ESS 514 Geophysics: Fluids (3) Geophysical fluid dynamics. Fluids in geophysics with emphasis on the oceans. Development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Includes advanced, research-oriented problems. Prerequisite: PHYS 322, MATH 307, and MATH 308 or equivalent.

ESS 515 Geophysics: Space (3) Various phenomena occurring in outer regions of Earth's atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Includes advanced, research-oriented problems. Prerequisite: PHYS 321 or equivalent.

ESS 516 Geophysics: The Atmosphere (3) Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Includes advanced, research-oriented problems. Prerequisite: ESS 514.

ESS 517 Early Earth Evolution (3) Geological, biological, and environmental evolution of the Earth over the first 4 billion years of its history, as an analogue for the development of other habitable planets.

ESS 518 Technical Communication in Applied Geosciences (1, max. 3) Reading, writing, and presentation of technical information in the geosciences. Topics vary by quarter. Offered: AWSp.

ESS 519 Scientific Writing and Graphics (2) *Waddington, Warren* Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ATM S 519/OCEAN 518; Sp, odd years.

ESS 520 Applications in Geological Geographic Information Systems (4) *Walters* Covers applied uses of GIS in the applied earth sciences. Includes hands-on instruction in and discussion of analysis of geologic patterns and phenomena: terrain analysis and interpretation; riverbed modeling; floodplain analysis; rainfall patterns and effects; landslide forecasting; isostatic phenomena; and topics of the students' own interest. Also covers basic instruction in geospatial statistics. Prerequisite: ESS 420 or permission of instructor. Offered: W.

ESS 522 Geophysical Data Collection and Analysis (3) Theory and practical application of data collection and analysis applied to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing system.

ESS 523 Geophysical Inverse Theory (3) Introduction to the mathematical techniques for estimating properties of physical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are quite general and have a wide range of applicability in the field of data interpretation. Prerequisite: ESS 522, or permission of instructor.

ESS 524 Numerical Heat and Mass Flow Modeling in the Earth Sciences (3) *Waddington* Numerical solution of steady and transient advective-diffusion equations de-

scribing heat and mass transport processes in earth sciences, emphasizing finite-volume methods and their relationship to finite-difference and finite-element methods. Topics include discretization methods; coordinate systems; boundary conditions; accuracy; and stability. Prerequisite: MATH 307; MATH 308 or equivalent; or permission of instructor. Offered: Sp, even years.

ESS 526 Fluvial Geomorphology (5) *Collins* Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises and independent project emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, and report writing.

ESS 527 Hillslope Geomorphology (5) *Duval* Theoretical and applied study of hillslope processes including erosion and deposition; mass wasting; and slope forms and evolution.

ESS 528 Interpretation of Sedimentary Structures (2-4, max. 4) Physical and environmental analysis of sedimentary structures, including biogenic sedimentary structures. Clastic sediments and rocks. Field trips required.

ESS 529 Principles of Fluid Dynamics, Heat, and Mass Transfer in Earth Sciences (3) Introduction to the quantitative treatment of transport phenomena with applications to mantle and magma convection, volcanic eruptions, landslides, porous flow, and reaction. Emphasis on the governing equations of fluid dynamics including porous and multiple flow, chaotic convection, mixing, heat transfer, rheology, analytical, numerical, and scaling solutions.

ESS 531 Physics of Ice (3) Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Offered: jointly with ATM S 510.

ESS 532 Snow and Ice on the Earth's Surface (3) Snow and ice climatology. Formation of the ice crystals in clouds. Snow metamorphism. Transfer of radiative, sensible, and latent heat at snow and ice surfaces. Remote sensing of snow and ice. Growth and melt of sea ice. Climatic records from ice. Prerequisite: permission of instructor. Offered: jointly with ATM S 511.

ESS 533 Dynamics of Snow and Ice Masses (3) Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ATM S 512.

ESS 535 Ice and Climate (3) Examines the role of ice and snow in climate. Polar climate dynamics. Polar-global interactions. Modeling snow cover, sea ice, and ice-sheet balance, and flow in the climate system. Prerequisite: permission of instructor. Offered: jointly with ATM S 514.

ESS 537 Advanced Mineralogy (3) Crystal symmetry; point groups, space groups. Mathematical description of crystal structures; group theory, irreducible representations; tensor description of physical properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation and creep crystals; elasto-viscous properties of Earth's mantle, crystal chemistry, solid state reactions. Offered: jointly with MSE 518; A.

ESS 538 Petrogenesis of Igneous Rocks (3) Origin of one or more of the major groups of igneous rocks. Selected petrogenetic problems in light of tectonic setting, petrography, geochemistry, and experimental studies. Prerequisite: ESS 439 or equivalent.

ESS 540 Advanced Igneous Petrology (4) Crystal-liquid-vapor equilibria in magmatic systems. Physical properties of silicate melts. Geothermometry and geobarometry in igneous rocks. Models of fractionation, assimilation, and magma mixing. Trace elements, radiogenic isotopes, and stable isotopes as tracers in magmatic processes. Nucle-

ation, crystal growth, and diffusion in melts. Prerequisite: ESS 312; ESS 439.

ESS 541 Applied Fluvial Geomorphology (4) Application of theory in fluvial geomorphology to framing and addressing questions in basic research and problems in applied contexts such as river engineering, land use planning, resource management, and river restoration. Prerequisite: either ESS 426, ESS 526, or permission of instructor.

ESS 544 Applied Tsunami Hazard Science (4) *Gonzalez* Broad introductory overview of tsunami science and physical, social, and economic impacts of tsunami hazards. Designed for scientific, engineering, earth-science professionals, and graduate students interested in tsunami hazard assessment, mitigation, or warning. Prerequisite: MATH 126; PHYS 123; AMATH 301, or equivalents.

ESS 546 Continental-Margin Sedimentation (3) Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities. Offered: jointly with OCEAN 546.

ESS 547 Engineering Geology: Methods and Application (4) Applies the application of geologic principles to geotechnical and environmental problems; includes investigation and characterization of soil and rock properties. Includes two weekend field trips.

ESS 550 Electromagnetic and Potential Field Methods (3) Development of equations of electromagnetic fields in conducting media. Solution of forward and inverse problems with natural and controlled sources: magnetotelluric and related methods. Includes the special case of static fields: DC resistivity, gravity, and magnetic interpretation. Prerequisite: PHYS 323; ESS 522; and either ESS 413 or ESS 513; or permission of instructor.

ESS 551 Mineral Physics (3) Applications of condensed matter physics to various geophysical problems. Topics vary, but usually include the thermal properties of relevant geophysical materials, the equation of state for the Earth's mantle and core, defects in solids and their roles in tectonophysics. Prerequisite: permission of instructor.

ESS 553 Electron Beam Microanalysis (4) Materials analysis using electron beams, including electron-target interactions, wave and energy dispersive x-ray analysis, scanning electron microscopy, and applications of these and related techniques to geological problems.

ESS 554 Paleoclimate Proxies (3) *Alexander, Sachs* Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/OCEAN 554.

ESS 555 Physics and Chemistry of the Earth's Interior (3) Emphasizes current issues in global tectonics and mantle dynamics. Examples include global seismic tomography and its bearing on geodynamics, the fate of subducted lithosphere and geochemical constraints on mantle convection. Prerequisite: permission of instructor.

ESS 557 Vertebrate Paleontology (5) Examines the biology of vertebrate animals, emphasizing their diversity, adaptations, and evolutionary history. Introduces aspects of behavior, physiology, morphology, and ecology that emerge from the comparative study of vertebrates. Laboratory includes local field trips and introduction to regional vertebrate fauna. Offered: jointly with BIOL 557.

ESS 558 Introduction to Graduate Research in Paleobiology (1) Introduction to paleobiology techniques and resources. Credit/no-credit only. Offered: jointly with BIOL 555; A.

ESS 559 Climate Modeling (3) *Bitz, Thompson* Principles of Earth system modeling. Emphasis on atmosphere, ocean sea ice, and land-surface components. Climate forcing. Appropriate use of models. Topics of current interest including carbon cycle, atmosphere chemistry, and biogeo-

chemistry. Prerequisite: either ATM S 587/OCEAN 587/ESS 587, ATM S 504 or ATM S 505. Offered: jointly with ATM S 559/OCEAN 558.

ESS 560 Cosmogenic Nuclides in Geomorphology (3) Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Prerequisite: either AMATH 301, AMATH 351, or permission of instructor.

ESS 562 Observational Seismology (1, max. 18) Quarterly research themes introduce students to a variety of digital and analog seismograms and techniques for their interpretation. Students present results of short investigations in an informal seminar setting. Credit/no-credit only.

ESS 563 Theoretical Seismology I (3) Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisite: either ESS 412, ESS 512, or permission of instructor.

ESS 564 Theoretical Seismology II (3) Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisite: ESS 563.

ESS 568 Oceanic Lithosphere (3) Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with OCEAN 545.

ESS 573 Cloud Microphysics and Dynamics (3) Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ATM S 535; Sp.

ESS 575 Advanced Rockets and Instrumentation (2-4, max. 12) Students launch science payloads to high altitude using high power amateur rockets, providing design, fabrication, test, integration, and management experience; covers science motivation, engineering aspects, and delivery systems. Project may vary each year. Offered: AW.

ESS 576 Space and Laboratory Plasma Physics (3) Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent, or permission of instructor. Offered: jointly with A A 556; W, odd years.

ESS 577 Advanced Space Plasma Physics (3) Formation by the interaction of solar wind with geomagnetic field. Trapped particles. Electromagnetic waves in anisotropic plasma. Dynamic disturbances and plasma instabilities. Prerequisite: ESS 415, or permission of instructor.

ESS 578 Kinetic Theory and Simulation of Space Plasmas (3) Wave-particle interactions in space plasmas. Generation of different wave modes, electrostatic and electromagnetic, Langmuir waves to Alfvén waves. Beam, Weibel, and masers instabilities, heavy ion interactions. Particle simulations, electrostatic and electromagnetic, for non-linear wave evolution and particle heating.

ESS 579 Computational Methods and Modeling in Geophysics I (3) Solution of complex dispersion equations including multiple root finding. Data analysis, fitting, smoothing, fast integration. Ray tracing and particle tracking in 2-D and 3-D. Computer simulation of fluid interactions, unmagnetized and magnetized, compressible and incompressible, and flow around objects.

ESS 580 Advanced Methods in Isotope Geochemistry (3, max. 18) *Huntington*, Steig Studies new developments in isotope geochemistry. Topics vary by quarter and may include clumped isotopes, triple-oxygen isotopes, rate isotopes, mass-independent fractionation, and their incorporation into Earth system models. Introduces theory, measurement, and applications to processes in Earth, ocean, atmospheric, planetary, and climate science. Prerequisite: one of ESS 312, ESS 424, ESS 457, ESS 459, ESS 501, ESS 554, OCEAN 583, or permission of instructor.

ESS 581 Planetary Atmospheres (3) Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ATM S 555.

ESS 583 Origin of the Solar System (3) Nebular and non-nebular theories of the solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557.

ESS 585 Climate Impacts on the Pacific Northwest (4) *Mantua*, *Snover* Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ENVIR 585/SMEA 585; Sp.

ESS 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ATM S 586/OCEAN 586.

ESS 587 Fundamentals of Climate Change (3) Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/OCEAN 587.

ESS 588 The Global Carbon Cycle and Climate (3) *Emerson* Oceanic and terrestrial biogeochemical processes controlling atmospheric CO₂ and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/OCEAN 588; W.

ESS 589 Paleoclimatology: Data, Modeling, and Theory (3) Evidence for past changes in land and sea surface temperature, in precipitation and atmospheric dynamics, and in ocean circulation: both long and interannual timescales. Paleoclimate modeling and theory. Time series analysis and climate noise. Rapid climate change. Statistical reconstruction of interannual variability. Offered: jointly with ATM S 589/OCEAN 589.

ESS 590 Special Topics (2-10, max. 20)

ESS 592 Professional Practice in Applied Geosciences (1, max. 3) Covers major issues and current topics in the practice of Geosciences: professional licensing, ethics, business trends, environmental regulation, emerging technologies. Includes internships and career guidance, as well as weekly guest speakers. Offered: AWSp.

ESS 593 Climate Science Seminar (1) *Mote* Focuses on how to communicate climate science to many different

audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ATM S 593/OCEAN 593; W.

ESS 594 Introduction to Earth and Space Sciences Research (1-2, max. 4) Introduces research of faculty and advanced graduate students to first-year graduate students and provides experience for the formulation, oral presentation, and defense of research proposals and results.

ESS 595 Earth and Space Sciences Research Methods (2, max. 30) Current research methodology and results based on recent literature and on faculty and student research. Designed to develop student perspective on observational and theoretical methods and on relation of specific research to broader developments in geophysics and interdisciplinary aspects of geophysics through faculty-guided presentations and discussion by students. Credit/no-credit only.

ESS 596 Climate Science Capstone Project (1-5, max. 5) *Mote* Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ATM S 596/OCEAN 596; AWSpS.

ESS 599 Seminar (1, max. 24) Review of current literature in geophysics and graduate student research with faculty participation. Credit/no-credit only.

ESS 600 Independent Study or Research (*-) Credit/no-credit only.

ESS 601 Internship (*) *Crider*, *Troost* Graduate internship and final exam. Prerequisite: permission of instructor.

ESS 700 Master's Thesis (*-)

ESS 800 Doctoral Dissertation (*-)

Program on the Environment

Wallace Hall, Suite 12
3737 Brooklyn Ave NE
Seattle, WA 98195-5679
poe.washington.edu
poe@uw.edu

The Program on the Environment (PoE) is the home for Environmental Studies education at the University of Washington. Environmental Studies focuses on the interactions between humans and environments, drawing on an interdisciplinary approach to understand and address complex environmental issues.

The Environmental Studies program offers a BA major in Environmental Studies, a minor in Environmental Studies, and a Graduate Certificate in Environmental Management.

Building on a foundation of natural science, social science, and humanities courses, the curriculum offers students flexibility in choosing an individual course of study. Internship, research, and study abroad opportunities develop skills and leadership for careers in environmental policy, sustainability, conservation, education, or consulting.

UNDERGRADUATE PROGRAM

Adviser

12 Wallace Hall, Box 355679

(206) 616-1208

poeadv@uw.edu

The Program on the Environment offers the following programs of study:

- The Bachelor of Arts degree with a major in environmental studies
- A minor in environmental studies

Bachelor of Arts

Suggested First and Second-Year College Courses: ENVIR 100, ENVIR 200, ENVIR 250, and all foundational courses listed below.

Program Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

All majors must satisfy the College of the Environment general education requirements.

Major Requirements

102-110 credits, as follows:

1. *Core Courses (20 credits):* ENVIR 100, ENVIR 200, ENVIR 250, ENVIR 300
2. *Foundational Courses (39-45 credits)*
 - a. *Biology (5 credits):* BIOL 180 and one course (or sequence) from among BIOL 200, BIOL 118/BIOL 119, BIOL 250/FISH 250/OCEAN 250, ENVIR 280
 - b. *Biological Systems (3-5 credits):* One course from BIOL 200, BIOL 250/FISH 250/OCEAN 250, ENVIR 240, ENVIR 280
 - c. *Chemistry (5 credits):* CHEM 120 or CHEM 142
 - d. *Earth Systems Literacy (6-10 credits):* Two courses from ATM S 211, ATM S 212, or ESS 201, ESS 210, ESS 230/OCEAN 230, OCEAN 200, GEOG 205
 - e. *Statistics (5 credits):* One course from Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311
 - f. *Economics (5 credits):* One course from ENVIR 235/ESRM 235/ECON 235 or FISH 230/ECON 230
 - g. *Values and Cultures (10 credits):* Two courses from ANTH 210, ANTH 211/ENVIR 211, HSTAA 221/ENVIR 221, or ENVIR 243/PHIL 243
3. *Analytical Methods (3-5 credits):* One course from approved list (see department website or advising office for list)
4. *Environmental Perspectives and Experiences (30 credits):* Minimum 30 credits from the list of approved courses (see department website or advising office for list). Minimum 3 credits in each of the six following categories: perspectives -- human and social dimensions; natural sciences, and policy and decision making; experiences -- bioregional; international; and fieldwork. At least 25 of the 30 credits must be at the 300 or 400 level. Courses listed under both perspectives and experiences may count toward either, but not both. Environmentally related independent study courses, study abroad programs, and other courses not on the approved list may count toward this requirement if approved in advance by the PoE adviser.
5. *Capstone Experience (10 credits):* ENVIR 490, ENVIR 491, ENVIR 492

6. *GPA Requirements:* Minimum 2.0 grade in each course presented for the major.

Minor

Minor Requirements: 30 credits, including ENVIR 100 and either ENVIR 200 or ENVIR 250. Five (5) credits from among ECON 235/ENVIR 235/ESRM 235, HSTAA 221/ENVIR 221, and PHIL 243/ENVIR 243. Remaining 15 credits drawn from the environmental perspectives course list (see program website or adviser for list). At least one course (minimum 3 credits) in each environmental perspectives course category, i.e., natural sciences, human and social dimensions, and policy and decision making. Ten (10) of these 15 credits must be at the 300 or 400 level. Minimum 2.0 for each course presented for the minor.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The environmental studies major offers a rigorous, interdisciplinary, experiential curriculum designed to prepare future environmental leaders to respond to bioregional and global environmental opportunities and challenges. It takes advantage of the extraordinary environmental research at the UW, and makes that social, scientific, humanistic, and professional expertise accessible to students in innovative ways.

Students completing the BA in environmental studies have developed skills in the following:

- *Earth Systems Knowledge:* Understand the structure, function, and integration of the Earth, its inhabitants, and its four major spheres: land, water, living things, and air.
- *Interdisciplinary Approach:* Apply an interdisciplinary approach to the study of the environment, integrating multiple kinds of information, tools, methods, and scholarship from a variety of disciplines, in order to analyze and construct arguments about complex environmental issues.
- *Experiential Learning:* Understand the connections between classroom and experiential learning and successfully practice multiple forms of hands-on, real world applications.
- *Communication:* Demonstrate proficiency in multiple modes of communication (writing for different audiences and purposes, using a range of disciplinary norms; oral presentations and public speaking; online publishing; and visual display of environmental information).
- *Public Policy and Decision Making:* Understand how uncertainty, risk, law, politics, ethics, economics, and culture interact with environmental public policy and decision making.
- *Teamwork:* Collaborate as members of teams, effectively working with multiple stakeholders from various backgrounds to address environmental issues.
- *History of Environmental Inquiry:* Understand and reflect critically on the intellectual and cultural history of environmental studies including the history of environmental preservation and conservation.
- *Temporal Scales:* Understand various temporal scales inherent in environmental studies and situate themselves on the continuum of geologic time, evolutionary history, human environment history, and decision making for future generations.

- *Spatial Scales:* Understand various spatial scales inherent in environmental studies spanning the continuum from the local/bioregional to the international/global.
- *Diversity:* Understand how environmental perspectives, policies, and decisions are related to issues of diversity, privilege, and power.
- *Technical Knowledge:* Be familiar with some of the technological tools commonly used to address environmental challenges.
- *Professional Development:* Understand how their education will serve them as environmental professionals.
- *Instructional and Research Facilities:* The Program on the Environment office in Wallace Hall Suite 12 includes a commons area for student and faculty events and presentations, four study areas, and a computer lab. Because PoE is an interdisciplinary program, its students access resources, laboratories, and field stations across a range of UW departments, colleges, and schools.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* All environmental studies majors complete a senior capstone experience, which includes an internship with a community-based organization or government agency, an undergraduate research project, and/or international fieldwork or study abroad.
- *Student Organizations/Associations:* SAGE (Student Association for Green Environments) is a club to spread awareness for environmental issues on and off campus and to promote events for a greener, sustainable environment. SAGE is committed to community engagement and education and creating professional development opportunities for environmental studies students.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

ENVIR 100 Environmental Studies: Interdisciplinary Foundations (5) I&S/NW T. BILLO, K. STRAUS, Y. WENG, E. WHEAT Introduces environmental studies through interdisciplinary examination of the ethical, political, social, and scientific dimensions of current and historical environmental issues. Integrates material from different disciplines, and applies insights and methods to actual problems and situations at scales from the local to the global. Offered: AWSp.

ENVIR 103 Society and the Oceans (5) I&S/NW Explores the social and policy dimensions of the ocean environment and ocean management policy. Pays attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons." Offered: jointly with JSIS B 103/SMEA 103.

ENVIR 200 Environmental Studies: Communication and Information (5) VLPA/I&S E. SCHAUMBERG A practical course for developing the skills necessary to engage, analyze, write, and speak about complex environmental issues in a variety of disciplinary contexts with particular values and emphases. Focus on reading, writing, presentation, and critical analysis of written material. Prerequisite: minimum grade of 2.0 in ENVIR 100; minimum grade of 2.0 in either C LIT 240, ENGL 109 and ENGL 110; ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL

199, ENGL 281, ENGL 297, ENGL 298, or ENGL 299. Offered: AWSp.

ENVIR 210 Introduction to Environmental Modeling (4) NW, QSR D. GRUNBAUM Explores strengths and limitations of diverse modeling approaches, and strategies for using models in quantitative critical analysis of past, current and future conditions in terrestrial and marine environments. Focus on active learning use of models to ask and answer questions about biotic and abiotic environmental processes, management strategies and policy decision-making. Offered: jointly with Q SCI 210.

ENVIR 211 Environmental Justice (5) I&S, DIV D. PENA Examines introductory studies of environmental racism and ecological injustice in the United States and select areas of the world. Reviews environmental justice theories and methods applied to risk science, ecosystem management, biodiversity conservation, and sustainable development. Includes comparative studies of social movements for “eco-justice.” Offered: jointly with AES 211/ANTH 211.

ENVIR 221 Environmental History of the U.S. (5) I&S L. NASH Surveys the relationship between nature and human history, including the impact of the non-human environment on American history and the environmental effects of colonization, urbanization, and consumerism; the cultural construction of nature in different eras and its social implications; the sources and limits of modern environmental politics. Offered: jointly with HSTAA 221; A.

ENVIR 235 Introduction to Environmental Economics (5) I&S/NW S. RABOTYAGOV Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: jointly with ECON 235/ESRM 235; SpS.

ENVIR 239 Sustainability: Personal Choices, Broad Impacts (3-5) I&S/NW K. STRAUS Presents frameworks of sustainability via exploration of key pillars of sustainability, the history of sustainability movements, and sustainability in action. Students examine personal and global aspects of sustainability through issues such as smart growth, environmental and natural building, green business and energy, ecotourism, and international policy. Offered: Sp.

ENVIR 240 The Urban Farm (5) NW E. WHEAT Develops students' understanding the ecological connections between food production, human health, and planetary sustainability. Teaches basic skills needed for food production in urban areas and the ethics behind sustainable urban agriculture, including a hands-on component on the farm at the biology greenhouse. Offered: Sp.

ENVIR 243 Environmental Ethics (5) VLPA/I&S L. NICHOLS Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change. Offered: jointly with PHIL 243.

ENVIR 250 Environmental Studies: Data Types and Collection Methods (5) NW, QSR T. BILLO, K. STRAUS, Y. WENG, E. WHEAT Introduction to the diversity of methods for collecting and analyzing data used to understand complex environmental issues. Case studies help to illustrate research design processes, and introduce key methods of data collection and analysis relevant to the problem. Prerequisite: minimum grade of 2.0 in ENVIR 100. Offered: AW.

ENVIR 280 Natural History: Knowing Our Non-Human Neighbors (5) NW T. BILLO Introduces natural history, the observation and representation of nature, at biological scales from organisms to landscapes. Emphasizes the natural history of the Pacific Northwest. Offered: Sp.

ENVIR 296 Study Abroad - Environmental Studies (1-15, max. 15) Environmental studies course taken through an approved study abroad program, for which there are no

direct UW equivalents. Credit does not apply to major requirements without approval.

ENVIR 300 Environmental Studies: Synthesis and Application (5) I&S/NW T. BILLO, L. NICHOLS, K. STRAUS, Y. WENG, E. WHEAT Synthesis and application of natural and social science disciplines to environmental issues in specific, place-based case studies. Cases illustrate design of environmental policies, analysis of complex environmental problems, and the entanglement of facts and values in environmental decision-making. Prerequisite: minimum grade of 2.0 in ENVIR 200 and ENVIR 250. Offered: Sp.

ENVIR 313 Environmental Earth Science (5) NW Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211. Offered: jointly with ESS 315.

ENVIR 330 Climate Change Impacts on Marine Ecosystems (5) NW Links the physics of climate to marine ecosystem processes, exploring both observed climate impacts from the past and projected ecosystem changes due to human-caused climate change in the future. Case studies include polar, sub-arctic, temperate, tropical, and upwelling ecosystems, and ocean-acidification and its projected impacts. Required: high school or college physics and algebra with a basic understanding of Newton's Laws and the ability to comprehend and construct vector diagrams. Offered: jointly with FISH 330; Sp.

ENVIR 341 Energy and Environment (3) NW Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with CHEM E 341/M E 341; A.

ENVIR 350 Internship (1-5, max. 15) Fieldwork, coursework, or other learning experience conducted off-campus, but supervised by UW faculty. Credit/no-credit only.

ENVIR 360 Environmental Norms in International Politics (5) I&S Ingebritsen Surveys development of international environmental consciousness from 1960s to present. Models of “green development”; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with JSIS B 350/SCAND 350.

ENVIR 362 Introduction to Restoration Ecology (5) I&S/NW J. BAKKER An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ESRM 362; A.

ENVIR 371 Anthropology of Development (5) I&S Development refers to social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, rural-urban relations, workers, business, environment. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 371.

ENVIR 379 Environmental Sociology (5) I&S/NW S. ASAH Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ESRM 371/SOC 379; A.

ENVIR 384 Global Environmental Politics (5) I&S K. LITFIN Examines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interlinked economic, technological, cultural, and political processes. Offered: jointly with POL S 384.

ENVIR 385 Political Ecology of the World Food System (5) I&S/NW K. LITFIN Investigates the intersection of globalization and food politics, the pivotal role of petroleum in the world food system, and the commodity chains for some foods. Includes an optional service learning component. Offered: jointly with POL S 385.

ENVIR 410 Growing Stuff: Ecology, Economy, and Culture of Resource-Production Ecosystems (5) I&S S. HARRELL Examines the connections between ecological, economic, and cultural aspects of local ecosystems that produce natural resources, through three case studies involving reading, writing, class discussion, and three required Saturday or weekend field trips. Case studies may include forest products, seafood, dairy products, biofuels, orchard crops, or others. Offered: jointly with ANTH 410/ESRM 405.

ENVIR 415 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/M E 415.

ENVIR 416 Ethics and Climate Change (5) I&S S. GARDINER, L. NICHOLS Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with PHIL 416.

ENVIR 417 Advanced Topics in Environmental Philosophy (5) I&S S. GARDINER Critical examination of issues in environmental philosophy. Topics vary. Prerequisite: one philosophy course. Offered: jointly with PHIL 417.

ENVIR 418 Communications and the Environment (5) I&S Examines the role of mass media in the resolution of environmental problems. Topics include strengths and weaknesses of media coverage, use of media by environmental groups and government agencies, media effects on public opinion, and mass communication and social movements. Offered: jointly with COM 418.

ENVIR 431 Ecopsychology (5) I&S P. KAHN Explores psychology of the human relationship with nature. Critically examines how ecopsychology can impact urban sustainability, human health, environmental education, and the design of new technologies. Specific topics include evolutionary psychology; human-animal interaction; biophilia; children and nature; indigenous cultures; and ecotherapy. Offered: jointly with ESRM 431/PSYCH 431; W.

ENVIR 433 Environmental Degradation in the Tropics (5) I&S/NW Christie Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with JSIS B 433/SMEA 433.

ENVIR 439 Attaining a Sustainable Society (3) I&S/NW E. WHEAT Discusses diverse environmental issues, the importance of all areas of scholarship to evaluating environmental challenges, and the connections between the past and the future, to reveal integrative approaches to protect the long-term interests of human society. Offered: W.

ENVIR 440 Environmental Pedagogy (3) I&S/NW Introduces the art of teaching in non-traditional settings. Designed to help students become effective environmental educators such as park naturalists, interpretive guides, or urban garden educators. Students learn pedagogical philosophy

and gain skills to become more effective environmental educators.

ENVIR 459 Culture, Ecology, and Politics (5) I&S, DIV D. *PENA* Critical studies of class, gender and race differences in environmental politics. The political-economic dimensions of ecological change. Contemporary environmental movements including the varieties of bioregionalism, deep ecology, ecofeminism, ecosocialism, environmental justice, and social ecology. Offered: jointly with ANTH 459.

ENVIR 460 Power, Privilege, and Preservation (5) I&S/NW, DIV Critically examines strategies of resource managers to integrate local communities and cultures in protected areas management. Explores issues of power, privilege, and injustice and their impacts on individuals, society, and resource management decisions. Examines the potential for more socially just and ecologically sustainable approaches to protected areas management. Offered: A.

ENVIR 476 Introduction to Environmental Law and Process (3) I&S Bryant Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with SMEA 476; A.

ENVIR 478 Topics in Sustainable Fisheries (3, max. 9) I&S/NW Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Conservation/restoration in practice. Pre-seminar discussion section focusing on select readings. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with BIOL 478/FISH 478.

ENVIR 480 Sustainability Studio (5, max. 10) Exploration of definitions and critical concepts of sustainability and analysis of sustainability practices on the UW campus. Student research teams analyze specific sustainability practices related to food, water, energy, and climate, among other topics. Sustainability project topic focus is different each quarter. Offered: AWSp.

ENVIR 485 Environmental Planning and Permitting in Practice (5) I&S T. WILDERMUTH Advanced survey of environmental planning and permitting as encountered by environmental and natural resource professionals in Washington State and beyond. Focuses on Washington State acts (SEPA, SMA, GMA) and Federal systems (NEPA, CWA, ESA) that shape environmental land use planning and federal planning and permitting systems Offered: W.

ENVIR 489 Peer Teaching Assistants in Environmental Studies (1-5, max. 10) Develops and enhances teaching skills through supervised direct teaching experience. Prepares students for graduate school teaching or other teaching by developing leadership, mentoring, and communication skills. Includes attending lectures and weekly preparation sessions, directed discussions with faculty and TAs, and teaching course lab, field, or discussion sections. Credit/no-credit only. Offered: AWSpS.

ENVIR 490 Pre-Capstone Seminar (2) P. MCDONALD Critique readings on environmental education and applied environmental work. Define a capstone experience based on personal interests and skills and complete a learning contract and a contextual bibliography for ENVIR 491. Prerequisite: minimum grade of 2.0 in ENVIR 300. Offered: ASP.

ENVIR 491 Capstone Experience ([1-12]-, max. 12) Capstone experiences, arranged during ENVIR 490, may include internships and other applied environmental work, directed research on environmental topics, or team efforts. Prerequisite: ENVIR 490. Offered: AWSpS.

ENVIR 492 Post-Capstone Seminar (-3) P. MCDONALD Build writing skills around course readings and discussion. Complete three final products: a capstone analysis paper summarizing and contextualizing work in ENVIR 491; an integrative essay reflecting on personal education; and a

formal capstone presentation. Prerequisite: ENVIR 491. Offered: ASP.

ENVIR 495 Advanced Topics in Environmental Studies (1-5, max. 15) Advanced topics in environmental studies. Offered: AWSpS.

ENVIR 496 Study Abroad - Advanced Environmental Studies (1-15, max. 15) Environmental studies course taken through an approved study abroad program for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.

ENVIR 497 Seminar in Environmental Studies (1-3, max. 6) Intensive and advanced reading and discussion of selected works in interdisciplinary environmental studies. Topics vary. Credit/no-credit only.

ENVIR 498 Independent Study (1-5, max. 15) Independent reading and/or research. Limited to majors and minors in Environmental Studies.

ENVIR 499 Undergraduate Research (1-15, max. 15) Undergraduate research in environmental studies. Offered: AWSpS.

ENVIR 500 Graduate Seminar in Environmental Studies (1-5, max. 15) Exploration of interdisciplinary themes in environmental science communication. Topics vary.

ENVIR 501 Graduate Seminar in Environmental Management (1-5, max. 15) Addresses a contemporary interdisciplinary issue in environmental management by integrating the perspectives and theories of science/technology, public policy, and business. Format emphasizes interactive, hands-on approaches to problem solving, with visiting lectures by academic and/or external practitioners.

ENVIR 502 Business Strategy and the Natural Environment (4) Applies economic and business principles (marketing, accounting, operations) to understand interactions between business and the natural environment and how environmental issues influence business strategy. Theory and case studies explore strategies that both respond to and seek competitive advantage from firms' interactions with the environment.

ENVIR 511 Environmental Management - Keystone Project I (4) First in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business. Offered: A.

ENVIR 512 Environmental Management - Keystone Project II (4) Second in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business. Prerequisite: ENVIR 511. Offered: W.

ENVIR 550 Global Commercialization of Sustainable Technologies (4) Students work on faculty-supervised interdisciplinary teams (with students from business, sciences/engineering, and public policy) to develop business plans for commercializing environmentally friendly technologies around the world. The projects involve collaborating with EPA's Environmental Technology Commercialization Center, with Battelle Labs, and with Puget Sound businesses. Offered: jointly with B BUS 550.

ENVIR 585 Climate Impacts on the Pacific Northwest (4) *Mantua, Snover* Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ESS 585/SMEA 585; Sp.

ENVIR 600 Independent Study or Research ([1-5]-) Independent reading and research. Limited to students enrolled in the Program on the Environment's graduate certificate programs.

School of Environmental and Forest Sciences

Director

Thomas DeLuca

107 Anderson

The School of Environmental and Forest Sciences, through teaching, research, and outreach, generates and disseminates knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services. Its vision is to provide internationally recognized knowledge and leadership for environmental and natural resource issues.

Founded in 1907, the school holds a position of national and international leadership in instruction and research. Its location in one of the world's largest forested regions provides students access to a unique urban-to-wildland world-class laboratory in which to study. Approximately 400 undergraduate and 175 graduate students are enrolled, taught by more than 50 faculty members. Students enjoy small classes and close association with faculty, as well as the diversity and superior facilities of a large research university.

The school's programs focus on the sustainability and functionality of complex natural resource and environmental systems, using an integrated, interdisciplinary approach across multiple scales involving the urban-to-wildland gradient. Its programs serve society generally, and natural resource professions in particular, with graduates well equipped to contribute to discussions and solutions to resource problems facing the region and the world. Interdisciplinary research and outreach centers and cooperatives include the Center for International Trade in Forest Products (CINTRAFOR), the Water Center, the UW Botanic Gardens, which include the Center for Urban Horticulture and the Washington Park Arboretum, the Olympic National Resources Center (ONRC), the Stand Management Cooperative (SMC), and the Precision Forestry Cooperative. For current information on these centers and cooperatives, visit www.sefs.washington.edu/centersPrograms/.

Office of Student and Academic Services

Director, Student and Academic Services

130 Anderson

sefsadv@uw.edu

The Office of Student and Academic Services in the School of Environmental and Forest Sciences assists prospective students with admission to the school and advises current students, including interpretation of school and University requirements and assistance in course planning. At the graduate level, faculty advisers assist students in choosing a course plan to help build an appropriate academic background for their research areas.

The office also helps to sponsor a career fair winter quarter. Students are strongly urged to seek summer employment and internship positions relevant to their career goals.

Research Programs

Areas of research are closely tied to the school's graduate program research areas. These include bioresource sci-

ence and engineering; forest ecology; forest soils; forest systems and bioenergy; restoration ecology and environmental horticulture; social sciences; sustainable resource management; and wildlife science.

Outreach Programs

The school, through its interdisciplinary centers and through collaboration with UW and external partners, undertakes and promotes continuing public and professional education for citizens of the state.

Facilities

The school occupies three central Seattle campus buildings: Alfred H. Anderson Hall, the Hugo Winkenwerder Forest Sciences Laboratory, and Julius H. Bloedel Hall. In addition, the Center for Urban Horticulture, a part of the UW Botanic Gardens, is located near the Union Bay natural area on the east side of the Seattle Campus. The center maintains a library that serves students, faculty, landscape professionals, and the public. The center's herbarium supports fieldwork in environmental horticulture, restoration ecology, and dendrology. Containing representative plant material from all parts of the United States, the collection includes dried, mounted specimens of shrubs, hardwood trees, and conifers. Another herbarium, complete in plants native to the Pacific Northwest and maintained by the Burke Museum and Department of Biology, is available for use by the school's students.

The school's laboratory facilities represent an extensive array of modern equipment for research, including optical equipment, electronic instrumentation for a wide variety of uses, gas chromatographs, spectrophotometers, and physical-test equipment. Specific laboratories are designed to study soil chemistry and soil physics, hydrology, polymer chemistry, tree physiology, genetics, wood and extractives chemistry, physics of fibrous composites, applied mechanics, wood process technology, silviculture, ecology, paleoecology, pathology, entomology, wildlife, landscape management systems, horticultural physiology, and horticultural plant materials.

The school computing facilities include computer systems and staff dedicated to specific research areas, a computer student laboratory, and a local area network with several servers offering access to the Internet and local printers.

Field Facilities

School field facilities include two major forested areas covering more than 4,000 acres, an arboretum, a natural area, and several cooperative research centers and stations. These lands offer a wide variety of terrestrial and aquatic characteristics favorable to a full range of scientific investigations. They also provide a natural-science laboratory for the many disciplines in the school concerned with the research and teaching of natural resources science and management.

The 4,200-acre Charles Lathrop Pack Experimental Forest is located 65 miles south of the University, near Eatonville, Washington, and is home to the Center for Sustainable Forestry at Pack Forest. Broad forest and soil diversity in this area has led to extensive biological, management, and engineering research. A full-time resident staff manages the facility, harmonizing its public-education objectives with academic and research objectives. Rustic but comfortable facilities which provide housing and support to research programs are also used extensively for conferences both within and outside the University. The Center for Sustainable Forestry is charged with discovering, teaching, and demonstrating the concepts of sustainable forestry, with special emphasis on the school's strategic themes of sustainable forest enterprise and sustainable land and ecosystem management in an urbanizing world.

The Olympic Natural Resources Center (ONRC) is a 19,000-square-foot research and education facility located on the west side of the Olympic Peninsula. The mis-

sion of the center is to conduct research and education on natural-resources management practices that integrate ecological and economic values. Innovative management methods that integrate environmental and economic interests into pragmatic management of forest and ocean resources are demonstrated. Both a forest management program and a marine program are in place to study the relationship between the terrestrial and marine environment.

The Lee Memorial Forest, approximately 160 acres, is located about 22 miles northeast of the University, near Maltby. This forested property provides valuable academic and research opportunities near the campus. Characterized by forest types and soils common to Western Washington lowlands, Lee Forest is used extensively for short field trips and for long-term research and demonstration projects especially related to changing land uses.

The Allan E. Thompson Research Center and the Joe E. Monahan Findley Lake Reserve and Research Area in the Cedar River watershed are used by the school in cooperation with Seattle Public Utilities for studies in forest ecology and soil science in representative low and high elevation forest ecosystems.

The UW Botanic Gardens include the Center for Urban Horticulture, which has offices, laboratories, public-education resources, and field sites for teaching and research along the shore of Union Bay. Its 10-acre Union Bay Gardens emphasize unusual ornamental and native woody landscape plants. The 60-acre Union Bay Natural Area, a former landfill, now a naturalized habitat, is used by University classes and the public to study principles and practices of restoration ecology. The Douglas Research Conservatory is a modern plant-growing facility with greenhouses, growth chambers, nursery, and classrooms. The Otis Douglas Hyde Herbarium is dedicated to plants of urban and environmental horticultural significance. The Miller Seed Vault stores seeds of Washington's rare and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Library is the Northwest's foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center for Urban Horticulture also conducts courses, lectures, and special events for the public and professionals as part of the school's outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the center.

The UW Botanic Gardens' largest facility is the Washington Park Arboretum, a 230-acre collection of trees and shrubs in a naturalistic setting on the south shore of Lake Washington. Managed in cooperation with the City of Seattle Department of Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about woody plants' diversity, natural ecology, and urban landscape use, as well as conserving endangered natural and cultivated plants. Classes in botany, dendrology, horticulture, wildlife, and landscape architecture make use of the collections, while the grounds are used for studies in soil science, ecology, and other research projects, including many independent student projects. The arboretum, established in 1934, offers numerous formal and informal classes for the general public and, in addition, serves the community as a public park and open space.

UNDERGRADUATE PROGRAM

Adviser

116 Anderson

(206) 543-3077

sefsadv@uw.edu

The School of Environmental and Forest Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in environmental science and terrestrial resource management. Within this major, options in landscape ecology and conservation, restoration ecology and environmental horticulture, sustainable forest management, and wildlife conservation are offered.
- The Bachelor of Science degree with a major in biore-source science and engineering. Biore-source science and engineering has ABET accreditation which is recognized by the Council on Postsecondary Accreditation and the U.S. Department of Education as the accrediting agency for engineering in the United States.
- Minors in ecological restoration, and environmental science and terrestrial resource management.

Bachelor of Science

Suggested First- and Second-Year School Courses:

- *Environmental Science and Terrestrial Resource Management:* ENGL 131 (or other 5-credit English composition course); COM 220; BIOL 180, BIOL 200, BIOL 220; CHEM 120, CHEM 220; any 5-credit VLP course; MATH 120 or Q SCI 291; ESRM 210.
- *Biore-source Science and Engineering:* CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238; ECON 200; ENGL 131 (or other 5-credit English composition course); HCDE 231; CHEM E 260; MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122, PHYS 123; Q SCI 381; BSE 150; BSE 201, BSE 202, BSE 248, and BSE 450.

Department Admission Requirements

- *Environmental Science and Terrestrial Resource Management:* Students in good academic standing may declare this major at any time.
- *Biore-source Science and Engineering:* Students may apply for freshman admission or upper-division admission. Applications are available in Student and Academic Services, 116 Anderson, or through the College of Engineering, 356 Loew, or by visiting the school website. Prospective upper-division BSE applicants should have most pre-engineering coursework completed before applying (see suggested sequencing at: www.sefs.washington.edu/academicPrograms/undergrad/bse/BSEflier.pdf), especially MATH 126 and CHEM 238. See adviser for further information. Admission is competitive; completion of requirements does not guarantee admission. Students may also apply to the chemical engineering degree program through the College of Engineering advanced admission program (see College of Engineering section for advanced admission entrance and continuation requirements).

Graduation Requirements

Environmental Science and Terrestrial Resource Management

180 credits, to include:

1. General Education Requirements (72-73 credits)

- a. *Written Communication (12 credits):* 5 credits English composition (ENGL 131 preferred); and seven additional credits.

- b. *Quantitative and Symbolic Reasoning* (20 credits): Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
 - c. *Natural World* (29-30 credits): BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
 - d. *Visual, Literary, & Performing Arts (VLPA)* (10 credits): COM 202 or COM 220; five additional credits from the University VLPA list.
 - e. *Individuals & Societies (I&S)* (10 credits): ENVIR 235/ECON 235 or ECON 200 or ECON 201; and five additional credits, which are satisfied by core courses shown below.
2. *Major Requirements* (62 credits for the major):
 - a. *Core Courses* (17 credits): ESRM 200, ESRM 201, ESRM 300, ESRM 304.
 - b. *Restricted Electives*: minimum 35 credits of 300- or 400-level courses from within the School of Environmental and Forest Sciences for the major; 35 credits may come from one of the specified option course lists; 15 of the credits must be at the 400 level.
 - c. *Capstone* (10 credits): ESRM 462 and ESRM 463 or ESRM 464; or ESRM 494 and ESRM 496; or ESRM 494 and ESRM 495
 - d. All ESRM courses must be completed with a minimum 2.0 grade to count toward major requirements.
 3. *Free Electives*: As needed to bring minimum total to 180 credits.
- c. *Business Option*: Additional 12 credits minimum): ESRM 320, ESRM 321, and one course from approved list.
3. *Free Electives*: To bring minimum total to 180 credits.

Minors

Ecological Restoration

Minor Requirements: 25 credits as follows:

1. *Introduction to Restoration Ecology* (5 credits): Either ESRM 362/ENVIR 362, BES 362, or TESC 362.
2. *Capstone* (10 credits): One of the following sequences: ESRM 462/ENVIR 462, ESRM 463/ENVIR 463, ESRM 464/ENVIR 464; or BES 462, BES 463, BES 464; or TESC 462, TESC 463, TESC 464.
3. *Electives*: 10 credits from approved list of electives maintained by each campus.
4. Minimum 2.00 cumulative GPA for courses presented for the minor.
5. Minimum 15 credits from outside the student's major.
6. Minimum 15 credits completed through the UW.

Environmental Science and Terrestrial Resource Management

Minor Requirements: Minimum 25 ESRM credits, 20 of which must be upper division. Maximum 5 credits from BSE courses allowed.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Forest resources emphasizes interactions between biotic and human systems at landscape to regional scales. It also provides a knowledge base to answer critical questions about how individual organisms and biotic systems respond to perturbations and stresses imposed by human activities, as well as how the environment affects human behavior and institutions. This knowledge enables the design of methods for the conservation, restoration, and sustainable use of biotic systems, and is critical for environmental decision making.

The goal of the bioresource science and engineering curriculum is to provide students with the training, tools, and experiences needed to be successful professionals in the paper and allied industries. At the same time, it provides a comprehensive education so graduates can effectively work and live in the world's complex society.

The goal of the environmental science and terrestrial resource management curriculum is to present fundamental knowledge and problem-solving experiences that enable students to understand the interdisciplinary dimensions of natural resource and environmental sciences and management. The structure of this curriculum provides great flexibility for students to pursue specialized fields through the formal program options, which include: landscape ecology and conservation; restoration ecology and environmental horticulture; sustainable forest management; and wildlife conservation; or to construct individual coursework to fit their educational goals.

Career opportunities abound in the area of environmental science and terrestrial resource management in both private and public sectors. One example is the projected need in the U.S. Forest Service, where it is estimated that one-third of the workforce will be retiring within the next five years.

- *Instructional and Research Facilities*: See the main School page for details.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for require-

ments or visit www.sefs.washington.edu/academicPrograms/undergrad/honors.shtml.

- *Research, Internships, and Service Learning*: The Office of Student and Academic Services regularly receives internship announcements, which are forwarded to all SEFS students via email and placed in the office's Career Corner. Students are strongly encouraged to pursue these opportunities, which include work experience with federal, state, and private organizations in environmental science, forestry, engineering, conservation, wildlife, horticulture, and other related fields.

Undergraduate research opportunities are available. Students should contact faculty members in their areas of interest. There are also foreign study and field opportunities within the College. Some are formal study with faculty members, others are through other agencies. Contact the Office of Student and Academic Services for more information.

- *Department Scholarships*: For majors, the School of Environmental and Forest Sciences has a strong scholarship program that provides in-state tuition to students, based on merit or need. Application information can be found at www.sefs.washington.edu/academicPrograms/scholarship/index.shtml.

The Washington Pulp and Paper Foundation provides scholarships for students enrolled in the bioresource science and engineering curriculum. For information, contact Professor Rick Gustafson in Bloedel 364 or visit the foundation website at: depts.washington.edu/wppf/.

- *Student Organizations/Associations*: The School has student organizations which organize student symposia, field trips, parties, slide shows and talks, public service projects, and other social activities. Current SEFS student organizations can be found at www.sefs.washington.edu/people/organizations.shtml.
- *Of Special Note*: Some classes include field trips or require laboratory supplies or material duplication at student expense.

Environmental Science and Terrestrial Resource Management voluntary program options:

All requirements for any of the four voluntary options are the same as for the major shown directly above. See the school's website for approved course lists.

1. *Landscape Ecology and Conservation Option*: At least 35 credits from the approved list.
2. *Restoration Ecology and Environmental Horticulture Option*: At least 35 credits from the approved list.
3. *Sustainable Forest Management Option*: At least 35 credits from the approved list.
4. *Wildlife Conservation Option*: At least 35 credits from the approved list.

Bioresource Science and Engineering

1. *General Education Requirements* (105 credits)

- a. *Written Communication* (12 credits): 5 credits English composition (ENGL 131 preferred); HCDE 231 (3 credits). (Additional 4 credits satisfied by BSE courses shown below.)
- b. *Natural World (NW)* (68 credits): MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352); Q SCI 381 or IND E 315 or STAT 390. CHEM 152, CHEM 162; CHEM 237, CHEM 238; PHYS 121, PHYS 122, PHYS 123; A A 260; 10 credits from the University NW list (outside the major).
- c. *Visual, Literary, & Performing Arts (VLPA)* (10 credits), chosen from the University VLPA list.
- d. *Individuals & Societies (I&S)* (20 credits): ECON 200; 10 credits chosen from the University I&S list (outside the major). (5 additional credits satisfied by required BSE courses.)

2. *Major Requirements* (74 credits)

- a. *Bioresource Science* (59 credits): BSE 150, BSE 201, BSE 202, BSE 248, BSE 391, BSE 392, BSE 406, BSE 420, BSE 421, BSE 422, BSE 426, BSE 430, BSE 436, BSE 480, BSE 481, BSE 497. All required BSE courses must be completed with a minimum 2.0 grade.
- b. *Engineering Electives* (15 credits minimum): Taken from a list of approved engineering electives.

GRADUATE PROGRAM

Graduate Program Adviser

116 Anderson, Box 352100

(206) 543-7081

sefsadv@uw.edu

Graduate programs in forest resources are designed to accommodate a wide range of education and career objectives. A student may concentrate on development of advanced professional skills and knowledge or on exploration of forest-related science.

Graduate programs offered in forest resources lead to the degrees of Master of Environmental Horticulture, Master of Forest Resources in Sustainable Forest Management, Master of Science, and Doctor of Philosophy. Graduate students may center their study in one of the special fields within the school's divisions.

Master of Environmental Horticulture

Admission Requirements

1. Evidence of academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)

- c. Adequate Scores on the GRE (550-Verbal, 600-Quantitative, 5.0-Writing, or 156-Verbal, 148- Quantitative, 5.0-Writing for tests after August 2011 recommended)
 - d. International applicants only: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study.
 - a. Clearly written statement of objectives in pursuing further education.
 - b. Ideally, work or field experience in the planned area of study.
 3. Supporting evidence from reference persons (three recommendations total).
 - a. Recommendations from references familiar with applicant's academic ability and potential.
 - b. Letters of recommendation from employers in field related to applicant's educational goals.

Degree Requirements

45 credits, as follows:

1. SEFS 500, SEFS 503, SEFS 549, SEFS 561, ESRM 411, ESRM 451, ESRM 480, ESRM 481; and 13 credits of restricted electives.
2. Internship/independent research: A formal public presentation and written professional paper are required. A member of the EHUF faculty advise the student on his/her project, which is completed as SEFS 601 (9 credits minimum)
3. Electives (7 credits)

Master of Forestry, Sustainable Forest Management

Admission Requirements

1. Evidence of academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
 - c. Adequate scores on the GRE (550-Verbal, 600-Quantitative, 5.0-Writing, or 156-Verbal, 148- Quantitative, 5.0-Writing for tests after August 2011 recommended)
 - d. *International Applicants Only:* Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study
 - a. Clearly written statement of objectives in pursuing further education.
 - b. Ideally, work or field experience in the planned area of study.
3. Supporting evidence from reference persons (3 recommendations total)
 - a. Recommendations from references familiar with applicant's academic ability and potential.
 - b. Letters of recommendation from employers in field related to applicant's educational goals.

Degree Requirements

45 credits, as follows:

1. SEFS 500, SEFS 509, SEFS 526
2. *Directed Electives:* 24 credits distributed among the following four areas, with at least two classes required in each area: forest biology/ecology, forest management,

forest measurements, forest policy and administration. See adviser for list of approved courses for each area.

3. *Unrestricted Electives:* 9 credits
4. *Capstone Project:* SEFS 600 or SEFS 601

Master of Science

Admission Requirements

1. Evidence of academic readiness for the program
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
 - c. Adequate scores on the GRE (550-Verbal, 600-Quantitative, 5.0-Writing, or 156-Verbal, 148- Quantitative, 5.0-Writing for tests after August 2011 recommended)
 - d. *International Applicants Only:* Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study
 - a. Clearly written statement of objectives in pursuing further education.
 - b. Ideally, work or field experience in the planned area of study.
3. Supporting evidence from reference persons (3 recommendations total).
 - a. Recommendation from references familiar with applicant's academic ability and potential.
 - b. Letters of recommendation from employers in field related to applicant's educational goals.

Degree Requirements

Minimum 45 credits, to include:

1. *Orientation:* SEFS 500
2. *Social and Natural Sciences Applied to Natural Resource and Environmental Issues:* SEFS 509
3. *Disciplinary Knowledge:* Minimum 10 credits from list of approved courses according to interest area
4. *Research Design and Quantitative Analysis:* Minimum 8 credits from list of approved courses according to interest area
5. *Current Topics:* 2 credits (500 level), topics vary from year to year
6. *Thesis Research:* SEFS 700 (9 credits minimum)

Current interest groups:

- Forest ecology
- Forest soils
- Bioresource science and engineering
- Restoration ecology and environmental horticulture
- Social sciences
- Sustainable resource management
- Wildlife science

Doctor of Philosophy

Admission Requirements

1. Evidence of academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have

sufficient course background in their intended program of study)

- c. Adequate scores on the GRE (550-Verbal, 600-Quantitative, 5.0-Writing, or 156-Verbal, 148- Quantitative, 5.0-Writing for tests after August 2011 recommended)
 - d. *International Applicants Only:* Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study
 - a. Clearly written statement of objectives in pursuing further education. PhD applicants should have earned a master's degree; most apply for the master's and then continue on to the PhD.
 - b. Ideally work or field experience in the planned area of study.
 - c. Publications written by the student related to the planned area of study.
 3. Supporting evidence from reference persons (3 recommendations total).
 - a. Recommendations from references familiar with applicant's academic ability and potential.
 - b. Letters of recommendation from employers in field related to applicant's educational goals.

Degree Requirements

90 credits, to include:

1. Same as for Master of Science degree (above) with one additional course in each of the categories:
 - a. Disciplinary knowledge
 - b. Research design and quantitative analysis
 - c. Current topics
2. Qualifying examination
3. General examination
4. *Dissertation Research:* SEFS 800 (27 credits minimum)
5. Final examination

Financial Assistance

The school has a limited number of appointments for teaching and research assistantships that provide a stipend, tuition waiver, and benefits. Teaching and research assistant responsibilities are half-time, allowing time to pursue a full academic load. Students may contact faculty directly about available research assistantships.

Fellowships without teaching or research obligations are also available. Requests for consideration must be submitted by December 31 for the following academic year. Applications are in the school's admission packet, available on the school's website at: www.sefs.washington.edu/academicPrograms/graduate/applicant.shtml.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsat/

SEFS 500 Graduate Orientation Seminar (1) Introduction to graduate study at the School, student resources and services, and current research. Required for all new graduate students in SEFS. Offered: A.

SEFS 501 Forest Ecosystems - Community Ecology (5) Community ecology of forest ecosystems. Quantitative methods of community description. Role of limiting factors, competition, and disturbance in determining community composition, structure, and stability. Introduction to forest ecosystem productivity. History and application of successional theory. Prerequisite: basic ecology course or permission of instructor. Offered: A.

SEFS 502 Analytical Techniques for Community Ecology (4) *J. BAKKER* Analysis of ecological data, focusing on community-level data. Topics include distance measures, group comparison methods (Mantel test, permutational MANOVA), ordinations (PCA, DCA, NMS), methods of identifying groups (cluster analysis, classification trees), as well as Indicator Species Analysis, diversity measures, and related topics. Prerequisite: Q SCI 482, which may be taken concurrently. Offered: W.

SEFS 503 Current Issues in Restoration Ecology and Environmental Horticulture (1, max. 10) Critical evaluation and discussion of published research in urban horticulture and restoration. Students and faculty present and discuss research methods and questions from current literature. Credit/no-credit only. Offered: AWSp.

SEFS 504 Research Processes in Forest Resources (4) Comprehensive survey of research processes for entering graduate students. Diagnostic and prescriptive evaluation of student research capabilities. Problem and hypothesis formulation, study design, multi-method strategies for gathering and analyzing data, and interpretation and presentation of results.

SEFS 505 Introduction to Pulp, Paper, and Bioproducts (3) *R. GUSTAFSON* Introduction to pulp and paper technology for BSE graduate students who do not have a prior background in pulp and paper. Broad overview of pulp and paper technology and the pulp and paper industry. Offered: A.

SEFS 507 Soils and Land Use Problems (4) *R. HARRISON* Environmental concerns of soils; how soil properties control potential and reasonable possibilities of land use. Includes factors controlling soil stability, hydrology, fertility, and movement of pollutants. Field trip oriented with weekly activity summaries. Students also conduct field trips to soil-use problem sites. Offered: W.

SEFS 509 Analysis of Research Problems (3) *S. RABOTYA-GOV* Natural resource issues emerge from interactions between humans and their biophysical world. Understanding resource problems and solutions requires integration of numerous areas of knowledge and methods of discovery. Objectives include exposure to, and development of, fundamental issues and skills essential for natural resource professionals, including development of a research plan. Offered: W.

SEFS 510 Graduate Studies in Forest Soils (1-5, max. 15) Offered: AWSpS.

SEFS 512 Biogeochemical Cycling in Soils and Forest Ecosystems (3) *D. ZABOWSKI* Elemental cycles in forests and soils. Fundamentals of processes involved in cycling are addressed along with alterations resulting from environment, vegetation, and soil types. Consideration of cycles of nutrients, metals, and other elements. Weekly discussion section reviews literature on biogeochemical cycling. Prerequisite: one soils course or permission of instructor. Offered: W, even years.

SEFS 513 Advanced Soil Genesis and Classification (5) *D. ZABOWSKI* Soil formation, morphology, classification, and relationship to the environment. Labs and field trips illustrate properties and processes of forest and grassland soils in Washington. Requires two weekend field trips and a graduate project. Prerequisite: CFR 510 or permission of instructor. Offered: Sp, even years.

SEFS 514 Advanced Forest Soil Fertility and Chemistry (4) *R. HARRISON* Chemical properties of soil, nutrient, and toxic elements; supply, retention, and loss of nutrients in soils; utilization of geochemical and ecosystem models such as GEOCHEM, MAGIC, TRICLE-DOWN, and ILWAS in developing a quantitative understanding of the chemical function of forest ecosystems. Prerequisite: general chemistry and geology of soils. Offered: Sp, odd years.

SEFS 515 Advanced Soil and Plant Analysis (3) *R. HARRISON* Plants and animals must acquire nutrient elements from their environment. Quantifying the composition of samples is the first step in understanding the processes

in natural and manmade systems. Sampling, handling, preparation, storage, and analysis stressed. Prerequisite: one botany or plant science course, instrumental analysis, soils. Offered: Sp, even years.

SEFS 519 Conducting Financial, Environmental, and Social Responsibility Performance Research (3, max. 12) *D. PAUN* Focuses on the concepts of accounting, finance, and financial statement analysis; techniques for analyzing firm performance; and conducting competitor analyses. Conduct in-depth, comparative performance analyses of U.S. and Canadian paper firms and publish the findings as a peer-reviewed manuscript in a journal. Offered: WSp.

SEFS 520 Geographic Information Systems in Forest Resources (5) *J. LAWLER* Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSp.

SEFS 521 Current Topics in Forest Resources (2-5, max. 10) Critical evaluation and discussion of published research in the broad field of forest resources. Topics and requirements vary. Offered: AWSp.

SEFS 522 Plant-Microbe Interactions (1, max. 3) *S. DOTY* Discusses current research related to forest tree-microbe interactions. Credit/no-credit only. Offered: W, odd years.

SEFS 523 Environmental Applications of Plants: Bioenergy and Bioremediation (3) *S. DOTY* Covers phytoremediation (removing pollutants using plants), biofuel production, and carbon sequestration. Focuses on the biology rather than the chemistry. Emphasizes the latest research on how current practices in these areas are being improved. Offered: A.

SEFS 525 Advanced Wildland Hydrology (4) *S. BOLTON* Advanced treatment of hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Graduate focus on a detailed field or modeling hydrologic analysis. Offered: W.

SEFS 526 Seminar in Advanced Silviculture (3) Seminar on current and emerging silvicultural issues and underlying biological principles. Topics include: stand management to enhance wildlife, biodiversity, and high productivity in subtropical and tropical regions; computer simulation of stand growth; adaptation to changes in management objectives; soil conditions and productivity during stand rotation; and minimizing effects of catastrophic disruption. Prerequisite: ESRM 428. Offered: W.

SEFS 527 Ecosystems Seminar (1) Discussion by invited speakers on current research related to ecosystems. Credit/no-credit only.

SEFS 529 School of Environmental and Forest Sciences Seminar (1, max. 6) Weekly seminars covering School of Environmental and Forest Sciences topics, with lectures from scientists on and off campus. Credit/no-credit only. Offered: AWSp.

SEFS 530 Introduction to Restoration Ecology (3/5) *J. BAKKER* Provides introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: A.

SEFS 535 Fire Ecology (4) *E. ALVARADO-CELESTIN* Fire regime concept as applied to fire ecology. Methodology for fire history research. History and function of forest fire in Western United States with emphasis on Pacific Northwest. One weekend field trip. Offered: A.

SEFS 540 Optimization Techniques for Natural Resources (5) *S. TOTH* Studies optimization techniques for natural resources managers including spatial optimization; linear, integer, and multi-objective programming; and stochastic and combinatorial optimization. Emphasizes model build-

ing rather than on algorithmic concepts. Prerequisite: MATH 308 or permission of instructor. Offered: Sp.

SEFS 541 Advanced Landscape Ecology (5) *J. LAWLER* Hands-on, applied, project-based research class. Students work in a team in conjunction with one or more outside partners to address real landscape-scale conservation problems. Covers scaling, landscape processes, pattern measurement, connectivity, landscape modeling, and conservation planning. Prerequisite: SEFS 501. Offered: W, odd years.

SEFS 549 Urban Horticulture Seminar (1, max. 6) Discussion by invited speakers on current topics in urban horticulture. Credit/no-credit only. Offered: A.

SEFS 550 Graduate Seminar (2-5, max. 10) Graduate seminar to evaluate and discuss current research topics. Topics and requirements vary. Offered: AWSp.

SEFS 554 Wildlife Seminar (1-2, max. 10) West Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Offered: AWSp.

SEFS 561 Public Presentation in Urban Horticulture (2) Students learn to make public presentations in scientific, professional, and popular contexts and to interpret technical information for professional and lay audiences. Support materials, such as audiovisuals and graphics, are discussed. Offered: Sp.

SEFS 564 Advanced Forest Biometry (3/5) *E. TURNBLOM* Classical problems in analysis of forest populations and growth theory, and principles of parametric analysis and estimation processes in forest biometry. Offered: A, odd years.

SEFS 567 Topics in Advanced Ecology (3, max. 6) Discusses literature on active research areas or controversies in different branches of ecology. Offered: jointly with BIOL 567/FISH 567; W.

SEFS 570 Seminar in Environmental Sociology (3) Offered: jointly with SOC 570.

SEFS 571 Resource Policy and Administration (4) Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with PB AF 592.

SEFS 574 Restoration Problem Solving: Ecological Engineering (5) *J. FRIDLEY* Exposes students to real-life problem solving that involves the design and manipulation of natural systems to perform ecological function. Focuses on the analysis, design, and implementation of discrete projects. Includes projects dealing with plants, hydrology, earthwork, waste and pollution management, as well as other resources and problems. Offered: A.

SEFS 590 Graduate Studies (1-5, max. 10) Study of emerging scientific developments in forest resources that may develop into regular course offerings. Offered: AWSpS.

SEFS 591 Seminar in Resource Policy and Management (1) Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the School of Environmental and Forest Sciences. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with PB AF 591.

SEFS 592 Environmental Policy Processes (3-4) Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with PB AF 590.

SEFS 595 Graduate Teaching Practicum (1-5, max. 5) Principles of teaching and learning applied to undergraduate instruction in the School of Environmental and Forest Sciences. Development, delivery, and evaluation of lectures

and homework assignments. Graduate teaching experience for SEFS students only. Credit/no-credit only. Offered: AWSp.

SEFS 600 Independent Study or Research (*-) Offered: AWSpS.

SEFS 601 Internship (3-9, max. 9) Graduate internship under the supervision of a faculty member. Credit/no-credit only. Offered: AWSpS.

SEFS 700 Master's Thesis (*-) Offered: AWSpS.

SEFS 800 Doctoral Dissertation (*-) Offered: AWSpS.

Bioresource Science and Engineering

BSE 150 Bioresource Science and Engineering Seminar (1) *R. GUSTAFSON* Introduces the science and technology of bioresources, including paper. Faculty, advisers, and guest lectures present on topics throughout the quarter. Credit/no-credit only. Offered: A.

BSE 190 Special Topics (1-5, max. 10) *NW R. BURA* Introduces current topics or courses under development to address the latest issues in bioresource science and engineering.

BSE 201 Introduction to Pulp, Paper, and Bioproducts (3) *NW* Broad overview of the science and technology of producing pulp and paper. Introduction of the BSE major course sequence and various career options. Examination of Pacific Northwest pulp and paper production facilities. Offered: W.

BSE 202 Pulp and Paper Lab and Field Studies (1) *NW* Laboratory and field trip studies in pulp and paper technology. Visits to local forest product manufacturing facilities. Required for BSE majors. Credit/no-credit only. Offered: W.

BSE 211 Creativity and Society (5) *VLPA/I&S G. ALLAN* Explores the nature of creativity and innovation in U.S. and other societies. Investigates the processes of thinking and techniques of idea generation in fields such as art, music, science, engineering and medicine. Offered: AWS.

BSE 248 Paper Properties (4) *NW* Acquaints students with raw material characteristics, physical and mechanical concepts, nomenclature, and procedures related to evaluating paper and paperboard product properties. Emphasizes structural, optical, mechanical, and moisture related properties. Offered: A.

BSE 309 Creativity and Innovation (2) *VLPA G. ALLAN* Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Offered: jointly with CHEM E 309; Sp.

BSE 391 Engineering Principles of Biorefineries (5) *NW F. PACHECO DE RESENDE* Introduction to biorefinery processes, including material and energy balances; sustainability aspects and environmental issues; and process modeling. Application of conservation laws to calculation of flow rates, chemical composition, and heat requirements of non-reactive and reactive systems typical of processes involving lignocellulosic biomass. Prerequisite: A A 260; either CHEM 237 or CHEM 223; MATH 307 Offered: A.

BSE 392 Bioresource Transport Phenomena (5) *NW F. PACHECO DE RESENDE* Focuses on transport phenomena involved in the biorefinery processes, including: momentum, heat, and mass transfer; paper drying, transport in biochemical and thermochemical processes, and product separation; and computational tools. Application of conservation laws to calculations of flow rates, chemical composition, and heat requirements involving lignocellulosic biomass. Prerequisite: BSE 391. Offered: W.

BSE 399 Undergraduate Internship (1-5, max. 15) Internship experience with a public agency or private company,

supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no-credit only. Offered: AWSpS.

BSE 406 Natural Products Chemistry (5) *NW R. BURA* Provides knowledge of chemistry of aqueous and solvent-rich systems, natural and synthetic polymers, and of interactions with inorganic materials and trace substances present in biomass processing systems. Covers the chemistry of lignocellulosic biomass components: cellulose, hemicellulose, lignin, and extractives. Presents the fundamental chemistry of biomass conversion process. Prerequisite: either CHEM 237 or CHEM 335. Offered: A.

BSE 420 Bioresource Engineering I (4) *R. BURA* Covers chemistry and reaction kinetics of conversion of biomass into molecules and fibers for use in making fuels and high value products. Includes chemical, biological, and thermal conversion of biomass. Develops applications of reaction kinetics to design reactor configurations. Prerequisite: BSE 406. Offered: W.

BSE 421 Bioresource Engineering II (4) *R. GUSTAFSON* Introduces basic mass transfer processes and physical basis: diffusion, convection, and mass transfer coefficients. Analyzes separation processes used in forest products and bioresources industries: membrane separations, flow through porous media, leaching and extraction, and evaporation. Includes industrial processes: dialysis, reverse osmosis, fiber web formation, pulp washing, and black liquor evaporation. Prerequisite: minimum grade of 2.0 in both BSE 392 and BSE 420. Offered: Sp.

BSE 422 Bioresource Engineering III (4) *R. GUSTAFSON* Introduces process simulators and their application to model unit operations and large scale integrated facilities such as biorefineries and pulp and paper mills. Covers applications to optimize processes for production and environmental impact, basic control equipment, process models used in control, types of controllers, and simple controller tuning. Prerequisite: minimum grade of 2.0 in BSE 421. Offered: A.

BSE 426 Bioresource Laboratory (4) *R. BURA* Covers bio-conversion laboratory techniques, focusing on design and operation of conversion processes to produce high value biorenewable products based on chemistry of biomass. Products include ethanol, pulp, glycols, and sugar streams. Includes significant product design component, and hands-on laboratory creation of products based on design. Prerequisite: BSE 420; Q SCI 381, which may be taken concurrently. Offered: Sp.

BSE 430 Papermaking Processes (5) Examines stock preparation operations (refining, screening, and cleaning) for papermaking and sheet forming as a unit of operations. Considers related unit operations of fluid dynamics and heat transfer as they apply to the commercial process. Covers sheet finishing operations of surface sizing, calendaring, and rewinding. Analyzes physics of fiber webs. Prerequisite: either BSE 392 or CHEM E 340. Offered: A.

BSE 436 Pulp and Paper Laboratory II (4) Paper testing, paper additives, flocculation, drainage, retention, heat transfer, and fluid dynamics in papermaking from virgin and recycled raw materials. Prerequisite: BSE 430. Offered: W.

BSE 480 Bioresource Design I (4) *I&S/NW R. GUSTAFSON* Design and production of biomass derived products meeting given specifications and financial constraints, integrating coursework knowledge to solve complex, open-ended design problems. Specific considerations in design include: economic, marketability, environmental, sustainability, ethical, health and safety, social, and political. Prerequisite: minimum grade of 2.0 in BSE 406; 2.0 in BSE 420; 2.0 in BSE 430. Offered: W.

BSE 481 Bioresource Design II (5) *I&S/NW R. GUSTAFSON* Comprehensive design of pulp and paper processes, including: economic feasibility studies; process equipment design, optimization, and control; and overall process integration and layout. Safety and ethics in the design process. Prerequisite: BSE 480. Offered: Sp.

BSE 489 Foreign Study (1-5, max. 15) Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

BSE 490 Special Topics (1-5, max. 15) Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSp.

BSE 497 Pulp and Paper Internship (1, max. 3) Technical and economic analysis of commercial pulp and paper installations. Structured visits to industrial operations to observe technical aspects of pulp and paper curriculum in practice. Preparation of visitation reports and analysis in seminar setting. Offered: AWSpS.

BSE 499 Undergraduate Research (1-5, max. 15) Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

Environmental Science and Resource Management

ESRM 100 Introduction to Environmental Science (5) *I&S/NW R. HARRISON, D. ZABOWSKI* Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Cannot be taken for credit if ESC 110 already taken. Offered: AWSpS.

ESRM 101 Forests and Society (5) *I&S/NW K. VOGT* Survey course covering forest ecosystems of the world, history of forestry and forest conservation, how forest ecosystems function, wildlife in forests, environmental issues in forestry, forest management, economics and products, and new approaches to forest management. Open to majors and nonmajors. Cannot be taken for credit if CFR 101 already taken. Offered: ASP.

ESRM 150 Wildlife in the Modern World (5) *I&S/NW* Covers major wildlife conservation issues in North America. Some global issues are also treated. Examples of topics include the conservation of large predators, effects of toxic chemicals on wildlife, old-growth wildlife, conservation of marine wildlife, recovery of the bald eagle, and gray wolf. Offered: A.

ESRM 200 Society and Sustainable Environments (5) *I&S/NW S. ASAH* Introduces the application of social concepts and theories to understanding and managing urban, urbanizing, and wildland landscapes in a sustainable manner. Of particular interest are factors that shape patterns on the landscape and resulting social and economic benefits. Explores landscapes across the urban to wildland gradient. Offered: WSp.

ESRM 201 Sustaining Pacific Northwest Ecosystems (5) *I&S/NW S. BOLTON, S. DOTY* Introduces the principles of ecology across an urban to wildland gradient and discusses how these landscapes can be sustainably managed. Explores basic ecological theories, plant communities, soil, climate, pollution, hydrology, and wildlife in classroom, labs, and field trips. Offered: ASP.

ESRM 210 Introductory Soils (5) *NW D. ZABOWSKI* Physical, chemical, and biological properties that affect distribution and use patterns of this important ecosystem component. Includes soil morphology and genesis, plant nutrition and nutrient cycling, soil water, microbiology, and application of soil properties to environmental concerns. One Saturday field trip. Offered: A.

ESRM 235 Introduction to Environmental Economics (5) *I&S/NW S. RABOTYAGOV* Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key

environmental issues. Offered: jointly with ECON 235/ENVIR 235; SpS.

ESRM 250 Introduction to Geographic Information Systems in Forest Resources (5) NW, QSR J. LAWLER Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSpS.

ESRM 300 Principles of Sustainability (2) I&S/NW Overview of principles of sustainability, including discussion of current literature, presentation, and discussion with practitioners, and methods for balancing social, economic, and ecological consequences of proposed policies and actions. Students develop a plan to further their studies in natural resources and environmental sustainability. Credit/no-credit only. Offered: W.

ESRM 304 Environmental and Resource Assessment (5) NW, QSR E. TURNBLOM, D. VOGT The processes of measuring, monitoring, and assessment; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Offered: ASpS.

ESRM 311 Soils and Land Use (3) NW R. HARRISON Intended for students concerned with environmental problems in the Puget Sound basin; also for those who intend to become professionally involved in land-planning decisions. Focus is on the significance of soils in understanding environmental problems and in promoting intelligent land-use decisions. Basic concepts of soil systems are presented, stressing those aspects important in making land-planning decisions. Offered: W.

ESRM 315 Natural Resource Issues: Old-Growth and Forest Management (5) I&S/NW J. FRANKLIN Biological and social elements of current conflicts, especially those associated with old-growth and its disposition. Ecology of Pacific Northwest forests and landscapes, history of forest practices, application of emerging science, proposed alternative practices and policies, including analysis of current proposal and its predecessors and successors. Open to majors and nonmajors. Offered: Sp.

ESRM 320 Marketing and Management from a Sustainability Perspective (5) I&S/NW D. PAUN Introduction to business concepts relating to marketing, human resource management, small businesses and entrepreneurship, and economics in the context of environmental resource management. Offered: AS.

ESRM 321 Finance and Accounting from a Sustainability Perspective (5) I&S/NW D. PAUN Introduction to business concepts relating to finance, accounting, and international business in the context of environmental resource management. Offered: WS.

ESRM 323 Silviculture (5) NW E. TURNBLOM Silviculture techniques, including nursery practices, clear-cutting, seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Multiple-use field trips. Offered: Sp.

ESRM 325 Environmental Applications of Plants: Bioenergy and Bioremediation (3) NW S. DOTY Explores current topics in forest bioresources with an emphasis on bioenergy, remediation of pollutants, and carbon sequestration. Offered: A.

ESRM 328 Forestry-Fisheries Interactions (4) NW Offered: jointly with FISH 328.

ESRM 331 Landscape Plant Recognition (3) NW S. REICHARD Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive

characters evident in the field with eye and hand lens. Hardiness and landscape applications. Offered: jointly with BIOL 331; Sp.

ESRM 350 Wildlife Biology and Conservation (5) NW A. WIRSING Wildlife ecology and population biology, and interrelationships between wild animals and humans, including encouragement of wildlife population growth and productivity, control of pest populations, and preservation of endangered species with emphasis on forest environments and forest faunas. Open to nonmajors. Prerequisite: either BIOL 162, BIOL 180, BIOL 220, or ESRM 162, any of which may be taken concurrently. Offered: A.

ESRM 351 Wildlife Research Techniques (8) NW Scientific approaches to the field study of wildlife populations and habitat, including species identification and natural history, experimental design, and report writing. Emphasis on direct experience with current field techniques used in the study of vertebrate populations and habitat. Prerequisite: either BIOL 162, BIOL 180, ESRM 162, or ESRM 350. Offered: Sp.

ESRM 362 Introduction to Restoration Ecology (5) I&S/NW J. BAKKER An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ENVIR 362; A.

ESRM 368 Natural Resource Measurements (4) NW E. TURNBLOM Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either IND E 315, Q SCI 381, STAT 220, or STAT 311. Offered: W.

ESRM 371 Environmental Sociology (5) I&S/NW S. ASAH Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ENVIR 379/SOC 379; A.

ESRM 381 Management of Wildland Recreation and Amenities (3) NW Introduction and overview of wildland recreation and amenities management. Agency history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: A.

ESRM 399 Field or Teaching Internship (1-5, max. 15) Internship experience in undergraduate teaching or in the environmental field, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no-credit only. Offered: AWSpS.

ESRM 400 Natural Resource Conflict Management (3) I&S/NW C. RYAN Introduction to the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.

ESRM 401 Spring Comes to the Cascades (3) NW Examines the interaction between forests, environment, and growth at three locations in the Cascades, from lowlands to alpine. Field trips and associate observations are linked

to classroom or group project activities and are used to understand a number of ecological, physiological, and meteorological concepts. Offered: Sp.

ESRM 403 Forest and Economic Development in the Developing World (4) NW J. EASTIN Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of forest-based economic development in different countries and regions. Offered: A.

ESRM 404 Plant Microbiology Laboratory (5) NW S. DOTY Focuses on measuring impacts of beneficial microorganisms on plants. Assays include colonization of plants, N stress alleviation, photosynthesis, and growth enhancement. Microorganisms are characterized by phytohormone production, provision of nutrients, and growth. Microbial strains are identified using standard molecular analysis methods (PCR, cloning, sequencing). Includes short lectures. Prerequisite: ESRM 201; BIOL 180; either CHEM 120 or CHEM 142 Offered: W.

ESRM 405 Growing Stuff: Ecology, Economy, and Culture of Resource-Production Ecosystems (5) I&S S. HARRELL Examines the connections between ecological, economic, and cultural aspects of local ecosystems that produce natural resources, through three case studies involving reading, writing, class discussion, and three required Saturday or weekend field trips. Case studies may include forest products, seafood, dairy products, biofuels, orchard crops, or others. Offered: jointly with ANTH 410/ENVIR 410.

ESRM 409 Soil Ecology (5) NW Soil organisms in forest and other ecosystems, decomposition, nutrient cycling. Nitrogen transformation, mycorrhizae, effects of forest management. Offered: A.

ESRM 410 Forest Soils and Site Productivity (5) NW R. HARRISON Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required. Offered: A, odd years.

ESRM 411 Plant Propagation: Principles and Practice (3) NW S. KIM Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Offered: Sp.

ESRM 412 Native Plant Production (3) NW J. BAKKER Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Offered: Sp.

ESRM 413 Soil Genesis and Classification (5) NW D. ZABOWSKI Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest and grassland soils in Washington. Offered: Sp, even years.

ESRM 414 Forest Soil Fertility and Chemistry (3) NW R. HARRISON Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Offered: Sp, odd years.

ESRM 415 Biology, Ecology, and Management of Plant Invasions (5) NW S. REICHARD Explores how biological invasions are one of the most serious threats to the preservation of biodiversity worldwide. Explores the vectors which

move plants and their pests, the biology and impacts of the invasive species, and management and policy approaches. Prerequisite: either BIOL 162, BIOL 220, BIOL 333, BIOL 471, BIOL 472, ESRM 201, ESRM 401, ESRM 472, or ESRM 473. Offered: A, even years.

ESRM 416 Field Survey of Wildland Soils (3) NW R. HARRISON, D. ZABOWSKI Study of soils in remote sites about which little information is available. Focus is field trip in Cascade Mountains just north of Glacier Peak with prior study of hiking area, soil and ecosystem changes, and wilderness use. Offered: S, odd years.

ESRM 420 Wildland Fire Management (5) NW E. ALVARADO-CELESTIN Principles of wildland fire behavior, ecology, and management. Weather, fuels, and topography effects on fire behavior. Forest structure influence on historical and current fire ecology. Principles of firesafe forests. Management issues of fire control and use in wilderness, multiple-use forest, and the wildland-urban interface. Offered: Sp.

ESRM 425 Ecosystem Management (5) NW J. FRANKLIN Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Prerequisite: ESRM 323. Offered: A.

ESRM 426 Wildland Hydrology (4) NW S. BOLTON Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.

ESRM 428 Principles of Silviculture and Their Application (5) NW Ford Focuses on the biology of major tree species in the PNW and their use in silviculture, stand development in plantation forest systems and its relationship to forest yield, the advantages and limitations of plantation silviculture relating to specific biotic, abiotic, and economic conditions, and management for objectives other than time yield. Prerequisite: ESRM 323. Offered: A.

ESRM 429 Environmental Science and Resource Management Seminar (1, max. 6) NW Weekly presentations covering environmental topics by scientists on and off campus. Credit/no-credit only. Offered: AWSp.

ESRM 430 Remote Sensing of the Environment (5) NW Moskal Focuses on hyperspatial remote sensing fundamentals, interpretation and manipulation of aerial photography, satellite imagery, and Light Detection and Ranging (LiDAR). Uses traditional and 'state of the art' image processing techniques. Students learn to evaluate available hyperspatial remote sensing data sources and design simple projects related to environmental applications. Offered: W.

ESRM 431 Ecopsychology (5) I&S P. KAHN Explores psychology of the human relationship with nature. Critically examines how ecopsychology can impact urban sustainability, human health, environmental education, and the design of new technologies. Specific topics include evolutionary psychology; human-animal interaction; biophilia; children and nature; indigenous cultures; and ecotherapy. Offered: jointly with ENVIR 431/PSYCH 431; W.

ESRM 435 Forest Entomology (3) NW Introduction to general entomology, characteristics, life histories, ecological relations, prevention, and control of forest insects. Offered: Sp.

ESRM 436 Laboratory in Forest Entomology (2) NW

ESRM 441 Landscape Ecology (5) NW J. LAWLER Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resources management (e.g., cumulative effects, cutting, patterns, anadromous fisheries, management of wildlife populations, and open-space planning). Offered: A.

ESRM 442 Forest Ecology and the Sierra Nevada and White Mountains (5) NW An ongoing research project used as a vehicle for learning field methods, natural history, Sierra Nevada species, and ecological theory. Fieldwork occurs on the Yosemite Forest Dynamics Plot, a long-term study of community dynamics. Prerequisite: either ESRM 200, ESRM 201, or ENVIR 490. Offered: S.

ESRM 450 Wildlife Ecology and Conservation (5) NW A. WIRSING Covers principles of wildlife ecology such as habitat use and selection, population and metapopulation dynamics, and predator-prey interactions, and illustrates how they apply to wildlife conservation problems with terrestrial, aquatic, and marine wildlife. Prerequisite: minimum grade of 2.0 in ESRM 350. Offered: W.

ESRM 452 Field Ornithology (3) NW J. MARZLUFF Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques, feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: ESRM 456 which may be taken concurrently; either BIOL 162, BIOL 180, or BIOL 220, any of which may be taken concurrently. Offered: A.

ESRM 455 Wildlife Seminar (1, max. 8) NW Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Offered: AWSp.

ESRM 456 Biology and Conservation of Birds (3) NW J. MARZLUFF Major principles of natural history, avian reproductive biology, population ecology, and national and international conservation strategies for both hunted and unhunted birds. Emphasis on western United States. Prerequisite: either BIOL 162, BIOL 180, or BIOL 220, ESRM 162, any of which may be taken concurrently. Offered: A.

ESRM 457 Fish and Wildlife Toxicology (3/5) NW Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with FISH 455; W.

ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW J. MARZLUFF Biological underpinnings and political realities of endangered species management, including: legal issues, recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction, species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: W.

ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW J. MARZLUFF, A. WIRSING Extended field course offers wildlife science students personal interactions with wildlife managers and wildlife populations in strategic public and private lands in the northwestern United States and southern Canada. Students share costs of trip. Offered when there is sufficient student demand. Prerequisite: ESRM 350; may not be repeated. Offered: Sp.

ESRM 461 Forest Management and Economics (5) I&S/NW Presents important contemporary decision tools, especially how they are used by forest managers to interpret, critique, and develop their basic applications in forestry. Topics include optimization techniques, including linear and nonlinear programming, concepts in interest and time evaluation of alternatives, marginal cost analysis, and computer spreadsheet assisted analysis. Prerequisite: Q SCI 381 or STAT 311; Q SCI 291 or MATH 124. Offered: Sp.

ESRM 462 Restoration Ecology Capstone: Introduction (2-) NW First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with BES 462/TESC 462.

ESRM 463 Restoration Ecology Capstone: Proposal and Plan (-3-) NW Student teams prepare proposals in

response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462. Offered: jointly with BES 463/TESC 463.

ESRM 464 Restoration Ecology Capstone: Field Site Restoration (-5) NW Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with BES 464/TESC 464.

ESRM 465 Economics of Conservation (3) I&S/NW J. PEREZ-GARCIA Economic principles and their use in the analysis of contemporary conservation problems. Particular emphasis directed toward the conservation of forest resources in the Pacific Northwest and related policy issues. Offered: Sp.

ESRM 468 Forest Operations (5) Examines forest land surveying, low volume road access planning, and timber harvesting concepts. Low volume road design principles and practical application of field road location. Overview of road drainage design, construction techniques and maintenance. Reviews basic harvest systems and setting design processes, including cost, production control, environmental and safety considerations. Prerequisite: ESRM 250; ESRM 368; ESRM 323 which may be taken concurrently. Offered: Sp.

ESRM 470 Natural Resource Policy and Planning (5) I&S/NW Introduction to and analysis of environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: W.

ESRM 473 Restoration in North America (5) NW K. EWING Investigates the vegetation and climate of North American ecosystems. Includes an ecosystem by ecosystem review of how restoration is done in each system, including some tropical ecosystems. Offered: W.

ESRM 474 Restoration Problem Solving: Ecological Engineering (5) J. FRIDLEY Exposes students to real-life problem solving that involves the design and manipulation of natural systems to perform ecological function. Focuses on the analysis, design, and implementation of discrete projects. Includes projects dealing with plants, hydrology, earthwork, waste and pollution management, as well as other resources and problems. Offered: A.

ESRM 478 Plant Ecophysiology (5) NW S. KIM Explores physiological mechanisms that underlie ecological observations, including how above- and below-ground microclimates develop and affect plant physiological processes. Discusses acclimation to environmental change along with species differences in physiological processes and plant's occupation of heterogeneous environments. Laboratories emphasize field measurement techniques. Prerequisite: either BIOL 180, B BIO 180, TESC 120, ESRM 201, ESRM 162, or FISH 162. Offered: jointly with BIOL 424; W.

ESRM 479 Restoration Design (5) I&S/NW K. EWING, J. FRIDLEY Covers the design process in ecosystem restoration by presenting a series of weekly design problems that students solve as teams. Categorizes problems by disturbance type, including restoration necessitated by agriculture, urbanization, salt-marsh filling or diking, construction of transport corridors, etc. Includes a team design portfolio. Offered: Sp.

ESRM 480 Landscape Plant Science and Sustainable Management (5) NW S. KIM Principles and practices of plant management in urban and modified landscapes. Physiological basis for plant management and selection; site analysis and preparation; plant installation and after-care; plant performance evaluation; long-term sustainable management and plant health care. Offered: A, even years.

ESRM 489 Foreign Study (1-5, max. 15) Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

ESRM 490 Special Topics (1-5, max. 15) Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSpS.

ESRM 491 Field Studies (1-5, max. 10) Independent field study or one time organized field courses with emphasis outside the traditional classroom. Offered: AWSpS.

ESRM 494 Senior Capstone Proposal (5-) Selection of a capstone topic and type, either thesis or project. Students select a faculty adviser to assist them in the proposal writing process. Regular or Honors credit. Prerequisite: ESRM 200; ESRM 201; ESRM 300; ESRM 304. Offered: AWSpS.

ESRM 495 Senior Project (-5) Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

ESRM 496 Senior Thesis (-5) Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisers to complete field or laboratory research and then prepare the senior thesis. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

ESRM 499 Undergraduate Research (1-5, max. 15) Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

Marine and Environmental Affairs

3707 Brooklyn Avenue Northeast

The School of Marine and Environmental Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses in marine affairs, economics, law, marine sciences, and public affairs, with emphasis on human dimensions of the environment.

GRADUATE PROGRAM

Graduate Program Coordinator

3707 Brooklyn NE, Box 355685

(206) 543-4326, (206) 543-7004

uwsmea@uw.edu

Master of Marine Affairs

The School of Marine and Environmental Affairs offers an internationally recognized master's degree program for launching careers in marine policy and administration. Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water.

A major program objective is to prepare students for professional careers in policy making, management, teaching, and research. Breadth of study is emphasized, and all students are expected to gain familiarity with relevant aspects of the social, technological, and environmental sciences.

In addition, each student is expected to develop a professional and scholarly proficiency in a particular aspect of marine affairs.

Completion of the MMA program normally requires two academic years for students who have received a baccalaureate degree. During the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. During the second year, a special competence is developed in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and a thesis is prepared and presented under the guidance of a faculty Supervisory Committee. Individual courses of study may be adjusted to accommodate prior experience and academic background. Mid-career and other qualifying students can apply to follow a non-thesis track emphasizing additional coursework and a degree project.

Admission Requirements

Admission to the School of Marine Environmental Affairs is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general-test scores, completed departmental supplementary information form, three letters of recommendation, official academic transcripts, and a statement of career objectives. Applicants must apply directly to, and be accepted by, the University's Graduate School. Course sequences begin each autumn quarter, and new students normally are admitted only at that time.

Degree Requirements

59 credits as follows:

1. The Core Curriculum (29 credits minimum)

- a. *Introduction to Marine Affairs*: SMEA 500 , SMEA 501
- b. *Economics*: SMEA 536 . (The Graduate Program Coordinator may waive SMEA 536 for students with adequate undergraduate training, but students must take at least one economics course at the 400 or 500 level. The following courses are suggested: SMEA 537 , SMEA 538 , ECON 435 , ECON 436 .)
- c. *Marine Law*: SMEA 506/LAW 561 or SMEA 515/LAW 565
- d. *Policy Analysis*: SMEA 519 or PB AF 513
- e. *Policy Processes*: One of the following: SMEA 507 , SMEA 508 , SMEA 521 , SMEA 523 , PB AF 590/CFR 592 (when course content appropriate; check with Graduate Program Coordinator); PB AF 592/FM 571
- f. *Marine Science*: SMEA 591 . (The Graduate Program Coordinator may waive from SMEA 591, but students must take at least one 400- or 500-level science course. The following courses are suggested: SMEA 510 ; FISH 450 (4); FISH 454 ; BIOL 472 ; or BIOL 473 .)
- g. *Quantitative Skills*: One of the following: The required skill level is equivalent to intermediate statistics, including an understanding of point estimates, confidence intervals and regression equations. Students not meeting this requirement through undergraduate classes or experience should take one appropriate course while at SMEA. Recommended courses include: Q SCI 381 , STAT 301 , or STAT 311 . (Although 300-level courses do not qualify for graduation credits, the school waives 3 credits of the 59-credit SMEA graduation requirement for students completing one of these courses.)
- h. *Social Science Data Collection and Analysis*: One of the following: SMEA 476 , SMEA 512 , PB AF 507 , GEOG 425 , or CRF 400
- i. *Marine Affairs Seminar*: SMEA 550

2. *Electives (20 credits minimum – or 10 additional elective credits for non-thesis track)*: Elective credits must qualify as graduate credit (typically 400- or 500-level courses) offered in any UW department or school. Students should consult their advisor or thesis committee chair in choosing a set of elective courses. At least 6 credits, and two courses must come from the following list of SMEA courses: SMEA 433 , SMEA 480 , SMEA 485 , SMEA 499 (var.) (when subject is African Population, Development and Marine Environment), SMEA 509 , SMEA 510 , SMEA 514 , SMEA 516 , SMEA 517 , SMEA 540 , SMEA 555 , SMEA 581 , SMEA 550 (cannot simultaneously be used to meet core requirements).
3. *The Thesis and Thesis Presentation (10 credits minimum – for thesis track students)*: SMEA 700 (minimum 9 credits); SMEA 570 .
4. *Career Skills (non-credit requirement)*: First year: One career counseling appointment during fall quarter. One resume review session during winter quarter. Second year: One career counseling appointment during fall quarter. One resume review session during winter quarter.

Financial Aid

The School of Marine Affairs has a limited number of positions for graduate student appointments as research assistants. Applicants in need of support are urged to investigate outside sources of funding.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

SMEA 103 Society and the Oceans (5) I&S/NW Explores the social and policy dimensions of the ocean environment and ocean management policy. Pays attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons." Offered: jointly with ENVIR 103/JSIS B 103.

SMEA 407 International Organizations and Ocean Management (3) I&S Surveys the manner in which international regimes and organizations govern and manage ocean use. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain organizations in different issues or regions, such as climate change or the Arctic.

SMEA 430 Development and the Environment (3) I&S, DIV Dolsak Critically examines policy approaches that balance economic development, natural resource use/environmental protection, and socioeconomic and political diversity. Examined policy approaches include market instruments, standards, information-based regulation, and corporate responsibility. Offered: A.

SMEA 433 Environmental Degradation in the Tropics (5) I&S/NW Christie Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with ENVIR 433/JSIS B 433.

SMEA 476 Introduction to Environmental Law and Process (3) I&S Bryant Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with ENVIR 476; A.

SMEA 480 Human Dimensions of Fishery Management (3) I&S/NW Techniques and philosophy for conservation,

management, and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with FISH 480.

SMEA 485 Pacific Recreation and Tourism Issues (3) I&S/NW, DIV Miller Examines how marine tourism links people to one another and to the environment. Utilizes concepts from cultural anthropology, sociology, political science, geography, ecology, conservation biology, and planning. Topics include: ecotourism, ethnic tourism, marine parks and protected area, fisheries, sustainable development, tourism ethics, and marine environmental education.

SMEA 499 Undergraduate Research (1-15, max. 15) Research on assigned topics under the supervision of faculty members.

SMEA 500 Introduction to the Human Dimensions of Global Change (3) D. FLUHARTY, T. LESCHINE Introduces students to human dimensions of global change in the marine environment. Examines how changes are physical, social, and institutional; and how global climate change affects the ability of ecosystems to provide services that support humankind. Explores changes the use of coastal and ocean resources. Offered: A.

SMEA 501 Integrated Marine Affairs Practice (3) Allison Survey of tools used in integrated assessment of contemporary problems in marine affairs explored through evaluation and comparison of theory and practical application. Prerequisite: SMEA 500 plus two of the following: SMEA 519, SMEA 536, SMEA 591, or permission of instructor. Offered: W.

SMEA 502 Decision Making and Action Taking in Marine Affairs (3) P. CHRISTIE Focuses on the dynamic interaction between human- and natural-world marine environmental systems and the policy- and decision-making, implementation, evaluation, and adjustment that must follow for effective response to problems that emerge within the human dimensions of global change in the marine environments framework. Prerequisite: SMEA 500; SMEA 501.

SMEA 506 International Law of the Sea (3)

SMEA 507 International Organizations and Ocean Management (3) Dolsak Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with PB AF 538.

SMEA 508 National Marine Policy Processes (3) Dolsak Comparative institutional dimensions of marine policy processes. Marine policy context at the national level and the dynamics that drive policy formulation and policy implementation.

SMEA 509 Integrated Coastal Management (3) Christie Managing multiple uses of coastal waters and the adjacent land; conflicts arising from competition for space and resources; organization, scientific, and economic problems associated with coastal management; planning and management experience in the United States and Southeast Asia. Prerequisite: SMEA 500 or permission of instructor.

SMEA 510 Topics in Marine Ecology (3) Klinger Study of ecological principles as they apply to marine species, populations, and ecosystems, using current examples from the primary literature, including contemporary issues such as species declines, species additions, pollution, and global change. Offered: W.

SMEA 511 Coastal Environment Management (3) Evaluation of human uses of the coastal and upland areas in the context of coupled social-ecological systems. Concepts and techniques for evaluation and practical application.

SMEA 512 Interviewing Methods and Environmental Topics (3) Miller Focuses on qualitative techniques employed

by social scientists and other researchers (e.g., sociologists, cultural anthropologists, political scientists, journalists, reporters) in interview situations. Students conduct interviews and limited participant observation with people in public, private, and activist sectors. Relevant to students with interests in marine affairs, forestry, fisheries, and environmental studies.

SMEA 514 Marine Pollution Management Issues (3) Leschine Management and policy aspects of marine environmental protection, emphasizing the two-way interaction between environmental managers and environmental and policy scientists which shapes policy.

SMEA 515 U.S. Coastal and Ocean Law (3-5) Kelly Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation.

SMEA 517 Marine Uses: Transportation and Commerce (3) Role of the oceans in the transportation of people and materials, character and trends in vessel design and terminal facilities, pattern and nature of industry organization, regulations, economics of the shipping industry, management of fleets and vessels, individuals at sea and ashore, national policies affecting the merchant marine and port facilities. Prerequisite: SMEA 500 or permission of instructor.

SMEA 519 Marine Policy Analysis (3) Dolsak Goal is appreciation for and basic working knowledge of techniques used in policy analysis. Techniques are explored in both quasi-realistic settings and in application to real world problems of marine policy.

SMEA 521 Governmental Responses to Global Climate Change (3) Dolsak Exploration of major scientific, policy, and legal issues pertaining to problems of global climate change including regime design, use of climate models, impact on hydrology water resources, and forests.

SMEA 523 International Science and Technology Policy (3) Dolsak Analyzes the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries. Deals with international implications as countries make policies in regional and global organizations. Examples chosen from space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploration.

SMEA 525 Marine Protected Area Management and Science (3) Fluharty Examines management and scientific issues involved with the design, establishment, operation, and maintenance of MPAs. Offered: Sp.

SMEA 530 Development and the Environment (3) Dolsak Examines two intertwined concepts that are frequently in conflict, economic development and the environment. Examines sustainable development, growth management, sustainable yield, and corporate social responsibility; the emergence, effectiveness, and their relationships with democracy and equity. Offered: A.

SMEA 536 Applied Microeconomics for Marine Affairs (3) Acquaints students with microeconomic tools commonly employed in policy analysis. Emphasis is placed on mastery of basic concepts, definitions, and models useful to marine policy, including determinants of price and outputs in competitive markets, effects of other market structures, market failure, and applied welfare economics.

SMEA 537 Economic Aspects of Marine Policy (3) Development of pertinent economic concepts and their application to selected topics in marine policy decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with ECON 537; W.

SMEA 538 Economics of Living Marine Resources (3) Develops pertinent economic concepts and applications for conservation, regulation, and restoration of fisheries and

other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Offered: jointly with ECON 538; Sp.

SMEA 539 U.S. Fisheries Management and Policy (3) Examination of basic laws and policies in the US that govern fisheries management and their implementation by managers at federal, tribal, state, and international levels. Includes lectures, guest speakers, and field trips. Offered: jointly with FISH 539.

SMEA 540 International Strategic Planning for Marine Resources (3) Kaczynski Marine economies are affected by declining resources, population pressure, and economic globalization. International examples and case studies are used to explore opportunities for strategic planning. Prerequisite: SMEA 500 or permission of instructor. Offered: A.

SMEA 550 Special Topics in Marine Studies (1-3, max. 18) Examination of various aspects of marine studies. Content varies, depending upon the interests of the faculty and students. Intended for the joint participation by the faculty and advanced students in the investigation of selected topics. One or more groups are organized each quarter.

SMEA 570 Thesis Presentation (1) Fluharty Completion of the thesis requirement for SMEA. Prepare a professional presentation to a peer audience. Credit/no-credit only. Offered: AWSpS.

SMEA 571 Non-Thesis Seminar (1) Leschine Capstone course for students enrolled in non-thesis track to synthesize and integrate their learning into concrete products. Credit/no-credit only. Offered: AWSpS.

SMEA 581 Case Study Research: Design and Methods (3) Provides in-depth training in case study theory, design, and methods. Designed for exploring prospectus ideas or beginning analysis of thesis research. Through readings, discussions, exercises, and lectures, students learn how to select units of analysis, control data quality, and collect, analysis, and report data. Offered: jointly with FISH 581.

SMEA 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ENVR 585/ESS 585; Sp.

SMEA 591 Marine Science in the Coastal Zone (3) R. KELLY Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with OCEAN 591; A.

SMEA 600 Independent Study or Research (*-)

SMEA 700 Master's Thesis (*-)

Oceanography

108 Oceanography Teaching Building

Oceanography - study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere - is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean's resources for the benefit of humanity. As an interdisciplinary science, oceanography integrates the basic

principles of biology, chemistry, geology, physics, geophysics, mathematics, botany, zoology, meteorology, and geography. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. Oceanography is divided into four areas of emphasis:

Biological Oceanography examines the processes governing the distribution, abundances, and production of plants, animals, and nutrients in the oceanic ecosystem. Emphasis is on investigations of bacteria, phytoplankton, zooplankton, and benthic organisms.

Chemical Oceanography investigates the complex chemistry, distribution, and cycling of dissolved substances, nutrients, and gases in seawater, the mechanisms controlling them, and their origins and fates.

Marine Geology and Geophysics studies marine sediments (their formation, transport, and deposition); ocean basin formation (plate tectonics); processes governing shoreline formation; and the origin, structure, and history of the oceanic crust and upper mantle.

Physical Oceanography endeavors to understand and predict motions in the sea from millimeters through tidal and current scales to the great ocean gyres, the distribution of physical properties (temperature, salinity, sea ice), and air-sea interaction and its implications for climate.

UNDERGRADUATE PROGRAM

Adviser

108 Oceanography Teaching Building, Box 357940

(206) 543-5039

student@ocean.washington.edu

The School of Oceanography offers the following programs of study:

- The Bachelor of Science degree with a major in oceanography
- The Bachelor of Arts degree with a major in oceanography
- Specializations include biological, chemical, or physical oceanography, or marine geology and geophysics
- A minor in oceanography
- A minor in climate science (offered jointly with the Departments of Atmospheric Sciences and Earth and Space Sciences)
- A minor in arctic studies (offered jointly between the Jackson School of International Studies and the School of Oceanography)

Bachelor of Arts

Suggested Pre-College Courses: Interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, and physics recommended.

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126 (or Q SCI 291, Q SCI 292, Q SCI 381); CHEM 142, CHEM 152; BIOL 180, BIOL 200; one of ESS 210, ESS 211, or ESS 212; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116); OCEAN 220; and English composition

Department Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

1. English composition (5 credits), with a minimum grade of 2.0

2. Writing courses (10 credits), including OCEAN 220 (3 credits) and OCEAN 444 (5 credits)
3. Quantitative and Symbolic Reasoning (10 credits), met by departmental requirements below
4. Individuals & Societies (20 credits). 10 of these credits must be taken out of major, defined as courses that neither count toward major requirements below nor have the prefix of the department from which the student is earning a degree (includes co-listed courses).
5. Visual, Literary, & Performing Arts (10 credits)
6. Natural World (20 credits). 10 credits must be taken out of major, defined as courses that neither count toward major requirements below nor have the prefix of the department from which the student is earning a degree (includes co-listed courses).

Major Requirements

Same as for the Bachelor of Science degree (see below), except only 10 credits of upper-division science, mathematics, or engineering courses are required.

Bachelor of Science

Suggested Pre-College and First- and Second-Year College Courses: Same as for Bachelor of Arts degree (shown above)

Department Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

Same as for the Bachelor of Arts degree (shown above).

Major Requirements

Minimum 116 credits, to include the following:

1. **Foundational Courses (55 credits):** PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116); MATH 124, MATH 125, MATH 126 (or Q SCI 291, Q SCI 292, Q SCI 381); CHEM 142, CHEM 152; BIOL 180, BIOL 200; one of ESS 210, ESS 211, ESS 212; and BIOL 161-BIOL 162 or BIOL 180, BIOL 200, BIOL 220
2. OCEAN 200, OCEAN 201, OCEAN 210, OCEAN 220, OCEAN 400, OCEAN 410, OCEAN 420, OCEAN 430, OCEAN 443, OCEAN 444, OCEAN 445 (35 credits)
3. 400-level oceanography coursework selected in the student's area of specialization, in consultation with a faculty adviser (6 credits)
4. Upper-division science, mathematics, or engineering, selected in the student's area of specialization, in consultation with a faculty adviser (20 credits)
5. Minimum 2.0 grade in all required oceanography courses.

Minor

Minor Requirements: 25 credits as follows:

1. OCEAN 200, OCEAN 210, OCEAN 220
2. One of the following: OCEAN 400, OCEAN 410, OCEAN 420, or OCEAN 430
3. 12 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

Minor in Arctic Studies

See entry for Arctic Studies in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Minor in Marine Biology

See entry for Marine Biology in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Minor in Climate Science

See entry for Climate Science in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard oceanographic research and data analysis and interpretation. Students engage in fieldwork and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally students acquire familiarity with the specialized instruments of oceanographic research.

The program prepares students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.

- **Instructional and Research Facilities:** The school has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The school operates two research vessels: the 274 foot R/V Thomas G. Thompson, used chiefly for open ocean research throughout the world, and the 65 foot R/V Clifford A. Barnes, used for research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.
- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- **Research, Internships, and Service Learning:** Special opportunities for oceanography majors are provided by involving students in undergraduate research projects and part-time employment.
- **Department Scholarships:** See adviser for availability.
- **Student Organizations/Associations:** The Student Oceanographic Society (SOS) provides peer advice, organizes field trips, sponsors alumni career panels, and holds social gatherings.

GRADUATE PROGRAM

Graduate Student Services

108 Ocean Teaching, Box 357940

(206) 543-5039

student@ocean.washington.edu

The School of Oceanography provides instruction and research opportunities at the graduate level in all areas: biological, chemical, and physical oceanography, and marine geology and geophysics. The program of study emphasizes independent research in conjunction with basic and spe-

cialized courses. Interdisciplinary research is encouraged, and students enjoy the opportunity to work across the usual scientific boundaries. Coursework during the first two years is required in each option; specialized coursework is structured to fit the student's background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

Master of Science

The program of study includes coursework in the student's area of interest and the other oceanography options, as well as completion of an approved research project and oral presentation of the results. Thesis and non-thesis programs are offered; most students select the non-thesis option.

Admission Requirements

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives (to be defined in online application), which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms (included in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

Degree Requirements

36-45 credits, as follows:

Thesis program: Minimum 36 quarter credits (27 course credits and minimum 9 credits of thesis). *Non-thesis program:* Minimum 36 quarter credits of coursework.

1. At least 18 of the minimum 36 quarter credits must be numbered 500 and above. (In a thesis program, 9 of the 18 credits must be course credits and 9 may be OCEAN 700.)
2. Numerical grades in at least 18 quarter credits of coursework taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
3. Minimum three full-time quarters of residence credit. Part-time quarters may be accumulated to meet this requirement.
4. In the thesis degree program, a thesis, approved by the Supervisory Committee, must be submitted to the Graduate School. A student must register for a minimum of 9 credits of thesis (OCEAN 700). With the exception of summer quarter, students are limited to a maximum of 9 credits per quarter of thesis (OCEAN 700). A final master's examination, either oral or written, as determined by the student's Supervisory Committee, must be passed.
5. A final master's examination, either oral or written, as determined by the student's supervisory committee.

Biological Oceanography Option: The core curriculum consists of OCEAN 530 , OCEAN 531 , OCEAN 532 , OCEAN 533 . Master's level students must take a minimum of 3 credits of advanced biological oceanography courses.

Chemical Oceanography Option: The core curriculum consists of OCEAN 520 . Master's level students must take a minimum of three advanced chemical oceanography courses.

Marine Geology and Geophysics Option: The core curriculum consists of OCEAN 540 , OCEAN 541 , OCEAN 545 .

Physical Oceanography Option: The core curriculum consists of OCEAN 500 , OCEAN 510 , OCEAN 511 , OCEAN 512 , OCEAN 513 , OCEAN 514 , OCEAN 515 , OCEAN 517 . Physical oceanography students take a sequence of three courses in applied mathematics.

Out-of-Option Requirement: All graduate students are required to take a minimum of one 3-credit, numerically graded, 500-level course from each option outside their own for a total of three courses and 9 credits. Each option provides a list of courses that can be taken to fulfill this requirement. See department website or adviser for a list of suitable courses. Students are expected to complete this breadth requirement prior to receiving an MS degree. A graduate student affairs committee, chaired by the Graduate Program Coordinator, addresses any requests for waivers.

Doctor of Philosophy

The degree program places a strong emphasis on research following completion of course requirements and the general examination. Upon successful completion of the general examination, the student undertakes an original research investigation, which is described in the dissertation and defended during the final examination.

Admission Requirements

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives (to be defined in online application), which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms (available in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

Degree Requirements

Minimum 90 credits, as follows:

1. Completion of a program of study and research as planned by the Graduate Program Coordinator in the student's major department or college and the Supervisory Committee. Half the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of coursework at the 500 level and above must be completed prior to scheduling the general examination.
2. Presentation of a minimum three years (nine full-time quarters) of resident study, two being at the UW with at least one year in continuous full-time residence. The year of full-time residence may be satisfied by completing any three full-time quarters (not necessarily continuous) at the UW and must be completed prior to the general examination. Residence requirement for the doctoral degree cannot be met solely by part-time study.

A minimum of two academic years of resident study must be completed prior to scheduling the general examination.

3. With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may be applied toward one year of resident study at the UW.
4. Numerical grades must be received in at least 18 quarter credits of coursework taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative 3.00 GPA is required for a graduate degree at the University.
5. Creditable passage of the general examination. Registration as a graduate student is required the quarter the examination is taken and candidacy is conferred.
6. Preparation and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credits. The candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters. At least one quarter must come after the student passes the general examination. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of dissertation (OCEAN 800).
7. Creditable passage of a final examination, usually devoted to defense of the dissertation and the field with which it is concerned. The general and final examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the examination is taken and the degree is conferred.
8. Completion of all work for the doctoral degree within ten years. This includes quarters spent on leave or out of status as well as applicable work from the master's degree from the UW or a master's degree from another institution, if applied toward one year of resident study.

Biological Oceanography Option: The core curriculum consists of OCEAN 530 , OCEAN 531 , OCEAN 532 , OCEAN 533 . Doctoral level students must take a minimum of 9 credits of advance biological oceanography courses.

Chemical Oceanography Option: The core curriculum consists of OCEAN 520 . Doctoral level students must take a minimum of six advanced chemical oceanography courses.

Marine Geology and Geophysics Option: The core curriculum consists of OCEAN 540 , OCEAN 541 , OCEAN 545 .

Physical Oceanography Option: The core curriculum consists of OCEAN 500 , OCEAN 510 , OCEAN 511 , OCEAN 512 , OCEAN 513 , OCEAN 514 , OCEAN 515 , OCEAN 517 . Physical oceanography students are also expected to take a sequence of three courses in applied mathematics.

Out-of-Option Requirement: All graduate students are required to take a minimum of one 3-credit, numerically graded, 500-level course from each option outside their own for a total of three courses and 9 credits. Each option provides a list of courses that can be taken to fulfill this requirement. See department website or adviser for list of suitable courses. Students are expected to complete this breadth requirement prior to receiving an MS degree. A graduate student affairs committee, chaired by the Graduate Program Coordinator, addresses any requests for waivers.

Financial Aid

Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources. Most appointments continue through the summer when students are engaged in research.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/.

OCEAN 100 Explore Oceanography at UW (1) Explores the research and experiences of the Oceanography school's faculty, graduate students, and undergraduate students. Intended for freshmen, new transfer students, and other considering oceanography as a major. Credit/no-credit only. Offered: A.

OCEAN 101 Oceanography of the Pacific Northwest (5) NW Introduces the fundamental principle of oceanography by focusing on the waters that surround us - the Washington coast and Puget Sound. Investigates the geologic history of the Pacific Northwest, and the physics, chemistry, and biology of coastal waters using case studies. Intended for nonmajors. Offered: A.

OCEAN 102 The Changing Oceans (5) I&S/NW Historical case studies of research on the ancient oceans, deep-sea exploration, climate change and the oceans, and human impacts on marine life. Students consider societal factors affecting progress in marine science, changing popular attitudes toward the oceans, and key current policy implications of marine science. Intended for nonmajors. Offered: W.

OCEAN 115 Astrobiology: Life in the Universe (5) NW R. BUICK, D. CATLING, V. MEADOWS, W. SULLIVAN Introduces to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with AST-BIO 115/ASTR 115/BIOL 114/ESS 115.

OCEAN 121 Deep Sea Exploration: Submarine Volcanoes and Novel Life Forms (2) NW Examines the dynamic marine processes that shape the planet and cutting-edge oceanographic technologies used to explore the deepest oceans. Includes imagery of rarely seen submarine volcanic eruptions, hot springs, and novel life forms highlighting the interconnected geological-biological processes creating the most extreme environments on Earth. Offered: W.

OCEAN 200 Introduction to Oceanography (3) NW Description of the oceans. Emphasis on relations of biology, chemistry, geology, and physics in marine environments. Examination of relationships and interactions at macro-, meso-, and micro-scales in the ocean. Intended for science majors. Offered: Sp.

OCEAN 201 Introduction to Oceanography Lab (2) NW Ingalls Provides opportunities to experiment with oceanographic concepts through laboratory and field experiences, and learn about the scientific method of inquiry as it applies to the study of geology, physics, chemistry, and biology of the ocean. Emphasizes topics that explore current challenges faced by the ocean and its ecosystem. Co-requisite: OCEAN 200. Offered: Sp.

OCEAN 210 Integrative Oceans (4) NW Presents fundamentals of ocean science through regional case studies that illustrate the relationship between interdependent physical, chemical, biological, and geological process. Students apply tools from the major scientific disciplines to understand major changes predicted for future oceanic environments. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/FISH 250. Offered: A.

OCEAN 215 Methods of Oceanographic Data Analysis (4) Statistics, graphical representations, and analysis methods for oceanographic datasets using the PYTHON programming language. Prerequisite: Prerequisite: MATH 125. Offered: A.

OCEAN 220 Introduction to Field Oceanography (3/5) NW Design and conduct a field study in oceanography. Focuses on active learning, deployment of instruments, data collection, interpretation, and presentation. Required field trip

during spring break. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/FISH/250. Offered: Sp.

OCEAN 230 Rivers and Beaches (3/5) NW Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focus on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with ESS 230.

OCEAN 235 Arctic Change (2/3) I&S/NW Investigates the Arctic system of ocean, ice, atmosphere, and sea-floor; how human interact with it, and what the future of the Arctic means to the world. Includes sea-ice loss, climate impacts, and Arctic resource exploitation. Offered: W.

OCEAN 240 Contemporary Issues in Oceanography (1-5, max. 9) NW Selected topics of contemporary interest in oceanography such as hydrothermal vents, planetary volcanism, biogeochemical cycling, the ecology of Puget Sound, and the ocean's role in climate.

OCEAN 250 Marine Biology (3/5) I&S/NW Lecture-laboratory course in marine biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Weekend field trip. Honors section research project. Offered: jointly with BIOL 250/FISH 250; AS.

OCEAN 261 Introduction to Ocean Technology (2) NW M. LOGSDON Introduces ocean science and technology in observational ocean science. Covers the basics of underwater sensor design, power, and data communication, and introduces the design and build process and the operational scope of the ERIS cabled observatory. Offered: S.

OCEAN 270 Aquatic Ecophysiology (5) NW Focuses on fundamental physiology, with an emphasis on processes relevant to living in a variety of aquatic environments. Includes a broad survey of taxa, from prokaryotes to mammals, and a variety of aquatic habitats. Prerequisite: BIOL 200. Offered: jointly with FISH 270/MARBIO 270.

OCEAN 285 Physics Across Oceanography: Fluid Mechanics and Waves (5) NW In the context of oceanography and marine science applications, explores the basic principles of fluid mechanics, waves, light, acoustics, and heat transfer. Prerequisite: either MATH 126 or QSCI 292, which may be taken concurrently; either PHYS 114 or PHYS 121.

OCEAN 295 Chemistry of Marine Organic Carbon (5) NW Explores how organic carbon cycles through the global carbon cycle, in the context of earth sciences and marine biogeochemical cycles. Prerequisite: either CHEM 152 or CHEM 120. Offered: S.

OCEAN 300 Exploring Opportunities in Marine Science (1) Explores academic, research, and career opportunities in the field of marine science and helps prepare students for graduation. Intended for junior and transfer students studying marine science. Credit/no-credit only. Offered: jointly with FISH 300/MARBIO 300; A.

OCEAN 351 Foundations of Ocean Sensors (5) NW, QSR D. GRUNBAUM Experiential learning giving students foundational knowledge of methods used to observe key quantities that characterize marine environments. Includes theory and application of sensor design and construction principles, in the context of inferences and hypothesis-testing about key physical, biological, chemical, and geological dynamics in the oceans. Prerequisite: OCEAN 215; OCEAN 285, which may be taken concurrently. Offered: W.

OCEAN 355 From Big Bang to the Blue Planet (3) NW Sachs Explores the origin and evolution of the Earth, ocean, atmosphere, and life, with an emphasis on climate as the integrator of changes in the biosphere, cryosphere, hydrosphere, atmosphere, and lithosphere. Prerequisite: either CHEM 120 or CHEM 142; either PHYS 114 or PHYS 121; either BIOL 161, or BIOL 180.

OCEAN 361 Ocean Technology I: Introduction to Underwater Observational Sensor Design and Build (2) NW M. LOGSDON Combines ocean science and technology in a design and build course utilizing the ERIS cabled observatory at the UW Oceanography dock. Students apply the basics of sensor design, power, and data communication to individual underwater observatory projects. Prerequisite: OCEAN 261, which may be taken concurrently. Offered: S.

OCEAN 365 Practicing Sustainability Science (8) I&S/NW S. Veirs, V. Veirs Intensive off-campus experience. Studies sustainability science, marine policy, and "clean" technologies. Includes interaction with community stakeholders for five weeks and experimentation with sustainable technologies and practices in the marine environment during a five-week cruise aboard an energy-efficient sailing catamaran. Offered: Asp.

OCEAN 370 Marine Evolutionary Biology (5) NW Emphasizes geobiological patterns of marine evolutionary biology environment; processes of evolution; marine prokaryote and eukaryote diversity; and applications of evolutionary principles to ocean change, and conservation and management of marine biodiversity. Prerequisite: either FISH 270/OCEAN 270/MARBIO 270 or BIOL 220. Offered: jointly with FISH 370/MARBIO 370; Sp.

OCEAN 400 Chemical Oceanography (4) NW Physical and chemical properties of seawater and marine products; processes determining the chemical makeup of the oceans. Prerequisite: either CHEM 152 or CHEM 155; OCEAN 210. Offered: W.

OCEAN 401 Special Topics in Chemical Oceanography (3) NW

OCEAN 409 Marine Pollution (3) I&S/NW R. KEIL Explores anthropogenic impacts on the oceans and marine organisms. Examines how scientific understanding informs environmental management, thereby linking science and society. Students develop a detailed understanding of the major categories of anthropogenic impacts on marine systems, their mechanisms of effect, their sources, and fates. Prerequisite: either OCEAN 200 or OCEAN 250; OCEAN 210. Offered: W.

OCEAN 410 Marine Geology and Geophysics (4) NW Explores the geological and geophysical processes that form and shape the ocean basins and continental margins. Prerequisite: either ESS 210, ESS 211, or ESS 212. Offered: jointly with ESS 410; A.

OCEAN 411 Special Topics in Marine Geology and Geophysics (3) NW

OCEAN 412 Seismic Exploration and Stratigraphy (5) NW Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: either ESS 311 or OCEAN 410; either MATH 126 or MATH 136; PHYS 123. Offered: jointly with ESS 467.

OCEAN 420 Physical Processes in the Ocean (4) NW Physical properties and processes of the ocean: methods of describing ocean currents, waves, tides, and mixing and their effect on movement of water parcels. Prerequisite: either PHYS 114 or PHYS 121; either MATH 125 or Q SCI 381, which may be taken concurrently; OCEAN 210. Offered: W.

OCEAN 421 Special Topics in Physical Oceanography (3) NW

OCEAN 423 Ocean Circulation and Climate (3) NW Quantitative treatment of ocean basin to global scale ocean circulation systems and their interaction with climate variability. Prerequisite: PHYS 123; MATH 125.

OCEAN 430 Biological Oceanography (4) NW Examines marine organisms, their quantitative distribution in time and space, and their interactions with the ocean. Emphasizes dominant pelagic forms of phytoplankton, bacterioplankton, and archaeoplankton; and their predators, viruses, and zooplankton. Case studies explore extreme

environments, coral reefs, influence of climate change on oceanic ecosystems, and the coastal ocean. Prerequisite: BIOL 200; OCEAN 210. Offered: A.

OCEAN 431 Special Topics in Biological Oceanography (3) NW Reviews current research. Topics include global change effects on marine organisms, marine pathogens and emerging diseases, introduced species, marine viruses, astrobiology, hydrothermal vents, symbiosis, animal physiology, larval forms and dispersal, biogeography, and environmental ethics. Prerequisite: either OCEAN 430 or any 400-level BIOL, FISH, or MICROM course.

OCEAN 443 Undergraduate Thesis: Proposal (3) NW

OCEAN 444 Undergraduate Thesis: Research (2) Work closely with faculty mentors to conduct thesis research as designed in OCEAN 443 in a field, laboratory, or other guided research setting. Prerequisite: OCEAN 443. Offered: W.

OCEAN 445 Undergraduate Thesis: Data Analysis and Writing (3) NW Analyze results from senior thesis experiments and present results in a series of drafts and a final paper. Results are presented at a two-day long public research symposium and on the students; individual web sites. Prerequisite: OCEAN 444. Offered: Sp.

OCEAN 450 Climatic Extremes (4) NW Course examines Earth history for extreme climatic conditions to predict future climate changes. Numerical climate models use PC-based computer programs to identify processes and feedbacks that control climate. Offered: W.

OCEAN 452 Spatial Information Technology in Ecosystem Sciences (3) NW *Logsdon* Introduces the use of Geographic Information Systems (GIS), remote sensing, and spatial analysis in the ecosystem sciences. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 452; A.

OCEAN 453 Geospatial Pattern Analysis and Geostatistics (3) NW *Logsdon* Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Prerequisite: either Q SCI 381 or Q SCI 482; OCEAN 452. Offered: jointly with FISH 453; W.

OCEAN 454 Hydrothermal Systems: An Interdisciplinary View (3) NW *Lilley* Provides a general, interdisciplinary overview of seafloor hydrothermal systems including important geological, chemical, and biological processes. Topics include tectonic and volcanic controls on hydrothermal systems, water/rock reactions, phase separation, temporal variability, fluxes to the deep sea, micro- and macro biology. Offered: W.

OCEAN 455 Introduction to Modeling in Oceanography (3) NW, QSR *Grunbaum* Explores roles of ocean models in understanding past, current, and future conditions in marine environments. Focuses on active learning using models to ask and answer questions about biotic and abiotic processes in marine environments. Prerequisite: either OCEAN 200, FISH 250, OCEAN 250, BIOL 250, or ATM S 211. Offered: A.

OCEAN 460 Marine Field Research (10) NW, QSR *S. Veirs, V. Veirs* Intensive off-campus marine research experience. Includes five weeks designing a field experiment and a five-week cruise aboard a sailing research vessel to implement it. Offered: ASp.

OCEAN 461 Advanced Ocean Technology - Project Design and Management (2) NW *M. LOGSDON* Project management practicum in the design, build, operations, and management of observational ocean science technology. Students oversee and mentor ongoing design and build projects, with attention to design criteria and deployment timelines. Prerequisite: OCEAN 361. Offered: S.

OCEAN 475 Current Research in Climate Science Seminar (3, max. 6) Weekly lectures focusing on a particular aspect

of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ATM S 475/ESS 475; A.

OCEAN 477 Seminar in Marine Biology (3) NW *Roccap* Reviews current research in marine biology. Emphasizes critical readings and discussion of primary literature. Prerequisite: FISH 250, OCEAN 250, or BIOL 250; Q SCI 381, STAT 220, or STAT 311. Offered: jointly with BIOL 477/FISH 477; W.

OCEAN 479 Research in Marine Biology (1-15, max. 15) Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/FISH 479; AWSpS.

OCEAN 481 Puget Sound and Estuarine Oceanography (3) NW *Keister, MacCready* Explores fundamental physical-biological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.

OCEAN 482 The Changing Arctic Ocean (3) NW *Deming, Woodgate* Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most recent advances and considering the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Offered: Sp.

OCEAN 492 Friday Harbor Apprenticeship (9/15) NW Intensive, full-time research training experience where teams of students work on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Research questions vary.

OCEAN 494 Field Experiences in Marine Science (1-15, max. 30) NW For participants in oceanography field work. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.

OCEAN 496 Study Abroad: Oceanography (1-15, max. 30) NW For participants in UW study abroad program. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.

OCEAN 497 Advanced Special Topics in Oceanography (1-15, max. 15)

OCEAN 499 Undergraduate Research (1-15, max. 24) Individual research supervised by a faculty member. May involve laboratory work, fieldwork, or literature surveys. Offered: AWSpS.

OCEAN 500 Current Problems in Oceanography (1, max. 10) Discussion of research topics that are currently being investigated within the school. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AW.

OCEAN 502 Spatial Information Technology in Ecosystem Sciences (3) *Logsdon* Introduces the use of Geographic Information Systems (GIS), remote sensing, and spatial analysis in the ecosystem sciences. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 502; A.

OCEAN 503 Geospatial Pattern Analysis and Geostatistics (3) *Logsdon* Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Offered: jointly with FISH 503; W.

OCEAN 506 Interdisciplinary Seminar in Oceanography (1-3, max. 12) Lectures, discussions, and work on selected

problems of an interdisciplinary nature. Prerequisite: permission of instructor.

OCEAN 507 Puget Sound and Estuarine Oceanography (3) *Keister, MacCready* Explores fundamental physical-biological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.

OCEAN 508 The Changing Arctic Ocean (3) *Deming, Woodgate* Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most recent advances and considering the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Offered: Sp.

OCEAN 509 Seminar (1, max. 30) Introduction to current research topics for beginning graduate students. Credit/no-credit only. Offered: AWSp.

OCEAN 510 Physics of Ocean Circulation (3) Structure of ocean basins; physical properties of seawater and the equation of state; heat, salt, fresh water budgets; tidal potential; Coriolis effect and geostrophic balance; major current systems and water masses; mixing, stirring in the ocean; simple waves; modern experimental methods in physical oceanography. Prerequisite: permission of instructor. Offered: A.

OCEAN 511 Introduction to Fluid Dynamics (4) Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: either a course in partial differential equations or permission of instructor. Offered: jointly with AMATH 505/ATM S 505; A, odd years.

OCEAN 512 Geophysical Fluid Dynamics I (4) Dynamics of rotating stratified fluid flow in the atmosphere/ocean and laboratory analogues. Equations of state, compressibility, Boussinesq approximation. Geostrophic balance, Rossby number. Poincare, Kelvin, Rossby waves, geostrophic adjustment. Ekman layers. Continuously stratified dynamics: Inertia-gravity waves, potential vorticity, quasigeostrophy. Prerequisite: OCEAN 511 or ATM S 505/AMATH 505. Offered: jointly with ATM S 509; W.

OCEAN 513 Geophysical Fluid Dynamics II (3) Theories, models of large-scale dynamics of oceans, atmospheres. Potential vorticity, Q principles; Rossby waves, ray tracing, Green's function, setup of general circulation; atmospheric "channels" versus ocean "basins"; wave-mean flow interaction, mountain drag, internal momentum flux; "Lagrangian" motion of particles, tracers; cascades, eddy flux of heat, moisture, Q. Prerequisite: OCEAN 512. Offered: Sp.

OCEAN 514 Waves (3) Application of marine hydrodynamics principles to wave motion in oceans. Offered: W.

OCEAN 515 Ocean Circulation: Observations (3) Modern large- and mesoscale ocean observations, interpreted in terms of contemporary circulation theories. Spectrum of temporal variability; eddies and eddy fluxes; ventilation; advection and diffusion in the abyss; transports of heat and salt; climatic scale of variability; modern methods for determining circulation. Prerequisite: OCEAN 510 or permission of instructor. Offered: Sp.

OCEAN 517 Methods and Measurements in Physical Oceanography (3) Principal instruments and experimental methods of physical oceanography. Devices and systems that measure pressure, temperature, electrical conductivity, sea state, and velocity. Prerequisite: permission of instructor.

OCEAN 518 Scientific Writing and Graphics (2) *Waddington, Warren* Covers principles of scientific writing; meth-

ods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ATM S 519/ESS 519; Sp, odd years.

OCEAN 520 Marine Chemistry (3) Processes controlling the chemical composition of seawater. Chemical distributions in the ocean, marine physical chemistry, chemical equilibrium, and concepts of mass balance. Mechanisms and models used to explain distributions of stable and radioactive isotopes, gases, trace metals, and biochemicals in the world's oceans. Offered: A.

OCEAN 521 Aquatic Chemistry (3) Application of physical chemistry and thermodynamics to processes that control chemical composition of natural waters. Equilibrium approach. Acid/base chemistry, the carbonate system, dissolution and precipitation, metal ions in solution, oxidation-reduction chemistry, silicate mineral reactions. Prerequisite: OCEAN 520 or permission of instructor. Offered: A.

OCEAN 522 Marine Organic Geochemistry (3) Sources, reactions, and fates of organic molecules in the marine environment along with the stable isotope geochemistry of marine organic substances. Prerequisite: CHEM 237 and CHEM 239 or permission of instructor.

OCEAN 523 Geochemical Cycles (4) Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with ATM S 508/CHEM 523.

OCEAN 529 Seminar on Chemical Oceanography (*, max. 30) Lectures, discussions, and readings on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

OCEAN 530 Marine Bacteria, Archaea, and Viruses (3) Explores the role of marine microorganisms in transformations of dissolved and particulate organic matter. Covers the functional and phylogenetic diversity of bacteria, archaea, and viruses in the marine environment; the fate of organic carbon in the microbial loop; and the interrelationship of the carbon cycle with other biogeochemical cycles. Prerequisite: permission of instructor. Offered: W, odd years.

OCEAN 531 Marine Phytoplankton and Biogeochemistry (3) Covers phytoplankton in the marine environment: evolution, ecology, primary productivity, and physiology, emphasizing their role in the global carbon cycle; spatial and temporal distributions of phytoplankton and how these patterns may change as ocean conditions change; and methods for determining distributions and rates in different ocean ecosystems. Prerequisite: permission of instructor. Offered: W, even years.

OCEAN 532 Marine Zooplankton Ecology (3) Examines the role of zooplankton in ecosystems and biogeochemical cycles. Covers the distribution and abundance of zooplankton in space and time; small-scale distributions; morphology and behavior; population dynamic, energetics, and secondary production; trophic structure and dynamics; biogeography; impacts of climate change; and models of populations and food chains.

OCEAN 533 Marine Benthic Ecology (3) Analyzes marine communities associated with the porous boundaries of the ocean, from sedimented seafloor and hydrothermal vents to sea ice (inverted benthos); emphasizing nutrition to these communities, including sinking organic aggregates, themselves porous habitats, and the role of symbiosis. Prerequisite: permission of instructor. Offered: W, even years.

OCEAN 535 Biological Oceanography (3) Examines major patterns and processes in upper ocean pelagic ecosystems, emphasizing quantitative analysis of mechanisms

controlling production and abundances of organisms, from plankton to fish. Introduces interdisciplinary study of effects of anthropogenically induced changes in climate and ocean chemistry on organisms, ecosystem processes, and biogeochemical cycles. Offered: A.

OCEAN 539 Seminar in Biological Oceanography (*, max. 30) Lectures, discussions, and work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

OCEAN 540 Marine Geology and Geophysics Processes (3) *Nittrover, Solomon* Synthesis of processes that form ocean basins and fill them with sediment, including: plate tectonics and the creation, evolution, and subduction of ocean crust; accumulation of terrestrial, biogenic, and authigenic sediments; and the history of paleoceanographic events recorded in the seafloor. Offered: W.

OCEAN 541 Marine Sedimentary Processes (3) Investigates fundamental process of marine sedimentation, including equations characterizing boundary-shear flows, initiation of grain motion, bedload and suspended-load transport, and sediment accumulation. Applies concepts to sediment dispersal in rivers, deltas, estuaries, beaches, continental shelves, slopes, and rises, with emphasis on the relationships between active processes and resulting deposits.

OCEAN 544 Subseafloor Hydrogeology and Geochemistry (3) *Soloman* Introduces the occurrence, composition, and movement of groundwater in the ocean crust and its role in a wide range of geologic and biogeochemical processes. Includes basic theories of groundwater motion, heat transport, solute transport, and hydromechanics with applications to diverse subseafloor environments ranging from mid-ocean ridges to subduction zones. Offered: Sp.

OCEAN 545 Oceanic Lithosphere (3) Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with ESS 568.

OCEAN 546 Continental-Margin Sedimentation (3) Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities. Offered: jointly with ESS 546.

OCEAN 549 Seminar in Geological and Geophysical Oceanography (*, max. 30) Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

OCEAN 550 Geochemistry and Geophysics of Melt Generation (3) Mantle flow beneath mid-ocean ridges and hotspots, major element systematics, constraints from trace elements and isotopes on melting and mantle reservoirs, melt extraction, and crustal thickness and axial topography. Prerequisite: OCEAN 544 or permission of instructor.

OCEAN 552 Seminar in Geophysics and Geological Data Analysis (1) Practical geophysical data analysis, map projections, gridding multibeam bathymetry processing, gravity and magnetic anomalies, downward continuation, magnetic inversion, seismic refraction and reflection, and microearthquake locations. Prerequisite: permission of instructor.

OCEAN 554 Paleoclimate Proxies (3) *Alexander, Sachs* Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/ESS 554.

OCEAN 558 Climate Modeling (3) *Bitz, Thompson* Principles of Earth system modeling. Emphasis on atmosphere, ocean sea ice, and land-surface components. Climate forc-

ing. Appropriate use of models. Topics of current interest including carbon cycle, atmosphere chemistry, and biogeochemistry. Prerequisite: either ATM S 587/OCEAN 587/ESS 587, ATM S 504 or ATM S 505. Offered: jointly with ATM S 559/ESS 559.

OCEAN 559 Advanced Seminar on Mid-Ocean Ridge Processes (*, max. 9) Lectures, discussions, and practical work on selected topics of current interest in mid-ocean ridge research. Prerequisite: permission of instructor.

OCEAN 560 Atmosphere/Ocean Interactions (3) Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Prerequisite: ATM S 509/OCEAN 512. Credit/no-credit only. Offered: jointly with ATM S 560.

OCEAN 569 Topics in Physical Oceanography (1-4, max. 30) Lecture series on topics of major importance in physical oceanography. Offered: AWSp.

OCEAN 570 Marine Microbial Interactions (1-3, max. 9)

OCEAN 572 Marine Protist Ecology (1-3, max. 9) Examines the phagotrophic (protozoa) and mixotrophic (both photosynthetic and phagotrophic) protists, including: interactions with predators and prey; and adaptations to changing environments, evolutionary, and ecological implications of mixotrophy. Prerequisite: OCEAN 532 or permission of instructor. Offered: Sp.

OCEAN 578 Advanced Topics in Biological Oceanography (*, max. 18) Specialized research areas. Topic varies each year. Offered at Friday Harbor Laboratories. Prerequisite: permission of director of Friday Harbor Laboratories. Offered: S.

OCEAN 580 Aquatic Kinetics (3) Reaction rates and mass transport in water. Theories of chemical kinetics; experimental results from: CO₂ hydrolysis, Fe, Mn, and H₂S oxidation, stable isotope fractionation, mineral dissolution; homogeneous, heterogeneous, microbial catalysis; reaction and transport at air-water, sediment-water, and O₂/H₂S interfaces. Prerequisite: permission of instructor.

OCEAN 582 River Basin Biogeochemistry (3) The function of rivers and river basins in transporting materials to the oceans and their importance in biogeochemical cycles. Origin of water and water routing within drainage basins, sources and modification of dissolved and particulate materials in transport, ecological theory, and estuarine mixing zone transformations. Prerequisite: permission of instructor.

OCEAN 583 Isotope Biogeochemistry (3) The use of stable isotopes to study biogeochemical cycles in the oceans and atmosphere; specifically carbon, nitrogen, and sulfur cycles. Isotopic effects during photosynthesis, respiration, organic matter degradation. CaCO₃ dissolution, methanogenesis, nitrification/denitrification, and sulfate reduction. Prerequisite: permission of instructor.

OCEAN 584 Ocean Tracers and Mixing (3) The applications of tracers to studies of ocean circulation and ventilation. Processes within the ocean for which tracers have provided important information include gas exchange, mixed layer dynamics, thermocline ventilation, deep water formation and spreading, and mixing. Knowledge of partial differential equations suggested.

OCEAN 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ATM S 586/ESS 586.

OCEAN 587 Fundamentals of Climate Change (3) Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy

and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/ESS 587.

OCEAN 588 The Global Carbon Cycle and Climate (3) *Emerson* Oceanic and terrestrial biogeochemical processes controlling atmospheric CO₂ and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/ESS 588; W.

OCEAN 589 Paleoclimatology: Data, Modeling, and Theory (3) Evidence for past changes in land and sea surface temperature, in precipitation and atmospheric dynamics, and in ocean circulation: both long and interannual timescales. Paleoclimate modeling and theory. Time series analysis and climate noise. Rapid climate change. Statistical reconstruction of interannual variability. Offered: jointly with ATM S 589/ESS 589.

OCEAN 590 Advanced Topics in Oceanography (9-18, max. 18) Advanced topics examining specialized and interdisciplinary areas of oceanographic research. Offered at Friday Harbor Laboratories. Prerequisite: permission of Director of Friday Harbor Laboratories. Offered: S.

OCEAN 591 Marine Science in the Coastal Zone (3) *R. KELLY* Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with SMEA 591; A.

OCEAN 592 Communicating Ocean Sciences (4) *Robigou* Explores improving communicating scientific knowledge through instruction of inquiry-based science in school classrooms. Students practice communicating science, and receive mentoring on how to improve their presentations. Prerequisite: Marine sciences studies background. Offered: Sp.

OCEAN 593 Climate Science Seminar (1) *Mote* Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ATM S 593/ESS 593; W.

OCEAN 596 Climate Science Capstone Project (1-5, max. 5) *Mote* Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ATM S 596/ESS 596; AWSpS.

OCEAN 600 Independent Study or Research (*-) Offered: AWSpS.

OCEAN 700 Master's Thesis (*-) Offered: AWSpS.

OCEAN 800 Doctoral Dissertation (*-) Offered: AWSpS.

Quantitative Science

The Center for Quantitative Science is an interdisciplinary program administered by the College of Environment with cooperation from the School of Aquatic and Fishery Sciences and the School of Environmental and Forest Sciences. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resources management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the School of Envi-

ronmental and Forest Sciences and the School of Aquatic and Fishery Sciences.

Students in environmental, biological, ecological, and resource management majors may wish to complete a minor in quantitative science to document their understanding of the mathematical and statistical methods used in these competitive and increasingly quantitative fields.

UNDERGRADUATE PROGRAM

Adviser

006 Anderson Hall, Box 352100

(206) 543-1191

cqs@uw.edu

The Center for Quantitative Science offers the following program of study:

- A minor in quantitative science

Minor

Minor Requirements: A minimum of 27 credits, as follows:

1. *Core Courses (24-25 credits):* Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCI 482; Q SCI 483 (or Q SCI 403/STAT 403)
2. *Electives (3-5 credits):* Selected from an approved list of electives, a partial list of which includes Q SCI 210/ENVIR 210, Q SCI 403/STAT 403 (if not taken as part of core courses, above), Q SCI 454/FISH 454, Q SCI 480/STAT 480, Q SCI 483 (if not taken as part of core courses, above), Q SCI 486/STAT 486. See adviser for possible additional qualifying courses.
3. A minimum 2.0 grade is required in each course taken as part of the minor.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

Q SCI 210 Introduction to Environmental Modeling (4) NW, QSR D. GRUNBAUM Explores strengths and limitations of diverse modeling approaches, and strategies for using models in quantitative critical analysis of past, current and future conditions in terrestrial and marine environments. Focus on active learning use of models to ask and answer questions about biotic and abiotic environmental processes, management strategies and policy decision-making. Offered: jointly with ENVIR 210.

Q SCI 291 Analysis for Biologists I (5) NW, QSR J. JOHNSON Introduction to differential calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include optimization and curve analysis. Prerequisite: either MATH 120, Q SCI 190, a minimum score of 2 on advanced placement test, or a score of 153-163 on MPT-AS placement test. Not available for credit to students who have completed MATH 124 with a 2.0 or higher. Offered: AWS.

Q SCI 292 Analysis for Biologists II (5) NW, QSR V. GALLUCCI, J. JOHNSON Introduction to integral calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include areas under curves, volumes, and differential equations. Prerequisite: minimum grade of 7 in either Q SCI 291 or MATH 124. Not available for credit to students who have completed MATH 125 with a 2.0 or higher. Offered: WSpS.

Q SCI 381 Introduction to Probability and Statistics (5) NW, QSR B. BARE, V. GALLUCCI, J. HORNE Applications to biological and natural resource problems stressing the

formulation and interpretation of statistical tests. Random variables, expectations, variances, binomial, hypergeometric, Poisson, normal, chi-square, "t" and "F" distributions. Prerequisite: either MATH 120, MATH 124, MATH 125, MATH 126, Q SCI 190, or Q SCI 291, or a minimum score of 2 on advanced placement test, or a score of 153-163 on the MPT-AS placement test. Offered: AWSpS.

Q SCI 403 Introduction to Resampling Inference (4) NW V. MININ Introduction to computer-intensive data analysis for experimental and observational studies in empirical sciences. Students design, program, carry out, and report applications of bootstrap resampling, rerandomization, and subsampling of cases. Experience programming in R is beneficial. Credit allowed for STAT 403 or STAT 503 but not both. Prerequisite: either STAT 311/ECON 311, STAT 341, STAT 390/MATH 390, STAT 481/ECON 481, or Q SCI 381 and Q SCI 482. Offered: jointly with STAT 403; Sp.

Q SCI 454 Ecological Modeling (5) NW T. ESSINGTON Examines concepts in ecological modeling focusing on the rationale, interpretation, and motivation for modeling in ecological sciences. Explores individual, population, and ecosystem-based models. Excel-based computer exercises, model building and interpretation, readings. Offered: jointly with FISH 454; W.

Q SCI 458 Modeling and Estimation in Conservation and Resource Management (4) NW T. BRANCH Explores the use of models in the evaluation of alternative management policies for natural resources, including modeling approaches, fitting models to data, and evaluating alternative management policies. Emphasizes calculating risk of extinction, and design of biological reserves. Offered: jointly with FISH 458; Sp.

Q SCI 480 Sampling Theory for Biologists (3) NW J. SKALSKI Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482. Offered: jointly with STAT 480; W, odd years.

Q SCI 482 Statistical Inference in Applied Research I: Hypothesis Testing and Estimation for Ecologists and Resource Managers (5) NW Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either STAT 311 or Q SCI 381. Offered: AW.

Q SCI 483 Statistical Inference in Applied Research II: Regression Analysis for Ecologists and Resource Managers (5) NW J. SKALSKI Analysis of linear regression models and introduction to nonlinear models. Model selection using generalized F-tests; residual analysis. Application to categorical, count, binomial, transformed variables. Introduction to matrix formation of regression models and applications. Prerequisite: Q SCI 381; Q SCI 482. Offered: Sp.

Q SCI 486 Experimental Design (4) NW Emphasizes data modeling using structured means resulting from choice of experimental and treatment design. Examines experimental designs, including crossed, nested designs; block; split-plot designs; and covariance analysis. Also covers multiple comparisons, efficiency, power, sample size, and pseudo-replication. Prerequisite: Q SCI 482. Offered: jointly with STAT 486; W, even years.

Q SCI 497 Special Topics in Quantitative Science (1-15, max. 15) NW Topics not normally offered in regular curriculum. Format ranges from seminar/discussion, formal lectures, laboratory or modeling work. Offered: AWSpS.

Q SCI 498 Internship (1-15, max. 15) NW Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of profes-

sional report reflecting on the experience is required. Offered: AWSpS.

Q SCI 499 Research Experience (1-15, max. 15) Special studies in quantitative ecology and resource management for which there is not sufficient demand to warrant the organization of regular courses. Credit/no-credit only.

Quaternary Research Center

19 Johnson

Quaternary studies focus on the processes that presently shape the natural environment and have operated over approximately the past two and a half million years (Quaternary period). A knowledge of Quaternary events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to present-day and future environmental changes.

Quaternary research is typically interdisciplinary, and thus it commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.

The center has the following goals:

1. To understand environments and climate changes of the past two and a half million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events.
2. To serve as a catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology/anthropology, botany, engineering, fisheries, forestry, geology, geophysics, oceanography, pedology, and zoology.
3. To provide a scientific perspective on the scale of modern and man-made environmental changes, including climate changes, in the context of recent earth history.
4. To conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies.
5. To seek applications of quaternary studies to modern environmental problems that help predict consequences of policy decisions.

GRADUATE PROGRAM

Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Quaternary-related subject.

RESEARCH FACILITIES

The research laboratories of the center provide an array of modern facilities for investigation of Quaternary problems.

QRC Resource Center

This specialized collection, dealing with a wide range of Quaternary topics, is among the most extensive in North America. It includes books, monographs, theses, journals, and maps, and houses a large, diverse reprint collection. Searches for library material can be conducted via the QRC web page.

Cosmogenic Nuclide Laboratory

John Stone, Director

The UW Cosmogenic Nuclide Laboratory analyses rare radionuclides produced by cosmic ray bombardment of the Earth's surface. These nuclides are useful for surface exposure dating and the study of geomorphic rates and processes. Current projects include work on Quaternary glaciations of Antarctica, Europe, and North America; dating of landslides and volcanic eruptions; and studies of erosion in both tectonically active and ancient, stable landscapes. The laboratory has sample preparation facilities and clean labs for extraction of Al-26, Be-10, and Cl-36. For additional information, visit the laboratory's website.

Geochemistry Library

Ronald S. Sletten, Director

The Geochemistry Library conducts analyses of natural waters, soil, and sediment. Instrumentation includes ICP-OES, ICP-MS, laser diffraction particle size analyzer, and total organic/inorganic carbon analyzer for water samples. The library also conducts C-13 CP-MAS-NMR for natural organic and pulsed field gradient PFG-NMR for diffusion studies of water in porous media. The primary research foci are weathering, elemental cycling, and studies of permafrost soils. Current projects include investigation of biocomplexity of carbon cycling in Arctic soils in Greenland and physicochemical soil processes in Antarctica and Alaska.

Periglacial Laboratory

Bernard Hallet, Director

Research in the Periglacial Laboratory focuses on diverse processes at the interface between glaciology and geomorphology that are fundamental to understanding landscapes and soils in alpine and polar regions. Founded by Link Washburn, the laboratory has a long history of experimental research on periglacial processes with special attention given to the complex phenomena associated with freezing soils and rocks. Recently the lab has also served as a base of support for extensive field work involving electronic instrumentation to monitor surface processes in the Arctic, Antarctica, the Himalayas, southeast Tibet, and other regions across the globe.

Stable Isotope Laboratory

Eric J. Steig, Director

The Stable Isotope Laboratory is the main center for stable isotope studies for the QRC. The current emphasis in the laboratory is the development of high-resolution climate records covering the last ten millennia, from ice cores in the Canadian Arctic, Greenland, and Antarctica. Facilities in the laboratory include off-line and online preparation systems for D/H and 18O/16O on water 13C/12C on carbonates and organic materials, and 15N/14N on nitrate and organics. Additional information, data, and other resources are available via the laboratory's website.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

QUAT 501 Seminar/Conference in Quaternary Environments (1, max. 6) Interdisciplinary seminar or conference in the changing natural environments of the Quaternary Period, with emphasis on climatic changes and their effects. Speakers from the University and elsewhere present lectures on their specialties, followed by discussion. Credit/no-credit only.

QUAT 502 Interdisciplinary Quaternary Investigations (2, max. 6) Research course for interdisciplinary investigation of Quaternary problems. Student attends sessions of QUAT

501 and pursues a problem-oriented case study concurrently under faculty direction. Required paper on case study. Prerequisite: graduate standing. Credit/no-credit only.

QUAT 504 Special Topics in Quaternary Sciences (1-3, max. 3) Environments and climate changes of past two million years (Quaternary Period) in context of modern surface processes, including historical changes, prehistorical environments of postglacial period, and Ice Age events. Provides scientific perspective on scale of modern and man-made environmental changes, including those of climate, in context of recent earth history. Prerequisite: background courses in earth sciences and ecology. Credit/no-credit only.

The Information School

370 Mary Gates Hall
Box 352840

Dean

Harry Bruce

Associate Deans

Cheryl Metover, Research

Matthew Saxton, Academics

Never in our society's history has there been such a great need to manage so much information quickly and efficiently. The Information School is dedicated to preparing a rising generation of information leaders to embrace the challenges associated with the way we create, find, store, manipulate, and share information.

The School offers four degree programs, leading to the Bachelor of Science in Informatics, Master of Library and Information Science, Master of Science in Information Management, and PhD in Information Science. The School also offers certificate programs, continuing education opportunities for professionals, and service courses for undergraduates in information fluency, research strategies, and technology. Graduates of the School assume a variety of professional roles in the public, private and non-profit sectors, with positions that span from information architects to children's librarians, from web developers to information technology (IT) managers, from network and information assurance professionals to researchers and faculty in the information field.

The community is interdisciplinary, bringing together a variety of social science traditions, including: library and information science, computer science, sociology, communication, philosophy, and engineering. Most research addresses topics in the following broad categories:

- Ethics and Information
- Personal Information Management
- Human-Computer Interaction and Design
- Information Management
- Knowledge Organization
- Information Literacy
- Access to Information
- Information in Everyday Life

The School's work remains focused on the human impact of information. The research and curriculum of the school examines information systems and technology from a user-centered perspective. By retaining a focus on the human impact of information systems and technology, we build on our community values of trust, transparency, and mutual respect.

History

Originally established in 1911, the Information School has the oldest library and information science program west of the Mississippi, and continues to offer the most extensive American Library Association-accredited library and information science degree in the Northwest region of the United States.

