management of aquatic resources, and biology and culture of aquatic animals.

## Bachelor of Science

*Suggested First- and Second-Year College Courses:* Calculus and either the chemistry or biology series the first year, followed by the other series immediately following. English composition, public speaking or other visual, literary and performing arts courses, and FISH 250.

### Department Admission Requirements

Students in good academic standing may declare this major at any time, including on their application for admission to the UW. After notification of admission and before registration, new students should visit or email the Student Services Office for help in planning their programs.

### Graduation Requirements

180 credits, to include 44 credits in FISH-prefix courses; 44 credits of Natural World; 15 credits of mathematics; 10 credits each of Individuals & Societies and Visual, Literary, & Performing Arts; 12 credits of writing; and 45 credits of free electives.

**The Natural World:** Minimum of 44 credits, to include:

- \* *Biological Sciences:* BIOL 180, BIOL 200, BIOL 220 (5, 5, 5); or BIOL 201, BIOL 202, BIOL 203 (5,5,5); or BIOL 101-BIOL 102 or BIOL 161-BIOL 162 and GENOME 371 or FISH 340/BIOL 340 (5-5, 5). One of BIOL 356 (3), FISH 447 (3), or BIOL 473 and BIOL 474 (3,2).
- \* *Physical Sciences:* PHYS 114, PHYS 115 (4,4), OCEAN 210 (3). Option A: CHEM 142, CHEM 152, CHEM 162 (5,5,6), and CHEM 220 (5) or CHEM 223 and CHEM 224 (4, 4); Option B: CHEM 120, CHEM 220, CHEM 221 (5, 5, 5).

**Mathematics and Statistics:** Minimum of 15 credits beyond MATH 120, to include Q SCI 291, Q SCI 292 (5, 5) or MATH 124, MATH 125 (5, 5) or MATH 144, MATH 145 (5,5). Q SCI 381 (5).

### General Education

- \* *Individuals & Societies (I&S):* Minimum of 10 credits to include one course (3 credits minimum) in economics and one course (3 credits minimum) in law, policy, or ethics. See program Web site for list of acceptable courses.
- \* *Visual, Literary, & Performing Arts (VLPA):* Minimum of 10 credits.
- \* *Writing Proficiency:* Minimum of 12 credits, to include 5 credits of English composition drawn from the University list, and at least 7 additional credits of writing-intensive (W) courses.

### Major Requirements

Minimum of 44 credits to include FISH 210, FISH 310, and FISH 311 (5,5,5); one from FISH 312 (5), FISH 323 (5), or FISH 324 (5); 18 additional credits of upper-division FISH courses, including 12 credits in the student's chosen focus area; FISH 494 and FISH 495 (3-9,3).

### Minor

#### *Aquatic and Fishery Sciences*

*Minor Requirements:* Minimum of 28 credits to include FISH 210 (5); two from FISH 310 (5), FISH 311 (5), FISH 312 (5), FISH 323 (5) and FISH 324 (5); Q SCI 381 (5) or Q SCI 482 (5); minimum of two upper-division FISH courses totaling at least 8 credits.

#### *Marine Biology*

The minor in marine biology is sponsored jointly by the College of Ocean and Fisheries Science and the College of Arts and Sciences, and is designed to immerse students in the study of marine organisms and ecosystems, starting in the freshman year. Because the experience of marine sciences cannot be taught entirely within the classroom, the minor is structured to provide ample opportunity for field work and research within the coursework. A description of the minor can be found under the Interdisciplinary Undergraduate Program section of the catalog.

#### *Quantitative Science*

Students interested in quantitative skills applied to biological and ecological fields should consider minoring in Quantitative Science, an interdisciplinary minor supported by the School of Aquatic and Fishery Sciences and the College of Forest Resources. More information may be found on the Center for Quantitative Science Web site.

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* Aquatic and Fishery Sciences is a life science degree designed to provide students a broad framework of knowledge and sets of skills for employment in a variety of areas (e.g., natural resource management, environmental consulting, fish or aquatic wildlife biology, aquaculture). In addition, students receive excellent preparation for graduate study in a number of life science fields. Expected student outcomes include:
  - a. Skills in written and oral communication, data analysis, field and lab skills. Skill sets have been integrated into all core and flagship courses.
  - b. Exposure to career paths in the field and interaction with professionals. Skills gained allow students to obtain an entry-level aquatic scientist position or admission to graduate school.
  - c. Emphasis in one of three focus areas (aquatic ecology, conservation and management, aquatic biology and culture); students get a broad overview, then may specialize in one of the three areas.
  - d. Strong encouragement to pursue multiple internship and research experiences, including opportunities like FHL research apprenticeships and Alaska Ecological Research Program.
  - e. Understanding not only of the science, but also the socio-political-economic environment and its impact on the field of aquatic and fishery sciences.
  - f. All students participate in a capstone experience that requires them to demonstrate acquired skill sets (including public presentation in an undergraduate research symposium).

SAFS graduates pursue careers in the private sector (environmental consulting firms, private companies), the public sector (state and federal agencies, non-profit organizations, non-governmental agencies, education), and many continue into graduate programs in either research or policy. The undergraduate degree prepares students for either direct employment in a number of fields within public and private sectors, or for competitive entry into applicable graduate programs worldwide.

- \* *Instructional and Research Facilities:* The School of Aquatic and Fishery Sciences is housed in several buildings on the University of Washington campus. In addition, the School maintains various facilities off campus, including field research stations in Washington State and Alaska.
- \* *Honors Options Available:* With College Honors (Four-Year Honors); With Distinction (Two-Year Honors). See [cofs.washington.edu/students/honors.html](http://cofs.washington.edu/students/honors.html) for requirements.
- \* *Research, Internships, and Service Learning:* SAFS scientists work closely with employers in both the public and private sectors, leading to opportunities for undergraduates to receive both internship and research experience. Scientists from area agencies (NOAA, National Marine Fisheries, Alaska Fisheries Sciences Center, National Marine Mammal Lab, the U.S. Forest Service, the Student Conservation Association, and the Seattle Aquarium) come to the school to attend weekly SAFS departmental seminars; undergraduates are encouraged to attend. The College of Ocean and Fishery Sciences is second only to the UW Medical School in federal research dollars brought to the UW campus, providing many paid hourly student positions within the department.
- \* *Department Scholarships:* Scholarships are awarded on the basis of academic merit, financial need and other factors. The annual application process for continuing students begins in spring; check with the Office of Student Services for applications and deadlines. All undergraduates, both freshmen and transfers, are considered for recruitment scholarships if they have declared AFS as their major on their application to the University of Washington.
- \* *Student Organizations/Associations:* SURF (Society for Undergraduate Resources in Fisheries) organizes social, career, and educational activities for undergraduates in Aquatic and Fishery Sciences. SURF also prints t-shirts, welcomes new students to the program, represents the program at events, and collaborates with student groups in other related departments on events.

#### *Of Special Note:*

- \* The College of Ocean and Fishery Sciences has its own career coordinator who organizes quarterly workshops, an annual career fair, an email list of openings related to the aquatic sciences, and who meets individually with both current students and alumni.
- \* Since 1999, the School of Aquatic and Fishery Sciences has sent six students and three faculty members to two Alaska Salmon Field Stations for a six-week course in aquatic ecology. These students

receive education in ecology, limnology, population modeling, field techniques, scientific writing, and presentation skills.

## Graduate Program

Graduate Program Coordinator  
116 Fishery Sciences, Box 355020  
206-616-5893  
safs@u.washington.edu

The School of Aquatic and Fishery Sciences, established in 1919, offers courses and conducts research on the conservation, management, and effective use of natural resources. Education and research in the School include studies of aquatic ecology; ichthyology; population dynamics; management of free-ranging stocks; restoration ecology; and effects of human activities on freshwater and marine ecosystems. SAFS is recognized internationally as one of the best graduate programs, especially in the area of quantitative fisheries management, but all of the research programs are well respected.

Students may apply for admission into programs leading to the Master of Science or Doctor of Philosophy. Students who apply for the Ph.D. program must hold a master's degree prior to beginning their doctoral studies. All students who receive a master's degree from the School and wish to pursue a Ph.D. will be reviewed by the Recruitment, Admissions, and Scholarship Committee before being accepted into the Ph.D. program.

## Master of Science

### Admission Requirements

Minimum requirements for admission to the graduate program in the School are

- \* A bachelor's degree from an institution of recognized standing with a minimum GPA of 3.00 in the last two years (90 quarter credits or 60 semester credits) of college work.
- \* Typically at least a 500 on both the verbal and quantitative portions of the GRE and a 5 on the analytic portion (a 500 if taken before October 2002).
- \* If an International Student, a minimum TOEFL score of 580 on written exam or 237 on computerized exam, or 70 on the Internet-based exam.

### Degree Requirements

45 credits as follows:

- \* *School of Aquatic & Fishery Sciences Core Courses:*
  - o Q SCI 482 (5)
  - o At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514, FISH 578, or QERM 597
  - o FISH 521 (4)
  - o FISH 522 (2)
  - o 18 credits of thesis research: FISH 700
- \* *Additional Course Requirements:* At least 12 credits of coursework at the 400 or 500 level are required in addition to the SAFS Core Courses listed above. 4 of the 12 credits must be in 500-level courses. At least 9 of the additional 12 credits must be numerically graded.

## Doctor of Philosophy

### Admission Requirements

- \* Minimum GPA of 3.00 for last two years (90 quarter credits or 60 semester credits) of graded college work
- \* GRE scores of 500 on the verbal and quantitative sections and 5 on the analytical section (500 if before October 2002)
- \* If an International Student, a minimum TOEFL score of 580 on written exam or 237 on computerized exam, or 70 on the internet-based exam.

Admission to the Ph.D. Program After Receiving a M.S. Degree from the School of Aquatic and Fishery Sciences

Students who wish to continue study toward the doctoral degree after receiving a master's from the School must apply to the Graduate Program Coordinator by way of the Student Services Office; the application will be considered by the Recruitment, Admission and Scholarship Committee and a recommendation will then be sent to the director for concurrence or denial. Applications must be submitted by the sixth week of the quarter in

which the master's degree is conferred. For more information, please refer to the SAFS Website.

## Bypassing the Master's Degree

Students admitted to the School at the pre-master's level may, under exceptional circumstances, proceed directly to post-master's study. Application should be made to the Graduate Program Coordinator via the Student Services Office for consideration by the Recruitment, Admissions and Scholarship Committee. More information is available on the SAFS Website.

Students who bypass the master's degree must complete all Ph.D. requirements within ten years of beginning graduate study, including M.S. coursework if used to fulfill any Ph.D. requirements.

## Degree Requirements

Minimum 90 credits, as follows:

- \* *SAFS Core Courses:* The following core courses are required of all Ph.D. students. They are the same as those required of M.S. students and must be taken as part of the doctoral program if they or their equivalents have not been taken during an M.S. program.
  - o Q SCI 482 (5)
  - o At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514, FISH 578, or QERM 597
  - o FISH 521 (4)
  - o FISH 522 (2)
  - o 27 credits of doctoral dissertation: FISH 800 (a maximum of 10 dissertation credits may be taken in any one academic quarter)
- \* *Additional Course Requirements:* At least 48 credits of coursework at the 400 level or above, including dissertation credits, are required in addition to the required core courses listed above. Of those, at least 9 credits must be numerically graded.

## Financial Aid

General information on graduate student support is available from the Office of Student Financial Aid, 105 Schmitz. The majority of first-year graduate students are offered research assistantships by appropriate faculty members, depending on the availability of research funding. The School of Aquatic and Fishery Sciences also has a limited number of fellowship opportunities for outstanding entering students. Other students may have their studies supported by the agency for which they work or they may be international students with scholarships from their home countries.

Graduate applicants are urged to discuss their financial needs with professors in their potential major fields during the early stages of the graduate application process. The graduate applicant will automatically be considered for any fellowships, research assistantships, or teaching assistantships available from the School of Aquatic and Fishery Sciences when the admissions application is submitted.

---

## Marine Affairs

3707 Brooklyn Avenue Northeast  
www.sma.washington.edu

## Graduate Program

Graduate Program Coordinator  
3707 Brooklyn NE, Box 355685  
206-543-4326, 206-543-7004  
uwsma@u.washington.edu

The School of Marine Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses from marine affairs, economics, law, marine sciences, and public affairs.

## Master of Marine Affairs

The School of Marine Affairs offers an internationally recognized master's degree program for launching careers in marine policy and administration.

Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water.

A major program objective is to prepare students for professional careers in policy making, management, teaching, and research. Breadth of study is emphasized, and all students are expected to gain familiarity with relevant aspects of the social, technological, and environmental sciences. In addition, each student is expected to develop a professional and scholarly proficiency in a particular aspect of marine affairs.

Completion of the M.A. program normally requires two academic years for students who have received a baccalaureate degree. During the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. During the second year, a special competence is developed in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and a thesis is prepared and presented under the guidance of a faculty supervisory committee. Individual courses of study may be adjusted to accommodate prior experience and academic background. Mid-career and other qualifying students can apply to follow a non-thesis track emphasizing additional coursework and a degree project.

### Admission Requirements

Admission to the School of Marine Affairs is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general-test scores, completed departmental supplementary information form, three letters of recommendation, official academic transcripts, and a statement of career objectives. Applicants must apply directly to, and be accepted by, the University's Graduate School. Course sequences begin each autumn quarter, and new students normally are admitted only at that time.

### Degree Requirements

59 credits as follows:

- \* *The Core Curriculum (29 credits minimum)*
  1. *Introduction to Marine Affairs*: SMA 500 (5), SMA 501 (3)
  2. *Economics*: SMA 536 (3). (Students may be waived by the Graduate Program Coordinator from SMA 536 due to adequate undergraduate training, but are required to take at least one economics course at the 400 or 500 level. The following courses are suggested: SMA 537 (3), SMA 538 (3), ECON 435 (5), ECON 436 (5).)
  3. *Marine Law*: SMA 506/LAW 561 (3) or SMA 515/LAW 565(3)
  4. *Policy Analysis*: SMA 519 (3) or PB AF 513 (3)
  5. *Policy Processes*: One of the following: SMA 507 (3), SMA 508 (3), SMA 521 (3), SMA 523 (3), PB AF 590/CFR 592 (3) (when course content appropriate; check with Graduate Program Coordinator); PB AF 592/FM 571 (5)
  6. *Marine Science*: SMA 591 (3). (Students may be waived by the Graduate Program Coordinator from SMA 591, but are required to take at least one 400- or 500-level science course. The following courses are suggested: SMA 510 (3); FISH 450 (4); FISH 454 (3); BIOL 472 (5); or BIOL 473 (3).)
  7. *Quantitative Skills*: One of the following: The required skill level is equivalent to intermediate statistics, including an understanding of point estimates, confidence intervals and regression equations. Students not meeting this requirement through undergraduate classes or experience should take one appropriate course while at SMA. Recommended courses include: Q SCI 381 (5), STAT 301 (5), or STAT 311 (5). (Note: Although 300-level courses do not qualify for graduation credits, the School will waive 3 credits of the 59-credit SMA graduation requirement for students completing one of these courses.)
  8. *Social Science Data Collection and Analysis*: One of the following: SMA 476 (3), SMA 512 (3), PB AF 507 (3), GEOG 425 (5), or CRF 400 (3)
  9. *Marine Affairs Seminar*: SMA 550 (3)
- \* *Electives (20 credits minimum – or 10 additional elective credits for non-thesis track)*: Elective credits must qualify as graduate credit (typically 400- or 500-level courses) offered in any UW department or school. Students should consult with their advisor or Thesis Committee Chair in choosing a set of elective courses. At least 6 credits, and two courses must come from the following list of SMA courses: SMA 433 (5), SMA 480 (3), SMA 485 (3), SMA 499 (var.) (when subject is African Population, Development and Marine Environment), SMA 509 (3), SMA

510 (3), SMA 514 (3), SMA 516 (3), SMA 517 (3), SMA 540 (3), SMA 555 (3), SMA 581 (3), SMA 550 (1-3) (cannot simultaneously be used to meet core requirements).

- \* *The Thesis and Thesis Presentation (10 credits minimum – for thesis track students)*: SMA 700 (minimum 9 credits); SMA 570 (1).
- \* *Career Skills (non-credit requirement)*: First year: One career counseling appointment during fall quarter. One resume review session during winter quarter. Second year: One career counseling appointment during fall quarter. One resume review session during winter quarter.

### Financial Aid

The School of Marine Affairs has a limited number of positions for graduate student appointments as research assistants. Applicants in need of support are urged to investigate outside sources of funding.

## Oceanography

108 Oceanography Teaching Building  
[www.ocean.washington.edu/ocean\\_web](http://www.ocean.washington.edu/ocean_web)

Oceanography -- the study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere -- is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean's resources for the benefit of humanity. As an interdisciplinary science, oceanography integrates the basic principles of biology, chemistry, geology, physics, geophysics, mathematics, botany, zoology, meteorology, and geography. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. Oceanography is divided into four areas of emphasis:

Biological Oceanography examines the processes governing the distribution, abundances, and production of plants, animals, and nutrients in the oceanic ecosystem. Emphasis is on investigations of bacteria, phytoplankton, zooplankton, and benthic organisms.

Chemical Oceanography investigates the complex chemistry, distribution and cycling of dissolved substances, nutrients, and gases in seawater, the mechanisms controlling them and their origins and fates.

Marine Geology and Geophysics studies marine sediments (their formation, transport, and deposition); ocean basin formation (plate tectonics); processes governing shoreline formation; and the origin, structure, and history of the oceanic crust and upper mantle.

Physical Oceanography endeavors to understand and predict motions in the sea from millimeters through tidal and current scales to the great ocean gyres, the distribution of physical properties (temperature, salinity, sea ice), and air-sea interaction and its implications for climate.

## Undergraduate Program

Adviser  
108 Oceanography Teaching Building, Box 357940  
206-543-5039  
[student@ocean.washington.edu](mailto:student@ocean.washington.edu)

The School of Oceanography offers the following programs of study:

- \* The Bachelor of Science degree with a major in oceanography
- \* The Bachelor of Arts degree with a major in oceanography
- \* Specializations include biological, chemical, or physical oceanography, or marine geology and geophysics
- \* A minor in oceanography

## Bachelor of Arts

*Suggested Pre-College Courses*: Interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, and physics recommended.

*Suggested First- and Second-Year College Courses*: BIOL 161- BIOL 162 or BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152; ESS 101 or ESS

210; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123. Students should complete the calculus, general chemistry, and either the biology or physics sequences before autumn quarter of the junior year.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Major Requirements

Same as for the Bachelor of Science degree (see below), except only 10 credits of upper-division science, mathematics, or engineering courses are required.

### Bachelor of Science

*Suggested Pre-College and First- and Second-Year College Courses:* Same as for Bachelor of Arts degree (shown above).

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### Graduation Requirements

Minimum 180 credits, to include the following:

1. MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; ESS 101 or 210; and BIOL 161-BIOL 162 or BIOL 180, BIOL 200, BIOL 220 (55-60 credits)
2. OCEAN 200, OCEAN 210, OCEAN 220 (taken for writing credit), OCEAN 400, OCEAN 410, OCEAN 420, OCEAN 430, OCEAN 442, OCEAN 443, OCEAN 444 (taken for writing credit), and one from the following: OCEAN 401, OCEAN 411, OCEAN 421, OCEAN 431 (39 credits)
3. 20 credits of upper-division science, mathematics, or engineering to be selected in the student's area of specialization in consultation with a faculty adviser (20 credits)
4. 20 credits of Visual, Literary, & Performing Arts and 20 credits of Individuals & Societies from the University Areas of Knowledge lists (40 credits)
5. 5 credits of English composition and 10 credits of W (writing) courses. 8 of the 10 credits of University-approved W (writing) courses are included within the curriculum, as noted in item 2 above. (7 credits)
6. Free electives to bring credit total to minimum 180.

### Minor

*Minor Requirements:* 25 credits as follows:

1. OCEAN 200, OCEAN 210, OCEAN 220
2. One of the following: OCEAN 400, OCEAN 410, OCEAN 420, or OCEAN 430
3. OCEAN 442
4. 9 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

*Minor in Marine Biology:* See the entry for Marine Biology in the Interdisciplinary Undergraduate Programs section of the General Catalog.

### Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard oceanographic research and data analysis and interpretation.

Students engage in fieldwork and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally, students acquire familiarity with the specialized instruments of oceanographic research.

The program prepares students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They

collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.

- \* *Instructional and Research Facilities:* The School has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The School operates two research vessels: the 274 foot R/V Thomas G. Thompson, used chiefly for open ocean research throughout the world, and the 65 foot R/V Clifford A. Barnes, used for research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.
- \* *Honors Options Available:* With College Honors; With Distinction (School Honors). See adviser for requirements.
- \* *Research, Internships, and Service Learning:* Special opportunities for oceanography majors are provided by involving students in undergraduate research projects and part-time employment.
- \* *Department Scholarships:* See adviser for availability.
- \* *Student Organizations/Associations:* The Student Oceanographic Society (SOS) provides peer advice, organizes field trips, sponsors alumni career panels, and holds social gatherings.

## Graduate Program

Graduate Student Services  
108 Ocean Teaching, Box 357940  
206-543-5039  
student@ocean.washington.edu

The School of Oceanography provides instruction and research opportunities at the graduate level in all areas: biological, chemical, and physical oceanography, and marine geology and geophysics. The program of study emphasizes independent research in conjunction with basic and specialized courses. Interdisciplinary research is encouraged, and students enjoy the opportunity to work across the usual scientific boundaries. Course work during the first two years is required in each option; specialized course work is structured to fit the student's background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

### Master of Science

The program of study includes course work in the student's area of interest and the other oceanography options, as well as completion of an approved research project and oral presentation of the results. Thesis and non-thesis programs are offered; most students select the non-thesis option.

### Admission Requirements

- \* One official copy of transcript(s) from all colleges or universities attended.
- \* Minimum GPA of 3.00 or B for last 90 quarter (60 semester) credits
- \* GRE scores
- \* TOEFL scores for international students.
- \* Statement of goals and objectives (provided in online application), which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
- \* Three letters of recommendation on School of Oceanography forms (included in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

## Degree Requirements

36-45 credits, as follows:

- \* *Thesis program:* Minimum of 36 or more quarter credits (27 course credits and a minimum of 9 credits of thesis). Nonthesis program: Minimum of 36 or more quarter credits of coursework.
- \* At least 18 of the minimum 36 quarter credits for the master's degree must be for work numbered 500 and above. (In a thesis program, 9 of the 18 credits must be course credits and 9 may be OCEAN 700, Masters thesis.)
- \* Numerical grades in at least 18 quarter credits of coursework taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
- \* A minimum of three full-time quarters of residence credit. Part-time quarters may be accumulated to meet this requirement.
- \* In the thesis degree program, a thesis, approved by the supervisory committee, must be submitted to the Graduate School. A student must register for a minimum of 10 credits of thesis (OCEAN 700). With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of thesis (OCEAN 700).
- \* A final master's examination, either oral or written, as determined by the student's supervisory committee, must be passed.
- \* *Biological Oceanography Option:* The core curriculum consists of OCEAN 530 (3), OCEAN 531 (3), OCEAN 532 (3), OCEAN 533 (3). Master's level students must take a minimum of 3 credits of advance biological oceanography courses.
- \* *Chemical Oceanography Option:* The core curriculum consists of OCEAN 520 (3). Master's level students must take a minimum of three advanced chemical oceanography courses.
- \* *Marine Geology and Geophysics Option:* The core curriculum consists of OCEAN 540 (3), OCEAN 541 (3), OCEAN 545 (3).
- \* *Physical Oceanography Option:* The core curriculum consists of OCEAN 500 (1), OCEAN 510 (3), OCEAN 511 (3), OCEAN 512 (3), OCEAN 513 (3), OCEAN 514 (3), OCEAN 515 (3), OCEAN 517 (2). Physical oceanography students must take a sequence of three courses in applied mathematics.
- \* *Out-of-Option Requirement:* A minimum of 12 credits of numerically graded, 500-level courses, 6 credits of which must be taken as 3-credit courses in two options outside a student's option. The remaining 6 out-of-option credits may be in courses in oceanography (outside a student's option) or in a related science selected at the discretion of the student and supervisory committee. These courses must be completed with the first two years of study. A grade of less than a 3.0 in any course will necessitate repeating the course or taking another course in that area as recommended by the student's committee.

## Doctor of Philosophy

The degree program places a strong emphasis on research following completion of course requirements and a General Examination. Upon successful completion of the General Examination, the student undertakes an original research investigation, which is described in the dissertation and defended during the Final Examination.

## Admission Requirements

- \* One official copy of transcript(s) from all colleges or universities attended.
- \* Minimum GPA of 3.00 or B for last 90 quarter (60 semester) credits
- \* GRE scores
- \* TOEFL scores for international students.
- \* Statement of goals and objectives (provided in online application), which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
- \* Three letters of recommendation on School of Oceanography forms (included in online application). Recommendations should be from

faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

## Degree Requirements

Minimum 90 credits, as follows:

- \* Completion of a program of study and research as planned by the Graduate Program Coordinator in the student's major department or college and the Supervisory Committee. Half of the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the General Examination.
  - \* Presentation of a minimum three years (nine full-time quarters) of resident study, two being at the UW with at least one year in continuous full-time residence. The year of full-time residence may be satisfied by completing any three full-time quarters (not necessarily continuous) at the University of Washington and must be completed prior to the General Examination. Residence requirement for the doctoral degree cannot be met solely by part-time study. A minimum of two academic years of resident study must be completed prior to scheduling the General Examination.
- With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may be applied toward one year of resident study at the UW.
- \* Numerical grades must be received in at least 18 quarter credits of coursework taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
  - \* Creditable passage of the General Examination. Registration as a graduate student is required the quarter the examination is taken and candidacy is conferred.
  - \* Preparation and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. The candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters. At least one quarter must come after the student passes the General Examination. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of dissertation (OCEAN 800).
  - \* Creditable passage of a Final Examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. The General and Final Examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the examination is taken and the degree is conferred.
  - \* Completion of all work for the doctoral degree within ten years. This includes quarters spent on leave or out of status as well as applicable work from the master's degree from the UW or a masters degree from another institution, if applied toward one year of resident study.

- \* *Biological Oceanography Option:* The core curriculum consists of OCEAN 530 (3), OCEAN 531 (3), OCEAN 532 (3), OCEAN 533 (3). Doctor's level students must take a minimum of 9 credits of advance biological oceanography courses.
- \* *Chemical Oceanography Option:* The core curriculum consists of OCEAN 520 (3). Doctor's level students must take a minimum of six advanced chemical oceanography courses.
- \* *Marine Geology and Geophysics Option:* The core curriculum consists of OCEAN 540 (3), OCEAN 541 (3), OCEAN 545 (3).
- \* *Physical Oceanography Option:* The core curriculum consists of OCEAN 500 (1), OCEAN 510 (3), OCEAN 511 (3), OCEAN 512 (3), OCEAN 513 (3), OCEAN 514 (3), OCEAN 515 (3), OCEAN 517 (2). Physical oceanography students must take a sequence of three courses in applied mathematics.

\* *Out-of-Option Requirement:* A minimum of 12 credits of numerically graded, 500-level courses, 6 credits of which must be taken as 3-credit courses in two options outside a student's option. The remaining 6 out-of-option credits may be in courses in oceanography (outside a student's option) or in a related science selected at the discretion of the student and supervisory committee. These courses must be completed with the first two years of study. A grade of less than a 3.0 in any course necessitates repeating the course or taking another course in that area as recommended by the student's committee.

## **Financial Aid**

Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources. Most appointments continue through the summer when students are engaged in research.

---

# School of Pharmacy

---

## Dean

Sidney D. Nelson

## Associate Deans

Nanci L. Murphy  
Kenneth E. Thummel  
Stanley S. Weber

[depts.washington.edu/pha/](http://depts.washington.edu/pha/)

Established in 1894, the University of Washington School of Pharmacy is proud of its strong commitment to excellence and the recognition given to its faculty and graduates for their outstanding educational, research, and service activities. The School's Dean's Office and three departments -- Medicinal Chemistry, Pharmaceutics, and Pharmacy -- are located in the H-Wing of the Health Sciences Building.

The School of Pharmacy offers a four-year professional program leading to the Doctor of Pharmacy (Pharm.D.) degree. The curriculum is designed to provide students with the scientific background and clinical skills necessary to render pharmaceutical care in a changing health care system. Instructional methods strive to enhance the critical-thinking and problem-solving skills necessary to provide rational drug therapy, promote healthy lifestyles and disease prevention, enhance patient compliance, reduce medication-related problems, and improve health outcomes. The School aspires to foster a commitment to life-long learning and provide an environment where students develop the knowledge, attitudes, and skills consistent with the profession's high standards.

Students have the opportunity to pursue elective choices to design a program compatible with individual areas of interest. Dual degree options include the Pharm.D./Ph.D. programs in Pharmaceutics and Medicinal Chemistry, the Pharm.D./M.S. program in Pharmaceutical Outcomes Research and Policy, and the Pharm.D./Physician Assistant program. Students also have the option of earning the Geriatric Certificate in Pharmacy Practice, the Pharmacy Management Certificate, and the Biomedical Regulatory Affairs Certificate concurrently with their degree. In the final year of the program students complete experiential training at a variety of practice settings. The School of Pharmacy is a member of the American Association of the Colleges of Pharmacy and its programs are accredited by the American Council on Pharmaceutical Education ([www.acpe-accredit.org](http://www.acpe-accredit.org)).

Consideration for admission to the professional program requires a minimum of two years of prepharmacy training. An applicant who is admissible to the University is not assured admission to the School of Pharmacy. Admission is competitive and based on a number of factors. Academic preparedness, motivation, oral and written communication skills, critical-thinking ability, and decision-making skills are among the criteria used to determine a candidate's aptitude for the pharmacy program. Following a preliminary assessment of the applicant pool, the most-qualified applicants are selected for an interview in Seattle. A writing assessment is also conducted at that time. Further details on admission requirements, application procedures, and program content may be obtained from the School's Office of Academic and Student Programs or its Web site.

The School also seeks to promote the life-long learning of pharmacists by offering opportunities for post-graduate education and continuing-education seminars. An external Pharm.D. program is available for those pharmacists who would like to pursue an advanced degree beyond the baccalaureate degree. Continuing-education programs are provided throughout the year to meet the needs of the community.

To foster the interests of students who seek to engage in creative discovery and research, the School also offers graduate education leading to the M.S. and/or Ph.D. degrees in medicinal chemistry, pharmaceutics, or pharmaceutical outcomes research and policy.

---

## Medicinal Chemistry

[depts.washington.edu/medchem](http://depts.washington.edu/medchem)

### Graduate Program

Graduate Program Coordinator  
H164 Health Sciences, Box 357610  
206-543-2224  
[medchem@u.washington.edu](mailto:medchem@u.washington.edu)

The Department of Medicinal Chemistry offers programs of graduate study leading to the degrees of Master of Science and Doctor of Philosophy. The primary mission of the program is to train versatile scientists for careers in the pharmaceutical and medical sciences. To this end, graduates of the program acquire a broad knowledge base in medicinal chemistry, pharmacology, and biochemistry, which is important in the rapidly evolving, multidisciplinary biomedical arena. The department further offers diverse opportunities for research at the interface between biology and chemistry, with emphasis on issues of biomedical importance.

Graduates of the program acquire the skills necessary to develop quantitative and qualitative methodologies necessary for the study of biochemical processes that occur at the cellular and subcellular levels. These include the elucidation of biochemical transformations and interactions using techniques such as protein engineering, and a broad array of supportive spectroscopic techniques including mass spectrometry and NMR.

One major area of research interest is the role of biotransformation processes in the toxification and detoxification of drugs and environmental contaminants. A second area of interest is the determination of protein and small ligand structure and function using NMR, mass spectroscopy, and other biophysical techniques. Issues of biomedical importance include elucidation of mechanisms of drug-induced cell toxicity, drug-drug and drug-herbal interactions, identification of enzyme attributes that dictate substrate specificity and catalytic mechanism, pharmacogenetics, proteomics and mechanisms of viral assembly.

Most students proceed directly to the doctoral degree program. Successful completion of a series of cumulative examinations and at least two quarters of teaching experience are among the requirements for completion of the doctoral program.

### Admission Requirements

Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted for graduate study in medicinal chemistry. Undergraduates who plan to pursue graduate study are encouraged to expedite their programs by selection of pertinent electives. Although the choice of electives varies with the student's ultimate goals, graduate study in medicinal chemistry requires an adequate background in biological and physical sciences.

### Master of Science

#### Degree Requirements

At least 27 credits of coursework, inclusive of thesis and non-thesis research, including a research project, preparation of an acceptable thesis, and passing a final examination.

### Doctor of Philosophy

#### Degree Requirements

90 credits minimum, to include:

Achieving a level of proficiency in organic, medicinal and physical chemistry, pharmacology, biochemistry, and molecular biology. Most course work is completed in the first two to two-and-a-half years of the graduate program. The program is flexible and easily adaptable to meet individual interests and needs.

In the first year of the program, students rotate through the laboratories of at least two faculty members. At the end of the first year, the student chooses a faculty sponsor and a dissertation research project.

- \* *First year:* CHEM 530, CHEM 531, CHEM 532 (3, 3, 3); MEDCH 501, MEDCH 502, MEDCH 503 (4, 4, 4); MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
- \* *Second year:* BIOC 530 (3); MEDCH 527 (3) MEDCH 541 (3); PHCOL 510, (2) PHCOL 511 (2); MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
- \* *Third year:* MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600 (7 credits each quarter)
- \* *Fourth year:* MEDCH 700 or MEDCH 800

## Financial Aid

Financial support in the form of research assistantships and fellowships may be available to students in good standing throughout their graduate careers. Availability of financial support varies from year to year, and prospective applicants should contact the graduate program coordinator for additional information.

---

## Pharmaceutics

depts.washington.edu/pceut

## Graduate Program

Graduate Program Coordinator  
H272 Health Sciences, Box 357610  
206-543-9434  
pceut@u.washington.edu

The Department of Pharmaceutics offers programs of study leading to the Doctor of Philosophy degree.

## Program Description

The doctoral degree program in pharmaceutics trains research scholars in the fundamental aspects of drug disposition and drug action. Drug disposition pertains to the facets of drug absorption, distribution, and elimination. Areas of emphasis include: drug delivery – processes for enhancing the absorption of a drug and targeting it to the site of action in order to improve therapeutic effect; drug metabolism – enzyme-catalyzed molecular transformations that often impart different disposition and pharmacological properties compared to the parent molecule; and drug excretion – the transport of drug molecules into excretory fluids such as the renal filtrate and bile. Pharmacokinetics is the study of the time course of these processes and its relationship to pharmacological effects. Students in the program gain expertise in basic biochemical, cellular, and molecular techniques, quantitative analytical methods, and in the elaboration of mathematical models to describe the kinetics of drug disposition and action. Scientists graduating from this program are capable of investigating the causes of inadequate exposure to a drug at the target site. They are able to elucidate the relationship between the kinetics of drug and metabolites in various body compartments or tissues and the manifestation of pharmacologic, therapeutic, and toxic effects. They are also able to probe the effects of alteration of physiological and biochemical processes (which may occur due to disease states or genetic variations) on drug disposition and pharmacological response. Many of these studies require expertise with in vitro methodologies, which students also acquire. Often students gain experience in the conduct of pharmacokinetic and pharmacodynamic studies in animals and man.

Typically graduates interact with clinicians, medicinal chemists, biochemists, pharmacologists, analytical chemists, and physiologists. This is possible because their training is highly interdisciplinary at the didactic and research levels.

A wide range of career paths is available to graduates. Opportunities include research in the pharmaceutical industry; research in hospitals, institutes, and foundations; teaching and research in academic institutions; and positions with government regulatory agencies.

## Doctor of Philosophy

### Admission Requirements

- \* One copy of official transcripts in a sealed envelope from each college attended
- \* Official GRE score report
- \* All foreign students must take the TOEFL and TSE test and send in the official score report
- \* Statement of personal goals describing the applicant's background, academic interests, and career objectives
- \* A résumé or curriculum vitae listing educational and employment history
- \* Three letters of recommendation from persons who are in a position to evaluate the applicant's potential for graduate school.

### Degree Requirements

Minimum 90 credits, to include:

- \* *Credits and Scholarship:* Minimum 41 credits of coursework, exclusive of thesis and non thesis research. 3.00 GPA in all numerically graded courses numbered 400 and 500. Minimum passing grade in any given course is 2.7, except required pharmaceutics courses (PCEUT 501, PCEUT 502, PCEUT 503, PCEUT 506) in which a passing grade is 3.0. Credits earned for a master's degree may apply towards the doctoral degree.
- \* *Teaching Experience:* Minimum two quarters of teaching assistant experience. Students are not asked to assist more than one class an academic quarter (less than 12 contact hours/week). Most students complete this requirement during the first three years in the program.
- \* *Examinations and Progress Evaluation:* A series of preliminary, cumulative (written) examinations; a General Examination (oral) for advancement to Ph.D. candidacy; a Final Examination (defense of the thesis). See Appendix A, "Progression Steps In Relation to the Doctoral Degree," for an overview. Appendix B describes the cumulative examination, which precedes the General Exam. Appendix C provides details about formation of a doctoral Supervisory Committee and its role in the General Exam and thesis defense. Appendix D provides details about the structure and conduct of the General Exam.
- \* *Master's Degree Bypass:* Students who qualify for continuation to the Ph.D. degree may be allowed to bypass the M.S. degree. See Appendix A for petition procedure.
- \* *Seminars:* All students must present a minimum of two and a maximum of four seminars while in the doctoral program (PCEUT 520). In addition, a presentation of papers from current literature is required twice a year, starting at the beginning of the second year until defense of the thesis (PCEUT 583). See Appendix E, "Training in Oral Communication through Seminars and Journal Club" for additional details.
- \* *Didactic:* Coursework for the doctoral program is divided into four components: (1) prerequisites which define the level of entry into the program; (2) a required core program which is analogous to the major; (3) elective courses, which are not required but are encouraged; (4) seminars and literature review.
  1. *Prerequisites:* MATH 124 (5 credits), MEDCH 400 (3). Applicants with a Pharm.D. degree should have fulfilled the medicinal chemistry requirement. MEDCH 400 can be taken in autumn quarter of the first year. Candidates are accepted on condition that any deficiencies in course requirements are rectified by the end of the first academic year.
  2. *Core Program:* PCEUT 506 (6 credits); PCEUT 501 (5), PCEUT 502 (4), PCEUT 503 (5); PHCOL 510; PHCOL 511, PHCOL 512, PHCOL 513 (2 credits each); BIOC 511(4), BIOC 512(4); T C 509 (3); PCEUT 600, PCEUT 800 (variable credit)Students entering with previous graduate-level course work in the required areas may have some of the above courses waived. In addition, all students must attend the following training sessions, preferably during the first academic year: chemical safety, biological safety, and bioethics training. Radiation safety and animal care may also be required, if relevant to the student's thesis research.
- 3. *Directed Electives:* Electives are not required. However, students are encouraged to take elective courses that might benefit their thesis

project and career goals. Courses that might be of interest can be found in the disciplines of biotransformation/biochemistry, biologics/drug delivery, pharmacology/cell biology, and physiological modeling/biostatistics.

4. *Seminars and Literature Review*: PCEUT 520 (1 credit/quarter; 3 quarters/year until graduation). Beginning the second year, students make one presentation each year, with a maximum of four presentations. A general topic seminar is presented in the second year; research presentations in subsequent years.

PCEUT 583 (1 credit/quarter; 3 quarters/year until graduation). Beginning the second year, students make two presentations each year until graduation. Journal club presentation is waived in the quarter during which the student is scheduled to make a PCEUT 520 seminar presentation.

5. *Research*: PCEUT 600, PCEUT 800 (variable credit). Students complete three research laboratory rotations (PCEUT 600, 2 credits), one per quarter, starting autumn quarter of their first year. A student may opt to complete a rotation in summer quarter, before the initiation of classes. This involves an early appointment in the department and, thus, decisions must be made at the time they accept the offer to enroll. Matching of available labs with each incoming student is facilitated by the first year graduate adviser. Student preferences are given due consideration.

Students must choose a thesis adviser by the end of spring quarter in their first academic year (See Appendix A for additional details).

Students must begin research in the lab of their adviser by summer quarter at the end of their first academic year (PCEUT 600, variable credit). Most students may find that after-class and off-hours are the best and most productive time for laboratory research (See Appendix A1b for additional details).

After successful completion of the master's bypass requirements (see Appendix A for details), students sign up for PCEUT 800 (variable credit), until the defense of their thesis.

6. *Cumulative Examination*: Students begin taking cumulative exams in autumn quarter of their second academic year, and continue taking them at every offering until completion of pass requirements or until they take the maximum of eight exams. A total of eight exams are offered, two each in autumn, winter, spring, and summer quarters. For each exam, there two questions. Students must pass four of eight exams to complete the cumulative requirement. Students who do not achieve this goal are given the option of completing requirements for a terminal master's degree or withdrawal from the program.

## Financial Aid

All students in the program receive financial support in the form of research assistantships, Public Health Service predoctoral training fellowships and other fellowships such as the William E. Bradley Graduate Fellowship and those from the American Foundation for Pharmaceutical Education and from several pharmaceutical companies.

---

## Pharmacy

[depts.washington.edu/pharma](https://depts.washington.edu/pharma)

### Graduate Program

Graduate Program Coordinator  
H375 Health Sciences, Box 357630  
206-616-1383

The Department of Pharmacy offers graduate training leading to either the Master of Science or Doctor of Philosophy degree.

The graduate program in pharmaceutical outcomes research in the Department of Pharmacy provides M.S.- and Ph.D.-level training with a focus on economic evaluation of pharmaceuticals, biopharmaceuticals and medical technology, pharmacoepidemiology, and pharmaceutical-policy evaluation. Outcomes research is the study of the health and cost consequences of pharmaceuticals and pharmaceutical-related policies on

individuals and populations. Graduates of this program are trained to assess the use, outcomes, and cost of pharmaceuticals, biopharmaceuticals, medical technologies, and pharmaceutical policies and practices. Students are prepared for careers in (1) teaching and research in colleges and universities; (2) pre- and post-marketing efficacy and safety; (3) policy analysis for industry, health insurance, and governmental agencies; and (4) drug-use management and evaluation within managed health-care organizations.

## Doctor of Philosophy

### Admission Requirements

- \* One copy of official transcripts from each college attended outside the United States. Transcripts from U.S. institutions are required by the department only.
- \* Official GRE Scores, unless the applicant has a terminal doctoral degree.
- \* For international students for whom English is not the native language, TOEFL and TSE scores.
- \* Statement of personal goals describing the student's background, academic interests, and career objectives in the field of outcomes research and policy.
- \* A resume or curriculum vitae listing educational and employment history.
- \* Three letters of recommendation from persons in a position to evaluate the applicant's potential for graduate school. At least one recommendation must be from a person at the last school attended for full-time study, unless the applicant has been out of school for five years or longer. Due to the online application procedures of the Graduate School, referees will receive an email directly from the Graduate School. Instructions should be followed so letters will be uploaded, and available only to the admissions committee of the department to which the student is applying.

### Degree Requirements

90 credits, as follows:

- \* *Core courses*: Epidemiology – EPI 512 (4), EPI 513 (4), BOST 511 (4), BOST 512 (4), BOST 513 (4), PHARM 532 (4), PHARM 533 (3), PHARM 534 (3), PHARM 535 (3), PHARM 597 (9)
- \* *Electives*: A sufficient number of electives to meet program credit requirements, determined in consultation with adviser to meet the student's interests and focus
- \* General Exam
- \* Dissertation and Final Exam

## Doctor of Pharmacy

A four-year professional program leading to the Doctor of Pharmacy (Pharm.D.) degree, the curriculum is designed to provide students the scientific background and clinical skills necessary to render pharmaceutical care in various health care settings. Individuals who wish to practice pharmacy in the United States must earn a Doctor of Pharmacy (Pharm.D.) degree from an accredited college or school of pharmacy, complete state-specific required internship hours, pass licensing examinations, and meet other licensing requirements.

### Admission Requirements

- \* Applicants to the UW School of Pharmacy Pharm.D. program must complete BOTH an on-line PharmCAS Application and submit a Supplemental Application to the UW School of Pharmacy, Office of Academic and Student Programs. Potential applicants should consult the School of Pharmacy Web site, for additional admission requirements and the most current information regarding the Pharm.D. program.
- \* Minimum 90 quarter credits or 60 semester credits of undergraduate coursework, at any accredited college or university, to include the following (given as quarter credits): general biology with labs (15), microbiology with lab (5), general chemistry with labs (15), organic chemistry with labs (15), calculus (5), statistics (4-5), English composition (10), Individuals and Societies -- I&S (Social Sciences) (10), Visual, Literary & Performing Arts -- VLPA (Humanities) (10, must include public speaking/speech communication).
- \* Pharmacy College Admission Test (PCAT) must be taken within two years of application. The UW School of Pharmacy accepts no other admission test (e.g., MCAT, GRE) in place of the PCAT.
- \* Applicants who have completed all prerequisite (Pre-Pharm) coursework prior to application and those who have earned a prior bachelor's degree

or higher are given preference in the process of screening for offer of interview. The Admissions Committee has established minimum cumulative and prerequisite (Pre-Pharm) GPA thresholds and PCAT scores for screening for offer of interview. Applicants who meet or exceed these minimums are not guaranteed an interview. Offers of interview are dependent upon the size and competitiveness of the applicant pool.

- \* An interview is required as part of the UW School's Pharm.D. admission process. After a preliminary assessment of the applicant pool, the most-qualified applicants are invited for an interview in Seattle with members of the Pharm.D. Admissions Committee. Admissions preference is given to residents of Washington State and residents from states participating in the Western Interstate Commission for Higher Education (WICHE).
- \* It is important for applicants to carefully research the pharmacy profession and the attributes, skills, and abilities essential for pharmacists in the provision of care. Although not required, applicants are strongly encouraged to gain pharmacy experience, either as a volunteer or employee.
- \* *Non U.S. Citizens:* Applicants who hold "Permanent Resident" or "Refugee/Asylee" visa status are eligible to apply. TOEFL scores are not required.
- \* *International Transcripts:* All transcripts for coursework completed at foreign colleges or universities must be translated and evaluated course-by-course by one of the following certified agencies: the Education Credential Evaluators, World Education Services, Inc, or Educational-Perspectives.

### Degree Requirements

197 credits, as follows:

- \* *Theory and methods (112 credits):* CONJ 401 (4), CONJ 402 (4), CONJ 403 (4), MEDCH 401 (4), MEDCH 402 (3), MEDCH 403 (3), MEDCH 404 (3), MEDCH 450 (3), MEDCH 451 (3), PCEUT 531 (4), PCEUT 532 (5), PCEUT 533 (3), PHARM 500 (3), PHARM 501 (3), PHARM 504 (3), PHARM 508 (4), PHARM 509 (2), PHARM 511 (2), PHARM 512 (3), PHARM 527 (4), PHARM 537 (2), PHARM 541 (3), PHARM 543 (4), PHARM 546 (3), PHARM 560 (9), PHARM 561 (9), PHARM 562 (7), PHARM 563 (2), PHARM 564 (2), PHARM 565 (2), PHARM 574 (1), PHCOL 401(3), PHCOL 402 (3)
- \* *Electives (32 credits):* Refer to the School of Pharmacy's Web site for a list of professional electives
- \* *Practicum (53 credits):* Introductory Pharmacy Practice Experience (8 credits) and Advanced Pharmacy Practice Experience (45 credits), to be completed in the last year of the program

The program of study listed above is current for students who entered the program in 2006 and beyond.

### Pharm.D./Ph.D. Concurrent Program

Pharm.D./Ph.D. Program Coordinator  
H272 Health Sciences, Box 357610  
206-543-3796

The accelerated dual-degree program is intended for outstanding students committed to earning the Pharm.D. degree and a Ph.D. degree in either Pharmaceutics or Medicinal Chemistry. Students are equipped to enter academic careers that require competence in both teaching and research. Graduates of this program possess the breadth and depth of knowledge necessary to work with colleagues across multiple disciplines essential to performing integrated and translational medical and pharmaceutical research. Many applicants have worked in research and developed an interest in public health and pharmaceutical sciences through that experience.

Students admitted to the concurrent degree program are able to complete the requirements for both degrees in about seven academic years, rather than the nine academic years normally required to receive both degrees. Applicants must meet competitive admission requirements of both the Pharm.D. and Ph.D. programs. Admission to the Pharm.D./Ph.D. program is based on the recommendation of the admission committees of the professional degree program, the graduate program, and the Pharm.D./Ph.D. program. For additional admission criteria, see respective programs.

### Admissions Requirements

Applicants must complete admission requirements of both the Pharm.D. and Ph.D. programs. Consideration for the Pharm.D./Ph.D. program is contingent upon completion of Pharm.D. application, Graduate School application, and Pharm.D./Ph.D. application (available online at [depts.washington.edu/soprin/pharmdphd/](http://depts.washington.edu/soprin/pharmdphd/)).

- \* The Pharm.D. program application is composed of (1) a verified completion of all application materials by the stated January 4 deadline, (2) PCAT scores, (3) prerequisite and cumulative GPA, and (4) the ability to complete prerequisite courses by the end of spring term prior to School of Pharmacy matriculation. For details, see Pharm.D. admission requirements.
- \* The Graduate School application for Medicinal Chemistry or Pharmaceutics includes (1) an undergraduate degree in chemistry, biochemistry, pharmacy, biology, or a closely related field, (2) a statement of purpose, (3) GRE scores, (4) prior research experience, (5) three letters of recommendation. The Graduate School application deadline is January 15.
- \* In addition, applicants are required to submit information requested in the Pharm.D./Ph.D. concurrent program application checklist, available on the above stated Web site.

### Financial Aid

Financial support in the form of research assistantships, teaching assistantships, and fellowships may be available to prospective and continuing students. Availability of financial aid is limited, typically to the first and second academic year. Prospective students should contact the graduate program coordinator for more information on financial support.

evans.washington.edu

The Daniel J. Evans School of Public Affairs is a graduate professional school providing education and research for current and future leaders in pursuing challenging public-service careers in government, nonprofit, or private-sector organizations. To address the educational needs and professional interests of individuals at different stages of their careers, the school offers the Traditional Master of Public Administration (M.P.A.), the Midcareer Master of Public Administration, the Executive Master of Public Administration, Peace Corps Master's International, and the Ph.D. in Public Policy and Management.

Master's-level programs enable students to acquire the policy analysis techniques, management knowledge, problem-solving skills, and political acumen required for effective leadership across sector boundaries and in regional, national, and international policy. M.P.A. graduates hold leadership positions such as mayors and city managers; local and regional government administrators; foreign service officers; senior military and public safety positions; assistants to elected officials; analysts with budget offices, legislative staff units, and city councils; directors of social service agencies; leaders and managers of nonprofit organizations; and administrators of arts organizations. In addition, a number of alumni are employed in private sector positions involving substantial contact with public agencies.

The Ph.D. program focuses on research that prepares students with a strong interdisciplinary perspective and a solid foundation of theory and methodology in policy analysis and management. The Ph.D. program prepares students for successful careers as faculty in university programs in public policy and management, and in research positions in the public and nonprofit sectors.

## Master of Public Administration

### Traditional M.P.A. Program

The Traditional M.P.A. Program is designed for students at an early stage in their career, who typically have three to five years of relevant work experience. Students must complete 60 credit hours of course work, including core requirements, an internship, and a degree project. Most students enroll on a full-time basis and complete the program in approximately two years or six quarters, while part-time students often take three or more academic years.

### Degree requirements

60 credits, as follows:

- \* *Core Curriculum (23 credits):*
  - o Managing Politics and the Policy Process (PB AF 511)
  - o Managing Organizational Performance (PB AF 512)
  - o Public Policy Analysis (PB AF 513)
  - o Microeconomics (PB AF 516)
  - o Public Budgeting and Financial Management (PB AF 522)
  - o Quantitative Analysis (PB AF 527, PB AF 528)
- \* Concentrated study in three curricular areas: economics (3 credits), analysis (3 credits), and values (3 credits)

- \* Specialized plan of study chosen from one or more of the following gateways: Education and Social Policy, Environmental Policy and Natural Resource Management, International Affairs, Nonprofit Management, Urban and Regional Affairs (15 credits)
- \* An internship (PB AF 600) (6 credits)
- \* 6-credit degree project (PB AF 605) or Public Service Clinics (PB AF 606, PB AF 607)

For full program details, visit <http://evans.washington.edu/degree/mpa/index.php>

### Midcareer M.P.A. Program

The Midcareer M.P.A. Program is designed for students with seven to 10 years of progressively responsible, professional work experience in the public, nonprofit, or private sectors who have had exposure to public issues. Students must successfully complete 54 credits of coursework, including an integrated core sequence, electives and leadership seminars. Many courses are offered in the evening. Most students, typically midlevel managers, are able to work full-time while developing leadership and analytic tools needed to attain higher leadership positions. Students complete the program in approximately three years if they follow the part-time plan of study. The program can be completed in less time depending on the student's ability to take more classes.

### Degree requirements

54 credits, as follows:

- \* *Leadership Seminars:* PB AF 543, PB AF 544, PB AF 545
- \* *Integrated Management Sequence:* PB AF 540, PB AF 541, PB AF 542
- \* *Microeconomics:* PB AF 516
- \* *Budgeting and Financial Management:* PB AF 522
- \* *Quantitative Analysis:* PB AF 527, PB AF 528
- \* *Values:* Chosen from PB AF 504, PB AF 506, PB AF 596, or PB AF 599
- \* *Electives:* Chosen in consultation with a faculty adviser
- \* Degree project not required

For full program details, visit <http://evans.washington.edu/degree/exmpa/index.php>

### Executive M.P.A. Program

The Executive M.P.A. Program is a cohort-based, modular program designed to meet the needs of senior-level managers and executives with 10 or more years of progressively responsible, professional experience (typically directors, senior managers in or near leadership positions, and high-level technical staff). Students must successfully complete 45 credits of coursework within a specially designed curriculum combining two intensive weeks, several weekend modules and numerous online assignments. Intensive learning emphasizes a variety of critical concepts in executive leadership, including: performance management and accountability; change management; communication skills; ethics and leadership; executive decision-making; human resource management; strategic financial management; and strategic leadership. Emphasis is on decision making, practical application, and integration of learning with experience. Because the program relies on a cohort model, entering students must begin their studies with a seven-day residential retreat. Students complete the program in approximately 18 months.

### Degree Requirements

45 credits, as follows:

- \* Two "Foundation Weeks" in Strategic Leadership and Performance Challenges: PA EX 501, PA EX 506
- \* Nine three-day weekend core modules in Organizational Culture (PA EX 502), Negotiation and Conflict Management (PA EX 503), Effective Communication (PA EX 504), Leading with Integrity (PA EX 505), Strategic Financial Management I (PA EX 507), Public-Private Partnerships (PA EX 508), Policies and Politics (PA EX 509), Human Resource Management (PA EX 510), and Leadership, Legacy and Commitment (PA EX 511)
- \* Online assignments
- \* Degree project not required

For full program details, visit <http://evans.washington.edu/degree/exmpa/index.php>

## Peace Corps Master's International

Peace Corps Master's International (PCMI) students must successfully complete 51 credits of coursework along with two years of Peace Corps service in international nongovernmental organization development and a degree project. PCMI students generally complete all core courses, except for Public Policy Analysis, in three quarters prior to leaving for Peace Corps service, and upon returning to UW, complete their coursework and a final degree project in one to two quarters. While on assignment overseas, students remain in touch with their faculty adviser and a returned volunteer from the Evans School. PCMI students generally create a Plan of Study focused on international nongovernmental management or other international management and policy issues, such as environmental or health policy. Students complete the program in approximately three to three-and-a-half years.

### Degree Requirements

51 credits, as follows:

- \* *Core Curriculum:*
  - o Managing Politics and the Policy Process (PB AF 511)
  - o Managing Organizational Performance (PB AF 512)
  - o Public Policy Analysis (PB AF 513)
  - o Microeconomics (PB AF 516)
  - o Public Budgeting and Financial Management (PB AF 522)
  - o Quantitative Analysis (PB AF 527, PB AF 528)
- \* Concentrated study in three curricular areas: economics (3 credits), analysis (3 credits), and values (3 credits)
- \* Two years of Peace Corps service
- \* 6-credit degree project related to Peace Corps field work

For full program details, visit <http://evans.washington.edu/degree/pcmi/index.php>.

## Doctor of Philosophy

The Ph.D. in Public Policy and Management is a research program that prepares its graduates for careers as faculty in university programs in public policy and management, and for research positions in the public and non-profit sectors. It takes an interdisciplinary perspective in its curriculum and draws broadly on theoretical and methodological foundations in policy analysis and management. Substantive policy areas reflect such diverse faculty research agendas as education and social policy, environmental policy, international development, nonprofit management, and urban policy.

This highly competitive and selective program admits five to seven excellent applicants each year, and provides funding and mentoring to help them succeed. The new program aims to be one of the top programs in the field of public policy and management, serving not only the Pacific Northwest, but the national and the global market for scholars in this field.

### Degree Requirements

90 credits, as follows:

The program consists of two years, or six full-time academic quarters, of coursework and examinations, research, and the writing of a dissertation beyond the two years.

The first-year core curriculum prepares doctoral students to undertake independent scholarship in public policy and management: Research Design (PB AF 599 or URDP 591), Institutional Perspectives on Management and Leadership (PB AF 599), Public Policy Processes (PB AF 575), Microeconomics (PB AF 599), Policy Analysis and Evaluation (PB AF 599), Quantitative Methods Sequence (SOC 505 and SOC 506 or ECON 580 and ECON 581), a data analysis practicum, and a qualifying examination.

In the second year, doctoral students increase their analytic and methodological skills. Requirements include at least two additional courses in qualitative and quantitative analysis methods, selected from a list of restricted electives, and at least three courses in a substantive policy field or in management studies.

Beyond the second year, requirements include: a general examination (advancing to candidacy), preparation of a dissertation of original research, and a final examination (dissertation defense).

Students are expected to complete the degree on average in four to five years, depending on the individual student. Prior coursework in calculus is expected before matriculation.

For full program details, visit: <http://evans.washington.edu/degree/phd.php/>.

## Concurrent Degree Programs

The Evans School offers the M.P.A. degree concurrently with the following five programs: Master of Urban Planning (M.U.P.), Master of Arts in International Studies (M.A.I.S.), Master of Urban Planning (M.U.P.), Master of Public Health (M.P.H.), Master of Science in Forest Resources (M.S.), Juris Doctor (J.D.). Concurrent degree applicants must apply through, and be accepted into, both programs. Admission criteria are those of each individual program.

### Master of Public Affairs and Master of Urban Planning Concurrent Degree Program

Modern urban problems - including community development, environmental quality, transportation, and growth management - are at the intersection of policy, planning, and management and require leaders with skills beyond traditional disciplinary boundaries.

Students earn both the Master of Public Administration (M.P.A.) and Master of Urban Planning (M.U.P.) in approximately three years. The concurrent degree includes the following:

- \* an integrated curriculum with knowledge and skills-based training in organizational management, policy analysis, urban planning, and community development
- \* a collaborative, interdisciplinary program where graduate students from different backgrounds contribute to each other's educational experiences
- \* practical experience and detailed analysis through a thesis, whereby students demonstrate competency in both degree areas.

### Degree Requirements

70 credits, as follows:

- \* *Joint Core*
  - o Public Affairs Gateway Base Course
  - o Urban Design and Planning Specialization or Certificate Course
- \* *Urban Planning Core:* URBDP 479 (3), URBDP 500 (4), URBDP 503 (3), URBDP 507 (4), URBDP 512 (3), URBDP 580 (3)
- \* *Public Affairs Core:* PB AF 511 (3), PB AF 512 (3), PB AF 513 (3), PB AF 516 (3), PB AF 522 (3), PB AF 527 (3)
- \* *Restricted Electives:* One course from each of the following areas: Land Use/Growth Management, Specialized Planning Studio, Analysis, Values, Economics, Conflict Resolution
- \* *Internship:* Graduate-level internship equivalent to three months' full-time work.
- \* *M.U.P. Thesis Requirement:* Combined urban planning thesis/professional project and public affairs degree project.

### Master of Public Affairs and Master of Arts in International Studies Concurrent Degree Program

### Degree Requirements

60 credits, as follows:

- \* *International Studies Requirements*
  - o *Language:* Proficiency equivalent to two years of college-level work in a modern foreign language (three years for Chinese and Japanese).
  - o *Required Core:* Colloquia in International Studies (three quarters); SIS 500 (3), SIS 501 (3), SIS 502 (3), SIS 511 (3), intermediate economics (option to waive)
  - o *Electives:* Two fields of study: the professional field completed by courses relevant to both programs; the second field can be either a regional studies field or a special topics field.
  - o *Final Papers and Oral Exam:* Students present two research papers to a faculty examining committee.
- \* *Public Affairs Requirements*
  - o *Core Curriculum:* PB AF 511 (3), PB AF 512 (3), PB AF 513 (3), PB AF 516 (3), PB AF 522 (3), PB AF 527 (3), PB AF 528 (3)
  - o *Restricted Electives (9 credits):* Economics (3 credits), analysis (3), values (3)
  - o *Plan of Study:* 15 credits generally from one or a combination of the following gateway courses: International Affairs, Environmental Policy and Natural Resources Management, Urban and Regional Affairs, Education and Social Policy, Nonprofit Management
  - o *Internship:* Three months of full-time work, or equivalent

- o *Degree Project*: May also be used as one of two final papers required by International Studies program if it has an international focus.

### Master of Public Affairs and Master of Science in Public Health Concurrent Degree Program

#### Degree Requirements

90 credits, as follows:

- \* *Public Affairs Requirements*
  - o *Core Courses*: PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3)
  - o *Restricted Electives*: ENV H 577 (3); either HSERV 585 (3), HSERV 587 (3), or HSMGMT 514 (3); one approved class in values (3)
- \* *Public Health Requirements*
  - o *Core Courses*: ENV H 580 (3), ENV H 581 (1), ENV H 583 (1); ENV H 700 (9); either BHOST 511, BHOST 512 (4, 4) or BHOST 517, BHOST 518 (4, 4); EPI 511 (4)
  - o *Degree Pathway Requirements*: One of the following:
    - + *Environmental Health*
      - \* *Core Courses*: ENV H 405 (3); ENV H 453 (3); ENV H 541 (3); either ENV H 543 (3) or ENV H 577 (3/4); ENV H 552 (3); ENV H 594 (1, max. 2); courses from two of the following three areas:
        - o *Waste management*: Either ENV H 445 (3) or ENV H 446 (3)
        - o *Air pollution*: ENV H 490 (3)
        - o *Water and wastewater*: ENV H 545 (3)
      - \* *Representative electives*: 9 credits from an approved list
    - + *Toxicology*
      - \* *Core courses*: ENV H 514, ENV H 515, ENV H 516 (4, 4, 4); ENV H 552 (3); ENV H 577 (3/4); either BIOC 405, BIOC 406 (3, 3) or BIOC 440, BIOC 441, BIOC 442 (4, 4, 4); one course in industrial hygiene or occupational medicine
      - \* *Electives*: 9 additional credits from approved list. (If student took the three-quarter biochemistry sequence above, only 3 credits of electives are required.)
    - + *Industrial Hygiene*
      - \* *Core Courses*: ENV H 405 (3), ENV H 553 (3), ENV H 555 (3), ENV H 557 (4), ENV H 560 (4), ENV H 564 (4); either BHOST 512 (4) or BHOST 518 (4); either ENV H 552 (3) or ENV H 570 (3)
      - \* *Electives*: Minimum 12 credits from approved list (available from adviser)
  - o *Additional Electives*: Sufficient number of electives to reach a total of 90 credits

### Master of Public Affairs and Master of Public Health in Environmental and Occupational Health Concurrent Degree Program

#### Degree Requirements

90 credits, as follows:

- \* *Public Affairs Requirements*
  - o *Core Courses*: PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3)
  - o *Restricted Electives*: ENV H 577 (3); either HSERV 585 (3), HSERV 587 (3), or HSMGMT 514 (3); one approved class in values (3)
- \* *Public Health Requirements*
  - o *Public Health Core Courses*: Either EPI 511 (4) or EPI 512, EPI 513 (3, 3); either BHOST 511 (4) or BHOST 517 (4); HSERV 510 (3); HSERV 511 (3/4)
  - o *Environmental and Occupational Health Required Courses*: Either ENV H 405 (3) or ENV H 514, ENV H 515, ENV H 516 (3, 3, 3); either ENV H 453 (3), ENV H 553 (3), or ENV H 564 (3); ENV H 570 (3); either ENV H 472 (3), ENV H 543 (3), or ENV H 577 (3/4); ENV H 580 (1 credit for three quarters); ENV H 581 (1); either ENV H 583 (1) or HSERV 522 (3/4); either ENV H 446 (3), ENV H 490 (3), ENV H 541 (3), ENV H 545 (3), or ENV H 552 (3); ENV H 599 (3); ENV H 700 (9)
- \* *Additional Electives*: Sufficient number of electives to total 90 credits

### Master of Public Affairs and Master of Health Administration Concurrent Degree Program

#### Degree Requirements

90 credits, as follows:

Health Administration course load is approximately 62 credits, which includes the M.H.A. capstone project credits and M.H.A. credits typically substituted by M.P.A. credits. M.P.A. core credit load is 22, with additional elective credits (approximately 12) and degree project credits (6). Program includes up to 12 shared credits.

Because of ongoing changes in the M.H.A. core curriculum, the schedule of courses below is expected to evolve. Contact the program office.