In 1998, the University set out to transform the School by charging it with a new mission, to become what it is today: a broad-based information school that meets the challenges and opportunities of the information age. With the addition of three new degree programs, a new dean, faculty, and state of the art facilities, the Information School became

the University's sixteenth independently organized school/college in 2001.

The School seeks to explore the theoretical and applied cutting edges of the information field and to nurture the best of both worlds: traditional library values and ever-changing information frontiers.

Passion

The School is inspired by information, wanting everyone to know how vital information is in all aspects of life.

Vision

The School envisions a world where more effective use of information helps everyone discover, learn, innovate, solve problems, have fun, and make a better world. Information changes lives.

Mission

The School prepares information leaders through researching the problems and opportunities of information, designing solutions to information challenges, and making information work.

Informatics students design, build, implement, and secure information systems that meet human, organizational, and societal needs.

Students have a strong people focus and they excel as user experience designers, business analysts, data managers, information architects, web developers, and information assurance professionals.

UNDERGRADUATE PROGRAM

Adviser

470 Mary Gates Hall

Box 352840

(206) 543-1794

informatics@uw.edu

The Information School offers a Bachelor of Science degree with a major in Informatics, with options in human-computer interaction and information architecture.

Bachelor of Science

Suggested First- and Second-Year College Courses: INFO 101, INFO 200, an English composition course (selected from the University list), CSE 142, CSE 143, and STAT 221, STAT 311, STAT 293, or Q METH 201; courses that develop strong analytical, qualitative, and quantitative reasoning skills; courses that develop strong written and oral communication skills; courses that provide exposure to a variety of social science fields such as psychology, sociology, anthropology, or philosophy.

Program Admission Requirements

Regular Admission

1. INFO 200; CSE 142; either STAT 221, STAT 311, STAT 390, or QMETH 201; one English composition course selected from the University list, with a minimum 2.0 grade in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses.
2. Minimum 2.00 cumulative college GPA.
3. Admission is competitive, based on the following criteria:
 - a. Overall academic performance
 - b. Grades in courses required for admission to the major
 - c. Personal statement reflecting an interest in and commitment to becoming a major in this field

- d. Other evidence of interest in and commitment to the field (e.g., work experience, internships).

Meeting the above criteria does not guarantee admission.

4. Application deadline is June 15. Students apply online at www.ischool.uw.edu. Admission is for autumn quarter only.
5. Admission is done annually and new students enter the program autumn quarter. Most students apply spring of their sophomore year and begin the program the following autumn quarter as a junior.
6. There is not an equivalent course to INFO 200 taught elsewhere; therefore, transfer students can apply to the program and be admitted with the provision that they complete INFO 200 with a minimum 2.0 grade before the end of their first year in the program.

Freshman Direct Admission Program (FDAP)

Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.

The number of early admission (FDAP) students does not exceed 10 percent of the number of majors admitted each year.

Major Requirements

94-99 credits as follows:

1. Courses required for admission to the program (18-19 credits, as shown above)
2. *Core Courses (55 credits):* INFO 330, INFO 340, INFO 343, INFO 360, INFO 380, INFO 450, INFO 470, INFO 481, INFO 490 (8), INFO 491, CSE 143, CSE 373
3. *Areas of Study (16-20 credits):* Students may choose a transcriptable option in either human-computer interaction (HCI) or information architecture (IA). (See below.) Alternatively students may work with their adviser to select a minimum of four classes (16-20 credits) to create a customized program aligned with their personal interests or career goals. For example, networking and information assurance, as well as social computing/social informatics, are additional areas of strength within the School.
4. *Free Elective (5 credits):* At least one additional 300- or 400-level INFO elective in any area, totalling at least 5 credits.

General Education and Areas of Knowledge:

1. English composition (5 credits)
2. Quantitative/Symbolic Reasoning (5 credits)
3. Writing courses (10 credits)
4. Natural World (20 credits)
5. Individuals & Societies (20 credits)
6. Visual, Literary, & Performing Arts (20 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirement (Natural World; Individuals & Societies; Visual, Literary, & Performing Arts).

Options

Human-Computer Interaction (HCI) Option (16-20 credits)

Minimum four courses from the areas listed below, with the following distribution:

1. At least one course in two of the following areas: user interface software and technology; design; usability and user research; social and ethical dimensions. See department website for approved area courses.
2. At least one course from the approved area list from a participating department outside the Information School (Art, Computer Science, or Human Centered Design & Engineering). See department website for approved area courses.
3. Special topics courses such as INFO 498, CSE 190, HCDE 490, and HCDE 496 may be approved within any of the course areas below on an individual, per-course basis, depending on subject matter.

Course Areas:

- Foundations: ART 383, CSE 440, HCDE 319
- User Interface Software and Technology: CSE 441, INFO 344, HCDE 438
- Design: ART 483, ART 484, INFO 424, HCDE 455
- Usability and User Research: INFO 310, HCDE 317, HCDE 318
- Social and Ethical Dimensions: INFO 444, INFO 447

Information Architecture (IA) Option (16-20 credits)

Minimum four courses from an approved list. See department website for list.

Information Assurance and Cybersecurity Option (16-20 credits)

See department website for list.

1. *Foundation Course*: INFO 310 or equivalent
2. Minimum three additional courses from an approved list (11-15 credits). Includes courses at participating departments on all three UW campuses. See program website for list: ischool.uw.edu/academics/informatics/degree-options. No more than one of these three may be a networking course (INFO 341, T INFO 250, or CSS 432).

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes

- *Learning Objectives and Expected Outcomes*: The informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science.

Graduates of the informatics program are qualified for jobs in the information and technology industry and in business, public service, and other professions. Possible job titles include user experience designer, business analyst, consultant, usability engineer, data manager, information architect, web developer, network manager, project manager, and information assurance professional.

The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information and management science, information science, biomedical informatics, business and accounting, and information technology.

Informatics student-learning outcomes include the ability to assess people's information needs and behavior; ability to design information systems to meet people's information needs; ability to work with information technologies (e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of infor-

mation technologies on people; ability to communicate effectively; ability to manage projects; ability to build working systems; ability to organize and manage information; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- *Instructional and Research Facilities*: Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia production, web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

- *Honors Options Available*: With College Honors; With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Distinction (Departmental Honors). See adviser for requirements.
- *Research, Internships, and Service Learning*: Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.

Informatics students are extensively engaged in faculty research and internships. A significant percentage of informatics students participates in the University's Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).

- *School Scholarships*: The Henry Scholarships, in the amount of approximately \$1500 each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.
- *Student Organizations/Associations*: Undergraduates participate in a number of the School's many student organizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technologists (ASIST).
- *Of Special Note*:
 - *Capstone Projects*: Students often use their capstone projects to identify interest areas, develop skills, and prepare for future pursuits. Through capstone projects, students demonstrate the skills, understanding, and competencies they can successfully use to prepare for employment and graduate studies.
 - *Information Sessions*: Prospective students are encouraged to attend an Informatics information ses-

sion. For a schedule of information sessions, visit the School website at ischool.uw.edu/informatics/prospective/more_info.

GRADUATE PROGRAMS

The School offers graduate programs leading to the Master of Library and Information Science (MLIS), the Master of Science in Information Management (MSIM), and the Doctor of Philosophy (PhD) in Information Science.

Master of Library and Information Science

MLIS Adviser

470 Mary Gates Hall, Box 352840

(206) 543-1794

mlis@uw.edu

Admission Requirements

The MLIS program is offered in two delivery modes: residential (on-campus, two-year program) and distance (online with quarterly residencies, three-year program). When applying, applicants must indicate for which program they are applying. Applications should also include:

1. A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
2. Three letters of recommendation
3. Personal statement of educational and professional goals and responses to two supplemental questions
4. Official transcript from each relevant institution attended
5. GRE scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE scores.
6. TOEFL score (for international students)

Degree Requirements

63 credits, as follows:

1. *Core Curriculum (34 credits)*: LIS 500, LIS 510, LIS 520, LIS 530, LIS 540, LIS 550, LIS 560, LIS 570, LIS 580
2. *Electives (29 credits)*
3. *Portfolio or Thesis Option*: MLIS students must complete either a portfolio or thesis in order to graduate.
4. *Directed Fieldwork*: LIS 590 is an elective course designed to provide students an opportunity to work in an information environment under the supervision of an experienced professional mentor.

Master of Library and Information Science, Law Librarianship

The Law MLIS program is designed to prepare lawyers with an existing JD degree to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms.

Admission Requirements

1. A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
2. Three letters of recommendation
3. Personal statement of educational and professional goals and responses to two supplemental questions
4. Official transcript from each relevant institution attended
5. Earned JD prior to enrollment in the MLIS program
6. TOEFL score (for international students)

Degree Requirements

44 credits, as follows:

1. *Core Curriculum (23 credits)*: LIS 500, LIS 510, LIS 520, LIS 530, LIS 540, LIS 550
2. *Law Librarianship Courses (17 credits)*: LIS 591, LIS 592, LIS 593, LIS 594, LIS 595
3. *Directed Fieldwork (4 credits)*: LIS 590

Master of Science in Information Management

MSIM Adviser

470 Mary Gates Hall, Box 352840

(206) 543-1794

msim@uw.edu

Admission Requirements

1. A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
2. Three letters of recommendation
3. Personal statement of educational and professional goals
4. Official transcript from each relevant institution attended
5. GRE or GMAT scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE or GMAT scores.
6. TOEFL score (for international students)

Degree Requirements, Day Option

65-71 credits, to include:

1. *Core Curriculum*:
 - a. *Foundational Core Courses*: IMT 480, IMT 440, IMT 500
 - b. *Technology Core Courses*: IMT 540, IMT 541, IMT 542
 - c. *Management Core Courses*: IMT 580, IMT 581, IMT 582
 - d. *Integrating Core Courses*: IMT 598, IMT 595
2. *Electives (24 credits)*: Beyond the required core courses, students have the option of crafting a program of study, in collaboration with their faculty adviser, specific to their interests and career goals. MSIM course electives include, among others, principles of information retrieval systems, strategic planning and evaluation, and marketing foundations for information professionals.
3. *Internship*: MSIM internships are structured around a course (IMT 590) and are designed to provide students an opportunity to work in an information environment under the supervision of an experienced professional mentor. During the internship placement (lasting a minimum of two academic quarters), the student works to meet meaningful learning objectives that have been mutually defined by student and internship supervisor.

Degree Requirements, Executive Option

47-53 credits, to include:

1. *Core Curriculum*:
 - a. *Foundational Core Courses*: IMT 480, IMT 440, IMT 500
 - b. *Technology Core Courses*: IMT 540, IMT 541, IMT 542
 - c. *Management Core Courses*: IMT 580, IMT 581, IMT 582
 - d. *Integrating Core Courses*: IMT 598, IMT 595

2. *Electives*: Students complete a minimum of 11 credits of electives, which includes advanced MSIM courses, relevant upper-level coursework in other academic disciplines, or an independent study (IMT 600).

Doctor of Philosophy in Information Science

PhD Adviser

470 Mary Gates Hall, Box 352840

(206) 543-1794

ischoolphd@uw.edu

Admission Requirements

90 credits minimum, to include:

1. Current curriculum vitae highlighting any academic and/or work experience, honors, publications, presentations, and research experience
2. Three letters of recommendation
3. Personal statement of educational and professional goals
4. Official transcript from each relevant institution attended
5. GRE Scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE scores.
6. TOEFL score (for international students)

Degree Requirements

90 credits minimum, to include:

1. *Required Courses*: INSC 501, INSC 570, INSC 572, INSC 500; two research practica; two teaching practica; at least one of the following quantitative methods courses: BIOST 502, BIOST 517, COM 520, CS&SS 507, PSYCH 524
2. Additional elective coursework selected in consultation with faculty advisers
3. 18 graded credits in courses at the 500 level and above (taken prior to general examination)
4. 60 credits taken prior to general examination
5. 27 dissertation credits (INSC 800)
6. Preliminary review determined by a School-based advisory committee at the end of the required first-year of full-time study
7. General examination upon completion of coursework and practica components to attain formal candidacy for the PhD program (candidate's certificate)
8. Successfully defend a dissertation before a Supervisory Committee (final examination)

Financial Aid

The University of Washington Financial Aid Office administers a variety of government and University funded financial aid programs for which applicants must submit the Free Application for Federal Student Aid form (FAFSA). For more information, contact the UW Financial Aid Office, 105 Schmitz Hall. Information on the FAFSA is also available online.

Graduate Assistantships and Scholarships

Financial aid options for full-time students may include graduate assistantships and scholarships. Graduate assistants generally work 220 hours per quarter, and receive a tuition waiver as well as a monthly salary and medical benefits. Prospective MLIS and MSIM students are encouraged to apply during the admission process and throughout the year as other positions become available. Visit the Student Employment Opportunities page at ischool.uw.edu/jobs/students to apply for open positions. PhD stu-

dents are automatically considered for graduate student service appointments.

MLIS scholarships are awarded on a basis of financial need, based on information from the Free Application for Federal Student Aid (FAFSA), and academic merit.

Information regarding additional sources of financial aid, from sources outside the Information School, is available at the Information School Financial Aid Resources web page.

Special Research Facilities

Located on the third and fourth floors of Mary Gates Hall, one of the University's high-technology buildings, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia, web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

For more information, please visit the School's website at www.ischool.uw.edu/resources/technology/help.

Continuing and Professional Education

The Information School works with University of Washington Educational Outreach to offer classes, workshops, and certificate programs for continuing education and professional development. Current certificate programs include web technology solutions; information assurance and cybersecurity; and school library professional. Those interested in continuing education or certificate programs should contact UW Professional & Continuing Education, 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105. Phone: (206) 543-2320 or see www.pce.uw.edu/.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

Informatics

INFO 101 Social Networking Technologies (5) I&S/NW Explores today's most popular social networks, gaming applications, and messaging applications. Examines technologies, social implications, and information structure. Focuses on logic, databases, networked delivery, identity, access privacy, ecommerce, organization, and retrieval.

INFO 102 Gender and Information Technology (5) I&S, DIV Explores the social construction of gender in relation to the history and contemporary development of information technologies. Considers the importance of diversity and difference in the design and construction of innovative information technology solutions. Challenges prevailing viewpoints about who can and does work in the information technology field. Offered: A.

INFO 200 Intellectual Foundations of Informatics (5) I&S Information as an object of study, including theories, concepts, and principles of information, information seeking, cognitive processing, knowledge representation and restructuring, and their relationships to physical and intellectual access to information. Development of information systems for storage, organization, and retrieval. Experience in the application of theories, concepts, and principles.

INFO 240 Database Management Fundamentals I (5) Covers database overview and history, the relational model, entity-relationship diagrams, database design and normalization, and Structured Query Language (SQL). Through labs, tests, and a project, students develop both theoretical and practical knowledge of relational database systems.

INFO 245 Database Management Fundamentals II (5) Covers conceptual, logical, and physical database design: distributed databases; web technology and databases; advanced queries; and enterprise database administration. Through labs, tests, and a project, students develop both theoretical and practical knowledge of relational database systems. Prerequisite: INFO 240.

INFO 310 Information Assurance and Cybersecurity (5) Provides a theoretical and practical introduction to information assurance and cyber-security (IAC). Includes methods and practices for securing information and information systems. Covers how vulnerabilities arise, recognizing evolving threats, and mitigating them. Explores the role of risk analysis, information privacy, accountability, and policy.

INFO 312 Enterprise Risk Management (4) Examines the risk inherent in use of technology, and how to manage risk to information, data, and technology in organizations. Topics include risk management frameworks, risk tolerance, key risk indicators, the legislative and regulatory environment, compliance, and new avenues of risk such as social media and mobile.

INFO 320 Technical and Social Perspectives on Search (5) Fundamentals of search including data acquisition and processing, index construction, query processing, ranking and display. Covers building a customized search service, search engine optimization, individual and social perspectives on search. Prerequisite: CSE 142; INFO 343 (may be taken concurrently).

INFO 330 User Experience and Information Architecture (5) Introduction to the methodologies utilized to create a user interface. Discusses user experience (UX), what makes an interface effective, and provides an overview of the tools and theories that are foundational to Information Architecture (IA). Discusses project scoping, wireframes, sitemaps, information design and formulating a UX strategy. Prerequisite: minimum grade of 2.0 in INFO 360.

INFO 340 Introduction to Relational Database Management Systems (5) NW Introduction to relational database management systems, focused on relational theory and the application of conceptual, logical, and physical database modeling. Key topics include the relational model, SQL, entity-relationship modeling, three-tier architectures, implementation of database applications, and related topics in information systems. Prerequisite: CSE 142.

INFO 341 Computer Networks and Distributed Applications (5) NW Basic concepts of local and wide-area computer networking including an overview of services provided by networks, network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses management, security, authentication, and policy issues associated with distributed systems. Prerequisite: CSE 142.

INFO 343 Client-Side Web Development (5) NW Introduction to client-side web development including markup, programming, protocols, libraries, frameworks, and techniques for creating effective, usable, dynamic, and responsive applications that meet user needs. Includes an introduction to web development roles within organizations, content management systems, and other tools to build and manage websites and applications. Prerequisite: CSE 142.

INFO 344 Server-Side Web Development (5) Introduces server-side web development programming, services, tools, protocols, best practices and techniques for implementing data-driven and scalable web applications. Con-

nects topics from human-centered design, information architecture, databases, data analytics and security to build a solution. Prerequisite: CSE 142; either INFO 343 or CSE 154; INFO 340 (may be taken concurrently).

INFO 360 Design Thinking (5) I&S Introduces design methods for identifying user needs, devising new design concepts, prototyping these concepts, and evaluating their utility and usability. Introduces the theory and practice of user-centered design. Examines methods for identifying users' needs, understanding users' behaviors, envisioning and prototyping new systems, and evaluating the usability of systems. Emphasis on incorporating people in the design process from initial field observations to summative usability testing.

INFO 362 Visual Information Design (5) VLPA Build fluency in expressing information visually as diagrams, charts, maps, and icons. Learn to solve design problems; give and receive critique; follow an iterative process of design refinement; and learn technical skills. Understand the nature of visual potential, visual design principles, and the impact of color and typography.

INFO 370 Introduction to Data Science (5) QSR Introduction to methods, concepts, and opportunities in data science. Topics include storage and scaling of large heterogeneous data, statistical inference, probability, experimental design, machine learning, network analysis, information visualization, and data ethics and policy. Assignments and projects are based on contemporary problems in data science from industry and research. Prerequisite: CSE 142; either STAT 221/CS&SS 221/SOC 221, STAT 311, STAT 390/MATH 390, or QMETH 201.

INFO 380 Information Systems Analysis and Design (5) Prepares students to participate in structured systems analysis and design efforts. Students learn how to analyze system context, behavior, and structure; identify stakeholders; gather requirements; and redesign systems to make them more beneficial to the organization.

INFO 386 Professionalism in Informatics (4) Examines professionalism, communication, teamwork, leadership, and interpersonal networking to strengthen students as they seek to excel professionally. Covers developing and presenting business cases and project plans, personal branding, conducting informational interviews, and effective written and oral communication.

INFO 415 Emerging Topics in Information Assurance and Cybersecurity (1-5, max. 15) Explores emerging topics and unique subjects in information assurance and cybersecurity (IAC) not otherwise covered in the IAC curriculum. Prerequisite: INFO 310.

INFO 424 Information Visualization and Aesthetics (5) VLPA Examines the visualization of information: the effects of human perception, the aesthetics of information design, the mechanics of visual display, and the semiotics of iconography. Examples may include census, epidemiological, crime, earth satellite, and medical data in the contexts of special computer applications, user populations, and cultures.

INFO 430 Knowledge Organization and Representation (5) Advanced study of knowledge organization using classificatory structures and creation of metadata element sets for representation. Conceptual and practical foundations for creating systems for information organization and representation. The creation, application, and use of a variety of systems and techniques for information organization and representation. Prerequisite: INFO 200; INFO 330.

INFO 431 Metadata Design (3) Explores principles of metadata schema and application profile design and implementation using XML technologies. Examines syntactic and semantic interoperability among diverse schemas and application profiles. Prerequisite: INFO 330; INFO 340.

INFO 432 Ontology Design (3) Covers concepts and technologies supporting semantic interoperability among different metadata and ontologies including topic maps, RDF,

schema, and Web Ontology Language (OWL). Includes advanced semantic modeling of complex data. Prerequisite: INFO 431.

INFO 433 Content Strategy in Information Architecture (4) I&S Introduces key concepts in understanding the content lifecycle in context of an organization's web, mobile, and other communication channels. Provides knowledge of key theories and principles in information architecture and practical application of skills including user research; information collection and analysis; and information organization and presentation.

INFO 444 Value-Sensitive Design (5) Introduction to value-sensitive design (VSD), information system design that accounts for human values in a principled and comprehensive manner. Examination of existing systems from a VSD perspective. Explores VSD research methods including conceptual, technical, empirical investigations. Key values include accountability, autonomy, consent, privacy, property, trust, sustainability. Prerequisite: either INFO 360, DESIGN 383, CSE 440, or HCDE 419.

INFO 445 Advanced Database Design, Management, and Maintenance (5) Advanced perspectives on DBMS theory, architecture, and implementation. Conceptual, logical, physical modeling. Index structures, query optimization and performance tuning, relational algebra, transaction processing, and concurrency control. Operational databases, decision support systems, and data warehousing. Projects in database implementation and integration. Social implications of large distributed database systems. Prerequisite: INFO 340.

INFO 446 Advanced Search Engine Systems (5) Focus on design, development, and evaluation of search engines. Theories and models in information retrieval for text and multimedia databases, web search engines, recommendation systems, and digital libraries. Topics include language issues, data-mining, machine learning, user-profiling, visualization, user interfaces, usability. Coursework involves analytical comparisons of search engines. Prerequisite: INFO 340.

INFO 447 Computer Supported Cooperative Work (5) I&S Focuses on design and use of collaboration technologies to communicate, share information, and coordinate activity. Emphasis on behavioral and social aspects of adopting and using these technologies. Topics include the history of work in this and related fields, collaboration support for teams, organizations, and communities.

INFO 450 Information Ethics and Policy (5) I&S Provides a framework for analyzing the ethical, legal, economic, and socio-political issues surrounding information, information technologies, and the information industries. Explores policy and ethical issues of information access and control including: intellectual property, file sharing, free speech, privacy, and national security.

INFO 454 Information Policy: Domestic and Global (5) I&S National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries.

INFO 461 Cooperative Software Design (5) Introduces the theory and practice of cooperative user-centered software design, applying fundamental theories and techniques from social psychology, computer-supported collaborative work, and software engineering. Prerequisite: INFO 360.

INFO 463 Input and Interaction (5) Introduces input and interaction techniques for desktop, mobile, and other computing environments. Combines motor and perceptual psychology, interaction design, and input devices and software in the study of human-computer systems. Emphasizes using human performance models to inform the design of new interaction techniques. Prerequisite: INFO 360.

INFO 466 Immersive Information Environments (5) VLPA/I&S Introduction to immersive technologies and approach-

es to analyzing, designing, and building immersive worlds utilizing game theory, 3D interactive design, environments, and learning theory. Conducted exclusively in a virtual world environment through an hands-on and practical educational approach.

INFO 467 Immersive Information Environment Design (5) VLPA Design, build, and curate immersive environments in a hands-on studio. Learn tools and techniques for contributing to immersive information environments such as virtual worlds, 3D simulations, and serious games. Utilize 3D information architecture to create personalized, community based environments for education, business and entertainment. Prerequisite: INFO 466.

INFO 470 Research Methods in Informatics (5) Introduction to the research methods used in informatics for understanding technology, information, and human behavior. Methods incorporate those from design, engineering, and social science. Topics include science and invention, research contribution types, research through design, theory, ethics, and qualitative/quantitative empirical methods. Prerequisite: either CS&SS 221/SOC 221/STAT 221, STAT 311, or QMETH 201.

INFO 474 Interactive Information Visualization (5) VLPA, QSR Techniques and theory for visualizing, analyzing, and supporting interaction with structures data like numbers, text, and relations. Provides practical experience designing and building interactive visualizations for the web. Exposes students to cognitive science, statistics, and perceptual psychology. Uses empirical approach to design and evaluate visualizations. Prerequisite: CSE 143; either INFO 343 or CSE 154; one of STAT 221/SOC 221/CS&SS 221, STAT 311, or MATH 390/STAT 390.

INFO 481 Project Management in Informatics (4) Introduces project management principles within the context of Informatics. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and the use of computer-based project management tools.

INFO 490 Project Capstone I (4) Student-driven team project including definition of an information problem, a method of investigation, creating of a project proposal, and completion of project deliverables. Prerequisite: INFO 360; INFO 470; INFO 481.

INFO 491 Project Capstone II (4) Includes design and implementation of a system or development of a research question intended to solve an information problem. Incorporates stakeholder and peer feedback, creation of project deliverables, presentation of the project in a public forum, and final assessment. Prerequisite: INFO 490.

INFO 495 Internship in Informatics (1-5, max. 12) Internship in the private or public sector, as approved by faculty member. Work jointly supervised by faculty member (or approved academic sponsor) and an on-site work supervisor.

INFO 497 Informatics Study Abroad (1-8, max. 18) International seminar, led by Information School faculty or researchers. Addresses a specialized area of informatics. Topics vary. May require language proficiency.

INFO 498 Special Topics in Informatics (1-5, max. 25) Various topics in informatics.

INFO 499 Independent Study (1-5, max. 15) Readings, design projects, or research under faculty supervision.

Information Management and Technology

IMT 500 Foundations of Information Management (3) Examines the role and function of information and information management in individual, organizational, community, and social contexts. Topics include information and information management concepts; methods of managing information and information flows within organizations; and

internal and external communication in professional settings.

IMT 501 Teamwork for Information Professionals (1) Introduces the theory and skills that support functional working groups, preparing students to work together effectively in the classroom and the workforce. Major topics include: theoretical perspectives on teams; processes and structural characteristics that influence team effectiveness; dynamics of individual behavior and interpersonal relationships in team interactions; and team leadership.

IMT 502 Effective Written Communications for Information Professionals (1) Provides the theory and skills necessary to communicate in writing in a manner that will accomplish the writer's goals. Major topics include: basic communication theory; effective organization; use of visuals; making writing accessible; managing tone; and writing online.

IMT 503 Effective Oral Communications for Information Professionals (1) Provides the theory and skills necessary to make effective oral presentations that will accomplish the presenter's goals. Major topics include: basic communication theory; preparing effective presentations; presentation best practices; and nonverbal communication cues.

IMT 510 Human Aspects of Information Systems (4) Social, organizational, cognitive, behavioral, and contextual aspects of information, including basic concepts in human information behavior, conceptual and practical frameworks used to study human-information interaction, and social responses to information technology. User-based and work-based evaluation and design of information systems. Exposure to experimental and interview methodologies.

IMT 520 Information Services and Resources (4) Concepts, processes, and skills of information involving creation, production, distribution, selection, collection, and services to facilitate access. Analysis of the information mediation process, including determining information needs; searching for, evaluation, and presentation of appropriate results; and modalities for delivery of services.

IMT 525 Information Management and Technology in Sports (3) Explores the information perspective, including the role and the use of information, information management, and information technologies applied to the sports context. Examines modern and emerging information management and technology systems and their design and use in administering intercollegiate athletic functions.

IMT 530 Organization of Information Resources (4) Introduction to issues in organization of information and information objects including analysis of intellectual and physical characteristics of information objects; use of metadata and metadata standards for information systems; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

IMT 535 Introduction to Information Architecture (5) Introduces concepts and methods of front- and back-end information architecture. Covers back-end topics including data and content modeling, taxonomy, controlled vocabulary, SEO, search, and analytics. Covers front-end topics including design thinking, design process, design patterns, navigation, workflow, labeling, orientation, and information scent. Unifies front- and back-end IA.

IMT 540 Design Methods for Interactive Systems (4) Introduction to the theory and practice of user-centered design. Examines design methods for identifying and describing user needs, specifying and prototyping new systems, and evaluating the usability of systems. Examines design methodologies such as contextual design and value-sensitive design, giving specific emphasis to human-information interaction. Prerequisite: permission of instructor.

IMT 541 Enterprise Information Systems Analysis and Design (4) Theoretical and practical examination of information systems analysis and design processes as they apply in the workplace. Explores techniques for assess-

ing system and technology needs, defining information and work specifications, process and data modeling, and stakeholder analysis process; and input and output design, database design, test plans and implantation strategies in the design process.

IMT 550 Policy and Ethics in Information Management (4) Explores a range of information issues in the social and organizational context of information professionals, including professional ethics, privacy, freedom of expression, and intellectual property. Gives students tools for analysis of the kinds of social and ethical issues that will arise in their future lives as information professionals.

IMT 551 Foundations of Organizational Information Assurance (3) Examines concepts, elements, strategies, skills related to the life cycle of information assurance - involving policies, practices, mechanisms, dissemination, and validation - that ensure the confidentiality, integrity, and availability of information and information systems. Analysis of the information assurance planning process, including determination and analysis of information assurance organization goals, the threat spectrum, risk, and legal and ethical issues.

IMT 552 Information Assurance Risk Assessment and Management (3) Examines the concepts, processes, and skills related to risk management in information assurance involving risk assessment, risk analysis, and mitigation planning. Analysis of the risk management process through several structured approaches that facilitate information assurance decision-making. Prerequisite: IMT 551.

IMT 553 Establishing and Managing Information Assurance Strategies (3) Applies and combines information assurance concepts, processes, and skills to solve case studies from practitioner experiences and explore the role of policy in creating a successful information assurance program. Prerequisite: IMT 551, IMT 552.

IMT 554 Information Economics (3) Theoretical and practical examination of how information economics impacts design decision in the context of information systems and information organizations. Explores issues of how information is priced, commoditized, exchanged, and preserved in economic transactions. Exposes students to how strategic decisions within organizations are made through concepts such as information and strategic games, information signaling, information strategies, information-based network economics, and information incentives.

IMT 556 Information and Operational Risk (3) Examines the information dimensions of the most common types of operational risk including: internal and external fraud, regulatory noncompliance, processing errors, information security breaches, and technology failures; practical application of operational risk frameworks where the intersection of people, information, processes, systems, and external events can lead to financial loss.

IMT 557 Operational Risk Management in the Public and Private Sectors (3) Learn to identify, monitor, and mitigate operational risk exposures in corporations and government agencies, analyze risk appetites, and drive risk awareness at each level of corporate or government hierarchies. Examines technology failure and information sharing in crisis management, intellectual property, and data risk in various infrastructure sectors. Prerequisite: IMT 556.

IMT 570 Analytic Methods for Information Professionals (4) Sharpens critical thinking processes by studying and applying scientific methods to problem solving in the information management area. Provides a framework to resolve information management research problems, interpret research findings, and to understand the interaction among the various parts of the research process.

IMT 576 Business Intelligence (4) Theoretical and practical concepts of business intelligence. Topics include Inmon and Kimball concepts of data warehouse and dimension modeling; online analytical processing and multidimensional cube for information processing and dissemination;

architecture of data acquisition, processing, and presentation layers; data governance and BI best practices, and future trends. Prerequisite: INFX 543. Offered: A.

IMT 580 Management of Information Organizations (4) Introduction to internal and external management issues and practices in information organizations. Examines key topics drawn from the fields of organizational theory and behavior, including planning and decision-making, organizational structure, leadership, and motivation. Reviews strategic and operational issues including human and organizational issues related to technology introduction, use, and management.

IMT 582 Strategic Information Initiatives (4) Covers tools, techniques, and approaches for identifying and planning entrepreneurial initiatives within organizations, including: business information assessments, organizational readiness assessments, alignment with organizational priorities, information audits, and processes for obtaining organizational investment in and commitment to new initiatives. Focuses on building business and economic justifications and leading strategic initiatives in organizations.

IMT 583 Finance and Accounting Foundations for Information Professionals (3) Introduction to financial accounting, including the principles of double-entry accounting, balance sheets, income, and cash flow statements. Covers key financial ratios and their use for various analytical purposes, along with the elements of a financial plan or budget.

IMT 584 Marketing Foundations for Information Professionals (3) Introduction to the principles of marketing. Looks at how to assess an environment from a marketing perspective, consumer and business behavior, market segmentation, product/service strategies, new product development processes, pricing, channels, retail/wholesale, marketing communication, and direct selling.

IMT 585 Human Resource Management Foundations for Information Professionals (3) Introduction to human resource management for information professionals. Covers the principles of job analysis, employee selection, interviewing, training, and appraisal.

IMT 586 Information Dynamics I (4) Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with INSC 586.

IMT 587 Principles of Information Project Management (4) Introduces project management principles within information-related business contexts. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and their use of computer-based project management tools.

IMT 588 Enterprise Project Management in Information Organizations (4) Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with INSC 588.

IMT 589 Special Topics in Information Management (1-4, max. 12) Special study and research in topics of current concern to faculty and students.

IMT 590 Internship in Information Management (2-4, max. 12) Internship in the private or public sector, jointly supervised by faculty member and an on-site work spon-

sor. Prerequisite: enrollment in the MSIM program. Credit/no-credit only.

IMT 598 Emerging Trends in Information Management and Technology (3) Focus on emerging trends in information management and information technology. Attention given to their impact on the functions of the chief information officer and others managing the acquisition, retention, use, and disposition of information and the enabling technologies. Exploration of methods and resources for trend discovery and tracking. Prerequisite: permission of instructor.

IMT 600 Independent Study or Research in Information Management ([1-4]-) Supervised independent study or research. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program. Credit/no-credit only.

Information School Interdisciplinary

INFX 501 Concepts in Algorithmic Thinking for Information (1) Presents programming concepts in the context of information science including the concepts of the algorithm, data storage, expressions, syntax, logic, objects, commands, and events. Introduces the algorithmic manipulation of information objects, and the mindset and methods of computer programming and application development. Credit/no-credit only.

INFX 502 Database Concepts for Information Professionals (1) Introduces the terminology and concepts of working with relational database management systems. Emphasizes working with tables and extracting information from data using Structures Query Language (SQL) commands and tools. Credit/no-credit only.

INFX 503 Website Design Concepts for information Professionals (1) Introduces the context and construction of websites presenting an integrated understanding of web design principles, information behavior, and technical skills. Emphasizes the roll of markup in information display and organization, the development of large sites, web strategy, and site construction. Credit/no-credit only.

INFX 504 Networking and Network Applications for Information Professionals (1) Introduces the concepts, terminology, and technologies of digital networks, including how networks operate and the influence networks have on the workplace and society. Includes preparation to think critically about the impacts of networking technologies on organizations, work groups, and information systems. Credit/no-credit only.

INFX 505 Project Management Basics for Information Professionals (1) Introduces the terminology, concepts, and skills used in working with project management and project management software. Emphasizes developing, refining, and monitoring work schedules using software tools. Credit/no-credit only.

INFX 508 Reading Seminar (2) Discusses theoretical works and contemporary research in areas related to information science, information management, or information technology and design. Introduces students to the intellectual traditions that underlie the field. Credit/no-credit only.

INFX 531 Metadata Design (3) Design principles of metadata schemas and application profiles - implementation of interoperable application profiles using XML technology. Focuses on achieving syntactic and semantic interoperability among diverse metadata schemas and application profiles. Prerequisite: either LIS 530 or IMT 530; INFX 542; or permission of instructor.

INFX 532 Ontology Design (3) Studies semantic interoperability among different metadata schemas and ontologies. Elaborates on concepts and technology related to Topic Maps, RDF Schema, and Web Ontology Language (OWL) to achieve advanced and semantic data modeling of complex data that exist in the real world. Prerequisite: INFX 531 or permission of instructor.

INFX 536 Metadata for Interactive Media (3) Explore new ideas and approaches for organizing and providing access to interactive media, particularly from a user-centered perspective. Design and conduct formative and evaluative user studies employing various qualitative and quantitative methods to determine information needs and seeking behaviors of various stakeholders in one or more interactive media domains.

INFX 537 Construction of Indexing Languages (4) Exploration of the design, construction, evaluation, and maintenance of controlled indexing languages, including studies of how users are integrated into the design process. Through completion of thesaurus construction project, prepares students to design index languages, plan and implement a design project, and evaluate indexing languages. Prerequisite: either LIS 530 or IMT 530. Credit/no-credit only.

INFX 538 Metadata Design Studio (4) Principles, skills and practices in the conceptualization and implementation of metadata systems with a focus on semantic web. Project-based exploration of domain and abstract data modeling, attribute/value space definition, and machine encoding decision. Prerequisite: either LIS 530 or IMT 530; INFX 542; or permission of instructor.

INFX 542 Information Structures Using XML (4) Introduces the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight given to understanding structures and implementing them. Topics include information analysis and organizational methods as well as XML and metadata concepts and application. Prerequisite: INFX 503.

INFX 543 Relational Database Management Systems (4) Introduction to relational database design and development theory, concepts, and skills, including traditional transactional database theory, architecture, and implementation in a user-centered systems context using SQL. Introduces database modeling, security, and privacy issues. Prerequisite: INFX 502 or permission of instructor.

INFX 544 Information Retrieval Systems (3) Introduction to theory and models in information retrieval and the systems for storage and retrieval of unstructured information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation, methods and tools for document analysis, interfaces, and usability.

INFX 546 Data Communications and Networking (4) Covers local and wide-area computer networking including topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks.

INFX 547 Social Media Data Mining and Analysis (4) Explores techniques for collecting and analyzing social media. Students gain direct experience with methods for collecting a social media corpus, defining features of activity that are relevant for analysis, and analyzing those features. Prerequisite: either INFX 501 or permission of instructor.

INFX 551 Fundamentals of Data Curation (4) Examines principles, practices, and trends in the curation of digital research data. Provides a foundation in data management and data services for professionals in institutions involved with data intensive research, scholarship, and innovation. Emphasizes data sharing, preservation, open access, metadata, and policy for development of reusable and accessible data resources.

INFX 554 Information and Contemplation (4) Explores how contemplative practices and perspectives can offer insights into today's information-intensive culture and how they can provide guidelines and design principles for the development of new information practices and technologies. Students explore a variety of contemplative/atten-

tional practices and use these to investigate information trends, practices, and concerns.

INFX 563 Advanced Relational Database Management Systems (4) Advanced relational database design and development theory using SQL, concepts, and skills. Topics include advanced T-SQL; backup and recovery; and triggers and reporting services. Prerequisite: INFX 543; either INFX 501 or equivalent.

INFX 567 Strategic Management of Social Media (4) Offers an overview of social media use in organizations of any type. Covers a variety of social media platforms and technologies, business strategies, and uses and related issues. Gives a historical perspective on social media and its development. Students learn to develop social media strategies and implementation plans for organizations.

INFX 571 Research Seminar (2-4, max. 10) Students work in teams under the supervision of individual faculty members to engage in research or design activities and learn through hands-on participation and study. Learning activities include data collection, data analysis, building prototypes, testing or evaluation, or dissemination activities.

INFX 572 Introduction to Data Science (4) Introduces a broad, non-technical overview of key concepts, skills, and technologies used in "data science". Provides a high-level introduction to common data science pipelines, such as experimental design, data collection and storage, basic analytics, machine learning, and data visualization, focusing on analyzing in real-world datasets using industry standard statistical packages.

INFX 573 Data Science I: Theoretical Foundations (4) Provides an overview of key concepts, skills, and technologies used by data scientists, including inference; machine learning and pattern recognition; storage and scaling; experimental design; and data visualization. Prerequisite: either Q METH 201, IMT 570, or equivalent college coursework; either CSE 142, INFX 501, or equivalent college coursework.

INFX 574 Data Science II: Machine Learning and Econometrics (4) Provides skills required to analyze and derive insight from large-scale, heterogeneous data. Covers key concepts of functional and imperative programming for storing, extracting, analyzing, and presenting large data projects; and data analysis using inferential statistics, supervised and unsupervised machine learning. Students gain experience modeling social and behavioral data. Prerequisite: INFX 573.

INFX 575 Data Science III: Scaling, Applications, and Ethics (4) Advanced skills for analyzing and deriving insight from large-scale, heterogeneous data. Provides methods, tools, and frameworks for analyzing data, with topics including scaling and distributed computing, network analysis, and visualization. Student gain experience applying methods to real-world data. Prerequisite: INFX 574.

INFX 576 Social Network Analysis (4) Provide students with an understanding of the fundamental concepts, common methods, and analytical tools of social network analysis. Students gain experience applying both exploratory and inferential methods to real-work problems with in the social network domain.

INFX 583 Cross Cultural Approaches to Leadership (3) Explores alternative leadership models as reflected in the literatures of multiple cultures. Examines ethical dimensions of leadership in the context of complex relationships among the peoples and agencies that comprise the global environment. Uses imagination in the application of cross cultural forms of leadership. Prerequisite: permission of instructor.

INFX 594 Degree Research Project (3) Includes analysis, design, completion, documentation, and presentation of a faculty-defined individual or group research project demonstrating professional-level knowledge and skills. Meets culminating experience master's degree requirement. Prerequisite: completion of 30 credits and adviser approval of

an MLIS degree plan or completion of 38 MSIM core credits. Credit/no-credit only.

INFX 595 Capstone I - Project Planning (2) Analysis and preliminary design of an approved individual or group research or implementation project demonstrating professional-level knowledge and skills. Prerequisite: either completion of all MSIM core courses or completion of 30 credit hours and advisor approval of an MLIS degree plan. Credit/no-credit only.

INFX 596 Capstone II - Project Implementation (3) Implementation of a project demonstrating professional-level knowledge and skills based on a project plan developed in INFX 595. Prerequisite: INFX 595. Credit/no-credit only.

INFX 597 Information Science Study Abroad (1-8, max. 18) International seminar, led by Information School faculty or researchers. Addresses a specialized area of information studies. Topics vary. May require language proficiency.

INFX 598 Special Topics (1-4, max. 30) Introduces innovation and specialized topics relating to the study of information in any context.

Information Science

INSC 500 Faculty Seminar (2) Presentations by faculty concerning research projects in which they are involved. Credit/no-credit only.

INSC 501 Theoretical Foundations for Information Science (3) In-depth exploration of the philosophical, theoretical, methodological, and historical foundation of information science and the study of information.

INSC 518 Seminar in Human Information Interaction (4) Investigates conceptual frameworks, assumptions, analytical tools, concepts, models, and theories in human information interaction (HII). Topics may include theories of information behavior, information behavior in everyday life, social informatics, HII in organizations, or personal information management. Previous readings in HII preferred. Prerequisite: permission of instructor.

INSC 535 Classification Theory (3) Survey of classificatory principles from bibliographic, philosophical, socio-cognitive, and linguistic perspectives. Overview of history of bibliographic classification and exploration of some existing bibliographic classification systems. Ramification of theoretical approach for classification practice. Prerequisite: LIS 530. Offered: jointly with LIS 535.

INSC 538 Seminar in Information Organization (4) Seminar on information organization, focusing on any area of information organization, including classification theory, metadata, document theory, information organization in information systems; social and political aspects of classification, controlled vocabularies, and cataloging history.

INSC 541 HCI Design Foundations for Interactive Systems (4) Develops knowledge and skills for design-based inquiry of interactive systems. Students practice user-centered design methods and study theories of human-computer interaction, including but not limited to: goal-based design and task analysis, scenario-based design, soft systems methodology, value sensitive design, universal design, and participatory design.

INSC 542 HCI Design Studio for Interactive Systems (4) Develops knowledge and skills for design-based inquiry of interactive systems. Includes a quarter-long project using appropriate methods and iteratively engages research, design, prototyping, and evaluation activities. Opportunity to reflect upon practice and receive critical review of work throughout the quarter.

INSC 543 Value Sensitive Design (4) Develops knowledge and skills to account for human values in design, development, and deployment of information systems. In-depth examination of value sensitive design theory, methods, and practice, including stakeholder project. Prerequisite: permission of instructor.

INSC 546 Assistive Technology and Inclusive Design (4) Examines interactive technologies for users with alternative skills or in alternative contexts. Covers universal design, inclusive design, and assistive technologies. Addresses needs of users with physical limitations, children/elders, users in developing nations, and mobile users.

INSC 547 Collaborative and Social Computing (4) Seminar on the design of collaborative and social computing systems. Introduces theories for analyzing collaborative on-line and face-to-face. Student apply a theoretical perspective through the design of a social or collaborative application. Application domains include blogging, tagging, on-line communities, social recommending, ubiquitous computing, and collaboration in domestic settings.

INSC 555 Information and Values (4, max. 12) Explores value systems within a range of different social and technological environments.

INSC 557 Cultural and Ethnic Dimensions in Information Science (4) Examines ethnic and cultural dimensions of information storage and transfer, knowledge creation and exchange, and information-related values in an increasingly global world. Readings from anthropology, cultural learning, cross-cultural communications, and ethnic traditions provide the basis for discussions about conducting research across culturally distinct communities. Prerequisite: permission of instructor.

INSC 561 PhD Colloquium on Professional Issue (1, max. 12) Covers topics relating to the professional concerns of doctoral students and their future lives as academics and researchers. Credit/no-credit only.

INSC 565 Teaching Practicum I (3) Doctoral student participation in teaching in a faculty-taught course. Credit/no-credit only.

INSC 566 Teaching Practicum II (3) Doctoral student takes primary teaching responsibility for a course under supervision of a faculty liaison. Prerequisite: INSC 565. Credit/no-credit only.

INSC 570 Research Design (4) Introduction to empirical research, basics of theory construction and research design, types of research, ethical issues, instruments and techniques for descriptive research, measures of association. Employs an integrated (qualitative and quantitative) and focused approach.

INSC 571 Quantitative Methods in Information Science (5) Describes uses, characteristics, and theoretical bases of research methods and data analysis techniques used in quantitative research, emphasizing uses in information and library science. Topics include experimental design, descriptive and inferential statistics, the normal distribution, elementary probability, nonparametric statistics, and exploratory data analysis techniques. Prerequisite: INSC 570.

INSC 572 Qualitative Methods in Information Science (5) Principles and approaches to conducting qualitative research in information science, including how to design a qualitative study, role of context, methods of data collection and analysis, increasing the trustworthiness of data, minimizing observer effect, how to incorporate and build theory. Exposure to field research and data analysis. Prerequisite: INSC 570.

INSC 573 Design Inquiry and Methods in Information Science (5) Acquire theory, methods, and skills for design-based inquiry, focusing on making artifacts - technical, informational, managerial, or organizational - and devising courses of action that enable people to mobilize. Students develop knowledge for design in Information Science through practical application of design methods and scholarly investigation of selected literatures.

INSC 575 Research Practicum I (3) Students work with a researcher from the Information School as an active member of a research team. Credit/no-credit only.

INSC 576 Research Practicum II (3) Students work with an approved researcher as an active member of a research team. Prerequisite: INSC 575 or permission of instructor. Credit/no-credit only.

INSC 578 Research Seminar (1-2, max. 15) Research presentations on a wide variety of topics in information science. Credit/no-credit only.

INSC 579 Research Colloquium in Information Science (2, max. 30) Research colloquium on various research topics in information science. Faculty, visitors, and students present current research. Prerequisite: permission of instructor. Credit/no-credit only.

INSC 581 Organizational Theories of Information Systems (4) Surveys major strands of management of information systems research. Covers the behavioral, economic, strategic, and technical research perspectives of MIS research.

INSC 586 Information Dynamics I (4) Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with IMT 586.

INSC 588 Enterprise Project Management in Information Organizations (4) Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with IMT 588.

INSC 598 Special Topics in Information Science (1-5, max. 12)

INSC 599 Independent Study in Information Science (1-5, max. 15) Readings, design projects, or research under faculty supervision. Prerequisite: permission of instructor and Ph.D. program chair.

INSC 600 Independent Study or Research (*) Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of Supervisory Committee or graduate program adviser. Credit/no-credit only.

INSC 800 Doctoral Dissertation (*-) Credit/no-credit only.

Information Technology Applications

ITA 340 Introduction to Web Publishing (3) Introduction to markup languages and publishing web content. Students gain understanding of HTML coding and extensions, image manipulation, information architecture, and web site publishing. Other topics include: the Web Accessibility Initiative, survey of Graphical User Interface (GUI) HTML editors, online privacy and security, and eXtensible Markup Language (XML).

ITA 341 Client-side Scripting and Design (3) Introduction to web browser design environment, scripting languages, JavaScript, Document Object Model (DOM), and creation of dynamic HTML web pages (DHTML) in combination with Cascading Style Sheets (CSS). Other topics include: client-server architecture and web design principles in the contexts of technical feasibility, usability, and accessibility. Prerequisite: ITA 340.

ITA 342 Introduction to SQL and Data Storage Technologies (3) Fundamentals of database design in a client-server architecture useful for web applications. Subsequent topics build upon foundation by introducing the Structured Query Language (SQL), open source tools MySQL and PHP for database processing, security issues in database appli-

cations, and XML as an alternate database storage technology. Prerequisite: ITA 341

ITA 343 Server-Side Programming and Web-data Integration (3) Provides framework to integrate server-side programming concepts and techniques, database technologies, and client-side scripting to design and implement dynamic web applications. Examines techniques using PHP, design and implementation of database (MySQL) connections, web application security, and XML data publication. Prerequisite: ITA 342.

Library and Information Science

LIS 462 Skills Approach to Information, Communications, and Technology (ICT) Literacy (3) Introduction to the Big6 TM Skills approach to information, communications, and technology (ICT) literacy for personal, school, district, or higher education settings. Includes technology within the Big6 framework, connection to standards, instructional design, assessment, curriculum mapping, peer collaboration, the parent connection, program planning, and implementation.

LIS 498 Special Topics (1-5, max. 15) Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit.

LIS 500 The Question of Information (2) Provides an overview of the major questions, concepts, and challenges engaging library and information science through seminar discussion. Exploration of the social context in which these questions and challenges occur, and their implications for both research and practice. Credit/no-credit only.

LIS 501 History and Foundations of Libraries and Librarianship (3) Introduces the history of libraries, major issues in contemporary library and information work, and types of libraries. Examines the role of libraries in society, the development of professional librarianship, and the role of librarians.

LIS 505 Archival and Manuscript Services (3) Selection, organization, and uses of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions' collections. Lecture, demonstration, and laboratory.

LIS 507 Preservation and Conservation of Library Materials (3) Consideration of the many factors contributing to the physical vulnerability of library materials of all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical background necessary.

LIS 508 History of Recorded Information (4) Exploration of the history and ongoing transformation of recorded information within three broad spheres of human life: public communication, administrative and commercial operation, and personal communication.

LIS 510 Information Behavior (3) Introduction to the user-centered approach to information behavior. Theoretical foundations of need, creation, seeking, sharing, assessment, management, and use. Synthesis of information behavior studies, performance of information behavior field research, and application of the results of information behavior studies to design information systems, services, and policy. Prerequisite: LIS 500.

LIS 516 Youth Development and Information Behavior in a Digital Age (3) Introduction to major theories of human development from birth through age eighteen and application of these theories to examine youth's information behavior and digital media use at various developmental stages. Explores new research on the impact of digital media tools and practices on youth development. Prerequisite: either LIS 510 or permission of instructor.

LIS 520 Information Resources, Services, and Collections (4) Concepts, processes, and skills related to information, including production, distribution, selection, collection,

and services to facilitate access. Specific discussion topics include characteristics of recorded knowledge; organizations and services devoted to managing access to recorded knowledge; and principles associated with development of recorded knowledge and collections.

LIS 521 Principles of Information Services (4) Analysis of the information mediation process, including determination and analysis of information needs; searching for, evaluation, and presentation of appropriate results; modalities for delivery of services; and current and future techniques. Prerequisite: LIS 520.

LIS 522 Collection Development (3) Access to materials as context for development and management of library collections in academic, public, school libraries. Community analysis, library mission; collection development policies, criteria, levels, responsibilities; aids to selection; collection evaluation, use studies; controversial materials.

LIS 524 Adult Reader Services in the Public Library (3) Focuses on developing and performing readers' advisory services for contemporary adult fiction and non-fiction. Includes interpersonal and marketing skills necessary to promote reading including reading advocacy, readers' advisory interviewing, writing advisory annotations, presenting book talks, and conducting book discussion groups.

LIS 525 Genres for Adult Readers (3) Reviews characteristics of the most popular genres of fiction, including speculative fiction, mystery/thriller/suspense, romance, westerns, and graphic fiction/memoir. Helps to develop practice in book talking, preparing annotated booklists, and making reading suggestions to library users.

LIS 526 Government Publications (3) Introduction to government publications of the United States and their acquisition, organization, and use. Other topics covered include the public's right to know, the Federal Depository Library Program, government influences in our daily lives, and future directions in government information. Credit/no-credit only.

LIS 527 Business Information Resources (3) Survey of the extent and nature of business information and its sources, and of business information producers and consumers. Study and use of both print and on-line sources.

LIS 528 Health Sciences Information Needs, Resources, and Environment (3) S. FULLER Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with BIME 570; Sp.

LIS 530 Organization of Information and Resources (4) Introduction to issues in organization of information and documents including: analysis of intellectual and physical characteristics of documents; principles and practice in surrogate creation, including standards and selection of metadata elements; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement. Prerequisite: LIS 500, which may be taken concurrently.

LIS 531 Catalogs, Cataloging, and Classification (4) Develops an understanding of library catalogs as information retrieval systems. Introduces library cataloging and classification. Focus on principles and standards in the creation of catalogs and cataloging records. Includes practice in descriptive and subject cataloging and classification. User perspective emphasized throughout. Prerequisite: LIS 500, LIS 530.

LIS 533 Advanced Cataloging and Classification (4) In-depth theory and practice in library cataloging and classification. Includes introduction to cataloging materials in a variety of formats. Prerequisite: LIS 500, LIS 530, and LIS 531.

LIS 534 Indigenous Systems of Knowledge (3) Conceptual foundations and comparative analysis of indigenous knowledge organization systems. Feasibility and use of contemporary knowledge organization mechanisms including thesauri and ontologies in expressing the cultures and artifacts of indigenous peoples. Prerequisite: LIS 530 or permission of instructor.

LIS 535 Classification Theory (3) Survey of classificatory principles from bibliographic, philosophical, socio-cognitive, and linguistic perspectives. Overview of history of bibliographic classification and exploration of some existing bibliographic classification systems. Ramification of theoretical approach for classification practice. Prerequisite: LIS 530. Offered: jointly with INSC 535.

LIS 550 Information and Society (3) Covers concepts, processes, and issues related to the larger social context within which the life cycle of information and knowledge in society are investigated. Discussion topics include codes of ethics, professionalization, privacy, freedom of expression, intellectual property, social inequalities, and quality of life. Prerequisite: LIS 500, which may be taken concurrently.

LIS 551 Intellectual Freedom in Libraries (3) Analysis of issues related to intellectual freedom, particularly to implications for libraries and librarians. Consideration of current legal climate, conformity versus freedom in modern world, librarian as censor, social responsibility and individual freedom, intellectual freedom of children, prospects for future. Credit/no-credit only.

LIS 560 Instructional and Training Strategies for Information Professionals (3) Develops knowledge and skills in instruction while applying theories of information literacy, teaching, and learning to instruction in an information environment. Teaches students how to design, develop, and evaluate instructional programs for specific users. Prerequisite: LIS 500.

LIS 561 Storytelling in a Digital Age (3) Instruction in the art and technique of oral and digital storytelling for all ages. Addresses both traditional and contemporary modes of storytelling, including transmedia. Sources include personal and family stories, folktales, and literary stories. Also explores non-library storytelling: therapeutic storytelling, organizational storytelling, and storytelling for qualitative research.

LIS 564 Multicultural Resources for Youth (3) Facilitates development of cross-cultural competence through authentic resources for children, teens, and teens produced by or about ethnic minorities in the United States. "Issues" focus, providing knowledge in critical examination of various genres of multicultural resources as well as in strategies to use them.

LIS 565 Resources for Digital Age Children (3) Introduces selection and evaluation of traditional, digital, and transmedia resources used by public and school libraries for children, birth to age twelve. Applies theories from human development, information behavior, and digital media research to the identification of developmentally appropriate selections and provision of readers/users/ advisory for children. Prerequisite: LIS 516.

LIS 566 Resources for Digital Age Teens (3) Introduces selection and evaluation of traditional, digital, and transmedia resources used by public and school libraries for teens. Applies theories from human development, information behavior, and digital media research to the identification of developmentally appropriate selections and provision of readers/users/ advisory for teens. Prerequisite: LIS 516.

LIS 567 Libraries as Learning Labs in a Digital Age (3) Application of theories and research on youth development to inform practice about programming and resources for youth. Create programs based on current research, including programming such as story times, book talks, and maker spaces. Prerequisite: LIS 516.

LIS 568 Information Literacy in a Digital Age (3) Explores theories, process, and practical applications of informa-

tion literacy. Examines the development of information literacy programs for libraries, community agencies, business, education, and other information settings. Explores the integral relationship between technology and information literacy, and assessment and evaluation of programs. Prerequisite: LIS 560.

LIS 569 Special Topics in Instructional and Training Strategies for Information Professionals (1-5, max. 18) Introduction to innovative and specialized topics in instructional and training strategies for information professionals. Prerequisite: LIS 560.

LIS 570 Research, Assessment, and Design (4) Students recognize research and design opportunities, translate them into researchable frameworks, and conduct research in libraries and other information agencies. Covers problem definition, data collection and analysis, design and validation of alternative solutions, and reporting of results. Prerequisite: LIS 500, which may be taken concurrently.

LIS 580 Management of Information Organizations (4) Introduction to internal and external management issues and practices in information organizations. Internal issues include organizational behavior, organizational theory, personnel, budgeting, planning. External issues include organizational environments, politics, marketing, strategic planning, funding sources. Prerequisite: LIS 500, which may be taken concurrently.

LIS 581 Marketing and Planning for Libraries (3) Approaches to planning and marketing library products/services. Examines partnerships that can be forged between elements of marketing and appropriate futures strategies for libraries. Discusses marketing and planning as integrated processes with attention to short- and long-term goals and objectives. No particular library institutional setting is assumed. Prerequisite: LIS 500, which may be taken concurrently.

LIS 584 Knowledge Management (3) Introduction to contemporary topics in management of knowledge creation and use in organizations. Discussion topics include knowledge generation, knowledge taxonomy, knowledge transfer, organizational knowledge management practice, and knowledge management systems. Prerequisite: LIS 500; LIS 580, or permission of instructor

LIS 585 Administration of the School Library Media Program (3) Develops competency in administering materials, equipment, and services of library media program as integral part of educational process of school. Focuses on developing skills in acquiring, organizing, and managing full range of learning resources for access and use, and communicating the program to users. Required for school library media specialists. Prerequisite: LIS 580.

LIS 586 Public Libraries and Advocacy (3) Examines the purpose and role of public libraries in an information society. Includes governance, services, and planning with special emphasis on advocacy for the library and community.

LIS 587 Library Technology Systems (4) Developing criteria for selection and design of information technology systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges, such as vendor relations, financing options, personnel requirements, and design of auxiliary activities. Prerequisite: LIS 580.

LIS 588 Special Librarianship (3) Seminar in the practice of special librarianship in business and commercial firms, government agencies, other non-profits, and the independent consultant sector. Emphasis on management of non-traditional information organizations and the targeted information role.

LIS 590 Directed Fieldwork (2-5, max. 8) Professional, supervised fieldwork in a library or professional information setting. Prerequisite: 30 credits in MLIS program. Credit/no-credit only.

LIS 591 Legal Research I (3) Introduction to legal bibliography and law librarianship. Basic primary and secondary le-

gal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Offered: jointly with LAW A 598.

LIS 592 Legal Research Methods (3/4) Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LAW A 599.

LIS 593 Selection and Processing of Law Library Materials (3) Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, budgeting, cataloging, and serials. Prerequisite: LIS 591 or permission of instructor.

LIS 594 Law Library Administration (4) Administration in law libraries, including organization, personnel, and management issues (e.g., interviewing, hiring, firing), communications, library planning, and bookkeeping. Prerequisite: LIS 591 or permission of instructor. Credit/no-credit only.

LIS 595 Current Issues in Law Librarianship ([0-4]-, max. 4) From a list of current topics in law librarianship, students select a topic, research it fully, write a major paper, and present their paper. Topics may include citation reform, ethics, and publisher practices. Prerequisite: law librarianship majors or permission of instructor. Credit/no-credit only.

LIS 596 Professional Portfolio (3) Preparation and presentation of reflective working and presentation portfolios representing the student's goals, achievements, knowledge and skills, experience, and professional objectives. Development of plans for ongoing professional development. Prerequisite: completion of 30 credit hours and adviser approval of MLIS degree plan. Credit/no-credit only.

LIS 598 Special Topics in Information and Library Science (1-6, max. 18) Seminar dealing with various topics in information and library science. Offered by visitors or resident faculty. Topics are changed from quarter to quarter. May not be offered every quarter. Prerequisite: determined by specific course.

LIS 600 Independent Study or Research (*-) Credit/no-credit only.

Interdisciplinary Graduate Degree Programs

These programs are administered by interdisciplinary groups of the Graduate School. Certain courses carrying the particular program prefix appear below; other courses with the same prefix appear elsewhere as indicated. Other courses included in these programs are selected from many disciplines throughout the University and carry the prefix of the respective discipline.

Astrobiology

C319 Physics-Astronomy Building

Astrobiology -- the study of life in the universe -- investigates the wide range of multidisciplinary factors that may influence the origin and evolution of life on Earth and beyond. Such investigation demands intense interdisciplinarity, for which the astrobiology program at the University of Washington is creating a new community of scholars, investigators, and educators -- a community skilled in multidisciplinary methods and thinking that pushes boundaries beyond the commonplace with intellectual vigor, creativity, and rigorous methodology.

Astrobiology at the University of Washington builds on the strengths of traditional academic structure to transcend the limits of specialization through the synergy of multidisciplinary cooperation in both research and education.

The internationally recognized graduate certificate program offers a rigorous, interdisciplinary curriculum in cooperation with the PhD programs of participating departments. The program's unique features bond students and faculty from widely disparate departments. Participating graduate students gain the personal and professional skills necessary to successfully engage in multidisciplinary collaborations.

The emerging field of astrobiology benefits from and is shaped by the perspectives of multiple disciplines directed at a common problem. It benefits also from the breadth of perspective offered by diversity in culture and race among the program's participants.

GRADUATE PROGRAM

Graduate Program Coordinator

C304 Physics-Astronomy, Box 351580

(206) 685-2392

office@astro.washington.edu

Graduate Certificate Program

Admission Requirements

UW academic departments participating in the graduate certificate program in astrobiology provide expertise in the following primary collaborating disciplines:

- Aeronautics and Astronautics
- Astronomy
- Atmospheric Sciences
- Biochemistry
- Biology
- Genome Sciences
- Earth and Space Sciences

- History (of Science)
- Microbiology
- Oceanography

Students wishing to participate in the astrobiology graduate certificate program must be accepted for admission by the PhD program of one of these departments. Contact the appropriate participating department for PhD program application requirements and deadlines.

Certificate Requirements

15 credits minimum, to include:

1. ASTBIO 501, ASTBIO 502
2. Three astrobiology-only seminar series (1 credit)
3. One cognate course approved by the student's advisory committee to ensure sufficient breadth (see program website for current list of cognate courses)
4. One quarter of a research rotation in an area outside the student's home discipline (3 to 10 credits)
5. Participation in a minimum of three workshops comprising the capstone experience (non-credit)
6. Astrobiology ethics seminar (variable credits)

Additional credits may be earned through:

- Other approved cognate courses
- Astrobiology public lecture series (1 credit)

Successful completion of the certificate requires a minimum cumulative 3.00 GPA for all required courses and a minimum 2.7 grade for each elective course.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

ASTBIO 115 Astrobiology: Life in the Universe (5) NW R. BUICK, D. CATLING, V. MEADOWS, W. SULLIVAN Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTR 115/BIOL 114/ESS 115/OCEAN 115.

ASTBIO 501 Astrobiology Disciplines (4) R. BUICK, D. CATLING, V. MEADOWS Review of research and subject matter relevant to astrobiology from within the disciplines of biology, astronomy, oceanography, atmospheric science, chemistry, planetary science, and geology. Offered: A, even years.

ASTBIO 502 Astrobiology Topics (4) R. BUICK, D. CATLING, V. MEADOWS Investigation in detail of research topics of current interest. Offered: A, odd years.

ASTBIO 550 Professional Development for Astrobiology (2) Seminar in preparation for the academic job market; writing and reviewing grant proposals; building and managing interdisciplinary research teams; understanding the multiple career paths available in astrobiology; interdisciplinary teaching; and professional ethics. Credit/no-credit only. Offered: W, odd years.

ASTBIO 575 Seminar in Astrobiology (1, max. 10) Discussion of recent research in astrobiology. Credit/no-credit only. Offered: W, even years.

ASTBIO 576 Astrobiology Colloquium (1, max. 15) Current research topics in astrobiology. Credit/no-credit only. Offered: ASP.

ASTBIO 600 Independent Study or Research (*) Study or research under the supervision of individual faculty members.

Biology Teaching

The Graduate School Biology Teaching Group offers an interdisciplinary program that leads to the degree of Master of Science in science for teachers. Although designed specifically for biology teachers in K-12 schools and community colleges, other life science educators, such as those in environmental learning centers, may find the program especially worthwhile. The program emphasizes broadening the student's understanding of the various fields of biological science, with the improvement of the student's effectiveness as a teacher as the primary goal. Opportunities for coursework within the departments of the University in biological science and science education are provided. Each student is asked to perform an in-depth study of a biological science problem in the context of its relevance to the teaching of biological science. Facilities and guidance are provided by a sponsoring professor and advisory committee drawn from the Biology Teaching Group and the several biological science departments of the University.

GRADUATE PROGRAM

Graduate Program Coordinator

222 Hitchcock, Box 355320

(206) 543-1689

Master of Science

Admission Requirements

1. Secondary teaching certificate or evidence of professional involvement in K-12 or public education
2. Bachelor's degree in biology or closely related field. Students in related fields must have adequate preparation in science.
3. Minimum 3.00 GPA in the most recent 90 graded quarter credits (60 semester credits)
4. Graduate Record Examination test scores
5. Two or three letters of recommendation
6. Statement of professional experience and objectives

Degree Requirements

36 credits, to include:

1. Minimum 18 credits at the graduate level: minimum 18 must be graded. These categories are not mutually exclusive.
2. All coursework must be at or above the 400 level.
3. Each student plans a program to meet his or her own educational objectives, selecting at least one course from each of the following areas: botany, genetics, microbiology, zoology, and from the College of Education. One course in biochemistry is also required unless already completed in prior academic work. Courses in biomedical history, fisheries, forest resources, environmental studies, etc. may be appropriate for the student's interests. The Graduate Program Coordinator assists the student in this planning.

Biomolecular Structure and Design

N107 Foege, Box 355061

The department's graduate program is directed toward the education of doctoral students who anticipate careers that involve teaching or research in the biomedical sciences. Graduates from the program have a broad knowledge of biological structure at all levels, from the molecular to the

human anatomical, with a major emphasis on the cellular level.

Graduate students select research and teaching options in their program. The research options are designed to provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. Teaching options prepare the student to teach in one of the anatomical sub-disciplines: human anatomy, neuroanatomy/neurobiology, histology, embryology/developmental biology, cell biology, and macromolecular structure.

GRADUATE PROGRAM

Graduate Program Coordinator

G514 Health Sciences, Box 357420

206-543-5474

Master of Science

Admission Requirements

1. Minimum 3.00 GPA
2. A bachelor's degree in one of the following or a related area: chemistry, biology, physics, biochemistry, or biophysics.
3. GRE
4. Minimal course requirements for successful applicants:
 - a. *Chemistry*: General, organic, and physical
 - b. *Physics*: One year
 - c. *Mathematics*: One year of calculus; multivariable calculus and/or linear algebra are strongly recommended
 - d. *Biology and/or Biochemistry*: One year general biology plus one advanced course in biology or biochemistry
5. Undergraduate research experience strongly recommended.
6. International students must have a minimum score on one test as follows: 7.0 IELTS; 92 TOEFL iBT; 237 TOEFLC; 580 TOEFL; 90 MLT.
7. International students hoping to study with BMSD faculty in the Chemistry Department must have a minimum score on one test as follows: 26 on the speaking portion of the TOEFL iBT; 7.0 on the speaking portion of the IELTS; 70 on the Versant English Test; 55 on the TSE; 230 on the SPEAK test administered at the UW.

Degree Requirements

36 credits, to include:

1. *Required Courses*: BIOC 530; BMSD 540, BMSD 541, BMSD 542; BMSD 520 to be taken every quarter
2. 12 graded credits of elective courses covering at least three of the four BMSD categories of topics: biomolecular structure, techniques in biomolecular structure, molecular and cellular biology, and chemistry
3. At least one sequence of Biomedical Research Integrity workshops in the first or second year of the program. The Biomedical Research Integrity (BRI) series is a sequence of lectures and workshops offered during summer quarter each year.
4. *Teaching*: In order to gain practical teaching experience, students in the program serve as teaching assistants for two quarters.
5. *Research*: Students rotate through a minimum of two and a maximum of three participating laboratories during their first year. The opportunity exists for students to do an early rotation during summer quarter.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

BMSD 520 Research Seminar (1, max. 9) Group conferences on graduate student research. Prerequisite: BMSD graduate student or permission of instructor. Offered: AWSp.

BMSD 541 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to biomolecular structure and design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: W.

BMSD 542 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to biomolecular structure and design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: Sp.

BMSD 599 Introduction to Research in Biomolecular Structure and Design (3-6, max. 24) Student works with one of the research groups within the Biomolecular Structure and Design program for one quarter and then rotates to another laboratory for one additional quarter. Minimum two quarters, maximum four. Prerequisite: BMSD student or permission of instructor. Offered: AWSpS.

Environmental Management

274 Mary Gates Hall

The graduate certificate in Environmental Management (EM) is an interdisciplinary program designed to prepare students to contribute to sustainable utilization and enhancement of the natural and human environment. Through coursework, seminars, and a culminating two-quarter-long keystone project, students acquire the tools to solve real-world environmental problems via the three avenues of science, policy, and business. Keystone projects provide a unique opportunity for graduate students to gain practical experience working in an interdisciplinary team with students from a variety of disciplines, a faculty mentor, and in collaboration with a community partner. The EM program provides education and training opportunities for a diverse array of graduate students preparing for management careers in the non-profit, for-profit, and public sectors, as well as for those who contribute legal, scientific, and technical expertise to environmental decision making locally, nationally, and internationally. Key benefits of the program include:

- Broadening knowledge, perspectives, and skills beyond the academic home discipline through core courses, keystone projects, and participation in a community of faculty and students from various departments that share the common goal of environmental stewardship and sustainability.
- Gaining practical experience crafting interdisciplinary solutions to real-world environmental issues and making connections with community partners outside the University.
- Receiving a printed certificate and record on the transcript from the Graduate School to document completion of the interdisciplinary program in Environmental Management.

The flexible curriculum is suitable for students from many backgrounds, such as engineering, physical and natural sciences, public policy, economics, geography, public

health, and political science, to name a few. There is no other comparable interdisciplinary educational experience currently available to graduate students at the University of Washington.

GRADUATE PROGRAM

Graduate Program Coordinator

274 Mary Gates Hall

Box 352802

(206) 221-6129

envirmgt@uw.edu

Admission Requirements

1. Enrollment in a graduate and professional degree program in any school of the University of Washington
2. Completion of a one-quarter upper-level or graduate-level course in applied quantitative methods (e.g., microeconomics, numerical modeling, applied statistical methods) or pure quantitative methods (e.g., mathematics or statistics); or social or natural science
3. Facility with written argument and communication. This skill is demonstrated in the letter of application

The program is governed by the steering committee for Environmental Management.

The certificate's courses and projects prepare students to contribute legal, scientific, social science, and technical expertise to environmental decision making at the local, national, and international scales. Students are required to broaden their knowledge and skills base beyond their home discipline; to read material from other fields with critical facility; to understand and appreciate the goals and analysis methods common to other fields; and to appreciate, communicate with, and collaborate with experts from other fields, who have different perspectives and priorities.

Certificate Requirements

Minimum 20 credits, to include:

1. *Three Core Courses (9+ credits)*: Courses vary by year
2. *Team-based Keystone Project (8 credits)*: ENVIR 511, ENVIR 512
3. *Electives (3+ credits)*: Selected in consultation with the Graduate Program Coordinator and approved by the EM director

Graduate School

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

GRDSCH 200 Preparing for Graduate Education (2) Explores graduate education and its structure and organization. Students use interactive assignments, individual reflective work, and professional portfolio development to explore their preparation for graduate education, and develop strategies for pursuing graduate school. Credit/no-credit only.

GRDSCH 525 Interactive Theater as Pedagogy (3) Students build skills in social change interactive theater to challenge institutional oppression, advance community dialogue, and promote inclusive educational environments. Emphasizes political education; storytelling; collaborative playwriting; rehearsal of plays and interventions; discussion; and self-reflection. Culminates in student-organized, public interactive theater performance and dialogue workshops. Previous acting experience not required.

GRDSCH 610 Teaching Mentorship (3, max. 6) Individualized project, under the direction of a faculty member, focused on issues of teaching and learning at the college/university level and designed to enhance the student's ability to make innovative contributions in teaching. Prerequisite: permission of faculty member, graduate program coordinator, and the Associate Dean of the Graduate School. Credit/no-credit only.

GRDSCH 615 Teaching Assistant and Research Assistant Preparation (1-6, max. 6) Instruction and teaching, learning, research, and resources for teaching and research assistants. Credit/no-credit only.

GRDSCH 620 Teaching Mentorship Seminar (2) Credit/no-credit only.

GRDSCH 630 Special Topics in College/University Teaching (2, max. 6) Interdisciplinary discussion of topics related to college/university teaching, with an emphasis on innovative teaching and preparing for faculty careers. Designed to address topics across disciplines, as a complement to discipline-specific courses offered in departments. Credit/no-credit only.

(206) 543-8778

mhaph@uw.edu

The graduate program in Health Services Administration offers two tracks for earning a Master of Health Administration (MHA) degree: a traditional day program (MHA) and an executive program (EMHA).

Accredited by the Commission on Accreditation of Healthcare Management Education (CAHME), the MHA provides the educational foundation for careers in management, planning, consulting, and policy-making in ambulatory care organizations, hospitals, long-term care facilities, mental health care organizations, government agencies, planning agencies, and other organizational settings in the health-care field.

Interdisciplinary by design and innovative in its approach to curriculum delivery, the program develops leaders prepared strategically and effectively to transform healthcare organizations and systems at the local, regional, and national level. The MHA program's interdisciplinary priority is evidenced by faculty that has been assembled from the graduate schools of Public Health, Foster School of Business, Public Affairs, Nursing, Medicine, and Law, as well as from the community of healthcare administration leaders in the Seattle metropolitan area.

Concurrent degree programs combining health administration with business, medicine, law, public health, or public administration are also an option for in-residence students. Many concurrent programs can be completed in three years of intensive academic study.

For in-residence MHA students, the two-year academic experience is augmented by a career development program with opportunities for mentorships with regional healthcare leaders, an internship experience in a health facility or agency -- typically under the preceptorship of the administrator or director of that organization.

The Executive Master of Health Administration (EMHA) is designed primarily for mid-career physicians and other clinical practitioners, as well as experienced health services

managers, who have demonstrated interest or competency in administration or management. Best-practice healthcare is a team process, and the team-based learning model, especially emphasized in year one, positions students for leadership roles within such an environment. Executive students build critical competencies while benefiting from the broad expertise already held among the working professionals in the classroom. EMHA classes convene in Bellevue, Washington, for a three-day period (Thursday through Saturday) once each month for 24 months. Additionally, once each week faculty lead students in a web-based session, ideal for practicing professionals who plan to continue their careers while gaining a graduate degree.

Both the MHA and EMHA programs operate under a fee-based structure and are administered in collaboration with UW Professional & Continuing Education. Complete application details can be viewed at www.mha.uw.edu and www.executivemha.edu.

Financial Aid

Students enrolled in both the MHA and EMHA programs are eligible for federal financial aid, as well as most other types of financial support that are not funded by state tuition revenues. When exploring financial aid options, students should emphasize they are applying for a fee-based program. Financial aid questions should be directed to the UW Office of Student Financial Aid (206) 543-6101, osfa@uw.edu.

Human-Computer Interaction Design

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsat/.

HCID 510 Designing Interactive Systems (3) Covers issues relating to the design and interactive technologies, favoring design thinking in lieu of implementation concerns. Skills include design processes, design rationale, adductive reasoning, structured brainstorming, design techniques, and design critiques.

HCID 511 Ideation Studio (5) Introduces student to ideation: the systematic process of generating design ideas, developing idea variations, and identifying ideas that open promising design directions; with hands-on exercises that give students the skills to participate in and lead ideation processes on their own.

HCID 520 User Interface Software and Technology (3) Covers fundamental skills in user interface prototyping and implementation, including tools for low and high fidelity prototyping, software architectures for implementing graphical user interfaces on desktop and mobile platforms, and the toolkits that use these software architectures.

HCID 521 Prototyping Studio (5) Examines user-interface prototyping as a foundational skill in user-centered design. Introduces the tools and uses hands-on exercises to enable students to create and refine user-interface prototypes as part of a design process.

HCID 530 Usability and User Research (3) Teaches concepts on engaging with users in the context of a technology design project. Covers both empirical and analytic evaluation techniques. Methods include user interviewing, in-lab usability testing, field deployments, heuristic evaluation, and cognitive walkthrough.

HCID 531 Evaluation Studio (5) Teaches concepts related to conducting user research and usability evaluations. Introduces students to the methods and hands-on exercises

that will enable them to determine user needs and usability and acceptability of interactive system designs.

HCID 540 Capstone Planning (1) Students conduct initial research on topic themes, learn to form effective project teams, and identify appropriate industry sponsors, delivering formal project proposals. HCID students only. Offered: W.

HCID 541 Capstone Studio (8) Team-based capstone design an interactive product relevant to industry challenges. Students apply iterative design, prototyping and research techniques in an studio format, with peer, faculty, and industry sponsor reviews of deliverables, culminating in a portfolio presentation documenting process and final solutions. Studio content supplemented by demonstrations and guest lecturers.

HCID 590 Design, Use, Build Seminar (1, max. 10) Covers the latest research in human-computer interaction and design, through talks by both UW and outside researchers. Credit/no-credit only. Offered: AWSpS.

HCID 598 Special Topics (1-5, max. 6) Studies of emerging areas and specialized topics in human-computer interaction and design.

HCID 599 Special Projects (1-5, max. 6) Individual graduate projects in human-computer interaction and design.

Molecular and Cellular Biology

The Molecular and Cellular Biology program (MCB) is a leader in applying the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The goal of the doctoral program is to broadly train students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. This program is appropriate for students interested in future careers in research and teaching in academia as well as biotechnology and pharmaceutical companies.

Twelve departments across three schools have faculty members actively pursuing research in molecular and cellular biology. The departments participating in the program include Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genome Sciences, Immunology, Microbiology, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics.

At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of basic sciences and molecular medicine participate in the joint Molecular and Cellular Biology graduate program. Shared FHCRC facilities are available for electron microscopy, flow cytometry, tissue culture, and image analysis. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide further support for the research effort.

Recently the MCB Program has established relationships with the Institute for Systems Biology (ISB) as well as Seattle Biomed. These collaborations allow MCB students access to labs conducting research using a systems approach to biology or a global focus on infectious disease.

Faculty Interests

Over 250 faculty members from the UW, the FHCRC, the ISB, and Seattle Biomed are researching molecular and cellular biology and are skilled in the training of graduate students. Faculty research interests are categorized into eight areas of interest: cancer biology; genetics; genomics and evolution; microbiology, infection and immunity; mo-

molecular structure and computational biology; and neuroscience.

GRADUATE PROGRAM

Graduate Program Coordinator

T466 Health Sciences, Box 357275

(206) 543-0253

mcb@uw.edu

Doctor of Philosophy

Admission Requirements

1. Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.
2. GRE scores. General Test. A Subject Test (e.g., biology, biochemistry, chemistry) is not required but recommended.
3. Letters of recommendation
4. Statement of purpose
5. Personal resume

Degree Requirements

90 credits, including:

1. *Credit Requirements:* MCB students complete 21 graded credits of coursework with 9 credits of the CONJ series and 12 credits of graded elective courses. M.S.T.P. students receiving a Ph.D. through the MCB Program are required to have 18 graded credits, and should petition the MCB directors to accept medical school courses in lieu of the remaining 3 credits.
2. *First Year:* Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes six five-week modules of the MCB conjoint series, three lab rotations, three quarters of literature review and one or more graded elective classes. Following the third rotation, students generally choose a permanent adviser in whose lab they pursue research for the rest of their educational career, generally three to four years. During the summer, students complete the biomedical research integrity lecture series.
3. *Second Year:* Students form their doctoral Supervisory Committee by the end of December, define their doctoral projects, take additional elective courses, participate as teaching assistants for a minimum of one quarter, complete either a second academic teaching assistantship or an alternative education experience, and hold their first committee meeting.
4. *Third Year and Beyond:* By the end of spring quarter of the third year, the student completes the general examination and is conferred official Ph.D. candidacy by the Graduate School. The student then focuses on the dissertation research and continues to meet with the Supervisory Committee each spring quarter to report on research progress and plans for the coming year. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of the final examination and acceptance of the completed dissertation by the Graduate School, a student is conferred the degree of Doctor of Philosophy.

Financial Aid

The MCB Program provides a stipend plus tuition and health benefits for the first year of study. At the end of the first year of study, students choose a doctoral committee, and subsequent years of support are provided by the de-

partment of the committee chair. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

MCB 511 Cell Cycle Control (3) Breeden, Roberts, Edgar Studies recent advances in understanding cell-cycle control, arising from genetics and biochemical studies of fission and budding yeast, marine invertebrates, *Drosophila*, amphibians, and cultured cells. Addresses the biochemical processes and molecular interactions and the rate-limiting events in the cell cycle, and the coupling of those events to physiological signals. Offered: A.

MCB 512 Scientific Speaking Seminar (1.5) Biggins, Peichel Teaches how to effectively give a scientific seminar about research. Offered: jointly with CONJ 512; W.

MCB 513 Development Journal Seminar (1, max. 12) Moens, Soriano, Swalla Examines current literature about specific topics in developmental biology. The seminar chooses current monthly topics and the group meets weekly to discuss published research papers. Topics may include: germ cell specification; cell migration and morphogenesis; axis formation; somitogenesis and stem cells. Offered: AWSp.

MCB 514 Molecular and Cellular Biology Literature Review (2) Raible Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology program.

MCB 515 Molecular and Cellular Biology Literature Review (2) Emerman Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: W.

MCB 516 Molecular and Cellular Biology Literature Review (2) Emerman Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: S.

MCB 517 Topics in Molecular and Cellular Biology (1-5, max. 12) Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty and invited speakers involved in research in this area. A basic knowledge of principles of molecular and cellular biology assumed.

MCB 519 Topics in Cancer (1, max. 6) Examination of ways to integrate basic, clinical, and public health sciences to increase understanding of human biology and disease. Seminars in introduction to cancer research as viewed by basic, clinical, and public health sciences, origins of cancer, cancer prevention, cancer progression, and therapies for cancer. Credit/no-credit only.

MCB 520 Tutorial in Molecular and Cellular Biology (1-2, max. 2) Emerman Special topics reading and discussion. Offered: A.

MCB 522 Development I: The Developmental Basis of Human Disease (3) Moens Uses recent discoveries in human genetics to guide student learning about animal development. Explores the normal developmental function of genes that have been identified as causal in human developmental disorders such as skeletal dysmorphologies, ciliopathies, autism, and cancer. Offered: A, odd years.

MCB 529 Cell Migration (1.5) Cooper, Moens Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated by the migrating cell. Offered: jointly with CONJ 529; W.

MCB 532 Human Pathogenic Viruses (3) Emerman Replication, regulation, and pathogenesis of several groups of human viruses, including human immunodeficiency virus and papillomaviruses. Emphasis on the unique aspects of the viral-like cycles as they relate to effects on infected cells and organisms. Guest lecturers focus on viral immunology, measles, herpes simplex virus, and HHV-8. Offered: A.

MCB 533 Evolutionary Genetics and Genomics (3) Malik, Peichel Introduces classic concepts and approaches in evolutionary genetics. Familiarizes students with genomic approaches, tools and resources, and demonstrates how evolutionary approaches and modern genomic tools are brought to bear on important biological questions. Offered: A.

MCB 539 Biological Basis of Neoplasia (3) Kemp, Zarbl Introduces the major themes in research in the biology of neoplastic change. Covers principle molecular mechanisms responsible for tumor initiation and progression, with a specific emphasis on intracellular signaling, DNA repair, cell cycle checkpoints, and loss of normal tissue homeostasis. Offered: Sp.

MCB 540 Nucleic Acid Enzymes (1.5) Stoddard Surveys a wide variety of enzymatic process that control the structure and modification of DNA and RNA, with particular focus on structure, function and mechanism. Unifying features of major reaction types (such as phosphoryl transfers and base modifications) constitute core material. Offered: W.

MCB 543 Logic Constructs and Methodologies of Biological Research (3) Explores the logic and methods of general scientific practice, from historical, logical, and practical points of view. Covers philosophical and methodological matters upon which there is consensus, and cutting issues of ongoing controversy. Includes both theoretical and practical application of scientific method.

MCB 560 Biotechnology Externship (2-12, max. 12) Moon Supervised research in a biotechnology company. Prerequisite: permission of instructor and doctoral candidacy. Offered: AWSpS.

MCB 580 Teaching Practicum in Molecular and Cellular Biology (2, max. 4) Supervised training in the teaching of molecular and cellular biology. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MCB 599 Introduction to Research in Molecular and Cellular Biology (*, max. 20) The student rotates through one research laboratory involved in the Molecular and Cellular Biology Program per quarter. Open only to first-year students in the Molecular and Cellular Biology Program. Credit/no-credit only. Offered: AWSpS.

MCB 600 Independent Study or Research (*-)

MCB 700 Master's Thesis (*-) Offered: AWSpS.

MCB 800 Doctoral Dissertation (*-)

Molecular Engineering

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

MOLENG 510 Molecular Engineering Principles (3) Covers molecular aspects of condensed organic materials, particularly molecular and collective interactions and resulting interfacial forces, entropic phenomena and condensation to systems of higher complexity. Includes the exploration of molecular system constraints and the molecular origin of resulting macroscale properties. Provides introduction into computer modeling.

MOLENG 520 Seminar in Molecular Engineering (1, max. 30) Weekly seminars on current topics in molecular Engineering. Credit/no-credit only. Offered: AWSp.

MOLENG 599 Current Topics in Molecular Engineering (1-5, max. 30) M. SARIKAYA Readings, lectures, and discussions on topics of current interest in the field of molecular engineering. Offered: AWSpS.

MOLENG 600 Independent Study/Research (*) Study and research under the supervision of an affiliated faculty member.

MOLENG 800 Doctoral Dissertation (*) Study and research under the supervision of an affiliated faculty member.

Museology

GRADUATE PROGRAM

Graduate Program Coordinator

Burke Museum, Box 353010

(206) 616-8280

The museology graduate program is designed to provide the generalized training, knowledge, and skills necessary to pursue a professional career in museum work. The program is directed toward the training of a broad range of museum professionals interested in curation and management of collections in anthropology, art, botany, geology, history, and zoology as well as in interpretive programs and museum administration.

Courses include required core museology subjects as well as a range of classes offering students the chance to specialize in interest areas. Coursework is divided between the theoretical and practical aspects of museum operations. Classes take the form of lecture courses, seminars, special lectures by guest speakers, field trips, laboratory and collection management courses, practicums, and internships.

Practical experience, an essential component of the program, is provided by several museological institutions at the University of Washington, including the Thomas Burke Memorial Washington State Museum, the Henry Art Gallery, the Herbarium, the Arboretum, the Fish Collection, and the University Libraries. The Burke Museum acts as host of the museology program. Located on the campus of the University of Washington, the Burke Museum is Washington state's natural-history and anthropology museum, and is the oldest and largest natural-history museum in the Northwest. It has nationally and internationally ranked collections focusing on the anthropology, geology, and zoology of the Pacific region and Pacific Rim.

Master of Arts

Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications completed and postmarked on or before this date are reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

Degree Requirements

Minimum 36 credits

The museology graduate program takes two years to complete, consisting of six quarters of academic study and research. During the first year, students carry on average between 10 and 15 credits each quarter; during the second year, the number of credits may vary depending on research, practicum, and internship work. Students may enroll part time with permission from the program director

1. Minimum 36 quarter credits, including 27 course credits and 9 thesis or thesis-project credits, with at least 18 credits of coursework numbered 500 or above, including a thesis or thesis project
2. Minimum three quarters of full-time residence credit or part-time equivalent
3. Reading competence in one foreign language, if required by the student's supervisory committee because of the student's area of specialization
4. Internship in an off-campus museum or related agency approved by the supervisory committee prior to submission of the student's thesis or thesis project
5. Thesis proposal presented by the beginning of the fourth quarter of study
6. Oral examination, covering both the thesis topic and the field of museology in general, following submission of the thesis or thesis project
7. All degree requirements completed within six years.

The following courses are required of all students unless exempted by petition to the program coordinating committee or credited for relevant coursework completed at other universities: MUSEUM 580, MUSEUM 581; MUSEUM 583 or MUSEUM 584 or MUSEUM 585; MUSEUM 582, MUSEUM 598, MUSEUM 590, MUSEUM 593, MUSEUM 594, MUSEUM 595; MUSEUM 700 or MUSEUM 710. In addition, two or more courses are required in an academic discipline relevant to the area of specialization.

The museology program also offers a graduate certificate in museum studies as an option for graduate students in other degree programs at the University. To qualify, students must take a specified minimum set of key courses in areas that emphasize either collection research and management, or museum administration and interpretation, to include hands-on work experience. Information and application materials for the certificate can be obtained from the museology program office.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsclat/

MUSEUM 500 Introduction to Museology (5) Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics.

MUSEUM 524 Seminar in Museum Exhibition (5) Theory, methodology, and fundamental principles of museum exhibition process. Exhibition elements include planning, conceptual development, interpretation, design, production, installation, evaluation, and community impact of museum exhibitions. Application of exhibition principles through term exhibit project.

MUSEUM 528 Advocacy and Social Change (3) K. MORRISSEY Explore the ways museums have engaged in representing and advocating for social change and the implications of that engagement. Readings, discussion, and assignments consider the fragile and interesting boundaries between museums and society and the changing expectation of museums to contribute to the common good of society. Offered: A.

MUSEUM 540 Preservation and Management of Collections (5) Lecture and demonstration of fundamental principles of collection management issues, emphasizing collection management needs of museum collection of all types. Application of principles through integrated collection management lab experiences addressing concerns of artifact handling, cataloging, photo-documentation, storage, and registration.

MUSEUM 542 Preservation of Collections II (5) Lecture and demonstrations in the recognition and treatment of

museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel.

MUSEUM 544 Philosophy and Ethics of Museum Collections (3) Explores ethics and issues related to collections housed in contemporary museums, addressing collections of many types including tangible and intangible aspects. Explores the meaning of "preserving cultural/natural significance": what museums, zoos, aquaria, and botanical gardens preserve, what they do not preserve, for whom, and how.

MUSEUM 560 Museum Administration and Leadership (5) Principles and practices of museum administration and leadership. Organizational structures and policies; management and leadership theory; board issues; organizational conflicts; planning issues; collection concerns; financial constructs; professional standards; and museum/community relations from an organizational and management perspective.

MUSEUM 562 Legal Issues in Museums (4) Explores the legal issues faced by art and science museums. Topics include copyright/trademark law, how the First Amendment protects controversial exhibits, repatriating Native American remains and cultural artifacts, donor rights, art appraising, wartime looting, and the ongoing debate over stewardship and ownership of the world's natural and cultural resources. Offered: jointly with LAW E 562.

MUSEUM 566 Grant Writing in Museums (3) Students learn how to identify relevant grant funding opportunities for museums and determine the fit for a particular institution or project; gain familiarity with the components of a grant proposal; understand how proposals are reviewed, what funders typically look for, and the characteristics of a high quality grant proposal.

MUSEUM 570 Research Design and Museology Practice (4) K. MORRISSEY Prepares students to identify, interpret, analyze, and design research that advances the field of museology.

MUSEUM 574 Introduction to Museum Evaluation (3) Provides an introduction to the field of evaluation as it relates to museum practice. Introduces basic types, ethics, and practices of evaluation and practices them through readings, reflective fieldwork, mentorships, and discussions.

MUSEUM 575 Museum Evaluation Project I (3) N. VISSCHER Applies museological training in Museum Evaluation. Students participate in a quarter-long evaluation project, designed by instructors to further student skills in data collection, and provide an introduction to data management, analysis and presentation within a variety of museum settings. Credit/no-credit only. Offered: Sp.

MUSEUM 576 Evaluation Project II (3, max. 9) N. VISSCHER Applies museological training in museum evaluation. Includes design and implementation of a yearlong-long evaluation project, intended to further student skills in evaluation planning, outcome development, instrumentation design, data analysis, and reporting in a variety of museum settings. Prerequisite: MUSEUM 574; MUSEUM 575 Credit/no-credit only. Offered: AWSp.

MUSEUM 583 Directed Fieldwork in Museum Operations (1-5, max. 15) Application of general museological training in one or more areas of supervised operation areas, including registration, education, exhibition, development, marketing or public relations. Credit/no-credit only.

MUSEUM 584 Directed Fieldwork in Archaeological Collections (1-5, max. 15) Application of museological training in curation of archeological collections at the Burke Museum. Supervised work ranges from fundamental collection documentation and research to preventive conservation, storage, and other special curation projects. Prerequisite: MUSEUM 581.

MUSEUM 585 Directed Fieldwork in General Collections (1-5, max. 15) Application of museological training in the

curation of art, historic, botanical, geological, zoological, or other collections. Supervised work ranges from fundamental collection documentation and research to preventive conservation or storage, and other special curation projects. Credit/no-credit only.

MUSEUM 588 Special Topics in Museology (1-5, max. 15) In-depth examination of selected current issues within the field of museology.

MUSEUM 594 Seminar in Museum Education (5) Focus on museums as educational institutions with consideration of the place of education in the mission of museums, the educational role of museums compared to that of other institutions, the museum's diverse audiences and their needs, and the educational methods and techniques museums may employ in pursuing their goals.

MUSEUM 597 Directed Fieldwork in Audience Research (1-5, max. 15) *Morrissey, Satwicz, Visscher* Applies museological training in visitor studies gained from audience research coursework. Includes implementation of audience research and evaluation projects within a variety of local museums, zoos, and aquaria. Students develop and practice skills in data collection, analysis, and reporting of results. Prerequisite: MUSEUM 596. Credit/no-credit only. Offered: AWSp.

MUSEUM 599 Careers and Social Capital (3-5) *O'Donnell* Prepares students to transition from the academic community of a world-class university to a place of responsibility within a professional community that is committed to stewardship of the vast natural and created resources of our global communities and environments, including our stories, values, knowledge, mistakes, questions, and aspirations. Offered: Sp.

MUSEUM 600 Independent Study or Research ([1-10]-)

MUSEUM 601 Internship (1-15, max. 15) Faculty supervised off-campus internships in museums and allied institutions. Each internship is individually established and provides students with practical experience and the opportunity to apply and learn new professional skills. Prerequisite: permission of instructor.

MUSEUM 700 Master's Thesis ([1-10]-)

MUSEUM 710 Master's Project ([1-10]-, max. 10) Credit/no-credit only.

Near and Middle Eastern Studies

The interdisciplinary PhD program in Near and Middle Eastern Studies is designed for students who wish to pursue research with a comparative perspective in Near Eastern languages and literature: Arabic, Hebrew, Persian (or Dari or Tajik), Turkish and Central Asian Turkic languages; Near Eastern linguistics; Islamic topics, namely, Islamic law, history, institutions, theology, and mysticism; comparative religion: Judaism, Christianity, and Islam; and interdisciplinary investigations of modern topics using the social sciences. The program, administered by an interdisciplinary Graduate School faculty group, includes courses offered in the Department of Near Eastern Languages and Civilization, the Jackson School of International Studies, and other departments on campus. Students must take courses in both the humanities and social sciences.

Doctor of Philosophy

Graduate Program Coordinator
311 Loew Hall, Box 352192
(206) 543-6398

Admission Requirements

1. MA or equivalent in a discipline or field directly related to the proposed PhD work

2. Third-year competence in a regional language, and reading knowledge of a second language pertinent to the PhD research
3. Application deadline for autumn quarter admission is February 1. Application procedures are at www.grad.washington.edu/students/interdisciplinary/nme/application.shtml.

Degree Requirements

Minimum 90 credits

Specific coursework and areas of concentration are determined by the student's interests within the framework of the degree and satisfactory progress requirements listed below.

1. Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization; Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination administered by the program.
2. Within three years of admission, completion of two advanced courses in the humanities, one of which must be in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one of which must be in the Department of History. These courses are in addition to work the student may have done at the BA and MA level.
3. Within three years of admission, completion of a graduate seminar. Two graduate seminars are required if none was taken at the M.A. level.
4. A student is expected to have studied three languages, two of which must be regional languages and one of which must be a "Western" European language other than English, such as French, German, Italian, Russian, or Spanish. The student's Supervisory Committee decides whether a fourth language is required and whether the fourth required language is European or regional. Students pursuing language-related work may anticipate a fourth required language, whereas those pursuing social-science-related studies may not. Before the general examination (see below) may be taken, the student must complete the language requirements including the second-year level in a regional language different from the two languages offered at the time of admission if both were not regional languages.
5. Disciplinary method and theory requirements: For all students conducting fieldwork or working with documents, whether social science or humanities focused, and for all social science-oriented students, the following courses are strongly encouraged: (a) ANTH 550; and (b) POL S 491; or (c) their equivalents in appropriate disciplines.

For students doing humanities-oriented research but not conducting fieldwork, two method and theory courses in the appropriate discipline or disciplines (e.g., comparative literature, philosophy) are required.

6. *Disciplinary Core Courses:* Each student is required to take two disciplinary core courses in appropriate fields. Core courses (or field courses) survey the literature, methods, and theoretical issues involved in a broad field of inquiry, as opposed to elective topical courses, which cover a much smaller area. Core courses should be chosen according to the anticipated research interests and fields for preliminary examination of each student. For example, these core disciplinary courses might focus on comparative politics, comparative religion, feminist theory, ethnicity and nationalism, analysis of linguistic structures, seminar in cognitive anthropology, comparative legal institutions, or international political economy. Courses on a narrow field of inquiry (such as Arab-Israeli conflict) do not constitute field or core courses, though they may contribute to a student's general field.

PhD Examinations and Dissertation

1. Preliminary examinations, consisting of three written and an oral. The three written examinations include: area of specialization, theory and discipline, and a self-designated field, revolving around the student's interest. The oral examination, following the written examinations, is two hours in length and addresses all these areas.
2. General examination, consisting of a take-home part and an oral part.
3. Final examination, the PhD thesis defense.

Annual Review: A subcommittee of the Near and Middle Eastern Studies program faculty meets each spring to review the progress of all students in the PhD program. Either the chair of the student's committee, the program's graduate adviser, or the program's director informs students of the results of this annual review.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsat/

N&MES 800 Doctoral Dissertation (*-)

Neuroscience

Understanding the brain represents both a major scientific challenge and a wonderful research opportunity. Investigations into the mechanisms of neural function require an interdisciplinary approach using the knowledge base and techniques of anatomy, biochemistry, molecular biology, physiology, pharmacology, and the behavioral sciences. Neuroscientists and their students must use these different approaches in their research and training if they are to make inroads to solving the major questions in neuroscience.

The University of Washington has met this challenge by establishing the interdisciplinary graduate program in neurobiology and behavior. The laboratories of more than 120 faculty members in over 20 departments within the School of Medicine, College of Arts and Sciences, and College of Engineering have combined efforts to form the doctoral training program, continuing a long history of collaborative efforts that cross University boundaries.

The program is designed to allow students to obtain both broad training in the neurosciences and more intensive coursework in specific areas of interest. The program emphasizes flexibility and encourages students to take responsibility in the design of their own curriculum. Students have the opportunity to work with faculty whose interests span the breadth of neuroscience research. Graduates of the program are well prepared for a variety of careers involving academic, research, industrial, and public policy positions.

GRADUATE PROGRAM

Graduate Program Coordinator
T471Health Sciences, Box 357270
(206) 685-1647
neubehav@uw.edu

Doctor of Philosophy

Admission Requirements

1. Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees

emphasizing biology, physical or natural sciences, and mathematics are preferred.

2. GRE scores: general test required; subject test not required, but recommended
3. Minimum three (3) letters of recommendation
4. Statement of purpose and curriculum vitae
5. All must be submitted online via the Graduate School application process.

Applications received after the deadline are considered at the discretion of the directors.

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record, GRE scores (including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology), and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

Degree Program Requirements

90 credits, to include:

1. **Credit Requirements:** 20 graded credits of coursework with NEUBEH core curriculum and 10 credits of graded/ungraded elective courses approved by the curriculum committee chairs and the student's advisers.
2. **First Year:** Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes the NEUBEH 501, NEUBEH 502, NEUBEH 503, NEUBEH 504, NEUBEH 532, NEUBEH 559 series, three lab rotations, and three quarters of the seminar series and journal clubs. Following the third rotation, students generally choose a permanent dissertation adviser in whose lab they pursue research for the rest of their educational career, generally four to five years.
3. **Second Year:** Students form their doctoral Supervisory Committee by the end of winter quarter, define their doctoral projects, take additional elective courses, and participate in a teaching internship for a minimum of two quarters (or equivalent), and hold their first committee meeting.
4. **Third Year and Beyond:** By the end of autumn quarter of the third year, the student completes the general examination and is conferred official PhD candidacy by the Graduate School. The student then focuses on dissertation research and continues to meet with the Supervisory Committee annually. Annual student evaluations and progress reports are due each spring quarter. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of that examination and acceptance of the completed dissertation by the Graduate School, the student is conferred the PhD degree.

Admission Process

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record, GRE scores (including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology), and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

Financial Aid

The neuroscience program provides a salary with benefits (insurance plus tuition) for the first three quarters of study during rotations. Once the student has entered a dissertation laboratory, support is provided by the department of the dissertation adviser. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

NEURO 501 Introduction to Neurobiology (3) *Carlson* Survey of molecular, cellular, and developmental neuroscience, including gene regulation, the cytoskeleton, protein sorting in the secretory pathway, growth factors, and neurotransmitter receptors. Includes lecture discussion of original literature.

NEURO 502 Introduction to Neurobiology (5) *Sherk* Systems level survey of vertebrate system, focusing on sensory system, on motor system, and on neuroanatomy. Lectures cover topics in sensory and motor systems. Laboratory includes brain dissection and study of intact, projected, and sectioned brain and spinal cord. Emphasis is on human nervous system.

NEURO 503 Cognitive and Integrative Neurobiology (4) *Phillips* Survey of all aspects of neuroscience, including a discussion of higher neural processes like motivation, decision making, attention, learning, and memory. Lecture and discussion of original literature.

NEURO 504 Biophysics of Nerve, Muscle, and Synapse (3) *Sullivan* Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with P BIO 504.

NEURO 510 Seminar in Neurobiology and Behavior (0.5, max. 30) Biweekly seminar on current topics. Required for students in the graduate program in neurobiology and behavior and for students supported on Graduate Neuroscience Program Training Grant. Credit/no-credit only.

NEURO 511 Seminar in Advanced Neurobiology (1-3, max. 30) Weekly faculty lectures, student presentations, and discussions of past and current scientific literature in neurobiology and behavior.

NEURO 512 Readings in Advanced Neurobiology and Behavior (1-3, max. 30) Guided study of the primary literature of neurobiology and behavior. Emphasizes critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Credit/no-credit only.

NEURO 515 Teaching Practicum in Neurobiology and Behavior (3-6, max. 30) Supervised training in the teaching of neuroscience and related scientific topics. Prerequisite: graduate standing in the neurobiology and behavior graduate program and permission of the instructor. Credit/no-credit only.

NEURO 526 Introduction to Laboratory Research in Neurobiology (4, max. 30) Students become familiar with, and assist in, the performance of research on ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Prerequisite: first-year graduate students in neurobiology. Credit/no-credit only.

NEURO 527 Current Topics in Neurobiology and Behavior (1, max. 30) *Rieke* Presentation and discussion of current research provides exposure to diverse areas of neurobiology and behavior research. Prerequisite: graduate student in neurobiology and behavior program or permission of instructor. Credit/no-credit only.

NEURO 528 Computational Neuroscience (3) Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or permission of instructor. Offered: jointly with CSE 528.

NEURO 535 Research Opportunities in Neurobiology and Behavior (1)

NEURO 541 Neuroendocrinology (3) *Steiner* Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 180, BIOL 200, and BIOL 220; BIOC 440, BIOC 441, BIOC 442 or permission of instructor. Offered: jointly with P BIO 509; W, even years.

NEURO 545 Quantitative Methods in Neuroscience (3) *Rieke* Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection, and information theory. Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Offered: jointly with P BIO 545.

NEURO 548 Molecular Mechanisms of Synaptic Plasticity (2) *Barria* Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with P BIO 548; Sp, even years.

NEURO 550 Biophysics of Calcium Signaling (1) *Hille, Santana* Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531. Offered: jointly with P BIO 550; Sp, odd years.

NEURO 554 Motor Learning: Cellular and Network Mechanisms (1) *Fetz, Perlmuter* Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with P BIO 554.

NEURO 555 Sensory Receptors (1) *Detwiler, Rieke* Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with P BIO 555.

NEURO 556 Axon Pathfinding Mechanisms (1) *Bothwell* Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with P BIO 556.

NEURO 557 Ion Channel Gating (1) *Zagotta* Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with P BIO 557.

NEURO 559 Neurobiology of Disease (3) *Garden, Neumai, Weinstein* Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis,

anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/P BIO 559.

NEURO 561 From Biophysics to Neural Computation (2) Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Offered: jointly with P BIO 561; Sp.

NEURO 600 Independent Study or Research (*-) Credit/no-credit only.

NEURO 700 Master's Thesis (*-)

NEURO 800 Doctoral Dissertation (*-)

Nutritional Sciences

UNDERGRADUATE PROGRAM

Adviser

305 Raitt, Box 353410

(206) 221-8526

ugnutr@uw.edu

Minor

The minor provides a foundation of knowledge in the study of nutritional sciences, with a unique focus on the intersection of food, food systems, and population health. Students pursuing the minor are presented with a multidisciplinary perspective on the field of nutritional sciences, including its metabolic/biochemical, behavioral, and public health aspects.

Minor Requirements: 25 credits, to include the following:

1. NUTR 300, NUTR 302, NUTR 303, NUTR 490 (10 credits)
2. 15 credits of approved electives, see website for list
3. Minimum 13 credits from School of Public Health
4. Minimum 15 credits of upper-division courses
5. Minimum 15 credits taken outside student's major requirements
6. Minimum 15 credits in residence through the UW
7. Minimum 2.0 cumulative GPA for courses applied toward the minor

GRADUATE PROGRAM

Graduate Program Coordinator

305 Raitt, Box 353410

(206) 543-1730

nutr@uw.edu

Nutritional Sciences is an interdisciplinary program in the School of Public Health that offers Master of Science (MS), Doctor of Philosophy (PhD), and Master of Public Health (MPH) degrees. The program is designed for the needs of students with a strong science background who wish to pursue (1) advanced training in nutritional science or clinical research, (2) advanced training in nutritional epidemiology and diet-disease interactions, or (3) training in public health nutrition practice.

The Graduate Coordinated Program in Dietetics (GCPD) combines the MS, MPH, and PhD programs with a supervised practice experience (internship equivalent), which gives students eligibility to take the national registration examination to become a Registered Dietitian (RD). The GCPD includes additional coursework and a nine-month

practice experience at regional community, clinical, and food service facilities.

Principal areas of study are biochemical and molecular nutrition, community or public health nutrition, food safety, nutrition and chronic disease, and clinical nutrition. Members of the core faculty represent the School of Public Health, the Fred Hutchinson Cancer Research Center, and the School of Medicine. The program also draws on a larger group of affiliate and clinical faculty from the College of Arts and Sciences, Schools of Medicine and Nursing, other units on campus, and from affiliated institutions in the Seattle area.

All students begin working on a research project under the supervision of an appropriate faculty member in the early stages of their graduate experience. Public health field placements, which follow the first year of required coursework, are an integral part of the MPH curriculum.

Students have access to faculty mentors and research facilities through the Medical Center, the South Lake Union Research Hub, and the Fred Hutchinson Cancer Research Center. Clinical facilities include UW Medical Center, Harborview Medical Center, Northwest Kidney Center, Seattle Children's hospital, Seattle Cancer Care Alliance, Northwest Hospital and Medical Center, Valley Medical Center, and the Center for Human Development and Disabilities.

Students may apply to the graduate degree program after completing a bachelor's or a master's degree. Prerequisite coursework in nutrition, chemistry, biochemistry, and human physiology is required. Students who wish to supplement their degree program with the Academy of Nutrition and Dietetics -accredited GCPD must also complete prerequisite coursework in microbiology, psychology, food science, and English. Students who have completed a didactic program in dietetics may apply to the graduate program and the GCPD.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

NUTR 200 Nutrition for Today (4) NW Examines the role of nutrition in health, wellness, and prevention of chronic disease. Topics include nutrients and nutritional needs across the lifespan food safety, and food security, wellness, body weight regulation, eating disorders, sports nutrition, and prevention of chronic disease. May not be taken for credit if credit earned in NUTR 300. Offered: AW.

NUTR 300 Nutrition for Today (3) NW *Averill, Kirk* Science of nutrition as it relates to individual food choices, health behaviors, public health. Health topics include wellness, obesity, eating disorders, sports nutrition, prevention of chronic disease. Nutrients and nutritional needs across the lifespan. Issues facing society including food safety, biotechnology, use of supplements and botanicals. Offered: AW.

NUTR 302 Food Studies: Harvest to Health (3) I&S/NW *Otten* Examines the many facets of the modern food supply from production and processing to distribution, marketing, and retail. Systems approach to foods studies considers geopolitical, agricultural, environmental, social, and economic factors along the pathway from harvest to health. Prerequisite: NUTR 200. Offered: Sp.

NUTR 303 Neighborhood Nutrition (3) NW *Drewnowski* Examines the food environment in the local community from the public health perspective. Explores where people get their food, what influences this decision and various aspects of the local food movement including access to healthy food, urban agriculture, farmers markets, and farm-to-school programs. Prerequisite: NUTR 200. Offered: W.

NUTR 310 Nutrition and the Life Course (4) NW Explores nutrient needs from infancy through adolescence and adulthood, including the physiological basis of nutrient requirements and the genetic, social, and environmental influences on food choices and nutrition status. Uses an evidence-based approach to assess the impact of nutrition across life stages and ways to improve population health by improving nutrition. Prerequisite: NUTR 200.

NUTR 400 Nutrition Seminar (1, max. 4) I&S *A. DREWNOWSKI* Examines emerging issues in food and nutrition as they relate to personal and public health. Reviews evidence in the context of health policy. Credit/no-credit only. Offered: AW.

NUTR 405 Physical Activity in Health and Disease (3) NW *Duncan* Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 220. Offered: Sp.

NUTR 406 Sports Nutrition (3) NW *Kirk* Covers the essentials of human nutrition that improve and sustain optimal performance for sport and exercise. Discusses the effect of eating disorders (in both male and female athletes), weight management, and sport nutrition resources. Prerequisite: NUTR 200. Offered: Sp.

NUTR 411 Diet in Health and Disease (3) QSR Discusses advanced topics in nutritional sciences. Includes nutrition and health, chronic disease prevention and management, and in-depth discussion of dietary patterns. Draws on current topics in the media, impacts of public health policy on diet, and the most recent nutrition research. Prerequisite: NUTR 200. Offered: Sp.

NUTR 412 United States Food and Nutrition Policy (3) I&S *Otten* Offers a broad introduction to food and nutrition policies in the United States and their impacts on population health. Real-world controversies and debates used to illustrate policy principles, research tools, and policy analysis. Includes topics on public health nutrition, food policy related to population health, and food security. Prerequisite: NUTR 200. Offered: A.

NUTR 420 Global Nutrition: Challenges and Opportunities (3) I&S *J. GORSTEIN* Examines global dimensions of malnutrition; its assessment and classification, along with global policies and programs to improve nutritional status in developing countries. Emphasizes global consequences of poor nutrition on health, cognition, and development with a focus on the first 1,000 days from conception to age two. Prerequisite: NUTR 200. Offered: A.

NUTR 446 Food Safety and Health (3) *Rosenfeld* Presentation of emerging issues in food safety and toxicology, microbiology, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international and national policies that promote regional solutions for a safe food supply and access to nutritious foods. Offered: W.

NUTR 465 Nutritional Anthropology (3) I&S/NW Examines the interrelationships between biomedical, sociocultural, and ecological factors, and their influence on the ability of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, and nutrition-related biobehavioral influences on human growth, development, and disease resistance. Prerequisite: BIO A 201. Offered: jointly with BIO A 465.

NUTR 490 Special Topics in Nutritional Sciences (1-5, max. 10) Examines emerging issues in nutrition. Reviews the evidence and potential policy implications.

NUTR 499 Undergraduate Research (1-5, max. 10) Independent study and research supervised by a faculty member with appropriate academic interest. Credit/no-credit only. Offered: AWSpS.

NUTR 500 Graduate Seminar: Current Issues in Nutrition (1, max. 4) A review of current topics in nutritional science and public health nutrition. Provides a forum for student and faculty presentation, and review of current research efforts. Prerequisite: graduate student in nutrition. Credit/no-credit only. Offered: AWSp.

NUTR 505 Physical Activity in Health and Disease (3) Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: human physiology. Offered: jointly with EPI 502; Sp.

NUTR 511 Survey of Advanced Nutrition (2-3) *Averill* Advanced introduction to nutritional sciences. Topics include macronutrient and micronutrient metabolism, energy balance and obesity, nutrient utilization in physical activity, nutritional needs and recommendations throughout the lifecycle, and the relationships between nutrition and atherosclerosis, diabetes, and cancer risk. Offered: A.

NUTR 512 United States Food and Nutrition Policy (3) *Otten* Offers a broad introduction to food and nutrition policies in the United States and their impacts on population health. Real-world controversies and debates used to illustrate policy principles, research tools, and policy analysis. Includes topics on public health nutrition, food policy related to population health, and food security. Prerequisite: NUTR 300. Offered: A.

NUTR 520 Nutrition and Metabolism I (3) *Rosenfeld* Metabolic/physiologic concepts related to energy balance, carbohydrate, and protein nutrition. Addresses energy producing pathways, as well as food sources, digestion, absorption, and utilization of carbohydrates, protein, and various micronutrients. Additional topics include low carbohydrate diets, vegetarianism, protein deficiency, and inborn errors in carbohydrate and protein metabolism. Prerequisite: biochemistry. Offered: A.

NUTR 521 Nutrition and Metabolism II (3) *Rosenfeld* Discussion of normal lipid components of animal tissues, with review of their metabolism and physiological functions. Topics include digestion, absorption, transport, and utilization of dietary fats, cholesterol, and fat-soluble vitamins. Discusses in-depth the roles played by lipids and various micronutrients in altering risk of atherosclerosis. Prerequisite: biochemistry. Offered: W.

NUTR 522 Nutrition and Metabolism III (3) *Rosenfeld* Advanced study of biologically essential minerals and vitamins. To include absorption, transport, function, storage, and excretion; imbalance, deficiency and toxicity; dietary structures; and role of these nutrients in prevention of diseases directly or indirectly. Prerequisite: biochemistry. Offered: Sp.

NUTR 526 Maternal and Pediatric Nutrition (4) Examines the influence of maternal, infant, and children's nourishment on growth, development, and health, including children with special healthcare needs, in both individual and population-based environments. Includes nutrition and assessment, critical evaluation of normative data, and evidence-based clinical and community nutritional care and family-centered care. Prerequisite: human nutrition and human physiology. Offered: A.

NUTR 527 Pediatric Nutrition (2-3) *Ogata* Addresses the influence of nourishment on growth, development, and behavior of children, including children with special health care needs, in both individual and population-based environments. Includes principles of nutrition and assessment, critical evaluation of normative data, clinical and community nutritional care, and family-centered care. Prerequisite: human nutrition and human physiology or permission of instructor. Offered: Sp.

NUTR 529 Nutrition Research Design ([1-3]-, max. 3) *Duncan* Critical review of selected nutrition literature. Evalua-

tion of experimental design, research protocols, data analyses, and data presentations. Prerequisite: BIOST 511. Credit/no-credit only. Offered: A.

NUTR 531 Public Health Nutrition (4) *Johnson* Explores the functions and essential services of public health as they apply to assuring access to a safe and nutritious food supply. Examines the practice of public health nutrition: nutrition environment, program planning, implementation, and evaluation; policy development, implementation, and evaluation; and links between basic science and public health nutrition practice. Prerequisite: introductory nutrition. Offered: W.

NUTR 532 Fieldwork in Public Health Nutrition (1-12, max. 12) *Lund* Experience and service learning in organizations that plan, deliver, and promote population-based nutrition education and nutrition services. Prerequisite: nutritional sciences graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

NUTR 536 Nutrition Education Principles and Practice (3) *Johnson* Examines theory-based design and delivery of nutrition education including conducting needs assessments and developing lesson plans, activities, visual aids, and evaluation material. Explores design features of written, oral, and technology-based nutrition education materials and initiatives. Addresses differing learning styles, cultural groups, and literacy levels. Offered: Sp.

NUTR 537 Laboratory Rotation (1-4, max. 6) Exposure to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to ongoing research for preparation of dissertation topics. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

NUTR 538 Nutritional Epidemiology (3) *Beresford, Kratz* Application of epidemiological methods to studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to design studies and read the literature in nutritional epidemiology. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: jointly with EPI 538; A.

NUTR 545 Food Safety and Health (3) Presentation of emerging issues in food safety, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods. Offered: jointly with ENV H 540; W.

NUTR 555 Nutrition in Developing Countries (3) *Gorstein* Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of under nutrition and micronutrient deficiencies. Offered: jointly with G H 555; Sp, odd years.

NUTR 559 Orientation to Clinical Dietetics Practice (3) *Averill* Provides an orientation to dietetics in clinical settings including the nutrition care process and integration of evidence-based practice. Offered: A.

NUTR 560 Nutritional Counseling for Chronic Disease (1-3) *Simon* Examines nutritional intervention strategies and counseling skills that pertain to chronic disease prevention and management. Builds knowledge and skills needed to create appropriate care plans and counseling strategies designed to meet individual client assessment/counseling situations. Offered: Sp.

NUTR 561 Graduate Coordinated Program in Dietetics (1-10, max. 35) *Lund* Focuses on the competencies for entry-level practice in dietetics. Includes supervised practice experience in wellness, public health, food services, ambulatory care, and clinical care. Prerequisite: GCPD students only. Credit/no-credit only. Offered: AWSpS.

NUTR 562 Nutrition and Chronic Disease (4) *Kirk* Epidemiology/pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes). Examines nutritional risk/protect-

tive factors in relation to public health, individual nutrition, and clinical intervention. Prerequisite: physiology, biochemistry. Offered: Sp.

NUTR 563 Nutrition in Acute Care (4) *Averill* Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, organ failure, burns, AIDS, and neoplastic disease. Examines specialized nutritional support and substrate requirements in the acute care setting. Prerequisite: either NUTR 562 or permission of instructor. Offered: A.

NUTR 564 Management of Nutrition Services (3) Examines healthcare policy and administrative issues that impact delivery of nutritional services in different healthcare settings. Topics include organizational behavior, productivity, project management, financial reporting, and human resources. Offered: S.

NUTR 590 Special Topics in Nutritional Science (1-4, max. 4) Examines emerging issues in nutrition. Reviews the evidence and potential policy implications. Prerequisite: permission of instructor. Credit/no-credit only.

NUTR 595 Nutritional Sciences Master's Practicum (1-12, max. 12) *Lund* Supervised practice experience providing students an opportunity to learn how nutritional sciences are applied to public health settings and in the formulation and application of public health policy. Prerequisite: HSERV 511; NUTR 531; EPI 511; NUTR 520; NUTR 521; NUTR 522. Credit/no-credit only. Offered: AWSpS.

NUTR 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

NUTR 700 Master's Thesis (*-) Credit/no-credit only. Offered: AWSpS.

NUTR 800 Doctoral Dissertation (*-) Credit/no-credit only. Offered: AWSpS.

Pathobiology

GRADUATE PROGRAM

Graduate Program Coordinator
310C Harris Hydraulics, Box 357965
(206) 543-4338
pathobio@uw.edu

The Pathobiology graduate program offers graduate training in the application of basic biomedical research to diseases of public health interest. The program of study involves core courses to develop a fundamental understanding of basic cellular and molecular processes and techniques important in the application of basic biomedical research to diseases; laboratory experience to learn how to collect, analyze, interpret, and use data for solving problems; and opportunities to develop skills in communicating research findings through oral and written presentations.

Master of Science

The master's program is designed for students to develop an understanding of the applications of molecular biology to public health, epidemiology, and cellular or antigenic analysis, and microbiology or immunology. The focus in this two-year program is developing basic research skills and understanding the scientific method. Students are expected to fulfill their course requirements during the first year. Under the guidance of a faculty research mentor, students propose and complete a thesis that includes an original research project.

Admission Requirements

Students are admitted directly into the PhD program. The department does not currently accept applications for the Master of Science.

Degree Requirements

A minimum of 60 credits as follows:

- 21.5 credits of required courses: PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1)
- Research Credits:** Sufficient credits of PABIO 600 and PABIO 700 to complete a research project.
- Electives:** Additional courses in pathobiology or the biomedical sciences may be taken to fulfill the graded course requirement, to encompass the interests of the student, or to fulfill any additional requirements set forth by the student's committee.

MS Thesis Research Proposal

The M.S. thesis research proposal should be done by the end of the fourth quarter of the first year and should contain the following, in this order:

- A brief synopsis of background relevant to the project.
- A summary of preliminary experiments.
- A description of experiments planned for the next year.

MS Thesis

The thesis must be provided to the MS advisory committee two weeks prior to the oral presentation. Corrections should be made following their review before submission of the document to the Graduate School.

MS Oral Presentation and Defense

Students give a formal seminar prior to the completion of the master's program.

Doctor of Philosophy

The doctoral program lasts four to five years and is designed for students to become capable of conducting independent research leading to the expansion of knowledge by developing skills to approach unfamiliar experimental systems and identify and explore important questions concerning pathogenesis and infection. Students develop familiarity with the paradigms for control, prevention, and treatment; develop an understanding of epidemiology and disease processes; learn basic methodologies used in this research including relevant areas of molecular biology, bacteriology, cell biology, virology, epidemiology, and biostatistics; and develop familiarity with the major classes of pathogens.

Admission Requirements

- Personal Statement:** The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of the student's background and readiness for graduate studies in pathobiology.
- One official set of transcripts from all collegiate institutions attended.
- Three letters of recommendation.
- Curriculum vitae
- Official Graduate Record Examination (GRE) scores
- International applicants are in addition required to submit official Test of English as a Foreign Language (TOEFL) scores. The Pathobiology program does not admit international applicants who have a TOEFL score of less than 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

Degree Requirements

90 credits minimum, as follows:

- Required Courses:** PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1), PABIO 598 (2), PABIO 500 (variable), PABIO 600 (variable), PABIO 800 (27); either IMMUN 441 (4) or IMMUN 532 (3).
- Students are required to attend Seminar (PABIO 580) and Journal Club (PABIO 581) every quarter of the academic year while enrolled, but may be excused for up to two quarters while writing the dissertation. Students give research presentations in the Graduate Research Symposium annually after the first year. 3 credits each of Seminar and Journal Club may be counted towards the degree.
- Electives:** The following are recommended tracks for elective credits:
 - Eukaryotic Pathogens:** PABIO 536, PABIO 548, CONJ 531 through CONJ 544, EPI 532, MICROM 444
 - Bacterial Pathogens:** PABIO 540, PABIO 568, EPI 520, EPI 529, MICROM 552, MICROM 555. (Students without a background in bacteriology are required to take MICROM 442 or an equivalent course as a prerequisite for entry into the Bacterial Pathogens track.)
 - Viral Pathogens:** Two or more of the following are strongly recommended: CONJ 531-CONJ 544, EPI 520, EPI 524, EPI 530, IMMUN 532, MICROM 540

Research Facilities

Research facilities are geographically dispersed and located in the Health Science Center of the School of Medicine, Fred Hutchinson Cancer Research Center, and Seattle Biomedical Research Institute. External support includes computer facilities and the Health Sciences Library with access to more than 345,000 volumes, 4,000 periodicals, and online bibliographic services for all national libraries of medicine and most commercial databases.

The Fred Hutchinson Cancer Research Center is a world-renowned research institution. Its mission for more than 20 years has been to eliminate cancer. Shared facilities are available, including electron microscopy, flow cytometry, tissue culture, image analysis, biotechnology center for DNA and protein synthesis and sequencing, animal facilities, biological production facility focused on monoclonal antibody production, extensive libraries, and a biocomputing center.

The Seattle Biomedical Research Institute is an independent nonprofit organization studying causes of and interventions to infectious diseases of worldwide impact, including targeted research producing leading-edge findings and applied research creating diagnostic tests and treatments.

Financial Aid

The department offers a twelve-month competitive salary, as well as paying tuition and health insurance, which includes medical, dental, and vision benefits. Students with satisfactory academic progress can anticipate funding for the duration of their studies.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

PABIO 498 Undergraduate Thesis (*)

PABIO 499 Undergraduate Research (*, max. 12)

PABIO 500 Introduction to Pathobiology Research (3-9, max. 15) Rotation through research laboratory. Credit/no-credit only. Offered: AWSpS.

PABIO 536 Bioinformatics and Gene Sequence Analysis (3) *T. ROSE* Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with BIME 536/PHG 536; Sp.

PABIO 548 Molecular and Cellular Parasitology (3) *Feagin* Molecular and cellular biology of parasites of health-related significance, emphasizing current research topics unique to parasites, particularly well-suited for study in parasites, and especially important to study in host-parasite systems. Prerequisite: familiarity with molecular and cellular biology and permission of instructor.

PABIO 551 Biochemistry and Genetics of Pathogens and Their Hosts (4) *L. Campbell* Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor. Offered: jointly with G H 566; A.

PABIO 552 Cell Biology of Human Pathogens and Disease (4) Cell biology and immunology explored through diseases of public health importance. Examples of pathogen interaction with host cell biology and immune systems, unique aspects of the cell biology of pathogens, perturbations of these systems in non-infectious diseases, and design of therapeutics and vaccines to combat diseases of public health importance. Prerequisite: undergraduate-level coursework in biology or molecular biology or permission of instructor. Offered: W.

PABIO 553 Survival Skills for Scientific Research (2) Focuses on skills needed for scientific career: writing abstracts, curriculum vitae, research proposals; preparing for oral presentations; lab management skills; discussion of mentorship/trainee relationships; case-based discussions of various topics in ethics and scientific misconduct. Credit/no-credit only. Offered: W.

PABIO 580 Pathobiology Seminar (1, max. 21) Research from students, faculty members, and invited speakers presented and discussed. Topics include immunochemistry, viruses, membranes, infectious diseases, immune response, and other related topics. Offered: W.

PABIO 581 Current Literature in Pathobiology (1, max. 15) Develops skills in analyzing data and assessing conclusions through an analysis of current literature in pathobiology. Focuses on breadth and analytical skills. Prerequisite: enrollment in the pathobiology graduate program.

PABIO 582 Critical Thinking and Research Design in Pathobiology (1.5, max. 12) *Lingappa* Analysis of issues, hypothesis and experimental design and testing. Prerequisite: graduate standing in pathobiology. Credit/no-credit only. Offered: Sp.

PABIO 590 Selected Topics (1-20, max. 20) Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format. Prerequisite: permission of instructor.

PABIO 598 Didactic Pathobiology (*, max. 12) Supervised teaching experience in pathobiology courses for PhD candidates. Prerequisite: permission of instructor.

PABIO 600 Independent Study or Research (*-) Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only.

PABIO 700 Master's Thesis (*-) Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only.

PABIO 800 Doctoral Dissertation (*-) Prerequisite: permission of Graduate Program Adviser. Credit/no-credit only.

Public Health Genetics

F363 Health Sciences Building
331 Raitt Hall, Box 353410

Public health genetics is an emerging field that applies advances in human genetics, genomics, and molecular biotechnology to improve public health and prevent disease.

Founded in 1997, the University of Washington's Institute for Public Health Genetics (IPHG) is a leader in the emerging field of public health genetics. Alone among U.S. universities, the UW, through IPHG, offers graduate degrees at both the master's and PhD levels.

The mission of the IPHG is to provide broad, interdisciplinary training for future public health professionals, to facilitate research in public health genetics, and to serve as a resource for continuing professional education.

GRADUATE PROGRAM

Graduate Program Coordinator
331 Raitt Hall, Box 353410
206-616-9286
phgen@uw.edu

Master of Science, Genetic Epidemiology

An interdisciplinary field that draws on training in epidemiology, genetics, and biostatistics and examines how genes and environmental factors interact to influence health and disease in human populations. Training in genetic epidemiology focuses on methods to identify genetic influences on human diseases and interactions with environmental exposures in populations, emphasizing applied research skills.

Admission Requirements

1. Statement of purpose
2. Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school
3. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
4. International applicants: official TOEFL scores
5. Three letters of recommendation from professors, supervisors, or others who know the student's work reasonably well. At least two letters should be academic references.
6. Recent copy of resume or curriculum vitae

Degree Requirements

68 credits minimum, to include:

1. **Required Courses:** PHG 511/EPI 517 (3), PHG 518/EPI 518 (4), PHG 519/BIOST 516/EPI 516 (3), EPI 573/ENV H 573 (3), PHG 512/LAW H 504/B H 514 (3); EPI 512 (4), EPI 513 (4); BIOST 517 (4), BIOST 518 (4); PHG 536/MEBI 536/PABIO 536 (3), GENOME 552 (1.5)
2. **Elective Courses:** Elective courses (excluding independent study and thesis credits) must be in epidemiology, biostatistics, genetics, public health genetics, or be related to the biological, physical, or social/behavioral factors which affect health, in particular ethical, legal and social issues related to genetic epidemiology.
3. **Thesis:** PHG 700 (9 credits minimum)

Master of Public Health, Public Health Genetics

Public Health Genetics is an emerging, interdisciplinary field that applies the rapid advances in human genetics, genomics, and bioinformatics to improve public health and prevent disease on a population basis. Training focuses on two core knowledge areas: genomics in public health (genetic and molecular epidemiology, pharmacogenetics, clinical aspects of genomics) and implication of genetics for society (ethics and social science, law and policy, health economics, and outcomes research).

Admission Requirements

1. Statement of purpose.
2. Official sealed transcripts, including courses, grades and degrees from all institutions attended after secondary school
3. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
4. International applicants: official TOEFL scores
5. Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.
6. A recent copy of the applicant's resume or curriculum vitae

Degree Requirements

63 credits, as follows:

1. **Required Courses:** 53 credits as follows: EPI 511 (4), BIOST 511 (4), HSERV 511 (3), ENV H 511 (3), HSERV 510 (3); PHG 511 (3), PHG 512 (3), PHG 513 (3), three of PHG 521 (3), PHG 522 (3), PHG 523 (3), PHG 525 (3), and PHG 542 (3); PHG 580 (6); PHG 595(3); at least 9 credits of PHG 700
2. **Electives:** Remaining 10 credits may combine approved elective courses, PHG 600 credits, and PHG 700 credits

Doctor of Philosophy

Public Health Genetics is an emerging, interdisciplinary field that applies the rapid advances in human genetics, genomics, and bioinformatics to improve public health and prevent disease on a population basis. Training focuses on two core knowledge areas: genomics in public health (genetic and molecular epidemiology, pharmacogenetics, clinical aspects of genomics) and implications of genetics for society (ethics and social science, law and policy, health economics, and outcomes research).

Admission Requirements

1. Statement of purpose.
2. Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school.
3. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
4. International applicants: official TOEFL scores
5. Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.
6. A recent copy of the applicant's resume or curriculum vitae.

Degree Requirements

90 credits minimum, to include:

1. Additional writing courses may be required. Students should consult their faculty adviser.
2. **Human Genetics:** Required -- PHG 551 or GENOME 565 (4); highly recommended -- GENOME 552 (1.5), PHG 536 (3)
3. **Public Health:** Required -- EPI 511 (4); BIOST 511 (4) or BIOST 517 (4); ENV H 511 (3); HSERV 511 (3)
4. **Core Knowledge Areas**
 - a. Genomics in Public Health: PHG 511 (3), PHG 513 (3), PHG 542 (3), PHG 580 (1)
 - b. Implications of Genetics for Society: PHG 512 (3), PHG 521 (3), PHG 522 (3) or PHG 523 (3), PHG 525 (3)
5. PHG 580 is required each quarter for all PhD students until they pass the preliminary examination.
6. **Preliminary Examination:** Following completion of required courses, usually taken at the end of the second year of study.
7. **Selective Courses for Core Knowledge Areas and Development of Dissertation Topic:** Once students begin to develop their dissertation project, they are expected to take at least nine additional units related to that project. Students need to work with their Supervisory Committee to identify selectives that are most useful in completing their dissertation. A list of example selective courses is available on the program website.
8. General examination
9. Dissertation
10. Final examination/dissertation defense

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

PHG 200 Implications of Public Health Genomics for the Modern World (3-5) I&S/NW P. KUSZLER Introduces the field of public health genomics through examples of genetic, ethical, political, and social issues emerging in the wake of the Human Genome Project. Students develop the skills to analyze and critique public health, clinical, personal, and social implications resulting from emerging genomic technologies. Offered: A.

PHG 301 Introduction to Genetic Epidemiology (3) I&S/NW Explores basic approaches that are used to identify genetic and environmental factors in health and disease, and how application of this information can be used to improve population health. Discusses the relevant ethical, legal, and social implications that occur in research and translation to practice. Offered: W.

PHG 302 Forensic Genetics (3) I&S/NW, QSR B. WEIR Introduces the field of forensic genetics through discussion of genetic and statistical issues emerging since the introduction of DNA profiling. Students develop the skills to interpret the evidence of matching genetic profiles; to perform calculations relevant for parentage determination; the identification of remains; and to consider the implications of familial searching of DNA databases. Prerequisite: either BIOST 310, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311, Q SCI 381, or Q METH 201. Offered: jointly with BIOST 302; W.

PHG 511 Genetic Epidemiology (3) Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511,

and GENOME 371, or equivalent. Offered: jointly with EPI 517; Sp.

PHG 512 Legal, Ethical, and Social Issues in Public Health Genetics (3) Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/LAW H 504; A.

PHG 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PCEUT 513; W.

PHG 519 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/EPI 516.

PHG 521 Culture, Society, and Genomics (3) B. MCGRATH Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/NURS 582; Sp.

PHG 523 Genetics and the Law (3) Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with LAW H 520; Sp.

PHG 536 Bioinformatics and Gene Sequence Analysis (3) T. ROSE Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with BIME 536/PABIO 536; Sp.

PHG 542 Genetic Discovery in Medicine and Public Health (3) Burke Addresses the implications of genetic science for clinical and public health practice, with an emphasis on health policy and ethics. Offered: jointly with B H 530; W.

PHG 551 Human Genomics: Science, Ethics, and Society (3) Fullerton Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Offered: jointly with B H 551/GENOME 573; A.

PHG 580 Interactive Seminar (1, max. 30) Lin Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Credit/no-credit only. Offered: jointly with LAW H 579; AWSp.

PHG 590 Selected Topics in Public Health Genetics (1-6, max. 6) Tutorials are arranged for a small number of students for in-depth examination of an area of public health genetics, usually of a current nature.

PHG 595 Master's Practicum (1-12, max. 12) Supervised practice experience providing students an opportunity to learn how genetics is applied in a public health setting and

in the formulation and application of public health policy. Prerequisite: practicum agreement.

PHG 600 Independent Study or Research (*-) Credit/no-credit only.

PHG 700 Master's Thesis (*-) Credit/no-credit only.

PHG 800 Doctoral Dissertation (*-) Credit/no-credit only.

Quantitative Ecology and Resource Management

The Quantitative Ecology and Resource Management (QERM) interdisciplinary graduate program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to develop or enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

GRADUATE PROGRAM

Graduate Program Coordinator

304 Loew Hall, Box 352182

(206) 616-9571

qerm@uw.edu

depts.washington.edu/qerm

The Quantitative Ecology and Resource Management (QERM) Interdisciplinary Graduate Program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to further enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, sociology, anthropology, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

Both a Master of Science and Doctor of Philosophy degree are offered; graduates are capable of continuing with the development and extension of biometrical and biomathematical modeling as they enter the educational, research, or private-sector work force.

Admission Requirements

1. Background in probability and mathematical statistics, linear algebra, and differential equations. Applicants with little or no statistical background are advised to take additional coursework prior to applying. Although not mandatory, this background makes a student's application more competitive.
2. Successful completion of the following coursework (or equivalent) prior to applying: MATH 126 (or equivalent); MATH 308 (or equivalent).

3. *Strongly Recommended:* MATH 394-MATH 395; STAT 341-STAT 342, or STAT 481.

4. Also taken into consideration:

- a. Minimum 3.00 GPA in last 60 semester or last 90 quarter credits required.
- b. Normally, completion of college-level courses in probability and mathematical statistics, linear algebra, and differential equations.
- c. Scores on Graduate Record Examination (GRE). Competitive applicants generally score above the 75th percentile on the verbal and analytic sections, and above the 85th percentile on the quantitative section.
- d. Minimum TOEFL score of 580 (237 for computer-based tests) - for international students only.
- e. Knowledge of the intended area of study, including clearly written statement of objectives.
- f. Recommendations from persons familiar with the applicant's academic ability and potential.
- g. Admission is also dependent on program resources and fit between student interests and faculty research. Students should explore faculty research interests by reviewing the QERM website, depts.washington.edu/qerm, to determine if their area of research interest is conducted at the UW. Students are not required to enter the QERM program with a faculty adviser selected in advance. Typically students identify their research and faculty adviser during their first year of study.

5. Application deadline for autumn quarter is January 1.

Degree Requirements (for Master of Science and Doctor of Philosophy)

Required coursework reflects the expectation that the student already has a fundamental understanding of the principles of statistical inference and ecological modeling. Required coursework taken during the first year includes:

1. STAT 516 and STAT 517
2. IND E 513 or IND E 599 (offered alternating years)
3. AMATH 523 or AMATH 535 (offered alternating years)
4. QERM 514 and QERM 597
5. SEFS 540
6. BIOL 567/SEFS 567/FISH 567
7. Ecology elective

Following the first year of core coursework, students select elective coursework in an area of emphasis ranging from biometry, mathematical modeling, and resource management. Additional elective coursework in basic biology and ecology gives students greater insight into the environmental systems in which they expect to apply their quantitative training.

Master of Science

Minimum 36 credits

Requirements for successful completion of the master of science degree include:

1. Successful completion of a minimum 36 quarter credits, including 27 course credits and 9 thesis credits, with at least 18 credits of coursework numbered 500 or above, including a thesis
2. Receipt of numerical grades in at least 18 quarter credits of coursework taken at the UW
3. Completion of a seminar on results of the research and oral defense of the thesis
4. Completion of all University requirements for graduation

Doctor of Philosophy

Minimum 90 credits

Requirements for successful completion of the doctoral degree, minimum of 90 credits, include:

1. Successful completion of the QERM qualifying examinations at the PhD level, following the first year of study
2. Successful completion of a minimum of 90-quarter credits, including 27 dissertation credits. Completion of an MS degree may be applied toward one year of the PhD program. The core QERM courses must be taken if the student has obtained an MS from a different program
3. A seminar on results of the research and an oral defense of the dissertation
4. Completion of all University requirements for graduation

Financial Aid

The QERM program offers incoming students a nine month fellowship funded by the Graduate School. Students secure their own funding starting at year two, typically in the form of a teaching or research assistantship. Tuition and health insurance are typically included as part of the financial package. Funding decisions are made annually; attempts are made to continue support for students making satisfactory progress.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

QERM 514 Analysis of Ecological and Environmental Data I (4) Overview of generalized linear models (GLMs), their use in forestry, fisheries, wildlife ecology, and environmental monitoring. Analysis of the statistical tests that fall under GLMs: chi-square tests on contingency tables, t-tests, analysis of variances, etc. Statistical software S+/R used throughout. Offered: Sp.

QERM 597 Seminar in Quantitative Ecology (2, max. 20) T. ESSINGTON Current topics in quantitative ecology and resource management. Fisheries, forestry, and marine resources. Offered: ASP.

QERM 600 Independent Study or Research (*-)

QERM 700 Master's Thesis (*-)

QERM 800 Doctoral Dissertation (*-)

Urban Design and Planning

The PhD in Urban Design and Planning at the University of Washington is one of 39 PhD programs in urban and regional planning in North America, and one of the oldest, founded in 1967. This program brings together faculty from disciplines ranging from architecture to sociology to focus on the interdisciplinary study of urban problems and interventions. Covering scales from neighborhoods to metropolitan areas, the program addresses interrelationships between the physical environment, the built environment, and the social, economic, and political institutions and processes that shape urban areas. The breadth of this program permits students to pursue doctoral studies in the various aspects of urban design and planning as well as in a number of related social science, natural resource, and engineering areas.

The program seeks to prepare scholars who can advance the state of research, practice, and education related to the built environment and its relationship to society and

nature in metropolitan regions throughout the world. It provides a strong interdisciplinary educational experience that draws on the resources of the entire University, and on the laboratory provided by the Seattle metropolitan region and the Pacific Northwest. The program emphasizes the educational values of interdisciplinarity, intellectual leadership and integrity, and the social values of equity, democracy, and sustainability. It seeks to promote deeper understanding of the ways in which public decisions shape and are shaped by the urban physical, social, economic, and natural environment. The program envisions its graduates becoming leaders in the international community of researchers, practitioners, and educators who focus on improving the quality of life and environment in metropolitan regions.

GRADUATE PROGRAM

Graduate Program Coordinator

311 Loew, Box 352192

(206) 543-6398

Doctor of Philosophy

Admission Requirements

Admission to the PhD program is based on evidence of promise of high scholarly achievement and research orientation. The applicant's statement of purpose, Graduate Record Examination (GRE) test results, letters of recommendation, and examples of past work constitute the basis for the admission evaluation.

Applicants typically have a master's degree in fields ranging from planning and public affairs to natural and social sciences. Students interested in a professional degree in urban design and planning should apply to the master's program in urban design and planning.

Application Deadline: All application materials are due by February 1. International applicants are encouraged to submit the Graduate School on-line application form by November 1.

For more information, see the program's website.

Degree Requirements

90 credits, divided into three phases.

Phase I: The Core Curriculum

The core curriculum defines the intellectual foundation of the program. While the program retains considerable flexibility in defining a research agenda within urban and environmental planning and policy, it provides a common foundation for all students to build upon. Students enter the program with a master's degree, in fields ranging from planning and public affairs to natural and social sciences. Depending on the academic preparation of the student, the core requirements can be met within one to two years.

Required Courses: Five courses, normally completed during the first year unless schedule conflicts make this infeasible. Courses from Phase II requirements may also be taken in the first year.

1. **Core Sequence:** URBDP 591, URBDP 592, URBDP 593
2. **Restricted Electives (before completion of Phase I):**
 - a. **Qualitative Research Methods:** One of the following: URBDP 598, GEOG 425, HIST 598, HSERV 526, POLS 493.
 - b. **Quantitative Research Methods:** One of the following: CS&SS 594, CS&SS 504, CEE 584

Phase II: Area of Study

Students develop with their Supervisory Committee a description of their proposed areas of study. These areas of scholarship must demonstrate an interdisciplinary research approach to an application within urban and environmental planning and policy. The description should develop a curriculum proposal approved by the Supervisory

Committee that addresses the following advanced study requirements:

Curriculum Requirements: Seven courses and a teaching seminar, in addition to advanced courses directly related to the area of study selected by the student. Some courses may be taken in the first year.

1. **Urban Processes and Patterns:** Three courses – For course options, see program website at depts.washington.edu/urbdpphd/Phase_II.shtml
2. **Research Design and Methods:** Two courses – For course options, see program Website at depts.washington.edu/urbdpphd/Phase_II.shtml
3. **Urban and Environmental Design and Planning:** Two courses – For course options, see program Website at depts.washington.edu/urbdpphd/Phase_II.shtml
4. **Teaching Methods:** One teaching seminar and experience as a TA for at least one quarter, before completion of Phase III.

General Examination: A critical review of the literature in the area of study, developed by the student, which integrates interdisciplinary research on that area of study and identifies areas of potential research opportunity that may subsequently form the basis for a dissertation proposal. The review should demonstrate broad familiarity with relevant research in the chosen area, and with the range of theory and methods applied within the reviewed literature.

Phase III: Dissertation

Once the student passes the general examination, he or she is advanced to the level of doctoral candidate, and is expected to build on the critical review of the literature to develop a dissertation proposal. The dissertation proposal should demonstrate the characteristics of interdisciplinarity, relevance to urban and environmental planning and policy, and potential for contribution to scholarship.

Financial Aid

The interdisciplinary PhD program in Urban Design and Planning attempts to provide funding for doctoral program applicants in a way that makes the program attractive to the strongest potential applicants, ensures their effective mentoring while in the program, and actively engages and energizes faculty to improve the program and to bring research funding to support students.

Interdisciplinary Undergraduate Degree Programs

Arctic Studies

The minor in arctic studies is sponsored jointly by the Jackson School of International Studies within the College of Arts and Sciences and the School of Oceanography in the College of the Environment. This interdisciplinary academic program links the natural, social sciences, and humanities in an integrated program of study. The purpose of the Arctic Studies minor is for undergraduates to have an opportunity to gain skills relevant to addressing major science and policy issues in the Arctic.

UNDERGRADUATE PROGRAM

Minor

503 Thomson, Box 353650

(206) 221-6374

nfabbi@uw.edu

Minor Requirements

Minimum 28 credits

1. Foundation Coursework (9 credits): ARCTIC 200; OCEAN 235; ARCTIC 401
2. Integrative Experience (3 credits): ARCTIC 400
3. Electives (minimum 16 credits): see adviser for approved list
4. Minimum two courses from the approved social sciences list
5. Minimum two courses from the approved sciences list
6. Minimum one course with North-Star designation; may be combined with social science or science elective offering
7. Minimum 2.00 cumulative GPA for courses applied to the minor
8. Minimum 15 credits taken from outside student's major requirements
9. Minimum 15 credits 300- and 400-level coursework
10. Minimum 15 credits completed in residence through the UW

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

ARCTIC 101 Elementary Inuktitut: Inuit Language (5) S. MALLON Fundamentals of oral and written modern Inuktitut, the Inuit language, including an introduction to the elements of Inuit culture. Offered: AS.

ARCTIC 200 Indigenous Diplomacies and International Relations in the Arctic (3) I&S Fabbri Provides an overview of current issues and geopolitics in the Arctic including those of the eight Arctic nation-states, six Permanent Participants (indigenous organizations) on the Arctic Council, and other non-Arctic nation-state interests. Offered: A.

ARCTIC 387 Study Abroad: Arctic Studies (1-5, max. 15) Relates Arctic geopolitics, indigenous internationalism, the arts, and/or natural sciences to the regions

and peoples of the circumpolar world. Equivalency for upper division Arctic minor of Jackson School course work taken on UW study abroad or direct exchange. Specific content varies and is evaluated on an individual basis.

ARCTIC 391 Climate Change - An International Perspective: Science, Art, and Activism (5) I&S/VLPA R. PAVIA Explores climate change science in the context of geographic, social, and political constraints, considering the role of art, activism, and Arctic indigenous peoples in communicating impacts and mitigation. Students gain knowledge in key atmospheric and ocean science principles along with the role of science in society Offered: jointly with JSIS B 391; Sp.

ARCTIC 400 Integrating Policy and Science in Arctic Studies (3) I&S/NW Gallucci, Hellmann Introduces Arctic resources and access from physical, biological, and political perspectives, focusing on the latter. Emphasizes political alliances among nation states as well as initiatives by indigenous peoples that involve mutual needs for access to Arctic resources for mining, transport, and food. Offered: Sp.

ARCTIC 401 Current Issues Concerning the Arctic Region (3, max. 9) I&S Addresses current issues impacting the Arctic region from the perspective of visiting scientists, social scientists, practitioners, and Arctic indigenous leaders. Offered: Sp.

ARCTIC 498 Special Topics in Arctic Studies (1-5, max. 10) Content varies by instructor.

Climate Science

The minor in Climate Science is offered jointly with the Department of Atmospheric Sciences, the Department of Earth and Space Sciences, and the School of Oceanography.

UNDERGRADUATE PROGRAM

Adviser

108 Oceanography Teaching Building, Box 357940 206-543-5039

student@ocean.washington.edu

Minor

Minor Requirements

25 credits as follows:

1. One of ESS 201, ATM S 211, or ATM S 321 (3-5 credits)
2. One of OCEAN 452/FISH 452, AMATH 301, Q SCI 381, or STAT 311 (3-5 credits)
3. *Integrated Capstone Experience*: ATM S 475/ESS 475/OCEAN 475 (3 credits)
4. *Science Electives*: At least one course from each focus area to include at least one course each from ATM S, ESS, and OCEAN. See adviser for list of approved courses (minimum 12 credits)
5. *Policy Elective*: One social science, policy, or energy course from an approved list of electives, to reach 25 credits
6. Minimum 2.00 cumulative GPA in courses applied to the minor
7. Minimum 15 credits taken through the UW
8. Minimum 18 credits outside student's major
9. Minimum 15 upper division credits
10. *Note*: Students are encouraged to take MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122, and PHYS 123, or see adviser to complete requirements for the minor.

Education, Learning, and Society

UNDERGRADUATE PROGRAM

Adviser

B507 Padelford

(206) 616-2352

elsminor@uw.edu

Minor

The minor in education, learning, and society, jointly sponsored by the College of Education and the College of Arts and Sciences, provides a strong background in how human beings learn, and how society, environment, and culture shape learning.

Minor Requirements

31 credits, to include:

1. *Learning and Development*: One from PSYCH 206 (prerequisite, PSYCH 101), PSYCH 306, NURS 201, EDPSY 302, EDPSY 406 (5 credits)
2. *Schooling and Society*: One from AES 340, CHID 210, EDUC 305, EDUC 310, SOC 292 (5 credits).
3. *Field Experience*: Any combination of EDUC 260, EDUC 360, EDUC 361, EDUC 369, GEN ST 346, and GEN ST 470 (with ELS adviser approval, student may substitute one of the following: GEN ST 350, ECFS 303, ECFS 304, ECFS 305, ECFS 454, ECFS 455, ECFS 456, EDC&I 499, EDPSY 499, EDSPE 499, CHID 497, or other related courses) (5 credits).
4. EDUC 299 (1 credit).
5. *Electives*: 15 credits from an approved list. For list, see adviser or College website.
6. Up to 15 credits of the minor may overlap with a student's major and up to 5 credits may overlap with another minor.

Undergraduate students from outside the College of Education may take courses offered to help them explore the field of education and prepare for graduate study. Fieldwork courses in local schools or social service agencies give students opportunities to make informed career and academic choices. Students may also complete prerequisites for graduate programs. Further, requirements to meet endorsement (subject) guidelines for secondary teaching may be completed by undergraduates.

Ethics

The Ethics program is an interdisciplinary minor sponsored by the Philosophy department.

UNDERGRADUATE PROGRAM

philadv@uw.edu

Minor

Minor Requirements

27 credits, to include:

1. Three courses from an approved list in which normative thinking and conceptual analysis of values and frameworks are central; at least one at the 300 level

- or above. See list at www.phil.washington.edu/POV/List_A_Courses.html
- Two courses from an approved list in which values-laden issues are central; at least one at the 300 level or above. See list at www.phil.washington.edu/POV/List_B_Courses.html
 - VALUES 495 (2-credit capstone).
 - Minimum 15 credits outside the student's major.
 - Minimum 15 credits completed through the UW.
 - Minimum 2.00 GPA in courses used for the minor.

Honors

211 Mary Gates Hall
uwhonors@uw.edu

The four-year University Honors Program features an interdisciplinary Honors core curriculum with a focus on experiential learning and reflection, Honors academic advising, foreign study programs and exchanges, and opportunities for independent study. It provides an academic community and educational opportunities to those students who are willing to take academic risks, think across disciplinary boundaries, and engage in experiential learning (e.g., research, leadership, community and/or international engagement).

To be considered for admission to the University Honors Program at entrance, students must apply to the Honors Program when they submit their Application for Undergraduate Admission to the University. "Selection is based on a student's demonstrated engagement with interdisciplinary learning, high school record, essay responses, a letter of recommendation, and fit for the program". Students also may seek admission based on their academic performance during their spring quarter of their freshman year at the University via the late admission process.

Students who are accepted into the University Honors Program in their freshman year and complete the Honors Core Curriculum alone graduate "With Interdisciplinary Honors." When students complete both the Core Curriculum and the Departmental Honors requirements in their chosen major, they graduate "With College Honors in Name of Major." Students who do not participate in or complete the Honors Core Curriculum but are admitted into and complete the Honors Program in their chosen major will receive a degree "With Honors in Name of Major." By special arrangement it may be possible for students to complete a degree "With College Honors" in departments, schools, or programs that do not offer a formal Departmental Honors option as well as Departmental Honors by itself.

Core Curriculum

47 credits as follows:

- HONORS 100 (1 credit)
- One Honors social science course (HONORS 230 series/HONORS 233/HONORS 397) (I&S; 5 credits).
- One Honors arts/humanities course (HONORS 210/HONORS 240 series/HONORS 213/HONORS 398) (VLPA; 5 credits).
- One Honors interdisciplinary course (HONORS 390 series/HONORS 381 series) (I&S, NW, VLPA; 5 credits)
- One Honors science course (HONORS 220 series/HONORS 223/HONORS 396) (NW; 5 credits).
- Combination of any five 4- or 5-credit Honors VLPA, I&S, NW courses and Honors prefix courses. (20-25 credits).
- HONORS 496 (1 credit)
- At least 15 credits of courses with the HONORS prefix, excluding HONORS 100 and HONORS 496.

- In at least one major in which the student is pursuing Interdisciplinary or College Honors, no more than three courses used in the major may apply toward the Honors core curriculum.
- Courses applying towards Departmental Honors may not be applied toward the Honors core curriculum.
- Students may fulfill no more than 15 credits of Honors core requirements by completing ad hoc projects in non-Honors course outside the major or by way of a non-Honors study abroad program. Ad hoc Honors courses with the appropriate Areas of Knowledge designation may replace the respective social science (I&S), arts/humanities (VLPA), or science (NW) course; ad hoc Honors courses may not replace the interdisciplinary course requirement.
- Minimum cumulative 3.30 GPA in all courses completed through the UW.

Departmental Honors

Students may apply to Departmental Honors in their major(s) after they have been admitted to the major, typically in their junior year. Each department at the UW has a unique set of Departmental Honors requirements. For links to specific information about each department, see the Honors Program Website.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

HONORS 100 Introduction to Honors Education (1) Introduces students to the essential features of the Honors Program, including interdisciplinary thinking, experiential learning, and the Honors portfolio. For University Honors Program students only.

HONORS 205 What We Know and How We Know It (5) C Helps students to develop methods of researching and gaining knowledge through critical reading of texts, dialogue, reflective writing, and visiting faculty lecturers from different disciplines. For University Honors Program students only.

HONORS 210 Humanities for Honors Students I (5, max. 15) VLPA Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For University Honors Program students only. Offered: A.

HONORS 211 Humanities for Honors Students II (5, max. 15) VLPA Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For University Honors Program students only. Offered: W.

HONORS 212 Humanities for Honors Students III (5, max. 15) VLPA Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For University Honors Program students only. Offered: Sp.

HONORS 213 Honors Foreign Study I - Humanities (2-5, max. 15) VLPA Coursework drawn from interdisciplinary groups in the arts and humanities. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 220 Science for Honors Students I (5, max. 15) NW Evolution of an idea or concept central to the natural sciences. Content varies from year to year. For University Honors Program students only. Offered: A.

HONORS 221 Science for Honors Students II (5, max. 15) NW Evolution of an idea or concept central to the natural sciences. Content varies from year to year. For University Honors Program students only. Offered: W.

HONORS 222 Science for Honors Students III (5, max. 15) NW Evolution of an idea or concept central to

the natural sciences. Content varies from year to year. For University Honors Program students only. Offered: Sp.

HONORS 223 Honors Foreign Study II - Natural Science (2-5, max. 15) NW Coursework drawn from interdisciplinary groups in the natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 230 Social Science for Honors Students I (5, max. 15) I&S Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For University Honors Program students only. Offered: A.

HONORS 231 Social Science for Honors Students II (5, max. 15) I&S Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For University Honors Program students only. Offered: W.

HONORS 232 Social Science for Honors Students III (5, max. 15) I&S Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For University Honors Program students only. Offered: Sp.

HONORS 233 Honors Foreign Study III - Social Science (2-5, max. 15) I&S Coursework drawn from interdisciplinary groups in the social sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 240 Fine Arts for Honors Students I (5, max. 15) VLPA Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For University Honors Program students only.

HONORS 241 Fine Arts for Honors Students II (5, max. 15) VLPA Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For University Honors Program students only.

HONORS 242 Fine Arts for Honors Students III (5, max. 15) VLPA Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For University Honors Program students only.

HONORS 345 Interdisciplinary Writing Seminar (5, max. 15) C Investigates emerging topics of interest in the arts and sciences and frames the investigation of subject matter through writing and dialogic inquiry within a particular field. Students discuss, revise, and reflect upon their work through peer review, in-class writing activities, and editorial feedback. For University Honors Program students only.

HONORS 350 Honors Seminar (2, max. 20) Discussion of selected topics in a variety of subject-matter fields. Topics and reading material vary from year to year. For University Honors Program students only. Credit/no-credit only.

HONORS 381 Honors Foreign Study IV (2-5, max. 15) VLPA/I&S/NW Develops ideas, concepts, or institutions that cut across the arts, humanities, social sciences, and natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 382 Honors Foreign Study V (2-5, max. 15) I&S/NW Develops ideas, concepts, or institutions that cut across the social sciences and natural sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 383 Honors Foreign Study VI (2-5, max. 15) VLPA/NW Develops ideas, concepts, or institutions that cut across the arts, humanities, and natural sciences. Specific content varies and must be individually evaluated.

440 INTERDISCIPLINARY UNDERGRADUATE DEGREE PROGRAMS

For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 384 Honors Foreign Study VII (2-5, max. 15) VLPA/I&S Develops ideas, concepts, or institutions that cut across the arts, humanities, social sciences. Specific content varies and must be individually evaluated. For University Honors Program students participating in a UW study abroad program only. Offered: AWSpS.

HONORS 391 Honors Interdisciplinary Study I (5, max. 15) VLPA/I&S/NW Develops ideas, concepts, or institutions that cut across the social sciences and natural sciences. For University Honors Program students only.

HONORS 392 Honors Interdisciplinary Study II (5, max. 15) I&S/NW Develops ideas, concepts, or institutions that cut across the social sciences and natural sciences. For University Honors Program students only.

HONORS 393 Honors Interdisciplinary Study III (5, max. 15) VLPA/NW Develops ideas, concepts, or institutions that cut across the arts, humanities, and natural sciences. For University Honors Program students only.

HONORS 394 Honors Interdisciplinary Study IV (5, max. 15) VLPA/I&S Develops ideas, concepts, or institutions that cut across the arts, humanities, and social sciences. For University Honors Program students only.

HONORS 396 Interdisciplinary Special Topics-Natural Science (1-5, max. 10) NW Special courses drawn from interdisciplinary groups in the natural sciences. Content varies. For University Honors Program students only.

HONORS 397 Interdisciplinary Special Topics-Social Science (1-5, max. 10) I&S Special courses drawn from interdisciplinary groups in the social sciences. Content varies. For University Honors Program students only.

HONORS 398 Interdisciplinary Special Topics-Humanities (1-5, max. 10) VLPA Special courses drawn from interdisciplinary groups in the humanities. Content varies. For University Honors Program students only.

HONORS 496 Integration of the Honors Core Curriculum (1) Allows students completing the Interdisciplinary Honors Program to reflect on and present to peers the intersection between their Interdisciplinary Honors core courses and experiential learning projects. For University Honors Program students only. Offered: AWSp.

HONORS 499 Honors Independent Study or Research (1-5, max. 10) Faculty supervised Honors independent study or research for students in areas extending beyond their major departments or along lines not otherwise accommodated by existing Honors courses. For University Honors Program students only.

Integrated Science

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsctat/

INTSCI 197 Special Topics in Integrated Sciences (1-5, max. 15) NW Selected topics in integrated sciences.

INTSCI 301 Integrated Sciences Seminar (1, max. 3) Covers contemporary issues in integrated sciences, science education, and science communication.

INTSCI 401 Integrated Sciences Practicum (2, max. 4) Provides the opportunity to explore professions in formal or informal science education, science writing, science policy, and other areas that require an integrated science perspective. Examples include weekly visits to a science

classroom or volunteer work at a science or natural history museum. Credit/no-credit only.

INTSCI 402 Nature of Science (5) NW Case study examination of scientific methods and elements of scientific practice including observation, data, statistics, interpretations, hypothesis, theory, and law. Asks how does science change; how does data support theories; and how are theories verified, falsified, or modified?

INTSCI 403 Science in Context (5) NW Case study examination of how science operates within broad social, political, and ethical contexts. Considers the growth of multidisciplinary and interdisciplinary research, societal impacts, ethical responsibilities, censorship, complex mechanisms of funding, and the power inherent in claims to knowledge.

INTSCI 491 Introduction to Research (2) NW Preparation for intensive "hands-on" science experience. Discussion of what constitutes scientific research; development of a research proposition; meeting with potential research supervisors; signed agreement with supervisor and capstone instructor on scope and details of research

INTSCI 492 Reflections on Research (2, max. 6) NW Reflections on an on-going science research experience through discussion, short papers, and oral presentations, with emphasis on the challenges and dilemmas that arise in data collection and analysis. Prerequisite: INTSCI 491; corequisite: registration in a departmental 498 research course. Offered: AWSp.

INTSCI 493 Communicating Research (3) NW Preparation of oral and written presentations of research, under guidance of the capstone instructor. Presentation on research in class and in another venue, such a scientific meeting or an on-campus symposium. Prerequisite: minimum of four credits of INTSCI 492. Offered: AWSp.

Marine Biology

The minor in marine biology is sponsored jointly by the College of the Environment and the College of Arts and Sciences, and is designed to immerse students in the study of marine organisms and ecosystems, starting in the freshman year. Because the experience of marine sciences cannot be taught entirely within the classroom, the minor is structured to provide ample opportunity for field work and research within the coursework.

UNDERGRADUATE PROGRAM

Adviser

116 Fishery Sciences Building, Box 355020

206-543-7426

marbiol@uw.edu

Minor

Minor Requirements

35 credits, as follows:

1. *Introductory Courses (19 credits):* FISH 250/OCEAN 250/BIOL 250; OCEAN 210; BIOL 180; Q SCI 381.
2. *Integrative Experience (3 credits):* See adviser for approved list of courses.
3. *Electives (13 credits):* Selected from an approved list available from a program adviser. Additional courses may be approved by program adviser. (A minimum of one elective course must be taken from each of the following units: aquatic and fisheries sciences; oceanography; and biology or Friday Harbor Laboratories biology - FHL prefix.)
4. Up to 17 credits may overlap with credits applied to a student's major and up to 5 credits may overlap with credits applied to another minor.

5. Minimum 15 credits in upper-division courses.

6. Minimum 2.00 cumulative GPA in courses presented for the minor.

Paleobiology

The minor in paleobiology is sponsored by the Department of Biology and is designed to provide students a solid foundation in the evolution and ecology of life in deep geologic time. In addition to classwork in paleontology, geobiology, astrobiology, and paleoanthropology, the minor provides opportunities for fieldwork and independent research.

UNDERGRADUATE PROGRAM

Adviser

318 Hitchcock Hall, Box 355320 206-543-9120

bioladv@uw.edu

Minor

Minor Requirements

Minimum 30 credits, as follows:

1. BIOL 354
2. *Electives:* Two from the paleobiology core content area and one from each of the three other content areas, selected from a list of approved courses available on the paleobiology website.
3. BIOL 483
4. *Integrative Experience in Paleobiology:* Minimum 3 credits from one of BIOL 475 or BIOL 499, ESS 499 or BIO A 499, at the discretion of the instructor
5. Remaining credits from any of the above or BIO A 369, BIO A 491, or an adviser-approved elective
6. Minimum 2.00 cumulative GPA for courses presented for the minor
7. Minimum 18 credits from outside the student's major.
8. Minimum 15 credits completed through the UW.

Interschool or Intercollege Programs

Bioengineering

N107 William H. Foege Building

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the healthcare system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as a leading bioengineering program in the world. Major areas of research and education include biomaterials and regenerative medicine, molecular and cellular engineering, technology for expanding access to healthcare, instrumentation, imaging and image-guided therapy, and systems, synthetic, and quantitative biology.

UNDERGRADUATE PROGRAM

Adviser

N107 William H. Foege Building, Box 355061

(206) 685-2000

bioeng@uw.edu

depts.washington.edu/bioe/programs/bachelors/bs.html

The Bioengineering program offers the following programs of study:

- The Bachelor of Science in Bioengineering degree
- The Bachelor of Science in Bioengineering degree with an option in nanoscience and molecular engineering
- A five-year BS/MS option (consult website or adviser for details)

Bachelor of Science in Bioengineering

Suggested First- and Second-Year College Courses: CHEM 142, CHEM 152, and CHEM 162; CSE 142, English composition, MATH 124, MATH 125, MATH 126, PHYS 121.

Department Admission Requirements

Admission is competitive. Students may be admitted at three different points. Consult the department's website for more information.

1. *Direct Admission.* The department enrolls up to 35 percent of its incoming class directly from high school. Students accepted to the UW who indicate bioengineering as their preferred major on their freshman application are considered. Strong applicants have completed chemistry, biology, and calculus in high school. Admission is for autumn quarter only.
2. *Early Admission.* Students enrolled at the UW are eligible to apply at the end of the freshman year if they have completed and earned at least a 2.50 GPA in the following courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; and 5 credits of English composition. A 2.50 GPA guarantees consideration but not admission. Application deadline is July 1 for autumn quarter admission.
3. *Upper Admission.* Requires 63 credits of coursework with at least a 2.50 GPA: MATH 124, MATH 125, and MATH 126; CHEM 142, CHEM 152, CHEM 162; CHEM 223 or CHEM 237; PHYS 121, PHYS 122; BIOL 180,

BIOL 200; AMATH 301; and 5 credits of English composition. Any of BIOL 180, PHYS 122, and AMATH 301 may be in progress at time of application. A 2.50 GPA guarantees consideration but not admission. Application deadline is February 1 for spring quarter. Consult the department's website or adviser for more details.

Nanoscience and Molecular Engineering Option (NME)

Admission to the NME option for bioengineering majors is by self-selection and normally occurs in winter quarter of the junior year, upon completion of all bioengineering prerequisites and formal admission to the BS bioengineering major. Students applying for the NME option should indicate that interest on their bioengineering major application and discuss their interests/background in their application personal statement.

Graduation Requirements

Students follow requirements in effect at time of entry into the department. 180 credits as follows:

General Education Requirements (105 credits)

1. *Areas of Knowledge:* 24 total credits in Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S), with at least 10 credits in each area.
2. *Written and Oral Communication (5 credits):* 5 credits of English composition, from the approved University list. Additional writing credits are built into the major core courses.
3. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126; either MATH 307 or AMATH 351; either MATH 308 or AMATH 352; STAT 390 or IND E 315
4. *Natural Science (44 credits):* CHEM 142, CHEM 152, CHEM 162 and CHEM 223 (or CHEM 237); PHYS 121, PHYS 122; BIOL 180, BIOL 200, BIOL 220
5. *General Electives (8 credits; 6 credits for the NME option)*

Major Requirements (75 credits)

1. *Engineering Fundamentals (4 credits):* AMATH 301
2. *Bioengineering Core (44 credits):* BIOEN 215, BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 401; either 10 credits of BIOEN 402, or 4 credits of BIOEN 403 plus BIOEN 404 and BIOEN 405.
3. *Bioengineering Senior Electives (15 credits):* Fifteen (15) credits from an approved departmental list, including completion of one of three concentration areas: Molecular and Materials Bioengineering: four courses from approved departmental concentration list. Cells, Tissue, and Systems Bioengineering: four courses from approved departmental concentration list. Diagnostics and Therapeutic Instruments: PHYS 123; four courses from approved departmental concentration list. See department for approved list.
4. *Approved Engineering Electives (9 credits):* Chosen from a departmentally approved list or from additional bioengineering senior elective credit. See department for approved list.
5. *Grade Requirements:* Minimum 2.0 grade in each bioengineering course applied to the major

Nanoscience and Molecular Engineering Option Requirements (77 credits)

1. *Engineering Fundamentals (4 credits):* AMATH 301
2. *Bioengineering Core (44 credits):* BIOEN 215, BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 401; either 10 credits of BIOEN 402 or 4 credits of BIOEN 403 plus BIOEN 404 and BIOEN 405
3. *Nanoscience and Molecular Engineering Courses (21 credits):* NME 220, NME 321, NME 421; minimum four additional approved nanoscience and molecular

engineering electives, to be chosen from an approved departmental list; additional senior elective credits as needed to total 15. The senior capstone (4-10 credits from BIOEN 402 or BIOEN 403) must be in an NME area.

4. Approved Engineering Electives: 5 credits

5. Minimum 2.0 grade in each bioengineering course applied to the major

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Bioengineering students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials. A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department's cutting-edge research. Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department's goal is to prepare students to be leaders and innovators in improving human health and healthcare. Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and biology; the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interactions between living and non-living materials and systems.
- *Instructional and Research Facilities:* The department is housed in the newly constructed Foege North building. Amenities include instructional laboratories, an advanced computing lab for class instruction and student use, a general computer lab for student use, a student work room, a seminar room, and meeting space. Departmental offices are also located in this building. Other laboratories are located in the College of Engineering and the School of Medicine. The Department of Bioengineering houses UWEB (University of Washington Engineered Biomaterials), participates in the Center for Nanotechnology, and sponsors many other research centers relating to our five thrust areas in computational bioengineering, distributed diagnosis and home healthcare, engineered biomaterials, medical imaging and image-guided therapy, and molecular bioengineering and nanotechnology.
- *Honors Options Available:* College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). Departmental Honors (see adviser for requirements). For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* Many undergraduate bioengineers are involved in internships. The department participates in the College of Engineering Co-op Program and maintains an internship website for majors.
- *Department Scholarships:* Several scholarships are available for majors.

- *Student Organizations/Associations:* The Biomedical Engineering Society (BMES), the campus chapter of the national professional organization, organizes social events as well as events that support student interest in medical school, graduate school, and industry.
- *Of Special Note:* Courses on technology commercialization are available to seniors.

GRADUATE PROGRAM

Graduate Program Coordinator

N107 William H. Foege Building, Box 355061

(206) 685-2000

bioeng@uw.edu

The Department of Bioengineering offers programs of study which lead to the Master of Science (MS), the Master of Pharmaceutical Bioengineering (PHARBE), and Doctor of Philosophy (PhD) degrees.

Master of Science

The Master of Science degree program provides breadth of knowledge of engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree prepares students for careers in academic, industrial, or hospital environments.

Admission Requirements

All application materials must be received in the appropriate office by the deadline. International applications are due by December 1; domestic applications are due by December 15. Late and/or incomplete applications are not reviewed. Required application items include:

1. Online application: www.grad.washington.edu/applFormAdmiss.
2. Department of Bioengineering Admission Form
3. Statement of Purpose
4. Resume/Curriculum Vitae
5. Three letters of recommendation
6. Unofficial transcripts only (official transcripts are requested once an offer has been made)
7. Official GRE scores (sent to code 4854, and must be sent before the deadline)
8. Official TOEFL scores (from international applicants only, and must be received before the deadline)

More information about the application is online at depts.washington.edu/bioe/education/prospective/educ_prospective.html. Materials sent in addition to those listed above are considered non-essential and do not enhance the application.

Applicants are expected to have the following courses as part of their undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, rate processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the MS program.

Degree Requirements

Course requirements for the MS in Bioengineering are detailed below. All core and elective courses must be taken for a numerical grade. Students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

Note: A single course may not count for two separate requirements.

36 credits as follows:

1. *Molecular Bioengineering:* BIOEN 501
2. *Cellular Bioengineering:* BIOEN 502
3. *Systems Bioengineering:* BIOEN 503
4. *Biostatistics*
5. *Bioengineering Seminar:* BIOEN 510
6. *Bioengineering Elective Courses*, chosen in consultation with faculty adviser: 10 credits
7. *Master's Thesis:* BIOEN 700

Master of Pharmaceutical Bioengineering

The Master of Pharmaceutical Bioengineering (PHARBE) program is an evening degree program designed to enable working local engineers, scientists, researchers, and professionals in the biotechnology, pharmaceutical, and related industries to explore advanced education in the areas of molecular and cellular biology, drug discovery and design, pharmaceuticals, and translational pharmaceuticals. Professionals may also complete three certificate programs without applying for degree status.

Admission Requirements

1. BS degree or equivalent in a relevant science (field/research), public health (biomedical related) or engineering (field/research) related, or a BS degree or equivalent in unrelated field and two years' experience working within a scientific or engineering group for a biotechnology or pharmaceutical company or related industry. Clinical degrees are considered.
2. Applicants who have a bachelor's degree other than a BS, professional experience, and completed recommended prerequisite course work are also considered for admission.
3. Minimum 3.00 GPA in the last 90 quarter credit hours (60 semester credit hours). Students who have a BA/BS degree with under a 3.00 GPA and have two years' work experience may be approved for graduate non-matriculated (GNM) status for basic biosciences. Students who receive a 3.0 or above in their basic biosciences courses under GNM status are considered for degree admissions.
4. Official GRE scores
5. One set of official (unopened) transcripts from each non-UW institution attended
6. *Prerequisite Course Requirements:* The following courses must be completed with a minimum 2.0 in each course before applying to the degree program. Students whose undergraduate degree majors are in engineering, biology, chemistry or pharmacy are exempt from the prerequisite course requirement.
 - a. *Calculus:* Minimum one quarter (or one semester) of college calculus
 - b. *Chemistry:* Minimum two quarters (one semester) of college general chemistry Additional course in organic chemistry recommended.
 - c. *Biology:* Minimum one quarter (semester) of general biology
 - d. *Physics:* One quarter (PHYS 114).
7. Applicants are evaluated on professional experience, previous degrees earned, or most recent/undergraduate GPA, basic biosciences courses GPA (if applicable), letters of recommendation, statement of intent, and GRE test scores. Admission to the program is not guaranteed.
8. Applicants who do not qualify for admission to the PHARBE degree program may be admitted to courses and/or to Pharmaceutical Bioengineering Certificate programs.
9. *English Proficiency:* Students who are non-native English speakers are expected to have adequate English

language proficiency. The Graduate School requires a TOEFL score of at least 580, unless applicants are citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or hold a bachelor's or advanced degree from an accredited institution in any of these countries.

Degree Requirements

Minimum 40 credits, with a minimum 3.00 cumulative GPA, as follows:

1. *Basic Biosciences Curriculum (20 credits):* Molecular and Cellular Biology I, Molecular and Cellular Biology II, Pharmaceutics I, Pharmaceutics II, Statistics and Experimental Design
2. *Advanced Tracks:* 16 credits from one of two advanced tracks in translational pharmaceuticals or drug discovery and design. Students must complete 20 credits of the basic biosciences core courses before enrolling in advanced track courses.
 - a. *Translational Pharmaceuticals (16 Credits):* Preclinical Development, Process Development, Formulation and Delivery, Clinical Development
 - b. *Drug Discovery and Design (16 Credits):* Molecular Biotechnology, Drug Discovery & Design, Molecular Targets & Drug Classes, Systems Biology and Bioinformatics
3. Departmental Seminar (4 Credits)
4. *Optional Capstone Project:* Students have the option of completing a professional capstone project in either the drug discovery and design or Process development courses.

Doctor of Philosophy

The objective of the PhD program is to train individuals for careers in bioengineering research and teaching. The program has three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the PhD program does not require prior completion of the MS degree and may be made directly after the BS. An optional dual PhD degree in bioengineering and nanotechnology is available; see www.nano.washington.edu for more information.

Admission Requirements

See the application process detailed in the MS section.

While it is not required to complete an MS degree before beginning the PhD, every graduate student is expected to have the following courses as part of her or his undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the PhD program.

Degree Requirements

90 credits, to include:

Students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

All core and elective courses must be taken for a numerical grade. A single course may not count for two separate requirements. Required courses include:

1. *Molecular Bioengineering:* BIOEN 501

2. *Cellular Bioengineering*: BIOEN 502
3. *Systems Bioengineering*: BIOEN 503
4. *Biostatistics*
5. *Bioengineering Seminar*: BIOEN 510
6. 16 credits of bioengineering elective courses, chosen in consultation with faculty adviser
7. 27 credits of dissertation writing (BIOEN 800)

Ordinarily, a student progressing well follows this schedule:

1. *First Year*: Complete one to three lab rotations and select a thesis adviser no later than the end of spring quarter.
2. *Second Year*: Pass the qualifying examination and form a Supervisory Committee by the end of that year.
3. *Third Year*: Pass the general examination.
4. *Fourth Year (and subsequent years)*: Make an annual progress report to, and receive feedback from, the Supervisory Committee.
5. *Fifth Year*: Defend the dissertation.

Medical Scientist Program

A Medical Scientist Training Program (MSTP) exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the MD and PhD degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at (206) 685-0762.

Research Facilities

As the department is established within the College of Engineering and the School of Medicine, bioengineering students have access to all engineering and health science departments and facilities. A wide range of technologies and virtually all aspects of biomedical research tools are available.

Financial Support

Financial support is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the adviser.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

BIOEN 215 Introduction to Bioengineering Problem Solving (3) D. HENDRICKS, A. TAYLOR Introduces bioengineering through a problem solving approach. Topics include: creative problem solving techniques, self-directed inquiry, engineering ethics, social constraints, and engineering design process.

BIOEN 290 Guided Independent Studies on Transformative Science (4) NW G. POLLACK Intensive laboratory experience mixed with lectures, readings, and discussions aimed at achieving deep understanding of scientific approach, particularly the nature of paradigm shifts, role of governmental support and management of science, power of orthodoxy, role of challenger, and fate of unpopular scientific views. Offered: W.

BIOEN 299 Introduction to Bioengineering (1) G. POLLACK Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no-credit only. Offered: ASP.

BIOEN 315 Biochemical Molecular Engineering (3) D. RATNER Introduces the requisite organic, physical, and biochemistry for incoming bioengineers to understand biological systems at the molecular level. Prerequisite: CHEM 223, CHEM 237 or CHEM 335; BIOL 200, which may be taken concurrently. Offered: Sp.

BIOEN 316 Biomedical Signals and Sensors (4) C. NEILS Introduces the sources, detection, and processing of signals in medical instrumentation. Includes analog and digital signal processing in the time and frequency domains. Emphasizes component strengths and limitations, to develop systems that improve safety, accuracy, and reliability. Prerequisite: AMATH 301 and PHYS 122; BIOEN 317, which must be taken concurrently; either MATH 307 or AMATH 351, which may be taken concurrently. Offered: Sp.

BIOEN 317 Biomedical Signals and Sensors Laboratory (2) F. CURRA Uses computational and experimental projects covering methods to acquire, process, and analyze signals from physiological and biochemical origins. Co-requisite: BIOEN 315 and BIOEN 316. Offered: Sp.

BIOEN 325 Biotransport I (4) Y. ZHENG Introduces momentum and heat transport in medical and biological systems. Examines how differential and control-volume analyses produce ordinary and partial differential equations; develops analytical and computational solution methods. Prerequisite: AMATH 301; either MATH 136, MATH 307, or AMATH 351; PHYS 122. Offered: Sp.

BIOEN 326 Solid and Gel Mechanics (4) W. THOMAS Introduces solid mechanics and interactions of biological structures and medical materials. Emphasizes the relationships between composition, structure, properties, and performance of metals and ceramics, synthetic and natural macromolecules, cells, tissues, and self assembling systems. Prerequisite: either CHEM 162, CHEM 164, or CHEM 165; PHYS 122; minimum grade of 2.0 in BIOEN 315. Offered: A.

BIOEN 327 Fluids and Materials Laboratory (2) C. NEILS Practical exploration of the behavior of fluids and soft materials that occur in biological systems and biomedical devices; and the interaction between cells and their environment. Includes methods of measurement, analysis, and design. Co-requisite: BIOEN 325 and BIOEN 326. Offered: A.

BIOEN 335 Biotransport II (3) J. BRYERS Studies the principles of combined mass transport in homogeneous and heterogeneous reaction systems as applied to biological processes. Introduces chemical and biochemical reaction kinetics, methods of evaluating kinetic parameters for reaction rate data, and prediction of the performance of biological and biochemical processes. Prerequisite: minimum grade of 2.0 in BIOEN 325. Offered: W.

BIOEN 336 Bioengineering Systems and Control (3) H. SAURO Reviews linear and nonlinear systems analysis and control system design and biological and medical applications. Prerequisite: minimum grade of 2.0 in BIOEN 327; either MATH 136, MATH 308, or AMATH 352. Offered: W.

BIOEN 337 Mass Transport and Systems Laboratory (2) A. TAYLOR Uses computational and experimental laboratory exercises to demonstrate time- and space-dependent linear and nonlinear systems with specific emphasis on bioengineering application. Prerequisite: BIOEN 327; BIOEN 335 and BIOEN 336, which must be taken concurrently; either MATH 390, STAT 390, or IND E 315, which may be taken concurrently. Offered: W.

BIOEN 345 Failure Analysis and Human Physiology (4) S. PUN, M. REGNIER, Y. ZHENG Applies engineering analysis to understand human physiology of the engineering of solutions to medical and biological problems. Includes laboratory. Prerequisite: BIOL 220; minimum grade of 2.0 in each of BIOEN 215, BIOEN 335, BIOEN 336, and BIOEN 337. Offered: Sp.

BIOEN 401 Bioengineering Capstone Principles (3) K. WOODROW Teaches design principles in bioengineering and guides the development of design and research-based

senior capstone projects. Prerequisite: either MATH 390, STAT 390, or IND E 315. Offered: Sp.

BIOEN 402 Bioengineering Capstone Research and Design ([2-6]-, max. 10) Independent senior design project. Prerequisite: BIOEN 401. Offered: AWSpS.

BIOEN 403 Bioengineering Capstone Research (2-, max. 4) Independent senior research project. Prerequisite: BIOEN 401. Offered: AW.

BIOEN 404 Bioengineering Team Design I (3) C. NEILS First course in team design project course sequence. Prerequisite: BIOEN 401. Offered: W.

BIOEN 405 Bioengineering Team Design II (3) A. TAYLOR Second course in team design project course sequence. Prerequisite: BIOEN 404. Offered: Sp.

BIOEN 410 Bioengineering Honors Seminar (1) D. HENDRICKS Service-learning for departmental honors students. Credit/no-credit only. Offered: A.

BIOEN 420 Medical Imaging (4) C. YUAN Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT optical imaging, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOEN 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization. Prerequisite: either BIOEN 316 or E E 235; either MATH 136, MATH 308, or AMATH 352; either CSE 142 or AMATH 301.

BIOEN 423 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with CSE 486/E E 423; A.

BIOEN 424 Advanced Systems and Synthetic Biology (3) Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with CSE 487/E E 424; W.

BIOEN 425 Laboratory Methods in Synthetic Biology (4) Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with CSE 488/E E 425; W.

BIOEN 440 Introduction to Biomechanics (4) J. SANDERS Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with M E 445; Sp.

BIOEN 455 BioMEMS (4) A. FOLCH Introduction to BioMEMS. State-of-the-art techniques in patterning biomolecules, machining three-dimensional microstructures and building microfluidic devices. Various biomedical problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Bi-weekly labs. Prerequisite: BIOEN 316. Offered: W.

BIOEN 457 Advanced Molecular Bioengineering (4) P. STAYTON Fundamentals of molecular recognition: thermodynamics, forces, kinetics. Manipulation of recognition processes for current molecular bioengineering research

and development. Fundamental physical chemistry of molecular recognition in the context of biomedicine. Therapeutics based on cells. Prerequisite: either BIOEN 315 and BIOEN 335. Offered: A.

BIOEN 467 Biochemical Engineering (3) *F. BANEYX* Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with CHEM E 467; W.

BIOEN 474 Immunoengineering (3) *K. WOODROW* Covers cell and tissues of immune system; lymphocyte activation and specificity; cell biology of antigen processing and preservation; and effector mechanisms. Includes discussion of concepts in theoretical immunology used to describe viral dynamics and the dynamics of immune responses. Students present case studies in the pathogenesis of immunologically mediated diseases.

BIOEN 485 Computational Bioengineering (4) *W. THOMAS* Introduction to computational and mathematical analysis of biological systems, including control, stochastic, and transport systems. Lectures and laboratory sessions emphasize biochemical systems, but also include electrical, mechanical, and fluidic systems. Prerequisite: BIOEN 335; either AMATH 351 or MATH 307. Offered: Sp.

BIOEN 486 Tissue Engineering (3) *D. KIM* Tissue structure and function, scaffold design, applications to specialized tissues and organs. Prerequisite: BIOEN 315. Offered: A.

BIOEN 487 Bioengineering and Nanotechnology (4) *X. GAO* Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine. Prerequisite: CHEM 142, CHEM 144, or CHEM 145; BIOL 180.

BIOEN 488 Computational Protein Design (4) *V. DAGGETT* Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems. Prerequisite: BIOEN 315.

BIOEN 490 Engineering Materials for Biomedical Applications (3) Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; A.

BIOEN 491 Controlled-Release Systems (3) *S. PUN* Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral, and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; W.

BIOEN 492 Surface Analysis (3) *B. RATNER* Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger): ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 458; Sp.

BIOEN 493 Advanced Surface Analysis (3) *D. CASTNER* Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrom-

etry, and multivariate analysis. Prerequisite: either CHEM E 458 or BIOEN 492. Offered: jointly with CHEM E 493; W.

BIOEN 494 Advanced Drug Delivery (3) *S. PUN* Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Prerequisite: BIOEN 491. Offered: Sp.

BIOEN 497 Bioengineering Education Outreach (1-2, max. 6) Work with K-12 schools or community organizations. Current science education research and instructional techniques. May involve presentations or instruction in hands-on activities. Credit/no-credit only.

BIOEN 498 Special Topics (1-6, max. 15) Topics of current interest in the field, offered as lectures, conferences, or laboratory. Offered: AWSpS.

BIOEN 499 Special Projects (1-6, max. 24) Individual undergraduate bioengineering projects (research or independent study) under the supervision of an instructor. Credit/no-credit only. Offered: AWSpS.

BIOEN 501 Molecular Bioengineering (4) Examines advanced topics in molecular diffusion, reaction kinetics, and convective transport modeling as applied to biological systems. Includes mathematical analysis and numerical simulation techniques applied to: Non-Fickian diffusion, rotational versus translational diffusion, immobilized enzyme kinetics, drug release, and gene delivery. Offered: A.

BIOEN 502 Cellular Bioengineering (4) Covers basic principles of cell biology (including cell structure, function, and signaling), recombinant RNA/DNA technology, and specific examples of cellular bioengineering applications including gene delivery, RNA silencing, and tissue engineering. Prerequisite: BIOEN 501. Offered: W.

BIOEN 503 Systems Bioengineering (4) Explores whole-body or organ physiology topics from an engineering perspective. Uses various model systems to elucidate engineering principles such as feedback control and homeostatic regulation. Includes real-world examples, computer modeling, and research design approaches. Prerequisite: BIOEN 502. Offered: Sp.

BIOEN 504 Introduction to Technology Commercialization (4) *M. O'DONNELL, B. RATNER* Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing.

BIOEN 505 Biomedical Entrepreneurship (4) Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing; introduces strategic planning, management of commercialization effort.

BIOEN 506 Applying Technology Commercialization (1) Focuses knowledge of entrepreneurship within the spaces of medical devices, hardware/software, and energy, into a practical description of a potential start-up company. Corequisite: ENTRE 540. Credit/no-credit only.

BIOEN 509 Bioengineering Departmental Seminar (1, max. 16) Research review and discussions centered on demonstrating approaches and solving scientific problems. Seminar lectures led by faculty and visiting faculty in Bioengineering and related disciplines. Credit/no-credit only. Offered: WSp.

BIOEN 511 Biomaterials Seminar (1, max. 18) *D. CASTNER, L. GAMBLE* Presentation of student research results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with CHEM E 511.

BIOEN 513 Current Topics in Cardiac Physiology (1, max. 3) *M. REGNIER* Current research in cardiac physiology. Student presentation and discussions of current research methodologies. Credit/no-credit only.

BIOEN 516 Medical Imaging Seminar (1) Weekly seminars, presented by UW faculty members, researchers and graduate students from UW, other academic institutions, and industry, on image computing and medical imaging. Topics include digital video, image processing, computer graphics, video/image compression, image analysis, algorithms and systems, pattern recognition, multimedia computer architectures, and other applications. Credit/no-credit only.

BIOEN 518 Nanotechnology Seminar (1, max. 18) Emphasizes frontier research in nanoscience and nanotechnology and on intellectual interactions within the nanotechnology community. Presented by experts in the field, with most being from other institutions. Prerequisite: graduate standing and permission of instructor. Credit/no-credit only. Offered: jointly with CHEM 597; AWSp.

BIOEN 520 Musculoskeletal Biomechanics (4) *R. CHING* Engineering principles and mechanics applied to the musculoskeletal system including structure-function property relationships of musculoskeletal tissues, the biomechanics of joint systems, and applications of biomechanics in industry and research. Offered: jointly with M E 527; W.

BIOEN 522 Biomechanics of Soft Tissue (3) *J. SANDERS* Applies soft tissue biomechanics to medical research. Develops specific biomechanical questions and experiments to address those aims or hypotheses.

BIOEN 523 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with CSE 586/E E 523.

BIOEN 524 Advanced Systems and Synthetic Biology (3) Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with CSE 587/E E 524; W.

BIOEN 530 Bioengineering Professional Series I: Literature Analysis (2) *V. DAGGETT* Skills in scientific literature analysis developed through topics in bioengineering. Credit/no-credit only. Offered: A.

BIOEN 531 Bioengineering Professional Series II: Proposal Writing (2) *M. SCATENA* Covers grant and fellowship proposal writing. Offered: W.

BIOEN 532 Bioengineering Professional Series III: Professional Skills Development (1) *C. GIACHELLI* Key areas of professional development related to the bioengineering field, including oral communication, management, networking, and interviewing. Credit/no-credit only. Offered: Sp.

BIOEN 552 Microfabrication and Microfluidics (3) *A. FOLCH, P. YAGER* Studies the use of 2- and 3-dimensional structures in research and biomaterials, cells, and complex liquids. Focuses on micropatterning of surfaces and microfluidic chemical analytical systems. Co-requisite: BIOEN 553.

BIOEN 553 Microfabrication and Microfluidics Laboratory (2) *A. FOLCH, P. YAGER* Studies the creation of 2- and 3-dimensional structures for use in research with biomaterials, cells, and complex liquids. Each student will fabricate at least one PDMS device and demonstrate its function. Co-requisite: BIOEN 552. Credit/no-credit only.

BIOEN 555 Water, Nature, and Biological Function (3) *G. POLLACK* Explores emerging concepts of water at interfaces as a new and simpler way to understand many features of chemistry, physics, and biology. Considers new understanding in cell function, energy transduction, solar energy,

flow, transport, weather, green science, and other basics of nature and engineering. Offered: Sp.

BIOEN 573 Biosensors and Biomedical Sensing (3) *P. YAGER* In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing.

BIOEN 574 Immunoengineering (3) *K. WOODROW* Covers cell and tissues of immune system; lymphocyte activation and specificity; cell biology of antigen processing and preservation; and effector mechanisms. Includes discussion of concepts in theoretical immunology used to describe viral dynamics and the dynamics of immune responses. Students present case studies in the pathogenesis of immunologically mediated diseases.

BIOEN 576 Laboratory Techniques in Protein Engineering (4) Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression. Prerequisite: background in biochemistry or molecular biology or permission of instructor.

BIOEN 577 Cell and Protein Reaction with Foreign Materials (3) *T. HORBETT* Study of ways in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, and cell receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor.

BIOEN 578 Biomembranes (3) *P. YAGER* Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membranes; in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water.

BIOEN 579 Host Response to Biomaterials (3) *C. GIACHELI* Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthetic use, including hemostasis, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology, BIOEN 490 (may be taken concurrently), or permission of instructor.

BIOEN 585 Computational Bioengineering (4) *W. THOMAS* Introduction to computational and mathematical analysis of biological systems, including control, stochastic, and transport systems. Lectures and laboratory sessions emphasize biochemical systems, but also include electrical, mechanical, and fluidic systems.

BIOEN 586 Tissue Engineering (3) *D. KIM* Tissue structure and function, scaffold design, applications to specialized tissues and organs. Offered: A.

BIOEN 587 Bioengineering and Nanotechnology (4) *Gao* Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine.

BIOEN 588 Computational Protein Design (4) *V. DAGGETT* Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems.

BIOEN 590 Advanced Topics in Biomaterials (3) Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodeg-

radation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with CHEM E 590.

BIOEN 591 Controlled Release Systems (3) *S. PUN* Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Offered: W.

BIOEN 592 Surface Analysis (3) *B. RATNER* Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 558.

BIOEN 593 Advanced Surface Analysis (3) *D. CASTNER* Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 558 or BIOEN 592. Offered: jointly with CHEM E 593; W.

BIOEN 594 Advanced Drug Delivery (3) *S. PUN* Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Offered: Sp.

BIOEN 598 Research Rotation (1-10, max. 30) Research rotation in the laboratories of core or adjunct faculty in the Department of Bioengineering. Credit/no-credit only. Offered: AWSpS.

BIOEN 599 Special Topics in Bioengineering (1-6, max. 30) Offered at a graduate level periodically by faculty members within the Department of Bioengineering; concerns areas of research activities with current and topical interest to bioengineers. Prerequisite: undergraduate or graduate courses (or equivalent) determined individually for each special topic.

BIOEN 600 Independent Study or Research (*) Offered: AWSpS.

BIOEN 601 Internship (1-10, max. 10) Bioengineering graduate internship program. Requires written report. Prerequisite: permission of supervisory committee chair. Offered: AWSpS.

BIOEN 700 Master's Thesis (*) Offered: AWSpS.

BIOEN 800 Doctoral Dissertation (*) Offered: AWSpS.

Medical Engineering

MEDENG 519 Journal Research Seminar (1) *Minie* Presentation and discussion of topics related to the medical, clinical, and pharmaceutical technology fields. Credit/no-credit only. Offered: jointly with PHARBE 519; AWSpS.

MEDENG 532 Medical Device Design (4) *Baker* Emphasizes human factors in the design and intellectual property of medical devices. Examines the useful and safe design of devices for patients, caregivers, physicians, technicians, and manufacturers. Addresses the physical, mental, and environmental constraints which affect fitting a device to the human user. Considers design for the device's life cycle.

MEDENG 533 Regulatory Affairs for the Medical Device Industry (4) Reviews the government oversight of medical device development and those laws and regulations that apply to development, testing, and production of the devices. Examines the responsibilities of a regulatory affairs specialists in companies.

Pharmaceutical Bioengineering

PHARBE 500 Molecular and Cellular Biology for Pharmaceutical Bioengineering I (4) *Minie* Covers fundamental molecular processes that occur in living organisms; including the structure and organization of prokaryotic and eukaryotic cells. Studies molecular basis of cellular structure and behaviors of cell membranes, environmental sensing and motility, signaling pathways, and differentiation. Integrates online literature/media resources and bioinformatics tools. Offered: W.

PHARBE 501 Molecular and Cellular Biology for Pharmaceutical Bioengineering II (4) *Minie* Uses a case based approach to examine prokaryotic and eukaryotic gene structure and regulation, viruses, signaling pathways, RNA, DNA, metagenomics, and systems biology. Integrates student presentations of select research topics into curriculum to develop critical thinking approaches to the latest developments in the field. Prerequisite: PHARE 500 or permission of instructor. Offered: Sp.

PHARBE 502 Pharmaceutics I (4) Covers the drug development process for both small molecules and biological form discovery stage through the end of phase 1. Addresses the science, logistics, and regulatory environment of preclinical (pharmacology, PKDM, toxicology, CMC) and early clinical development. Offered: A.

PHARBE 503 Pharmaceutics II (4) *Benson* Covers phases II and III of the drug development process. Topics include clinical study design, safety, pharmacology, and statistics. Provides an overview of the preparation and filing of the New Drug Application (NDA). Uses case studies to demonstrate key concepts. Prerequisite: PHARBE 502 or permission of instructor. Offered: W.

PHARBE 510 Applied Pharmacokinetics (4) Covers basic principle of pharmacokinetics and its impact on treatment, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Offered: A.

PHARBE 511 Process Development (4) *Laursen* Examines the principles involved in designed and developing production processes for protein therapeutics. Covers technologies, methods, and unit operations used in the development and GMP manufacture of biopharmaceuticals. Includes interdependencies of upstream, downstream, analytical, formulation and drug delivery technologies, illustrated with key biochemical, chemical, and physical chemical reaction examples. Offered: W.

PHARBE 512 Formulation and Delivery (4) *Nehilla* Introduces drug delivery and formulation principles, systems, and applications. Reviews administration routes and associated delivery barriers, connection to drug pharmacokinetics/pharmacodynamics, and drug diffusion and permeation principles. Includes current and developmental biomaterials used for formulation and drug delivery systems. Offered: Sp.

PHARBE 513 Clinical Development (4) Evaluates clinical development strategies including comprehensive drug candidate life cycle plan. Covers clinical trial design, FDA and Institutional Review Boards, ethics, consents, safety, and quality. Discusses target product profiles, phase III study synopses, informed consents, and SWOT analyses. Students present phase II results and debate go/no go decisions. Offered: A.

PHARBE 519 Journal Research Seminar (1) *Minie* Presentation and discussion of topics related to the medical, clinical, and pharmaceutical technology fields. Credit/no-credit only. Offered: jointly with MEDENG 519; AWSpS.

PHARBE 520 Molecular Biotechnology (4) *To* Emphasizes concepts and the techniques/methodologies used in molecular biotechnologies. Uses practice-oriented lectures and laboratories to cover issue culture and assays, recombinant DNA methodologies such as SNA isolation, restric-

tion mapping, cloning, site-directed mutagenesis, DNA sequencing, PCR techniques and applications, protein electrophoresis, ELISA analysis, and Western/Southern blotting methodologies. Offered: A.

PHARBE 521 Drug Discovery and Design (4) Baldwin Explores general principles and current approaches involved in modern drug discovery and development. Includes specific aspects of human biology and disease, case studies in discovery, and the evolution of how these topics have merged. Covers novel drug discovery techniques, emerging non-standard therapeutics, and the history of drugs and drug discovery. Offered: W.

PHARBE 522 Molecular Targets and Drug Classes (4) Wong Discusses select medicinal compounds, emphasizing mechanism of action, biotransformation, and structural and physical properties governing absorption, distribution, and excretion. Design of therapeutics to focus on maximizing efficacy while reducing toxicities. Compounds include classical organic small-molecules, peptides, proteins, nucleic acids, lipids, carbohydrates, and other bioactive chemical classes. Offered: Sp.

PHARBE 523 Systems Biology and Bioinformatics (4) Surveys methods in bioinformatics and systems biology, including genomics, proteomics, protein-folding prediction, phylogenetics, and simulations, making particular use of tools available online. Emphasizes student presentations. Offered: A.

Global Health

The Department of Global Health was established in 2007, bridging the schools of Medicine and Public Health, with a mandate to harness the expertise and interdisciplinary power of all 16 UW schools and colleges. The department is the second largest at the UW in terms of funding for research and training programs. Departmental efforts include 31 centers, programs, initiatives, and the Institute for Health Metrics and Evaluation.

The mission is to close the gap between the world's one billion people who experience relatively good health and the five billion who experience much lower levels of health, through teaching (education, training, and mentoring), research, and service programs.

The department offers an undergraduate minor, a Master of Public Health, and two PhD options: global health, and pathobiology. Four graduate certificate offerings are available for graduate students, as well as a global health pathway for UW medical students. Current and emerging focus areas include health metrics and evaluation, infectious diseases, workforce development, health system strengthening and implementation science, climate change, global trauma and violence, global medicines safety, and a strong cross-cutting focus on social justice and equity.

UNDERGRADUATE PROGRAM

The Department of Global Health offers the following program:

- A minor in global health

Minor

Minor Requirements (30 credits):

1. **Required Courses (8 credits):** G H 101/GEORG 180/JSIS B 180; and G H 210 or G H 410
2. **Perspectives in Global Health Series (3 credits):** G H 401; G H 402; G H 403
3. **Electives (to bring total to 30 credits):** Minimum of one elective course from each of the four content areas selected from a list of approved courses available from the Department of Global Health website, globalhealth.washington.edu

washington.edu/academics/undergraduate-minor/requirements

4. Minimum 15 credits outside the student's major
5. Minimum 15 credits completed through the UW
6. Minimum 15 upper-division credits
7. Minimum 2.0 grade in courses applied to the minor

GRADUATE PROGRAM

Graduate Program Coordinator

(206) 897-1804
ghprog@u.washington.edu

Master of Public Health

The Global Health MPH program emphasizes a social justice approach to global health with a focus on the social, economic, and political determinants of health, and the history and context of global responses to health problems. The core curriculum develops competencies in the basic tools of public health, including epidemiology, biostatistics, global health systems, environmental health, and social behavioral sciences. Courses in research methods and management are also required. A practicum provides hands-on experience with local or international agencies engaged in global health activities, and academic coursework culminates with independent scholarship leading to a research or practice thesis. The curriculum is highly interdisciplinary, with faculty and courses from across campus including natural and social sciences and the humanities. Case studies and applied learning are common approaches, and contributions by students provide a major component of the learning environment.

For current listings of MPH program options and their requirements, visit the program website.

Admission Requirements

Applicants must have completed at least a baccalaureate degree by the time of matriculation, and some tracks require at least two years of relevant post-college work or volunteer experience prior to matriculation as well. Each MPH track has its own admission requirements.

1. Completed Graduate School online application. Deadline midnight, December 1
2. Official scores from the general Graduate Record Examination (GRE), required for applicants who have not already earned a doctoral-level degree (e.g., MD, PhD, JD) from a U.S. institution of higher learning
3. Unofficial transcripts: Applicants upload unofficial transcripts from each college and/or university attended into the online application.
4. Three recent letters of recommendation, preferably from former supervisors and professors
5. Personal statement, including background, goals, and research interests
6. Resume, maximum three pages

Degree Requirements

63 credits, for all MPH tracks

At least 30 credits must be from graduate-level, in-classroom courses, and at least 18 of these must be from global health in-classroom courses.

All tracks require a foundation course, epidemiology, biostatistics, environmental health, social and behavioral sciences, research methods, a practicum, and a thesis. Beyond these shared requirements, each track also has its own set of requirements. See program website for track-specific requirements.

Doctor of Philosophy

Program Manager

Institute for Health Metrics and Evaluation
2301 5th Avenue, Suite 600, Box 358210
Seattle, WA
(206) 897-2870
ghpdh@u.washington.edu

The Department of Global Health, in collaboration with the Institute for Health Metrics and Evaluation and Health Alliance International, has developed a unique PhD program, building on faculty expertise in the areas of metrics and implementation science. The program provides students the most innovative tools to advance global health solutions, and includes two emphasis areas:

Metrics: Students translate evidence into useful knowledge by learning and applying advanced quantitative methods, impact evaluation techniques, and analytic tools. Students design and develop new, innovative ways to tackle critical global health measurement challenges.

Implementation Science: Students identify and address barriers to effective implementation and scale-up of evidence-based interventions by developing and applying cutting-edge methodologies and analytical approaches.

For comprehensive information, see the PhD program website.

Admission Requirements

The department recruits students who wish to pursue a long-term career in global health, whether in academic institutions, ministries of health, non-governmental organizations, or the private sector. All indicators of future success, including past work, service, and research experience; level of enthusiasm and detail in letters of recommendation; previous academic records and performance on standardized tests; applicant's written statement of purpose; and an ability to discuss research or practice work and future goals are considered. The department reviews all variables without a preset formula.

Minimum Qualifications

1. Bachelor's degree from an accredited college or university in the United States, or its equivalent from a foreign institution. Strong candidates have prior master-level training or significant experience working in the global health field, ideally in a low-resource setting.
2. Demonstrated passion and commitment to the field of global health
3. High academic standing: Minimum 3.30 cumulative GPA in previous undergraduate- and graduate-degree work, though the department expects applicants to have a minimum 3.70 GPA.
4. Graduate Record Examination (GRE) scores greater than or equal to 120 (700) on the quantitative section
5. **English Proficiency:** For students who have not completed a degree in an institution where English is the primary language of instruction, results from the Test of English as a Foreign Language (TOEFL) are required.

Degree Requirements

Minimum 96 credits

1. **Coursework:** Minimum 27 dissertation credits, 37 credits in core requirements, 16 credits in area of emphasis, and remaining credits in electives. See details about curriculum and course paths on program website.
2. Preliminary written examination
3. General examination
4. Research and dissertation
5. Final examination

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/.

G H 101 Introduction to Global Health: Disparities, Determinants, Policies, and Outcomes (5) I&S S. GLOYD, M. SPARKE Provides an introduction to global health, including: the burden and distribution of disease and mortality; the determinants of global health disparities; the making of global health policies; and the outcomes of global health interventions. Offered: jointly with GEOG 180/JSIS B 180; W.

G H 210 Confronting Global Diseases: Introductory Biologic Principles and Context (3) NW M. PARSONS Provides a broad introduction to the leading causes of disability and death globally. Covers the basic biologic and scientific principles of globally prevalent human health problems, including the connections between the biology of disease and current prevention and treatment interventions used in public health. Not intended for biological science majors. Offered: Sp.

G H 399 Global Health Study Abroad (1-5, max. 15) I&S For participants in approved study abroad programs. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

G H 401 Core Topics in Global Health (1) *Gonzales, Wade* Addresses a variety of foundational topics and central themes in global health, including the history and scope of the field, the complexities and contexts for global health problems, and the multidisciplinary nature of global health work. Credit/no-credit only. Offered: A.

G H 402 Contemporary Issues in Global Health (1) J. BE-SCHTA, D. WADE Explores contemporary topics in global health. Offered: W.

G H 403 Multidisciplinary Perspectives in Global Health (1) *Gonzales, Wade* Presenters from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers illustrate how their work is influenced by communication, culture, economic and socio-political realities. Credit/no-credit only. Offered: Sp.

G H 410 Advanced Biologic Principles of Global Diseases (3) NW R. COLER Presents selected communicable and noncommunicable diseases of global health importance at an advanced level. Students learn about biological principles, host-pathogen interactions, and other factors that influence the burden of global health diseases. Prerequisite: either BIOL 180, G H 210, or MICROM 301. Offered: W.

G H 419 War and Health (4) I&S Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with HSERV 415; Sp.

G H 456 Global Mental Health (3) I&S, DIV Rao Examines the socio-cultural and political forces that impact assessment, manifestation, and treatment of mental illnesses worldwide. Students take a critical view of diagnostic systems and examine cultural differences in presentation of mental illness. Also reviews treatment practices in low resource settings, cultural-specific communication, and stigma. Offered: Sp.

G H 490 Special Topics (1-5, max. 15) Offered: AWSpS.

G H 499 Undergraduate Research (1-15, max. 15) Offered: AWSpS.

G H 500 Global Health Seminar (1, max. 6) Explores issues relevant to global health; themes vary by quarter. Credit/no-credit only. Offered: AWSp.

G H 501 Core Topics in Global Health (1) *Gonzales, Wade* Addresses a variety of foundational topics and central themes in global health, including the history and scope of the field, the complexities and contexts for global health problems, and the multidisciplinary nature of global health work. Offered: A.

G H 502 Contemporary Issues in Global Health (1) J. BE-SCHTA, D. WADE Explores contemporary topics in global health. Offered: W.

G H 503 Multidisciplinary Perspectives in Global Health (1) *Gonzales, Wade* Presenters from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers illustrate how their work is influenced by communication, culture, economic, and socio-political realities. Offered: Sp.

G H 505 P-Advanced Global Health (2) Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with MED 560.

G H 511 Problems in Global Health ([0-4]-, max. 4) *Gloyd* Explores social, political, economic, environmental determinants of developing countries' health; traces development of societal responses to problems. Includes: origins of primary healthcare; child survival; traditional systems; population; water; sanitation; international agencies; impact of economic policies. Case study formulating pharmaceutical policy in a developing country. Offered: A.

G H 514 Global Societal Determinants of Health (2-3) *Bezruchka* Examines societal determinants of health of nations around the globe. Asks why there is an increasing inequity in health outcomes today? Topics include early life, population health biology, medical care, mental health, and the environment. Offered: Sp.

G H 516 Health and Human Rights (3) Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with LAW H 540; W.

G H 519 War and Health (4) Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with HSERV 515; Sp.

G H 521 Leadership Development in Global Health (3) *Campbell* Primarily taught through self and group assessment, case studies and small group work, explores student's leadership and management effectiveness, strengths and weaknesses. Establishes frameworks (communication, effective influencing, culture, values, vision and mission, and decision-making) explored throughout the three-quarter sequence. Offered: A.

G H 522 Global Program Management and Leadership (3) *Downer* Focuses on management and leadership skills for complex global health settings. Includes personal leadership strengths/values; management dilemmas, data-driven decisions; program planning design and evaluation; and resource management. Offered: W.

G H 523 Policy Development and Advocacy for Global Health (3) *Katz, Lane* Primarily taught through case- and problem-based learning and small group work, explores complex factors affecting global health policy and how context (e.g., ideology, culture, and history), international institutions, scientific knowledge, and stakeholder interests affect the structure of and changes to a nation's health system and its performance. Offered: Sp.

G H 531 Research and Evaluation Methods in Global Health (3-4) *Mock, O'Malley* Provides an overview of a range of evaluation and research designs used in global health. Students learn practical methodologies to obtain, validate, and analyze information regarding health status, services, and programs. Discusses usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, and qualitative methods. Offered: jointly with EPI 539; W.

G H 532 Responsible Conduct of Research: Global and Local (3) Prepares international and U.S. students to develop research proposals; conduct international and domestic field research; and present scholarly work. Offered: jointly with EPI 586; A.

G H 533 Survey Research Methods (4) A. MOKDAD Provides students with skills in questionnaire development and survey methods. Students develop a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511/HSERV 513; BIOST 517/BIOST 518; or EPI 512/EPI 513, which may be taken concurrently, or permission of instructor. Students should have a survey project in mind. Offered: jointly with CS&SS 527/HSERV 527.

G H 538 Advanced Qualitative Methods in Anthropology and Public Health (5) J. PFEIFFER Provides students with both a theoretical foundation in qualitative approaches to research in anthropology and public health and in-depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame research questions, design, appropriate research strategies that incorporate qualitative methods, and analyze data. Offered: jointly with ANTH 519/HSERV 521; Sp, even years.

G H 539 Methods, Tools, and Data in Global Health (2) *Gakidou* Familiarizes students with current global health issues and their analytical challenges. Introduces analytical methodologies, quantitative concepts, statistical packages applied to global health challenges, and software used in health metrics and evaluations research. (Two weeks). Offered: A.

G H 541 Fundamentals of Implementation Science in Global Health (4-5) *Sherr, Wasserheit* Provides an introduction to the emerging field of implementation research by outlining various methods that are applied to improving implementation (including applied engineering, management tools, health systems, and policy research), and using experiential case studies from global health leaders. Addresses barriers to effective replication and scale-up in local settings. Offered: Sp.

G H 543 Global Health Pharmacy: Medicines, Practice, and Policy (2) J. BABIGUMIRA, A. STERGACHIS Introduces the critical role of pharmaceuticals in addressing the major diseases affecting persons in resource-limited settings, such as HIV/AIDS, malaria, and tuberculosis. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoeconomics, financing, intellectual property, and drug trade policies. Offered: W.

G H 544 Maternal and Child Health in Developing Countries (3) D. DENNO Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with HSERV 544; W.

G H 545 Child Health in Developing Countries ([0-3]-, max. 3) *Denno* Provides an understanding of the causes and functional effects of the most prominent child health problems. Examines trends and progress in global child health and explores potential explanations for these trends. Offered: Sp.

G H 555 Nutrition in Developing Countries (3) *Gorstein* Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of under nutrition and micronutrient deficiencies. Offered: jointly with NUTR 555; Sp, odd years.

G H 556 Global Mental Health (3) *Rao* Examines the socio-cultural and political forces that impact assessment, manifestation, and treatment of mental illnesses worldwide. Students take a critical view of diagnostic systems and examine cultural differences in presentation of mental illness. Also reviews treatment practices in low resource settings, cultural-specific communication, and stigma. Offered: Sp.

G H 560 Principles of STD/HIV Research (3) *Graham, Winer* Provides MD and PhD fellows and graduate students with a comprehensive overview of the current state of knowledge in specific areas of STD/HIV research, including study design, laboratory methods, production of instruments for data collection, and methods for data analysis. Credit/no-credit only. Offered: S.

G H 561 Tropical Medicine (1) *F. BUCKNER, P. POTTINGER* Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: jointly with MED 561; Sp.

G H 562 AIDS: A Multidisciplinary Approach (2) *C. FARQUHAR* Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/MED 530; A.

G H 563 HIV/STI Prevention Research Methods (3) *J. BAETEN, R. HEFFRON* Focuses on current research and implementation of HIV/STI prevention (biomedical, behavioral, and public health interventions). Includes analyzing strength of research evidence to support candidate interviews, understanding key features of clinical trial design, and applying appropriate/feasible interventions for specific settings and populations. Offered: jointly with EPI 549; Sp.

G H 566 Biochemistry and Genetics of Pathogens and Their Hosts (4) *L. Campbell* Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor. Offered: jointly with PABIO 551; A.

G H 571 Essential of Clinical Care and Capacity Building in Low Income Countries (2) *Pak-Gorstein, Zunt* An interdisciplinary case-based forum of presentations by local and international lecturers and class discussions on realities of providing healthcare in low-income settings. Covers issues in prevention, socioeconomic underpinnings, management of medical and surgical conditions, and sustainable strategies to build capacity. Credit/no-credit only. Offered: W.

G H 572 Global Health Fieldwork: Preparation, Integration, Reentry (2) *S. GRAHAM* Prepares students for community-based global health experiences, and provides them the opportunity to share, discuss, and reflect on these experiences after returning to the United States. Explores the problems and promise of current global health strategies. Prerequisite: participation in International Health Opportunities Program or similar experience. Credit/no-credit only. Offered: S.

G H 573 Clinical Management of HIV (2-3) *M. CHUNG, H. KIM* Provides in-depth case-based training on the diagnosis and clinical management of HIV and associated condi-

tions. Includes interactive format with speakers who have experience in both resource-rich and resource-limited settings. Offered: jointly with CONJ 553; Sp.

G H 575 Integrated Residency Global Health Leadership (3) *Farquhar, Roxby* One-month rotation course for residents integrated in career in global health. Designed to teach residents the skills necessary to become future leaders in this field. Comprised of several different components, including field visits to local global health organizations, lectures, and small group case-based discussions. Credit/no-credit only. Offered: A.

G H 576 Health in Complex Humanitarian Emergencies (2) *D. TOWNES* Covers the principles of planning, implementing, and evaluating health programs for refugees and internally displaced persons during complex humanitarian emergencies in resource poor countries. Topics include rapid assessment; surveys; surveillance; nutrition; camp management; epidemiology of infectious diseases; water and sanitation; and vaccination campaigns during international relief operations for complex humanitarian emergencies. Credit/no-credit only.

G H 580 Global Health Doctoral Seminar: Biology, Systems, and Measurement (2, max. 8) *Gakidou, Lukehart, Sherr* Examines the most critical issues in global health and currently available solutions. Introduces complementary perspectives of pathobiology, metrics, and implementation science to build a multidisciplinary understanding of these issues, including effective and appropriate strategies for their control. Offered: AWSp.

G H 590 Selected Topics in Global Health (1-5, max. 15) Focuses on topics relevant to global health. Offered: AWSpS.

G H 592 Program Seminars (1-6, max. 6) Addresses specific educational needs of students within the Department of Global Health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

G H 593 MPH Workshop (1, max. 3) *Rao* Introduces students to the issues involved in conceptualizing and completing thesis projects and the various international health organizations and faculty members available as resources to projects. Prerequisite: first-year Global Health MPH students. Offered: AWSp.

G H 595 Master's Practicum (1-6, max. 6) Supervised practice experience providing an opportunity to apply knowledge and skills in a setting of relevance to global health. Prerequisite: permission of faculty adviser. Credit/no-credit only. Offered: AWSpS.

G H 600 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: AWSpS.

G H 700 Master's Thesis (*) Prerequisite: permission of instructor. Offered: AWSpS.

G H 800 Doctoral Dissertation (*) Prerequisite: permission of Graduate Program Advisor. Offered: AWSpS.

ness of ethic and cultural characteristics and healthcare access, health and healthcare concerns of specific communities, traditional and alternative health-care practices, and community-based promotion and disease prevention programs. Credit/no-credit only.

UCONJ 411 Psychology of Aging (3) *Kiyak* Focuses on developing the skills necessary for critically evaluating current psychological theories of aging, research findings in this area, and the implications of findings on the aging person. Special consideration given to the effects of socioeconomic, sex, and ethnic differences in the psychology of aging. Open to upper-division undergraduates and beginning graduate students interested in the field of gerontology.

UCONJ 412 The Family in Later Life (3) Focuses on issues affecting older persons and their families. Addresses demographic influences on families; roles, rules for and function of family members; inter-generational relationships; economic, political, and social policy affecting family life; and cultural variations and supportive resources for older persons and their families.

UCONJ 413 Current Issues in Aging (3) Describes the population trends at work in the United States and other developed nations with significant societal implications for care and management of elders. Evaluates selected public policies related to aging. Gives students proficiency in using resources related to aging on the Internet. Evaluates alternative long-term care models.

UCONJ 420 Biological Safety Practices (1) *Kenny* General introduction to appropriate laboratory procedures used for handling potentially hazardous biological agents. Particular focus on laboratory safety and appropriate protocols that should be employed by those engaged in infectious disease and recombinant DNA research. Credit/no-credit only.

UCONJ 422 Sexually Transmitted Diseases: An Overview (2) *Gardner* Clinically oriented course designed to provide a knowledge base for upper-division health science students to participate effectively in community outreach programs for the prevention of sexually-transmitted diseases. Offered cooperatively by the departments of Pharmacy and Medicine.

UCONJ 440 Biological Aspects of Aging (3) Introductory course on aspects of the biology of human aging and of functional changes associated with normal aging and with those illnesses that may be present in the elderly. Focus on the relationship between changes in physical function, environment, and quality of life. Includes theoretical perspective on aging as well as the aging process in specific physiological systems. Designed for upper-level undergraduate students with an interest in aging.

UCONJ 442 Social and Cultural Aspects of Aging (3) Involves faculty members from the various social science fields examining the range and variation of relationships among age-linked attitudes and cultural values related to aging; the social and economic factors that influence the elderly in contemporary society; the effects of ethnic and sex differences in sociocultural aging. Open to upper-division undergraduates and beginning graduate students interested in gerontology.

UCONJ 500 Seminar in Interprofessional Collaboration ([1-3], max. 7) Interdisciplinary teams composed of students and community members placed in diverse urban settings to address an identified community need by developing and implementing collaborative, community-based projects. Seminars emphasize interprofessional collaborative practice, intrapersonal understanding, interpersonal group process skills, organizational savvy, community awareness, and sociocultural sensitivity. Offered through Graduate School of Public Affairs. Offered: AWSp.

UCONJ 504 Advanced Interdisciplinary Case Studies in Global Health (3) *Gorstein, Kurth, Shell-Duncan* Uses actual multidisciplinary case studies to (1) analyze quantitative parameters of diseases, (2) contrast the descriptive

University Conjoint

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

UCONJ 100 Introduction to Health Professions (1) *Garcia* Opportunities in health professions. Information on educational requirements, professional/patient interaction, licensing, registering for practice in profession, salaries, and career opportunities.

UCONJ 290 Diversity Issues in the Healthcare Environment (1-2, max. 2) *I&S* Introduction to the complexity of the issues surrounding culture and health, the interrelated-

and analytic approaches of health sciences, anthropology, and nutritional sciences, (3) integrate diverse disciplinary perspectives into cohesive information, (4) organize class presentations, and (5) apply critical thinking in approaching complex health issues. Offered: Sp.

UCONJ 510 Introductory Laboratory Based Biostatistics (2) Introduces methods of data description and statistical inference for experiments. Covers principles of design and analysis of experiments; descriptive statistics; comparison of group means and proportions; linear regression; and correlation. Emphasizes examples from laboratory-based biomedical sciences, and provides demonstrations using standard statistical programs.

UCONJ 517 Interdisciplinary Clinical Research Methods Seminar (2) Provides an introduction to clinical/translational relational research methods, including selection of research questions, study design, measurement, data analysis, and practical aspects of conducting research in clinical settings. Prerequisite: Students from Health Sciences schools conducting research under the Multidisciplinary Predoctoral Clinical Research Training Program. Credit/no-credit only. Offered: S.

UCONJ 520 Molecular Biophysics Research Seminar (1) *Parson A* series of research seminars for faculty and students involved with the molecular biophysics program. Credit/no-credit only.

UCONJ 524 Developmental Neurobiology (3) *Raible, Reh* Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation; electrophysiological, morphological, and neurochemical regulation of cellular phenotype; neuronal pathways and synaptic contacts; cellular and synaptic plasticity; and behavior. Examination of molecular biological, morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology, neuroanatomy, molecular neurobiology. Offered: Sp.

UCONJ 525 Overview of Faculty Research in Neurobiology (1) Reviews research topics currently being studied in neurobiology. Student preparation consists of reading pertinent articles published on each topic. Prerequisite: first-year graduate student in neurobiology. Credit/no-credit only.

UCONJ 530 Issues in Indian Health (2) Surveys historical and contemporary issues in Indian health. Covers Indian contributions to health, traditional Indian medicine, current disease epidemiology, development of federal Indian health policy, the Indian Health Service, tribal health programs, and consequences of major legislation on Indian health. Prerequisite: current health science student or permission of instructor.

UCONJ 531 Introduction to Mind Body Medicine-An Experiential Elective (2) Sessions contain a didactic component followed by an experiential component and cover a variety of self-care techniques including meditation, exercise, and nutrition. Goals are to promote personal well being, a healthy lifestyle, reduce burnout, and reduce academic difficulties. Credit/no-credit only.

UCONJ 532 Health Sciences Common Book Seminar (1, max. 4) *R. ARNOLD* Covers material related to the current health sciences common book, and provides knowledge of key barriers underserved populations face in obtaining adequate healthcare, and strategies health professions can use to effectively care for underserved individuals. Guest speakers include community leaders. Service learning course. Credit/no-credit only. Offered: W.

UCONJ 545 Emergency Preparedness for Health Professionals (1) Introduces the roles of health professionals in preparing for community-wide disasters. Emergency preparedness content for graduate and professional students in health sciences. First of two interdisciplinary courses focusing on "all-hazards" preparedness. Credit/no-credit only.

UCONJ 546 Emergency Response for Health Professionals (2, max. 6) Focuses on interdisciplinary emergency preparedness and response for graduate students in health professions. Includes system and policy issues with emphasis on clinical relevance for health professionals. Second of two interdisciplinary courses focusing on "all-hazards" preparedness. Credit/no-credit only.

UCONJ 548 Current Issues in First Nations Behavioral Health: Mental Health and Substance Abuse (3) Historical and intergenerational antecedents of tribal psychiatric and substance abuse disorders. Oppression, economic circumstances, and family functioning as shaping mechanisms for attachment. Implications of insufficient attachment for neuro-development and developmental psychopathology. Traditional vs. mental health and substance abuse assessment and treatment. Self as provider to tribal clients, communities, systems.

UCONJ 550 Healthcare in the Underserved Community (1) Gives graduate/professional students in health sciences an introduction to health related issues faced by underserved populations. Credit/no-credit only.

UCONJ 584 Plant Tumors (1, max. 9) *Gordon* Discussion of the literature of plant tumors and current research work being done in this area at the University. Offered cooperatively by the departments of Biochemistry, Biology, and Microbiology and Immunology. Prerequisite: offered only to persons actively pursuing work in this area. Credit/no-credit only.

UCONJ 599 Selected Readings in Interdisciplinary Clinical Research (1, max. 6) *Marshall, Mitchell* Analysis and synthesis of selected readings and works in progress related to multidisciplinary and interdisciplinary clinical research. Prerequisite: UCONJ 517; permission of instructor. Credit/no-credit only. Offered: AWSp.

UCONJ 624 Health Equity and Community Organizing (1) *Arnold* Equips students with tools to organize themselves and others to address social and structural injustices that perpetuate health disparities. Didactic coursework complemented with opportunities to apply skills and gain confidence through hands-on collaboration with local leaders and engagement in community-driven listening and advocacy campaigns. Credit/no-credit only. Offered: AW.

Interim Assistant Dean

Naomi Sanchez

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association's list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current School of Law catalog.

Facilities and Services

The School of Law, housed in William Gates Hall since 2003, is equipped with classroom, clinical, library, lounge, and office facilities. Eleven classrooms are equipped for multi-media presentations, wireless internet connection, and assistive-listening systems.

The Marian Gould Gallagher Law Library is among the largest university law collections on the West Coast. The collection currently contains more than 450,000 bound volumes and volume equivalents of microform. In addition to the extensive main collection, it houses important materials that support the Asian, marine, sustainable international development, and tax law graduate programs and serves as a federal depository for selected United States government documents. The library is equipped with the latest in microreaders and printers in order to make full use of the growing microform collection. The library is a subscriber to LEXIS, WESTLAW, the Western Library Network, and other research databases.

JURIS DOCTOR PROGRAM

The Juris Doctor (JD) degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As with most law schools in the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills.

Except for a required course in professional responsibility, the public service requirement, and an advanced writing project requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. JD candidates are required to perform 60 hours of public-service legal work during the second or third year.

Admission

New students may enter the School of Law only in autumn quarter. For first-year students, instruction begins earlier than for upper-class students. Students must have earned a baccalaureate degree from an accredited college or university prior to commencing the study of law.

All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Data Assembly Service (LSDAS). Registration packets and test information are available at most law schools and from Law School Admission Council, Box 2000, Newtown, PA 18940-0998. www.lsac.org

No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in The Official Guide to U.S. Law Schools (2000 Edition). Applications for admission to the next entering class must be postmarked no later than January 15. To be assured of consideration, an applicant must have complete credentials, including the LSDAS report, filed in the School of Law by February 1. An application fee (at this writing, \$50) also is required.

Transfer Applicants

Students who have completed at least one year at a member school of the Association of American Law Schools may apply for admission with advanced standing, with credit for no more than one year of such work. A student who has completed or expects to complete at least two years of work at a member school of the Association of American Law Schools and who expects to graduate from that member school may apply to this school for admission as a non-degree candidate.

Applicants should request application forms and instructions from the admissions office in time to permit filing of all application materials by July 10.

Applications are considered only if vacancies exist. Selection is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body.

Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the general University policy on the registration of nonmatriculated students.

Financial Aid

Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December at most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Box 355880, University of Washington, Seattle, WA 98195, (206) 543-6101, offa@uw.edu. Applicants for admission should not wait until they have been admitted before applying for financial aid.

School of Law grants are awarded primarily on the basis of financial need, although scholarship or other factors may be considered for certain awards. Inquiries concerning School of Law aid should be addressed to Financial Aid Coordinator, School of Law, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-3020; uwlawaid@uw.edu.

Inquiries

A more detailed statement on admission policy and application procedure is available from the School of Law. Requests for application materials and the University law school bulletin should be addressed to Law School Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-4617; admissions@law.washington.edu; (206) 543-4078.

GRADUATE PROGRAM

Graduate Program Coordinator

William Gates Hall, Box 353020

(206) 543-4937

gradlaw@uw.edu

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LLM) in Asian and Comparative Law, the law of sustainable international development, intellectual property law and policy, and taxation. The School of Law offers the Doctor of Philosophy (PhD) degree in Asian and Comparative Law only.

Master of Laws

Admission Requirements

1. Minimum B or 3.00 GPA in the most recent two years of study.
2. U.S. applicants must have completed their first degree in law (JD or equivalent) at a school accredited by the American Bar Association.
3. International students must have a first degree in law (LLB, BLaw) or equivalent and a minimum TOEFL score of 580 or 237 (TOEFLC).

Degree Requirements, Asian and Comparative Law

36 credits, as follows:

1. *Required Courses:* LAW B 551, LAW 600, LAW B 550; two courses in Asian and comparative law
2. *Elective Courses:* Additional courses, chosen in consultation with adviser, to bring total credits to 36.

Degree Requirements, Intellectual Property Law and Policy

40 credits, to include:

1. *Required Core Courses:* LAW P 501, LAW P 510
2. *Additional Requirement for Students Not Trained in the Common Law System:* LAW P 503
3. At least 16 additional credits drawn from a list of approved elective courses.
4. Research project and thesis

Degree Requirements, Law of Sustainable International Development

40 credits, as follows:

1. 15 credits in Law School classes. The remaining 25 credits may be earned in any other departments of the University. Sustainable international development students are required to take courses in at least three departments other than the Law School.
2. *Writing and Research Requirement:* Completion of a research paper is required and is generally satisfied by LAW B 578.
3. LAW A 545

Degree Requirements, Taxation

36 credits, as follows:

1. *Required Courses:* LAW T 501, LAW T 502, LAW T 503, LAW T 504, LAW T 510, LAW T 511
2. *Core Electives:* Two of the following courses: LAW T 515, LAW T 516, LAW T 521, LAW T 530
3. *Electives:* Additional courses, chosen in consultation with adviser, to reach 36 credits for degree

Doctor of Philosophy

Admission Requirements

Admission to the PhD program is limited to exceptional scholar-lawyers who are fluent in English and in another language. Prospective PhD students must normally complete the LLM program before being accepted as PhD students. The School does, however, welcome applications from candidates with equivalent academic standing and a demonstrated capacity for advanced research and writing.

Degree Requirements

90 credits, to include:

1. An LLM degree is counted toward the credit necessary for the PhD program.
2. Doctoral thesis seminar (4 credits)
3. Other coursework (26-29 credits): Coursework varies according to student's research interest areas and is determined in consultation with Supervising Committee
4. Doctoral dissertation (27-30 credits)

Financial Aid

Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@uw.edu; (206) 543-4937.

Inquiries

Requests for applications and program brochures for all School of Law LLM programs except the LLM in taxation, as well as information regarding application procedures, should be addressed to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195.; gradlaw@uw.edu.

Requests for applications and program brochures for the LLM in taxation should be addressed to Law School Graduate Tax Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@uw.edu.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

LAW 100 Introduction to American Law (2-5, max. 5) I&S T. MYHRE Examines the structure of the American legal system and how laws are made. Surveys key doctrinal areas of the law learning fundamental legal concepts, and explore how the law functions and evolves over time, including legal issues and decision-making related to statutory or common law. Offered: A.

LAW 300 Introduction to Law (3-6, max. 6) I&S Understanding the legal system, its functions in the social-economic order, legal reasoning, and the world of legal education and the legal profession. Open to nonlaw students only.

LAW 301 Introduction to Common Law Legal Reasoning (3) I&S Examines legal reasoning based on case law precedent using short, modern judicial decisions, summarizing those decisions in case briefs, breaking legal rules down into their elements, applying rules to facts, and reasoning by analogy from judicial decisions to hypothetical fact patterns.

LAW 305 Global Health and Justice (3-5) I&S

LAW 310 Law, Science, and Technology (4) I&S

LAW 410 Problems in Professional Responsibility (4) I&S

LAW 415 Criminal Justice (3) I&S Examines pre-trial rights of persons suspected or accused of crime, primarily those

rights covered by the Fourth, Fifth, Sixth, and Fourteenth Amendments of the U.S. Constitution.

LAW 416 International Contracting: Negotiation and Drafting (3) I&S Skills course designed to introduce process and problems of negotiating and drafting international agreements. Client interviewing and counseling and negotiation and drafting of a contract between parties in the United States and Japan. Open to nonlaw students only. Credit/no-credit only.

LAW 422 Copyright (3) I&S

LAW 429 Public Land Law (3) I&S

LAW 440 Legal Issues of Internet Law (3) I&S Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, propriety rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

LAW 442 Land Law and the Urban Environment (3) I&S Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of nuisance law. Open to law and nonlaw students. Credit/no-credit only.

LAW 443 The Legal Process I (3/5) I&S The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Open only to nonlaw students.

LAW 444 Constitution and American Public Education (3-6, max. 6) I&S Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no-credit only. Offered: jointly with EDLPS 444.

LAW 445 Major Issues in American Constitutional Law (3) I&S Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court's recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and presidential powers. Open to law and nonlaw students.

LAW 447 Critical Perspectives in Law (3) I&S Examination of modern critical legal thought and critics views regarding proposed alternative forms of social ordering.

LAW 476 International Economic Relations and Trade Policy (3) I&S Consideration of international control of national trade policies and permissible transnational reach of national trade or other regulation. The General Agreement on Tariffs and Trade (GATT) and the international monetary system examined from legal and economic perspective. Examination and comparison of prescriptive jurisdiction to public international law.

LAW 477 Law, Literature, and Film ([2-4]-, max. 4) VLPA/I&S An examination of literary and cinematic portrayals of and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."

LAW 481 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment (1-6, max. 6) I&S

LAW 489 Law and Aging (3) I&S Survey of principal areas of law of special concern to aging population, considering healthcare and healthcare decision-making, public and private income maintenance programs, taxation, guardianships, conservatorships, and other methods of protecting the property of the elderly, counseling, and professional responsibility.

LAW 600 Independent Study or Research (*)

LAW 800 Doctoral Dissertation (*)

Law A

LAW A 501 Contracts ([2-8]-, max. 8)

LAW A 502 Civil Procedure I ([2-6]-, max. 6)

LAW A 503 Property I ([2-8]-, max. 8)

LAW A 504 Torts ([2-8]-, max. 8)

LAW A 505 Criminal Law ([2-5]-, max. 5)

LAW A 506 Legal Analysis, Research, and Writing ([1-7]-, max. 7)

LAW A 507 Constitutional Law I: Constitutional Structures of Government ([3/6]-, max. 6)

LAW A 508 Comparative and International Law Survey (3) Taylor, Walsh, Winn Survey of basic principles of public international law; comparative and historical overview of various legal traditions (civil law, common law, Islamic law, and mixed systems). Examines sources, subjects, and challenges of international law, and methodology of comparing foreign legal systems, providing perspective on U.S. legal system and rules. Offered: Sp.

LAW A 509 Administrative Law (3-5)

LAW A 510 Sales (3-4)

LAW A 511 Payment Systems (2/4)

LAW A 512 Secured Transactions (3-4)

LAW A 513 Creditor-Debtor Law ([2-3]-, max. 5)

LAW A 514 Publicly Held Corporations (3)

LAW A 515 Business Organizations (4-5)

LAW A 516 Legal Accounting (3)

LAW A 517 Securities Regulation (4) Examines the federal regulations of the offer and sale of securities and the public offering process under the Securities Act of 1933; exemptions from federal registration; the reporting obligations of public companies under the Securities Exchange Act of 1934, and the examination of the impact of the Sarbanes-Oxley Act of 2002.

LAW A 518 Restitution (3)

LAW A 519 Transmission of Wealth (3-5)

LAW A 520 Property II ([2-8]-, max. 8)

LAW A 521 Community Property (2/3)

LAW A 522 Copyright (3/4)

LAW A 523 Real Estate Transactions (3/4)

LAW A 524 Law, Science, and Technology (3) P. KUSZLER Considers how the linkage between science and law has become more pivotal with advancements in technology. Topics include science in the context of criminal law, public regulation, and individual rights. Explores the power of science to promote justice and expose injustice. Offered: A.

LAW A 525 Water Law (4)

LAW A 526 Copyrights and Trademarks (5)

LAW A 527 Environmental Law (4)

LAW A 529 Public Land Law (3)

LAW A 530 Individual Income Tax ([2-6]-, max. 6)

LAW A 531 Death and Gift Taxation (2-5, max. 5)

LAW A 532 Taxation of Business Entities (5)

LAW A 534 Mergers and Acquisitions (4-6) Deals with tactics, strategy, and state and federal law relating to transactions by means of which corporations and other forms of business entity combine. Emphasizes corporate law with some treatment of federal tax and securities law issues. Prerequisite: either LAW A 515 or LAW A 567.

LAW A 535 Trademarks and Unfair Competition (2)

LAW A 536 Securities and Shareholder Litigation (2) Kaplan Covers securities and shareholder litigation in its broadest sense including federal securities litigation, state securities litigation, SEC enforcement, and state law-based derivative litigation. Offered: Sp.

LAW A 537 Taxation of Corporations, Partnerships, and Limited Liability Companies (4-)

LAW A 538 Estate Planning Workshop (3-4)

LAW A 540 Land Use Planning Seminar (3)

LAW A 541 Transnational Tax (5)

LAW A 542 Land Law and the Urban Environment (3)

LAW A 543 Business Reorganization Under the Bankruptcy Code (4)

LAW A 544 Transnational Commercial Law (3-4) Examines the political economy of transnational commercial law. Uses select international harmonization instruments (e.g. Cape Town Convention on International Interests in Mobile Equipment, UNCITRAL Model Law on Cross-Border Insolvency, Vienna Convention on Contracts for the International Sale of Goods) to illustrate and critique different methodological and institutional approaches.

LAW A 545 International Environmental Law (3-4)

LAW A 546 Patents ([2-4]-, max. 4)

LAW A 547 Critical Perspectives on Law Seminar ([2-4]-, max. 4) Considers law from the point of view of Continental philosophy and critical social theory. Involves close readings and intensive discussion of canonical texts from various critical traditions of thinking about law. Students also write and present papers concerning themes raised by the readings. Offered: A.

LAW A 548 Civil Rights ([2-6]-, max. 6)

LAW A 549 Advanced Legal Research (4)

LAW A 550 Constitutional Law ([2-8]-, max. 8)

LAW A 551 Global Governance Seminar (3-4) Introduces international and transnational regimes governing issues as varied as international economic inequality and instability; conflict and peace-building; humanitarian crises and intervention; and global environmental change. Explores principles of regime design and legal architecture. Evaluates the effectiveness and legitimacy of various modes of global governance.

LAW A 552 Antitrust Law and Policy ([2-5]-, max. 5)

LAW A 553 Feminist Jurisprudence (4) Explores the intersections of law and sex, gender, and sexuality with the aid of various theoretical lenses, prominently feminist legal theory. Focuses on those areas of law where notions of sex, gender, and sexuality seem conflated and confused.

LAW A 554 Labor Relations and the Law ([1-5]-, max. 5)

LAW A 556 Employment Discrimination ([2-4]-, max. 4)

LAW A 558 National Security Law Seminar ([2-6]-, max. 6) *Allen* Three-quarter seminar that provides an opportunity for study and research in selected legal issues relating to national security law and its processes and institutions. Prerequisite: LAW A 507. Offered: AWSp.

LAW A 560 Employment Issues (2/3) Examination of issues under selected employee protection laws. Analysis of the Fair Labor Standards Act, Workers' Compensation, and Social Security Act (related to retirement, disability, and supplemental income benefits). Includes assessment of public assistance issues for low-wage workers. Prerequisite: LAW A 509, LAW A 562, or permission of instructor.

LAW A 561 Law and Economics (2-4, max. 4) Offered: jointly with PB AF 519.

LAW A 562 Employment Law (3-4) Examines the law governing the employment relationship, including the establishment and termination of employment. Topics include employee duties, prohibited employment practices, regulation of wages, hours, and benefits of employment, workers' compensation, and occupational safety and health.

LAW A 563 Local Government Law (3)

LAW A 564 American Legal History (1-4, max. 4) Reviews the American legal history from colonial times to the civil rights era. Readings cover early constitutionalism, the republican revolution, the antebellum movement, the end

of slavery, the regulatory state, and rights of women and minority groups.

LAW A 565 American Indian Law (4)

LAW A 566 Theories of Justice ([2-4]-, max. 4)

LAW A 567 Closely Held Business Organizations (4) Examines elements of various unincorporated business forms and closely held corporations. Reviews relevant state statutes and case law related to each form relevant to advising small business clients on the choice of business form utilized in their ventures. Not open to students who have taken LAW A 515. Offered: A.

LAW A 568 Collective Bargaining and Labor Arbitration (2-4)

LAW A 569 Investments Funds and Managers Seminar (3) *Krug* Explores U.S. regulation of investment managers and invest companies, including hedge funds and mutual funds. Topics draw heavily from federal securities laws, particularly the Investment Advisers Act and the Investment Company Act of 1940, and encompass regulatory developments/proposals and policy considerations underpinning investment industry regulation. Offered: Sp.

LAW A 571 International Organizations Seminar (3) Provides a critical introduction to some of the issues that are important to understanding how international organizations function today. Focuses on the role of international organizations in the modern forms of international law-making, regulation, and global governance.

LAW A 572 Criminal Justice Policy (4) Provides overview of key policy issues arising in the criminal justice system, such as mass incarceration, victim's rights movement, racial disparities, and wrongful conviction. Considers role of prosecutors and public defenders in contributing to or alleviating these problems, and how participants in the system can provide leadership in addressing them.

LAW A 574 International Law (2-4, max. 4)

LAW A 575 Human Rights History: Rights, Revolutions, Republics, 1750-1850 (4) *Walsh* Comparative constitutional history of rights lawyering. Includes political trials from French Revolution in Europe through postcolonial Jacksonian American Republic. Covers basic rhetoric of early human rights discourse: on treason, seditious libel, racial equality, servitude, labor conspiracy, religious liberty, consumer protection, and codification. Offered: W.

LAW A 576 Cross-Border and International Criminal Law (3-4) *Allen* Examines responses by states and international organizations to international and transnational crimes. Covers substantive and procedural international criminal law, criminal responsibility, defenses and immunities, and the prosecution and punishment of international criminals in both national and in international tribunals. Prerequisite: LAW A 505. Offered: W.

LAW A 577 Immigration Law (3/4)

LAW A 578 International Business Transactions ([1-4]-, max. 4)

LAW A 579 Child Advocacy Seminar (2-4, max. 4) *Kelly* Includes child abuse and neglect, parental rights termination, paternity, and an overview of other practice areas as they intersect with issues of child abuse and neglect. Focuses on Washington law and practice, covering applicable substantive and procedural law, local practice rules, and professional responsibility. Offered: A.

LAW A 580 Family Law (3-5)

LAW A 581 Washington Constitutional Law Seminar ([1-4]-, max. 4) Studies the history, structure, content, and role of state constitutions generally, and the development of Washington's constitution in particular. Examines the important distinctions between the federal constitution and state document, and the interplay between them. Covers state declarations of rights and the substantive sections of state constitutions that relate to the structure, role, and constraints. Offered: A.

LAW A 582 Bankruptcy (3-4)

LAW A 583 Insurance Law (4)

LAW A 584 American Public School Law (3) Constitutional, statutory, and common law principles common to all public education systems within the United States. Applicable law in a variety of substantive legal areas such as torts, property, contracts, administrative law, and fundamental rights. Offered: Sp.

LAW A 585 Admiralty (3-5)

LAW A 586 Advanced Family Law Seminar (2-4) Discusses family law topics previously excluded or covered only minimally including: adoption, paternity, guardianship, third-party custody, parenting plans in the child welfare context, and family law in the intimate partner violence context. Prerequisite: LAW A 580.

LAW A 589 Elder Law (4)

LAW A 590 Constitutional Law: Equal Protection, Fundamental Rights, and Due Process of Law (4-5)

LAW A 591 Constitutional Law: Freedom of Expression (4-5)

LAW A 592 Constitutional Law II ([2-8]-, max. 8) Examines individual constitutional rights, primarily involving guarantees of due process and equal protection found in the 5th and 14th Amendments. Focuses on constitutionality of laws that classify people on basis of race, sex, sexual orientation, and other bases, as well as laws that restrict abortion, contraception, sexual activity, and other individual freedoms. Prerequisite: LAW A 507.

LAW A 595 Jurisprudence and Legal Philosophy ([2-4]-, max. 4) Surveys classic jurisprudential questions in the study of the nature, norms, and justifications of legal systems. Focuses on theories of adjudication, and covers the major twentieth and twenty-first century schools of jurisprudential thought, especially American Legal Realism, Natural Law, Legal Positivism, and Critical Legal Theory.

LAW A 597 Intensive Legal Writing Workshop (2-4) Focuses on how the rhetorical situation of legal writing influences choices about grammar, syntax, sentence structure, and paragraph structure. Students learn to use structures that best serve law-trained readers' needs for clear, concise, cohesive writing, and practice critical reading skills and techniques for self- and peer-editing.

LAW A 598 Legal Research I (3) Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Offered: jointly with LIS 591.

LAW A 599 Legal Research Methods (3/4) Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LIS 592.

Law B

LAW B 500 Civil Procedure II (2-4)

LAW B 503 Evidence ([2-6]-, max. 6)

LAW B 506 Conflicts of Laws ([2-6]-, max. 6)

LAW B 507 Federal Courts and the Federal System (3/4)

LAW B 508 Business, Social Responsibility, and Human Rights (2-4) *A. RAMASASTRY* Addresses business obligations to respect human rights. Offered: A.

LAW B 510 Problems of Professional Responsibility (2-4, max. 4)

LAW B 511 Decision Making for Lawyers: Concepts, Duties, and Skills (3) Enhances students' legal judgment, problem-solving, and prediction skills. Analyzes the psychology of decision making; describes the legal malpractice and disciplinary implications of deficient decision

making; identifies the frequency, costs, and predictors of adverse legal outcomes; and demonstrate methods to improve decision making.

LAW B 512 Legislation and the Formulation of Public Policy (2-3)

LAW B 513 Advanced Seminar ([2-4]-, max. 4) Covers advanced topics in evidence law and policy. Prerequisite: LAW B 503, which may be taken concurrently.

LAW B 514 Street LawClinic ([1-8]-, max. 8)

LAW B 515 Criminal Procedure: Investigation (5)

LAW B 516 International Contracting ([2-4]-, max. 4)

LAW B 517 Juvenile Justice Seminar ([1-6]-, max. 6)

LAW B 518 Appellate Advocacy ([1-3]-, max. 3) Credit/no-credit only.

LAW B 519 Pre-Trial Practice (3-4) Offered: A.

LAW B 520 Trial Advocacy ([2-6]-, max. 6) Credit/no-credit only.

LAW B 521 Trial Advocacy II (3-, max. 6) *Howard* Addresses more advanced trial advocacy issues than are covered in LAW B 520. Includes a civil or criminal track of study and work with trial lawyers who specialize in that area of practice on more sophisticated issues of strategy, evidence, creative use of exhibits at trial, technology in the courtroom, and ethics. Prerequisite: LAW B 520; permission of the Director of the Trial Advocacy Program. Offered: WSp.

LAW B 522 Mediation Skills Training (1) Focuses on collaborative style of mediation. Through a mix of theory and practice, students learn the skills, tools, and processes used by mediators. Students observe and practice the five-steps of the mediation process, through demonstrations and roleplaying. Individual coaches work with students to hone their skills. Credit/no-credit only. Offered: AW.

LAW B 523 Negotiation (2-4, max. 4) Credit/no-credit only.

LAW B 524 Alternative Dispute Resolution Seminar (2-, max. 4) Provides opportunities for study, research, and writing related to the legal, policy, and ethical issues in the emerging field of alternative dispute resolution (ADR). Research papers satisfy the advanced writing requirement for JD students. Prerequisite: permission of instructor if LAW B 525 already completed.

LAW B 525 Alternative Dispute Resolution (3) Overview of alternative dispute resolution including negotiation, mediation, arbitration, med-arb, early neutral evaluation, mini-trials, summary jury trials, and E-ADR. Critical evaluation of each process occurs through a combination of assigned readings, roleplay exercises, videotapes, guest presentations, and student-designed classes.

LAW B 526 Mediation Clinic ([1-10]-, max. 10) Credit/no-credit only.

LAW B 527 Criminal Prosecution Clinic (8) Credit/no-credit only.

LAW B 528 Workers' Rights Clinic ([2-8]-, max. 8) Provides clinical training in workers' rights and administrative law under the supervision of members of the Law School faculty. Students represent workers in employment law matters such as unemployment compensation benefits or wage claims. Credit/no-credit only.

LAW B 529 Advanced Environmental Law and Practice ([1-4]-, max. 4)

LAW B 530 Judicial Externship (1-18, max. 18)

LAW B 531 Immigration Law Clinic ([1-8]-, max. 8) Credit/no-credit only.

LAW B 532 Advanced Clinic (1-4, max. 4) Advanced clinical training under the supervision of a law school faculty member in order to complete a project or case begun by the student during a clinic, or to pursue in more depth the subject of the clinic. Prerequisite: Clinical basis for continued work. Credit/no-credit only.

LAW B 533 Interviewing and Counseling for Lawyers (2/3) Credit/no-credit only.

LAW B 534 Counseling Workshop (1-, max. 3) Provides an introduction to the culture of counseling in the legal profession. Students learn about effects of power and privilege in the United States and implications for counseling relationships. Students increase their abilities to engage in respectful practice of counseling people from all backgrounds.

LAW B 535 Legislative Externship (1-18, max. 18) Credit/no-credit only.

LAW B 536 Drafting Business Documents ([1-3]-, max. 3)

LAW B 537 Refugee Advocacy Clinic ([1-12]-, max. 12) Credit/no-credit only.

LAW B 538 Agency Externships (1-18, max. 18) Credit/no-credit only.

LAW B 539 Public Interest Law Externship ([1-18]-, max. 18) Credit/no-credit only.

LAW B 540 Japanese Law (4) Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with JSIS A 540.

LAW B 541 Chinese Law (4) Introduction to the institutions and processes of the Chinese legal system. Focuses on the contemporary system and its role in relation to political, economic, and social developments. Examines legal aspects governing foreign trade and investment in China. Offered: jointly with JSIS A 541.

LAW B 542 Comparative Korean Law (2-4) *Taylor* Introduction to basic institutions and processes of the Korean legal systems. Emphasis on the historical development and traditional roles of law, the reception of Western law, and cultural and structural factors that influence the function of law and legal institutions.

LAW B 544 Civil Litigation in Comparative Context ([2-4]-, max. 4) Covers international jurisdiction, service process abroad, taking evidence abroad, applicable laws and treaties, comparison of trial procedures, enforcement of foreign judgments, and use of arbitration. Uses United States and translated Japanese cases.

LAW B 545 Survey of American Law and Practice (6) Provides an integrated introduction to the U. S. legal system, legal analysis, legal research, and legal writing. Introduces tools and techniques for basic legal research in U. S. materials. Credit/no-credit only.

LAW B 546 Cross-Border Business Transactions Between China and the United States (4) *Page, Zang* Uses case study methodology to explore how United States law and Chinese economic policy and business laws are used in achieving Chinese-United States cross-border transactions. Open to law, business, and international studies students.

LAW B 547 Comparative Constitutional Law (2-5) Examines the constitutional structure of the U.S. government and the jurisprudence of U.S. constitutional courts, and compares them with the constitutional structures and jurisprudence of several foreign countries.

LAW B 548 Forensics (4) *Bailey* Introduces the world of expert witnesses in both criminal and civil cases, looking at the forms of scientific and technical knowledge commonly involved. Covers not only the standard and rules governing expert testimony, but also provide opportunities for hands-on experience. Offered: W.

LAW B 549 Government Regulation of Business in Japan (3) Offered: jointly with JSIS D 549.

LAW B 550 American Legal Systems and Method ([1-6]-, max. 6) Provides an integrated introduction to the basic structure and principles of the U.S. public and private law systems; the sources and techniques for basic legal re-

search; and the analytical and writing skills expected of U.S. trained lawyers.

LAW B 551 Comparative Law Seminar ([2-6]-, max. 6)

LAW B 552 Tutorial in Comparative Law ([1-4]-, max. 6)

LAW B 553 Chinese Legal Tradition (3) Offered: jointly with JSIS D 553.

LAW B 554 Research Tutorial ([1-12]-, max. 12) Introduces students to social science research methods that may be applicable to their research agenda. Focuses on reading, discussion, commentary, writing, and especially rewriting under close and targeted supervision by the professor. Offered: jointly with JSIS 595.

LAW B 555 Roman Law (3)

LAW B 556 Islamic Law (2-5) Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with NEAR E 536.

LAW B 557 Graduate Writing Seminar ([2-6]-, max. 6) Through class instruction and individual tutoring, students select research topics, submit periodic writing assignments, and make formal presentations, culminating in the submission of a major research paper.

LAW B 558 Doctoral Thesis Seminar (2-10, max. 10) Students draft thesis abstracts, tables of contents, preliminary chapters, and present arguments orally to identify core theories and applied studies to incorporate in their work. Read a selection of published work and indicative articles drawn from the list of relevant sources for individual thesis-in-development.

LAW B 559 Comparative Law: Europe, Latin America, and East Asia (4)

LAW B 560 Criminal Justice Externship (1-18, max. 18) Credit/no-credit only.

LAW B 561 International Law of the Sea (3-4)

LAW B 562 Quantitative Methods (4) Covers logic, applications, and limits of quantitative reasoning in the law. Includes mathematics from areas such as statistics, game theory, and social-choice theory, together with legal examples from areas such as discrimination, torts, and CLS to help (re)consider issues such as proof, deterrence, and identity politics.

LAW B 563 Marine Law and Policy Seminar ([2-6]-, max. 6) Study and research in selected legal problems relating to ocean and coastal law, marine trade and transportation, marine resources, and protection of the marine environment. Students prepare and present a research paper and critique papers prepared by other students. Prerequisite: LAW B 561, LAW B 565.

LAW B 564 Women, Poverty, and Natural Resource Management (2-4) Uses an interdisciplinary approach to issues of development and environmental conservation, helping students to understand the complexities that face policy and law reform in developing countries. Discusses gender mainstreaming as a prerequisite to development and conservation solutions. Offered: A.

LAW B 565 U.S. Coastal and Ocean Law (3-5) *Allen* Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation.

LAW B 567 General Externship Perspectives Seminar (2, max. 6) Credit/no-credit only.

LAW B 568 Field Seminar in Law, Rights, and Governance (3-5) *K. FRIEDMAN, A. GODOY, S. PEKKANEN, M. SPARKE* Exposes students to theoretical and policy debates about the causes and consequences of legal evolution, rule of law, and a broad range of world governance concerns. Topics include human rights, markets, commerce, climate, environment, migration, institutions, justice, order, and rule of law. Offered: jointly with JSIS 599.

LAW B 570 Bio-entrepreneurship and the Law (3) Covers legal issues in bio-entrepreneurship by tracking product development through a VC-backed start-up company.

LAW B 571 PhD Colloquium (1-3, max. 3) Designed for students to engage with research agendas in the academy and to build a professional skill set for success - from writing conference abstracts and preparing articles for publication to 'workshopping' papers and developing their dissertations. Credit/no-credit only.

LAW B 572 Election Law (3-4) Examines the law of elections in the United States. Major themes include the design of electoral maps; the protection of voting rights; political parties and state action; money in politics; and the administration of elections.

LAW B 573 Supreme Court Decision Making (2-4, max. 4) Examines Supreme Court decision making from both a theoretical and practical perspective. Surveys representative cases on the Court's current docket. Extensive preparation required of participants, who play the roles of lawyers, justices, and commentators. Emphasis on developing appellate advocacy skills.

LAW B 575 Family Law: Selected Topics (2-3) *Mastroianni, Price* Covers current cutting-edge and complex areas of family law that challenge traditional definitions of "family." Examines marriage, dissolution, and parenting disputes through the lens of "nontraditional" families and families created through medical intervention. Prerequisite: LAW A 580 or permission of instructor. Offered: A.

LAW B 576 Climate Justice Seminar ([1-6]-, max. 6)

LAW B 577 Law, Literature and Film ([2-4]-, max. 4) An examination of literary and cinematic portrayals of, and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."

LAW B 578 Seminar on Legal Problems of Economic Development ([1-6]-, max. 6)

LAW B 579 Law and Development: History and Theories (3-4) *Ramaswamy* Examines the role of law in fostering economic and social development in developing countries, emerging markets, and nations in transition. Provides a historical overview of the role of law in alleviating poverty and exposes students to key theoretical perspectives. Offered: A.

LAW B 580 Externship Tutorial (2) Credit/no-credit only.

LAW B 581 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment ([1-6]-, max. 6)

LAW B 582 International Development Practicum (1-6, max. 6) Provides experience with an approved non-profit organization, business, judicial or legislative body, or intergovernmental or governmental agency on issues related to law and development and sustainable development. Students work under the guidance of experienced practitioners. Credit/no-credit only. Offered: AWSpS.

LAW B 584 Indian Law Seminar ([2-6]-, max. 6) Covers advanced topics in Indian Law. Prerequisite: LAW A 565 or permission of instructor.

LAW B 585 Natural Resources Law ([1-4]-, max. 4)

LAW B 589 Social Enterprise Law (2-3) *D. Markham* Social enterprise is increasingly driving commerce, corporate norms, and investment goals globally. Begins with an introduction of social enterprise, including underlying principles and legal framework, followed by in-depth analysis of governance, operational and investment considerations, both domestic and abroad. Includes lectures, reading, and one student project. Offered: W.

LAW B 590 The United States Constitution: Past, Present, and Future (2)

LAW B 591 Law and Society in Asia ([2-6]-, max. 6)

LAW B 593 Natural Resources Commons Property (3) A review of the different forms of natural resources and an exploration of the desirability of managing certain resources as commons or private property. Covers a review of the successes and failures by various groups in setting policy in this area.

LAW B 594 Public Land Law Seminar ([2-6]-, max. 6)

LAW B 595 International Humanitarian Law (3-5) *Lorenz* Investigates International Humanitarian Law (sometimes called the Law of Armed Conflict), the field concerned with rules developed by civilized nations to protect victims of armed conflict, including the Geneva Conventions. Case studies include the conflict between Israel and the Palestinians, as well as developments in Afghanistan and Iraq. Offered: Sp.

LAW B 596 International Protection of Human Rights ([2-4]-, max. 6) *Stilt* Examines international treaty and customary law protecting fundamental human rights against abuse by governments. Major international systems studied are the U.N., the Council of Europe, and the O.A.S. Readings include international and American judicial opinions, treaties, and studies by human rights groups and scholars.

LAW B 597 Journal Seminar (1-3) Focuses on topic selection, research, and drafting to assist students on one of the law school journals. Provides students with the opportunity to explore a topic in depth, to think critically about current law, and to consider future developments by writing a substantial note or comment. Does not satisfy the advanced writing requirement.

LAW B 598 Advanced Research and Writing Seminar ([1-6]-, max. 6)

LAW B 599 Special Topics (1-12, max. 12)

Law C

LAW C 530 For-Profit Small Firm Externship (4-6) Field-based experience in pre-approved for-profit small law firm (10 attorneys or fewer) under supervision of authorized field supervisor. Students may not receive any monetary compensation for the work, nor may clients be billed for work performed by a student. Students must enroll concurrently in an approved companion seminar. Credit/no-credit only.

LAW C 535 For-Profit Corporate Counsel Externship (4-6) Field-based experience in pre-approved corporate legal department under supervision of authorized field supervisor. Students may not receive any monetary compensation for the work, nor may clients be billed for work performed by a student. Students must enroll concurrently in an approved companion seminar. Credit/no-credit only.

Law E

LAW E 500 Advanced Writing Project (1-3, max. 3) Independent research and writing project supervised by a faculty member. Projects are structured to develop skills in research, analysis, and writing. Offered: AWSpS.

LAW E 501 United States Contract and Sales Problems (3-4) Examines the distinctive features of Common Law and Civil Law contract and sales law. Introduces the sources of contract and sales law, and emphasizes basic elements as well as problems of formation and remedies. Offered: S.

LAW E 502 White Collar Crime (3-4)

LAW E 503 Analytic Writing (3)

LAW E 504 Civil Process and Litigation (3) Introduces adjudicatory jurisdiction, covering problems of parallel litigation; service (notice); discovery; recognition/enforcement of foreign state and country judgments; and arbitral awards, as well as choice of forum (court or arbitration). Focuses on the distinctive features of Common Law/Civil Law civil litigation. Offered: S.

LAW E 505 United States Law-Making Institutions and Processes (3-4) Introduces distinctive features of the United States legal system, including the constitutional design

for the structure and powers of the judicial, executive, and legislative branches; United States federalism and federal and state administrative procedure; and the scope of regulatory authority. Offered: S.

LAW E 506 Business and Financial Literacy for Law Students (3) Introduces students to a broad range of fundamental business and financial topics. Emphasizes breadth, relevance, and promoting a basic understanding of foundational business concepts and terms; financial statements; quantitative concepts; how markets function; core business challenges; and practical, business-related challenges often faced by lawyers.

LAW E 507 Access to Justice Seminar (2) Explores the legal, ethical, and financial issues involved in providing legal services to moderate income persons. Uses a combination of lectures and interactive discussion. Credit/no-credit only.

LAW E 508 Persuasive Writing (2-4) *Anderson* Studies persuasion and rhetoric by practicing legal argument: working with facts, framing issues, constructing legal arguments. Studies examples of good and bad persuasive writing. Students practice written advocacy skills in a number of assignments. Students practice advocacy in the context of pre-trial motions and appeals.

LAW E 509 European Union Law (2-4) Survey of the legal origins of the European Union and the synthesis of the major European legal traditions achieved. Focus on the process of harmonizing national laws of the member states and economic integration in the area of competition law and free movement of goods and services.

LAW E 510 Banking Law (2-3) Introduces the basics of banking law and regulation. Topics include separate sections on U.S. regulation of financial services with emphasis on federal regulation of banks, and on international, cross-border, and comparative banking regulatory issues.

LAW E 511 Venture Capital Deals (4) *O'Conner* Focuses on the legal environment of venture capital (VC) financing of technology start-ups. Analyzes relevant statutes and regulations, and the standard set of negotiated terms in typical VC deals. Students negotiate and draft VC deal documents. Offered: W.

LAW E 512 Law, Globalization, and Multinational Corporations (3) An interdisciplinary workshop that examines the role of multinational corporations in a global society. Topics include the legal construct of the multinational corporation, the multinational and the state, the multinational and human rights, and the multinational in the international arena. Offered: jointly with JSIS D 512.

LAW E 513 Theories and Tools for Combatting Corruption ([1-4]-, max. 4) Corruption has been identified as an obstacle to development, and a 'cost of doing business' in many countries. Examines theories, causes and consequences of corruption, and select regimes established to combat and measure it, e.g., UNCAT, ORCD Anti-Bribery Convention, U.S. Foreign Corrupt Practices Act, and the Transparency International's Corruption Perceptions Index.

LAW E 514 The Law of Nonprofit Organizations (2-4, max. 4) Examines laws generally applicable to nonprofit corporations and legal issue relating to co-operatives, credit unions, and thrift/mutual associations. Attention given to the Washington Nonprofit Corporations Act with comparable statutes and model legislation.

LAW E 515 Post-Conviction Review (2-4) *Anderson, Katsounis* Covers direct appeals and collateral remedies in state and federal criminal proceedings. Topics include jurisdictional issues, harmless error, exhaustion, time limits, cognizable claims, history of the Great Writ of habeas corpus, and the federal AEDPA statute. Offered: Sp.

LAW E 516 Criminal Procedure: Adjudication (4) Covers the formal charging, trial, and appellate stages of criminal proceedings, including grand jury proceedings, prosecutorial discretion in charging, pretrial release and detention, charging and venue joinder and severance, double jeopardy

dy assistance of counsel, discovery, and disclosure, criminal trials appeals, and collateral post conviction remedies.

LAW E 517 Legal Information Technology (2-4) A. THOMSON, B. WILLIAMS Introduces the theory and practice of legal informatics.

LAW E 518 Torts II (3-4) Wolcher Covers advanced topics in tort law, including defamation, invasion of privacy, intentional infliction of mental distress, medical malpractice, misuse of legal proceedings, misrepresentation, interference with prospective advantage, nuisance, products liability, toxic torts, trespass to chattels, conversion, and vicarious liability. Prerequisite: LAW A 504. Offered: Sp.

LAW E 519 Philosophy of Law (4) Explores jurisprudence as “the jurist’s quest for a systematic vision that will order and illuminate the realities of the law” and legal philosophy as “the philosopher’s effort to understand the legal order and its role in human life.” Examines various texts, emphasizing works of one or more proponents and critics of liberalism.

LAW E 520 European Union Constitution (4) Walsh Examines the European Union constitution adopted in the Lisbon Reform Treaty: history, values, and objectives; EU institutions and finances; economies, political, and constitutional competences; citizenship and democracy; human rights and fundamental freedoms; common foreign policy; security and defense; and amending the constitution. Offered: A.

LAW E 521 Advanced Trial Advocacy (3)

LAW E 522 Advanced Constitutional Law: Sexual Orientation and Gender Identity (1-4, max. 4) Nicolas Examines various constitutional provisions from a gay rights perspective. Topics include the rights of equal protection and substantive due process, as well as the First and Ninth Amendments and the Full Faith and Credit Clause. Offered: A.

LAW E 523 Entrepreneurial Law Clinic ([1-9]-, max. 9) Prerequisite: LAW A 526, LAW E 547, or LAW A 546. Offered: S.

LAW E 524 Child Advocacy Clinic ([3-12]-, max. 12)

LAW E 525 Poverty Law (4) Overview of legal issues affecting poor people, including relevant background readings on poverty and access to justice, and selection problems such as housing and homelessness, education, employment issues of low-wage workers, income support and welfare reform, consumer law, family law, and child care.

LAW E 526 Law Reform in Transition Economies Seminar ([2-4]-, max. 6) Clarke, Ramasastry, Taylor Using interdisciplinary perspectives and case studies, this seminar probes the assumptions, methods and outcomes of commercial law reform in transition economies. Also highlights and critiques the role of international lawyers in this important, emerging area of practice.

LAW E 527 Bankruptcy Client Representation Project ([1-4]-, max. 4) Kuno Provides an opportunity for students to interview a client, evaluate the appropriateness of different forms on bankruptcy as a solution to their debt problems, and provide representations in obtaining the bankruptcy. Student teams are paired with pro bono attorneys under the supervision of a part-time faculty member. Credit/no-credit only. Offered: W.

LAW E 528 Appellate Advocacy Clinic (2-, max. 4) Clinical training in appellate litigation with both seminar and practical components dealing with appellate procedure, strategy, and applicable substantive law. Students represent clients in state appellate court, writing at least one appellate brief and participating in oral argument.

LAW E 529 Tribal Court Public Defense Clinic (4-, max. 12) Offers clinical training in substantive areas of law implicated in representation of Native American tribal court criminal and dependency proceedings. Open to third year students in the JD program. Offered: AWSp.

LAW E 530 Race and Justice Clinic (3-4, max. 12) Focuses on how lawyers can address racial disparities for youth in the juvenile justice system by advocating in multiple forums. Students participate in direct representation on cli-

ents, community education, and coalition building. Topics include the history of race in juvenile justice, past efforts to reduce disproportionate minority contact in juvenile justice, the School to Prison Pipeline, skills training, community lawyering, and systems change.

LAW E 532 Sports Law (3/4) Analyzes sports cases and materials that cover multiple disciplines, including contracts, torts, constitutional, antitrust, labor and employment, intellectual property, and criminal law. Participation in problem solving exercises and drafting and negotiations sessions, which explore areas like player and coaching contracts, investigation of NCAA rules infractions, and possible sanctions against universities.

LAW E 533 Rights in America: Equality, liberty, and Democracy (4) Deep historical exploration of a jurisprudentially revolutionary constitutional conflict that pits courts, local government, and the U.S. Congress in passionate struggles over gay and lesbian antidiscrimination rights; freedoms of speech and religion; and African-American political equality in the nation’s capital. Offered: S.

LAW E 534 Human Rights Law: Philosophy and Practice (4) Explores international human rights law through a rigorous curriculum including both human rights philosophy and practice. Topics include aspects of human rights with various disciplines from environmental law and public health to business. Prerequisite: LAW B 596; LAW A 574, both of which may be taken concurrently.

LAW E 535 Basic Income Tax Concepts (3) Basic federal income tax principles, how the tax law impacts a wide variety of business and personal transactions and decisions, and what a reformed tax law might look like.

LAW E 536 Practical and Professional Responsibility Issues in the Small or Solo Law Practice (3-4) Credit/no-credit only.

LAW E 537 Refugee Law (2) Examines the processes in the United States for the admission of refugees and for the adjudication of asylum claims. Explores international refugee policy and evolving legal norms concerning asylum, temporary protection, repatriation, resettlement, and internal displacement.

LAW E 538 Transnational Civil Litigation in U.S. Courts (3-4) Examines the law governing private civil disputes in U.S. courts arising from transnational transactions, including: jurisdiction; forum selection and choice-of-law clauses; extraterritorial service of process, discovery, and application of U.S. law; parallel proceedings; foreign sovereign immunity; Act of State doctrine; and recognition and enforcement of foreign judgments.

LAW E 539 United States and European Union E-Commerce Law (2/3) Compares the different attitudes to regulation of e-commerce and the information society in the U.S. and the European Union. Topics may include: an introduction to European Union institutions, regulatory, cultural themes in the Internet; e-society and e-commerce in Europe; regulation of illegal, harmful content, and Internet Service Provider liability, etc.

LAW E 540 Transnational Litigation (3) J. HALEY Considers transnational litigation involving civil, common, and hybrid law jurisdictions. Students learn nuances of how jurisdiction is asserted and forum determined in global transnational disputes. Offered: A.

LAW E 541 Cannabis Law Seminar (2-3) S. O’CONNOR Introduces students to federal and state laws governing medical and recreational cannabis. Guest lecturers include government officials, cannabis law practitioners, and industry leaders. Students write and present a substantial research or policy paper. Offered: A.

LAW E 542 Queer Youth Advocacy (2) Addresses the legal needs of lesbian, gay, bi-sexual, and transgendered youth. Topics include educational advocacy; legal consequences within the parent-child relationship, access, consent, and right to refuse physical and mental health services; and accessing services for homeless and foster youth.

LAW E 543 Professional Ethics for International LLM Students (3-4) K. BOXX Provides foreign-trained LLM students background in professional responsibility issues, including confidentiality, conflicts of interest, role of the lawyer, and understanding business issues. Designed for international students to master professional responsibility rules online prior to arrival at law school, with discussion sections while in residence. Offered: S.

LAW E 544 Privacy Law (2) Examines the legal doctrines of privacy and confidentiality used to protect personal information. Aims to understand how courts and legislatures seek to protect information as new technologies and institutional practices emerge. Studies scope and implications of federal statutes that attempt to establish fair information practices with respect to electronic personal information.

LAW E 545 International Trade Law (2-4) Introduces the legal framework, policies, and jurisprudence of the World Trade Organization (WTO). Provides an overview of the regulation of trade in goods, services, and intellectual property that is necessary for international legal practice, and provides the policy analysis to better understand the trade dimensions of international legal disputes.

LAW E 546 International Commercial Arbitration (2-3) Introduces the legal framework of international commercial arbitration (ICA) with a focus on the New York Convention of 1958 and the United States Federal Arbitration Act of 1925.

LAW E 547 Robotics Law and Policy (2) R. CALO Explores the legal and policy aspects of near-term robotics and artificial intelligence. Relevant technologies include driverless cars, drones, medical, personal or service robots, and various expert systems. Readings draw from multiple disciplines, but focus particularly on legal or policy sources. Offered: Sp.

LAW E 549 International Investment Law and Practice (4/5) Pekkanen Examines the rise of international investment law and practice, including topics such as Bilateral Investment Treaties (BITs), standards of treatment, investor-state arbitrations, and social and political controversies related to the governance of foreign direct investment (FDI) in developed and developing countries. Offered: jointly with JSIS B 549.

LAW E 550 Complex Litigation Seminar (2-4) Examines practical and theoretical problems associated with complex litigation, including class actions and multidistrict litigation. Prerequisite: either LAW B 500 or LAW B 507.

LAW E 551 Law and Entrepreneurship (3/4) Planning-oriented course uses the problem method to explore the corporate tax and securities law, general business and financial considerations related to small business formation and financing. Prerequisite: LAW A 515; LAW A 530.

LAW E 552 Regulation of Business - W.R. Grace, a Case Study (4) Stevelman Surveys prominent areas of law relevant to American corporations using W.R. Grace and Co. as a case study. Includes corporate disclosures in SEC filings; SEC enforcement actions; litigation between Grace and the EPA; Grace’s bankruptcy plan; and criminal prosecution of Grace. Offered: W.

LAW E 553 Technology Law and Public Policy (2) Survey of the domains of public policies that have been affected by the information revolution. Examines issues from Internet taxation, to personal data privacy, information warfare. Discusses the implications of the new public policies and whether it is feasible for states to enact different information policies.

LAW E 554 Technology Law and Public Policy Clinic ([2-4]-, max. 12) Clinical training in legislative and public policy advocacy under supervision of law school faculty. Examines legislative process, drafting, commentary and advocacy, appellate advocacy, and professional responsibility concerns. Supervised practice experience representing public interest with respect to law and technology. Prerequisite:

LAW E 553, which may be taken concurrently. Credit/no-credit only.

LAW E 555 Legislation ([2-5]-, max. 5) *Andersen, Vaughn, Watts* Studies topics related to legislation and the legislative process. Examines the structure and operation of legislative bodies as well as the contemporary debates and laws that surround the process. Considers the theories and canons of statutory construction and interpretation. Introduces the basic techniques of statutory drafting. Offered: W.

LAW E 556 International Human Rights Clinic ([1-12]-, max. 12) *Godoy* Interdisciplinary clinical training in international human rights. Includes seminar component on legal issues, practice skills, and reflections on human rights projects. Fieldwork on human rights projects tests, develops, and enhances skills training through real-world human rights practice with cross-campus, U.S., and international partnerships. Credit/no-credit only. Offered: AWSp.

LAW E 557 Human Rights Advocacy Seminar (2-4) *Ramasatry* Provides interdisciplinary training in international human rights advocacy. Provides background knowledge and exposure to skills needed to participate effectively in advocacy efforts, including the Interdisciplinary International Human Rights Clinic. Offered: AWSp.

LAW E 558 Voting Rights Research and the Law (3) Address two primary topics related to the Voting Rights Act of 1965, Sections 2 and 5, and their application today: 1) redistricting and minority representation; and 2) the protection or suppression of the right to vote. Also includes introductory research methods and statistical analysis.

LAW E 560 Contemporary Muslim Legal Systems Seminar (2-6, max. 6) *Lombardi* Provides a forum for in-depth research of legal developments in nations where governments are trying to establish legal systems that ensure economic development and human rights, while at the same time ensuring that their law respects "Islamic norms." Prerequisite: LAW B 556. Offered: A.

LAW E 561 Critical Race Theory (2-4) Provides an overview of Critical Race Theory (CRT) and the contrasts between CRT and liberal and conservative analytical frameworks on race and the law. Examines the questions and criticisms raised about CRT, as well as the impact of the field on legal and political discourse.

LAW E 562 Legal Issues in Museums (4) Explores the legal issues faced by art and science museums. Topics include copyright/trademark law, how the First Amendment protects controversial exhibits, repatriating Native American remains and cultural artifacts, donor rights, art appraising, wartime looting, and the ongoing debate over stewardship and ownership of the world's natural and cultural resources. Offered: jointly with MUSEUM 562.

LAW E 566 Innocence Project Northwest Clinic (3-4, max. 12) Offers students clinical training investigating and litigating claims of actual innocence on behalf of prisoners serving lengthy sentences for serious crimes. Open to second- and third-year students in the JD program.

LAW E 567 Technology Transfer Law and Policy Seminar (2) *O'Connor* Covers the law and policy affecting university and non-profit research commercialization and technology transfer. Focuses on the Bayh-Dole Act, the laws and regulations covering data, copyrightable works, materials, tax exempt issues, employee assignments, and other matters. Offered: W.

LAW E 568 Indian Law Clinic (4-, max. 12) Supervised practice component on Indian law practice and procedure and advocacy skills. Provide legal advice, brief services, and representation to low income Indian clients under the direct supervision of a practicing attorney. Client counseling research, negotiation, and community education. Offered: AWSp.

LAW E 569 Advanced Mediation Practicum (3) *Ewalt* Advanced clinical practicum in mediation under the supervision of the faculty and experienced mediators. Students

convene and mediate cases referred to the Mediation Clinic from government agencies and other sources. Only for students who have successfully completed the Mediation Clinic LAW B 526, or have other comparable experience. Offered: A.

LAW E 570 International Economic Relations and Comparative Trade Policy (3/4)

LAW E 572 Race and the Law (3-4) Evaluates the legal regulation of race in the United States. Addresses the racial and legal history of major groups in the United States, including African-Americans, Asian-American, Latinos, Native Americans, and whites, and examines the nexus between law and the construction of race as a concept and locus of identity.

LAW E 575 Veterans Legal Aid Clinic (3, max. 9) Students provide legal aid to low income veterans on upgrading military discharges, child support, VA housing programs, correcting criminal convictions, reinstating suspended driver licenses, assistance before VA on overpayments or complex benefits issues. Specialized outreach and service provided to incarcerated veterans, veterans in treatment courts, women veterans and homeless/at-risk veterans.

LAW E 578 LLM Early Bar Prep (2-8, max. 8) *M. SHAW* Provides LLM students an early start on bar exam preparation. Students review heavily tested areas across several bar exam subject areas while learning test taking strategy for the Essay Multistate and MPT portions of the Washington UBE, NY, or CA bar exams. Credit/no-credit only. Offered: WSp.

LAW E 579 International and Foreign Law Research (2-3) Overview of international law materials. Examines primary materials in the vernacular and in translations: constitutions, charters, codes, administrative rules, cases, treaties, and other international agreements. Focuses on practice tools such as directories, guides, digests, and proceedings. Prerequisite: LAW A 506 or permission of instructor.

LAW E 580 Gender Violence and the Law (3-4) Introduces substantive legal areas including: evidence and rape shield laws; protection orders; civil liability of perpetrators and third-parties, and restorative civil remedies in housing, employment, and education contexts. Looks at national trends and primarily focuses on Washington State Law.

LAW E 581 Reproductive Rights and Justice Seminar (4) *Ainsworth* Provides students with an in-depth study of the constitutional framework governing reproductive rights, as well as critiques of that framework from feminist theorist, those who oppose abortion and contraception, and those whose reproduction and sexuality have been historically marginalized and regulated. Studies different bases in the law for reproductive rights claims, including privacy, equality, and dignity. Offered: A.

LAW E 582 Information Policy: Domestic and Global (5) National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries. Coverage includes freedom of information privacy, copyright, telecommunications, and emerging technologies.

LAW E 583 Globalization and the Law (1-6, max. 6) Focuses on the rise of global law, intersection of national, international, and global law, and the legitimacy of global law.

LAW E 588 Trademark and Unfair Competition Law (3) *Hoffmann* Provides a comprehensive review of issues relating to protection of trademarks and other trade identity symbols under the common law and the Federal Lanham Act. Offered: A.

LAW E 590 Incarcerated Parents Advocacy Clinic ([4-5]-, max. 9) Students advocate for incarcerated parents seeking to preserve relationships with children despite incarceration. Supervised by clinic faculty, students represent incarcerated parents in dependency and other court proceedings, working with clients and families to maintain the

parent-child relationship. Students develop interviewing and counseling, negotiations, and trial preparation skills. Credit/no-credit only.

LAW E 591 Non-Profit Organizations Clinic (1-3, max. 3) Provides students with an opportunity to represent a real client in setting up a non-profit organization and applying for tax-exempt status. Students draft multiple documents such as articles of incorporation, applications for tax-exempt status, and client communications. Credit/no-credit only.

LAW E 592 Federal Appellate Advocacy (1-6, max. 6) Representation of an otherwise pro se litigant in an appeal in the Ninth Circuit. Preparation of the opening and reply brief and conduct the oral argument. Requires substantial research, multiple drafts, and painstaking familiarity with the record. Prerequisite: permission of the instructor. Credit/no-credit only.

LAW E 594 Regulatory Environmental Law and Policy ([1-12]-, max. 12) Examines the applied and theoretical dimensions of environmental rule-making, with particular emphasis on the development of an administrative record. Students prepare written comments on pending rules proposed by governmental agencies. Prerequisite: either LAW A 527 or LAW B 585; LAW A 509, which may be taken concurrently. Credit/no-credit only.

LAW E 595 Animal Law (3) Examines substantive law and procedure, specific cases, legislation, and background societal mores that force an evolution and backlash in the level of jurisprudential and legislative comfort with new ways of seeing and speaking about animals other than humans. Offered: WSp.

LAW E 596 Wildlife Law Seminar (3) *Anderson, Knudsen* Covers the basic issues involved in the law of fish and wildlife management. Topics include the relationship between property and wildlife, federalism issues, and international regulatory regimes.

LAW E 597 Global Warming and Justice Seminar (4) *Rodgers* Explores case studies (worldwide but with an emphasis on indigenous peoples) addressing multiple legal responses to the consequences of climate change. Explores remedies under U.S. and international law. Offered: WSp.

LAW E 598 Climate Change Law (3-4) *Rodgers* Develops student understanding of the consequences of anticipated climate change across a spectrum of issues that include human health, the Earth, and its oceans. Covers the practice of agriculture, revised energy futures, legislative responses to climate change, and local, state, regional, and tribal efforts to address it. Offered: Sp.

LAW E 599 Legislative Advocacy Clinic (2-5, max. 15) Clinical training in legislative and public policy advocacy. Topics include the legislative process, drafting commentary, advocacy, building a legislative agenda, working with coalitions, and ethics. Direct work with non-profit and other organizations advocating in the state legislature to develop and move legislation as well as respond to proposed legislation. Prerequisite: LAW A 579. Offered: AWSp.

Law (Health)

LAW H 501 Fundamentals of Health Law (4) Topics include: healthcare reform; obligations to provide care (including EMTALA); medical decision-making law; private health insurance and managed care (including ERISA, HIPAA, and COBRA); Medicare; Medicaid and SCHIP; regulation of healthcare providers; staff privileges and hospital-physician contracts; tax exemption; antitrust, and fraud and abuse laws.

LAW H 502 Medical Malpractice (3-4)

LAW H 503 Medical Ethics and Jurisprudence (3-) *Dudzinski, Kuszler* Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support,

re-search with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with B H 535.

LAW H 504 Legal, Ethical, and Social Issues in Public Health Genetics (3) Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/PHG 512; A.

LAW H 506 International Bioethics, Social Justice, and Health Seminar (1, max. 3) *Kuszler, Rivin* Explores case studies of ethical dilemmas in research and medical practice and violations of international human rights norms in the design, implementation, and evaluation of health programs and policies. Bioethics and human rights law are the foundational tools for critically evaluating global health impact. Offered: AWSp.

LAW H 507 Law, Medicine, and Ethics in the Context of Pain Management (2) Reviews the problem of physicians failing to relieve pain of patients in the dying process and legal and ethical issues they face as well as cultural sources of the problem.

LAW H 508 Beginning of Life: Rights and Choices (2) Addresses the controversial legal issues engendered by our increasing control over the beginning of life. Focuses on the law, regulation, and policy implications of contraception; new reproductive and genetic technologies, including surrogate parenthood, sperm and egg donation, in-vitro fertilization, and other methods of conquering infertility; and abortion.

LAW H 509 End of Life: Rights and Choices (2) Address controversial legal issues engendered by our increasing control over the end of life. Focuses on patient autonomy issues at the end of life including withdrawal of life support, surrogate decision making, advance directives, and patient choice to hasten death with medical assistance (physician aid in dying). Offered: Sp.

LAW H 510 Topics in Law and Medicine ([1-4]-, max. 4)

LAW H 511 International Research Ethics, Law, and Policy (3) *Kuszler, Rivin* Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, healthcare systems, and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with B H 553; A.

LAW H 512 Public Health Law (2) Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public health officers and healthcare industry administrators. Offered: jointly with HSERV 551.

LAW H 515 Global Health Law (3) *Kuszler* Provides an examination of the legal, economic, social, ethical, and political aspects of global health. Explores the emergence of global health law as a multilateral tool to address health disparities and improve the health of the vulnerable. Offered: A.

LAW H 516 Study Abroad: Global Health, Human Rights, and the Rights of the Child in Cambodia (10) Study abroad exploring the theoretical underpinnings and practical aspects of the rights of the child in the context of Cambodia's health system, focusing on children with disabilities. Approaches the rights of the child from legal and health services perspectives, combining methodologies of research and analysis for practical application. Offered: S.

LAW H 517 Legal Issues for Global Health Programs (2) *J. Lane* Examines the role of the law, legal strategy and legal research in supporting and advancing global health programs. Provides students an outline of the legal issues impacting global health programs and instruction on working with local counsel and research partners in foreign jurisdictions. Offered: W.

LAW H 518 Legal and Policy Solutions to Improve Global Health of Women, Adolescents, and Children (1-2, max. 2) *J. Lenga-Long, B. Shah, J. Sylker* Explores specific examples of how legal and policy frameworks can impact health inequities for women, children, and adolescents. Teaches to formulate multi-disciplinary strategies to improve health outcomes. Credit/no-credit only. Offered: W.

LAW H 520 Genetics and the Law (3) Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with PHG 523; Sp.

LAW H 521 Medicare and Medicaid Finance and Reimbursement (3) *Gould, Williams* Covers the history of Medicare and Medicaid, how they are administered, how eligibility is determined, payments are made, and financing is structured. Includes changes to both programs from the Affordable Care Act, how the federal government audits providers, and the available appeals. Offered: W.

LAW H 522 Affordable Care Act Seminar: Legal and Policy Issues in Health Reform Implementation (2) *K. Merrikin, S. Thieme Sanford* Delves into the Affordable Care Act, including its historical context, key provisions, policy choices, legal challenges, implementation issues and future directions. As part of the seminar, which utilizes a multi-disciplinary approach, each student analyses an ACA provision of interest.

LAW H 524 Forensic Evidence (3) Examines the application of the rules of evidence in cases that involve forensic evidence. Examines paradigmatic cases involving homicide and physical or sexual assault, although the principles examined are applicable generally in civil and criminal cases.

LAW H 525 Business Transactions in Healthcare (3) *Snyder* Focuses on the complex business transactions involved in modern healthcare mergers. In addition to the transactional business aspects, the students also address government rules, regulations, and prohibitions that arise. Students in teams represent different sides of the transaction in this simulated experiential learning opportunity. Offered: W.

LAW H 526 Healthcare Employment Law (3) *Lehmann* Focuses on employment in health care settings, and will specifically cover "at will" employment and the development of implied and express individual employment contracts; recruiting and hiring; negotiated collective bargaining agreements; managing health care employees; and termination of employment. Offered: Sp.

LAW H 528 Health Law Practicum (1-6, max. 6) Provides experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to health law or policy. Students work under the guidance of experienced practitioners. Both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only. Offered: AWSp.

LAW H 529 HIV and the Law: Legal and Political Developments of the AIDS Crisis (2-4, max. 4) *Price* Traces thirty years of the HIV/AIDS epidemic, beginning with the discovery of the disease through the present. Focuses on many of the socio-political-legal aspects of the HIV/AIDS crisis, including discrimination, quarantine, immigration, criminal law, insurance, public health, and family law issues. Offered: Sp.

LAW H 530 Disability Law (3-4) Considers the definition of disability as defined by statute (ADA, FRA), case law, and social perception. Focuses on education law and entitlements, access to and discrimination in employment, housing, public transportation, and healthcare.

LAW H 531 Health Law Advocacy (2-4, max. 4) *Fox, Lenga-Long* Explores select aspects of legal advocacy for vulnerable patients and surrogate decision-makers in healthcare

settings. Focuses on practical, pragmatic solutions to complex health law advocacy issues, using both classroom participation and mock guardianship hearings. Offered: Sp.

LAW H 534 Mental Health and the Law (3) Covers medical and legal definitional issues as well as major civil and criminal law issues, including standards and procedures for involuntary commitment; consent for, and informed refusal of, treatment; de-institutionalization/community-based treatment; the insanity defense; competency to stand trial; and punishment of the mentally ill convict.

LAW H 536 Research Ethics and Regulation (3) *Mastroianni* Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with B H 536; W.

LAW H 540 Health and Human Rights (3) Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with G H 516; W.

LAW H 545 FDA Law (3) *Kuszler* Surveys the scope of regulatory authority accorded to the FDA. Focuses on products used in medical care, notably pharmaceutical drugs, medical devices, and biologics. Considers food safety, regulation of cosmetics, and oversight of carcinogenic substances. Offered: Sp.

LAW H 550 Medical Products Liability Law (3) Focuses on product liability claims arising from defective design/development, manufacture, marketing, and distribution of medical technologies. Considers the concepts of strict liability, negligence, breach of warrant, and informed consent as well as the relative roles of state and federal law. Offered: W.

LAW H 579 Interactive Seminar (1, max. 30) *Lin* Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Credit/no-credit only. Offered: jointly with PHG 580; AWSp.

LAW H 580 Competition in Health Care (3) Examines the role competition and its opposite, regulation, play in the healthcare industry in the United States.

LAW H 582 Healthcare Fraud and Abuse (2-3) Considers federal and state laws that impose criminal and civil penalties on healthcare providers for activities ranging from payment for referrals, submissions of false claims, misconduct in medical research, the illegal disclosure of patient information, and the abuse and neglect of patients in long term care settings.

LAW H 590 Advanced Research and Writing Seminar in Health Law (2-, max. 4) *Kuszler* Dedicated research and writing seminar. Includes a substantial paper on a health law topic. Offered: WSp.

LAW H 599 Health Law Tutorial (1-4) Focuses on a specialized area of health law. Prerequisite: limited to students in the graduate program in health law; must be approved by the program director. Offered: AWSp.

Law (Intellectual Property)

LAW P 501 Intellectual Property Law Core (6-8) Intensive study of intellectual property law core subjects: patents, copyrights, trade secrets, and trademarks. Examines fundamental principles, their underlying policies, and how the laws inter-relate. Not open to students who have taken LAW A 522, LAW A 546, LAW E 567, or LAW E 588.

LAW P 503 Introduction to American Legal Systems and Skills (2-3) Introduces the U.S. system of state and federal courts in the context of intellectual property. Discusses how intellectual property laws come from the common law as well as state and federal statutes and regulations.

Teaches legal research, writing, case briefing, and analysis skills. Offered: A.

LAW P 504 Economic Analysis of Intellectual Property (2-3) Explores the intersection between intellectual property law and economics from both a macro and micro economic perspective; economic justification of intellectual property law; and portfolio management tools that can evaluate intellectual property protection as an investment. Prerequisite: either LAW P 501 or LAW E 567. Offered: W.

LAW P 505 International Intellectual Property Law (2-3) Focuses on international treaties as they relate to protection of trademarks and copyrights. Introduces international aspects of branches of intellectual property, including general principles of comparative and international law, and specific law related to obtaining and enforcing intellectual property rights in foreign countries. Prerequisite: either LAW A 522, LAW E 567, LAW E 588, or LAW P 501.

LAW P 506 Transnational Intellectual Property Law Theory and Practice (4) *Takenaka* Studies comparative intellectual property law using a series of lectures, license exercises, and a mock trial. Consists of a series of lectures on campus followed by a one-week intensive transnational seminar hosted by a law school in Asia or Europe. Offered: Sp.

LAW P 509 Antitrust and Intellectual Property Rights (2-3) *Bangasser* Examines in-depth application of competition law and policy to the creation and exploration of intellectual property. Offered: Sp.

LAW P 510 Advanced Research and Writing Seminar (2-, max. 4) *Gomulkiewicz* Instructs IP LL.M students in the research and writing skills necessary to write a major legal research paper. Offered: A.

LAW P 522 Advanced Copyright Law (2-5) Advanced, in-depth study of copyright law and policy. Explores the boundaries of copyright protection and how copyright law relates to other intellectual property laws. Prerequisite: either LAW A 522, LAW E 567, or LAW P 501.

LAW P 525 Intellectual Property Law Seminar ([1-4]-, max. 4) Explores current controversies and important topics in intellectual property law and policy. Welcomes visiting speakers from industry, government, and the academy to discuss these cutting-edge issues.

LAW P 528 LLM Intellectual Property Law Practicum (1-4, max. 6) Experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to intellectual property law and policy. Students work under the guidance of experienced practitioners; both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only.

LAW P 535 Entertainment Law (3) A primer on the various forms of legal protection (trade secrets, copyright, trademarks, publicity law, and licensing) that form the bases for various types of entertainment. Considers key industries: books, music, movies, television, internet, and computer games. Prerequisite: LAW P 501 or permission of the instructor.

LAW P 539 Law, Technology, and Development (2-3) *Snyder, Winn* Provides an overview of selected principles and theories of development economics, and considers the implications of technological innovation, intellectual property rights, government regulation, trade policy, and technical standards for the achievement of development objectives. Mass media coverage of current developments enriches class discussions.

LAW P 543 Intellectual Property Law in East Asia (2-3)

LAW P 545 Advanced Patent Law Seminar (3) *Taylor* Studies public policy and practice considerations relating to patenting research results in high technology. Examines the most up-to-date issues in legal protection of technology from the comparative law perspective. Prerequisite: either LAW A 546 or LAW P 501. Offered: W.

LAW P 546 Advanced Trademark Law (3) *Takenaka* Covers advanced procedural and substantive topics of trademark law including protection of trade dress, online trademark infringement, and global trademark protection including gray market issues. Students write and present a research paper on a topic related to trademark law and policy. Prerequisite: either LAW P 501 or LAW P 567 Offered: W.

LAW P 547 Legal Protection for Computer Software (3) Addresses copyright, patent, trademark, trade dress, trade secret, and contract protection for software. Also addresses how the law places boundaries around legal protection through anti-trust law and the doctrines of fair use and preemption.

LAW P 548 Litigation Strategies in Technology Protection (3) Deals with procedural and substantive legal issues in enforcement of patents. Proceeds through a litigation in the order that parties normally would. Teaches substantive legal issues in conjunction with procedural and strategic considerations. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

LAW P 550 Patent Prosecution (4) Addresses fundamentals of patent application drafting, through a combination of lectures and assignments. Addresses all aspects of proceedings before the U.S. Patent and Trademark Office, including preparing new applications, and examiner interviews. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

LAW P 552 Strategic Intellectual Property Commercialization (3) Comprehensive coverage of issues related to exploitation of intellectual property rights as a business asset for new companies, or as a source of income for existing businesses. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

LAW P 567 Survey of Intellectual Property (3-6, max. 6) *O'Connor* Intended for both law students who are only interested in a general overview of intellectual property and non-law students who are seeking a certificate in intellectual property law and policy. Designed as an alternative to Patents, Trademark and Unfair Competition Law, and Copyrights. Prerequisite: either LAW A 522, LAW A 546, LAW E 588, or LAW P 501. Offered: W.

LAW P 577 Drafting Intellectual Property Licenses (3) Covers advanced drafting and negotiating licenses and other technology agreements. Credit/no-credit only.

LAW P 589 IP Innovations in Science and Technology (2-, max. 6) *Takenaka* Covers controversial intellectual property law and policy questions arising from evolving science, technology and e-commerce, and addresses cutting edge issues from a multidisciplinary perspective. Examines the current legal regimes and research environment and explores innovative methods for maximizing the exploitation of advanced science and technology. Offered: AWSp.

LAW P 590 Graduate Intellectual Property Law Tutorial (1-4, max. 4) Focuses on a specialized area of intellectual property law. Limited to students in the graduate program in intellectual property law and policy. Tutorial must be approved by the program director.

Law (Taxation)

LAW T 502 Federal Tax Controversies and Procedures (3)

LAW T 503 Problems of Timing (2-3)

LAW T 504 Income Taxation of Business and Investments (3-5) *M. HATFIELD* Addresses the fundamental issues of the taxation of income related to businesses and investments. Topics include business deductions; capital expenditures; depreciation; below market loans; non-recourse debt; methods of accounting; gains and losses; like-kind exchanges; installment sales; passive activity losses and credits; and the at-risk rules. Offered: A.

LAW T 505 Introduction to Income Taxation (2) Addresses a number of fundamental income tax concepts, including the computation of individual tax liability, statutory exclu-

sions, deductions, and gains. Also deals with issues related to character and timing.

LAW T 506 Tax Practice and Skills (1-4, max. 4) Orientation to core concepts of tax practice, including administrative structure and nature of tax law, nuances of statutory interpretation, and the relative authority of statutory, administrative, and judicial sources. Includes overview of print and online tools for federal tax research. Credit/no-credit only.

LAW T 507 Federal Tax Policy Seminar (2-4, max. 4) Examines the theoretical and policy considerations applied in assessing existing and proposed federal tax regimes. Topics include: the nature of the income tax as a tax on saving and consumption; consumption taxes as alternatives to taxes on income; tax policy and charitable giving; taxes and the poor; and more.

LAW T 510 Estate and Gift Taxation (3)

LAW T 511 Taxation of Partners and Partnerships ([1-4]-, max. 4)

LAW T 512 Exempt Organizations ([2-4]-, max. 4)

LAW T 513 Estate Planning (3)

LAW T 514 Drafting Estate Planning Documents (2) *Adams* Includes the drafting of several documents used in contemporary estate planning practice, including wills, trusts, client letters, powers of attorney, healthcare directives, gift and estate tax returns, and opinion letters. Prerequisite: LAW T 513, which may be taken concurrently. Offered: Sp.

LAW T 515 International Taxation I (3)

LAW T 516 International Taxation II (3)

LAW T 517 Estate and Gift Taxation II (2)

LAW T 518 Taxation of S Corporations (2)

LAW T 519 Canadian-United States Tax Issues (2) *Ko* Overview to various cross-border issues, including the Canadian income tax (and its GST tax), residency for Canadian tax purposes, principles relating to operation of Canadian business in the United States and profit repatriation, and U.S. investment in Canada and similar repatriation issues.

LAW T 520 Professional Regulation of Tax Lawyers (2-3) Addresses the professional regulation of tax lawyers by Congress, the IRS, state bars, and professional associations. May address legal malpractice and criminal liability issues for tax lawyers.

LAW T 521 Compensation and Benefits I (3)

LAW T 522 Compensation and Benefits II (2)

LAW T 523 International Estate Planning (2)

LAW T 524 Transfer Pricing Seminar (2) *Andrade* Reviews section 482 of U.S. Internal Revenue Code and the Treasury regulations thereunder with a focus on multinational corporations (MNCs) and their related party transactions that are subject to the arm's length standard. Application of U.S. transfer pricing regulations to related party transactions involving MNCs.

LAW T 525 Advising Privately-Owned Businesses (3) Explores the role of the lawyer as an adviser through case studies examining a range of structural planning issues and the practical and analytical challenges of the planning process. Emphasizes tax and business considerations, and creative planning strategies. Prerequisite: LAW A 530; LAW A 515, which may be taken concurrently.

LAW T 526 Federal Tax Clinic ([2/3]-, max. 9) Clinical training in federal tax litigation under the supervision of members of the law school faculty.

LAW T 527 Taxation of Financial Instruments (2) Examines the classification and tax consequences of various financial instruments including: fixed, variable, and contingent rate debt instruments; secondary market transactions in debt instruments, such as coupon stripping and market discount purchases; and transactions in common stock-equity derivatives, such as notional principal contracts, hedging transactions, and monetization strategies.

LAW T 528 Graduate Tax Practicum (1-6, max. 6) Field-based experience in a department-approved public or private entity, of eight hours per week minimum under the guidance of experienced practitioners. The student and practitioner produce a final report summarizing the practicum experience to the supervising faculty member, who decides whether to award academic credit. Credit/no-credit only.

LAW T 529 International Tax Practice Seminar (2-3) *Kadet* Utilizes case studies of real-world, multi-faceted international business transactions to develop the knowledge and skills to apply international tax principles and tools to both inbound and outbound investments. Offered: Sp.

LAW T 530 Tax Issues in Mergers and Acquisitions (2-3) Examines the federal income taxation of business entities and their owners. Limited to coverage of the fundamental concepts of corporate and partnership taxation.

LAW T 531 Advanced Transactional Tax Problems (2) Examination (through case studies) of consolidated tax returns, limits on the use of tax benefits, carryover of tax attributes, classifications of debt versus equity, and corporate penalty taxes.