#### Course requirements:

- \* *Health Administration Core*: ACCTG 503 (4); HSERV 511 (4), either HSERV 522 (4) or HSERV 552 (3), HSERV 551 (2), HSERV 587 (3); HSMGMT 501 (3), HSMGMT 502 (3), HSMGMT 513 (4), HSMGMT 523 (3), HSMGMT 545 (4), HSMGMT 560 (4), HSMGMT 562 (4), HSMGMT 571 (3), HSMGMT 590 (2, 2, 4), HSMGMT 592 (2, 2); one class in values/ethics (3)
- \* *Public Affairs Core*: PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3)
- \* *Internship*: Students work with faculty advisers to coordinate a single internship if possible or desirable.
- \* *Degree Projects*: Students work with faculty advisers and instructors of the M.H.A. capstone project (HSMGMT 545) and M.P.A. degree project (PB AF 605) to attempt collaboration on a single project. A minimum of 10 project credits are required.
- \* *Additional Electives*: Sufficient electives to reach 90 credits

### Master of Public Affairs and Master of Science in Forest Resources Concurrent Degree Program

#### Degree Requirements

90 credits, as follows:

- \* *Mini-core*: PB AF 591/CFR 591 (1 credit each year); PB AF 590/CFR 592 (3/4); PB AF 592/CFR 571 (5)
- \* *Opportunity to Specialize*: Focuses on training public, private, and nonprofit leaders to synthesize the worlds of science, management, and policy.
  - o *Forest Economics and Policy*:
    - + *Core classes*: CFR 500 (1); PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 522 (3); PB AF 527, PB AF 528 (3, 3); ECON 500, ECON 502 (4, 4); either CFR 504 (4) or QERM 521 (4); applied professional field (6 credits approved by graduation committee); topics seminar or independent study in forest economics (2); forest biology, ecology, hydrology or forest products (3-5 credits, 500-level)
    - + *Restricted Electives*: Economics (3-5 credits); analysis (3-5 credits); values (PB AF 569 or approved values course, 3 credits)
    - + *Electives*: Electives include additional courses, skills workshops, or independent study.
    - + *Thesis*: CFR 600/700 (6-9 credits)
  - o *Social Systems and Natural Resource Policy*:
    - + *Core Classes*: CFR 500 (1); PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3); PB AF 527, PB AF 528 (3, 3); CFR 501 (5) or approved 500-level resource-related natural science course (3-5 credits); CFR 573 (3) or CFR 570 (3); approved seminar on natural resources (3 credits)
    - + *Restricted Electives*: Economics (3-5 credits); analysis (3-5 credits); values (PB AF 596 or approved values course, 3 credits)
    - + *Electives*: At least 12 credits must be taken from CFR courses
    - + *Thesis*: CFR 600/700 (6-9 credits)
  - o *Wildlife Conservation Policy*:
    - + *Core Classes*: CFR 500 (1); PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3); PB AF 527, PB AF 528 (3, 3); ESRM 450 (5); ESRM 458 (5); CFR 554 (1-2); CFR 521; two of the following: ESRM 424 (3), ESRM 441 (5), CFR 501 (5), CFR 528 (3), Q SCI 477 (5)
    - + *Restricted Electives*: Economics (3-5 credits); analysis (3-5 credits); values (PB AF 596 or approved values course, 3 credits)
    - + *Electives*: Electives include additional courses, skills workshops, or independent study.
    - + *Thesis*: CFR 700 (9 credits)
- \* *Additional Electives*: Sufficient electives to reach 90 credits

## Master of Public Affairs and Juris Doctor Concurrent Degree Program

### Degree Requirements

90 credits minimum, as follows:

- \* *Law Requirements:*
  - o *First Year:* LAW A 501 (2-8), LAW A 502 (2-6), LAW A 503 (2-8), LAW A 504 (2-8), LAW A 507 (4), LAW A 505 (2-5), LAW A 506 (1-6, three quarters)
  - o *Second and Third Years:* The only prescribed courses are LAW B 510 (2-4) and LAW E 500 (1-3). Students prepare for subjects on the state bar exam and are encouraged to undertake independent work under supervision of a faculty member.
  - o *Public Service Requirement:* Students perform 60 hours of public service legal work during the second or third year of law school. This requirement may be satisfied by successfully completing any approved clinical program course, a public service externship that carries at least two credits, or the street law course.
- \* *Public Affairs Requirements:*
  - o *Core Curriculum:* PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3); PB AF 527, PB AF 528 (3, 3)
  - o *Restricted Electives:* Economics (3 credits), analysis (3 credits), values (3 credits)
  - o *Plan of Study:* 15 credits generally from one or a combination of the following gateways: International Affairs, Environmental Policy and Natural Resources Management, Urban and Regional Affairs, Education and Social Policy, Nonprofit Management
  - o *Internship:* Equivalent to three months of full-time work.
  - o *Degree Project:* Independent research. While not a thesis, the degree project enables students to work closely with UW faculty members on a topic of interest.

### Admission Requirements

Admission to the Evans School is highly competitive and selective, and is based primarily on the applicant's demonstrated ability to complete the graduate program while sustaining a high level of achievement. The School's Admissions Committee reviews previous undergraduate or graduate (if applicable) course work, grades and GRE test scores, and gives considerable weight to professional experience, previous academic awards or scholarships, volunteer work, letters of recommendation, and the applicant's writing skills as demonstrated in a personal essay. The school admits students annually for autumn quarter. General requirements

Applicants must hold a baccalaureate degree from an accredited college or university in the United States, or its equivalent from a foreign institution, and have achieved a minimum grade point average of 3.0 on the last 90-quarter (or 60 semester) credits of undergraduate work.

Graduate Record Examination (GRE) general test scores are required for admission to all programs except the Executive Master of Public Administration. TOEFL scores are required for international students only.

Visit [www.evans.washington.edu/degree](http://www.evans.washington.edu/degree) for specific requirements of each program.

### Application deadlines

Due to class-size limitations in our competitive programs, applicants are encouraged to submit their applications as early as possible.

Application materials to the Traditional M.P.A. Program and to the Peace Corps Master's International Program must be received online and postmarked by January 15 for priority consideration. Applications received after this date will be accepted for review on a space available basis until March 1.

Application materials for the Midcareer M.P.A. Degree Program must be received online and postmarked by March 1. Applications received after this date will be accepted for review on a space-available basis until June 1.

Application materials for the Executive M.P.A. Degree Program must be received online and postmarked by May 1. Applications received after this date will be accepted for review on a space-available basis until July 1.

Application materials for the Ph.D. Program in Public Policy and Management must be submitted and postmarked by February 1st. Applications postmarked after February 1st will not be reviewed.

Applicants to all programs must also apply to the UW Graduate Admissions Office by the specific program deadlines above.

### Financial Aid

For further information, visit: <http://evans.washington.edu/degree/financialaid/index.php/>.

### Evans School Fellowships

The Evans School offers several fellowships to entering students each year from the school's endowed fellowship funds. These typically consist of \$4000-\$5000 stipends awarded primarily on the basis of academic achievement and/or excellence in public service. Applicants interested in school fellowships must submit the Evans School Financial Aid Form with their Evans School application.

Daniel J. Evans Endowment for Excellence in Public Service: Fellowships support students aspiring to excellence in public service.

Nancy Bell Evans Endowment for Excellence in Nonprofit Service: Fellowships support students who aspire to excellence in nonprofit service and philanthropy.

Jon Brock Endowed Fellowship: Supports outstanding master's students studying conflict resolution and management in public and nonprofit sectors.

Elaine Chang Endowed Fellowship: Provides support to outstanding students pursuing studies in international peace and development.

Brewster C. Denny Endowed Fellowship: Supports students committed to excellence in public service.

Robert J. and Micki E. Flowers Endowed Fellowship: Provides support to outstanding students from diverse backgrounds pursuing careers in public and nonprofit service.

Margaret T. Gordon Endowed Fellowship: Supports outstanding Evans School students.

Henry M. Jackson Endowed Fellowship: Supports students pursuing careers in environmental policy and natural resources management.

Morton Kroll Endowed Fellowship: Provides support to top students pursuing arts management internships.

Robert J. Lavoie Fellowship: Provides funds to outstanding students preparing to work in public service.

Governor Gary Locke Endowed Fellowship: Supports Asian/Pacific Islander students pursuing studies in public service and politics.

Hubert G. Locke Endowed Fellowship: Provides support for students pursuing internships in nonprofit organizations devoted to social justice issues.

George A. Shipman Endowed Fellowship: Supports outstanding students pursuing careers in public service.

Evans School Alumni Endowed Fellowship: Supports recruiting of outstanding students.

Home Street Bank Fellowship: Supports an outstanding graduate student pursuing a career in public affairs.

Scottish Rite Scholarship Foundation of Washington PCMI Fellowship: Provides a stipend to an entering student accepted to the Peace Corps master's international degree program.

William Shelton Fellowships: Funded by the Scottish Rite Scholarship Foundation of Washington to promote better government through education.

### Assistantships

The Evans School offers many research, teaching, and staff assistantship positions each year. Typically 10 to 20 hours per week, these positions include a monthly stipend, benefits, paid tuition, and health insurance. Hiring is competitive. Most announcements are posted in the spring, or as positions become available, on the Evans School Intranet.

Research assistantships are open to first- and second-year M.P.A. students and to Ph.D. students. First-year M.P.A. students are eligible to apply upon acceptance. Students typically work on grant-funded studies, special conferences, and public policy colloquia series sponsored by the school's research centers. Research assistants are exposed to a wide range of policy issues, including regional growth management, international trade, state and federal entitlement programs, health-and-human-services delivery, and education reform. In addition, some research fellowships are offered each year to highly qualified applicants during the admission process. These fellowships guarantee a paid research assistantship for the first year of study and tuition support.

Teaching and staff assistantships are reserved for second year students and Ph.D. students. Teaching assistants are hired for some core courses. Staff assistantships include such positions as coordinators for international programs, peer advisers, public service clinic/career services coordinators, and computer lab managers.

## Work-Study Status

When hiring for hourly positions, the school often gives preference to students possessing work-study status. Work-study positions have included research assistance for faculty and grants, and staff support for the school's centers. Work-study status is one of several forms of aid granted by the University of Washington Financial Aid Office.

## Research Facilities

The school promotes the application of research to real-world policy contexts and its integration with the teaching enterprise. In addition to supporting the independent research of faculty members, the school houses several research and policy centers focusing on regional development, family and child welfare, poverty alleviation, nonprofit management and leadership, international development, consensus building and conflict resolution, and education reform.

These centers shape students' educational experiences by offering research assistantships, special events, career networking, degree-project advising, teaching, and guest lecturing in classes taught by center faculty. The availability of research assistantships is based on current projects.

### Center for Urban Simulation and Policy Analysis

The center fosters understanding of the relationship between urban growth and public policy. "UrbanSim," a software-based simulation model for integrated planning and analysis of urban development, incorporates interactions between land use, transportation, and public policy. The software enables metropolitan planning organizations and others to forecast the likely effects of land use and transportation plans and policies by taking into account environmental, sociological, and economic dimensions.

### Center on Reinventing Public Education (CRPE)

How can urban school systems provide strong, coherent schools for all children while upholding the commitment to equal opportunity on which public education is founded? The answer, CRPE believes, is to reinvent city school systems around principles of school autonomy, accountability for performance, and family choice. The center develops new models of public education based on these principles and helps public officials and community leaders choose and implement reform strategies. CRPE projects address district finance, leadership and human resources, school accountability, teacher development and quality, and charter schools.

### Human Services Policy Center (HSPC)

The center pairs applied analytic research, preventive approaches, and promotion of comprehensive policies to improve the lives of children, families, and communities, especially those who are disadvantaged. Public communications and strategic partnerships ensure that the HSPC's research affects policy. Core programs include educating and caring for young children; communicating about policies for children and families; and profiling child well being (Washington Kids Count).

### Marc Lindenberg Center for Humanitarian Action, International Development, and Global Citizenship

The Lindenberg Center prepares students and faculty for life and work in a global society through partnerships that expand teaching, research, and service opportunities in humanitarian action, international development, and

global citizenship. The center's programs enable students to understand connections between poverty, hunger, health, and human security, and equip them with the skills and knowledge to create a better, more humane world. In partnership with international organizations, the center conducts research and multi-disciplinary academic training programs that prepare students for work in emergency and humanitarian relief and international development. The center also promotes responsible global citizenship through exchanges with developing countries, internationalization of curriculum, and collaboration with K-12 schools to change the way students see the world and think about global issues.

### Nancy Bell Evans Center on Nonprofit Leadership and Philanthropy

The center enhances the understanding and vitality of the nonprofit sector through research, education, and community engagement. The center conducts research of importance to scholars, policy-makers, and practitioners. It also strives to connect scholars doing research with practitioners in the field. A special research focus is the changing service and policy roles of nonprofit organizations, particularly in the context of devolution, privatization, and globalization. The center serves as the hub of nonprofit studies across the UW campus and, in conjunction with the Cascade Center for Public Service, provides growth and learning opportunities for senior-level nonprofit professionals in the Pacific Northwest.

### The William D. Ruckelshaus Center

The William D. Ruckelshaus Center, formerly known as the Policy Consensus Center, is a joint venture between the UW and WSU. The center draws together representatives from a wide network of agencies, advocacy groups, businesses, agribusiness, tribal governments, university researchers, and others to find long-term solutions to policy conflicts in Washington State, enhancing the region's capacity for effective, sustainable policy making and problem solving. Policy areas range from natural resources and economic development to labor issues in the business community and elsewhere. The center's activities focus on four major areas: providing an objective forum for conflict resolution or policy enhancement; building capacities through assessment, training, and consulting to broaden stakeholders' perspectives and improve collaboration; researching and disseminating best practices in conflict resolution and policy problem solving; and closing the gap between science and policy.

### West Coast Poverty Center

This center serves as a regional hub for research, education, and policy analysis on the causes and consequences of poverty in the west coast states. At the UW, the center is a collaborative venture of the Evans School, the School of Social Work, and the College of Arts and Sciences, and is the newest of three regional poverty centers funded by the U.S. Department of Health and Human Services. The center fosters opportunities for cross-disciplinary exchanges and collaboration among poverty researchers and practitioners. It supports research on a broad range of poverty-related topics, such as labor market changes and consequences for economic security and social well-being; new patterns of work and family life, including transformations in family formation, employment, and care-giving arrangements for parents and children; and demographic trends and implications for poverty and public policy. Key activities include awarding grants to established and emerging poverty scholars and doctoral students; hosting seminars and research conferences on poverty and public policy; conducting outreach, dissemination, and dialogue with policymakers and practitioners; and mentoring the next generation of poverty scholars and practitioners.

### Executive Training, Civic Engagement, and Outreach

#### Cascade Center for Public Service and Leadership

The Cascade Center, a public and nonprofit leadership training unit, provides executive and mid-level public and nonprofit sector leaders professional development opportunities to strengthen their management skills. A diverse complement of two-day, three-day, and five-day management courses, as well as a two-week executive program, helps meet a wide range of management training needs in the Northwest and the U.S.

Cascade Center courses are offered at the UW campus in Seattle. With prior permission, traditional and mid-career M.P.A. students may apply for a maximum of 12 elective credits to be waived from their degree

requirements upon completion of Cascade courses, with approval from their adviser. Executive M.P.A. students may apply for up to nine elective credits to be waived from their degree program, with approval from their adviser. Cascade courses are not graded and participants do not earn academic credits. Rather, the Evans School may accept completed Cascade coursework in lieu of required elective credit hours.

### **Civic Engagement**

An important convener of public policy deliberations in the Puget Sound region, the Evans School provides a neutral forum in which leading scholars and practitioners can talk about practical solutions to emerging policy issues. Groups wanting a university partner in public events often turn to the Evans School. Through strategic alliances, the school attracts many people to engage in dialogue with faculty, students, and the greater policy community. Public lectures, conference, symposia, and panel discussions help students enrich their policy studies beyond the classroom. These include the Daniel J. Evans Lessons in Leadership Seminars, the Dael L. Woffle Memorial Lecture in Science and Public

Policy, the Betty Jane Narver Lecture on Women in Public Policy, the Civic Engagement for the 21st Century Seminar Series, the Forum at the Evans School, and the quarterly Dean's Forum.

In addition, through service on commissions, organizational boards, and other means, Evans School professors and students actively assist governments, NGOs, nonprofits, community organizations, and companies to improve society in the U.S. and abroad. Whether through Public Service Clinics or internships, trainings, or volunteer service projects, students can actively engage their knowledge in serving the public good.

### **Electronic Hallway**

The Electronic Hallway, [www.hallway.org](http://www.hallway.org), is an internationally recognized, online resource for public affairs teaching and curriculum development. It supports the Evans School teaching mission and distributes cases and skill exercises to educators in public policy and management.

---

# School of Public Health and Community Medicine

---

## Dean

Patricia W. Wahl

F350 Health Sciences  
sphcm.washington.edu

The School of Public Health and Community Medicine (SPHCM) is composed of five departments: Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Health Services, and Pathobiology.

## Undergraduate Program

A Bachelor of Science degree and an undergraduate minor are offered in the Department of Environmental and Occupational Health Sciences. The Department of Health Services offers a Bachelor of Science degree in health information administration through the UW Evening Degree Program. Students may pursue a general studies bachelor's degree with an emphasis in public health by working with faculty in SPHCM and the College of Arts and Sciences, UW General Studies Office, 171 Mary Gates Hall. The SPHCM also offers a school-wide public health minor, requirements for which are described in the Health Services section.

## Graduate Program

The SPHCM offers graduate programs leading to the degrees of Master of Public Health (M.P.H.), Master of Health Administration (M.H.A.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). Admission requirements vary by degree and field and are described in the sections of each department.

**Master of Public Health Degree:** The M.P.H. is a professional degree that provides broad training in public health. Each track or program provides additional training in a particular area. Graduates pursue careers in public health practice settings, academia, or research. The M.P.H. degree is offered in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, and Health Services. Students earning the M.P.H. may choose from several areas including biostatistics, community oriented public health practice, environmental and occupational health, epidemiology, health and policy research, international health (in Epidemiology or Health Services), maternal and child health (in Epidemiology or Health Services), occupational and environmental medicine, public health genetics, public health nutrition, or social and behavioral sciences. The M.P.H. degree in public health nutrition is offered through the Nutritional Sciences Interdisciplinary Graduate Program and the M.P.H. in public health genetics is a multidisciplinary program that involves faculty from throughout the University. The Extended M.P.H. Program is a three-year, part-time program that allows mid-career public health professionals to pursue the M.P.H. degree in community practice, health education, maternal and child health, or oral health while continuing their employment.

**Master of Health Administration Degree:** The M.H.A. degree is offered by the interdisciplinary Health Services Administration Group in the Department of Health Services under the auspices of the Graduate School. The program prepares students for careers in management, planning, and policy analysis in a variety of settings in the health care field. The purpose of the M.H.A. curriculum is to integrate the knowledge, skills, and experience that encompass health services management, planning, and policy analysis. Students develop knowledge and skills that enable them to better understand and manage change, analyze information and make decisions, and manage organizations and the people in them. The Executive M.H.A. Program is a part-time program designed for mid-career health services professionals, including physicians and other experienced clinicians, who wish to continue their employment while pursuing the M.H.A. degree. The program provides a balance of theory and practical management skills.

**Master of Science and Doctor of Philosophy Degrees:** The M.S. and Ph.D. programs in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Health Services, and Pathobiology prepare students for academic or research careers. The M.S. and Ph.D. programs in the Nutritional Sciences program, and the Ph.D. program in the Institute for Public Health Genetics are administered in SPHCM, although the degrees are awarded through the Graduate School's interdisciplinary group structure.

The M.S. programs in biostatistics, environmental health, epidemiology, genetic epidemiology, health and policy research, industrial hygiene and safety, nutritional sciences, pathobiology, statistical genetics, and toxicology offer focused research training in specific disciplines. Graduates of these programs often assume positions as senior technical staff in laboratories or other organizations and as research project coordinators, or pursue further graduate training. The M.S. program differs from the Ph.D. program in that more of the courses emphasize the concepts underlying methodological approaches rather than the ability to independently design a major research program.

The Ph.D. programs in biostatistics, environmental and occupational hygiene, epidemiology, health services, pathobiology, statistical genetics, toxicology, and the interdisciplinary Ph.D. programs in nutritional sciences and public health genetics, train future academicians as highly qualified independent investigators and teachers, and as well-trained practitioners. The doctoral programs are distinct from the M.S. programs by the addition of advanced coursework and the nature and scope of the dissertation research project.

**Concurrent Degree Programs:** The SPHCM has concurrent degree programs with the School of Business Administration, the Daniel J. Evans School of Public Affairs, and the School of Nursing that lead to concurrent M.H.A.-M.B.A., M.H.A.-M.P.A., and M.H.A.-M.N. degrees, respectively. The SPHCM and the schools of Business Administration and Public Affairs offer these degree programs during both day and evening times. The SPHCM has concurrent degree programs with the Henry M. Jackson School of International Studies, the School of Social Work, the School of Nursing, and the School of Public Affairs that lead to the M.P.H.-M.A.I.S., M.P.H.-M.S.W., M.P.H.-M.N., and MPH-MPA and MS-MPA degrees, respectively. The M.P.H.-M.N. concurrent degree program provides students opportunities to study the areas of community health care nursing and child nursing. The School of Medicine and SPHCM have a concurrent degree programs that lead to the M.P.H.-M.D., M.H.A.-M.D. and Ph.D.-MD degrees. In the autumn of 2003 the concurrent degree program with the School of Dentistry that leads to the M.P.H.-M.S.D. degrees was approved, and the concurrent M.P.H.-J.D. degree program with the School of Law is expected to be approved during the 2004-2005 year.

**Residency Programs:** The SPHCM offers a residency in occupational and environmental medicine. Physicians are also welcome to apply to any of the School's graduate programs.

**Certificate and Graduate Certificate Programs:** The SPHCM offers several graduate certificate programs including a joint program with the School of Medicine in Biomedical and Health Informatics. The Department of Biostatistics offers a graduate certificate program in statistical genetics; the Department of Health Services in health behavior and health promotion, health policy, international health, and maternal and child health; the Extended Degree Program in public health; and the Institute of Public Health Genetics in public health genetics. The Department of Health Services also offers certificate programs in health information administration (HIA) and medical management.

---

## Biostatistics

[www.biostat.washington.edu](http://www.biostat.washington.edu)

## Graduate Program

Graduate Program Coordinator  
F664 Health Sciences, Box 357232  
206-543-1044  
[bioadmit@u.washington.edu](mailto:bioadmit@u.washington.edu)

The Department of Biostatistics offers Master of Science, Master of Public Health, and Doctor of Philosophy degrees in quantitative methods applied to the medical and biological sciences. Biology, medicine, and health services are undergoing major changes in their development as quantitative sciences. As technological advances find expression in new research tools, new theoretical concepts are being employed in the analysis of quantitative data. The techniques and viewpoints of mathematics and statistics, traditionally peripheral to biology and medicine, are now woven

into the fabric of the life sciences, thereby providing exciting new opportunities in research and teaching.

Many universities have instituted programs relating mathematics or statistics to one particular biological field. The goal of the biostatistics graduate program is to equip students to develop and apply the quantitative techniques of mathematics, statistics, and computing appropriate to medicine, biology, and health services.

Because of the quality of the faculty and their involvement in a diversity of statistical applications, as well as the quality of the students, students receive an excellent education. Students are recruited from undergraduate programs in mathematics, statistics, and biology and are selected on the basis of outstanding quantitative ability.

## Master of Public Health

### Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

To be considered for admission to the Biostatistics MPH pathway, a candidate must hold a doctoral-level degree in another field (e.g., M.D., Ph.D., J.D.) or be currently working on such a doctoral degree. Candidates who have not yet been awarded a doctoral degree will not be awarded the Biostatistics-pathway M.P.H. until they are awarded their doctoral degree. All other prerequisites and required materials are the same for M.S., M.P.H., and Ph.D. applicants.

### Degree Requirements

In addition to meeting the minimum Graduate School requirements, students must also obtain a minimum grade point average of 3.00 in each of the biostatistics core courses (BIOST 514, BIOST 515, BIOST 524, BIOST 536, BIOST 537), a minimum cumulative GPA of 3.00 in non-biostatistics core courses (EPI 512, EPI 513, HSERV 511, ENV H 511, P BIO 511, and HSERV 510), and earn a minimum GPA of 2.70 in each non-biostatistics core course

63 credits, as follows:

- \* *Biostatistics core courses:* BIOST 514, BIOST 515 (8); BIOST 524 (3); BIOST 536, BIOST 537 (8); BIOST 580 (3); BIOST 590 (3); BIOST 700 (9). (Note: BIOST 514, BIOST 515, BIOST 524, BIOST 536, and BIOST 537 must be taken for a numerical grade.)
- \* *Non-biostatistics core courses:* EPI 512, EPI 513 (8); HSERV 511 (3); HSERV 510 (3-4); ENV H 511 (3); P BIO 511 (3). All non-biostatistics core courses must be taken for a numerical grade.
- \* *Biostatistics elective courses:* 6 credits of any approved biostatistics M.S. elective, or STAT 512 or STAT 513
- \* *Biostatistics M.P.H. practicum:* MPH students must also complete a practicum experience for 3 credits in an organization or agency that provides planning or services relevant to public health.

## Master of Science

### Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential M.S. students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (to include multivariate calculus), one course in linear algebra, and one course in probability theory.

## Degree Requirements

73 credits minimum, as follows:

- \* *Required courses:* BIOST 514 (4), BIOST 515 (4), BIOST 536 (4), BIOST 537 (4), BIOST 580 (\*, max. 9), STAT 512 (4), STAT 513 (4)
- \* *Elective credits:* 12 required elective credits must be taken, with at least 6 credits of elective courses with a methodology emphasis, and 6 credits of elective with a biology or public health emphasis (list provided).
- \* *Biostatistical consulting:* BIOST 590 (\*). Students must take BIOST 598 before or during the quarter in which they take BIOST 590.
- \* *Master's Thesis:* 18 credits of BIOST 700
- \* *Computer Proficiency:* The department requires a basic level of computing proficiency from all graduates, but encourages them to take the opportunity to gain greater expertise with a variety of computing tools. The computing proficiency requirement is met when a student writes and documents a computer program sophisticated enough to demonstrate the necessary basic competence in programming, or completes an approved programming course. The student's faculty advisor can approve the proficiency requirement or refer the matter to an ad hoc faculty committee for approval. Approved courses include STAT/BIOST 534, STAT/BIOST 535; CSE 142; and MEDED 531.

## Doctor of Philosophy

### Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential Ph.D. students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (to include multivariate calculus), one course in linear algebra, and one course in probability theory.

### Degree Requirements

Minimum 100 credits, as follows:

- \* *Required courses:* BIOST 514 (4); BIOST 515 (4); BIOST 533 (3); BIOST 570 (3); BIOST 571 (3); BIOST 580 (\*, max. 9); MATH 574, MATH 575, MATH 576 (3, 3, 3) or equivalent.; STAT 512, STAT 513 (4, 4); STAT 581, STAT 582, STAT 583 (3, 3, 3).
- \* Students must earn a minimum 3.0 grade in each of the required courses. At the faculty's discretion, qualifying exam performance may outweigh a course grade below the minimum. (Note: The minimum grade requirement for elective courses is 2.7.)
- \* *Elective credits:* 15 elective credits must be taken, consisting of at least 6 credits of elective courses with a methodology emphasis and 9 credits of elective with a biology or public health emphasis (list provided).
- \* In addition to the above courses, students in the Ph.D. program must complete 36 credits of BIOST 800, write a dissertation, complete a consulting class, and demonstrate proficiency in a computer language.
- \* If a Ph.D. student enrolls in STAT 512 and STAT 513, he or she must take the M.S. Theory Exam in the following June for advisory purposes. Ph.D. students must also take the Ph.D. Statistical Theory exam during the summer following enrollment in STAT 581, STAT 582, STAT 533 and the Ph.D. applied exam during the summer following enrollment in BIOST 571 and BIOST 572, or in BIOST 570 and BIOST 571, or if both STAT 581, STAT 582, STAT 583 and BIOST 570 and BIOST 571 are taken in the same year the student may elect to delay the Ph.D. applied exam by one year. If either exam is failed, it must be passed the following year.
- \* Students in the Ph.D. program must also complete a biology project, and pass the General and Final Examinations.
- \* *Computer Proficiency:* The department requires a basic level of computing proficiency from all graduates, but encourages them to take the opportunity to gain greater expertise with a variety of computing

tools. The computing proficiency requirement is met when a student writes and documents a computer program sophisticated enough to demonstrate the necessary basic competence in programming, or completes an approved programming course. Approved courses include: STAT/BIOST 534, STAT/BIOST 535; and CSE 142.

## Environmental and Occupational Health Sciences

F461 Health Sciences  
depts.washington.edu/envhlth

Environmental health focuses on identifying, evaluating, and controlling environmental conditions that may have an adverse impact on human health. Examples of problem areas requiring environmental health expertise are assuring adequate quality and quantity of food and drinking water, safe treatment and disposal of domestic and industrial waste materials, limiting or reducing air and noise pollution, limiting occupational exposure to hazardous substances and unsafe conditions, assuring safe and healthful housing, controlling the spread of insect- and rodent-borne illness, proper selection and use of pesticides, and understanding the effects of global changes in climate and the atmosphere on human health.

### Undergraduate Program

Adviser  
F461D Health Sciences, Box 357234  
206-543-4207  
ehug@u.washington.edu

The Department of Environmental and Occupational Health Sciences offers the following programs of study:

- \* The Bachelor of Science degree with a major in environmental health
- \* A minor in environmental health

### Bachelor of Science

*Suggested First- and Second-Year College Courses:* ECON 200; POL S 202; COM 220; STAT 220 or STAT 311.

### Department Admission Requirements

1. Admission to the major is competitive. Applicants must complete substantial prerequisite coursework (see below) and an application to be considered. Completing the prerequisites and submitting an application do not guarantee admission.
2. Applications are due the third Friday of autumn, winter, spring, and summer quarters. Applications can be downloaded from the Environmental Health Undergraduate Program Web site at <http://depts.washington.edu/ehug>. Prospective students should apply one quarter before they wish to enter the major; ideally, students enter the major by or before the beginning of their junior year.
3. Applicants must complete the following, with a minimum grade of 2.0 in each course, to be considered for admission:
  - a. Minimum cumulative GPA of 2.50
  - b. 5 credits of English composition
  - c. BIOL 180, BIOL 200, BIOL 220
  - d. CHEM 142, CHEM 152, CHEM 162
  - e. CHEM 237, CHEM 238, CHEM 239 (or CHEM 223, CHEM 224)
  - f. Either MATH 124 or MATH 144 or Q SCI 291 (MATH 112 does not satisfy this requirement)
4. The program manager, department advisers, and the chair evaluate applications based on overall GPA, grades in math, science, and composition courses; demonstrated writing ability; and stated reasons for applying to the major. Grades in chemistry, biology, math, and ENV H courses weigh heavily in the admission process.
5. Applicants are strongly encouraged to meet with the program manager before submitting an application.
6. Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Please consult the UW Equivalency Guide or a UW adviser to verify transferability of coursework.

### Major Requirements

85-98 credits, as follows:

1. *General Education and Basic Skills:* Completion of 10 credits in VLPA-designated courses and 10 credits in I&S-designated courses (of which 6 credits are specified under requirement 3), plus 7 credits in W-designated courses (of which 4 credits are specified under requirement 4).
2. PHYS 114, PHYS 115, PHYS 117, PHYS 118 (or PHYS 121 and PHYS 122). Completion of these courses prior to entering the program is recommended.
3. ENV H 311, ENV H 405, ENV H 431, ENV H 432, ENV H 433, ENV H 472, ENV H 482 (2 credits minimum), and two of the following: ENV H 440, ENV H 441, ENV H 445 (or ENV H 446), ENV H 490.
4. EPI 420, STAT 311 (or STAT 220 or Q SCI 381), T C 333, MICROM 301, MICROM 302.
5. 30 additional credits of approved electives.
6. Sufficient elective credits to reach a total of 180 credits.

### Minor

*Minor Requirements:* 29 credits as follows:

1. *Core Courses:* 14 credits of the following: ENV H 311, ENV H 405, EPI 420; STAT 200 or STAT 311.
2. *Approved Electives:* 15 credits of electives from the approved departmental list. See Web site or adviser for details.

### Student Outcomes and Opportunities

- \* *Instructional and Research Facilities:* The department houses thirteen centers and institutes and twenty labs.
- \* *Honors Options Available:* None offered.
- \* *Research, Internships, and Service Learning:* The department operates an internship program in cooperation with government agencies and private employers throughout the state. Each student intern works under the supervision of an experienced employee, with guidance from a faculty member. Internship placements are available throughout the year for variable amounts of academic credit.
- \* *Department Scholarships:* None offered.
- \* *Student Organizations/Associations:* UW Student Environmental Health Association

### Graduate Program

Graduate Program Coordinator  
F461 Health Sciences, Box 357234  
206-543-3199

The Department of Environmental & Occupational Health Sciences offers three graduate degrees: Master of Science, Master of Public Health, and Doctor of Philosophy. The areas of emphasis are environmental and occupational hygiene (Ph.D.) industrial hygiene and safety (M.S.), toxicology (Ph.D./M.S.), environmental health (M.S.), and occupational and environmental medicine or environmental and occupational health (M.P.H.).

The Ph.D. in Environmental and Occupational Hygiene option focuses on the assessment of exposures, health effects, and control strategies in community and work environments. The program emphasizes expertise in exposure assessment to evaluate human health risks from chemical, physical, and biological agents. Research opportunities include: laboratory and field investigations of environmental exposures and health outcomes; air, soil and water pollution monitoring; ambient, indoor, and personal exposure modeling; evaluation of biomechanical stress factors and organization of the work environment; development of new instruments, biomarkers, and novel methods for assessing human exposures; and evaluation of effective control strategies for the prevention or reduction of illness and injury.

The M.P.H. in Environmental and Occupational Health provides an opportunity for students to focus on the recognition, assessment, and control of environmental and occupational hazards, the impact of these hazards on health and society, and approaches to regulations, enforcement, and policy development. It emphasizes development of skills essential to science-based public health practice. In addition to coursework, students complete a field practicum and research in any of the department's research facilities or in a field setting.