LAW T 532 Taxation of Estates, Trusts, and Beneficiaries (2-3)

LAW T 533 Tax Crimes: Investigations, Prosecutions, and Penalties (2) *Chiconie* Focuses on elements of tax and related crimes with a view of the governmental investigative tools and powers, including IRS summonses, search warrants, and Grand Jury investigations. Covers taxpayer's rights and defenses in a criminal case; the IRS voluntary disclosure program; and the elements of civil penalties. Offered: AWSp.

LAW T 534 State and Local Taxation (2)

LAW T 536 Taxation of Trans-Pacific Transactions (2-3)

LAW T 537 Business Planning ([2-6]-, max. 6)

LAW T 538 Estate Planning for Business Interests (2-3) Business succession and estate planning issues for the owners of closely held business, including shareholder agreements, recapitalizations, family limited partnerships and limited liability companies, taxable acquisitions, split dollar agreements, redemptions to pay death taxes, electing small business trusts and more. Prerequisite: LAW T 510

LAW T 539 Matrimonial Tax (2) Covers tax aspects of married relationships and the tax impact of the dissolution of a marriage. Includes joint returns, the marriage tax penalty, innocent spouse relief from joint return liability, pre-nuptial agreements, transfer tax effects of inter-spousal transfers, alimony, child support, and marital property transfers incident to divorce.

LAW T 540 Federal Tax Research and Writing (2-4)

LAW T 541 Limited Liability Companies (2)

LAW T 542 State and Local Tax II: Advanced State Tax Concepts (2) *Okimoto* Covers the interplay between the federal tax and state tax systems. Covers attributional and economic nexus, unitary business principle, state combined reporting versus federal consolidated filings, expense disallowance, adjustments to the federal tax base, fair apportionment, alternative business tax, and state tax implications of mergers and acquisitions. Offered: W.

LAW T 543 Advanced Partnership Tax (2) Builds on the material covered in the basic course, Taxation of Partners and Partnership. Covers more sophisticated aspects of partnership allocations; transactions between partners and partnerships; and sale or exchange of partnership interests. Prerequisite: LAW T 511.

LAW T 544 Tax Aspects of Charitable Giving (2) Examines income, gift, and estate tax consequences of charitable gifts of cash and property. Includes: theoretical and policy bases of charitable deduction; technical requirements; effect of receipt of benefits; percentage limitations based on

donee and type of property; application of carryover rules; effect of partial cash or cash equivalent consideration.

LAW T 545 International Taxation of Intellectual Property (2) *Smith* Overview of the tax consequences of various types of common commercial arrangements that involve the development, ownership, and use of intangible property within multinational groups. Explores tax efficient arrangements such as contract research and licensing arrangement, cost-sharing arrangement, and the use of intangible holding companies.

LAW T 546 Taxation of Real Estate Interests (2) An in-depth study and analysis of the tax consequences of acquiring, developing, operating, and disposing of interests in real property. Focuses on practical approaches to structuring sale-leaseback transactions, syndications, installment sales, and like-kind exchanges. Considers the application of the passive activity loss rules in real estate.

LAW T 547 International Taxation of Electronic Commerce (2-, max. 4) Electronic commerce is defined as the exchange of digital information in connection with the purchases and sale of goods and services. Seminar and discussion format. Explores the potential methods and approaches for the taxation of earnings associated with electronic commerce.

LAW T 548 Tax Writing (2) Designed to improve writing skills as they relate to practice of tax law. Students draft many types of tax documents. Also considers professional responsibility aspects of tax practice.

LAW T 549 International Merger and Acquisition Transactions (2) Examines the rules applicable to international merger and acquisition transactions, both tax-deferred and table, including the anti-inversion rules of 7874 and the rules under 367 for a variety for tax-deferred transaction structures. Also covers the unique considerations applicable to taxable acquisitions of foreign target companies.

School of Medicine

Dean

Paul G. Ramsey

C314 Health Sciences

Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Wyoming, Alaska, Montana, and Idaho (WWAMI). Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School's basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Seattle Children's hospital, Northwest Hospital & Medical Center, Valley Medical Center, and the Veterans Affairs Puget Sound Healthcare System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits approximately 240 medical students to its first-year class and has a total enrollment of over 1000 students pursuing the Doctor of Medicine degree. The full-time faculty numbers more than 2,100 members and there are more than 4,500 clinical faculty located throughout the WWAMI region. The affiliated University residency-training network enrolls more than 1,200 house officers. Enrollment in the graduate programs in the basic sciences exceeds 600 students, and approximately 1,000 postdoctoral fellows are enrolled in advanced training programs. The School has baccalaureate and/or graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. The School participates in training a broad spectrum of other allied health professionals. The School is also home for the Physician Assistant Training Program known as MEDEX.

WWAMI Program

The WWAMI program was initiated in 1971 as an effort to address the maldistribution and shortage of physicians in the Northwest region, provide a broader range of educational opportunities for students, and address the need for primary-care physicians oriented toward rural practice. It is an integral part of the undergraduate medical curriculum and is a fully accredited program of the School of Medicine. The WWAMI program is named for the five states (Washington, Wyoming, Alaska, Montana, and Idaho) that share resources and responsibilities in the regional educational program. Funds appropriated to the WWAMI program by the Wyoming, Alaska, Montana, and Idaho legislatures assure each state of positions for its students in the entering medical class each year.

Foundations of Science Phase Training

The University of Washington School of Medicine is nationally recognized for its regional training program (WWAMI). In addition to providing unique clinical learning opportunities, the WWAMI program allows a small-group learning experience at the regional training sites, which many students prefer. Students from Washington (Spokane), Alaska, Montana, and Idaho complete their 18-month foundational curriculum in small learning groups in their respective home states. Wyoming students complete their first 12-month foundational curriculum in Wyoming. The state of Washington provides two sites for medical students to complete their 18-month foundations curriculum:

Seattle: uwmedicine.washington.edu/Education/Md-Program

Spokane: www.medicalsciences.wsu.edu/prospectivestudents/wwamiprograminfo.html

Small group learning experiences are available in Spokane. All Washington residents are required to rank one or more of these two sites in order of preference in their secondary application. Every effort is made to match accepted Washington students with one of their preferred sites.

More information and video testimonials from first-year Spokane medical students are available at: uwmedicine.washington.edu/Education/MD-Program/Admissions/WWAMI-First-Year/Pages/default.aspx

Offers of acceptance are conditional upon agreement to participate in the WWAMI program.

Patient Care Phase Training

At the conclusion of the foundations of science phase, students enter the portion of the curriculum that is predominantly clinical. Required, selective, and elective clerkships are described below. As part of clinical training, students complete clerkships at the UW, at its affiliated hospitals, or at community clinical units located in the five-state region. During third- and fourth-year clerkships, School of Medicine full-time and clinical faculty members provide supervised clinical training in required as well as elective clerkships through the WWAMI region.

ACADEMIC PROGRAMS

Bachelor of Science

A program leading to a baccalaureate degree with a major in microbiology is offered through the College of Arts and Sciences.

Bachelor of Clinical Health Sciences

A program leading to a baccalaureate degree with a major in clinical health services is offered through the MEDEX program.

Bachelor of Science in Medical Technology

A curriculum in medical laboratory science is offered by the Department of Laboratory Medicine. This program provides study in basic laboratory science that includes clinical laboratory training and is designed to prepare knowledgeable and skilled laboratory scientists for a variety of employment opportunities. Information concerning admission to the medical laboratory science program appears under Laboratory Medicine in this catalog.

Bachelor of Science in Prosthetics and Orthotics

The Department of Rehabilitation Medicine offers a Bachelor of Science degree in prosthetics and orthotics. The curriculum provides professional training in the basic sciences and the clinical application, design, and fabrication of prostheses and orthoses. Information concerning admission to the curriculum in prosthetics and orthotics may be found under Rehabilitation Medicine in this catalog.

MEDEX Northwest Physician Assistant Training

MEDEX Northwest, UW School of Medicine, is a program designed to train physician assistants. The program has been in existence since 1978 and is accredited by ARC-PA, the Accreditation Review Commission on Education for the Physician Assistant. MEDEX currently trains approximately 80 students annually in three didactic training sites (Seattle, Yakima, and Spokane). Discussions are currently underway to have a fourth training site in Anchorage, AK. Students return to their home communities in the WWAMI region (Washington, Wyoming, Alaska, Montana, Idaho) plus a variety of sites in Oregon and Nevada for their clinical year of training.

MEDEX Northwest is currently an eight-quarter program. The first four quarters consist of intense clinical and didactic

instruction at one of the didactic training sites. The final four quarters are spent in clinical experiences throughout the Northwest region. At the completion of the program, students are eligible to sit for the National Certifying Examination for Physician Assistants.

Master of Occupational Therapy

The Department of Rehabilitation Medicine offers a graduate degree in occupational therapy. The curriculum provides professional training in the health sciences and in the theory and practice of occupational therapy as it impacts occupational performance across the life span and in the various arenas of practice. Occupational therapy addresses daily living skills including self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under Rehabilitation Medicine in this catalog.

Doctor of Physical Therapy

The Department of Rehabilitation Medicine offers a graduate degree in physical therapy. The curriculum provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to the physical therapy program appears under Rehabilitation Medicine in this catalog.

Master of Science and Doctor of Philosophy

Work leading to master's and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of Biochemistry, Bioengineering, Biological Structure, Immunology, Microbiology, Pathology, Pharmacology, and Physiology and Biophysics. Master's degree programs are offered by the departments of Laboratory Medicine, Medical History and Ethics, and Rehabilitation Medicine. Students may work toward these degrees concurrently with the MD degree, taking additional years beyond the typical four-year medical curriculum.

Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in the basic sciences of medicine and the School of Public Health. A student who intends to work toward a graduate degree should confer with the chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show evidence of being able to take on this additional work load.

DOCTOR OF MEDICINE

Upon completion of the curriculum of the School of Medicine, the MD degree is awarded to those candidates who (1) have given evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

Admission

(Procedures and policies described are subject to change. Information regarding changes is available from the School of Medicine Admissions Office.)

Selection Factors

Candidates for admission to the University of Washington School of Medicine are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of, and exposure to, the needs of individuals and society and an awareness of healthcare delivery is-

sues are desired. Extenuating circumstances in an applicant's background are evaluated as they relate to these selection factors.

Applicants must submit scores from the Medical College Admission Test (MCAT). This examination must be taken no later than autumn of the year before matriculation and cannot be more than three years old at the time of matriculation. MCAT registration blanks are available through premedical advisers or through the Office of Admissions. Under exceptional circumstances, to be determined by the Admissions Committee, the GRE may be considered during the admission process; however, if accepted, the applicant is required to take the MCAT prior to matriculation.

The following science course requirements must be completed before matriculation but preferably by the time of application: A total of 32 semester hours or 48 quarter hours of undergraduate courses divided into (a) chemistry, 12 semester/18 quarter hours, which can be satisfied by taking any combination of inorganic or organic chemistry, biochemistry, or molecular biology courses; (b) physics, 4 semester/6 quarter hours; (c) biology, 8 semester/12 quarter hours; and (d) other ("open") science subjects, 8 semester/12 quarter hours, which can be met by taking other courses in any of the three categories above.

Although a biochemistry course is not absolutely required for admission to the medical school, it is very strongly suggested for entering students. The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and is taught with the presumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism. A comprehensive undergraduate biochemistry course is the most expedient way to gain this knowledge.

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in the required courses. Candidates should be proficient in the use of the English language and basic mathematics and are expected to have a basic understanding of personal computing and information technologies.

Students who entered in the fall of 2003 had a mean GPA of 3.69 and the following mean MCAT scores: Verbal, 10.0; Physical Science, 10.3; Biological Science, 10.8; and a median Writing Sample of P.

Completion of three years of coursework at an accredited college or university is the minimum required before possible matriculation; however, all entrants in recent years have earned bachelor's degrees. No specific major is advised. A broad background in the humanities and liberal arts is encouraged, indeed expected.

Pre-Medical Requirements

The following pre-medical course requirements must be completed prior to matriculation but preferably by the time of application; undergraduate or post-baccalaureate courses must be completed at a college or university accredited by the appropriate regional accrediting body. All candidates must demonstrate substantial academic ability in their major field as well as in the required science courses. Candidates should be proficient in the use of the English language and basic mathematics, and are expected to have a basic understanding of personal computing and information technology. All entrants in recent years have fulfilled requirements for a bachelor's degree. No specific major is advised. A broad background in the humanities and liberal arts is encouraged and expected.

Courses must include a minimum of:

1. 4 semesters or 6 quarters of social science or humanities
2. 6 semesters or 9 quarters of chemistry and biology. The subject matter in these courses must include general chemistry, general biology, biochemistry, molecu-

lar genetics, and cell biology/cell physiology, although applicants are not required to take courses with these specific titles.

3. 2 semesters or 3 quarters of physics; or 1 semester or 2 quarters of physics plus 1 semester or 2 quarters of calculus or linear algebra

The following courses are recommended, but not required:

- Ethics
- Anatomy or comparative anatomy
- Human or mammalian physiology
- Embryology
- The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and it is taught with the assumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism.

For further information, consult:

- UW School of Medicine Admissions website
- The American Association of Medical Colleges' publication, 2012-2013 Medical School Admission Requirements (MSAR)
- askuwsom@uw.edu

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise.

Application Procedure

The University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1 and no waivers are granted. After receiving the application from AMCAS, the School of Medicine asks qualified individuals to submit a \$35 application fee and supplemental application materials. Every attempt is made to notify applicants of the final action by the middle of April of the year of matriculation.

Residents of the states of Washington, Wyoming, Alaska, Montana, or Idaho are eligible to apply. Candidates from Wyoming, Alaska, Montana, and Idaho are required to submit residency certifications from their respective state certifying officers. Proof of legal residence for Washington residents also may be requested. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at the time of application.

Applicants from outside this five-state region who come from disadvantaged backgrounds or who have demonstrated a commitment to serving underserved populations are considered. Foreign applicants, in addition to the above requirements, must also have a permanent-resident visa.

Individuals with a demonstrated interest in research may apply for the MD/PhD program (Medical Scientist Training Program, or MSTP) regardless of residency.

Applications are not considered from persons who have failed to meet minimum standards at this or another medical or dental school.

The deadline for submitting additional application materials is January 13, 2012. These supplemental materials include:

1. A supplemental application form. This is sent to qualified applicants after the School of Medicine has received the AMCAS application.
2. An autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician with specific emphasis on steps taken to explore a career in medicine and eventual professional goals. Any other issues of importance to the candidate should also be included. The applicant may

request that the personal comments section of the AMCAS application be used to fulfill this requirement.

3. Three additional short essays (250 word limit each)
 - a. How have your experiences prepared you to be a physician?
 - b. How do you imagine your personal and professional lives intersecting 10 years from now?
 - c. What obstacles to your goals have you experienced and how have you dealt with them?
 - d. For reapplicants: From your most recent application until now, how have you strengthened your application?
4. A premedical-committee letter of recommendation or three letters from instructors (either sciences or humanities) from whom the candidate has taken courses. These letters should critically evaluate the candidate's academic ability, strengths and weaknesses, the difficulty of coursework undertaken, motivation for medicine, personal maturity, and special attributes and assets. We accept up to three additional letters of recommendation. Letters of recommendation from current employers may be advantageous. All letters of recommendation should be submitted via the AMCAS Letters of Evaluation/Recommendation service. We must receive letters from AMCAS by the secondary application deadline (January 13, 2012).
5. A \$35 non-refundable application fee (check or money order only). This is automatically waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Admissions Office.
6. On-line acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Medical Education at the University of Washington School of Medicine: Admission, Retention, and Graduation Standards.
7. All acceptances are contingent on a criminal background check. Falsifying information may lead to the withdrawal of an acceptance.

Inquiries, address changes, or other information regarding the application should be transmitted in writing and directed to the Committee on Admissions, Office of Admissions, Box 356340, School of Medicine, University of Washington, Seattle, Washington 98195-6340; or email askuwsom@uw.edu.

Medical Curriculum

Basic Science Curriculum - 147 credits

The first two years of the medical-student curriculum are identified as the Basic Science Curriculum, consisting of three phases, or groups, of courses in the human biology series, courses in the sciences basic to medicine, organ systems courses taught by basic and clinical disciplines, and introduction to clinical medicine. The first phase is designed to provide the background in basic disciplines required for the organ-system courses. In the second phase, emphasis is placed on learning the normal and pathophysiologic properties of several human organ systems, and upon correlating these properties with clinical methods of data collection and problem formulation. Students pursue the introduction to clinical medicine course throughout the first two years, learning to interview patients, obtain a medical history, and perform the physical examination.

The academic demands of the Basic Science Curriculum are scaled so that most students are also able to take elective courses that broaden their background.

Basic Sciences Curriculum (generally defined as 500-level courses) - 159 credits

1. Required human biology (basic science) first-year courses

- a. Biochemistry I and II
- b. Gross anatomy and embryology (including trunk and head and neck anatomy)
- c. Introduction to clinical medicine
- d. Introduction to immunology
- e. Mechanisms in cell physiology
- f. Medical information for decision making
- g. Microbiology and infectious disease
- h. Microscopic anatomy (histology)
- i. Musculoskeletal system
- j. Nervous system
- k. Systems of human behavior
2. Required human biology (basic science) second-year courses
 - a. Cardiovascular system
 - b. Cases in clinical ethics
 - c. Clinical epidemiology and evidence-based medicine
 - d. Gastro-intestinal system
 - e. Genetics
 - f. Hematology
 - g. Hormones and nutrients
 - h. Introduction to clinical medicine II
 - i. Medicine, health, and society
 - j. Mind, brain, and behavior
 - k. Pathology II
 - l. Principles of pharmacology
 - m. Reproduction
 - n. Respiratory system
 - o. Rheumatology
 - p. Skin system
 - q. Urinary system
3. *Required Preceptorship*: A mentoring experience in which a practicing physician volunteers to give personal instruction, training, and supervision to a medical student during the first two years of medical school. Preceptorships offer the preclinical student an opportunity to follow a patient over time, to get to know the particular clinical field, and to experience a clinical setting over a period of eight weeks. Students report that preceptorships can be an excellent way of preparing for board examinations and clinical training.
4. *Non-clinical Selectives* (500-level medical school courses) - 4 credits: Students taking courses in the basic sciences curriculum are expected to pursue electives that enhance their personal medical education – i.e., special electives offered throughout the University relevant to medical education, but not involving direct patient care (must be approved by the School of Medicine). All UW non-clinical selectives run on the regular quarterly academic calendar; hence, they may not correspond with other courses in the School of Medicine.
5. *Independent Investigative Inquiry (III)* - 8 credits: Involves independent investigation in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. The purpose of this requirement is to allow the student to gain an understanding of the philosophy and methods of scientific investigation.

The III portion of the curriculum engages students in activities that foster the skills of life-long learning essential for practicing physicians in the twenty-first century. Students gain experience generating questions related to the practice of medicine and explore the various methods available to resolve such questions. Students are strongly urged to select a topic of particular interest and to investigate the subject independently, utilizing

the advice of a faculty adviser and other resources in the WWAMI community. This is a unique opportunity for students to choose both the content and form of their learning and to pursue an interest that may not be included elsewhere in the curriculum

Clinical Curriculum (generally defined as 600-level courses) - 148 credits

The clinical curriculum is pursued in the third and fourth years of medical school. It includes prescribed clerkships to be completed by all students (84 credits or 42 weeks) in family medicine, internal medicine, obstetrics and gynecology, pediatrics, psychiatry, and surgery, plus clinical electives (32 credits or 16 weeks) in four clinical areas including clerkships in rehabilitation medicine/chronic care, emergency care/trauma, neurology, and surgery electives. Additional clinical or non-clinical selectives (a minimum of 32 credits or 16 weeks) are also required.

During the clinical curriculum, students gain clinical knowledge and gradually increase their clinical problem-solving abilities while working as junior members of the medical-care team. Each team is headed by a faculty clinician working in one of the medical school-affiliated hospitals, clinics, or practices.

1. Required clinical clerkships in the third year
 - a. Family Medicine (6 weeks, 12 credits)
 - b. Internal Medicine (12 weeks, 24 credits)
 - c. Obstetrics/gynecology (6 weeks, 12 credits)
 - d. Pediatrics (6 weeks, 12 credits)
 - e. Psychiatry (6 weeks, 12 credits)
 - f. Surgery (6 weeks, 12 credits)
2. Required clinical selectives in third or fourth year(s)
 - a. Emergency medicine (4 weeks, 8 credits)
 - b. Rehabilitation medicine/chronic care (4 weeks, 8 credits)
 - c. Neurology (4 weeks, 8 credits)
 - d. Surgery (4 weeks, 8 credits)
3. Other clinical electives (16 weeks, 32 credits)

Capstone: Preparation for Residency - 2 credits

Capstone is a required, one week course taught primarily in a small group and workshop format, designed as a “continuing medical education” course, in which fourth-year students (graduating in June of the current year) choose sessions to attend relating to the medical issues, evaluation, management, and procedures involved in their planned specialties. Grading is credit/no-credit only, and is based on attendance and tracked via evaluations.

Total minimum credits for the MD degree - 309 credits

Student Evaluation and Promotion

The awarding of the Doctor of Medicine degree is contingent upon satisfactory completion of academic and non-cognitive requirements. The latter includes the acquisition of behavioral patterns and attitudes consistent with the School's professional standards and the oath that all students take at the time of graduation. As such, student evaluation is based on observations by the faculty and others involved in teaching of the student's behavior and conduct as well as papers and examinations. Every student is required to pass Steps 1 and 2 of the United States Medical Licensing Examination, all University of Washington examinations, and to complete an approved independent investigative inquiry project before receiving the Doctor of Medicine degree. Periodic reviews of student performance are conducted by the School's Student Progress Committee. Students are informed of their deficiencies and the remedial requirements, if any, for these deficiencies. Dismissal from the School may occur if the student fails to maintain an acceptable academic record, fails to follow academic

directives provided by the School's committees, or fails to develop attitudes and behavioral patterns appropriate to a career in medicine.

The Faculty Council on Academic Affairs (FCAA) reviews the Student Progress Committee's action, and the Dean of the School of Medicine has final approval of the committee's and council's recommendations. A review mechanism is available within this process. Once dismissal or withdrawal from the School has occurred, the student may petition for reinstatement through the FCAA. Reinstatement is not considered without substantial evidence that the problems causing the dismissal or withdrawal have been resolved. Only one petition through the FCAA is allowed. If more than one year elapses after the withdrawal or dismissal, the individual may be required to apply for readmission through the admission process. If a reinstatement petition is denied by the FCAA, the decision is final with no further avenue for review. Subsequent requests for admission must be directed through standard admission procedures.

Honor Society

Alpha Omega Alpha (AOA) is a national honor medical society. A charter as Alpha of Washington was granted to the School of Medicine in 1950 by AOA. Members are elected by AOA on the basis of high scholarship and good moral character. The purpose of AOA is to recognize and perpetuate excellence in the medical profession. Its goals are to promote scholarship and research in medical school, encourage high standards and conduct, and recognize high attainment in medical science, practice, and related fields. Its motto is “Worthy to serve the suffering.”

Grading System

Grades awarded in each course in the MD curriculum are Pass or Fail in the first-year basic science curriculum; Honors, Pass, or Fail in the applied-science curriculum; and Honors, High Pass, Pass, or Fail in the clinical curriculum. The School's goal is to provide a curriculum that defines the competencies to be achieved by the student at each level. However, a pattern of documented evaluator concerns about a student's performance may indicate unsatisfactory performance when the record is viewed as a whole, even though passing grades have been assigned. Honors may be awarded in a course on predetermined criteria that may involve additional work in the subject as selected by the student. The grading system precludes the ranking of students and no class standing is assigned.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

Graduation with Honors

A degree of Doctor of Medicine with Honors may be awarded to students with high achievement who, in addition, have demonstrated initiative and success in clinical and scholarly pursuits related to medicine. Candidates for graduation with honors are nominated by the departments each year and are selected on the basis of a review of their academic records by the Honors and Awards Committee.

Office of Multicultural Affairs

The Office of Multicultural Affairs assists students from disadvantaged backgrounds who are pursuing MD or MD-PhD degrees. The program nurtures interests in medical careers by providing a variety of support services and enrichment activities in the areas of recruitment, education, admission, retention, and professional development. The School considers applicants from disadvantaged backgrounds or those who have a demonstrated commitment to work with underserved populations. Students should contact the Office of Multicultural Affairs for assistance during the application process. The program offers counseling and advocacy, referrals to University and community resources, tutoring, financial-aid information, and numer-

ous opportunities to interact with other minority health-care professionals within the community. Various student organizations also provide minority medical students a means to interact socially and pursue shared interests, to offer peer support, and to assist with community-outreach activities.

U-DOC, a high-school summer-enrichment program offered by the Office of Multicultural Affairs, is a six-week program for students who have completed their junior year in high school. U-DOC's goal is to foster, affirm, and encourage high school students' interest in the medical profession by allowing them to further explore medical careers and to obtain a valuable introduction to college life. U-DOC is offered in each of the five WWAMI states.

The Western Consortium Summer Medical Education Program (SMEP) offers undergraduate and some qualified postbaccalaureate students a six-week summer academic-enrichment program that includes biology, chemistry, physics, communications, study skills, and MCAT preparation. Structured clinical and research activities are also offered. Housing, stipends, and travel assistance are available.

A prematriculation program for entering minority or disadvantaged medical students is offered for six weeks during the summer. The program is designed to facilitate students' entry into medical school by providing instruction in histology as well as enrichment activities in areas such as study skills, stress management, test-taking skills, research, clinical practice, and community health. Stipends and travel assistance are available to students who qualify.

During the regular school year, the Office of Multicultural Affairs serves as a support network for both the academic and nonacademic needs of students, and facilitates students' access to the multiple resources in the School of Medicine, the WWAMI region, and the community.

The Native American Center of Excellence was established in 1992 as part of the Office of Multicultural Affairs to encourage Native American students to pursue medicine as a career, to promote research on Native American health issues, and to foster the preparation of Native American students for faculty roles in academic medicine. The Center of Excellence provides educational experiences that integrate Western medicine with the Native American way of life, offers a variety of support services to promote the academic development of students, and sponsors a variety of educational opportunities within the Native American community.

Inquiries and requests for additional information may be obtained from the Office of Multicultural Affairs, Box 357430, School of Medicine, University of Washington, Seattle, Washington 98195-7430; (206) 685-2489.

Medical Scientist Training (MD-PhD) Program

A limited number of highly qualified candidates who wish to pursue both the MD and PhD degrees are considered annually. MD/PhD students are permitted a wide choice of research specializations from among numerous disciplines and interdisciplinary areas of biomedical sciences. The program emphasizes continuity of both clinical and basic sciences exposure. Among participating graduate departments and interdepartmental disciplines are biochemistry, bioengineering, chemistry, environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, and physiology and biophysics. The participating interdepartmental and affiliate programs are neurobiology and behavior, molecular and cellular biology. Students can also conduct their research at the Fred Hutchinson Cancer Research Center.

Applicants who wish to be considered for the MD/PhD program must submit the Medical Scientist Training Program application as soon as possible. Both the application and any supplemental material requested must be completed by January 15. Serious consideration is rarely given to ap-

plicants with minimal research experience and/or a cumulative GPA of less than 3.50 or MCAT scores of less than 10 in each category.

Applicants should correspond directly with the administrator of the Medical Scientist Training Program: MSTP

University of Washington
Health Sciences Building, Room 1264
Box 357470
Seattle WA 98195-7470
(206) 685-0762
mstp@pathology.washington.edu
www.pathology.washington.edu/mstp/

Financial Information

Fees and Other Charges

All fees and extra service charges are payable in U.S. dollars and due at the time specified for such fees and charges. The University reserves the right to change any of its fees and charges without notice. Resident tuition for 2003-2004 is \$4,149 per quarter; nonresident tuition is \$9,796 per quarter.

Financial Assistance

Financial aid awards are based on the demonstrated need of the students. All applicants for aid must submit the Free Application for Federal Student Aid (FAFSA). This requires disclosure of financial information from the student and the student's parents. The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and the Primary Care Loan are the primary sources of aid. Institutional loans are also available from the School of Medicine. Limited amounts of grant funds are available to Washington state residents who meet specific funding criteria. Parental information is not required for grant funds, the Stafford Loan, or the Perkins Loan.

Scholarships are available through the School of Medicine scholarship fund. These awards vary in amount and require financial information from the student and the student's parents. There is a separate application for the School of Medicine scholarship, which has a May 31 due date.

Financial aid information is distributed to all accepted applicants. The FAFSA form may be obtained at www.fafsa.ed.gov or from the UW Office of Student Financial Aid or the School of Medicine Financial Aid Office. The deadline for receipt of the financial-aid application by the processor is February 28. Applicants must meet this deadline to be considered for all available aid sources regardless of the status of their admission file. Late applicants are awarded only Stafford and Unsubsidized Stafford loans.

Outside employment is discouraged while the student is enrolled in medical-school coursework.

Enrichment Opportunities

Students may enhance their medical education through a variety of sponsored activities that offer students an opportunity to explore areas of special interest, such as working in rural or urban clinics that serve medically underserved communities, undertaking medical research projects, or participating in an international exchange program with a developing country. Brief descriptions of two of the more formally structured programs follow.

Rural/Underserved Opportunities Program (RUOP)

This program exposes students to rural medicine and utilizes clinical training sites in all five states. For one month during the summer between the first and second years, students work with physicians in small communities, offering a chance to better understand the challenges and opportunities in these settings. Students receive a stipend supported by the Family Health Foundation, the Academy

of Family Physicians, Area Health Education Centers, and the School of Medicine.

Medical Student Research Training Program

Summer research opportunities are offered to UW medical students interested in gaining valuable experience from training in medical research. This research is planned and carried out under the supervision of a faculty sponsor and is undertaken during the summer between the first and second years. Student trainees in the program receive a stipend supported largely by gifts given by donors specifically to fund student research. The project is ten weeks, full-time, on a working schedule of forty hours per week, and the student may not be enrolled in courses for credit during this time. At the conclusion of the summer, the students prepare posters that are presented as part of the Medical Student Research Forum.

GRADUATE MEDICAL EDUCATION AND POSTDOCTORAL TRAINING

The University of Washington School of Medicine offers a broad array of residency and fellowship programs. Training occurs at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Puget Sound Health Care System, Seattle Children's hospital, and other affiliated training sites in Seattle and throughout the WWAMI region. Postdoctoral research fellowship opportunities in the basic sciences are also offered.

CONTINUING MEDICAL EDUCATION

The Office of Continuing Medical Education, School of Medicine, offers a wide variety of courses for physicians and healthcare professionals in the Pacific Northwest and throughout the nation.

Offerings include short courses of one to three days, one- to two-week board-review courses, visiting professorships, preceptorships, and mini-residencies. Other offerings include lecture series at hospitals, video-tape presentations, self-directed instructional materials, and other specific courses requested by members of the medical community throughout the WWAMI region. Information on offerings is available from its website at www.uwcmce.org.

All physicians also are invited to participate in continuing medical education programs offered by clinical departments, such as grand rounds and regular conference series.

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians. All programs sponsored by the Office of Continuing Medical Education are applicable to physician relicensure requirements of the Washington Board of Medical Examiners and for Category I credit of the Physician's Recognition Award of the American Medical Association. Prescribed credit for the American Academy of Family Physicians and other types of credit are included in the program offerings when appropriate.

Brochures and calendars for courses are available for more detailed information. For information concerning Continuing Medical Education programs, contact:

Anesthesiology

BB1459 Health Sciences

The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuro-anesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding medical student clerkships may be directed to Dr. John Bramhall at (206) 231-2847 or bramhall@uw.edu. Other training questions may be directed to the Residency Coordinator at (206) 543-2773 or lfg@uw.edu.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/.

ANEST 498 Undergraduate Thesis (*) *Sivarajan* By special arrangement. Time and credit to be arranged. Offered: AWSpS.

ANEST 499 Undergraduate Research (*) Specific research problems relating to pulmonary, cardiovascular, renal, obstetric, and central nervous system functions, and their alteration by anesthetic techniques and agents. Offered: AWSpS.

ANEST 501 P-Preceptorship in Anesthesiology (1, max. 12) An opportunity for first- and second-year medical students to gain experience with medical practice situations by observing clinical faculty members in the operating room. Prerequisite: permission of instructor. Offered: AWSpS.

ANEST 650 P-Pain Medicine Clerkship (8) Participation as part of a Pain Medicine team in evaluation and management of patients experiencing short term post injury (surgery, trauma) pain and/or long-term pain. (Four weeks, full time). Prerequisite: Third- or fourth-year student.

ANEST 663 Basic Anesthesia Clerkship - Cheyenne, WY (4) Introduction to the principles of airway management, ventilator support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation.

ANEST 665 P-Basic Anesthesia Clerkship - Anchorage (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 667 P-Basic Anesthesia Clerkship - Billings (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 668 P-Basic Anesthesia Clerkship - Missoula (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 671 P-Basic Anesthesia Clerkship - Boise (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 672 Basic Anesthesiology - Boise, ID VA (4) Introduction to the principles of airway management, ventilator support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation (Two weeks, full-time). Prerequisite: third- or fourth- year Medicine student.

ANEST 674 P-Basic Anesthesia Clerkship - Spokane (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 677 P-Basic Anesthesia Clerkship - Swedish (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 678 P-Basic Anesthesia Clerkship - VA (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 679 P-Basic Anesthesia Clerkship - HMC (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 680 P-Basic Anesthesia Clerkship - UWMC (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

ANEST 681 P-Advanced Clerkship in Anesthesiology - UWMC (8, max. 16) Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: Third- or fourth-year student.

ANEST 682 P-Advanced Clerkship in Anesthesia - HMC (8, max. 16) Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. Prerequisite: Third- or fourth-year student.

ANEST 683 P-Advanced Clerkship in Anesthesiology - VAMC (8, max. 16) Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical

anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: Third- or fourth-year student.

ANEST 684 P-Advanced Clerkship in Anesthesiology - Spokane (8) Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: third- or fourth-year medical students.

ANEST 688 Advanced Anesthesia - Cheyenne, WY (8) Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic.

ANEST 697 P-Anesthesiology Special Electives (*, max. 24) Special clerkships, externships, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain a special assignment form from the dean's office at least one month before advance registration. (Four to twelve weeks, full-time.). Prerequisite: permission of instructor.

ANEST 699 P-WWAMI Anesthesiology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Biochemistry

See the Biochemistry section under the College of Arts and Sciences for full program description.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/.

BIOC 405 Introduction to Biochemistry (3) NW Hol, Hurley Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

BIOC 406 Introduction to Biochemistry (3) NW Ailion, Brzovic Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOC 405. Offered: W.

BIOC 426 Basic Techniques in Biochemistry (4) NW Verlinde Introduction to basic biochemistry experiments. Acquaints students (largely biochemistry majors) with basic biochemical laboratory techniques. Prerequisite: BIOC 440, which may be taken concurrently. Offered: ASP.

BIOC 440 Biochemistry (4) NW Brockerhoff, Klevit Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: minimum grade of 2.5 BIOL 200; 2.5 in either CHEM 224, CHEM 239, or CHEM 337; 2.0 in either MATH 124, MATH 134, or MATH 144. Offered: A.

BIOC 441 Biochemistry (4) NW Merz, Miller Biochemistry and molecular biology for undergraduate students in mo-

lecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: minimum grade of 2.2 in BIOC 440. Offered: W.

BIOC 442 Biochemistry (4) NW Kimelman, Palmiter Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: either 2.2 in BIOC 406 or 2.2 in BIOC 441. Offered: Sp.

BIOC 499 Undergraduate Research (*, max. 35) Investigative work on enzymes, proteins, lipids, molecular biology, developmental biology, intermediary metabolism, physical biochemistry, and related fields. Credit/no-credit only. Offered: AWSpS.

BIOC 510 ISCRM Research Updates and Stem Cell Club ([0/1]-, max. 12) Ruohola-Baker, Ware Presents ongoing research at the Institute for Stem Cell and Regenerative Medicine. Includes diverse subject matter in regenerative medicine, with new, unpublished data, and opportunity to identify collaborations and contacts for discussion, and an understanding of the state of the art. Credit/no-credit only. Offered: jointly with CONJ 510.

BIOC 520 Seminar (1) J. HURLEY Seminar dealing with timely topics in the field of biochemistry. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

BIOC 530 Introduction to Structural Biology (3) Baker, Daggett, Hol, Klevit, Merritt, Verlinde, Weiner, Zheng Graduate-level discussion of the structure, function, and chemistry of proteins, control of enzymatic reactions. Prerequisite: a comprehensive course in biochemistry and permission. Offered: A.

BIOC 533 Topics In Biochemistry (1, max. 30) Provides in-depth examination of current topics in biochemistry, molecular biology, and structural biology. Designed to help participants in basic science departments become acquainted with latest ideas on selected topics. Emphasis on analysis of key concepts in the field with reference to classical papers and recent literature. Prerequisite: permission of instructor. Instructor: Miller Offered: AWSp.

BIOC 534 Topics In Molecular Biophysics (1.5, max. 30) Emphasis on methods used to study macromolecular structure and dynamics, including x-ray crystallography, NMR, optical spectroscopy, computer modeling, protein folding and ligand binding. Two topics covered each quarter; students may register for one or both. Prerequisite: permission of instructor. Offered: AWSp.

BIOC 540 Literature Review (2) S. HOPPINS Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: jointly with BPSD 540; A.

BIOC 541 Literature Review (2) Loeb, Palmiter Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: W.

BIOC 542 Literature Review (2) Hauschka Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: Sp.

BIOC 581 Introduction to Biochemical Research (4, max. 16) Student works with one of the research groups within the department for one quarter and then rotates to other laboratories for second and third quarters. Prerequisite: graduate standing in biochemistry or permission of instructor. Credit/no-credit only. Offered: AWSpS.

BIOC 600 Independent Study or Research (*-) Offered: AWSpS.

BIOC 700 Master's Thesis (*-) Offered: AWSpS.

BIOC 800 Doctoral Dissertation (*-) Offered: AWSpS.

Bioethics and Humanities

A204 Health Sciences Building

UNDERGRADUATE PROGRAM

Adviser

A204 Health Sciences Building

Box 357120

(206) 543-5145

bhinfo@uw.edu

The Department of Bioethics and Humanities offers the following program of study:

- A minor in bioethics and humanities

Minor

Minor Requirements: 25 credits, as follows:

1. One of the following core courses: B H 311, B H 420, B H 456, B H 474/PHIL 411, or PHIL 242
2. One of the following core courses: B H 401, B H 481, or B H 485
3. Electives from an approved list to reach 25 credits. Core courses (listed in items 1 and 2, above) may be used as electives if they are not counted toward the core requirements. If a B H course is cross-listed with another department's course, the course may be counted toward the B H-course minimum even if taken under the other department's prefix. See program website for more information on electives.
4. Minimum 15 credits of bioethics and humanities courses
5. Minimum 2.0 grade in courses presented for the minor

GRADUATE PROGRAM

Graduate Program Coordinator

(206) 221-6548

gradprog@uw.edu

The department offers a two-year Master of Arts in bioethics, which provides students the foundational knowledge, skills, and experience to enrich their careers and broaden their competency in bioethics. The program offers training in research and clinical aspects of bioethics as well as empirical and normative methods of analysis.

Students have the opportunity to study with diverse and well-respected faculty from the University of Washington, the Treuman Katz Pediatric Bioethics Center, and the Seattle Veterans' Health Administration. The program helps prepare students to teach, publish, and conduct research that incorporates bioethics analysis.

Application and Admission

Qualified candidates include:

1. Practicing clinicians, biomedical scientists, health lawyers, post-doctoral fellows, and physicians accepted into a UW clinical fellowship program or the Treuman Katz Pediatric Bioethics Fellowship program.
2. Students currently enrolled in a professional degree program at the University of Washington (i.e. Law, Nursing, or Medicine).

Candidates should possess strong writing, critical thinking, and verbal communication skills. GRE scores are not required. Application due date is March 1.

Degree Requirements

40 credits, as follows:

1. Ethical theory (10 credits)
2. Empirical research methods (6 credits)
3. Clinical ethics (6 credits)
4. Research ethics (3 credits)
5. Approved electives (6 credits)
6. Practicum (3 credits)
7. Master's project (6 credits)

Students are encouraged to take additional electives based on interest and area of specialty, with guidance from their faculty mentor(s).

Opportunities for in-depth study on a topic of interest are available through elective courses, mentored research, and practicum experiences.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

B H 201 Topics in Bioethics and Humanities (2) Introduces topics in clinical, research, and population health ethics and methods of ethical analysis and argumentation. Addresses topics such as the birth of bioethics, informed consent, end-of-life care, genomic medicine, social justice in healthcare and in population health, and global bioethics. Credit/no-credit only.

B H 311 Ethical Issues in Modern Medicine (3) I&S N. JECKER Case-based approach to ethical topics in medicine, such as abortion, genetic testing, physician-assisted death, and euthanasia. Emphasizes utilizing ethical principles and methods of case analysis. Offered: Sp.

B H 401 History of Modern Medicine (3) I&S Berryman Survey of evolution of medical theory, practice, and institutions in European and American society from the late eighteenth century to the present. Medical background not required.

B H 402 Ethical Theory (5) I&S N. JECKER Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Offered: jointly with PHIL 412.

B H 404 Metaethical Theory (5) I&S N. JECKER Studies the major metaethical theories, including both cognitivist and noncognitivist approaches. Emphasizes moral philosophy during the twentieth century, as well as contemporary commentary. Offered: jointly with PHIL 413.

B H 420 Philosophical Problems in Bioethics (3) I&S Jecker Introduces the philosophical concepts and controversies that underlie contemporary bioethical debates. Explores issues using the literature of bioethics and philosophy, contemporary film, works of fiction, and conversations with health professionals. Students learn philosophical methods of analysis and argument, and debate different sides of ethical issues.

B H 421 History of Eugenics (5) I&S Wojak Examines the history of ideas, policies, and practices associated with eugenics and human genetics from the late nineteenth century to the present in American society and other national contexts. Offered: jointly with DIS ST 421.

B H 440 Philosophy of Medicine (5) I&S N. JECKER Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Offered: jointly with PHIL 459.

B H 456 Social Justice and Health (5) I&S Blacksher Examines the moral grounds for the view that social inequality

ties in health are unjust using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity.

B H 460 Reflections on Research, Responsibility, and Society (3) I&S Explores ethical and policy issues that emerge in the conduct of basic, applied, translational, community-based, and collaborative research. Addresses the ethical debates that arise in the context of planning, implementing, and disseminating research.

B H 474 Justice in Health Care (5) VLPA/I&S N. JECKER Examination of the ethical problem of allocating scarce medical resources. Emphasizes the fundamental principles of justice that support alternative health policies. Offered: jointly with PHIL 411.

B H 481 The Pursuit of Health in American Society (3) I&S Whorton Examination of the development of concern for personal health over the past two centuries, and of the evolution of philosophies and practices of health promotion. Emphasis on the influence of both medicine and popular culture on shaping of attitudes toward diet, exercise, alcohol, drugs, sex, and other health behavior.

B H 483 The Rise and Development of Sports Medicine (3) I&S Berryman Evolution of medical thought related to exercise for good health, training for sport participation, and treatment of sport-related injuries. Begins with ancient period, concludes with present. Development of specialization in sports medicine, sport team physicians, preventive medicine, concepts of fitness and wellness as related to exercise prescription, and exercise science.

B H 485 Concepts of the Body in Nineteenth- and Twentieth-Century America (3) I&S Berryman Investigation of ideas relating to corporeal self in nineteenth- and twentieth-century America. Evolution of physical ideals of manliness/femininity, how ideals related to surrounding culture, how different bodily activities developed to realize ideals. Athleticism, physiognomy, beauty contests, body building, decorations, cosmetics, anthropometry, and phrenology.

B H 497 Bioethics and Humanities Special Electives (*-, max. 30)

B H 499 Undergraduate Research (*, max. 5) Investigative work in biomedical ethics or history of the biomedical sciences.

B H 501 Alternative Approaches to Healing (2) Surveys the different philosophies and practices of the major alternative approaches to healing. Provides a characterization of alternative medicine accompanied by presentations by practitioners of chiropractic, naturopathic, homeopathic, traditional Chinese medicine, energy, and mind-body therapies. Credit/no-credit only.

B H 502 Ethical Theory (5) Jecker Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Offered: A.

B H 505 Professional Seminar I (3) Methods for identifying a bioethics research question and developing a systematic approach to investigating it, including utilization of bibliographic sources in bioethics, philosophy, history. Prerequisite: permission of instructor.

B H 506 Professional Seminar II (2) Includes conducting research in ethics, writing, giving oral presentations, facilitating seminars, developing curriculum vitae, and career planning.

B H 509 Ethics and the Social Determinants of Health (2) Blacksher Engages student in ethical questions that confront healthcare workers who serve poor and minority patient populations. Using literature from social epidemiology, bioethics, and case studies, students examine questions about clinicians' duties and patient responsibilities, controversial disease prevention programs and policies,

and broader questions of social justice. Credit/no-credit only. Offered: Sp.

B H 511 P-Medical Ethics (2) McCormick Studies ethical problems arising in clinical settings of medicine; introduces philosophical analysis and argument in practical contexts. Includes clinician-guest speakers. Credit/no-credit only.

B H 512 P-The Human Face of Medicine (2) McCormick Readings and discussing literature by and about physicians and patients to better understand the human values undergirding medical practice and ethical issues arising in the "doctor-patient" relationship.

B H 513 P-Ethical Responsibilities of Medical Practice (2) Dudzinski, McCormick Provides intensive and practical guidance about management of principal ethical and legal problems that arise in clinical practice: informed consent, confidentiality, decisions regarding life-support, advance directives and surrogate decision-makers, duty to care for indigent and risky patients. One week intensive course. Offered: S.

B H 514 Legal, Ethical, and Social Issues in Public Health Genetics (3) Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with LAW H 504/PHG 512; A.

B H 518 Spirituality in Healthcare (2) Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with FAMED 547/SOC W 587; Sp.

B H 527 Social Science Research Methods (3) D. BOWEN Introduces students to research methods in bioethics, ranging from qualitative to quantitative: interviews, focus groups, surveys, and experimental and observational designs. Students write research questions, match research methods to research questions, and conclude with a proposal that uses a social sciences empirical approach to address their research question. Offered: Sp.

B H 530 Genetic Discovery in Medicine and Public Health (3) Burke Addresses the implications of genetic science for clinical and public health practice, with an emphasis on health policy and ethics. Offered: jointly with PHG 542; W.

B H 535 Medical Ethics and Jurisprudence (3-) Dudzinski, Kuzzler Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with LAW H 503.

B H 536 Research Ethics and Regulation (3) Mastroianni Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with LAW H 536; W.

B H 548 Methods in Clinical Ethics (3) Schellenberg Introduces the history, practice, and research methods in clinical ethics. Case-based examination of methods including principlism, casuistry, narrative methods, virtue ethics. Prerequisite: permission of instructor. Offered: A.

B H 549 Classic Cases in Bioethics (3) Dudzinski Analysis of complex ethical cases from UWSOM clinical departments, case law, literature, and media. Case discussions focus on implications for delivery of medical care. Prerequisite: permission of instructor.

B H 550 Current Topics in Bioethics (3) Edwards Analysis of complex ethical cases from UWSOM clinical departments, literature, and media. Case discussion focuses on public policy implications. Prerequisite: permission of instructor.

B H 551 Human Genomics: Science, Ethics, and Society (3) Fullerton Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Offered: jointly with GENOME 573/PHG 551; A.

B H 552 Advanced Qualitative Methods (4) Starks Examines and compares phenomenology, discourse analysis, and grounded theory. Reviews the history of ideas and critically reads examples of published articles to appreciate how each method frames questions and produces different analyses.

B H 553 International Research Ethics, Law, and Policy (3) Kuzler, Rivin Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, healthcare systems, and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with LAW H 511; A.

B H 554 Ethics in Clinical Contexts (2) Cooper, Edwards Introduces the tools of clinical ethics in the context of case studies drawn from specific medical specialties. Focuses on ethical issues in clinical cases; special emphasis on understanding perspectives of clinician, patient, and trainee. Credit/no-credit only.

B H 556 Social Justice and Health (5) Blacksher Examines the moral grounds for the view that social inequalities in health are unjust, using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity.

B H 560 Genomics, Ethics, and Policy (2, max. 10) Burke, Edwards, Fullerton, Starks Explores the intersection of genomics, ethics, and policy, with a particular focus on examining the benefits of genomics for medically underserved communities. Offered: S.

B H 574 Justice for Healthcare (5) N. JECKER Examination of the ethical problem of allocating scarce medical resources. Emphasizes fundamental principles of justice that support alternative health policies. Offered: W.

B H 595 Ethics Practicum (1-6, max. 6) Students participate in clinical ethics rounds, case discussions, review of research protocols, or other professional activities related to bioethics. Prerequisite: permission of instructor. Credit/no-credit only.

B H 596 Master's Research Project ([1-12]-, max. 12) Research project culminating in a scholarly paper suitable for publication in a peer-reviewed journal. Majors only. Credit/no-credit only.

B H 597 Special Topics in Medical Ethics (1-5, max. 15)

B H 600 Independent Study or Research (*-)

Biological Structure

G520 Health Sciences

The department promotes an understanding of biological processes through the study and analysis of structure-function relationships. The research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, biomolecular structure, and quantitative biology with an emphasis on computer-graphic representations of biological structures. This diversity creates a lively atmosphere

in the department that provides a stimulating environment for the training of scientists with a variety of backgrounds.

The Department of Biological Structure recruits students through interdisciplinary PhD programs at the University of Washington. Faculty of the Department of Biological Structure are affiliated with one or more of these programs that provide high quality training in a wide range of scientific research areas. These multidisciplinary programs include faculty from the departments of Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genetics, Immunology, Microbiology, Molecular Biotechnology, Oceanography, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics, as well as research groups in the Fred Hutchinson Cancer Research Center.

The department does not offer a specific course of study leading to a Master of Science degree. An MS degree may be awarded, however, for students who meet the following requirements: One year of coursework (30 credits), concentrating in one or more areas that include neurobiology, cell and molecular biology, or developmental biology. Minimum 30 credits of research. Basic knowledge of statistics. One quarter of teaching as an assistant. A thesis committee approves the course of study, administers a general examination, and reviews the research proposal prior to the thesis defense.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/.

B STR 301 General Anatomy (4) NW Survey of systemic human anatomy, including human skeletal system, muscular system, respiratory system, circulatory system, nervous system, digestive system, endocrine system, urinary system, and reproductive system. For second-, third-, and fourth-year undergraduates. Offered: Sp.

B STR 431 Introduction to Neuroanatomy (2) NW *Dhaka, Mulligan, Pasupathy* Anatomy and functional organization of the human central nervous system, with clinical applications. Prerequisite: admission to the School of Dentistry. Offered: W.

B STR 498 Undergraduate Thesis (*, max. 30) Individual research projects under the supervision of an instructor. For senior medical students. Offered: AWSpS.

B STR 499 Undergraduate Research (*, max. 30) Individual research projects in cellular and developmental biology, experimental immunology, reproductive biology, neurobiology, molecular structure, morphometrics, computer modeling, and related fields under the supervision of an instructor. Offered: AWSpS.

B STR 501 P-Human Anatomy and Embryology (1-13, max. 13) *Clark* Dissection course in regional anatomy: thorax, abdomen, pelvis, perineum. Prerequisite: permission of instructor. Offered: A.

B STR 502 P-Human Anatomy and Embryology (1-5, max. 5) Dissection course in regional anatomy: upper and lower extremities. Prerequisite: permission of instructor. Offered: W.

B STR 510 Seminar in Anatomy (1) Scientific and historical basis of selected studies in biological structure, anatomy, and human development. Original literature used as basis for textbook descriptions. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

B STR 512 Human Microanatomy (4) *Birmingham-McDonogh* Treating the specialized tissues and organs of the body from the microscopic and ultramicroscopic points of view. Prerequisite: permission of instructor. Offered: A.

B STR 515 Biological X-Ray Structure Analysis (3) *Stenkamp* Theory of x-ray diffraction, with emphasis on appli-

cations to biological systems. Prerequisite: permission of instructor. Offered: W.

B STR 519 Current Problems in Macromolecular Structure (2, max. 10) *Stenkamp* Macromolecular structures related to specific areas of biological research. Emphasis on discussion of relevant research papers and use of computer graphics to visualize the molecular structures. Offered: AWSpS.

B STR 520 Structure Based Design of Drugs (3, max. 9) *Hol, Verlinde* Research papers illustrating protein-structure-based design of new drugs. Review of methods and extensive discussion of all known mechanisms of drug resistance. Offered: W, even years.

B STR 521 Advanced Biomacromolecular Crystallography (3, max. 9) *Hol, Merritt, Stenkamp* Aspects of protein crystallography ranging from crystal growth, phase determination methods, density averaging to refinement, fiber diffraction of DNA and proteins. Offered: W, odd years.

B STR 530 P-Human Anatomy and Embryology for Dental Students (8/13) *Clark, Mulligan* Normal anatomy of the thorax, abdomen, pelvis, and perineum are discussed and dissected employing cadavers. Development of the organ systems related to definitive adult structure. Developmental anomalies and diagnostic anatomy. Prerequisite: admission to School of Dentistry. Offered: A.

B STR 540 Special Problems in Anatomy (1-6, max. 6) Special projects in anatomy under sponsorship of faculty member. Prerequisite: graduate, medical, or dental student standing and permission of instructor. Offered: AWSpS.

B STR 541 P-Microscopic Anatomy for Dental Students (6) *Birmingham-McDonogh* Lecture and laboratory work in microscopic anatomy. For dental students taking HUBIO 510; others by permission of instructor. Offered: A.

B STR 555 Laboratory Rotation in Biological Structure (*, max. 5) Introduction to experimental design, research methods, and scientific thought in laboratories of faculty members. Provides hands-on experience, an entrance into the literature of the field, and opportunities for discussion with all members of the laboratory. First-year dental students only. Prerequisite: permission of instructor. Offered: AWSpS.

B STR 557 Biomolecular Structure Seminar (1, max. 9) *Hol* Literature review of key research in biomolecular structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Prerequisite: graduate standing in biological structure or biochemistry and permission of instructor. Credit/no-credit only. Offered: AWSpS.

B STR 580 P-Anatomy Teaching Practicum (*, max. 8) *Clark* Opportunity for medical student (or other professional student) to gain teaching experience in biological structure and human biology courses, including gross anatomy, histology, and neuroanatomy. May include lecture, laboratory, conference, depending on student interest, experience. Credit based on course credit in which student is assisting. Prerequisite: permission of course chairperson. Offered: AWSpS.

B STR 584 Seminar in Neurogenesis (1, max. 16) *Birmingham-McDonogh, Dhaka* Current research on process by which neurons are generated in the nervous system. Prerequisite: permission of instructor. Offered: AWSpS.

B STR 590 Electron Cryo-Microscopy of Biological Macromolecules and Complexes (3) *Wang* Introduces high-resolution cryo-electron microscopy (cryoEM); image formation and three-dimensional reconstruction theories and available software. Includes hands-on experience using the cryoEM facility for data collection and analysis; and presentations on student projects. Offered: Asp.

B STR 591 X-Ray and NMR Analysis of Macromolecular Structure (1, max. 9) *Hol* Current topics in research on molecular structure, usually emphasizing techniques of x-

ray crystallography. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

B STR 598 Reading in Biological Structure (2) Critical evaluation of research in biological structure, including current problems, methods, and future directions by reading and discussing research and review papers. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

B STR 600 Independent Study or Research (*-) Offered: AWSpS.

B STR 700 Master's Thesis (*-) Offered: AWSpS.

B STR 800 Doctoral Dissertation (*-) Offered: AWSpS.

Biomedical Informatics and Medical Education

E312 Health Sciences

The Department of Biomedical Informatics and Medical Education is comprised of two units: (1) the Division of Medical Education and Evaluation and (2) the Division of Biomedical and Health Informatics. The Division of Medical Education and Evaluation provides training, research and service in educational areas central to medical education including faculty and course evaluation, construction and scoring exams, curriculum development, implementation of innovative educational methodologies such as standardized patients and web-based simulated patients, faculty development, and research consultation (www.meded.washington.edu). The Division of Biomedical and Health Informatics consists of a research and training program that emphasizes both basic and applied aspects of informatics with a view toward making a difference in people's lives through interdisciplinary collaboration between faculty and students (www.bhi.washington.edu). BHI houses a National Library of Medicine Training Grant in Biomedical and Health Informatics supporting pre- and postdoctoral fellows.

The Department of Biomedical Informatics and Medical Education offers courses in the theory and application of medical education and biomedical and health informatics. Courses are designed for faculty, graduate and undergraduate students, postgraduates and fellows in the health sciences who desire further training in the methods, issues, research, and technology of medical education and biomedical informatics. BIME offers applied and research master's and doctoral degrees, as well as fellowship training, in biomedical and health informatics.

GRADUATE PROGRAM

Graduate Training Program Coordinator

I-264 Health Sciences, Box 357240

(206) 616-0369

informat@uw.edu

Master of Science

Admission Requirements

1. Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States
2. Minimum 3.00 undergraduate GPA, for the last 90 graded quarter credits or 60 graded semester credits.
3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts

- GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. GRE scores must be from testing within the past five years.
- GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD).
- A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

Degree Requirements

60 credits, as follows:

- Foundational Courses:** MEBI 530, MEBI 550, MEBI 552; either LIS 510 or LIS 544; two of the following courses: MEBI 534, MEBI 535, HSERV 503/EPI 503; a graduate-level statistics class
- Elective Courses:** Four additional courses to establish depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.
- Research Seminars:** At least 3 credits of MEBI 590 and at least 3 credits of MEBI 591
- Thesis and Final Examination:** All students must complete an M.S. thesis and pass a final examination for the master's degree.

Doctor of Philosophy

Admission Requirements

- Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States.
- A minimum 3.00 undergraduate GPA for the last 90 graded quarter credits or 60 graded semester credits.
- Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
- GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. The GRE scores must be from testing within the past five years.
- GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD).
- A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

Degree Requirements

90 credits, to include:

- Foundational Courses:** MEBI 520, MEBI 530, MEBI 550, MEBI 552; either LIS 510 or LIS 544; two of the following: MEBI 534, MEBI 535, HSERV 503/EPI 503; a graduate level statistics class
- Courses for Depth of Knowledge:** Five additional courses to establish the necessary depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.

- Research Seminars:** 12 credits of research seminars that must include at least 3 credits of MEBI 590 and at least 6 credits of MEBI 591
- Oral Presentations:** All students must satisfactorily present material in an oral format. Students should present at least once per year. This requirement is fulfilled by journal club and research seminar (MEBI 590 and MEBI 591) presentations.
- Formal Examinations:**
 - The Qualifying Examination:** All students must pass a qualifying examination (oral and written) that covers breadth of knowledge prior to formally creating a PhD Supervisory Committee and proceeding with their dissertation research.
 - The General Examination:** The general examination includes an oral and written part. The oral portion is a public presentation of the student's area of research, and includes an oral examination covering the student's in-depth knowledge of her or his area.
 - Final Examination (Dissertation Defense):** A candidate for the PhD must present a dissertation demonstrating original and independent investigation and significant achievement in the field of biomedical and health informatics.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

BIME 498 Special Topics in Biomedical and Health Informatics (1-5, max. 15) Readings, lectures, and discussions pertaining to significant problems or issues in biomedical and health informatics.

BIME 499 Undergraduate Research (*, max. 12) Investigative research or directed readings in medical education and in biomedical and health informatics. Prerequisite: permission of instructor.

BIME 520 Teaching Methods in Medical Education (2) C. SCOTT Empirical and theoretical merits of different teaching methods as applied to medical education. Structuring and leading group discussions, using questions, organizing and delivering lectures, identifying styles of clinical supervision, providing constructive feedback, and presenting effective clinical demonstrations. Offered: Sp.

BIME 521 Evaluation of Learning in the Health Sciences (3) J. CARLINE Basic issues and methods for evaluation of learning: cognitive performance, psychomotor skills, and reasoning abilities in classroom, laboratory, and clinical settings. Practical applications of instruments such as multiple-choice questions, essays, oral examinations, checklists, rating scales, simulations, and patient management problems.

BIME 522 Research in Medical Education (2) C. SCOTT Individualized, problem-based overviews of research methods and research design pertinent to research and scholarship in medical education. Development and sequencing of research projects from conceptualization through literature review, including proposal development, project implementation, data management, analysis, and write-up. Assessment and critical reading of related literature stressed. Offered: A.

BIME 530 Introduction to Biomedical and Health Informatics (3) J. GENNARI Overview of biomedical and health informatics concepts, theories, and applications, including the historical evolution and the current and future research directions within the context of information flow in health-care settings. Offered: A.

BIME 533 Public Health and Informatics (3) A. TURNER Introduction to the emerging field of public health informatics. Covers general public health topics as well as key pub-

lic health informatics issues and applications. Evaluates a public health information system. Prerequisite: either BIME 530 or permission of instructor. Offered: jointly with HSERV 509; W.

BIME 534 Biology and Informatics (3) N. ABERNETHY Provides an introduction to some of the fundamental concepts in core fields of biology; the information representation and management problems that arise from these fields; and current and potential informatics solutions to these problems. Offered: Sp.

BIME 535 Clinical Care and Informatics (3) D. MASUDA Explores the ways in which information technology affect healthcare delivery system design and delivery. Considers current and future research questions and trends as well as current and future application opportunities and challenges. Offered: A.

BIME 536 Bioinformatics and Gene Sequence Analysis (3) T. ROSE Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536/PHG 536; Sp.

BIME 537 Informatics Research and Evaluation Methods (4) N. ABERNETHY Introduces the many facets of evaluation and research for biomedical and health informatics projects. Focuses on formal studies of the application of information technology in medicine, conducted while an information resource is under development and after the resource is in routine service. Offered: W.

BIME 539 Teaching, Learning, and Communication in Biomedical and Health Informatics (4) D. MASUDA Covers learning theory and teaching/communication skills specific to informatics practitioners and researchers. Reviews current learning theories applicable to undergraduate and graduate education. Helps to develop and practice effective teaching techniques. Offered: Sp.

BIME 540 Critically Appraising and Applying Evidence in Healthcare (3) F. WOLF Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with HSERV 528; W.

BIME 541 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) E. DEVINE, F. WOLF Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with EPI 541/HSERV 529/PHARM 529; Sp.

BIME 550 Knowledge Representation and Applications (3) J. GENNARI Defines knowledge representations and explores how knowledge presentations and ontologies are used in the semantic web and why these issues are important for biomedical informatics application builders. Uses a research focus to explore foundational theoretical issues and choices facing application builders. Offered: W.

BIME 554 Biomedical Information Interactions and Design (4) Introduction to theoretical frameworks and research methodologies that underpin the study of human-information interactions and the design of biomedical information systems to support them. Emphasis on understanding informational needs and specifications that drive the design of health information systems. Offered: Sp.

BIME 570 Health Sciences Information Needs, Resources, and Environment (3) S. FULLER Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with LIS 528; Sp.

BIME 581 Telehealth Systems and Applications (4) G. DEMIRIS Prepares consumers, managers, and researchers of telehealth systems through guided exploration into the components of such systems. Introduces challenges and opportunities facing designers and managers of telehealth and remote healthcare delivery networks. Offered: jointly with NSG 540.

BIME 590 Selected Topics in Biomedical and Health Informatics (1-3, max. 12) Computers and information technology are improving and changing healthcare education, research, and clinical practice. Informatics faculty and researchers from the UW and affiliated institutions present their research findings as well as discuss their views of national developments in their respective disciplines. Prerequisite: permission of instructor. Credit/no-credit only.

BIME 591 Biomedical and Health Informatics Research Colloquium (1, max. 12) Provides forum for extensive interactive research discussions. Format is round table with short presentations and long facilitated discussion amongst students and core BHI faculty. Both students and faculty present. Topics primarily research focused (ongoing and proposed research.), but also journal articles, current topics of debate, and other. Credit/no-credit only.

BIME 598 Special Topics in Biomedical and Health Informatics (1-4, max. 12) Readings, lectures, and discussions pertaining to a significant biomedical and health informatics problem or an emerging issue. Topics vary.

BIME 600 Independent Study/Research ([1-10]-) Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of instructor.

BIME 700 Master's Thesis ([1-15]-) Prerequisite: permission of instructor.

BIME 800 Doctoral Dissertation ([1-10]-)

Comparative Medicine

T142 Health Sciences

The Department of Comparative Medicine provides education and research opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (C MED 407) for biomedical graduate students, zoonotic diseases, and training in laboratory-animal medicine for veterinary medical students and veterinarians, combined with a Master of Science degree program in comparative medicine. Areas of current research interests include enteric disease, lymphocyte biology, biology of aging, mouse genomics, generation and characterization of transgenic animal models, somatic cell gene transfer, and animal models of gene therapy.

GRADUATE PROGRAM

Graduate Program Coordinator

T136 Health Sciences, Box 351790

(206) 685-3261

Postdoctoral Program

Postdoctoral training in the areas of laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of a combination of coursework, clinical residency rotations, and research leading to a Master of Science degree in comparative medicine. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Financial assistance is normally provided. A detailed description of the postdoctoral program is available on the department's website at depts.washington.edu/compmed/.

Master of Science

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission to the degree program requires acceptance into the department's postdoctoral training program. The degree option involves additional elective courses, the completion of a more-involved research project, and a thesis.

Predocutorial Program

This program is designed to acquaint veterinary medical students with laboratory-animal medicine as a veterinary specialty. Specific areas covered include control/treatment of the principal diseases of common laboratory animals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students year-round. Stipend support is normally provided.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsat/.

C MED 499 Undergraduate Laboratory Research (1-6, max. 12) B. IRITANI, W. LADIGES, L. PRICE, M. RUDELL Specific problems in comparative medicine. Credit/no-credit only. Offered: AWSpS.

C MED 512 Introduction to the Anatomical Analysis of Animal Disease (2, max. 10) J. SNYDER, P. TREUTING Use of animals in experimental study of disease; techniques of animal necropsy, characterization, interpretation of gross and microscopic lesions, correlation of lesions with altered physiological processes, differentiation between naturally occurring and experimentally induced lesions. Prerequisite: PATH 444, PATH 445, or equivalent, and permission of instructor. Enrollment limited: two students per quarter. Offered: AWSpS.

C MED 514 Comparative Pathology Rounds (1, max. 6) J. SNYDER, P. TREUTING Focus on histopathology of naturally occurring and experimentally induced lesions of primates, laboratory and domestic animals, fish, wildlife, and birds. Participants discuss the lesions and the basic pathogenetic mechanisms that underline them. Prerequisite: PATH 500 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

C MED 516 Research and Literature Review Seminar (1, max. 12) C. HSU, B. IRITANI Alternates between research seminars and literature review presentations. Research seminar topics relate to basic and translational animal models. Literature review seminars involve critical evaluation of recent articles on laboratory animal medicine and

other scientific or medical topics. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

C MED 518 Clinical Conference and Comparative Pathology Seminar (1, max. 12) L. PRICE, P. TREUTING Alternates between clinical veterinary medicine and comparative pathology discussions. Clinical discussions include case reports of spontaneous and induced diseases. Comparative pathology discussions cover gross and histopathology of natural occurring and experimentally induced lesions in laboratory animals and wildlife. Prerequisite: either PATH 500 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

C MED 520 Biology of Laboratory Animals (1) T. BRABB, B. IRITANI, P. TREUTING Fundamentals of morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of commonly used laboratory animal species. Discusses similarities and differences within and between species, including humans. Other topics include husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: A.

C MED 521 Biology of Laboratory Animals (1) T. BRABB, B. IRITANI, P. TREUTING Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including humans are discussed. Other topics include husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: W.

C MED 530 Diseases of Laboratory Animals (1-) T. BRABB, B. IRITANI, P. TREUTING Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: A.

C MED 531 Diseases of Laboratory Animals (1-) T. BRABB, B. IRITANI, P. TREUTING Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: W.

C MED 540 Animal Models (2) T. BRABB, G. HISH JR, C. HSU, B. IRITANI, P. TREUTING Naturally occurring and experimentally induced analogs of human diseases in animals with emphasis on diseases lacking animal models, and approaches to identifying new models. Discusses animal models of categorical disease (e.g., cancer, atherosclerosis, gerontology). Prerequisite: permission of instructor. Offered: Sp.

C MED 590 Selected Topics in Animal Medicine (1-5, max. 10) T. BRABB, L. COLBY, C. FREVERT, B. IRITANI, P. TREUTING Radiation biology, genetics, anesthesiology and experimental surgery, preventive medicine, and ethical aspects of use of animals in biomedical teaching and research. Specific topics vary from year to year, depending on expertise of the annual visiting professor. Prerequisite: permission of instructor. Offered: AWSpS.

C MED 592 Comparative Pathology for the Scientist (3) C. FREVERT Introduces the interpretation of pathological changes in animals used for biomedical research, with a focus on the mouse. Covers study design and interpretation, techniques to measure pathological changes in major organ systems, plus other topical material related to pre-clinical drug studies and translational research.

C MED 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

C MED 601 Internship Rotation - Laboratory Animal Medicine (*-) Prerequisite: DVM degree. Credit/no-credit only. Offered: AWSpS.

C MED 700 Master's Thesis (*-) Credit/no-credit only. Offered: AWSpS.

Conjoint Courses

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

CONJ 401 Human Anatomy and Physiology (4) *T. LINDER, A. MELBY* Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: BIOL 220; either CHEM 155 or CHEM 162. Offered: A.

CONJ 402 Human Anatomy and Physiology (4) *T. LINDER, A. MELBY* Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 401. Offered: W.

CONJ 403 Human Anatomy and Physiology (4) *T. LINDER, A. MELBY* Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 402. Offered: Sp.

CONJ 475 Alcoholism: A Course for Medical Students and Students in the Allied Health Sciences (2) *Kivlahan, Samson* For medical students in the allied health sciences in any year that covers an introduction to the epidemiology, diagnostic strategies, natural history, physiologic effects, and treatment of alcohol-related disorders. Offered: Sp.

CONJ 480 Neuroscience for Rehabilitation Professionals (5) *Anderson, Mulligan, Slomp* Structure and function of the central nervous system, emphasizing sensorimotor systems and higher integrative functions, coupled with clinical correlations. Required for occupational therapy, physical therapy, and prosthetic/orthotic students. Others by permission.

CONJ 504 Topics of Molecular Medicine (1.5, max. 5) Focuses on an important topic in medicine and science. Lectures introduce clinical and basic science background, followed by a seminar/discussion with speakers. Prerequisite: Graduate standing and permission of instructor. Offered: jointly with MOLMED 504; Sp.

CONJ 505 P-Pain Clinic Preceptorship (1, max. 12) One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at UW Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: Pain Center.

CONJ 510 ISCRM Research Updates and Stem Cell Club ([0/1]-, max. 12) *Ruohola-Baker, Ware* Presents ongoing research at the Institute for Stem Cell and Regenerative Medicine. Includes diverse subject matter in regenerative medicine, with new, unpublished data, and opportunity to identify collaborations and contacts for discussion, and an understanding of the state of the art. Credit/no-credit only. Offered: jointly with BIOC 510.

CONJ 511 Genomic Dissection (1) *Clark, Horwitz, Shedure* Uses state of the art technology to sequence the genome of a cadaver. Explores the structure of the genome, as well as genetic variants responsible for human individualization and disease. Credit/no-credit only. Offered: A.

CONJ 512 Scientific Speaking Seminar (1.5) *Biggins, Peichel* Teaches how to effectively give a scientific seminar about research. Offered: jointly with MCB 512; W.

CONJ 513 Clinical Medical and Human Genetics (4) *Byers* Rotations through medical genetics clinics for graduate students enrolled in the molecular medicine pathway. Students review clinical data, identify the molecular basis of

genetic disorders, and assess how scientific studies have changed the assessment and natural history of these conditions. Limit of four students per quarter. Offered: jointly with MOLMED 513; AWSp.

CONJ 514 Molecular Medicine (1.5, max. 3) *Eary, Rosen* Introduces how basic sciences impact the practice of medicine, using patient case histories to introduce key areas of clinical research and investigative medicine. Topics include cancer biology; drug development; gene- and cell-based therapeutics; inflammation and host response; vascular disease; and obesity and weight regulation. Offered: jointly with MOLMED 514; W.

CONJ 515 Interdisciplinary Health and Human Services Delivery in Rural Communities (1) *House* Provides opportunities for students in health and human services to explore current trends and issues of service delivery in rural communities. Addresses demographics, economics, community structure, culture, and professional/personal issues. Field trip fee. Prerequisite: major standing in a health or human services profession. Credit/no-credit only. Offered: Sp.

CONJ 516 What Every Physician Should Know about Oral Health (1) *Lewis, Mouradian, Slayton* Didactic elective for students interested in understanding oral health and its relationship to systemic health. Special interest to students planning careers in primary care, public health, or who are likely to practice in rural or underserved communities. Includes weekly seminars and clinical demonstrations. Credit/no-credit only. Offered: Sp.

CONJ 524 Structural Basis of Signal Transduction (1.5) *Xu* Focuses on the structure-function relationship of key enzymes in signal transduction (protein/lipid kinases; phosphatases etc.) and the structural consequences of protein phosphorylation. Teaches students to look into critical structural details using PC or Mac. Prerequisite: undergraduate course in biochemistry and basic cell biology, or permission of instructor. Offered: W.

CONJ 526 Introduction to Systems Biology and Quantitative Approaches to Biomedical Sciences (1.5) *Aitchison* Covers philosophy of systems biology, experimental design, and the linkages between discovery and hypothesis-driven science. Reviews quantitative systems biology tools for genomics, proteomics, modeling and data integration, and emerging technologies. Offered: W.

CONJ 529 Cell Migration (1.5) *Cooper, Moens* Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated by the migrating cell. Offered: jointly with MCB 529; W.

CONJ 530 Directing Stem Cells Toward Regenerative Medicine (3) An introduction to the rapidly developing field of human embryonic stem cells in regenerative medicine crossing all medical disciplines including ethics. Requires a strong background in biological sciences. Offered: Sp.

CONJ 531 Signaling Mechanisms in Excitable Cells (1.5) *W. ZAGOTTA* Mechanisms of cellular signaling, particularly in nerve and muscle. Electrical, chemical, and mechanical signaling in the cell that lead to processes such as electrical excitability, action potentials, and muscle contraction. Prerequisite: comprehensive undergraduate course in general biochemistry and molecular biology, or permission of instructor. Offered: A.

CONJ 532 Signal Transduction from the Cell Membrane to the Nucleus (1.5) *Beavo, Moon, Storm* Intracellular signaling pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane receptors and G-proteins, insulin/PI3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: A.

CONJ 533 The Dynamic Chromosome (1.5) *Henikoff, Roth* The chromosome viewed as the ultimate organelle. How chromosomes are maintained and propagated. Epigenetic regulation of genes. Genetic, biochemical, and cytologic methods for understanding chromosome functions. Prerequisite: cell biology, biochemistry, and genetics. Offered: A.

CONJ 534 Selected Problems in Nervous System Development (1.5) Introduces students to current issues in developmental neurobiology. Topics include regionalization of the neuroectoderm, mechanisms of neurogenesis, axon patterning and plasticity, and cell death. Not intended to be comprehensive; examines the experimental basis for current views in the field of a few topical issues.

CONJ 537 Mechanism of Transcriptional Regulations (1.5) *Tsukiyama* Biochemical mechanisms of gene transcription covering a broad range of transcriptional regulation, including mechanisms of transcriptional initiation, elongation, and termination. Regulation of transcription by chromatin. Includes a special lecture regarding regulation of transcription in cell growth and differentiation. Offered: A.

CONJ 538 Genetic Instability and Cancer (1/1.5) *Maizels, Monnat* Seminar focusing on molecular pathways that maintain genomic stability in all cells and that carry out programmed changes in genomic structure in the immune system. Special attention devoted to understanding how failure in these pathways leads to genomic instability and malignancy. Prerequisite: permission of instructor.

CONJ 539 Modern Approaches to Vaccines (1.5) *Fuller* Covers selected topics based on recent publications in viral and bacterial vaccine research. Emphasizes understanding the latest advanced and issues in vaccine discovery, mechanisms of action, and special topics in viral vaccines. Offered: Sp.

CONJ 540 Basic Science of Urologic Complications (3) Introduction to the multidisciplinary nature of the most common urologic complications ranging from prostate cancer to erectile dysfunction. Covers epidemiology, clinical and surgical treatments, current dogmas and approaches/models in basic study of underlying disease mechanisms, and a journal review of each complication. Prerequisite: biological science course.

CONJ 541 Molecular Biology of Cellular Processes (1.5) *Bornstein* Translational control; cytoskeleton and molecular motors; protein targeting, sorting and secretion; apoptosis; regulation of cell function by extracellular matrix. Prerequisite: comprehensive undergraduate course in biochemistry and molecular biology or permission of instructor. Offered: Sp.

CONJ 542 Development (1.5) *Li* Molecular mechanisms of development; molecules and pathways used for the patterning of developing organisms. Similarities and differences in the making of plants, invertebrates, and vertebrates. Prerequisite: comprehensive undergraduate courses in biology, molecular biology, or permission of instructor. Offered: W.

CONJ 544 Protein Structure, Modification and Regulation (1.5) *Stoddard, Strong* Overview of general principles of protein structure, including forces that contribute to folding and stabilization, followed by an extended coverage of the means by which protein structure and function are modified and regulated. Examples from recent developments in protein folding, processing, and allosteric regulation. Prerequisite: introductory biochemistry and cell biology.

CONJ 545 Molecular Interactions and Medicine (1.5) *Verlinde* Forces governing molecular interactions in biology; with a focus on medicine. Principles of computer modeling techniques in use for predicting the molecular behavior of proteins, ligands, and their complexes. In computer ligand discovery; drug design, and the understanding at the atomic level of some genetic diseases. Two computer lab sessions. Offered: Sp.

CONJ 546 Survey of Technologies for Molecular Biology (1.5) *Bumgarner* Broad overview of modern technologies used in molecular biology with particular emphasis on DNA sequencing and gene expression. In addition to methods and applications for the technologies, examines the theoretical basis and underlying instrumentation through which these technologies are implemented. Offered: A.

CONJ 547 Molecular Evolution of Viral-Host Interactions (1.5) *Katze* Interactions between viruses and the cells they infect, with special emphasis on evolutionary battle that occurs between the invading virus and its host. Examines new technologies being used to molecularly dissect virus-host interactions. Offered: Sp.

CONJ 548 Modeling Proteins and Proteomes (1.5) *Samudrala* Hands-on experience for modeling protein structures, using the models to predict function, and applying the prediction methods to all proteins encoded by an organismal genome. Provides an overview of protein structure, how it mediates function, and its importance for understanding protein interaction networks. Technologies involved for protein structure modeling. Offered: W.

CONJ 549 Microbial Population Biology (1.5) *Mittler* Principles of ecology and evolution as they apply to microorganisms. Prerequisite: advanced undergraduates with permission of instructor. Offered: Sp, even years.

CONJ 550 P-Clinical Infectious Diseases (3) Lecture series by faculty members from various departments, authorities in the field of clinically important infectious diseases. Lectures, reading assignments, and handouts emphasize epidemiology, clinical manifestations, laboratory findings, diagnosis, treatment, and prevention. Oriented for second-year medical students. Credit/no-credit only.

CONJ 551 Immunity (1.5) *Strong* Provides an understanding of the central cellular and molecular players in the mammalian immune system at a level appropriate for the non-specializing graduate student. Selected topics include the molecular basis of B and T cell activation and effector functions and the mechanisms of innate immunity. Offered: Sp.

CONJ 552 Metabolic Flexibility in Biology (1.5) Small molecules and the ways that chemistry of these molecules facilitates life under changing conditions. Includes systems from microbiology to human physiology to understand aspects of cancer, aging, and animation. Explores topics including bioenergetics/metabolic flux, adaptation, and allometric scaling. Prerequisite: undergraduate organic chemistry and biochemistry.

CONJ 553 Clinical Management of HIV (2-3) *M. CHUNG, H. KIM* Provides in-depth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with speakers who have experience in both resource-rich and resource-limited settings. Offered: jointly with G H 573; Sp.

CONJ 554 Fundamentals of Hypnosis (1) *McCann, Schnee-weiss* Examines phenomena associated with hypnosis, as well as its safe use in clinical practice. Credit/no-credit only. Offered: W.

CONJ 556 Drug Addiction: Mechanisms, Prevention, and Treatment (2) *Chavkin* Key advances, insights, methods, and challenges for our understanding of drug addiction from psychological, pharmacological, psychiatric, community prevention, legal, and neurodevelopmental perspectives. Enhances familiarity with the multidisciplinary approaches required to understand addiction as a disease. Offered: A.

CONJ 557 Microbial Evolution and Ecology (2) Selected topics in microbial evolution including evolution of the main lines of descent, and bacterial and archaeal speciation and co-speciation, and evidence for early microbial life on Earth. Prerequisite: MICROM 412 or general microbiology background. Offered: ASP.

CONJ 558 Fundamentals of Prokaryotic Biology (1.5) *Harwood, Leigh* Basic principles in prokaryotic cell structure,

genomics, and metabolism. Introduction to prokaryotic physiology, bacterial pathogenesis, and microbial ecology.

CONJ 559 Scientific Ideas at Work (1.5) *Gray, Maizels* Examines how basic biomedical research leads to discovery of new therapeutics and diagnostics for treatment of human disease. Considers disease mechanism and impact, need for a drug, preclinical studies, clinical testing and drug approval, and how technology developed in an academic laboratory is translated into a commercial product. Offered: jointly with MOLMED 559; Sp.

CONJ 562 Advanced Topics in Bacterial Physiology (1.5) Covers cutting edge research and concepts pertaining to the complexity of the bacterial cell with an emphasis on primary literature and discussion. Offered: Sp.

CONJ 570 Introduction to the Clinical Management of Transgender Patients (1) Covers the steps and protocols providers need to know to provide culturally proficient care for trans-identified patients. Prior completion of FAMED 561 highly recommended. Prerequisite: current graduate health science student and permission of course coordinator. Credit/no-credit only.

CONJ 583 Molecular Targets in Cancer Therapy (1.5) *Maizels, Monnat* Examines how molecular targets for cancer therapies are discovered and validated. Covers disease mechanisms, need for new therapeutics, how small molecule and antibody therapeutics are identified and developed, and how preclinical studies are used to establish safety and efficacy. Offered: jointly with MOLMED 583; A.

CONJ 585 Surgical Anatomy (1-3, max. 12) *Graney* Guided dissection of selected regions, supplemented by conferences. Offered conjointly by the departments of Biological Structure and Surgery. Prerequisite: permission of department. Coordinator: Department of Biological Structure.

CONJ 616 P-Prison/Corrections Medicine Clerkship - Washington (*, max. 16) Covers a wide variety of diseases in a variety of outpatient settings, including urgent care, a chronic care clinic, and a long-term care facility for elderly and medically frail inmates in a men's prison setting. Also includes the option to learn common procedures including suturing, joint injections, skin biopsies, and toenail removals. Prerequisite: completion of the medicine and family medicine required clerkships. Offered: AWSpS.

CONJ 617 P-Subinternship in Neurocritical Care Medicine (8) As sub-interns on the Neurocritical Care Service, students learn about critical illness, focusing on neurosurgical critical illness. Through direct patient care responsibilities, students gain experience managing traumatic brain injury, acute spinal cord injury, acute cerebral hemorrhage, and other common critical-care issues. Offered: AWSpS.

CONJ 625 Global Health Clinical Elective (*, max. 24) *S. McClelland* Provides a better understanding of the challenges of providing medical care in international resource-limited settings. Students spend a minimum of five weeks at a developing county medical center, with the goal of learning more about the local burden of disease and strategies for diagnosis and treatment. Prerequisite: fourth year medical students. Offered: WSp.

CONJ 626 Global HIV Medicine Elective (10-20, max. 20) *Chung* Prepares health profession students for work in developing countries. Includes experience treating HIV-positive patients in resource-poor settings, analyzing the relationship between poverty and health, recognizing tropical diseases that are common in Sub-Saharan Africa or Southeast Asia, and understanding the epidemiology of HIV in Sub-Saharan Africa or Southeast Asia. Offered: AWSpS.

CONJ 630 P-Write Chronic Care Clerkship (8) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: approved by the WRITE committee.

CONJ 655 P-Chronic Care - Olympia (8) Exposure to rehabilitation. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didac-

tic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 656 P-Chronic Care/Palliative Care - Cheyenne, WY (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 657 P-Chronic Care/Pain - VAPSHCS - Seattle, WA (8) Exposure to pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 658 P-Chronic Care/Palliative Care - Providence Spokane (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 659 P-Chronic Care/Geriatrics - Missoula VHC (8) Exposure to rehabilitation, palliative care, pain management, and geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 660 P-Chronic Care/Palliative Care - Group Health Everett (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 661 P-Chronic Care/Palliative Care - Coeur d'Alene (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 662 P-Chronic Care/Alaska - Fairbanks APCA (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management through the Chronic Care website and didactics. Students focus their clinical activities on chronic pain management.

CONJ 663 P-Chronic Care/Alaska - Providence Palliative Care (8) Exposure to the areas of rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation of the first day, and patient case presentations during didactics on last day.

CONJ 664 P-Chronic Care/Palliative Care - Kline Galland Home (8) Exposure to rehabilitation. Students assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 665 P-Chronic Care/Palliative Care - PHOS (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 666 P-Chronic Care/Spokane - VAMC Geriatrics Unit (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 667 P-Chronic Care/Palliative Care - Evergreen Hospice (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are as-

signed to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 668 P-Chronic Care/Spokane - St. Luke's Rehab, Pain Management (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 669 P-Chronic Care/Spokane - Deaconess Palliative Care (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor and clinical site to concentrate clinical activities.

CONJ 670 P-Chronic Care/Billings - St. Vincent Healthcare (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation on the first day, and patient case presentations during didactics on last day.

CONJ 671 P-Chronic Care/Boise - Saint Alphonsus Palliative Care (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation on the first day, and patient case presentations during didactics on last day.

CONJ 672 P-Chronic Care/Boise - St. Luke's Palliative Care (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation on the first day, and patient case presentations during didactics on last day.

CONJ 673 P-Chronic Care/Boise - VAMC (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities.

CONJ 674 P-Chronic Care/Alaska - Anchorage APCA (8) Exposure to rehabilitation, geriatrics, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities.

CONJ 675 P-Chronic Care/Palliative Care - GHHS Tacoma (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 677 P-Clinical Allergy and Immunology (*, max. 12) Clinic and office experience in diagnosing and managing allergic disease. Clinical conferences, hospital rounds on clinical immunology and allergy. Student may elect a flexible program, emphasizing adult or pediatric allergy. (Four weeks, full-time). Prerequisite: MED 665 or basic clerkships in departments of Family Medicine or Pediatrics.

CONJ 679 P-Chronic Care/Palliative Care - PRMC (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical studies. Includes didactic orientation on the first day and patient case presentations during didactics on last day.

CONJ 680 P-Detoxification and Rehabilitation Program for Alcoholism and Drug Abuse (*, max. 16) J. REOUX Supervised introduction to alcoholic detoxification and rehabilitation and drug abuse. Supervised clinical experience in a variety of alcoholism and drug abuse treatment programs; accompanied by a core series of lectures and discussions. For medical students only. Prerequisite: Completion of 3rd year psychiatry clerkship.

CONJ 681 P-Chronic Care/Palliative Care - Children's (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 682 P-Chronic Care/Palliative Care - HMC (8) Exposure to palliative care. Students are assigned to a preceptor

and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 683 P-Chronic Care/Palliative Care - UWMC PC Consult (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 684 P-Chronic Care/Palliative Care - Multicare Hospice (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 685 P-Chronic Care/Palliative Care - Providence Everett (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 686 P-Chronic Care/Rehab - Children's (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 687 P-Chronic Care/Rehab - HMC (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 688 P-Chronic Care/Rehab - VA RMS (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 689 P-Chronic Care/Rehab - VA SCI (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 690 P-Chronic Care/Rehab - UWMC (8) Exposure to rehabilitation. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 691 P-Clerkship in Chronic Care - Boise PMR (8) Required clerkship for fourth year medical students, concentrating on geriatrics, palliative care, and rehab medicine using lectures, group discussions, standardized patients, and case scenarios.

CONJ 692 P-Chronic Care Clerkship - Spokane, St. Luke's Rehab (8) Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 693 P-Chronic Care/Geriatrics - HMC (8) Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 694 P-Chronic Care/Geriatrics - VA (8) Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 695 P-Chronic Care/Pain Management - Roosevelt (8) Exposure to pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 696 P-WRITE Clinical Electives (*, max. 24) Clinical electives for WRITE program. Offered: AWSpS.

CONJ 697 International Exchange Clerkship (12) Hunt Participation in healthcare delivery systems in developing countries; observation of relationship of host country's traditional medicine with Western medicine. Students live in cross-cultural setting to better understand their own assumptions about healthcare and life styles. Offered: Sp.

CONJ 698 P-Foreign Medical Student Clerkship (*, max. 24) A limited number of students from foreign medical schools are accepted for individually designed clinical clerkships at available sites after all UWMC students are accommodated. Prerequisite: permission of Associate Dean for Academic Affairs, School of Medicine.

CONJ 699 P-Clinical Clerkships (*, max. 32)

Family Medicine

C408 Health Sciences

The University of Washington Department of Family Medicine, founded in 1971, improves the health and well-being of individuals, families, and communities through leadership in education, scholarship, and clinical care. With over 800 clinical faculty members located throughout the Washington, Wyoming, Alaska, Montana and Idaho (WWAMI) region, and approximately 40 regular faculty located at the University site in Seattle, the department is one of the largest of its kind in the country.

Direct patient care is offered primarily through the clinical operations at the UW Neighborhood Clinic in Northgate and the Family Medicine Clinic at Harborview. The Medical Student Education Section develops and delivers innovative, high-quality training to students who serve the evolving needs of the diverse individuals, families, and communities of the WWAMI region, with emphasis on rural and urban underserved and other vulnerable populations. The residency program is known for its full spectrum training of residents that allows its graduates to enter a variety of practice settings, including careers with an academic or health policy focus. The UW Family Medicine Residency Network is a group of 18 family medicine residency programs located within the WWAMI region. The network exists to promote excellence in family medicine residency education, provide academic leadership, and to respond to societal needs for family physicians. Organized in October 1977, the research section's efforts are focused primarily in four areas – rural health, the health workforce, chronic disease, and medical education. MEDEX Northwest, established in 1969, joined the Department in 2011. Its mission is to train physician assistants who will primarily practice in medically underserved and rural areas of WWAMI.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsct/

FAMED 499 Undergraduate Research (*, max. 35) W. PHIL-LIPS Research activities arranged with University or community-based physicians in diverse areas relating to family medicine. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 501 P-Introduction to Family Medicine: Preceptorship (2, max. 12) *J. CAWSE-LUCAS* Medical students spend one morning per week for one or more quarters working with a practicing community family physician. Prerequisite: first- and second-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 502 P-Preclinical Continuity Preceptorship in Family Medicine (1-8, max. 12) *J. CAWSE-LUCAS* Introduces medical students to continuity of care in family medical settings, especially regarding what it means to be someone's doctor and what it is like to work with individuals to help them achieve optimal health for a minimum of two quarters. Prerequisite: first- and second-year medical students; permission of course coordinator. Offered: AWSpS.

FAMED 525 African American Health and Health Care Disparity (1) *F. OVERSTREET* Examines the most pressing health issues facing African Americans. Provides a forum to examine the root causes of health disparity in African descendants. Explores strategies to remedy problems in public health and healthcare delivery systems. Prerequisite: current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: A.

FAMED 530 Primary Care (1) *W. PHILLIPS* Introduces primary care, the foundation of medical care and cornerstone of healthcare reform. Addresses history, clinical content, practitioner workforce, delivery models, research methods, and policy issues. Explores the role of primary care in personal and population health. Includes lectures, discussions, student presentations, and practice observation. Prerequisite: permission of course coordinator. Offered: W.

FAMED 540 Topics in Health and Human Services in Rural Communities (1) *Shin* Explores topics important to rural clinical practice. Includes rural health research, rural health policy, cultural competency, models of rural health practice, and others. Includes panel discussions, a case study, and a required field trip to a rural community. Prerequisite: permission of course coordinator. Offered: W.

FAMED 547 Spirituality in Healthcare (2) Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/SOC W 587; Sp.

FAMED 556 Spanish for Health Professionals (1) Instruction in interviewing/history taking Spanish-speaking patient. Prerequisite: Spanish fluency at intermediate level; current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: Sp.

FAMED 559 Tobacco Related Health Disparities (1/2) Integrates multiple disciplinary perspectives to address the pressing issue of disproportionate tobacco use and related diseases among marginalized populations, including those defined by socioeconomic status, race/ethnicity, and sexual orientation. Explores links between, and intervention strategies for, smoking and mental illness, social stress, acculturation processes, and genetics. Offered: jointly with HSERV 556.

FAMED 561 LGBTQ Health and Health Disparities (1) Covers the history and health status of the Lesbian, Gay, Bisexual, Transgendered, and Queer (LGBTQ) community in the United States; effective strategies and skills for working with the LGBTQ community; designed to help the learner understand and respond better to healthcare needs of the LGBTQ community. Prerequisite: current graduate health science student; permission of course coordinator. Offered: W.

FAMED 630 P-WRITE Family Medicine Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: permission of course coordinator.

FAMED 631 P-LIC Family Medicine Clinical Clerkship - Olympia, WA (12) Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: permission of course coordinator.

FAMED 632 P-Clinical Clerkship in Family Medicine - Bozeman (12) Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 633 P-Clinical Clerkship in Family Medicine - Leavenworth (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 634 P-Clinical Clerkship in Family Medicine - Sitka (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 635 P-Clinical Clerkship in Family Medicine - Cheyenne (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 636 P-Clinical Clerkship in Family Medicine - Wenatchee (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 637 P-Clinical Clerkship in Family Medicine - Spokane GHC (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 638 P-Clinical Clerkship in Family Medicine - Othello (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 640 P-Clinical Clerkship in Family Medicine - Boise (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 641 P-Clinical Clerkship in Family Medicine - Spokane (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 642 P-Clinical Clerkship in Family Medicine - Madigan (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 643 P-Clinical Clerkship in Family Medicine - Tacoma (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 644 P-Clinical Clerkship in Family Medicine - University of Washington Medical Center (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 645 P-Clinical Clerkship in Family Medicine - Group Health (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 646 P-Clinical Clerkship in Family Medicine - Swedish First Hill (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 647 P-Clinical Clerkship in Family Medicine - Swedish Cherry Hill (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 648 P-Clinical Clerkship in Family Medicine - Renton Valley (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 649 P-Clinical Clerkship in Family Medicine - Olympia (12) For description and prerequisites, see FAMED 636. Offered: AWSpS.

FAMED 650 P-Clinical Clerkship in Family Medicine - Anacortes (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 651 P-Clinical Clerkship in Family Medicine - Omak (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 653 P-Clinical Clerkship in Family Medicine - Anchorage (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 656 P-Clinical Clerkship in Family Medicine - Whitefish (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 657 P-Clinical Clerkship in Family Medicine - Po-catello (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 658 P-Clinical Clerkship in Family Medicine - Sea Mar Clinic (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 659 P-Clinical Clerkship in Family Medicine - Country Doctor (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 660 P-Clinical Clerkship in Family Medicine - Yakima (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 661 P-Clinical Clerkship in Family Medicine - Bremerton (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 662 P-Clinical Clerkship in Family Medicine - Buffalo (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 663 P-Clinical Clerkship in Family Medicine - Petersburg (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 664 P-Clinical Clerkship in Family Medicine - Billings (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 665 P-Clinical Clerkship in Family Medicine - Missoula (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 666 P-Clinical Clerkship in Family Medicine - Torrington (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 669 P-Clinical Clerkship in Family Medicine (12) For description and prerequisite, see FAMED 632.

FAMED 670 P-Advanced Underserved Clerkship (*, max. 24) Students gain experience, knowledge, and skills needed to care for rural, specific ethnic, or underserved populations. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 672 P-Advanced Preceptorship International (*, max. 24) For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on healthcare delivery. Prerequisite: late third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 674 P-Advanced Interviewing in Primary Care (8) *L. MAUKSCH* Emphasizes developing competency in patient-centered interviewing, interview organization, and time management. Introduces primary care counseling skills and methods of health behavior change. Prerequisite: permission of course faculty.

FAMED 676 P-Clinical Clerkship in Family Medicine - Libby (12) For description and prerequisites, see FAMED 632. Offered: AWSpS.

FAMED 677 P-Clinical Clerkship in Family Medicine - Grand Coulee (12) For description and prerequisites, see FAMED 632. Offered: AWSpS.

FAMED 678 P-Clinical Clerkship in Family Medicine - Port Angeles (12) For description and prerequisites, see FAMED 632. Offered: AWSpS.

FAMED 679 P-Clinical Clerkship in Family Medicine - Fern-dale (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 680 P-Traditional Indian Medicine Clerkship in Primary Care Setting (*, max. 16) Broadens students' knowledge about the traditional Indian perception of health and illness, and expands their experience and skills with Traditional Indian Medicine (TIM) by interacting with a TIM practitioner, Native physician, patients and their families, and the local Native community. Prerequisite: either UCONJ

530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.

FAMED 681 P-Indian Healthcare Clerkship (*, max. 16) Examines the health disparities, health systems, and cultural/community strengths associated with American Indian/Alaska Native or other indigenous peoples. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.

FAMED 682 P-Clinical Clerkship in Family Medicine - Ellensburg (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 683 P-Clinical Clerkship in Family Medicine - Lewiston (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 684 P-Clinical Clerkship in Family Medicine - Butte, MT (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 685 P-Clinical Clerkship in Family Medicine - Valley - Juneau, AK (12) For description and prerequisite, see FAMED 632. Offered: AWSpS.

FAMED 686 P-Clinical Clerkship in Family Medicine - Port Townsend (12) For description and prerequisite, see FAMED 632.

FAMED 687 P-Clinical Clerkship in Family Medicine - While Salmon (12) For description and prerequisite, see FAMED 632.

FAMED 688 P-Family Medicine Subinternship (*, max. 24) Students serve as interns for family medicine services associated with residency programs under the supervision of family medicine residents and attending physicians. Schedules mix inpatient and ambulatory experiences as determined by the site and the fourth-year student may have the same call as R-1 on service. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 697 P-Family Medicine Special Electives (*, max. 24) Supplemental experience in rural/urban practice or a family medicine department in a setting not already established through the UW SOM family medicine curriculum. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 699 P-WWAMI Family Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of course coordinator. Offered: AWSpS.

Genome Sciences

S-250 Foege Building

The Department of Genome Sciences was created in 2001 with the merger of the Department of Genetics and the Department of Molecular Biotechnology.

GRADUATE PROGRAM

Graduate Program Coordinator

S-340 Foege Building, Box 355065

(206) 616-7297

gensci@uw.edu

The Department of Genome Sciences offers a graduate program leading to the doctor of philosophy degree. Students are admitted only to the doctoral program.

The faculty and students of the Department of Genome Sciences study a broad range of topics, including the genetics of *E. coli*, yeast, *C. elegans*, *Drosophila*, and mouse;

human and medical genetics; mathematical, statistical, and computer methods for analyzing genomes and theoretical and evolutionary genetics; and genome-wide studies by such approaches as sequencing, transcriptional and translational analysis, polymorphism detection, and identification of protein interactions. Successful completion of the graduate program, generally over a period of five years, leads to the PhD in Genome Sciences.

The department's goal is to address leading edge questions in biology and medicine by developing and applying genetic, genomic, and computational approaches that take advantage of genomic information now available for humans, model organisms, and a host of other species.

Doctor of Philosophy

Admission Requirements

1. Baccalaureate or advanced degree, either in a science such as biology, biochemistry, or related field, or in a computational area such as computer science or mathematics. The ideal candidate has experience in both areas. The most competitive applicants have excellent GRE scores as well as extensive laboratory research experience.
2. Personal statement describing the applicant's academic and scientific background, research goals, and motivation for applying
3. Curriculum vitae
4. Unofficial copies of transcripts.
5. Unofficial copies of GRE scores (and TOEFL scores, for international applicants). Applicants who have provided official scores to the UW Graduate School need not send additional copies.
6. Three letters of reference from professors or others who are able to provide insight on the applicant's qualifications. Reference letters may be submitted online or by hard copy.
7. Applicants still in school who will have earned additional courses not yet listed on the transcript should send a list of such additional courses to be taken before graduation.

Degree Requirements

90 credits, to include:

1. *First Year:* Core courses, covering such topics as gene regulation, genomics, genetic analysis, genomic informatics, computational biology, proteomics, and population genetics, as well as literature review. Students rotate through a minimum of three laboratories before selecting a thesis laboratory at the end of the first year. Actual courses are determined in consultation with adviser.
- Electives focused on specific areas of interest. Students have the option of selecting mentors from core faculty members in the Department of Genome Sciences as well as from adjunct and affiliate faculty members from several UW departments and the Fred Hutchinson Cancer Research Center.
2. *Second Year:* Thesis research and additional electives. At the end of the second year, the student takes the general examination for PhD candidacy.
3. *Third Year:* Students serve as teaching assistants for two undergraduate courses.
4. *Final Years:* Most students complete their research and defend their dissertation during their fifth year.
5. During all years, students participate in the departmental Journal Club and research reports functions, and attend presentations of well-known researchers via the departmental seminar series.

Financial Aid

Genome Sciences provides full funding, including a competitive twelve-month salary, tuition waiver, and health insurance. Support is contingent upon satisfactory academic progress.

Research Facilities

The department is located in the William H. Foege Building. Students are assigned space in the laboratories of faculty members with whom they do their rotations or dissertation research. State-of-the-art research facilities are available in the department for cellular, protein, and DNA analysis. Extensive computer and library resources are available to students.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

GENOME 261 Genomes and Society (4) NW Explores current technological advances in genome research and how these advances are impacting society. Topics include sequencing of the human genome, stem cell research, cloning, genetically modified foods, immunizations/public health, and genetic therapy. Appropriate for non-science majors.

GENOME 351 Human Genetics: The Individual and Society (4) NW Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering; ethical issues. Appropriate for non-science majors.

GENOME 361 Fundamentals of Genetics and Genomics (3) NW Introduces fundamentals concepts in genetics and genomics including patterns of inheritance, genetic variation, and the relationship between genotype and phenotype. Prerequisite: BIOL 200; may not be taken if GENOME 371 is already taken; may not be repeated. Offered: WSpS.

GENOME 371 Introductory Genetics (5) NW Covers gene transmission, including chromosome mapping, genetic pathways; mutational analysis of biological processes emphasizing mutations affecting chromosome transmission. Introduction to genomics - cloning and sequence analysis of whole genomes. Emphasizes formal genetic mechanisms, molecular techniques. For biological sciences majors. Prerequisite: minimum grade of 1.7 in BIOL 180; minimum grade of 1.7 in BIOL 200; may not be repeated. Offered: A.

GENOME 372 Genomics and Proteomics (5) NW Covers emerging fields of genomics and proteomics. Discusses key technologies and their applications to the study of human and model organism genomes.

GENOME 373 Genomic Informatics (4) NW Focuses on methods for analyzing large genetic data sets and their application to biological problems, including sequence alignment and search methods, gene prediction, phylogenetic trees, and microarray analysis.

GENOME 414 Molecular Evolution (5) NW Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354. Offered: jointly with BIOL 414.

GENOME 453 Genetics of the Evolutionary Process (3) NW Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Em-

phasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENOME 361 or GENOME 371.

GENOME 454 The Origins of Genetics (4) NW Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel's work and its rediscovery. Evidence contributing to cornerstone of classical genetics - the chromosome theory of heredity. Prerequisite: either GENOME 351, GENOME 371, or GENOME 372. Offered: A.

GENOME 463 Hands-On Science for Elementary School Teachers (5) Offers prospective and practicing teachers an opportunity to learn science through the hands-on teaching methods recommended for teaching science at the elementary level.

GENOME 465 Advanced Human Genetics (4) NW *Eichler, King* Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Offered: W.

GENOME 466 Cancer Genetics (3) NW Focuses on three types of cancer-related genetics. DNA repair, mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENOME 361, GENOME 371, or GENOME 372.

GENOME 475 Debates in Genetics (3) NW Utilizes the original scientific literature as the basis for discussion of a range of genetic issues that impact society. Discussions are student-led; evaluations are based both on participation in class and on a research paper. Prerequisite: BIOL 200; either BIOL 355, BIOL 401, BIOL 402, GENOME 361, or GENOME 371.

GENOME 490 Undergraduate Seminar (2, max. 6) NW Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale for research projects and the presentation and interpretation of research findings. Offered: AWSp.

GENOME 496 Peer Teaching Assistants in Genome Sciences (1-5, max. 5) Direct experience in the classroom teaching a discussion section for non-majors in genome sciences courses. Peer teaching assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material. In addition, peer TAs are given training in teaching techniques and course preparation. Prerequisite: GENOME 371. Credit/no-credit only.

GENOME 499 Undergraduate Research (*, max. 30) Credit/no-credit only. Offered: AWSpS.

GENOME 501 Introduction to Research Materials (1-10, max. 10) The student undertakes a research project in one of the research groups within the department for a quarter at a time. Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSpS.

GENOME 503 An Inquiry Approach to Teaching Genetics at the Introductory High School Level (2, max. 6) Provides advanced science content on topics in genetics and bioethics that are taught in secondary biology classrooms, as well as pedagogical strategies for conveying concepts to pre-college students. Workshop participation required.

GENOME 504 StarNet: Research Experiences for Students and Teachers (3, max. 9) Explores the scientific knowledge, technical skills, and pedagogical strategies related to teaching DNA sequencing and bioethics in a high school classroom. Workshop participation required.

GENOME 505 StarNet: Teacher Research Experience (9) Participating teachers carry out an independent research project in a University of Washington laboratory. Teachers, scientists, and StarNet staff meet weekly for an informal research talk.

GENOME 506 The Science Education Partnership (5, max. 15) Provides secondary school teachers training in molecular biology, genetics, and biotechnology, as well as resources and ongoing support designed to enhance biology instruction. Workshop participation required. Credit/no-credit only.

GENOME 520 Seminar (1, max. 30) Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSp.

GENOME 522 Journal Club (1, max. 30) Presentation and discussion of current scientific literature. For Genome Sciences graduate students only. Credit/no-credit only. Offered: AWSp.

GENOME 523 Research Reports (1, max. 30) *Thomas* Presentation and discussion of current student research. For Genome Sciences graduate students only. Credit/no-credit only. Offered: AWSp.

GENOME 525 Current Literature in Human Genetics (1) Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Prerequisite: graduate or postdoctoral status. Credit/no-credit only. Offered: AWSp.

GENOME 531 Genetics of Human Disease (3) Covers modern approaches to the identification of human disease genes permitted by their isolation. Reviews how functional conservation of proteins throughout eukaryotic evolution is modeled in systems such as somatic cell culture, transgenic mice, menatodes, *Drosophila*, and yeast. Credit/no-credit only.

GENOME 540 Introduction to Computational Molecular Biology: Genome and Protein Sequence Analysis (4) Algorithmic and probabilistic methods for analysis of DNA and protein analysis. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: permission of instructor. Offered: W.

GENOME 541 Introduction to Computational Molecular Biology: Molecular Evolution (4) Computational methods for studying molecular evolution. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Offered: Sp.

GENOME 547 Scientific Writing (1.5) For graduate students principally in their second and third year. Focuses on the preparation of research manuscripts for publication. Also considers other scientific writing such as thesis proposals and fellowship and grant applications. Credit/no-credit only.

GENOME 550 Methods and Logic in Genetics (3) Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and *in vivo* gene function. Prerequisite: first-year genetics graduate students only. Offered: A.

GENOME 551 Principles of Gene Regulation (1.5) A detailed examination of the mechanisms of transcription and translation as determined by experimental genetics, molecular biology, and biochemistry.

GENOME 552 Technologies for Genome Analysis (1.5) Discussion of current and newly-emerging technologies in genome analysis with regard to applications in biology and medicine and to potential advantages and limitations. Prerequisite: permission of instructor. Offered: A.

GENOME 553 Advanced Genetic Analysis (1.5) Classical genetic analysis is a powerful approach to dissect com-

plex biological processes. Selective removal, addition, or alteration of specific proteins to identify and order genes in a pathway, define protein function, determine tissue and temporal requirements for gene function, and distinguish among competing hypotheses to explain biological phenomena.

GENOME 554 Genomic Informatics (1.5) Many complete genome sequences are known. Each of these encodes the instructions for making an entire organism, but how can we hope to decipher the code? Focuses on methods for analyzing genome sequences, ranging from large-scale organizational pattern to gene prediction and detailed local alignment methods.

GENOME 555 Protein Technology (1.5) Focuses on current and emerging technologies and approaches in protein analysis, and considers applications of these technologies in biology, biotechnology, and medicine.

GENOME 559 Introduction to Statistical and Computational Genomics (3) Rudiments of statistical and computational genomics. Emphasis on basic probability and statistics, introduction to computer programming, and relevant web databases.

GENOME 561 Molecular Population Genetics and Evolution (1.5) Surveys recent literature to gain an understanding of the basic principles of molecular population genetics and evolution as applied to analysis of genome data. Requires some computer analysis of genome data.

GENOME 562 Population Genetics (4) *Felsenstein* Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Offered: W, odd years.

GENOME 565 Advanced Human Genetics (4) *Eichler, King* Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure, and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Offered: W.

GENOME 570 Phylogenetic Inference (3) *Felsenstein* Methods for inferring phylogenies (evolutionary trees) - biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Offered: W, even years.

GENOME 573 Human Genomics: Science, Ethics, and Society (3) *Fullerton* Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Offered: jointly with B H 551/PHG 551; A.

GENOME 576 Genetic and Genomic Analysis of Bacteria (1.5) In-depth coverage of genetic and genomic strategies used to analyze complex biological processes in bacteria. Focuses on general approaches, with examples drawn from studies of pathogenic organisms where possible. A combination of lectures and seminar-style discussions of primary literature.

GENOME 580 Ethics in Biomedical Research and Teaching (1) Explores ethical issues in research and teaching and discusses avenues of responsible conduct. Credit/no-credit only.

GENOME 581 Seminar in *Drosophila* Genetics (1) *Berg* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of *Drosophila* development. Credit/no-credit only. Offered: AWSp.

GENOME 582 Seminar in Mouse Genetics (1) *Braun* Discussion of contemporary research in and novel methods for genetic, cell biological, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no-credit only.

GENOME 584 Seminar in DNA Replication (1) *Brewer, Fangman* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of budding yeast, with emphasis on the mechanisms and control of DNA replication. Credit/no-credit only. Offered: AWSp.

GENOME 585 Seminar in Bacterial Genetics (1) Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the topogenesis of membrane proteins. Credit/no-credit only.

GENOME 586 Seminar in Mammalian Genetics (1) *Sibley* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/no-credit only.

GENOME 587 Seminar in Nematode Genetics (1) *Thomas* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no-credit only.

GENOME 590 Population Genetics Seminar (1) *Felsenstein* Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Prerequisite: GENOME 562 or permission of instructor. Credit/no-credit only.

GENOME 599 Special Topics in Molecular Biotechnology (*, max. 12) Prerequisite: permission of instructor. Offered: AWSp.

GENOME 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

GENOME 700 Master's Thesis (*-) Offered: AWSpS.

GENOME 800 Doctoral Dissertation (*-) Offered: AWSpS.

Human Biology

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsctat/](http://uw.edu/students/crsctat/).

HUBIO 500 P-Medical Practice Preceptorship at WWAMI Sites (1, max. 3) Personal experience with, and insight into, medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student's preference of discipline at the WWAMI sites. Registration limited to first-year medical students at WWAMI sites. Offered: AWSpS.

HUBIO 501 P-Human Biology Special Projects (*) Designed for medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum. Offered: AWSpS.

HUBIO 505 P-WWAMI Preceptorship (*, max. 6) Opportunity for first-year medical students at WWAMI sites to gain personal experience with medical practice situations by

being assigned to selected clinical faculty members in their offices. Offered: ASP.

HUBIO 510 P-Microscopic Anatomy: Histology (6) *Bermingham-McDonogh* Lectures and laboratories in microscopic anatomy designed to provide the principles and concepts of histology, to define the morphological characteristics of the cells, tissues, and organs of the human body, and to relate this information to functional processes studied in concurrent and subsequent courses. Offered: A.

HUBIO 511 P-Human Anatomy and Embryology (8/13) *Clark* Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of the cadaver and examination of the normal living body. Concentrates on exploration of the body cavities and the viscera they contain. Offered: A.

HUBIO 512 P-Mechanisms in Cell Physiology (5) *Detwiler* Physiology of the cell membrane, including ionic and electrical potential gradients; active transport, excitability, and action potentials; biophysics of sensory receptors; neuromuscular transmission; muscle energetics and contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions. Offered: A.

HUBIO 513 P-Introduction to Clinical Medicine (3-) *Issac, Maestas* Instruction in communication skills and interview techniques to form the basis for the doctor-patient relationship and for the skills of communicating with patients. The patient profile is obtained. Attention to developing comfort in the physician role. Offered: A.

HUBIO 514 P-Biochemistry I-A (4-) *Maizels* Explores molecular biology of the genome. Examines how the genome serves as a source of information, how molecular understanding of gene function identifies new therapeutic targets and provides new therapeutic and diagnostic tools. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: A.

HUBIO 516 P-Systems of Human Behavior (5) *Harrington* Effects of behavioral factors in major management problems faced in medical practice relating to cultural background, social role, sexual identity, and belief systems. Acquisition of skills in analyzing behavior, defining objectives, and designing precise treatment strategies. Offered: A.

HUBIO 522 P-Introduction to Clinical Medicine (-4-) *Isaac, Maestas* Medical history is introduced and instruction in data collection is begun. Experience in conducting medical interviews with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed. Offered: W.

HUBIO 523 P-Introduction to Immunology (2) *Gale* Topics covered include: basic concepts such as antigens; antibodies; complement; B- and T-lymphocyte function, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities, autoimmunity, blood transfusion, and transplantation).

HUBIO 524 P-Biochemistry I-B (-4) *Maizels* Metabolism as integrated in the organs and tissue of the human body for the purpose of generating energy from food and converting small molecules to essential building block of our cells. Discusses principles of nutrition in the context of human health and disease. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: W.

HUBIO 530 P-Clinical Epidemiology and Evidence-Based Medicine (2) *Kestenbaum* Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of di-

agnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: W.

HUBIO 531 P-Head, Neck, Ear, Nose, and Throat (5)

HUBIO 532 P-Nervous System (8) *Dacey, Mulligan* An integrated approach to the normal structure and function of the nervous system, including the eye. Presents neuropathological examples as well as clinical manifestations of neurological disease.

HUBIO 534 P-Microbiology and Infectious Disease (9) *Moseley* An introduction to medical microbiology and infectious diseases. Emphasizes the biology of microbial pathogens and the mechanisms of pathogenesis. Covers clinical manifestations, epidemiology, general principles of diagnosis, therapy, and prevention of infectious disease. Offered: Sp.

HUBIO 535 P-Introduction to Clinical Medicine (-4) *Isaac, Maestas* Adult screening physical examination is taught through the use of lecture, audiovisual aids, and small-group tutorial, where students in supervised setting practice the physical examination on one other. Further practice in the performance and recording of the patient profile and medical history. Offered: Sp.

HUBIO 540 P-Cardiovascular System (6) *Feigl* Interdisciplinary approach to cardiovascular medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Function of the cardiovascular system in health and disease. Offered: A.

HUBIO 541 P-Respiratory System (4) *Culver, Luks* Interdisciplinary approach to the respiratory system, including anatomy of thorax and lungs, ventilation mechanics, blood-gas transport, gas exchange, acid-base balance, and the physiology and pathology of obstructive, restrictive, and pulmonary-vascular diseases. Offered: A.

HUBIO 542 P-Introduction to Clinical Medicine (4-) *McDonough* Advanced instruction in interview technique, history taking, and physical examination, with emphasis on detection of abnormalities. Offered: A.

HUBIO 543 P-Principles of Pharmacology I (5) *McKnight* Includes general principles of pharmacology and the specific pharmacology of major drugs acting on the autonomic and cardiovascular systems. Offered: A.

HUBIO 547 P- Pathology IIA (5) *Norwood* Examines patterns of cell and tissue response to injury. Covers mechanisms of cell injury, the inflammatory process, thrombosis, normal and abnormal growth, neoplasia, and clinicopathological correlation. Includes a description of the major pathologic changes associated with specific diseases in the different organ systems. Uses a multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory and covers molecular changes in response to environmental exposure to pollution, radiation, and physical injury.

HUBIO 548 P-Cases in Clinical Ethics (1) *Edwards, Timberlake* Provides exposure to key issues in clinical ethics as well as the tools for ethical reasoning and critical thinking that support the student's current and future work. Prerequisite: second-year medical students.

HUBIO 550 P-Introduction to Clinical Medicine (-4-) *McDonough* Advanced instruction in interview technique, history taking, and physical examination, with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.

HUBIO 551 P-Gastro-Intestinal System (4) *Silverstein* Anatomy of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.

HUBIO 552 P-Hematology (3) *Richard* Familiarizes students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease, is stressed. Offered: W.

HUBIO 553 P-Musculoskeletal System (4) *Schmale* Gross, surface, applied, and radiographic anatomy. Clinical manifestations in the musculoskeletal system and pathophysiology of trauma, aging, infection, and inflammation, as well as congenital and metabolic disorders. Dissections, physical examinations, and problem-based learning. Offered: W.

HUBIO 554 P-Genetics (2) *Mefford* Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, amniocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.

HUBIO 555 P-Medicine, Health, and Society (3) *Allan, Chen* Interdisciplinary introduction to health services designed for future healthcare practitioners. Examines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student's ability to adopt a broad perspective across healthcare disciplines and traditional boundaries. Offered: W.

HUBIO 556 P-Hormones and Nutrients (4) *DeSantis* Introduction to principles of human endocrinology, metabolism, and nutrition; the physiology and pathophysiology of endocrine systems, glucose and lipid metabolism, and fluid and salt balance; and the importance of proper nutrition in certain disease states.

HUBIO 557 P-Pathology IIB (2-) *Norwood* Examines patterns of cell and tissue response to injury. Covers mechanisms of cell injury, the inflammatory process, thrombosis, normal and abnormal growth, neoplasia, and clinicopathological correlation. Includes a description of the major pathologic changes associated with specific diseases in the different organ systems. Uses a multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory and covers molecular changes in response to environmental exposure to pollution, radiation, and physical injury.

HUBIO 558 P-Rheumatology (1) An intensive immersion course in rheumatology for second year students. Lectures and small group patient demonstrations link concepts of immunology, pathology and pharmacology with inflammatory and autoimmune disease, teach differential diagnosis of symptoms seen in rheumatic disease and use if diagnostic to demonstrate features of common childhood and adult rheumatic diseases and their management.

HUBIO 559 P-Problem Based Learning (3) *Scott* Teaches students to methodically solve medical problems by gathering, sorting, and interpreting data. Students learn life-long self-education and self-evaluation skills. Provides practice working as a healthcare team by including medical, nursing, and physician assistant students in each group. Offered: W.

HUBIO 560 P-Introduction to Clinical Medicine (-5) *McDonough* Introduction to clinical and laboratory diagnosis. Offered: Sp.

HUBIO 562 P-Urinary System (4) *Jefferson* Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.

HUBIO 565 P-Reproduction (4) *Steiner* Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of testicular and ovarian function, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolactin and lactation, aging and infertility. Offered: Sp.

HUBIO 566 P-Pathology IIC (-3) *Norwood* Examines patterns of cell and tissue response to injury. Covers mecha-

nisms of cell injury, the inflammatory process, thrombosis, normal and abnormal growth, neoplasia, and clinicopathological correlation. Includes a description of the major pathologic changes associated with specific diseases in the different organ systems. Uses a multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory and covers molecular changes in response to environmental exposure to pollution, radiation, and physical injury.

HUBIO 567 P-Skin System (2) *Colven* Gross and microscopic anatomy. Physiology, protection, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination and illustrating examples of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.

HUBIO 569 P-Mind, Brain, and Behavior (6) *O. PASCUALY* Defines and describes major psychiatric disorders and presents a systematic approach to differential diagnosis. Discusses conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry; along with physiological and biochemical mechanisms, and therapeutic and adverse effects. Offered: Sp.

HUBIO 590 P-Medical Information for Decision Making (1) *Tarczy-Hornoch* Introduction to methods for: a) identifying and retrieving high quality, relevant documents for clinical decision making, b) applying rigorous criteria when reading primary research studies, reviews of primary studies, or other medical information sources that report on the effectiveness of therapeutic or preventive interventions. Prerequisite: first-year medical students. Offered: W.

HUBIO 591 P-WWAMI Non-clinical Selectives - Pullman (*, max. 30) Courses offered at WWAMI university site in Pullman designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 592 P-WWAMI Non-clinical Selectives - Spokane (*, max. 30) Courses offered at WWAMI university site in Spokane designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 593 P-WWAMI Non-clinical Selectives - Laramie (*, max. 30) Courses offered at WWAMI university site in Laramie, WY designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 594 P-WWAMI Non-clinical Selectives - Anchorage (*, max. 30) Courses offered at WWAMI university site in Anchorage, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 595 P-Independent Investigative Inquiry, IHOP (8) *S. GRAHAM, D. Roesel* With faculty mentorship, students investigate a global health issue, work on a community health project, and create an academic poster. Prerequisite: IHOP students only. Offered: S.

HUBIO 596 P-WWAMI Non-Clinical Selectives - Bozeman (*, max. 30) Courses offered at WWAMI university site in Bozeman, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 597 P-Independent Investigative Inquiry (8) Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: Sp.

HUBIO 598 P-WWAMI Non-Clinical Selectives - Moscow (*, max. 30) Courses offered at WWAMI university site in Moscow, ID, designed to satisfy the non-clinical selective graduation requirement for medical students. Offered: AWSp.

HUBIO 599 P-Independent Study in Medical Science (6) Independent research with faculty sponsor and comple-

tion of paper as partial fulfillment of non-clinical selective graduation requirement. Offered: Sp.

HUBIO 600 P-Capstone Course: Preparation for Residency (2, max. 4) A combination of large group lectures and small group discussions and workshops reviewing clinical skills in history-taking and physical examinations, imaging studies, common and emergency drugs, ACLS, infectious disease control, common clinical problems, and other topics that are encountered in residency training. Offered: Sp.

Immunology

H564 Health Sciences

For those contemplating careers in biomedical research, immunology provides challenging and exciting intellectual opportunities. Progress in the discipline in the past decade has been extraordinary, a fact nowhere more visible than at the University of Washington. The Department of Immunology, launched in 1989, now includes more than 30 faculty and 200 scientists, students, post-docs and staff, all engaged in elucidating fundamental immunological mechanisms and how these mechanisms impact human health, infectious, autoimmune and allergic diseases, and cancer. Current members of the department have distinguished records in the area of lymphocyte signaling, T and B cell development, macrophage function, antigen processing, immuno-tolerance, and the structure of antigen receptors.

Consider the fundamental processes that underlie immune function. First, millions of potentially injurious macromolecules must be recognized. Second, recognition of these macromolecules, generally structures associated with potential pathogens, must trigger powerful effector mechanisms that permit elimination of the offending microorganisms. Finally, these recognition and effector systems must distinguish the universe of potentially harmful molecules from an equally diverse repertoire of structurally similar 'self' components. How is such specific molecular recognition achieved? How do the cells responsible for mediating host defense develop, and what signaling systems direct their responses? These are questions being addressed by members of the program at the molecular, cellular, and whole organism levels.

GRADUATE PROGRAM

Graduate Program Coordinator

H564 Health Sciences, Box 357650

immgrad@uw.edu

(206) 685-3955, fax (206) 543-1013

The graduate program, organized through the Department of Immunology, occupies contemporary laboratory and office space in the H and I wings of the Health Sciences complex, where many faculty are based. Other members of the training faculty are based in contiguous wings of the Health Sciences complex or at one of four affiliated institutions: Fred Hutchinson Cancer Research Center, Benaroya Research Center at Virginia Mason, Seattle Children's hospital, and the Institute for Systems Biology. The University of Washington is a premier institution for biomedical research in the nation, ranking second among all institutions in overall support from the NIH. The research environment is augmented by affiliated institutions, creating an open and collegial partnership for basic, translational, and clinical research in which collaborations and open sharing of ideas and reagents take place. Members of the program have been instrumental in development and application of contemporary technologies, including flow cytometry, confocal microscopy, high-throughput genomic, proteomic, and computational analysis, and generation and analysis

of transgenic/knockout/knockin mice to address important immunological and biological questions. Training of students occurs in an open environment which is intellectually stimulating, scientifically diverse, and strongly interactive. All immunology graduate students are assured financial support for the term of their studies.

Master of Science

Students are not admitted to the department specifically as candidates for a master's degree. A terminal master's degree can be awarded if the faculty deems the student has made some progress in the program but not enough to be consistent with earning the Ph.D.

Doctor of Philosophy

Admission Requirements

Students are admitted for autumn quarter; application deadline is January 1 for U.S. citizens and November 1 for international applicants. Requirements for admission are flexible. However, most successful applicants have completed survey courses in biology, chemistry, and physics; one year of organic chemistry; and mathematics through integral calculus. Prior exposure to immunology through formal coursework, or especially through laboratory research, is desirable. A bachelor's degree is required, as is evidence of superior scholarship and above average performance on the GRE General Test. A GRE subject test is not required.

International students must take the Test of English as a Foreign Language (TOEFL); 250 is the minimum acceptable score on computer test.

Degree Requirements

90 credits, to include:

1. 18 graded credits in the first two years of study. First-year coursework consists of consecutive five-week-long courses taken autumn through spring quarters – two per quarter (for 1.5 to 2 graded credits each); winter quarter, all first-year students also take IMMUN 532 (4 graded credits), for a total of 13 or 13.5 graded credits the first year, depending on course choices. In the second year, 4.5 or 5 additional graded credits are required, earned by taking electives winter and/or spring quarters. As part of the first- and second-year coursework, students take two five-week courses that specifically focus on cancer immunology.
2. Autumn quarter of the first year, students may take an elective and attend selected lectures of the undergraduate immunology course, IMMUN 441. Students are required to attend the departmental seminar series, Journal Club, and research-in-progress talks beginning the first quarter and continuing throughout enrollment.
3. All elective courses must be relevant to biomedical research, and be rigorous enough to include either a final examination or required written paper for a grade. Elective classes must be at the 500 level, and receive a numerical grade.
4. Each graduate student takes the qualifying examination during July immediately following the second year of classes. (MSTP students take qualifying examinations following the first year of graduate classes.) The qualifying examination is two parts - written and oral.
5. Students who pass the qualifying examination then prepare for the General Examination, which must be taken within 15 months of the qualifying examination.
6. The dissertation must meet all format requirements before being accepted by the Graduate School.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

IMMUN 441 Introduction to Immunology (4) NW General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: BIOL 220; may not be repeated. Offered: A.

IMMUN 499 Undergraduate Research (*, max. 24) Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor. Offered: AWSpS.

IMMUN 532 Intersection of Innate and Adaptive Immunity in Disease (4) Examines the molecular and cellular basis of immune function. Topics include: hematopoiesis, innate immunity, antigen receptor structure, lymphocyte development, antigen presentation, effector T-cell functions, and immune-mediated diseases. Prerequisite: coursework in molecular genetics; graduate standing in immunology; other graduate students with permission of instructor. Offered: W.

IMMUN 534 Central Issues in Immunology (2, max. 4) Presentations by participants of topics relating to the broad study of immunology. Prerequisite: graduate standing in immunology. Offered: Sp.

IMMUN 537 Immunological Methods (1.5) Fink, Weinmann Introduces whole animal, cellular, biochemical, and molecular techniques used in immunological research. Discusses strengths and limitations of each technique and emphasizes caveats in interpreting the resulting data. Offered: A.

IMMUN 538 Immunological Based Diseases and Treatments (2) E. BETTELLI, R. SAVAN Addresses the mechanisms leading to the development of immunologically based diseases. In particular, covers immunological basis and treatment of infection, autoimmunity, and cancer. Offered: Sp.

IMMUN 550 Selected Topics in Immunology (1, max. 30) Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 551 Research Conference in Regulation of T Cell-Dependent B Cell Maturation (1, max. 30) Clark Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 552 Research Conference in Principles of Antiviral Immunity (1, max. 30) Stetson Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Prerequisite: immunology graduate student; permission of instructor. Offered: AWSpS.

IMMUN 553 Research Conference in Recombination and Repair in B Cell Development (1, max. 30) Maizels Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 554 Research Conference in Immunogenetic Aspects of Human Autoimmunity (1, max. 30) Nepom Weekly group conferences concerning ongoing graduate students

and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 555 Research Conference in Model of Autoimmune Disease and Their Regulation (1, max. 30) Gorman Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 556 Research in Conference in Regulation of Autoimmunity and Allergic Inflammation (1, max. 30) Ziegler Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 557 Research Conference in the Mechanisms and Consequences of Programmed Cell Death (1, max. 30) Oberst Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology or permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 558 Research Conference in Apoptosis and Autoimmunity (1, max. 30) Elkon Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 559 Research Conference in T Cell Responses during Mycobacterium tuberculosis (1, max. 30) Urdahl Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate student; permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 560 Research Conference in Progress in T Cell Research (1, max. 30) Bevan, Fink, Gorman, Greenberg, Pepper, Stetson Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 561 Research Conference in Mechanisms of Peripheral Tolerance (1, max. 30) Fink Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 562 Research Conference in Structural Molecular Immunology and Vaccinology (1, max. 30) Strong Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate students; permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 563 Research Conference in Macrophage Biology: Signaling and Phagocytosis (1, max. 30) Aderem Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 564 Research Conference in Cellular/Molecular Regulation of T Cell Responses (1, max. 30) Greenberg Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each

quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 565 Research Conference in Innate Immune Defenses against Virus Infection (1, max. 30) *Gale* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus on understanding virus and host regulation of innate immune processes. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 566 Research Conference in the Studies of Lymphocyte Memory (1, max. 30) *Pepper* Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 567 Research Conference in the Role of miRNAs in Modulating the Immune System (1, max. 30) *Savan* Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 568 Research Conference in Regulation of the Inflammatory Response of Myeloid Cells (1, max. 30) *Hamerman* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus placed on understanding the regulation of the inflammatory response of myeloid cells. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 569 Research Conference in T cells in autoimmunity (1, max. 30) *Bettelli* Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 570 Research Conference in Mucosal Immunity (1, max. 30) *Oukka* Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 571 Research Conference in Development and Activation of B Cells (1, max. 30) *Rawlings* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only.

IMMUN 572 Research Conference in Signal Transduction in B-Cells (1, max. 30) *Scharenberg* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only.

IMMUN 573 Immunology Seminar Series (1, max. 30) Weekly discussion in which original research results are presented and discussed. Emphasis is on new and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Prerequisite: graduate standing in immunology; other graduate students with firm background in immunology and permission of instructor. Credit/no-credit only.

IMMUN 574 Research Conference in Kaposi's Sarcoma-Associated Herpes Virus: Interactions with B-Cells and Endothelial Cells (1, max. 30) *Lagunoff* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register

for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only.

IMMUN 575 Research Conference in Infection and Immunity (1, max. 30) *Bevan* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only.

IMMUN 576 Research Conference in Innate Immune Mechanisms of Response and Regulation (1, max. 30) *A. LACY-HULBERT* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than once conference each quarter. Prerequisite: graduate standing in immunology; permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 577 Research Conference in Lymphocyte Homing and Function (1, max. 30) *Campbell* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 578 Research Conference in Immunology and the Pathogenesis of Tuberculosis (1, max. 30) *Ramakrishnan* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 579 Research Conference in Liver Immunology (1, max. 30) *Crispe* Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Credit/no-credit only. Offered: AWSpS.

IMMUN 599 Introduction to Immunology Research (1-10, max. 40) Current problems in immunological research. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 600 Independent Study or Research (*-) Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 700 Master's Thesis (*-) Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

IMMUN 800 Doctoral Dissertation (*-) Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

Laboratory Medicine

NW 120, UW Medical Center

Medical laboratory science, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of health-care, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease.

UNDERGRADUATE PROGRAM

Adviser

NW 120, UW Medical Center

(206) 598-6131

medtech@uw.edu

The Department of Laboratory Medicine offers the following program of study:

- Bachelor of Science in Medical Laboratory Science degree

Bachelor of Science

1. *Pre-professional Phase.* During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.
2. *Professional Phase.* The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable them to function effectively in the clinical laboratory.

The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.

Suggested First- and Second-Year College Work: Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include: CHEM 321, MICROM 301, GENOME 351, GENOME 371, B STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH 410, UCONJ 420. Begin taking admission requirements, shown below.

Department Admission Requirements

1. BIOL 118, BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239); one of STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or Q SCI 381.
2. Complete all general education requirements including 10 credits of Individuals & Societies, and 10 credits of Visual, Literary, & Performing Arts, as well as all required English and writing courses.
3. Students admitted to the medical laboratory science program must be exempt from or have successfully completed any required English as a Second Language (ESL) courses no later than August 31 of the application year or admission is cancelled.

Application Procedure: See program adviser for application form. Application deadline is February 15, to begin the following autumn quarter.

Major Requirements

152-155 credits as follows:

1. *Courses Required for Admission (48-51 credits):* See list above.
2. *Didactic Courses (59 credits):* IMMUN 441, MICROM 442, MICROM 443, MICROM 444, MICROM 445; LAB M 418, LAB M 419, LAB M 420, LAB M 421, LAB M 426, LAB M 428, LAB M 429, LAB M 430, LAB M 434, LAB M 435
3. *Clinical Rotations (50 credits):* LAB M 423, LAB M 424, LAB M 425, LAB M 431, LAB M 432, LAB M 433
4. Minimum 2.0 grade in all didactic and clinical rotation courses

- Minimum 2.00 GPA, both cumulative and in required courses

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes:** Graduates of the medical laboratory science program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience trouble-shooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations.

Successful medical laboratory scientists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical laboratory scientist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical laboratory scientists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out research in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- Instructional and Research Facilities:** The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Seattle Children's hospital, Labcorp Dynacare, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans' Affairs Puget Sound Health Care System, Virginia Mason Medical Center, Evergreen Hospital Medical Center, and High-line Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington. These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialties in these divisions. In addition, students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.
- Honors Options Available:** For Interdisciplinary Honors, see University Honors Program.
- Internship Opportunities:** One or two internships per year in Japan available to graduates of the medical technology program.
- Department Scholarships:** Several offered.
- Student Organizations/Associations:** None currently active.
- Of Special Note:** The medical laboratory science program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119, (847) 939-3597, (773) 714-8880, (773) 714-8886 (fax), info@naacsls.org, www.naacls.org. Graduates are eligible for certification by the Board of Registry of the American Society

for Clinical Pathology and by the National Credentialing Agency for Laboratory Personnel, Inc.

GRADUATE PROGRAM

Graduate Program Coordinator

NW 120, Box 357110

(206) 598-2148

hschil@uw.edu

The Department of Laboratory Medicine offers a Master of Science in Laboratory Medicine and prepares the graduate for advanced technical and supervisory positions in the clinical and research laboratories as well as in pharmaceutical and diagnostic industries.

The curriculum is flexible, usually two years for full-time students, and up to six years for part-time students. Students select one of five pathways and work with a mentor on a thesis project. In addition to the 25 credits of required courses, they take courses related to their area of study. The target population is medical technology (MT/MLS) graduates with ASCP certification.

The Department of Laboratory Medicine also offers a combined undergraduate/graduate program (CUG). Students may enter this CUG either as undergraduates or college graduate/postbaccalaureate students. To be admitted to the CUG program, the student must first be accepted into the undergraduate program shown above. Undergraduates or college graduate/postbaccalaureate students may apply simultaneously to the CUG program, or delay application until graduation. Once accepted into the CUG, the student completes the undergraduate program, then immediately enrolls in the Graduate School. Students receive a BS in Medical Laboratory Science at the completion of their undergraduate studies and an MS in Laboratory Medicine at the completion of their graduate studies.

Admission Requirements

The program accepts mostly ASCP certified medical laboratory scientists (MLS/MT). For medical laboratory scientists (MLS/MT), MLT (medical laboratory technician), students from a four-year program, or laboratorians with significant experience in a clinical laboratory, admission requirements include:

- Minimum 3.00 GPA in the last 90 graded quarter credits or the last 60 graded semester credits
- Certification as a medical laboratory scientist (MLS/MT) or equivalent, or as a medical laboratory technician (MLT) or equivalent, or as a specialist in a clinical laboratory field
- Completion of the Graduate Record Examination (GRE) Aptitude Test within the last five years
- Foreign students must have a satisfactory command of the English language. Results of the TOEFL, MLT, or IELTS must be submitted to the Graduate School. These scores are good for only two years.
- A 200-300 word statement about educational and professional objectives and reasons for taking the master of science program
- Three letters of recommendation
- A personal interview

For students with an undergraduate degree in a scientific field such as chemistry, microbiology, or biology, without ASCP certification, the program is highly competitive. Admission requirements include:

- Outstanding academic achievements, including a minimum 3.20 GPA in the last 90 graded quarter credits or the last 60 graded semester credits.

- Completion of the Graduate Record Examination (GRE) Aptitude Test within the last five years, with excellent scores.
- Foreign students must have an excellent command of the English language. Results of the TOEFL or IELTS must be submitted to the Graduate School. Scores are good for only two years.
- A 200-300 word statement about educational and professional objectives and reasons for taking the master of science program
- Three letters of recommendation
- Personal interviews with department faculty

Application deadline is February 15 to begin the following autumn quarter. Application forms and procedures for admission to the Graduate School are available at www.grad.washington.edu/.

Degree Requirements

Minimum 36 credits, of which 9 are thesis credits. Full-time medical laboratory scientists typically complete the program in two years. Students select one of five pathways, as follows:

- Chemistry/Immunology**
 - Required:** BIOT 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
 - Recommended:** MICRO 441
 - Electives Relevant to Thesis (chosen with advice from mentor):** BIOC 426, BIOC 440, BIOC 441, BIOC 442, BIOC 540, BIOC 541, BIOC 542, BIOT 512, BIOT 513, CHEM 428, CHEM 429, CHEM 436, CONJ 546, IMMUN 532, IMMUN 533 IMMUN 534, IMMUN 535, PATH 500, PATH 502, PATH 513, PATH 515, PATH 516, PATH 517, P BIO 505, P BIO 506, P BIO 507, PHCOL 401, PHCOL 402
- Hematology/Coagulation**
 - Required:** BIOC 440, BIOC 441, BIOC 442, BIOT 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
 - Recommended:** PATH 516
 - Elective Relevant to Thesis (chosen with advice from mentor):** BIOT 512, BIOT 513, CHEM 428, CHEM 429, CONJ 546, GENOME 465, IMMUN 441, IMMUN 532, P BIO 506, PATH 500, PATH 512, PATH 514, PATH 515, PATH 516, PATH 522, PATH 560 (*, max. 10).
- Microbiology/Virology**
 - Required:** BIOT 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
 - Recommended:** IMMUN 441, MICRO 442, MICRO 444, MICRO 445, MICRO 555 (2.5)
 - Electives Relevant to Thesis (chosen with advice from mentor):** BIOC 440, BIOC 441, BIOC 442, BIOC 541, BIOT 512, BIOT 513, CHEM 428, CHEM 429, CONJ 547, CONJ 550, EPI 503, EPI 507, EPI 510, EPI 511 (3-4), EPI 512, IMMUN 533, MICROM 411, MICROM 431, MICROM 450, MICROM 529, MICROM 530, MICROM 531, MICROM 553, P BIO 505, P BIO 506, PATH 512, PATH 513, PATH 515, PATH 516
- Molecular Diagnostics/Genetics**
 - Required:** BIOT 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
 - Recommended:** BIOC 440 or equivalent, BIOC 441 or equivalent, BIOC 442 or equivalent, GENOME 465
 - Electives Relevant to Thesis (chosen with advice from mentor):** BIOT 512, BIOT 513, BIOT 516, CHEM 428, CHEM 429, CONJ 546, EPI 516, EPI 517, GENOME 411, GENOME 466, IMMUN 531, IMMUN 441, IMMUN 532, IMMUN 536, MICROM 450, MICROM 530, P BIO 505, P BIO 506

5. Management/Medical Informatics

- a. *Required:* BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
- b. *Electives Relevant to Thesis) chosen with advice from mentor)*
 - i. *Business Administration:* B A 470, B A 472
 - ii. *Business Communications:* B CMU 510
 - iii. *Human Resource Management and Organizational Behavior (HRMOB):* HRMOB 410, HRMOB 450, HRMOB 470 MGMT 403, MGMT 404

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

LAB M 418 Introductory Clinical Chemistry (6) *Bankson* Introduces the fundamentals of instrumentation and methodology in the clinical chemistry laboratory. Limited to medical laboratory science students. Offered: Sp.

LAB M 419 Clinical Coagulation (4) *Hansen-Suchy* Lecture and laboratory coverage of the theory of the hemostatic system, to include tests used in the diagnosis/monitoring of patients with abnormal bleeding and/or thrombosis. Instrumentation as appropriate for testing included. Quality control and quality assurance discussed. Limited to medical laboratory science students. Offered: S.

LAB M 420 Laboratory Analysis of Urine and Body Fluids (3) *Schiller* Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Limited to medical laboratory science students. Offered: S.

LAB M 421 Medical Microbiology (1/6, max. 6) *Abbott* Lecture and laboratory coverage of human infections and diagnostic procedures used for isolation, identification, and antimicrobial susceptibility testing of the microorganisms associated with disease. Limited to medical laboratory science students. Offered: S.

LAB M 423 Clinical Chemistry (*, max. 24) *Iamma* Clinical testing using automated and manual methods. Measurement of pancreatic function and intestinal absorption, renal and liver function, enzymes, electrolytes, blood gases, lipids, toxicology, urinalysis, endocrinology, and immunology. Limited to medical laboratory science students. Offered: AWSp.

LAB M 424 Clinical Microbiology (*, max. 24) *G. VAN KEKERIX* Techniques used in the diagnostic microbiology laboratory, including quality control, specimen evaluation, identification of pathogenic microorganisms, and antimicrobial susceptibility testing. Limited to medical laboratory science students. Offered: AWSp.

LAB M 425 Clinical Hematology (*, max. 24) *K. HANSEN-SUCHY* Clinical study of techniques used in the diagnostic evaluation of blood cells, including production, proliferation, survival, morphologic, and functional features. Assessment of proteins and cells important in hemostasis included. Quality control and quality assurance issues considered. Biomolecular techniques appropriate for evaluation of the hematologic and hemostatic systems discussed. Limited to medical laboratory science students. Offered: AWSp.

LAB M 426 Clinical Immunohematology ([1-7]-, max. 7) *D. SABATH* Lecture and laboratory covering theory of transfusion medicine and serological procedures used in the evaluation of cellular antigen systems. Principles of immunology and genetics included as appropriate for the techniques performed; screening of donor units to provide a safe product discussed. Quality control and quality assurance issues considered. Limited to medical laboratory science students. Offered: A.

LAB M 427 Selected Studies in Laboratory Medicine (*, max. 24) *H. EGGLESTON* Selected clinical study in the major scientific disciplines of laboratory medicine, to include molecular diagnostics, or pursuance of a clinical research study. Limited to medical laboratory science students. Credit/no-credit only. Offered: AWSp.

LAB M 428 Clinical Biochemistry for Medical Laboratory Scientists (4) *Bankson* Introduces medical applications and the clinically relevant aspects of biochemistry necessary for understanding biochemical diseases. Teaches the structures and human metabolism of proteins, carbohydrates, lipids, and nucleotides in health, along with their roles in disease processes. Stresses normal biochemical pathways and subsequent diseases when the pathways are disrupted or diverted. Limited to medical laboratory science students. Offered: A.

LAB M 429 Foundations of Medical Laboratory Science (5) *K. HANSEN-SUCHY* Lecture and laboratory cover the essential theories, concepts, and practices that define medical laboratory science as a distinctive profession within Laboratory Medicine and which circumscribe its scope of practice. Instructional areas comprise the pre-analytical, analytical, and post-analytical components of contemporary medical lab services. Limited to medical laboratory science students. Offered: A.

LAB M 430 Medical Laboratory Science: Introductory Clinical (6) *K. HANSEN-SUCHY* Lecture and laboratory coverage of theoretical and practical aspects important in the evaluation of blood cells, to include their production, morphology, function, and associated pathology. Instrumentation used in testing included, as well as quality control and quality assurance issues. Limited to medical laboratory science students. Prerequisite: LAB M 429. Offered: W.

LAB M 431 Clinical Immunohematology Rotation (7-) *R. LAMMA* Practicum emphasizing application of knowledge and skills to perform a wide variety of basic testing routinely performed in contemporary blood laboratory and further develop discipline-specific competencies. Limited to medical laboratory science students. Offered: AWSp.

LAB M 432 Phlebotomy Rotation (-2-) *G. VAN KEKERIX* Covers the theories, concepts, and practices underlying the safe and reliable collection of blood (phlebotomy) for analysis by medical laboratory techniques. Limited to medical laboratory science students. Offered: AWSp.

LAB M 433 Enrichment Rotation (-9) *Xu* Selected practical experience emphasizing application of knowledge and skills to perform a wide variety of testing in a clinical setting and further develop discipline-specific competency in the major scientific disciplines of laboratory medicine, including hematology, clinical chemistry, microbiology, and immunohematology or pursuance of a clinical research study. Limited to medical laboratory science students. Offered: AWSp.

LAB M 434 Virology Laboratory (1) *R. LAMMA* Laboratory coverage of testing procedures and techniques routinely performed in the contemporary virology lab to detect and identify viruses which cause disease in humans and to monitor therapies used to treat human viral infections. Limited to medical laboratory science students. Offered: Sp.

LAB M 435 Molecular Diagnostics for Medical Laboratory Science (2) *K. HANSEN-SUCHY, C. PRITCHARD* Provides a comprehensive overview of the fundamental principles of molecular diagnostics and explores its use in the diagnosis of disease. Topics include: nucleic acid structure and function, genetics, DNA chemistry, nucleic acid isolation, amplification techniques, components of a molecular laboratory, and evaluation of controls to validate results obtained. Limited to medical laboratory science students. Offered: W.

LAB M 499 Undergraduate Research (*, max. 35) Specific project in clinical laboratory investigation. Offered: AWSpS.

LAB M 502 Laboratory Medicine Grand Rounds (1, max. 6) *Shirts* Grand rounds are concerned with current topics in

the field of laboratory medicine. Credit/no-credit only. Offered: AWSp.

LAB M 510 Laboratory Medicine Research Conference (1, max. 6) *Hoffman* Presentation and discussion of ongoing research and development projects by faculty, residents, fellows, and graduate students. Open to graduate students in laboratory medicine and other medical sciences. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

LAB M 520 Seminar in Organization and Management in Laboratory Medicine (3) *Schiller* Core course for the Master of Science degree in laboratory medicine. Prerequisite: graduate student standing in Laboratory Medicine or permission of instructor. Offered: Sp, odd years.

LAB M 521 Advanced Laboratory Hematology (1, max. 6) *Sabath* Lectures on diagnostic clinical hematology with emphasis on clinicopathological correlation. For laboratory medicine graduate students with special interest in diagnostic clinical hematology. Prerequisite: graduate standing and permission of instructor. Offered: AWSp.

LAB M 522 Hematopathology Seminar (2) *Wood* Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with PATH 522; W, even years.

LAB M 590 P-Research Projects in Laboratory Medicine (*) *Tait* Opportunity for laboratory experience on a research problem related to laboratory medicine. Students investigate areas of potential clinical importance. Projects selected from areas such as chemistry, coagulation, hematology, immunology, microbiology, virology, molecular diagnostics, and computer applications. Research goals established by instructor in discussion with student. Prerequisite: permission of instructor. Offered: AWSpS.

LAB M 600 Independent Study or Research (*-) Prerequisite: graduate standing in laboratory medicine. Credit/no-credit only. Offered: AWSpS.

LAB M 601 Internship (3-9, max. 9) *Schiller* Prerequisite: graduate standing in laboratory medicine. Credit/no-credit only. Offered: AWSpS.

LAB M 680 P-Clinical Laboratory Testing: Methods and Interpretation (*, max. 30) *Wener* Provides the third- and fourth-year medical student with the opportunity to evaluate clinical laboratory data in the clinical laboratory setting. One-on-one teaching using case material and actual clinical samples. Offered: AWSpS.

LAB M 685 P-Laboratory Case Studies for Clinical Diagnosis (4) *Nester* Clinical case presentations and discussions aimed at test selection, disease-induced alterations, efficient algorithms, factors confounding interpretation, testing economics. (Four weeks half-time). Prerequisite: completion of required clerkships. Offered: Sp.

LAB M 699 P-WWAMI Laboratory Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

LAB M 700 Master's Thesis (*-) Credit/no-credit only. Offered: AWSpS.

MEDEX

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

MEDEX 401 Introduction to Paramedicine (8) Introduces the history of paramedicine and role of the paramedic, as well as medical concepts and technical skills relevant to its practice. Prerequisite: Seattle/King County paramedic students only. Offered: A.

MEDEX 402 Airway Management (3) Teaches cognitive and psychomotor skills critical to basic and advanced airway management. Includes enhanced techniques of rapid sequence intubation. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

MEDEX 403 Patient Assessment (4) Teaches patient assessment and total patient care management. Provides didactic and laboratory exposure necessary to perform complete and thorough patient exams. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

MEDEX 404 Medical Emergencies I (5) Studies the pathophysiology and treatment of medical emergencies encountered in cardiopulmonary, neurovascular, endocrine, renal, and obstetric patients. Introduces the pharmacology of neurovascular and cardiopulmonary medications. Prerequisite: MEDEX 403. Offered: W.

MEDEX 405 Trauma Emergencies (5) Emphasizes advanced pre-hospital management of the critical trauma patient. Teaches the pathophysiology and treatment of burns and trauma to the head, chest, and abdomen. Includes advanced techniques in surgical airway. Prerequisite: MEDEX 403 which may be taken concurrently. Offered: W.

MEDEX 406 Medical Emergencies II (3) Studies the pathophysiology and treatment of alcoholism, environmental disorders, infections and communicable diseases, hematology, toxicology, and psychiatric emergencies. Prerequisite: MEDEX 405. Offered: Sp.