The M.P.H. in Occupational and Environmental Medicine is for individuals with an earned doctorate. The goal of the program is to provide training in the public health sciences with a focus on occupational and environmental health. The program provides didactic instruction and participation in field studies. Research efforts focus on understanding, preventing, and managing environmental and occupational disease, injury, and disability. Physicians also have the option of applying for a concurrent fellowship or residency in occupational and environmental medicine.

The concurrent M.P.H./M.P.A. or M.S./M.P.A. degree programs with the Daniel J. Evans School of Public Affairs seek to educate students who bring substantive public health knowledge and a strong policy and management orientation to their professional careers. With several courses that satisfy degree requirements in both programs, students are able to earn the two degrees in a shorter period of time than if the degrees were taken separately. Applicants must apply to both programs.

## Admission Requirements

Prerequisites for admission to the M.S. industrial hygiene and safety, toxicology, and environmental health programs and the M.P.H. environmental and occupational health program include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors are considered if the prerequisite courses have been completed. Competitive applicants typically have strong grades and Graduate Record Examination scores, a statement of personal goals consistent with the program, and supportive letters of reference.

Prerequisites for admission to the M.P.H. Occupational and Environmental Medicine program include a doctoral degree (M.D., D.O. or equivalent) with prior coursework in physics, chemistry, calculus, and biology. Concurrent residency applicants must satisfy additional prerequisites including graduation from a Class A medical school (U.S., Canada, or equivalent) and completion of one year of approved internship. Three years in primary care specialty is also encouraged.

Prerequisites for admission to the Ph.D. environmental and occupational hygiene and toxicology programs include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. A master's degree in a related field is recommended for Ph.D. environmental and occupational hygiene applicants. Selection of an applicant is also based upon an honors-level GPA, a statement of personal goals consistent with the program, supportive letters of reference, and high scores on the Graduate Record Examination.

International applicants are also required to submit official scores for the Test of English as a Foreign Language (TOEFL). TOEFL scores of 580 (237 computer) or higher are required for admission to the M.S., M.P.H., and Ph.D. programs.

## Master of Public Health

### Degree Requirements

63 credits, as follows:

- \* *Core Requirements:* EPI 511 (or EPI 512, EPI 513), BOST 511 (or BOST 517), M.P.H./M.P.A. students are also required to take BOST 512 (or BOST 518), HSERV 510, and HSERV 511.
- \* *Required Courses:* ENV H 405 (or ENV H 514, ENV H 515, and ENV H 516), ENV H 453 (or ENV H 553 or ENV H 564), ENV H 570, ENV H 577 (or ENV H 472 or ENV H 543), ENV H 446 (or ENV H 490, or ENV H 541, or ENV H 545, or ENV H 552). Courses in environmental health not chosen can be taken as electives.
- \* *Electives*
  - o *Thesis Track:* At least two additional 400- or 500-level departmental courses (minimum 6 credits).
  - o *Project Track:* At least four additional 400- or 500-level departmental courses (minimum 9 credits).
- \* *Practicum:* ENV H 599
- \* *Degree Project:*
  - o *Thesis Track:* ENV H 700
  - o *Project Track:* ENV H 598

## Master of Science, Environmental Health

### Degree Requirements

64 credits, as follows:

- \* *Core Courses:* ENV H 580, ENV H 581, ENV H 583, ENV H 700, BOST 511 (or BOST 517 or higher), EPI 511
- \* *Required Courses:* ENV H 405, ENV H 453, ENV H 541, ENV H 543 (or ENV H 577), ENV H 552, ENV H 594, ENV H 445 (or ENV H 446), ENV H 490, ENV H 545
- \* *Representative Electives:* 9 graded elective credits, approved by the student's academic adviser.

## Master of Science, Industrial Hygiene

### Degree Requirements

62 credits, as follows:

- \* *Core Courses:* ENV H 580, ENV H 581, ENV H 583, ENV H 700, BOST 511 (or BOST 517, or higher), EPI 511. Higher level biostatistics and epidemiology courses can be substituted for BOST 511 or BOST 517, and for EPI 511.
- \* *Required Courses:* ENV H 405, ENV H 553, ENV H 555, ENV H 557, ENV H 560, ENV H 564, BOST 512 (or BOST 518, or higher level), ENV H 552 (or ENV H 570). If both ENV H 552 and ENV H 570 are taken, one can be used toward the 12 elective credits (see below).
- \* *Electives:* 12 or more credits from the list below, in consultation with the program director or adviser. If both ENV H 552 and ENV H 570 (above) are taken, one may count toward required elective credits. Courses include ENV H 417, ENV H 446, ENV H 457, ENV H 556, ENV H 559, ENV H 562, ENV H 566, ENV H 584, ENV H 596 (taken winter quarter).

## Master of Science, Safety and Ergonomics

### Degree Requirements

62 credits, as follows:

- \* *Core Courses:* ENV H 580, ENV H 581, ENV H 583, ENV H 700, BOST 511 (or BOST 517, or higher), EPI 511. (Higher level biostatistics and epidemiology courses can be substituted for BOST 511 or BOST 517, and for EPI 511.)
- \* *Required Courses:* ENV H 405, ENV H 553, ENV H 560, ENV H 562, ENV H 564, ENV H 566, ENV H 596, BOST 512 (or BOST 518). (Higher level biostatistics courses can be substituted for BOST 512 or BOST 518). IND E/ENV H 537, MGMT 300.
- \* *Representative Electives:* ENV H 457, ENV H 512, ENV H 555, ENV H 557, ENV H 559, ENV H 569, ENV H 570, ENV H 572, ENV H 584, T C 517, UCONJ 420.

## Master of Science, Toxicology

### Degree Requirements

63 credits, as follows:

- \* *Core Courses:* ENV H 580, ENV H 581, ENV H 583, ENV H 700, BOST 511 (or BOST 517, or higher), EPI 511.
- \* *Required Courses:* ENV H 514, ENV H 515, ENV H 516, ENV H 552, ENV H 577, BIOC 405, BIOC 406 (or BIOC 440, BIOC 441, BIOC 442), ENV H course in industrial hygiene or occupational medicine).
- \* *Representative Electives:* Toxicology students who take the two-quarter biochemistry series (BIOC 405, BIOC 406) must have an additional 9 graded elective credits. Students who choose the three-quarter biochemistry series (BIOC 440, BIOC 441, BIOC 442) must have an additional 3 graded elective credits. Electives must be approved by the student's academic adviser. Electives may include ENV H 511, ENV H 512, ENV H 531, ENV H 532, ENV H 533, ENV H 535, ENV H 550, ENV H 553, ENV H 555, ENV H 567, ENV H 570, ENV H 582, ENV H 584, ENV H 591, BIOL 403, BIOL 411, BOST 521, C MED 407, MICROM 441, MICROM 442, MICROM 518, PATH 444, PATH 555, P BIO 500-level courses, P BIO 405, P BIO 406, P BIO 507, PEDS 512, PHCOL 401, PHCOL 402, PHCOL 403, PHCOL 527.

## Doctor of Philosophy, Environmental and Occupational Hygiene

### Degree Requirements

90 credits minimum, as follows:

- \* *Core Sciences (11-12 credits)*: Sequence of three courses in one area, to be approved by adviser.
- \* *Biostatistics (3 credits)*: BHOST 512 (or BHOST518 or higher)
- \* *Epidemiology (4 credits)*: EPI 511 (or higher)
- \* *Environmental and Occupational Health Seminar (6 credits)*: ENV H 580
- \* *Dissertation (27 credits)*: ENV H 800
- \* *Lab Rotations (6-9 credits)*: ENV H 595
- \* *Required courses*:
  - o *Industrial Hygiene (6 credits)*: ENV H 553 and ENV H 555
  - o *Toxicology (3 credits)*: ENV H 405 (or more advanced)
  - o *Environmental Chemistry (3 credits)*: ENV H 552
  - o *Occupational and Environmental Epidemiology (3 credits)*: ENV H 570
  - o *Electives (20 credits)*: 10 elective credits are unspecified and 10 must be in courses taught by Industrial Hygiene or Environmental Health program faculty.

## Doctor of Philosophy, Toxicology

### Degree Requirements

90 credits minimum, as follows:

- \* *Core Sciences (11-12 credits)*: Sequence of three courses in one area, to be approved by adviser.
- \* *Biostatistics (3 credits)*: BHOST 512 (or BHOST518 or higher)
- \* *Epidemiology (4 credits)*: EPI 511 (or higher)
- \* *Environmental and Occupational Health Seminar (6 credits)*: ENV H 580
- \* *Dissertation (27 credits)*: ENV H 800
- \* *Lab Rotations (6-9 credits)*: ENV H 595
- \* *Required courses*:
  - o *Toxicology (9 credits)*: ENV H 514, ENV H 515, ENV H 516
  - o *Toxicology Seminar (9 credits)*: Of the 9 credits (minimum) of current topics courses, at least six credits must be in ENV H 591. The other credits can be chosen among other current topics courses offered by the Department of Environmental Health or other departments, with approval of student's advisory committee.
  - o *Advanced Toxicology*: 6 credits from approved list
  - o *Physiology*: 3 credits from approved list
  - o *Electives (20 credits)*: 10 elective credits are unspecified and 10 must be in courses taught by Industrial Hygiene or Environmental Health program faculty.

## Financial Aid

Support is available for many students in the form of traineeships or research assistantships, which include tuition. This support comes from federal and private sources awarded to the department or School.

## Research Facilities

Specialized laboratories exist for research in industrial hygiene chemistry, optical remote sensing of chemicals, industrial ventilation, ergonomics, trace organics and heavy metals, environmental microbiology, electron microscopy, controlled exposure to environmental agents, and toxicology (including toxicogenomics and analytical cytology). Field research is facilitated through an extensive consultation-service program conducted by this department for labor and industry in Washington state.

## Epidemiology

depts.washington.edu/epidem

## Graduate Program

Graduate Program Coordinator  
F262 Health Sciences, Box 357236  
206-685-1762 or 206-543-8226  
epi@u.washington.edu

The Department of Epidemiology offers three graduate degrees -- Doctor of Philosophy, Master of Science, and Master of Public Health -- for individuals intending to become academicians, highly qualified research specialists, or well-trained public health practitioners, respectively. The Department also offers a number of degree tracks within the degree programs, as well as several graduate certificates.

The Master of Public Health degree requires coursework in health services and environmental health, in addition to epidemiology and biostatistics, as well as a thesis and a practicum as preparation for a career in public health practice or as a prelude to the Doctor of Philosophy program. Three tracks are available: the General Track, which is selected by most students; the Maternal and Child Health Track (MCH); and the Global Health Track (GH). The MCH and GH tracks require coursework in the respective specialty areas in addition to the requirements of the General Track. Applicants may choose to apply to two additional specialized programs: Public Health Nutrition and Public Health Genetics.

Formal concurrent degree programs involving the M.P.H. (Epidemiology) include the following: Doctor of Medicine (M.D.), Master of Arts in International Studies (M.A.I.S.), and Master of Public Affairs (M.P.A.). An informal concurrent degree program involving the M.P.H., M.S., or Ph.D. in Epidemiology and another graduate degree at the UW may be pursued with the permission of both departments.

The Master of Science degree requires concentration on courses and research in epidemiology and biostatistics as preparation for a research specialization or as a prelude to the Doctor of Philosophy program. It also requires electives from the School of Public Health and Community Medicine. Two tracks are available, the General Track and the Clinical Research Track. Applicants also may choose to apply for an M.S. in Genetic Epidemiology.

The Ph.D. course requirements differ from the M.S. program requirements primarily in the scope and complexity of research for the dissertation. Coursework includes a core series in epidemiology and biostatistics. Electives in substantive disease and exposure areas, as well as research methods, are required. Requisite general electives from the School of Public Health are also part of the curriculum. M.D. students at the UW may apply for formal concurrent M.D. and Ph.D. degrees.

The Department offers several graduate certificate programs open to any qualified graduate student at the University. Some certificate programs are open to Graduate Non-Matriculated students, as indicated on the certificate Web sites. They offer specialization in the following specific areas:

- \* Advanced Clinical Research Methods
- \* Basic Clinical Research Methods
- \* Global Health
- \* Maternal and Child Health
- \* Public Health Genetics
- \* HIV and Sexually Transmitted Infections

## Admission Requirements for All Degrees

Admission to all graduate programs is highly competitive and is based on the following:

1. Background in epidemiology or other health-related fields (such as medicine, health or biological sciences, mathematics, quantitative social sciences), including prior areas of study and work experience
2. Undergraduate and graduate grades (if applicable)
3. GRE scores (except for master's degree applicants with a prior doctorate from a U.S. university, M.D./M.P.H. applicants, and M.D./Ph.D. applicants funded by the Medical Scientist Training Program)
4. TOEFL or IELTS score from international applicants
5. Letters of reference

## Master of Public Health

### Degree Requirements

Minimum 63 credits, as follows:

1. 27 to 38 course credits
2. *Core Courses*: 21 or 22 graded credits, including EPI 512 (4), EPI 513 (4), BHOST 511 (4), HSERV 510 (3), HSERV 511 (3), and
3. One of the following environmental health courses: ENV H 511 (3), ENV H 517 (3), ENV H 577 (3/4), ENV H 584 (3)

4. *Electives*: 6 credits of EPI course electives of 2 or more credits each (EPI 514 recommended; contact program for acceptable courses.)
5. 3 to 6 credits (120 to 240 hours) in a field-based practicum (EPI 595)
6. 9 to 18 thesis (EPI 700) credits
7. Students may enroll in additional elective courses in epidemiology and other relevant departments and for independent study (EPI 600) to bring the total to 63 credits. Relevant 400-level coursework may count toward the total. Coursework unrelated to health and at the 300-level or below does not count toward the degree.

*M.P.H. Specialized Program Options*: The M.P.H. degree offers specialized tracks as listed below. They have additional admission and course requirements detailed at the program Web sites.

- \* Global Health
- \* Maternal and Child Health

The following two tracks are officially under the Epidemiology Department, but have different application procedures and requirements.

- \* Public Health Nutrition
- \* Public Health Genetics

## Master of Science

### Degree Requirements

60 credits, to include:

- \* 28 to 42 course credits
- \* *Core Courses*: 24 graded credits, including EPI 512 (4), EPI 513 (4), EPI 514 (4), BIOST 511 (4), BIOST 512 (4), BIOST 513 (4)
- \* *Electives*: Two EPI courses of at least 2 credits each
- \* *School of Public Health Electives*: Two additional courses (2 or more credits each) in any department of the School of Public Health and Community Medicine (including Epidemiology) or other University of Washington courses related to the biological, physical, or social/behavioral factors that affect health.
- \* Contact program for acceptable elective courses.
- \* 9 to 18 thesis credits (EPI 700)
- \* Students may also enroll in additional elective courses in epidemiology, independent study (EPI 600) and in other relevant departments for a total of 60 credits. Relevant 400-level coursework may count toward the total. Coursework unrelated to health and at the 300-level or below does not count toward the degree.

*M.S. Clinical Research Track*: The Clinical Research Track in Epidemiology is chiefly intended for professionals who have already completed clinical training and who plan to conduct research with patients in health care settings as a significant part of their future career. For specific coursework requirements, visit the program Web site.

The Genetic Epidemiology track is officially under the Epidemiology Department, but has different application procedures and requirements. See the following Web site: [http://depts.washington.edu/phgen/degreeprograms/MSGGE\\_degree.shtml](http://depts.washington.edu/phgen/degreeprograms/MSGGE_degree.shtml).

## Doctor of Philosophy

### Admission Requirements

Admission requirements specific to the Ph.D

- \* Admission requirements listed here are in addition to the admission requirements for all degrees listed above.
- \* U.S. master's degree in epidemiology or other health-related field, including mathematics and quantitative social sciences. For information about conditions for very rare exceptions to the U.S. master's requirement, see [http://http://depts.washington.edu/epidem/adm/online\\_submission.shtml#phd](http://http://depts.washington.edu/epidem/adm/online_submission.shtml#phd).
- \* Applicants do not need to locate faculty mentors in advance in order to be admitted.

### Degree Requirements

Minimum of 90 total credits, to include:

- \* The minimum credit requirement may be reduced to 60 for students with a prior relevant master's degree.
- \* 30 to 49 course credits

- \* *Core Courses*: 28 graded credits including EPI 512 (4), EPI 513 (4), EPI 514 (4), EPI 536 (4) EPI 537 (4), BIOST 517 (4), BIOST 518 (4)
- \* Three quarters of EPI 584 (1 credit each, maximum 3)
- \* *Minimum required electives (minimum 2 credits each)*: One course in infectious disease epidemiology; two courses in advanced epidemiologic methods or non-infectious disease epidemiology; and three additional courses in any department of the School of Public Health and Community Medicine (including Epidemiology) or other University courses related to the biological, physical or social/behavioral factors that affect health.
- \* Contact program for acceptable elective courses.
- \* Students are encouraged to take EPI 583 (1) each quarter of the first year, and to take EPI 591 (1) each quarter after the first year.
- \* The student's Supervisory Committee may require additional courses to ensure that the student has adequate training in the area of epidemiology that the he or she is pursuing.
- \* *Dissertation*: 27 credits of EPI 800
- \* Additional epidemiology courses, as well as courses offered by other departments or schools, may be taken depending on the student's area of interest and prior academic background. Relevant 400-level coursework may count toward the total credits. Coursework unrelated to health and at the 300-level or below does not count toward the degree.
- \* Students may also enroll in additional EPI 800 or EPI 600 to reach the total credits required.

## Financial Aid

Research assistantships for work on various projects provide salary and tuition waivers for students working 20 hours/week. (Although funding is not guaranteed with admission, most students find a research assistantship before the start of Autumn Quarter.) Research training stipends with partial tuition support are available on a limited basis, especially for more advanced doctoral students. Teaching Assistantships are available competitively for second year and higher-level students.

## Research Facilities

University facilities include well-equipped laboratories, an excellent library system, and access to computers. Various opportunities for field research are provided in Seattle and elsewhere in the state, including Children's Hospital and Regional Medical Center, Fred Hutchinson Cancer Research Center, Group Health's Center for Health Studies, Harborview Medical Center, the Center for AIDS and STD, Public Health: Seattle-King County, Washington State Department of Health, VA Puget Sound Health Care Systems and many other local health institutions. Consult the program Web site under "Affiliated Institutions" for an additional, but not exhaustive, list.

## Health Services

H668 Health Sciences  
depts.washington.edu/hserv

Health information management professionals serve the healthcare industry and the public by managing, analyzing, and utilizing data vital for patient care. From paper and electronic health records to health informatics, maintaining access, quality, and privacy of patients' test results, diagnoses, prescriptions, and treatments is core to this discipline. Health information management standards and policies also assure data is accessible for accurate patient billing and reimbursement, optimal health services utilization, public health reporting, and research.

## Undergraduate Program

Adviser  
1100 NE 45th Street, Suite 405, Box 354943  
206-543-8810  
hhim@u.washington.edu

The program in Health Informatics and Health Information Management (HIHM) offers both a postbaccalaureate certificate and a Bachelor of Science degree (Evening Degree Program).

Health information management professionals serve the healthcare industry and the public by managing, analyzing, and utilizing data vital for patient care. From paper and electronic health records to health informatics, maintaining access, quality, and privacy of patients' test results, diagnoses, prescriptions, and treatments is core to this discipline.

Health information management standards and policies also assure data is accessible for accurate patient billing and reimbursement, optimal health services utilization, public health reporting, and research.

The program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education, in cooperation with the American Health Information Management Association (AHIMA). Students acquire a sound background in health data systems, organizational theory, computer systems in health care, health information systems analysis, management theory and application, quality assurance theory and application, and finance and legal issues. Upon completion of this program, students are eligible to take the national certification examination for Registered Health Information Administrator.

## Health Informatics and Health Information Management Postbaccalaureate Certificate

### Admission Requirements

Applicants must hold a baccalaureate degree from an accredited college or university with a minimum GPA of 2.50. They must also have taken courses in, or have the requisite knowledge and skills pertaining to, the following: human anatomy and physiology (laboratory course); pathophysiology; introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; principles of management; statistics (any discipline); and medical terminology.

### Certificate Requirements

55 credits as follows:

1. HIHIM 409 (4,4), HIHIM 410 (6), HIHIM 412 (5), HIHIM 420 (5), HIHIM 421 (5), HIHIM 450 (3), HIHIM 454 (4), HIHIM 455 (5), HIHIM 456 (5), HIHIM 460 (3), HIHIM 462 (3), HIHIM 470 (3), HIHIM 480 (4).
2. The program may be completed in either one or two academic years.

For current information, please visit the Health Informatics and Health Information Management Web site.

## Bachelor of Science

### Health Informatics and Health Information Management Major

*Suggested First- and Second-Year College Courses:* Human anatomy and physiology (laboratory course); pathophysiology; introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; principles of management; statistics (any discipline); English composition; and medical terminology.

### Department Admission Requirements

1. Admission to UW Evening Degree Program for summer quarter of planned entry to Health Informatics and Health Information Management (HIHIM)
2. Minimum 90 transferable credits.
3. Completion of the following prerequisites (With the exception of medical terminology, prerequisite courses may be taken at the UW or elsewhere):
  - a. *Statistics (one of the following):* STAT 220, STAT 311, QMETH 201, PSYCH 315, EDPSY 490, or equivalent. (4-5 credits)
  - b. *Anatomy and physiology with laboratory:* BIOL 118 and BIOL 119, or equivalent (6 credits)
  - c. *Management:* MGMT 300, or equivalent (4 credits)
  - d. *Computer applications and information technology:* CSE 100, INFO 100, or equivalent (5 credits)
  - e. *Medical terminology:* Not offered at UW. Available at various community colleges (3-5 credits)
4. *Grades:* Minimum cumulative GPA of 2.50. Minimum cumulative GPA of 2.50 in prerequisite coursework. Minimum 2.0 grade in each prerequisite course.
5. Prerequisites must be completed prior to admission, with the following exception: A maximum of one (1) prerequisite course may be in progress during summer quarter. Applicant must include written petition with HIHIM application. Applicant may be considered for conditional admission. Offer of admission to HIHIM is withdrawn if prerequisite is not completed by the end of summer quarter or if prerequisite grade requirement is not met.

6. Admission is once a year, for summer quarter. Admission is competitive; completion of admission requirements guarantees consideration but not acceptance. Application deadline for each year is April 15. The academic summer schedule begins with an introductory course and an optional independent study course.

### Program Requirements

1. *General Education Requirements*
  - a. *English Composition and Additional Writing (15 credits):* English composition (5 credits); additional writing (W courses) (10 credits)
  - b. *Quantitative and Symbolic Reasoning (4-5 credits):* Depending on course taken, may be satisfied by the statistics prerequisite requirement.
  - c. *Areas of Knowledge (60 credits):* Minimum 20 credits each in Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Natural World (NW). (BIOL 118 and BIOL 119 may count toward both the prerequisite and NW requirements.)
2. *Program Requirements (57 credits)*
  - a. *Disease concepts (4 credits):* HIHIM 409
  - b. *Information systems (16 credits):* HIHIM 410, HIHIM 420, HIHIM 421
  - c. *Coding and vocabulary (5 credits):* HIHIM 412
  - d. *Management (24 credits):* HIHIM 450, HIHIM 454, HIHIM 455, HIHIM 456, HIHIM 470, HIHIM 480
  - e. *Internships and projects (8 credits):* HIHIM 460, HIHIM 462, HIHIM 499
3. Additional electives to complete minimum of 180 credits required for a degree.

For current information, visit the Health Informatics and Health Information Management Web site.

## General Studies Major

The general studies major allows undergraduate students to create an interdisciplinary, individually designed program of study in public health. The student identifies public health as a central organizing theme and designs the course of study under the guidance and supervision of at least two faculty members and a general studies adviser. The general studies major usually requires 50-70 credits, many of which come from the courses required for the public health minor. A complete description of the general studies major can be found in the Arts and Sciences section of this catalog.

## Minor

The public health minor includes the study of historical and contemporary issues in public health including social and behavioral determinants of health, the geography of health and illness, the etiology of infectious and chronic diseases, the relationship between environmental factors and health, and access to health care and modes of delivery of health services.

*Minor Requirements:* 30 credits, including 20 credits of required courses and 10 credits of electives. Required courses include: BIOST 111 (1); ENVH 311 (3); EPI 420 (3); GEOG 280 (5); HSERV 480A (3); MHE 417 (3); PABIO 201 (2). Electives may be taken from the following courses or an approved substitute: ANTH 375 (3); ANTH 475 (5); ANTH 476 (5); ANTH 477 (3); GEOG 380 (4); HSERV 480B (1-3, max. 6); HSERV 480C (1-3, max. 6); MHE 474/PHIL 411 (5); MHE 481 (3); NUTR 300 (3); PSYCH 451 (5); SOC 212 (5); SOC 331 (5); STAT 311 (5); UCONJ 490 (3); UCONJ 497 (3).

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The bachelor's degree program is designed to prepare individuals for careers in the management and use of health care information, and prepares students for the Registered Health Information Administrator (R.H.I.A.) national certifying examination of the American Health Information Management Association. The program gives students the tools to work in a wide variety of health care positions upon graduation, including health information management, health informatics with emphasis on electronic health records, health care quality improvement, decision support analysis, research, health insurance, and consulting. Graduates pass a national credential examination, with a majority working within the health information management field.
- \* *Instructional and Research Facilities:* None.
- \* *Honors Options Available:* None.
- \* *Research, Internships, and Service Learning:* Students complete two internships, one of which is the capstone project.

- \* *Department Scholarships:* None.
- \* *Student Organizations/Associations:* Students are invited to join the health information management professional association at reduced rates.

## Graduate Program

Graduate Program Coordinator  
H673 Health Sciences, Box 357660  
206-616-2926  
hservmph@u.washington.edu

The Department of Health Services offers a two-year graduate program in health services leading to the Master of Public Health or Master of Science degree. The M.P.H. degree prepares future health practitioners, managers, and researchers to conduct the unfinished work of improving the well-being of communities in the United States and throughout the world. Graduates take jobs in health system management, health program design and evaluation, health promotion, public health practice, and policy analysis. Among other options, the department offers an M.P.H. in community-oriented public health practice (C-O.P.H.P.) This program uses problem-based learning methods, and integrates classroom instruction and experiential fieldwork to prepare students to work in community and public health practice settings. Students may also pursue any of the M.P.H. specialty options. The department also offers a three-year extended degree program in community-health management, leading to the M.P.H. degree for employed professionals working full-time.

The department also maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). In addition, an executive version of the traditional M.H.A. degree, designed for mid-career health care professionals, is offered. The M.H.A. degree provides full academic preparation for careers in management and policy positions in health systems, hospitals, medical groups, health plans and other types of health care organizations.

The department offers a Ph.D. in health services and participates in the training of doctoral fellows.

## Master of Public Health

For current listings of M.P.H. options and their requirements, please visit the program Web site.

### Admission Requirements

1. One set of official transcripts from all institutions of higher learning attended
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree (e.g., M.D., Ph.D., J.D.) from a U.S. institution of higher learning)
3. Test of English as a Foreign Language (TOEFL) scores, if applicable.
4. Admission application
5. Applicant's statement, including a description of the applicant's professional background, career goals, and the educational objectives which the applicant expects to meet while completing the program
6. Three recent letters of recommendation, preferably from former supervisors and teachers.
7. An in-person or telephone interview with a Health Services faculty person is highly recommended, but not required

### Degree Requirements, Community-Oriented Public Health Practice Track

63 credits, as follows:

1. Problem-based learning (PBL) core curriculum - 36 credits
2. Integrated fieldwork - 6 credits (first year)
3. Seminars - 6 credits
4. Capstone project - 9 credits (second year)
5. Electives - 6 credits from School of Public Health and Community Medicine and other schools/colleges at the UW, as appropriate

## Degree Requirements, Health Policy and Research Option

Minimum 63 credits, to include:

- \* At least 30 credits be from graduate-level courses
- \* At least 18 credits from graduate-level Health Services courses
- \* *Coursework:*
  1. Either BIOST 511 (4) or BOST 517 (4)
  2. One of the following: ENV H 511 (3), ENV H 517 (3), ENV H 570 (3), ENV H 577 (3-4), or ENV H 584 (3)
  3. Either EPI 511 (4) or EPI 512/EPI 513 (4/4)
  4. HSERV 511 (3-4)
  5. HSMGMT 560 (4), HSERV 510 (3)
  6. HSERV 592 (1-6, max. 6) for each quarter in residence
  7. 3 credits of practicum: HSERV 595 (3-6, max. 6)
  8. 9 credits of thesis: HSERV 700
  9. Remaining credits as electives

## Degree Requirements, International Health Option

The department no longer offers this option. Please see the Global Health program.

## Degree Requirements, Maternal and Child Health Option

Minimum 69 credits, to include:

1. HSERV 510 (3), HSERV 511 (3/4), HSERV 541 (3), HSERV 542 (4)
2. Either HSERV 527 (4), HSERV 581 (4), EPI 514 (4), HSERV 543(3), or HSERV 561 (3)
3. HSMGMT 560 (4)
4. One of the following environmental health classes: ENV H 511 (3), ENV H 517 (3), ENV H 570 (3), ENV H 577 (3/4), or ENV H 584 (3)
5. Either EPI 511 (3/4) or both EPI 512 (4) and EPI 513 (4)
6. Either BOST 511 (4) or BOST 517 (4); either BOST 512 (4) or BOST 518 (4)
7. HSERV 592 (1 credit for each of six quarters)
8. *Practicum:* HSERV 595 (3-6, max. 6)
9. *Thesis:* HSERV 700 (9)

## Degree Requirements, Social and Behavioral Sciences Option

Minimum 63 credits, to include:

1. The MPH in Health Services SBS track requires the following specific courses:
  - a. HSERV 511 (4), HSMGMT 560 (4), BOST 511 (4)
  - b. One of the following: ENV H 511 (3), ENV H 517 (3), ENV H 570 (3), ENV H 577 (3/4), or ENV H 584 (3)
  - c. Either EPI 511 (3/4), or EPI 512 and EPI 513 (4, 4) (recommended)
  - d. HSERV 510 (3)
  - e. HSERV 592 (1-6, max. 6; six quarters total required)
  - f. BOST 512 (4) (may be replaced with BOST 517 by advanced students with the permission of their adviser)
  - g. Designated Health Services methods course to support thesis research
  - h. One of the following: HSERV 507 (3), HSERV 513 (3), HSERV 580 (3), HSERV 581 (4), HSERV 582 (3/4), HSERV 586 (3), HSERV 588 (3), or HSMGMT 514 (3/4)
2. At least 18 credit hours in 500-level Health Services classroom courses. HSERV and HSMGMT courses listed above count toward this requirement, but independent study does not. SBS Seminar does count towards this requirement.
3. At least 30 credits in graduate-level classroom courses in the School of Public Health and Community Medicine, or in other schools at the University if approved by the student's advisor.
4. HSERV 595 (3-6, max. 6)
5. HSERV 700, master's thesis (9)

## Master of Health Administration

For the most current information, please visit the M.H.A. program Web site.

### Admission Requirements

- \* A baccalaureate degree from an accredited university
- \* Minimum GPA of 3.00 in the last 90 graded credits
- \* GRE scores

## Degree Requirements

79 credits, as follows:

- \* *Year One Required Courses:* ACCTG 503 (4); HSERV 511 (4); either HSERV 587 (3) or HSMGMT 514 (4), HSMGMT 501 (3); HSMGMT 513 (4); HSMGMT 523 (3); HSMGMT 560 (3); HSMGMT 571 (4); 12 credits of HSMGMT 590 (1-6, max. 12); 4 credits of HSMGMT 592 (2, 2)
- \* *Year Two Required Courses:* Either HSERV 551 (3), HSERV 552 (3), or HSERV 553 (2-3); HSMGMT 500 (3), HSMGMT 502 (3), HSMGMT 545 (4), HSMGMT 562 (4), and MHE 523 (3).

## Master of Science, Health Care and Population Health

### Admission Requirements

For the most current information, please visit the M.S. program Web site.

1. One set of official transcripts from all institutions of higher learning
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)
3. Test of English as a Foreign Language (TOEFL) scores, if applicable.
4. Admission application
5. Applicant's statement, including a description of the applicant's professional background, career goals, and the educational objectives which the applicant expects to meet while completing the program
6. Three recent letters of recommendation, preferably from former supervisors and teachers.
7. An in-person or telephone interview with a Health Services faculty person is highly recommended

### Degree Requirements

Minimum 63 credits, to include:

1. Either HSERV 511 (3/4) or HSERV 512 (3)
2. Either HSERV 587 (3), HSMGMT 513 (4), or HSMGMT 514 (3)
3. EPI 512 (4), EPI 513 (4)
4. Either BOST 511, BOST 512, BOST 513 (4, 4, 4), or BOST 517, BOST 518 (4, 4)
5. Two of the following: HSERV 522 (4), HSERV 523 (4), HSERV 524 (4), HSERV 525 (4), HSERV 526 (4), HSERV 527 (4), HSERV 539 (3/4), HSERV 583 (3), HSERV 584 (3), or HSERV 586 (3)
6. Three quarters of HSERV 592 (1-6, max. 6)
7. 9 credits of HSERV 700

## Doctor of Philosophy

For the most current information, please visit the Ph.D. program Web site.

### Admission Requirements

Admission priority is given to applicants who have graduated from a master's program with high academic standing. Students with only a bachelor's degree with health services research experience are occasionally admitted. Generally these students are admitted to the master of science program and then may be admitted to the doctoral program.

Applicants who have a bachelor's, master's, or professional degree in a field related to health services are given preference over applicants who do not have such experience.

Applicants with research experience and publications are typically rated more highly.

Students admitted to the program generally have GRE scores in or above the 80th percentile.

International applicants must submit the results of the Test of English as a Foreign Language (TOEFL), unless they are a citizen of Australia, Canada, Ireland, New Zealand, or the United Kingdom, or have earned a bachelor's or higher degree from the United States or one of the countries listed above. A minimum score of 580 (paper based) or 237 (computer based) on the TOEFL is required to be considered for admission to the UW.

## Degree Requirements

100 credits minimum, as follows:

- \* *Required core competencies (35 credits):* HSERV 512 (3), HSERV 513 (3), HSERV 514 (3); HSERV 523 (4), HSERV 524 (4), HSERV 525 (4); one of the following: HSMGMT 514 (3), HSERV 587 (3), or ECON 500 (3); HSERV 522 (3); BOST 517 (4), BOST 518 (4) (or BOST 511, BOST 512, BOST 513 (4, 4, 4) or BOST 514, BOST 515 (4, 4); EPI 512 (4), EPI 513 (4)
- \* *Area of emphasis:* Five courses or 15 credits in an area of emphasis. Suggested areas of emphasis are as follows:
  - o Economics or Finance
  - o Health Behavior and Health Promotion
  - o Occupational Health
  - o Cancer Prevention and Control
  - o Evaluation Sciences
  - o Population Health and Social Determinants
  - o Global Health
  - o Maternal and Child Health
  - o Sociology/Demography
  - o Bioinformatics
  - o *Customized area of emphasis:* The specific courses to be taken are selected by the student and the adviser based on the student's past coursework, experience, proposed dissertation topic, and future career goals.
- \* Doctoral courses in advanced theory and methods in health services (50 credits including a minimum of 30 dissertation credits)
- \* Written preliminary examination
- \* Written and oral General Examinations
- \* Dissertation
- \* Dissertation defense (Final Examination)

## Financial Aid

Every attempt is made to ensure that students admitted are not prevented from pursuing graduate studies due to inadequate finances. Some fellowships, assistantships, scholarships, and loans are available each year.

## Research Facilities

In addition to using University facilities, the program has extensive links with community health-care delivery systems and agencies for research and training.

## Extended M.P.H.

Graduate Program Coordinator  
H674 Health Sciences, Box 357660  
206-685-7580

For the most current information, visit the Extended M.P.H. program Web site.

The Extended M.P.H. Degree Program is a part-time, partial distance learning program delivered through a combination of intensive four-week summer sessions on the University campus, directed independent study, and four intensive weekend seminars during the academic year. The program is designed for mid-career public and community health professionals with three or more years of experience related to public health. The program provides knowledge and skills required at mid- and upper-level practice and management positions for health professionals. In addition to the core courses in health services, epidemiology, biostatistics, and environmental health, the prescribed coursework includes a broad exposure to the health-care system plus specific management training in budgets, finance, personnel management, economics, organization theory, and program planning and evaluation. Pathways are available in health education, maternal and child health, public health practice, and oral health.

The Extended M.P.H. Degree Program provides training in developing skills in the scientific base of public health, analytic methods, management and communication, and policy and advocacy, as well as training in cross-cutting issues. Graduates apply their skills directly to their careers.

### Admission Requirements

1. Current employment in a public health related agency preferred
2. Minimum three years experience in community, public, or environmental health-related field

3. Baccalaureate degree from an accredited college or university
4. Minimum 3.00 GPA in the last graded 90 quarter/60 semester hours
5. Graduate Record Examination (GRE) scores, taken within 6 years. (Applicants with M.D., D.O., or Ph.D. degrees from an accredited U.S. college or university may waive the GRE requirement.)

## Degree Requirements

63 credits minimum, as follows:

- \* *Year 1 Required Courses:* BIOST 502 (4), EPI 511 (3/4), HSERV 501 (3), HSERV 516 (4), HSERV 520 (1-3, max. 3), HSMGMT 560 (1-4, max. 4)
- \* *Year 2 Required Courses:* BIOST 503 (4), ENV H 511 (1-3, max. 3), HSERV 504 (1-3, max. 3), HSERV 522 (1-4, max. 4), HSMGMT 514 (3/4), HSMGMT 563 (3)
- \* *Year 3 Required Courses:* HSMGMT 566 (3), HSMGMT 572 (3)
- \* *Thesis or Project Option:* HSERV 700 (master's thesis) or HSERV 598 (project); EPI 600/ENV H 600
- \* *Practicum (required):* focus based on pathway choice
- \* *Elective or Pathway Credits (required):* Pathway courses may be spread out over two years. Electives may be taken at any time.

## Pathobiology

depts.washington.edu/pathobio

### Graduate Program

Graduate Program Coordinator  
F161F Health Sciences, Box 357238  
206-543-4338  
pathobio@u.washington.edu

The Pathobiology graduate program offers graduate training in the application of basic biomedical research to diseases of public health interest. The program of study involves core courses to develop a fundamental understanding of basic cellular and molecular processes and techniques important in the application of basic biomedical research to diseases; laboratory experience to learn how to collect, analyze, interpret, and use data for solving problems; and opportunities to develop skills in communicating research findings through oral and written presentations.

### Master of Science

The master's program is designed for students to develop an understanding of the applications of molecular biology to public health, epidemiology, and cellular or antigenic analysis, and microbiology or immunology. The focus in this two-year program is developing basic research skills and understanding the scientific method. Students are expected to fulfill their course requirements during the first year. Under the guidance of a faculty research mentor, students propose and complete a thesis that includes an original research project.

### Admission Requirements

- \* *Personal Statement:* The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of your background and readiness for graduate studies in pathobiology.
- \* One official set of transcripts from all collegiate institutions attended.
- \* Three letters of recommendation.
- \* Curriculum vitae
- \* Official Graduate Record Examination (GRE) scores
- \* International applicants are ALSO required to submit official Test of English as a Foreign Language (TOEFL) Scores. The Department of Pathobiology will not admit international applicants that have less than a TOEFL score of 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

### Degree Requirements

A minimum of 60 credits as follows:

- \* 21.5 credits of required courses: PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1)

- \* *Research Credits:* Sufficient credits of PABIO 600 and PABIO 700 to complete a research project.
- \* *Electives:* Additional courses in Pathobiology or the biomedical sciences may be taken to fulfill the graded course requirement, to encompass the interests of the student, or to fulfill any additional requirements set forth by the student's committee.

*M.S. Thesis Research Proposal:* The M.S. thesis research proposal should be done by the end of the fourth quarter of the first year. The proposal should contain the following, in this order:

- \* A brief synopsis of background relevant to the project.
- \* A summary of preliminary experiments.
- \* A description of experiments planned for the next year.

*M.S. Thesis:* The thesis must be provided to the M.S. advisory committee two weeks prior to the oral presentation. Corrections should be made following their review before submission of the document to the Graduate School.

*M.S. Oral Presentation and Defense:* All students are required to give a formal seminar prior to the completion of Master's program.

## Doctor of Philosophy

The doctoral program lasts four to five years and is designed for students to become capable of conducting independent research leading to the expansion of knowledge by developing skills to approach unfamiliar experimental systems and identify and explore important questions concerning pathogenesis and infection. Students develop familiarity with the paradigms for control, prevention, and treatment; develop an understanding of epidemiology and disease processes; learn basic methodologies used in this research including relevant areas of molecular biology, bacteriology, cell biology, virology, epidemiology, and biostatistics; and develop familiarity with the major classes of pathogens.

### Admission Requirements

- \* *Personal Statement:* The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of your background and readiness for graduate studies in pathobiology.
- \* One official set of transcripts from all collegiate institutions attended.
- \* Three letters of recommendation.
- \* Curriculum vitae
- \* Official Graduate Record Examination (GRE) scores
- \* International applicants are ALSO required to submit official Test of English as a Foreign Language (TOEFL) Scores. The Department of Pathobiology will not admit international applicants that have less than a TOEFL score of 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

### Degree Requirements

90 credits minimum, as follows:

- \* *Required Courses:* PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1), PABIO 598 (2), PABIO 500 (variable), PABIO 600 (variable), PABIO 800 (27); either IMMUN 441 (4) or IMMUN 532 (3).
- \* Students are required to attend Seminar (PABIO 580) and Journal Club (PABIO 581) every quarter of the academic year while enrolled. Students may be excused for up to two quarters while writing the dissertation. Students will give research presentations in the Graduate Research Symposium annually after the first year. 3 credits each of Seminar and Journal Club may each be counted towards the degree.
- \* *Electives:* The following are recommended tracks for elective credits:
  - o *Eukaryotic Pathogens:* PABIO 536, PABIO 548, CONJ 531 through CONJ 544, EPI 532, MICROM 444
  - o *Bacterial Pathogens:* PABIO 540, PABIO 568, EPI 520, EPI 529, MICROM 552, MICROM 555. (Students without a background in bacteriology are required to take MICROM 442 or an equivalent course as a prerequisite for entry into the Bacterial Pathogens track.)
  - o *Viral Pathogens:* Two or more of the following are strongly recommended: CONJ 531-544, EPI 520, EPI 524, EPI 530, IMMUN 532, MICROM 540

## Research Facilities

Research facilities are geographically dispersed and located in the Health Science Center of the School of Medicine, Fred Hutchinson Cancer Research Center, and Seattle Biomedical Research Institute. External support includes computer facilities and the Health Sciences Library with access to more than 345,000 volumes, 4,000 periodicals, and online bibliographic services for all national libraries of medicine and most commercial databases.

The Fred Hutchinson Cancer Research Center is a world-renowned research institution. Its mission for more than 20 years has been to eliminate cancer. Shared facilities are available, including electron microscopy, flow cytometry, tissue culture, image analysis, biotechnology center for DNA and protein synthesis and sequencing, animal facilities, biological production facility focused on monoclonal antibody production, extensive libraries, and a biocomputing center.

The Seattle Biomedical Research Institute is an independent nonprofit organization studying causes and interventions to infectious diseases of worldwide impact, including targeted research producing leading edge findings and applied research creating diagnostic tests and treatments.

## Financial Aid

The department offers a twelve-month competitive salary, as well as paying tuition and health insurance, which includes medical, dental, and vision benefits. Students with satisfactory academic progress can anticipate funding for the duration of their studies.

---

## Public Health Genetics

F363 Health Sciences Building  
depts.washington.edu/phgen

Public health genetics is an emerging field that applies advances in human genetics, genomics, and molecular biotechnology to improve public health and prevent disease.

Founded in 1997, the University of Washington's Institute for Public Health Genetics (IPHG) is a leader in the emerging field of public health genetics. Alone among U.S. universities, the UW, through IPHG, offers graduate degrees at both the master's and Ph.D. levels.

The mission of the IPHG is to provide broad, interdisciplinary training for future public health professionals, to facilitate research in public health genetics, and to serve as a resource for continuing professional education.

## Graduate Program

Graduate Program Coordinator  
F363 Health Sciences Building, Box 357236  
206-616-9286  
phgen@u.washington.edu

## Master of Science, Genetic Epidemiology

### Admission Requirements

1. Completed program application form.
2. Statement of purpose
3. Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school
4. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
5. *International applicants:* Official TOEFL scores
6. Three letters of recommendation from professors, supervisors, or others who know the student's work reasonably well. At least two letters should be academic references.
7. Printed copy of completed Graduate School web application, sent along with the Public Health Genetics program application
8. Recent copy of the student's resume or curriculum vitae

## Degree Requirements

68 credits minimum, to include:

- \* *Required Courses:* PHG 511/EPI 517 (3), PHG 518/EPI 518 (4), PHG 519/BIOST 516/EPI 516 (3), EPI 573/ENV H 573 (3), PHG 512/LAW H 504/MHE 514 (3); EPI 512 (4), EPI 513 (4); either BIOST 511, BIOST 512, BIOST 513 (4, 4, 4), or BIOST 517, BIOST 518 (4, 4); PHG 536/MEDED 536/PABIO 536 (3), GENOME 552 (1.5), GENOME 553 (1.5)
- \* *Elective Courses:* At least two elective courses (excluding independent study and thesis credits) of 2 or more credits each. Courses must be in epidemiology, biostatistics, genetics, public health genetics, or be related to the biological, physical, or social/behavioral factors which affect health, in particular ethical, legal and social issues related to genetic epidemiology.
- \* *Thesis:* PHG 700 (9 credits minimum)

## Master of Public Health, Public Health Genetics

### Admission Requirements

1. Completed appropriate program application form.
2. Statement of purpose.
3. Official sealed transcripts, including courses, grades and degrees from all institutions attended after secondary school
4. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
5. *International applicants:* Official TOEFL scores
6. Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.
7. A printed copy of the applicant's completed Graduate School web application
8. A recent copy of the applicant's resume or curriculum vitae

### Degree Requirements

63 credits, as follows:

1. *Required Courses:* 52 credits as follows: EPI 511 (3/4), BIOST 511 (4), HSERV 511 (3/4), ENV H 511 (1-3), HSERV 510 (3); PHG 511 (3), PHG 512 (3), PHG 513 (3), PHG 521 (3), PHG 522 (2) or PHG 525 (3), PHG 523 (2), PHG 581 (1); PHG 580 (3); PHG 595(3); at least 9 credits of PHG 700
2. *Electives:* Remaining 11 credits may combine approved elective courses, PHG 600 credits, and PHG 700 credits

## Doctor of Philosophy

### Admission Requirements

1. Completed appropriate program application form.
2. Statement of purpose.
3. Official sealed transcripts, including courses, grades and degrees from all institutions attended after secondary school.
4. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
5. *International applicants:* Official TOEFL scores
6. Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.
7. A printed copy of the applicant's completed Graduate School web application.
8. A recent copy of the applicant's resume or curriculum vitae.

### Degree Requirements

90 credits minimum, to include:

1. For students who require additional training in written communication for a multidisciplinary audience, TC 509 may be required.
2. *Human Genetics:* Required -- PHG 551 or GENOME 565 (4); Highly recommended -- GENOME 552 (1.5), PHG 536 (3)
3. *Public Health:* Required -- EPI 511 (3/4); BIOST 511 (4) or BIOST 517 (4); ENV H 511 (1-3); HSERV 511 (3-4)
4. *Core Knowledge Areas*
  - a. *Genomics in Public Health:* PHG 511 (3), PHG 513 (3), PHG 542 (3), PHG 580 (1)

- b. *Implications of Genetics for Society*: PHG 512 (3), PHG 521 (3), PHG 522 (2) or PHG 525 (3), PHG 523 (2), PHG 541 (3), PHG 543 (3)
  - 5. PHG 580 is required each quarter for all Ph.D. students till they pass the preliminary examination.
  - 6. *Preliminary Examination*: Following completion of required courses, usually taken at the end of the second year of study.
  - 7. *Selective Courses for Core Knowledge Areas and Development of Dissertation Topic*
    - a. *All Students*: PHG 518 (2-4), PHG 519 (3), EPI 573 (3)
    - b. *Genomics in Public Health*: EPI 512 (4), EPI 513 (4), ENV H 514 (3), ENV H 515 (3), ENV H 516 (3), ENV H 567 (2), ENV H 577 (3/4), MEDCH 527 (4), PCEUT 502 (4)
    - c. *Implications of Genetics for Society*: PHG 537 (2), MHE 402 (5), MHE 474 (5), LAW A 596 (1-4), HSERV 551 (2), HSERV 510 (3), ANTH 475 (5), HSERV 552 (3), HSERV 583 (3), HSERV 584 (3), HSERV 587 (3)
-

# Reserve Officer Training Corps Programs

---

## Aerospace Studies

711A Condon Hall  
depts.washington.edu/afrotc/web

The Air Force Reserve Officer Training Corps program (AFROTC) is designed to motivate, educate, and commission highly qualified students for active duty as officers in the U.S. Air Force. The curriculum provides the opportunity for students in any major to gain military knowledge and to become effective Air Force officers and leaders in the aerospace environment.

## General Program Requirements

All aerospace studies courses are open to all University students. Additionally, any student may join the AFROTC program as a cadet and enroll in the 100- and 200-level general military courses. Entry into the professional officer courses (300- and 400-level courses) as a cadet seeking a commission in the Air Force is on a controlled, selective basis.

## Commissioning Requirements

Students who successfully complete the AFROTC program and receive an academic degree from the University are offered commissions as second lieutenants in the Air Force.

## General Military Courses

The 100- and 200-level courses for AFROTC cadets consist of one classroom hour, one-and-a-half hours of leadership laboratory, and two hours of physical fitness per week during the freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn, winter, or spring quarter. Sophomore students may enter at the start of autumn or winter quarter and take the freshman- and sophomore-level courses concurrently. A four-week field-training course, taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students receive pay and travel costs for field training.

Except for sophomore cadets on AFROTC scholarship, students incur no active-duty service commitment by taking general military courses and may drop the courses at any time within the limits of University course-drop policies. Non-ROTC students take the AS classes without any additional requirements for leadership laboratory or physical fitness

## Professional Officer Courses

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive a tax-free monthly subsistence stipend. They are furnished texts and uniforms. Junior- and senior-level classes consist of three hours of academic classes, three hours of leadership-laboratory and two hours of physical fitness per week. Non-ROTC students take the AS classes without any additional requirements to attend leadership laboratory or physical fitness. Non-ROTC students earn academic credits for 300- and 400-level courses, but do not earn an Air Force commission.

## Financial Assistance

The Air Force offers one-, two-, and three-year scholarships to college students. AFROTC scholarships pay tuition, certain fees, and textbook reimbursement. In addition, scholarship winners receive a monthly subsistence allowance. To apply for one of these scholarships, students should contact the Unit Admissions Officer in the Department of Aerospace Studies (AFROTC), 206-543-2360 or at afrotc@u.washington.edu.

## Two-Year Program

To provide for those students wishing to join AFROTC but unable to take the general military courses, a two-year professional officer course is available on a competitive basis. This program is open to graduate

students and full-time undergraduate students in select majors who will complete a bachelor's degree in two years.

Students in this program are required to attend a six-week field-training course at an Air Force base during the summer preceding program entry. The student is paid during the six-week period. Upon return to the campus, students enter the professional officer course. Uniform, texts, and a monthly subsistence are provided. Students interested in this program should contact the AFROTC department by February prior to the autumn quarter they desire to enter, at 206-543-2360 or at afrotc@u.washington.edu.

## Undergraduate Program

Adviser  
711A Condon Hall, Box 353830  
206-543-2360  
afrotc@u.washington.edu

The Air Force ROTC program offers a minor in air and space leadership studies.

## Minor

*Minor Requirements:* 29 credits, to include the following:

1. 24 credits of Air and Space Studies coursework
2. 5 credits in a foreign language beyond the first-year level
3. Minimum 18 upper-division credits in Air and Space Studies coursework
4. Minimum 24 credits in residence at the UW
5. Minimum 2.5 grade in each course presented for the minor.

---

## Military Science

104 Clark Hall  
depts.washington.edu/armyrotc

The ROTC program provides students an opportunity to learn and practice the art of leading people. Recognizing that there is a great difference between cognition and volition, the program is structured in such a way as to give the student practical experience in leading and managing resources.

The Army ROTC (AROTC) program enables the student to learn about the military profession and the role it plays in our democratic system of government. The courses enable such knowledge to be acquired on the campus without serving in the military forces.

Army ROTC electives enrich the student's course of study. Taking such courses also opens up an additional career option, enabling the student to earn a commission and to serve in the Army as an officer, or in the Reserves or National Guard while pursuing a civilian career. Officers serve in a wide variety of career paths, including infantry, human resources, aviation, intelligence, automation, and hospital administration.

Army ROTC provides the student membership in a close-knit fraternal organization.

ROTC programs on college campuses are the nation's way of ensuring that the influences of higher education are transferred into the military services—a mandatory requirement in a democracy.

A minor in military science and leadership is available to any student at the UW. Requirements are shown below.

Enrollment and Scholarship Officer  
105 Clark, Box 353820  
206-543-9010

## Traditional Four-Year Program

Open to freshman and sophomore men and women. Academic studies include courses in military history, principles of leadership, techniques of instruction, management and staff procedures, logistics, physical conditioning, and military law. Extracurricular activities include such options

as Ranger Company, color guard, training exercises, field trips, and related activities. A non-scholarship student incurs no obligation of any kind during the first two years of the four-year AROTC program.

Placement credit toward completion of AROTC courses may be given for prior ROTC or military training. Veterans routinely receive full credit for the first two years of AROTC and may enter the advanced course when they are academic juniors. All military textbooks and uniform items are furnished without charge. Students in the advanced course receive tax-free monthly subsistence of \$350 per month as an academic junior and \$400 per month as an academic senior. In the advanced course, cadets are required to participate in the leadership-development program, which is a practicum of skills and principles taught during the previous two years. Between their junior and senior years, cadets attend a five-week summer camp during which they receive varied and challenging training and for which they are paid both for the time at camp and for travel expenses to and from the camp location. Upon entering the advanced course, students agree to complete the course, accept a commission upon graduation, and serve a minimum of four years if scholarship (three years if non-scholarship) and be on active-duty commitment. If the cadet chooses to go in the Reserves or National Guard, then he or she will serve a minimum of eight years.

### Four-Year Scholarship Program

Application to this program should be made while the student is still in high school. Selection of students is made on a nationwide competitive basis. This program may lead to a commission in the Active Army, the Army Reserve, or the Army National Guard. All tuition, a flat rate for books and laboratory expenses, and uniform items, plus monthly tax-free stipends, is provided by the Army. The program requires four years of academic study on campus, as well as a five-week advanced camp training period between the junior and senior years, for which the cadet is paid for both time and travel expense to and from the camp location. Academic studies are identical to those of the traditional four-year program. The student must sign a contract wherein the student agrees to complete this program, along with a chosen academic program, to accept a commission, and to serve on active duty or in the reserve forces after commissioning.

### Three-Year Scholarship Program

This program is open to qualified students on campus. The scholarship provides financial assistance during the remaining years of the student's enrollment. Each scholarship pays for tuition and a flat rate for books and laboratory expenses and provides tax-free monthly stipends of \$350 for academic juniors and \$400 for academic seniors. All other advantages and obligations are the same as those of the four-year scholarship program.

### Two-Year or Lateral Entry Program

This program is open to qualified undergraduate and graduate students who have at least two years remaining in school and who have completed 81 credits. Students may qualify for entrance into the advanced course under this program in two ways.

First, they may participate as qualified veterans who receive placement credit for the first two years of AROTC. Veterans are also eligible to compete for two- and three-year scholarships while receiving their educational benefits. Members of the Reserves and National Guard may also be eligible to participate in AROTC and receive their commission upon graduation.

The second alternative under this program requires attendance at the Leader's Trainers Course for five weeks at Fort Knox, Kentucky. Completion of this training also qualifies students for direct entry into the advanced course. While at camp, students receive pay plus travel expenses to and from the camp location, and they may compete for two-year scholarships, provided scholarships are available.

### Undergraduate Program

Adviser  
105 Clark, Box 353820  
206-543-9010

The Army ROTC program offers a minor in military science and leadership.

### Minor

*Minor requirements: 27 credits, to include the following:*

1. M SCI 401, M SCI 402, M SCI 403 (9 credits)
2. Additional military science coursework (18 credits)
3. Minimum 18 credits of military science completed at the upper division level.
4. Minimum 18 credits of military science completed in residence at the UW.
5. Minimum 2.5 grade in each course presented for the minor.

---

## Naval Science

305 Clark  
depts.washington.edu/uwnrotc

The Department of Naval Science offers University students an opportunity to engage in study that leads to a commission in the U.S. Navy or Marine Corps while working toward a baccalaureate degree. The Naval Reserve Officer Training Corps (NROTC) Unit functions in conjunction with the Department of Naval Science. An NROTC student may select an academic major within certain limitations (e.g., some programs that normally lead to immediate graduate education, such as architecture, are not consistent with the mission of the NROTC program).

In addition to their University curricula, NROTC students take naval science courses in history and customs, naval engineering/weapons systems, navigation, naval operations, and leadership/management. In addition, each student must attend one naval science laboratory session and one physical training session per week. During the summer, students may have a four-to-six-week training cruise to put into practice their earlier classroom training.

Two NROTC programs are offered, as outlined below. In addition, any University student may take a naval science course without enrolling in the NROTC program, or may complete a minor in naval science, requirements for which are shown below.

Adviser  
305 Clark, Box 353840  
206-543-0170  
nrotc@u.washington.edu

### Navy-Marine Scholarship Program

Each year students are accepted for scholarship status in the four-year, three-year alternate, and two-year NROTC scholarship programs. Eligibility for the three- and four-year programs is based upon nationwide competition and selection by a central selection committee. Application must be made by December 1 of the academic year preceding appointment as midshipman. Those selected are provided educational benefits, including subsidy by the Navy of all tuition, fees, and uniforms. In addition, there is a textbook stipend each quarter and a monthly subsistence pay which ranges between \$250 and \$400.

For the two-year scholarship program, applications from current sophomores, or juniors enrolled in five-year programs of study, must be received by March. Those chosen by a central selection committee attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies these students for enrollment in the advanced courses in the NROTC program. All scholarship students are appointed as midshipmen, USNR-R, and upon graduation are commissioned as officers in the Navy or Marine Corps Reserve, after which they serve on active duty for a minimum of four years.

### Navy-Marine College Program

Each year, men and women are accepted for four- and two-year nonscholarship college programs. Applications for the two-year program are accepted from current sophomores in community colleges or four-year colleges and must be received prior to March of their sophomore year (or third year, if in a five-year program).

Those students selected for the two-year program attend a six-week course of instruction at NSI during the summer prior to their junior year. Successful completion of NSI instruction qualifies students for enrollment

in the advanced course in the NROTC program. Students in the NROTC college program pay their own college expenses but receive monthly subsistence pay during their junior and senior years. The Navy furnishes all uniforms and textbooks used in naval science courses.

All college-program students are eligible for a scholarship after completing one academic term, with scholarship awards based on academic grades and participation within the midshipman battalion. The two-year college-program students also may win a scholarship for superior performance at NSI. Upon graduation, college-program students are commissioned in the Navy Reserve or Marine Corps Reserve and serve on active duty for three years.

## Undergraduate Program

Adviser  
305 Clark, Box 353840  
206-543-0170  
nrotc@u.washington.edu

### Minor

*Minor requirements:* 25 credits, to include the following:

1. N SCI 201; N SCI 402 (6 credits)
  2. Additional naval science coursework (19 credits)
  3. Minimum 12 naval science credits completed at the upper-division level.
  4. Minimum 12 naval science credits completed in residence at the UW.
  5. Minimum 2.5 grade in each course presented for the minor.
-

# School of Social Work

## Dean

Edwina Uehara

210 Social Work/Speech and Hearing Sciences  
depts.washington.edu/sswwweb

The School of Social Work offers two professional programs, one at the undergraduate level and one at the graduate level, as well as a Ph.D. program. The Bachelor of Arts in Social Welfare (B.A.S.W.) program prepares students for entry-level generalist practice. The graduate professional program prepares students for advanced practice within a field of concentration; students earn a Master of Social Work degree. Both the B.A.S.W. and M.S.W. programs are accredited by the Council on Social Work Education. The School also offers a Doctor of Philosophy degree in social welfare that prepares students for careers in research and education. Consistent with University policy, no credit is granted on the basis of life experience or previous employment. All three programs are housed in the Social Work/Speech and Hearing Sciences Building, 4101 Fifteenth Avenue Northeast, Seattle, WA 98105-6299.

In addition, the School offers two concurrent degree programs - one with the School of Public Health and Community Medicine leading to the M.S.W. and M.P.H. degrees, and a second with the Evans School of Public Affairs, leading to M.S.W. and M.P.A. degrees.

## Undergraduate Program

### Adviser

23D Social Work, Box 354900  
206-543-8617  
sswstsr@u.washington.edu

The School of Social Work offers the following program of study

- \* The Bachelor of Arts with a major in social welfare

The program includes upper-division courses in social welfare, with prerequisites in human biology, economics, psychology, statistics, and sociology. Students enter at the start of their junior year after completing most of the liberal arts requirements established by the College of Arts and Sciences. Social welfare courses include content on social welfare history, policy and services, human behavior and the social environment, social welfare research, and cultural diversity. These academic courses prepare students for the senior year three-quarter practicum experience, which involves a total of 480 hours of direct social services under the supervision of a practicum instructor approved by the School.

## Bachelor of Arts

*Suggested First- and Second-Year College Courses:* SOC WF 101, SOC WF 200, SOC WF 201; PSYCH 101; SOC 110; BIOL 100 or BIOL 118; ECON 200 or ECON 201; also courses in American ethnic studies, sociology, psychology, and women studies.

## Department Admission Requirements

Approximately 40 juniors are admitted each year. Admission, which is for autumn quarter only, is competitive and completion of the requirements listed below does not guarantee acceptance. May 1 is the application deadline. To be considered for admission to the program applicants must meet the following criteria by the time of application:

1. Completion of a minimum of 65 credits.
2. Completion of the following courses: PSYCH 101 (or PSYCH 102); introductory sociology; ECON 100, ECON 200, or ECON 201; and BIOL 100 or BIOL 118, with a minimum grade of 2.0 in each course.
3. A minimum 2.00 cumulative GPA.
4. Have some paid or volunteer social service experience.
5. Applicants must submit a completed application, admissions essay, resume, and provide copies of their college transcripts.

Application forms and a detailed description of the social welfare major are available at the School's admissions office, 23C Social Work/Speech and Hearing Sciences (SWS), or are mailed upon request, 206-543-5676. A student may discuss the program in person by contacting the Director of Admissions, 206-543-5676, sswadmis@u.washington.edu. Students

accepted to the major complete a change-of-college form and transfer their academic file to the School's Student Services Office. Students not accepted may contact the Director of Admissions to discuss alternatives to the social welfare major, or the appeal process.

## Major Requirements

63 credits as follows:

- \* *Junior year (34 credits):* SOC WF 200 (5); SOC WF 310 (3); SOC WF 315 (2, 2, 2); SOC WF 320 (5); SOC WF 402 (5); SOC WF 403 (5); and SOC WF 404 (5).
- \* *Senior year (29 credits):* SOC WF 311 (3); SOC WF 312 (3); SOC WF 390 (5); SOC WF 405 (3); SOC WF 415 (12); SOC WF 445 (3).

## Student Outcomes and Opportunities

- \* *Learning Objectives and Expected Outcomes:* The B.A.S.W. program produces beginning-level social work practitioners and is accredited by the Council on Social Work Education. Students become generalist social work professionals able to work with individuals, families, groups, communities, and organizations in enhancing the health, well being, and empowerment of disadvantaged communities across the lifespan. Graduates may pursue social work practice jobs, or graduate education in social work, or a range of other fields (e.g., law, medicine, public policy, international development). Students receive an interdisciplinary liberal arts education, drawing on a range of social science courses which prepare them to promote human welfare and deal with complex social problems. Students are involved in both academic coursework (gaining intellectual knowledge and critical thinking skills) and a field placement experience ("lived" or "on the ground" experience).

The following outcomes define the B.A.S.W. program:

1. Preparation of entry-level baccalaureate social workers for generalist practice in a multicultural context.
2. Education and training of generalist social workers who are informed, engaged, and responsive practitioners, able to understand and take action in enhancing human welfare and in promoting social and economic justice.
3. Education of students within the context of an interdisciplinary liberal arts education, to foster a comparative and critical examination of social welfare and social work through the study of its history, policies, research, and practice interventions.
4. Preparation for graduate education.

- \* *Instructional and Research Facilities:* The School of Social Work houses a number of centers and projects. For more information on these research activities, visit [depts.washington.edu/sswwweb/centers\\_proj.html](http://depts.washington.edu/sswwweb/centers_proj.html).

- \* *Honors Options Available:* None offered.

- \* *Research, Internships, and Service Learning:* Contact the adviser for information.

- \* *Department Scholarships:* A limited number of financial-aid opportunities are available to students. Applicants are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Inquiries may be directed to the Chair of the Scholarship Committee, School of Social Work.

- \* *Student Organizations/Associations:* Organization of Student Social Workers (OSSW)

## Graduate Program

Graduate Program Coordinator  
Box 354900  
206-543-8617  
sswstsr@u.washington.edu

## Master of Social Work

The School of Social Work offers a Master of Social Work degree with four options for completion: a two-year full-time program; a one-year advanced

standing program for qualified students with a degree in social work/social welfare from an accredited undergraduate program; a three-year Evening Degree program; and a three-year M.S.W. outreach program.

All program options prepare students for advanced professional practice with a culturally diverse range of at-risk populations in publicly funded social services. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation, and opportunities for advanced content in areas of policy, services, and methods.

The professional foundation provides instruction in the basic knowledge and skills required for effective, generalist social work practice, as well as socialization to the profession, its value orientation, ethics, and history.

The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in the social work profession. The advanced curriculum is being revised. Please check the School's Web site for the most current information.

Students in the Evening Degree and weekend options may also select from courses in advanced policy services and methods. Elective offerings are determined by a vote of students in the cohort.