MEDEX 407 Special Considerations for Paramedicine (4) Emphasizes the care and treatment of pediatric, geriatric, and bariatric patients. Reviews special considerations encountered in scenarios such as multiple casualty, confined space, and extrication incidents. Prerequisite: MEDEX 406 which may be taken concurrently. Offered: Sp.

MEDEX 408 Advanced Certifications (5) Instruction in PEPP, PALS, ACLS, ATLS, and National Registry curricula and certifications. Prerequisite: MEDEX 407. Credit/no-credit only. Offered: S.

MEDEX 414 Paramedic Clinical Practicum I (3) Participation in all aspects of patient care in the HMC-ER and OR with a primary focus on patient assessment and examination, as well as proficiency in IV cannulation and airway management. Prerequisite: MEDEX 401 which may be taken concurrently; Seattle/King County paramedic students only. Credit/no-credit only. Offered: A.

MEDEX 415 Paramedic Field Practicum I (6) Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes aspects of scene management and total patient care competence. Prerequisite: MEDEX 401 which may be taken concurrently. Credit/no-credit only. Offered: A.

MEDEX 424 Paramedic Clinical Practicum II (3) Participation in patient care in the HMC-ER with a focus on patient assessment, examination, IV cannulation, and airway management. Emphasizes the critical care of patients in the cardiovascular intensive care unit. Prerequisite: MEDEX 414. Credit/no-credit only. Offered: W.

MEDEX 425 Paramedic Field Practicum II (7) Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes scene management and total patient care competence. Prerequisite: MEDEX 415. Credit/no-credit only. Offered: W.

MEDEX 434 Paramedic Clinical Practicum III (4) Participation in patient care in the CHRMC-ER and OR with a focus on pediatric patient assessment, examination, and proficiency in IV cannulation and airway management. Emphasizes the care of expectant mother and newborn through rotations in the UW Labor and Delivery department. Prerequisite: MEDEX 424. Credit/no-credit only. Offered: Sp.

MEDEX 435 Paramedic Field Practicum III (8) Consists of regularly scheduled ride time with Seattle Medic One. The student assumes graduated responsibility for patient care and scene management while being closely evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes the field care of the pediatric patient and expectant mother. Prerequisite: MEDEX 425. Credit/no-credit only. Offered: Sp.

MEDEX 444 Paramedic Clinical Practicum IV (3) Participation in patient care in the HMC Emergency Department, Neurology Clinic, Pulmonary Clinic, and Cardiology Clinic. Focuses on trauma management, extrication, MCI, and search/rescue. Includes observation of a minimum of three autopsies with the medical examiner. Prerequisite: MEDEX 434. Credit/no-credit only. Offered: S.

MEDEX 445 Paramedic Field Practicum IV (11) Consists of regularly scheduled ride time with Seattle Medic One paramedics. The student assumes all responsibilities for scene management and patient care. Evaluations determine completion of the program. Prerequisite: MEDEX 435. Credit/no-credit only. Offered: S.

MEDEX 450 Basic Science in Clinical Medicine (6) Review of important basic science concepts that include relevant topics for a healthcare clinician. Prerequisite: permission of the MEDEX program. Offered: WS.

MEDEX 451 Anatomy and Physiology in Clinical Medicine (6) Uses an organ system approach to human anatomy and physiology relevant for a healthcare clinician. Offered: AS.

MEDEX 452 Pathophysiology for Primary Care (6) Basic pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Pathophysiology studied per organ system. Offered: A.

MEDEX 453 Basic Clinical Skills (5) Provides the student with mastery of a screening history and physical examination and thoroughness in data-collection skills. Offered: Asp.

MEDEX 454 Adult Medicine I (7) Problem-oriented approach to the diagnosis and management of common primary care conditions. Introduction to relevant laboratory and radiological procedures. Organ system approach. Offered: W.

MEDEX 456 Maternal and Child Health for the MEDEX Practitioner I (3) Designed to acquaint students with principles of prenatal care and primary-care pediatrics. Offered: W.

MEDEX 457 Behavioral Medicine I (2) Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: A.

MEDEX 458 Behavioral Medicine (2) Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: W.

MEDEX 459 Behavioral Medicine (2) Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: Sp.

MEDEX 460 Principles of Patient Management (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: W.

MEDEX 461 Principles of Patient Management (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: Sp.

MEDEX 462 Maternal and Child Health for the MEDEX Practitioner II (3) Continuation of MEDEX 456. Emphasis on diagnosis and treatment of common pediatric problems. Offered: Sp.

MEDEX 463 Clinical Clerkships I (19) Full-time clinical clerkship spent in institution-based or specialty practice settings with the supervision of licensed health care providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 465 Clinical Clerkships II (19) Continuation of clinical clerkships spent in institution-based or specialty practice settings with supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 466 Family Practice Clerkship for the MEDEX Practitioner I (19) *Ballweg* Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of patient encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.

MEDEX 467 Family Practice Clerkship for the MEDEX Practitioner II (19) *Ballweg* Further experience in primary-care practice with emphasis on independent patient management by the student supervised by family practitioners. Credit/no-credit only. Offered: AWSpS.

MEDEX 468 Emergency Medicine I for the MEDEX Practitioner (2) Approach to the diagnosis and management of common emergency conditions for primary-care physician assistants. Organ system approach. Offered: W.

MEDEX 469 Emergency Medicine II for the MEDEX Practitioner (2) Continuation of MEDEX 468. Approach to diagnosis and management of common emergency conditions for primary-care physician assistant. Organ system approach. Offered: Sp.

MEDEX 470 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.

MEDEX 471 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.

MEDEX 472 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.

MEDEX 473 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: A.

MEDEX 474 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: W.

MEDEX 475 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

MEDEX 499 Special Field Projects/Independent Study (1-19, max. 19) Clinical clerkships and independent study activities. Credit/no-credit only. Offered: AWSpS.

MEDEX 510 Healthcare for Rural and Medically Underserved Populations (5) Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations for practicing clinicians. Prerequisite: EMCHS students only. Offered: S.

MEDEX 511 Healthcare Administration and Public Health (5) Applies the basic principles of healthcare administration and public health to specific communities and practices. Prerequisite: EMCHS students only. Offered: S.

MEDEX 512 Academic Medicine and Specialty Practice for Practicing Clinicians (5) Overview for practicing clinicians of primary care as well as medical and surgical specialty practice within the academic medicine environment. Prerequisite: admission to the program. Offered: S.

MEDEX 513 Global Health for Practicing Clinicians (5) Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Prerequisite: admission to the program. Offered: S.

MEDEX 521 Capstone Project I (3) Includes capstone project introduction, literature review, critical reading, research design and proposals, ethics, IRB, research writing, and results presentation. (Two weeks on the Seattle campus, six weeks online). Prerequisite: EMCHS students only. Credit/no-credit only. Offered: S.

MEDEX 522 Capstone Project II (1) Details students' choice of capstone project and preparation of a detailed proposal including the timeline for completion. Prerequisite: MEDEX 521. Credit/no-credit only. Offered: A.

MEDEX 523 Capstone Project III (1) Students work on capstone projects. Prerequisite: MEDEX 522. Credit/no-credit only. Offered: W.

MEDEX 524 Capstone Project IV (1) Continuation of work on the capstone project. Prerequisite: MEDEX 523. Credit/no-credit only. Offered: Sp.

MEDEX 525 Capstone Project V (5) Completion of the capstone project, preparation of final drafts, submission of finished project to faculty mentors, and presentation of project. Prerequisite: MEDEX 524. Credit/no-credit only. Offered: S.

MEDEX 528 Investigative Skills for Practicing Clinicians (5) Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Applications critically appraise the public health and biomedical literatures drawing examples from current scientific literature and existing data. Prerequisite: admission to EMCHS program. Offered: S.

MEDEX 531 Clinical Residencies I (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.

MEDEX 532 Clinical Residencies II (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.

MEDEX 533 Clinical Residencies III (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.

MEDEX 536 Health Policy for Practicing Clinicians (4) Overview of United States health policy issues including payment structures, quality, disparities, workforce and legislative impact. Prerequisite: EMCHS students only. Offered: W.

MEDEX 537 Leadership for Practicing Clinicians (4) Leadership skills for clinical practice, community, the profession, and organizations. Prerequisite: EMCHS students only. Offered: A.

MEDEX 538 The Physician Assistant Profession (4) Overview of the physician assistant profession, focusing on the history of the profession, education, economics, legal, political, and professional aspects of the physician assistant profession, current and future physician assistant roles, and hot topics. Prerequisite: EMCHS students only. Offered: Sp.

MEDEX 540 Healthcare for Rural and Underserved Populations (5) Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations. Offered: S.

MEDEX 541 Healthcare Administration and Public Health (5) Application of the basic principles of healthcare administration and public health to specific communities and practices. Offered: S.

MEDEX 542 Academic Medicine and Specialty Practice (5) Overview of primary care as well as medical and surgical specialty practice within the academic medicine environment. Offered: S.

MEDEX 543 Global Health (5) Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Offered: S.

MEDEX 550 Basic Science in Clinical Medicine (6) Intensive review of important basic scientific concepts relevant to clinical medicine. Prerequisite: MEDEX Northwest students only. Offered: S.

MEDEX 551 Anatomy and Physiology (6) Overview and review of human anatomy and physiology by organ system. Prerequisite: MEDEX students only. Offered: S.

MEDEX 552 Pathophysiology for Primary Care (6) Examines pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Studies pathophysiology per organ system. Offered: A.

MEDEX 553 Basic Clinical Skills (5) Provides the student with mastery of history-taking and physical examination skills, thoroughness in data collection, medical record-keeping, and verbal presentation skills. Offered: A.

MEDEX 554 Adult Medicine I (7) Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: W.

MEDEX 555 Adults Medicine II (7) Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: Sp.

MEDEX 556 Maternal Child Health I (3) Examines the principles of prenatal care and primary-care pediatrics. Offered: W.

MEDEX 557 Behavioral Medicine I (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: A.

MEDEX 558 Behavioral Medicine II (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: W.

MEDEX 559 Behavioral Medicine III (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: Sp.

MEDEX 560 Principles of Patient Management I (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: W.

MEDEX 561 Principles of Patient Management II (3) Provides systematic approach to pharmacological therapies

including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: Sp.

MEDEX 562 Maternal Child Health II (3) Emphasizes the diagnosis and treatment of common pediatric problems. Prerequisite: MEDEX 556. Offered: Sp.

MEDEX 563 Clinical Clerkships I (19) Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 565 Clinical Clerkships II (19) Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Prerequisite: MEDEX 563. Credit/no-credit only. Offered: AWSpS.

MEDEX 566 Family Practice Clerkship I (19) Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.

MEDEX 567 Family Practice Clerkship II (19) Further experience in primary-care practice with an emphasis on independent patient management by the student supervised by family practitioners. Prerequisite: MEDEX 566. Credit/no-credit only. Offered: AWSpS.

MEDEX 568 Emergency Medicine I (2) Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: W.

MEDEX 569 Emergency Medicine II (2) Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: Sp.

MEDEX 570 Professional Role Development I (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.

MEDEX 571 Professional Role Development II (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.

MEDEX 572 Professional Role Development III (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.

MEDEX 573 Technical Skills I (1) Introduces clinical skills and procedures through hands-on experiences. Offered: A.

MEDEX 574 Technical Skills II (1) Introduces clinical skills and procedures through hands-on experiences. Offered: W.

MEDEX 575 Technical Skills III (1) Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

MEDEX 588 Investigative Skills for Entry-Level Clinicians (5) Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Application appraise the public health and biomedical literatures drawing on examples from current scientific literature and existing data. Offered: S.

MEDEX 599 Independent Study (1-19, max. 19) Supervised clinical clerkship or independent study activities to meet specific needs. Prerequisite: permission of the MEDEX program. Credit/no-credit only. Offered: AWSpS.

Medicine

RR512 University of Washington Medical Center
domchair@uw.edu

Active programs in teaching, research, and patient care are carried on at the University of Washington Medical Center, Veterans' Administration Puget Sound Health Care System (VAPSHCS), Harborview Medical Center, Pacific Medical Center, the Puget Sound Blood Center, the Northwest Kidney Center, and the Fred Hutchinson Cancer Research Center. Major affiliations for clinical teaching also exist with Providence Medical Center and Swedish Hospital Medical Center. There are many additional affiliations with community hospitals in Seattle, the state of Washington, and the WWAMI region. Medical students, interns, medical residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsctat/

MED 498 Undergraduate Thesis (*)

MED 499 Undergraduate Research (*) Case studies, with laboratory research. Available to undergraduates and medical students. Offered: AWSpS.

MED 505 P-Preceptorship in Medicine (1, max. 12) To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of department. Credit/no-credit only. Offered: AWSpS.

MED 507 HIV in Latinos (1-, max. 12) Students shadow an attending physician, and participate in routine and acute visits for a primarily Spanish-speaking patient population. Includes Spanish-language health education and rapid HIV testing sessions, and encourages attendance at a community event targeting the Latino HIV community. Prerequisite: permission of instructor; conversational Spanish proficiency or FAMED 556. Credit/no-credit only.

MED 510 Health Issues of Sexual Minorities (1) Introduction to the special healthcare issues and barriers confronting persons identified as bisexual, gay, lesbian, or transgendered. Includes lectures, panels, and case presentations by faculty and community experts.

MED 515 Medicine as Culture (1) Examines the ways that medical practice, the medical profession, and ideas about sickness and health are embedded in society and culture, as a way of contextualizing biological phenomena and medical knowledge. Credit/no-credit only.

MED 525 Introduction to Gerontology and Geriatric Medicine (1) Introduces gerontology and geriatric medicine. Explores topics in geriatric medicine including: multidisciplinary care, dementia and delirium, falls, polypharmacy, urinary incontinence, fragility, and end-of-life care. Employs a combination of lectures, time spent interviewing and observing patients in hospital-based clinics, private homes, long term care and continuing retirement communities, and bedside teaching with a healthcare provider. Credit/no-credit only.

MED 530 AIDS: A Multidisciplinary Approach (2) C. FARQUHAR Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare;

and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/G H 562; A.

MED 531 P-Human Genetics (*) Weekly seminar dealing with a variety of topics in medical genetics given by faculty of the Division of Medical Genetics and related departments and divisions. Open to medical students with a good foundation in genetics.

MED 533 P-Clinical Endocrinology (2) Includes brief lectures followed by instructor-led interviews with patients to illustrate the clinical presentation, diagnosis, and treatment of the major endocrinopathies. Students gain a greater appreciation of the impact these disorders have on patients' lives. Prerequisite: second year medical students.

MED 534 Wilderness Medicine (1) Provides training in medical emergencies and clinical situations unique to wilderness settings where access to medical care is limited. Students gain experience in patient assessment, extrication, and the management of common wilderness situations including altitude illness, burns, trauma, diving injuries, hypo- and hyperthermia, and toxin exposures. Offered: Sp.

MED 536 Introduction to Critical Care Medicine (1) Uses a combination of didactics, time spent observing rounds and physicians on-call in the ICU as well as dedicated bedside teaching by a critical care attending physician to teach about core topics in pediatric and adult critical care medicine including shock, respiratory failure, sepsis, mechanical ventilation, and palliative care. Offered: W.

MED 540 Preventing Healthcare Associated Infections (1) Multidisciplinary approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Credit/no-credit only. Offered: jointly with EPI 505; W.

MED 546 Clinical Applications of Gene Therapy (2) Overview of the current status of gene therapy. Discusses its role in the future practice of medicine. Lecture and literature reviews.

MED 547 Quantitative Methods in Medical Genetics (2) Computational methods of use for medical genetics. Review of problem sets. Topics range from basic probability to linkage analysis. Prerequisite: genetics and permission of instructor.

MED 549 Clinical Medical Genetics (1) Review of current clinical advances in medical genetics. Includes lectures and discussion of cases from medical genetics clinic. Prerequisite: genetics or human genetics and permission of instructor.

MED 555 P-Mind, Body, and Pen: Writing and the Art of Becoming a Physician (1) Provides forum for medical students to write about issues in medicine and medical education. Focuses on writing as a process for giving voice to the conflicting demands and dilemmas of becoming a physician. Explores personal narratives, dreams and disappointments, chronic illness and death, empathy and revulsion, authenticity and power. Offered: W.

MED 556 Visual Thinking: How to Observe in Depth (1) Uses visual thinking strategies to look at art and enhance diagnostic acumen. Expands observational and critical thinking skills, and encourages open-ended discussion. Skills applied in assessing patients. Combination of slide sessions and observation of original objects at Seattle museums. Credit/no-credit only. Offered: A.

MED 557 Hispanic Health and Healthcare Disparities (1) Acosta Covers Hispanic culture and language, history of Hispanics in the United States, Hispanic health status issues, and effective strategies for working across cultures and linguistic barriers. Designed to help the learner understand and respond better to the healthcare needs of the Hispanic community.

MED 560 P-Advanced Global Health (2) Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and

economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with G H 505.

MED 561 Tropical Medicine (1) F. BUCKNER, P. POTTINGER Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: jointly with G H 561; Sp.

MED 565 P-The Healer's Art: Awakening the Heart of Medicine (1) Encourages cultivation of human dimensions in practice of medicine while strengthening personal commitment to medicine as a life's work. Facilitates student recognition of commonality of personal concerns among peers and student response to the dimension of mystery in the experience of illness as well as development of the capacity for awe. Credit/no-credit only. Offered: Sp.

MED 599 P-Transfusion Machine (3) Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell serology/compatibility, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.

MED 600 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: AWSpS.

Emergency Medicine

MED EM 501 P-Emergency Medicine Preceptorship (1, max. 12) Provides opportunities for first- and second-year medical students to gain experience working in an emergency setting. Students shadow faculty in emergency medicine during their shifts. Includes learning about common conditions seen in the emergency department and the opportunity to work on history taking and physical exam skills. Prerequisite: permission of instructor. Credit/no-credit only.

MED EM 550 P-Introduction to Emergency Medicine (1) Presentation of common medical and surgical emergencies and their urgent management, especially within the framework of rapid patient assessment and stabilization. Lecture topics include chest pain and myocardial infarction, basic arrhythmia management, and burn and wound care. Credit/no-credit only.

MED EM 600 Independent Study/Research (*) Provides medical students the opportunity to participate in research as part of their medical education. Must obtain permission through submission of a proposal to department and securing a faculty sponsor.

MED EM 605 P-Emergency Medicine - UWMC (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 606 P-Emergency Medicine - HMC/UWMC (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCI, PEDS; and SURG required clerkships.

MED EM 607 P-Emergency Medicine - Madigan (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 608 P-Emergency Medicine - Swedish Cherry Hill (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients.

Prerequisite: MED; OB/GYN; PBSCI; PEDS; and SURG required clerkships.

MED EM 609 Emergency Medicine - Seattle Children's (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 617 P-Emergency Medicine - Olympia (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 624 P-Emergency Medicine - Shelton (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 625 P-Emergency Medicine - Spokane (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 626 P-Emergency Medicine - Spokane Deaconess (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 645 P-Emergency Medicine - Boise, St. Lukes (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 646 P-Emergency Medicine - Boise, Saint Alphonsus (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 656 P-Emergency Medicine - Juneau, AK (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 657 P-Emergency Medicine - Fairbanks (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 658 P-Emergency Medicine - Anchorage (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 662 P-Emergency Medicine - Bozeman, MT (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 663 P-Emergency Medicine - Billings, MT (8) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 668 P-Emergency Medicine - Casper (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 669 P-Emergency Medicine - Cheyenne, WY (8) Clerkship emphasized the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 680 P-Emergency Medicine Subinternship - Madigan (8) Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only; permission of department.

MED EM 681 P-Emergency Medicine Subinternship - HMC/UWCR (*, max. 16) Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only; permission of department.

MED EM 682 P-Emergency Medicine Subinternship - UWMC (*, max. 16) Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only; permission of department.

MED EM 697 P-Emergency Medicine Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least one month before preregistration. (Two, four, six, or twelve weeks). Prerequisite: required EM clerkship; permission of instructor at away site and department. Offered: AWSpS.

MED EM 699 P-WWAMI Emergency Medicine Special Elective (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington, within the WWAMI region. Prerequisite: permission of department and away site.

Medicine Elective Clerkships

MEDECK 601 P-Ward Medicine Subinternship - Seattle (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 602 P-Primary Care - Seattle (8/12) Four-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Roosevelt Clinic following a panel of patients in medicine, rheumatology, and virology clinics. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 603 P-Clinical Cardiology and Electrocardiography - Seattle (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 604 P-Clinical Dermatology - Seattle (8) Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 605 P-Clinical Endocrinology and Metabolism - Seattle (*, max. 12) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 606 P-Clinical Gastroenterology - Seattle (8) Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff, plus directed tutorial work. Students are scheduled at one of three sites: UWMC, Harborview Medical Center, and Veterans' Administration hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 607 P-Clinical Hematology/Oncology - Seattle (8) Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 608 P-Clinical Infectious Diseases - Seattle (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 609 P-Nephrology and Fluid Balance - Seattle (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 610 P-Clinical Respiratory Disease (8) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 612 P-Clinical HIV Care - Seattle (8) Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 613 P-Clinical Nutrition - Seattle (8) Instruction in nutritional assessment and care of both inpatients and outpatients. Students work with preceptors at a variety of hospital and clinic teaching sites, attend nutrition-related seminars, and practice interview skills on standardized patients. (Four weeks). Prerequisite: HUBIO 568; third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 614 P-Clinical Oncology - Seattle (8) Students participate in the oncology service in the inpatient oncology consult service at UWMC hospital, obtaining exposure to the management of patients with cancer, oncological complications and emergencies, oncological drug mechanisms of action, side effects, and interactions. Obtain basic understanding of principles of oncology care. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 615 P-Rheumatology - Seattle (8) Full-time inpatient-outpatient clerkship in rheumatology. Clinical experience provided in diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospitalized patients at the University of Washington Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In addition to patient contact, reading, seminars, and preceptorial sessions are the methods of instruction. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 616 P-Advanced Dermatology Clinic - Seattle (8) Advanced clinical dermatology clerkship at various sites including HMC, UWMC, VA Seattle, and Children's Hospital. Students choose from four tracks within the rotation: dermatopathology, pediatric dermatology, dermatologic surgery, and advanced medical dermatology. (Four weeks). Prerequisite: third-year required Medicine clerkship; MEDECK 604. Offered: AWSpS.

MEDECK 617 P-Harborview Evening Clinic - Seattle (2) A longitudinal elective for senior medical students who assume primary responsibility for a panel of medical patients

in an outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students must apply to this program, and are expected to participate for the full academic year. Prerequisite: third-year required Medicine clerkship.

MEDECK 618 P-Medical Consultation - Seattle (8) Full-time outpatient and inpatient elective in peri-operative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 619 P-Management of Sexually Transmitted Diseases - Seattle (2, max. 12) Instruction and clinical experience in diagnosis, treatment, management, and patient counseling of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of patients with STDs. Prior to the elective, each student must review a packet of didactic materials. (Two weeks). Prerequisite: third-year required Medicine, OB/GYN, and Surgery clerkships. Offered: AWSpS.

MEDECK 620 P-Critical Care Medicine Subinternship - Seattle (8) Participating students function at the sub-intern level on the MICU service at either Harborview Medical Center, UWMC, or VAMC. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 622 P-Clinical Medical Genetics (8) Students see outpatients and attend a variety of outpatient clinics including subspecialty clinics in cancer genetics, connective tissue genetics, neurogenetics, Turner syndrome and dermatologic genetics, and pediatric general genetics clinics with an emphasis on dysmorphology, developmental delay, disorders of sexual differentiation, skeletal dysplasia, craniofacial anomalies, and neurogenetics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 623 P-Clinical Wound Management (*) Opportunity for medical student to be exposed to and learn wound care management in clinical setting. At end of rotation students should be able to diagnose cause of chronic ulcer or wound, outline the approach to the management of diabetic foot ulcer, peripheral artery disease ulcer and VLU, and initiate treatments such as sharp debridement, VAC, dressing, and Unna Boot placement. (Two weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 624 Hospitalist Subinternship - Seattle, WA (8) Intensive experience in hospital medicine. The student works primarily with an attending hospitalist or nocturnist.

MEDECK 625 Cardiology Subinternship - Seattle, WA (8) Students serve as intern on the cardiology service under the supervision of senior resident and cardiology attending physicians.

MEDECK 626 P-Clinical Cardiology and Electrocardiography - Tacoma (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship.

MEDECK 627 P-Clinical Endocrinology and Metabolism - Tacoma (*, max. 12) Clerkship in clinical endocrinology and metabolism. Combined inpatient and outpatient assignments at selected hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship.

MEDECK 628 P-Clinical Infectious Diseases - Tacoma (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Pre-

requisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 629 P-Clinical Respiratory Disease and Critical Care - Tacoma (8) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 630 P-Ward Medicine Subinternship - Tacoma (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 631 P-Ward Medicine Subinternship - Spokane (8) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 633 P-Clinical Cardiology and Electrocardiography - Washington (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 634 P-Clinical Dermatology - Washington (8) Participation in dermatology clinics and inpatient consultations. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 636 P-Clinical Gastroenterology - Washington (8) Participation in consulting ward rounds, procedures, conferences, and selected clinics at Sacred Heart Hospital in Spokane. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 637 Clinical Infectious Diseases - Yakima, WA (8) Students participate in the clinic and consulting service at area hospitals. Includes patients with a range of community acquired and hospital acquired infectious diseases. Students participate in antibiotic stewardship discussions and infection control meetings.

MEDECK 638 Clinical Infectious Diseases - Spokane (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 639 P-Nephrology and Fluid Balance - Washington (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 640 Critical Care Medicine Subinternship - Washington (8) Participating students function at the sub-intern level on the MICU. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 644 P-Clinical Dermatology - Wyoming (8) Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 651 P-Ward Medicine Subinternship - Alaska (*, max. 24) Students act in the capacity of interns on the

medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 653 P-Clinical Cardiology and Electrocardiography - Alaska (8) Clerkship in clinical cardiology. Combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 654 P-Clinical Dermatology - Alaska (8) Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 658 P-Clinical Infectious Diseases Alaska (8) Students participate in clinic and in the consulting service throughout the hospital, attend ICU, antimicrobial stewardship rounds, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship; fourth-year standing. Offered: AWSpS.

MEDECK 664 P-Clinical Dermatology - Montana (8) Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 669 P-Nephrology and Fluid Balance - Montana (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Credit/no-credit only. Offered: AWSpS.

MEDECK 670 P-Clinical Medicine Critical Care - Idaho Falls (8) Inpatient critical care rotation in a community hospital setting at Eastern Idaho Regional Medical Center in Idaho Falls, Idaho. Students assist in the diagnosis and management of common ICU problems, as well as major trauma resuscitation, under the supervision of critical care physicians. Students exposed to common ICU problems, which may include sepsis, respiratory failure, hypotension, organ failure, and gastrointestinal hemorrhage. Students work as part of a multidisciplinary team. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 671 P-Ward Medicine Subinternship - Idaho (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 672 P-Clinical Endocrinology and Metabolism - Idaho Falls, ID (8) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: medicine required clerkship. Offered: AWSpS.

MEDECK 673 P-Clinical Cardiology and Electrocardiography - Idaho (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 674 P-Clinical Dermatology - Idaho (8) Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 675 P-Clinical Allergy and Immunology - Boise, ID (4) Clinical experience seeing a combination of new and recheck patients with allergy, asthma and immunology disorders for example but not limited to, seasonal allergies, allergic rashes, asthma, chronic cough, chronic sinusitis,

contact dermatitis, bee sting allergy, and food allergy. Prerequisite: Medicine Clerkship and 4th year standing.

MEDECK 677 P-Clinical Hematology/Oncology - Idaho (8) Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 678 P-Clinical Infectious Diseases - Idaho (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 679 P-Nephrology and Fluid Balance - Idaho (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 680 P-Clinical Respiratory Disease and Critical Care Medicine - Idaho (8) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 681 P-Clinical Aspects of Aging - Idaho (8) Work with elderly patients as subintern with senior care program. Inpatient and ambulatory setting in nursing homes and patients' homes. Interdisciplinary approach. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 682 P-Endocrinology and Metabolism - Idaho Falls (8)

MEDECK 686 P-Advanced Clinical Dermatology Clinic - Idaho (8) Advanced clinical dermatology clerkship. (Four weeks). Prerequisite: third-year required Medicine clerkship; either MEDECK 604, MEDECK 634, MEDECK 644, MEDECK 664, or MEDECK 674. Offered: AWSpS.

MEDECK 690 P-General Internal Medicine - Shiprock (8) Clerkship located at the Northern Navajo Medical Center in Shiprock, New Mexico. Students are involved in all aspects of patient care, including home visits, ambulatory care, and hospital stays. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

MEDECK 691 P-Medicine Special Electives - Seattle (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 692 P-Medicine Special Electives - Washington (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 693 P-Medicine Special Electives - Wyoming (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 694 P-Medicine Special Electives - Alaska (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 695 P-Medicine Special Electives - Montana (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 696 P-Medicine Special Electives - Idaho (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 697 P-Medicine Special Electives - Away (*, max. 24) Special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least three months before preregistration. (Two, four, six, or twelve weeks). Prerequisite: permission of department.

Medicine Required Clerkships

MEDRCK 601 P-Clinical Clerkship (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 610 P-Clinical Clerkship Seattle-Shelton, WA (24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experiences emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 612 P-Clinical Clerkship - Seattle-Madigan (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 614 P-Clinical Clerkship - Seattle-Montesano (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 616 P-Clinical Clerkship Seattle-Olympia (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 617 P-Clinical Clerkship Seattle-Port Townsend (*, max. 24) Paauw Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 618 P-LIC Clinical Clerkship (24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experiences emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (38-44 week integrated clerkship, full-time.) Offered: AWSpS.

MEDRCK 621 P-Clinical Clerkship - Spokane (*, max. 24) Third-year medical students assume increasing responsibility

for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Some students can schedule outpatient time in Pullman, WA. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 624 P-Clinical Clerkship - Seattle-Wenatchee (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 630 P-Write Medicine Clinical Clerkship (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (18-22 week integrated clerkship, full-time.)

MEDRCK 632 P-Clinical Clerkship - Seattle-Jackson (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 634 P-Clinical Clerkship - Seattle-Sheridan (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 636 P-Clinical Clerkship - Seattle-Douglas (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 638 P-Clinical Clerkship - Seattle-Lander (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 652 P-Clinical Clerkship - Seattle-Anchorage (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 654 P-Clinical Clerkship - Seattle-Soldotna (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a

teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 672 P-Clinical Clerkship - Seattle-Billings (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 673 P-Clinical Clerkship Seattle-Great Falls (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 674 P-Clinical Clerkship - Seattle-Dillon (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 676 P-Clinical Clerkship - Seattle-Missoula (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 678 P-Clinical Clerkship - Seattle-Bozeman (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MEDRCK 691 P-Clinical Clerkship - Boise (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

Microbiology

K-335A Health Sciences

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

UNDERGRADUATE PROGRAM

For undergraduate program details, please see the Microbiology entry under the College of Arts and Sciences.

GRADUATE PROGRAM

Graduate Program Coordinator

K335A Health Sciences, Box 357242

(206) 543-2572

advmicro@uw.edu

The Department of Microbiology offers a graduate program leading to the doctor of philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

Admission Requirements

Students can be admitted to the PhD program with a background in any biological science discipline. Selection is based on the evaluation of a student's undergraduate record for indications of the ability to excel in independent, creative research. The department strongly recommends that undergraduate preparation include courses in biochemistry, physics, general and organic chemistry, microbiology, molecular biology and cell biology. To be competitive with the applicant pool, prospective students are also strongly advised to seek opportunities to carry out undergraduate research.

Required Background Courses

Generally satisfied prior to entry into the graduate program

1. A one-year course in biochemistry (equivalent to BIOC 440, BIOC 441, and BIOC 442)
2. A course in classical and molecular genetics (equivalent to GENOME 371 or GENOME 372)
3. A course in general microbiology (equivalent to MICROM 410)
4. A course in medical microbiology and basic immunology is recommended for those considering research in the area of medical microbiology or virology

Degree Requirements

90 credits minimum, as follows:

1. *Conjoint Courses (6 credits)*: 6 credits from the following conjoint courses: CONJ 524, CONJ 531, CONJ 532, CONJ 533, CONJ 534, CONJ 535, CONJ 537, CONJ 538, CONJ 539, CONJ 541, CONJ 543, CONJ 544, CONJ 545, CONJ 546, CONJ 547, CONJ 548, CONJ 549 (1.5 credits each). It is recommended that students take additional conjoint courses or choose one or more of the genome sciences modules: GENOME 551, GENOME 552, GENOME 553, GENOME 554, GENOME 555, GENOME 556, GENOME 559 (1.5 credits each).
2. *Virology and Bacteriology Courses (6-7 credits)*: Three of the following courses; one virology and one bacteriology course must be among those selected: MCB 532, MCB 542, MICROM 441, MICROM 450, MICROM 510, MICROM 530, MICROM 553
3. *Faculty Research Presentations for First-Year Students*: MICROM 599
4. *Laboratory Rotation*: MICROM 500, minimum three quarters
5. *Journal Club*: MICROM 522, continuous enrollment
6. *Seminar*: MICROM 520 seminar series or attendance at Fred Hutchinson seminars. Students at Fred Hutchinson are also encouraged to attend the Microbiology seminars. To be taken every quarter unless a conflict with teaching exists.

7. *Research Discussion Groups*: Taken every quarter. Students register for the appropriate course number for credit.

8. *Additional Requirements*

- a. Be a teaching assistant in at least two laboratory courses for undergraduates (usually satisfied in the first and/or second year).
- b. Give at least two formal lectures in an undergraduate course (third or fourth year).
- c. Be first author on multiple papers related to thesis research which are published or accepted for publication in refereed journals. Under some circumstances, one first-author publication satisfies this requirement.

9. General examination, dissertation, final examination

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsclat/

MICROM 101 Microbes and Society (5) NW Intended for liberal arts majors and students not majoring in the biological sciences. Focuses on activities of bacteria, viruses, and other microorganisms, and their influence on humans. Microbe-related topics include disease, bioterrorism, food, biotechnology, and ecology. Examines the nature of scientific inquiry, along with major biological concepts.

MICROM 301 General Microbiology (3) NW Anderson, Mougous Acquaints students with microorganisms and their activities. Topics include microbial cell structure and function, metabolism, microbial genetics, and the role of microorganisms in disease, immunity, and other selected applied areas. Prerequisite: either CHEM 120, CHEM 140, CHEM 142, or CHEM 145. Offered: ASpS.

MICROM 302 General Microbiology Laboratory (2) NW Anderson, Beins, Chandler Laboratory course primarily for students taking MICROM 301. Covers a variety of microbiological techniques, with experiments designed to illustrate major concepts of bacteriology, virology, and immunology. No auditors. Offered: ASpS.

MICROM 402 Fundamentals of General Microbiology Laboratory (3) NW Gray Isolation of a broad range of non-pathogenic bacteria from natural sources, using selective and enrichment techniques, with microscopic, biochemical, and molecular identification. Related exercises include genetics, physiology, quantitation, and growth energetics. Prerequisite: BIOL 200. Offered: ASP.

MICROM 410 Fundamentals of General Microbiology I (3) NW Parsek, Traxler Survey of the microbial world, metabolism, biosynthesis, regulation, growth, structure, and function. Required for students majoring in microbiology; recommended for students majoring in biology. Prerequisite: minimum grade of 2.3 in BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

MICROM 411 Bacterial Genetics (5) NW Gray, Merrikkh, Traxler Molecular genetics: description of fundamental genetic processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focuses on prokaryotic organisms. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: W.

MICROM 412 Prokaryotic Diversity (3) NW Greenberg, Leigh Structure, biochemical properties, and genetics of the major groups of prokaryotes. Prerequisite: BIOL 200. Offered: Sp.

MICROM 413 Special Topics in Microbiology (1, max. 3) Examines current subjects in microbiology. Credit/no-credit only.

MICROM 431 Prokaryotic Recombinant DNA Techniques (3) NW Chandler Laboratory course emphasizing concepts

and techniques/methodologies in recombinant DNA research employing bacteria and their viruses. Topics and experiments/demonstrations include genomic and plasmid DNA isolation, restriction mapping, cloning, transposon mutagenesis, sequencing, and Western and Southern blotting. No auditors. Prerequisite: either BIOL 200 or MICROM 301. Offered: W.

MICROM 435 Microbial Ecology (3) NW Stahl Consideration of the various roles that microorganisms, particularly bacteria and cyanobacteria, play in environmental processes. The interrelationships among microorganisms and the effects of the physical, chemical, and biological properties of their environment are discussed and assessed. Prerequisite: BIOL 180.

MICROM 442 Medical Bacteriology (3) NW Cookson Medically important bacterial pathogens are discussed in terms of the clinical, therapeutic, and epidemiological aspects of diseases caused by them, molecular mechanisms of pathogenesis and their identification in the clinical laboratory. Laboratory course, MICROM 443 coordinates. Prerequisite: BIOL 200. Offered: W.

MICROM 443 Medical Bacteriology Laboratory (3) NW Anderson, Beins, Chandler Required for medical technology students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. No auditors. Prerequisite: BIOL 200. Offered: AW.

MICROM 444 Medical Mycology and Parasitology (4) NW Anderson, Hohl, Murphy Consideration of medically important fungi and parasites, with emphasis on their biology in relation to disease and its laboratory diagnosis. For medical technology students, microbiology majors, and medical students as an elective. Prerequisite: BIOL 200. Offered: Sp.

MICROM 445 Medical Virology (3) NW Lagunoff, Smith Introduces medical virology emphasizing basic understanding of the pathogenesis and replication of medically important viruses including the spread, diagnosis, epidemiology, treatment, and prevention of human viral diseases. Prerequisite: either BIOL 180 or BIOL 200; Sp.

MICROM 450 Molecular Biology of Viruses (3) NW Champoux Introduction to the molecular biology of viruses and virus-host relationships. Designed for advanced undergraduates and graduate students in the biological sciences. Coverage includes bacterial and animal viruses, with an emphasis on the molecular mechanisms of viral gene expression and regulation. Prerequisite: BIOL 200. Offered: W.

MICROM 482 Peer Teaching Assistants in Microbiology (1-5, max. 10) Direct experience in teaching a microbiology laboratory class. Peer TA's attend concurrent accompanying lecture course, meet weekly to coordinate, give introductory lab remarks, supervise the execution of lab exercises, and assist in preparing/grading of quizzes/exams. Training in teaching techniques, approaches. Student evaluation provided. Prerequisite: MICROM 402; MICROM 410. Credit/no-credit only. Offered: AWSpS.

MICROM 495 Honors Undergraduate Research (*-) Leigh Specific problems in microbiology or immunology. Offered: AWSpS.

MICROM 496 Undergraduate Library Research (2) An introduction to library research techniques and to microbiological literature. Staff assign a topic and supervise the project. Offered: AWSpS.

MICROM 499 Undergraduate Laboratory Research (*, max. 35) Leigh Specific problems in microbiology or immunology. Credit/no-credit only. Offered: AWSpS.

MICROM 500 Introduction to Research (*, max. 20) Introduction to research areas of the faculty and the techniques employed in their investigations. Prerequisite: graduate standing in microbiology or permission of instructor. Credit/no-credit only. Offered: AWSpS.

MICROM 520 Seminar (1, max. 30) Fang Credit/no-credit only. Offered: AWSp.

MICROM 522 Current Research in Microbiology (1, max. 30) Harwood, Merrikh, Parsek Weekly student and faculty seminar presentations based on the current literature. Prerequisite: graduate standing in microbiology. Credit/no-credit only. Offered: AWSp.

MICROM 526 Research of Cell Surface Problems (1, max. 30) Traxler Weekly research seminar and discussion of scientific literature pertaining to the process of membrane protein biogenesis. Prerequisite: permission of instructor. Credit/no-credit only.

MICROM 529 Mechanisms of Bacterial Pathogenesis (1, max. 30) Fang Student and faculty seminar presentations based on current research pertaining to mechanisms of bacterial pathogenesis at the molecular and cellular levels. Prerequisite: graduate standing in microbiology. Credit/no-credit only. Offered: AWSp.

MICROM 532 Methanogenesis Research Meeting (1, max. 30) Leigh Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Prerequisite: MICROM 410, permission of instructor. Credit/no-credit only. Offered: AWSpS.

MICROM 533 Herpesvirus Research Meeting (1, max. 30) Lagunoff Weekly research seminar and discussion of scientific literature pertaining to the study of molecular virology of Kaposi's Sarcoma-associated herpesvirus. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MICROM 534 Research Seminar in Salmonella Pathogenesis (1, max. 30) Fang Provides a formal group setting for discussion and evaluation of a student's research progress. Credit/no-credit only. Offered: AWSpS.

MICROM 540 Virology (3) Katze Introduces new approaches and technologies being used in modern virology laboratories to provide a better understanding of the fields of virology and virus-host interactions. Covers topics in bio-defense, viral genomics and proteomics, and systems biology as it pertains to virus/host infection. Prerequisite: permission of instructor.

MICROM 553 Molecular Mechanisms of Bacterial Pathogenesis (3) Salama Mechanisms of bacterial pathogenesis explored at the molecular, genetic, and cellular levels through selected models as presented in the current scientific literature. Prerequisite: MICROM 411 or equivalent. Offered: A, odd years.

MICROM 554 Seminar in Molecular and Medical Microbiology (1, max. 15) Cookson Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented and discussed critically. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

MICROM 555 Advanced Clinical Microbiology (2.5) Butler-Wu, Fang Attendance at daily plate rounds of the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Prerequisite: MICROM 443 and permission of instructor. Credit/no-credit only. Offered: AWSp.

MICROM 560 Research and Journal Club in Retrovirology (1, max. 30) Linial Weekly research seminar and discussion of literature in areas of retroviral replication and transformation. Prerequisite: graduate standing or permission of instructor. Offered: AWSpS.

MICROM 562 Oncogene and Retrovirus Research Seminar (1, max. 30) Linial, Overbaugh Weekly discussions of ongoing research related to retroviral replication, retroviral oncogenes and pathology. Prerequisite: graduate standing or permission of instructor. Offered: AWSpS.

MICROM 585 Research in Cell and Molecular Biology (1, max. 30) Champoux Weekly research seminar. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MICROM 588 Research in Applied Microbiology (1, max. 30) Lidstrom Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with CHEM E 588; AWSpS.

MICROM 599 Research Presentations (2) Current research review. Credit/no-credit only.

MICROM 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

MICROM 700 Master's Thesis (*-) Credit/no-credit only.

MICROM 800 Doctoral Dissertation (*-) Credit/no-credit only. Offered: AWSpS.

Neurological Surgery

325 9th Avenue, Harborview Medical Center

askuwns@uw.edu

The Department of Neurological Surgery is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction in this area is provided for medical students and postgraduate physicians.

The department's medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, University of Washington Medical Center, Veterans Affairs Puget Sound Health Care Center, and Seattle Children's hospital. The department also has several course offerings correlating research and clinical problems of the nervous system, including the research seminars in neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.

Selected medical students also may elect research experience within the Department of Neurological Surgery. The department research facilities are housed in the Medical Research Tower of the University of Washington Medical Center, at Harborview Research and Training Building, and at Veterans Affairs Puget Sound Health Care System. Investigations are under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year program emphasizes preparation for a career in academic neurosurgery.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsclat/

NEUR S 498 Undergraduate Thesis (*, max. 35) D' Ambrosio, Ellenbogen, Hevner, Horner, MacDonald, Mourad, Morrison, Ojemann, Ramirez Offered: AWSpS.

NEUR S 499 Undergraduate Research (*, max. 35) D' Ambrosio, Ellenbogen, Ferreira, Hevner, Horner, MacDonald, Mourad, Morrison, Ojemann, Ramirez, Rostomily, Silber Investigation of special problems as an intimate member of the research team in the neurological surgery laboratories. Research to lead to a thesis, if desired. List of projects available on request. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 505 P-Preceptorship in Academic Neurosurgery (1, max. 12) *Chestnut, Ellenbogen, Ferreira, Hofstetter, Kim, Lee, Ojemann, Rostomily, Sekar, Silbergeld, Zhang* Opportunity for first- and second-year medical students to observe the research, teaching, and patient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 665 P-Clinical Neurosurgery Clerkship (8) *Ellenbogen, Lee* Provides the medical student with exposure to common neurologic and neurosurgical problems such as trauma, hydrocephalus, stroke, back pain, bleeds in the head, and tumors. Satisfies the requirement of the Neurology clerkship requirement. For third- and fourth-year medical students.

NEUR S 680 P-Neurological Surgery Clerkship (*, max. 8) *Ellenbogen, Lee* Student serves clinical clerkship as an intimate member of the staff, participating in inpatient and outpatient care, both preoperative and postoperative, involving neurological surgery patients. University of Washington Medical Center or a University-affiliated hospital may be selected, subject to approval of the department. (Four weeks). Prerequisite: HUBIO 563. Offered: AWSpS.

NEUR S 697 P-Neurological Surgery Special Electives (*, max. 24) *Ellenbogen* By specific arrangement, for qualified students, special clerkship, externship, or research opportunities made available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 699 P-WWAMI Neurological Surgery Special Electives (*, max. 24) *Ellenbogen* By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Neurology

RR650 University of Washington Medical Center
neurolog@uw.edu

Neurology, previously a division of the Department of Medicine, became an independent department at the University of Washington School of Medicine in autumn of 1995. The four-year residency program (including an internship) offers superb training in all facets of neurology in a setting of great institutional strength in fundamental neuroscience research. In addition, the Department of Neurology offers exceptional training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical-clerkship program provides basic training in neurology patient care. The Neurology Department is active in teaching, research, and patient care at the University of Washington Medical Center, Seattle Veterans Affairs Medical Center, Harborview Medical Center, Seattle Children's hospital, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsclat/

NEURL 495 Community Rehabilitation of the Neurologically Impaired: Internship (*, max. 5) *Fraser, Clemmons* Supervised work with a neurologically disabled vocational

rehabilitation population within a multidisciplinary vocational rehabilitation unit. Offered: AWSpS.

NEURL 499 Undergraduate Research (*, max. 25) Provides an opportunity to gain research experience and direct participation in clinical or basic science investigation in neurological topics. Offered: AWSpS.

NEURL 505 P-Preceptorship in Neurology (1, max. 12) *Kraus* Provides an opportunity for first and second-year medical students to gain personal experience with neurology practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Offered: Sp.

NEURL 536 Topics in Clinical Neurology (1) *Spain* Lectures on epilepsy, stroke, coma, drug overdose, dementia, headache, myelopathies, infectious disease. Credit/no-credit only. Offered: S.

NEURL 555 Frontiers in Neuroimmunology (1) *Moeller* Current concepts and developments in neuroimmunology. Prerequisite: either NBIO 301 or IMMUN 441. Credit/no-credit only. Offered: AWSpS.

NEURL 559 Neurobiology of Disease (3) *Garden, Neumaier, Weinstein* Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURO 559/P BIO 559.

NEURL 632 P-Introduction to Neurology - Casper, WY (8) *Kraus* Provides the medical student with a general understanding of basic clinical neurology in Casper, WY. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 633 P-Introduction to Neurology - Anchorage - Alaska Neurology Clinic (8) *Kraus* Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 634 P-Introduction to Neurology - Anchorage - ANMC (8) Provides the medical student with a general understanding of basic clinical neurology at Alaska Native Medical Center in Anchorage, Alaska. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 637 P-Introduction to Neurology-Missoula (8) Provides the medical student with a general understanding of basic clinical neurology at Montana Neurobehavioral Specialist in Missoula, MT. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 638 P-Introduction to Neurology - Great Falls (8) Provides the medical student with a general understanding of basic clinical neurology at Advanced Neurology Specialists in Great Falls, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 639 P-Introduction to Neurology - Billings Regional Neuroscience Clinic (8) Provides the medical student with a general understanding of basic clinical neurology at Neurology Associates in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 640 P-Introduction to Neurology - Billings Clinic (8) Provides the medical student with a general understanding of basic clinical neurology at Billings Clinic in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 642 P-Introduction to Neurology- St. Lukes Boise (8) *Kraus* Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-

year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 643 P-Introduction to Neurology - Dr. Lyons, Boise (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. George Lyons in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 644 P-Introduction to Neurology - Idaho Falls EINA (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Stephen Vincent in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 645 P-Introduction to Neurology - Idaho Falls Neurology (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Erich Garland in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 647 P-Introduction to Neurology - Boise St. Alphonsus (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Karin Lindholm in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 648 P-Introduction to Neurology - Coeur D' Alene (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Michael Coats in Coeur d' Alene, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 649 P-Introduction to Neurology - Tacoma St. Joseph (8) Provides the medical student with a general understanding of basic clinical neurology in Tacoma, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 650 P-Introduction to Neurology - Lacey, WA (8) Provides the medical student with a general understanding of basic clinical neurology in Lacey, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 651 P-Introduction to Neurology - Kirkland, WA (8) Provides the medical student with a general understanding of basic clinical neurology in Kirkland, WA. For third- or fourth-year students. Prerequisite: either medicine, family medicine, surgery, or pediatrics. Offered: AWSpS.

NEURL 652 P-Introduction to Neurology - Spokane Rockwood Clinic (8) Provides the medical student with a general understanding of basic clinical neurology in Spokane, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 653 P-Introduction to Neurology - Spokane CMA, WA (8) Provides the medical student with a general understanding of basic clinical neurology in Spokane, WA. For third- or fourth-year students. Prerequisite: either medicine, family medicine, surgery, or pediatrics.

NEURL 654 P-Introduction to Neurology - Dr. Greeley, Spokane (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. David Greeley in Spokane, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 655 P-Introduction to Neurology - Spokane (8) Provides the medical student with a general understanding of basic clinical neurology in Spokane, Washington. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 656 P-Introduction to Neurology - Wenatchee (8) Provides the medical student with a general understanding of basic clinical neurology at Wenatchee Valley Medical

Center in Wenatchee, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 657 P-Introduction to Neurology - Yakima (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Richard Sloop in Yakima, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 658 P-Introduction to Neurology - Olympia Neurology (8) Provides the medical student with a general understanding of basic clinical neurology at Olympia Neurology in Olympia, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 659 P-Introduction to Neurology - NW Neurology, Lakewood (8) Provides the medical student with a general understanding of basic clinical neurology at Northwest Neurology, a Franciscan Medical Group clinic, in Lakewood, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 660 P-Introduction to Neurology - Madigan (8) Provides the medical student with a general understanding of basic clinical neurology at Madigan Army Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 661 P-Introduction to Neurology - Tacoma/Puyallup Multicare (8) Provides the medical student with a general understanding of basic clinical neurology at Neurology and Neurosurgery Associates in Tacoma and Puyallup, Washington. Students spend time at both clinics. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 662 P-Introduction to Neurology - Group Health, Tacoma (8) Provides the medical student with a general understanding of basic clinical neurology at Group Health Tacoma Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 663 P-Introduction to Neurology - Group Health, Eastside (8) Provides the medical student with a general understanding of basic clinical neurology at Group Health Eastside Specialty Center in Redmond, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 664 P-Introduction to Neurology - Burien (8) Provides the medical student with a general understanding of basic clinical neurology at South Seattle Neurology Associates in Burien. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 665 P-Introduction to Neurology - UWMC (8) Kraus Provides the medical student with a general understanding of basic clinical neurology, at UWMC. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 666 P-Introduction to Neurology - HMC (8) Provides the medical student with a general understanding of basic clinical neurology at Harborview Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 667 P-Introduction to Neurology - VA (8) Provides the medical student with a general understanding of basic clinical neurology at the VA Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 668 P-Introduction to Neurology - Northwest Hospital (8) Provides the medical student with a general understanding of basic clinical neurology at Northwest Hospi-

tal in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 669 P-Introduction to Neurology - Virginia Mason (8) Provides the medical student with a general understanding of basic clinical neurology at Virginia Mason Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 670 P-Introduction to Neurology - Minor and James (8) Provides the medical student with a general understanding of basic clinical neurology at Minor and James Medical in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 671 P-Introduction to Neurology - Swedish (8) Provides the medical student with a general understanding of basic clinical neurology at Swedish Medical Center I in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 672 P-Introduction to Neurology - Group Health, Seattle (8) Provides the medical student with a general understanding of basic clinical neurology at Group Health Capitol Hill Campus in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 673 P-Introduction to Neurology - Renton, Valley Medical Center (8) Provides the medical student with a general understanding of basic clinical neurology in Renton, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics.

NEURL 681 P-Seizure Clinic Clerkship (2.5) A. Wilensky Evaluation and follow-up of patients with seizure disorders. Limited contact with inpatients. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

NEURL 685 Epilepsy and Clinical Electroencephalography (4/8, max. 8) Miller Introduction into epilepsy and the use and interpretation of the electroencephalogram and other clinical studies used to assess it, under the direct supervision of several of the faculty epileptologists and clinical neurophysiologists. Offered: AWSpS.

NEURL 686 P-Clinical Neurology (8) Swanson Clerkship including both inpatient and outpatient experiences and didactic sessions on neurological subjects. Student assigned to one of the affiliated hospitals and supervised by neurology residents and full-time staff. Offered: AWSpS.

NEURL 687 Advanced Clerkship in Child Neurology (4, max. 8) Gospe Advanced course in neurology dealing with neurological disease in children. Supervision by child neurology residents and attending. Prerequisite: NEURL 665, third- and fourth-year medical students. (Limit: one student.) Offered: AWSpS.

NEURL 697 Neurology Away Elective (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions outside the WWAMI region. Students obtain special assignment form from the dean's office at least one month prior to preregistration. Prerequisite: permission of department adviser. Offered: AWSpS.

NEURL 699 WWAMI Neurology Special Assignment Elective (4/8, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of adviser. Offered: AWSpS.

Obstetrics and Gynecology

BB667 Health Sciences Building

The Department of Obstetrics and Gynecology is involved with teaching, patient care, and research in the areas of normal and abnormal human reproduction: growth and development of the fetus, normal and complicated obstetrics, and surgical and medical diseases of the female reproductive system, including endocrinology, oncology, infectious disease, urogynecology, psychosocial problems, primary and preventive health care, and ethics.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

OB GYN 498 Undergraduate Thesis (*, max. 30) By arrangement.

OB GYN 499 Undergraduate Research (*, max. 30)

OB GYN 505 P-OB GYN Preceptorship (1, max. 12) Provides an opportunity for first- and second-year medical students to gain direct obstetrics and gynecology experience with a variety of clinical faculty members in diverse patient-care settings. Includes opportunities to observe labor and delivery, gynecologic surgery in the operating room, ambulatory obstetrics and gynecology in clinic, and family planning.

OB GYN 550 P-Voluntary Pregnancy Termination: An Overview of Medical and Social Issues (2) Prager A flexible curriculum which allows the medical student to observe in an abortion clinic, read articles and a textbook on abortion. Can be used by medical student as elective credit.

OB GYN 551 Perinatal Care Elective (1) Provide an introduction and overview of perinatal care for first- or second-year medical students with emphasis on late third trimester, labor and delivery, and postpartum. Opportunity to observe the patient-provider relationship. Optional labor and delivery observation. Offered: AWSpS.

OB GYN 579 P-Obstetric and Gynecologic Investigation (*) The investigation may cover any one of the following fields: normal and complicated pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.

OB GYN 631 P-Introduction to Obstetrics and Gynecology, NWHMC (*, max. 12) See OB GYN 665. Offered at Northwest Hospital, Seattle, WA. (Six weeks, full-time). Prerequisite: HUBIO series, 3rd year medical students.

OB GYN 632 P-Introduction to Obstetrics and Gynecology - Bellingham (*, max. 12) See OB GYN 665.

OB GYN 639 P-Introduction to Obstetrics and Gynecology, St. Alphonsus (*, max. 12) See OB GYN 665. Offered at St. Alphonsus, Boise, ID. (Six weeks, full-time). Prerequisite: HUBIO series, 3rd year medical students.

OB GYN 644 P-Introduction to Obstetrics and Gynecology - Gillette, WY (12) General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 645 P-Introduction to Obstetrics and Gynecology - Sheridan, WY (12) General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 646 Introduction to Obstetrics and Gynecology - Rock Springs, WY (12) Clerkship equivalent to OB GYN 665 offered in Rock Springs, WY. (Six weeks, full-time).

OB GYN 650 P-Introduction to Obstetrics and Gynecology - Kalispell, MT (12) General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 651 P-Introduction to Obstetrics and Gynecology - Helena, MT (12) General introductory obstetrics and gynecology clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to third- and fourth-year medical students. Prerequisite: HUBIO 565.

OB GYN 652 P-Introduction to Obstetrics and Gynecology - Bozeman, MT - Deaconess Women's Specialists (12) See OB GYN 665 for description. Located at Deaconess Women's Specialists in Bozeman, MT. (six weeks. Limit: one student).

OB GYN 653 Introduction to Obstetrics and Gynecology - Ellensburg, WA (12) Clerkship equivalent to OB GYN 665 offered in Ellensburg, WA. (Six weeks, full-time). Prerequisite: HUBIO series; 3rd Year medical students.

OB GYN 656 P-Introduction to Obstetrics and Gynecology - Wasilla (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Wasilla, AK. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 657 P-Introduction to Obstetrics and Gynecology - Lander (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Lander, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 659 P-Introduction to Obstetrics and Gynecology - Cody (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Cody, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 660 P-Introduction to Obstetrics and Gynecology - Billings, St. Vincent (*, max. 12) Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 662 P-Introduction to Obstetrics and Gynecology - Libby (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Libby, Montana. Includes experience in several private physicians' offices. Prerequisite: third-year medical student after completion of HUBIO series.

OB GYN 663 P-Introduction to Obstetrics and Gynecology - Wenatchee (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Wenatchee, WA. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 664 P-Introduction to Obstetrics and Gynecology - GH Tacoma (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Tacoma, WA. Includes experience in several private physicians' offices. (six weeks, full time) Prerequisite: HUBIO series; third-year medical student status.

OB GYN 665 P-Introduction to Obstetrics and Gynecology - UH-HMC (*, max. 12) Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. Rotations occur at UWMC and Harborview Medical Center. (Six weeks. Limit: four students). Prerequisite: HUBIO 565.

OB GYN 666 P-Introduction to Obstetrics and Gynecology - Boise (*, max. 12) Clerkship equivalent to 665 offered in Boise, Idaho (WWAMI). Includes experience in several private physician offices. (Six weeks. Limit: one student. Not offered summer quarter). Prerequisite: HUBIO 565.

OB GYN 667 P-Introduction to Obstetrics and Gynecology - Madigan (*, max. 12) Clerkship equivalent to OB GYN 665 offered at Madigan Army Medical Center, Tacoma. (Six weeks. Limit: three students). Prerequisite: HUBIO 565.

OB GYN 668 P-Introduction to Obstetrics and Gynecology - Spokane (12) Clerkship equivalent to OB GYN 665 offered in Spokane (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: two students). Prerequisite: HUBIO 565.

OB GYN 669 P-Introduction to Obstetrics and Gynecology - Swedish (12) Clerkship equivalent to OB GYN 665 offered at Swedish Hospital Medical Center. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 670 P-Introduction to Obstetrics and Gynecology - GH-Central (12) Clerkship equivalent to OB GYN 665 offered at the Central facility of Group Health Cooperative of Puget Sound in Seattle. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: two students). Prerequisite: HUBIO 565.

OB GYN 671 P-Introduction to Obstetrics and Gynecology - Anchorage (12) Clerkship equivalent to OB GYN 665 offered at Anchorage, Alaska (WWAMI). Includes experience in several private physicians' offices as well as Providence Hospital. (Six weeks. Limit: four students). Prerequisite: HUBIO 565.

OB GYN 672 P-Introduction to Obstetrics and Gynecology - GH-East (12) Clerkship equivalent to OB GYN 665 offered at the Eastside facility of Group Health Cooperative of Puget Sound in Redmond. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 676 P-Introduction to Obstetrics and Gynecology - Missoula (12) Clerkship equivalent to OB GYN 665 offered in Missoula, Montana. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 677 P-Introduction to Obstetrics and Gynecology - Rock Springs (12) Equivalent of OB GYN 665, offered in Rock Springs, Wyoming. Student rotates among outpatient clinic, labor and delivery, operating suites, and medical/surgical inpatient areas. (Limit: two students.) Offered: AS.

OB GYN 678 P-Introduction to Obstetrics and Gynecology - Billings (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Spokane (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 679 P-Introduction to Obstetrics and Gynecology - Cheyenne (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Cheyenne, WY. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 681 P-Gynecological Oncology Subspecialty (8) Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Limit: two students each four weeks). Prerequisite: basic OB GYN clerkship.

OB GYN 682 P-Antenatal High-Risk Obstetrics (8) Four weeks on high-risk antenatal obstetrics ward and clinic. Students responsible for initial workups, daily laboratory evaluations, continuing care of high-risk antepartum patients. Weekly conference with obstetrics attending; presentation of one or more topics per rotation. Excellent

coordination with resident and attending staff required to maintain patient-care continuity. (Limit: two students each four weeks).

OB GYN 683 P-Gynecological Oncology Subspecialty - Boise (8) Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Four weeks). Prerequisite: basic OB GYN clerkship.

OB GYN 685 P-Subspecialty Gynecology - UWMC (8) Explores specialty areas in gynecology including: urogynecology, family planning, adolescent gynecology, and reproductive endocrinology and infertility. Students see and evaluate patients in both the outpatient and inpatient setting, follow patients to the operating room and fully participate in their hospital care, and consult on inpatients and emergency room visits. Exposes interested students to the breadth and depth of benign gynecologic subspecialty areas, the faculty and resident of the University of Washington, and the OB GYN resident program (Limit: one student every four weeks).

OB GYN 686 P-Introduction to Obstetrics and Gynecology - Yakima (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Yakima (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 687 P-Introduction to Obstetrics and Gynecology - Fairbanks (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Fairbanks, AK. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 689 P-Introduction to Obstetrics and Gynecology - Havre (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Havre, MT. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 690 P-Introduction to Obstetrics and Gynecology - Sandpoint (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Sandpoint, ID. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 691 P-Introduction to Obstetrics and Gynecology - Tacoma (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Tacoma. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 692 P-Introduction to Obstetrics and Gynecology - Bozeman, MT - Bozeman OB/GYN (*, max. 12) Clerkship equivalent to OB GYN 665 offered Bozeman, MT. Includes experience in several private physician offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 693 P-Introduction to Obstetrics and Gynecology - Valley Medical Center (*, max. 12) Clerkship equivalent to OB GYN 665 offered at Valley Medical Center. Includes experience in several private physicians' offices. (Six weeks. Limit one student). Prerequisite: HUBIO 565.

OB GYN 695 P-Introduction to Obstetrics and Gynecology - Tri Cities (*, max. 12) Clerkship equivalent to OB GYN 665 offered in the Tri Cities. Includes experience in several private physicians' offices. (Six weeks. Limit one student). Prerequisite: HUBIO 565.

OB GYN 697 P-Obstetrics and Gynecology Special Electives (*, max. 24) By arrangement, for qualified students, special clerkship or research opportunities are sometimes made available at other institutions. Prospective students obtain special assignment form one month before preregistration. Department evaluates student performance. Prerequisite: permission of department.

OB GYN 699 P-WWAMI Obstetrics and Gynecology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be avail-

able at institutions other than the University of Washington located inside the WWAMI region. A special assignment form must be obtained one month in advance of preregistration. Prerequisite: permission of department.

Ophthalmology

RR801 University of Washington Medical Center

The Department of Ophthalmology is responsible for the instructional and research programs in diseases of the eye and visual system and its adnexae.

Medical-student instruction is provided, including multiple electives in the clinical years. Graduate physicians are provided with three years of residency training at the affiliated hospitals. An optional internship is available in ophthalmology. A two-year ophthalmic plastics and orbit fellowship, and a two-year surgical retina fellowship, are offered. Patient care is provided under the supervision of full- and part-time faculty physicians at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Medical Center, and Seattle Children's hospital.

Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/physiology of the orbit. Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact Ingrid Noe at ingrid@uw.edu. For more information on medical student clerkships, contact Dorrie Quirante at dorieq@uw.edu.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

OPHTH 498 Undergraduate Thesis (*, max. 25) *Francis* Thesis-based research in vision and ophthalmology. Elective. Offered: AWSpS.

OPHTH 499 Undergraduate Research (*, max. 25) *Francis* Laboratory or clinical research in morphology, biochemistry, immunology, experimental pathology, or clinical studies of the eye and visual system. Offered: AWSpS.

OPHTH 501 P-Ophthalmology Preceptorship (1, max. 12) *Francis* Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Student observes activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- and second-year medical student standing and permission of instructor. Offered: AWSpS.

OPHTH 681 P-Ophthalmology Clerkship - HMC/Eye Institute (4/8, max. 12) Students gain experience in the diagnosis and treatment of common ocular disorders. Basic examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 683 P-Pediatric Ophthalmology Clerkship - Seattle Children's (4) Student examines and observes treatment of children with ocular diseases and learns to differentiate trivial from potentially blinding disorders. Furnishes programmed text in general ophthalmology. Prerequisite: completion of human biology series. Offered: WS.

OPHTH 685 P-Ophthalmology Clerkship - VAPSHCS (4) Participation in diagnosis and treatment of medical and surgical ocular disease. Outpatient examinations, inpatient surgery, as well as neuro-ophthalmologic, retinal, and glau-

coma consultations. Basic techniques involved in tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 686 P-Ophthalmology Clerkship - GHC Puget Sound (4) Diagnosis and treatment of ocular disease in outpatients. Weekly assignments to Group Health ophthalmologist responsible for the care of walk-in and urgent patients, demonstrating findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 688 P-Ophthalmology Clerkship - Anchorage (8) Four-week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slit-lamp biomicroscopy, tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisite: completion of human biology series, MED 665, and SURG 665; fourth-year medical students only. Offered: AWSpS.

OPHTH 689 P-Ophthalmology Clerkship - Spokane (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 690 P-Ophthalmology Clerkship - Missoula (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 691 P-Ophthalmology Clerkship - Nampa (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, neuro-ophthalmology, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 697 P-Ophthalmology Special Electives (*, max. 24) *Francis* By specific arrangement, for qualified students, special clerkship, externship, or research opportunities are at times made available at institutions or clinics other than the UW. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

OPHTH 699 P-WWAMI Ophthalmology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

Orthopaedics

BB1043 University of Washington Medical Center

The Department of Orthopaedics is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the Master of Science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

ORTHP 498 Undergraduate Thesis (*, max. 30) *Eyre* Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the area of orthopaedics, and develops a thesis for recognition. Offered: AWSpS.

ORTHP 499 Undergraduate Research (*, max. 90) *Eyre* Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Offered: AWSpS.

ORTHP 505 P-Preceptorship in Orthopaedic Surgery (1, max. 12) Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community. Students observe general aspects of private practice from a longitudinal perspective. Prerequisite: permission of department. Offered: AWSpS.

ORTHP 585 P-Sports Medicine (2) *O' Kane* Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes nutritional concerns, biomechanics of certain sports injuries, and cardiovascular, pulmonary, and musculoskeletal concerns. Prerequisite: second-year medical student standing. Offered: Sp.

ORTHP 643 P-General Orthopedic Clerkship - Cody, WY (8) Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students.

ORTHP 644 P-General Orthopaedic Clerkship - Jackson (*, max. 8) *Khoury* Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three a year. Offered: AWSpS.

ORTHP 650 P-General Orthopaedic Clerkship - Billings (*, max. 8) *Shenton* Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three a year. Offered: AWSpS.

ORTHP 655 P-General Orthopaedic Clerkship - Boise (*, max. 8) *Scheffel* Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternative in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students.

ORTHP 668 P-Pediatric Orthopaedics - Spokane (*, max. 8) *Caskey* Acquaints students with all aspects of musculoskeletal problems in childhood. Includes didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Shriners Hospital for Children in Spokane. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Offered: AWSpS.

ORTHP 669 P-General Orthopaedic Clerkship - Spokane (*, max. 8) *Scott* Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students. Offered: AWSpS.

ORTHP 675 P-Preceptorship in Orthopaedics (*, max. 4) Student spends full time with the preceptor during all his or her working day in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private ortho-

paediatric practice. (Two weeks, full-time). Prerequisite: SURG 665 or HUBIO 553 and permission of department. Offered: AWSpS.

ORTHP 676 P-Pediatric Orthopaedics - Seattle Children's (*, max. 8) *Burton, Dales, Jingui, Kregel, Lindberg, Mosca, Schmale, Steinman, White* Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Seattle Children's Hospital, and correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Offered: AWSpS.

ORTHP 677 P-Musculoskeletal Trauma (*, max. 8) *Barei, Beingessner, Bellabarba, Bransford, Dunbar, Firoozabadi, Henley, Kleweno, Nork, Taitsman* Harborview Medical Center. Emergency room, wards, operating room, and outpatient clinics. Instruction in general and special clinics, including hand, hip, foot, and fracture, with emphasis placed on physical examination of the patient. Students take correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665, HUBIO 553. Offered: AWSpS.

ORTHP 678 P-Musculoskeletal Oncology (8/12) *Conrad, Davidson* In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, staging, treatment, and postoperative follow-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Offered: AWSpS.

ORTHP 680 P-General Orthopaedic Clerkship - VAMC (*, max. 8) *Chansky* Veterans' Administration Hospital: structured to provide a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.

ORTHP 681 P-Sports Medicine Orthopaedic Clerkship (8) *Green, Larson, O' Kane, Twaddle* Orthopaedic subspecialty clerkship at University of Washington Medical Center. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care. Students work primarily in one subspecialty area and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.

ORTHP 682 P-Outpatient Orthopaedics (8) *Conrad, Davidson, Manner, Matsen, Wagner, Warme* Outpatient orthopaedic experience at University of Washington Medical Center. Emphasis on physical exam, diagnosis, radiographic evaluation, and non-operative treatment. Rotation through general orthopaedics as well as all subspecialty areas. For students who plan careers in primary care. Prerequisite: completion of HUBIO series. Offered: AWSpS.

ORTHP 684 P-Disorders of the Spine (8) *Wagner* Evaluation and assessment strategies of spinal disorders for patients of all ages and a wide variety of clinical conditions including trauma, deformity, degenerative disorders, metabolic, and inflammatory diagnoses. Opportunities exist to participate in outpatient, surgical, and conference based teaching sessions aimed at all experience levels and individualized for practitioners with interest in medical specialties, emergent care, radiology, physiatry, intervention pain management, and surgical specialties. Offered: AWSpS.

ORTHP 685 P-Adult Reconstruction: Total Joint Service (8) *Manner* Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Students work with faculty in the Total Joint Service which specializes in lower extremity adult reconstructive surgery, including: complex primary hip/knee arthroplasty; less invasive approaches to hip/knee arthroplasty; revision hip/knee arthroplasty; periacetabular and proximal femoral osteotomy; osteotomy about the knee; and hip arthroscope. Offered: AWSpS.

ORTHP 687 P-Shoulder and Elbow (8) *Matsen, Warme* Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with the faculty in the Shoulder and Elbow Service, which provides comprehensive evaluation and management for a wide range of shoulder and elbow problems, including: arthritis, dislocation or instability, fractures, rotator cuff/tendon tears, joint stiffness, and unsuccessful previous surgery. Offered: AWSpS.

ORTHP 697 P-Orthopaedic External Elective (*, max. 24) Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities or at large orthopaedic institutes. Prerequisite: HUBIO 553 and permission of department. Offered: AWSpS.

ORTHP 699 P-WWAMI Orthopedics Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Otolaryngology — Head and Neck Surgery

BB1165 University of Washington Medical Center

The Department of Otolaryngology - Head and Neck Surgery provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major portion of departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsat/

OTOHN 498 Undergraduate Thesis (*, max. 35) *Rubel, Futran* Student works directly with department faculty in selecting a suitable area for laboratory or clinical research in the area of otolaryngology, and develops a thesis for recognition. Offered: AWSpS.

OTOHN 499 Undergraduate Research (*, max. 35) *Rubel, Futran* Research opportunities offered under direction in the area of otolaryngology. (Twelve weeks.) Offered: AWSpS.

OTOHN 501 P-Preceptorship in Otolaryngology - Head and Neck Surgery (1, max. 12) *Hillel* One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at the University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: OTOHNS office. Offered: AWSpS.

OTOHN 678 P-Otolaryngology - Head and Neck Surgery Clerkship - Cheyenne (4/8, max. 24) *Futran* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 679 P-Otolaryngology - Head and Neck Surgery Clerkship - Missoula (4/8, max. 24) *Futran, Hillel, Man-*

ning, Whipple Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 680 P-Otolaryngology - Head and Neck Surgery Clerkship - UWMC (4/8, max. 24) *Futran* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Rotation at UWMC. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 681 P-Otolaryngology - Head and Neck Surgery Clerkship - HMC (4/8, max. 24) *Whipple* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 682 P-Otolaryngology - Head and Neck Surgery Clerkship - VA (4/8, max. 24) *Coltrera* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 683 P-Otolaryngology - Head and Neck Surgery Clerkship - Madigan (*, max. 8) Individual externship training at an outpatient clinic, where visits average twelve hundred per month, supplemented by inpatient assignments. Students may reside at the hospital during externship, using facilities of bachelor officer quarters and hospital mess. (Two or four weeks, full-time). Prerequisite: completion of human biology series. Offered: AWSpS.

OTOHN 684 P-Otolaryngology - Head and Neck Surgery Clerkship - Seattle Children's (4/8, max. 24) *Manning* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 685 P-Otolaryngology - Head and Neck Surgery Clerkship - Boise (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 686 P-Otolaryngology - Head and Neck Surgery Clerkship - Greater Seattle Private Practice (4) *Hillel* Provides exposure to all aspects of patient care through a private practice setting. The student is exposed to the outpatient clinic and operating room procedures with daily directed contact with one attending faculty member. Contact administrator to arrange rotation. Prerequisite: permission of course director. Offered: AWSpS.

OTOHN 687 P-Otolaryngology - Head and Neck Surgery Clerkship - Spokane (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 688 P-Otolaryngology - Head and Neck Surgery Clerkship - Anchorage (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series. Offered: AWSpS.

OTOHN 697 P-Otolaryngology - Head and Neck Surgery - Away Externship (*, max. 8) Fultran By specific arrangement. Special clerkship, externship, or research opportunities are at times made available at institutions other than the University of Washington. Prospective students obtain a special assignment form from the dean's office at least one month before preregistration. Prerequisite: permission of clerkship director. Offered: AWSpS.

OTOHN 699 P-Otolaryngology - Head and Neck Surgery Clerkship - WWAMI (4/8, max. 8) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

Pathology

C516 Health Sciences

Pathology is the study of disease; its causes, mechanisms, and effects on the body. Pathology is both a basic biological science and a specialty of medicine. As a medical specialty, practiced by MDs, it includes the laboratory evaluation of organs, tissues, and fluids to assist other physicians in reaching a diagnosis. As a basic science, practiced by PhDs, pathology focuses on the experimental investigation of the molecular processes of disease, using techniques of cell and organ culture, biochemistry, molecular biology, and genetics.

The Department of Pathology offers graduate training in experimental pathology, with an emphasis on the cellular and molecular biological basis of disease, leading to the Doctor of Philosophy degree in cellular and molecular pathology. The primary goal of the graduate program is to train individuals for careers as practicing scientists in biomedical research, investigating basic disease mechanisms. Emphasis is on development of skills in hypothesis generation and testing, including the design, accomplishment, and critical interpretation of experiments. Experimental pathology uses the full range of biomedical research techniques (including biochemistry, molecular biology, cell biology, animal modeling) to attempt to elucidate the mechanisms underlying human disease. Graduates of the program usually continue research careers at biotechnology companies or universities/research institutes.

GRADUATE PROGRAM

Graduate Program Adviser

C516 Health Sciences, Box 357470

(206) 616-7551

Doctor of Philosophy

Admission Requirements

1. Copy of the Graduate School Application
2. Official transcripts
3. Official GRE scores. The department also recommends that applicants take the Subject Test in Biology or related area.
4. Statement of purpose and research interests
5. Three or more letters of recommendation
6. Personal statement that addresses the relationship between personal background and aspirations

Special Requirements

Prospective candidates should have taken undergraduate courses in the sciences, and have acceptable scores on the Graduate Record Examination, including advanced biology or chemistry. Some experience in a research laboratory

is strongly recommended. Those wishing to matriculate toward both the MD and PhD degrees must gain admission to both the Graduate School and the School of Medicine.

Degree Requirements

90 credits, to include:

1. *Required Coursework*: PATH 500, PATH 501, PATH 507, PATH 512, PATH 513, PATH 515, PATH 516, PATH 551; BIOST 511; CONJ 538, CONJ 539
2. *Research before the General Examination*: PATH 600
3. *Research after the General Examination*: PATH 800
4. *Recommended Courses*: CONJ 531, CONJ 532
5. General examination
6. Dissertation
7. Final examination

Financial Aid

Funding for students is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

Research Facilities

The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of disease in mammalian species. Special facilities exist for training in electron microscopy; cell, tissue, and organ culture; recombinant DNA techniques; histochemistry and cytochemistry; analytical biochemistry; immunology; and molecular and cell biology.

Residency Training Program

The department supervises a residency-training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Subspecialty training is also available through clinical fellowships. Persons who complete the residency program are eligible for certification by the American Board of Pathology. For additional information, contact the Resident Program Director, Department of Pathology, Box 356100, or visit the residency program website.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

PATH 498 Undergraduate Thesis (*, max. 35) Elective.

PATH 499 Undergraduate Research (*, max. 35) Elective.

PATH 501 Pathology Proseminars (1, max. 9) Small group discussions and presentations by students based on critical reading of original papers, or on concurrent seminars, in many areas of experimental pathology and medicine. Topic varies by quarter. Prerequisite: permission of instructor. Offered: AWSpS.

PATH 502 Inflammation and Repair (2) Lecture-seminar; a seminar course dealing with an in-depth examination of the processes involved in inflammation and repair. Prerequisite: permission of instructor. Credit/no-credit only. Offered: even years.

PATH 507 Introduction to Pathology Research (2) Current developments and approaches to investigation of the molecular and cellular basis of disease. Members of the Pathology faculty present and discuss their own research projects. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

PATH 510 Introduction to Pathology Methods (3) Laboratory course designed to introduce graduate students to the fundamentals of image analysis, histology, histopathol-

ogy, post mortem evaluation, surgical pathology, and other methods used to investigate disease etiology, progression, and manifestation in humans and in animal models. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

PATH 511 Topics in Experimental Pathology (1-2, max. 10) Focus on areas of research relevant to experimental pathology. Prerequisite: permission of instructor. Offered: AWSpS.

PATH 512 Molecular Basis of Disease: Death and Repair (1.5) First in a series designed to introduce students to medically important diseases and physiologic processes and experimental approaches to elucidating the cellular processes underlying these diseases. Covers basic cell/tissue processes that underlie normal homeostasis and most disease and, including apoptosis, necrosis, stem cells, inflammation, granulation tissue, tissue regeneration, repair and fibrosis.

PATH 513 Mechanisms of Neurodegeneration (1.5) Introduction to the cellular and molecular mechanisms that underlie neurodegenerative diseases, including introduction to the normal development and anatomy of the central nervous system, a review of epidemiologic, genetic, and clinical research tools used in the investigation of these diseases, and a systematic review of the major neurodegenerative diseases.

PATH 516 Molecular Basis of Human Genetic Disease (3) Introduces the underlying mechanisms in human genetic disorders, ranging from the single nucleotide, through genomic instability, and chromosomal rearrangements. Includes tissue and organ specific examples of the manner in which these disorders provide insights into human biology. Offered: Sp.

PATH 517 The Biology and Pathology of Aging (3/4) M. KAEBERLEIN Surveys the biology and pathologies of the aging phenomena in multiple species and at multiple organismal levels from whole animals to molecules. Prerequisite: coursework in biology, biochemistry, molecular biology, and genetics. Offered: Sp.

PATH 520 Experimental Pathology Seminar (1) Review of current research in various areas of experimental pathology by members of the department and visiting scientists. Credit/no-credit only. Offered: AWSp.

PATH 521 Anatomy and Autopsy (1) Fligner Students view an autopsy, and learn how autopsy can diagnose disease, determine cause of death, and improve patient care. Requirements include orientation session, autopsy, and a clinical-autopsy conference. Participants must be free at least one morning per week to attend an autopsy at UWMC. Prerequisite: UW medical students only. Offered: WSp.

PATH 522 Hematopathology Seminar (2) Wood Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with LAB M 522; W, even years.

PATH 530 Human Cytogenetics (*, max. 4) Disteche Sources and methods of preparation and identification of human chromosomes. Molecular structure and mapping of chromosomes. Human cytogenetic pathology: karyotype-phenotype interactions, chromosome breakage, and cancer cytogenetics. Prerequisite: permission of instructor. Offered: Sp.

PATH 535 Innate Immunity and Immunopathology (1.5) I. CRISPE, K. SMITH Explores the relationship between the innate immune system and disease processes, using a student-led seminar format. Students analyze, present, and critique primary research literature, and use the knowledge gained to develop a sophisticated insight into the mechanisms of immunopathology. Offered: Sp.

PATH 540 Translational Research Topics (1) Horwitz First and second year students in the M.D./Ph.D. program pres-

ent and discuss current papers from the biomedical literature in journal club format, and describe their own research in seminar format. Credit/no-credit only. Offered: AWSp.

PATH 544 General and Systemic Pathology ([2-3]-, max. 5) W. MAHONEY Basic pathologic processes that underlie disease, including cell alterations, genetic and developmental pathology, environmental pathology, neoplasia, immunopathology, inflammation, infection, and systemic diseases. Correlates gross, functional, and biochemical alterations. For first-year dental students and graduate students. Requires reasonable grounding in biological and chemical sciences. Prerequisite for nondental students: permission of instructor.

PATH 550 Mechanisms of Disease (3) Conrad-Liles, Rendi Examines the mechanisms of inflammation, cell injury, death, repair, immunity, and neoplasia as well as diseases of various organ systems. Systems covered include the cardiovascular, pulmonary, gastrointestinal, neurologic, endocrine, and genitourinary/renal systems. Topics presented through lecture, primary literature, and small-group discussion. Offered: A.

PATH 551 Experimental and Molecular Pathology (2-5, max. 20) Introduction to experimental pathology. A tutorial course designed to introduce a graduate student (medical, dental) or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: Pathology PhD student; permission of instructor. Credit/no-credit only. Offered: AWSp.

PATH 555 Environmental Pathology (3) Monnat Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisite: PATH 410 or PATH 444 or HUBIO 520. Offered: Sp, even years.

PATH 560 Molecular Analysis of Human Disease (*, max. 10) Review and discussion of contemporary research on molecular basis of human disease. Focus on mutational mechanisms, genetic instability, AIDS, and cancer. Students participate in weekly group discussion and work with faculty to select, develop, and present discussion topic. Prerequisite: medical, graduate, or professional standing and permission of instructor. Credit/no-credit only. Offered: AWSp.

PATH 580 Mitochondria and Metabolism in the Pathogenesis of Human Disease (1.5) Hawkins, Tian Explores the fundamentals of mitochondrial biology, bioenergetics, and cellular metabolism. Includes topical lectures and literature reviews introducing students to advanced metabolic concepts within the context of human disease. Offered: A.

PATH 590 Patient-Centered Translational Research (1) Horwitz MSTP students preparing to return to clerkships are partnered with a senior MD/PhD medical student or house officer, preview the medical or surgical ward team environment, select a patient-focused translation research topic based on their clinical experience, and prepare a plan for refreshing introductory clinical skills. Offered: WSp.

PATH 600 Independent Study or Research (*-) Prerequisite: Pathology PhD student. Credit/no-credit only. Offered: AWSp.

PATH 667 P-Renal Pathology Laboratory (*, max. 6) Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students earn 1 credit for one-hour seminar per week. May be taken concurrently with MED 693. Prerequisite: permission of instructor.

PATH 676 P-Diagnostic Pathology Clerkship - Spokane (8, max. 24) Medical student participation in dissection and study of autopsy and surgical pathology cases at Sacred Heart Medical Center in Spokane. Can be taken for either two or four weeks.

PATH 677 P-Neuropathology Clerkship - HMC (*, max. 16) Includes participation in dissection and study of neuropathology cases. Students work up cases under senior staff including dissection, microscopic examination, and literature review.

PATH 678 P-Diagnostic Pathology Clerkship - Medical Examiner's Office, Alaska (*, max. 24) Medical student participation in dissection and study of autopsy and forensic pathology cases at the Anchorage Medical Examiner's Office.

PATH 680 P-Diagnostic Pathology Clerkship - University of Washington Medical Center (*, max. 24) Swanson Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year medical student standing.

PATH 681 P-Diagnostic Pathology Clerkship - Harborview Medical Center (*, max. 24)

PATH 682 P-Diagnostic Pathology Clerkship - Veterans' Administration Hospital (*, max. 24)

PATH 683 P-Diagnostic Pathology Clerkship - Medical Examiner's Office (*, max. 24) Raven

PATH 687 P-Diagnostic Pathology Clerkship - Seattle Children's Hospital (*, max. 24)

PATH 688 P-Diagnostic Pathology Clerkship - Madigan Army Medical Center (*, max. 24)

PATH 690 P-Diagnostic Pathology Clerkship - Northwest Medical Center (*, max. 24)

PATH 691 P-Diagnostic Pathology Clerkship - General Hospital of Everett (*, max. 24)

PATH 697 P-Pathology Special Electives (*, max. 24) By specific arrangement, students have clerkships, externships, or research opportunities at institutions other than the University of Washington. Prospective students obtain special assignment forms from the dean's office at least one month before advance registration. Prerequisite: permission of instructor.

PATH 699 P-WWAMI Pathology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

PATH 700 Master's Thesis (*-)

PATH 800 Doctoral Dissertation (*-) Prerequisite: Pathology PhD student. Offered: AWSp.

Pediatrics

RR314 Health Sciences

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 20 electives, in addition to the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives as well as the traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Seattle Children's hospital, University of Washington Medical Center, and Harborview Medical Center.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsclat/

PEDS 498 Undergraduate Thesis (*, max. 35) For medical students. Offered: AWSp.

PEDS 499 Undergraduate Research (*, max. 35) Participation in various clinical or basic research programs in progress, specifically: child development, developmental biology, human embryology and teratology, medical genetics, infectious diseases, neonatology, neuroembryology, cardiology, endocrinology and metabolism, immunology, respiratory disease. Offered: AWSp.

PEDS 505 P-Preceptorship in Pediatrics (1, max. 12) To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatricians by being stationed with carefully selected clinical faculty members in their offices. Enrollment limited. Coordinator: Department of Pediatrics. Credit/no-credit only. Offered: AWSp.

PEDS 530 P-Homeless Youth and Their Medical Care (1) Seminar and interview practice; students learn how to deal with special health problems and other related problems of "street kids" through interviews and observations. Credit/no-credit only. Offered: W.

PEDS 611 P-Country Doctor Free Teen Clinic (*, max. 24) Participation in a free clinic for out-of-home youth, either Monday or Tuesday evenings. Clinical services include general medical care, with a focus on reproductive health, STD evaluations/treatment, and the impact of a homeless lifestyle on general health. (Limit per rotation: two students.) Offered: AWSp.

PEDS 622 P-Pediatric Child Abuse and Neglect - Boise (4/8, max. 24) Exposes future clinicians to the most common issues relating to child abuse and neglect. Prerequisite: fourth-year medical students; core pediatrics rotation. (Limit: one student; by departmental permission). Offered: AWSp.

PEDS 623 P-Pediatrics Child Abuse - Spokane, WA (4-8, max. 8) Exposes future clinicians to the most common issues relating to child abuse and neglect. (Limit: one student). Prerequisite: fourth-year medical students who have completed their core pediatrics rotation; permission of department. Offered: AWSp.

PEDS 624 Pediatric Emergency Medicine - Spokane (8) Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: PEDS core clerkship; by departmental permission. Offered: AWSp.

PEDS 625 Pediatric Emergency Medicine (8) Elective in Pediatric Emergency Department at Seattle Children's Hospital. Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: fourth- year medical students. Offered: AWSp.

PEDS 630 P-WRITE Pediatrics Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: PEDS 665, inpatient only; acceptance in the WRITE program.

PEDS 631 P-LIC Pediatrics Clinical Clerkship (12) Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: acceptance into LIC program.

PEDS 635 P-Pediatric Cardiology - Boise, ID (*, max. 24) Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with

cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student; by departmental permission). Offered: AWSpS.

PEDS 636 P-Pediatric Cardiology - Spokane (*, max. 24) Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 637 P-Pediatric Cardiology - Anchorage (*, max. 24) Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 640 P-Pediatric Gastroenterology - Boise (4/8, max. 24) Elective rotation where students see clinical pediatric gastrointestinal problems, participate in inpatient gastroenterology consultations, outpatient clinic evaluations for new and follow-up patients, and (observe) endoscopic and therapeutic gastrointestinal procedures. (Limit: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 648 Pediatric General Clerkship - Everett, WA (12) General introductory pediatric clerkship. One half in hospital setting; one half in outpatient department, clinic, or private office. Open to all third- and fourth-year students. (Six weeks, full-time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 649 P-Pediatric General Clerkship - Centralia/Olympia, WA (12) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 650 P-Pediatric General Clerkship - Moses Lake, WA (12) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 651 P-Pediatric General Clerkship - Bozeman, MT (12, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 652 P-Pediatric General Clerkship - Idaho Falls, ID (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 653 P-Pediatric General Clerkship - Helena, MT (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in Helena, MT.

PEDS 655 P-Pediatric General Clerkship - Jackson, WY (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities, including access to a community hospital with nursery, pediatric beds, and physician-staffed emergency room. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 656 P-Pediatric General Clerkship - Wenatchee (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 657 P-Pediatric General Clerkship - Missoula (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at Community Medical Center. (Six weeks, full time. Limit per rotation: one or two students.) Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 658 P-Pediatric General Clerkship - Boise (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at St. Luke's Medical Center. (Six weeks, full time. Limit per rotation: one or two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 659 Pediatric General Clerkship - Billings, MT (*, max. 24) General introductory inpatient and outpatient pediatric clerkship. Exposes students to diverse settings where children receive health services. The six-week experience takes place primarily in two active pediatric group practices with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit: per rotation: one student.) Offered: AWSpS.

PEDS 660 Pediatric General Clerkship - Cheyenne, WY (*, max. 24) Introductory inpatient and outpatient pediatric clerkship that exposes students to environments in settings where children receive medical and health services. The six-week experience takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 661 P-Pediatric General Clerkship - Anchorage (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 663 P-Pediatric General Clerkship - Mary Bridge (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three or four students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 664 P-Pediatric General Clerkship - Pocatello, ID (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 665 P-Pediatric General Clerkship - Seattle (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: ten students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 666 P-Pediatric General Clerkship - Great Falls, MT (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 667 P-Pediatric General Clerkship - Madigan (*, max. 24) General introductory pediatric clerkship. One-

half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 668 P-Pediatric General Clerkship - Spokane (*, max. 24) General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two or three students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 669 P-Neonatal Pediatrics - Clerkship (*, max. 24) Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. (Limit per rotation: one or two students). Prerequisite: PEDS and OB GYN core clerkships. Offered: AWSpS.

PEDS 670 P-Pediatric Infectious Diseases (*, max. 24) Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; fourth-year medical student standing. Offered: AWSpS.

PEDS 671 Pediatric Endocrinology (*, max. 24) Focuses on the evaluation of the normal progression of hormone mediated processes in children and the recognition, diagnosis, and management of a variety of endocrine problems. Includes participation in clinics, inpatient endocrine rounds, and a variety of conferences at Seattle Children's Hospital. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 672 P-Office Practice - Spokane (*, max. 12) Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 673 P-Office Practice (*, max. 12) Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 674 P-Pediatric Genetics - Spokane (*, max. 24) Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Two or four weeks. Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 675 P-Clinical Elective in Complementary and Alternative Medicine (4/8, max. 8) Clinical elective for students interested in a better understanding of CAM. Students arrange different clinical placements with selected CAM providers in the community: naturopathic physician, chiropractor, acupuncturist, and massage therapist. Students are expected to arrange their own schedule and must be prepared to do so at least four weeks in advance of the start of the rotation. (Limit per rotation: one or two students). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 677 P-Pediatric Intensive Care (8) Students manage patients with the supervision of the Pediatric Critical Care attending or fellow at Seattle Children's Hospital. Includes the opportunity to manage patients with complex multisystem disease and learn key elements of acute resuscitation in the intensive-care setting. (Limit per rotation: one

student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 678 P-Pediatric Infectious Diseases - Boise (*, max. 24) Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; third- or fourth-year medical student standing; departmental permission. Offered: AWSpS.

PEDS 679 P-Clinical Problems in Developmental Disabilities (*, max. 12) Experience in multidisciplinary evaluation and management of the handicapped child. Student performs pediatric evaluations, obtains appropriate consultations, observes additional professional assessments (e.g., psychological testing), and plans rehabilitation program. Opportunity to provide parent counseling. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 681 P-Medical Genetics (*, max. 24) Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 683 P-Pediatric Nephrology (8) Four-week elective clerkship at Seattle Children's Hospital. Students participate in nephrology and transplant rounds, consult with renal fellows and attendings, and work up patients in renal clinics. Participation in seminars; special course in fluid balance. (Limit per rotation: one student). Prerequisite: third- or fourth-year medical student; PEDS and MED core clerkships; departmental permission. Offered: AWSpS.

PEDS 684 P-Pediatric Pulmonary Medicine (8) Respiratory disorders, diagnostic techniques, and treatments unique to children in the inpatient, intensive care, and outpatient settings. Application of principles of pulmonary physiology to clinical problems. Students conduct consultations under the supervision of the attending and present a topic of choice. Inpatient rounds and clinics. (Limit per rotation: one student). Prerequisite: PEDS core clerkship, fourth-year medical student standing. Offered: AWSpS.

PEDS 685 P-Pediatric Hematology and Oncology (*, max. 24) One-on-one teaching plus four weekly didactic sessions. Specific training in techniques and interpretation of bone marrow aspirations, intravenous chemotherapy, transfusions, and laboratory techniques of hematologic evaluation. Self-learning programs available. (Two or four weeks, full-time. Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 686 P-Pediatric Cardiology (*, max. 24) Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 689 P-Advanced Rural Pediatrics - Ft. Washakie, WY (8) Student functions at the sub-intern level to care for patients with acute pediatric illness, proved well child care, and provide follow up care to patients seen in the newborn nursery, Level II Neonatal ICU, hospitalizations, and previous clinic visits. Students interested should make arrangements well in advance of registration. Prerequisite: required clerkship in Pediatrics, Obstetrics and Gynecology, Internal Medicine, and Surgery.

PEDS 690 P-Advanced Pediatric Clerkship - Boise (*, max. 24) Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis,

and care at St. Lukes Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 691 P-Advanced Pediatric Clerkship - Seattle (*, max. 24) Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care as Seattle Children's. (Limit per rotation: three students). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 692 P-Advanced Pediatric Clerkship - Spokane (*, max. 24) Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at Sacred Heart Children's Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

PEDS 693 P-Advanced Pediatric Subinternship - Mary Bridge (*, max. 24) Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. (Limit per rotation: one student). Prerequisite: Core Clerkship in PEDS, OB/GYN, I-Med, Surgery; departmental permission.

PEDS 694 P-Pediatric Adolescent Medicine (8) Elective in Adolescent Medicine at Seattle Children's Hospital. Open to 4th year medical students who have completed their Core pediatrics Rotation. Students will be expected to manage patients with the supervision of attending physicians. Students will have the opportunity to manage adolescent patients in the outpatient setting and learn key elements of subspecialty care of adolescents.

PEDS 697 P-Pediatric Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship externship or research opportunities at institutions other than University of Washington. The faculty can advise of possible opportunities. Obtain special assignment form from the Department of Pediatrics at least one month before preregistration. Prerequisite: permission of department and the away site. Offered: AWSpS.

PEDS 698 Pediatric Advanced Therapeutics/Pediatric Boot Camp (4) Focuses on what is needed on day one of internship to care for children through hands-on experience, simulation, group problem solving, role-playing, didactics, and supplemental reading material. Emphasizes the acquisition and practice of core skills. Themes include communication, procedural competency, and medical decision making pertinent to both inpatient and outpatient pediatrics. (Two weeks.) Prerequisite: Prerequisite: fourth-year standing; departmental approval. Offered: Sp.

PEDS 699 P-WWAMI Pediatrics Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be within the WWAMI region. Prerequisite: permission of department and the away site. Offered: AWSpS.

Pharmacology

E401 Health Sciences

Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

GRADUATE PROGRAM

Graduate Program Coordinator

E-417 Health Sciences, Box 357280

(206) 685-9252

phcoladm@uw.edu

The Department of Pharmacology offers the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirement

A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, pharmacy, physics, physiology, psychology, or zoology. Students are selected from the applicant pool based on several criteria, including academic records, recommendations, and previous research experience.

Graduation Requirements

Minimum 90 credits, to include:

1. PHCOL 510, PHCOL 511, PHCOL 512, and PHCOL 513 with a minimum 2.7 grade for each class. Enrollment in PHCOL 507 throughout graduate school; PHCOL 514 in the first, second, and third years of graduate study.
2. PHCOL 519 (laboratory rotations) for autumn, winter, and spring quarters of the first year acquainting the student with various areas of pharmacology and research under investigation within the department. During each quarter, the student carries out a research project in the laboratory of a faculty member. At the end of the quarter, the student gives a presentation on the rotation research project that is evaluated by the faculty, using the criteria of scientific content, delivery, knowledge of the subject, and organization of material. The student receives a grade and academic credit for PHCOL 519. Students entering the PhD program with an MS degree or equivalent may petition to enroll in only one quarter of PHCOL 519 before selecting a laboratory. Rotations may occur outside the department by special permission only.
3. Four advanced 2-3 credit graded elective courses in pharmacology in addition to the PHCOL 510 through PHCOL 513 series. Nine graded credits (non-seminar) in graduate-level courses in physiology, biochemistry, molecular biology, immunology, cell biology, or other relevant areas. The courses should strengthen the foundation of the student's thesis proposal.
4. Creditable passage of the general examination consisting of a comprehensive take-home written examination on general pharmacology, taken during summer quarter of the second year, followed by preparation of a grant proposal on the thesis project, and an oral examination, given by the Supervisory Committee during the first quarter of the third year of study. The student is evaluated on the proposed dissertation research and on his or her knowledge of the major disciplines important to the research. Based on the student's performance, the committee recommends approval and candidacy for the PhD degree, further work and subsequent reexamination, or termination.
5. After successful completion of the general examination, the student devotes most of his or her time to thesis research in the third and subsequent years of study. Students are expected to finish all degree requirements and complete their thesis research within a six-year time period from matriculation.
6. The research project for the Ph.D. dissertation is chosen by the candidate and faculty sponsor and approved by the candidate's Supervisory Committee. Research must

represent a worthy and fundamental contribution showing originality in concept and implementation.

When the candidate has concluded the research project and prepared a complete copy of the dissertation, the sponsor obtains approval of the Graduate School and sets a date for the final examination. The final examination is concerned principally with the subject matter of the dissertation, but may include the background and origins of the dissertation problem as well as its practical applications and extrapolations.

Financial Aid

Financial support is offered to students who maintain satisfactory academic progress. Tuition and stipends are provided by National Institutes of Health training grants, University of Washington teaching assistantships, individual research grants, and fellowships from private sources.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

PHCOL 401 General Pharmacology I (2-4, max. 4) *Wang* Principles governing drug-receptor interactions, dose-response relationships, desensitization, and tolerance. Drug toxicity, allergy, mutagenesis, and carcinogenesis. Pharmacogenomics and DNA/RNA therapies. General pharmacology of drugs acting on the endocrine and vascular systems. For pharmacy students and other undergraduates. Offered: A.

PHCOL 402 General Pharmacology II (3/4) *Storm* General pharmacology of drugs acting on the autonomic, cardiovascular, and central nervous systems. For Pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Offered: W.

PHCOL 434 General Pharmacology (2) *Grubbs* Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.

PHCOL 435 General Pharmacology (2) *Grubbs* Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: W.

PHCOL 498 Undergraduate Thesis (*, max. 35) Offered: A.

PHCOL 499 Undergraduate Research (*, max. 35) Participation in departmental research projects. Offered: AWSpS.

PHCOL 507 Pharmacology Seminar (1, max. 30) Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance. Research progress reports, and reports on results of completed research. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 510 Drug Discovery and Emerging Therapeutics (2) *Zheng* Consideration of the general principles and current approaches involved in modern drug discovery and development, with an emphasis on basic concepts in drug action, delivery, and metabolism. Discussion of novel drug discovery techniques and emerging non-standard therapeutics. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: W.

PHCOL 511 Autonomic/Cardiovascular Pharmacology (2.5) *Nathanson* Consideration of the pharmacology of the cardiovascular and autonomic nervous systems. Emphasizes the mechanisms of neurotransmitter, hormone, drug action at autonomic synapses, and the molecular basis for physiology and pathophysiology of the cardiovascular system. Lectures, group discussion, and analysis of recent re-

search. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: W.

PHCOL 512 Neuropharmacology (2) *Bajjalieh* Consideration of the neurobiological basis of drug action on the central nervous system, including mechanism of action and therapeutic use in psychiatric disorders; neurodegeneration/neuroinflammation; control of neuronal excitability and pain; and drug abuse and addiction. Lecture, group discussion, and analysis of recent research. Offered: Sp.

PHCOL 513 Endocrine Pharmacology and Chemotherapeutics (2) *McKnight* Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glycoprotein hormones/growth factors, peptide and steroid hormones. Basic principles of chemotherapy of endocrine and other cancers, as well as viral and microbial diseases. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: Sp.

PHCOL 514 Current Topics in Pharmacology (1, max. 30) *Gardner* Current research related to the mechanisms of drug action presented in a seminar format. Presentations include relevant background material as well as detailed experimental results taken from current research articles. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 515 General Pharmacology Laboratory (*, max. 9) Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 519 Introduction to Laboratory Research in Pharmacology (4) *Storm* On a rotation basis students carry out individual research projects in the laboratories of different faculty members. At the end of each quarter students make formal presentations of their work. For first-year graduate students in pharmacology. Offered: AWSpS.

PHCOL 527 Drug Metabolism (4) *A. RETTIE, K. THUM-MEL* Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Includes reaction mechanisms, ultrastructural considerations, induction mechanisms, methodology, kinetics of inhibition and activation, steroid and amine metabolism. Offered: jointly with MEDCH 527; W, odd years.

PHCOL 529 Ion Channel Pharmacology (2) *Catterall, Tempel* Current topics in ion channel structure, function, genetics, and pharmacology, including consideration of role in electrical signaling in cell membranes and information transfer and processing in nervous system, inherited diseases of ion channels, and sites and mechanisms of action of drugs and toxins. Prerequisite: CONJ 532 and CONJ 536 or permission of instructor. Offered: A, odd years.

PHCOL 530 Neuronal Signaling Pathways (2) *Beavo, Hague, Storm, Xia* Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Emphasizes roles played by signal transduction pathways in regulation of synaptic plasticity, memory formation, neuronal apoptosis, and developmental neurobiology. Prerequisite: UCONJ 532 or permission of instructor. Offered: W, even years.

PHCOL 531 Genetic Analysis of Signaling Systems (3) *McKnight, Moon* Current topics involving signal transduction are discussed with an emphasis on genetic analysis of multicellular systems and creative experimental design. Prerequisite: 9 credits of graduate-level courses in molecular and cellular biology, biochemistry, or genetics, or permission of instructor. Offered: Sp, odd years.

PHCOL 534 Molecular Basis of Addictive Drug Action (2) *Chavkin, Phillips, Stella* Advanced consideration and discussion of current literature addressing the basis of opiate, psychostimulant, and cannabinoid effects on signal transduction events, electrical activity of neurons, and drip-motivated behaviors in animal models of human drug

abuse. Prerequisite: PHCOL 512 or permission of instructor. Offered: A, even years.

PHCOL 535 Transcriptional Control in Human Disease (3) *Bomsztyk, Wang* Advanced consideration and discussion of the mechanisms regulating transcription/gene expression and of aberrant transcription factors which disrupt this process found in cancer and other human diseases. Prerequisite: PHCOL 512 or permission of instructor. Offered: Sp, even years.

PHCOL 550 An Overview of Faculty Research (1) *Wang* Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Prerequisite: first-year student standing in pharmacology. Credit/no-credit only. Offered: A.

PHCOL 560 Regulation of Cell Function by Cyclic Nucleotide Phosphodiesterases (1) *Beavo* Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on practical problem solving, data analysis, and presentation of methods important to understanding published data and designing new experiments in this area of research. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 561 Molecular Properties of Ion Channels (1) *Catterall* Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of sodium and calcium channels and the mechanism of action of drugs on them. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 562 Molecular Basis for Motivated Behavior (1) *Chavkin* Discussion of research strategies and methodologies involved in the regulation of motivated behavior by understanding signal transduction and synaptic physiology. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 563 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1) *Storm* Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 564 Cellular Regulation by Protein Kinases (1) *McKnight* Analysis of research problems, techniques, and emerging concepts in the study of the function of protein kinases. Emphasis on critical evaluation of research and development of presentation skills. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 565 Intercellular Signaling in Development (1) *Moon* Molecular genetic approaches to dissecting the roles and mechanisms of intracellular signaling during development. Emphasis on vertebrate genes related to *Drosophila* segment polarity genes. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 566 Molecular Pharmacology of Neurotransmitter and Neurokinin Receptors (1) *Nathanson* Discussion of research strategies and methodologies in the areas of molecular neurobiology and signal transduction of muscarinic receptors, G-proteins, and neurokinin receptors. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 567 Mechanisms of Carcinogenesis (2) Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell

proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with ENV H 567; A, even years.

PHCOL 569 Molecular Genetics of Potassium Channel Function (1) *Tempele* Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of potassium channel genes and their role in behavior as studied in mutant mice. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 571 Molecular Mechanisms of Neurosecretion (1) *Bajjalieh* Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only.

PHCOL 572 Transcriptional Regulation of Growth Control Genes (1) *Wang* Discussion of research strategies, methodologies, and literature relating to proliferative growth control, cellular differentiation, and gene expression. Emphasis on practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only.

PHCOL 573 Signaling Systems Linked to Neuroinflammation (1) *Stella* Discussion of research strategies, methodologies, and literature related to neuroinflammation, microglial cell activation, and the cannabinoid signaling pathway. Emphasis on solving practical problem, data analysis, and presentation. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 575 Structural Biology of Ubiquitination (1) *Zheng* Discussion of research strategies, methodologies and literature concerning the structure, function, and regulation of ubiquitin-protein ligases and the mechanism underlying ubiquitination and ubiquitin-dependent proteolysis. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 576 Pharmacological, Molecular, and Functional Characterization of G-protein Coupled Receptors (1) *Hague* Discusses research strategies, methodologies, and literature relating to the pharmacological characterization, molecular biology, and functional coupling of GPCRs. Emphasizes practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 577 Regulatory Roles of Ubiquitin in the Nucleus (1) *Gardner* Focuses on the design and implementation of research aimed at understanding the nuclear functions of the small protein modifier ubiquitin. Strongly emphasizes the understanding of current literature, experimental design and troubleshooting, data analysis, and presentation of experimental results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

PHCOL 578 A-Kinase Anchoring Proteins in Cell Signaling Research (1) *Scott* Focuses on the design and implementation of research A-Kinase anchoring proteins in cell signaling. Emphasizes understanding experimental design and troubleshooting, data analysis, and presentation of experimental results. Credit/no-credit only. Offered: AWSpS.

PHCOL 579 Genetic Regulation of Emotional Behavior (1) *Zweifel* Provides background in the materials and methods used in the study of the genetic basis of learning and memory and neural circuit function achieved through discussion of current literature, data acquisition and analysis, and experimental design. Offered: AWSpS.

PHCOL 580 Proteomics for Cellular Systems (1) *Ong* Discusses and reviews literature for proteomics and other genome-wide approaches to study cellular systems. Trains students to integrate knowledge from existing literature

with ongoing laboratory research to enhance data analysis and experimental design. Offered: AWSpS.

PHCOL 600 Independent Study or Research (*) Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.

PHCOL 700 Master's Thesis (*) Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.

PHCOL 800 Doctoral Dissertation (*) Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.

Physiology and Biophysics

G424 Health Sciences

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences anatomy, molecular biology, immunology, biochemistry, pharmacology, pathology, and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

GRADUATE PROGRAM

Graduate Program Coordinator

G424 Health Sciences, Box 357290

(206) 685-0519

pbio@uw.edu

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the M.S. degree are rarely accepted. Students pursuing a PhD degree in physiology and biophysics may emphasize molecular and cellular physiology, biophysics, neurobiology, respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years to complete. The first year is spent acquiring a broad knowledge of physiology via a sequence of courses and laboratory rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter years are spent pursuing the area in depth and completing an original research project.

Individuals with graduate degrees in physiology and biophysics often pursue careers in teaching and research in colleges and universities and in biotech industries. The department participates in interdisciplinary PhD degree programs in neurobiology and behavior and in molecular and cellular biology. The department also participates in the medical scientist training program, and the biological physics structure and design program.

Master of Science

The Master of Science degree is normally granted as part of the path of study leading to the Doctor of Philosophy degree. Students are normally admitted only to the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirements

To apply for admission, a student must provide academic transcripts, Graduate Record Examination (GRE) scores, four letters of recommendation, and a statement of purpose. Because of the broad scope and interdisciplinary nature of the graduate program, there are no specific prerequisites for admission. However, most students have backgrounds in the physical and/or biological sciences. These include majors in biology, physics, mathematics, engineering, computer science, chemistry, and psychology. The most important requirement is a strong motivation and excitement about doing science.

Degree Requirements

90 credits minimum, as follows:

Due to the broad nature of research interests in the department and the diversity of graduate-student backgrounds, formal course requirements are kept to a minimum and are completed in the first year. Students are encouraged to shape their own graduate education, as they choose the majority of their coursework and the scientific direction for their research. Courses available include those offered by other departments, both in the Medical School and elsewhere on campus. Electives may be chosen from a list of mini-courses whose topics reflect the current interests of faculty and students. Students are required to take at least six mini courses.

Required Courses

1. CONJ 531, CONJ 532, P BIO 532, NEUBEH 501, NEUBEH 502, P BIO 508, must be taken three times; P BIO 513, P BIO 519
2. Six departmental mini-courses, to be completed prior to the general examination, from the following: P BIO 509, P BIO 545, P BIO 550, P BIO 551, P BIO 552, P BIO 553, P BIO 554, P BIO 555, P BIO 556, P BIO 557, P BIO 559.
3. P BIO 600 (before general examination)
4. P BIO 800 (after general examination)

Note: P BIO 503 is highly recommended, but not required

General Examination

The general examination must be taken by the last day of autumn quarter of the third year. After passing the general examination the student is advanced to candidacy for the doctoral degree. The student then registers for P BIO 800 and continues working on thesis research.

Final Examination

The culmination of the program is the submission of a written doctoral thesis and the presentation of this work in a public lecture attended by members of the department and the University.

Research Facilities

The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, respiratory physiology, muscle biophysics, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

P BIO 498 Undergraduate Thesis (*, max. 35) Offered: AWSpS.

P BIO 499 Undergraduate Research (*, max. 35) Offered: AWSpS.

P BIO 504 Biophysics of Nerve, Muscle, and Synapse (3) *Sullivan* Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with NEURO 504.

P BIO 505 Human Physiology (4-) *Binder* Provides an introduction to the study of human physiology. Covers the physiology of excitable cells, muscle physiology, renal physiology, gastrointestinal physiology, and the physiology of the central nervous system. Offered: A.

P BIO 506 Human Physiology (-4) *Wordeman* Provides an introduction to the study of human physiology. Covers cardiovascular physiology, respiratory physiology, acid base balance, neuroendocrinology, and reproductive physiology. Prerequisite: P BIO 505, or equivalent with permission of instructor. Offered: W.

P BIO 508 Introduction to Laboratory Research in Physiology (1-5, max. 15) Students participate in the performance of ongoing projects in designated research laboratories. Emphasis is on experimental design, methodology, and techniques. For first- and second-year graduate students in physiology and biophysics to provide a basis for future independent research. Offered: AWSpS.

P BIO 509 Neuroendocrinology (3) *Steiner* Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 180, BIOL 200, and BIOL 220; BIOC 440, BIOC 441, BIOC 442 or permission of instructor. Offered: jointly with NEURO 541; W, even years.

P BIO 513 Practicum in Teaching Physiology and Biophysics (4) Students undertake instructional material development, presentation of materials, and develop problem-solving techniques. Credit/no-credit only. Offered: AW.

P BIO 519 Membrane and Muscle Biophysics Seminar (1) *Hille* Lectures on current research topics in cell membrane function and muscle contraction. Prerequisite: permission of instructor. Credit/no-credit only. Offered: Sp.

P BIO 520 Physiology Seminar (*) Selected topics in physiology. Prerequisite: permission of instructor.

P BIO 521 Biophysics Seminar (*) Selected topics in biophysics. Prerequisite: permission of instructor.

P BIO 522 Selected Topics in Respiratory Physiology (1-3, max. 3) *Hildebrandt* Advanced seminar on selected topics, including pulmonary mechanics, gas exchange, lung fluid balance, regulation of breathing, pulmonary circulation, respiration in the neonate, liquid breathing, airway dynamics, lung structure and development, cardiopulmonary interactions, exercise physiology. Prerequisite: permission of instructor. Offered: AWSpS.

P BIO 523 Heat Transfer and Temperature Regulation (2-5, max. 5) *Brengelmann* Thermal exchange between the body surface and the environment. Heat production and distribution within the body. Properties of cutaneous and deep temperature receptors. Neural integration and homeothermy. Prerequisite: permission of instructor. Credit/no-credit only.

P BIO 525 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A.

P BIO 526 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed

with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: W.

P BIO 527 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: SpS.

P BIO 545 Quantitative Methods in Neuroscience (3) *Rieke* Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection, and information theory. Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Offered: jointly with NEURO 545.

P BIO 548 Molecular Mechanisms of Synaptic Plasticity (2) *Barria* Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with NEURO 548; Sp, even years.

P BIO 550 Biophysics of Calcium Signaling (1) *Hille, Santana* Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531. Offered: jointly with NEURO 550; Sp, odd years.

P BIO 554 Motor Learning: Cellular and Network Mechanisms (1) *Fetz, Perlmutter* Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with NEURO 554.

P BIO 555 Sensory Receptors (1) *Detwiler, Rieke* Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with NEURO 555.

P BIO 556 Axon Pathfinding Mechanisms (1) *Bothwell* Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with NEURO 556.

P BIO 557 Ion Channel Gating (1) *Zagotta* Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with NEURO 557.

P BIO 558 Concepts and Mechanisms in Mitosis (2) *Asbury, Wordeman* Examines how the mitotic spindle organizes and separates duplicated chromosomes during cell division. Overview of spindle components and key mechanistic concepts. Discusses recent or classic papers from the primary literature.

P BIO 559 Neurobiology of Disease (3) *Garden, Neumaier, Weinstein* Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/NEURO 559.

P BIO 561 From Biophysics to Neural Computation (2) Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Offered: jointly with NEURO 561; Sp.

P BIO 600 Independent Study or Research (*) Offered: AWSpS.

P BIO 700 Master's Thesis (*) Offered: AWSpS.

P BIO 800 Doctoral Dissertation (*) Offered: AWSpS.

Psychiatry and Behavioral Sciences

BB1644 Health Sciences

pbsci@uw.edu

The department offers coursework, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

GRADUATE PROGRAM

The Medical School curriculum is divided into a core (basic) curriculum and an elective curriculum. Within its core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning theory, cognition, memory, perception, neuropharmacology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsychiatry and behavioral medicine, as well as training in interviewing skills and assessment techniques. Its elective program includes a variety of clinical experiences and advanced didactics and seminars designed to further the knowledge and skills developed within the basic curriculum. In addition, the department encourages research and other scholarly pursuits by students in areas of interest to them. Stipends are available for research studies.

Residency Training in Psychiatry

A four-year residency for medical school graduates and a three-year post-internship residency prepares physicians for Specialty Board Certification in Psychiatry. Clinical rotations on inpatient, outpatient, emergency, and consultation/liaison services are augmented by individual supervision and didactic lectures. With the program's integrative orientation, residents become proficient in psychotherapy, psychopharmacology, and community liaison with patients of all ages. Fellowships in child, geriatric, addiction, community, forensic and consultation-liaison psychiatry, and psychiatric neuroscience are available.

Clinical Psychology Internship Program

The one-year internship in clinical psychology, accredited by the American Psychological Association, offers advanced clinical training to candidates for the doctorate

in clinical psychology from graduate programs accredited by the American Psychological Association. Training tracks with the internship in general adult, general child, rehabilitation and health psychology, and public behavioral health and justice policy (adult and child). Advanced research skills training is also available as part of an INH-funded training grant for selected internship participants.

Postdoctoral Fellowship Training

Postdoctoral fellowships for advanced clinical and research training in behavioral medicine, broadly construed, are also offered.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

PBSCI 498 Undergraduate Thesis (*, max. 15) Opportunity to complete work on psychiatric research projects or to pursue a specific psychiatric topic in depth, for instance, through library research. Offered: AWSpS.

PBSCI 499 Undergraduate Research (*, max. 15) Opportunities are available for participation in a wide variety of ongoing research in the behavioral sciences and clinical psychiatry, or for the development of an individual investigative project under the supervision of a faculty sponsor. Offered: AWSpS.

PBSCI 505 P-Psychiatry Preceptorship (1, max. 12) *Combs* Opportunity for first- and second-year medical students to gain direct experience with clinical faculty members in psychiatry. Includes opportunities to observe different areas of psychiatry including addiction, child, geriatrics, community, crisis, and consultation. Prerequisite: permission of department. Offered: AWSp.

PBSCI 525 P-Psychiatry and the Law (3) *E. GOLDENBERG, J. PIEL* Explores issues at the interface of law and psychiatry through didactic curriculum and research. Trainees develop an individualized research project with the assistance of their faculty mentors. Covers topics in civil and criminal forensic psychiatry, research ethics, research design, grantsmanship, and mental health law. Offered: Sp.

PBSCI 546 Psychiatric Epidemiology (3) *Vander Stoep* Using epidemiological methods to study mental illness. Topics include contributions of mental illness to global disease burden; major population-based studies of mental illness; measurement of psychopathology; culture and mental illness; role of neurodevelopment, genetics, social and physical environment in etiology of mental disorders; mental health services research. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Credit/no-credit only. Offered: jointly with EPI 546; Sp.

PBSCI 580 Applied Research in Behavioral Health and Justice Policy (2) Direct experience working with community agencies to build research capacity. Emphasized child welfare, children's mental/behavioral health, and juvenile justice. Seminars cover translational research, community-based research, and communicating research to program and policy audiences. For graduate students, psychiatric residents, and graduate psychology, psychosocial nursing, social work, and public health students. Offered: AW.

PBSCI 600 Research in Psychiatry ([1-15]-) Independent laboratory research under the guidance and supervision of research scientists in the Psychiatry Department. Faculty permission required.

PBSCI 630 P-WRITE Psychiatry Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

PBSCI 631 P-Basic Psychiatry Clerkship - Juneau, AK (12) Basic psychiatry clerkship in Juneau, Alaska. Fulfills graduation requirements for clerkship in psychiatry.

PBSCI 632 P-LIC Psychiatry Clinical Clerkship (12) Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: acceptance into LIC program.

PBSCI 637 P-Basic Psychiatry Clerkship - Fairfax - Kirkland, WA (12) Basic psychiatry clerkship in Kirkland, Washington. Fulfills graduation requirements for clerkship in psychiatry.

PBSCI 639 P-Basic Psychiatry Clerkship - Olympia (12) Basic psychiatry clerkship at Olympia, WA. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 640 P-Basic Psychiatry Clerkship - Pocatello (12) Basic psychiatry clerkship at Pocatello, ID. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 655 P-Basic Psychiatry Clerkship - Cheyenne (12) Basic psychiatry clerkship in Cheyenne, WY. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 661 P-Basic Psychiatry Clerkship - Helena (12) Basic psychiatry clerkship in Helena, MT. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 662 P-Basic Psychiatry Clerkship - Missoula (12) Students work at St. Patrick Hospital with adult and adolescent inpatients and in the emergency room for emergent-care exposure. Students have outpatient experience through the adult intensive outpatient program, Pain Treatment Center, and in faculty outpatient practices. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. Prerequisite: completion of the HUBIO series; third and fourth year students.

PBSCI 663 P-Basic Psychiatry Clerkship - Billings (12) Students work at South Center Regional Mental Health Center and Behavioral Sciences Clinic with adult and adolescent inpatients, in the emergency room for emergent care exposure. Outpatient experience including consultations at the community mental health center, Indian reservation, and prison. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. A vehicle is needed by students at this site. Prerequisite: completion of the HUBIO series; third and fourth year students.

PBSCI 665 P-Basic Clinical Clerkship (*, max. 24) Inpatient clerkship in psychiatry. Students have primary responsibility under the direction of attending psychiatrists and residents for diagnosis and care of patients at University of Washington Medical Center, Harborview Medical Center, or Veterans Administration Hospital. Emergency room, crisis intervention, consultation to patients with psychiatric dysfunction. Familiarity with psychopharmacology and short-term hospitalization emphasized. (Six weeks, full-time.)

PBSCI 666 P-WWAMI Psychiatry and Behavioral Sciences Clerkship (12) Rotation aims to increase student's skills in basic psychiatry, social psychiatry, transcultural psychiatry, and community psychiatry. Orientation is around the diagnosis, treatment, and clinical management of white, Aleut, Indian, and Eskimo children and adults in outpatient, inpatient, and community settings. Third-, fourth-year medical students. (Limit: Two or three students). Prerequisite: HUBIO 563.

PBSCI 667 P-Basic Psychiatry Clerkship - Boise (12) Basic psychiatry clerkship at Veterans' Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 668 P-Psychiatry Clerkship - Spokane (12) Students work on adult, geriatric, and adolescent inpatient psychiatric units of Sacred Heart Medical Center, following patients after transfer to partial hospitalization or outpatient clinic. Didactics include basic psychiatric diagnosis, treatment, and pharmacotherapy. (Limit: two or three students). Prerequisite: completion of HUBIO series; third and fourth-year medical students.

PBSCI 669 P-Basic Psychiatry Clerkship - Casper, Wyoming (12) Students work in the Wyoming Behavioral Institute with adult, adolescent, and child inpatients. Students have some outpatient experience and emergent care assessment experience at the Wyoming Medical Center. Didactics and discussion include topics such as psychopharmacology, emergent care and assessment, diagnosis, and substance abuse issues.

PBSCI 670 P-Clerkship in Consultation/Liaison Psychiatry - UWMC (*, max. 24) Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. (Limit: one student; two or four weeks.) Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 671 P-Clerkship in Consultation/Liaison Psychiatry - HMC (*, max. 24) Students receive organized instruction and supervised clinical experience in the evaluation of psychiatric and/or behavioral problems in patients on medical and surgical services, and in effectively consulting with their health care providers regarding their clinical management. Includes evaluation of (non-financial) decisional competency. (Limit: two students). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 672 P-Selective Clerkship in Primary Care Psychiatry - Boise, VAMC (8/12) Assessment and treatment of patients with acute psychiatric problems in a primary care/rural setting. Consultation work on general medicine and surgery; assessment and dealing with outpatient psychiatric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisite: satisfactory completion of required psychiatry clerkship (Four weeks; visiting students interested in the Boise Psych Residency Track allowed.)

PBSCI 673 P-Outpatient Psychiatry Elective (*, max. 24) Offered at Harborview Outpatient Center. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending at Psychopharmacology Clinic. (Four to six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 676 P-Inpatient Clerkship in Psychiatry - American Lake VA (8/12) *Johnston* For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the evaluation, management, and treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 677 P-Alcohol and Drug Treatment Clerkship - American Lake VA (8/12) *Lim* Student assists in every phase of the substance-abuse treatment, including admission interviews, patient evaluation, problem identification, group and individual psychotherapy, assertiveness training, anger control, human sexuality, medical evaluation and treatment, couples therapy, discharge and aftercare planning. Experience primarily clinical. Prerequisite: satisfactory completion of required psychiatry clerkship. (Four or six weeks, full-time).

PBSCI 678 P-Clerkship in Psychiatric Long-Term Care and Rehabilitation (*, max. 12) *Johnston* Two- to six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington's, organic brain syndrome) is such that physical rehabilitation is not an emphasis. Prerequisite: HUBIO 563; satisfactory completion of required psychiatry clerkship.

PBSCI 680 P-Clerkship in Emergency Psychiatry (*, max. 24) *Pasio* Emphasis on clinical evaluation, acute management, and treatment planning for individual patients.

Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 685 P-Geriatric Psychiatry Clerkship (*, max. 12) Two- to six-week elective (four weeks highly recommended). Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a variety of settings. Emphasis on improving clinical skills regarding diagnosis and treatment of common behavioral problems in the elderly. Prerequisite: satisfactory completion of required psychiatry clerkship, vehicle required for this rotation.

PBSCI 688 P-Subinternship in General Psychiatry (*, max. 16) Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship; permission of instructor.

PBSCI 695 P-Advanced Clerkship in Child Psychiatry - CSTC (*, max. 24) Provides an opportunity to participate in evaluation and treatment of children and adolescents in Lakewood, WA. Prerequisite: satisfactory completion of required psychiatry clerkship; fourth year medical student status. 2/4/6 weeks.

PBSCI 696 P-Advanced Clerkship in Child Psychiatry (*, max. 24) Provides students an opportunity to participate in evaluation and treatment. Experiences in specialized clinics are also available. (Four or six weeks, full-time. Limit: one student). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 697 P-Psychiatry Special Electives (*, max. 24) By special arrangement, clerkships, externships, and research opportunities can be taken at other institutions. Students obtain permission from Dr. Combs before contacting the dean's office one month before advance registration. Students contact affiliating institutions. Does not fulfill the requirement for a basic clerkship in psychiatry.

PBSCI 699 P-WWAMI Psychiatry and Behavioral Sciences Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Radiation Oncology

NN106 University of Washington Medical Center

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the Department of Radiation Oncology are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work, particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

R ONC 499 Undergraduate Research (*, max. 24) Phillips, Schwartz, Wilbur Opportunities in clinical or laboratory investigation in radiation oncology, radiation physics, or computer-related research. Student participation in ongoing or new projects. Open to students in the biological or physical sciences.

R ONC 505 P-Radiation Oncology Preceptorship (1, max. 12) Kane, Kelly, Kim, Koh, Laramore, Liao, Patel, Rockhill, Russell Students choose either to follow an attending physician through all aspects of radiation oncology including consults, follow-up, and treatment planning; or to follow a small cohort of patients throughout their treatment course to learn about the experience of a cancer patient undergoing treatment for life-threatening disease. Credit/no-credit only.

R ONC 600 Independent Study or Research (*) Prerequisite: permission of department and faculty sponsor. Offered: AWPSP.

R ONC 694 P-Clinical Cancer Management - SCCA (*, max. 8) Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of instructor.

R ONC 695 P-Clinical Cancer Management - UWMC (*, max. 8) Kane Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of instructor.

R ONC 697 P-Radiation Oncology Special Elective (*, max. 24) Kane By specific arrangement for qualified students, special clerkship, externship, or research opportunities are made available at institutions other than the University of Washington. Students obtain a "special assignment" form from the dean's office at least one month before advance registration. Prerequisite: permission of instructor.

R ONC 699 P-WWAMI Radiation Oncology Special Electives (*, max. 24) Kane By special arrangement for qualified students, special clerkships or externships may be available at institutions located within the WWAMI region, other than the University of Washington. Prerequisite: permission of department.

Radiology

RR215 University of Washington Medical Center

Diagnostic radiology is that branch of clinical medicine that specializes in the interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology's major subspecialties, radionuclides are employed for both diagnostic and therapeutic

purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The Department of Radiology consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both divisions are ably supported by technologists and faculty members in the field of radiation physics. Instruction in radiology is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each of the hospitals affiliated with the University.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

RADGY 498 Undergraduate Thesis (*, max. 30) Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. Offered: AWPSP.

RADGY 499 Undergraduate Research (*, max. 35) Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic and/or nuclear medicine. Offered: AWPSP.

RADGY 505 P-Preceptorship in Radiology (1-, max. 24) Opportunity for medical students to gain experience with faculty in clinical and academic environments. Students observe general aspects of diagnostic radiology, interventional radiology, or nuclear medicine, including clinical problems, the different relationships in clinic between physician and patient, and research aspects of the department. Prerequisite: permission of instructor. Offered: AWPSP.

RADGY 508 Physical Aspects of Medical Imaging (4) Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound, and Doppler ultrasound.

RADGY 580 P-Nuclear Medicine Technique, Physics, and Instrumentation (2.5) Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. Discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor. Offered: S.

RADGY 600 Independent Study or Research (*) Prerequisite: permission faculty sponsor. Offered: AWPSP.

RADGY 686 P-Introduction to Diagnostic Radiology - Idaho Falls (4) Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies.

RADGY 687 P-Introduction to Diagnostic Radiology - Casper (4) Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWPSP.

RADGY 688 P-Introduction to Diagnostic Radiology - Boise (4)

RADGY 689 P-Introduction to Diagnostic Radiology - Billings (4) Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWPSP.

RADGY 690 P-Introduction to Diagnostic Radiology - Nampa (4) Half-time clerkship in the field of medical imaging.

Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWPSP.

RADGY 691 P-Introduction to Diagnostic Radiology - Alaska (4) Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWPSP.

RADGY 692 P-Introduction to Diagnostic Radiology - Spokane (4) Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWPSP.

RADGY 694 P-Advanced Clinical Clerkship (8) Full-time clerkship provides a more in depth experience in diagnostic radiology and nuclear medicine. Required rotations in the subspecialty areas of radiology augment the basic lecture series and case discussions of RADGY 693. For those with a special interest in diagnostic radiology. Prerequisite: permission of instructor and departmental education coordinator. Offered: AWPSP.

RADGY 695 P-Radiology Sub-specialty Elective (*, max. 8) Clinical rotation in one of the sub-specialty areas of radiology at the University of Washington and affiliated hospitals. Requires special arrangements and permission from a preceptor and the education coordinator in Radiology. Two or four weeks. Offered: AWPSP.

RADGY 696 P-Nuclear Medicine Clerkship (*, max. 12) Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching conferences of the division. Four- and six-week clerkships can be pre-planned in areas such as pulmonary, cardiovascular, renal, bone, computer analysis. Prerequisite: permission of instructor. Offered: AWPSP.

RADGY 697 P-Radiology Special Electives (*, max. 24) Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct communication between the student and the education coordinator in Radiology. A written outline from a preceptor at the intended site required. Prerequisite: permission of radiology education coordinator. Offered: AWPSP.

RADGY 699 P-WWAMI Radiology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Rehabilitation Medicine

BB928 Health Sciences

The Department of Rehabilitation Medicine provides education for medical students, interns, residents, and allied health students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational

therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.

The department offers curricula leading to the following degrees: Master of Occupational Therapy, Doctor of Physical Therapy, Master of Prosthetics and Orthotics, and a PhD in rehabilitation science.

OCCUPATIONAL THERAPY

Head

Janet M. Powell

The profession of occupational therapy appeals to people who enjoy thinking creatively and flexibly to solve problems, and who want to help people with disabilities perform activities important in their daily lives. Occupational therapists provide services related to occupational performance (activities) in everyday life in the areas of self-care, work, education, or play and leisure. They work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventive strategies to enhance health and well-being; and with people in all age groups from diverse cultural and ethnic groups and socioeconomic levels.

Occupational therapists help people with impairments or limitations live as productive and as high quality of life as life as possible. Services focus on increasing independence, enhancing development, providing compensatory strategies, and minimizing or preventing disability. Therapists adapt activities and environments, select therapy activities meaningful to clients, and provide client, family, and caregiver education. For example, an occupational therapist may teach adaptive dressing techniques to a client who has lost use of a hand following a stroke, help a child with autism interact with peers, or modify a computer for a young adult with a spinal cord injury returning to work.

Today's occupational therapists practice in rehabilitation centers, outpatient rehabilitation clinics, schools, hospitals, mental health facilities, private practice, skilled nursing facilities, home healthcare, and community health programs. The most common work settings for occupational therapists are school systems, hospitals, and long-term care facilities. The current and future job outlook for occupational therapists is excellent. The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE), which can be contacted at: ACOTE c/o Accreditation Department AOTA, 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449, phone (301) 652-2682. Standards comply with the U.S. Department of Education criteria for recognition of accrediting agencies. Graduates of the program are eligible to sit for the national certification examination for occupational therapist. The National Board for Certification in Occupational Therapy (NBCOT) is the certifying agency responsible for development and implementation of this examination. Most states, including Washington, require state licensure in order to practice.

Master of Occupational Therapy

Admission Requirements

1. Bachelor's degree in any major and Graduate Record Examination (GRE) taken within the past five years. Seven prerequisite courses as shown below. Volunteer or work experience in at least two practice areas of occupational therapy. Admission is once a year for entry autumn quarter; applications are evaluated starting January 15.
2. Specific prerequisite courses at the UW. (Students who have attended schools other than the UW must take comparable courses.)

3. *Natural Sciences*: BIOL 118; B STR 301; CHEM 120; EDPSP 490
4. *Social Sciences*: PSYCH 305; PSYCH 306; SOC 110 or ANTH 202
5. *Requirements to Apply*: Completion of five prerequisite courses, including three courses in the natural sciences; 3.00 minimum GPA in prerequisite courses with no single course graded less than 2.7; minimum 3.00 GPA on the most recent 60 semester or 90 quarter credits. Admission is based on academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information are available by calling (206) 598-5764, or by consulting the program's website at rehab.washington.edu/education/degree/ot, or by emailing ot@uw.edu.

Degree Requirements

1. *Courses*: To be completed in the scheduled sequence, beginning autumn quarter only, at the UW: REHAB 510, REHAB 520, REHAB 522, REHAB 533, REHAB 541, REHAB 542, REHAB 543, REHAB 544, REHAB 545, REHAB 548, REHAB 551, REHAB 566, REHAB 570, REHAB 571, REHAB 572, REHAB 574, REHAB 575, REHAB 576, REHAB 577, REHAB 578, REHAB 579, REHAB 580, REHAB 581, REHAB 582, REHAB 584, REHAB 585, REHAB 591, and REHAB 594.
2. *GPA Requirement*: Cumulative 3.00 GPA in all required professional coursework to retain satisfactory standing and to graduate. Detailed scholastic requirements are available on the program's website at rehab.washington.edu/education/degree/ot/.
3. *Continuation Policy*: If at any point the OT curriculum cumulative GPA falls below 3.00, the student is placed on academic probation and must raise the GPA to 3.00 by the end of two subsequent quarters. Students unable to remove their probation status are subject to dismissal from the program. If a student receives a grade below 2.7 in a required course, continuation in the program is reviewed and determined by the Occupational Therapy Advisory and Evaluation Committee.
4. *Fieldwork Placement*: The student must satisfactorily complete all academic coursework before taking the two required Level II Fieldwork placements (REHAB 594). Both fieldwork placements must be satisfactorily completed within 24 months following completion of the academic portion of the program in order to graduate.

For more information on the Master of Occupational Therapy program, visit the department's website at rehab.washington.edu/education/degree/ot/.

PHYSICAL THERAPY

Interim Head

Sarah Westcot McCoy

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal or neuromuscular conditions.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is rebuilding self-confidence and creating a desire to return to a normal, active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.

As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, evaluate, and direct patient care in outpatient clinics,

rehabilitation centers, health maintenance organizations, developmental centers, home-health agencies, schools, extended-care facilities, voluntary health programs, industry, and private practices. The physical therapist may be found anywhere quality healthcare is needed. Increasingly, physical therapists are becoming involved in basic and clinical research, such as the academic community, either as full-time faculty members or as supervisors of clinical education, and as consultants in local, state, and federal health-planning activities.

Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. The steps to licensure as a physical therapist vary slightly from state to state, but all physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including an emphasis on physical and social sciences. The physical therapist evaluates the patient's problem by testing such factors as range of joint motion, muscle strength, posture and gait, pulmonary function, sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Intervention procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and assisted ambulation training.

As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formal mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.

The University of Washington program in physical therapy is accredited by the American Physical Therapy Association Commission on Accreditation in Physical Therapy Education. For complete program details visit rehab.washington.edu/education/degree/pt.

Doctor of Physical Therapy

Admission Requirements

1. Enrollment is limited to 44 students each year and admission is competitive.
2. Application is restricted to those who are U.S. citizens or U.S. permanent residents by the autumn program entrance date.
3. Applicants are required to submit scores from the General Test portion of the Graduate Record Examinations (GRE).
4. Prior to the application deadline of December 15, the student must have met the following academic requirements:
 - a. Minimum 3.00 GPA on all college-level courses
 - b. Minimum 3.00 GPA on PT prerequisite courses
 - c. Minimum 2.0 (C) grade on each PT prerequisite course
 - d. Half (50%) of PT prerequisite courses completed.

For a list of PT prerequisite course descriptions, see the program Website at depts.washington.edu/rehab/pt/eligibility.asp#prereq
5. Minimum requirements above must be maintained until program entrance and all prerequisite courses must be finished at that time. Applicants must complete a bachelor's degree before they start the program.
6. Most clinical internship placement sites require potential trainees to undergo a criminal history background check for crimes against vulnerable populations. To ensure that all students offered positions in the PT program have no such history and therefore are able to finish

the clinical portion of the curriculum, the completion of a criminal background check process is required of applicants accepting admission.

Degree Requirements

157 credits, as follows:

Year One

1. *Autumn Quarter:* REHAB 504, REHAB 509, REHAB 517, REHAB 521, REHAB 522, REHAB 541, REHAB 544
2. *Winter Quarter:* REHAB 506, REHAB 517, REHAB 533, REHAB 542, REHAB 545, REHAB 551
3. *Spring Quarter:* REHAB 507, REHAB 517, REHAB 525, REHAB 533, REHAB 536, REHAB 543, REHAB 548
4. *Summer Quarter:* REHAB 500, REHAB 508, REHAB 517, REHAB 537, REHAB 538, REHAB 540

Year Two

1. *Autumn Quarter:* REHAB 510, REHAB 511, REHAB 523, REHAB 547, REHAB 566
2. *Winter Quarter:* REHAB 502, REHAB 512, REHAB 527, REHAB 529
3. *Spring Quarter:* REHAB 502, REHAB 503, REHAB 531, REHAB 566, REHAB 569
4. *Summer Quarter:* REHAB 505, REHAB 514, REHAB 535, REHAB 515, REHAB 567, REHAB 801

Year Three

1. *Autumn Quarter:* REHAB 595, REHAB 801
2. *Winter Quarter:* REHAB 595, REHAB 801
3. *Spring Quarter:* REHAB 595, REHAB 801

PROSTHETICS AND ORTHOTICS

Division Director

Ann Yamane

The prosthetist-orthotist is a member of the rehabilitation healthcare team, which also includes physicians, surgeons, physical and occupational therapists, psychologists, vocational rehabilitation counselors, and other appropriate specialists. The interdisciplinary rehab team works with physically challenged individuals to increase their functional abilities, enhance their daily life, and help them to participate in activities they enjoy.

Certified Prosthetists Orthotists (CPOs) provide direct patient care and management. CPOs work in conjunction with physicians, surgeons, and therapists to evaluate the prosthetic or orthotic needs of the patient. Prostheses replace or substitute for a missing limb or part of a limb, and orthoses help with the control of motion and the support of a weakened body segment. Before designing a specific device, the prosthetist-orthotist examines a patient to find any conditions that might affect the future success of that device. Following the evaluation, the prosthetist-orthotist obtains an impression of the affected segment along with the appropriate measurements. A technician fabricates the prosthesis or orthosis, and the prosthetist-orthotist assesses the fit and function of the device and follows up with the patient, as necessary. To evaluate the fit and function, the prosthetist-orthotist must have a detailed knowledge of anatomy and kinesiology, joint range of motion, muscle strength, human locomotion, material science, and the human-device interaction.

Graduate Program Coordinator

BB808 Health Sciences Center

(206) 543-6763

pando96@uw.edu

The prosthetics and orthotics division offers the following program of study:

- The Master of Prosthetics and Orthotics degree

Master of Prosthetics and Orthotics

Admission Requirements

1. Bachelor's degree in any major from a regionally accredited U.S. college or university
2. Minimum 3.00 cumulative GPA
3. Prior to the start of the program, all prerequisites must be completed, including one course each in the areas of biology* (or other life science), statistics, and chemistry*; a two-course series in the areas of (1) anatomy and physiology and (2) physics*, and two courses in psychology (to include a general psychology course as well as either a developmental or abnormal psychology course). Laboratories must be taken with courses marked with an asterisk*.
4. Minimum 3.00 cumulative prerequisite GPA. No single course graded less than 2.0. Grades lower than 2.0 are not accepted.
5. GRE general test scores. Test must be taken within the past five years.
6. Volunteer or work experience in a prosthetics-orthotics clinic is strongly encouraged
7. Admission is competitive based on scholastic achievement, written skills, references, and involvement in activities or experiences related to the health professions.
8. Admission occurs once a year for entry autumn quarter; applications are evaluated starting December 15.
9. International applicants must meet several requirements in addition to those required of U.S. applicants to be admitted to the UW Graduate School. Consult the FAQs on the UW Graduate School website for more information.

See program website for complete details on admissions requirements.

Degree Requirements

112 credits as follows:

1. *Courses:* To be satisfactorily completed in a specific sequence beginning autumn quarter of entry year, and only at the UW: REHAB 522, REHAB 544, REHAB 541, REHAB 504, REHAB 509, RHB PO 511, RHB PO 501, REHAB 533, REHAB 545, REHAB 542, REHAB 551, REHAB 506, RHB PO 515, REHAB 548, REHAB 543, RHB PO 512, RHB PO 581, RHB PO 541, RHB PO 502, RHB PO 521, RHB PO 522, RHB PO 523, REHAB 580, RHB PO 561, REHAB 510, RHB PO 524, RHB PO 525, RHB PO 526, RHB PO 527, RHB PO 581, RHB PO 582, RHB PO 562, RHB PO 528, RHB PO 529, RHB PO 583, RHB PO 563, RHB PO 530, RHB PO 531, RHB PO 534, RHB PO 558, RHB PO 584, RHB PO 564.
2. *Grade Requirements:* A student must maintain a minimum 3.00 cumulative program GPA, and receive "credit" grades in all courses graded credit/no credit only, to maintain good standing in the program and be eligible for graduation.
3. *Continuation Policy:* If at any point the cumulative GPA in the curriculum courses falls below 2.70, the student is placed on academic probation. In order to be removed from probation, the student must achieve a cumulative GPA of 3.00 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his or her probation status, he or she is subject to dismissal from the program.

POST-PROFESSIONAL PROGRAMS

Doctor of Philosophy in Rehabilitation Science

Director

Deborah Kartin

Rehabilitation science is an interdisciplinary field that focuses on human function and disability. Basic and applied research from health sciences, social sciences, engineering, and related fields is directed toward (1) enhancing physical and psychosocial functioning, participation in life situations, and quality of life for people with disabilities; and (2) informing relevant social and healthcare policy.

The program targets students from diverse backgrounds in rehabilitation-related fields including occupational therapy, physical therapy, speech and language pathology, rehabilitation counseling, medicine, nursing, prosthetics and orthotics, and engineering.

The goal of the PhD program in rehabilitation science is to prepare future researchers, educators, and leaders in the area of rehabilitation science. Graduates contribute to the field of rehabilitation science, working in settings such as academic and research institutions, service delivery systems (e.g., hospitals, public schools), government agencies, and the private sector. These individuals are prepared to address research, education, service delivery, and policy issues from an interdisciplinary perspective.

1. Demonstrate advanced knowledge and productivity in rehabilitation science specific to research, education, service delivery, and/or policy.
2. Demonstrate leadership in interdisciplinary collaboration for the purpose of optimizing research, education, service delivery, and/or policy.
3. Generate and extend knowledge that is innovative and rigorously tested within a focused area of rehabilitation science.

Admission Requirements

1. Baccalaureate degree from a college or university of recognized rank
2. Copy of current professional certification/licensure to practice (as appropriate)
3. Letters of recommendation from three persons knowledgeable about the individual's potential for doctoral-level work in rehabilitation science
4. Letter of application
5. Resume/CV
6. Official university transcripts
7. Official Graduate Record Examination (GRE) General Test Scores

Degree Requirements

100 credits minimum, as follows:

1. **Core Course Series (21 credits):** coursework and practicum experiences in teaching (minimum 5 credits), and coursework in statistics and research methods (minimum 18 credits). In addition, each student must complete three cognates (minimum 6 credits each) specific to the student's goals. The student's committee and the core faculty in the rehabilitation science doctoral program must approve the entire course of study.
2. **General Requirements:** In addition to meeting all requirements of the UW Graduate School, all students are expected to meet the following general requirements.
 - a. Minimum 3.00 cumulative and quarterly GPA.
 - b. 100 credits minimum, of which 27 are dissertation credits.

- c. Completion of at least one teaching practicum (3-credit minimum).
- d. Satisfactory completion of a research and scientific inquiry day manuscript and presentation.
- e. Satisfactory completion of general examinations.
- f. Dissertation.
- g. Final examination.

For more information on the PhD program in rehabilitation science, visit the program's website at rehab.washington.edu/education/degree/rehabsci/.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

REHAB 300 Introduction to Occupational Therapy (1) Introduction to occupational therapy profession. Provides historical perspectives, theoretical foundations, and clinical case studies in various practice arenas. Credit/no-credit only.

REHAB 496 Special Topics in Rehabilitation (1-9, max. 14) Guided opportunity for in-depth study in specific areas of rehabilitation. Topics vary.

REHAB 498 Undergraduate Thesis (*, max. 15)

REHAB 499 Undergraduate Research (*, max. 15) Opportunity to design, perform, and analyze research investigation in problem areas in rehabilitation medicine. These include clinical and basic research problems in, for example, head and spinal injury, chronic disease, pain neurophysiology, electrodiagnosis, communication, and bio-engineering.

REHAB 500 Clinical Clerkship in Physical Therapy (4) *Robinson* Observation, instruction, and supervised practice in treatment of patients in diverse clinical settings. Emphasis is given to the application of previously learned material and skills to specific clinical problems. Required for physical therapy students. Credit/no-credit only.

REHAB 502 Pediatric Physical Therapy (4-, max. 8) *C. KERR* Provides foundational knowledge in development and an overview of pediatric physical therapy practice for children with atypical development. Presents examination, evaluation, and development of physical therapy plans of care for children with various disabilities within the frameworks of family-centered care and disablement models.

REHAB 503 Lifespan III: Geriatric Physical Therapy (3) *Matsuda* Theory and principles of exercise procedures used when treating the geriatric patient. Includes a discussion of age related changes in the systems essential to movement control; factors contributing to physical disability and frailty with aging; adaptation of assessment and treatment procedures to the geriatric patient. Lectures and laboratories.

REHAB 504 Procedures I: Basic Physical Examination of the Extremities (2) *Maitland* Develops technical skills and theoretical foundations in the examination of patients from a neuromusculoskeletal perspective. Special emphasis on examination of the extremities, including applied anatomy, posture, screening tests, special tests, and scanning exams.

REHAB 505 Introduction to Pharmacology (2) *D. MACK* Pharmacological survey of drugs commonly prescribed for clients seen in a physical therapy practice setting. Presentations on basic principles. Additional data search and group reports. Overview of medical emergencies.

REHAB 506 Procedures II: Basic Physical Examination of the Spine (2) *Bennett* Develops technical skills and theoretical foundations in the examination of patients from a neuromusculoskeletal perspective. Emphasizes exami-

nation of the spine including applied anatomy, posture, screening tests, special tests, and scanning exams.

REHAB 507 Physical Therapy Procedures III: Modalities (3-4) *McGough* Principles and practice of physical therapy clinical treatment procedures utilizing therapeutic modalities. Lecture and laboratory format.

REHAB 508 Principles of Therapeutic Exercise (3) *E. MCGOUGH* Theory, principles, and practice of exercise procedures used for treatment purposes in physical therapy, including motor learning, variables of motor performance, and exercise prescription. Lectures and laboratories. Simulated patient problems.

REHAB 509 Physical Therapy Procedures: Functional Skills Assessment (1) *Robinson* Development of clinical competence in assessment and training of basic patient functional skills, including handling techniques, transfers, and assisted ambulation.

REHAB 510 Rehabilitation Psychology (2) *Patterson* Focuses on understanding assimilation of disability, participation in rehabilitation, management of behavior, and maintenance of performance from both the practitioner and patient perspective. Focuses on the role of the psychologist in the rehabilitation team. Includes case study and case conference materials.

REHAB 511 Musculoskeletal IV: Clinical Management (5) *Bennett* Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper quadrant anatomy. Lecture and laboratory format.

REHAB 512 Musculoskeletal V: Clinical Management (4) *Maitland* Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on lower quadrant anatomy. Lecture and laboratory format.

REHAB 513 Special Studies in Physical Therapy (1-5, max. 15) Theory and practice in specialized areas of physical therapy. Includes organization and administration of specialized programs, advanced evaluation and treatment techniques, role of the consultant. Credit/no-credit only.

REHAB 514 Systems Review for Physical Therapists (3) *Maitland* Development of advanced physical assessment skills to provide students with the ability to determine if a patient's disorder is within the scope of practice for physical therapy or requires referral to another healthcare provider. Lectures and laboratory format, with an emphasis on the lab component. Credit/no-credit only.

REHAB 515 Advanced Neuromusculoskeletal Interventions in Physical Therapy (3) *Bennett* Advanced neuromusculoskeletal treatment techniques. Emphasis on review of manual therapy, exerciser and modality interventions in case studies across lifespan and continuum of care. Credit/no-credit only.

REHAB 516 Medical Information for Rehabilitation Counselors (3) *Johnson* Lectures in medical science field regarding the etiology, prognosis, and physical restoration of common disabling conditions. Case studies are used extensively, and major emphasis is placed on vocational implications of physical disability. Prerequisite: permission of instructor.

REHAB 517 Physical Therapy Seminar (2-, max. 12) *D. KARTIN, S. MCCOY, K. MCQUADE* Focuses on physical therapy topics pertaining to transcurricular and professional practice issues.

REHAB 519 P-Preceptorship in Rehab Medicine (1, max. 12) *McNalley* Explores the field of physical medicine and rehabilitation. Students observe a physiatrist one half day each week, and gain understanding of the management of acute injuries, chronic disease, and disabilities. Offered: AWSps.