### Admission Requirements

Admission to the M.S.W. program requires formal admission to the Graduate School as well as to the School of Social Work. Applicants must have a bachelor's degree, a strong academic background, and social-service experience. Applicants must submit official transcripts from all colleges and universities attended, references, application forms, Graduate Record Examination scores, resume, and an admission essay to be considered for autumn-quarter entry. January 15 is the closing date for receipt of applications and materials. Admission is competitive and selection is based on a review of the applicant's submitted materials. Current application materials can be obtained from the School's Admissions Office, 23 Social Work/Speech and Hearing Sciences Building, or by calling 206-543-5676 in Seattle or 1-800-558-8703.

### Degree Requirements

Minimum 46 credits (Advanced Standing program); 75 credits (Day and Extended Degree programs), as follows:

- \* M.S.W. program requirements include completion of required professional foundation and advanced curriculum credits and demonstrated competence in both academic and field practicum work.
- \* *Human Biology Requirements:* BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), taken within ten years before or during the M.S.W. program. Course must be completed before beginning the advanced year (including practicum). Credit may not be applied to the M.S.W. degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
- \* *Basic Statistics Requirement:* An introductory course in statistics (any discipline) is a prerequisite for SOC W 505.
- \* *Professional Foundation Courses Required for the Day and Extended Degree Program:* SOC W 500 (3), SOC W 501 (3), SOC W 504 (1-3), SOC W 505 (3), SOC W 506 (3), SOC W 510 (3), SOC W 511 (3), SOC W 512 (3), SOC W 513 (3), SOC W 514 (3), SOC W 523 (1), SOC W 524 (8). All foundation courses must be completed before beginning the advanced curriculum.
- \* *Advanced Curriculum for the M.S.W. Day Program:* Specialization in an advanced methods area in combination with a particular population or problem focus. Areas of concentration might include policy practice in health care, clinical practice in transnational communities, administration in mental health settings, or clinical and contextual practice with a focus on low-income children and families. Students enter the second year with an individualized learning plan (developed by winter quarter of their foundation year) that sets out a coherent program of advanced study. Identified in the learning plan is a policy/services course, an advanced methods area, an advanced field practicum, and proposed choices for methods and elective courses that support the student's overall area of concentration.

A minimum program of study includes:

1. One policy/services course (3 credits), consistent with the student's second year specialization

2. Two advanced methods (6 credits) in the student's primary method area or across methods with the approval of the faculty adviser and practicum coordinator
3. Elective course offerings (9 credits) to include courses related to the policy/services areas, and advanced HBSE and theory courses, with the primary focus on development of knowledge and skills in intervention. Students are encouraged to take one elective course from outside the school. Elective courses range from 1 to 3 credits.
4. Advanced practicum (SOC W 525, 18 credits) aligns with the student's policy/services course and with the student's primary intervention method area.

\* *Advanced Curriculum for the M.S.W. Extended Degree Program:* Consists of an advanced generalist policy/services course, a two-quarter advanced generalist practice sequence, 9 credits of electives, and a 720-hour advanced generalist practicum. Students consult with their adviser and practicum coordinator to determine electives and a practicum appropriate to the student's career goals. Students graduate with theory, knowledge, and skills to assess, intervene, and evaluate across levels of social work practice -- from micro to mezzo to macro -- and across client populations and practice settings.

\* *M.S.W. Electives:* Courses may be selected from curriculum offerings related to particular fields of practice, intervention theories, intervention modalities, social problems, populations, and research methods. Students may take advanced methods courses in areas other than the student's primary methods area and relevant courses in other graduate programs and professional schools of the University. Three credits of external coursework may be included.

### Financial Aid

A limited number of financial-aid opportunities are available. Applicants to the M.S.W. program are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Departmental funding is limited. Inquiries may be directed to the Chair of the Scholarship Committee, School of Social Work.

### Master of Social Work/Master of Public Health Concurrent Degrees

The concurrent degrees prepare professionals who function at the interface of both fields in practice, research, planning, administration, and policy development. Students develop (1) competence in social work practice in community health; (2) understanding of the organization and functioning of the health and social service delivery systems; and (3) basic analytical skills necessary to conduct research and to perform competently in a variety of public health social work roles. Students also have an opportunity for in-depth study of particular issues related to their special interests and career goals.

### Application

Students who matriculate into the full time program in either Social Work or Public Health are eligible. Students admitted to Social Work with advanced standing should apply for both programs simultaneously. Students in the part-time extended degree program in either Social Work or Public Health are not eligible for the program.

1. Students must apply to and be accepted by both schools.
2. Students are strongly encouraged to complete up to one year of studies in Social Work before entering the Public Health program. Applications for entry are due in both schools by January 15. Typically students apply to Social Work in January and enter the M.S.W. program in September. They then apply to Public Health the following January and begin the M.P.H. program the next September. Staggered entry permits students to complete all requirements of both degrees within three years.

### Degree Requirements

115-125 credits (depending on number of electives taken)

1. Two separate sets of at least 36 credits each.
2. At least 18 numerically graded credits for each degree in courses numbered 500 through 599. All required courses in the MPH program must be taken for a grade.

- Up to 12 credits taken in one school may be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.
- The M.P.H requires a thesis.

## Master of Social Work/Master of Public Affairs Concurrent Degrees

The University of Washington Evans School of Public Affairs and School of Social Work concurrent degree option offers interdisciplinary preparation in the fields of social work and public affairs, leading to the Master of Social Work and Master of Public Administration. Earning degrees in both areas prepares students to be professionals who work at the interface of the two fields in practice, research, planning, administration, and policy development.

Students are able to combine their studies at the Schools of Social Work and Public Affairs to meet the requirements for both degrees in approximately three years.

### Admission

Students must apply to and be accepted by both schools. Application decisions are made independently by both schools although students interested in the concurrent degree should indicate that interest in their admission materials.

Current students in either Public Affairs or Social Work who decide in the fall of their first year that they wish to apply to the other school may request a courtesy transfer of some application materials from their current school to the other school's admissions office. Students are responsible for monitoring the completeness of their own admissions materials.

The concurrent degree option is only available for students in the School of Social Work Policy Practice concentration (day program). Course sequencing and quarters-to-completion information given assumes students pursue the Public Affairs traditional day program.

### Program Entry and Foundation Preparation

Given the integrated first-year curriculum in both programs, students complete the first year of foundation study in each program largely without substitution. See the sample plans of study below for greater detail.

The concurrent degree option is flexible enough to allow students who begin in either program to decide during the first year to pursue the concurrent degree. However, students who know at the point of initial application that they will pursue the concurrent option are strongly advised to complete the Social Work foundation in year 1 and the Public Affairs foundation year 2. This allows greater flexibility in scheduling electives and provides a marginally more coherent sequencing of theoretical and research methods content.

### Advanced Specializations

Students in both programs choose an area of specialization for advanced work and work with an adviser to plan an individual advanced curriculum. Public Affairs students choose one of five gateway areas and outline their advanced work in a plan of study. Advanced concentrations in Social Work consist of a methodological area and practice, or topical, area. The M.S.W./M.P.A. option described here is available to social work students in the policy practice methods concentration. M.S.W./M.P.A. students can pursue any of the social work 'practice field' specializations. Social Work students combine their advanced concentration elements into one learning plan.

## Doctor of Philosophy in Social Welfare

The Ph.D. program in social welfare prepares students to contribute to the advancement of knowledge and practice in the field of social welfare and the profession of social work for the promotion of social justice. Students are expected to acquire both the substantive and methodological competence to contribute theoretical formulations and empirical research that inform effective social work practice and advance scholarship in social welfare.

After the first year of required courses, each student's program of study is individually designed and focuses on well-defined substantive and

interventive areas of research relevant to the field of social welfare. In the basic core of required courses, which include teaching and research practice, students have an opportunity to pursue their particular interests with faculty members in the School of Social Work and in other schools and departments.

During the first two years, students define and develop the specialized areas that will be the focus of their General Examination and, typically, their subsequent dissertation research. The selected areas must have clear significance for the development of practice, programs, or policies in social work and social welfare.

The General Examination for advancement to candidacy generally occurs at the end of the second year or during the third year. After advancement to candidacy, students devote themselves full time to completion of their dissertation research. The last step before award of the degree is the Final Examination, which serves as the defense of the dissertation. Students are strongly encouraged to remain in residence at the University until the dissertation is accepted. The Ph.D. program takes approximately four years, although academic excellence in learning and performance is always the first criterion for degree progress.

### Admission Requirements

Admission is highly selective and students are admitted for autumn-quarter entry only. Applicants must have a master's degree in social work or a closely related field.

The Council on Social Work Education requires that faculty who teach practice courses in accredited programs have two years of supervised practice experience. Thus, obtaining such experience is highly important for those who seek academic positions following graduation.

Applicants selected for admission are those whose scholastic achievements, previous experience, and aptitude for social welfare research, scholarship, and teaching indicate the greatest promise for achieving the objectives of the program. In addition, an effort is made to maintain a balanced student group reflecting the range of concerns in social welfare and of faculty resources. The deadline for receipt of admission material is December 15. For more information, call 206-685-1680, or email [pdmhpr@u.washington.edu](mailto:pdmhpr@u.washington.edu).

### Degree Requirements

90 credits minimum, to include:

\* *Required Courses:* All required Ph.D. courses must include content on diverse populations, including the disadvantaged and oppressed. This includes content on people of color, women, gay men and lesbians, and persons with disabilities. The specific type or nature of the content (e.g., readings, exemplars, exercises) and how it is introduced and integrated likely differs across courses. In all cases, content on diversity must be in accord with course objectives and be visibly present in the course syllabus.

All required coursework (with the exception of the 800 tutorials) must be completed before or during the quarter in which the oral section of the General Examination takes place.

The following courses are required of all students in the program and must be taken on a graded basis unless only offered as Credit/No Credit Only (i.e., they cannot be taken on a Satisfactory/Non Satisfactory basis).

- Introduction to Advanced Research Methods and Design.* Two quarters during first year.
- Fundamentals of Social Work Statistics.* Two quarters during the first year.
- Research Issues and Priorities in Social Welfare.* Two quarters during the first year.
- Social Welfare Policy.* Two quarters during the first year (contemporary policy, and international and global policy).
- Research Practicum.* Two quarters; to be completed by the end of the second year. (Credit/no credit only.)
- Teaching Practicum.* One quarter; to be taken after successful completion of first year. (Credit/no credit only)
- Doctoral Seminars.* One-credit seminars in the first year (Credit/no credit only). These focus on professional development issues and skills with emphasis on academic and research careers.
- Teaching Preparation.* One quarter in the second year.

9. A minimum of two (3+ credit) courses in advanced graduate research methods (typically 500-level courses offered in other departments) relevant to the student's anticipated research in a substantive or interventive area. Coursework beyond the minimum is encouraged.
10. A minimum of two (3+ credit) graduate social science theory courses (500 level or above), designed to provide strong theoretical foundations. Students often use these courses to develop a "minor" in one of the social sciences. Offered in the College of Arts and Sciences or in one of the professional schools, these courses are related to the substantive or interventive content of the student's program. Coursework beyond the minimum is encouraged for greater depth of interdisciplinary theoretical training.
11. *Dissertation Tutorials (SOC WL 800)*. Taken after the student has successfully completed the oral General Examination and has been advanced to candidacy for the Ph.D. Students must complete a total of 27 credit hours over at least three quarters to satisfy the Graduate School requirement

\* *Elective Courses in the School of Social Work*

1. *Qualitative Methods in Social Work Research*. One or two quarters offered alternate years.
  2. *Analytical Perspectives on Social Welfare Policy*. One quarter, offered annually.
  3. *Advanced Topics in Data Analysis*. One quarter offered annually, covering advanced quantitative methods.
  4. *Social Movements and Participatory Action Research Methods*. One quarter, offered alternate years.
  5. *Psychosocial scale construction and measurement*. One quarter, offered alternate years.
  6. *Interdisciplinary Prevention Science*. One quarter, offered annually.
- \* *Additional Course Expectations*: Students may take tutorials (SOC WL 600) with faculty members while completing advanced coursework and writing the integrative paper (prior to the oral General Examination). These tutorials should include one or more written products.

Students are also encouraged to take additional courses that bear on their substantive areas of interest. Courses may be taken in any department or school of the University but should ordinarily be at the 500 level or above.

\* *Prevention Research Training Program Courses*: (Trainee requirements in addition to all Ph.D. program courses)

1. *Seminar in Prevention Science*. One-credit seminars taken autumn, winter, and spring quarters each year of the traineeship. Credit/No Credit Only.
2. *Interdisciplinary Prevention Science: Children and Adolescents*. Overview of developmental perspective examining factors that promote or inhibit health development at different stages and during transitions. Three-credit course taken spring of first year in the training program.
3. Two additional graduate level (500+) courses, one social science theory and one research methods, related to the prevention research area of study.

## Financial Aid

All students have some means of financial support during the nine-month school year for the first three years in the program and the School is frequently able to continue support beyond this point. In each of the first three years, the Ph.D. Program Director assists students in obtaining funding from the School, other UW sources, or external federal and private granting agencies. Each year, awards of stipends, fellowships, and research and teaching assistantships are made on the basis of resources available, and they match with areas of student interest. Financial assistance provided is not usually adequate to cover all educational and living expenses. Forms required for financial assistance must be submitted by February 15 by completing the Free Application for Federal Student Aid (FAFSA).

---

# Course Descriptions

## College of Architecture and Urban Planning

### Architecture

**ARCH 100 Introduction to Architecture Study (8) VLPA** Introduces design studio instruction to students contemplating architecture as a field of study of career. Studio projects, informed by workshops, lectures, readings, field trips, and in-studio critiques introduce the history, theory and practice of architecture. Includes instruction in basic design drawing and model making. Offered: S.

**ARCH 150 Appreciation of Architecture I (2/3) VLPA** Historical survey of the architecture of Western civilization. For nonmajors.

**ARCH 151 Appreciation of Architecture II (2/3) VLPA** Historical survey of the architecture of Western civilization. For nonmajors.

**ARCH 210 Design Drawing I (4) VLPA** Projects, lectures, demonstrations, and exercises to develop skill in freehand drawing and an understanding of drawing as a vital means to see, analyze, and represent essential aspects of the visual environment.

**ARCH 211 Design Drawing II (4) VLPA** Projects, lectures, demonstrations, and exercises to introduce the language of architectural drawing, with emphasis on freehand drawing as the primary means to imagine, explore, and develop design ideas. Prerequisite: ARCH 210.

**ARCH 220 Introduction to Architectural Structures (2) Onouye** Introduces basic structural behavior and concepts of structural systems. Uses lectures, demonstrations, and testing of student-built projects to examine structural concepts of systems, subsystems, and components in a non-numerical manner. Prerequisite: ARCH 210.

**ARCH 251 World Architecture: Non-Western Cultures (3) I&S/VLPA Prakash** Introduction to historical and contemporary built environments of non-Judeo-Christian civilizations, primarily Hindu, Buddhist, Islamic, and Meso-American, as manifestations of cultural history and as responses to environmental determinants. Offered: Sp.

**ARCH 300 Introduction to Architectural Design I (6)** Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form.

**ARCH 301 Introduction to Architectural Design II (6)** Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 300.

**ARCH 302 Introduction to Architectural Design III (6)** Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 301.

**ARCH 303 Introduction to Design Studio I (6)** Studio problems to develop initial awareness,

knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields.

**ARCH 304 Introduction to Design Studio II (6)** Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields.

**ARCH 305 Introduction to Design Studio III (6)** Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields.

**ARCH 310 Architectural Design Drawing I (3)** Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with 303 studio to integrate drawing in all phases of the design process.

**ARCH 311 Architectural Design Drawing II (3)** Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with 304 studio to integrate drawing in all phases of the design process.

**ARCH 312 Architectural Design Drawing III (3)** Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with 305 studio to integrate drawing in all phases of the design process.

**ARCH 314 Introduction to Architectural Drawing (2)** Skill development in conceptualization of forms and their relationships through observation and recording in freehand graphic manner. Proportion, scales, light effect, value, texture, and various perspective techniques.

**ARCH 315 Design Drawing III (2)** Projects, lectures, demonstrations, and exercises coordinated with studio projects to integrate drawing in all phases of the design process. Lessons in diagramming of design concepts and planning and presenting design solutions. Prerequisite: ARCH 211; corequisite: ARCH 300.

**ARCH 316 Design Drawing IV (3)** Lectures, demonstrations, and exercises to develop drawing skills and techniques applicable to architectural design problems. Topics include advanced perspective construction, shade and shadow calculations, descriptive geometry, topographical manipulation, and additional appropriate topics at the request of the class. Prerequisite: ARCH 315.

**ARCH 320 Introduction to Structures I (3)** Statics — Force analysis; the study of external forces and force systems and their analytical solutions as applied to bodies at rest (equilibrium). Topic areas include beams, trusses, determinate frames, and load tracing.

**ARCH 321 Introduction to Structures II (3)** Strength of Materials; the study of the properties of materials and cross-sectional shapes of structural elements with respect to their effectiveness in resisting stresses. Topic areas include stress and strain, section properties, analysis and design of beams and columns. Prerequisite: ARCH 320.

**ARCH 322 Introduction to Structures III (3)** Elementary Structural Design; synthesis of the previous structures coursework with applications to design of determinate timber and steel structures. Examination of forces on buildings; snow, live loads, wind, and earthquake. An introduction to concept of continuity. Prerequisite: ARCH 321.

**ARCH 331 Environmental Control Systems (3) NW** Description of thermal comfort needs and the means by which buildings can be designed to satisfy those needs. Consideration of how climate determines building forms, site analysis and planning *vis-a-vis* the local climate, basic heat transfer mechanisms, and design strategies for overcoming heat loss through the building envelope.

**ARCH 332 Construction Materials and Assemblies I (3)** Lectures and readings pertaining to a survey of residential and light-commercial construction materials, assemblies, and techniques of assembly.

**ARCH 350 Architecture of the Ancient World (3) VLPA** Architectural history in the Western world from beginnings to AD 550.

**ARCH 351 Romanesque, Gothic, and Renaissance Architecture (3) VLPA** Architectural history in the Western world from AD 550 to 1750. Recommended: ARCH 350.

**ARCH 352 History of Modern Architecture (3) VLPA Ochsner** Architectural history in the Western world from 1750 to the present. Recommended: ARCH 351.

**ARCH 360 Introduction to Architectural Theory (3) I&S/VLPA** Function of architectural theory in comprehending and ordering various human purposes in architecture, types of architectural purpose, and types of theories. Current concerns.

**ARCH 380 Computers in Architecture (3)**

Laboratories, lecture, and demonstrations to introduce computing in environmental design and planning. Offered: ASp.

**ARCH 400 Architectural Design IV (6)** Offers studio problems in non-residential building design to advance student's understanding of the ideas and technologies of architecture. Prerequisite: ARCH 302.

**ARCH 401 Architectural Design V (6)** Offers studio problems in non-residential building design to advance student's understanding of the ideas and technologies of architecture. Prerequisite: ARCH 400.

**ARCH 402 Design/Build Studio (6)** Study of the design/build process with emphasis on the synthesis of design and construction considerations. Focuses on developing design and construction concepts to meet program requirements specified in case studies. Offered: jointly with CM 402; W.

**ARCH 403 Architectural Problems (6)**

**ARCH 410 Introduction to Architectural Photography (3/5) VLPA Stamets** Basic elements and processes of architectural photography to include camera controls, exposure technique, photo processing, and fundamental principles of photographing architecture. Student must provide own 35 mm (or larger) camera with manual operating controls. Offered: AWS.

**ARCH 412 Architectural Illustration and Presentation (3)** Issues, conventions, and techniques used in architectural renderings, including line drawings, shaded drawings, use of color, composition, organization, advanced perspective, scale figures, entourage, reflections, and media. Prerequisite: ARCH 315.

**ARCH 413 Architectural Photography Projects (3)** Students develop in-depth photo essays relating to architecture, the urban movement, or landscape design following the principles introduced in ARCH 313. Lectures, seminar, and discussion. Prerequisite: ARCH 410.

**ARCH 415 Architectural Sketching (3)** Exercises in freehand representational drawing using charcoal, graphite, and conte crayon with emphasis on line, proportion, values, and composition. Studies progress from geometric to nongeometric forms. Recommended: either ARCH 210 or ART 104.

**ARCH 416 Freehand Drawing and the Digital Realm (3) VLPA Stevens** Explores the potential role of freehand drawing in digital media. Students use stylus and tablet to draw in print and photo-imaging programs, combining the flexibility of digital tools with the rich traditions of freehand drawing. Focus alternates between Internet as context for image making and printed output. Offered: AW.

**ARCH 417 Advanced Topics in Digital Drawing (3) VLPA Stevens** Provides a context for developing an individual project exploring drawing or painting in digital media. Explores advanced issues in digital image creation and production through a book, film, or Web project. Each student completes and publishes a project during the quarter. Prerequisite: ARCH 416. Offered: Sp.

**ARCH 418 Watercolor Drawing (3)** Introduction to the principles and practice of using transparent watercolor for the naturalistic representation of objects, people, and interior and exterior space. Recommended: either ARCH 210 or ART 104.

**ARCH 420 Structural Design I (4) NW** Reinforced concrete fundamentals; establishes basics of reinforced concrete behavior and introduces methods of design used in current engineering practice. Basic mechanics of structural concrete introduced in examining bending, shear, and axial forces. Topic areas include beams, slabs systems, columns, foundations, retaining walls, and an introduction to prestressed concrete. Prerequisite: ARCH 322.

**ARCH 421 Structural Design II (4)** Design of steel structures.

**ARCH 422 Structural Design III (4)** Design of reinforced concrete structures.

**ARCH 426 Structural Unit Masonry (3) Lebert** Structural behavior and design of reinforced brick, tile, and unit masonry structures. Prerequisite: CEE 381. Offered: jointly with CEE 455.

**ARCH 430 Materials and Processes (3) Vanags** Lectures, field trips, and laboratory sessions directed toward the nature, potentials, and limitations of a variety of materials (wood, metal, plastics, inorganic cementing materials, minerals, rocks, and clay) and the processes involved with their production, fabrication, and system compatibility.

**ARCH 431 Environmental Control Principles (3)** Daylighting of buildings, reducing noise and enhancing sound for communication, and regulating heat transfer for occupant thermal comfort; description of passive means for environmental control, including presentation of scientific explanations and design guidelines for utilizing these means; design guidelines are intended for use in the preliminary schematic design phase. Offered: AW.

**ARCH 432 Construction Materials and Assemblies II (3)** Lectures and readings pertaining to a survey of materials, assemblies, and techniques of assembly of concrete and steel frame, commercial exterior envelope, and interior partitioning building constructions systems. Prerequisite: either ARCH 400 or CM 313.

**ARCH 433 Active Control Systems for Building Operation (3) NW Heerwagen** Electrical, mechanical (HVAC), plumbing, and fire safety systems for buildings. Descriptions of what these systems do, where they are used, how they are integrated into the overall building design; rules of thumb, design strategies, and short cuts for anticipating system design and use. Prerequisite: either ARCH 331 or ARCH 431.

**ARCH 434 Color and Light (3)** Lectures, demonstrations, exercises, and projects focusing on the use of color applied to the three-dimensional architectural context. Color theory is explored with the multiple effects of changing light.

**ARCH 435 Principles and Practices of Environmental Lighting (3)** Perception-based approach to principles of natural and artificial

lighting. Practical considerations of lighting involving environmental evaluations, calculations and the use of lamps and fixtures. Sketch and model studies for applications. Impact of lighting design on energy conservation. Relation of lighting design process to architectural design concepts. Prerequisite: either ARCH 331 or ARCH 431.

**ARCH 436 Building Acoustics (3) NW** Description of principles and practices for manipulating and enhancing sound in buildings. Information about sound behavior and the organization of architectural elements (deployment of design features, including various geometries and materials) for the control of sound in enclosed spaces and between adjacent spaces.

**ARCH 439 Light Frame Building Assemblies (3)** Fundamentals of light-frame construction from soils examination, foundation systems to framing systems, and the integration of electrical, plumbing, and heating/cooling into the structure. Prerequisite: either ARCH 332 or CM 313.

**ARCH 441 Visions of the Japanese House (3) Oshima** Explores the origins, derivations, and permutations of the "Japanese House." Outlines underlying principles and paradigms of Japanese domesticity through history and traces its evolution through aspects ranging from the house's expression in media to its constructional materiality. Offered: A.

**ARCH 442 Africa and Middle East Seminar (3) VLPA McLaren** Advanced introduction to colonial and postcolonial architecture in Africa and the Middle East, beginning with the initial European colonization in the mid-19th century. Provides a historical understanding of the formation of distinctive regional and/or national identities in the architecture of these regions. Offered: Sp.

**ARCH 445 South Asian Architecture I (3) VLPA Prakash** Advanced introduction to precolonial architecture and urbanism of South Asia. Using methodologies of culture studies, examines select Hindu, Buddhist, and Islamic case studies on a comparative genealogy.

**ARCH 446 South Asian Architecture II (3) VLPA Prakash** Advanced introduction to colonial and postcolonial architecture and urbanism of South Asia. Using methodologies of culture studies, covers 1800 to present, emphasizing the past 50 years since India's independence in 1947.

**ARCH 450 Modern Architecture and the Decorative Arts (3) VLPA Anderson** History/theory seminar investigates parallel and interactive developments in European architecture and the decorative arts from 1870 to 1930. Examines the production of designers as well as the economic, political, and cultural circumstances that affected their work.

**ARCH 451 Traditional Chinese Architecture and Gardens (3) I&S/VLPA** Introduction to Chinese architecture (palaces, homes, temples, tombs), urban planning, and gardens; each area examined in terms of techniques of production, visual styles, historical development, and relationship to traditional Chinese cultural values. Recommended: some background in Chinese art, history, language, or literature.

**ARCH 452 History of Architecture in Seattle and Environs (3) I&S Ochsner** Historical

development of architectural in Seattle and surrounding areas from the nineteenth century to the present, also touching on issues of urban design and historic preservation.

**ARCH 453 Japanese Architecture (3) VLPA**  
Survey of Japanese architecture from its origins to modern times. Although Shinto architecture, tea houses, gardens, and modern developments are discussed, the primary focus is on the development of Japanese Buddhist architecture. Offered: jointly with ART H 419.

**ARCH 454 Greek Architecture (3) VLPA**  
Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ART H 446/CL AR 446.

**ARCH 455 Special Studies in Gothic Art and Architecture (3) VLPA**  
Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and England. Offered: jointly with ART H 455.

**ARCH 456 Nineteenth-Century Architecture (3) VLPA**  
*Clausen* From late eighteenth-century French rationalists, Neoclassicists, to *fin de siècle* Vienna and Paris. Includes theorists such as Ruskin, Viollet-le-Duc, and Semper; major movements, such as the Arts and Crafts, and the French Ecole des Beaux-Arts method of design. Offered: jointly with ART H 490.

**ARCH 457 Twentieth-Century Architecture (3) VLPA**  
*Clausen* Architecture in the twentieth century, mainly in Europe and the United States. Traces roots of Modernism in Europe in the 1920s, its demise (largely in the United States) in the 1960s and recent trends such as Post-Modernism and Deconstructivism. Offered: jointly with ART H 491.

**ARCH 459 Architecture Since 1945 (3) VLPA**  
*Clausen* Theories and forms in architecture from the end of World War II to present. Includes new wave Japanese architects, recent Native-American developments, and non-Western as well as Western trends. Offered: jointly with ART H 493.

**ARCH 460 Design Theory and Analysis (3) I&S/VLPA**  
Problematical nature of philosophies of architecture; interaction of philosophical concepts and architectural form and expression. Fundamentals of architectural criticism.

**ARCH 461 Recent Developments in Architectural Theory (3) I&S/VLPA**  
Concentrates particularly on developments that spring from recent work in the epistemology of science and in philosophy.

**ARCH 462 Spatial Composition in Architecture (3)**  
Advanced introduction to compositional strategies in architecture. Drawing on a historical survey of the development of Western Architecture, the seminar investigates different compositional strategies and their relationship to cultural values and systems of meaning. Intended as complement to the design studio.

**ARCH 463 Theories of Representation (3)**  
*Anderson* Seminar focusing on the development of representational techniques in western architecture from antiquity to the present which seeks to discover how these techniques have affected the realization and interpretation of architecture. Prerequisite: ARCH 350; ARCH 351; ARCH 352.

**ARCH 475 Residential Architectural Practice (3)**  
Lectures and exercises focused on the operation of a professional architectural practice specializing in residential and smaller-scale projects. Topics include: clients and program development, design strategies and space planning, site considerations, regulatory constraints, consultants, contractors, specialized construction methodology, and issues, ethics, and liability specific to residential project delivery.

**ARCH 476 Design and the International Building Code (3)**  
Provides detailed review of non-structural sections of the International Building Code (IBC) including designer responsibility, code background, purpose and requirements based on occupancy, construction type, and building design features. Discusses amendments by both the State of Washington and the City of Seattle. Prerequisite: either ARCH 302 or CM 313.

**ARCH 477 Healthcare Facilities Planning and Design (3)**  
*Parker* Focuses on a broad understanding of healthcare facility planning and design through a combination of class seminars, field work, and research reports. Site visits to Seattle health care institutions provide examples for the application of problem analysis and research methods. Offered: W.

**ARCH 478 CAD and Working Drawings (4)**  
Intensive introduction to computer-aided design systems for developing construction documentation (working drawings). Lectures and exercises focus on learning the methodology for using CAD to efficiently prepare working drawings, as well as discussions regarding industry recognized standards and current technology used in the preparation of documentation. Prerequisite: ARCH 380; CM 313. Offered: ASpS.

**ARCH 481 3D Modeling and Rendering (3)**  
Lectures and weekly exercises focus on understanding and applying the underlying principles of 3D computer graphics and rendering software. Topics include user-interface, data creation and modeling, lighting models, smoothing, texture mapping, ray tracing, radiosity, animation, and solid modeling. Prerequisite: ARCH 380. Offered: ASp.

**ARCH 482 Web Weaving (3)**  
*B. Johnson* Examines the function, limitations, and uses of primary World Wide Web technologies and fundamental Web site design and implementation. Participants develop hands-on design/build expertise for Web site design, implementation, and maintenance using readily available tools and techniques. Looks beyond today and explores emerging Internet technologies. Offered: A.

**ARCH 483 Design of Virtual Environments (3)**  
Explores through a blend of technical exercises constructing computational artifacts, readings, and discussions of relevant literature, the possibilities of online virtual environments. Incorporates a term project or paper based on exercises and readings. Offered: W.

**ARCH 484 Design Computing Seminar (3)**  
Weekly colloquium and discussion forum. Discusses design computing research and report on ongoing project progress, with demonstrations and guest speakers. Explores design computing, design thinking and design process, and inventing new computer aided tools for design. Offered: W.

**ARCH 485 Digital Craft Workshop: Advanced Projects in CAD (3)**  
Advanced topics for students who have completed one or more design computing courses and wish to develop a project further. Offered: W.

**ARCH 486 Computer Graphics Programming for Design (3)**  
Introduction to fundamental concepts of computer programming for design applications with an emphasis on interactive graphics. Basic control and data structures for interactive graphics programming; weekly exercises with term project. Significant lab time required. Offered: ASp.

**ARCH 488 American Architecture (3) VLPA**  
*Clausen* American architecture from indigenous native American traditions to the present. Offered: jointly with ART H 488.

**ARCH 493 Rome Preparation Seminar (2)**  
Seminar dealing with history, culture, topography, and customs of Rome, Italy. Required for students enrolling in ARCH 495, ARCH 496, or ARCH 497.

**ARCH 495 Architectural Studies Abroad (9)**  
Architectural, urban and historic studies in international cities and towns. Prerequisite: ARCH 493.

**ARCH 498 Special Projects (1-12, max. 12)**  
Instructor-initiated and department-approved systematic study and offering of specialized subject matter. Topics vary and are announced in preceding quarter.

**ARCH 499 Undergraduate Research (1-6, max. 6)**

**ARCH 500 Architectural Design Studio I(6)**  
Architectural design, with emphasis on development of professional skills in design synthesis; specifically the design of institutional buildings in response to a context that is significant for historical and urban characteristics. Analysis includes programming, typology, site and place, and influence of regulatory measures on building form. Concurrent with ARCH 590. Offered: A.

**ARCH 501 Architectural Design Studio II(6)**  
Architectural design, with emphasis on development of professional skills in design synthesis, specifically, the unique qualities of materials, construction technology, and assembly details in the expression of architectural ideas. Analysis includes the influence of regulatory measures on building form. Concurrent with ARCH 570. Offered: W.

**ARCH 502 Architectural Design Studio III (6)**  
Architectural design, with emphasis on development of professional skills in design synthesis, specifically the comprehensive integration of building systems within an ordered design concept. Analysis includes the planning and integration of structural systems, building service systems, and building envelope design as an appropriate architectural expression. Concurrent with ARCH 530. Offered: Sp.

**ARCH 503 Architectural Design Studio Options (6)**  
Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

**ARCH 504 Architectural Design Studio Options (6)**  
Advanced architectural studios in

general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

**ARCH 505 Architectural Design Studio Options (6)** Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

**ARCH 506 Advanced Architectural Studies (6)** Advanced experimental studies dealing with significant architectural relationships that involve scholarly investigation, development, and presentation of results.

**ARCH 520 Advanced Wood Structures Design (3)** Design methods related to wood structures. Nature of wood as a building material, plywood, glued laminated wood structures, timber piles and pile foundations, pole buildings, and conventional wood building framing.