REHAB 520 Seminar (1-5, max. 12) Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics for graduate students, residents, and

postdoctoral fellows in rehabilitation medicine. Lectures, discussion, and laboratory work in selected aspects appropriate to elected area of study for applicants for master-level degree.

REHAB 521 Survey of Pathophysiology for Rehabilitation (2-3, max. 6) *Kerfeld* Uses a systems approach overview of the disease process and the impact it has on the rehabilitation process. Provides a foundation for understanding how dysfunction of major systems can influence a person's ability to move. Discusses risk reduction and prevention strategies surrounding diseases. Credit/no-credit only.

REHAB 522 Neurophysiological Topics in Rehabilitation Medicine (2) *Kinney* Reviews traditional neurophysiological concepts related to the nervous, musculoskeletal, and cardiopulmonary systems as a foundations for rehabilitation practice. Includes recent advances in research and applicable case studies.

REHAB 523 Neuroscience III: Applied Neurology (4) *Matsuda* Theory and principles of advanced exercise procedures used when treating patients with neurologic pathology. Includes the application of principles of motor learning and control; facilitation and inhibition of variables affecting functional motor performance; adaptation of assessment and treatment procedures to patients with different types of neurologic impairments. Lectures and laboratories.

REHAB 525 Exercise Physiology for Rehabilitation (3) *Moritz* Provides systems approach to exercise physiology, including cardiovascular and musculoskeletal response to exercise training, and the impact it has on the rehabilitation process. Reviews common disease processes that effect ability and tolerance, and may benefit from rehabilitation interventions.

REHAB 527 Neuroscience IV: Special Topics in Neurologic Rehabilitation (3) *Kelly* Critical analysis and application of physical therapy assessment and treatment techniques to problems related to specific adult neurological disorders. Neurological disorders to be covered include stroke, spinal cord injury, traumatic brain injury, and multiple sclerosis.

REHAB 528 International Clinical Clerkship (2) *Robinson* Short-term clinical education experience outside the United States. Participants work in a mentored relationship as part of a multi-disciplinary rehabilitation team providing direct clinical services and consultation to patients and their caregivers. Sponsored sites selected and screened by clinical coordinator. Students may choose area of clinical focus. Credit/no-credit only.

REHAB 529 Professional and Practice Issues in Physical Therapy (2) *K. MCQUADE* Augments the student's understanding of the profession and current issues in healthcare. Includes healthcare delivery, scope of practice, professional organization, political activism, specialist certification, licensure, collaboration, therapeutic relationships, disclosure, privacy, and informed consent. Credit/no-credit only.

REHAB 530 Medical Aspects of Vocational Counseling (2-3) *Johnson* Introduction to vocational implications of physical and emotional disabilities. Methods, counseling techniques, therapeutic modalities, community resources used in producing vocational assistance for persons with disabilities. Prerequisite: resident standing in rehabilitation medicine or permission of instructor.

REHAB 531 Critical Thinking Skills in Physical Therapy (3) *K. MCQUADE* Introduces students to structured critical thinking for discussion and analysis of selected musculoskeletal approaches. Interactive small groups explore key papers with controversial or novel assertions, or that address commonly used treatment techniques. Credit/no-credit only.

REHAB 532 Clinical Affiliation for Rehabilitation Counselors (5-6) *Johnson* Under preceptorship of rehabilitation counseling staff, students counsel and evaluate patients with severe physical, emotional, or social problems; administer vocational testing; obtain placement on job stations;

work with community resources for vocational/educational placement; and develop activity-oriented schedules. Prerequisite: permission of instructor.

REHAB 533 Diseases and Diagnosis in Rehabilitation (2-, max. 4) Provides an introduction to medical diagnoses and diseases having high rates of referral to rehabilitation services in order to promote comprehensive patient care.

REHAB 535 Physical Therapy Administration Issues (2) *S. MCCOY* In-depth discussion of administrative issues overarching physical therapy practice, including economic trends, operational policy, budgeting, reimbursement, staffing, business structure, and entrepreneurship. Required for physical therapy students. Credit/no-credit only.

REHAB 536 Patient Evaluation and Clinical Decision Making (1-2, max. 8) *Robinson* General principles and practice of physical therapy patient evaluation and use of the clinical decision-making models. The application of patient management principles through examination techniques and documentation strategies. Lecture and laboratory format.

REHAB 537 Functional Mobility Skills (2) *Pradhan* Principles and practice of physical therapy interventions related to functional mobility skills, including transfer training, wheelchair fitting, wheelchair mobility, gait training, and caregiver training. Lecture and laboratory format.

REHAB 538 Integumentary, Edema Management, and Circulatory Screening for PT (2) *Robinson* Principles and practice of physical therapy evaluation and interventions related to wound care, burn care, edema management, circulatory screening, and splinting applications. Lecture and laboratory format.

REHAB 539 Communication Disorders in Rehabilitation Medicine (1) *Yorkston* Overview of communication disorders secondary to central and peripheral nervous system impairment. Emphasis on facilitating identification of speech/language disorders with discussion of implications for rehabilitation.

REHAB 540 Acute Care Practice in Physical Therapy (2) *Robinson* Principles and practice of physical therapy evaluation and interventions related to individuals with diagnoses in the recent onset (or acute) stage of development.

REHAB 541 Gross Anatomy Laboratory - Extremities (1) *Guthrie, Rollinger* Uses cadavers to study the musculoskeletal, peripheral-vascular, and peripheral-nervous systems. Focuses on the extremities. Uses primarily prospected material, but provides some opportunity for independent dissection. Credit/no-credit only.

REHAB 542 Gross Anatomy Laboratory - Spine (1) *Guthrie, Rollinger* Studies the musculoskeletal, peripheral-vascular, and peripheral-nervous systems from cadavers. Focuses on the spine. Uses primarily prospected material, but includes some opportunity for independent dissection. Credit/no-credit only.

REHAB 543 Rehabilitation Kinesiology Laboratory (1) *Robinson, Rollinger* Provides instruction and focus on practical experience and clinical problem solving in kinesiology by exploring and developing proficiency in a framework for observation, analysis, and description of human movement on the normal pathological spectrum. Credit/no-credit only.

REHAB 544 Functional Anatomy for Rehabilitation of the Extremities (4-) *Goldstein, Guthrie* Covers the functions of the musculoskeletal system as applied by professionals in the practice of clinical rehabilitation. Focuses on anatomy and of the upper and lower extremities, including associated peripheral-vascular and peripheral-nervous systems. Intended to enhance functional assessment and to improve diagnosis and treatment through greater understanding of underlying anatomy.

REHAB 545 Functional Anatomy for Rehabilitation of the Spine (-3) *Goldstein, Guthrie* Covers functions of the musculoskeletal system as applied by professionals in the

practice of clinical rehabilitation. Focuses on the anatomy of the spine, including associated vascular and nervous systems. Enhances functional assessments and the improvement of diagnosis and treatment through greater understanding of underlying anatomy.

REHAB 546 Teaching Practicum in Rehabilitation (1-3, max. 15) Integration of knowledge and skills in teaching through teaching in the classroom or presentation of a minicourse, workshop, or in-service training series. Prerequisite: permission of instructor.

REHAB 547 Biomechanics Basis of Exercise (3) *McQuade* Provides an in-depth exploration of the neuromechanical basis of exercise. Focuses on the applications of biomechanical principles to exercise, including: exercise equipment analysis; neuromuscular basis of strength, power and flexibility; and joint kinematics and stability. Prerequisite: knowledge of basic kinesiology and biomechanics or permission of instructor.

REHAB 548 Kinesiology for Rehabilitation (3) *Guthrie* Advanced study of joint motion and muscle function in relation to both the normal and abnormal state. Focuses on principles of kinesiology as they are applied to human movement and disability. Analyzes specific techniques and interventions employed in the field of rehabilitation medicine.

REHAB 550 Neuropsychology in Rehabilitation (2) *J. HOFFMAN* Examination and management of patients with brain lesions, as well as an understanding of the consequences of such conditions. Prerequisite: graduate standing in rehabilitation medicine.

REHAB 551 Neurobiology for Rehabilitation (5) *Kinney, Pradhan* In-depth analysis of human neuroanatomical structure and neurophysiological function as a basis for rehabilitation practice.

REHAB 555 P-Neuromuscular Electrodiagnosis (2.5) *Kraft* Demonstration of fundamentals of electromyography and peripheral nerve stimulation followed by participation in clinical electrodiagnosis examinations. Develops awareness of knowing when such procedures are indicated for patients and interpreting results rather than developing proficiency in performing these examinations. Prerequisite: permission of instructor.

REHAB 556 Foundations of Rehabilitation Science (3) *Johnson, Kartin, Yorkston* Overview of rehabilitation science and social constructs of disability emphasizing biopsychosocial-environmental models of the enabling-disabling process across the lifespan. Lays the philosophical and theoretical foundations for the study of rehabilitation as a science and is designed to promote interdisciplinary thinking. Prerequisite: instructor permission.

REHAB 557 Evidence-Based Rehabilitation (3) *Kartin, Yorkston* Addresses frameworks for evaluating the evidence in rehabilitation science; asking answerable questions, using advanced search strategies; critically appraising literature; understanding the systematic review process; conducting and interpreting meta-analyses; developing evidence-based practice guidelines; communicating the evidence to stakeholders; and translating evidence into rehabilitation practice. Prerequisite: permission of instructor.

REHAB 558 Rehabilitation Research Methods (3) *Johnson, Kartin, Yorkston* Provides an orientation and critical analysis of current practices in disability and rehabilitation research by appraising methodologies and strategies used to investigate consequences of human function, activity performance, and social participation. Topics include introduction to qualitative and quantitative methodologies with respect to rehabilitation research. Prerequisite: permission of instructor.

REHAB 560 Defining and Measuring Outcomes in Rehabilitation Research (3) *Amtmann* Introduces the importance, methods, and challenges of outcomes research in rehabilitation. Addresses definitions and importance of

outcomes research; behaviors measurement, functional abilities, quality of life, and consumer satisfaction; outcomes measurement for diverse populations across lifespan; research outcomes design; and challenges specific to outcomes research. Prerequisite: permission of instructor.

REHAB 561 Epidemiological and Health Services Approaches to Rehabilitation Research (3) *Ciol, Hoffman* Introduces the application of principles and methods from the fields of epidemiology and health services to rehabilitation research. Provides an overview of epidemiological research methods applicable to rehabilitation research, health services approaches, ethics, and use of research to inform disability policy. Prerequisite: permission of instructor.

REHAB 562 Neuroscience in Rehabilitation (3) *Kelly, Yorkston* Develops knowledge related to neural control of movement; movement dysfunction from neurologic pathology; and methodological approaches to investigating neural control of movement. Includes concepts in motor control; motor learning; and neural plasticity relating to movement dysfunction in people with neurologic pathology and to rehabilitation science. Prerequisite: permission of instructor.

REHAB 564 Practice Skills for Occupational Therapy (1, max. 3) *J. PITONYAK* Provides an introduction to physical assessments and interventions with a focus on physical management of clients, management of medical and adaptive equipment, splint fabrication, and maintenance of therapist and client safety. The therapeutic skills covered serve as a foundation for more advanced technical and professional competencies in subsequent courses and field-work. Credit/no-credit only. Offered: AWSp.

REHAB 566 Special Topics in Rehabilitation (1-9, max. 14) Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

REHAB 567 Practicum in Rehabilitation (1-12, max. 24) Specialized practicum experience in environment providing rehabilitation services. Practicum arrangements and permission by instructor.

REHAB 568 Biophysics as Applied to Physical Medicine (2) *Esselman* Propagation and absorption characteristics of physical forms of energy used for treatment in physical medicine. Physiologic effects basic to prescription of the physical therapy modalities. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 569 Prosthetics and Orthotics for Physical Therapists (2) Introduces the principles and designs of orthoses and prostheses, using a clinical problem-solving approach to determine functional deficits to create joint rehabilitation goals between physical therapy and prosthetics and orthotics in regards to the prosthesis and orthosis. Emphasizes team medicine and collaboration in rehabilitation.

REHAB 570 Foundations of Occupational Therapy (5) *Powell* An overview of the practice of occupational therapy, emphasizing the role of occupational performance in context, frames of reference, clinical reasoning, and purposeful activity. Introduces the diversity of occupational therapy practice environments through didactic and clinical experiences.

REHAB 571 Occupational Performance through the Life Span (4) Overview of human development as it relates to occupational performance and functional adaptation in the ages and stages of life from infancy through old-old age. Emphasis on environmental influences, activity, and occupational roles, tasks, and component behaviors as they relate to individuals in different ages and stages.

REHAB 572 Occupational Therapy Theory and Practice in Psychosocial Dysfunction I (1-7, max. 7) *Fogelberg* An overview of bodies of knowledge in psychosocial practice as related to occupational performance. Learning topics

include major frames of reference, effects of psychosocial disorders on occupational performance (life activities), and occupational therapy evaluation and intervention skills. Lectures, reading, class discussions, role-playing, problem-based learning, and fieldwork comprise the learning experiences.

REHAB 574 Occupational Therapy Theory and Practice in Physical Disabilities I (6) Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches.

REHAB 575 Occupational Therapy Theory and Practice in Physical Disabilities II (5) *Powell* Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches.

REHAB 576 Occupational Therapy Theory and Practice in Pediatrics (1-7, max. 7) *T. JIRI-KOWIC, J. PITONYAK* Provides knowledge and skills necessary for providing occupational therapy evaluation, intervention, and transition services focused on occupational performance (life activities) for children and teens with disabilities and their families.

REHAB 577 Occupational Therapy Theory and Practice in Geriatrics (5) *Powell* Occupational therapy evaluation and intervention with older adults. Covers psychology, physiology, and socio-demographics of aging. Emphasis on interaction skills with the elderly and occupational performance (life activities). Laboratory experiences and fieldwork in the practice setting enhance didactic coursework.

REHAB 578 Occupational Performance Analysis (3) *Rollinger* Skills in the analysis, adaptation, and sequencing of therapeutic and functional activities as they apply to occupational performance. Analysis focuses on performance components (sensorimotor, cognitive, psychosocial, psychological), temporal aspects (chronological, developmental), and environmental aspects (physical, social, cultural).

REHAB 579 Therapeutic Communication (3) Introduces basic principles and skills of effective interpersonal communication in dyadic interactions and in groups. Emphasis on effective listening, interviewing, and principles and concepts of occupational therapy groups. Lectures, readings, class discussions, role playing, and in-class exercises comprise the learning experiences.

REHAB 580 Introduction to Research in Rehabilitation (3) Evaluation of rehabilitation research literature and design of research studies relevant to rehabilitation.

REHAB 581 Application of Measurement Systems (3) *Jirikowic* Provides basis for critically evaluating and using tests and measurements in occupational therapy evaluation. Focus on reliability, validity, norms, test development process, statistics relevant to tests and measurement, and ethical implications of testing. Critical evaluation of selected standardized test used in occupational therapy.

REHAB 582 Assistive Technology in Rehabilitation (3) *T. JIRIKOWIC* Overview of the field of assistive technology as it impacts occupational performance in self-care, work, and leisure activities. Covers interface devices, computer applications, environmental controls, augmentative communications, power mobility, seating and positioning systems, and sensory enhancements.

REHAB 583 Exploring Disability (1) Explores multiple aspects of disability including social, mental, physical, and financial factors. Provides skills for working with people with disabilities and exposure to a multidisciplinary team approach to overcoming healthcare barriers. Utilizes inter-

active didactic with patient participation and introduction to community resources for people with disabilities.

REHAB 585 Leadership and Management in Occupational Therapy (5) *T. MROZ* Focuses on occupational therapy leadership and management in healthcare delivery systems. Includes theoretical and professional competencies focuses on healthcare access, health policy laws, service delivery settings, reimbursement, regulation, political advocacy. Management topics include leadership, program planning, budgeting, personnel, and outcome measurement.

REHAB 588 Fieldwork II Seminar (1) *Rollinger* Supports a successful transition from academic work to the full-time Fieldwork II clinical experiences by reinforcing the integration and application of acquired technical and professional competencies needed for REHAB 594, Fieldwork II. Credit/no-credit only. Offered: Sp.

REHAB 591 Graduate Project (1-4, max. 10) Graduate project focuses on practice, administration, education, policy, research, or other scholarly or creative work. Required of entry-level occupational therapy students.

REHAB 592 Principles of Orthotic Use in Rehabilitation (2) *Crane* General principles and clinical applications of orthoses in patient management, with exposure to research issues in orthotic design.

REHAB 593 Principles of Prosthetic Use in Rehabilitation (2) *Morgenroth* General principles of prevention of amputation, prosthetic design, biomechanics, and clinical applications of upper and lower extremity prostheses.

REHAB 594 Clinical Fieldwork in Occupational Therapy (10, max. 30) *Rollinger* 12-week, full-time fieldwork, delivering occupational therapy services to clients focusing on application of meaningful occupation under direct supervision. Exposure to varied clients across the lifespan and in various settings reflective of current practice. Students must complete a minimum of two 12-week placements. Credit/no-credit only.

REHAB 595 Clinical Affiliation in Physical Therapy ([2-10], max. 30) *Robinson* Clinical practice of physical therapy techniques under supervision in community-based clinics. Credit/no-credit only.

REHAB 596 Electromyography and Clinical Neurophysiology (4) *Kraft* Didactic course covering electromyography and clinical neurophysiology. First part covers basic neurophysiology and second covers electromyography, nerve conduction studies, somatosensory-evoked potentials, residual- and auditory-evoked potentials, single fiber EMG, late response, quantitative analysis, and macro EMG. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 597 Electromyography and Electrodiagnosis Laboratory (1-) *Kraft* Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Credit/no-credit only.

REHAB 598 Electromyography and Electrodiagnosis Laboratory (-1) *Kraft* Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Credit/no-credit only.

REHAB 599 Electromyography and Electrodiagnosis Laboratory (-1) *Kraft* Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Credit/no-credit only.

REHAB 600 Independent Study or Research (*-) Credit/no-credit only.

REHAB 684 Rehabilitation Elective - Boise, ID (8) Students work directly with the physician, seeing a variety of patients with musculoskeletal diagnoses as outlined in the objectives for the course, as well as working as a member of a multi-disciplinary rehab team. They also observe procedures such as EMGs, nerve conduction studies, and

a variety of peripheral and central injections. Students participate in care of injured workers and their return to work. (Four weeks).

REHAB 685 P-Chronic Disease and Disability (4) *McNalley* Structured clinical experience on rehabilitation medicine services. Differences between acute and chronic medicine, identification of disability problems, and therapeutic techniques for re-moving disability. Hospitals are within University system, local area, and WWAMI area. Pre-requisite: third-year medical student standing.

REHAB 686 P-Rehabilitation Medicine Clerkship - Pediatrics (8/12) *McNalley* Incorporates material of REHAB 685 and expands into disabling pediatric disease. School planning, family counseling, community support services included. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics. Prerequisite: third-year medical student standing.

REHAB 687 P-Rehabilitation Medicine Clerkship (8/12) *McNalley* Incorporates material of REHAB 685 and expands into disability problems. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for careers in family medicine, internal medicine, rheumatology, cardiology, neurology, geriatrics, orthopedic surgery, neurosurgery, and cardiovascular surgery. Prerequisite: third-year medical student standing.

REHAB 689 P-Spinal Cord Injury (8/12) *McNalley* Introduction to diagnosis, management, rehabilitation of patients with spinal-cord injuries. Interaction with rehabilitation team, psychiatrists, and subspecialists in urology, neurosurgery, and plastic surgery. Performance at subintern level expected. Veterans' Administration Medical Center only. Prerequisite: MED 665, SURG 665.

REHAB 697 P-Rehabilitation Medicine Special Elective (*, max. 24) *McNalley* Equivalent to REHAB 686, REHAB 687, or REHAB 688. Student arranges with another university, using the "special assignment form." Students qualify after review, similar experience at another university. Prerequisite: permission of instructor.

REHAB 699 P-WWAMI Rehabilitation Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

REHAB 700 Master's Thesis (*-) Credit/no-credit only.

REHAB 800 Doctoral Dissertation in (*-) Offered: AWSpS.

REHAB 801 Practice Doctorate Project/Capstone ([1-4], max. 12) Credit/no-credit only. Offered: AWSpS.

Prosthetics and Orthotics

RHB PO 501 Prosthetics and Orthotics Skills (1) Emphasizes the development of psychomotor skills for the application of contemporary technology uses. Practice and discussion of material and design theories related to durability, weight, and ease of fabrication to encourage problem-solving skills for independent practice. Credit/no-credit only. Offered: A.

RHB PO 502 Professional and Practice Issues (1) Provides an overview of professional and practice issues in prosthetics and orthotics. Includes discussion of healthcare, policy, and systems; introduction to reimbursement, Medicare and Medicaid rules and regulations; practice management; bioethics; professional organizations; legislative issues; and medical ethics and compliance. Offered: Sp.

RHB PO 511 Upper Limb Prosthetics I (4) Covers upper limb prosthetics providing students with background knowledge of rehabilitation planning and principles of below elbow prosthetic management and prescription consideration. With direct patient contact, students assess and then formulate, implement, and evaluate a prosthetic treatment plan. Offered: A.

RHB PO 512 Upper Limb Prosthetics II (4) Integrates principles from upper limb prosthetics I, focusing on above-elbow prosthetic management. Encourages critical thinking and appropriate clinical decision-making through discussions and case study exercises that include body-powered, externally-powered, and hybrid systems. Offered: Sp.

RHB PO 515 Upper Limb Orthotics (3) Focuses on the integration of information acquired in previous foundational courses in anatomy and patient evaluation procedures with knowledge and skills of orthotic principles and theories related to upper limb orthotic interventions and patient management.

RHB PO 521 Lower Limb Prosthetics and Orthotics I: Theory and Application (5) Integrates prior core foundational knowledge (anatomy, kinesiology, medical science, gait analysis, patient evaluation procedures, and functional skills) with new knowledge of prosthetic and orthotic theory, patient evaluation, and clinical practice. Analyzes, evaluates, and synthesizes principles and theories in developing intervention plans for individuals with lower limb dysfunction or amputation. Offered: S.

RHB PO 522 Lower Limb Prosthetics I: Clinical Practice (4) Explains and applies biomechanical principles of prosthetic gait and alignment to treatment of individuals with amputations below the knee. Students develop individualized treatment plans that demonstrate analysis of client needs, application of transtibial socket design, prescription principles, and components. Integrates knowledge of available research and protocols into the planning process. Offered: S.

RHB PO 523 Lower Limb Orthotics I: Clinical Practice (4) Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: S.

RHB PO 524 Lower Limb Prosthetics and Orthotics II: Theory and Application (5) Integrates prior foundational knowledge acquired in RHB PO 521 with new knowledge and skills of prosthetic and orthotic theory and practice. Students actively analyze, evaluate, and synthesize principles and theories in the development of prosthetics/orthotics intervention plans for individuals with lower limb dysfunction or amputation. Prerequisite: RHB PO 521. Offered: A.

RHB PO 525 Lower Limb Prosthetics II: Clinical Practice (4) Includes advanced instruction in concepts and skills developed in Lower Limb Prosthetics I. Offered: A.

RHB PO 526 Lower Limb Orthotics II: Clinical Practice (3) Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate, develop, and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: A.

RHB PO 527 Pediatric Prosthetics and Orthotics (2) Focuses on the integration of information from previous coursework focusing on specific pediatric medical conditions and interventions. Includes discussion of pathology/pathophysiology, etiology, clinical presentation, natural history, and surgical and medical management. Discusses implications of various medical interventions and their functional considerations based on the available literature. Offered: ASp.

RHB PO 528 Lower Limb Prosthetics III: Theory and Application (5) Develops individualized prosthetic treatment plans based on a comprehensive knowledge of prosthetic gait, alignment, transfemoral socket design, and component principles. Develops support treatment plans by in-

tegrating knowledge of available research and treatment protocols into the decision-making process. Offered: W.

RHB PO 529 Lower Limb Prosthetics III: Clinical Practice (6) Advanced instruction in application of biomechanical principles of prosthetic gait and alignment to treatment of individuals with amputations above the knee. Includes obtaining histories, assessing physical function, and taking residual limb impressions and measurements to prove prosthetic care. Offered: W.

RHB PO 530 Lower Limb Orthotics III: Theory and Application (4) Integrates knowledge and competencies from prior courses with new knowledge of orthotics management of the lower limb involving the knee and hip. Students acquire knowledge of components and design options for dysfunction of the hip and knee. Offered: WSp.

RHB PO 531 Lower Limb Orthotics III: Clinical Practice (4) Integrates prior knowledge of design principles, material science, and fabrication process; acquires knowledge of components and design options; and analyzes efficacy of orthotic treatment plans in achieving desired biomechanical goals and outcomes. Offered: WSp.

RHB PO 532 Spinal Orthotics (5) *Yamane* Integrates competencies gained from core foundational courses with additional theories and principles of orthotic management of spinal pathologies including scoliosis, trauma, and congenital and degenerative etiologies. Offered: Sp.

RHB PO 533 Spinal Orthotics I (2) Integrates prior knowledge (anatomy, physiology, patient evaluation skills) obtained in the foundational courses with knowledge and skills of orthotic theory and practice related to trauma and degenerative etiologies. Learning is achieved through lectures, discussion, and laboratory experiences. Offered: AWSp.

RHB PO 534 Spinal Orthotics II (3) Integrate prior knowledge of anatomy, physiology, and clinical evaluation with knowledge and skills of orthotic theory and practice related to scoliosis and kyphosis. Learning is achieved through lectures, discussion, and laboratory experiences.

RHB PO 541 Engineering Concepts (2) Solves problems based on principles of mechanics, strength of materials, force analyses, and fatigue that are related to prosthetic and orthotic design. Applies basic science to component failure. Discusses fiber reinforced materials, thermoforming plastics and hydraulic knee units. Offered: Sp.

RHB PO 561 Clinical Rotation I (2) Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: S.

RHB PO 562 Clinical Rotation II (1) Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: A.

RHB PO 563 Clinical Rotation III (1) Students actively participate in the provision of prosthetics and orthotics treatment services and develop clinical patient care skills under the mentorship of clinical preceptors. Offered: W.

RHB PO 564 Clinical Rotation IV (1) Students actively participate in the provision of prosthetics and orthotics treatment services and refine clinical patient care, decision-making, and problem-solving skills under the mentorship of clinical preceptors. Offered: Sp.

RHB PO 581 Outcome Measures for the Prosthetics and Orthotics Clinic (2) Examines development and use of health-related outcome measures. Focuses on the relationship between measurement constructs and patient populations as well as psychometric properties. Students select, implement, and critically evaluate patient outcome measures. Offered: Sp.

RHB PO 582 Critical Evaluation of the Prosthetics and Orthotics Literature (1) Examines and applies appropriate

methods of analyzing prosthetics/orthotics literature. Offered: A.

RHB PO 583 Evidence Based Practice I (3) Focuses on the use and critical evaluation of evidence to answer clinical problems. Encourages students to become consumer of evidence by developing an understanding of how to acquire and incorporate evidence into routine clinical practice. Offered: W.

RHB PO 584 Evidence Based Practice II (3) Covers developing a treatment plan based on theory, evidence, and experience; and proposing a quantitative and qualitative assessment strategy to evaluate the developed treatment. Encourages students to become consumers of evidence to answer clinically relevant questions. Offered: Sp.

Surgery

BB487 University of Washington Medical Center

The Department of Surgery carries out instruction during all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency-room clerkship is also a required part of the curriculum. The department offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department's clinical activities, including but not limited to trauma, cardiothoracic surgery, plastic surgery, vascular surgery, transplantation, surgical critical care, pediatric surgery, and the management of burn patients.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

SURG 498 Undergraduate Thesis (*, max. 35) Offered to those students who have engaged in undergraduate research in general surgery. (Full- or part-time.)

SURG 499 Undergraduate Research (*, max. 35) Provides an opportunity to participate in ongoing research projects or carry out an independent research project under supervision of Department of Surgery faculty. Practical experience in experimental design and execution is provided under direct supervision of selected faculty members. (Full- or part-time.)

SURG 505 P-Preceptorship in Surgery (1, max. 12) Opportunity for first- and second-year medical students to gain personal experience with clinical faculty members in the community. Students observe general aspects of private practice, including clinical problems seen; practice limitation; doctor-doctor, doctor-patient, and doctor-nurse relationships in the office and hospital. Prerequisite: permission of department.

SURG 600 Independent Study or Research (*-)

SURG 602 P-Clinical Clerkship - Coeur D'Alene, ID (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 603 P-Clinical Clerkship - Spokane VAMC (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating room.

SURG 604 P-Clinical Clerkship - Bozeman, MT (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 605 P-Clinical Clerkship - Swedish Medical Center (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 606 P-Clinical Clerkship - Anchorage, AK (12) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 630 P-WRITE Surgery Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

SURG 642 P-Rural Surgery Clerkship - Pullman, WA (8) Designed to supplement basics learned in surgery required clerkship. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Highly suggested for student entering primary care. Prerequisite: required surgery clerkship; medicine clerkship.

SURG 644 P-Rural Surgery Clerkship - Lewiston, ID (8) Designed to supplement basics learned in surgery required clerkship. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Highly suggested for student entering primary care. Prerequisite: required surgery clerkship; medicine clerkship.

SURG 646 P-Rural Surgery Clerkship - Gillette (8) Designed to supplement basics learned in surgery required clerkship. Provides an excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery clerkship; medicine clerkship; permission of the department.

SURG 647 P-Rural Surgery Clerkship - Powell (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 648 P-Rural Surgery Clerkship - Libby (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 649 P-Rural Surgery Clerkship - Lewistown (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 650 P-Rural Surgery Clerkship - Twin Falls (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 651 P-Community Surgery Clerkship - Rock Springs, WY (8) Designed to supplement basics learned in Surgery 665. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Encouraged for students entering primary care. Prerequisite: completed required Surgery and Medicine clerkships.

SURG 652 P-Plastic Surgery - Spokane (8) Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: surgery and medicine required clerkships.

SURG 653 P-Pediatric Surgery - Spokane (8) Student functions as a subintern directly assisting on the services and is an integral part of the team. Prerequisite: surgery required clerkship.

SURG 654 P-Cardiothoracic Surgery - Spokane (4-8) The student functions as a subintern and directly assists on the service and is an integral part of the team. Prerequisite: surgery required clerkship.

SURG 656 P-Trauma/Acute Care Surgery - Boise (8) The student functions as a subintern and directly assists on the service and is an integral part of the team at St. Alphonsus Trauma Services. (Four weeks).

SURG 657 P-Vascular Surgery - Spokane (4/8) Student spends two or four weeks at the Vascular Institute in Spokane. The student functions as a subintern and directly assists on the service and is an integral part of the team.

SURG 658 P-Ambulatory Surgery Clerkship - Mary Bridge (4) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 659 P-Ambulatory Surgery Clerkship - Madigan (4-8, max. 12) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 660 P-Ambulatory Surgery Clerkship - Group Health (4) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 661 P-Surgical Intensive Care Unit Sub-Internship - VA (8) Designed to augment experience gained in SURG 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery required clerkship.

SURG 662 P-Community Surgery Clerkship - Longview (8) Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 663 P-Subinternship in General Surgery - Virginia Mason (*, max. 16) Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

SURG 664 P-Subinternship in General Surgery - VAMC (*, max. 16) Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

SURG 665 P-Clinical Clerkship - UWMC (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 666 P-Clinical Clerkship - Boise (12) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 667 P-Clinical Clerkship - Spokane (12) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 668 P-Clinical Clerkship - Casper (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 669 P-Clinical Clerkship - Billings (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 670 P-Clinical Clerkship - Missoula (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 671 P-Clinical Clerkship - Madigan (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision-making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 672 P-Clinical Clerkship - HMC (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

SURG 673 P-Clinical Clerkship - VA (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

SURG 674 P-Clinical Clerkship - Virginia Mason (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

SURG 675 P-Clinical Clerkship - Caldwell, ID (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 677 P-Clinical Clerkship - Sheridan, WY (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic

principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 678 P-Clinical Clerkship - Kalispell, MT (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 679 P-Clinical Clerkship - Wenatchee, WA (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 681 P-Peripheral Vascular Disease (4/8, max. 8) Peripheral arterial and venous problems, including methods of clinical evaluation; new diagnostic procedures; and the available methods of treatment. Patient workup, performance of diagnostic studies, and presentation of case material to the staff. Prerequisite: surgery required clerkship.

SURG 682 P-Clinical Burn Care (*, max. 12) Offered on the burn unit of Harborview Medical Center. Exposure to the care of patients with thermal injury, including management of severe metabolic and septic problems and opportunity to participate in surgical procedures. Exposure to plastic and reconstructive surgery. Prerequisite: surgery required clerkship.

SURG 683 P-Pediatric Surgery Externship (8/12) Surgical conditions peculiar to the particular age group with a preponderance of congenital and neoplastic conditions that are amenable to surgical treatment. Prerequisite: surgery required clerkship.

SURG 685 P-Cardiothoracic Surgery Externship (*, max. 12) Serve as subintern, participate in patient care while learning cardiopulmonary hemodynamics of cardiac and thoracic surgery. Observe a wide variety of both cardiac and thoracic disease entities. Participate in the open-heart procedures in the operating room. Opportunity to gain additional understanding of physiology of cardiopulmonary bypass.

SURG 686 P-Plastic Surgery Clerkship and Preceptorship (*, max. 12) Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: surgery and medicine required clerkships.

SURG 687 P-Transplantation Surgery Clerkship (8) Clerkship is in the University regional multi-organ transplantation center. Student participates fully in the care of all transplant patients, on twice daily multidisciplinary rounds, in pre-operative conference, and in the operating room and on the donor harvest team. Weekly didactic teaching sessions. Prerequisite: surgery and medicine required clerkships.

SURG 688 P-Subinternship in General Surgery (*, max. 12) Offered on the general surgery wards of the University-affiliated hospitals. Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

SURG 689 P-Community Surgery Clerkship - Coeur d'Alene (8) Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.

SURG 690 P-Alaska Native Medical Center Surgery Sub-Internship (8/12) Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in gen-

eral, thoracic, vascular, and plastic surgery in a specialized population of patients. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.

SURG 691 P-Surgical Intensive Care Unit Sub-Internship - HMC (8) Designed to augment experience gained in SURG 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery required clerkship.

SURG 692 P-Ambulatory Surgery Clerkship - Seattle Children's (4) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 693 P-Rural Surgery Clerkship - Buffalo (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 694 P-Rural Surgery Clerkship - Riverton (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 695 P-Vascular Thoracic Surgery (8/12) The student spends two weeks on the vascular and two weeks on the thoracic surgery services at Harborview Medical Center. The student functions as a subintern and directly helps the residents manage all patients on the service and is an integral part of the OR team.

SURG 696 P-Breast Surgery - Spokane (4/8) Two or four weeks at the Breast Center in Spokane. Student functions as a subintern directly assisting on the service and is an integral part of the team.

SURG 697 P-Surgery Special Electives (*, max. 24) Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before pre-registration. Prerequisite: surgery required clerkship and permission of department.

SURG 698 P-Clinical Clerkship - Fairbanks (*, max. 24) Includes the diagnosis and management of surgical problems. Focuses on the physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

SURG 699 P-WWAMI Surgery Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

Urology

BB1115 Health Sciences

Urology is the surgical discipline concerned with diseases of the urinary tract in males and females, and the genital system in the male. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal diseases, reproductive biology, neuropathology, renal stone formation, and transplantation.

Clinically the field encompasses a large variety of technical skills including real-time imaging and manipulation, endoscopy, laparoscopy and robotics, and open surgery. Medical diagnosis and treatment are a large part of the discipline.

The department is actively involved in patient care, instruction, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses, and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator at (206) 731-3205 for further information.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

UROL 498 Undergraduate Thesis (*, max. 35) Provides an opportunity for medical students to write in the area of urology.

UROL 499 Undergraduate Research (*, max. 35) The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students.

UROL 501 P-Urology Preceptorship (1, max. 12) Individual experiences with one or more of the full-time department faculty members covering research, teaching, and patient care. Students observe activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- or second-year medical student standing; permission of instructor.

UROL 675 P-Urology Preceptorship (*, max. 8) Student follows a private practice preceptor in all of his or her work. Becomes acquainted with the office management of urological problems. (Two or four weeks). Prerequisite: UROL 680, HUBIO 562.

UROL 679 P-Urology Clerkship - Boise VA (*, max. 8) Two or four week rotation. Full activities of clinical service. Emphasizes basic principles of urology. Prerequisite: HUBIO 562.

UROL 680 P-Urology Clerkship (*, max. 8) *Dalkin, Grady, Krieger, Lendvay, Porter, Voelzke, Wessells, Yang* Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562.

UROL 681 P-Female Urology (4) *J. Miller* Observation of cases of lower urinary tract disorders specific to women, emphasizing behavioral management and multidisciplinary care. Ninety-five percent of cases observed are women. Not intended as the only exposure to urology for students considering urology as career choice. Prerequisite: third- or fourth-year standing and permission of instructor.

UROL 682 P-Urology Clerkship - Spokane (8) Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562.

UROL 683 P-Urology Clerkship - Boise (*, max. 8) Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562.

UROL 684 P-Urology Clerkship - Billings (*, max. 8) Two or four week rotation. Includes full activities of clinical service. Emphasizes basic principles of urology. Prerequisite: HUBIO 562.

UROL 685 P-Urology Sub-Internship (*, max. 12) *Dalkin, Grady, Krieger, Lendvay, Porter, Voelzke, Wessells, Yang* Subintern is responsible for patient workups and for pre-operative and postoperative care and participates in the operating room. Prerequisite: MED 665 or pediatrics basic clerkship, or permission of instructor.

UROL 690 P-Urology Specialties (*, max. 8) For those who wish further exposure to a specific aspect of urology. Stu-

dents spend time with one attending at University of Washington Medical Center, Harborview Medical Center, Seattle Children's Hospital, or Veterans' Administration Hospital studying oncology, infections, infertility, stone disease, impotence, or other aspects of urology. Prerequisite: UROL 680 and permission of instructor.

UROL 697 P-Urology Special Electives (*, max. 24) Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before pre-registration. Prerequisite: permission of instructor.

UROL 699 P-WWAMI Urology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

School of Nursing

T301 Health Sciences

Dean

Azita Emami

Associate Deans

Joie Whitney, Associate Dean for Research

Maggie Baker, Associate Dean for Academic Affairs

Nurse professionals are members of interdisciplinary teams in clinics, hospitals, and community settings, and work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. Nurse practitioners fill critical healthcare needs in both urban and rural settings, often for portions of the population who have not received adequate healthcare. Nurse scientists conduct important research about a variety of health problems and how best to promote health, prevent disease, and care for people who are ill. Nurses also teach in colleges and universities throughout the world.

UNDERGRADUATE PROGRAM

Adviser

T301 Health Sciences, Box 357260

(206) 543-8736

sonas@uw.edu

The School of Nursing offers the following programs of study:

- Bachelor of Science in Nursing degree with eligibility to take the licensure examination to become a registered nurse.
- An accelerated Bachelor of Science in Nursing option for candidates with an existing bachelor's degree. This option provides eligibility to take the licensure examination to become a registered nurse.
- A four-quarter modification of the basic curriculum is available for the registered nurse. This BSN Completion (RN to BSN) program is available at UW Bothell and UW Tacoma, and prepares graduates go on for advanced degrees in nursing.

Bachelor of Science in Nursing

Suggested First- and Second-Year College Courses: See below, under Admission Requirements.

Admission Requirements

Admission to the nursing major occurs once a year, for autumn quarter, with an application deadline of January 15. Selection is competitive.

Application Requirements

1. Cumulative 2.00 GPA or higher
2. To be considered for admission, applicants must satisfy one of the following requirements at time of application.
 - a. Three out of the total prerequisite science courses completed with a minimum 3.00 GPA.
 - b. Four out of the total prerequisite science courses with a minimum 2.80 GPA.
3. The science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students, two quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118,

BIOL 119; B STR 301; MICROM 301 (plus MICROM 302 for UW students; non-UW applicants must take a separate microbiology laboratory if laboratory is not included in the general microbiology course); NUTR 300.

Together with the application and college transcript(s), applicants submit a personal statement; a resume outlining volunteer/paid health-care experience, community service, and cultural awareness; and a recommendation from a health care provider (employer or volunteer coordinator).

4. Applicants are expected to have 100 hours of health care experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application. The majority of applicants present health care experiences of several hundred hours for nine months or more.
5. After an initial review of all applications, some applicants are asked to attend a proctored essay session. The proctored essay dates are published in the admissions publication. Eligible applicants are invited via email.

Entrance Requirements

Prior to beginning the nursing program in the autumn, students must meet the following requirements:

1. A minimum of 90 credits to include the following courses:
 - a. *Written Communication (10 credits):* English composition and W-courses
 - b. *Problem-Solving (8 credits):* One QSR course, chosen from MATH 107, MATH 111, MATH 112, MATH 120, MATH 124, MATH 134, MATH 144, PHIL 115, PHIL 120, PHIL 470, or Q SCI 291. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490
 - c. *Visual, Literary, & Performing Arts (VLPA) (15 credits)*
 - d. *Individuals & Societies (I&S) (15 credits):* To include NURS 201 or equivalent
 - e. *Natural World (NW) (26-33 credits):* To include CHEM 120, CHEM 220, CHEM 221 (three quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 (plus MICROM 302 for UW students; non-UW applicants must take a separate microbiology laboratory if laboratory not included in general microbiology course); NUTR 300
 - f. Electives to complete 90 credits
2. A minimum 2.00 cumulative GPA, and a minimum 2.0 grade for each prerequisite course. Because admission is competitive, the GPA for admission is usually significantly higher.
3. All applicants must be exempted from all English language proficiency requirements at UW in order to start the program. If offered admission the applicant is required to pay for a background check to be run by a company specified by the School of Nursing.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, nursing.uw.edu. To contact the School of Nursing Office of Academic Services, call (206) 543-8736 or 1 (800) 759-NURS or email sonas@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, visit nursing.uw.edu/admissions/info-sessions/.

Major Requirements

Students need a minimum of 180 credits to graduate with a bachelor's degree from the University of Washington. The required credits in the nursing curriculum total 94; thus 86

credits must be earned through general education, nursing prerequisites, and elective courses.

94 credits as follows:

1. *Nursing Foundations (52 credits):* NURS 301, NURS 303, NURS 304, NURS 308, NURS 309, NURS 310, NURS 401, NURS 404, NURS 405, NURS 407, NURS 410, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420
 2. *Clinical Nursing (39 credits):* NCLIN 302, NCLIN 306, NCLIN 403, NCLIN 407, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418
 3. *Nursing Research and Methods (3 credits):* NMETH 403
- Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

Accelerated Bachelor of Science in Nursing Option

Admission Requirements

Admission occurs once a year, for summer quarter, with an application deadline in preceding autumn quarter. Selection is competitive.

Application Requirements

1. Cumulative 2.80 college-level GPA or higher.
2. At least four of the total prerequisite science courses completed with a minimum 3.0 grade in each course, and a cumulative 3.30 GPA or higher in these courses. Science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two quarter sequence -- one general chemistry and one organic -- for non-UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non-UW applicants must take a separate microbiology lab if lab is not included in the general microbiology course); NUTR 300.
3. Together with the application and college transcript(s), applicant submits a series of personal statements; a resume outlining volunteer/paid healthcare experience, community service, and cultural awareness; and a recommendation from a healthcare provider (employer or volunteer coordinator).
4. Applicants are expected to have 100 hours of health-care experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application. The majority of applicants present healthcare experiences of several hundred hours for nine months or more.
5. All applicants are asked to attend a proctored essay session.

Entrance Requirements

Prior to beginning the nursing program in summer, students must meet the following requirements:

1. Bachelor's degree in a non-nursing field.
2. Completion of a lifespan growth and development course -- NURS 201 or equivalent.
3. Completion of one statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490.
4. Completion of all Natural World courses: CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non UW applicants must take a separate microbiology laboratory if laboratory not included in general microbiology course.); NUTR 300. Minimum 3.30 cumulative GPA in these courses.
5. Minimum 3.00 cumulative GPA, and minimum 3.0 grade for each prerequisite course.

- All applicants must be exempted from all English language proficiency requirements at UW in order to start the program. If offered admission the applicant is required to pay for a background check to be run by a company specified by the School of Nursing.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, nursing.uw.edu. To contact the School of Nursing Office of Academic Services, call (206) 543-8736 or 1 (800) 759-NURS or email sonas@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, visit nursing.uw.edu/admissions/info-sessions/.

Major Requirements

94 credits, as follows:

- Nursing Foundations (52 credits)*: NURS 301, NURS 303, NURS 304, NURS 308, NURS 309, NURS 310, NURS 401, NURS 404, NURS 405, NURS 407, NURS 410, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420
- Clinical Nursing (39 credits)*: NCLIN 302, NCLIN 306, NCLIN 403, NCLIN 407, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418
- Nursing Research and Methods (3 credits)*: NMETH 403

Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes:** The School of Nursing prepares its graduates to function as generalists in professional nursing practice and to collaborate with other health-care providers. The BSN/ ABSN undergraduate curriculum emphasizes theory and clinical practice to ensure critical thinking, human caring, and clinical expertise. Clinical experiences are provided in institutional and community settings for preventive and acute care. For the ten goals of the BSN degree program, visit nursing.uw.edu/admissions/bsn/curriculum/.
- Instructional and Research Facilities:** Learning Laboratory
- Honors Options Available:** With College Honors (Completion of Honors core curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- Research Internships and Service Learning:** Students complete eight clinical courses during the BSN program beginning with the first quarter of the program. Each student experiences placements in medical-surgical nursing, pediatric, family nursing, psychosocial mental health, and community-based nursing. Clinical hours per course range from six hours/week during the first quarter to 24 hours/week during the final quarter.
- Department Scholarships:** Limited scholarships based on student need established by FAFSA. Students are invited to apply after they have been admitted to the program by completing the School of Nursing Financial Aid application.
- Student Organizations/Associations:** Students may join the Professional Organization of Nursing Students (PONS) after admission to the program. PONS' involvement spans all aspects of the undergraduate program: recruitment, orientation, education, fund raising, and social events.

GRADUATE PROGRAM

Graduate Program Coordinator

T301 Health Sciences, Box 357260

(206) 543-8736

sonas@uw.edu

The School of Nursing offers graduate study leading to the degrees of Master of Nursing (MN), Master of Science (MS), Doctor of Nursing Practice (DNP) and Doctor of Philosophy in nursing science (PhD). The DNP program admits RNs interested in advanced clinical practice. The PhD program prepares students for roles as scientists, scholars, and educators. Neither the MS nor the PhD program requires RN licensure for admission.

The School of Nursing offers an MN degree with a focus in community health systems nursing. A thesis or scholarly project is required for the MN degree. A concurrent MN/ MPH degree is also available.

The MS degree is in Clinical Informatics and Patient-Centered Technologies (CIPCT). A thesis or scholarly project is required for the MS degree.

The Doctor of Nursing Practice (DNP) program admits postbaccalaureate or post-graduate students for either advanced practice registered nursing or advanced systems and population systems health. The following tracks are available (subject to change; visit School of Nursing website): adult gerontology primary care nurse practitioner; community health-systems nursing; family nurse practitioner; pediatric nurse practitioner; pediatric clinical nurse specialist; neonatal clinical nurse specialist; neonatal nurse practitioner; nurse midwifery; perinatal nurse specialist; and psychiatric mental health nurse practitioner. Applicants who already have a MN degree may apply to earn a DNP degree in their same specialty. The DNP program of study culminates in a capstone clinical investigative project.

The PhD in nursing science is a research-based degree program that trains students to create knowledge that influences and alters the health of individuals, groups, and populations, using current theories of nursing science. PhD students work closely with faculty to create their own research-based programs of study. These programs of study are based on applicants' research interests as they intersect with the current research interests of School of Nursing faculty. The PhD in nursing science program also offers an optional concentration in statistics in partnership with the Center for Statistics and the Social Sciences. All PhD students must successfully defend a dissertation at the end of their program of study.

The School of Nursing also offers a Graduate Certificate Program in Advanced Practice Nursing (GCPAPN), with sub-tracks as follows: adult nurse practitioner; psychiatric mental health nurse practitioner; advanced practice environmental health; infant mental health; pediatric nurse practitioner; nurse midwifery; neonatal clinical nurse specialist; and neonatal nurse practitioner. (See School's website for updated information.) Admission criteria vary slightly based on focus of the graduate certificate. Some graduate certificate options require an RN license and a graduate degree in nursing. All options require completion of or concurrent enrollment in a graduate degree and a minimum 3.00 GPA in the last 90 quarter (60 semester) graded credits. Admission and program requirements for these certificates are the same as requirements for the umbrella degree in which the student is enrolled.

Part-time study is available for some graduate degree programs. Coursework may be started prior to formal admission to a program as a graduate nonmatriculated student (GNM). GNM status allows the student to take non-clinical courses and to earn up to 12 graduate-level credits that may be applied to a graduate program if the student is later

admitted. Time limits for acceptance of courses taken as a GNM student are six years for a master's degree and ten years for a doctoral degree from the first course to completion of the degree.

Master of Nursing

Admission Requirements

- Baccalaureate degree from a nationally accredited nursing program with a minimum 3.00 GPA on a 4.00 scale for the last 90 graded quarter credits,
 - OR -
 - Associate of Arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing, acceptable to the UW. In addition, RNs with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
- A 3-credit basic course in descriptive and inferential statistics with a minimum 2.0 grade
- An active, unrestricted United States RN license at the time of application. If the applicant does not have a Washington State license, the applicant must obtain one prior to beginning the UW Master of Nursing program.
- Proof of English Language Proficiency. All applicants to the DNP program whose native language is not English must demonstrate English language proficiency unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
- Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admission process
- Three letters of recommendation: one academic, one clinical, and one additional recommendation of either type. Recommendations may be submitted online through the Graduate School.
- Admission essays relevant to the MN program objectives
- One official transcript from each collegiate institution attended, mailed to the School of Nursing along with other application materials
- If admitted to the MN program, the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

Degree Requirements

38-41 credits, as follows:

Nursing science and professional foundations (15 credits); clinical practice (6 credits); scholarly inquiry (11 credits with scholarly project or 14 credits with thesis); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

Master of Nursing/Master of Public Health Concurrent Degree Program (MN/ MPH)

Admission Requirements

See admission requirements for MN and MPH individual degrees. Students must apply separately to, and be accepted by, each school. Students already enrolled in one

school may apply for admission to the other and to the concurrent degree track. Students are encouraged to complete up to one year of study in one school before entering the other.

Degree Requirements

See MN and MPH individual degree requirements; common requirements are as follows:

At least 18 quarter credits for the master's degree in each program numbered 500 and above. Numerical grades in at least 18 quarter credits of coursework for each degree and all required courses taken graded. Up to 12 credits taken in one school can be counted toward the other school's total credit requirements, if approved by both programs. Electives for each School's program can be fulfilled by taking the required courses of the other School's program.

One thesis is required. The 9 required thesis credits can be taken in either School, which then becomes the "home" School and the source of the thesis committee chair as well as the program authorized to approve the thesis. Each School agrees to accept the other School's thesis as meeting its thesis requirement. Faculty from each School should be involved in development of the thesis and sit on the thesis committee.

Master of Science

Admission Requirements

1. A baccalaureate degree in any discipline from a regionally accredited institution of higher learning with a minimum 3.00 GPA on a 4.00 scale for the last 90 graded quarter credits by date of enrollment. Applicants to the Master of Science need not have a previous degree in nursing.
2. A 3-credit basic course in descriptive and inferential statistics with a minimum 2.0 grade. Visit the School of Nursing website for a list of approved statistics courses.
3. Proof of English Language Proficiency. All applicants to the MS program whose native language is not English must demonstrate English language proficiency unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that the previous degree instruction was in English. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
4. Three letters of recommendation, two from persons qualified to comment on the applicant's academic abilities and one from a person who can provide work-related (practice) information.
5. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admission process.
6. Resume describing relevant work, professional, and volunteer experiences.
7. Admission essays relevant to the MS degree program objectives.
8. If admitted to the MS program, the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

For students planning to take clinical nursing courses as part of their program of study, an active, unrestricted Washington RN license is required. Other applicants to the Master of Science program are not required to have an active RN license or to have a previous degree in nursing.

Degree Requirements

46-49 credits, as follows:

Nursing science (15 credits); professional foundations (3 credits); theory development (5 credits); modes of inquiry (11 credits); scholarly project (6 credits) or thesis (9

credits); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

Doctor of Nursing Practice

Admission Requirements

1. Baccalaureate degree from a nationally accredited nursing program with a minimum 3.00 GPA on a 4.00 scale for the last 90 graded quarter credits. Applicants with a master's degree from a nationally accredited nursing program are also welcome to apply and must have a minimum 3.00 GPA on a 4.00 scale for the last 90 graded credits of the master's degree.

- OR -

Associate of Arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing, is acceptable. In addition, RNs with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.

2. If an applicant has not completed a master's degree, a 3-credit basic course in descriptive and inferential statistics with a minimum 2.0 grade, taken within five years of matriculation.
3. Proof of English Language Proficiency. All applicants to the DNP program whose native language is not English must demonstrate English language proficiency unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
4. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admission process
5. Three letters of recommendation, one academic, one clinical, and one additional recommendation of either type. Recommendations may be submitted online through the Graduate School.
6. Response to three admission questions
7. Resume describing relevant work, professional, and volunteer experiences.
8. BSN equivalency, if applicable
9. One official transcript from each collegiate institution attended, mailed to the School of Nursing along with other application materials.
10. All applicants to the Doctor of Nursing Practice program must have an active, unrestricted United States RN license at the time of application. If the applicant does not have a Washington State RN license, the applicant must obtain one prior to beginning the UW Doctor of Nursing Practice program.
11. If admitted to the DNP program the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

Degree Requirements

93 credits minimum, as follows:

1. Advanced Practice (minimum 45 credits)
2. Leadership (minimum 15 credits)
3. Practice Inquiry (minimum 30 credits)

Doctor of Philosophy

Admission Requirements

1. A baccalaureate degree from a college or university of recognized rank. Although the majority of applicants have a master's degree in nursing, neither a nursing background nor RN licensure is required for admission.
2. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admission process
3. Proof of English Language Proficiency. All applicants to the PhD program whose native language is not English must demonstrate English language proficiency unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
4. A scholarly writing sample (25 pages or less) providing an example of an applicant's current skills in scholarly writing. The sample should analyze a current clinical problem or professional issue using appropriate references to making an argument and supporting that position. The paper must be solely authored by the applicant. It is evaluated on multiple factors, including clarity, logical consistency, insight, and creativity or innovation. These are not accepted. If an editor is used, copies of both the edited and non-edited versions should be submitted for review.
5. Letters of recommendation from three persons knowledgeable about the individual's potential for a research career in nursing.
6. Statement of goals and research interests in response to specific questions listed on the application related to the pursuit of doctoral studies. The statement is used to evaluate the applicant's ability in written self-expression and the congruency of goals and research interests with the program objectives.
7. If admitted to the PhD program the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

Degree Requirements

93 credits minimum, as follows:

1. *Theory and Domain of Knowledge (minimum 41 credits)*: Coursework in this category provides grounding in science and nursing science fundamental to examination of more specific issues in the relationship of human health and nursing.
2. *Scholarly Inquiry (minimum 52 credits)*: Coursework deals with means of developing knowledge. Exposure to variety of approaches with encouragement to develop advanced skills is at least one methodology. Includes 27 dissertation credits.

Financial Aid

A limited number of nurse traineeships are available for pre-master's study. Other financial aid is available on a limited basis. Teaching assistantships and research assistantships are available to a limited number of students. Priority for these appointments is given to pre-doctoral students.

Additional Information

For additional information on current graduate program content, admission criteria, deadlines, as well as application forms, visit the School of Nursing website at <http://nursing.uw.edu>. To contact the Office of Academic Services, School of Nursing, call (206) 543-8736 or 1- (800) 759-NURS or email sonas@uw.edu. Information sessions

are offered periodically in the School of Nursing, Health Sciences Building T310, and an information session podcast is available.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

NSG 432 Infants and Children: Risk and Resilience (5) I&S C. DILLON, M. HIRSCHSTEIN, S. SPIEKER Provides a survey of infant and early childhood development, including prenatal and neonatal factors, and social/societal influences, using an infant mental health framework. Emphasizes how risk and protective factors can impact social-emotional, physical, and cognitive growth. Includes research-based principles and approaches to supporting families, teachers, and caregivers of young children. Offered: SpS.

NSG 505 Applied Occupational Health and Safety (3) Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with ENV H 559/IND E 567; Sp, even years.

NSG 506 Occupational Safety Management (4) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with ENV H 560; Sp.

NSG 507 Technical Aspects of Occupational Safety (3) Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, student receive an OSHA 510 30-hour Construction Safety and Health certificate. Offered: jointly with ENV H 562; W.

NSG 508 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/IND E 566; W.

NSG 511 Prevention Issues in Community Health (3) An interdisciplinary overview of community health prevention approaches focusing on the social determinants of health and health disparity reduction among vulnerable populations. Analysis of community and population preventive strategies across the life course. Roles of advanced community health nurses as prevention leaders and consumers of prevention information are emphasized. Offered: Sp.

NSG 512 Prevention Critique in Community Health (3) Critical examination of community health prevention programs that build community health capacity and show promise in facilitating long-term health equity among vulnerable populations. Focuses on the leading health disparities among U.S. racial and ethnic people of color, and how to be a critical program consumer, adopter, and adapter. Offered: A.

NSG 513 Psychopharmacology for Children and Adolescents (1) Tyson, Walsh Reviews pertinent issues in prescribing psychoactive medications to children and adolescents. Emphasizes empirical neuroendocrine bases, and nursing management relevant to these interventions. Examines legal and ethical issues pertaining to prescrib-

ing for children and adolescents. Credit/no-credit only. Offered: S.

NSG 516 Physiological Aspects of Aging (3) B. COCHRANE Focuses on biological theories of aging, major physiological and pathophysiological changes that occur in human body systems with aging. Also addresses health considerations and individual adaptations based on current research. Offered: A.

NSG 530 Leadership, Communication, and Professional Identity (4) Brown, Shannon Analyzes professional identity, transition to new roles and responsibilities, leadership approaches, and inter-professional teamwork skills needed to provide effective, efficient and patient/community-centered care. Covers advanced, multi-modal communication strategies specific to professional role certification, conflict resolution, professional communication, inter-professional teamwork and leadership using interactive, skills-based learning. Offered: A.

NSG 537 Development and Psychopathology: Parents and Infants (3) Spieker Provides an overview of typical social and emotional development and psychopathology in children ages three and younger. Demonstrates attachment relationships with parents and family to infant's development and psychopathology. Core course of Infant Mental Health Certificate program. Offered: W.

NSG 539 Assessment and Management of Common Psychosocial and Biophysical Conditions in the Perinatal Period (1-3, max. 3) Teaches assessment and management of psychosocial and biophysical adaptation of child-bearing women and families during the perinatal period, with emphasis on parenthood transition including common stressors, parent-infant interactions, and community-based support models. Included is adaptation of the neonate and the continuum from prenatal to pediatric care.

NSG 540 Telehealth Systems and Applications (4) G. DEMIRIS Prepares consumers, managers, and researchers of telehealth systems through guided exploration into the components of such systems. Introduces challenges and opportunities facing designers and managers of telehealth and remote healthcare delivery networks. Offered: jointly with BIME 581.

NSG 548 Basic Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2) Covers the theory and practice of basic arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, as well as selected pharmacologic and electrical management. Content is appropriate for primary care, and provides foundation for advanced interpretation for students in acute/critical care.

NSG 549 Complex Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2) Covers the theory and practice of complex arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, as well as selected pharmacologic and electrical management. Appropriate for acute/critical care. Prerequisite: NSG 548, or satisfactory pretest of basic ECG interpretation.

NSG 550 Seminar on Professional Issues in Nursing Education (3) Seminar on role and related professional issues in nursing education. Prerequisite: either NSG 545, B NURS 513, or T NURS 513; either NSG 546, B NURS 511, or T NURS 511. Offered: jointly with B NURS 550/T NURS 550.

NSG 551 Health Politics and Policy (3) Critically analyzes the politics of health policy in the United States. Examines leadership and advocacy in influencing politics and policy to address and influence health outcomes. Offered: W.

NSG 552 Social Determinants of Health and Health Equity (3) Examines fundamental concepts, emerging theory, research, and intervention strategies regarding the influence and putative mechanisms of environment and societal factors on health at population, community, and individual levels. Emphasizes an interdisciplinary, multi-level

so-cio-ecological perspective on health and illness with consideration of principles of equity and justice in societal contexts. Offered: W.

NSG 553 Foundations of Health Systems and Health Economics (3) Examines health systems and care delivery in the context of principles of business, finance, and economics. Concepts applied in the design of cost and care effectiveness system-level health improvements. Prerequisite: either NMETH 536, which may be taken concurrently, or permission of instructor. Offered: Sp.

NSG 554 Occupational Health Nursing: Practice Issues (3) Examination of current, emerging occupational health and safety topics affecting worker populations. Includes discussion of workforce groups, work environments, and socio-political contexts; introduces prevalent health matters resulting from occupational exposures; applies theoretical concepts to the prevention of work-related injuries and illnesses; and identifies issues affecting advanced professional practice and leadership roles.

NSG 555 Perspectives on Implementing Research in Advanced Nursing Practice (3) Boutain, Landis Provides an overview of contemporary multidisciplinary perspectives, models and research approaches for advanced practice nursing. Focuses on understanding and applying science to practice, and practice to science. Emphasizes ethical practice, scientific responsibility, research curiosity and use. Offered: A.

NSG 556 Program Planning and Health Systems and Multicultural Communities (4) Chrisman, Strickland, Tsai Explores culture as it related to the program planning process, methods, theories, attitudes, and skills in health promotion and disease prevention through community engagement. Offered: W.

NSG 557 Physiology and Pathophysiology Across the Life Span (4) Analyzes disordered physiologic responses in individuals within the context of lifespan physiology. Examines pathophysiologic principles and responses, using case studies as exemplars for selected concepts, and the relationship between physiologic and pathophysiologic principles and the evidence basis for current practice. Offered: A.

NSG 558 Occupational Health Nursing: Advanced Practice and Leadership in Program Development (3) Examination of advanced professional practice and leadership in the context of occupational health and safety programs. Focuses on assessment, development, implementation, and evaluation of programs involving workplace health surveillance, case management, workers' compensation, and health promotion in consideration of political, economic, legal, ethical issues, and application of current research.

NSG 559 Prevention Effectiveness in Community Health (1) Focuses on increasing effectiveness of organization- and community-level health promotion and prevention programs with multicultural communities. Includes web-based tool-kits pertaining to: cross-cultural adaptations of health promotion programs; mental health promotion in communities; institutional readiness to sustain prevention policies; and community engagement in health promotion efforts. Credit/no-credit only.

NSG 560 Pediatric Case Studies (2) Focuses on integration and application of pediatric history-taking, diagnostic reasoning, behavioral and developmental assessment, health promotion, and management of common pediatric conditions in case-based scenarios. Prerequisite: NCLIN 502; NURS 518; NURS 529, any of which may be taken concurrently, or permission of instructor. Credit/no-credit only. Offered: W.

NSG 561 Community Health Systems for Equity (3) Defines, evaluates, and synthesizes how community health systems promote health equity. Emphasizes how various systems, such as care, public health, governmental, tribal, family, and social-kin, nonprofit, faith-based, and business, inhibit or promote communal health. Highlights advanced

practice, practice inquiry, and leadership implications. Offered: A.

NSG 562 Management of Adults I (2-3) Focuses on evidence-based clinical-decision making and management of common adult health problems, emphasizing episodic and acute concerns. Emphasizes concepts of health promotion and patient/family focuses care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care.

NSG 563 Management of Adults II (3) Focuses on evidence-based clinical-decision making and management of common adult health problems, emphasizing episodic and acute concerns. Emphasizes concepts of health promotion and patient/family focuses care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care. Offered: Sp.

NSG 564 Management of the Adult III (3) Focuses on evidence-based patient-centered care of older adults with multiple chronic conditions across the continuum from outpatient to acutely or critically ill, including prevention and management of geriatric syndromes. Explores strategies for optimal transition across care settings and across the health continuum.

NSG 565 Primary Care Management Across the Lifespan (1) Clinical application of theories of health promotion and chronic disease management in complex patients across lifespan, utilizing evidence-based approaches to health promotion, assessment, differential diagnosis and disease management. Emphasizes clinical decision-making, considering the chronic care model, coordination of care, poly-drug therapy, and information systems. Prerequisite: NCLIN 518, which must be taken concurrently; permission of instructor. Credit/no-credit only. Offered: A.

NSG 566 Pediatric Pharmacology (1-2, max. 2) Focuses on clinical application of pharmacologic management in pediatric acute and chronic illnesses. Emphasizes pediatric pharmacotherapeutics including selection of therapeutic agents, indications, efficacy, therapeutic and adverse effects, monitoring parameters, and dosing principles. Includes didactic as well as case-based learning strategies. Offered: Sp.

NSG 567 Advanced Pharmacotherapeutics in Complex Case Management (1) Uses a case-based method to examine an evidence-based approach to pharmacotherapeutic management of complex chronic conditions across the lifespan. Incorporates examination of both pharmacologic factors and patient-related factors, such as age, socioeconomic status, and behavioral aspects that support the selection of commonly used drugs for patients of all ages across multiple settings. Prerequisite: PHARM 514; permission of instructor. Offered: A.

NSG 568 Infant Observation (1-, max. 4) C. DILLON, S. SPIEKER Includes observing an infant and parent in the first year of life and reflecting on observations. GCPAPN-IMH core course. Four quarter sequence begins each Autumn. Offered: AWSpS.

Nursing

NURS 201 Growth and Development Through the Life Span (5-6) I&S Focuses on human growth and development throughout the life span. Emphasizes influence of growth and development theory and research on achievement of health and health promotional efforts directed toward persons of various ages and life styles. Optional service learning component. Open to nonmajors. Offered: AWS.

NURS 204 Learning Wellness: Healthy Ways to Respond to Stressful Student Life (3) Examines the intimate connections of body, mind, spirit, as well as how stress challenges personal health. Provides overview of methods that respond to stress in health-producing ways, including time management, making healthy choices, and practicing well-

ness. Discusses evidence for each method and provides experiential components. Credit/no-credit only.

NURS 205 Nursing as a Career in Contemporary Society (1) Introduces an accurate description of nursing career, educational requirements and rationale, including advanced degree career possibilities. Explores breadth of nursing roles in promoting health to individuals, groups, and populations. Links historical development with contemporary practice. Explores factors that promote student and professional success in nursing. Credit/no-credit only.

NURS 301 Clinical Applications of Anatomy and Physiology (3) Application of anatomic and physiologic concepts to selected clinical phenomena. Focuses on integrated responses and functional health patterns. Exemplars of developmental and lifespan factors are identified. Includes experiential activities to enhance integration of content. Offered: AS.

NURS 303 Foundations of Professional Nursing (2-3) Exploration of the profession of nursing, including past and present work of nurses, the experience of being ill and seeking healthcare, and the U.S. healthcare system. Offered: Sp.

NURS 304 Human Responses I (3) Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: A.

NURS 308 Human Responses II (3) Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: W.

NURS 309 Pharmacotherapeutics in Nursing Practice I (2-) Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. First of a two-quarter sequence. Offered: A.

NURS 310 Pharmacotherapeutics in Nursing Practice II (-[2-3]) Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. Second of a two-quarter sequence. Offered: W.

NURS 401 Care in Illness I (5) Introduces major concepts relevant to the experience of acute and chronic illness, including physiological, pathophysiological, behavioral and experimental human responses, assessment of functional health status and interdisciplinary therapeutics in common alteration across the lifespan. First of a two-quarter sequence. Offered: W.

NURS 404 Gerontological Nursing (2) Focuses on concepts and issues relevant to the nursing care of older adults across the care continuum. Major course themes include nursing assessment of the older adult, health promotion, patient safety, geriatric syndromes, gerontechnology and influence of payer systems on care for older adults. Prerequisite: NURS 310.

NURS 405 Care in Illness II (5) Continuation of NURS 401, further examining selected psychopathologic and pathophysiological alterations in health of individuals in context of families across life span. Emphasizes assessing functioning in psychosocial, cultural, person-environment relationships, and healthcare resources to plan nursing strategies for acutely/chronically ill individuals of all ages.

NURS 407 Culture, Diversity, and Nursing Practice (3) Analyzes the impact of cultural, social, and global factors on the health of multicultural and diverse groups at the individual, population, and systems levels. Students gain knowledge and skills to effectively respond to the healthcare needs

of multicultural societies through non-discriminatory and culturally appropriate nursing care practice. Offered: Sp.

NURS 410 Legal and Ethical Issues in Clinical Practice (3) Identification of ethical and legal issues and the ensuing dilemmas relevant to the profession of nursing and nurses as health professionals and citizens. Selected problems and dilemmas affecting nurses, nursing, and the delivery of healthcare analyzed using specific moral-ethical perspectives. Offered: AW.

NURS 412 Healthcare Systems (3) Introduction to analysis of healthcare systems with emphasis on political economy of health, access and utilization, disparities in health, public and private health insurance and reimbursement issues. Comparison of U.S. and other national healthcare systems. Offered: Sp.

NURS 415 Nursing of Families: Childbearing and Childrearing (5) Applies family concepts to nursing of childbearing and childrearing families. Focuses on family as context for care of individuals. Emphasizes use of physiological, psychological, developmental, cultural, and environmental theories for health promotion, disease prevention, and nursing therapeutics. Offered: AW.

NURS 417 Psychosocial Nursing in Health and Illness (3) Examines psychosocial disorders/issues of life transitions from integrated perspective of biological, social sciences, nursing, and humanities. Emphasizes utilizing psychosocial nursing and interpersonal therapeutics for assessment, intervention, health promotion with individuals/families/groups at risk for experiencing psychosocial disorders. Prerequisite: NCLIN 418, which may be taken concurrently. Offered: AW.

NURS 419 Transition to Professional Practice (3) Focuses on critical examination, synthesis, and evaluation of professional nursing care. Emphasizes mastery, synthesis, and application of theory, research, and practice in relation to nursing management, leadership, and nursing care of individual clients or groups of clients and populations. Offered: SpS.

NURS 420 Promoting Community and Public Health (3) DIV Covers community and public health nursing theory focusing on populations. Includes a synthesis of theory, research, and practice in relation to community/public health, informed by a social justice framework, social determinants of health, community partnerships, and culturally appropriate population-based community/public health nursing. Corequisite: NCLIN 409.

NURS 445 Topics in Nursing (1-10, max. 10) Guided survey and discussion of current literature on major topics in physiological nursing. Seminar/lecture with analysis and discussion of selected topics and readings. May have clinical component. Implications for nursing practice and healthcare emphasized.

NURS 499 Special Electives (1-4, max. 15) Seminars on selected nursing issues of clinical problems, with independent study option, under supervision of nursing faculty. Credit/no-credit only. Offered: AWSpS.

NURS 500 Child Management II: Chronic Conditions (3) Kleckhefer, Magyary Focuses on approaches to caring for children and adolescents with chronic physical, neuro-biological, developmental, or psychosocial conditions. Emphasizes evidence-based, culturally-competent, family-centered, interdisciplinary, and comprehensive assessment, referral, management, and care-coordination strategies. Offered: S.

NURS 501 Child Mental Health Assessment and Interventions (3) Developmentally based assessment and therapeutic approaches relevant for children with psychosocial health problems. Consideration to matching therapeutic approaches with specific nature of symptomatology and other child, family, cultural, and environmental characteristics, including social and educational systems. Individual and group evaluation research emphasized.

NURS 504 Clinical Nursing Therapeutics (1-6, max. 6) Critical analysis of therapeutic modalities to assist patients with a variety of responses to health problems. Includes selected therapies such as suction/drainage, positioning to address responses in critical, life threatening, and chronic/continuing health states. Varying credits assigned for modules covering particular therapies. Prerequisite: NURS 502, NURS 503, or permission of instructor.

NURS 505 Selected Topics in Psychosocial and Community Health Nursing (2-10, max. 10) In-depth exploration of the major theoretical issues in psychosocial nursing. Seminar with analysis and discussion of selected topics and readings and implications for research and healthcare.

NURS 507 Older Adult Mental Health Assessment and Intervention (2) Examines the dynamics of mental health research and practice in normal, optimal, and pathological aging. Focuses on psychosocial and environmental influences on mental health of older adults. Topics include: models of aging, cognitive impairment, depression, severe mental illness, and successful strategies to enhance mental health in older adults.

NURS 509 Issues in Violence and Aggression for Health Professionals (3) Focuses on research and theory of violent/aggressive behavior. Perspectives of victim, offender, family, community, society examined. Focus is recognition of violence against women. Designed to challenge students to clarify beliefs, values related to topics such as rape, homicide, domestic violence. Prerequisite: graduate nursing student or permission of instructor.

NURS 514 Physiologic Adaptations in Women and Children: Physiologic Adaptations During Pregnancy and Postpartum (1-3, max. 6) *Blackburn* Analyzes the physiologic adaptations in the maternal-fetal-neonatal unit, fetal development, and developmental adaptations in children from infancy to adolescence. Implications of normal and altered physiologic functions for nursing practice and examination of the basis for selected nursing intervention strategies.

NURS 515 Common Adolescent Health Problems (2-3) Focuses on assessment, clinical decision making, and management of common adolescent problems. Concepts and theories of health promotion, adolescent development, and intervention strategies are explored to provide a broad framework for caring for adolescents in primary settings.

NURS 517 Pediatric Pulmonary Anatomy, Physiology, and Pathophysiology: Clinical Applications (2) Content includes normal pediatric lung development infancy through adolescence and explores evidence for diagnosis, management, and follow up of commonly encountered respiratory problems. Emphasizes coordination of care with multiple disciplines when diagnosing and treating children with special health care pulmonary needs and family centered care and professional leadership role. Prerequisite: permission of instructor. Offered: Sp.

NURS 518 Child Management I: Acute Conditions (3) Focuses on use of clinical decision making framework to develop theoretically and empirically sound individualized management plans for the young child, with physical and behavioral symptoms of common pediatric illness, in the primary care setting. Prerequisite: PNP or FNP specialty, or permission of instructor.

NURS 520 Evaluation of Clinical Performance in Nursing (3) For graduate students preparing for faculty or staff development positions in nursing. Theory and principles of evaluation. Instruments to appraise clinical nursing performance developed as part of course requirements. Prerequisite: graduate standing or permission of instructor.

NURS 522 Legal and Ethical Issues in Advanced Practice Nursing (3) *Shannon* Reviews selected ethical issues in healthcare and legal guidelines relevant to healthcare decision-making. Explores bioethics as a type of applied eth-

ics. Focuses on preparing students for ethical challenges in advanced nursing roles. Offered: Sp.

NURS 524 Conceptual Foundations for Care Systems Management (3) Critical analysis of nature and theoretical bases of care systems management practice. Concepts of nursing and organization science foundations to person-provider transaction management and leadership in context of economic, political, and social environments and health outcomes. Prerequisite: graduate standing.

NURS 525 Managing Clinical Effectiveness Within Care Systems (3) Optimizing person-provider clinical therapeutic transactions at multiple levels of care systems, complexity, and population aggregation. Emphasis on designing, managing and evaluating clinical effectiveness and efficiency within care systems.

NURS 526 Managing Organizational Effectiveness Within Care Systems (3) Analysis of management strategies for attaining effective and efficient organizational structures and processes within healthcare systems. Prerequisite: NURS 524 or permission of instructor.

NURS 527 Managing Effective Access and Utilization Within Care Systems (3-4) In-depth inquiry into healthcare access and resource utilization patterns among diverse populations, with emphasis on management strategies for establishing effective population-system fit. Additional credit for exploring access and utilization patterns within specific populations.

NURS 529 Childhood Common Developmental and Behavior Issues (2) Focus on common developmental and behavioral issues presented by children and their families in primary care setting. Emphasis on the developmental, family, and cultural aspects of assessment and management of the common issues.

NURS 533 Healthcare of Cancer Survivors (2) Focuses on teaching the health science graduate students about cancer survivorship issues. Discusses the health concerns of those who have been cured of their initial malignancy but are still at risk of long-term effects of chemotherapy, radiation, and surgery.

NURS 534 Aging and Health in Contemporary Society (3) Explores demographic, cultural, psychological, theoretical, political, and ethical context of aging and health in contemporary society. Content is based on empirical data and policy statements on aging. Analyzes healthcare delivery at an individual, community, and systems level to support optimal functioning across the health continuum for older adults. Offered: Sp.

NURS 536 Biological Aspects of Cancer: Implications for Care (3) Survey of major concepts from tumor biology and implications for advanced oncology nursing practice. Areas covered include carcinogenesis, cancer epidemiology, pathology, metastasis, treatments (chemotherapy, radiation, surgery, immunotherapy), and cancer detection and prevention. Discussion of role of advanced nurse clinician and complex patient responses are incorporated into discussion of basic biological concepts.

NURS 537 Symptom Management in Cancer Care and Serious Illness (3) *Berry, Nguyen* Focuses on assessment, integration of research findings into clinical decision-making, diagnostic reasoning, and management of common symptoms experienced by adult patients with cancer and/or serious illness. Explores individual and family responses to serious illness and malignant processes. Emphasizes concepts of prevention, tailored patient/family education, management and evaluation strategies. Offered: Sp.

NURS 538 Management of Adults with Respiratory Dysfunction (3) In-depth examination of problems such as abnormal secretions and shortness of breath associated with respiratory dysfunction due to pulmonary diseases and other pathophysiological states.

NURS 539 Seminar in Critical-Care Nursing (3, max. 9) Systematic inquiry into pathophysiology, initial nursing

management, and systems of care for the critically ill adult or child.

NURS 541 Women's Healthcare: Diagnosis and Management (1-3, max. 3) Examines advanced practice women's healthcare issues including unique health issues for women, health maintenance, contraceptive care, diagnosis, and treatment of women's health problems across the lifespan. Prerequisite: permission of instructor.

NURS 542 Theoretical Foundations of Advanced Practice Nursing: Childbearing I (1-4, max. 4) Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to the normal childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of pregnant client within the context of the individual, family, socio-cultural environment, and healthcare system.

NURS 543 Theoretical Foundations of Advanced Practice Nursing: Childbearing II (3) Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to at-risk childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of at-risk pregnant client within the context of the individual, family, socio-cultural environment, and healthcare system.

NURS 546 Interpersonal Therapeutics in Advanced Psychiatric Mental Health Nursing: Current Perspectives (3) Selected theories in relation to psychosocial development and adaptation across life span for individuals, families, and small groups and as explanatory models of major psychosocial disabilities. General and psychosocial nursing models evaluated for heuristic value for research and practice. Prerequisite: graduate standing or permission of instructor.

NURS 547 Neuroscience Basis of Advanced Practice Psychiatric/Mental Health (3) Analysis of biological processes influencing psychosocial behavior in response to internal and external stimuli. Research and theory of neuroendocrine mechanisms in psychosocial disabilities. Analysis of nursing management and evaluation of biopsychosocial modalities used in modification of behavior. Prerequisite: graduate standing in nursing or permission of instructor.

NURS 548 Frameworks in Infant Mental Health (3) *Spieker* Review infant mental health (IMH) and early development from a developmental interdisciplinary perspective. Pays special attention to brain development, sensory integration, early communication, and emotion regulation. Offered: A.

NURS 549 Assessment in Psychosocial Nursing (3) Conceptual and clinical approaches to advanced-level data collection and diagnostic reasoning in psychiatric/psychosocial disorders. Synthesizes knowledge from psychosocial nursing and multiple allied fields to enhance learners' cognizance of principles for establishing accurate and comprehensive data bases and sound multifaceted diagnostic formulations. Emphasizes DSM diagnostic scheme.

NURS 552 Wellness, Health Promotion, and Disease Prevention (3) Covers theoretical perspectives and evidence for wellness, health promotion, disease prevention, and risk reduction through the lifespan for advanced practice nursing. Examines issues impacting individual, family, population, and community health related to context and culture. Includes strategies for health promotion and behavior change at individual, family, population, and community levels. Offered: A.

NURS 554 Management of Psychiatric Disorders: Adult and Adolescent (3-4) Focuses on advanced nursing management strategies for psychiatric disorders and primary mental health conditions. Emphasizes the synthesis and integration of scientific evidence to formulate psychiatric diagnoses, and select appropriate interventions for individuals, families, and communities. Measures outcomes

through practice inquiry at both system and policy levels. Prerequisite: NURS 549.

NURS 555 Relationship Based Mental Health Assessment of Infant and Toddlers (3) *Dillon* Focuses on multi-disciplinary, diagnostic mental health assessments of infants and toddlers within the context of their primary relationships. Core course of Infant Mental Health Certificate Program. Prerequisite: permission of instructor. Offered: Sp.

NURS 556 Addictions and Substance Abuse: Biopsychosocial Perspectives (3) Psychosocial and pathophysiological aspects of substance use examined for their effects on individuals and families throughout life span. Theories and empirical findings serve as basis for evaluating preventive and therapeutic nursing approaches to substance use disorders, including those related to target populations. Prerequisite: basic course in biological sciences.

NURS 557 Health, Culture, and Community (3) *Chrisman* A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with HSERV 576; W.

NURS 560 Dynamics of Community Health Practice (3) Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with HSERV 508.

NURS 561 Selected Topics in Comparative Nursing Care Systems (2/3, max. 10) In-depth examination of the literature pertinent to major theoretical issues in cross-cultural nursing and healthcare systems. Seminar with analysis and discussion of selected topics and readings. Implications for research and healthcare stressed.

NURS 562 Clinically Applied Anthropology (3) Anthropology as it relates to interdisciplinary delivery of culturally relevant healthcare. Cultural variation in illness beliefs and behavior, types of healing practices, illness prevention, social support networks. Prerequisite: graduate standing, permission of instructor. Offered: jointly with ANTH 562.

NURS 564 Biological Intervention in Advanced Practice Psychiatric/Mental Health Nursing (3-4) Biological and pharmacological interventions pertinent to practice of psychosocial nursing, including psychopharmacology, electroconvulsive therapy, and phototherapy. Emphasis on empirical neuroendocrine bases and then nursing management issues pertaining to these interventions. Legal and ethical issues pertaining to advanced practice and putative neurological mechanism are examined. Prerequisite: NURS 547 or permission of instructor.

NURS 566 Work Stress and Health (3) Delineates our understanding of the relationship between work-related stressors and worker health. Theoretical models of job stress are considered and methodological issues examined. Uses social justice framework to explore worker stress and health disparities in immigrants and other disadvantaged populations. Offered: Sp.

NURS 569 Observation and Assessment of Relationships (2) *C. DILLON, S. SPIEKER* Culminating course in the GC-PAPN-Infant Mental Health. Focuses on reflective practice, consultation, and supervision, a core features of practice across disciplines that are providing services to infants, toddlers, and their families. Prerequisite: NURS 548; NSG 537; NURS 555. Offered: Sp.

NURS 576 Assessment and Collaboration with Communities and Systems (3) Examines, critiques, and applies theory in assessing communities, populations, and systems cross-culturally. Focuses on advanced practice, executive leadership/policy, and practice inquiry; broad definition of

community includes organizations. Emphasizes team work in assessment implementation, i.e., survey, interview, focus groups, observation/participant observation to advance understanding of social determinants of health.

NURS 579 Transcultural Nursing Practices (3) Seminars examine four decades of nursing practice literature and other disciplines related to appropriate and competent care of diverse and multicultural populations. Concepts and methods from anthropology and other behavior sciences are considered in relationship with current health practice guidelines. Graduate standing or instructor permission.

NURS 580 Current Issues in Occupational and Environmental Medicine (2, max. 12) Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with ENV H 596; AWSp.

NURS 581 Study of International Health (2-3) International health based on the concept of health ecology. Assigned readings, discussions, and analysis of different perspectives, strategies, systems, and the wide range of conditions and forces affecting global and local health and illness. Emphasizes roles of healthcare providers. Credit/no-credit only.

NURS 582 Culture, Society, and Genomics (3) *B. MCGRATH* Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/PHG 521; Sp.

NURS 583 Emotions and Mental Health: From Adversity to Adaptation (3-4) *Betrus, Elmore* Provides an understanding of nature and function of emotions as well as relationship of emotion to mental health/illness. Emphasizes adversity arising from individual and community sources and its impact on emotional health. Addresses implications for interpersonal and social policy interventions.

NURS 584 Critical and Interdisciplinary Approach to Health Policy (3) Advanced seminar to critically analyze various public health policies from a social justice framework.

NURS 587 Role Transition Seminar (2) Emphasizes the transition to doctoral study and eventual post-graduate roles. Includes information to clarify expectations and skills to facilitate success: various forms of scholarly and interpersonal communication, principles of scholarly collaboration, giving and receiving critiques, development of a program of study, and other topics developed by participants. Prerequisite: Enrolled in PhD program in Nursing Science. Credit/no-credit only.

NURS 588 Philosophical Basis of Nursing Inquiry (3) Overview and critical analysis of historical and contemporary views of knowledge development and of science, with particular emphasis on the ways these views influence approaches to nursing inquiry. Emphasis on analyzing the underlying epistemological and ontological assumptions and implications of diverse approaches to knowledge generation in nursing.

NURS 589 Theoretical Perspectives in Nursing (3) Critical analysis of theory development, including evaluation of relationships among theories, evidence, and explanation. Diverse approaches used to appraise historical and contemporary milestones in the development and evaluation of nursing knowledge. Emphasis on process and implications of theory development for nursing research, practice, education, and systems. Prerequisite: NURS 588. Offered: W.

NURS 590 Ecology of Human Health (5) Provides conceptual foundation for the study of human health ecology within nursing science. Frameworks for understanding human health as an outcome of individual, family, and group interactions and transactions with environments are applied. Provides the basis for evaluation and developing therapeutic approaches to improve health.

NURS 592 The Science of Therapeutics: Theoretical Foundations (4) Addresses the state of the science of nursing therapeutics. Students examine the practices of nursing to promote, maintain, and restore human health from an ecological perspective. Therapeutics considered from the perspectives of the individual, family, and community systems. Prerequisite: NURS 590 or equivalent with permission of instructor.

NURS 595 Synthesis of Nursing Science (3) Advanced seminar for critical analysis, integration, and synthesis of material for a research proposal. Focus includes discussion of research integrity and ethics, including scientific conduct, risk management related to scientific misconduct and negligence. Prerequisite: NURS 587; NURS 588; NURS 589; NURS 590; NURS 592; NMETH 579; NMETH 580; and NMETH 591. Credit/no-credit only.

NURS 597 Health in the Context of Culture (5-6, max. 24) Provides basic overview of health and healthcare challenges and opportunities in other countries. Examines socio-cultural, environmental, economic, political, and ecological factors that influence, health, health promotion, illness, disability, and death. Address responses to health issues both within and outside the health sector. May include study abroad.

NURS 599 Selected Readings in Nursing Science (1-3, max. 18) Analysis of synthesis of selected readings with faculty mentor. Prerequisite: permission of instructor. Credit/no-credit only.

Nursing Clinical

NCLIN 302 Practicum: Health Assessment (1-5, max. 5) Lecture and lab emphasize nursing skills in communication, interviewing, functional and physical health assessment. Includes: basic communication skills, beginning physical and psychosocial assessment of the individual across the lifespan, and family assessment. Offered: AS.

NCLIN 306 Practicum: Basic Skills of Nursing Practice (4) Practicum in communication, interviewing, health assessment, identification of threats to health in clinical settings. Explores risk, vulnerability identification, communication, physical/psychosocial assessment of individuals across lifespan, nursing care planning, documentation, psychomotor skills development. Prerequisite: NCLIN 302, which may be taken concurrently. Credit/no-credit only.

NCLIN 403 Practicum: Pediatric Nursing (4) Provides supervised acute/chronic illness nursing care to pediatrics clients. Emphasizes beginning skills in systematic health and developmental assessment, including person/environment fit, basic competency in selected nursing therapies, and developing role as care agent for pediatrics clients and their families. Prerequisite: NURS 401, may be taken concurrently. Credit/no-credit only. Offered: WSp.

NCLIN 407 Practicum: Nursing Care of Ill Adults (5) Provides supervised nursing care to ill adults and their families. Emphasizes systematic assessment, including person/environment fit, developing competency in selected nursing therapies, and developing a role as a professional nurse. Prerequisite: NURS 401, which may be taken concurrently. Credit/no-credit only.

NCLIN 409 Partnerships in Community Health (4) Analysis, application, and evaluation of community partnership process for health. Analysis of nursing role in community/public health, including community building, collaboration, policy. Development and formulation of community interventions to maintain/promote biopsychosocial health, and

to promote health/prevention of injury and disease. Credit/no-credit only.

NCLIN 411 Transition to Clinical Practice (9) Focuses on critical examination, synthesis, and evaluation of professional nursing care with individual clients or groups reflecting diverse settings, ages, and ethnic communities. Emphasizes mastering theoretical concepts, applying research findings, improving skill competency, and developing clinical leadership capabilities. Credit/no-credit only.

NCLIN 416 Practicum: Nursing of Families: Childbearing and Childrearing (4) Provides the opportunity for supervised nursing of childbearing and childrearing families and individuals. Emphasizes expanding nursing process skills, especially health promotion, with individuals and families during childbearing and childrearing. Prerequisite: NURS 415, which may be taken concurrently. Credit/no-credit only. Offered: AW.

NCLIN 418 Practicum: Psychosocial Nursing (4) Provides supervised psychosocial nursing care to individuals/families/groups/communities with threats to or alterations in psychosocial health. Emphasizes increasing skill in systematic assessment, developing competency in selected psychosocial nursing interventions, and evaluation of treatment outcomes. Prerequisite: NURS 417, which may be taken concurrently. Credit/no-credit only. Offered: AW.

NCLIN 490 Special Laboratory Elective (1-4, max. 4) Provides supervised laboratory experience to enhance and document clinical skills and decision making. Prerequisite: permission of instructor. Credit/no-credit only.

NCLIN 499 Clinical Practicum Elective (1-5) Provides opportunities to develop nursing skills in the care of individuals, groups, communities, or care-systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: NCLIN 302; NCLIN 306; NCLIN 402; NCLIN 406.

NCLIN 500 Comprehensive Health Assessment (3) Uses didactic and experimental learning to develop evidence-informed advanced assessment skills including systematic collection, organization, interpretation, and communication of data reflecting the health status of adolescents/adults/older adults. Emphasizes a holistic analysis of developmental, familial, physiological, psychosocial, occupational, environmental, functional, nutritional, and cultural aspects of health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWS.

NCLIN 501 Diagnostic Health Assessment (1-5, max. 5) Examines evidence-informed clinical decision-making in the advanced assessment of symptoms experienced by adolescents/adults/older adults. Uses didactic and experimental learning in the systematic collection, integration, analysis, interpretation, and communication of focuses subjective and objective data, including formulation of diagnostic hypotheses. Prerequisite: NCLIN 500, which may be taken concurrently. Credit/no-credit only. Offered: AWS.

NCLIN 502 Pediatric Diagnostic Health Assessment ([1-2]-, max. 2) Uses didactic and experimental learning to develop evidence-informed advanced assessment skills including systematic collection, organization, interpretation, integration, and communication of data reflecting health status of children from birth to adolescence. Emphasizes holistic analysis of development, familial, physiological, psychosocial, environmental, functional, nutritional, and cultural aspects of health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

NCLIN 503 Advanced Fieldwork Community Health Nursing (2-6, max. 12) Guided experience in delineating nursing roles in community settings. Development of a philosophy of community health nursing. Application of core concepts pertaining to health, ethics, care, and community. A minimum of four hours of guided experience weekly. Prerequisite: graduate standing and permission of instructor.

NCLIN 505 Diagnostic Management and Decision Making (3) P. CHRISTIANSON Examines diagnostics pertinent to adult and geriatric illnesses from individual and population perspectives, in the context of evidence, risks/benefits, equity, cost, access, and quality of care. Case analyses integrate health assessment and differential diagnoses into selection of appropriate tests. Includes didactic and lab components. Prerequisite: NCLIN 501 or equivalent. Offered: W.

NCLIN 508 Seminar in Group Treatment (1) Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

NCLIN 510 Group Work with High-Risk Youth (3-6, max. 6) Theory and application course in group counseling for high-risk youth. Central theme is group leader effectiveness in helping young people increase school performance, decrease drug involvement, and increase emotional well-being. Open to graduate students in nursing, education, and related human services professions.

NCLIN 512 Advanced Practicum in Family and Child Nursing I (2-12, max. 35) Clinical seminar and practicum provide opportunities to develop advanced nursing practice competencies in the care of women, families, children, and/or adolescents. Focuses on the application of theory and principles when providing direct patient care, patient education, and the collaboration of care with individuals and/or groups. Credit/no-credit only.

NCLIN 514 Seminar in Home Care for Chronic Illness (3) Home-care services as component of community health nursing. Understanding effects of direct nursing functions on care of chronically ill persons and their families. Selected field study experiences in community health settings. Prerequisite: NURS 563, graduate standing, and permission of instructor.

NCLIN 516 Advanced Clinical Practicum I (4) Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals and groups. Credit/no-credit only. Offered: Sp.

NCLIN 517 Advanced Clinical Practicum II (5) Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Credit/no-credit only. Offered: S.

NCLIN 518 Advanced Clinical Practicum III (6) Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Credit/no-credit only. Offered: A.

NCLIN 519 Newborn Assessment for Advanced Practice (1) Develops knowledge and skills to obtain and evaluate health histories and perform systematic physical assessment on newborns and young infants using diagnostic reasoning process and evidence-based approach. Analyzes data to develop different diagnoses and management plans. Prerequisite: nurse-midwifery and perinatal nurse specialist students or permission of instructor. Credit/no-credit only.

NCLIN 520 Clinical Reasoning and Assessment Across the Lifespan (2) Provides the framework to begin evidence-informed clinical decision-making in the advanced assessment of patients across the lifespan. Includes didactic and experiential learning in systematic collection, integration, analysis, interpretation, and communication of focused subjective and objective data, including formulation of

diagnostic hypotheses. Emphasizes a holistic approach. Credit/no-credit only. Offered: A.

NCLIN 521 Diagnostic Decision Making and Clinical Skills Laboratory (2) Designed to enhance student's knowledge, performance, and interpretation of various diagnostic tests and clinical procedures in multiple settings. Includes skills across the age span. Skill demonstration and validation occur in the lab classroom. Co-requisite: NCLIN 516; permission of instructor. Credit/no-credit only.

NCLIN 532 Advanced Practice in Community Health Systems Nursing: Overview (3) Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to social determinants of health and social justice. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: A.

NCLIN 533 Advanced Practice in Community Health Systems Nursing: Culture (3) Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to cultural issues affecting the health of individuals, populations, and communities. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.

NCLIN 534 Advanced Practice in Community Health Systems Nursing: Assessment (3) Seminar and practicum focusing on evidence-based approaches to community health systems nursing. Includes integration and application of theories and content related to the assessment and appraisal of communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: Sp.

NCLIN 535 Advanced Practice in Community Health Systems Nursing: Policy (4) Seminar and practicum focusing on evidence-based approaches to community health systems nursing. Includes integration and application of theories and content related to health-related organizational and public policy that promotes health equity. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: A.

NCLIN 536 Advanced Practice in Community Health Systems Nursing: Health Systems (4) Seminar and practicum focusing on evidence-based approaches to community health systems nursing. Includes integration and application of theories and content related to systems-level models of practice to service delivery among communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.

NCLIN 540 Infant Mental Health Practice: Parent Child Relationships and Intervention ([3-6]-, max. 18) Focuses on reflective practice, relationship-based consultation, and therapeutic interventions with infants/toddlers and caregivers. Students complete required clinical practicum at assigned community sites for three quarters. Prerequisite: admission to Infant Mental Health certificate program. Credit/no-credit only. Offered: AWSp.

NCLIN 541 Advanced Practice Specialist Clinical Practicum (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Emphasis is on specialization and role development. Prerequisite: permission of instructor. Credit/no-credit only.

NCLIN 542 Advanced Practice Specialist Clinical Practicum II (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork emphasizes greater depth/complexity/independence in specialization and role development. Seminars emphasize critical analysis of role-related issues.

Capstone experience for clinical practicum. Prerequisite: NCLIN 541. Credit/no-credit only.

NCLIN 543 Advanced Practice Specialist Clinical Practicum III (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Role development within specialty context. Emphasis is on critical analysis of leadership-related issues. For students in final clinical, serves as capstone. Prerequisite: NCLIN 542. Credit/no-credit only.

NCLIN 544 Advanced Practice Specialist Clinical Practicum IV (1-10, max. 20) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork serves as capstone experience. Seminar emphasis is on consultation and collaboration. Prerequisite: NCLIN 543. Credit/no-credit only.

NCLIN 549 Nurse Practitioner Clinical Practicum I: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced nursing practice with individual/groups. Students practice under clinical preceptor supervision. Focuses on data collection/critical thinking related to health status and threats to health, incorporating knowledge from the biological, behavioral, and social sciences. Prerequisite: permission of instructor, or NCLIN 501 or equivalent. Credit/no-credit only.

NCLIN 550 Nurse Practitioner Clinical Practicum II: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 549, emphasizing critical thinking related to the differential diagnosis/management of health problems and human responses. Students practice under clinical preceptor supervision. Addresses selected role issues in advanced practice nursing. Prerequisite: NCLIN 549 or permission of instructor. Credit/no-credit only.

NCLIN 551 Advanced Practice Nursing Clinical Practicum III: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 550, emphasizing the integration and application of previous learning in the care of people with multiple health problems. Students practice under preceptor supervision. Addresses selected role issues in advanced practice nursing. Prerequisite: NCLIN 550 or permission of instructor. Credit/no-credit only.

NCLIN 552 Nurse Practitioner Clinical Practicum IV: Adults/Older Adults (1-10, max. 10) Intensive clinical experience in which students integrate previous learning to assume responsibility for care of older adults and/or adults with multiple health problems. Students practice as an advanced practice nurse supervised by a preceptor, assuming increasing responsibility for planning/implementing therapies and for documenting/evaluating outcomes. Prerequisite: NCLIN 551. Credit/no-credit only.

NCLIN 562 Professional Interpersonal Styles of Communication with Families to Enhance Health Outcomes (3) Complex communication processes evaluated and applied to the family as unit of interaction within interdisciplinary context. Empirical based communication practices analyzed considering family variables adherence, satisfaction, health outcomes, and cost effectiveness. Engagement in experiential learning through challenging clinical scenarios. Emphasizes cultural competencies. Prerequisite: DNP nursing student or permission of instructor. Credit/no-credit only.

NCLIN 566 Advanced Clinical Practicum in Psychosocial Nursing (1-9, max. 20) Seminar and practicum focus on development of advanced clinical and role-function skills. Practicum in settings with select populations under supervision of expert clinicians. Seminars use evidenced-based practice criteria to integrate cases into discussion. Prerequisite: NURS 570, NURS 564, one theory course, or permission of instructor. Credit/no-credit only.

NCLIN 567 Advanced Practice Clinical Practicum (2-6, max. 22) Practicum used to expand, deepen, or enrich advanced practice skills relevant to area of specialty preparation. Uses clinical activities to reflect an integration of advanced practice, leadership, and practice inquiry. Emphasizes self-directed learning, in-depth clinical skill building and decision-making, continuity of care, and interprofessional collaboration. Prerequisite: permission of instructor. Credit/no-credit only.

NCLIN 599 Independent Study Clinical Practicum (1-12, max. 25) Clinical practicum to develop advanced-practice nursing skills in care of individuals, groups, communities, or care systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: matriculated MN, DNP students, or post-master's student, and permission of academic adviser and instructor. Credit/no-credit only. Offered: AWSpS.

NCLIN 798 Tripartite Immersion Practicum ([1-5]-, max. 5) Practicum to synthesize and expand knowledge and skills in application of tripartite role of advanced practice, inquiry, and leadership. Analysis of practice issues including reflective practice, collaboration, health systems, technology, ethics, and policy. Prerequisite: permission of instructor and Supervisory Committee. Credit/no-credit only.

NCLIN 801 Advanced Clinical Practicum Immersion (9) Immersion clinical practicum and seminar providing opportunities to integrate advanced nursing practice competencies, leadership, professional role, and collaboration with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Offered: A.

Nursing Methods

NMETH 403 Introduction to Research in Nursing (3) Organization of the structure of nursing knowledge through research. Concepts and processes of research utilized in the investigation of nursing science.

NMETH 416 Methods for Research and Inquiry in Nursing I (2) Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on appraising literature and methods for generating evidence. Offered: A.

NMETH 417 Methods for Research and Inquiry in Nursing II (2) Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on searching evidence, appraising evidence, and classifying different types/levels of evidence. Offered: W.

NMETH 418 Methods for Research and Inquiry in Nursing III (2) Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on identifying gaps in the literature/evidence, and formulating a plan to conduct research. Offered: Sp.

NMETH 419 Application of Methods for Research and Inquiry in Nursing (2) Apply methods for contributing to evidence relevant to nursing. In small groups identify, implement, and disseminate a plan for generating, evaluating, synthesizing, or translating evidence around health, healthcare, and/or nursing practice. Offered: Sp.

NMETH 499 Undergraduate Research (1-5, max. 12) Supervised individual scholarly inquiry on a specific nursing problem. Credit/no-credit only.

NMETH 520 Scholarly Inquiry for Nursing Practice (5) Analyzes conceptual, theoretical, ethical, and empirical knowledge as a basis for posing nursing research questions, identifying research designs, selecting sampling and data collection strategies, and proposing analytic methods to answer a research question, and evaluate completed research for its scientific adequacy and applicability to practice. Offered: AWSpS.

NMETH 522 Data Management for Research Professionals (4) Surveys industrial strength data management, using techniques applicable to multi-center, longitudinal re-

search trials with survey instruments. Involves challenges research professionals face as they graduate from a student project to a study with hundreds of cases, variables, multiple survey instruments and a staggered, repeated sampling protocol. Credit/no-credit only.

NMETH 523 Project Management and System Analysis for Health Informatics (3) Masuda Overview of information technology project management principles as contained within the Project Management Body of Knowledge (PM-BOK) and the Systems Development Life Cycle within formal Systems Analysis. Offered: A.

NMETH 524 Healthcare Information Systems and the Electronic Health Records (3) Masuda, Murphy Overview and analysis of healthcare informatics issues, including patient safety and Information Technology (IT), infrastructure, clinical systems, definitions and functions of EHR systems, IT leadership in healthcare organizations, informatics change management, including key user roles evaluating EHR and workflow changes. Offered: W.

NMETH 526 Patient-Centered Interactive Health Communication Technologies (3) Overview of current and emerging consumer-centric eHealth tools and technologies. Researchers and practitioners from multiple disciplines present theories, concepts, and principles from health, information, cognition, and human-factors sciences as they relate to the development and use of these tools and technologies.

NMETH 527 Introduction to Health Informatics and Systems Thinking (3) Masuda, Oyler Examines how informatics aids in the transformation of healthcare delivery and how to most effectively use the theories and best practices in informatics toward building and deploying informatics solutions. Offered: A.

NMETH 528 Computing Concepts: From Theory to Application (3) Johnson Survey of conceptual and applied computing concepts. Conceptual topics include a global survey of hard/software, networking, information systems analysis/design, and programming. The applied component emphasizes desktop system management skills and the creative use of spreadsheets to enhance personal productivity. Offered: W.

NMETH 529 Database Concepts and Applications in Clinical Informatics (3) Oyler Introduction to relational database theory and technology from a health informatics perspective. Focuses on transactional database theory, architecture, and implementation in a socio-technical context. Analyzes database applications used in clinical environments. Introduces knowledge bases and data warehouses. Prerequisite: NMETH 528. Offered: Sp.

NMETH 530 Proposal and Project Development (3/5) Focuses on the application of methods of inquiry to develop a scholarly proposal through faculty-guided small group discussion and individual composition. Students select project option to complete the conceptual phase and most activities to fulfill their plan. Offered: AWSpS.

NMETH 533 Appraisal and Translation of Evidence for Practice (5) Designed to enhance use of methods to critically appraise literature, design, and implement processes to evaluate outcomes of practice, and promote patient-centered care. Applies relevant findings to improve practice, develop guidelines, and use information technology and research methods. Includes dissemination of findings. Prerequisite: either NMETH 535 or permission of instructor. Offered: Sp.

NMETH 535 Nursing Inquiry to Support Evidence-Based Practice (5) Cochrane, Ward Works to understand and apply conceptual, ethical, and practical aspects of quantitative and qualitative research methods by design, sampling, data collection, measurement, and analysis, as a basis for evaluating and generating evidence for nursing practice. Develops skills in data management and statistical analysis to utilize in practice-based inquiry. Prerequisite: either NGS 555 or permission of instructor. Offered: W.

NMETH 536 Methods of Program Evaluation and Quality Improvement (4) *Jarrett, Walsh* Teaches principles and practice of program evaluation and quality assurance. Emphasizes current practices in designing, managing, evaluating, and disseminating finding for use in a variety of healthcare contexts. Includes content on use of informatics to improve healthcare delivery effectiveness, efficiency, and safety. Prerequisite: either NMETH 535, which may be taken concurrently, or permission of instructor. Offered: Sp.

NMETH 570 Seminar in Clinical Research in Nursing (3) Philosophy, problems of design; use of criterion measures in terms of patient care.

NMETH 575 Methodological Issues in Family Research (3) Emphasizes research with the family as unit of analysis. Examines patterns of family functioning in relation to responses to heal situations. Reviews family units from generational and intergenerational perspectives. Critiques methods assessing dyadic and triadic relationships and therapeutic interventions on family outcomes. Prerequisite: permission of instructor.

NMETH 579 Research Design and Methods in Nursing Science (4) Focuses on elements of rigorous research designs and methods commonly used in nursing science; including descriptive, explanatory, predictive, and experimental and quasi-experimental designs, concepts of validity and reliability, and integration of design with analytical approaches for clinical research.

NMETH 580 Methodological Perspectives in Nursing Inquiry (3) Allows students to translate philosophical and theoretical perspectives into research methodologies. Foci include the relationship of theoretical perspectives to methodologies; the methodological issues among and between varying schools of thought such as interpretive/postmodern, critical/feminist, and contemporary empiricist; and how the methodologies influence choices of research design and methods. Prerequisite: NURS 588 or permission of instructor.

NMETH 581 Observational Research Methods (2-6, max. 6) Examines observational methods for conducting verbal and nonverbal behavioral research. Emphasizes critical analysis and rigor in research question formulation, measurement decisions, coding scheme development, data collection, and analysis and interpretation of data. In-depth application of observational method optional. Prerequisite: graduate standing and basic research methods course or permission of instructor. Offered: W.

NMETH 582 Interpretative Methods in Nursing Research (4-) Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of Instructor.

NMETH 583 Interpretative Methods in Nursing Research (-4) Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of instructor.

NMETH 584 Methods: Physiologic Measures (4) Exploration of the measurement of physiologic functioning in human and animal models. Examples include biochemical and biophysical measure. Students develop beginning skills with one physiologic measure. Prerequisite: physiology and chemistry and permission of instructor.

NMETH 585 Meta-Analysis (4) Meta-analysis examined as a method to synthesize research. Overview of meta-analytic methods; description of the collection, analysis, synthesis, and reporting of studies; explanation of statistical calculations; and discussion of reliability and validity measures incorporated into meta-analytic design. Prerequisite: permission of instructor.

NMETH 586 Instrument Development and Testing (4) Includes measurement theory, reliability, validity, level of measurement, and the process of scale development,

modification, or translation. Students learn to evaluate, develop, modify, translate, and test instruments for use in research. Prerequisite: student in health science discipline and permission of instructor.

NMETH 587 Methods of Theory Testing: Causal Modeling with Path Analysis and Structural Equation Modeling (4) Includes causal inferencing and theory testing through causal modeling with path analysis and structural equations modeling. Students learn to evaluate theory models and to apply the content by developing and testing models. Prerequisite: student in health science discipline and permission of instructor.

NMETH 590 Special Topics in Nursing Research (2-5, max. 9) Examination of a specific research method, with evaluation of appropriateness, efficiency, rigor of measurement, and potential for inference for nursing research. Prerequisite: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

NMETH 591 The Science of Therapeutics: Design and Outcomes (4) Synthesizes advanced strategies to evaluate the short- and long-term outcomes of clinical therapeutics with special emphasis on feasibility, pilot studies, and randomized control trials. Includes analysis of completed studies as well as the design of a randomized control trial of a clinical therapeutic. Prerequisite: NMETH 579, NURS 592, or permission of instructor.

NMETH 592 Clinical Outcome Research II (2-4, max. 4) Application and evaluation of philosophical, methodological, and analytical concepts and issues examined in NMETH 591. Two modules are offered: a) case study and small-n studies and b) large-n studies. Students demonstrate application of decision-making process involved in development of clinical outcome study. Prerequisite: permission of instructor.

NMETH 593 Time Series and Sequential Analysis (4) Basic introduction to terminology and methods of time series and sequential analysis as applicable to nursing-relevant processes in the form of samples of interval and categorical data collected over time; autocorrelation, autoregression, spectrum, socinor, Markovian, lag sequential, and log-linear analyses. Development of practical analysis skills on real data sets. Prerequisite: permission of instructor. Credit/no-credit only.

NMETH 598 Special Projects ([1-12]-, max. 12) Fulfills the requirements of the non-thesis option for Master's students in nursing. Projects involve scholarly inquiry with in-depth focused analysis, culminating in a written product/report for dissemination. Prerequisite: NMETH 520 or permission of instructor. Credit/no-credit only.

NMETH 600 Independent Study or Research (*-) Credit/no-credit only.

NMETH 700 Master's Thesis (*-) Credit/no-credit only.

NMETH 800 Doctoral Dissertation (*-) Prerequisite: permission of Supervisory Committee chairperson or Graduate Program Coordinator. Credit/no-credit only.

NMETH 801 Practice Doctorate Project/Capstone (3-, max. 6) Addresses a clinical or systems problem using an evidence-based, practice relevant approach. Students engage in self-reflection, collaborative partnership building, and use of leadership strategies. Analyzes implications of project for future practice and practice inquiry activities. Culminates in written and oral reports for dissemination. Credit/no-credit only. Offered: AW.

Associate Deans

Nanci L. Murphy

Stanley S. Weber

Established in 1894, the UW School of Pharmacy is proud of its strong commitment to excellence and the recognition given to its faculty, students, and graduates for their outstanding educational, research, and service activities. The School's Dean's Office and three departments - Medicinal Chemistry, Pharmaceuticals, and Pharmacy - are located in the H-Wing of the Health Sciences Building and the South Campus Center. The School is a member of the American Association of Colleges of Pharmacy and its programs are accredited by the Accreditation Council on Pharmacy Education.

DOCTOR OF PHARMACY PROGRAM

The School of Pharmacy offers a four-year program leading to the Doctor of Pharmacy (PharmD) degree. The curriculum of the PharmD program is designed to provide students the scientific background and clinical skills necessary to take the North American Pharmacist Licensure Examination (NAPLEX) and the Multistate Pharmacy Jurisprudence Examination (MPJE) to enter professional practice.

Limited class enrollment allows for individualized attention from instructors while students still enjoy the benefits of attending a large university. Instructional methods emphasize the critical thinking, problem-solving, and clinical skills necessary to provide rational drug therapy, reduce medication-related problems, promote healthy lifestyles and disease prevention, optimize health outcomes, enhance patient adherence, and render care in a changing health-care system. The School fosters a commitment to life-long learning and provides an environment where students develop the knowledge, attitudes, and skills consistent with the profession's high standards.

Admission

Admission is for autumn quarter only. Applicants who are current UW students or who are considered admissible to UW are not assured admission. Admission is competitive, based on a number of factors including cumulative and prerequisite GPAs, PCAT scores, written communication skills as demonstrated in application essays, interview results, and review of all application materials. Competitiveness varies from year to year, depending on size and strength of the applicant pool.

Because of limits on enrollment, the School cannot admit all qualified applicants. On average, over 600 students apply each year for 100 generally available positions. Admission is contingent upon satisfactory completion of all prerequisites, eligibility to obtain a Washington State Pharmacy Intern Certificate, and satisfactory results on the Criminal Background Check and Conviction/Criminal History Information Form. Accepted students are required to meet the University and health sciences immunization requirements.

After a preliminary assessment of the applicant pool, based on completeness of the application, review of all application materials, prerequisite and cumulative GPA thresholds and PCAT score thresholds, the most qualified applicants are invited for an interview in Seattle with members of the PharmD Admissions Committee. Residents from states participating in the Western Interstate Commission for Higher Education (WICHE) Pharmacy Student

Exchange Program (Alaska and Nevada) are encouraged to apply. Applicants who meet or exceed GPA and PCAT minimum thresholds are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool during each annual admission cycle.

Further information on admission requirements, application procedures, and program content is available from the School of Pharmacy Office of Academic and Student Programs or at sop.washington.edu/school-of-pharmacy/pharmd-admissions/applications-to-pharmd-program.html.

GRADUATE PROGRAMS

Graduate Program Coordinator

H375 Health Sciences, Box 357630

(206) 616-1383

The Department of Pharmacy offers graduate study leading to a PhD degree in pharmaceutical outcomes research and policy. Emphasis of this program is on the health and cost outcomes of pharmaceuticals and pharmaceutical services and policies. Graduate training in this program prepares students for career opportunities in teaching and research in universities, safety and economic evaluation of products in the pharmaceutical industry, policy analysis of governmental agencies, and drug use management within healthcare delivery and financing organizations.

Also offered is a track in the PharmD/MS program in pharmaceutical outcomes research and policy, which provides an opportunity for one-to-two students currently completing their PharmD training at the UW to enter the graduate program in their fourth year of training. The program requires completion of 64 credit hours, a written thesis, and a quarter of practicum in a managed care, government, industry, or other appropriate setting. At the end of this training, students may elect to receive a master's degree, or continue on toward a PhD degree.

The UW's biomedical regulatory affairs Master of Science program, offered by the UW School of Pharmacy in partnership with UW Educational Outreach, addresses a growing need for well-trained professionals in the regulatory field. The degree serves those who wish to advance their careers in the medical products industry or those entering the field from related areas.

Deadline for application for the PhD and the PharmD/MS programs is December 31. Applicants are notified of acceptance or rejection by March 30. Refer to the application deadline for the biomedical regulatory affairs master-of-science program posted at: www.biomedreg.uw.edu/admissions/deadlines.asp.

Application materials and additional information are available in the Department of Pharmacy or at program websites listed below:

- sop.washington.edu/porpp/graduate-program/phd-program27.html.
- sop.washington.edu/porpp/graduate-program/concurrent-pharmdms-degree-in-pharmaceutical-outcomes-research-a-policy.html.
- www.biomedreg.uw.edu.

Residency and Fellowship Programs

The Department of Pharmacy offers several postdoctoral fellowships in pharmacotherapeutics and pharmaceutical outcomes, and advanced community residency programs, primarily intended for PharmD graduates. Additional information is available on the department's website: sop.washington.edu/pharmacy/about/fellowship-a-residency-opportunities.html.

Clinical and Affiliate Faculty

In addition to the School of Pharmacy's full- and part-time faculty listed above, a large number of practicing pharmacists contribute to the School's academic programs. Over 500 pharmacists throughout the Pacific Northwest are members of the clinical and affiliate faculty, representing a variety of pharmacy practice settings such as community, hospital, nursing home, government, and industry. Information on the names, addresses and practice settings of these faculty members is available from the Office of Professional Pharmacy Education.

Medicinal Chemistry

The Department of Medicinal Chemistry offers programs of graduate study leading to the degree of doctor of philosophy. The degree includes didactic and research-based learning with faculty who are leaders in several areas of modern biomedical research.

Graduates of the program acquire the skills necessary to develop quantitative and qualitative methodologies necessary for the study of biochemical processes that occur at the cellular and subcellular levels. These include the elucidation of biochemical transformations and interactions using techniques such as protein engineering, and a broad array of supportive spectroscopic techniques including mass spectrometry and NMR.

One major area of research interest is the role of biotransformation processes in the toxification and detoxification of drugs and environmental contaminants. A second area of interest is the determination of protein and small ligand structure and function using NMR, mass spectroscopy, and other biophysical techniques. Issues of biomedical importance include elucidation of mechanisms of drug-induced cell toxicity, drug-drug and drug-herbal interactions, identification of enzyme attributes that dictate substrate specificity and catalytic mechanism, pharmacogenetics, proteomics, and mechanisms of viral assembly.

Most students proceed directly to the doctoral degree program. Successful completion of a series of cumulative examinations and at least two quarters of teaching experience are among the requirements for completion of the doctoral program.

GRADUATE PROGRAM

Graduate Program Coordinator

H164 Health Sciences, Box 357610

(206) 543-2224

medchem@uw.edu

Admission Requirements

Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted for graduate study in medicinal chemistry. Undergraduates who plan to pursue graduate study are encouraged to expedite their programs by selection of pertinent electives. Although the choice of electives varies with the student's ultimate goals, graduate study in medicinal chemistry requires an adequate background in biological and physical sciences.

Degree Requirements

Doctor of Philosophy

90 credits minimum, to include:

Proficiency in organic, medicinal and physical chemistry, pharmacology, biochemistry, and molecular biology. Most coursework is completed in the first two years. The pro-

gram is flexible and easily adaptable to meet individual interests and needs.

In the first year, students rotate through the laboratories of at least two faculty members. At the end of the first year, the student chooses a faculty sponsor and a dissertation research project.

1. *First Year:* CHEM 530, CHEM 531, CHEM 532; MEDCH 501, MEDCH 502, MEDCH 503; MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
2. *Second Year:* BIOC 530; MEDCH 527 MEDCH 541; PHCOL 510, PHCOL 511; MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
3. *Third Year:* MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600 (7 credits each quarter)
4. *Fourth Year:* MEDCH 800

Financial Aid

Financial support in the form of research assistantships and fellowships may be available to students in good standing throughout their graduate careers. Availability of financial support varies from year to year, and prospective applicants should contact the Graduate Program Coordinator for additional information.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsat/

MEDCH 400 Fundamental Concepts in Medicinal Chemistry (3) *Nelson* Principles of physical organic chemistry; chemical bonding, stereochemistry, acids/bases, and reaction mechanisms relevant to processes such as drug distribution, specificity, and metabolism. Prerequisite: either CHEM 239 or CHEM 337. Offered: A.

MEDCH 495 Special Studies in Medicinal Chemistry (*, max. 6) Opportunity to expand the breadth and depth of understanding in specific areas. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 499 Independent Study/Research (*, max. 24) Research problems in medicinal chemistry. Prerequisite: cumulative GPA of 2.50 and permission of instructor. Offered: AWSpS.

MEDCH 520 Seminar (1, max. 30) *A. NATH* Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with PCEUT 520.

MEDCH 521 Advanced Medicinal Chemistry (3) *Atkins, Nelson* Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction of drugs with enzyme systems, and recent advances in drug design. Prerequisite: CHEM 457, CHEM 531, and BIOC 442, or permission of instructor. Offered: Sp.

MEDCH 527 Drug Metabolism (4) *A. RETTIE, K. THUMMEL* Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Includes reaction mechanisms, ultrastructural considerations, induction mechanisms, methodology, kinetics of inhibition and activation, steroid and amine metabolism. Offered: jointly with PHCOL 527; W, odd years.

MEDCH 528 Biophysical Enzymology and Biopharmaceuticals (3) *Atkins, Catalano* Covers in-depth treatment of chemical catalysis and transition state theory as related to enzyme mechanisms; thermodynamics and kinetics of protein-ligand interactions, protein-protein-interactions and protein-lipid interactions, and methods for their study.

Discusses therapeutically relevant examples, including viruses, therapeutic antibodies, and drug targets. Offered: W, even years.

MEDCH 529 Advanced Medicinal Chemistry (4) *Atkins, Kunze, Nelson, Rettie, Totah* Covers the fundamental aspects of contemporary medicinal chemistry. Discusses the chemical characteristics of drugs and drug targets, pharmaceutical properties of drugs, drug metabolism, toxicology, and pharmacogenetics. Focuses on various drug classes; their biochemistry, pharmacology, mechanism of action, and toxicology. Offered: W.

MEDCH 530 Integrated Pharmacology (1) *Atkins, Beavo, Rettie* Students present and discuss primary literature that integrates aspects of medicinal chemistry and pharmacokinetics with the physiology, pharmacology, and genetics of therapeutic drug targets. Examples of targets discussed include ion channels and enzymes relevant to cardiovascular disease, and neurodegenerative disease. Credit/no-credit only. Offered: Sp.

MEDCH 535 P-Diagnostic Medicinal Chemistry (3) *Catalano, Kunze* Examination of clinical diagnostic tests with regard to the chemical or biochemical rationale of the testing method, interpretation of test results, and major factors influencing test values with special emphasis on the effects of medications. Clinical laboratory data from patients considered in light of these factors. Offered: W.

MEDCH 541 Biological Mass Spectrometry (3) *Whittington* Covers the basics of modern ionization methods and mass analyzers; small molecule structure assignment, quantitative assay development by LC-MS and metabolomics; quantitative discovery-based proteomics and validation methods; and peptide sequence determination, post-translational modification mapping, and protein structure determination methods. Prerequisite: permission of instructor. Offered: Sp.

MEDCH 551 Flavin and Heme-Containing Monooxygenases (1) *Rettie* Discussion of research strategies and methodologies concerning the structure, function, and polymorphic expression of human monooxygenases, especially the cytochrome P450s and flavin-containing monooxygenases. Emphasis placed on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 552 Medicinal Chemistry Aspects of Drug Action and Drug Metabolism (1) *Nelson* Discussion of research strategies, methodologies, and literature concerning the mechanisms of drug action and drug metabolism, particularly as these apply to opiate drugs and beta blockers. Emphases placed on problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 553 Structure and Function of Macromolecular Protein Assemblies (1) *Atkins* Discussion of research strategies, methods, and current literature concerning macromolecular self-assembly processes and protein-protein interactions as they relate to biological specificity. Emphasis on experimental approaches used in current literature. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 554 Biophysical and Structural Virology (1) *Lee* Discusses current topics in virus research and literature. Weekly sessions led by all participating members of the research group. Credit/no-credit only. Offered: AWSpS.

MEDCH 555 Biophysics and Pharmacology of Dynamic Proteins (1) *Nath* Discusses current topics in protein dynamics, focusing on intrinsically disordered proteins and drug-metabolizing enzymes. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 556 Clinical and Mechanistic Aspects of Drug Metabolism (1) *Totah* Discussion of research methodologies and new approaches to elucidate chemical mechanisms

and enzymology of reactions catalyzed by cytochrome P-450. Emphasis on clinical applications and predicting in vivo drug behavior and toxicity. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 558 Human Cytochrome P-450 Biochemistry (1) *Kunze* Presentation and discussion of research strategies and methodologies related to current problems in human drug metabolism by cytochrome P-450 enzymes. Emphasis on hypothesis testing and experimental problem solving in the areas of enzyme kinetics and mechanism. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 559 Biosynthesis, Metabolism, and Analysis of Lipids (1) *L. XU* Covers recent advanced on oxidative metabolism of lipids, lipid biosynthesis, and application of advanced mass spectrometry to the analysis of lipids and oxidized lipids. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

MEDCH 561 P-Immunizing and Antimicrobial Agents (4) *Black, Lee, Totah* Mechanisms of action, spectrum of coverage, resistance patterns, toxicity, and therapeutic applications of antibiotics, antifungals, and antivirals. Also covering chemical and biologic properties of agents used to prevent or treat infectious diseases, including diagnostic, prophylactic, and therapeutic uses of immunizing agents. Prerequisite: MICROM 301, MICROM 302, MEDCH 570, or equivalent, PharmD major, or permission of instructor. Offered: Sp.

MEDCH 562 P-Medicinal Chemistry (3) *W. ATKINS, K. KUNZE, D. PORUBEK, A. RETTIE* Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: A.

MEDCH 563 P-Medicinal Chemistry (3) *Nelson, Rettie* Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: W.

MEDCH 564 P-Medicinal Chemistry (3) *Atkins, Nelson* Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: Sp.

MEDCH 570 P-Medicinal Biochemistry (4) *Catalano, Kunze* Covers advanced topics in medical biochemistry directly related to understanding disease and drug therapy in pharmacy practice. Areas of study include enzymes of drug metabolism, metabolic control of disease states, signal transduction, virology, coagulation and complement cascades, cellular transport, and DNA replication/transcription. Offered: W.

MEDCH 582 Topics in Medicinal Chemistry (1, max. 30) Discussion of pertinent articles from current literature. Credit/no-credit only. Offered: AWSpS.

MEDCH 599 Cumulative Exams for Medicinal Chemistry (1) Quarterly cumulative examinations for graduate students. Credit/no-credit only. Offered: AWSpS.

MEDCH 600 Independent Study or Research (*-) Credit/no-credit only. Offered: AWSpS.

MEDCH 700 Master's Thesis (*-) Credit/no-credit only. Offered: AWSpS.

MEDCH 800 Doctoral Dissertation (*-) Credit/no-credit only. Offered: AWSpS.

Pharmaceutics

The Department of Pharmaceutics offers a program of study leading to the Doctor of Philosophy degree.

The doctoral degree program in pharmaceutics trains research scholars in the fundamental aspects of drug delivery, drug disposition, and drug action in animals and man. Drug disposition includes the facets of drug absorption, distribution, and elimination. Pharmacokinetics is the study of the time course of these processes and the time course of pharmacological effects. Drug delivery includes targeting of drugs and modulation of xenobiotic and drug transporters to tissues or specific cell types to improve their therapeutic effect. For further information, visit: sop.washington.edu/pharmaceutics/about/what-is-pharmaceutics.html.

Typically graduates interact with clinicians, medicinal chemists, biochemists, pharmacologists, analytical chemists, and physiologists. This is possible because their training is highly interdisciplinary at the didactic and research levels.

A wide range of career paths is available to graduates. Opportunities include research in the pharmaceutical industry; research in hospitals, institutes, and foundations; teaching and research in academic institutions; and positions with government regulatory agencies.

GRADUATE PROGRAM

Graduate Program Coordinator

H272 Health Sciences, Box 357610

(206) 543-9434

pceut@uw.edu

Doctor of Philosophy

Admission Requirements

1. One copy of official transcripts in a sealed envelope from each college attended
2. Official GRE score report
3. All foreign students must take the TOEFL and TSE test and send in the official score report
4. Statement of personal goals describing applicant's background, academic interests, and career objectives
5. A resume; or curriculum vitae listing educational and employment history
6. Three letters of recommendation from persons in a position to evaluate the applicant's potential for graduate school.

Degree Requirements

Minimum 90 credits of coursework, to include:

1. **Credits and Scholarship:** Minimum 41 credits of coursework, exclusive of thesis and non thesis research. 3.00 GPA in all numerically graded courses numbered 400 and 500. Minimum passing grade in any given course is 2.7, except required pharmaceutics courses (PCEUT 501, PCEUT 502, PCEUT 503, PCEUT 506) in which a passing grade is 3.0. Credits earned for a master's degree may apply towards the doctoral degree.
2. **Teaching Experience:** Minimum two quarters of teaching assistant experience. Students are not asked to assist more than one class an academic quarter (less than 12 contact hours/week). Most students complete this requirement during the first three years in the program.
3. **Examinations and Progress Evaluation:** A series of preliminary, cumulative (written) examinations; a general examination (oral) for advancement to PhD candidacy; a final examination (defense of the thesis). See Appendix A, "Progression Steps in Relation to the Doctoral De-

gree," for an overview. Appendix B describes the cumulative examination, which precedes the general exam. Appendix C provides details about formation of a doctoral Supervisory Committee and its role in the general exam and thesis defense. Appendix D provides details about the structure and conduct of the general exam.

4. **Master's Degree Bypass:** Students who qualify for continuation to the PhD degree may be allowed to bypass the M.S. degree. See Appendix A for petition procedure.
5. **Seminars:** All students must present a minimum of two and a maximum of four seminars while in the doctoral program (PCEUT 520). In addition, a presentation of papers from current literature is required twice a year, starting at the beginning of the second year until defense of the thesis (PCEUT 583). See Appendix E, "Training in Oral Communication through Seminars and Journal Club" for additional details.
6. **Didactic:** Coursework for the doctoral program is divided into four components: (a) prerequisites which define the level of entry into the program; (b) a required core program which is analogous to the major; (c) elective courses, which are not required but are encouraged; (d) seminars and literature review.

a. Prerequisites: MATH 124, MEDCH 400

Applicants with a PharmD degree should have fulfilled the medicinal chemistry requirement. MEDCH 400 can be taken in autumn quarter of the first year. Candidates are accepted on condition that any deficiencies in course requirements are rectified by the end of the first academic year.

b. Core Program: PCEUT 506, PCEUT 501, PCEUT 502, PCEUT 503, PCEUT 510, PHCOL 511, PHCOL 512, PHCOL 513, BIOST 511, BIOST 512, HCDE 509, PCEUT 600, PCEUT 800

Students entering with previous graduate-level coursework in the required areas may have some of the above courses waived. In addition, all students must attend the following training sessions, preferably during the first academic year: chemical safety, biological safety, and bioethics training. Radiation safety and animal care may also be required, if relevant to the student's thesis research.

c. Directed Electives: Electives are not required. However, students are encouraged to take elective courses that might benefit their thesis project and career goals. Courses that might be of interest can be found in the disciplines of biotransformation/biochemistry, biologics/drug delivery, pharmacology/cell biology, and physiological modeling/biostatistics.

d. Seminars and Literature Review:

- i. PCEUT 520 (1 credit/quarter; 3 quarters/year until graduation). Beginning the second year, students make one presentation each year, with a maximum of four presentations. A general topic seminar is presented in the second year; research presentations in subsequent years.
- ii. PCEUT 583 (1 credit/quarter; 3 quarters/year until graduation). Beginning the second year, students make two presentations each year until graduation. Journal club presentation is waived in the quarter during which the student is scheduled to make a PCEUT 520 seminar presentation.

7. Research: PCEUT 600, PCEUT 800.

Students complete three research laboratory rotations (PCEUT 600), one per quarter, starting autumn quarter of their first year. A student may opt to complete a rotation in summer quarter, before the initiation of classes. This involves an early appointment in the department and, thus, decisions must be made at the time they accept the offer to enroll. Matching of available labs with each incoming student is facilitated by the first year

graduate adviser. Student preferences are given due consideration.

Students must choose a thesis adviser by the end of spring quarter in their first academic year (See Appendix A for additional details).

Students must begin research in the lab of their adviser by summer quarter at the end of their first academic year (PCEUT 600). Most students may find that after-class and off-hours are the best and most productive time for laboratory research (See Appendix A1b for additional details).

After successful completion of the master's bypass requirements (see Appendix A for details), students sign up for PCEUT 800, until the defense of their thesis.

8. **Cumulative Examination:** Students begin taking cumulative exams in autumn quarter of their second academic year, and continue taking them at every offering until completion of pass requirements or until they take the maximum of eight exams. A total of eight exams are offered, two each in autumn, winter, spring, and summer quarters. For each exam, there two questions. Students must pass four of eight exams to complete the cumulative requirement. Students who do not achieve this goal are given the option of completing requirements for a terminal master's degree or withdrawal from the program.

Financial Aid

All students in the program receive financial support in the form of research assistantships, Public Health Service predoctoral training fellowships, and other fellowships such as the William E. Bradley Graduate Fellowship or those from the American Foundation for Pharmaceutical Education or from several pharmaceutical companies.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

PCEUT 499 Undergraduate Research (1-6, max. 12) Research problems in drug disposition, drug targeting, and drug development. Prerequisite: cumulative GPA of 2.50 and permission of instructor.

PCEUT 501 Advanced Pharmacokinetics I (5) Lin, Prasad, Unadkat Drug absorption, distribution, excretion, metabolism, and pharmacological effects in mammalian systems. Compartmental and physiologically-based pharmacokinetic models as well as non-compartmental approaches examined. Drug disposition studied in a physiologically realistic context taking nonlinear events into account. Aimed at development of innovative methods for data analysis (including population pharmacokinetic and pharmacodynamic models) and evaluation in biological systems. Prerequisite: PCEUT 506 or permission of instructor. Offered: even years.

PCEUT 502 Pharmacokinetics of Drug Metabolism (4) Isoherranen, Thummel Advanced study of drug metabolism pharmacokinetics. Topics emphasize linear and nonlinear metabolic clearance kinetics, drug-drug interaction mechanisms and kinetics, metabolite kinetics, in vitro-in vivo predictions, pharmacogenetics and other sources of inter-individual variability. Prerequisite: PCEUT 506 or permission of instructor. Offered: even years.

PCEUT 503 Drug Transport and Delivery (5) Ho, Hu, Mao, Shen, Unadkat, Wang Provides advance knowledge of the physico-chemical and biological concepts underlying in vivo transport and delivery of drugs. Prerequisite: PCEUT 506.

PCEUT 506 Pharmacokinetic Principles (6) Lin Covers the fundamentals of pharmacokinetics. Includes lectures and laboratory exercises on the key concepts in pharmacoki-

netics, including compartmental kinetics, clearance, protein binding, bioavailability, pharmacodynamics, clinical pharmacokinetics, and Michaelis-Menten kinetics.

PCEUT 510 Drug Interactions (3) *Collins, Horn, Lin, Shen* Covers common pharmacokinetic mechanisms underlying clinically important interactions between drugs, and patient- and drug-related factors that predispose a patient to adverse drug effects. Includes case-based discussion of approaches to identification, clinical evaluation, and clinical management of drug-drug interaction risk. Prerequisite: PHARM 558; PHARM 559; PHARM 560; PHARM 561; PHARM 563; PHARM 564, and PHARM 565.

PCEUT 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PHG 513; W.

PCEUT 520 Seminar (1, max. 30) A. NATH Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with MEDCH 520.

PCEUT 531 P-Pharmaceutical Formulation: Principles and Dosage Forms (4) *Lee, Mao, Shen* Physicochemical principles involved in formulating stable dosage forms suitable for human administration. Hands-on laboratory experience with formulating extemporaneous preparations routinely encountered in community and hospital pharmacies. Routes of drug administration.

PCEUT 532 P-Clinical Pharmacokinetics (4) *Anderson, Isoherranen, Unadkat, Wang* Covers basic principles of pharmacokinetics and their application to the clinical setting, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, and the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Prerequisite: PCEUT 531.

PCEUT 533 P-Biopharmaceutics, Drug Delivery and Therapeutic Resonance (3) *R. HO, S. HU, K. THUMMEL* Provides basic principles of biopharmaceutics, drug delivery and therapeutic response, and their application to traditional and biotherapeutics, including oral and non-oral routes of drug administration. Discussion include fundamental principles related to assessment of bioavailability, bioequivalence, and genetic basis for drugs. Offered: Sp.

PCEUT 570 Advanced Research Topics (1, max. 15) Combines a discussion of the practical aspects and experimental techniques used to address the questions relating to drug disposition with comprehensive theoretical treatment of pharmacokinetic principles. Prerequisite: permission of the instructor. Credit/no-credit only.

PCEUT 583 Topics in Pharmaceutics (1, max. 30) *N. KLATT, K. THUMMEL* Discussion of pertinent articles from current literature and recent laboratory results. Credit/no-credit only.

PCEUT 584 Pharmacokinetic Discussion Group (2) *Lin* Student initiated discussions of pharmaceutics concepts in relation to current literature. Preparatory to departmental cumulative examinations. Credit/no-credit only.

PCEUT 586 Biotechnology and Biopharmaceutics (2-3) *Ho, Hu, Kelly, Thummel* Current topics in pharmaceuticals and biotechnology focusing on transforming small molecules, proteins, and genes into therapeutic products. Includes new drug therapies, drug design, pharmacogenomics, molecular modeling, high throughput screen, production and stability considerations, and delivery systems of protein and gene therapeutics in relation to pharmacokinetic and therapeutic responses.

PCEUT 587 Introduction to Biopharmaceutical Product Development (3) Provides a framework of the drug development process and its regulation. Prerequisite: ENV H 405 or ENV H 514, ENV H 515, and ENV H 516, or PCEUT 501, PCEUT 502, and PCEUT 503; or equivalent, or instructor permission. Offered: jointly with ENV H 587; A, even years.

PCEUT 598 Independent Research (*, max. 24) Basic and clinical research problems in drug disposition and effect. Prerequisite: minimum grade of 2.50 GPA and permission of instructor.

PCEUT 599 Cumulative Exams for Pharmaceutics (1-, max. 3) *Isoherranen* Quarterly cumulative examinations for graduate students.

PCEUT 600 Independent Study or Research (*-) Credit/no-credit only.

PCEUT 700 Master's Thesis (*-) Credit/no-credit only.

PCEUT 800 Doctoral Dissertation (*-) Credit/no-credit only.

Pharmacy

Graduate Program Coordinator

H375 Health Sciences, Box 357630

(206) 616-1383

The Department of Pharmacy offers graduate study leading to a PhD degree in pharmaceutical outcomes research and policy. Emphasis of this program is on the health and cost outcomes of pharmaceuticals and pharmaceutical services and policies. Graduate training in this program prepares students for career opportunities in teaching and research in universities, safety and economic evaluation of products in the pharmaceutical industry, policy analysis of governmental agencies, and drug use management within healthcare delivery and financing organizations.

Also offered is a track in the PharmD/MS program in pharmaceutical outcomes research and policy, which provides an opportunity for one-to-two students currently completing their PharmD training at the UW to enter the graduate program in their fourth year of training. The program requires completion of 64 credit hours, a written thesis, and a quarter of practicum in a managed care, government, industry, or other appropriate setting. At the end of this training, students may elect to receive a master's degree, or continue on toward a PhD degree.

The UW's biomedical regulatory affairs Master of Science program, offered by the UW School of Pharmacy in partnership with UW Educational Outreach, addresses a growing need for well-trained professionals in the regulatory field. The degree serves those who wish to advance their careers in the medical products industry or those entering the field from related areas.

Deadline for application for the PhD and the PharmD/MS programs is December 31. Applicants are notified of acceptance or rejection by March 30. Refer to the application deadline for the biomedical regulatory affairs master-of-science program posted at: www.biomedreg.uw.edu/admissions/deadlines.asp.

Application materials and additional information are available in the Department of Pharmacy or at program websites listed below:

- sop.washington.edu/porpp/graduate-program/phd-program27.html.
- sop.washington.edu/porpp/graduate-program/concurrent-pharmdms-degree-in-pharmaceutical-outcomes-research-a-policy.html.
- www.biomedreg.uw.edu.

Residency and Fellowship Programs

The Department of Pharmacy offers several postdoctoral fellowships in pharmacotherapeutics and pharmaceutical outcomes, and advanced community residency programs, primarily intended for PharmD graduates. Additional information is available on the department's website: sop.washington.edu/pharmacy/about/fellowship-a-residency-opportunities.html.

Clinical and Affiliate Faculty

In addition to the School of Pharmacy's full- and part-time faculty listed above, a large number of practicing pharmacists contribute to the School's academic programs. Over 500 pharmacists throughout the Pacific Northwest are members of the clinical and affiliate faculty, representing a variety of pharmacy practice settings such as community, hospital, nursing home, government, and industry. Information on the names, addresses and practice settings of these faculty members is available from the Office of Professional Pharmacy Education.

PROFESSIONAL PROGRAM

Doctor of Pharmacy

A four-year professional program leading to the Doctor of Pharmacy (PharmD) degree, the curriculum is designed to provide students the scientific background and clinical skills necessary to render pharmaceutical care in various healthcare settings. Individuals who wish to practice pharmacy in the United States must earn a Doctor of Pharmacy (PharmD) degree from an accredited college or school of pharmacy, complete required internship hours, pass licensing examinations, and meet other state-specific licensing requirements.

Admission Requirements

Consideration for admission to the professional program requires a minimum three years of pre-pharmacy training. An applicant who is admissible to the University is not assured admission to the School of Pharmacy. Admission is competitive, based on a number of factors. Academic preparedness, motivation, oral and written communication skills, critical-thinking ability, and decision-making skills are among the criteria used to determine a candidate's aptitude for the program. Following a preliminary assessment of the applicant pool, the most qualified applicants are selected for an interview in Seattle. A writing assessment is also conducted at that time. Further details on admission requirements, application procedures, and program content are available from the School's Office of Academic and Student Programs or its website.

1. Applicants to the UW School of Pharmacy PharmD program must both complete an on-line PharmCAS Application and submit a supplemental application to the UW School of Pharmacy, Office of Academic and Student Programs. Potential applicants should consult the School of Pharmacy website, sop.washington.edu/school-of-pharmacy/pharmd-admissions/applications-to-pharmd-program.html for additional admission requirements and the most current information regarding the PharmD program.
2. Please refer to the School's website for current entry-level Doctor of Pharmacy program information at sop.washington.edu/students/.
3. Pharmacy College Admission Test (PCAT) must be taken within two years of application. The UW School of Pharmacy accepts no other admission test (e.g., MCAT, GRE) in place of the PCAT.
4. Applicants who have completed all prerequisite (pre-pharmacy) coursework prior to application and those who have earned a prior bachelor's degree or higher are given preference in the process of screening for offer of

interview. The admissions committee has established minimum cumulative and prerequisite (pre-pharmacy) GPA thresholds and PCAT scores for screening for offer of interview. Applicants who meet or exceed these minimums are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool.

- Interview is required as part of the UW School's PharmD admission process. After a preliminary assessment of the applicant pool, the most-qualified applicants are invited for an interview in Seattle with members of the PharmD admissions committee. Admission preference is given to residents of Washington State and residents from states participating in the Western Interstate Commission for Higher Education (WICHE).
- It is important for applicants to research carefully the pharmacy profession and the attributes, skills, and abilities essential for pharmacists in the provision of care. Although relevant experience is not required, applicants are strongly encouraged to gain pharmacy experience, either as a volunteer or employee.
- Non-U.S. Citizens:* Applicants who hold "Permanent Resident" or "Refugee/Asylee" visa status and international students with F-1 Visa status are eligible to apply. F-1 Visa students must take the TOEFL within two years of application. Please refer to the School's website for more information at sop.washington.edu/school-of-pharmacy/pharmd-admissions/international-applicants-eligibility-to-apply.html.
- International Transcripts:* All transcripts for coursework completed at foreign colleges or universities must be translated and evaluated course-by-course by one of the following certified agencies: the Education Credential Evaluators, World Education Services, Inc, or Educational-Perspectives.

Degree Requirements

Current degree requirements for entering classes are reflected in the graduating class of 2015 and later. (Graduating classes of 2014 and earlier have different course sequences as a result of this revision.) Below are the current degree requirements:

- Year 1 (47 core, 5 elective credits):* CONJ 401, CONJ 402, CONJ 403; MEDCH 561, MEDCH 570; PCEUT 531, PCEUT 532, PCEUT 533; PHARM 500; PHARM 558; PHARM 584, PHARM 585, PHARM 586; PHARMP 511, PHARMP 512; 5 elective credits; MEDCH 400 is required for students who do not pass the MEDCH qualifying exam, which if taken, can be credited as a professional elective.
- Year 2 (46 core, 5 elective credits):* MEDCH 562, MEDCH 563, MEDCH 564; PHCOL 401, PHCOL 402; PHARM 509; PHARM 537; PHARM 539; PHARM 543, PHARM 543; PHARM 559; PHARM 563; PHARM 592, PHARM 593, PHARM 594; PHARMP 513, PHARMP 514; PHARMP 531; 5 elective credits
- Year 3 (33 core, 18 elective credits):* PCEUT 510 (3); PHARM 541; PHARM 560; PHARM 561, PHARM 562; PHARM 564, PHARM 565; PHARMP 532, PHARMP 533, PHARM 541; 18 elective credits
- Year 4:* Nine required clinical rotations (6 credits each) for a total of 54 credits

PharmD/PhD Concurrent Program

PharmD/PhD Program Coordinator

H272 Health Sciences, Box 357610

(206) 543-0819

The accelerated dual-degree program is intended for outstanding students committed to earning the PharmD degree and a PhD degree in either Pharmaceutics or Medicinal Chemistry. Students are equipped to enter academic

careers that require competence in clinical practice, teaching, and research. They will possess the breadth and depth of knowledge necessary to work with colleagues across multiple disciplines essential to performing integrated and translational medical and pharmaceutical research. Many of our trainees have worked in research and developed an interest in public health and pharmaceutical sciences through that experience.

Students admitted to the concurrent degree program are able to complete the requirements for both degrees in about eight academic years, rather than the nine years normally required to receive both degrees.

Admission to the PharmD/PhD program is based on the recommendation of the admission committees of the professional degree program, the graduate program, and the PharmD/PhD program. For additional admission criteria, see respective programs.

Admission Requirements

Applicants must complete admission requirements of both the PharmD and PhD programs. Consideration for the PharmD/PhD program is contingent upon completion of a PharmD application, Graduate School application, and PharmD/PhD application (available online at: sop.washington.edu/school-of-pharmacy/degree-programs/concurrent-degree-opportunities.html).

- PharmD program application is composed of (a) verified completion of all application materials by the deadline as stated on the school website, (b) PCAT scores, (c) prerequisite and cumulative GPA, (d) ability to complete prerequisite courses by the end of spring term prior to School of Pharmacy matriculation. For details, see PharmD admission requirements.
- Graduate School application for medicinal chemistry or pharmaceuticals includes (a) undergraduate degree in chemistry, biochemistry, pharmacy, biology, or a closely related field, (b) statement of purpose, (c) GRE scores, (d) prior research experience, (e) three letters of recommendation. Graduate School application deadline as stated on the school website.
- In addition, applicants are required to submit information requested in the PharmD/PhD concurrent program application checklist, available on the above stated website.

Financial Aid

Financial support in the form of research assistantships, teaching assistantships, and fellowships may be available to prospective and continuing students. Availability of financial aid is limited, typically to the first and second academic year. Prospective students should contact the Graduate Program Coordinator for more information on financial support.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

PHARM 301 Medications and Health: It's Not All About Drugs (3) I&S/NW Dawson, Odegard, Weber Covers personal health promotion, treatment of illness, and health care. Explores several medication-related topics, provides insight on drug development and efficacy, and serves as introduction to students contemplating careers in health sciences, especially in pharmacy. Credit/no-credit only.

PHARM 500 Profession of Pharmacy (1) Kedzierski, Weber Introduces the new student to the profession of pharmacy. Provides both an historical and a modern context that assists student pharmacists begin to participate in the profession. Provides an overview of career opportunities.

Prerequisite: professional PharmD class 1 student. Credit/no-credit only. Offered: A.

PHARM 501 P-Alternative and Complementary Medicines (2) Anderson Studies popular alternative and complementary medicines used in the United States. Focuses on herbal products with some coverage of other non-nutritional dietary supplements. Open to professional and graduate students in the Schools of Pharmacy, Nursing, Medicine, Dentistry, and Public Health, or by permission of instructor. Credit/no-credit only. Offered: AW.

PHARM 503 Senior Care Introductory Pharmacy Practice Experience (2) Murphy, Plein Under faculty supervision, provides clinical services for senior patients in various settings. Includes reviewing charts, interviewing patients, collaborating with other health care providers, and making recommendations on medication therapies to providers and patients. All students participate in an orientation/seminar workshop and in a weekly (for five weeks) clinical pearls workshop. Prerequisite: either successful completion of the first five quarters of the PharmD curriculum or permission of instructor. Credit/no-credit only. Offered: Sp.

PHARM 509 P-Principles of Evidence Based Medicine III: Critical Evaluation of Published Evidence (1) O'Sullivan Provides a critical evaluation of medical literature. Prerequisite: permission of School of Pharmacy.

PHARM 510 Contemporary Concepts in Clinical Nutrition Support (1) Chan Addresses current topics and concepts in clinical nutrition support. Topics include assessment and management of patients requiring specialized nutrition support, enteral nutrition, and parental nutrition. Prerequisite: biochemistry, anatomy and physiology, or permission of instructor; taken concurrently with NUTR 511. Offered: A.

PHARM 513 P-Medical Devices for Home Healthcare (3) Downing Study of medical devices commonly provided by pharmacists to their patients, including their selection and adaptation for specific patient needs. Lectures include display and demonstration of actual devices.

PHARM 514 Pharmacotherapeutics for Advanced Nursing Practice (3) Hertig Application of principles of pharmacology as foundation for clinical decision making by advanced practice nurses for individuals and populations. Incorporates pharmacotherapy into advanced nursing therapeutics by addressing pharmacokinetics, pharmacodynamics, pharmacogenetics as well as patient-related factors that support selection of commonly used drugs. Selected drugs within categories are compared/contrasted.

PHARM 515 Pharmacotherapeutics for Acute/Critical Illness (3) Coyne Analysis of issues that impact the assessment, prescription, and evaluation of pharmacotherapeutic regimens for patients who are acutely or critically ill. Current research, clinical contextual considerations, and pharmacotherapeutic principles are emphasized as the basis for decisions relevant to the management of pharmacotherapy in acute care clinical practice.

PHARM 516 Introduction to Biomedical Regulatory Affairs (3) Hazlet Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production; and responsibilities of a regulatory affairs specialist in the regulatory setting.

PHARM 517 Product Development and Manufacturing Systems (3) Hazlet Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production.

PHARM 518 Product Testing, Evaluation, and Post-Market Issues (3) Hazlet Medical product post-marketing requirements; reporting and enforcement actions; inspections (internal and by regulators) preparation, conduct, and follow-up actions; surveillance and studies, reimbursement, and economics.

PHARM 519 Pharmacotherapeutics for Infectious Disease and Infection (2) Black, Simpson Analysis of pharmaco-

therapeutics to control infection and manage infectious disease through seminar discussion of cases, critical analysis of a pharmacotherapeutic regimen, and development of references to enhance students' clinical expertise. Emphasis on principles of anti-infective therapy, problem solving clinical cases with complex medication regimens, and identifying judicious pharmacotherapeutic plans.

PHARM 520 P-Introduction to Pharmacoeconomics and Outcomes Research (2) *Veenstra* Provides an introduction to economic evaluation and outcomes research related to pharmaceuticals and other healthcare technologies. Covers the methods of cost-effectiveness analysis and quality of life evaluation, and their use in real-world decision-making.

PHARM 521 P-Pharmacy Teaching Practicum (1-3, max. 6) *Allen, Dawson, Hammer* Allows students the opportunity to apply learning about education in a mentored experiences. Students serve as assistant instructors in existing pharmacy courses or engage in other approved educational experiences. Prerequisite: PHARM 586, instructors permission. Credit/no-credit only. Offered: AWSp.

PHARM 522 P-The Nature of Scientific Truth (2) *Hansten* Drawing on the wisdom of scientists and philosophers, discussion of the nature and limitations of scientific truth, using examples from the practice of pharmacy whenever possible. Emphasizes reasoning errors that are common in science, particularly those that involve the application of scientific information to clinical practice. Credit/no-credit only.

PHARM 525 P-Advanced Compounding Skills (1) *Lawhorn, Needham* Prepares the student to create unique, patient-specific pharmaceutical dosage forms used in contemporary pharmacy practice. Includes pre-readings and assignments, a didactic session and a laboratory session, and is offered over a weekend. Prerequisite: PCEUT 531. Credit/no-credit only.

PHARM 529 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) *E. DEVINE, F. WOLF* Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/EPI 541/HSERV 529; Sp.

PHARM 532 Methods in Pharmaceutical Policy Analysis (4) *Garrison, Hazlet* Introduction to the tools used in and the framework and dominant contexts for pharmaceuticals policy development and analysis. Methods reviewed in a series of sessions presenting a specific method and case analyses involving pharmaceuticals development. Project and in-class presentation required.

PHARM 533 Pharmacoepidemiology (3) *Boudreau, Heckbert* Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513; or permission of instructor. Offered: jointly with EPI 533; Sp, even years.

PHARM 534 Economic Evaluation in Health and Medicine (3) *Garrison, Veenstra* Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with HSERV 583.

PHARM 535 Assessing Outcomes in Health and Medicine (3) *Devine, Edwards* Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Offered: jointly with HSERV 584; W.

PHARM 536 Advanced Methods in Economic and Outcomes Evaluation in Health and Medicine (3) *Carlson* Covers advanced methods and techniques for evaluating costs, outcomes, and cost-effectiveness of health, medical, and pharmaceutical interventions. Topics include: network meta-analysis, Markov modeling, probabilistic sensitivity analysis, value of information analysis, utility mapping, conjoint analysis, and budget impact analysis. Prerequisite: either PHARM 534 and PHARM 535 or permission of instructor. Offered: Sp.

PHARM 537 P-Chemical Dependency Concepts (2) *Kedzierski* Examines the development of therapeutic frame for working with patients with addictions. Includes the genesis of addiction harm reduction strategies, legal and ethical considerations, medication management in the substance-abusing population, impaired pharmacist rehabilitation, detection and dealing with substance abuse issues in pharmacy practice, community resources. Course offered to professional PharmD, class 2. Credit/no-credit only. Offered: A.

PHARM 538 P-Chemical Dependency Issues in Practice (3) *Kedzierski* Emphasis on drug classes, pharmacologic management of abstinence and withdrawal, drug testing, drug use in pregnancy, treatment options and recovery, codependency and legal and ethical considerations. Prerequisite: PHARM 537. Credit/no-credit only. Offered: W.

PHARM 539 P-Principles of Professional Practice Management (3) *Downing, Somani* Emphasizes the major issues and barriers of providing pharmaceutical care in institutional and community pharmacies. Topics include evaluating workflow and facility design, complying with legal and safety standards, managing drug distribution services, payment for pharmacist services, human resource management and marketing pharmaceutical care services.

PHARM 541 Pharmacy, Healthcare, and Society (3) *Sullivan* Introduction to health services and pharmacy practice designed for future healthcare practitioners. Examines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student's ability to adopt a broad perspective across healthcare disciplines and traditional boundaries.

PHARM 542 P-Managed Care Pharmacy: Principles and Practice (3) *Fullerton, Penna* Surveys the activities, tactics, and strategies used by managed care to deliver pharmacy services to their members. Includes: formulary development, clinical improvement programs, quality improvement measures, regulatory activities, contracting with pharmaceutical manufacturers, network management, financial issues, sales and marketing, and provider relations. class 2, 3, and 4 PharmD students.

PHARM 543 Pharmacy Laws and Ethics ([2-3]-, max. 5) *Hazlet* Studies the laws governing the practice of pharmacy, approaches to legal, and ethical dilemmas in the delivery of pharmaceutical care, and methods of statutory and regulatory reform.

PHARM 544 Survey of Pharmacy Laws (1) *Hazlet* Prepare, discuss, and present responses to assigned questions developed by faculty regarding laws governing pharmacy practice in the course of reviewing for the Multistate Pharmacy Jurisprudence Examination. Class meets for two consecutive Saturdays in February and March. Email and web access required. Open to fourth-year PharmD students; non-matriculated students by permission only. Credit/no-credit only.

PHARM 549 Pharmacotherapeutics for Older Adults (3-4) *Murphy* Applies pharmacologic knowledge to the assessment, individualized selection of therapy, and monitoring of treatment in older adults with multiple comorbidities; and age-related changes in pharmacokinetics and pharmacodynamics with emphasis on problem solving, using case examples. Prerequisite: either PHARM 561; PHARM 565 or permission of the School of Pharmacy. Offered: Sp.

PHARM 550 Seminar in Geriatrics ([0-1]-, max. 1) *C. CATALANO, L. MIKE* Students facilitate a discussion with students/faculty about the management of an older adult with complex medication regimen. In addition, students critically review and appraise primary literature relevant to contemporary issues related to geriatric pharmacotherapy. Prerequisite: PHARM 549; permission of the instructor. Credit/no-credit only. Offered: AWSpS.

PHARM 552 Practice-Based Leadership and Project Development (2) *J. Arnold, N. Murphy* Strengthen skills necessary to develop, implement, and evaluate innovated programs that improve health, healthcare delivery, and the patient experience. In addition to actively participating in class discussions and group work, students are responsible for submitting weekly assignments, a final reflection paper, and a project proposal. Credit/no-credit only. Offered: W.

PHARM 557 Pharmacotherapeutics II (2) Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy Offered: Sp.

PHARM 558 P-Pharmacotherapeutics I - Pharmacotherapy with Non-prescription (OTC) Drugs (3) *Ellsworth* Overview of common classes of nonprescription drug therapeutics with an emphasis on case examples, patient assessment, non-drug adjunct therapy, product selection, and patient advice. Oral presentation required. Computer (Internet) case discussion mandatory. Enrollment restricted to first-year PharmD students.

PHARM 559 Pharmacotherapeutics III (4) Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: Sp.

PHARM 560 Pharmacotherapeutics IV (6) Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy Offered: A.

PHARM 561 Pharmacotherapeutics IV (7) *Gray, Mike* Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge toward the management of common diseases. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: W.

PHARM 562 Pharmacotherapeutics V (6) *Chan, McCune* Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge toward the management of common diseases. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: Sp.

PHARM 563 Applied Pharmacotherapeutics I (2) *C. CATALANO, L. MIKE* Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care. Prerequisite: permission of School of Pharmacy. Offered: Sp.

PHARM 564 Applied Pharmacotherapeutics II (2) *C. CATALANO, L. MIKE* Develops a foundation of skills that enables

a pharmacist to practice collaborative patient specific care. Prerequisite: permission of School of Pharmacy. Offered: A.

PHARM 565 Applied Pharmacotherapeutics III (2) C. CATALANO, L. MIKE Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care. Prerequisite: permission of School of Pharmacy. Offered: W.

PHARM 566 P-Applied Pharmacokinetics (2) Bauer Pharmacokinetics of specific drugs. Influence of age, weight, sex, and disease states on patient-specific dosage regimens emphasized. Advanced kinetic concepts are discussed and put into applied context. Prerequisite: PCEUT 532.

PHARM 567 P-Cancer Pharmacotherapeutics (2) Gibson, Kwok, McQuary, Vincent Pharmacotherapy of cancer, covering supportive care therapeutics (antibiotics, antiemetics, analgesics,) to the antineoplastic agents. The pathophysiology, staging, and treatment of different cancers is discussed. Specialists from the different oncology practice areas serve as guest lecturers. Prerequisite: either PHARM 561; PHARM 565, or permission of the School of Pharmacy. Offered: Sp.

PHARM 568 Health Economics (3/4) Garrison Applies microeconomics principles and models to understand the nature of healthcare markets and systems. Includes a wide range of health sector activities and policy issues studied by applying rigorous economic analytical tools coupled with review of key econometric and empirical analysis. Prerequisite: introductory coursework in microeconomic principles and basic statistics. Offered: W.

PHARM 569 P-Fluid and Electrolytes and Parenteral Nutrition (2) Chan Focuses on the principles of fluid electrolyte and nutritional management in patients requiring parenteral nutrition (PN) and infusion therapy. Topics include acid-base balance, macro- and micro-nutrient requirements, nutritional assessment, complications of PN and compounding and compatibility of PN solutions. Discusses consideration in special populations (e.g., ICU). Prerequisite: either PHARM 561; PHARM 565, or permission of the School of Pharmacy.

PHARM 570 P-Critical Care Pharmacotherapeutics (2) Mike Overviews pharmacotherapeutic topics for patients in the critical care setting. Discusses principles in hemodynamic monitoring, respiratory management, concepts in pathophysiology related to critical illnesses, and other timely topics reflecting current clinical practice. Prerequisite: third-year PharmD student, or approval of instructor.

PHARM 571 P-Current Topics in Acute Care Pharmacotherapy (1) Chan Increases understanding and stimulates discussion in current topics related to acute care pharmacotherapy. Reviews the management of patients in the acute care setting through current cases presented by instructors. May be taken alone or concurrently with PHARM 570. Prerequisite: either PHARM 561 ;PHARM 565, or permission of the School of Pharmacy.

PHARM 572 Pharmacist Advocacy I: Legislative and Grassroots Affairs (1) Downing Increases student awareness and knowledge of local, state, and national healthcare issues that affect pharmacists and their patients. Prepares pharmacy students to knowledgeably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Offered: A.

PHARM 573 Pharmacist Advocacy II: Legislative and Grassroots Affairs (1) Downing Prepares pharmacy students to knowledgeably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Students actively participate in off-campus legislative and advocacy activities while the Washington State legislature is in session. Offered: W.

PHARM 579 Current Topics in Pharmacy (1, max. 3) Black, Murphy Provides a forum for discussing late-breaking top-

ics that impact current and future pharmacy research and practice. Credit/no-credit only. Offered: AW.

PHARM 581 P-Global Health Pharmacy: Medicines, Practice, and Policy (2) J. BABIGUMIRA, A. STERGACHIS Introduces the critical role of pharmaceutical in addressing major diseases (such as HIV/AIDS, malaria, tuberculosis) affecting persons in resource-limited settings. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoeconomics, financing, intellectual property, and drug trade policies. Prerequisite: satisfactory completion of the 1-credit lecture/discussion component.

PHARM 582 P-Special Topics in Global Health Pharmacy and Medical Products ([1-3]-, max. 6) Babigumira, Garrison Provides in-depth instruction on selected special topics relating to the use, access to, and impact of pharmaceuticals, vaccines, and diagnostics/medical devices in global health. Credit/no-credit only.

PHARM 584 Pharmacy Practice I - Introduction to Community Pharmacy Practice I (3) Allen, Hammer Introduction to development and practice of skills in drug information resources; prescription processing and problem solving; pharmaceutical calculations and compounding; patient information and counseling on over-the-counter and compounded medications. Offered: A.

PHARM 585 Pharmacy Practice II (3) Allen, Hammer Continued development and practice of skills in drug information resources; prescription problem solving; pharmaceutical calculations; and patient information and counseling. Emphasizes use of commonly prescribed prescription medication as well as patient-specific characteristics that impact their care. Prerequisite: PHARM 584. Offered: W.

PHARM 586 Pharmacy Practice III: Applications of Public Health Practice (3) Catalano, Hammer Develops skills that enable public health screening and health promotion in community-based settings: administration of vaccines to adults and adolescents; practical application of community-based health screenings, counseling, and referral; and teaching self-monitoring techniques to patients. Emphasizes communication with members of special populations. Prerequisite: PHARM 585. Offered: Sp.

PHARM 587 Diabetes Prevention (2) Danielson, McKennon, Odegard Provides students with knowledge/skills to serve as Diabetes Prevention lifestyle coaches. The knowledge/skills developed can be applied to promote health/wellness in the community. Prerequisite: PHARM 563. Credit/no-credit only. Offered: A.

PHARM 588 Diabetes Care (2) Danielson, Odegard Further develops foundations in the principles of diabetes management and provides practice in application of diabetes-care principles. Develops knowledge and ability to assess, manage, educate, and monitor patients with diabetes. Prerequisite: either PHARM 560; PHARM 564, or permission of the School of Pharmacy. Credit/no-credit only.

PHARM 591 Community Collaborations in Healthcare Practicum (2, max. 8) Kedzierski Collaboration with representatives from the Salvation Army Adult Rehabilitation Center and other community sites to improve health literacy and health outcomes of men and women beneficiaries (residents) in addition treatment and recovery. Prerequisite: permission of instructor. Credit/no-credit only. Offered: ASP.

PHARM 592 Pharmacy Practice IV: Design and Analysis of Medical Studies (3) Devine Introduces the basic biostatistical concepts used in the medical literature, and the various study designs. Develops students' skills in critically evaluating the medical literature, with the goal of applying these skills to clinical practice. Prerequisite: PHARM 584; PHARM 585; PHARM 586. Offered: A.

PHARM 593 Pharmacy Practice V: Institutional Pharmacy Practice (3) Somani Includes discussion and skill development related to contemporary institutional pharmacy

practice. Focuses on health information technology, the quality improvement process, MUE and cost management, medication order processing, counseling and medication reconciliation, interpersonal teamwork, and patient-oriented services. Students create and present mock proposals for new guidelines and practice protocols. Prerequisite: PHARM 592. Offered: W.

PHARM 594 Pharmacy Practice VI: Medication Quality and Safety (2) Introduces topics related to medication safety and quality improvement. Describes the role of information technology and the importance of organizational leadership and teamwork in improving safety. Introduces topics of collaborative drug therapy management and managed care pharmacy practice. Prerequisite: PHARM 593. Offered: Sp.

PHARM 595 Special Studies in Pharmacy (1-6, max. 24) Special studies of professional topics in pharmacy. An opportunity to expand the breadth and depth of understanding in specific pharmaceutical areas. Students may undertake independent study under the individual direction of a faculty member.

PHARM 596 Seminars in Pediatric Pharmacotherapy (2) Harvey Explores therapeutic topics pertinent to the pediatric population. Emphasizes ambulatory pediatrics. Prerequisite: third-year PharmD student or permission of instructor. Credit/no-credit only. Offered: W.

PHARM 597 Graduate Seminar (1, max. 24) Interactive discussion of topical issues, methods, or analytic techniques. Topics vary. Prerequisite: graduate program student. Credit/no-credit only.

PHARM 599 Independent Study/Research (1-6, max. 24) Applied pharmaceutical research problems. Credit/no-credit only.

PHARM 600 Independent Study or Research (*-) Credit/no-credit only.

PHARM 700 Master's Thesis (*-) Credit/no-credit only.

PHARM 800 Doctoral Dissertation (*-) Credit/no-credit only.

Pharmacy Practice

PHARMP 511 Introductory Pharmacy Practice Experience in Community Pharmacy I (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Orients students to community practice, fulfills requirements for entering patient care, and sets expectations for the course series. First in a series of four. Prerequisite: PHARM 584. Credit/no-credit only. Offered: W.

PHARMP 512 Introductory Pharmacy Practice Experience in Community Pharmacy II (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes legal requirements for practice, fulfills requirements for entering patient care, and exposes student to leaders in community pharmacy practice. Second in a series of four. Prerequisite: PHARMP 511. Credit/no-credit only. Offered: Sp.

PHARMP 513 Introductory Pharmacy Practice Experience in Community Pharmacy III (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes patient safety, involvement in health/wellness screening, and exposes students to leaders in community pharmacy. Third in a series of four. Prerequisite: PHARMP 512. Credit/no-credit only. Offered: A.

PHARMP 514 Introductory Pharmacy Practice Experience in Community Pharmacy IV (2) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes reflection on and documentations of professional competency. Fourth in a series of four. Prerequisite: PHARMP 513. Credit/no-credit only. Offered: W.

PHARMP 522 Foundations of Interprofessional Practice ([0-1]-, max. 1) J. DANIELSON, P. ODEGARD Team-based training and experiential immersion in healthcare team functioning for PY3 pharmacy students. Work with medical, nursing, physician assistant, social work, dental, and dietetic students in patient care situations to apply evidence-based practice and quality improvement principles. Focuses on development of intra and interprofessional roles and professional identity. Credit/no-credit only. Offered: AWSp.

PHARMP 531 Introductory Pharmacy Practice Experience in Institutional Pharmacy I (1) Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion/reflection, and progress assessment. Orients students to institutional practice, exposes student to leaders in hospital practice, and introduces expectations for quality assurance activities. First in a series of three. Prerequisite: PHARMP 514. Credit/no-credit only. Offered: AWSpS.

PHARMP 532 Introductory Pharmacy Practice Experience in Institutional Pharmacy II (1) Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes quality assurance in hospital practice, reflects on medication reconciliation, and orients students to subsequent IPPE coursework. Second in a series of three. Prerequisite: PHARMP 531. Credit/no-credit only. Offered: AWSpS.

PHARMP 533 Introductory Pharmacy Practice Experience in Institutional Pharmacy III (1) J. DANIELSON Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient setting, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion, and progress assessment. Third in a three-part series. Prerequisite: PHARMP 532. Credit/no-credit only. Offered: AWSpS.

PHARMP 541 Introductory Pharmacy Practice Experience in Clinical Skills (1) O'Sullivan Students interview and assess a patient in the practice setting, present the patient case and an oral seminar in a small group setting, and complete other requirements for beginning advanced pharmacy practice experience. Prerequisite: PHARMP 533. Credit/no-credit only. Offered: Sp.

PHARMP 571 Advanced Pharmacy Practice Experience in Inpatient/Acute Care General Medicine (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

PHARMP 572 Advanced Pharmacy Practice Experience in Hospital or Health-System Pharmacy (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in an acute care or other inpatient setting. Applies therapeutic

knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

PHARMP 573 Advanced Pharmacy Practice Experience in Ambulatory Care (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a clinic-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and provide drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

PHARMP 574 Advanced Pharmacy Practice Experience in Community Pharmacy (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a community-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

PHARMP 575 Advanced Pharmacy Practice Experience in Patient Care (6, max. 30) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a non-required setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

PHARMP 576 Advanced Pharmacy Practice Experience in Non-Patient Care (6, max. 24) O'Sullivan Advanced pharmacy practice experience focusing on providing pharmacy services in a variety of non-patient care settings. Credit/no-credit only. Offered: AWSpS.

PHARMP 577 Advanced Pharmacy Practice Experience in Senior Care (6, max. 12) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a senior or geriatric care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 578 Advanced Pharmacy Practice Experience Elective (1-6, max. 12) O'Sullivan Advanced pharmacy practice experience in patient or non-patient care settings. Credit/no-credit only. Offered: AWSpS.

PHARMP 581 Advanced Pharmacy Practice Experience in Inpatient/Acute Care General Medicine (9, max. 36) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 582 Advanced Pharmacy Practice Experience in Hospital or Health-System Pharmacy (9, max. 36) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in an acute care or other inpatient setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 583 Advanced Pharmacy Practice Experience in Ambulatory Care (9, max. 36) O'Sullivan Six week ad-

vanced pharmacy practice experience focusing on providing patient-centered care in a clinic-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 584 Advanced Pharmacy Practice Experience in Community Pharmacy (9, max. 36) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in community-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 585 Advanced Pharmacy Practice Experience in Patient Care (9, max. 27) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a non-required setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 586 Advanced Pharmacy Practice Experience in Non-Patient Care Settings (9, max. 18) O'Sullivan Six week advanced pharmacy practice experience focusing on providing pharmacy services in a variety of non-patient care settings. Offered: AWSpS.

PHARMP 587 Advanced Pharmacy Practice Experience in Senior Care (9, max. 18) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a senior or geriatric care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

Pharmacy Regulatory Affairs

PHRMRA 524 Introduction to Clinical Trials (3) Hammond, Hayashi, Jonlin Introduces the major concepts under which clinical trials are designed to run. Focuses on the phases of clinical trials, the role of the Food and Drug Administration, Institutional Review Boards, the Code of Federal Regulations and ethical principles. Addresses study design and statistical concepts. Offered: A.

PHRMRA 525 Implementation and Conduct of Clinical Trials (3) Hammond, Hayashi, Jonlin Outlines the work of carrying out a clinical trial including the complex work of study initiation, issues of site and data managements, preparation of the final report and study close out, as well as the details that control the study conduct. Offered: W.

PHRMRA 526 Project Management and the Business of Clinical Trials (3) Hammon, Hayashi, Jonlin Addresses the business dimension of clinical trials, including the principles of project management, planning, analysis, contingency and follow-up within the context of clinical trials that involve a large number of tasks and people responsible for parts of the overall study. Offered: Sp.

PHRMRA 527 International Regulatory Affairs (3) Hammond Develops an understanding of international differences in the regulation of design, manufacture, and post-marketing surveillance of medical products relative to U.S. Food and Drug Administration requirements. Prerequisite: PHARM 504. Offered: A.

PHRMRA 528 Medical Risk Analysis and Management (3) Karp Examines the principles and application of risk management methods in the design, manufacture, and marketing of medical products. Offered: W.

PHRMRA 536 Skills for the Regulatory Affairs Professional (2) Rose Covers essential skills in regulatory affairs and

includes an overview of local medical products companies. Offered: A.

PHRMRA 545 Data Essentials and Analysis for Regulatory Professionals (3) *Magee* Applies statistical methods to medical products design, clinical evaluation, manufacturing, and post-marketing surveillance. Prerequisite: introductory statistics. Offered: W.

PHRMRA 546 Technical Writing for the Medical Products Industries (3) *Teal* Presents up-to-date information and strategies for effective technical communication within the medical product industries. Addresses the appropriate and correct use of the English language, information design, and the use of computer technology in producing professional documents. Emphasizes communicating technical information to a variety of stakeholders. Offered: A.

PHRMRA 547 Advanced Topics in Medical Products Regulation (2, max. 6) *Feagin* Addresses essential topics in medical products regulation. Employs a combination of lecture presentations, case studies, and participants' small group discussion to achieve practical outcomes for regulatory professionals. Offered: W.

PHRMRA 548 Biomedical Regulatory Affairs Practicum ([1-9]-, max. 9) *Feagin* Provides a practical experience to ensure that participants are able to shepherd new medical products (drug, device, biologic) through regulatory, clinical, and quality assurance aspects. Includes a project and final report. Offered: AWSpS.

PHRMRA 550 Advanced Technical Writing for Biomedical Regulatory Affairs (2) *Teal* Further examines communications with attention to best written practices. Provides an intensive review of common editing and advanced strategies for crafting highly reliable and effective documentation. Prerequisite: PHRMRA 546 or permission of instructor. Credit/no-credit only. Offered: Sp.

PHRMRA 554 Advanced Medical Products Regulation I (2) *Hammond* Provides an in-depth exploration of regulatory issues primarily related to non-clinical and clinical aspects of medical product development. Offered: A.

PHRMRA 555 Advanced Medical Products Regulation II (2) *Feagin* Provides an in-depth exploration of regulatory issues primarily related to manufacturing, post-marketing concerns, and FDA interactions. Offered: W.

PHRMRA 560 Short Course in Multinational Biomedical Regulatory Affairs (2, max. 30) *Hazlet* Presents three medical products registration countries or groupings (for instance, European Union, World Health Organization). Locale based on program impact, unique features, or recent or controversial regulatory issues.

PHRMRA 595 Special Topics in Regulation (1-6, max. 24) Offered: AWSpS.

Daniel J. Evans School of Public Affairs

Dean

Sandra O. Archibald
208E Parrington Hall

Associate Deans

Leigh Anderson
Joaquin Herranz
Robert Plotnick

The Daniel J. Evans School of Public Affairs is a graduate professional school providing education and research for current and future leaders in pursuing challenging public-service careers in government, nonprofit, or private-sector organizations. To address the educational needs and professional interests of individuals at different stages of their careers, the school offers the Master of Public Administration (MPA), the Executive Master of Public Administration (Executive MPA), Peace Corps Master's International (PCMI), and the PhD in Public Policy and Management.

Master's-level programs enable students to acquire the policy analysis techniques, management knowledge, problem-solving skills, and political acumen required for effective leadership across sector boundaries and in regional, national, and international policy. MPA graduates hold leadership positions such as mayors and city managers; local and regional government administrators; foreign service officers; senior military and public safety positions; assistants to elected officials; analysts with budget offices, legislative staff units, and city councils; directors of social service agencies; leaders and managers of nonprofit organizations; and administrators of arts organizations. In addition, a number of alumni are employed in private sector positions involving substantial contact with public agencies.

The PhD program focuses on research that prepares students with a strong interdisciplinary perspective and a solid foundation of theory and methodology in policy analysis and management. The PhD program prepares students for successful careers as faculty in university programs in public policy and management, and in research positions in the public and nonprofit sectors.

GRADUATE PROGRAM

evansuw@uw.edu

Master of Public Administration

Evans School MPA Program

Evans School MPA is designed for present and future leaders of the public, private, and nonprofit sectors, emphasizing broad-based public policy analysis and management knowledge. Degree requirements for the program are flexible and can be tailored for students who are early in their careers, as well as those who have additional years of progressively responsible work experience. While most students enroll full-time and generally take two years to complete their degree, flexible evening and part-time options are also available.

Degree Requirements

72 credits, with a minimum 60 credits from within the Evans School, as follows:

1. Core Curriculum (36 credits):

- Managing Politics and the Policy Process (PB AF 511)
 - Managing Organizational Performance (PB AF 512)
 - Public Policy Analysis (PB AF 513)
 - Microeconomics (PB AF 516, PB AF 517)
 - Public Budgeting and Financial Management (PB AF 522)
 - Program Evaluation (PB AF 526)
 - Quantitative Analysis (PB AF 527, PB AF 528)
- Concentrated study in a field of specialization, three courses minimum (12 credits)
 - Public affairs electives, two-course minimum (8 credits)
 - An internship (minimum 400 non-credit work hours)
 - 8-credit degree project (PB AF 608) or Public Service Clinics (PB AF 606, PB AF 607)

For full program details, visit evans.washington.edu/courses-degrees/mpa/

Executive MPA Program

The Executive MPA program is a cohort-based, modular program designed to meet the needs of senior-level managers and executives with 10 or more years of progressively responsible, professional experience (typically directors, senior managers in or near leadership positions, and high-level technical staff). Students must successfully complete 45 credits of coursework within a specially designed curriculum combining one intensive week, several weekend modules and numerous online assignments. Intensive learning emphasizes a variety of critical concepts in executive leadership, including: performance management and accountability; change management; communication skills; ethics and leadership; executive decision making; human resource management; strategic financial management; and strategic leadership. Emphasis is on decision making, practical application, and integration of learning with experience. The program relies on a cohort model, so entering students must begin their studies with a seven-day residential retreat. Students complete the program in approximately 18 months.

Degree Requirements

45 credits, as follows:

- One "Foundation Week" in Strategic Leadership and Performance Challenges: PA EX 501
- Twelve three-day weekend core modules in Executive Decision Making (PA EX 502), Strategic Financial Management (PA EX 503, PA EX 505), Executive Economics (PA EX 504), Mission Integrity (PA EX 506), Values and Personal Integrity (PA EX 507), Leading for Human Development (PA EX 508), Leading Across Boundaries (PA EX 509), Negotiation and Mediation (PA EX 510), and Strategic Communication (PA EX 511), Strategic Policy Making (PA EX 512), and Leading for a Legacy (PA EX 513)
- Online assignments
- Degree project not required

For full program details, visit evans.washington.edu/executive-education/mpa.

Peace Corps Master's International

Peace Corps Master's International (PCMI) students must successfully complete 51 credits of coursework along with two years of Peace Corps service in international nongovernmental organization development and a degree project. PCMI students generally complete all core courses in three quarters prior to leaving for Peace Corps service; upon returning to UW, students complete their coursework and a final degree project in one or two quarters. While on assignment overseas, students remain in touch with their faculty adviser and a returned volunteer from the Evans School. PCMI students generally create a plan of study focused on international nongovernmental management or other inter-

national management and policy issues, such as environmental or health policy. Students complete the program in approximately three to three-and-a-half years.

Degree Requirements

51 credits, as follows:

1. Core Curriculum:

- Managing Politics and the Policy Process (PB AF 511)
- Managing Organizational Performance (PB AF 512)
- Public Policy Analysis (PB AF 513)
- Microeconomics (PB AF 516, PB AF 517)
- Public Budgeting and Financial Management (PB AF 522)
- Program Evaluation (PB AF 526 or PB AF 536)
- Quantitative Analysis (PB AF 527, PB AF 528)

2. Electives (including 9 credits of restricted electives: 3 credits each in economics, analysis, and values) (17 credits)

3. Two years of Peace Corps service

4. 6-credit degree project related to Peace Corps fieldwork

For full program details, visit evans.washington.edu/courses-degrees/mpa/peace-corps.

Doctor of Philosophy

The PhD in public policy and management is a research program that prepares its graduates for careers as faculty in university programs in public policy and management, and for research positions in the public and non-profit sectors. The interdisciplinary curriculum draws broadly on theoretical and methodological foundations in policy analysis and management. Substantive policy areas reflect such diverse faculty research agendas as education and social policy, environmental policy, international development, nonprofit management, and urban policy.

This highly competitive and selective program admits three to five excellent applicants each year, and provides funding and mentoring to help them succeed. The program aims to be one of the top programs in the field of public policy and management, serving not only the Pacific Northwest, but the national and the global market for scholars in this field.

Degree Requirements

90 credits, as follows:

Two years, or six full-time academic quarters, of coursework and examinations, research, and the writing of a dissertation beyond the two years.

The first-year core curriculum prepares doctoral students to undertake independent scholarship in public policy and management: Research Design (PPM 502), Institutional Perspectives on Management and Leadership (PPM 504), Microeconomics (PPM 506), Public Policy Processes (PPM 508), Policy Analysis and Evaluation (PPM 510), Quantitative Methods Sequence (SOC 505 and SOC 506 or ECON 580 and ECON 581), and a qualifying examination.

Second year doctoral students increase their analytic and methodological skills. Requirements include Data Analysis Practicum (PPM 512) at least one qualitative methods and one additional quantitative methods course, proposed by the student and approved by the PhD Program Coordinator. Students are encouraged to consider obtaining a statistics certificate from CSSS. At least three courses in a substantive policy field or in management studies are required.

Beyond the second year, requirements include: a general examination/dissertation proposal (advancing to candidacy), preparation of a dissertation of original research, and a final examination (dissertation defense).

Students are expected to complete the degree in four to five years, depending on the individual student. Prior coursework in calculus is expected before matriculation.

For full program details, visit: evans.washington.edu/courses-degrees/phd

Concurrent Degree Programs

The Evans School offers the MPA degree concurrently with the following five programs: Master of Urban Planning (MUP), Master of Arts in International Studies (MAIS), Master of Public Health (MPH), Master of Science in Forest Resources (MS), Juris Doctor (JD). Concurrent degree applicants must apply through, and be accepted into, both programs. Admission criteria are those of each individual program.

Admission Requirements

Admission to the Evans School is highly competitive and selective, and is based primarily on the applicant's demonstrated ability to complete the graduate program while sustaining a high level of achievement. The School's Admissions Committee reviews previous undergraduate or graduate (if applicable) coursework, grades and GRE test scores, and gives considerable weight to professional experience, previous academic awards or scholarships, volunteer work, letters of recommendation, and the applicant's writing skills as demonstrated in a personal essay. The School admits students annually for autumn quarter.

General Requirements

Applicants must hold a baccalaureate degree from an accredited college or university in the United States, or its equivalent from a foreign institution, and have achieved a minimum 3.0 GPA in the last 90-quarter (or 60 semester) credits of undergraduate work.

Graduate Record Examination (GRE) general test scores are required for admission to all programs except the Executive Master of Public Administration. TOEFL scores are required for international students only.

Visit evans.washington.edu/courses-degrees/mpa/concurrent for specific requirements of each program.

Application Deadlines

Because of class-size limitations in the competitive programs, applicants are encouraged to submit applications as early as possible.

Application materials to the MPA program and to the Peace Corps Master's International program must be received online and postmarked by January 15 for priority consideration. Applications received after this date are accepted for review on a space available basis until March 1.

Application materials for the Executive MPA degree program must be received online and postmarked by May 1. Applications received after this date are accepted for review on a space-available basis until July 1.

Application materials for the PhD program in public policy and management must be submitted and postmarked by February 1. Applications postmarked after February 1st are not reviewed.

Applicants to all programs must also apply to the UW Graduate School by the specific program deadlines above.

Financial Aid

For further information, visit: evans.washington.edu/prospective-students/financial-aid.

Evans School Fellowships

The Evans School offers several fellowships to entering students each year from the School's endowed fellowship funds. These typically consist of \$4000-\$5000 stipends awarded primarily on the basis of academic achievement and/or excellence in public service. Applicants interested in school fellowships must submit the Evans School Financial Aid Form with their Evans School application.

- *Daniel J. Evans Endowment for Excellence in Public Service:* Fellowships support students aspiring to excellence in public service.
- *Nancy Bell Evans Endowment for Excellence in Nonprofit Service:* Fellowships support students who aspire to excellence in nonprofit service and philanthropy.
- *Jon Brock Endowed Fellowship:* Supports outstanding master's students studying conflict resolution and management in public and nonprofit sectors.
- *Elaine Chang Endowed Fellowship:* Provides support to outstanding students pursuing studies in international peace and development.
- *Brewster C. Denny Endowed Fellowship:* Supports students committed to excellence in public service.
- *Robert J. and Micki E. Flowers Endowed Fellowship:* Provides support to outstanding students from diverse backgrounds pursuing careers in public and nonprofit service.
- *Margaret T. Gordon Endowed Fellowship:* Supports outstanding Evans School students.
- *Henry M. Jackson Endowed Fellowship:* Supports students pursuing careers in environmental policy and natural resources management.
- *Morton Kroll Endowed Fellowship:* Provides support to top students pursuing arts management internships.
- *Robert J. Lavoie Fellowship:* Provides funds to outstanding students preparing to work in public service.
- *Governor Gary Locke Endowed Fellowship:* Supports Asian/Pacific Islander students pursuing studies in public service and politics.
- *Hubert G. Locke Endowed Fellowship:* Provides support for students pursuing internships in nonprofit organizations devoted to social justice issues.
- *George A. Shipman Endowed Fellowship:* Supports outstanding students pursuing careers in public service.
- *Evans School Alumni Endowed Fellowship:* Supports recruiting of outstanding students.
- *Home Street Bank Fellowship:* Supports an outstanding graduate student pursuing a career in public affairs.
- *Scottish Rite Scholarship Foundation of Washington PCMI Fellowship:* Provides a stipend to an entering student accepted to the Peace Corps Master's International degree program.
- *William Shelton Fellowships:* Funded by the Scottish Rite Scholarship Foundation of Washington to promote better government through education.

Assistantships

The Evans School offers many research, teaching, and staff assistantship positions each year. Typically 10 to 20 hours per week, these positions include a monthly stipend, benefits, paid tuition, and health insurance. Hiring is competitive. Most announcements are posted in the spring, or as positions become available, on the Evans School Intranet.

Research assistantships are open to first- and second-year MPA students and to PhD students. First-year MPA students are eligible to apply upon acceptance. Students typically work on grant-funded studies, special conferences, and public policy colloquia series sponsored by the school's research centers. Research assistants are exposed to a wide range of policy issues, including regional growth management, international trade, state and federal entitlement programs, health-and-human-services delivery, and education reform. In addition, some research fellowships are offered each year to highly qualified applicants during the admission process. These fellowships guarantee a paid research assistantship for the first year of study and tuition support.

Teaching and staff assistantships are reserved for second year students and PhD students. Teaching assistants are

hired for most core courses. Staff assistantships include such positions as coordinators for international programs, peer advisers, public service clinic/career services coordinators, and computer lab managers.

Work-Study Status

When hiring for hourly positions, the school often gives preference to students possessing work-study status. Work-study positions have included research assistance for faculty and grants, and staff support for the school's centers. Work-study status is one of several forms of aid granted by the University of Washington Financial Aid Office.

FACILITIES

Research Facilities

The school promotes the application of research to real-world policy contexts and its integration with the teaching enterprise. In addition to supporting the independent research of faculty members, the school houses several research and policy centers focusing on regional development, family and child welfare, poverty alleviation, nonprofit management and leadership, international development, consensus building and conflict resolution, and education reform.

These centers shape students' educational experiences by offering research assistantships, special events, career networking, degree-project advising, teaching, and guest lecturing in classes taught by center faculty. The availability of research assistantships is based on current projects.

Human Services Policy Center (HSPC)

The center pairs applied analytic research, preventive approaches, and promotion of comprehensive policies to improve the lives of children, families, and communities, especially those who are disadvantaged. Public communications and strategic partnerships ensure that the HSPC's research affects policy. Core programs include educating and caring for young children; communicating about policies for children and families; and profiling child well being (Washington Kids Count).

Marc Lindenberg Center for Humanitarian Action, International Development, and Global Citizenship

The Lindenberg Center prepares students and faculty for life and work in a global society through partnerships that expand teaching, research, and service opportunities in humanitarian action, international development, and global citizenship. The center's programs enable students to understand connections between poverty, hunger, health, and human security, and equip them with the skills and knowledge to create a better, more humane world. In partnership with international organizations, the center conducts research and multi-disciplinary academic training programs that prepare students for work in emergency and humanitarian relief and international development. The center also promotes responsible global citizenship through exchanges with developing countries, internationalization of curriculum, and collaboration with K-12 schools to change the way students see the world and think about global issues.

Nancy Bell Evans Center on Nonprofit Leadership and Philanthropy

The center enhances the understanding and vitality of the nonprofit sector through research, education, and community engagement. The center conducts research of importance to scholars, policy-makers, and practitioners. It also strives to connect scholars doing research with practitioners in the field. A special research focus is the changing service and policy roles of nonprofit organizations, particularly in the context of devolution, privatization, and globalization. The center serves as the hub of nonprofit studies across the UW campus and, in conjunction with the Cascade Center for Public Service, provides growth and learn-

ing opportunities for senior-level nonprofit professionals in the Pacific Northwest.

The William D. Ruckelshaus Center

The William D. Ruckelshaus Center, formerly known as the Policy Consensus Center, is a joint venture between the UW and WSU. The center draws together representatives from a wide network of agencies, advocacy groups, businesses, agribusiness, tribal governments, university researchers, and others to find long-term solutions to policy conflicts in Washington State, enhancing the region's capacity for effective, sustainable policy making and problem solving. Policy areas range from natural resources and economic development to labor issues in the business community and elsewhere. The center's activities focus on four major areas: providing an objective forum for conflict resolution or policy enhancement; building capacities through assessment, training, and consulting to broaden stakeholders' perspectives and improve collaboration; researching and disseminating best practices in conflict resolution and policy problem solving; and closing the gap between science and policy.

West Coast Poverty Center

This center serves as a regional hub for research, education, and policy analysis on the causes and consequences of poverty in the west coast states. At the UW, the center is a collaborative venture of the Evans School, the School of Social Work, and the College of Arts and Sciences, and is the newest of three regional poverty centers funded by the U.S. Department of Health and Human Services. The center fosters opportunities for cross-disciplinary exchanges and collaboration among poverty researchers and practitioners. It supports research on a broad range of poverty-related topics, such as labor market changes and consequences for economic security and social well-being; new patterns of work and family life, including transformations in family formation, employment, and care-giving arrangements for parents and children; and demographic trends and implications for poverty and public policy. Key activities include awarding grants to established and emerging poverty scholars and doctoral students; hosting seminars and research conferences on poverty and public policy; conducting outreach, dissemination, and dialogue with policymakers and practitioners; and mentoring the next generation of poverty scholars and practitioners.

Executive Training, Civic Engagement, and Outreach

Cascade Center for Public Service and Leadership

The Cascade Center, a public and nonprofit leadership training unit, provides executive and mid-level public and nonprofit sector leaders professional development opportunities to strengthen their management skills. A diverse complement of two-day, three-day, and five-day management courses, as well as a two-week executive program, helps meet a wide range of management training needs in the Northwest and the United States.

Cascade Center courses are offered at the UW campus in Seattle. With prior permission, traditional and mid-career MPA students may apply for a maximum of 12 elective credits to be waived from their degree requirements upon completion of Cascade courses, with approval from their adviser. Executive MPA students may apply for up to nine elective credits to be waived from their degree program, with approval from their adviser. Cascade courses are not graded and participants do not earn academic credits. Rather, the Evans School may accept completed Cascade coursework in lieu of required elective credit hours.

Civic Engagement

An important convener of public policy deliberations in the Puget Sound region, the Evans School provides a neutral forum in which leading scholars and practitioners can talk about practical solutions to emerging policy issues. Groups wanting a university partner in public events often turn to

the Evans School. Through strategic alliances, the school attracts many people to engage in dialogue with faculty, students, and the greater policy community. Public lectures, conference, symposia, and panel discussions help students enrich their policy studies beyond the classroom. These include the Daniel J. Evans Lessons in Leadership Seminars, the Dael L. Wolfe Memorial Lecture in Science and Public Policy, the Betty Jane Narver Lecture on Women in Public Policy, the Civic Engagement for the Twenty-First Century Seminar Series, the Forum at the Evans School, and the quarterly Dean's Forum.

In addition, through service on commissions, organizational boards, and other means, Evans School professors and students actively assist governments, NGOs, nonprofits, community organizations, and companies to improve society in the United States and abroad. Whether through public service clinics or internships, trainings, or volunteer service projects, students can actively engage their knowledge in serving the public good.

Electronic Hallway

The Electronic Hallway, hallway.evans.washington.edu, is an internationally recognized, online resource for public affairs teaching and curriculum development. It supports the Evans School teaching mission and distributes cases and skill exercises to educators in public policy and management.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

PB AF 355 Special Topics in Nonprofits (3-4, max. 12) Covers various topics regarding nonprofit essentials.

PB AF 403 Professional Leadership (4) Cultivates practical skills required to lead within various organizational contexts: managerial strategies for public, nonprofit, and business organizations are developed through case studies and guest speakers. Focuses on analytical and ethical approaches to problem solving and the communication skills needed for effective leadership in any career.

PB AF 499 Topics in Public Policy (3-5, max. 6) I&S Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with POL S 404.

PB AF 501 Legislative Relations (3/4) Studies role of legislative bodies in American public policy making. Builds on case studies and focuses on tactics, constraints, and options involved in working within a legislative process to achieve public policy goals.

PB AF 503 Executive Leadership (3/4) Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its constituencies and communities.

PB AF 504 Leadership Ethics in the Public Interest (3/4) Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership as well as strategies to build strong institutional cultures and support ethical practices in institutions.

PB AF 505 The Law of Public Administration (3) Legal framework of public administrative action in the United States, emphasizing constitutional requirements; operation of the administrative process; management of personnel, funds, and contracts; and judicial review of administrative activity.

PB AF 506 Ethics and Public Policy (3/4) Teaches students to identify moral issues in public life. Special focus on the integration of moral concerns into public discussion in a

manner which contributes to good policy and does not polarize issues. Discusses moral and political theory by focusing on contemporary cases and issues.

PB AF 507 Mediation and Negotiation as Instruments of Public Management and Policy-Making (3/4) Possibilities offered by mediation and negotiation methods using a mixture of cases, readings, discussions, lectures, and guest speakers. Use of negotiation and mediation techniques to resolve disputes and disagreements over public-policy issues.

PB AF 508 Management Approaches to Service Delivery (3-4)

PB AF 509 Managing People in Public and Nonprofit Agencies (3/4) Emphasizes the role of the program manager rather than that of the personnel officer. Managing people within a variety of programmatic, bureaucratic, and political settings. Case studies form basis of class discussion, assignments.

PB AF 510 Foundations of American Democracy (4) Examines the fundamental values such as equality, liberty, dignity, freedom, and autonomy that individuals justify and shape American political culture and institutions. Focuses upon the philosophical and religious foundations of these values and examines the relations among them as well as how they influence American political culture, institutions, and conflict.

PB AF 511 Managing Politics and the Policy Process (4) Examines broad aspects of organizational life and orients students to key internal and external challenges and opportunities of managing public and nonprofit organizations. Main topics include organizational mission, values, communication, culture, organizational environment and the policy process, legislative-executive relations, interest group advocacy, and media relations.

PB AF 512 Managing Organizational Performance (4) Addresses questions of organizational design, personnel, and operations management to equip students with skills to perform effectively in mission-driven organizations. Core topics include organizational design, inter-organizational networks, human resources and staff management, improving service delivery and production flows, measuring and managing for performance, and ethical leadership.

PB AF 513 Public Policy Analysis (4) Production and use of analysis to support public policy decisions. Defining problems, devising alternative solutions, clarifying stakes in choices, predicting impacts of choices. Skills developed by working on specific policy problems. Assumes familiarity with statistics, microeconomic theory, and institutions and processes of American government. Prerequisite: PB AF 516 or permission of instructor.

PB AF 514 Psychology for Policy Analysis (3/4) Examines basic concepts in social psychology, judgment and decision making, and behavioral economics. Explores how these concepts can be applied to the design, implementation, and evaluation of successful policy.

PB AF 515 Decision Making for Public Managers (3) Considers decision making from normative, prescriptive, and descriptive perspectives. Emphasizes individual decision making, with some discussion of organizational decision practice. Focuses on decision analysis; presents tools for structuring decisions; and considers the role of analysis as a basis for negotiation.

PB AF 516 Economics for Policy Analysis and Management I (4) Ways in which microeconomic analysis can contribute to the analysis of public sector issues. Supply and demand, consumer and firm behavior, competitive and monopoly markets, income distribution, market failure, government intervention. Policy applications of theory. Prerequisite: elementary economics.

PB AF 517 Economics for Policy Analysis and Management II (4) Serves to deepen student understanding of microeconomic theory and develop skills in applying it to public policy and management issues. Prerequisite: PB AF 516.

PB AF 518 Applied Cost Benefit Analysis (3/4) Develops familiarity through problems and applications. Stresses techniques of use.

PBAF 519 Law and Economics (2-4, max. 4) Offered: jointly with LAW A 561.

PB AF 520 Intergovernmental Relations (3) Comparative study of the issues involved in implementing government programs across multiple jurisdictions. Issues of accountability, feasibility, politics, and constitutional limits are examined by focusing upon various methods used to implement programs across federal, state, regional, and international jurisdictions.

PBAF 522 Financial Management and Budgeting (4) An introduction to financial and management accounting, and an overview of public and nonprofit budgeting systems. Covers tools and techniques for budget analysis and the use of financial information in managerial decision making.

PB AF 523 Advanced Budgeting in the Public Sector (3-4) Covers more advanced topics in governmental budgeting. Provides an overview of the functions, expenditures, and revenues of federal, state, and local governments. Prerequisite: PB AF 522.

PB AF 524 Public Sector Financing (3-4) *Dively* Covers financial management in public agencies, with the primary focus on state and local government. Prerequisite: PB AF 522.

PB AF 525 Qualitative Field Methods and Analysis (3-4) Provides a review of qualitative field research methods, exposure to writing from the field, and opportunities to try practicing fieldwork. Emphasizes study design, case selection, and field notes. Addresses coding, analysis, writing, and presenting findings.

PB AF 526 Program Evaluation (3/4) Theory, practice, and politics of evaluation, from simple feedback mechanisms to evaluation of large-scale ongoing programs and social experiments. Emphasis on applications of experimental and quasi-experimental evaluation. Case studies illustrate various types of evaluation. Prerequisite: PB AF 527

PB AF 527 Quantitative Analysis I (4) Two-quarter sequence explores how to formulate research questions, gain experience with conducting research, and learn how to assess which statistical tools or research methods are appropriate to answer different types of policy or management questions. Covers probability, descriptive statistics, hypothesis testing, and confidence intervals. Prerequisite: graduate status in School of Public Affairs or permission of instructor.

PB AF 528 Quantitative Analysis II (4) Second quarter of a two-quarter sequence aimed at helping students become informed users and critical consumers of research and statistical analysis. Combines material on research design and data collection methods with tools for multivariate analysis. The multivariate analysis methods include correlation and an introduction to multivariate regression. Prerequisite: PB AF 527.

PB AF 530 International Affairs (3) Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with JSIS B 534/POL S 534.

PB AF 531 Development Management in the Twenty-First Century (3/4) Addresses organization, administration and evaluation in governmental and non-governmental agencies involved in development efforts. Students examine development strategies, alternative management approaches, and management skills such as budgeting, finance, human resource development and program evaluation. Other topics include communication, expatriate/local power imbalances, decentralization, community involvement, culture, and personnel issues.

PB AF 532 International Development Capstone (2/4) Examines different policy environments leaders must address to achieve policy in comparative and international settings. Includes strategies, tactics, and frameworks needed to initiate and sustain policy dealing with authoritarian, democratic, liberal, and one-party states. Focuses on pressures from the international system and issues such as globalization.

PB AF 533 Economics of International Development (3/4) Introduction to sustainable international development and its physical, human, social, and natural capital components. Students examine the new growth theories and evidence, and their relationship to democracy, trade, and other policies and institutions. Topics include income distribution, poverty, and the environment.

PB AF 534 Food and Agricultural Policy in Developing Countries (4) Provides an understanding of the role of agriculture in economic development. Examines frontier policy issues in developing countries related to food security and agricultural production. Emphasizes developing a nuanced understanding of contemporary food and agricultural policy issues, with a firm grounding in theory and history.

PB AF 535 Seminar in American Foreign Policy (3-) Examines how the U.S. foreign policy process works, emphasizing formation, content, and implementation of post-Cold War U.S. foreign and national security policy, with emphasis on current foreign and national security policy.

PB AF 536 Program Evaluation in the Developing World (-[3/4]) *Gugerty* Provides an overview of issues in the analysis and evaluation of development projects focusing on the developing world with three themes: understanding and analyzing development programs; understanding and using the logic of impact assessment; identifying practical, field-based tools for monitoring and evaluation in low resource environments.

PBAF 537 Topics in International Affairs (3-5, max. 12) Examines topics of interest and import in foreign policy and international affairs. Focuses on the in-depth analysis of issues and the integration of economic, institutional, and political dimensions.

PB AF 538 International Organizations and Ocean Management (3) *Dolsak* Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with SMEA 507.

PB AF 539 Values in International Development (4) Examines and clarifies international development values, including underlying theories of justice on which they seem to be built, the ways in which they are justified to stakeholders, the general public, and impacts they have upon people, especially the poorest and most vulnerable.

PB AF 540 African Development Challenges (3) Provides an introduction to the political economy of development in sub-Saharan Africa. Focuses on understanding various theories about the underlying causes of current African development challenges and on analyzing and evaluating various proposals and policies for addressing these challenges.

PB AF 541 The Role of Nongovernmental Organizations in International Development (3) Explores some of the major issues faced by nongovernmental organizations (NGOs) working on development issues worldwide. Examines organizational forms, NGO-state relationships, inter-organizational relationships, and the relationship of NGOs to beneficiaries.

PB AF 542 The Law and Economics of Regulation (3/4) Examines the principles and practices of regulatory environments.

PB AF 544 Land Use and Transportation Policy (3/4) Provides an historical and theoretical context for a fuller un-

derstanding of federal and local policies regarding land use and transportation as well as a range of public policy options which influence how metropolitan areas grow and how people move around.

PB AF 545 Public Leadership Seminars (3) Provides a forum to reflect on the major dimensions of modern managerial leadership. Includes a team project working with outside clients or organizations.

PBAF 546 Professional Development: Hubert H. Humphrey Seminar (1, max. 3) Engages students as global citizens, discussing global issues affecting students' home environments. Utilizes the diversity in professional backgrounds and regional experiences of participants. Provides an introduction to U.S. government at the federal, state, and local levels, designed to enhance students' ability to participate and to create appropriate professional affiliations. Credit/no-credit only.

PB AF 547 Water Resource Economics (4) Explores the economics of water resources, including static and dynamic efficiency for consumers and producers and other topics concerned with water quality. Explores effects of climate change on water resources, and economic approaches to mitigate these effects.

PB AF 548 Management and Public Capital Markets (4) Explores the new debt management environment for financial managers of public organizations, and the meaning and value of active public debt management, including the analytical tools and accountability issues that characterize responsible management.

PB AF 550 Management of Nonprofit Organizations (3/4) Focuses upon the roles played by nonprofit organizations in meeting the public good. Examines internal management issues such as structure, budget, and operations; and external issues such as board functions, legal status, marketing, media relations, and fund-raising.

PB AF 551 Nonprofit Management Capstone (3/4) Explores the means through which nonprofit organizations establish strategies to expand their impact, sustain their organizations, and shape the future, and the steps through which they develop effective new programs to implement those strategies.

PB AF 552 Philanthropy and Society (4) Provides students a holistic background of the philanthropic sector. Begins with an in-depth analysis of history and context and ends with a discussion of current strategies and approaches to giving by foundations. Builds in sequence: history, context, sub-sectors, accountability, and results.

PB AF 553 Nonprofit Financial Management (3/4) Provides an understanding of the financial framework on nonprofit organizations. Focuses on the financial principles of management of nonprofits, with an emphasis on financial reporting, strategic financial planning, managerial decision-making and budgeting.

PB AF 554 Nonprofit Organizations and Public Policy (3) Examines the changing role of nonprofit organizations in American society. Selected policy topics include privatization, for-profit/nonprofit competition, public-private partnerships, tax policy, and new sources of revenues.

PBAF 555 Topics in Nonprofit Management (3-5, max. 12) Examines various topics of public importance in nonprofit management. Integrates the political, managerial, and economic dimensions of these issues.

PB AF 556 Public-Private Partnerships (3-4) Provides a comprehensive overview and examination of partnerships and their implications for public policy and nonprofit and public management. Examines the diverse array of partnerships in the UW and abroad and the management challenges involved in the development and implementation of different partnership strategies.

PB AF 557 Management and Public Capital Markets (4) *Marlowe* Covers the institutions and dynamics of the public capital market; how the structure of that market shapes

managers' choices about how to design, sell, and manage debt obligations; and the analytical tools managers and investors use to evaluate those choices and their potential consequences.

PB AF 558 Collaboration and Management Across Sectors (4) Organizations from different sectors (public, business, nonprofit) increasingly work together to achieve unique, collaborative outcomes. Managing cross-sector relationships presents dynamic process and governance challenges that go well beyond the difficulties of managing within an organization. Explores the opportunities and risks involved in working across organizational boundaries.

PB AF 560 Inequality, Governance, and Policy in the Metropolitan Region (3/4) Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with URBPD 560.

PB AF 561 Urban Economics and Public Policy (3/4, max. 12) Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PB AF 516 or equivalent. Offered: jointly with URBPD 561.

PB AF 562 Introduction to Neighborhood Planning and Community Development (3) Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle's experience, NIMBYism, security, neighborhood character, housing segregation, environmental racism. Offered: jointly with URBPD 562.

PB AF 563 Intergroup Relations and Public Policy (4) Explores how social psychological research on intergroup relations is pertinent to various aspects of public policy. Includes historical and current perspectives. Examines how the literature describes how individuals perceive, judge, and feel about individuals from various social groups. The groups discussed ranges from minimal groups to classic social groups.

PB AF 564 Housing and Social Policy (4) Focuses on the problem of affordable housing and its interrelationships with social problems in the United States.

PB AF 565 Topics in Urban Affairs (3-5, max. 12) Examines various topics of public importance in urban policy. Integrates the political, managerial, and economic dimensions of these issues.

PB AF 566 Community Economic Development (3/4) Explores the relationship between local community economic development, environmental sustainability, cultural vitality, and trend in regional and national economics, with specific focus on how to make community and economic investments that yield development outcomes that contribute to economic, equitable, environmental, and cultural vitality.

PB AF 567 Community Engagement and Urban Governance (3/4) Investigates interactions between citizen participation and efforts to measure and improve policy and program performance in large cities. Develops analytic frameworks and practical strategies for sustaining and enhancing participation and performance.

PB AF 568 Social Justice and Public Policy (3/4) Examines the values of social justice that motivate action in the public arena; thinks about how those values create concerns and solutions; and explores issues of equity and liberty, of

balancing the rights of the individual, the common good, and redistribution.

PB AF 569 Race and Public Policy (3-4) Analyzes the way in which the persistent problem of race is expressed in the formation and implementation of social and public policy.

PB AF 570 Foundations of Social Policy (3) Examines major institutions and programs in social policy including: income maintenance, social services, education, and healthcare. Focuses on American social policy with some attention to comparative welfare state development. Includes extensive discussion of different policy strategies to address social policy problems.

PB AF 571 Education, The Workforce, and Public Policy (3, max. 6) W. ZUMETA Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, underutilized workers, race and gender discrimination issues, and the role of education and training in economic development. Offered: jointly with EDLPS 563.

PB AF 572 Higher Education and Public Policy (3) Explores the nature of public policies affecting higher education, how these policies are made and influenced at both the federal and state levels, and the role of policy research and analysis, and several of the major current public policy problems and policy responses.

PB AF 573 Topics in Education and Social Policy (3-5, max. 12) Examines various issues of public importance in the areas of education and social policy. Focuses on in-depth analysis of relevant issues and the integration of the economic, administrative, and political dimensions of these issues.

PB AF 574 Economics of Race and Inequality in the United States (3/4) Covers the history of racial inequality over the past century, theories of the causes, wage determination and discrimination in employment and pay, inequalities in education and human capital development, and residential segregation and its consequences. Discusses the effectiveness and limitations of policy response to racial inequality.

PB AF 575 Economics of Education Policy (4) Introduces economic theory applications and econometric analysis to educational policy issues. Covers supply and demand, consumer behavior, and production theory. Discusses educational investment incentives, school behavior, and governmental intervention. Uses econometric methods to infer education policies' effects and make predictions. Addresses educational attainment, school resources, teacher labor markets, and accountability.

PB AF 576 Poverty and Anti-Poverty in the United States (3/4) Examines the nature and extent of poverty in the United States, its causes and consequences, and the anti-poverty effects of public policies.

PB AF 577 Topics in Microfinance (3) Provides an overview of the basic issues and debates around microfinance. Students gain an analytical understanding of the opportunities and motivation for small scale financial services, and the limitations.

PB AF 578 Asset Building for Low Income Families (3/4) Explores assets and finances for low income families primarily in the United States. Identifies programs and policies targeted toward asset building and looks at evidence of their efficacy. Uses a multi-disciplinary perspective to examine the economic, social, and political contexts for these policies.

PB AF 579 Topics in Health Policy (4) McCann Introduces students to the ways in which the public health and healthcare systems are organized, financed, and delivered in the U.S. in concert with how national and state political institutions influence and reflect these systems leveraging current challenges to analyze past, present, and potential policy solutions. Offered: AWS.

PB AF 581 Information Technology and the Policy-Making Process (3) Demystifies information base for policy making in democracies. Examines theoretical and practical issues associated with information processing in the public sector. Considers role of new technologies in collecting, analyzing, and disseminating information with special attention to the relationship between these technologies and effective government service, public participation, and organizational accountability.

PB AF 582 Communicating Climate Change (4) Surveys climate change communications and the role in achieving climate change policy goals. Assesses climate change communication in light of scientific evidence as well as student reactions. Explores theories and frameworks to evaluate and improve climate change communications. Examines the role of climate change communication as a policy tool.

PB AF 583 Science, Technology, and Public Policy (4) Examines the relationship between the advancement of technical knowledge, the pace of technological change, and public policies designed to induce or respond to these development. Issues of policy formulation, administrative design, and future trends; applications include biotechnology, energy, information technology, global warming, robotics, national security, homeland security, and space exploration.

PB AF 585 Topics in Science, Technology, and Public Policy (3-5, max. 12) Examines relationship between advancement of technical knowledge and pace of technological change, and public policies to induce or respond to these trends. Generic issues of government research, development, and personnel training programs are addressed. Applications of policy issues involving biomedical, communications, energy, environmental, transportation, and weapons technologies.

PB AF 586 International Science and Technology Policy (3) Seminar is designed: first, to analyze the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries; second, to deal with the international implications of particular technologies as countries try to make policy for them in regional and global organizations. Examples of specific technologies are chosen from such fields as space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploitation.

PB AF 587 Water and Sanitation Policy in Economically Developing Countries (3/4) Examines the policy dimensions of providing water supply and sanitation services in developing countries.

PB AF 588 Environmental Risk Analysis (4) Examines a variety of frameworks and models of risk with respect to regulation, policy, and decision-making.

PB AF 589 Risk Assessment for Environmental Health Hazards (3/4) Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/ENV H 577; A.

PB AF 590 Environmental Policy Processes (3-4) Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with SEFS 592.

PB AF 591 Seminar in Resource Policy and Management (1) Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the School of Environmental and Forest Sciences. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with SEFS 591.

PB AF 592 Resource Policy and Administration (4) Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with SEFS 571.

PB AF 593 Climate Change and Energy Policy (3-4) Energy policy formulation and implementation with emphasis on post-1973 developments. Energy conservation programs; changing roles of oil, coal, gas, nuclear, and solar energy; institutional, environmental, and equity considerations; government research and development programs.

PB AF 594 Economic Approaches to Environmental Management (3/4) *Layton* Examines the economic tools relevant to natural resource and environmental management. Tools are developed in the context of a series of resource problems, with an eye towards building intuition useful for addressing complex policy problems that do not fit neatly into textbook examples.

PB AF 595 Topics in Environmental Policy and Management (3-5, max. 12) Examines various topics of public importance in environmental policy and management. Integrates the political, managerial, and economic dimensions of these issues.

PB AF 596 Ethics and Values in Environmental and Natural Resource Policy (3) Explores environmental values and ethics and their relationship to the policy process. Includes content on value foundation of economic efficiency and its relationship to fairness, legal entitlements, duty to other creatures, and incommensurabilities in valuing goods. Current policy controversies are addressed.

PB AF 597 Role of Scientific Information in Environmental Decisions (3/4) *Cullen* Examines how science contributes to decisions that involve the natural environment; how science and scientists help frame debates and decisions; how scientific findings are incorporated into decision-making processes; how scientists and non-scientists deal with uncertainty about scientific questions.

PB AF 598 Administrative and Policy Skills Workshop (1-3, max. 6) Teaches practical administrative, leadership, and analytic skills commonly required of managers and analysts in the public and nonprofit sectors. The workshops emphasize hands-on problem resolution, simulations, and actual practice. Credit/no-credit only.

PB AF 599 Special Topics (1-6, max. 15) Study and analysis of special topics in public affairs. Topics vary each quarter depending on curricular needs and interests of students and faculty.

PB AF 600 Independent Study or Research (*-)

PB AF 605 Degree Project ([1-8]-, max. 8)

PB AF 606 Public Service Clinic ([3/4]-) *Carlson* Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

PB AF 607 Public Service Clinic (-[3/4]) *Carlson* Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

PB AF 608 Capstone Project Seminar ([3-4]-, max. 9) Meets the degree project requirements as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to complete individual degree projects.

School of Public Health

Dean

Howard Frumkin

F350 Health Sciences

The UW School of Public Health provides education to prepare outstanding, innovative, and diverse public health leaders and scientists; research to advance public health science and policies; and service to promote the health and well-being of communities locally, nationally, and globally. The School of Public Health emphasizes strong discipline-oriented academic programs, as well as programs that emphasize interdisciplinary collaboration.

The School has five departments: Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Services -- plus interdisciplinary programs that include health services administration, maternal and child health, nutritional sciences, pathobiology, and public health genetics.

Within these departments and program, the school offers the following degrees: Master of Public Health (MPH); Master of Science (MS); Master of Health Administration (MHA); Doctor of Philosophy (PhD); and bachelor's degrees in public health, environmental health (also a minor), and health informatics and health information management (HIHIM).

Concurrent degree programs with Anthropology, Dentistry, Foster School of Business, International Studies, Law, Medicine, Molecular and Cellular Biology, Nursing, Public Administration, and Social Work are also available.

Graduate certificate programs are offered in basic or advanced clinical research methods (Epidemiology), emergency preparedness and response (Health Services), global health (Global Health), health management (Health Services), health policy (Health Services), HIV and STIs (Global Health), maternal and child health (Health Services), public health practice (Health Services Executive MPH program), public health genetics (Public Health Genetics), and statistical genetics (Biostatistics).

For more information, see the school's academic catalog at sph.washington.edu/publications/catalog.asp or visit the homepage at sph.washington.edu.

UNDERGRADUATE PROGRAM

Adviser

F-332 Health Sciences, Box 357230

(206) 221-4561

phmajor@uw.edu

The School of Public Health offers a Bachelor of Science or a Bachelor of Arts with a Major in Public Health.

The Department of Environmental and Occupational Health Sciences offers a minor and a Bachelor of Science with a Major in Environmental Health. The Department of Health Services offers a Bachelor of Science degree in Health Informatics and Health Information Management, as well as a baccalaureate certificate, through the UW Evening Degree Program. A minor in global health is offered by the Department of Global Health. A minor in Nutritional Sciences is offered by the Nutritional Sciences Program.

General Education

The School of Public Health general education requirements, which apply to all degree programs mentioned above, are as follows:

Basic Skills

- English Composition (C) – 5 credits
- Additional Writing (W) – 10 credits
- Quantitative and Symbolic Reasoning (QSR) – One course (minimum 4 credits)

Areas of Knowledge

- Visual, Literary, & Performing Arts (VLPA) – 10 credits*
- Individuals & Societies (I&S) – 10 credits
- Natural World (NW) – 20 credits
- Additional Areas of Knowledge – 25 credits

*Although School of Public Health students are not required to study a foreign language, they are encouraged to do so by substituting first-year language courses for the VLPA requirement. Completion through the third quarter is required for VLPA credit.

Suggested First and Second-Year Courses: Anthropology, political science, psychology, sociology; distribution of general education and Areas of Knowledge courses as well as coursework that develops critical and analytical thinking, communication skills, and an understanding of public health.

Admission Requirements

Admission to the major is competitive. Applicants must complete prerequisite coursework (see below) and an application to be considered. Completing the prerequisites and submitting an application do not guarantee admission.

Admission is offered twice a year for autumn and winter quarters. Applications for autumn are due the third Friday of spring quarter and applications for winter are due the third Friday of autumn quarter. The application is available from the public health major website at sph.washington.edu/uph. Transfer students must also apply for admission to the UW for autumn or winter quarter, following the admission process, policies, and deadlines found at admit.washington.edu.

The program evaluates applications based on overall academic record, grades in major relevant coursework, selection of and preparation for appropriate BA or BS path, ability to make satisfactory progress toward the degree, and understanding of and potential fit with the major as demonstrated in the personal statement.

Applicants are strongly encouraged to attend an information session before submitting an application.

Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Consult the UW Equivalency Guide or a UW adviser to verify transferability of coursework.

Early Admission

The early admission option is for a select group of students, already enrolled at the UW, who have discovered the major early in their academic career and want to begin developing stronger connections to the school and related opportunities. Students apply to the early admission option during spring of their first year for entry in autumn of their second year or during autumn of their second year for entry in winter of their second year.

Applicants must complete the following by the application deadline to be considered for admission:

1. Minimum 30 college credits
2. Minimum 3.00 cumulative GPA
3. English composition (5 credits)
4. Minimum 3.0 grade in one introductory public health course from the following: ENV H 111, EPI 201, G H 101, HSERV 100, NUTR 300, PHG 200
5. Minimum 3.0 grade in one introductory science from the following: BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or MICROM 301/MICROM 302

Upper Division Admission

The upper division admission option is typical for most students both at the UW and transferring from other institutions.

Applicants must complete the following by the application deadline to be considered for admission:

1. Minimum 60 college credits
2. Minimum 2.50 cumulative GPA
3. English composition (5 credits)
4. Minimum 2.5 grade in one introductory public health course from the following: ENV H 111, EPI 201, G H 101, HSERV 100, NUTR 300, PHG 200, or one 5-credit course from anthropology (ANTH only), geography (GEOG), political science (POL S), psychology (PSYCH), or sociology (SOC)
5. For BA path students, minimum 2.5 grade in one introductory science from the following: BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or MICROM 301/MICROM 302
6. For BS path students, minimum 2.5 grades in at least two courses of a year-long sequence in introductory science, with laboratories, or mathematics, chosen from: biology (BIOL 180, BIOL 200, BIOL 220); chemistry (CHEM 142, CHEM 152, CHEM 162); organic chemistry (CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242); physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119, or PHYS 121, PHYS 122, PHYS 123); or mathematics (MATH 124, MATH 125, MATH 126)

Bachelor of Arts

Major Requirements

108-109 credits, as follows:

1. *Integrated Core (20 credits):* Minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
2. *Public Health Foundation (8-9 credits):* Statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (3 credits), EPI 320
3. *Social and Behavioral Sciences Breadth (25 credits):* One 5-credit course from each of the following departments: Anthropology (ANTH only), Geography, Political Science, Psychology, and Sociology; minimum 20 credits at the 200 level or above
4. *Social and Behavioral Sciences (20 credits):* One 5-credit course from each of the following departments: Anthropology (ANTH only), Political Science, Psychology, and Sociology; minimum 15 credits at the 200 level or above.
5. *Natural Science (10 credits):*
 - a. 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302.
 - b. 5 credits from CHEM 120, CHEM 142, CHEM 145
6. *Bachelor of Arts (BA) Selectives (20 credits):* Courses identified to address competency areas in advocacy, community dynamics, communication, economics, education, ethics, health promotion, law, policy, social justice, and writing. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
7. *Public Health Electives (20 credits):* 300- and 400-level courses to build competency areas in public health. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Capstone (5 credits):* Minimum 2.0 grade in each of SPH 491 and SPH 492 (minimum 2.0 grade)
9. Minimum 2.00 cumulative GPA for courses applied to the major

In addition to the major requirements shown above, students must complete the general education requirements for the School of Public Health.

Bachelor of Science

Major Requirements

108-120 credits, as follows:

1. *Integrated Core (20 credits)*: Minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
2. *Public Health Foundation (8-9 credits)*: Statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (3 credits), EPI 320
3. *Social and Behavioral Sciences Breadth (25 credits)*: One 5-credit course from each of the following departments: Anthropology (ANTH only), Geography, Political Science, Psychology, and Sociology; minimum 20 credits at the 200 level or above
4. *Social and Behavioral Sciences (20 credits)*: One 5-credit course from each of the following departments: Anthropology (ANTH only), Political Science, Psychology, and Sociology; minimum 15 credits at the 200 level or above.
5. *Natural Science (10 credits)*:
 - a. 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302.
 - b. 5 credits from CHEM 120, CHEM 142, CHEM 145
6. *Bachelor of Science (BS) Selectives (30-32 credits)*: Two year-long sequences of introductory science, with laboratories, or mathematics, chosen from biology (BIOL 180, BIOL 200, BIOL 220); chemistry (CHEM 142, CHEM 152, CHEM 162); organic chemistry (CHEM 237, CHEM 238, CHEM 239, CHEM 241 CHEM 242); physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119, or PHYS 121, PHYS 122, PHYS 123); or mathematics (MATH 124, MATH 125, MATH 126)
7. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in public health. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Capstone (5 credits)*: Minimum 2.0 grade in SPH 491 and SPH 492
9. Minimum 2.00 cumulative GPA for courses applied to the major

In addition to the major requirements shown above, students must complete the general education requirements for the school of Public Health.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Public Health is a school-wide liberal arts major, leading to a Bachelor of Arts or Bachelor of Science, which uses public health questions, concepts, and tools to teach critical thinking skills. Students learn to ask questions, challenge assumptions, and explore answers to promote the health and well-being of communities, locally, nationally, and globally. By integrating the diverse areas of public health, students are introduced to the determinants of health, emerging diseases, access to health care and modes of health care delivery, the geography of health, and the effects of environment on health and disease. The major provides undergraduates with competen-

cies in Health, Ethics & Social Justice, Social Science, Natural Science, Policy & Politics, and Environment with particular emphasis on collaboration, communication, and critical thinking across these domains. An undergraduate degree in public health provides a grounding in science, values, passion, and commitment which is valuable for a range of career and educational options across multiple disciplines.

- *Instructional and Research Facilities*: The School of Public Health has five departments -- Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Services -- as well as interdisciplinary programs such as the Public Health major, Maternal and Child Health, Nutritional Sciences, Pathobiology, and Public Health Genetics. The School has over 30 research centers, including Institute for Public Health Genetics, Northwest Center for Public Health Practice, Center for Public Health Nutrition, Institute for Health Metrics and Evaluation, and the Health Promotion Research Center. Administration and teaching are primarily in the Magnuson Health Sciences Center.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning*: Majors are encouraged to engage in experiential learning. See adviser for details.
- *Department Scholarships*: See adviser for details.
- *Student Organizations/Associations*: Undergraduate Student Public Health Association (USPHA). Public Health Dawgs (PhDs).

GRADUATE PROGRAM

The School of Public Health (SPH) offers graduate programs leading to the degrees of Master of Public Health (MPH), Master of Health Administration (MHA), Master of Science (MS), and Doctor of Philosophy (PhD). Admission requirements vary by degree and field and are described in the sections for each department.

Master of Public Health Degree: The MPH is a professional degree that provides broad training in public health. Each program provides additional training in a particular area. Graduates pursue careers in public health practice settings, academia, or research. The MPH degree is offered in all SPH departments. Students earning the MPH may choose from several areas including biostatistics; community-oriented public health practice; environmental and occupational health; epidemiology; Executive MPH program; health metrics and evaluation; health services; health systems and policy; global health (in Epidemiology or Global Health); leadership, policy, and management; maternal and child health (in Epidemiology or Health Services); nutritional sciences; occupational and environmental medicine; public health genetics; or Peace Corps Master's International. The Executive MPH degree program is a three-year, part-time program that allows mid-career public health professionals to pursue the MPH degree in community practice, environmental health, global health, health education, or maternal and child health while continuing their employment.

Master of Health Administration Degree: The MHA degree is offered by the interdisciplinary Graduate Programs in Health Services Administration in the Department of Health Services under the auspices of the Graduate School, either as a full-time, in-residence program or a part-time executive program. The MHA program prepares students for careers in management, planning, and policy analysis in a variety of settings in the healthcare field. The purpose of the curriculum is to integrate the knowledge, skills, and experience that encompass health services

management, planning, and policy analysis. Students develop knowledge and skills that enable them to better understand and manage change, analyze information and make decisions, and manage organizations and the people in them. The Executive MHA program is a part-time program designed for mid-career health services professionals, including physicians and other experienced clinicians, who wish to continue their employment while pursuing the MHA degree. Both programs provide a balance of theory and practical management skills.

Master of Science and Doctor of Philosophy Degrees: The MS and PhD programs in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, and Health Services prepare students for academic or research careers. The MS and PhD in the Nutritional Sciences and the Pathobiology programs, and the PhD program in the Institute for Public Health Genetics are administered in the school, although the degrees are awarded through the Graduate School's interdisciplinary group structure.

The MS programs in biostatistics, environmental health (general, occupational and environmental exposure sciences, and toxicology tracks), epidemiology (general, global, or clinical research tracks), health services (healthcare and population health), nutrition, pathobiology, and genetic epidemiology offer focused research training in specific disciplines. Graduates of these programs often assume positions as senior technical staff in laboratories or other organizations and as research project coordinators, or pursue further graduate training. The MS program differs from the PhD program in that more of the courses emphasize the concepts underlying methodological approaches rather than the ability to independently design a major research program.

The PhD programs in biostatistics (general or statistical genetics tracks), environmental and occupational health sciences (environmental & occupational hygiene and toxicology tracks), epidemiology, health services, nutritional sciences, pathobiology, and public health genetics, train future academicians as highly qualified independent investigators and teachers, and as well-trained practitioners. The doctoral programs are distinct from the MS programs by the addition of advanced coursework and the nature and scope of the dissertation research project.

Concurrent Degree Programs: The School of Public Health MPH program encourages students to take full advantage of the University's unique position as a leading education, research, and service institution and to consider one of the many concurrent degree programs available with the MPH. Enrollment in a concurrent degree program at the University permits a student to proceed in a coordinated way towards sequential completion of both degrees in a shortened period of time. Some of the options available are not formal concurrent programs, but the degrees listed can be pursued in parallel with the Global Health MPH. In some cases, agreements are reached between the two programs to allow for sharing of some credits and/or projects. Most concurrent degrees begin with a successful application to the other school, followed by an application to the MPH during the first year of study in the first program.

Residency Programs: The SPH offers a residency in occupational and environmental medicine (MPH). Physicians may apply to any of the school's other graduate programs.

Certificate and Graduate Certificate Programs: The SPH offers several graduate certificate programs, including: Basic or Advanced Clinical Research Methods (Epidemiology); Emergency Preparedness and Response (Health Services); Global Health (Global Health); Global Health of Women, Adolescents, and Children (Global Health); Global Injury and Violence Prevention (Global Health); Health Economics and Outcomes Research (with the School of Pharmacy); Health Management (Health Services); Health Policy (Health Services); HIV and STIs (Global Health); Maternal and Child Health (Health Services); Public Health Practice

(Health Services Executive MPH Program); Public Health Genetics (Public Health Genetics) and Statistical Genetics (Biostatistics).

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/.

SPH 380 History and Practice of Public Health (5) T. KWAN-GETT, S. PAK-GORSTEIN Provides a historical overview of public health as a framework to understand organization of contemporary public health and key issues faced today. Offered: AW.

SPH 381 Science and Public Health (5) M. AVERILL, D. LEHMAN, J. LINGAPPA, G. ONSTAD Provide an overview and introduction to the ways different scientific disciplines are used to address public health goals. Prerequisite: minimum grade of 1.7 in SPH 380; either BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or both MICROM 301 and MICROM 302. Offered: WSP.

SPH 480 Research Methods in Public Health (5) J. BASEMAN, L. NELSON Applies concepts and research methods to real public health problems. Prerequisite: EPI 320; minimum grade of 1.7 in SPH 381. Offered: AW.

SPH 481 Ethics, Social Justice, and Policy in Public Health (5) S. MACKENZIE Integration of prior learning and consideration of public health decision from an ethics and justice perspective. Prerequisite: minimum grade of 1.7 in SPH 480. Offered: WSP.

SPH 490 Selected Topics in Public Health (1-5, max. 15) In depth study of current public health topics. Offered: AWSpS.

SPH 491 Public Health Capstone I (2-) Part one of integrative experience bringing together students' knowledge and skills acquired in the public health major.

SPH 492 Public Health Capstone II (-3) Part two of integrative experience bringing together students' knowledge and skills acquired in the public health major. Prerequisite: SPH 491.

SPH 493 Public Health Capstone (5) Students complete a final self-directed paper on public health topic of interest integrating the knowledge and skills acquired during their time in the public health major. Offered: AWSpS.

SPH 494 Honors Seminar in Public Health (1, max. 5) D. HINCHEY Skill-building, discussion-based seminar designed to challenge ability to analyze issues in public health using topics raised in current media. Credit/no-credit only. Offered: AWSpS.

SPH 495 Public Health Internship (1-5, max. 15) D. HINCHEY Internship in public health related area. Credit/no-credit only. Offered: AWSpS.

SPH 497 Public Health Special Electives (1-5, max. 15) Independent study of a current public health topic. Offered: AWSpS.

SPH 499 Undergraduate Research (1-5, max. 15) Individual research on a specific topic in public health. Offered: AWSpS.

Biostatistics

Founded in 1970, the Department of Biostatistics is a leader in statistical sciences. Its 83 faculty include a member of the United States National Academy of Sciences, two members of the Institute of Medicine, and 20 Fellows of the American Statistical Association. Five hundred and sixty alumni hold leadership roles in academia, government, and industry worldwide. The department is a center for development and application of statistical methodology

across the health sciences, and has collaborative partnerships with Fred Hutchinson Cancer Research Center, Seattle Children's Hospital Research Institute, Group Health Cooperative, and the Veterans' Administration. To complement research, the department recently established the Center for Biomedical Statistics to provide consulting and collaborative services.

GRADUATE PROGRAM

Graduate Program Coordinator

H655 Health Sciences, Box 357232

(206) 543-1044

bioadmit@uw.edu

The Department of Biostatistics offers Master of Science, Master of Public Health, and Doctor of Philosophy degrees in quantitative methods applied to the medical and biological sciences. Biology, medicine, and health sciences are undergoing major changes in their development as quantitative sciences. As technological advances generate huge quantities of information, biostatistical tools and concepts are critical for the analysis of these data. The techniques and viewpoints of mathematics and statistics, traditionally peripheral to biology and medicine, are now woven into the fabric of the life sciences, thereby providing new opportunities in research and teaching.

Many universities have instituted programs relating mathematics or statistics to one particular biological field. The goal of the biostatistics graduate program is to equip students to develop and apply the quantitative techniques of mathematics, statistics, and computing appropriate to medicine, biology, and other health science disciplines.

Because of faculty involvement in diverse statistical applications, the department produces graduates at all levels. Students are recruited from programs in mathematics, statistics, and biology and are selected on the basis of quantitative ability.

Master of Public Health

Combines broad training in public health with specific training in biostatistics. Includes core courses in biostatistics, environmental health, epidemiology, health services, and social and behavioral sciences. In addition, successful candidates are required to complete a public health practicum and write a research-based master's thesis. The degree is designed for individuals who anticipate careers as data analysts in public health research or practice and for individuals who plan doctoral work in public health or biomedical field, but who want more methodological training than those PhD programs offer.

Admission Requirements

Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

To be considered for admission to the Biostatistics MPH pathway, a candidate must hold a doctoral-level degree in another field (e.g., MD, PhD, JD) or be currently working on such a doctoral degree. Candidates who have not yet been awarded a doctoral degree are not awarded the Biostatistics-pathway MPH until they are awarded their doctoral degree. All other prerequisites and required materials are the same for MS, MPH, and PhD applicants.

Degree Requirements

63 credits, as follows:

1. *Biostatistics Core Courses*: BIOST 514, BIOST 515; BIOST 524; BIOST 536, BIOST 537; BIOST 580; BIOST

590. BIOST 514, BIOST 515, BIOST 524, BIOST 536, and BIOST 537 must be taken for a numerical grade, with a 3.0 minimum grade in each course.

2. *Non-biostatistics Core Courses*: EPI 512, EPI 513; HSERV 510, HSERV 511; ENV H 511; G H 515. All non-biostatistics core courses must be taken for a numerical grade, with a minimum grade of 2.7 in each non-biostatistics core course and a minimum 3.00 cumulative GPA.
3. *Biostatistics Elective Courses*: 6 credits of any approved biostatistics MS elective, or STAT 512 or STAT 513
4. *Biostatistics MPH Practicum*: BIOST 595 (3). Three credits in an organization or agency that provides planning or services relevant to public health.
5. *Master's Thesis*: 9 credits of BIOST 700.

See department website for further information on degree requirements.

Master of Science

The Master of Science program offers advanced training in biostatistics. The program includes coursework in biostatistics, statistics, and one or more biomedical fields. In addition, successful candidates are required to pass a master's theory examination and write a research-based master's thesis. The degree is designed for individuals who anticipate a career as a data analyst in public health or biomedical research or practice and for individuals who plan doctoral work in a public health or biomedical field, but want more methodological training than those PhD programs offer.

Admission Requirements

Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential MS students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (to include multivariate calculus), one course in linear algebra, and one course in probability theory.

Degree Requirements

63 credits minimum, as follows:

1. *Required Courses*: BIOST 514, BIOST 515, BIOST 536, BIOST 537, BIOST 580, BIOST 590, STAT 512, STAT 513. Students must earn a minimum 3.0 grade in each of the required courses (except BIOST 580 and BIOST 590). At faculty discretion, required courses may be waived based on prior coursework, and faculty may also waive the requirement for obtaining a grade of 3.0 in selected courses when subsequent performance on a relevant qualifying examination is excellent.
2. *Elective Credits*: 12 elective credits, including at least 6 credits with a methodology emphasis, and 6 credits with a biology or public health emphasis (See department for elective-credit lists.)
3. *Examinations*: Students who enroll in STAT 512 and STAT 513 must take and pass the MS theory examination the following summer. If this examination is failed, it must be passed the following year.
4. *Master's Thesis*: 18 credits of BIOST 700. The master's thesis can be waived for students who have taken and passed all the PhD qualifying examinations at a level appropriate for PhD students. In place of the 18 credits of BIOST 700 and the 8 credits of BIOST 536 and BIOST 537, the student must take and pass all required

coursework for the PhD degree, including BIOST 533, BIOST 570, STAT 581, STAT 582, STAT 583 and, depending on the pathway, BIOST 571 and BIOST 572, or BIOST 550, BIOST 551, and BIOST 552.

See department website for further information on degree requirements.

Doctor of Philosophy

The doctoral program in biostatistics trains future leaders, highly qualified as independent investigators and teachers, who are well trained practitioners of biostatistics. The program includes coursework in biostatistics, statistics, and one or more public health or biomedical fields. In addition, successful candidates are required to pass PhD applied and theory examinations, complete a biology project, and write a dissertation that reports the results of new biostatistical research undertaken by the candidate.

Admission Requirements

Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential PhD students may enter the graduate program in biostatistics from programs in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (including multivariate calculus), one course in linear algebra, and one course in probability theory. The two pathways to the PhD (standard or statistical genetics) are shown below.

Degree Requirements

Minimum 103 credits, as follows:

Standard Pathway

- Required Courses:** BIOST 514; BIOST 515; BIOST 533; BIOST 570; BIOST 571; BIOST 572; BIOST 580, BIOST 590, BIOST 800; MATH 576, or equivalent; STAT 512, STAT 513; STAT 581, STAT 582, STAT 583
- Students must earn a minimum 3.0 grade in each required course (except BIOST 580, BIOST 590, or BIOST 800). A placement examination may be taken to waive STAT 512 and STAT 513. At faculty discretion, required courses may be waived based on prior coursework, and faculty may also waive the requirement for obtaining a 3.0 grade in selected courses when subsequent performance on a relevant qualifying examination is excellent.
- Elective Credits:** 15 elective credits, consisting of at least 6 credits with a methodology emphasis and 9 credits with a biology or public health emphasis. (See department for elective-credit lists.) The minimum grade requirement for elective courses is 2.7.
- Examinations:** If a PhD student enrolls in STAT 512 and STAT 513, he or she must take the MS theory examination the following summer for advisory purposes. PhD students must also take and pass the PhD statistical theory examination within two years following first-time completion of STAT 581, STAT 582, STAT 583; take and pass the PhD applied examination within two years following first-time completion of BIOST 570; and pass the general and final examinations.
- Teaching Assistant:** PhD students must serve as a TA for at least one quarter.

Statistical Genetics Pathway

- Prerequisites:** Familiarization with the statistical genetics program; GENOME 371 (or equivalent course from another institution); GENOME 372, GENOME 453, or GENOME 465 (or equivalent class from another institution)

- Required Courses:** BIOST 514, BIOST 515, BIOST 533, BIOST 550, BIOST 551, BIOST 552, BIOST 570, BIOST 581, BIOST 590, BIOST 800; STAT 512, STAT 513, STAT 581, STAT 582, STAT 583; MATH 576 (or equivalent); GENOME 540 or GENOME 541; GENOME 562
- Students must earn a minimum 3.0 grade in each of the required courses (except BIOST 581, BIOST 590, or BIOST 800). A placement examination may be taken to waive STAT 512 and STAT 513. At faculty discretion, required courses may be waived based on prior coursework, and faculty may also waive the requirement for obtaining a grade of 3.0 in selected courses when subsequent performance on a relevant qualifying examination is excellent.
- Elective Credits:** At least 4 credits of elective courses with a methodology emphasis. (See department for elective-course list.) Minimum 2.7 grade required.
- Examinations:** If a PhD student enrolls in STAT 512 and STAT 513, he or she must take the MS theory examination the following summer for advisory purposes. PhD students must also take and pass the PhD statistical theory examination within two years following first-time completion of STAT 581, STAT 582, STAT 583; take and pass the PhD applied examination within two years following first-time completion of BIOST 570; and pass the general and final examinations.
- Teaching Assistant:** PhD students must serve as a TA for at least one quarter.

See the department website for further information on degree requirements.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

BIOST 111 Lectures in Applied Statistics (1) NW Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Credit/no-credit only. Offered: jointly with STAT 111; Sp.

BIOST 290 Introduction to Biomedical Research: Study Design and Interpretation (3) NW Introduces biostatistical concepts necessary for the interpretation, evaluation, and communication of biomedical research. Includes biomedical study design, randomization, graphical data displays, control bias, variability, confounding, interaction, and ethics of human experimentation. Students participate in group and individual projects, group discussions, and oral presentations. Offered: AWSp.

BIOST 302 Forensic Genetics (3) I&S/NW, QSR B. WEIR Introduces the field of forensic genetics through discussion of genetic and statistical issues emerging since the introduction of DNA profiling. Students develop the skills to interpret the evidence of matching genetic profiles; to perform calculations relevant for parentage determination; the identification of remains; and to consider the implications of familial searching of DNA databases. Prerequisite: either BIOST 310, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311, Q SCI 381, or Q METH 201. Offered: jointly with PHG 302; W.

BIOST 310 Biostatistics for the Health Sciences (4) QSR Hughes Introduction to statistical methods for students panning on majoring in health sciences. Uses case studies and examples from popular and scientific literature to introduce topics such as data description, study design, screening, estimation hypothesis testing, categorical data analysis, and regression. Emphasizes concepts and interpretation rather than computation or theory. Offered: AWSp.

BIOST 425 Introduction to Nonparametric Statistics (3) NW Overview of nonparametric methods, such as rank

tests, goodness of fit tests, 2 x 2 tables, nonparametric estimation. Useful for students with only a statistical methods course background. Prerequisite: STAT 390/MATH 390. Offered: jointly with STAT 425.

BIOST 499 Undergraduate Research (1-10, max. 30) Supervised reading programs; library and field research; special projects.

BIOST 502 Introduction to Statistics in Health Sciences (4) Description and examples of common concepts in biostatistics. Probability, point and confidence interval estimation, hypothesis testing including two-sample and paired t and chi-square tests, introduction to simple linear regression. Emphasizes applications in health sciences. Offered: W.

BIOST 503 Application of Statistics to Health Sciences ([0-3], max. 3) Standard statistical techniques presented with examples drawn from the health sciences literature. Critical interpretation of research results, and introduction to the computer for data processing and statistical analysis. Prerequisite: BIOST 502 or equivalent. Offered: A.

BIOST 510 Biostatistics in Dentistry (3) Spiekerman Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Offered: jointly with DPHS 568; S.

BIOST 511 Medical Biometry I (4) Presentation of the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Examples are drawn from the biomedical literature, and real data sets are analyzed by the students after a brief introduction to the use of standard statistical computer packages. Statistical techniques covered include description of samples, comparison of two sample means and proportions, simple linear regression and correlation. Offered: A.

BIOST 512 Medical Biometry II (4) Multiple regression, analysis of covariance, and an introduction to one-way and two-way analyses of variance: including assumptions, transformations, outlier detection, dummy variables, and variable selection procedures. Examples drawn from the biomedical literature with computer assignments using standard statistical computer packages. Prerequisite: either BIOST 511 or BIOST 517, or equivalent. Offered: W.

BIOST 513 Medical Biometry III (4) Analysis of categorical data including two sample methods, sets of 2 x 2 tables, R x C tables, and logistic regression. Classification and discrimination techniques. Survival analysis including product limit estimates and the Cox proportional hazards model. Prerequisite: BIOST 512 or permission of instructor. Offered: Sp.

BIOST 514 Biostatistics I (4) Presentation of principles and methods of data description; graphics; point, confidence interval estimation; hypothesis testing; relative risk; odds ratio; Mantel-Haenszel; chi-square test. Examples drawn from biomedical literature; real-data sets analyzed using statistical computer packages. Prerequisite: biostatistics majors or permission of instructor. Offered: A.

BIOST 515 Biostatistics II (4) Introduction to linear models; multiple regression, correlation; residual analysis; dummy variables; analysis of covariance; one-, two-way analysis of variance; randomized blocks; fixed, random effects (repeated measure, factorial designs); multiple comparisons. Real biomedical data sets analyzed. Prerequisite: BIOST 514, biostatistics major, or permission of instructor. Offered: W.

BIOST 516 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI

517; or permission of instructor. Offered: jointly with EPI 516/PHG 519.

BIOST 517 Applied Biostatistics I (4) Introduction to the analysis of biomedical data. Descriptive and inferential statistical analysis for discrete, continuous, and right-censored random variables. Analytic methods based on elementary parametric and non-parametric models for one sample; two sample (independent and paired), stratified sample, and simple regression problems. Offered: A.

BIOST 518 Applied Biostatistics II (4) Multiple regression for continuous, discrete, and right-censored response variables, including dummy variables, transformations, and interactions. Introduction to regression with correlated outcome data. Model and case diagnostics. Computer assignments using real data and standard statistical computer packages. Prerequisite: BIOST 517 or permission of instructor. Offered: W.

BIOST 519 Advanced Epidemiologic Methods (4) *Guthrie, Phipps* Introduces advanced epidemiologic methods, including causal inference, inverse probability weighting, propensity scores, imputation for missing data, approaches to multiple comparisons, Bayesian inference, meta-analysis, mediation analysis, and marginal structural models. Prerequisite: EPI 512; EPI 513; EPI 514; EPI 536/BIOST 536. Offered: jointly with EPI 515; Sp.

BIOST 524 Design of Medical Studies (3) Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for graduate students in biostatistics and for research-oriented graduate students in other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of BIOST 513, BIOST 518, STAT 421, STAT 423, STAT 512, or EPI 512; or permission of instructor. Offered: jointly with STAT 524; Sp.

BIOST 527 Nonparametric Regression and Classification (3) *Minin, Raftery, Richardson, Wakefield* Covers techniques for smoothing and classification including spline models, kernel methods, generalized additive models, and the averaging of multiple models. Describes measures of predictive performance, along with methods for balancing bias and variance. Prerequisite: either STAT 502 and STAT 504 or BIOST 514 and BIOST 515. Offered: jointly with STAT 527; Sp.

BIOST 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent; or permission of instructor. Offered: jointly with CS&SS 529/STAT 529.

BIOST 531 Statistical Methods for Analysis with Missing Data (3) *Chan* Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM algorithm and Gibbs' sampler. Covers both ignorable and non-ignorable missing-data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with EPI 531; W.

BIOST 532 Ethical Issues for Biostatisticians (2) Exposes students to ethical issues in the conduct of biomedical research, particularly the computation, interpretation, and communication of statistics. Provides the knowledge and resources needed to practice statistics ethically in this domain. Helps students formulate justified responses to ethical challenges, and nurtures a sense of professional responsibility to take action. Credit/no-credit only.

BIOST 533 Theory of Linear Models (3) Examines model structure; least squares estimation; Gauss-Markov theo-

rem; central limit theorems for linear regression; weighted and generalized least squares; fixed and random effects; analysis of variance; blocking and stratification; and applications in experimental design. Prerequisite: STAT 421 or STAT 423; and STAT 513, BIOST 515, and a course in matrix algebra. Offered: jointly with STAT 533; Sp.

BIOST 534 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 534; Sp.

BIOST 536 Categorical Data Analysis in Epidemiology (4) Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity with available software programs gained by analysis of bona fide data and critiques of published analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with EPI 536; A.

BIOST 537 Survival Data Analysis in Epidemiology (4) Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic and health sciences studies. Familiarity with interpretation and available software programs gained by analysis of bona fide sets of data and critiques of published analyses appearing in the literature. Prerequisite: BIOST 536 or permission of instructor. Offered: jointly with EPI 537; W.

BIOST 540 Correlated Data Regression (3) Introduction to regression modeling of longitudinal and clustered data from epidemiology and health sciences. Interpretation and familiarity with software gained by analysis of data and critiques of published analyses. Prerequisite: Either BIOST 513, BIOST 515, BIOST 518, BIOST 536, or permission of instructor. Offered: Sp.

BIOST 550 Statistical Genetics I: Mendelian Traits (3) Mendelian genetic traits. Population genetics; Hardy-Weinberg, allelic variation, subdivision. Likelihood inference, information and power; latent variables and EM algorithm. Pedigree relationships and gene identity. Meiosis and recombination. Linkage detection. Multipoint linkage analysis. Prerequisite: STAT 390 and STAT 394, or permission of instructor. Offered: jointly with STAT 550; Sp.

BIOST 551 Statistical Genetics II: Quantitative Traits (3) Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with STAT 551; A.

BIOST 552 Statistical Genetics III: Design and Analysis (3) Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENOME 371; or permission of instructor. Offered: jointly with STAT 552; W.

BIOST 555 Statistical Methods for Spatial Epidemiology (3) Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with EPI 555; Sp.

BIOST 561 Computational Skills for Biostatistics I (1) Provides an introduction to statistical computing with R.

Emphasizes good programming techniques useful in statistical analysis. Prerequisite: biostatistics and statistics graduate student. Credit/no-credit only. Offered: A.

BIOST 562 Computational Skills for Biostatistics II (1) Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: either BIOST 561 or permission of instructor. Credit/no-credit only. Offered: W.

BIOST 563 Computing and Research (2) Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: either BIOST 562 or permission of instructor. Credit/no-credit only. Offered: S.

BIOST 570 Advanced Regression Methods for Independent Data (3) Covers linear models, generalized linear and non-linear regression, and models. Includes interpretation of parameters, including collapsibility and non-collapsibility, estimating equations; likelihood; sandwich estimations; the bootstrap; Bayesian inference: prior specification, hypothesis testing, and computation; comparison of approaches; and diagnostics. Prerequisite: STAT 512 and STAT 513; BIOST/STAT 533 or STAT 421/STAT 502 and STAT 423/STAT 504; a course in matrix algebra. Offered: jointly with STAT 570; A.

BIOST 571 Advanced Regression Methods for Dependent Data (3) Covers longitudinal data models, generalized linear and non-linear mixed models; marginal versus conditional models; generalized estimating equations, likelihood-based inference, REML, BLUP, and computation of integrals; Bayesian inference: Markov chain Monte Carlo; covariance models, including models for split plot designs; comparison of approaches; and diagnostics. Prerequisite: BIOST570/STAT 570. Offered: jointly with STAT 571; W.

BIOST 572 Advanced Regression Methods: Project (3) Student presentations and discussion on selected methodological research articles focusing on regression modeling. Prerequisite: STAT 571. Offered: jointly with STAT 572; Sp.

BIOST 576 Statistical Methods for Survival Data (3) Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either BIOST 515, STAT 473, or equivalent. Offered: jointly with STAT 576.

BIOST 578 Special Topics in Advanced Biostatistics (*, max. 30) Advanced-level topics in biostatistics offered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with STAT 578; AWSps.

BIOST 579 Data Analysis and Reporting (2, max. 8) Analysis of real data to answer scientific questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics or permission of instructor. Offered: jointly with STAT 579; AWSp.

BIOST 580 Seminar in Biostatistics (*, max. 30) Presentation and discussion of special topics and research results in biostatistics. Speakers include resident faculty, visiting scientists, and advanced graduate students. Offered: AWSp.

BIOST 581 Statistical Genetics Seminar (1, max. 30) Presentations and discussion of special topics and research results in statistical genetics. Students, posdocs, and faculty present their work and papers from the literature. Credit/no-credit only. Offered: AWSp.

BIOST 582 Student Seminar (1, max. 30) Student seminar series for collaboration, exchange of ideas, and exposure to different stages of performing independent research. Encourages both students and faculty to give presentations including RA work, extended class projects, master's

theses, dissertation progress, data analysis, practice talks, and journal articles. Credit/no-credit only. Offered: AWSpS.

BIOST 590 Biostatistical Consulting (3, max. 6) Training in consulting on the biostatistical aspect of research problems arising in the biomedical field. Students, initially under the close supervision of a faculty member, participate in discussions with investigators leading to the design and/or the analysis of a quantitative investigation of a problem. With experience, independent associations of student and research worker are encouraged, with subsequent review by faculty of resulting design and analysis. Prerequisite: permission of instructor. Offered: AWSpS.

BIOST 595 Biostatistics Master's Practicum (1-12, max. 12) Supervised practice experience providing students an opportunity to learn how biostatistics is applied in a public health setting and in the formation of public health policy. Prerequisite: BIOST 514; BIOST 515; BIOST 536; BIOST 537.

BIOST 598 Techniques of Statistical Consulting (1) Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with STAT 598; ASP.

BIOST 600 Independent Study or Research (*-) Offered: AWSpS.

BIOST 700 Master's Thesis (*-) Offered: AWSpS.

BIOST 800 Doctoral Dissertation (*-) Offered: AWSpS.

Environmental and Occupational Health Sciences

F461 Health Sciences

Environmental health focuses on identifying, evaluating, and controlling environmental conditions that may have an adverse impact on human health. Examples of problem areas requiring environmental health expertise are assuring adequate quality and quantity of food and drinking water, safe treatment and disposal of domestic and industrial waste materials, limiting or reducing air and noise pollution, limiting occupational exposure to hazardous substances and unsafe conditions, assuring safe and healthful housing, controlling the spread of insect- and rodent-borne illness, proper selection and use of pesticides, and understanding the effects of global changes in climate and the atmosphere on human health.

UNDERGRADUATE PROGRAM

Adviser

F461D Health Sciences, Box 357234

(206) 543-4207

ehug@uw.edu

The Department of Environmental and Occupational Health Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in environmental health
- A minor in environmental health

Bachelor of Science

Suggested First- and Second-Year College Courses: Chemistry, organic chemistry, biology, calculus, statistics, English composition

Department Admission Requirements

1. Admission to the major is competitive. Applicants must complete prerequisite coursework and an application to be considered. Completing the prerequisites and submitting an application do not guarantee admission. Applicants are admitted in two groups: Early Admission and Upper-Division Admission.
2. Applications are due the third Friday of autumn, winter, spring, and summer quarters. Applications can be downloaded from the Environmental Health undergraduate program website at depts.washington.edu/ehug.
3. Prospective students should apply during the quarter they plan to complete prerequisites for entry the following quarter. Ideally, students enter the major by or before the beginning of their junior year.
4. Applications are evaluated on overall grades; performance in math, science, and composition courses; demonstrated writing ability; and understanding of and potential fit with the major.
5. Applicants are strongly encouraged to meet with the program manager before submitting an application.
6. Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Consult UW Equivalency Guide or UW adviser to verify transferability of coursework.

Early Admission

Applicants must complete the following, with a minimum 2.0 grade in each course, to be considered for early admission:

1. Minimum cumulative 3.00 GPA
2. Minimum 30 college credits
3. 5 credits of English composition
4. CHEM 142, CHEM 152, CHEM 162
5. Either MATH 124 or MATH 144 or Q SCI 291 (MATH 112 does not satisfy this requirement)

Upper-Division Admission

Applicants must complete the following, with a minimum grade of 2.0 in each course, to be considered for admission:

1. Minimum cumulative 2.50 GPA
2. 5 credits of English composition
3. BIOL 180, BIOL 200, BIOL 220
4. CHEM 142, CHEM 152, CHEM 162; CHEM 237, CHEM 238, CHEM 239 or CHEM 223, CHEM 224
5. Either MATH 124 or MATH 144 or Q SCI 291 (MATH 112 does not satisfy this requirement)

Degree Requirements

180 credits, as follows:

General Education and Basic Skills

93 credits as follows. Many of these courses overlap with major requirements shown below.

1. *Written and Oral Communications (12 credits):* One 5-credit English composition course from the University list; HCDE 333; 3 credits of additional W-designated coursework.
2. *Quantitative and Symbolic Reasoning (QSR) (10 credits):* Either MATH 124, MATH 144, or Q SCI 291 (MATH 112 does not satisfy this requirement); either STAT 311 (recommended), STAT 220, or Q SCI 381
3. *Visual, Literary, and Performing Arts (VLPA) and Individuals & Societies (I&S) (20 credits):* Minimum 10 credits required in each area

4. Natural World (NW) (51 credits)

- a. *Biology (15 credits):* BIOL 180, BIOL 200, BIOL 220
- b. *Chemistry (26 credits):* CHEM 142, CHEM 152, CHEM 162, and CHEM 237, CHEM 238, CHEM 239 (or CHEM 223, CHEM 224)
- c. *Physics (10 credits):* PHYS 114, PHYS 115, PHYS 117, PHYS 118 (or PHYS 121 and PHYS 122)

Major Requirements

72-74 credits, as follows:

1. *Environmental Health Core (minimum 36 credits):* ENV H 311, ENV H 405, ENV H 431, ENV H 432, ENV H 433, ENV H 472, ENV H 482 (2 credits minimum), EPI 320, MICROM 301, MICROM 302.
2. *Environmental Health Electives (9-11 credits):* Minimum three courses chosen from ENV H 440, ENV H 441, ENV H 442, ENV H 445 (or ENV H 446), ENV H 448, ENV H 453, ENV H 460, and ENV H 473.
3. 27 additional credits of approved electives
4. Minimum 2.0 grade in each course required for the major
5. Sufficient elective credits to reach total of 180 credits.

Minor

Minor Requirements: 29 credits as follows:

1. *Core Courses:* 17 credits of the following: ENV H 311, ENV H 405, ENV H 431, EPI 320; STAT 220 or STAT 311.
2. *Approved Electives:* 12 credits of electives from the approved departmental list. See website or adviser for details.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Learning Objectives and Expected Outcomes: In the Bachelor of Science program in Environmental Health, students learn to utilize tools of scientific inquiry to identify, prevent, and control environmental factors that can damage human health. As part of their training, students are introduced to basic principles of risk assessment, microbiology, epidemiology, sampling, and toxicology, and can choose to focus in one of three interest areas: biomedical sciences, health and environmental science, and environmental public health practice.
- *Instructional and Research Facilities:* The department houses thirteen centers and institutes and twenty labs.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* The department operates an internship program in cooperation with government agencies and private employers throughout the state. Each student intern works under the supervision of an experienced employee, with guidance from a faculty member. Internship placements are available throughout the year for variable amounts of academic credit.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* UW Student Environmental Health Association

GRADUATE PROGRAM

Graduate Program Coordinator

F461 Health Sciences, Box 357234

(206) 543-3199

The Department of Environmental & Occupational Health Sciences offers three graduate degrees: Master of Science, Master of Public Health, and Doctor of Philosophy. The areas of emphasis are environmental and occupational hygiene (PhD), industrial hygiene and safety/occupational and environmental exposure sciences (MS), environmental toxicology (PhD/MS), environmental health (MS), and occupational and environmental medicine or environmental and occupational health (MPH).

The PhD in environmental and occupational hygiene option focuses on the assessment of exposures, health effects, and control strategies in community and work environments. The program emphasizes expertise in exposure assessment to evaluate human health risks from chemical, physical, and biological agents. Research opportunities include: laboratory and field investigations of environmental exposures and health outcomes; air, soil and water pollution monitoring; ambient, indoor, and personal exposure modeling; evaluation of biomechanical stress factors and organization of the work environment; development of new instruments, biomarkers, and novel methods for assessing human exposures; and evaluation of effective control strategies for the prevention or reduction of illness and injury.

The MPH in environmental and occupational health provides an opportunity for students to focus on the recognition, assessment, and control of environmental and occupational hazards, the impact of these hazards on health and society, and approaches to regulations, enforcement, and policy development. It emphasizes development of skills essential to science-based public health practice. In addition to coursework, students complete a field practicum and research in any of the department's research facilities or in a field setting.

The MPH in occupational and environmental medicine is for individuals with an earned doctorate. The goal of the program is to provide training in the public health sciences with a focus on occupational and environmental health. The program provides didactic instruction and participation in field studies. Research efforts focus on understanding, preventing, and managing environmental and occupational disease, injury, and disability. Physicians also have the option of applying for a concurrent fellowship or residency in occupational and environmental medicine.

The concurrent MPH/MPA or MS/MPA degree programs with the Daniel J. Evans School of Public Affairs seek to educate students who bring substantive public health knowledge and a strong policy and management orientation to their professional careers. With several courses that satisfy degree requirements in both programs, students are able to earn the two degrees in a shorter period of time than if the degrees were taken separately. Applicants must apply to both programs.

Admission Requirements for All Degrees

Prerequisites for admission to the MS occupational and environmental exposure sciences, environmental toxicology, and environmental health programs and the MPH environmental and occupational health program include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors are considered if the prerequisite courses have been completed. Competitive applicants typically have strong grades and Graduate Record Examination scores, a statement of personal goals consistent with the program, and supportive letters of reference.

Prerequisites for admission to the MPH occupational and environmental medicine program include a doctoral degree (MD, DO or equivalent) with prior coursework in physics, chemistry, calculus, and biology. Concurrent UW residency applicants must satisfy additional prerequisites including graduation from a Class A medical school (United States, Canada, or equivalent) and completion of one year of approved internship. Three years in primary care specialty is also encouraged.

Prerequisites for admission to the PhD environmental and occupational hygiene and environmental toxicology programs include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. A master's degree in a related field is recommended for Ph.D. environmental and occupational hygiene applicants. Selection of an applicant is also based upon an honors-level GPA, a statement of personal goals consistent with the program, supportive letters of reference, and high scores on the Graduate Record Examination.

International applicants are also required to submit official scores for the Test of English as a Foreign Language (TOEFL). TOEFL scores of 580 (237 computer) or higher are required for admission to the MS, MPH, and PhD programs.

Master of Public Health, Environmental and Occupational Health

Focuses on the recognition, assessment, and control of environmental and occupational hazards; the impact of these hazards on public health and society; and approaches to regulations, enforcement, and policy development. Nurses with a BN can opt for a special emphasis MPH track to train in the delivery of health and safety services to worker populations and communities.

Degree Requirements

63 credits, as follows:

- Core Requirements:** EPI 511 (or EPI 512, EPI 513), BIOST 511 (or BIOST 517). MPH/MPA students are also required to take BIOST 512 (or BIOST 518), HSERV 510, and HSERV 511.
- Required Courses:** ENV H 505 (or ENV H 514, ENV H 515, and ENV H 516), ENV H 453 (or ENV H 553 or ENV H 551), ENV H 570, ENV H 577 (or ENV H 572 or ENV H 543), ENV H 446 (or ENV H 490, or ENV H 541, or ENV H 545, or ENV H 552, or ENV H 548). Courses in environmental health not chosen can be taken as electives to satisfy course requirements. Students have a choice of either completing a thesis (ENV H 700) or a project (ENV H 598B).
- Electives (varies by track)**
 - Thesis Track:** At least two additional 400- or 500-level departmental courses (minimum 6 credits) required to fulfill elective requirements.
 - Project Track:** Students who take 6-8 credits of ENV H 598A must take 3 additional 400-500 classes. Students who take 9 or more ENV H 598A credits must take two additional 400-500 level elective credits.
- Practicum:** ENV H 599 (at least 120 hours)

Master of Public Health, Occupational and Environmental Medicine

Gives physicians a better understanding of the clinical and scientific principles in environmental and occupational health. Training focuses on epidemiology, occupational and environmental hygiene, biostatistics, health services and environmental toxicology. A concurrent residency/fellowship program is available.

Degree Requirements

64 credits

Master of Science, Environmental Health

Students learn to identify sources of contamination in air, water, food, and soil, and on surfaces; how contamination is spread; strategies to prevent or control effects on human health or environmental quality; and the means of communicating risk information to the public and health professionals.

Degree Requirements

64 credits, as follows:

- Core Courses:** ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517 or higher), EPI 511
- Required Courses:** ENV H 505, ENV H 453, ENV H 541, ENV H 543 (or ENV H 577), ENV H 552, ENV H 594, ENV H 445 (or ENV H 446), ENV H 548, ENV H 545
- Representative Electives:** 9 graded elective credits, approved by the student's academic adviser.

Master of Science, Occupational and Environmental Exposure Sciences

Students learn to quantify and manage human exposures to chemicals, air pollutants, aerosols, and physical agents found in a wide variety of community and occupational settings. The program emphasizes rigorous academic training, internships, career guidance, and practical skills needed for graduates to establish long-term careers as environmental health and safety professionals. A flexible curriculum offers options for either a thesis or professional portfolio alternative.

Degree Requirements

63 credits, as follows:

- Core Courses:** ENV H 580, ENV H 581, ENV H 583, ENV H 700 (or appropriate section of ENV H 598, and ENV H 559, and appropriate section of ENV H 599) BIOST 512 (or BIOST 518, or higher), EPI 511. Higher level biostatistics and epidemiology courses can be substituted for BIOST 511 or BIOST 517, and for EPI 511. Students completing a project are required to take only BIOST 511 and are not required to take ENV H 583, but are required to complete an internship (ENV H 599).
- Required Courses:** ENV H 551, ENV H 553, ENV H 557
- Learning Emphasis Required Courses:**
 - Occupational Hygiene:** ENV H 505, ENV H 555, ENV H 557, ENV H 560, ENV H 570
 - Ergonomics and Human Factors:** ENV H 537, ENV H 549, ENV H 560, ENV H 566, ENV H 596
 - Health and Safety Management and Policy:** ENV H 560, ENV H 577, ENV H 584, ENV H 599
 - Exposure Biomarkers:** ENV H 505, ENV H 506, ENV H 554, ENV H 570, P BIO 506
- Electives:** Electives must be taken to satisfy the degree requirement of 63 total credits.

Master of Science, Environmental Toxicology

Focuses on understanding the mechanisms of action of environmental chemicals and their effects on human health and in the environment. Research areas include chemical effects on organ systems (neurological, hepatic, renal, cardiovascular, reproductive, and respiratory) and also developmental toxicology, environmental carcinogenesis, and dietary chemoprotection. The program also offers a strong focus on human risk assessment as well as in toxicological issues that cross ecological and human health disciplines.

Degree Requirements

63 credits, as follows:

- Core Courses:** ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511.
- Required Courses:** ENV H 514, ENV H 515, ENV H 516, ENV H 552, ENV H 577, BIOIC 405, BIOIC 406 (or BIOIC 440, BIOIC 441, BIOIC 442), ENV H course in industrial hygiene or occupational medicine.
- Representative Electives:** Toxicology students who take the two-quarter biochemistry series (BIOIC 405, BIOIC 406) must have an additional 9 graded elective credits. Students who choose the three-quarter biochemis-

try series (BIOC 440, BIOC 441, BIOC 442) must have an additional 3 graded elective credits. Electives must be approved by the student's academic adviser. Electives may include ENV H 511, ENV H 512, ENV H 531, ENV H 532, ENV H 533, ENV H 550, ENV H 553, ENV H 555, ENV H 567, ENV H 570, ENV H 584, ENV H 591, BIOL 411, BIOST 521, C MED 407, C MED 590, MICROM 441, MICROM 442, MICROM 518, PATH 444, PATH 544, PATH 555, P BIO 500-level courses, P BIO 505, P BIO 506, P BIO 507, PHCOL 401, PHCOL 402.

Doctor of Philosophy, Environmental and Occupational Hygiene

Students in this program learn to identify, evaluate, and manage health risks found in a wide variety of community and occupational settings, obtaining advanced research training in exposure assessment and control methods.

Degree Requirements

92 credits minimum, as follows:

1. **Core Sciences (11-12 credits):** Sequence of three courses in one area, to be approved by adviser. Typical core choices are biochemistry, chemistry, engineering, applied mathematics, epidemiology, microbiology, or physiology.
2. **Biostatistics (3 credits):** BIOST 512 (or BIOST 518 or higher)
3. **Epidemiology (4 credits):** EPI 511 (or higher)
4. **Environmental and Occupational Health Seminar (6 credits):** ENV H 580
5. **Dissertation (27 credits):** ENV H 800
6. **Laboratory Rotations (6-9 credits):** ENV H 595
7. **Required Courses:**
 - a. **Industrial Hygiene (6 credits):** ENV H 553 and ENV H 555
 - b. **Toxicology (3 credits):** ENV H 405 (or more advanced)
 - c. **Environmental Chemistry (3 credits):** ENV H 552
 - d. **Occupational and Environmental Epidemiology (3 credits):** ENV H 570
 - e. **Electives (20 credits):** 10 elective credits are unspecified and 10 must be in courses taught by occupational and exposure sciences or environmental health program faculty.

Doctor of Philosophy, Environmental Toxicology

Focuses on understanding the mechanisms of the action of environmental chemicals and their effects on human health and in the environment. Research areas include chemical effects on organ systems (neurological, hepatic, renal, cardiovascular, reproductive, and respiratory) as well as developmental toxicology, environmental carcinogenesis, and dietary chemoprotection. The program also offers a strong focus on human risk assessment and toxicological issues that cross ecological and human health disciplines.

Degree Requirements

104 credits minimum, as follows:

1. **Core Sciences (11-12 credits):** Sequence of three courses in biochemistry.
2. **Biostatistics (3 credits):** BIOST 512 (or BIOST 518 or higher)
3. **Epidemiology (4 credits):** EPI 511 (or higher)
4. **Environmental and Occupational Health Seminar (6 credits):** ENV H 580
5. **Dissertation (27 credits):** ENV H 800
6. **Laboratory Rotations (6-9 credits):** ENV H 595
7. **Required Courses:**

- a. **Toxicology (9 credits):** ENV H 514, ENV H 515, ENV H 516
- b. **Toxicology Seminar (9 credits):** Of the 9 credits (minimum) of current topics courses, at least six credits must be in ENV H 591. The other credits can be chosen among other current topics courses offered by the Department of Environmental Health or other departments, with approval of student's advisory committee.
- c. **Advanced Toxicology:** 6 credits from approved list
- d. **Physiology:** 3 credits from approved list
- e. **Electives (20 credits):** Of the four (minimum) required electives, two must be departmental courses and two may be taken outside the department. The two departmental courses must be from two different non-toxicology programs. All elective credits must be approved by the student's advisory committee.

Financial Aid

Support is available for many students in the form of traineeships or research assistantships, which include tuition. This support comes from federal and private sources awarded to the department or School.

Research Facilities

Specialized laboratories exist for research in industrial hygiene chemistry, optical remote sensing of chemicals, industrial ventilation, ergonomics, trace organics and heavy metals, environmental microbiology, electron microscopy, controlled exposure to environmental agents, and toxicology (including toxicogenomics and analytical cytology). Field research is facilitated through an extensive consultation-service program conducted by this department for labor and industry in Washington State.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscaat/.

ENV H 111 Exploring Environment and Health Connections (3) I&S Introduction to environmental health concepts. Examines current events to illustrate and better appreciate the relationship between environment and health and to explore whether an environmental condition is or is not an important threat to health. Emphasizes the roles of environmental scientists and related professionals. Offered: A.

ENV H 205 Environmental Health in Media (2) I&S Explores how the perspective of filmmakers and documentaries can influence the public's interpretation of environmental health issues, and examines the science and cultural norms that support both sides of the argument. Offered: Sp.

ENV H 310 Green Chemicals, Green Products, Green Processes: Crafting a Less Toxic World (3) I&S/NW D. KALMAN Presents green chemistry in the context of social impact and public health. Focuses on the relationship between the science and application of chemistry, and the conditions of life that affect everyone's health, particularly in the developed world. Prerequisite: either CHEM 220 or CHEM 237; recommended: either one ENV H or SPH course.

ENV H 311 Introduction to Environmental Health (3) I&S/NW Relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Offered: ASP.

ENV H 320 Introduction to Technical Communication in Environmental Health (5) Written and oral communication for

environmental health professionals. Principles of effective writing for technical articles, proposals, and reports with attention to structure, clarity, style, and language usage. Students learn to translate complex technical information for broader audiences. Offered: W.

ENV H 405 Toxic Chemicals and Human Health ([0-3], max. 3) Examines the basic principles of toxicology and the effects of chemicals on human health. Includes mechanisms; dose/response relationships; toxicity testing, disposition in the body; modifiers of response; chemicals and cancer; birth defects; exposures in the home, workplace, and environment; and risk assessment and government regulation. Prerequisite: minimum grade of 2.0 in BIOL 220; either 2.0 in CHEM 224, 2.0 in CHEM 239, or 2.0 in CHEM 337. Offered: Sp.

ENV H 417 Case Studies in Children's Environmental Health Disparities (3) DIV Introduces students to the ways in which children are disproportionately affected by environmental health hazards. Through a series of engaging case studies, student learn the core scientific concepts of children's environmental health while exploring the social, cultural, regulatory, political, and economic factors that lead to children's health disparities. Offered: Sp.

ENV H 431 Environmental and Occupational Sampling and Analysis I (3) NW Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: minimum grade of 2.0 in each of the following: either CHEM 162 or CHEM 164; PHYS 114, which may be taken concurrently; ENV H 311. Offered: A.

ENV H 432 Environmental and Occupational Sampling and Analysis II (4) NW Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: ENV H 431. Offered: W.

ENV H 433 Environmental and Occupational Sampling and Analysis III (4) NW Laboratory and lecture related to the evaluation of water quality. The identification and analysis of microorganisms in water, food, and air. Prerequisite: ENV H 431; MICROM 301; MICROM 302. Offered: Sp.

ENV H 440 Water, Wastewater, and Health (3) Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

ENV H 441 Food Protection (3) Study of identification and characteristics of chemicals and biological agents implicated in foodborne disease outbreaks and conditions or circumstances by which food contamination occurs. Examination of food protection activities conducted by local and state government at the retail level. Prerequisite: either 2.0 in CHEM 155, or 2.0 in CHEM 162, or 2.0 in CHEM 164; 2.0 in MICROM 302. Offered: W.

ENV H 442 Zoonotic Diseases and Their Control (3) Examines the transmission and control of zoonotic and vector-borne diseases of public health importance in the United States and globally. Pays attention to identification, surveillance, and control methods. Prerequisite: minimum grade of 2.0 in BIOL 220. Offered: W.

ENV H 444 Antibiotic Resistant Bacteria/Genes Impact on the Environment and Public Health (4) M. ROBERTS Explores how the global use and abuse of antibiotics has profound consequences on the health of humans, animals, and the environment. Addresses issues of antibiotic resistant bacteria and genes through an interdisciplinary "One Health" approach that integrates human, animal, and environmental health. Prerequisite: either EPI 320, BIOL 220, or MICROM 301. Offered: A.

ENV H 445 Solid Waste Management (3) Examination of the public health, environmental, economic, and materials conservation aspects of solid wastes management; amounts and sources of solid wastes, waste reduction and

recycling, methods of storage, transportation and disposal, integrated waste management, identification of present problems and future needs. Prerequisite: minimum grade of 2.0 in CHEM 155, 2.0 in CHEM 162, or 2.0 in CHEM 164; either 2.0 in MATH 124, 2.0 in MATH 127, 2.0 in MATH 134, or 2.0 in MATH 144. Offered: Sp.

ENV H 446 Hazardous Waste Management (3) Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Prerequisite: CHEM 162; MATH 124. Offered: W.

ENV H 447 Environmental Change and Infectious Disease (3) G. CANGELOSI Uses multidisciplinary approach to address the impacts of environmental change (including climate change) on infectious disease. Concepts include categories of environmental change; infectious disease emergence/re-emergence; environmental aspects of infectious disease exposure, acquisition, and progression; pathogen growth/survival in the environment; historical and societal perspectives; surveillance; and strategies for control. Offered: Sp.

ENV H 448 Community Air Pollution (3) Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Offered: Sp.

ENV H 451 Ecology of Environmentally Transmitted Microbiological Hazards (3) Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

ENV H 452 Detection and Control of Environmentally Transmitted Microbiological Hazards (3) Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and detection for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious microorganisms. Offered: W.

ENV H 453 Industrial Hygiene (3) Introduction to the principles and scientific foundation of industrial hygiene. Examines the anticipation, recognition, evaluation, and control of work place hazards to health and safety. Focuses on the first three functions, but includes some consideration of control methods. Prerequisite: BIOL 200; CHEM 224; either PHYS 115 or PHYS 122. Offered: A.

ENV H 460 Occupational Safety Management (3) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Offered: Sp.

ENV H 461 Air-Pollution Control (4) Fundamental concepts of air pollution Control including emission sources, atmospheric dispersion, ambient concentrations, and emission standards, with emphasis on processes and equipment for controlling emissions. Offered: jointly with CEE 490; ASP.

ENV H 462 Technical Aspects of Occupational Safety (3) Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, students receive an OSHA 510 30-hour Construction Safety and Health certification. Offered: W.

ENV H 472 Environmental Risk and Society (3) I&S Examines scientific determinations of environmental risks and explores how such determinations are evaluated by af-

ected communities and society. Employs risk analysis to integrate technical knowledge in hazard identification and exposure assessment to provide a more rational basis for environmental policies. Role of public participation in risk-based decision making discussed. Offered: W.

ENV H 473 Environmental Health Policy and Practice (3) I&S Explores how environmental health problems are controlled in the United States. Examines both the policies and practices of environmental health. Looks at how various government programs are established, organized, and operated to prevent or control hazards in the community. Also examines the legal and regulatory framework. Offered: Sp.

ENV H 480 Undergraduate Seminar (1, max. 6) Covers career exploration and planning within the environmental health major through presentation of current environmental and occupational health issues. Offered: A.

ENV H 482 Environmental Health Internship (2-15, max. 15) Assignment to an environmental health or environmental protection agency for supervised observation and experience in environmental health technology, program planning, and utilization of community resources. Prerequisite: minimum grade of 2.5 in ENV H 311. Credit/no-credit only. Offered: AWSpS.

ENV H 490 Selected Topics in Environmental Health (1-6, max. 20) In-depth study of a current environmental health topic. Offered: Sp.

ENV H 497 Environmental Health Special Electives (*, max. 35) Offered: Sp.

ENV H 499 Undergraduate Research (*, max. 35) Individual research on a specific topic in environmental health upon which specific conclusions, judgments, or evaluation can be made or upon which facts can be presented. Offered: AWSpS.

ENV H 505 Fundamentals of Environmental and Occupational Toxicology (4) Basic principles governing the behavior and effects of toxic chemicals on biological systems. Focuses on human health impacts of chemicals in the context of public health. Designed for non-toxicology majors. Prerequisite: 2 quarters of biology; 2 quarters of chemistry, or permission of instructor. Offered: Sp.

ENV H 510 Global Environmental and Occupational Health (4) Provides an overview of environmental and occupational health, with major focus on developing countries. Examines a variety of environmental hazards and influential factors, interactions with human health and well-being, and relevance to public health. Considers workplace, community, home, regional, and global problems. Offered: W.

ENV H 511 Environmental and Occupational Health ([1-3], max. 3) Effects of exposure to chemical, physical, and biological agents, embracing the community and workplace environments. Current issues, using specific cases from recent literature as basis for classroom discussion and written assignments. Offered: W.

ENV H 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with PCEUT 513/PHG 513; W.

ENV H 514 Fundamentals of Toxicology (3) Covers major fundamentals and core areas of toxicology, including dose response, absorption, distribution, metabolism, and excretion of toxicants, toxicity testing, interpretation of toxicological data; and biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses. Also explores mechanisms and fate of chemical interaction with biological systems. Prerequisite: BIOL 212, BIOC 405, or permission of instructor. Offered: A.

ENV H 515 Organ System Toxicology (3) T. KAVANAGH Focuses on organ system toxicology. Emphasizes the pathophysiology of toxicant-induced organ injury, including adaptive responses to toxicant exposure, inflammation, and tissue repair pathways. Prerequisite: ENV H 514 or permission of instructor. Offered: W.

ENV H 516 Toxic Agents: Effects and Mechanisms (3) Focuses on the toxic effects and the underlying mechanisms of the principal classes of toxicants: pesticides, metals, solvents, air pollutants, persistent organic pollutants, radiation, as well as on food safety and occupational/clinical/eco toxicology. Prerequisite: ENV H 515 or permission of instructor. Offered: Sp.

ENV H 517 Children's Environmental Health (3) Discussion of environmental health issues as they pertain to children's health. Topics include historical perspective of public health research and policies directed at protecting children's health and emerging scientific and public health issues such as the risks and benefits of seafood consumption during pregnancy; the use of pesticides on food and in the home; air pollution and childhood asthma, and childhood injuries and the built environment. Offered: Sp.

ENV H 520 Advanced Technical Communication in Public Health (3) Covers written and oral communication for environmental health and public health professionals, with particular emphasis on three main areas: conveying information more effectively to technical audiences, translating that information for general audiences in the public arena, and crafting effective commentary relating to topics of professional interest.

ENV H 530 Research Proposal Preparation for Biological Sciences (3) Provides first-hand experience for doctoral students in the biological sciences on proposal writing and the review process. Focuses on hypothesis-driven, laboratory bench-work based research following the NIH predoctoral fellowship format, and aims to prepare students for their pre-doctoral fellowship submissions and general qualifying exams. Offered: A.

ENV H 531 Neurotoxicology (3) Advanced discussions of the principles and methodological approaches to neurotoxicology (including behavioral toxicology), classes of neurotoxic agents, types and mechanisms of neurotoxic effects, as well as the role of neurotoxicology in toxicology and public health. Prerequisite: ENV H 514, ENV H 515, ENV H 516 or ENV H 405 or permission of instructor. Offered: W, even years.

ENV H 532 Reproductive and Developmental Toxicology (3) Investigates chemicals that can induce adverse reproductive and developmental outcomes. Discussion topics include identification and characterization of specific classes of toxic agents, mechanisms of action of these agents at the molecular and cellular level, and risk assessment and regulatory issues. Prerequisite: ENV H 514 and ENV H 515 or ENV H 405 or permission of instructor. Offered: S, even years.

ENV H 533 Molecular Toxicology (3) Advanced discussion of molecular mechanisms whereby chemical and biological agents produce their harmful effects on biological tissues. Topics include the role of xenobiotic biotransformation enzyme expression in chemical susceptibility, toxicogenomics, chemical-induced oxidative stress, alternative models, species differences, and dietary anti-carcinogens. Prerequisite: prior coursework in toxicology and biochemistry, or permission of instructor. Offered: Sp, odd years.

ENV H 534 Biochemical Toxicology of the Puget Sound (3) Advanced discussion of effects of pollutants on aquatic organisms at the molecular, biochemical, and physiological levels, and in the context of Puget Sound case studies. Topics include assessing toxicant-induced cell injury in aquatic organisms, biotransformation and detoxification pathways, toxicogenomics, assessing chemical diseases in fish, biomarkers, and zebrafish models. Prerequisite: prior coursework in toxicology and biochemistry or permission of instructor. Offered: W, even years.

ENV H 536 Health Impact Assessment (2) Examines the use of Health Impact Assessment as a public health tool for informing decision-makers about the potential health impacts of proposed projects and policies. Students learn the steps for conducting HIAs, review case studies, and conduct an HIA of a current local proposed project. Offered: jointly with URBPD 536.

ENV H 537 Introduction to Manufacturing Systems (3) Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with IND E 537; A.

ENV H 538 Public Health and the Built Environment (2) Examines how the design of communities and land use and transportation decision have positive and adverse effects on health. Considers built environment impacts on physical activity, obesity, air quality, injuries, mental health, social capital, and environmental justice; and explores interventions to promote healthy community design. Offered: jointly with URBPD 538.

ENV H 540 Food Safety and Health (3) Presentation of emerging issues in food safety, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods. Offered: jointly with NUTR 545; W.

ENV H 541 Ecology of Environmentally Transmitted Microbial Hazards (3) Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

ENV H 542 Detection and Control of Environmentally Transmitted Microbial Hazards (3) Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and diction for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious organisms. Offered: W.

ENV H 543 Quantitative Microbial Risk Assessment (3) Focuses on the principles of quantitative risk assessment as applied to infectious microorganisms. Covers hazard identification, exposure assessment, health effects assessment, risk characterization, and risk communication. Offered: Sp, even years.

ENV H 544 Antibiotic Resistant Bacteria/Genes Impact on the Environment and Public Health (4) *M. ROBERTS* Explores how the global use and abuse of antibiotics has profound consequences on the health of humans, animals, and the environment. Addresses issues of antibiotic resistant bacteria and genes through an interdisciplinary "One Health" approach that integrates human, animal, and environmental health. Prerequisite: either EPI 320, BIOL 220, or MICROM 301. Offered: A.

ENV H 545 Water, Wastewater, and Health (4) Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

ENV H 546 Pesticides and Public Health (3) Examines health risks and benefits associated with pesticide use in the United States and internationally; reviews exposure, toxicity, epidemiology, and regulation of pesticides, focusing on populations such as workers and children; discusses benefits derived from vector control, food production, and food preservation. Offered: W, odd years.

ENV H 547 Environmental Change and Infectious Disease (3) *G. CANGELOSI* Uses multidisciplinary approach to address the impacts of environmental change (including climate change) on infectious disease. Concepts include categories of environmental change; infectious disease emergence/re-emergence; environmental aspects of infectious disease exposure, acquisition, and progression; pathogen growth/survival in the environment; historical and societal perspectives; surveillance; and strategies for control. Offered: Sp.

ENV H 548 Community Air Pollution (3) Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Prerequisite: SPH graduate student or permission. Offered: Sp.

ENV H 549 Human Factors in Engineering Design (3) Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations. Covers traditional human factors material with a project-based focus/emphasis. Offered: jointly with IND E 549; Sp.

ENV H 551 Principles of Human Exposure Science (3) Examination of the scientific principles and methods used to characterize human exposures to environmental disease agents, discuss sources and pathways of exposure, use of standard factors, analytical approaches for exposure data, exposure biomarkers, and the energetics of physical agents and injuries. Prerequisite: CHEM 162; MATH 124. Offered: A.

ENV H 552 Environmental Chemistry of Pollution (4) Chemical and physical processes determining distribution and fate of chemical hazards, detection of low levels of hazardous compounds, and environmental evaluation and prediction. Fundamental chemical concepts and measurable properties of individual compounds to interpret and relate measurements. Prerequisite: admission to graduate program or permission of instructor. Offered: W.

ENV H 553 Environmental Exposure Monitoring Methods (4) Provides an in-depth understanding of current monitoring methods for occupational, residential, and community exposures to hazardous chemical agents. Examines the technical basis for sampling strategies and sampling and analytical methods for chemicals in air, water, food, and soil, and for biological markers of exposure and effect in humans and other biota. Prerequisite: ENV H 453 or permission of instructor. Offered: W.

ENV H 554 Biological Monitoring for Chemical Exposure (2) Advanced seminar on biological monitoring for assessment of chemical exposure and health risks from environmental agents. Considers applications and interpretation of results from analysis of biological specimens taken from persons exposed to chemicals in the work place and the general environment. Prerequisite: ENV H 551 or permission of instructor. Credit/no-credit only. Offered: Sp, odd years.

ENV H 555 Instrumental Methods for Industrial Hygiene Measurement: Laboratory (3) Utilizes typical instrumental techniques and analytical methods for the evaluation of potential occupational exposures. Prerequisite: ENV H 453 and ENV H 553 or permission of instructor. Offered: Sp.

ENV H 556 Quantitative Occupational Exposure Analysis (3) Exploration of industrial hygiene data to understand nature of airborne exposures in the occupational environment, and their interpretation for human health. Focus on reading and discussion of primary exposure assessment literature and statistical analysis of real dataset. Prerequisite: one quarter of statistics or biostatistics and basic industrial hygiene. Offered: W, odd years.

ENV H 557 Exposure Controls (3/4) Presents engineering concepts for selecting exposure controls for chemical,

physical, and biological agents. Topics include regulatory mandates, hazard rating strategies, protective clothing, respiratory protection, chemical safety management, building ventilation, local exhaust ventilation, chemical and bio-hazards controls, airflow measurements, and ventilation troubleshooting. Offered: W.

ENV H 559 Applied Occupational Health and Safety (3) Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with IND E 567/NSG 505; Sp, even years.

ENV H 560 Occupational Safety Management (4) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with NSG 506; Sp.

ENV H 562 Technical Aspects of Occupational Safety (3) Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, student receive an OSHA 510 30-hour Construction Safety and Health certificate. Offered: jointly with NSG 507; W.

ENV H 564 Recognition of Health and Safety Problems in Industry (2) Develops skills in occupational health and safety hazard recognition in a variety of important Northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with IND E 564; A.

ENV H 566 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with IND E 566/NSG 508; W.

ENV H 567 Mechanisms of Carcinogenesis (2) Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with PHCOL 567; A, even years.

ENV H 569 Occupational Biomechanics (4) Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with IND E 569; Sp, even years.

ENV H 570 Occupational and Environmental Epidemiology (3) Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with EPI 570; Sp.

ENV H 571 Neuroepidemiology and Environmental Risk Factors (3) *W. KUKULL* Focuses on neurologic diseases

and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Psychiatric disorders e.g. schizophrenia, autism spectrum disorders, and depression will not be discussed. Offered: jointly with EPI 571; W, odd years.

ENV H 572 Environmental Risk and Society (3) Examines environmental health risk assessments and explores how such assessments are viewed by affected communities. Reviews scientific risk assessment methods, risk perception, risk communication, and public participation processes. Examines the influence of advocacy and special-interest publications on risk assessment debates. Offered: W.

ENV H 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3) *Schwartz* Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with EPI 573; A.

ENV H 574 Probabilistic Exposure Analysis (3) Examination of probabilistic (in contrast to deterministic) approaches to prediction of human exposure to environmental contaminants including explicit separation of population variability from uncertainty due to ignorance. Discussion of data needs, pitfalls, policy ramifications, and current state of development and regulatory acceptance. Examples from real world. Student project required. Offered: Sp, odd years.

ENV H 576 Clinical Occupational Medicine (2) For clinicians in training, comprehensive overview of occupational disease principles, occupational history-taking, and the provider's role in workers' compensation. Epidemiologic evidence and pathophysiologic basis for occupational diseases reviewed, emphasizing organ system approach to diagnosis and management. Prerequisite: occupational medicine or preventive medicine residents/fellows, nursing students, or permission of instructor. Offered: S.

ENV H 577 Risk Assessment for Environmental Health Hazards (3/4) Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/PB AF 589; A.

ENV H 580 Environmental and Occupational Health Sciences Seminar (1, max. 6) Presentation of current environmental and occupational health research and issues. Credit/no-credit only. Offered: AWSp.

ENV H 581 Environmental Health Reading (1) Critical reading of selected basic and applied research publications on environmental health problems and programs.

ENV H 583 Thesis Research Proposal Preparation (1) Includes reviewing components of research proposals and practicing writing and developing effective aims, hypotheses, background materials, and analytic strategies for writing theses and presenting at scientific meetings. Offered: Sp.

ENV H 584 Occupational and Environmental Health: Policy and Politics (3) Provides an understanding of the policy process and policy issues in occupational and environmental health and safety, including exploring the relationships between science, values, and politics in the process of setting public policy. Offered: Sp.

ENV H 587 Introduction to Biopharmaceutical Product Development (3) Provides a framework of the drug development process and its regulation. Prerequisite: ENV H 405 or ENV H 514, ENV H 515, and ENV H 516, or PCEUT 501,

PCEUT 502, and PCEUT 503; or equivalent, or instructor permission. Offered: jointly with PCEUT 587; A, even years.

ENV H 590 Selected Topics (1-6, max. 20) In-depth study of a current environmental health topic.

ENV H 591 Current Topics in Toxicology (2, max. 12) *T. KAVANAGH, Z. XIA* Provides in-depth examination of current topics in environmental and occupational toxicology taken from journal articles and seminars. Consists of presentations led by outside speakers, students, post-doctoral fellows, and faculty. Students expected to participate actively in discussion. Assigned weekly readings given according to the schedule of seminar speakers and topics.

ENV H 592 Current topics in Occupational Health Sciences (1/3) Weekly discussion of current research on a broad range of topics relevant to occupational and environmental health including exposure assessment, occupational epidemiology, occupational hygiene, and control of environmental hazards. Presentations and discussion sessions designed to help students organize and prepare a critical analysis of research findings. Credit/no-credit only. Offered: A.

ENV H 593 Current Topics in Risk Assessment (1, max. 6) Examines current topics in risk assessment and risk communication with a focus on issues in environmental health. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Credit/no-credit only. Offered: AWSp.

ENV H 594 Current Topics in Environmental Health (1, max. 2) Critical review and discussion of current scientific literature of particular relevance to the Environmental Health program. Primary presentations rotate among faculty and students. Credit/no-credit only. Offered: W.

ENV H 595 Research Rotation (3, max. 9) Research laboratory rotation for pre-doctoral graduate students. Students commit at least 10 hours per week to a laboratory research project aimed at introducing the student to current methods of laboratory research, and to familiarize the student with specific faculty research interests. Prerequisite: graduate standing and permission of program director.

ENV H 596 Current Issues in Occupational and Environmental Medicine (2, max. 12) Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with NURS 580; AWSp.

ENV H 597 Case Studies in Environmental and Occupational Health (1, max. 12) Discusses clinical cases, recent journal articles, and global environmental health scenarios relevant to the clinical practice of environmental and occupational health. Explores collaborative management of environmental and occupational health-related illnesses and navigation of complex environmental health scenarios through real-world cases and critical analysis of published literature. Offered: AWSp.

ENV H 598 Degree Program Project/Portfolio ([1-9]-, max. 18) Supervised project work on a topic related to student's concentration in graduate study that results in a project paper. Offered: AWSpS.

ENV H 599 Field Studies (2-6, max. 6) Assignment to an environmental research or service program to develop field research and evaluation skills. Credit/no-credit only. Offered: AWSpS.

ENV H 600 Independent Study or Research (*-) Prerequisite: permission of departmental adviser. Offered: AWSpS.

ENV H 700 Master's Thesis (*-) Prerequisite: permission of departmental adviser. Offered: AWSpS.

ENV H 800 Doctoral Dissertation (*-) Prerequisite: permission of departmental adviser. Credit/no-credit only. Offered: AWSpS.

Epidemiology

GRADUATE PROGRAM

Epidemiology Program Office

F262 Health Sciences, Box 357236

(206) 543-6302 or (206) 543-8226

epiapply@uw.edu

depts.washington.edu/epidem

The Department of Epidemiology offers the following three graduate degrees: Doctor of Philosophy, Master of Science, and Master of Public Health, for individuals intending to become academicians, highly qualified research specialists, or well-trained public health practitioners, respectively. The department also offers a number of degree tracks within the master's degree programs, as well as several graduate certificates.

Admission Requirements for All Degrees

Admission to all graduate programs is highly competitive and is based on the following:

1. Background in epidemiology or other health-related fields (such as medicine, health or biological sciences, mathematics, quantitative social sciences), including prior areas of study and work experience, especially quantitative public health research
2. Undergraduate and graduate grades (if applicable)
3. GRE scores (exceptions are often made for master's degree applicants with a prior PhD, MD, DO, DDS, DVM, or equivalent health-related degree from a U.S. university; MD/MPH applicants at UW; and MD/PhD applicants funded by the Medical Scientist Training Program at UW. No exceptions to GRE requirement are made for PhD program applicants.)
4. TOEFL or IELTS score from international applicants, unless bachelor's degree taught entirely in English
5. Applicant interests that are aligned with those of Department of Epidemiology faculty. (It is not expected that applicants locate a faculty mentor in advance.)
6. Compelling motivation for pursuing training in epidemiology as demonstrated through a well-written goal statement
7. Letters of reference

The Master of Public Health (MPH) degree in epidemiology requires coursework in health services and environmental health, in addition to epidemiology and biostatistics, as well as a thesis and a practicum as preparation for a career in public health practice or as a prelude to the PhD program. Three tracks are available: the general track, which is selected by most students and allows specialization via the choice of electives and thesis topic; the global health track (GH); and the maternal and child health track (MCH). The global health track requires approximately two years of prior health science work experience in a developing country, although some of the two years may be health-related work with immigrant or underserved groups in the United States. (The epidemiology global health track is not the same as the MPH general track through the Global Health Department in that it focuses on epidemiology and biostatistics rather than on health services-oriented training, but it does incorporate some of the same classes.) Applicants without the requisite experience may apply to both the Epidemiology general track and the global health graduate certificate (listed below) which combined offer equivalent training. The MCH track expects prior U.S. MCH experience for admission. Applicants without this experience may apply to both the general track and the MCH

graduate certificate (listed below) which combined offer the similar training.

Formal concurrent degree programs involving the epidemiology MPH include the following: Doctor of Medicine (MD), Doctor of Philosophy (PhD) in Anthropology, Master of Arts in International Studies (MAIS), and Master of Public Affairs (MPA). A master's or doctorate from another department at the UW may be combined with the MPH with the approval of both programs.

The Master of Science (MS) degree in epidemiology requires concentration on courses and research in epidemiology and biostatistics as preparation for a research specialization or as a prelude to the PhD program. It also requires electives from the School of Public Health. Two tracks are available, the general track, which allows specialization via the choice of electives and thesis topic and the clinical research track (CR). The MS CR is intended chiefly for professionals who have already completed clinical training, and who plan to conduct research with patients in healthcare settings as a significant part of their future careers.

A formal concurrent degree program combines the epidemiology general track MS with the PhD in molecular and cellular biology. A master's or doctorate from another department at the UW may be combined with the MS with the approval of both programs.

Applicants interested in an MS in genetic epidemiology, administered by the Institute for Public Health Genetics (a School of Public Health program that is not part of the Department of Epidemiology), should visit <http://depts.washington.edu/phgen/programs/msge.html>.

The Doctor of Philosophy is designed to produce academics who are highly qualified as independent investigators, teachers, and practitioners. The requirements for the PhD degree in epidemiology differ from the MS program requirements primarily in the scope and complexity of research for the dissertation. Coursework includes a core series in epidemiology and biostatistics, as well as epidemiology electives and other electives from the School of Public Health.

Admission Requirements Specific to the PhD

1. Master's degree in epidemiology or other health-related field, including mathematics and quantitative social sciences.
 - a. A prior doctorate without a health-related master's degree is not acceptable.
 - b. An applicant with a doctorate only and no master's degree should apply to the MS or MPH first.
 - c. All courses and credits from the MS or MPH in epidemiology at the UW count directly toward the PhD in epidemiology.
2. GRE from all applicants, including those who hold a U.S. doctorate, except MSTP MD students at UW.

The Epidemiology Department and other School of Public Health departments offer several graduate certificate programs open to any qualified graduate student at the University (sph.washington.edu/prospective/edprograms.asp#cert). Some certificate programs are open to Graduate Non-Matriculated students, if indicated on the certificate websites. Following is a partial listing of certificate programs:

- *Advanced Clinical Research Methods*: depts.washington.edu/epidem/Certificates/acrc.shtml (May not be combined with an epidemiology PhD degree at UW)
- *Basic Clinical Research Methods*: depts.washington.edu/epidem/Certificates/brcr.shtml (May not be combined with an epidemiology PhD degree at UW)
- *Global Health Graduate Certificates*: globalhealth.washington.edu/academics/certificates-and-fellowships
 - General Global Health
 - Global Health of Women, Adolescents, and Children
 - Global Injury and Violence

- HIV and Sexually Transmitted Infections
- *Maternal and Child Health*: depts.washington.edu/mchprog/certificate/
- *Public Health Genetics*: depts.washington.edu/phgen/certificateprogram/Certificate.shtml
- *Statistical Genetics*: www.stat.washington.edu/statgen/index.php?page=certificate (Offered by the Biostatistics department)

Master of Public Health

Degree Requirements

Minimum 63 credits, as follows:

1. 45 to 49 class credits
2. *Core Courses*: 33 graded credits, including EPI 512, EPI 513, EPI 514, BIOST 511, BIOST 512, BIOST 513, either ENV H 510 or ENV H 511, HSERV 510, HSERV 511. BIOST 517-BIOST 518 may be substituted for BIOST 511, BIOST 512, BIOST 513
3. EPI 510, a prerequisite for EPI 514, is required for students without substantial SAS and Stata programming experience
4. *Electives*: 6 credits of EPI course electives of 2 or more credits each (See acceptable electives in the on the courses webpage at depts.washington.edu/epidem/courses/)
5. 3 to 6 credits (120 to 240 hours) in a field-based practicum (EPI 595)
6. 9 to 18 thesis (EPI 700) credits
7. Students may enroll in additional elective courses in epidemiology and other courses with substantial public health content with departmental approval, and for independent study (EPI 600) to bring the total to 63 credits. Public health-related 400-level courses taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework without substantial public health content, and at the 300-level or below, does not count toward the degree.

MPH Specialized Program Options: The MPH degree offers specialized tracks as listed below. They have additional course, practicum and thesis requirements detailed on the program websites.

- *Global Health Track*: Requires additional coursework specific to international health. More information about this track is at depts.washington.edu/epidem/program/globalhealth.shtml.
- *Maternal and Child Health Track*: Requires additional coursework related to maternal and child health in the U.S. More information about this track is at depts.washington.edu/mchprog/academic/.

Master of Science

Degree Requirements

60 credits, to include:

1. 36 to 40 class credits
2. *Core Courses*: 24 graded credits, including EPI 512, EPI 513, EPI 514, BIOST 511, BIOST 512, BIOST 513. BIOST 517-BIOST 518 may be substituted for BIOST 511, BIOST 512, BIOST 513.
3. EPI 510, a prerequisite for EPI 514, is required for students without substantial SAS and Stata programming experience.
4. *Electives*: 6 credits of EPI course electives of 2 or more credits each. (See acceptable electives on the courses webpage at depts.washington.edu/epidem/courses/)
5. *School of Public Health Electives*: Two additional 500-level courses (2 or more credits each) in any department of the School of Public Health (including Epidemiology) or other UW courses with significant

public-health content. (See acceptable electives in the appropriate degree requirements checklist at depts.washington.edu/epidem/CurrentStudents/.)

6. 9 to 18 thesis credits (EPI 700)

Students may enroll in additional elective courses in epidemiology and other relevant departments, and for independent study (EPI 600) to bring the total to 60 credits. Public health-related 400-level coursework taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework unrelated to public health and at the 300-level or below does not count toward the degree.

MS Specialized Program Options:

MS Clinical Research Track: Requires specific coursework in place of most of the electives for the MS General Track. For specific requirements, visit the program website at depts.washington.edu/epidem/program/cr.shtml.

Doctor of Philosophy

The curriculum includes courses on epidemiologic methods, and biostatistics. Electives in substantive disease and exposure areas, as well as research methods, are required. Requisite general electives from the School of Public Health are also part of the curriculum.