**ARCH 529 Seminar in American Architecture (5)** *Clausen* Topics vary. Offered: jointly with ART H 592.

**ARCH 530 Integrated Building Systems (3)** *Miller* Discusses strategies for ordering separate and discreet building systems into integrated architectural schemes. Focuses on systems that affect architectural expression and resolution in buildings including: structural, environmental control, materials, and assembly with an emphasis on sustainable building design. Concurrent with ARCH 502. Offered: SP.

**ARCH 532 Green Technology (3)** *Heerwagen* Examination and application of various resource-conserving building technologies, particularly within the context of the LEED Rating System. Principles and practices associated with the inclusion of these technologies in buildings. Offered: W.

**ARCH 535 Graduate Seminar: Study Topics in Environmental Lighting (3)** Focus on individual student projects involving research and design for lighting.

**ARCH 551 Scandinavian Architecture of the Nineteenth and Twentieth Centuries (3)** Introduction to the contribution of Scandinavian architecture to early functionalism with emphasis on its relationship to neoclassicism and vernacular architecture.

**ARCH 553 Historic Preservation of Architecture, USA (3)** American achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

**ARCH 554 Special Studies in Modern Architecture (3)** Study and critical analysis of a selected number of distinguished professionals (architects, planners, educators, critics) and their contributions to the evolution of modern and contemporary architectural practice and thought.

**ARCH 556 The Arts & Crafts Movement and Its Legacies (3)** *Ochsner* Historical development of the arts and crafts movement focusing primarily on its influence on American architecture from 1870 to the present.

**ARCH 558 Seminar in Twentieth-Century Architecture (3/5)** *Clausen* Specific focus changes from quarter to quarter. Prerequisite:

graduate standing with background in architecture, architectural history, or permission of instructor. Offered: jointly with ART H 591.

**ARCH 559 American Utilitarian Architecture (3)** Significant American environmental design efforts arising from utilitarian needs, e.g., factories, bridges, skyscrapers, and associated technical building innovations.

**ARCH 560 Graduate Seminar on Architectural Theories (3)** Recent developments in architectural theory, urban design theory, criticism, and the methodology of criticism.

**ARCH 561 Urban Design Theory (3)** Study of development of nineteenth- and twentieth-century urban design theories and parallel developments in architecture and urban planning. Theoretical premises are related to current practices of urban design in various sociopolitical contexts, European as well as American. Evolutionary nature of theory emphasized. Prerequisite: URBDP 479 or permission of instructor.

**ARCH 562 Regionalism (3)** Exploration of design ideas that address the cultivation of regional character by acknowledging the commonplace, including both the landscape and its buildings. The many disruptive forces that threaten the possibilities of local culture are also considered from a political, social, and economic point of view.

**ARCH 563 Graduate Seminar in Architecture and Cultural Theory (3)** Study of contemporary cultural studies and postcolonial writings in terms of their impact on architectural theory and practice. Topical seminar based on reading and individual research. Offered: W.

**ARCH 570 Design Development (3)** *Miller* Lectures and case studies emphasizing the design development phase of architectural practice.

**ARCH 572 Specifications and Contracts (3)** Detailed organization and composition of contracts, specifications, and related contract documents.

**ARCH 573 Professional Practice (3)** *Rees* Operation of an architectural office and professional practice.

**ARCH 574 Design and Construction Law (3)** Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington state law. Offered: jointly with CM 500.

**ARCH 576 Community Leadership Practices (4)** *Sutton* Examines how to facilitate community design processes. Explores theories and methods of participation and applies them to creating community visioning tools. These tools are put to use during the spring charrette when city officials, neighborhood residents, K-12 students, and others create a shared vision for their community. Offered: W.

**ARCH 577 Ethical Practice (3)** *Sutton* Helps students develop ethical reasoning skills. Examines the sociology of professional practice leading to and understanding of the dilemmas associated with serving a diverse society.

Reviews exemplary case studies in ethical practice. Communication skills developed through writing and dialogue, and creation of an exhibit exploring an ethical issue. Offered: W.

**ARCH 578 Case Studies in Contemporary Architectural Practice (3)** Presentations and discussions by local architectural firms examining the issues that influence building design and project delivery in contemporary architectural practice. Focuses on understanding the issues as opportunities rather than impediments to good design. Class visits a different architectural firm each week for an in-depth review of current projects.

**ARCH 579 Technical Issues in Preservation Design (3)** Issues, practices, and procedures involved in preservation and reuse of old and historic buildings. Technical and esthetic means by which practicing professionals approach the analysis, interpretation, and resolution of problems such work raises. Emphasis on recent and local projects and related experiences.

**ARCH 587 Theory of Design Computing (3)** Examines the relationship between theory of design and computational tools for practice. Explores how the emergence of computers as a mainstream tool in design has already changed architectural practice. Discusses how, as with other technologies that revolutionized the practice of architecture, information technologies carry hidden implications about design process and products. Offered: A.

**ARCH 588 Research Practice (3)** Provides the opportunity for a guided preliminary exploration and refinement of a research topic, prior to thesis proposal. Weekly seminar meetings focus on student work with regular presentations and discussions. Offered: W.

**ARCH 590 Urban and Preservation Issues in Design (3)** Introduction to recent theory and practice in the fields of urban design and historic preservation primarily in North American urban contexts, including examples of recent projects presented by practicing professionals.

**ARCH 591 Architecture in the Landscape (3)** Advanced introduction to the relationships between buildings and places in the landscape with an emphasis on western concepts of nature. A taxonomy of place as nature is developed. Ways in which the architect can design places that landscape taxonomy are explored.

**ARCH 593 Residential Design: Methods and Practices (3)** Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods, and practices. Offered: jointly with URBDP 574.

**ARCH 595 Master's Thesis Studio and Pre-Design (3)** Preparation of master's design thesis pre-design document within a structured, faculty supervised setting. Student product covers programming; site analysis; land use, building, and accessibility code compliance; building systems selection (material, structural, and mechanical); cost implications; conceptual approach and schematic design exploration. Required for admission to the master's thesis design studio. Offered: AW.

**ARCH 596 Fieldwork in Professional Practice (\*, max. 9)** On-location study under the

supervision of a practicing professional involved in an aspect of environmental design.

**ARCH 597 Research Practicum (5)** *Johnson, McLaren* Provides a mentored research opportunity where students apply their research and writing skills and knowledge of methods and theory to an advanced research topic. Offered: Sp.

**ARCH 598 Special Topics for Graduate Students (1-6, max. 6)** Systematic study and offering of specialized subject matter. Topics vary and are announced in the preceding quarter. May be repeated for credit.

**ARCH 599 Thesis Preparation (3)** Explores development of a proposal for thesis-level research. Participants identify a research area, find relevant literature and prepare an annotated bibliography, articulate a specific question within the research area, and write, present, and defend a proposal. Participants may use this course to develop a thesis proposal. Offered: Sp.

**ARCH 600 Independent Study or Research (\*)** Credit/no credit only.

**ARCH 700 Master's Thesis (\*)** Credit/no credit only.

---

## Architecture and Urban Planning

### Built Environment

**B E 550 Colloquium-Practicum on Research-Practice and Teaching-Learning (1, max. 6)** A synthetic and interdisciplinary forum for the presentation and peer critique of faculty and student research and practice projects, and a venue for pedagogical issues and skills for effective teaching and learning.

**B E 551 The Contemporary Built Environment (3)** Covers major or landmark cases of complex built environment projects, emphasizing the multiple dimensions involved and their interconnections.

**B E 552 Theories of Knowledge and the Built Environment (3)** Systematic examination of alternative epistemological frameworks applicable to studying the built environment; examinations of their differences and similarities and of the possibility of a comprehensive, pluralistic approach.

**B E 553 Ethics in Practice, Research, and Teaching (3)** Preparation for ethical challenges facing professional practice, research, and teaching in the built environment. Coverage of general and professional ethics, and examination of principles and rules and application through case studies.

**B E 598 Special Topics (1-6, max. 15)** Systematic study of specialized subject matter. Topics vary depending on current interest and needs, and are announced in the preceding quarter.

**B E 800 Doctoral Dissertation (\*)** Credit/no credit only. Offered: AWPSp.

## College of Architecture and Urban Planning

**CAUP 496 Practical Experience (3-6, max. 6)** Credit/no credit only.

**CAUP 498 Special Projects (1-12, max. 12)**

## Community and Environmental Planning

**CEP 200 Introduction to Community and Environmental Planning (5) I&S** *Purcell* Introduction to central themes of major. Opportunities to engage in community action and planning process, while developing ecological literacy. Lectures, discussions, and critical writing exercises combine to increase knowledge and interest in these fields. Emphasis on developing community of learners in and out of classroom setting. Offered: ASP.

**CEP 300 CEP Retreat (1, max. 4)** Focuses on planning analysis assessment and development of the major. Opportunities for community building and all-major policy deliberation and decisions. Workshops for skill building in consensus, facilitation and for major-specific activities such as developing individual study plans and study abroad experiences. Credit/no credit only. Prerequisite: Majors only. Offered: ASP.

**CEP 301 The Idea of Community (5) I&S** *Campbell* Theories of community and communal rights and responsibilities. Experience building a learning community within major. Explores struggles for community in every sector of life. Witness essentials of community through service and field experiences, students construct individual curriculum and learning plans for major, selecting cross-disciplinary work. Credit/no credit only. Offered: A.

**CEP 302 Environmental Response (5) I&S/NW** *Miller* Explores issues of environmental crisis and societal responses. Readings and reflective analysis from broad selection of authoritative sources to develop grounded perspective in ecological literacy and consciousness. Concurrently, experiential education in challenges and practical responses to building sustainable society through participation in community-based environmental effort. Credit/no credit only. Offered: W.

**CEP 303 Social Structures and Processes (5) I&S** *Campbell* Investigates use of formal and informal social structures and processes within context of community and environment. Looks at patterns and institutions of social organization and relationships among different sectors. Issues of interrelatedness, citizenship, knowledge, and communication. Credit/no credit only. Offered: Sp.

**CEP 446 Internship (5, max. 10)** *Ryan* Connects core and individual courses with field work. Group and individual readings develop understanding of how students' internships and field placements constitute particular element of community and environmental planning. Explores how what we do for a living is part of our lives as citizens and public service. Credit/no credit only. Offered: AWPSp.

**CEP 460 Planning in Context (5) I&S** *Ryan* Examines theory against backdrop of practice for broad, historical understanding of social,

political, environmental planning. Critique from viewpoints, e.g., planning history, ethics, ecofeminism, environmental justice, class and capitalism, planning and global economy. Develop personalized history reflecting individual experience, professional experience, and philosophical heritage of planning profession. Credit/no credit only. Offered: A.

**CEP 461 Ethics and Identity (5) I&S** Examination of personal, societal, vocational, environmental, planning ethics. Readings and discourse on ethical foundations for public life. Individual and group readings on values, human potential. Develops understanding of ecological context, moral responsibility, self-awareness. Constructs positive, diverse view of humanity, environment regardless of race, gender, ethnicity, beliefs. Credit/no credit only. Offered: W.

**CEP 462 Community and Environment (5) I&S** *Campbell, Ryan* Capstone quarter merges core seminars, disciplinary courses in major, community field experiences for mastery of personal knowledge and skills. Reflection and synthesis of themes in major; engagement with contemporary issues. Compares theoretical definitions of community and environment with individual philosophies and knowledge within thoughtful, applied context. Credit/no credit only. Offered: Sp.

**CEP 498 Special Topics (1-9, max. 15) I&S** Systematic study of specialized subject matter.

**CEP 499 Undergraduate Independent Study or Research (1-5, max. 10)** Individual reading, research, fieldwork, other special project approved and supervised by faculty adviser most appropriate for the project proposed. Report on the purposes, procedures, and results of study is required. Credit/no credit only. Offered: AWPSp.

---

## Strategic Planning for Critical Infrastructures

**SPCI 500 Strategic Planning and Systems Analysis (4)** Introduction to two major planning and analytic processes, strategic planning and systems analysis, as applied to the public sector. Includes study of the various elements and types of systems as well as the strategic planning process for public organizations.

**SPCI 501 Introduction to Comprehensive Emergency Management (3)** Introduction to emergency management and risk reduction concepts and principles. Includes emergency management tools, techniques, and resources as well as governmental programs, relationships, and the broader social context.

**SPCI 502 Constitutional Issues in Homeland Security (3)** Explores the balance between individual liberties and national security. Examines the moral concepts underlying American civil rights and acts of terrorism against the United States. Discusses application of the U.S. Constitution to Homeland Security laws and other governmental actions to protect the nation at home and abroad.

**SPCI 503 Physical Critical Infrastructure: Power and Fuel Systems, SCADA, Telecommunications, and Water Supply (3)** Introduction to Model-Based Vulnerability Analysis (MBVA) approach to the study of physical critical

infrastructures, including power and fuel systems, SCADA, telecommunications, and water supply.

**SPCI 504 Applied Geo Spatial Analysis (4)**

Provides the theoretical and practical skills needed to use a Geographic Information System (GIS) for analyzing spatial phenomena on the urban and regional scale. Focuses on principles and methods of spatial analysis and their application to strategic planning, risk management, and hazard mitigation. Credit/no credit only.

**SPCI 505 Epidemiology of Biological and Chemical Hazards Mitigation I: Principles (3)**

Introduction to epidemiology: surveillance for detection of outbreaks, outbreak investigation, and control for infectious agents, toxins, and chemicals. Case studies are drawn from actual outbreaks illustrating these essential epidemiological methods. Examines problem-solving techniques. Credit/no credit only.

**SPCI 506 Strategic Planning Practicum I (3)**

Uses case-based and problem-based approaches to teach the techniques of planning, decision-making, and analysis common to critical infrastructures.

**SPCI 507 Epidemiology of Biological and Chemical Hazards Mitigation II: Application (3)**

The second of a two-course sequence, focusing on the applications of the principles of epidemiology covered in Epidemiology of Biological and Chemical Hazards I: Principles. Study cases drawn from actual outbreaks: compare and contrast types, apply knowledge to solve, propose interventions for control, and formulate strategies for preventing outbreaks. Credit/no credit only.

**SPCI 508 Risk Assessment and Management (4)**

Introduction to processes and methods of risk assessment and management, focusing on how these principles can be integrated into strategic planning and decision making.

**SPCI 509 Critical Infrastructure Systems: Cyberterrorism and Communications Systems (3)**

Survey of issues surrounding telecommunication and computer infrastructures, with the objective of developing a working knowledge of these systems, the hazards confronting them, and preventative measures.

**SPCI 510 Strategic Planning Practicum 2 (3)**

Second in a three-course sequence that uses case-based and problem-based approaches to teach the techniques of planning, decision-making, and analysis common to critical infrastructures.

**SPCI 511 Critical Infrastructure Systems: Government Services, Banking, and Finance (3)**

Survey of issues surrounding the economy as a critical infrastructure system, including government services and banking/finance systems, with the objective of developing a working knowledge of these systems, the hazards confronting them, and preventative measures.

**SPCI 512 Critical Infrastructure Systems: Public Health (3)**

Survey of issues surrounding private and public health-care systems in relation to emergency health-care services. Includes health-care cultures, critical communication, government funding, emergency preparedness, and psychological recovery from major traumatic events.

**SPCI 513 Strategic Planning Practicum 3 (3)**

*Whittington* Uses case-based and problem-based approaches to teach the techniques of planning, decision-making, and analysis common to critical infrastructures. Third in a three-course sequence. Offered: WS.

**SPCI 514 Capstone A (3)**

*Whittington* First of two-part capstone course that provides students with the expertise to develop and teach the problem-based case. Offered: ASp.

**SPCI 515 Capstone B (3)**

*Whittington* Second of two-part capstone course that provides students with the expertise to develop and teach the problem-based case. Offered: ASp.

**SPCI 598 Special Topics (1-4, max. 12)**

Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter.

**SPCI 599 Special Projects (1-4, max. 12)**

Independent/tutorial study for graduate students in the Masters in Strategic Planning for Critical Infrastructures Program. Individual reading, research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty advisor most appropriate for the project proposed.

---

## Construction Management

**CM 250 Construction and Culture (3) I&S**

*Rolle* Study of the evolution of modern building construction with emphasis on the relationship between the projects that have been built over time and the people who built them. Focuses on the development of building technology, equipment, and materials used by Western civilizations. Offered: A.

**CM 301 Construction Communications (4)**

Applies business writing to the construction industry. Focuses on planning, writing, and editing documents most critical to a construction manager's professional success.

**CM 310 Introduction to the Construction Industry (3)**

*Emam* Introduction to the construction process, including general overview of organization, relationships, practices, terminology, project types, procurement methods, industry standards, contract documents, and career opportunities. Offered: A.

**CM 311 Construction Documents (2)**

Introduction to construction plans and specifications with emphasis on reading and interpreting them. Focuses on architectural/engineering drawings and associated specifications used in building construction. Prerequisite: CM 310; CM 313, which may be taken concurrently. Offered: A.

**CM 312 Construction Accounting (3)**

*Kim* Introduction to accounting for the contractor, placing emphasis on the analysis and use of financial statements and a job cost accounting system. Open to nonmajors on space-available basis. Offered: A.

**CM 313 Construction Methods and Materials I (4)**

*Dossick* Introduction to basic building materials, with emphasis on techniques for assembly and utilization in residential and light construction, including materials such as concrete, brick, and wood. Offered: AS.

**CM 320 Construction Contract Documents (3)**

Introduction to working drawings, specifications, and other documents designed to enable the student to read and interpret complete set of contract documents for residential and light commercial projects. Emphasis on the organization and uses of architectural/engineering drawings and specifications in the construction process. Offered: WS.

**CM 321 Mechanical Systems in Buildings (3)**

Introduction to building heating, cooling, plumbing, and fire protection systems including aspects of design, construction, estimating, and problem solving. Offered: W.

**CM 322 Electrical Systems in Buildings (3)**

Introduction to electrical construction including electrical distribution from generation to consumption, terminology, equipment and applications, electrical contract documents and estimating, and electrical project management theory and practice. Offered: W.

**CM 323 Construction Methods and Materials II (5)**

Analysis of building methods for structural, non-structural, and design and use of temporary structures including method selection, sequencing, and coordination of specialty trades in commercial and industrial construction. Offered: W.

**CM 331 Construction Estimating I (4)**

*Abdel-Aziz* Introduction to the principles and techniques of estimating construction costs, with emphasis on quantity take-off and pricing elements of work. Prerequisite: CM 323. Offered: Sp.

**CM 332 Construction Equipment Management (3)**

*Schaufelberger* Study of the basic principles, practices, and techniques used in the construction industry for selecting and managing construction equipment. Focuses on understanding the time value of money, estimating equipment ownership and operating costs, selecting the proper equipment for specific construction tasks, and estimating equipment production. Offered: Sp.

**CM 333 Construction Safety (3)**

Explanation of requirements of the Occupational Safety and Health Act and other related federal and state legislation as applied to the building construction industry. Standards for accident prevention, hazard identification, and responsibility for compliance emphasized. Offered: A.

**CM 334 Construction Surveying (2)**

*Jacobson* Introduction to construction surveying including layout of construction features, distance and elevation measurement, and use and care of surveying equipment. Offered: Sp.

**CM 402 Design/Build Studio (6)**

*Dossick* Study of the design/build process with emphasis on the synthesis of design and construction considerations. Focuses on developing design and construction concepts to meet program requirements specified in case studies. Offered: jointly with ARCH 402; W.

**CM 410 Construction Estimating II (5)**

*Rojas* Principles and techniques for estimating commercial construction projects including a mock bid day exercise on a commercial construction project. Prerequisite: CM 331; CM 332. Offered: A.

**CM 411 Project Planning and Control (3)**

*Abdel-Aziz* Introduction to the basic principles, techniques, and practices used as tools by

contractors to plan, schedule, and control costs on building construction projects. Prerequisite: CM 331. Offered: A.

**CM 413 Competitive Business Presentations (1)** *Schaufelberger* Study and development of skills needed to develop and deliver professional construction management presentations. Includes a series of workshops and practical exercises in construction presentation skills, teamwork, and leadership. Offered: A.

**CM 415 Heavy Construction Practices (3)** *Schaufelberger* Introduction to heavy construction with emphasis on highway and bridge construction. Topics include: contract analysis, work breakdown, equipment selection, unit-price cost estimating, site logistics planning, and project scheduling. Offered: A.

**CM 420 Temporary Structures (3)** *Daniali* Study of temporary structures used to support construction operations such as concrete formwork, scaffolding systems, shoring systems, cofferdams, underpinning, slurry walls, and construction dewatering systems. Prerequisite: ARCH 322. Offered: W.

**CM 421 Project Management I (3)** *Kim* Introduction to the organization, management, and administrative functions on construction projects including a hands-on and extensive case study of a commercial construction project, cost control, and introduction to the concepts of Value Engineering, partnering, and Total Quality Management. Prerequisite: CM 410; CM 411. Offered: W.

**CM 422 Computer Applications in Construction (2)** *Abdel-Aziz* Introduction to the use of automated programs for planning, scheduling, and controlling construction projects. Focuses on the use of Primavera Project Planner software. Offered: A.

**CM 423 Construction Law (3)** *Goldblatt* Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Washington state law is emphasized. Entry code required. Open to nonmajors on space-available basis. Prerequisite: CM 421. Offered: Sp.

**CM 425 Concrete Technology (3)** *Nemati* Introduction to the properties and behavior of concrete. Focuses on uses of concrete as a building material and new techniques for concrete construction. Offered: W.

**CM 430 Building Code and Environmental Regulations (3)** Introduction to the permit process, life-safety requirements, and environmental regulations for designs and construction of buildings as established by the national and local jurisdictions. Offered: Sp.

**CM 431 Project Management II (5)** Capstone project using case studies to apply skills, knowledge, techniques, and concepts developed in prior courses. Emphasis on the concept of integrated project management, including cost estimating and bidding, scheduling, cost control, safety, project organization, and documentation. Prerequisite: CM 421. Offered: Sp.

**CM 432 Soils and Foundations (3)** *Daniali* Origin, classification, and physical properties of soil as used in engineering and construction

applications, together with loads and stresses of soil on, and from, the more common types of engineering structures. Prerequisite: ARCH 322; CM 323. Offered: W.

**CM 433 Construction Labor Relations (3)** *Goldblatt* Introduction to construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Offered: W.

**CM 455 Real Estate Development (5)** *Rolfe* Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Offered: A.

**CM 481 Facility Life Cycle 1: Planning (3)** Introduction to facility management. First in sequence of three built around the principle of the facility life cycle. Defines key terms. Examines topics such as ethics, business context, budgets, cost analysis, and strategic planning. Students work in online teams to develop a course-final project.

**CM 482 Facility Life Cycle 2: Design and Construction (5)** Second in sequence of three built around the principle of the facility life cycle. Covers design basics, cost estimates, building materials, project management, and construction administration. Students establish a mentor relationship with a professional facility manager and interview three guest speakers, experts in their fields.

**CM 483 Facility Life Cycle 3: Relocation and Operational Issues (4)** Final in sequence of three built around the principle of the facility life cycle. Provides an overview of issues related to facility operations and maintenance, including occupancy and start up, inventory and staff management, relocation, disaster planning, emergency preparedness, and security.

**CM 485 Facility Management Studio (6)** Applies skills learned through the three facility life cycle courses to the completion of a project that demonstrates the ability to identify and resolve facility management issues. Students are matched with a client in their region.

**CM 498 Special Topics (1-10, max. 20)**

**CM 499 Undergraduate Research (\*, max. 12)** Individual or small-group studies in which students may select topics with approval of faculty sponsor and department.

**CM 500 Design and Construction Law (3)** *Goldblatt* Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington state law. Offered: jointly with ARCH 574. Offered: Sp.

**CM 505 Advanced Integrated Computer Applications (3)** *Rojas* Study of management information systems used in the construction industry. Emphasis on the utilization of current state-of-the-art integration of Computer Aided Design (CAD), scheduling (including advanced concepts such as resource leveling, schedule compression, and cash flow projections), and estimating programs. Offered: S.

**CM 510 Advanced Construction Techniques (3)** *Nemati* Study of techniques and practices used in complex construction projects, including industrial and high-rise structures, building renovation, and tenant improvements. Offered: A.

**CM 515 Innovative Project Management Concepts (3)** *Dossick* Examination of innovative techniques for planning and managing construction projects including use of time-phased, three-dimensional Building Information Models; sustainable construction techniques; and web-based project management tools. Offered: Sp.

**CM 520 Construction Procurement Systems (3)** *Schaufelberger* Study of the different methods used in the procurement and delivery of projects in the construction industry including lump sum, unit price, cost-plus, design-build, and construction management contracts. Offered: A.

**CM 525 Cost Analysis and Management (3)** *Kim* Study of cost management procedures applicable to the building process from the conceptual phase through owner operations, including conceptual estimating, project cost analysis and control, and value engineering and life-cycle costing. Offered: W.

**CM 530 Project Economics and Risk Analysis(3)** *Abdel-Aziz* Studies the process for delivery of public-private infrastructure projects and risk analysis techniques used in economic/financial project studies. Focuses on understanding public-private project delivery systems, feasibility studies, project financial and economic modeling, and quantitative risk analysis techniques. Offered: W.

**CM 535 Research Methods in Construction (3)** *Rojas* Examination of research methods used in construction studies. Includes an overview of the research process, planning of a successful research endeavor, literature review, qualitative and quantitative research, ethics in research and publishing, and various research methodologies. Offered: S.

**CM 540 Sustainable Construction (3)** Study of sustainable construction techniques and best practices. Focuses on use of US Green Building Council's Leadership in Energy and Environmental Design standards to evaluate alternatives and select techniques for constructing sustainable projects. : Sp.

**CM 545 Real Estate Development (3)** *Holm* A study of the technical issues involved in developing real-estate projects. Tracks project development from initial conception through closing of the sale. Emphasizes the steps and processes involved in pursuing, analyzing, and closing a real-estate purchase. Offered: A.

**CM 550 Residential Project Development (3)** *Leahy* Study of the financial, technical, and management activities and environmental impact regulations and studies associated with the development of residential projects, including business and construction practices and marketing strategies for continued profitable operation of a residential construction firm. Offered: Sp.

**CM 555 Construction Firm Management (3)** *Schaufelberger* Management of construction company including organization, corporate structure, operation procedures, marketing, and human resources management. Emphasis on safety and loss prevention management,

insurance and risk management, financing, accounting, marketing construction services, and bonding requirements for construction company. Other topics include individual and corporate planning and process of strategic planning. Offered: W.

**CM 565 Managing International Projects (3)** *Schaufelberger* Study of processes involved in the selection, acquisition, and management of international construction projects. Emphasis is placed on examining common problems associated with managing construction projects outside the United States, identifying risks involved, and discussing possible solutions. Offered: Sp.

**CM 570 Facilities Management (3)** *Emam* Major issues involved in facilities management: facilities planning, financial planning, real estate management, interior space planning and management, facilities operation and maintenance, and emergency preparedness. Offered: A.

**CM 575 Leadership in Construction (3)** *Rojas* Studies leadership principles applicable to the construction industry. Addresses both organizational leadership and leadership of construction processes. Offered: S.

**CM 580 Temporary Structures (3)** *Nemati* Study of materials, methods, and techniques associated with temporary structures used in various construction operations, such as concrete formwork, scaffolding, underpinning, cofferdams, slurry trenches, earth-retaining structures, and dewatering systems. Offered: W.

**CM 582 Heavy Construction Estimating (3)** *Abdel-Aziz* Study of the principles used in developing cost estimates for heavy construction projects. Includes interpretation of contact documents, quantity take-off, pricing, and preparation of unit-price bid documents. Emphasizes developing cost estimates for highway projects. Offered: S.

**CM 584 Marine Construction (3)** *Daniali* Study of the materials, methods and techniques associated with construction of projects in marine environments, including the impact of site conditions on the selection of appropriate construction techniques. Emphasizes equipment and crew selection, productivity and cost estimation, and construction sequencing. Offered: A.

**CM 586 Utility Systems Construction (3)** *Schaufelberger* Study of the materials, methods, and techniques associated with construction of major utility systems, such as water, sewer, communications, electrical or natural gas. Includes construction of central utility plants as well as major distribution and collection systems. Offered: W.

**CM 588 Construction Operations and Productivity (3)** *Rojas* Study of heavy construction operations with emphasis on productivity enhancement focusing on an integrated approach to planning, modeling, analysis, and design of construction operations, and the use of simulation models and other analytical tools. Offered: A.

**CM 590 Research Methods in Construction Engineering (2)** *Schaufelberger* Study of the academic research process. Includes development of a research proposal, review of relevant literature, selection of research methodology,

collection of data, data analysis, and preparation of research report. Offered: Sp.

**CM 598 Special Topics (1-6, max. 6)** Systematic study and offering of specialized subject matter. Offered: AWSpS.

**CM 600 Independent Study or Research (\*)** An in-depth independent investigation of some facet of construction management. Offered: AWSpS.

**CM 700 Master's Thesis (\*)** Offered: AWSpS.

---

## Landscape Architecture

**L ARCH 200 Landscape Architecture Field Trips (2) I&S/VLPA** Five field trips introduce typical landscape architecture projects and demonstrate scope of the landscape architecture field. Visits to major projects in the Puget Sound region include city and county parks, river parks, harbors, downtown redevelopments, streetscapes, campus headquarters, and others. Open to nonmajors.

**L ARCH 300 Introductory Landscape Architecture Design Studio (6) VLPA** Introduction to history and environmental influences in field while developing design and graphic skills. Site analyses and drawing to convey design concepts. Relationship of visual perception to drawing, role of values in design, verbal communication, and behavioral analysis of design process. Required for admission to Bachelor of Landscape Architecture program.

**L ARCH 301 Design Foundation Studio (5)** Introduces site planning and design process, principles, and skills through experiential learning. Using design principles, studio develops vocabulary for site design. Activities foster skills in design process, form, language, creativity, communication, group dynamics, and organization. Methods include readings, discussion, design exercise and projects, critiques, precedent studies, site visits. Majors only.

**L ARCH 302 Site Design in Urban Context (5)** Explores the application of design ideas and principles to urban sites. Theory and research informing the design of human environments and lessons from urban and ecological design precedents are implemented in the design of plazas, urban parks, waterfronts, streets, campuses, commercial areas, and historical sites.

**L ARCH 303 Natural Processes Studio (5)** Project design studies related to natural systems. Emphasizes the innovative use of historical landscape forms to achieve more sustainable landscape performance, using both biophysical and social criteria to define sustainability. Introduces computer mapping applications.

**L ARCH 310 Landscape Architecture Field Sketching (2)** Introductory level sketching of landscape subjects: natural and urban sites, plants, animals, architectural elements. Emphasis on perspective. Various media, including pencil, charcoal, markers, ink wash, water color.

**L ARCH 311 Introduction to Design Graphics (2)** Introduction to communication techniques for

various phases of the design process. Many techniques are introduced and their suitability and appropriateness for different purposes explored.

**L ARCH 322 Introduction to Planting Design (3) VLPA** Traditional ways plants are used in landscape design. Composition and design characteristics of plant materials. Technical considerations for selection, climate, cultural suitability, availability, costs, and maintenance. Open to nonmajors.

**L ARCH 323 Topics in Planting Design I (1)** Explores planting design topics that relate specifically to site, program and design issues addressed in concurrent studio projects. Identifies and describes native and ornamental trees and shrubs on the UW campus and vicinity. Utilizes tree canopy layers, shrub masses and ground plane layers as space forms in studio project designs. Concurrent with L ARCH 301.

**L ARCH 324 Topics in Planting Design II (1)** Explores planting design topics that relate specifically to site, program and design issues addressed in concurrent studio projects. Utilizes trees, shrubs and herbaceous plants as space forms in urban contexts. Utilizes plant characteristics of color, texture, and form in studio project design. Considers design principles of unity/diversity, complexity/simplicity and pattern in studio project design. Concurrent with L ARCH 302.

**L ARCH 325 Topics in Planting Design III (1)** Explores planting design topics that relate specifically to site, program and design issues addressed in concurrent studio projects. Considers trees, shrubs and herbaceous plants of natural and ecosystems human-made plant communities. Considers plant community dynamics and changes over time. Concurrent with L ARCH 303.

**L ARCH 331 Landscape Construction (4)** Basic course in site engineering, correlating the design and technical aspects of site development and suitability. Grading, drainage, circulation requirements and alignment, organization concepts relative to landscape resources, site evaluation, utilization and protection, and building and site program analysis and coordination.

**L ARCH 332 Landscape Construction (4)** Materials and structures in landscape construction. Design criteria and construction techniques for detail elements of landscape architecture. Working drawings, specifications, cost estimates, and procedures.

**L ARCH 341 Site Planning (3)** Introduces urban ecological design issues for good site planning processes, principles, and methods. Linked with L ARCH 301. Addresses planning for people, natural systems in place-making, design for movement with carried land uses. Includes readings, discussions, presentations, campus walks, case studies, graphic and written assignments.

**L ARCH 352 History of Landscape Architecture (3) I&S/VLPA** Survey of the development of landscape architecture as an art form from Mesopotamia to the present. Relationships to physical landscape, climate, culture, religion, and other arts. Open to nonmajors.

**L ARCH 353 History of Modern Landscape Architecture (3) I&S/VLPA** Development of

profession and art of landscape architecture in the United States, Europe, South America, and Japan in relation to prevailing social, economic, political, and cultural factors. Relationships with other professions, especially architecture and urban planning, and other arts, such as painting and sculpture. Open to nonmajors.

**L ARCH 361 The Human Experience of Place (3) I&S/VLPA** Interdisciplinary approaches to exploring the reciprocal relationship between people and the landscapes of everyday life. Through readings, discussion, in-class activities and mini-projects, students study place attachment, relationships to nature, environmental attitudes and perception, personal space, territoriality, urban public space, diversity, participation, and the politics of space. Open to nonmajors.

**L ARCH 362 Designing Urban Landscapes: Theory and Politics (3) VLPA** Introduction to the design of landscape in urban contexts. Overview of major urban design theories and examples of historic and contemporary work. Discussion of the contesting urban processes: visions of city, social and cultural factors, public and community process, and the discourses of nature, urban ecology, and ecological design.

**L ARCH 363 Ecological Design and Planning (3) NW** Introduction to landscape ecological theory applied to urban environments. Comparison of different vocabularies used to describe landscape structure and function, from the fields of landscape design, urban design, and biology. Discussion of design theories that have sought to re-center landscape planning and design around the goal of achieving ecological sustainability.

**L ARCH 401 Urban Recreation Design (1-6) I&S/VLPA** Special studies in metropolitan, urban, and neighborhood recreation areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

**L ARCH 402 Neighborhood Design Studio (1-6, max. 6)** Studio at neighborhood and site scales, mixed use. Incorporates urban design theory, precedents, neighborhood/project issues, and community clients. Skills in neighborhood and site analysis, programming, designs are developed in groups and individually. Methods include readings, research, critiques, field studies, and graphic, written and verbal presentations.

**L ARCH 403 Cultural Landscape Studio (1-6, max. 6)** Studies of the landscape at various scales and in diversified contexts. Offers better understanding of visual components of landscapes, designer's capacity to evaluate and change these components, and resultant interaction with, and effect on, landscape user.

**L ARCH 406 Individual Design Studio (6)** Senior projects in landscape architecture; projects vary according to the student's particular emphasis and needs.

**L ARCH 411 Landscape Graphics (3)** Introduces fundamental hand-drawn graphic conventions, drawing techniques, and media used in environmental design. Emphasizes building drawing and media skills that support design ability development. Includes lectures, demonstrations, display of examples, drawing from slides, and in-class workshops.

**L ARCH 412 Landscape Communications (2)** Development of advanced skills of visual representation to communicate students' visions for urban ecological design. Discussion of professional portfolio requirements and portfolio design issues.

**L ARCH 423 Planting Design Studio (3)** Utilization of plants as design elements to manipulate space and modify the landscape for various activities and resolutions of site problems. Factors that determine the appropriate use and arrangement of plant materials in an urban context. Composition, plant selection, planting techniques, and maintenance requirements are major components of this class.

**L ARCH 424 Advanced Planting Design Seminar (2)** Analyzes the complex relationship between plants, man, and environment and affords opportunity to explore methods of utilizing these relationships to plant and to design more responsive landscapes.

**L ARCH 425 Advanced Planting Design Studio (1-6, max. 6)** Advanced seminar/studio in planting design. Provides opportunity to explore ecological, technical, and esthetic principles for selecting plants to meet specific site conditions. Project types include historical sites, multifamily housing projects, plazas, landfills, and reclamation sites.

**L ARCH 433 Large-Scale Site Construction (4)** Includes studies of natural determinants and restraints on large-scale construction, development affected by service and utility systems, physiographic suitability of site, cost-benefit analysis, and critical path methodology for site construction projects.

**L ARCH 440 Computers in Landscape Architecture (1-3, max. 3)** Laboratory, lecture, and demonstration classes to introduce software applications specific to required landscape architecture courses. Credit/no credit only.

**L ARCH 441 CAD for Landscape Architecture (3)** An introduction to computer-aided drafting for professional landscape architectural practice. Students work in a variety of scales from detail, to planting design, to master plan graphics, to gain a broad-based knowledge of current industry CAD practices and techniques. Emphasizes using CAD as an effective design tool.

**L ARCH 450 History of Environmental Design in the Pacific Northwest (3) VLPA** Development of landscape architecture, architecture, and urban planning in the Pacific Northwest from nineteenth century to the present, with major emphasis on twentieth century. Open to nonmajors.

**L ARCH 451 History of Environmental Design on the West Coast (3) VLPA** Development of the environmental arts of landscape architecture, architecture, and urban planning from the eighteenth century to the present, with major emphasis on the twentieth century. Open to nonmajors.

**L ARCH 452 History of Urban Landscapes (3)** Introduces the history of urban landscape design of public spaces in cities. Comparative survey of non-western cultures, including China, Japan, Islamic world, and Pre-Columbian countries to the western world from the Pre-Classical through nineteenth and twentieth century in Europe and USA. Examines as pragmatic practices or works of art.

**L ARCH 463 Urban Recreational Design (3) I&S/VLPA** Special recreational studies in metropolitan, urban, and neighborhood areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

**L ARCH 470 Landscape Architecture Tutorial (2, max. 6)** Various aspects of project organization, programming, scheduling of work loads, graphic and verbal communication problems, data collection methods and interpretation, methodologies for landscape planting and design.

**L ARCH 473 Professional Practice (3)** Professional practice in private office, academic institutions, and public agencies. Evolution of landscape architecture as a profession, possible scenarios for future, variety of practice types and their relationships, ethical and legal/contractual responsibilities of a professional.

**L ARCH 474 Project Design (1-6, max. 6)** Detailed design studies of small-to-medium-scale projects. General focus on public landscape areas and social/psychological uses of site. Specific focus on design development and professional office presentation.

**L ARCH 475 Advanced Project Design Studio (1-6, max. 6)**

**L ARCH 476 Professional Operations (3-6, max. 6)** Practicum course for landscape architecture majors for internship and exposure to the profession with working experiences at various levels of professional endeavor. Student apprenticeship in selected private offices and public agencies. Credit/no credit only.

**L ARCH 477 Landscape Architecture Consultancy Studio (3-6, max. 6)** Simulation of the professional relationship of the landscape architect as a consultant to University students in other design planning and management disciplines. Focus is on site analysis, master planning, schematic designs and detailed design, working drawings, and planting plans associated with student projects.

**L ARCH 495 Landscape Architectural Studies Abroad (1-10, max. 30)** Studies conducted under faculty supervision in various locations outside the United States.

**L ARCH 498 Special Projects (1-10, max. 30)** Special projects as arranged. Open to nonmajors.

**L ARCH 499 Undergraduate Research (1-9, max. 9)** Individual or small-group studies pertaining to special problems, theories, or issues of landscape architecture and environmental issues.

**L ARCH 501 Landscape Design and Planning I (1-6)** Enhances perceptual awareness and design sensitivity to natural and man-made landscapes. Basic skills necessary for more advanced course work required in the Master of Landscape Architecture degree program. Examination of landscape environment through problem-solving techniques that acknowledge holistic approach to the environment.

**L ARCH 503 Landscape Design of Communities (1-6)** Methods and techniques for developing physical design solutions and implementation strategies in neighborhoods and small communi-

ties. Social, economic, political, and individual forces affecting community development and growth. Comparison of several communities, identifying pertinent landscape issues, potential design solutions, and methods for achieving design goals through the political process.

**L ARCH 504 Regional Landscape Planning (1-6)** Application of landscape ecological theory to the design of urban environments. Focuses on the strategic design of urban infrastructure, including underground drainage systems, roads, parks, transit systems, and on understanding the cumulative performance of urban sites.

**L ARCH 505 Regional Landscape Design (1-6)** Theory/techniques of regional design to analyze, evaluate, plan, design, and manage the resources of the regional landscape continuum.

**L ARCH 506 Landscape Visual Resources (1-6)** Survey of existing theory/techniques and the generation of new methods to analyze, evaluate, plan, design, and manage the visual resources of the landscape.

**L ARCH 507 Landscape Art (1-6)** Public art placed in, or developed for, specific landscape settings. Various aspects and benefits of public art, including materials, technologies, philosophies of landscape imagery and meaning. General planning criteria for location for maximum public benefit and identification of objectives for a specific site and artwork.

**L ARCH 511 Visual Learning (3)** Seminar/laboratory to develop visual learning processes and skills for applying these processes to landscape architecture. Related visualization concepts.

**L ARCH 523 Landscape Technology (1-6)** Studio on rehabilitation of stressed urban landscapes. Focus varies but often deals with an analysis of the potentials in urban watershed and the study of alternative site designs for enhancing a range of landscape functions related to water quality. Taught by an interdisciplinary team.

**L ARCH 550 History and Theory of Modern Landscape Architecture (3)** Lecture/seminar on history and theory of landscape architecture from the eighteenth century to the present. Relation to theory in related environmental design disciplines such as architecture and urban planning and other disciplines such as geography.

**L ARCH 561 Regional Landscape Planning and Design (2)** Discussion of theories and case studies that provide a framework for defining sustainable urban design as both a cultural and biophysical phenomenon.

**L ARCH 562 Landscape Art (2)** Process of developing and placing artwork in specific landscape settings. Types of artwork and landscape settings; ways for artist and site designer to interpret, alter, and incorporate factors of landscape; viewer's perception and experience; examples of public and private support.

**L ARCH 570 Scholarship and Inquiry (3)** The first of two required courses on the nature of scholarship and theory building in landscape architecture. Investigate scholarship related to the design process, design critique, research, and practice. Students begin to frame their own scholarship for their master's thesis.

**L ARCH 571 Seminar on Landscape Architecture Research (3)** Introduction and exploration of problems and opportunities of several basic research methods currently employed in landscape architecture research. Emphasis on how researchers identify research topics and develop appropriate research methods. Introduce analysis and interpretation of research results.

**L ARCH 590 Seminar in Landscape Architecture (1-3, max. 12)** Advanced topics in landscape architecture with focus on unpublished areas of research.

**L ARCH 598 Special Topics (1-6, max. 9)** Systematic study of specialized regional landscape subject matter, including history, technology, implementation, and other topics depending on current interest/needs. Topics vary and are announced in the preceding quarter.

**L ARCH 600 Independent Study or Research (\*)**

**L ARCH 601 Internship (3-9, max. 9)** Credit/no credit only.

**L ARCH 700 Master's Thesis (\*)**

---

## Urban Design and Planning

**URBDP 300 Introduction to Urban Planning (5) I&S** *Ludwig* Principles and theories of urban structure and institutions. Concepts and logic of planning as a community process and a professional activity. Evolution of planning ideas in response to changing social, economic, and environmental conditions within the American political framework. Complementary nature of public and private responsibilities. Major procedures used by planners.

**URBDP 301 Database Management Fundamentals (3)** Introduces the tasks and roles that contribute to the management of the design and security of database systems in an organizational context. Students gain a basic understanding of database management systems and administrative practices, as well as hands-on database experience. Credit/no credit only.

**URBDP 370 Reading the City (5) I&S/VLPA** *Ryan* Comprehending cities as reflection of individual reader and social/cultural context. Skills for analyzing everyday, visible evidence of the city. Topics include self-identity with place, city, image and perception, visual design analysis and place as representation of culture. Extensive writing, multiple texts, collaborative work in groups and field work.

**URBDP 407 Urban Planning Studio (5) I&S/VLPA** Synthesis of urban design and planning problems and methods in a laboratory section.

**URBDP 420 Database Systems and Planning Analysis (3)** Applications of relational database management systems in urban design and planning. Emphasis on practical aspects of database design and use. Design, create, and modify databases and database applications, including spatial databases. Introduction to GIS. Use of personal computers linked to desktop mapping packages and relational database management systems.

**URBDP 422 Urban and Regional Geospatial Analysis (5)** *Alberti* Principles of GIS applied to problems in urban design and planning, landscape architecture, and environmental and resource studies. Practical problem-solving approaches using contemporary desktop mapping packages and vector and raster GIS systems. Siting, environmental evaluation and inventories, and modeling. Prerequisite: 3.0 in URBDP 420. Offered: W.

**URBDP 429 Computer-Aided Planning of Urban Systems (3)** Survey of on-line planning applications; use of various on-line systems to solve urban systems design problems; investigation of hardware/software trade-offs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with CEE 418.

**URBDP 443 Problem Analysis in Urban Ecology (5) I&S/NW** *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluated how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with ESRM 474/GEOG 486/ENVIR 486; A.

**URBDP 444 Applied Theory and Methods in Urban Ecology (5) I&S/NW** *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: URBDP 443. Offered: jointly with CFR 475/GEOG 487/ENVIR 487; W.

**URBDP 445 Research in Urban Ecology (5) I&S/NW** *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Students write and orally present revised objectives and methods sections of their interdisciplinary project and present a draft results section. Prerequisite: URBDP 444. Offered: jointly with CFR 476/GEOG 488/ENVIR 488; Sp.

**URBDP 446 Practical Experience (4, max. 8)** *Rolfe* Off-campus internship under academic supervision in situations useful to the education of planners, such as public/private planning and design offices, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects.

**URBDP 450 Introduction to Land Use, Growth Management, and Environmental Planning (3)** *Bae* Provides an understanding of contemporary land use issues (including sprawl, smart growth, new urbanism, transit-oriented development, and Washington's Growth Management Act) and examines their environmental impact and social welfare implications. Analyzes best-practice techniques of growth management. Offered: A.

**URBDP 451 Housing (3) I&S** *Ludwig* Survey of housing and redevelopment problems, theories, standards, and practice. Development of public policies, finance, technological considerations, social factors, and priorities. Prerequisite: 3.0 in URBDP 300.

**URBDP 452 Urban Development and Spatial Structure (3) I&S** *Miller* Physical and functional structure of urban areas, with major focus on locational decision making in households, firms, and other organizations, and space demands of these urban activities. Selected land-use models illustrating use of this theoretical understanding for forecasting competition, land-use conflicts, and the land-conversion process.

**URBDP 453 Introduction to Urban Economics and Development (4) I&S** *Waddell* Introduction to urban economics and impacts on real estate development with emphasis on land allocation, location theory, rent/value theory, factors affecting growth and decline of cities, and the role of governmental regulation/policy/finance in controlling real estate development. Offered: jointly with CM 453.

**URBDP 457 Housing in Developing Countries (3)** *Ludwig* Emphasis on role of the design and planning professional in housing delivery in developing countries. Exploration of issues of culture, political environment, social context, economic circumstances, and other factors which define and limit the manner in which the professional planner and designer can and should function.

**URBDP 460 History of City Development (3) I&S/VLPA** *Dubrow* Analysis of city forms and designs, emphasizing their relation to the culture of each period.

**URBDP 461 History of Urban Planning in the United States (3) I&S** *Hancock* Seminar in origins, development, and significance of the American planning movement and the profession that emerged from it, as defined by some of its seminal innovators, theories, practices, and achievements, and as evaluated by cultural realities thereby served.

**URBDP 465 Land Use (3) I&S** *Westerlund* Land use as a substantive focus for urban and regional planning and growth management. Consideration of data collection, analysis, plan development, and implementation methods. Seminar and group project sections.

**URBDP 466 Infrastructure and Community Facilities (4) Blanco** Issues and methods associated with planning for parks, schools, drainage, sewerage, utilities, libraries, solid waste and transportation. Covers their relationship to comprehensive plans, project permitting and impact assessment. Financing, regulating, and relationships to social, environmental, and economic goals are discussed.

**URBDP 467 Urban Planning Uses of Remote Sensing (3) Westerlund** Using aerial photographs and satellite image data in urban planning. Urban change analysis, land-use and land cover classification, and environmental planning applications. Scale and resolution considerations. Development of proficiency through laboratory exercises and use of image-processing software.

**URBDP 468 Land Use From Satellite Data (3) Westerlund** Digital data from Landsat and other sources used to determine land-use and land-cover classification in urban and rural areas. Hands-on exercises on computer. Photo interpretation, statistics, land-use classification, and verification are incorporated.

**URBDP 470 Introduction to Urban Design (3) I&S/VLPA** *Rolfe* Definitions and examples of

urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning.

**URBDP 471 History of Urban Design (3) I&S/VLPA** *Streatfield* Aspects of form, pattern, and space that mark efforts of individuals and groups to express their values and goals in the design of their cities. Special attention given to both historical and modern examples.

**URBDP 472 Creativity and Culture in Design (3) Kasprisin** Exploration of creativity in design from a system theory perspective. Theoretical readings in physics, biology, and behavioral science balanced with practical approaches and case studies in urban design and architecture literature. Offered: A.

**URBDP 474 Site Planning: Issues and Techniques (3) Abramson** Introduction to site planning; how it is regulated; why it is important to know; and how to carry out its key tasks, including residential subdivision and mixed-use development layout; basic topographical and hydrological analysis and manipulation; roadways, parking and hierarchies of circulation, and site design detail. Offered: Sp.

**URBDP 479 The Urban Form (3) VLPA** *Moudon* Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

**URBDP 481 Metropolitan Planning and Development in Developing Countries (3) I&S** *Ludwig* Examination of the nature and causes of urban planning and management problems in developing countries and exploration of alternative approaches to solve some of these problems.

**URBDP 482 Politics and Planning (3) I&S** Explores the need to understand the crucial role of politics in the planned development of American communities, to think critically and constructively about the relationship of politics and development and ways to make it as democratic and equitable as possible, and to strengthen analytical and writing skills.

**URBDP 494 Alaska Field Study (2-5, max. 10) Kasprisin, Westerlund** Travel to Alaskan communities for interpretation of natural systems, history, cultures, settlement patterns, and current issues of planning and economic development. Meetings with community leaders and planners. Students either select a topic for field and documentary research, or participate in intensive charrette-type projects or quarter-long projects in communities. Offered: Sp.

**URBDP 498 Special Topics (1-9, max. 15)** Systematic study of specialized subject matter. Topics for each quarter vary, depending upon current interest and needs, and are announced in the preceding quarter.

**URBDP 499 Special Projects (1-12, max. 12)** Independent/tutorial study for undergraduates. Individual reading, research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty adviser most appropriate for the project proposed. A report on the purposes, procedures, and results of the study is required.

**URBDP 500 Survey of Urban Planning (4) Miller** Concepts and logic of planning as a professional activity. Evolution of guiding ideas in relation to changing social, economic, and environmental conditions within the American political framework. Major procedures used by planners. Critical appraisal. Open to graduate students in urban design and planning and to graduate students in architecture seeking the urban design certificate.

**URBDP 501 Comprehensive Planning and Implementation (3) Born, Spangenberg, Tovar** Reviews the comprehensive planning process as a part of managing metropolitan growth. Examines federal/state statutes affecting local government comprehensive plans. Includes local government land use regulations and reviews development process. Concentrates on tools to shape land use and development patterns and their effectiveness in creating outcomes specified in comprehensive plans. Offered: W.

**URBDP 503 Communication and Analysis (3) Kasprisin** Development of communication skills understanding within the planning and design process. Presentation of communications as a design process with mental, visual, oral, written, and kinesthetic cognitive actions combined to form communications thinking. Offered: W.

**URBDP 506 Planning Studio Prep (2)** Introduces plan-making process, provides time for background research, issue identification, public involvement, and preliminary analysis.

**URBDP 507 General Urban Planning Laboratory (4)** Studio/field project in applied professional planning of a comprehensive nature, utilizing a local study area to examine the realities of problem solving in situations of functional and normative conflict. Integration of analysis, programming, implementation, and presentation phases of the planning process.

**URBDP 508 Specialized Planning Laboratory (5, max. 10) Blanco, Dubrow, Kasprisin, Moudon, Rolfe, Westerlund** Studio/field project on a specialized planning problem. Several options are offered each year, such as regional-environmental planning, housing, metropolitan planning, and urban design. Prerequisite: ARCH 500 and ARCH 507. Additional prerequisite for some sections: urban planning seminar or lecture courses.

**URBDP 509 Resources for Urban Planning (1)** Provides an opportunity for students to explore and discuss issues of professional practice with practicing planners in an informal context. Questions posed by the participants usually emphasize practical aspects of working as planners. Credit/no credit only.

**URBDP 510 Theories and Methodologies of Planning I (4) Bae** Survey of the philosophy, methods, and analytical techniques used in planning public actions and policies, with emphasis on the logic and assumptions upon which these are based. Various planning surveys and methods. Open to graduate students in urban design and planning and to graduate students seeking the urban design certificate. Prerequisite: URBDP 500.

**URBDP 511 Theories and Methodologies of Planning II (4) Blanco**

**URBDP 512 Research Seminar (3) Miller** Planning, designing, and undertaking applied research in an urban setting. Framing, critically

assessing, managing, and presenting research used in urban planning and design. Conceptual modeling of causal relationships, choice among experimental and quasi-experimental designs, and ethical and political implications of research undertakings. Exercises leading to a complete research design. Offered: A.

**URBDP 519 Qualitative Research Planning (3)** Qualitative research methods covering both the theoretical foundations and practical methodologies of traditional and innovative approaches, including cognitive mapping, open-ended interviews, ethnographic observation, hermeneutics, phenomenology, critical theory, communicative action, grass-roots empowerment, post-structuralism, and self organization.

**URBDP 520 Quantitative Methods in Urban Design and Planning (4)** *Bae* Methods of statistical and mathematical analysis in design and planning. Emphasizes the use of computer packages for analyzing urban data. Regression, matrix methods, cohort-survival populations models with examples solved on microcomputers. Prerequisite: college mathematics and basic course in probability and statistics.

**URBDP 525 Evaluation in Urban Planning (3)** *Miller* Methods and techniques for a priori assessment of physical improvement plans, program designs, public policies. Includes cost effectiveness and matrix or goal achievement, as well as more conventional cost-benefit and cost-revenue forms of analysis. Emphasis on understanding the reasoning and issues in evaluation, and gaining a working competence in at least one of the methods treated.

**URBDP 530 Land-Use/Transportation Models (3)** *Waddell* Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land-use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered: jointly with CEE 588.

**URBDP 537 Open Space Land Uses (3)** *Westerlund* Exploration of public and private values of open space; its aesthetic, environmental, recreational, natural resource uses from development sites to metropolitan regions. Methods of open space inventory, analysis; legal and administrative tools for preserving and managing open space; development of multipurpose open space programs in local governments. Prerequisite: URBDP 500.

**URBDP 543 Problem Analysis in Urban Ecology (5)** *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with CFR 574; A.

**URBDP 544 Applied Theory and Methods in Urban Ecology (5)** *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objective and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite:

URBDG 543 or permission of instructor. Offered: jointly with CFR 575; W.

**URBDP 545 Research in Urban Ecology (5)** *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present a draft results section. Prerequisite: URBDP 544. Offered: jointly with CFR 576; Sp.

**URBDP 546 Practicum (4, max. 8)** *Rolle* Off-campus experience under academic supervision in situations useful to the education of planners, such as planning offices, public bureaucracies, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects. Credit/no credit only. Prerequisite: permission of instructor.

**URBDP 547 Professional Project (1-9, max. 9)** Independent development of client oriented project involving application of professional planning/design methods and approaches. Professional-quality report relates project to larger professional context, addresses alternative approaches/methods and includes an evaluation of the project. Master of Urban Planning students only, taken in lieu of 700. Not recommended for those continuing into Ph.D. program. Credit/no credit only.

**URBDP 548 Advanced Urban Ecology (5)** *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Discussion of current and important theoretical and empirical papers in urban ecology. Students continue to research interdisciplinary urban ecology projects while developing publishable manuscripts and oral presentations. Emphasizes research ethics, diverse views, and presentation skills. Prerequisite: URBDP 543, 544, 545. Offered: jointly with CFR 580/GEOG 588; AWSp.

**URBDP 549 Hazard Mitigation Planning (3)** A survey of the field of planning for managing risks of natural hazards—earthquakes, floods, coastal/meteorological hazards, and human-caused technological hazards/terrorism. Covers pre-event mitigation through building and land-use controls; disaster preparedness; post-event response, recovery, and mitigation of future hazards. Emphasizes hazard mitigation as a long-term strategy for achieving sustainability of communities.

**URBDP 552 Real Estate Process (4)** *De Lisle* Introduction to the real estate process including concept generation, market research, design, construction, finance, and transactions. Offered: A.

**URBDP 553 Real Estate Appraisal and Feasibility (4)** Introduction to real estate feasibility analysis, including an emphasis on individual property market analysis, permitting, investment, decision-making, and market behavior. Focuses on building basic research skills to determine economic viability and marketability of real estate projects. Prerequisite URBDP 552.

**URBDP 554 Real Estate Finance (4)** *De Lisle* Overview of real estate finance and investment analysis, including a survey of capitol markets, banking regulations, interest/discounting theories, debt instruments, and project financing. Prerequisite: URBDP 552.

**URBDP 555 Real Estate Development (4)** *Rolle* Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Prerequisite: URBDP 522.

**URBDP 556 Real Estate Investment (4)** *Rolle* Analysis of private and public real-estate investment decisions using case studies of individual development projects. Focuses on application of principles introduced in URBDP 552, 553, 554 and 555. Offered: Sp.

**URBDP 558 Real Estate Market Analysis (4)** Fundamentals of market analysis for commercial and residential real estate projects. Demand for real estate by property type, methods for analyzing and forecasting population, employment, and income in a regional economy; competitive supply and capture rate analysis; retail trade area analysis; and integrating market studies into financial feasibility analysis.

**URBDP 560 Urban Affairs (3)** Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with PB AF 560.

**URBDP 561 Urban Economics and Public Policy (3)** Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PB AF 516 or equivalent. Offered: jointly with PB AF 561.

**URBDP 562 Introduction to Neighborhood Planning and Community Development (3)** Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle's experience, NIMBYism, security, neighborhood character, housing segregation, environmental racism. Offered: jointly with PB AF 562.

**URBDP 563 Seminar in Urban Planning and Policy (1)** Seminar for students in the MPA/MUP concurrent degree program. Explores topics that intersect urban planning and policy, through exchange with faculty and professionals working in this arena. Focuses on developing thesis topics that explore this intersection. Offered: jointly with PB AF 563.

**URBDP 564 Planning history, theory and ethics (3)** Examines major historical landmarks since the Civil War (urban, suburban, and rural, physical and social-economic); theoretical alternatives (rationalism, pluralism-advocacy, critical theory, bio-regionalism, dissipative models); and ethical issues (such as distributive justice and principles of professional conduct).

**URBDP 565 American Urban History (3)** Intensive lecture/seminar designed to provide

students the opportunity for the immersion in historical scholarship that addresses the social, economical, political, technological, and cultural forces that have shaped the development of American cities.

**URBDP 567 Democracy, Citizenship, and Participation in the City (3)** *Purcell* Graduate seminar on democracy in cities. Focuses on contemporary ideas, debates, and initiatives. Offered: Sp.

**URBDP 570 Urban Design Process (3)** *Rolfe* The study of concepts, methods, and processes basic to planning, design, and effectuation. Credit/no credit only. Prerequisite: specialization in urban design or permission of instructor.

**URBDP 571 Research and Analytical Methods for Urban Design (3)** *Moudon* Conceptual framework for an epistemology of urban design and physical planning. Review of relevant research in related fields and disciplines. Prerequisite: specialization in urban design or permission of instructor.

**URBDP 572 Case Studies in Urban Design and Development (3)** *Kasprisin* Wide range of urban design and development projects recently completed. Effective urban design implementation, including design process, decision making, administration, management. Tools and techniques such as design analysis, policy making, regulation, design review, taxation, financing. Prerequisite: URBDP 510 and URBDP 580 and/or permission of instructor.

**URBDP 573 Digital Design (4)** Uses digital technologies for mapping, drafting, modeling and communication. Includes real-world case study projects that focus on urban design and planning issues. Offered: Sp.

**URBDP 574 Residential Design: Methods and Practices (3)** *Dubrow* Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America.

Focus on selected contemporary issues in neighborhood and dwelling design, methods and practices. Offered: jointly with ARCH 593.

**URBDP 576 Pedestrian Travel, Land Use, and Urban Form (3)** *Vernez Moudon* Graduate seminar concentrating on walking as a mode of transportation in cities and city-regions, including social, cognitive, and perceptual dimensions of pedestrian movement and behavior theory. Offered: jointly with CEE 586; Sp.

**URBDP 580 Legal and Administrative Framework for Planning (3)** *Blanco* Political, legal, and administrative institutions closely related to the planning process. Issues of devolution of authority and public representation and participation. Legal basis for planning and associated regulation.

**URBDP 585 Introduction to Historic Preservation Planning (3)** *Dubrow* Theories, methods, and practices associated with historic preservation planning. Overview of preservation planning programs at federal, state, and local levels. Introduction to tools and methods needed to identify, document, evaluate, and plan for protection of historic properties. Provides opportunity to learn fundamentals of preservation planning through practical experience. Offered: Sp.

**URBDP 586 Implementation in Preservation Planning (4)** Practical experience in identifying, documenting, evaluating and developing strategies for protection of historic resources, building on introductory theories, methods, and practices. Develops skills critical to preservation planning via research, fieldwork and writing. Prerequisite: introductory course in preservation.

**URBDP 587 Preservation and the Vernacular Environment (3)** *Dubrow* Exploration of theoretical, methodological, and practical issues related to the preservation of vernacular architecture and cultural landscapes in the United States. Offered: W.

**URBDP 591 Doctoral Seminar I (4-)** Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

**URBDP 592 Doctoral Seminar II (4-)** Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

**URBDP 593 Doctoral Seminar III (4-)** Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

**URBDP 597 Pacific Northwest Bioregion Forum (1)** *Kasprisin* Exchange between universities of Pacific Northwest to share ideas and information on planning related ecological issues within the bioregion.

**URBDP 598 Special Topics (1-6, max. 15)** Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter. Prerequisite: permission of instructor.

**URBDP 600 Independent Study or Research (\*)**

**URBDP 700 Master's Thesis (\*)**

**URBDP 800 Doctoral Dissertation (\*)**

### American Ethnic Studies

#### Afro-American Studies

**AFRAM 101 Introduction to African American Studies (5) I&S** History, culture, religion, institutions, politics, economics, arts, and psychology of peoples of African descent as developed from experience in both the old and new worlds. Multidisciplinary analysis of social life from a Black perspective as illustrated in selected historical and contemporary writings.

**AFRAM 150 Introduction to African-American History (5) I&S** Introductory survey of topics and problems in Afro-American history with some attention to Africa as well as to America. Basic introductory course for sequence of lecture courses and seminars in Afro-American history. Offered: jointly with HSTAA 150.

**AFRAM 214 Survey of Afro-American Literature (5) VLPA** *Butler* A chronological survey of Afro-American literature in all genres from its beginnings to the present day. Emphasizes Afro-American writing as a literary art; the cultural and historical context of Afro-American literary expression and the aesthetic

criteria of Afro-American literature. Offered: jointly with ENGL 258.

**AFRAM 220 Third World Images in Film (5) I&S/VLPA**

**AFRAM 246 African American Politics (5) I&S** *P. Rivers* Survey of African Americans within the U.S. socio-political processes. Situates African Americans within a post-civil rights context where there is debate about race's centrality to an African American politics. Recommended: either AES 150, AFRAM 201, or POL S 202. Offered: jointly with POL S 246.

**AFRAM 260 African American Family (5) I&S** This course explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with SOC 260.

**AFRAM 261 The African-American Experience Through Literature (5) I&S/VLPA** *Scott* Instructs students in hermeneutical and sociological methods of analyses. Analyzes

selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personality. Offered: jointly with SOC 261.

**AFRAM 270 The Jazz Age (5) I&S** *Walter* Interdisciplinary study of period after World War I to Great Crash. Afro-American and Anglo-American currents and impulses that flowed together in the Roaring Twenties. Covers politics of normalcy, economics of margin, literature of indulgence and confusion, transformation of race relations, and cultural influence of jazz. Offered: jointly with HSTAA 270.

**AFRAM 272 History of the South Since the Civil War (5) I&S** *Walter* Reconstruction and its aftermath, the Agrarian (Populist) revolt, disfranchisement and segregation, the effects of urbanization and subsequent depression, desegregation, and the struggle for civil rights. Examines the New South, the conflict of ideology with structural and material change, and the place of the South in contemporary America.

**AFRAM 306 Basic Swahili (5) Maulana** Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill

and an introduction to written texts of graded difficulty.

**AFRAM 307 Basic Swahili (5) *Maulana*** Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill and an introduction to written texts of graded difficulty. Prerequisite: AFRAM 306.

**AFRAM 308 Basic Swahili (5) *Maulana*** Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill and an introduction to written texts of graded difficulty. Prerequisite: AFRAM 307.

**AFRAM 309 Intensive Basic Swahili (15) *Maulana*** First-year Kiswahili language. Introduces students to Kiswahili and allows them to explore and understand not only the language but also the diverse cultures and customs of the people of East Africa. Provides a basic foundation in speaking, reading, and writing. Primary emphasis on basic structure of Kiswahili and its operation. Offered: S.

**AFRAM 315 Black Identities and Political Power (5) I&S *Rivers*** Relates the deployment of political power within institutions to shifting racial identities. Shows how racial identities both reflect and inflect relations of domination and resistance within and between cultures in the black diaspora. Prerequisite: either AES 150, AFRAM 150, AFRAM 201, or POL S 201. Offered: jointly with POL S 315.

**AFRAM 320 Black Women in Drama (5) VLPA** Character types of Black women as represented in plays by Black women. Some Black male playwrights are juxtaposed with Black female writers for comparative analysis. Playwrights include Georgia Douglas Johnson, Angelina Grimke, Alice Childress, Lorraine Hansberry, Ira Aldridge, LeRoi Jones.