Degree Requirements

Minimum 90 total credits:

1. Minimum reduced to 60 credits for students with a prior or relevant master's degree (All course requirements must be satisfied even if more than 60 credits are needed to do so.)
2. 54 to 66 class credits
3. *Core Courses*: 32 graded credits including EPI 512, EPI 513, EPI 514, EPI 515, EPI 536 EPI 537, BIOST 517, BIOST 518. BIOST 511, BIOST 512, BIOST 513 may be substituted for BIOST 517-BIOST 518.
4. EPI 510, a prerequisite for EPI 514, is required for students without substantial SAS or Stata programming experience.
5. *Required Non-graded Courses*: EPI 528 (3), two quarters of EPI 584, EPI 588
6. Minimum three required epidemiology electives (minimum 2 credits each). (See acceptable electives in the appropriate degree checklist at depts.washington.edu/epidem/CurrentStudents/.)
7. Three additional electives (minimum 2 credits each) from any department of the School of Public Health, including Epidemiology, or other UW courses with significant public health content
8. Students are encouraged to take EPI 583 (1) each quarter of the first year and EPI 591 (1) each quarter after the first year.
9. *Dissertation*: 27 credits of EPI 800
10. The student's supervisory committee may require additional courses, including English language courses, to ensure that the student has adequate training in the area of epidemiology he or she is pursuing.
11. Additional epidemiology courses and EPI 800 credits, independent study (EPI 600), and courses with substantial public health content offered by other departments or schools (with permission), may be applied to the total PhD credits. Public health-related, 400-level coursework taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework unrelated to public health, and at the 300-level or below does not count toward the degree.

Financial Aid

Research assistantships (RA) for work on various projects provide salary and tuition waivers for students working 20

hours a week. Although funding is not guaranteed with admission, many new PhD and a few master's students find a research assistantship by the start of their first autumn quarter. Most doctoral students have found an RA by their second or third quarter in the program, and many master's students do so by their second year, when they have more of the skills that faculty supervisors need. Research training stipends with partial tuition support are available on a limited basis, especially for more advanced doctoral students. Teaching assistantships are available competitively for second-year and higher-level students. More information is at <http://depts.washington.edu/epidem/funding/index.shtml>.

Research Facilities

University facilities include an excellent library system and access to computers. Many varied opportunities for field research and practice are provided in Seattle and elsewhere in the state and nation, at institutions such as Seattle Children's hospital, Fred Hutchinson Cancer Research Center, Group Health Research Institute, Harborview Medical Center, the Center for AIDS and STD, Public Health: Seattle-King County, Washington State Department of Health, VA Puget Sound Healthcare Systems, and many other local health institutions. Cooperating organizations focusing on global health also are available in Seattle and internationally. Additional, but not exhaustive, lists of cooperating agencies are at depts.washington.edu/epidem/research/Other_Institutions.shtml. A partial list of agencies and funding related to international health are listed at globalhealth.washington.edu/ghrc/funding-and-fieldwork.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/.

EPI 201 Outbreak Investigation and Response (4) I&S/NW, QSR J. BASEMAN Provides an introduction to infectious disease outbreaks of both domestic and global significance. Students learn about outbreak detection, investigation and response activities and methodologies through a combination of lecture, case studies, homework, and popular media.

EPI 220 Sexually Transmitted Infections: Causes and Consequences (5) I&S/NW, QSR L. MANHART Examines the causes and consequences of sexually transmitted infections (STI). Discusses strategies to prevent STI with a focus on sexual and reproductive health. Explores new advances in STI epidemiology, treatment, and public health control. Offered: A.

EPI 320 Introduction to Epidemiology (4) NW Goldberg For the undergraduate student wishing to devote only one quarter to a course in epidemiologic methods. Description of ways in which variation in disease occurrence is documented and how that variation is studied to understand causes of disease. Prerequisite: either BIOST 310, QMETH 201, Q SCI 381, STAT 220, STAT/CS&SS/SOC 221, or STAT 311, any of which may be taken concurrently. Offered: WSp.

EPI 330 Analyzing Epidemiologic Data: Basic Methods (4) I&S, QSR B. MUELLER Application of concepts to real data using basic epidemiologic analysis methods. Prerequisite: EPI 320; either BIOST 310, QMETH 201, Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 211; STAT 311, or minimum score of 3 on AP Statistics test. Offered: Sp.

EPI 360 Exploring the HIV/AIDS Pandemic (5) I&S/NW, QSR S. HAWES Presents a comprehensive overview of the historical, public health, clinical, and biological aspects of HIV infection. Covers impact of AIDS on community and global health care and prospects for prevention and control. Offered: W.

EPI 499 Undergraduate Research (*) Offered: AWSpS.

EPI 501 Public Health Practice at the Local Level (3) Basic overview of state and local public health practice with leaders in the field and case studies focusing on rural and urban public health challenges. Offers preparation for practice in public health agencies. Prerequisite: HSERV 511 or permission of instructor. Offered: jointly with HSERV 501.

EPI 502 Physical Activity in Health and Disease (3) Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: human physiology Offered: jointly with NUTR 505; Sp.

EPI 503 Applied Epidemiology in Public Health Practice (3) Baseman Introduces the principles, methods, and issues in public health practice-based epidemiology. Covers public health surveillance, outbreak and cluster investigation, community health assessment, screening, evaluation, and other select topics. Offered: jointly with HSERV 503; Sp.

EPI 505 Preventing Healthcare Associated Infections (1) Multidisciplinary approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Credit/no-credit only. Offered: jointly with MED 540; W.

EPI 510 Epidemiologic Data Analysis (3) Mackelprang, Winer Intended for students planning to take EPI 514. Introduces concepts and programming skills necessary to analyze data sets for case-control and cohort studies. Provides students hands-on experience in using epidemiologic data sets for stratified analyses with SAS and Stata. Prerequisite: EPI 511 or EPI 512. Credit/no-credit only. Offered: W.

EPI 511 Introduction to Epidemiology (4) Kukull Epidemiologic methods for non-epidemiology majors. Focuses on research designs and methods to describe distribution and determinants of disease and health events in populations; uses quantitative and biomedical information to infer whether causal relationships exist between potential causes and disease in populations. Offered: A.

EPI 512 Epidemiologic Methods I (4) A. PHIPPS, A. ROW-HANI-RAHBAR, N. WEISS Considers principles and methods of epidemiology. Covers measures of disease frequency, descriptive epidemiology, overview of study designs, measures of excess risk, causal inference, screening, measurement error, misclassification, effect modification, and confounding. First in a two course sequence. Prerequisite: BIOST 511, which may be taken concurrently, or equivalent. Offered: A.

EPI 513 Epidemiologic Methods II (4) A. PHIPPS, A. ROW-HANI-RAHBAR, N. WEISS Considers how epidemiologic studies may be designed to maximize etiologic inference. Covers infectious disease epidemiologic studies, randomized controlled trials, cohort studies, case-control studies, cross-sectional studies, ecological and multilevel studies, and selected topics such as meta-analysis. Second in a two course sequence. Prerequisite: EPI 512. Offered: W.

EPI 514 Application of Epidemiologic Methods (5) Hawes, Littman Practical experience in analysis of data. Students analyze data sets currently on file using contemporary epidemiologic methods as taught in EPI 512 and EPI 513. Prerequisite: EPI 510 or experience in statistical programming; EPI 512, EPI 513, and epidemiology major. Offered: Sp.

EPI 515 Advanced Epidemiologic Methods (4) Guthrie, Phipps Introduces advanced epidemiologic methods, including causal inference, inverse probability weighting, propensity scores, imputation for missing data, approaches to multiple comparisons, Bayesian inference, meta-analysis, mediation analysis, and marginal structural models. Prerequisite: EPI 512; EPI 513; EPI 514; EPI 536/BIOST 536. Offered: jointly with BIOST 519; Sp.

EPI 516 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/PHG 519.

EPI 517 Genetic Epidemiology (3) Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENOME 371, or equivalent. Offered: jointly with PHG 511; Sp.

EPI 519 Epidemiology of Cardiovascular Disease (3) Principles, methods, and issues in the epidemiology of cardiovascular disease. Focuses on coronary heart disease and its major risk factors; also covers other topics such as stroke and sudden death. The format includes informal lectures and discussions of the current literature. Prerequisite: EPI 511 or EPI 512, EPI 513. Offered: A.

EPI 520 Epidemiology of Infectious Diseases (3) Manhart Infectious diseases from a public health perspective. Topics include analytic methods, study design, outbreak investigations, surveillance, vaccine evaluations, global eradication, screening, modeling, and infectious causes of chronic diseases. Homework and discussion based on current examples from the published literature. Prerequisite: EPI 511, EPI 512, or permission of instructor. Offered: W.

EPI 521 Epidemiology of Maternal and Child Health Problems ([3-4]-) Enquobahrie Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with HSERV 542; W.

EPI 524 Epidemiologic Studies of Cancer Etiology and Prevention (3-4) M. MADELEINE Current knowledge of the role of environmental/lifestyle factors and genetic susceptibility in the etiology of several cancers with an emphasis on study design. Prerequisite: either EPI 511 or EPI 512; concurrent enrollment in EPI 513. Offered: W.

EPI 527 Vaccines (3) Wald Overview of issues in vaccine development, clinical trials, implementation of vaccination programs, and the role of vaccines in the control of infectious diseases. Emphasizes current issues and real-world challenges in the vaccine field and features critical reading of the literature. Offered: A.

EPI 528 Exposure Measurement in Epidemiology (3) J. DELANEY Principles and methods of measuring exposures (risk factors) in epidemiological studies. Questionnaire design; quality-control procedures for interviews, record abstraction, and lab methods; validity and reliability of measures; effects of measurement error; maximizing response rates; measurement of specific exposures. Prerequisite: EPI 513. Offered: Sp.

EPI 529 Emerging Infections of International Public Health Importance (3-) Hortwitch Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with HSERV 536; W.

EPI 530 AIDS: A Multidisciplinary Approach (2) C. FARQUHAR Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus

(HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with G H 562/MED 530; A.

EPI 531 Statistical Methods for Analysis with Missing Data (3) *Chan* Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM algorithm and Gibbs' sampler. Covers both ignorable and non-ignorable missing-data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with BIOST 531; W.

EPI 532 Epidemiology of Infectious Diseases in Resource-Limited Countries (3) *McClelland* A review of major infectious disease problems of the developing world, including AIDS, malaria, tuberculosis, measles, and diarrhea, with an emphasis on public health control strategies. Offered: Sp, odd years.

EPI 533 Pharmacoepidemiology (3) *Boudreau, Heckbert* Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513; or permission of instructor. Offered: jointly with PHARM 533; Sp, even years.

EPI 536 Categorical Data Analysis in Epidemiology (4) Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity with available software programs gained by analysis of bona fide data and critiques of published analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with BIOST 536; A.

EPI 537 Survival Data Analysis in Epidemiology (4) Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic and health sciences studies. Familiarity with interpretation and available software/computer programs gained by analysis of bona fide sets of data and critiques of published analyses appearing in the literature. Prerequisite: BIOST 536 or permission of instructor. Offered: jointly with BIOST 537; W.

EPI 538 Nutritional Epidemiology (3) *Beresford, Kratz* Application of epidemiological methods to studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to design studies and read the literature in nutritional epidemiology. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: jointly with NUTR 538; A.

EPI 539 Research and Evaluation Methods in Global Health (3-4) *Mock, O'Malley* Provides an overview of a range of evaluation and research designs used in global health. Students learn practical methodologies to obtain, validate, and analyze information regarding health status, services, and programs. Discusses usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, and qualitative methods. Offered: jointly with G H 531; W.

EPI 540 Introduction to Cancer Biology (3) *Madeleine* Provides a general understanding of cancer biology, comparing normal cells to cancer cells, with a focus on the acquired characteristics of cancer cells. Integrates knowledge from different fields of cancer research, guiding students through diverse literature on cancer and carcinogenesis. Prerequisite: undergraduate biology coursework or permission of instructor. Offered: Sp, even years.

EPI 541 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) *E. DEVINE, F. WOLF* Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/HSERV 529/PHARM 529; Sp.

EPI 542 Clinical Epidemiology (2) *Weiss* Principles and methods involved in studying the outcome of illness. Prerequisite: EPI 511, or EPI 512 and EPI 513. Offered: S.

EPI 546 Psychiatric Epidemiology (3) *Vander Stoep* Using epidemiological methods to study mental illness. Topics include contributions of mental illness to global disease burden; major population-based studies of mental illness; measurement of psychopathology; culture and mental illness; role of neurodevelopment, genetics, social and physical environment in etiology of mental disorders; mental health services research. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Credit/no-credit only. Offered: jointly with PBSCI 546; Sp.

EPI 547 Social Determinants of Population Health and Health Disparities (3) Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor. Offered: jointly with HSERV 514; Sp.

EPI 548 Social Determinants of Health: Research Methods (3) *Beresford, Smith* Explores study design, measurement and analytic issues applicable to research into the social determinants of health and health disparities. Semi-weekly graduate-level seminar offered to students with a basic knowledge of epidemiological and biostatistical principles. Prerequisite: either EPI 511 or EPI 512/EPI 513; BIOST 511/BIOST 512 or BIOST 517/BIOST 518. Credit/no-credit only. Offered: jointly with HSERV 548; W.

EPI 549 HIV/STI Prevention Research Methods (3) *J. BAETEN, R. HEFFRON* Focuses on current research and implementation of HIV/STI prevention (biomedical, behavioral, and public health interventions). Includes analyzing strength of research evidence to support candidate interviews, understanding key features of clinical trial design, and applying appropriate/feasible interventions for specific settings and populations. Offered: jointly with G H 563; Sp.

EPI 554 Introduction to Epidemic Modeling for Infectious Diseases (3) *R. BARNABAS* Covers the basic tools for building and analyzing mathematical models of infectious disease epidemics. Model types include deterministic and stochastic models, compartmental and individual-based models. Laboratory provides hands-on model building experience in Excel, Stella, and R. Offered: A.

EPI 555 Statistical Methods for Spatial Epidemiology (3) Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with BIOST 555; Sp.

EPI 570 Occupational and Environmental Epidemiology (3) Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with ENV H 570; Sp.

EPI 571 Neuroepidemiology and Environmental Risk Factors (3) *W. KUKULL* Focuses on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Psychiatric disorders e.g. schizophrenia, autism spectrum disorders, and depression will not be discussed. Offered: jointly with ENV H 571; W, odd years.

EPI 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3) *Schwartz* Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with ENV H 573; A.

EPI 582 Design and Analytic Strategies to Enhance the Validity of Epidemiologic Studies (1) *Weiss* Discusses the issues that led to specific methodologic developments during the past 30 years, along with a characterization of these developments and the consequences of their application. Prerequisite: EPI 512; EPI 513. Credit/no-credit only. Offered: W.

EPI 583 Epidemiology Seminar (1, max. 12) *S. DAVIS* Presentation of current epidemiologic research and application of epidemiologic research in the practice of public health. Offered: AWSp.

EPI 584 Doctoral Dissertation Seminar (1, max. 2) *S. DAVIS* Forum for Epidemiology doctoral students to obtain information for doctoral research, including: project ideas; forming a committee; developing a proposal; conducting the project; and presenting results. Prerequisite: EPI 512 and EPI 513, admission to the PhD program, successful completion of the preliminary examination, or second-year status. Credit/no-credit only. Offered: AW.

EPI 585 Injury and Violence: A Public Health Approach (3) *Schiff* Focuses on broad concepts including a conceptual model, surveillance, research methods, control and prevention of injuries. Topics include unintentional injuries from motor vehicle crashes, falls, drowning, sports injuries and intentional injuries from youth violence, intimate partner violence, homicide and suicide. Offered: A, even years.

EPI 586 Responsible Conduct of Research: Global and Local (3) *A. DRAKE, C. FARQUHAR* Prepares international and U.S. students to develop research proposals; conduct international and domestic field research; and present scholarly work. Offered: jointly with G H 532; A.

EPI 587 Practical Aspects of Research Operations (2) *Fitzpatrick* Provides the basics necessary to plan, implement, and manage a research study. Topics include human subjects applications, data collection, hiring and training of staff, participant recruitment and retention, data management, quality assurance and control, results reporting, communications, and budgeting. Prerequisite: K12 Clinical Scholar or one course in EPI/BIOST. Credit/no-credit only. Offered: A, even years.

EPI 588 Preparing, Writing, and Critiquing Scientific Research Proposals (3) *A. FITZPATRICK, L. KESSLER* Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Credit/no-credit only. Offered: jointly with HSERV 578; Sp.

EPI 590 Selected Topics in Epidemiology or International Health (1-6, max. 6) Tutorials arranged for a small number of students for in-depth examination of an area of epidemiology or international health, usually of current nature.

Seminar format. Prerequisite: EPI 511. Also a special summer format presenting introductory material. May be offered with ENV H 590 and/or HSERV 590. For more information and permission, consult department program adviser. Offered: AWSpS.

EPI 591 Current Literature in Epidemiology (1, max. 15) N. WEISS Articles pertaining to epidemiology and related subjects selected from the current literature to be distributed and read by all participants. Faculty members and enrolled students alternate being responsible for conducting sessions and choosing articles to read. Prerequisite: EPI 513. Credit/no-credit only. Offered: AWSpS.

EPI 592 Program Seminars (1-6, max. 16) Graduate seminars organized to address specific educational needs of students in various specialized programs within the Department of Epidemiology (i.e., Maternal and Child Health). Prerequisite: permission of instructor. Offered: AWSpS.

EPI 593 Cancer Prevention Research Laboratory (3, max. 24) White Research experience for pre- and post-doctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Credit/no-credit only. Offered: AWSpS.

EPI 595 Epidemiology Master's Practicum (1-6, max. 6) Supervised practice experience providing students an opportunity to learn how epidemiology is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: EPI 512 and BIOST 511 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

EPI 600 Independent Study or Research (*-) Prerequisite: permission of independent study supervisor. Credit/no-credit only. Offered: AWSpS.

EPI 700 Master's Thesis (*-) Prerequisite: permission of thesis chair. Credit/no-credit only. Offered: AWSpS.

EPI 800 Doctoral Dissertation (*-) Prerequisite: permission of dissertation chair. Credit/no-credit only. Offered: AWSpS.

Health Services

H664 Magnuson Health Sciences Center
Box 357600

The mission of the Department of Health Services is to work with partners in public health and healthcare to prepare leaders, design solutions, and conduct innovative research that translates into practice and policy. The department offers rigorous academic preparation that integrates learning, service, and research opportunities, emphasizing practical experience and student-faculty collaboration. Through this approach, students master competencies needed for success.

The department offers rigorous academic preparation that integrates learning, service, and research opportunities, emphasizing practical experience and student-faculty collaboration. Through this approach, students master competencies needed for success.

Bachelor's and master's degrees are available in public health, health services administration, health information management, and health services research. Additionally, doctorate and post-doctoral opportunities are available in health services research.

UNDERGRADUATE PROGRAM

Adviser

(206) 543-8810

hihim@uw.edu

depts.washington.edu/hihim

Health Informatics and Health Information Management (HIHIM) offers both a Bachelor of Science degree and a postbaccalaureate certificate. Both the degree and certificate program require 65 credits, which may be completed in either one or two academic years.

Health Informatics and Health Information Management Postbaccalaureate Certificate

Admission Requirements

Baccalaureate degree from an accredited college or university with a minimum 2.50 GPA. Courses in, or the requisite knowledge and skills pertaining to, the following: human anatomy and physiology (laboratory course); introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; principles of management; statistics (any discipline); and medical terminology.

Certificate Requirements

65 credits:

Both the postbaccalaureate certificate and bachelor's degree programs require 65 credits, which may be completed in either one or two academic years.

For current information, visit the Health Informatics and Health Information Management website.

Bachelor of Science

Health Informatics and Health Information Management Major

Suggested First- and Second-Year College Courses: Human anatomy and physiology (laboratory course); introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; statistics (any discipline); English composition; and medical terminology.

Department Admission Requirements

1. Admission to UW Undergraduate Evening Degree Completion Program for summer quarter of planned entry to Health Informatics and Health Information Management (HIHIM)
2. Minimum 90 transferable credits (HIHIM 2-year curriculum plan). Students who have completed a minimum 120 transferable credits including 70 of the 80 UW general education required credits are eligible for the 1-year curriculum plan.
3. Completion of prerequisite coursework in the following areas:
 - a. Statistics (4-5 credits)
 - b. Anatomy and physiology with laboratory (6 credits)
 - c. Medical terminology (3-5 credits): Not offered at UW. Available at various community colleges (3-5 credits).
4. *Grades:* Minimum 2.50 cumulative GPA. Minimum 2.50 cumulative GPA in prerequisite coursework. Minimum 2.0 grade in each prerequisite course.
5. English language proficiency through English courses or a satisfactory score on a designated English proficiency examination specified on the program website.
6. Prerequisites must be completed prior to admission, with the following exception: A maximum of one prerequisite course may be in progress during summer quar-

ter. Applicant must include written petition with HIHIM application. Applicant may be considered for conditional admission. Offer of admission to HIHIM is withdrawn if prerequisite is not completed by the end of summer quarter or if prerequisite grade requirement is not met.

7. Admission is once a year, for summer quarter. Admission is competitive; completion of admission requirements guarantees consideration but not acceptance. Application deadline for each year is April 15. The academic summer schedule begins with an introductory course and an optional independent study course.

Additional information about prerequisite coursework can be viewed at depts.washington.edu/hihim/prerequisites.

Degree Requirements

1. *General Education Requirements (80 credits)*
 - a. *English Composition (C) and Additional Writing (15 credits):* English composition (5 credits); additional writing (W courses) (10 credits)
 - b. *Quantitative and Symbolic Reasoning (QSR) (4-5 credits):* Depending on course taken, may be satisfied by the statistics prerequisite requirement.
 - c. *Areas of Knowledge (60 credits):* Minimum 20 credits each in Visual, Literary, and Performing Arts (VLPA), Individuals & Societies (I&S), and Natural World (NW). BIOL 118 and BIOL 119 may count toward both the prerequisite and NW requirements.
2. *Major Requirements (65 credits)*
 - a. Disease concepts (4 credits)
 - b. Information systems (15 credits)
 - c. Coding and vocabulary (8 credits)
 - d. Management (30 credits)
 - e. Internships and projects (8 credits) - HIHIM 460, HIHIM 462
3. Additional electives to complete minimum 180 credits required for a degree.
4. Minimum 2.00 cumulative GPA in core courses and minimum 2.0 grade in individual courses.

For current information on application and program completion requirements, visit the Health Informatics and Health Information Management program website.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The bachelor's degree program is designed to prepare individuals for careers in the management and use of healthcare information, and prepares students for the Registered Health Information Administrator (RHIA) national certifying examination of the American Health Information Management Association. The program gives students the tools to work in a wide variety of healthcare positions upon graduation, including health information management, health informatics with emphasis on electronic health records, healthcare quality improvement, decision support analysis, research, health insurance, and consulting. Graduates pass a national credential examination, with a majority working within the health information management field.
- *Instructional and Research Facilities:* None
- *Honors Options Available:* None
- *Research, Internships, and Service Learning:* Students complete two internships, one of which is the capstone project.

- *Department Scholarships:* None
- *Student Organizations/Associations:* Students are invited to join the health information management professional association at reduced rates.

GRADUATE PROGRAM

Graduate Program Coordinator

(206) 616-2926

hservmph@uw.edu

The Department of Health Services offers a two-year graduate program in health services leading to the Master of Public Health or Master of Science degree. The MPH degree prepares future health practitioners, managers, and researchers to conduct the unfinished work of improving the well being of communities in the United States and throughout the world. Graduates take jobs in health system management, health program design and evaluation, health promotion, public health practice, and policy analysis. Among other options, the department offers an MPH in community-oriented public health practice (COPHP). This program uses problem-based learning methods, and integrates classroom instruction and experiential fieldwork to prepare students to work in community and public health practice settings. Students may also pursue any of the MPH specialty options. The department also offers a three-year extended degree program in community health management, leading to the MPH degree for employed professionals working fulltime.

The department also maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). In addition, an executive version of the traditional MHA degree, designed for mid-career healthcare professionals, is offered. The MHA degree provides full academic preparation for careers in management and policy positions in health systems, hospitals, medical groups, health plans, and other types of healthcare organizations.

The department, in conjunction with UW Professional and Continuing Education, offers a fee-based master's degree in Health Informatics and Health Information Management.

The department offers a PhD in health services and participates in the training of doctoral fellows.

Master of Public Health

For current listings of MPH options and their requirements, see the MPH program website.

Admission Requirements

1. One set of official transcripts from all institutions of higher learning
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)
3. Test of English as a Foreign Language (TOEFL) scores, if applicable.
4. Written statement, including a description of the applicant's professional background, career goals, and educational objectives
5. Three recent letters of recommendation, preferably from former supervisors and teachers.
6. An in-person or telephone interview with a Health Services faculty person is highly recommended. Complete application details can be viewed at depts.washington.edu/hservmph/admission.

Degree Requirements

63 credits for each program (specialty option) listed below. For detailed requirements, see depts.washington.edu/hservmph.

Community-Oriented Public Health Practice Program

63 credits, to include:

1. *Problem-Based Learning (PBL) Core Curriculum:* 36 credits
2. *Integrated Fieldwork:* 6 credits (first year)
3. *Seminars:* 6 credits
4. *Capstone Project:* 9 credits (second year)
5. *Electives:* 6 credits from School of Public Health and Community Medicine and other schools/colleges at the UW, as appropriate

Health Systems and Policy

63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 credits are from Health Services courses.
2. *Practicum:* 3 credits
3. *Thesis or Capstone Project:* 9 credits

Maternal and Child Health

63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 credits are from Health Services courses.
2. *Practicum:* 3 credits
3. *Thesis:* 9 credits

Social and Behavioral Sciences

63 credits, to include:

1. At least 30 credits from graduate-level-in-classroom courses of which at least 18 credits are from Health Services courses.
2. *Practicum:* 3 credits
3. *Thesis:* 9 credits

Master of Health Administration

See UW General Catalog listing at www.washington.edu/students/gencat/academic/health_services_administration.html.

Master of Science

Admission Requirements

For current information, see the MS program website.

1. One set of official transcripts from all institutions of higher learning
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)
3. Test of English as a Foreign Language (TOEFL) scores, if applicable
4. Written statement, including a description of the applicant's professional background, career goals, and educational objectives
5. Three recent letters of recommendation, preferably from former supervisors and teachers
6. An in-person or telephone interview with a Health Services faculty person is highly recommended

Degree Requirements

Minimum 63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 are from Health Services courses
2. Participation in a program research seminar: Either HSERV 587, HSMGMT 513, or HSMGMT 514

3. *Thesis:* 9 credits

Master in Health Informatics and Health Information Management

The Master of Health Informatics and Health Information Management (MHIHM) program prepares individuals for leadership in health informatics and technology, enterprise information management, and health administration. The curriculum pairs advanced health informatics and health information management courses with master of health administration courses.

The program trains professionals from the fields of health information management, health administration, business, information technology, and healthcare, to strategically lead, develop, and direct health information initiatives and systems. Graduates are prepared to take on senior management roles in this rapidly growing segment of the industry. The program prepares graduates for work in diverse healthcare delivery systems, such as hospitals, clinics, consulting and vendor organizations, and government agencies.

Financial Aid

The MHIHM program develops professionals who understand and assess the delivery system landscape and the growing role of enterprise information governance, technology drivers, and changing requirements for sharing health and patient information through exchange practices.

The curriculum enables students to build and enhance current strengths and acquire new skills. Students study comprehensive management strategies and apply practical methods in planning, analyzing, and manipulating health data to meet institutional needs and resource management. Students address data and technology management policies and tools. They learn to market, design, sponsor, and apply problem solving techniques to complex situations. In addition, students expand their collaboration and communication skills to participate in, and lead, high level leadership teams. Team-based learning, capstone projects, and involvement from healthcare community leaders, are all program hallmarks.

MHIHM classes convene in Bellevue, Washington, for a three-day period (Thursday through Saturday) once each month for 21 months. Additionally once each week faculty lead students in a web-based session, ideal for practicing professionals who plan to continue their careers while gaining a graduate degree.

The program operates under a fee-based structure and is administered in collaboration with UW Professional & Continuing Education. Complete application details can be viewed at www.health-informatics.uw.edu/admissions/application-details/.

Doctor of Philosophy

For the most current information, visit the PhD program website.

Admission Requirements

Admission priority is given to applicants who have graduated from a master's program with high academic standing. Applicants who have a bachelor's, master's, or professional degree in a field related to health services are given preferential review. Students with only a bachelor's degree are occasionally admitted. Applicants with relevant research experience and publications are the most competitive.

Students admitted to the program generally have GRE scores in or above the 75th percentile.

International applicants must submit the results of the Test of English as a Foreign Language (TOEFL), unless they meet UW criteria for waiving the requirement. Scores must show high English language proficiency. A minimum score of 580 (paper based) or 237 (computer based) on the TOEFL is required to be considered for admission to the UW.

Degree Requirements

100 credits minimum, as follows:

1. **Required Core Competencies (35 credits):** HSERV 512, HSERV 513, HSERV 514, HSERV 523, HSERV 524, HSERV 525; one of the following: HSMGMT 514, HSERV 587, or ECON 500; HSERV 522; BIOST 517, BIOST 518, or BIOST 511, BIOST 512, BIOST 513, or BIOST 514, BIOST 515; EPI 512, EPI 513
2. **Area of Emphasis:** Five courses or 15 credits in an area of emphasis. Suggested areas of emphasis: economics or finance; health behavior and health promotion; occupational health; cancer prevention and control; evaluation sciences; population health - the social determinants; global health; maternal and child health; sociology/demography; bioinformatics. For a customized area of emphasis, specific courses taken are selected by the student and the adviser, based on the student's past coursework, experience, proposed dissertation topic, and future career goals.
3. Doctoral courses in advanced theory and methods in health services: 50 credits, including a minimum of 30 dissertation credits
4. Written preliminary examination
5. Written and oral general examinations
6. Dissertation
7. Dissertation defense (final examination)

Financial Aid

Every attempt is made to ensure that students admitted are not prevented from pursuing graduate studies because of inadequate finances. Some fellowships, assistantships, scholarships, and loans are available each year.

Research Facilities

In addition to using University facilities, the program has extensive links with community healthcare delivery systems and agencies for research and training.

EXECUTIVE MPH

Graduate Program Coordinator

H674 Health Sciences, Box 357660

(206) 685-7580

For current information, see the Extended MPH program website.

The Executive MPH degree program is a part-time, partial distance learning program delivered through a combination of intensive four-week summer sessions on the University campus, directed independent study, and four intensive weekend seminars during the academic year. The program is designed for mid-career public and community health professionals with three or more years of experience related to public health. The program provides knowledge and skills required at mid- and upper-level practice and management positions for health professionals. In addition to the core courses in health services, epidemiology, biostatistics, and environmental health, the prescribed coursework includes a broad exposure to the health-care system plus specific management training in budgets, finance, personnel management, economics, organization theory, and program planning and evaluation. Pathways are available in health education, maternal and child health, public health practice, and oral health.

The Executive MPH degree program provides training in developing skills in the scientific base of public health, analytic methods, management and communication, and policy and advocacy, as well as training in cross-cutting issues. Graduates apply their skills directly to their careers.

Admission Requirements

1. Current employment in a public health-related agency preferred
2. Minimum three years experience in community, public, or environmental health-related field
3. Baccalaureate degree from an accredited college or university
4. Minimum 3.00 GPA in the last graded 90 quarter/60 semester hours
5. Graduate Record Examination (GRE) scores, taken within 6 years. (Applicants with MD, DO, or PhD degrees from an accredited U.S. college or university may waive the GRE requirement.)

Degree Requirements

63 credits minimum, as follows:

1. **Year 1 Required Courses:** BIOST 502, EPI 511, HSERV 501, HSERV 516, HSERV 520, HSMGMT 560
2. **Year 2 Required Courses:** BIOST 503, ENV H 511, HSERV 504, HSERV 522, HSMGMT 514, HSMGMT 563
3. **Year 3 Required Courses:** HSMGMT 566 (3), HSMGMT 572 (3)
4. **Thesis or Project Option:** HSERV 700 (master's thesis) or HSERV 598 (project); EPI 600/ENV H 600
5. **Practicum (required):** Focus based on pathway choice
6. **Elective or Pathway Credits (required):** Pathway courses may be spread out over two years. Electives may be taken at any time.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at uw.edu/students/crscat/

HSERV 100 Personal and Public Health (3) I&S Provides an overview of the key components of health and wellness. Presents a balance between individual responsibility and social determinants of public health, emphasizing a holistic preventative model. Incorporates self-assessment and considers the impact of personal, family, social, cultural, and environmental factors on health.

HSERV 290 Special Topics (1-6, max. 12) I&S Explores current or evolving areas of interest in public health.

HSERV 346 Using Economics to Solve Today's Healthcare Problems (4) I&S Health economics is a growing field and an important aspect of public policy. Introduces health economics and the tools economists use to analyze current issues in health care. Furthers the understanding of economics and how it is used in current debates. Prerequisite: ECON 200. Offered: jointly with ECON 346; A.

HSERV 415 War and Health (4) I&S A. HAGOPIAN, E. KANTER Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with G H 419; Sp.

HSERV 475 Perspectives in Medical Anthropology (5) I&S J. TAYLOR Introduction to medical anthropology. Explores the relationships among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with ANTH 475.

HSERV 476 Introduction to Applied Ethnographic Methods in Public Health (4) Introduces practical methods of gathering ethnographic data. Students investigate a local culture, including such diverse groups as graffiti artists and dumpster divers.

HSERV 480 Introduction to Public Health (3) Covers history and major agencies and organizations of public health, Systems perspective on understanding factors affecting public health, the core functions and services of public health, and the major current public health issues in the U.S. and world. Uses a modified problem-based learning (PBL format). Includes substantial group work.

HSERV 481 Issues in Public Health (3) Introduces public health by taking an in-depth look at local public health practice. Focuses on practical solutions for real life problems in local public health settings. Incorporates speakers from the local practice community.

HSERV 482 The Health of Populations (4) I&S, DIV Explores what makes a population healthy or unhealthy. Examines why the United States is less healthy than all other rich countries, despite being one of the healthiest fifty years ago.

HSERV 488 Dark Empire: Race, Health, and British Society - Abroad (5) Explores factors responsible for the well-being and health of black and other racial/ethnic minorities in Britain. Addresses: the National Health Service; ethnic diaspora, anti-immigration laws; urban riots; inequality, and the rise of Muslim fundamentalism and Islamophobia. Conducted in Britain.

HSERV 490 Advanced Topics (1-6, max. 12) I&S Explores current or evolving public health problems. Offered: W.

HSERV 499 Independent Study in Health Services (1-12, max. 12) Individual library or field study project selected in consultation with a faculty adviser.

HSERV 501 Public Health Practice at the Local Level (3) Basic overview of state and local public health practice with leaders in the field and case studies focusing on rural and urban public health challenges. Offers preparation for practice in public health agencies. Prerequisite: HSERV 511 or permission of instructor. Offered: jointly with EPI 501.

HSERV 503 Applied Epidemiology in Public Health Practice (3) Baseman Introduces the principles, methods, and issues in public health practice-based epidemiology. Covers public health surveillance, outbreak and cluster investigation, community health assessment, screening, evaluation, and other select topics. Offered: jointly with EPI 503; Sp.

HSERV 504 Health Communication ([1-3]-, max. 3) Overview of the theory and practice of designing, producing, and evaluating public health communication campaigns, including the use of mass media. Develops greater capacity for critical judgment about the use of communication strategies for achieving public health goals.

HSERV 507 Health Communication and Marketing for Health Promotion: Theory and Practice (3) Discusses health communication theories and applications at the individual level (persuasion), interpersonal level (motivational) interviewing), and population level (mass media). Examines marketing principles for health promotion. Develops a health communication campaign for clients. Investigates adaptation frameworks of communication campaign cutting across cultures.

HSERV 508 Dynamics of Community Health Practice (3) Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with NURS 560.

HSERV 509 Public Health and Informatics (3) A. TURNER Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either BIME 530 or permission of instructor. Offered: jointly with BIME 533; W.

HSERV 510 Society and Health (3) Provides an overview of three core areas in the social and behavioral sciences of public health practice and research: social determinants of individual and population health, health promotion and disease prevention, and cultural competency and community collaboration. Prerequisite: HSERV 511 or equivalent or permission of instructor.

HSERV 511 Introduction to Health Services and Public Health (3-4) History, organization, and effectiveness of U.S. healthcare and public health systems. Determinants of health, need, and utilization. Public and private financing. Supply and provision of personal and public health services. Managed care. Government and private sector roles. Prerequisite: graduate standing or permission of instructor.

HSERV 512 Health Systems and Policy (3) Students review and examine selected topics from literature. Includes need and access to care; theory and effects of health insurance; private and public insurance programs; managed care; costs/expenditures; availability and organization of health resources; and quality assessment and improvement. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511.

HSERV 513 Health Policy Research (3) Extends students' understanding of the nature of health policy and health policy development in the context of a market-based economy. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor.

HSERV 514 Social Determinants of Population Health and Health Disparities (3) Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor. Offered: jointly with EPI 547; Sp.

HSERV 515 War and Health (4) A. HAGOPIAN, E. KANTER Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with G H 519; Sp.

HSERV 516 Introduction to Health Services ([3-4]-) Provides overview of healthcare system, exposes students to current issues and developments affecting organization and delivery of health services, helps students develop ability to frame and analyze questions and issues related to health services. Prerequisite: registration in Extended MPH degree program.

HSERV 518 Social and Ethical Issues (2-4, max. 4) Presents introduction to ethical issues in public health policy and practice. Additional one credit option focuses on health administration/managed care. Coursework designed to train students in basic skills of ethical analysis and increase competency in recognizing, researching, and analyzing issues arising in public health and health services delivery.

HSERV 519 Study Design and Causal Inference (1) Increases depth of knowledge about causal inference in impact evaluation. Applies the elements of causal inference to impact study design and statistical analysis, including the concept of statistical conclusion validity, internal validity, construct validity, and external validity. Credit/no-credit only. Offered: A.

HSERV 520 Methods in Applied Community Research ([0-4]-, max. 4) Skills/knowledge necessary to conduct orderly investigation of specific problems in preparation for MPH thesis or project. Includes problem identification, posing research questions, literature review, consideration of theoretical/practical context, choosing study design, data collection, protection of human subjects, and recognizing

potential errors. Prerequisite: registration in Extended MPH degree program. Credit/no-credit only.

HSERV 521 Advanced Qualitative Methods in Anthropology and Public Health (5) J. PFEIFFER Provides students with both a theoretical foundation in qualitative approaches to research in anthropology and public health and in-depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame research questions, design, appropriate research strategies that incorporate qualitative methods, and analyze data. Offered: jointly with ANTH 519/G H 538; Sp, even years.

HSERV 522 Health Program Evaluation ([1-5]-, max. 5) Politics, theory, methods of evaluation, from simple health programs to evaluation of large-scale interventions. Emphasizes experimental and quasi-experimental designs to estimate program impacts, as well as evaluation of program implementation. Case studies drawn from health field illustrate various types of evaluations. Prerequisite: background in introductory statistics.

HSERV 523 Advanced Health Services Research Methods I: Large Public Databases; Big Data (4-5) Introduces the new big data of health services research, health claims, and survey databases. Discusses the promises and pitfalls of the data and models for analyzing the correlates of health care costs and utilization. Prerequisite: either HSERV 511, BIOST 511/BIOST 512/BIOST 513, BIOST 517/BIOST 518, or EPI 511/EPI 512, and permission of instructor.

HSERV 524 Advanced Health Services Research Methods II: Hierarchical and Incomplete Data (4-5) Introduces advanced biostatistical techniques for analyzing incomplete data in population health research. Examines a wide range of topics including: missing data and potential outcome framework for causal inference, propensity score and multiple imputation, multilevel random effect linear and logistic models, and empirical Bayes prediction. Prerequisite: either HSERV 523 or permission of instructor.

HSERV 525 Advanced Health Services Research Methods III: Casual Inference Using Observational Data ([4-5]-) Focuses on reviewing statistical methods developed for "micro" (individual-level) data on behavior (choices or exposures) and outcomes in order to make casual inference about the role of a choice or an exposure on outcomes. Prerequisite: either HSERV 523, BIOST 511, BIOST 512, BIOST 513, or permission of instructor.

HSERV 527 Survey Research Methods (4) A. MOKDAD Provides students with skills in questionnaire development and survey methods. Students develop a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511/HSERV 513; BIOST 517/BIOST 518; or EPI 512/EPI 513, which may be taken concurrently, or permission of instructor. Students should have a survey project in mind. Offered: jointly with CS&SS 527/G H 533.

HSERV 528 Critically Appraising and Applying Evidence in Healthcare (3) F. WOLF Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with BIME 540; W.

HSERV 529 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) E. DEVINE, F. WOLF Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or per-

mission of instructor. Offered: jointly with BIME 541/EPI 541/PHARM 529; Sp.

HSERV 531 CPHP Population Health (3) Considers the elements that determine a population's health including the social determinants of health. Groups are challenged to question their innate views of health and what produces it by comparing the United States with other rich and poor countries, considering structural factors affecting health. Offered: A.

HSERV 532 CPHP Community Development (3) Provides an introduction to understanding and working with communities on health related issues. Students work directly with community members, community advocates, and community-based service organizations to address health issues. Students learn how to employ methods of community engagement to build on local assets to address health issues. Offered: A.

HSERV 533 CPHP Quantitative Methods (6) Acquaints students with methods of epidemiology and biostatistics used in conceptualizing, collecting, analyzing, and interpreting quantitative data on health outcomes and risk factors with quantitative methods for evaluating programs or treatments that address health concerns in populations. Expands skills in communicating quantitative aspects of public health, using writing, tables, and graphs. Offered: W.

HSERV 534 CPHP Environmental Health (2) Provides an overview of the fundamental scientific principles and practices utilized in environmental public health. Examines, via case study methodologies, the occurrence of diseases resulting from environmental and occupational exposures and how they can be modified, reduced, or eliminated by incorporating various control practices. Offered: Sp.

HSERV 535 CPHP Health Behavior and Health Promotion (4) Provides an overview of the theory and practice of planning, designing implementing, and evaluating public health promotion problems. Helps public health professionals apply sound judgment when making decisions about identification, audience segmentation, and intervention selection. Offered: Sp.

HSERV 536 Emerging Infections of International Public Health Importance (3-) *Hortwicht* Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with EPI 529; W.

HSERV 537 CPHP Health Policy (6) Covers concepts and analytic tools for health policy analysis, development, and advocacy, while exploring factors affecting public health policy, including science and community values. Student write a policy statement for an advocacy organization, teach a lay audience about an issue, and arrive at policy conclusions based on quantitative data.

HSERV 538 CPHP Program Evaluation (2) Covers the basic concepts and approaches for program evaluation in public health. Uses one case during the quarter, which includes a final assignment requiring students to work as a team to design, not conduct, an evaluation. Offered: W.

HSERV 539 CPHP Organizing Communities for Health (4) Synthesizes the accumulated skills and knowledge a public health professional uses to work with communities to advance public health. Integrates a broad array of skills to bring together the perspectives of the many players and interest groups that interact in dynamic community settings. Offered: W.

HSERV 540 CPHP Management and Leadership (6) Explores the principles of leadership and management within the context of public health organizations. Explores the distinction between management and leadership and examines the management functions of planning, organizing,

directing, and controlling the use of human and financial resources to accomplish the goals of the organization.

HSERV 541 Topics in Maternal and Child Health I (3-) Provides an overview of the historical and legislative basis for the major MCH health and social service policies and programs. Uses the life-course perspective to examine the social determinants of health and development of women, children, and adolescents. Pays special attention to racial inequities on the health of families.

HSERV 542 Epidemiology of Maternal and Child Health Problems ([3-4]-) *Enquobahrie* Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with EPI 521; W.

HSERV 544 Maternal and Child Health in Developing Countries (3) *D. DENNO* Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with G H 544; W.

HSERV 548 Social Determinants of Health: Research Methods (3) *Beresford, Smith* Explores study design, measurement and analytic issues applicable to research into the social determinants of health and health disparities. Semi-weekly graduate-level seminar offered to students with a basic knowledge of epidemiological and biostatistical principles. Prerequisite: either EPI 511 or EPI 512/ EPI 513; BOST 511/BOST 512 or BOST 517/BOST 518. Credit/no-credit only. Offered: jointly with EPI 548; W.

HSERV 551 Public Health Law (2) Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public health officers and healthcare industry administrators. Offered: jointly with LAW H 512.

HSERV 552 Health Policy Development (3-) Uses primarily case- and problem-based learning and small-group projects to focus on factors that influence public policy development concerning health services in the U.S., with some global health content. Examines the roles of science and stakeholder interests in the structure of and changes to a nation's health system. Offered: A.

HSERV 556 Tobacco Related Health Disparities (1/2) Integrates multiple disciplinary perspectives to address the pressing issue of disproportionate tobacco use and related diseases among marginalized populations, including those defined by socioeconomic status, race/ethnicity, and sexual orientation. Explores links between, and intervention strategies for, smoking and mental illness, social stress, acculturation processes, and genetics. Offered: jointly with FAMED 559.

HSERV 558 Tobacco and Public Health: Prevention, Treatment, Policy, and Social Change (1-3, max. 3) Integrates multiple disciplinary perspectives to provide a comprehensive overview of the history, health effects, policy, prevention, and treatment of tobacco use. Utilizes readings, stimulates discussions, and hosts renowned experts to provide students with the foundation to understand and address the local, national, and global epidemic of tobacco use.

HSERV 559 Public Policy and the Public's Health ([0-3]-, max. 3) *Watts* Explores the factors that affect health policy and the interaction of policy, markets, and the legal system through public health examples. Examines how science and community values intertwine in policy development, and how context influences the structure of and changes to a nation's health system.

HSERV 560 Adult Learning: Theory and Practice (3) Designed to help students apply Popular Education theory and practice to preparation, presentation, and evaluation of health education. Students design, teach, and evaluate four separate teaching sessions (one between each seminar) using theory and principles of Popular Education learned to date. Prerequisite: graduate standing or permission of instructor.

HSERV 561 Introduction to Health Promotion Planning and Evaluation ([0-3]-, max. 3) Links practice to theory between the planning, implementation, and evaluation of health promotion intervention and behavior change theory. Uses PRECEDE/PROCEED planning model by Green and Kreuter as framework.

HSERV 568 Health Economics (3) Applies microeconomics principles and models to understand the nature of health care markets and systems. Includes a wide range of health sector activities and policy issues by applying rigorous economic analytical tools coupled with review of key econometric and empirical analysis. Prerequisite: introductory coursework in microeconomic principles and basic statistics. Offered: W.

HSERV 571 Cultural Competency for Public Health Practice ([1-4]-, max. 4) Application of cultural competency to clinical practice, healthcare management, and health services research when working with culturally diverse populations. Methodological orientation is qualitative, historical, and ethnographic. Lecture, narratives, discussions, guest presentations, film, video. Interdisciplinary perspective appropriate for graduate students in public health, health administration, nursing, social work, and anthropology.

HSERV 575 Cancer Prevention and Control (3) Provides an overview of research in cancer prevention and control for students training for a career in this field. Students identify major areas of prevention and control research, conduct an analysis of data in cancer prevention and control, and learn to prepare a research project grant. Prerequisite: permission of instructor.

HSERV 576 Health, Culture, and Community (3) *Chrisman* A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with NURS 557; W.

HSERV 577 Health Behavior and Preventative Medicine ([2/4]-, max. 4) Focuses on psychosocial and cultural factors related to health, preventive health behavior, illness perception, and behavior; theoretical basis for prevention; the interaction of consumers and providers in the delivery of healthcare services; and clinic and community based applications.

HSERV 578 Preparing, Writing, and Critiquing Scientific Research Proposals (3) *A. FITZPATRICK, L. KESSLER* Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Credit/no-credit only. Offered: jointly with EPI 588; Sp.

HSERV 581 Strategies of Health Promotion (4) Assessment of health promotion planning, implementation, and evaluation strategies for their strengths, weaknesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influencing their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities. Prerequisite: HSERV 511.

HSERV 583 Economic Evaluation in Health and Medicine (3) *Garrison, Veenstra* Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with PHARM 534.

HSERV 584 Assessing Outcomes in Health and Medicine (3) *Devine, Edwards* Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Offered: jointly with PHARM 535; W.

HSERV 585 Seminar in Medical Geography (5, max. 10) *Mayer* Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with GEOG 581.

HSERV 586 Medical Geography (3) *Mayer* Geography of disease, consideration in health systems planning. Analysis of distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research; health-related issues. Offered: jointly with GEOG 580.

HSERV 587 Health Policy Economics (3) Applies economic theory to selected topics in healthcare, including information, risk and insurance, industry organization, government regulation, and public health issues. Emphasizes policy implications of these applications. Offered: jointly with ECON 547.

HSERV 589 Community Based Participatory Research and Health (3) Begins with a research topic of importance to the community with the aim of combining knowledge and action for social change. Provides an understanding of principles and strategies, and appreciate of its advantages and limitations, and skills for participating effectively.

HSERV 590 Selected Topics in Health Services (*, max. 30) Explores current or evolving public health problems. Prerequisite: permission of instructor.

HSERV 591 Community Oriented Public Health Practice (1-6, max. 42) Seven-quarter integrated sequence covers public health aspects of community assessment, biostatistics, epidemiology, health promotion/disease prevention, behavior change, environmental health, community development, policy development and analysis, and program planning and management. It is taught in a problem-based format. Prerequisite: enrollment in the CPHP program.

HSERV 592 Program Seminars (1-6, max. 20) Graduate seminars organized to address specific educational needs of students in various fellowships, residencies, and other specialized programs within the Department of Health Sciences (i.e., maternal and child health, international health, preventive medicine, social and behavioral sciences). Prerequisite: permission of instructor.

HSERV 595 Practicum/Field Work in Community Medicine ([1-12]-, max. 12) Experience in variable time blocks in community health activities in agencies delivering and planning health services. Sites include neighborhood clinics, health planning bodies, medical practice settings, public health agencies, special problem clinics and facilities, environmental programs and services. Prerequisite: master's student in health services and permission of instructor.

HSERV 598 Extended Degree Program Project Option (*, max. 9) Supervised project work on a selected topic related to student's concentration in graduate study. Includes survey of literature, development of approach, and written pa-

per on conclusions. Prerequisite: registration in extended MPH degree program and satisfactory completion of the first summer's coursework.

HSERV 599 Capstone Project (*-) Applies and extends the public health skills learned to other settings, develops new skills, expands a professional network, and provides specialized knowledge that can be used to advance the student's future career and effectiveness in public health.

HSERV 600 Independent Study or Research (*-) Prerequisite: permission of instructor.

HSERV 700 Master's Thesis (*-) Prerequisite: permission of instructor.

HSERV 800 Doctoral Dissertation (*-)

Health Informatics and Health Information Management

HIHIM 407 Foundations for Healthcare Vocabularies (3) Focuses on health concepts, documentation, healthcare taxonomies, and clinical vocabularies, terminologies, classifications, and nomenclatures required for health data analysis, clinical coding, and clinical systems associated with the electronic health record.

HIHIM 408 Management Concepts with HIM Applications (3) Covers core management functions of planning, organizing, staffing, leading, and contracting in healthcare environment and decision-making, operations, supervision, and communication foundations for health information administration.

HIHIM 409 Disease Concepts for Managers (4) Develops a methodology for understanding and communicating dimensions of disease states as all health state that a person might experience. Presents clear, effective ways to describe the diversity of health conditions and focuses on disease from a health information systems perspective.

HIHIM 410 Introduction to Healthcare Systems and Health Data Systems (5) Covers current issues in healthcare; relationship of the healthcare system to health data systems: accreditation, licensure and professional standards; health records analysis, statistics, data linkage, application of professional standards to health records and record management systems; retrieval, tracking, and retention systems.

HIHIM 412 Healthcare Coding (5) Covers healthcare coding principles for International Classification of Diseases (ICD) and Current Procedural Terminology (CPT) code sets used in diagnosis and procedure code assignments for research and reimbursement by healthcare providers in all settings. Prerequisite: HIHIM 409.

HIHIM 413 Revenue Cycle Management (3) Covers the revenue cycle management of health information administration.

HIHIM 420 Healthcare Computer Systems and Electronic Health Records (5) Current health information systems and the role of health informatics; technology infrastructure and health informatics standards, electronic health records, definitions, functions, issues, and barriers; hospitals, ambulatory care, home health and long-term care and computer applications. Prerequisite: HIHIM 410; HIHIM 411.

HIHIM 421 Health Information Systems Analysis (5) Examines lifestyle systems development process and tools, project management and team coordination, analysis of health information systems, and user requirements. Prerequisite: HIHIM 420.

HIHIM 450 Organizational Theory in Health Facilities and Healthcare Delivery (3) Addresses the organization of healthcare services across the spectrum of healthcare delivery systems - both governmental (federal, state, local) and private. Financing of healthcare services and related policy issues are explored.

HIHIM 454 Finance Concepts for Healthcare Managers (4) Covers financial concepts applied to today's healthcare environment, financial management tools, and budgeting.

HIHIM 455 Professionalism and Leadership (4) Professional development, leadership assessment and ethics, interpersonal skills and effective communication, and human resource management requirements.

HIHIM 456 Quality Assurance and Research in Healthcare (5) Quality improvement, risk management, and utilization management in healthcare; design and analysis of quality improvement systems, including use of data systems in quality assurance and research; health data retrieval, analysis and presentation, and review of relevant healthcare informatics research. Prerequisite: statistics; medical terminology.

HIHIM 460 Management Project I (3) Explores the development of management skills and competencies, and a seminar through site experience in healthcare facilities with campus and clinical faculty. Prerequisite: HIHIM 410

HIHIM 462 Management Project II (5) Explores applied management using a formal capstone project in a healthcare setting. Prerequisite: HIHIM 460.

HIHIM 470 Legal Concepts for Health Fields (3) Examines principles of law as applied to the health field, with reference to health information management.

HIHIM 480 Management, Problem-Solving, and Decision-Making (5) Provides the tools and experiences useful at a management level for problem-solving and decision-making in health information administration.

HIHIM 490 Special Topics (1-5, max. 15)

HIHIM 499 Independent Study (1-5, max. 5)

HIHIM 508 Health Information Management Systems and Practice (1-2, max. 3) Provides a high level framework of health informatics and health information management practice. Covers practice related systems with emphasis on enterprise information governance, patient record organization, content and structure, and associated enterprise business functions and processes to provide foundation for understanding the practice.

HIHIM 510 Enterprise Systems and Electronic Health Records (3) Covers industry drivers, development, compliance framework, and certification of electronic health record systems status and operations addressed through strategic decision making and leadership: data movement among enterprise clinical, business, administrative systems to legal health record; and barrier and benefit assessment within major institutional culture and technology initiative changes. Offered: A.

HIHIM 520 Law, Policy, and Ethics in Health Informatics and Health Care (3) Explores the laws, policies, and issues involved in oversight and management of health data and health information systems. Defines the legal health record and the requirements, role, and uses. Covers the legal and ethical framework, issues and concepts, and the role of e-discovery on the emerging health data environment. Offered: W.

HIHIM 525 Database Concepts and Applications in Health Informatics (3) Provides an overview of data models, architecture platforms, and relational database theory and technology. Covers design and uses of databases in patient record systems, registries and indexes, and health databases, security, privacy and ethical issues, database design, data integrity, field properties, tables, reports, queries, and data retrieval. Offered: Sp.

HIHIM 530 Privacy and Security in Electronic Environments (3) Covers the laws, regulations, policies, and practice related to the confidentiality, privacy, and security of health information in an electronic environment. Federal and state laws and regulations require specific performance in the acquisition, use, storage, and maintenance of health information. Examines systems and practices. Offered: Sp.

HIHIM 535 Clinical Vocabularies, Terminologies, Classifications, and Mapping (3) Covers clinical terminologies, classifications, and mapping, which provides information on taxonomies and metadata, information objects, and classification theory in organizing information in an electronic system. Includes current initiatives in terminologies and data mapping in electronic health record systems. Offered: S.

HIHIM 540 Community Health Information and Information Exchange (2) Covers community and consumer health informatics associated with health services provides; electronic health records that address internal and external standards; accreditation and regulatory requirements needed to provide quality care; and health information exchange from policy to implementation. Offered: A.

HIHIM 550 Healthcare Data Management - Health Record to Enterprise (2) Covers the conceptualization, design, and management of data initiatives and knowledge needed by the healthcare enterprise. Reviews data integrity principles and guidelines to determine methodology for evaluation development and management of internal and external information requirements. Offered: W.

HIHIM 555 EHR/HI Systems Operations and Improvement (2) Addresses leadership and management of an organization's health information assets that are required as the nation transitions to interoperable health information systems. Offered: W.

HIHIM 556 Environment of Care (2) Explores the current healthcare environment related to healthcare safety issues. Examines an overview of major health and safety challenges and responses; focusing on the impact of the issues in improving health and safety in healthcare and information resources needed. Offered: Sp.

HIHIM 560 Special Topics in Health Informatics (1-3, max. 6) Presents problem solving opportunities on health industry information issues, strategies and unmet challenges. Topics reflect the current state, progress, and future expectations faced by healthcare and health information managers.

HIHIM 598 Enterprise Leadership, Change, and Project Leadership (3) Focuses on applying leadership readiness at the enterprise level; informatics and information governance challenges; research and project management resources; communication management strategies; and the impact of technology from management oversight to health services delivery. Offers an opportunity to practice a key role of leadership: transforming organizational culture by effective implementation of change. Offered: W.

HIHIM 599 Capstone Project (3) Provides a practice-based problem solving experience that draws on health informatics and information management; health industry knowledge; leadership and management strategies; and applies project management skills to design, plan, and implement a management project in healthcare and healthcare related organizations. Offered: S.

Health Services Management

HSMGMT 500 Risk and Insurance Seminar (3) Presents the principles and practices of health insurance and risk. Emphasizes healthcare financing arrangements in the United States, including both private and government-sponsored (public) programs. Discusses comparisons with other developed countries.

HSMGMT 501 Epidemiology/Critical Evidence Appraisal (2-4, max. 4) Basic knowledge about methods used in epidemiology and their application to critical appraisal of clinical, epidemiological, and health administration literature for evidence-based management of healthcare organizations, improvement of delivery of health services, and for creating health policies.

HSMGMT 503 Population Health Management (2) Provides health administration students with an introduction to managing the health of defined populations. Examples

include: the population within the catchment area of a hospital, the members of a health maintenance organization, the persons served by an accountable care organization, and the population employed in an workplace.

HSMGMT 505 Managing Healthcare Organizations (2-4) Introduces healthcare organizations and organizational management concepts. Develops a broad perspective by integrating conceptual, strategic, and systemic frameworks using four knowledge themes; the management role, organizational theory, management economics, and theory and practice of systemic organizational change within overall strategic management and systemic contexts.

HSMGMT 506 Introduction to Clinical Care (2) Introduces the world of clinical care. Discovers through readings, discussion, and direct experience, the people and processes of clinical care and how they relate to healthcare administration.

HSMGMT 507 Group Dynamics and Team Leadership ([1-4]-, max. 4) Focuses on theories and observations of team behaviors and techniques with emphasis on the individual as a team member; introduces team management/leadership models, theories, and skills. Students develop self-awareness, knowledge, and skills associated with building interpersonal relationships. Credit/no-credit only.

HSMGMT 510 Organizational Behavior (3-4) Application of organizational behavior theory to explore the factors that affect behavior, performance, and job satisfaction of people working in organizations. Provides a body of knowledge and skills needed to successfully manage and lead healthcare organizations. Focuses on "best practices" for managing individuals, teams, and organizations.

HSMGMT 513 Seminar in Healthcare Finance (3-4) Focuses on case studies and modern theory in managerial finance relevant to health services. Students prepare group presentations and individual case study analyses of health services finance problems. Builds on accounting and finance principles.

HSMGMT 514 Health Economics (3/4) Uses economic concepts and tools to examine range of issues pertaining to healthcare, delivery of healthcare services. Includes demand analysis, production of health services, expenditure growth, markets for hospital and physician services, externalities. Emphasis on using economics to examine issues and solve problems. Prior economics courses not required.

HSMGMT 515 Advanced Economics - Decision Analysis ([1-3]-, max. 3) Develops skills to become informed consumers of economic evaluations of health programs. Develops skills necessary to conduct economic analyses of public health and health service programs.

HSMGMT 518 Ethical Issues in Health Services (2-3) Presents an introduction to ethical issues that arise in management of health services organizations. Covers clinical and organizational ethics.

HSMGMT 523 Informatics in Healthcare Management (3) Medical informatics concerns the representation, organization, and manipulation of biomedical information and knowledge. Exposes students to a high-level understanding of informatics and its healthcare applications. Discussion of successes and failures in implementing information technology focuses on gaining leadership and management knowledge that embraces informatics.

HSMGMT 531 Systems Modeling Frameworks for Healthcare (3) Focuses on methodologies to support strategic decision making in a systems context, considering the material, patients, providers, information, and resource dependencies of most healthcare organizations. Includes optimization models and basic alternative evaluation methods for the applications of capacity planning, policy investigation, and design and planning decisions. Offered: W.

HSMGMT 532 Quantitative Methods for Health Systems Design and Analysis (3) Focuses on the method and application of operations research in health systems design and analysis. Covers a variety of topics in healthcare manage-

ment and decision making. Healthcare decision making touches areas in resource allocation, scheduling, staffing, capacity planning, cost-effectiveness analysis, and assessment of medical technologies. Offered: W.

HSMGMT 545 Capstone Integrative Seminar ([1-4]-, max. 4) Designed to assist students in the transition from theory to practice. Emphasis on sharpening analytical and intuitive leadership practices through the use of interactive case studies, team building exercises, and field projects. Prerequisite: second-year MHA students.

HSMGMT 550 Medical Practice Quality Measurement and Management (3) Provides an overview of healthcare industry themes regarding cost, access, and quality. Concentrates on definition, measurement, and improvement of quality. Shows how quality measurements and specifications; the concept of value, guidelines, and pathway; and the evidence-based medicine movement interconnect. Utilizes examples of cutting edge programs to apply and promote improvement.

HSMGMT 552 Health Administration and Business Law (4) Studies numerous interrelated legal topics pertinent to healthcare organizations, typically including contracts, medical malpractice, legal and ethical obligations to provide healthcare, privileging, medical decision-making, tax-exemption, antitrust, fraud, and health information management. Encourages discussion of how the law supports or hinders current efforts to improve healthcare delivery systems.

HSMGMT 553 Healthcare Marketing Strategy (2) Provides an understanding of wholesale and retail markets in the healthcare sector. Examines market research and the application of marketing strategies and tactics to support an organization's core strategies. Applies the concepts of market segmentation, targeting, and positioning to decisions about design, distribution, pricing, and promotion of health services.

HSMGMT 554 Entrepreneurship (2) Focuses on developing students' resourcefulness, know how, and decision support skills needed to critically identify, evaluate, and develop new healthcare ventures. Topics include anatomy of startup ventures; new venture creation and innovation, business plan development and assessment, financing, marketing, and growth strategies; and corporate venturing.

HSMGMT 560 Management Practice in Healthcare and Public Health Organizations (1-4, max. 4) Introduction to leadership and management, focusing on effective strategies for creating a productive work environment. Organizational structure and strategy introduced. Case studies and other problem-solving methods, using health services applications, are utilized in order to apply theoretical material. Prerequisite: graduate student.

HSMGMT 562 Strategic Management of Healthcare Organizations (3-5) Management of goals, strategy, and structure in healthcare organizations. Design of external relationships and internal structures, strategy-formulation, decision-making, and change. Integration of professional, social, and organizational values. Theory, student and practitioner experience, and case studies used to enhance repertoire of management approaches and skills. Prerequisite: HSERV 511 and HSMGMT 560 or equivalent.

HSMGMT 563 Personnel Management for Health Professionals ([1-3]-, max. 3) Designed for midcareer health services professionals developing strategies and skills in human resource management. Focuses on policy and practice issues important to handling day-to-day personnel problems-selection, promotion, performance appraisal, discipline, grievances. Prerequisite: registration in Extended MPH degree program or permission of instructor; non-business majors.

HSMGMT 566 Decision Support Models for Health Services (3) Management science and approaches developed as applied to problems in public health. Emphasizes conceptual understanding of processes/application of systematic

and rational approach to managerial problem solving, including cost-benefit, cost effectiveness analysis. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH degree program; non-business majors.

HSMGMT 567 Clinical Systems Management (3) Introduces the management of clinical systems and their underlying cultures. Focuses on quality improvement, change management, governance, and clinical leadership development of physician-administrator partnerships in complex medical care settings.

HSMGMT 568 Quality Process Management (3-4) Provides a thorough understanding of the main concepts of operations management with a focus on total quality management techniques, along with key integrative frameworks that provide the foundation for successful applications of these approaches, as applied to healthcare organizations.

HSMGMT 570 Quantitative Methods (3-4) Concentrates on fundamental concepts of statistics and their application to healthcare management. Approaches statistics from two different perspectives that benefit leaders in healthcare: that of biostatistics and evidence based medicine, and that of management statistics for process improvement.

HSMGMT 571 Healthcare Financial Management (3) Focuses on the tools and analytic frameworks that healthcare managers use to make prospective forward-looking decisions. Problems worked in-class and assigned as homework to ensure that participants develop competencies and confidence in applying the analytic tools and frameworks. Prerequisite: HSERV 511 and ACCTG 500 or ACCTG 501 or permission of instructor. Offered: W.

HSMGMT 572 Financial Management for Health Professionals (3) Intensive review of basic accounting principles/terminology and an introduction to financial management/managerial accounting, including budgeting for managerial control, planning, cost accounting, financing health programs. Managerial accounting, program costing, rate setting, budget preparation. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH degree program or permission of instructor; non-business majors.

HSMGMT 574 Financial Management I (3-4) Prepares clinical professionals for participating intelligently in, and contributing to, financial decisions of healthcare organizations. Learn the language and fundamental concepts of accounting and finance, and become comfortable with what is required in formal financial analysis.

HSMGMT 576 Capital Planning (2) Emphasizes preparing clinical executives for managerial and leadership in healthcare organizations. Key concepts include capital cycle, creditworthiness, financial planning, cost of capital, capital structure, and capital allocation.

HSMGMT 577 Environment of Care (2) Addresses the basic issues of the "environment of care." Explores the physical environments in which care is provided to patients, JCAHO standards provide the core structure. Uses real world experiences and examples.

HSMGMT 578 Project Management (2) Introduces need for, concepts of, and tools and techniques used in contemporary project management. Builds upon prior courses and experience in leadership, management, planning, and team development. Focuses on difference between management of ongoing operations and of projects, and the need for a disciplined approach when planning and executing projects.

HSMGMT 579 Accounting for Health Service Managers (3) Emphasis on preparing graduate students for management and leadership roles in their healthcare organizations. Covers financial accounting including the accounting equation, journal entries, and processes of accounting.

HSMGMT 590 Select Topics (1-6, max. 12) By arrangement, students and faculty members develop a program of reading and conference appropriate to the selected topic. Topic chosen is within the special competence of the par-

ticipating faculty member, in the area of health services management.

HSMGMT 592 Health Management Program Seminar (1-6, max. 6)

Reserve Officer Training Corps Programs

Aerospace Studies

104 Clark Hall

The Air Force Reserve Officer Training Corps program (AFROTC) at the UW produces leaders ready to lead in any environment. AFROTC molds students by exposing them to a rigorous training program that grooms each student from a role of followership into a future leader.

UNDERGRADUATE PROGRAM

Detachment 910

114 Clark Hall

Box 353830

(206) 543-2360

afrotc@uw.edu

General Program Requirements

All aerospace studies courses are available to cadets exclusively. Additionally any students may join the AFROTC program as cadets and enroll in the 100- and 200-level general military courses so long as they meet the minimum entrance requirements. Aerospace Studies 100- and 200-level courses count as credit toward graduation. The general military courses are prerequisites to entry into the professional officer courses (300- and 400-level courses) and seeking a commission in the Air Force is on a controlled, selective basis. Contact the Recruiting Flight Commander in the Department of Aerospace studies (AFROTC) for more information.

Commissioning Requirements

Students must successfully complete the AFROTC program and receive an academic degree from the University. Upon program and degree completion, cadets are offered commissions as second lieutenants in the Air Force.

General Military Courses

The 100- and 200-level courses for AFROTC cadets consist of one classroom hour, two hours of leadership laboratory, and two hours of physical fitness per week during the freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn, winter, or spring quarter. Sophomore students may enter at the start of autumn or winter quarter and take the freshman- and sophomore-level courses concurrently. A four-week field-training course, normally taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students receive pay and travel costs for field training.

Except for sophomore cadets on AFROTC scholarship, students incur no active-duty service commitment by taking general military courses and may drop the courses at any time within the limits of University course-drop policies.

Professional Officer Courses

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive a tax-free monthly subsistence stipend. They are furnished texts and uniforms. Junior- and senior-level classes consist

of three hours of academic classes, two hours of leadership-laboratory and two hours of physical fitness per week.

Financial Assistance

The Air Force offers many types of scholarships to college students. AFROTC scholarships pay tuition, certain fees, and textbook reimbursement. In addition, scholarship winners receive a monthly subsistence allowance. Cadets are eligible for one of these scholarships and should contact the Recruiting Flight Commander in the Department of Aerospace Studies (AFROTC), (206) 543-2360 or at afrotc@uw.edu.

Minor

Minor Requirements:

29 credits, to include the following:

1. 24 credits of aerospace studies coursework
2. 5 credits in a foreign language beyond the first-year level
3. Minimum 18 upper-division credits in aerospace studies coursework
4. Minimum 24 credits in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crsct/

A S 101 Foundations of the United States Air Force I (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

A S 102 Foundations in the United States Air Force II (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

A S 103 Foundations in the United States Air Force III (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: Sp.

A S 211 The Evolution of Air and Space Power I (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: A.

A S 212 The Evolution of Air and Space Power II (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets,

but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: W.

A S 213 The Evolution of Air and Space Power III (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: Sp.

A S 250 Aerospace Studies Leadership Laboratory (0-1, max. 10) Evaluates the challenges of team leadership in complex contemporary environments. Students apply critical thinking skills using scenarios that emulate real-life Air Force issues and environments. Evaluates Air Force leadership attributes, skills, and activities. Focuses on advanced leadership development. Corequisite: any A S course. Credit/no-credit only. Offered: AWSp.

A S 331 Aerospace Studies 300 (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: A.

A S 332 Aerospace Studies 300 (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: W.

A S 333 Aerospace Studies 300 (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: Sp.

A S 431 Aerospace Studies 400 (3) I&S Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: A.

A S 432 Aerospace Studies 400 (3) I&S Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: W.

A S 433 Aerospace Studies 400 (3) I&S Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: Sp.

Military Science

104 Clark Hall

The ROTC program provides students an opportunity to learn and practice the art of leading people. Recognizing there is a great difference between cognition and volition, the program is structured to give the student practical experience in leading and managing resources.

The Army ROTC (AROTC) program enables the student to learn about the military profession and the role it plays in our democratic system of government. Courses enable such knowledge to be acquired on campus without serving in the military forces.

Army ROTC electives enrich the student's course of study. Such courses also open up an additional career option, enabling the student to earn a commission and to serve in the Army as an officer, or in the Reserves or National Guard while pursuing a civilian career. Officers serve in a wide variety of career paths, including infantry, human resources, aviation, intelligence, automation, and hospital administration.

Army ROTC provides the student membership in a close-knit fraternal organization.

ROTC programs on college campuses ensure that the influences of higher education are transferred into the military services - a mandatory requirement in a democracy.

A minor in military science and leadership is available to any student at the UW. Requirements are shown below.

For information on the programs described below, contact the following:

Enrollment and Scholarship Officer
105 Clark, Box 353820
(206) 543-9010

Traditional Four-Year Program

Open to freshman and sophomore men and women. Academic studies include courses in military history, principles of leadership, techniques of instruction, management and staff procedures, logistics, physical conditioning, and military law. Extracurricular activities include such options as Ranger Company, color guard, training exercises, field trips, and related activities. A non-scholarship student incurs no obligation of any kind during the first two years of the four-year AROTC program.

Placement credit toward completion of AROTC courses may be given for prior ROTC or military training. Veterans routinely receive full credit for the first two years of AROTC and may enter the advanced course when they are academic juniors. All military textbooks and uniform items are furnished without charge. Students in the advanced course receive tax-free monthly subsistence of \$350 per month as an academic junior and \$400 per month as an academic senior. In the advanced course, cadets are required to participate in the leadership-development program, which is a practicum of skills and principles taught during the previous two years. Between their junior and senior years, cadets attend a five-week summer camp during which they receive varied and challenging training and for which they are paid both for the time at camp and for travel expenses to and from the camp location. Upon entering the advanced course, students agree to complete the program, accept a commission upon graduation, and serve a minimum of four years if scholarship (three years if non-scholarship) and be on active-duty commitment. If the cadet chooses to go into the Reserves or National Guard, then he or she serves a minimum of eight years.

Four-Year Scholarship Program

Application to this program should be made while the student is still in high school. Selection of students is made on a nationwide competitive basis. This program may lead to a commission in the Active Army, the Army Reserve, or the Army National Guard. All tuition, a flat rate for books and laboratory expenses, and uniform items, plus monthly tax-free stipends, are provided by the Army. The program requires four years of academic study on campus, as well as a five-week advanced camp training period between the junior and senior years, for which the cadet is paid for both time and travel expense to and from the camp location. Academic studies are identical to those of the traditional four-year program. The student must sign a contract wherein the student agrees to complete this program, along with a chosen academic program, to accept a commission, and to serve on active duty or in the reserve forces after commissioning.

Three-Year Scholarship Program

Open to qualified students already on campus. The scholarship provides financial assistance during the remaining years of the student's enrollment. Each scholarship pays for tuition and a flat rate for books and laboratory expenses and provides tax-free monthly stipends of \$350 for academic juniors and \$400 for academic seniors. All other advantages and obligations are the same as those of the four-year scholarship program.

Two-Year or Lateral Entry Program

Open to qualified undergraduate and graduate students who have at least two years remaining in school and who have completed at least 81 credits. Students may qualify for entrance into the advanced course under this program in two ways.

They may participate as qualified veterans who receive placement credit for the first two years of AROTC. Veterans are also eligible to compete for two- and three-year scholarships while receiving their educational benefits. Members of the Reserves and National Guard may also be eligible to participate in AROTC and receive their commission upon graduation.

Requires attendance at the Leader's Trainers course for five weeks at Fort Knox, Kentucky. Completion of this training also qualifies students for direct entry into the advanced course. While at camp, students receive pay plus travel expenses to and from the camp location, and they may compete for two-year scholarships, provided scholarships are available.

UNDERGRADUATE PROGRAM

Enrollment and Scholarship Officer
105 Clark, Box 353820
(206) 543-9010

The Army ROTC program offers a minor in military science and leadership.

Minor

Minor Requirements

27 credits, to include the following:

1. M SCI 401, M SCI 402, M SCI 403 (9 credits)
2. Additional military science coursework (18 credits)
3. Minimum 18 credits of military science completed at the upper-division level
4. Minimum 18 credits of military science completed in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

M SCI 101 Military Science and Leadership Development (3) Introduction to challenges and competences critical for effective leadership. Examines how critical thinking, goal setting, time management, and stress relate to leadership. Develops knowledge and comprehension of leadership dimensions. Lessons include history and mission of the Army and leadership, personal development, values and ethics, and tactics and techniques discussions. Offered: A.

M SCI 102 Military Science and Introduction to Tactical Leadership (3) Overviews leadership fundamentals of problem solving, listening skills, briefings, providing feedback, and effective writing. Explores dimensions of leadership values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises. Introduction of effective oral communication. Develops skills in map reading, land navigation, and tactical maneuvering at team levels. Offered: W.

M SCI 103 Military Science and Introduction to Applied Basic Leadership (3) Final introductory series on leadership. Applies leadership fundamentals emphasizing attributes, skills, and actions. Students assess capabilities simultaneously, considering their personal leadership. Lessons apply leadership to military tasks of map reading, navigation, and tactics. Offered: Sp.

M SCI 110 Military Science Leadership Laboratory (0.5, max. 3) Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on leadership development. Credits do not count toward graduation. Credit/no-credit only. Offered: AWSp.

M SCI 201 Military Science and Innovative Team Leadership (3) Explores dimensions of innovative tactical leadership strategies and styles. Practices personal motivation and team building through planning, preparing, and executing group exercises. Develops knowledge of leadership values and attributes through an understanding of Army leadership examples. Lessons include leadership, personal development, values and ethics, officership, and tactics and techniques. Offered: A.

M SCI 202 Military Science and Foundations of Tactical Leadership (3) Explores creative and innovative tactical leadership strategies and styles by examining team dynamics and leadership theories. Examines challenges of leading teams in complex contemporary environments. Practical exercises focus on dimensions of terrain analysis, patrolling, operation orders, and cultural awareness. Lessons include fundamentals of leadership, personal development, and tactics and techniques. Offered: W.

M SCI 203 Military Science and Transformational Leadership (3) Continues study of the theoretical basis of Army leadership and framework and dynamics of transformational leadership in the context of military operations. Develops greater self-awareness by assessing leadership styles and practices oral and written communication skills. Enables progress to applied and advanced tactical leadership study. Offered: Sp.

M SCI 301 Military Science and Tactical Leadership (3) Studies, practices, and evaluates adaptive leadership skills. Develops self-awareness and critical thinking skills using challenging scenarios related to small unit operations. Analyzes and evaluates leadership values, attributes, skills, and actions. Lessons focuses on leadership, land navigation, oral and written presentations, tactics, and physical fitness. Prerequisite: M SCI 101; M SCI 102;

M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: A.

M SCI 302 Military Science and Applied Leadership (3) Continues adaptive approach to leadership applying situations necessary to build skills required in complex scenarios. Develops proficiency in evaluating, decision-making, persuading, and motivating peers through practical exercises. Students evaluate individual leadership values, attributes, skills, and actions, and receive specific feedback on their leadership abilities based on written and oral presentations. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: W.

M SCI 303 Military Science and Advanced Tactical Leadership (3) Finalizes M SCI 301 and M SCI 302 leadership skills that are necessary to successfully lead others while solving complex problems. Explores, evaluates, and develops decision-making skills required in contemporary environments. Reviews critical aspects of combat, specifically stability and support operations. Provides specific leadership feedback and prepares for advanced leadership and management. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: AWSp.

M SCI 305 Practicum-Techniques of Military Instructions (1-3, max. 3) Analysis, review of techniques used in military training and instructions. Students plan, rehearse, deliver, provide written critique on block of military instruction from the Military Qualification Skills Manual. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher.

M SCI 310 Military Science Advanced Leadership Laboratory (1, max. 6) Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on advanced leadership development. Prerequisite: M SCI 110. Offered: AWSp.

M SCI 401 Military Science and Developmental Leadership (3) I&S Develops proficiency in planning, executing, and assessing complex problems, functioning as a staff member, and providing leadership-performance feedback. Explores situational opportunities assessing values, risk, and ethical decisions. Performance measured by abilities to give and receive systematic, specified feedback on 16 leadership attributes, skills, and actions focusing on advanced leadership development. Prerequisite: M SCI 301; M SCI 302. Offered: A.

M SCI 402 Military Science IV: Advanced (3) I&S Explores dynamics of leading in complex situations of contemporary environments. Examines differences in customs and courtesies, military law, principles of war, and rules of engagement. Lessons review aspects of interacting with nongovernmental organizations, civilians, and host nation support with case studies examining complex ethical and practical demands of leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received grade of 2.0 or higher. Offered: W.

M SCI 403 Military Science and Advanced Leadership (3) I&S Completes fundamental learning of advanced leadership attributes, skills, and actions that effectively prepare students for careers in military or civilian leadership. Examines Army modularity, unit organization, joint operations, and the role of junior leaders. Focuses on case studies, situational exercises, student presentations, and battlefield analysis to develop insights on leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received grade of 2.0 or higher. Offered: Sp.

Naval Science

202 Clark

Naval Science offers University students an opportunity to engage in study that leads to a commission in the U.S. Navy or Marine Corps while working toward a baccalaureate degree. The Naval Reserve Officer Training Corps (NROTC) Unit functions in conjunction with Naval Science. An NROTC student may select an academic major within certain limitations (e.g., some programs that normally lead to immediate graduate education, such as architecture, are not consistent with the mission of the NROTC program).

In addition to their University curricula, NROTC students take naval science courses in history and customs, naval engineering/weapons systems, navigation, naval operations, and leadership/management. In addition, each student must attend one naval science laboratory session and one physical training session per week. During the summer, students may have a four-to-six-week training cruise to put into practice their earlier classroom training.

Two NROTC programs are offered, as outlined below. In addition, any University student may take a naval science course without enrolling in the NROTC program, or may complete a minor in naval science, requirements for which are shown below.

Navy-Marine Scholarship Program

Each year students are accepted for scholarship status in the four-year, three-year alternate, and two-year NROTC scholarship programs. Eligibility for the three- and four-year programs is based upon nationwide competition and selection by a central selection committee. Application must be made by December 1 of the academic year preceding appointment as a midshipman. Those selected are provided educational benefits, including subsidy by the Navy of all tuition, fees, and uniforms. In addition, there is a textbook stipend each quarter and a monthly subsistence pay which ranges between \$250 and \$400.

For the two-year scholarship program, applications from current sophomores, or juniors enrolled in five-year programs of study, must be received by March. Those chosen by a central selection committee attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies these students for enrollment in the advanced courses in the NROTC program. All scholarship students are appointed as midshipmen, USNR-R, and upon graduation are commissioned as officers in the Navy or Marine Corps Reserve, after which they serve on active duty for a minimum of four years.

Navy-Marine College Program

Each year, men and women are accepted for four- and two-year non-scholarship college programs. Applications for the two-year program are accepted from current sophomores in community colleges or four-year colleges and must be received prior to March of their sophomore year (or third year, if in a five-year program).

Those students selected for the two-year program attend a six-week course of instruction at NSI during the summer prior to their junior year. Successful completion of NSI instruction qualifies students for enrollment in the advanced course in the NROTC program. Students in the NROTC college program pay their own college expenses but receive monthly subsistence pay during their junior and senior years. The Navy furnishes all uniforms and textbooks used in naval science courses.

All college-program students are eligible for a scholarship after completing one academic term, with scholarship awards based on academic grades and participation with-

in the midshipman battalion. The two-year college-program students also may win a scholarship for superior performance at NSI. Upon graduation, college-program students are commissioned in the Navy Reserve or Marine Corps Reserve and serve on active duty for three years.

UNDERGRADUATE PROGRAM

Adviser

202 Clark, Box 353840

(206) 543-0170

nrotc@uw.edu

Minor

Minor Requirements

25 credits, to include the following:

1. N SCI 201; N SCI 402 (6 credits)
2. Additional naval science coursework (19 credits)
3. Minimum 12 naval science credits completed at the upper-division level
4. Minimum 12 naval science credits completed in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

N SCI 101 The Naval Service (3) General introduction to the U.S. Navy and Marine Corps, with emphasis on organization, missions, roles, tasks, assets, and operations. Offered: A.

N SCI 102 History of U.S. Sea Power I (3) I&S A study of the U.S. Navy and Marine Corps as they fit into the history of the United States, from the American Revolution to the outbreak of World War II. Prerequisite: N SCI 101. Offered: W.

N SCI 103 History of U.S. Sea Power II (3) I&S A study of the U.S. Navy and Marine Corps as they fit into the history of the United States, from World War II to the present day. Prerequisite: N SCI 102. Offered: Sp.

N SCI 110 Naval Science Laboratory (*, max. 12) Evaluates the challenges of leading teams in complex contemporary environments. Topics vary. Required each quarter for NROTC students. Credit/no-credit only. Offered: AWSp.

N SCI 201 Naval Leadership and Management (3) I&S Introduction of the theory and techniques of naval leadership based on principles of behavioral science pertinent to understanding individual and group behavior of adults. Introduces the management process and the relationship of management functions to leadership. Stresses acceptance of a traditional deep sense of moral responsibility on the part of the aspiring leader. Prerequisite: minimum 2.0 grade in N SCI 101. Offered: A.

N SCI 202 Navigation I (3) NW The science and practice of maritime coastal navigation, including visual fixing, dead reckoning, and piloting methods. Computation of tides and currents and nautical rules of the road. Prerequisite: N SCI 101. Offered: W.

N SCI 203 Navigation II (3) NW Basic theory and practice of celestial and electronic navigation. Relative motion theory and contact coordination practice in a multiple ship environment. Prerequisite: N SCI 202. Offered: Sp.

N SCI 301 Naval Ship Systems I (3) Study of fundamental principles of energy transfer and thermodynamics. An introduction to nuclear propulsion, gas turbines, and auxiliary power systems. Offered: A.

N SCI 302 Naval Ship Systems II (3) Study of ship characteristics, ship design, hydrodynamic forces, stability, damage control, and shipboard electrical systems. Includes introduction to engineering documentation, electrical safety, preventative maintenance, and personnel qualifications. Prerequisite: N SCI 301. Offered: W.

N SCI 303 Naval Weapon Systems (3) Study of fundamental principles of sensor, tracking, weapon delivery subsystems, and current naval weapons. Includes techniques of linear analysis of ballistics and weapons, and dynamics of basic components of weapon-control systems. Prerequisite: N SCI 302. Offered: Sp.

N SCI 321 Evolution of Warfare I (3) I&S Focuses on critical thinking on how and why warfare has changed. Explores how warfare and technology have evolved over time, their relationship, and how innovations promulgate. Topics include maneuver warfare, fourth generational warfare, and various military strategy strategist theories. Designed for future Marine Corps Officers, but open to all students.

N SCI 323 USMC Leadership and Administration of Justice I (3) Concepts, objectives, characteristic qualities, and practical techniques of leadership as exercised by the Marine Corps officer. Emphasizes leadership and management role of the junior officer in the Fleet Marine Forces. Intensive physical activities and outdoor projects to test an individual's physical and mental endurance. Prerequisite: N SCI 110; N SCI 421. Offered: Sp.

N SCI 401 Naval Operations (3) Introduction to naval operations, the employment of naval forces, naval tactics, formulation of operations plans and orders, employment of detection equipment, and meteorology. Prerequisite: N SCI 101. Offered: A.

N SCI 402 Naval Leadership and Ethics (3) I&S Study of leadership and ethics within a military context using applicable case studies. Examines the Law of Armed Conflict and Code of Conduct; the importance of integrity, moral courage, and ethical behavior to effective leadership; and the interrelationship between authority, responsibility, and accountability. Offered: W.

N SCI 403 Naval Organization and Management (3) Study of organization, systems, and techniques employed in the Navy for management of its human, material, and financial resources. Some work relates to the administration of discipline in the Navy under the Uniform Code of Military Justice. Emphasis on the leadership and management role of the junior officer in the fleet. Prerequisite: minimum 2.0 grade in N SCI 402. Offered: Sp.

N SCI 421 Amphibious Warfare (3) I&S Provides basic knowledge of evolution of amphibious warfare from pre-modern era to present. Strategic, operational, and tactical considerations in planning specific operations and amphibious landings. Prerequisite: either N SCI 321 or minimum two POL S or JSIS courses. Offered: A, even years.

School of Social Work

Dean

Edwina Uehara

210 Social Work/Speech and Hearing Sciences

The School of Social Work offers two professional programs, one at the undergraduate level and one at the graduate level, as well as a PhD program. The Bachelor of Arts in Social Welfare (BASW) program prepares students for entry-level generalist practice. The graduate professional program prepares students for advanced practice within a field of concentration; students earn a Master of Social Work degree. Both the BASW and MSW programs are accredited by the Council on Social Work Education. The School also offers a Doctor of Philosophy degree in social welfare that prepares students for careers in research and education. Consistent with University policy, no credit is granted on the basis of life experience or previous employment. All three programs are housed in the Social Work/Speech and Hearing Sciences Building, 4101 Fifteenth Avenue Northeast, Seattle, WA 98105-6299.

In addition, the School offers two concurrent degree programs – one with the School of Public Health leading to the MSW and MPH degrees, and a second with the Evans School of Public Affairs, leading to MSW and MPA degrees.

UNDERGRADUATE PROGRAM

Adviser

23D Social Work, Box 354900

(206) 543-8617

sswadm@uw.edu

The School of Social Work offers the following program of study

- The Bachelor of Arts degree with a major in social welfare

The program includes upper-division courses in social welfare, with prerequisites in human biology, economics, psychology, statistics, and sociology. Social welfare courses include content on social welfare history, policy and services, human behavior and the social environment, social welfare research, and cultural diversity. These academic courses prepare students for the senior year three-quarter practicum experience, which involves a total of 480 hours of direct social services under the supervision of a practicum instructor approved by the School.

Bachelor of Arts Program

Suggested First- and Second-Year College Courses: SOC WF 101, SOC WF 200; SOC WF 201; prerequisites in psychology, sociology, economics/political science, and human biology (see below); also, courses in American ethnic studies, sociology, psychology, and gender, women, and sexuality studies.

Department Admission Requirements

Pathways for admission to the social welfare major:

1. Approximately 36 juniors are admitted each year. Admission, which is for autumn quarter only, is competitive and completion of requirements listed below does not guarantee acceptance. April 1 is the application deadline. To be considered for admission, applicants must meet the following criteria by the time they begin classes in the social welfare program:
 - a. Minimum 65 credits completed

- b. Five prerequisite courses, four of which must be completed prior to beginning the program in autumn (minimum 2.0 grade required in each). Courses in the areas of psychology, sociology, economics/political science, and human biology must be completed before beginning the required SOC WF courses. An introductory statistics class may be taken as late as spring quarter of the junior year, but is a required prerequisite of senior-year courses and is recommended prior to admission. See for list of acceptable courses and more information.

- c. A minimum 2.00 cumulative GPA

- d. Have some paid or volunteer social service experience

- e. Completed application, admission essay, resume, and copies of college transcripts

2. Approximately eight freshmen and sophomores are admitted through early admission. Applicants may apply either in spring quarter of their freshman year or autumn quarter of their sophomore year. Application deadlines are April 15 and October 31. Applicants must meet the following criteria:

- a. Minimum 30 credits completed

- b. Completion of or enrollment in at least one of five prerequisite courses, three more of which must be completed prior to beginning the program degree requirements in autumn of the junior year (minimum 2.0 grade required in each). Courses in psychology, sociology, economics/political science, and human biology must all be completed prior to beginning required SOC WF courses. An introductory statistics class may be taken as late as spring quarter of the junior year, but is a required prerequisite of senior-year courses and is recommended prior to admission. See School website for list of acceptable courses and more information.

- c. Minimum 3.00 cumulative GPA

- d. Fifty community service/student leadership hours in college and high school

- e. Completed application, admission essay, resume, personal disclosure statement, and official copies of all college transcripts

- f. One letter of recommendation

- g. Preference given to students who have completed a social welfare premajor offering (see School website for more information)

A group interview with the program director and faculty/staff is scheduled after completed applications are submitted.

Application forms and a detailed description of the social welfare major are available at the School's website, socialwork.uw.edu/. A student may discuss the program in person by contacting the Director of Admissions, (206) 543-5676, sswadm@uw.edu. Students accepted to the major complete a change-of-college form and transfer their academic file to the School's Student Services Office. Students not accepted may contact the Director of Admissions to discuss alternatives to the social welfare major, or the appeal process.

Major Requirements

67 credits as follows:

1. Core Courses (2.0 minimum grade required in each course): SOC WF 200; SOC WF 310; SOC WF 311; SOC WF 312; SOC WF 315; SOC WF 320; SOC WF 390; SOC WF 402; SOC WF 404; SOC WF 405; SOC WF 410; SOC WF 415; SOC WF 460 or SOC WF 442 or SOC WF 443; SOC WF 465; and SOC WF 435
2. 2.00 cumulative UW GPA
3. 2.50 cumulative GPA in SOC WF required courses

Continuation Policy

All students must make satisfactory academic progress in the major and meet outlined standards of professional behavior. Failure to do so may result in probation or referral to the student review committee, either of which could lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The BASW program produces beginning-level social work practitioners and is accredited by the Council on Social Work Education. Students become generalist social work professionals able to work with individuals, families, groups, communities, and organizations in enhancing the health, well being, and empowerment of disadvantaged communities across the lifespan. Graduates may pursue social work practice jobs, or graduate education in social work, or a range of other fields (e.g., law, medicine, public policy, international development). Students receive an interdisciplinary liberal arts education, drawing on a range of social science courses which prepare them to promote human welfare and deal with complex social problems. Students are involved in both academic coursework (gaining intellectual knowledge and critical thinking skills) and a field placement experience ("lived" or "on the ground" experience).

The following outcomes define the BASW program:

- a. Preparation of entry-level baccalaureate social workers for generalist practice in a multicultural context.
- b. Education and training of generalist social workers who are informed, engaged, and responsive practitioners, able to understand and take action in enhancing human welfare and in promoting social and economic justice.
- c. Education of students within the context of an interdisciplinary liberal arts education, to foster a comparative and critical examination of social welfare and social work through the study of its history, policies, research, and practice interventions.
- d. Preparation for graduate education.

In addition, the School of Social Work houses a number of centers and projects. For more information on these research activities, visit socialwork.uw.edu/research/research-centers.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Contact the adviser for information.
- *Department Scholarships:* A limited number of financial-aid opportunities are available to students. Applicants are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Inquiries may be directed to the chair of the scholarship committee, School of Social Work.
- *Student Organizations/Associations:* Organization of Student Social Workers (OSSW)

GRADUATE PROGRAM

sswadm@uw.edu

Master of Social Work

The School of Social Work offers a Master of Social Work degree with three options: a two-year full-time program; a one-year advanced-standing program for qualified students with a degree in social work/social welfare from a Council on Social Work Education accredited undergraduate program; and a three-year part-time extended degree program.

All program options prepare students for advanced professional practice with a culturally diverse range of at-risk populations in publicly funded social services. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation, and opportunities for advanced content in areas of policy, services, and methods.

The professional foundation provides instruction in the basic knowledge and skills required for effective, generalist social work practice, as well as socialization to the profession, its value orientation, ethics, and history.

The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in the social work profession. The advanced curriculum is being revised. Check the School's website, socialwork.uw.edu for current information.

Admission Requirements

Formal admission to the Graduate School as well as to the School of Social Work. Bachelor's degree, strong academic background, and social-service experience. Official transcripts from all colleges and universities attended, references, application forms, résumé, and an admission essay to be considered for autumn-quarter entry. January 15 is the closing date for receipt of applications and materials. Admission is competitive and selection is based on a review of the applicant's submitted materials. Current application materials can be obtained from the School's Admissions Office website at socialwork.uw.edu/admissions/.

Degree Requirements

Minimum 46 credits (advanced standing program); 75 credits (day and extended degree programs), as follows:

1. Completion of required professional foundation and advanced curriculum credits and demonstrated competence in both academic and field practicum work.
2. *Human Biology Requirements:* BIOL 100, BIOL 101, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), or SSW Continuing Education course "Human Biology" taken within 10 years of admission to the MSW program. Students must complete the requirement prior to beginning the advanced curriculum (including practicum). Credit may not be applied to the MSW degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
3. *Basic Statistics Requirement:* An introductory course in statistics (any discipline) is a prerequisite for SOC W 505/SOC W 506.
4. *Professional Foundation Courses Required for the Day and Extended Degree Program:* SOC W 500, SOC W 501, SOC W 504, SOC W 505, SOC W 506, SOC W 510, SOC W 511, SOC W 512, SOC W 513, SOC W 523, 3 credits of electives, SOC W 524. All foundation courses must be completed before beginning the advanced curriculum.

5. *Advanced Curriculum for the MSW Day Program:* Specialization in an advanced methods area or field of practice. Current areas of concentration include policy and administrative practice; health and mental health practice; community-centered integrative practice; practice with children, youth, and families; and multigenerational practice. Students enter the second year with an individualized learning plan (developed by winter quarter of their foundation year) that sets out a coherent program of advanced study. Identified in the learning plan is a policy/services course, an advanced methods area, an advanced field practicum, and proposed choices for methods and elective courses that support the student's overall area of concentration.

Programs of study vary slightly by concentration, but a typical program of study includes:

- a. One policy/services course (3 credits), consistent with the student's second year specialization
 - b. Two advanced methods (6 credits) in the student's primary method area or across methods with the approval of the faculty adviser and practicum coordinator
 - c. Elective course offerings (9 credits) to include courses related to the policy/services areas, and advanced HBSE and theory courses, with the primary focus on development of knowledge and skills in intervention. One elective course from outside the School. Elective courses range from 1 to 3 credits.
 - d. Advanced practicum (SOC W 525, 18 credits) aligns with the student's policy/services course and with the student's primary intervention method area.
6. *Advanced Curriculum for the MSW Extended Degree Program:* Students select one of two specializations within the Interpersonal/Direct Social Work Practice concentration: Integrative Health-Mental Health Advanced Practice, or Multigenerational Practice with Children, Families, and Elders. Advanced curriculum consists of policy/services course, a two-quarter advanced practice methods sequence, SOC W 571, 6 credits of electives, and a 720-hour advanced practicum.
 7. *MSW Electives:* Courses may be selected from curriculum offerings related to particular fields of practice, intervention theories, intervention modalities, social problems, populations, and research methods. Students may take advanced methods courses in areas other than the student's primary methods area and relevant courses in other graduate programs and professional schools of the University. Three credits of external coursework may be included.

Financial Aid

A limited number of financial-aid opportunities are available. Applicants to the MSW program are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Departmental funding is limited and typically requires a department-specific application be submitted by April 1. Inquiries may be directed to the Admissions Office, School of Social Work. Information on available tuition awards may also be reviewed on the Social Work admissions website, socialwork.uw.edu/admissions.

Master of Social Work/Master of Public Health Concurrent Degrees

Concurrent degrees prepare professionals who function at the interface of both fields in practice, research, planning, administration, and policy development. Students develop (1) competence in social work practice in community health; (2) understanding of the organization and functioning of the health and social service delivery systems; and (3) basic analytical skills necessary to conduct research and to perform competently in a variety of public health

social work roles. Students also have an opportunity for in-depth study of particular issues related to their special interests and career goals.

Application

Students who matriculate into the full time program in either Social Work or Public Health are eligible. Students admitted to Social Work with advanced standing should apply for both programs simultaneously. Students in the part-time evening degree program in either Social Work or Public Health are not eligible for the program.

1. Students must apply to and be accepted by both schools.
2. Students are strongly encouraged to complete up to one year of studies in Social Work before entering the Public Health program. Applications for entry are due in both schools by January 15. Typically students apply to Social Work in January and enter the MSW program in September. They then apply to Public Health the following January and begin the MPH program the next September. Staggered entry permits students to complete all requirements of both degrees within three years.

Degree Requirements

115-125 credits (depending on number of electives taken)

1. Two separate sets of at least 36 credits each
2. At least 18 numerically graded credits for each degree in courses numbered 500 through 599. All required courses in the MPH program must be taken for a grade.
3. Up to 12 credits taken in one school may be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.
4. The MPH requires a thesis.

Doctor of Philosophy

The PhD program in social welfare prepares students to contribute to the advancement of knowledge and practice in the field of social welfare and the profession of social work for the promotion of social justice. Students acquire both the substantive and methodological competence to contribute theoretical formulations and empirical research that inform effective social work practice and advance scholarship in social welfare.

After the first year of required courses, each student's program of study is individually designed and focuses on well-defined substantive and interventive areas of research relevant to the field of social welfare. In the basic core of required courses, which includes teaching and research practice, students have an opportunity to pursue their particular interests with faculty members in the School of Social Work and in other schools and departments.

During the first two years, students define and develop the specialized areas that are the focus of their general examination and, typically, their subsequent dissertation research. Selected areas must have clear significance for the development of practice, programs, or policies in social work and social welfare.

The general examination for advancement to candidacy generally occurs at the end of the second year or during the third year. After advancement to candidacy, students devote themselves full time to completion of their dissertation research. The last step before the degree is the final examination, defense of the dissertation. Students are strongly encouraged to remain in residence at the University until the dissertation is accepted. The PhD program takes approximately four years, although academic excellence in learning and performance is always the first criterion for degree progress.

Admission Requirements

Admission is highly selective and students are admitted for autumn-quarter entry only. Applicants must have a master's degree in social work or a closely related field.

The Council on Social Work Education requires that faculty who teach practice courses in accredited programs have two years of supervised practice experience. Thus, obtaining such experience is highly important for those who seek academic positions following graduation.

Applicants selected for admission are those whose scholastic achievements, previous experience, and aptitude for social welfare research, scholarship, and teaching indicate the greatest promise for achieving the objectives of the program. In addition, an effort is made to maintain a balanced student group reflecting the range of concerns in social welfare and of faculty resources. The deadline for receipt of admission material is December 15. For more information, call (206) 685-1680, or email phdmhr@uw.edu.

Degree Requirements

90 credits minimum, to include:

1. **Required Courses:** Must include content on diverse populations, including the disadvantaged and oppressed. Includes content on people of color, women, gay men and lesbians, and persons with disabilities. Specific type or nature of the content (e.g., readings, exemplars, exercises) and how it is introduced and integrated likely differs across courses. In all cases, content on diversity must be in accord with course objectives and be visibly present in the course syllabus.

All required coursework (with the exception of 800-level tutorials) must be completed before or during the quarter in which the oral section of the general examination takes place.

Courses required must be taken on a graded basis unless offered credit/no-credit only (i.e., they cannot be taken on a satisfactory/not-satisfactory basis).

- a. Introduction to Advanced Research Methods and Design. Two quarters during first year.
- b. Fundamentals of Statistics. Two quarters during first year through other departments (primarily Sociology or Biostatistics).
- c. Research Issues and Priorities in Social Welfare. Two quarters during first year.
- d. Social Welfare Policy. Two quarters during first year (contemporary policy and international and global policy).
- e. Research Practicum. Two quarters; to be completed by the end of second year (credit/no-credit only).
- f. Teaching Practicum. One quarter; to be taken after successful completion of first year (credit/no-credit only).
- g. Career Planning Seminar. One-credit seminar offered quarterly (credit/no-credit only). Focus is on professional development issues and skills with emphasis on academic and research careers.
- h. Teaching Preparation. One quarter in the second year.
- i. Minimum two (3+ credit) courses in advanced graduate research methods (typically 500-level courses offered in other departments) relevant to the student's anticipated research in a substantive or interventive area. Coursework beyond the minimum is encouraged.
- j. Minimum two (3+ credit) graduate social science theory courses (500 level or above), designed to provide strong theoretical foundations. Students often use these courses to develop a "minor" in one of the social sciences. Offered in the College of Arts and Sciences or one of the professional schools, they are

related to the substantive or interventive content of the student's program. Coursework beyond the minimum is encouraged for greater depth of interdisciplinary theoretical training.

- k. Dissertation Tutorials (SOC WL 800). Taken after the student has successfully completed the oral general examination and has been advanced to candidacy for the PhD. Students must complete a total of 27 credits over at least three quarters to satisfy the Graduate School requirement
2. **Elective Courses in the School of Social Work**
 - a. Qualitative Methods in Social Work Research. One or two quarters, offered alternate years.
 - b. Analytical Perspectives on Social Welfare Policy. One quarter, offered annually.
 - c. Advanced Topics in Data Analysis. One quarter, offered annually, covering advanced quantitative methods.
 - d. Social Movements and Participatory Action Research Methods. One quarter, offered alternate years.
 - e. Psychosocial Scale Construction and Measurement. One quarter, offered alternate years.
 - f. Interdisciplinary Prevention Science: Children and Adolescents. Overview of developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21), 3-credit course (credit/no-credit only).
 - g. Promoting Well-Being among At-Risk Groups. Guidance for Health Promotion/Prevention Research.
3. **Additional Course Expectations:** Students may take tutorials (SOC WL 600) with faculty members while completing advanced coursework and writing the integrative paper (prior to the oral general examination). These tutorials should include one or more written products. Students are also encouraged to take additional courses that bear on their substantive areas of interest. Courses may be taken in any department or school of the University but should ordinarily be at the 500 level or above.
4. **Prevention Research Training Program Courses:** (Trainee requirements in addition to all PhD program courses)
 - a. *Seminar in Prevention Science.* One-credit seminars taken autumn, winter, and spring quarters each year of the traineeship. Credit/no-credit only.
 - b. *Promoting Well-Being among At-Risk Groups:* Interdisciplinary Guidance for Health Promotion/Prevention Research. One quarter, 3 credits, introduction to prevention research.
 - c. Two additional graduate level (500+) courses, one social science theory and one research methods, related to the prevention research area of study.

Financial Aid

The School of Social Work ensures that all students have some means of financial support during the nine-month school year for the first three years in the program and is frequently able to continue support beyond this point. In each of the first three years, the PhD program director assists students in obtaining funding from the School, other UW sources, or external federal and private granting agencies. Each year, awards of stipends, fellowships, and research and teaching assistantships are made on the basis of resources available and match with areas of student interest. An award of a particular stipend or assistantship in one academic year does not carry a commitment for that same award in another year because both the grant situation and the applicant pool change. Advanced teaching and research positions are available on a competitive basis. Students are encouraged to begin their efforts to secure dissertation research support early and to stay in

communication with the PhD program directors and associate deans, who oversee assistantship assignments in consultation with the School administration.

COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at www.uw.edu/students/crscat/

SOC W 500 Intellectual and Historical Foundations of Professional Social Work Practice (3) Intellectual, historical, and ethical foundations of the social work profession. Engagement with crucial aspects of the profession's history; contemporary issues, problematics, and directions; and key concepts and theoretical frameworks. Students develop personal, professional, and intellectual foundations for practicing social work built on the central values of plurality and social justice.

SOC W 501 Poverty and Inequality (3) Analysis of poverty and inequality in United States. Analytic and descriptive focus on measurement, processes of production and perpetuation, and public policy responses. Examines causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, disability, age, sexual orientation, and family structure.

SOC W 504 Social Work for Social Justice: Developing a Personal-Professional Stance (3) Focuses on personal and professional development toward social work practice for social justice. Employs critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globalization.

SOC W 505 Foundations of Social Welfare Research (3) *Almgren, Balassone, Erera, Roffman* Overview of research process/methods in social work, with focus on consuming and performing practice-related research and evaluating one's own practice. Emphasis on critical understanding of empirical literature, development of useful and appropriate questions about social work practice, and strategies and techniques for doing research and applying findings to practice. Offered: Sp.

SOC W 506 Social Welfare Research and Evaluation (3) Second of a two-quarter research sequence. Introduces a range of methods for informing evidenced-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and techniques for conducting practice-relevant research, including data collection and analysis. Prerequisite: minimum 2.5 grade in SOC W 505.

SOC W 507 Advanced Standing Social Welfare Research and Evaluation (5) Introduces a range of methods for informing evidence-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and technique for conducting practice-relevant research, including data collection and analysis. Prerequisite: advanced standing students.

SOC W 510 Practice I: Introduction to Social Work Practice (3) Foundation knowledge and skills for direct practice with individuals, families, and groups. Assists students toward mastery of interviewing and relationship building skills and knowledge of cross-cultural communication and practice issues and of social work values and ethics. Provides opportunity to develop beginning level skills in assessment. Offered: ASP.

SOC W 511 Practice II: Intermediate Direct Service Practice (3) Foundation knowledge and skills for direct practice with individuals, families, and groups. Course assists students toward mastery in assessment, development of treatment plans based on theory and assessment information, goalsetting skills, and selection of appropriate interventions. Offered: AW.

SOC W 512 Practice III: Organizational Practice (3) Focuses on ways in which management activities contribute to service effectiveness for clients and quality of conditions for staff. Various managerial roles, functions, and skills examined. Impact of agency structure, culture, and mission on staff, clients, and organizational outcomes discussed with emphasis on ways social work managers influence change. Offered: W.

SOC W 513 Practice IV: Community Change Practice (3) Provides frame of reference and skills for community-based social work practice. Theories of social change are examined with examples drawn from community organizing and policy advocacy. Offered: Sp.

SOC W 516 Research Base for Prevention Science (3) Introduces the transdisciplinary field of prevention science; enhances understanding of the developmental epidemiology of risk, protection and outcome and how prevention interventions are conceptualized and evaluated; critiques research on preventive interventions and practice; and outlines the role of prevention science in advancing health and well-being over the life course.

SOC W 517 Promoting Individual, Family, School, and Community Risk Prevention (3) Covers existing evidence-based practices in prevention science that have demonstrated effects on reducing risks and promoting positive development in youth. Emphasizes practice skills, topic include promotion of healthy development in childhood/adolescence; prevention of child abuse and neglect, early pregnancy, violence and delinquency, substance abuse, school misbehavior, and mental health disorders.

SOC W 518 Macro Practice in Health and Prevention (3) Students engage in the translation of research, advocacy, and the sustainability and dissemination of prevention initiatives and programs. Includes skill development in policy analysis, community organizing, and media/legislative advocacy. Covers current issues in prevention, the policy context surrounding them, and skills to propel prevention forward as a priority in or society.

SOC W 519 Policy/Services: Health/Mental Health (3) Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

SOC W 520 Policy/Services: Multigenerational (3) Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

SOC W 521 Child and Family Inequalities: Policy/Services Platform (3) Advanced study of policy and services relevant to practice with children, adolescents, and families. Applies social justice framework to understanding policy context and organization of services responses to child and family inequalities, especially for historically oppressed and marginalized populations. Examines social construction of policies in historical, political, and comparative context.

SOC W 522 Introduction to Practicum: Advanced Standing (2) Orients advanced standing students towards their practicum. Covers critical issues related to the advanced standing practicum and prepares students for successful practice in their chosen agencies. Incorporates and builds upon content and skills acquired through a generalist (micro, mezzo, and macro levels of practice) undergraduate social work education. Credit/no-credit only.

SOC W 523 Introduction to Practicum (0-1, max. 2) Workshops for preparation for agency-based placement interviewing and orientations occur at agencies. Credit/no-credit only.

SOC W 524 Foundation Practicum (1-8, max. 12) Agency-based practicum with emphasis on development of knowl-

edge, perspectives, and skills needed for practice with individuals, families, groups, organizations, and communities. Prerequisite: social work major. Credit/no-credit only. Offered: AWPSS.

SOC W 525 Advanced Practicum (1-10, max. 24) Agency-based advanced practicum. Prerequisite: completion of foundation courses and practicum. Credit/no-credit only. Offered: AWPSS.

SOC W 526 Multigenerational Policy-Services Platform: A Feminist, Multicultural Lens (3) Builds social workers' competencies to analyze, critique, and advocate for policies and processes that support growing numbers of multigenerational families. Presents a feminist, multicultural, and multigenerational perspective to analyze how historical and current service structures, policies, and regulations support or undermine families across the lifespan.

SOC W 527 Global and Local Inequalities: Critical Analyses of the Processes and Policies of Globalization (3) Discussion of the health of the planet, economic and cultural globalization, the enduring legacies of imperialism and colonialism in this global era, and their local impacts. Foci include international agreements, UN conventions, immigration, and refugee policies.

SOC W 528 Healthcare Inequalities: Policy/Services Platform (3) Examines the organization, policies, and services of U.S. healthcare system from a social justice framework. Topics include the U.S. healthcare system's historical development, differential access to health and healthcare, healthcare system reform, and the analysis of healthcare policy from contrasting ideological perspectives.

SOC W 529 Mental Health Inequalities: Policy/Services Platform (3) Mental health policy trends and organization of services at national, state, and local levels reflected in legislative, regulatory, and institutional policies. Provides historical perspective on the development of U.S. mental health policies and services. Discusses specific areas of intersystem linkages in terms of equitable access and empowerment.

SOC W 530 Advanced Practice with Diverse Children and Families (3) Builds on foundation frameworks and competencies to develop specialized knowledge and skills for working with vulnerable children and families. An ecological framework informs family- and community-centered assessment and intervention that is empowering, culturally responsive, and clinically relevant. Foci include resilience, violence, attachment, loss, substance abuse, and disability.

SOC W 531 Advanced Practice with Diverse Children and Families: Focus on Child Mental Health (3) Develops specialized knowledge and skills for practice with children with mental health concerns and their families. Emphasis on child and family mental health assessment and interventions that are culturally relevant, collaborative, and strength-promoting. Topics include culture and mental health, system of care, psychotropic medication, ADHD, and depression.

SOC W 532 Advanced Practice with Diverse Children and Families: Focus on Child Welfare (3) Develops advanced knowledge and skills for culturally relevant child welfare practice across a range of settings including child protection, foster care, and adoption. Topics include family dynamics around child maltreatment; trauma and its impact on children; separation, loss, and identity development; and self-care in child welfare practice.

SOC W 533 Multigenerational Advanced Practice with Older Adults (3) Emphasizes a multigenerational, culturally competent empowerment approach and in-depth knowledge on "best practices" related to assessment, diagnosis, and clinical interventions with older adults and their families. Builds on other multigenerational classes.

SOC W 534 Praxis of Intergroup Dialogue (3) Students design, plan, implement, and evaluate intergroup dialogue sessions as peer facilitators. Students facilitate intergroup

dialogue in conjunction with SOC W 504. Focuses on intensive in-vivo instruction, consultation, and supervision of facilitators.

SOC W 535 Special Topics in Interpersonal/Direct Practice (2-3, max. 9) Examines current substantive topics in direct/interpersonal practice.

SOC W 536 Social Movements and Organizing: People, Power, and Praxis (3) Focuses on social, economic, and political problems from an organizer's perspective, and strategies, tactics, and skills necessary to engage in organizing activities. Emphasizes principles common to community, electoral, union, and issue organizing. Addresses why people organize, how organizing works, and what it takes to be a good organizer.

SOC W 537 Empowerment Practice with Refugees (3) Empowerment practice with refugees and immigrants across a transnational continuum of forced migration, including flight, internal displacement, asylum seeking, repatriation, and resettlement. Instruction includes classroom activities, workshops with local service providers, and agency-based projects. Addresses implications for strengths-based social services, policy, and practice skills.

SOC W 538 Critical Empowerment Practice with Multi-ethnic Communities (3) Principles of empowering practice, critical analyses of models of multiculturalism and paradigms of knowledge and practice proven problematic in our increasingly diverse society. Assists students in developing empowering practice values, knowledge, and skills for work in multi-ethnic communities.

SOC W 539 Ethnographic Interviewing (3) Facilitates empowering and culturally sensitive practice, while providing an understanding of the other from his/her own perspective. Addresses power in worker-client relationships, clients as experts, communication across cultures, the uses and presentation of data to effect social change, ethical issues, and specific ethnographic interviewing techniques.

SOC W 540 Advanced Social Work Practice in Health Settings I (3) Teaches theory and strengths-based practice within interprofessional health care settings from biopsychosocial, family systems, multi-cultural, contextual, and lifespan perspectives. Advances skills in conducting assessments and interventions to support individuals and families experiencing pain and loss associated with trauma and acute or chronic illness.

SOC W 541 Advanced Social Work Practice in Health Settings II (3) Teaches health care theory and practice skills relevant to working with adults and children in a variety of health care settings, using biopsychosocial, contextual, multicultural, interdisciplinary, and lifespan perspectives. Advances skills in adherence assessment, ethical decision-making, discharge planning, cross-cultural and cross-professional practice, and counseling regarding life-threatening illness.

SOC W 542 Recovery-Oriented Social Work Practice in Community Mental Health (3) Emphasizes recovery-oriented practice with adults with severe and persistent mental illness and persons with co-occurring mental illness and substance disorders. Trains for generalist social work practice in most community mental health settings: community mental health centers, psychiatric hospitals, residential programs, jails, homeless shelters, on-the-streets, client's homes, etc.

SOC W 543 Social Work Practice in Community Mental Health II (3) Focuses on social work practice with persons with severe mental illness. Emphasizes recovery, supported housing, supported employment, integrated treatment of co-occurring disorders. Covers practice with diverse populations: multicultural, developmentally disabled, geriatric, and gay/lesbian. Examines partnering with family members and working with Social Security. Complements SOC W 542, but may be taken free-standing.

SOC W 544 Clinical Social Work with Individuals I: Theory and Practice (3) First quarter of a two-quarter sequence on

the theory and practice of clinical social work. Focuses on key concepts underlying direct practice. Topics include the therapeutic relationship, therapeutic listening, the ground rules, transference, counter transference, psychological defenses, resistance, phases of treatment, transference, countertransference, and vicarious trauma.

SOC W 545 Clinical Social Work With Individuals II: Theory and Practice (3) Second of a two-quarter sequence on the theory and practice of clinical social work. Focuses on the use of interpretation, obstacles to treatment, intervention techniques, case formulations that link assessment and intervention, monitoring client progress, and on selected theories of therapy.

SOC W 546 Addressing Trauma and Recovery in Multigenerational Advanced Practice (3) Multigenerational perspective on clinical interventions for various traumas: childhood sexual abuse, battering at any age, chemically dependent parents, elders with abusive adult children, and a range of losses throughout the lifespan. Recovery process explicated in terms of family strengths across the generations and through state-of-the-art techniques for healing trauma.

SOC W 547 Multigenerational Integrative Seminar (1-3, max. 3) Designed to foster the integration of classroom learning and field education. Taken concurrently with advanced practicum, provides support for addressing challenges in professional settings, development of leadership skills, and preparing for future work in the field of multigenerational practice. Credit/no-credit only.

SOC W 548 Advanced Practice I: Multigenerational (3) First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual assessment from micro to macro levels.

SOC W 549 Advanced Practice II: Multigenerational (3) Second quarter of a two-quarter sequence. Highlights program planning, supervision, and intervention across all levels of practice.

SOC W 550 Strategic Program Management and Change Leadership in Human Services (3) Examines tools and techniques required for leadership, program planning, implementation, and program change. Topics include strategic planning, logic modeling, agency-bound relations, work-group facilitation, and diversity-promoting management. Lecture, discussion, and exercises. Required for SSW administration concentrators; open to others with permission of instructor.

SOC W 551 Human Resource Management in the Human Services (3) Theories and techniques for 1) designing human services workplaces that support employees' performance and well-being, and 2) managing diverse, satisfied, and high-performing human service staffs. Topics include job quality analyses; job descriptions; employee interviewing, supervision and performance evaluation; models of negotiation and conflict resolution; and strategies for working with volunteers.

SOC W 552 Financial Management of Human Services Programs (3) Covers key financial management components of human service programs, including development and use of business plans, budgets, and financial statements. Helps students to demonstrate an understanding of financial management through budget preparation, financial statement analysis, new project cost projections, audits, and presentations using computer-based spreadsheets and presentation software.

SOC W 554 People, Place, Equity (3) Introduces empirical, theoretical, and applied knowledge on place as a key dimension of social work practice. Examines how people-place relationships differentially affect social opportunities such as health and wellness, employment, and housing. Provides intellectual and practical foundations for incor-

porating spatial analyses and collaborative place-making interventions in practice.

SOC W 555 Global Perspectives in Social Work Practice (3) Focuses on contemporary social issues of global importance: poverty; HIV/AIDS; population growth; gender inequality; and war, conflict, and displacement, with specific focus on these issues in the global south. Examines sociocultural, economic, and political processes that shape these issues, and entwined perspective of human rights and development.

SOC W 556 Family Healing: A Cross-Generational Approach (3) *Lustbader* Explores how to respond to multigenerational dynamics within the entire extended family and examines how bow difficulties and strengths are passed from one generation to another. Emphasizes cultural differences as well as issues pertaining to the impact of chemical dependency, mental illness, and disability across generations.

SOC W 557 Caring for Persons with Life-Limiting Illness: A Lifespan Approach (3) Focuses on multi-systemic social work practice with seriously ill people with a life-limiting condition. Examines how families care for a critically ill loved one, and the differences that occur when the seriously ill person is a child, adolescent, a mid-aged adult, or an elder at the end of life.

SOC W 558 Gender, Gender Identity, and Sexuality (3) Anti-oppression focus on social work practice with lesbian, gay, bisexual, transgender, two-spirit, intersexed, and queer communities. Emphasizes cultural, social, and political context within which such practice occurs as well as an examination of the diversity and heterogeneity within these communities. Enhances students' micro and macro practice skills.

SOC W 559 Child Development (3) Provides students with a basic understanding of child development theory and research as well as specific knowledge about the development of children from infancy through adolescence. Emphasizes developmental approach to assessment and intervention with children and families. Particular emphasis placed on developmentally-based child welfare practice.

SOC W 560 Policy Processes, Institutions, and Influences (3) Focuses on the process and institutions through which social policies are developed, adopted, and implemented, with special attention to the implications of these processes for social justice. Develops practice skills in analyzing and influencing the policy process, including social problem definition, policy design, policy adaptation, and policy implementation.

SOC W 561 Concepts and Methods of Policy Analysis (3) Engages students in the concepts and applied practice of policy analysis and evaluation. Prepares students to address two generic policy questions: Given an identified problem, what policy or program should be selected? Given a particular policy or program, how do we evaluate effectiveness? Particular attention paid to social justice implications.

SOC W 562 Advanced Practice I: Health/Mental Health (3) First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual assessment from micro to macro levels.

SOC W 563 Advanced Practice II: Health/Mental Health (3) Second quarter of a two-quarter sequence. Highlights program planning, supervision, and intervention across all levels of practice.

SOC W 565 Special Topics in Policy Practice (2-3) Examination of current substantive topics in policy practice. Content varies according to recent developments in the field and the interests of the instructor.

SOC W 570 Anti-racist Organizing for Social and Economic Change (3) Applies an institutional analysis of racism and

white privilege to the strategies of community organizing by communities of color and indigenous peoples. Examines anti-racist organizational transformation, intersectionality of oppressions and privileges, white allies in anti-racist struggles, and the role of social workers in maintaining and combating institutional racism.

SOC W 571 Assessment of Mental Disorders (3) Provides basic knowledge and skills to assess mental disorders and improve critical thinking concerning assessment and diagnosis. Emphasizes the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV) for its system of symptom description and classification. Examines challenges of methodological implications of mental health assessment across race, gender, and ethnicity.

SOC W 572 Understanding Addiction, Pharmacology of Drugs, and Treatment Methods (3) Provides students with the knowledge and basic skills to recognize and understand the dynamics of chemical dependency in the lives of individuals, how to assess the presence of this disorder, and what the issues are in referring individuals to treatment for this disorder.

SOC W 573 Child Welfare and Permanency Planning (3) Focuses on social work interventions within the public child welfare system for children who have been abused and neglected. Includes practice models to ensure safety and permanency for children, federal and state mandates for permanency, cultural determinants, juvenile court dependency system, and research findings pertaining to permanency planning outcomes.

SOC W 574 Collaborative Community-Based Program Evaluation (3) Focuses on carrying out a formative and process evaluation of a community program in conjunction with program staff and clients. In addition to learning about program theory, measurement construction, study design, and data analysis, students develop consultative and presentation skills needed in utilization-focused evaluation.

SOC W 575 Domestic Violence Policy and Intervention (3, max. 6) Examines policy, theory, research, and intervention in field of intimate partner violence with emphasis on historical, cultural, and political contexts. Advanced study of structural contributors, policy parameters, and service delivery and cross-systems necessary to effective practice and leadership in the field locally, nationally, and globally.

SOC W 576 Empowerment Practice with Persons with Disabilities (3) Provides background in theories and models of disability that contribute to empowerment-oriented intervention techniques. Emphasizes direct practice skills for working with people with disabilities and their families. Emphasizes understanding how disability studies and the disability movement influence social work practice.

SOC W 577 Maintaining Quality Social Work Practice: Ethics, Self-care, and Risk Management (2-3) Develops models for managing ethical and legal obligations to clients and others; managing risk; and maintaining ethical, responsible, and self-sustaining practice over a professional career. Examines competing ethical frameworks and material on essential values underlying ethical principles and the basis for ethical and legal regulation of practice.

SOC W 578 Evidence-Based Practice in Child Mental Health (3) Critically examines the program components and empirical research base of selected child mental health treatment program models designed to serve children and youth who present with severe emotional or behavioral disorders. Focuses on treatment models that reflect a "systems care philosophy" and which offer alternatives to traditional services.

SOC W 579 Faith Matters and Mental Health Practice: Conflict vs Integration (3) Examines the complex interrelation between faith matters and the practice of mental health professions, including approaches to definitions and assessments.

SOC W 580 Grant Writing and Fund Development (3) Prepares students to participate and provide leadership in

grant writing and fundraising for community-based human services. Opportunity to practice skills required for developing a successful grant proposal and planning a successful fundraising program. Identify, cultivate, and develop sources of funding. Students assist in writing a complete grant proposal as final project.

SOC W 581 Historical Trauma and Healing (3) Provides specialized knowledge and skills for practice with communities experiencing historical trauma. Covers emerging theories of historical trauma, impact of historical trauma on families and communities, and culturally relevant interventions to promote healing. Builds upon the concepts of empowerment practice and indigenous models of social work.

SOC W 582 Interpersonal Violence and Trauma (3) Examines trauma theory, nature of interpersonal violence, psychodynamic concepts, cognitive behavioral theory, treatment of victims and offenders. Topics include psychological trauma, abuse-specific psychotherapy, multidisciplinary and cognitive behavioral interventions with victims and offenders, effects of interpersonal violence, and counter-transference reactions. Format includes lecture, discussion, case presentations, and presentations by community experts.

SOC W 583 Multicultural and Multigenerational Approaches to Healing Grief and Loss (3) Uses critical analysis to expand Western symptom-oriented grief and loss theory to include multicultural approaches, exploring new constructionist models of meaning-making, narrative biography, and cultural tradition through case studies. Assessment and intervention exercises include journaling, art, and ritual, allowing students to explore how their own grief affects practice.

SOC W 584 Multicultural Mental Health Practice (3) Advanced-practice course that builds upon foundation content in HUB, micro- and macro-practice/HBSE sequences, policy, diversity, and research. Grapples with complex mental health service design and delivery issues often informed by ethnocentric paradigms of knowledge and practice that have proven problematic in their general application in our increasingly diverse society.

SOC W 585 Advanced Group Work (3) Overview of group work and major theorist in the field. Examines differential applicability of methods across diverse populations. Emphasis on developing powers of observation of group process (as opposed to content) and on ability to intervene at the group level (as opposed to individual level). Prerequisite: Group work experience.

SOC W 586 Policy Advocacy (1-3, max. 3) Focuses on involvement in the policy-making process. Students design projects to influence public policy in local, state, and federal levels. Readings based on policy materials (proposed and final laws, regulations, budgets, advocacy documents). Credit/no-credit only.

SOC W 587 Spirituality in Healthcare (2) Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/FAMED 547; Sp.

SOC W 588 Social Work in Schools (3) Required for School Social Worker certification. Explores theoretical frameworks, current issues in education, individual, group and family practice; organizational context; and systems change. Also covers legal issues, racism and educational outcomes, special education, culturally sensitive practice, advocacy, family involvement, child abuse mandated reporting, collaboration, and ethics.

SOC W 589 Social Work Practice with Families (3) Philosophical, theoretical, and practice issues relevant to family-centered social work. Presents family systems theory and a generalized model of engagement, assessment, and treatment. Clinical applications with particular client populations and their presenting problems, such as couples, family crisis, child behavioral problems, and affective disorders.

SOC W 590 Social Work Supervision and Consultation (3)

Provides knowledge and skills involved in the role of social worker as supervisor and team leader; supervision as a leadership function, power and authority, professional boundaries, staff recruitment, selection, performance evaluation, and addressing staff-related performance problems.

SOC W 591 Social Work Practice in Long-Term Care Across the Lifespan (3) Applies a multigenerational framework to introduce values, skills, and knowledge necessary for social work practice in long-term care settings across all age groups. Meets at a nearby continuing care community and provides regular opportunities to interact with persons requiring long-term care, their families, and formal caregivers.

SOC W 592 Social Work Practice with African-American Families (3) Introduces the study of African-American families from a historical, socio-cultural, and political perspective. Presents various theories for understanding African-American families and addresses an Afrocentric framework for intervention.

SOC W 593 Social Work Practice with Chemically Dependent Adults: Understanding Assessment, Evaluation, and Counseling (3) Teaches skills in four contexts: (1) incorporating questions concerning alcohol/drug use in an assessment of new clients, (2) conducting a comprehensive alcohol/drug assessment when a problem has been identified, (3) offering a brief motivational enhancement intervention to ambivalent clients, and (4) delivering cognitive-behavioral counseling focusing on overcoming dependence.

SOC W 594 Gender and Inequalities in the Global Context (3) Examines issues of gender, globalization, and inequality through a gender lens. Topics include global movements of capital (the global factory) and labor (migration, trafficking, etc.), disruption/creation of family forms and gender roles (domestic violence), social welfare, private/public policies, international frames (human rights), resistance, and response.

SOC W 595 Co-Occurring Addiction and Mental Health Disorders (3) Provides students with the knowledge and skills to understand the dynamics of co-occurring addiction and mental health disorders (COD) in the lives of individuals. Students learn how to assess the presence of COD and what the issues are in referring individuals to treatment or providing them treatment for COD.

SOC W 596 Statistics in Social Work (1-3, max. 3) Introductory foundation in descriptive statistics, probability theory, statistical inference, and bivariate statistics commonly used in evaluations of social program and clinical practice. Conceptual emphasis on understanding the logic of measurement and statistical inference. Understanding reinforced by hand calculations involving high school algebra. Fulfills SOC W 505 prerequisite.

SOC W 597 Graduate Study Abroad in Social Work (1-15, max. 15) For graduate students in a UW study abroad program. Specific content varies and must be individually evaluated.

SOC W 598 Integrative Seminar (1-5, max. 12) Integrates specialized knowledge in social work settings. Offered: AWSp.

SOC W 599 Independent Study in Social Work (1-10, max. 10) Prerequisite: approval of a well-specified plan by an instructor and program director, including learning objectives and activities. Credit/no-credit only.

SOC W 600 Independent Study or Research (1-10, max. 10) An independent research project. Prerequisite: approval of a well-specified plan by an instructor and program director, including learning objectives and activities included on the SOC W 600 form.

SOC W 700 Master's Thesis (*-)

Social Welfare

SOC WL 515 Community Service Practicum (3, max. 6)

Development of skills on working in partnership with community institutions in the role of researcher or scholarly collaborator, through ongoing reflection and consultation with a faculty member. Uses a learning contract to focus specific activities. Credit/no-credit only. Offered: AWSpS.

SOC WL 552 Seminar in Contemporary Social Welfare Policy (3)

Critical review of contemporary American income maintenance and related social welfare policies, and the economic, political, and social factors that affect their development, implementation, and effectiveness. Evaluation of their effects on poverty, income inequality, and related social outcomes, including international comparisons. Assessment of proposals for reform. Closely linked to SOC WL 553.

SOC WL 553 Policy Implementation and Organizations (3)

Examines divers organization theories relevance to policy implementation, translational research, and practice interventions within health and human service settings. Emphasizes multilevel models and integrative frameworks that take into account individual, group, and organizational factors, recognizing outcomes as embedded phenomenon nested within organization, community, and societal contexts. Offered: Sp.

SOC WL 554 Analytical Perspectives on Social Welfare Policy (3)

Broad overview of the social welfare policy process, including epistemological issues, content on social problem construction and definition, policy agendas and case study methodology. Introduction to analytical tools and concepts needed to take a proactive role in policy development, advocacy, implementation, and policy research.

SOC WL 556 West Coast Poverty Center Seminar Series (1, max. 15)

Presents cutting-edge research on poverty, inequality, and public policy. Offered: AWSp.

SOC WL 557 Dissertation and Career Seminar (1, max. 20)

Orients advanced PhD students to three main tasks: dissertation, job market, and entering teaching and research careers. Offered: AWSp.

SOC WL 559 Preparing to Teach: Instructional Theory and Practice (3)

Teaching conceptualized as professional practice. Focuses on integration of theory, research and educational strategies, techniques, and skills into students' practice as educators. Classroom discussions and activities promote reflection, exploration, critical analysis, and experimentation.

SOC WL 577 Promoting Well-Being among At-Risk Groups through Prevention Research (3)

Nurios Interdisciplinary overview of major concepts and methods in health promotion and prevention research, with emphasis on at-risk populations. Attentive to health disparities, collaboration with diverse communities and biobehavioral advances in addition to application of theory and prevention-science framework. Encourages interdisciplinary participation and supporting students in articulating their research perspectives.

SOC WL 578 Seminar in Special Topics for Prevention Research (1, max. 30)

Interdisciplinary overview of major concepts in promotion of mental health and prevention of mental distress with prevention science as framework. Provides conceptual foundations for advanced study in specialized aspects of mental health prevention research. Credit/no-credit only.

SOC WL 579 Interdisciplinary Approaches to Prevention Science: Children and Adolescents (3)

Overview of theory, research, and practice in prevention science. Developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21). Designed for interdisciplinary dialogue, and includes guest faculty from around the University who are specialists in course topics. Credit/no-credit only.

SOC WL 580 Quantitative Research Methods and Design

(3) Logic, terminology, and methods of quantitative social science approaches to correlational, experimental, quasi-experimental, survey, and program evaluation research. Components of the research process (problem definition, concept explication, ethical evaluating, and designing defensible quantitative research studies).

SOC WL 581 Qualitative Research Methods and Design

(3) Theoretical and methodological foundations of a range of qualitative methods relevant to social welfare and social science research. Fundamentals of qualitative research design and implementation, including framing research questions, sampling, data collection, analytical methods, and quality criteria. Focus on ethics, cultural sensitivity, and community-based research with vulnerable populations.

SOC WL 582 Research Practicum (3-) Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.

SOC WL 583 Research Practicum (-3) Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.

SOC WL 584 Teaching Practicum (3) Supervised teaching of a required course or teaching as a co-instructor with a faculty member. Learning contract used to target specific teaching competencies, e.g., assessing and evaluating student outcomes, identifying class session goals and objectives, tailoring instruction methods to diverse learning styles. Credit/no-credit only. Offered: AWSpS.

SOC WL 585 Qualitative Methods in Social Work Research I (3) The first in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 586 Qualitative Methods in Social Work Research II (3) The second in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 589 Multivariate Data Analysis for the Social Sciences (4, max. 8) Erosheva Provides social scientists with an introduction to multivariate analysis techniques and the knowledge to carry them out. Focuses on statistical methods that explore relationships between observed variables. Topics include principal components, cluster, factor, latent class analysis. Prerequisite: SOC WL 587, SOC WL 588, or equivalent. Offered: jointly with CS&SS 589; A.

SOC WL 590 Topics in Advanced Research Methods (3)

Special topics in social and behavioral research design for advanced graduate students. Topics vary and focus on community-based research methods and measurement construction for culturally diverse populations. Prerequisite: doctoral student in social welfare or related discipline; advanced master's level students by permission of instructor.

SOC WL 591 Seminar on Topics in Social Welfare (1-3, max. 15)

SOC WL 598 Issues and Priorities in Social Welfare Research (3) Foundations in the definitions of theory; the socially constructed nature of theory and definitions of social "problems"; conceptual and theoretical perspectives on human society, interaction, and change; and analysis of the theoretical foundations of social science research paradigms.

SOC WL 599 Research Problems and Priorities in Social Work and Social Welfare (3)

Assists students in applying theory in building an original conceptual model. Emphasizes critical thinking, including ideological, political, methodological, and ethical contexts/implications of ideas, theories, and models that shape social welfare scholarship and its application to social practice. Prerequisite: admission to social welfare PhD program or permission of instructor.

SOC WL 600 Independent Study or Research (*-)

Prerequisite: approval of a well-specified plan by the instructor and program director. Includes a written product. Credit/no-credit only. Offered: AWSpS.

SOC WL 800 Doctoral Dissertation (*-) Offered: AWSpS.

Social Welfare (BASW)**SOC WF 101 Social Work in Action: Bridging the Gap From Science to Service (5)**

I&S Explores current social work practice and research applied to major societal problems. Lectures and discussions by leading faculty introduce students to the evidence-based perspective underlying program planning and practice innovation. Topics include: juvenile delinquency, child maltreatment, domestic violence, foster care reform, mental health, school violence, substance abuse, and poverty. Offered: A.

SOC WF 120 International Responses to Human Needs: Social Welfare Policies and Services (5)

Focuses on major global social services such as poverty, immigration, and health that are reshaping social welfare policies and services throughout the world. Provides a comparative overview of social welfare policies and programs in the United States and selected other countries.

SOC WF 200 Introduction to Social Welfare Practice (5)

I&S Introduction to the field of social work, including the theoretical concepts and institutional framework that guide practice. Overview of social work profession and social welfare system within which it operates. Lectures supplemented by exercises, films, guest lectures, and class discussions. Offered: A.

SOC WF 201 Advances in Prevention Science: Bridging the Gap from Science to Service (5)

I&S Investigates the potential for preventing major social problems (child abuse and neglect, alcohol misuse, and interpersonal violence). Critically examines the state of prevention science, includes dialogue about ways to enhance the exchange of ideas between research and practice communities, and explores implications for social policy.

SOC WF 215 Intergroup Dialogues (3)

DIV Explores issues of social identities, differences, and inequalities to build understanding, skills, and values for bringing about greater social justice using dialogic communication.

SOC WF 250 Writing for Social Welfare (2)

Focuses on producing short essays, paragraphs, and individual sentences. Discusses writing conventions and students' questions and challenges; analyzes writing samples; and practices short writing to develop greater ease with writing well and writing frequently. Credit/no-credit only.

SOC WF 297 Study Abroad in Social Work (1-15, max. 15)

For participants in a UW study abroad program. Specific content varies and must be individually evaluated.

SOC WF 310 Social Welfare Practice I (5)

Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Offered: A.

SOC WF 311 Social Welfare Practice II (5)

Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, interven-

tion, termination, and evaluation. Prerequisite: SOC WF 310. Offered: W.

SOC WF 312 Social Welfare Practice III (5)

(5) Focus on macro systems in a diverse society using the generalist perspective. The implications of system resources and configurations for meeting human needs are considered. The role and function of generalist social workers to understand and advocate for system development and change is emphasized. Prerequisite: SOC WF 311. Offered: Sp.

SOC WF 315 Community Service Learning (1-5, max. 6)

Opportunity for students to apply social work theory to practice, to advocate for social justice, and to be involved in community service. Students learn by connecting classroom theory and community-based experience through the completion of community-based projects in social work-type agencies. Majors only.

SOC WF 320 Social Welfare Policy (5)

I&S Emphasizes policy and program development in social welfare with emphasis on the context, making, and unmaking of social policy. Covers policy formulation as well as current and emerging policies in social welfare. Prerequisite: SOC WF 200. Offered: WSp.

SOC WF 390 Introduction to Social Welfare Research (5)

Introduction to logic of the scientific method as applied to social work and social welfare practice, to the design and conduct of a research study, and to data collection and summarization. Skill development in critical consumption of social welfare research. Prerequisite: either STAT 220 or QMETH 201. Offered: A.

SOC WF 402 Human Behavior and Social Environment I (5)

I&S Focuses on understanding human development across the lifespan. Integrates biological, psychological, structural, environmental, political, global, and socio-cultural perspectives. Explores the relationship between the person and the environment including families, groups, organizations, communities, and institutions.

SOC WF 404 Cultural Diversity and Justice (5)

I&S, DIV History and culture of disadvantaged and oppressed groups served by social welfare generalist practitioners. Offered: Sp.

SOC WF 405 Fieldwork Seminar (1-4, max. 9)

Integrates social work practicum experiences with prior and concurrent coursework in social sciences, social work, and research. Includes discussion of class presentations and simulations or practice situations that combine knowledge and skill utilization. Student logs provide a basis for individual goal identification and achievement. Required of social welfare seniors. Offered: AWSp.

SOC WF 410 Evidence-Based Practices in Social Welfare (3)

Focuses on interface between social work research and practice, with attention to origins and defining features of evidence-based practice (EBP) and approaches to intervention consistent with EBP framework. Integrates content on research and practice priorities, and provides students with knowledge and skills to promote use of theory-driven, empirically-supported interventions.

SOC WF 415 Beginning Field Instruction (1-12, max. 12)

Students are placed in selected social service agencies and accept beginning social service assignments under the supervision of competent agency personnel. Credit/no-credit only. Offered: AWSp.

SOC WF 435 Skills for Social Welfare Practice (1)

Builds on first-year generalist practice content. Provides skill building in one or two areas of social work practice relevant to many practice settings. Topic chosen by students and faculty. Credit/no-credit only.

SOC WF 442 Building Competencies for Intergroup Dialogue Facilitation (5)

VLPA/I&S, DIV Focuses on both knowledge and skills development for peer facilitators. Topics include philosophy and principles of dialogic education and dialogic communication; intergroup communication; social identity development; principles of working with conflict; group dynamics, observation, and facilitation;

team building among co-facilitators; and creating a support system among instructors and facilitators.

SOC WF 443 Facilitating Intergroup Dialogue (5) VLPA/I&S, DIV Practicum seminar providing instruction, consultation, and supervision of peer group facilitators. Focuses on comparison of facilitation experiences and consultations, trouble-shooting with other facilitators, co-facilitator team building, and planning for dialogues. Exploration of specific, current intergroup issues, such as affirmative action and immigration. Continuation of team-building work begun in SOC WF 442.

SOC WF 445 Special Topics in Social Work Practice Methods (3, max. 6) Examines roles, skills, and methods in designated areas of social work practice. Content builds on foundation practice methods.

SOC WF 450 Integrative Seminar: Poverty Analysis (5) Critical analysis of poverty both in the United States and from a global perspective. Analytical and descriptive focus on measurement, processes of production and perpetuation, and theoretical perspectives that lead to different social and economic policy responses.

SOC WF 460 Chemical Dependency: Assessment and Treatment (3) Provides students the knowledge and basic skills needed to recognize and understand the dynamics of chemical dependency in the lives of individuals. Students learn how to assess the presence of this disorder and what the issues are in referring individuals to treatment.

SOC WF 465 Social Welfare Capstone Seminar (1) Students demonstrate and reflect on mastery of core competencies and respective practice behaviors foundational to generalist practice. Studies analyze and synthesize data from their experiences in the BASW program and integrate this understanding with their new identity as a professional social worker. Credit/no-credit only.

SOC WF 490 Independent Research in Social Welfare (1-15, max. 15) Individual work with faculty member to assist with current research project(s). Students trained and supervised in some or all of the following research tasks: literature review, data analysis, record-keeping, interviewing, report writing, data entry and coding, data collection, and other tasks commonly found in research problems in social welfare. Credit/no-credit only.

SOC WF 491 Honors Seminar (1, max. 3) Three quarter seminar for students admitted into the BASW Honors Program. Guides students through stages of research conceptualization and proposal writing, IRB application, data collection and analysis, and dissemination. Includes feedback and discussion with instructor and peers. Credit/no-credit only.

SOC WF 492 Honors Thesis I (3-) Part one of a two quarter series for BASW Honors students writing their honors thesis. Students carry out an individual project of their choosing under the guidance of a faculty member. Focuses on data collection, management, and preliminary analysis.

SOC WF 493 Honors Thesis II (-3) Part two of a two quarter series for BASW Honors students writing their honors thesis. Students carry out an individual project of their choosing under the guidance of a faculty member. Focuses on data analysis, research writing, and presentation of results.

SOC WF 495 Special Topics in Generalist Social Welfare (1-5, max. 15) Readings, lectures, and discussions pertaining to significant topics of special and current interest to social workers.

SOC WF 497 Advanced Study Abroad in Social Work (1-15, max. 15) For participants in a UW study abroad program. Specific content varies and must be individually evaluated.

SOC WF 499 Independent Study in Social Welfare (1-15, max. 15) Independent reading or independent study. Includes written paper. Not open to graduate or non-matriculated students.

FACULTY

Faculty may have multiple appointments, but are listed by their primary appointing department only.

College of Arts and Sciences

American Ethnic Studies

Professors

Flores, Lauro Hugo 1980; PhD, 1980, University of California (San Diego)

Kashima, Tetsuden * 1976; MA, 1968, San Francisco State; PhD, 1975, University of California (San Diego)

Sumida, Stephen Hiro 1998; MA, 1970, Columbia University; PhD, 1982, University of Washington

Walter, John Christopher * 1988, (Emeritus); MA, 1968, University of Bridgeport; PhD, 1971, University of Maine

Associate Professors

Bonus, Enrique Caudal 1998; MA, 1990, California State University, Fresno; PhD, 1997, University of California (San Diego)

Gamboa, Erasmo * 1975; MA, 1973, University of Washington; PhD, 1984, University of Washington

Nomura, Gail Mieko 1999; MA, 1971, University of California (Berkeley); PhD, 1978, University of Hawaii

Retman, Sonnet H. 2002; PhD, 1997, University of California (Los Angeles)

Salas, Elizabeth 1987; MA, 1977, California State University, Los Angeles; PhD, 1987, University of California (Los Angeles)

Assistant Professors

Cordova, Dorothy Laigo 1988, (Affiliate); BA, 1976, Western Washington University

Pinedo-Turnovsky, Carolyn 2009; MA, 2003, City University of New York; PhD, 2006, City University of New York

Pittman, LaShawnDa 2013; MA, 2000, University of Connecticut; PhD, 2010, Northwestern University

Vu, Thuy Quoc 1987, (Affiliate); MA, 1972, Michigan State University; PhD, 1973, Michigan State University

Senior Lecturer

So, Connie Ching 1990; MPA, 1989, Princeton University

Lecturers

Atienza, Richard Mangilaya 2006; MAE, 2008, St. Joseph's College

Kirk, Brian Lamont 2014; MM, 1990, New York University

Scott, Terry Anne 2011; MA, 2002, Southern Methodist University

American Indian Studies

Professors

Harmon, Alexandra J. * 1991; JD, 1972, Yale University; MA, 1990, University of Washington; PhD, 1995, University of Washington

Hart, Daniel Winfield 1999; MFA, 1985, Temple University
Oliver, Marvin Emmett 1974, (Emeritus); MFA, 1973, University of Washington

Teuton, Christopher Barrett 2014; MA, 1995, University of Wisconsin (Madison); PhD, 2003, University of Wisconsin (Madison)

Witherspoon, Gary Jay * 1987, (Emeritus); MA, 1969, University of Chicago; PhD, 1970, University of Chicago

Associate Professors

Cote, Charlotte June 2001; MA, 1996, University of California (Berkeley); PhD, 2002, University of California (Berkeley)

Fryberg, Stephanie Ann 2013; MA, 1999, Stanford University; PhD, 2002, Stanford University

Million, Dian Lynn 2002; MA, 1998, University of California (Berkeley); PhD, 2004, University of California (Berkeley)

Lecturer

Colonnese, Tom Grayson 1993; MA, 1974, University of Northern Iowa; PhD, 1981, Arizona State University

Anthropology

Professors

Anagnost, Ann Stasia * 1990; MA, 1977, University of Michigan; PhD, 1985, University of Michigan

Anderson, Eugene Newton 2006, (Affiliate); PhD, 1967, University of California (Berkeley)

Close, Angela Elizabeth * 1995, (Emeritus); MA, 1974, Cambridge University (UK); PhD, 1976, Cambridge University (UK)

Duncan, Bettina Shell * 1995; MS, 1988, University of Wisconsin; PhD, 1994, Pennsylvania State University

Grayson, Donald Kenneth * 1975; MA, 1969, University of Oregon; PhD, 1973, University of Oregon

Harrell, Stevan * 1974; MA, 1971, Stanford University; PhD, 1974, Stanford University

Hunn, Eugene Stuart 1972, (Emeritus); MA, 1969, University of California (Berkeley); PhD, 1973, University of California (Berkeley)

Kahn, Miriam * 1986; MA, 1974, Bryn Mawr College; PhD, 1980, Bryn Mawr College

Keyes, Charles F. * 1965, (Emeritus); PhD, 1965, Cornell University

Lape, Peter Vanderford 2000; MA, 1995, San Francisco State; PhD, 2000, Brown University

Leonetti, Donna Lockwood 1974, (Emeritus); MA, 1967, University of Washington; PhD, 1976, University of Washington

Li, Yongxian 2009, (Affiliate); BA, 1979, Sichuan University (China)

Nason, James D. * 1968, (Emeritus); MA, 1967, University of Washington; PhD, 1970, University of Washington

Newell, Laura Livingston * 1957, (Emeritus); MA, 1957, Northwestern University; PhD, 1967, University of Washington

Nute, Peter E. * 1968, (Emeritus); PhD, 1969, Duke University

O'Connor, Kathleen Ann * 1999; MA, 1987, State University of New York (Albany); PhD, 1995, State University of New York (Albany)

Ottenberg, Simon * 1955, (Emeritus); PhD, 1957, Northwestern University

Pena, Devon Gerardo 1999; MA, 1978, University of Texas (Austin); PhD, 1983, University of Texas (Austin)

Rhodes, Lorna Amarasingham * 1983, (Emeritus); MA, 1971, Cornell University; PhD, 1973, Cornell University

Sivaramakrishnan, K. 1999, (Affiliate); MA, 1979, Jamia Millia Islamia University (India); MS, 1991, Yale University; MPhil, 1993, Yale University; PhD, 1996, Yale University

Smith, Eric Alden * 1980, (Emeritus); MA, 1976, Cornell University; PhD, 1980, Cornell University

Spain, David Howard * 1968, (Emeritus); MA, 1962, Ohio State University

Stein, Julie K. 1980; MA, 1976, University of Minnesota; PhD, 1980, University of Minnesota

Takezawa, Yasuko I. 1990, (Affiliate); MA, 1985, University of Washington; MIA, 1987, University of Tsukuba (Japan); PhD, 1989, University of Washington

Taylor, Janelle Sue 1999; MA, 1990, University of Chicago; PhD, 1999, University of Chicago

Winans, Edgar Vincent * 1957, (Emeritus); MA, 1954, University of California (Los Angeles); PhD, 1959, University of California (Los Angeles)

Associate Professors

Bilaniuk, Laada Myroslava 1997; MA, 1991, University of Michigan; PhD, 1998, University of Michigan

Chapman, Rachel R. 2004; MA, 1988, Yale University; MA, 1991, University of California (Los Angeles); PhD, 1998, University of California (Los Angeles)

Eck, Gerald Gilbert * 1974, (Emeritus); MA, 1974, University of California (Berkeley); PhD, 1977, University of California (Berkeley)

Feathers, James K. * 1983, (Research); MA, 1985, University of Washington; PhD, 1990, University of Washington

Fitzhugh, John Benjamin 1997; MA, 1992, University of Michigan; PhD, 1996, University of Michigan

Goodreau, Steven M. 2001; MA, 1998, Pennsylvania State University; PhD, 2001, Pennsylvania State University

Haakanson, Sven David Jr. 2013; MA, 1996, Harvard University; PhD, 2000, Harvard University

Hoffman, Daniel J. 2004; MA, 2001, Duke University; MD, 2004, Duke University

Holman, Darryl Jon * 1999; MS, 1990, University of Wisconsin; PhD, 1996, Pennsylvania State University

Jolles, Carol Zane 1988, (Emeritus); MA, 1985, University of Washington; PhD, 1990, University of Washington

Kramer, Patricia Ann 1993; PhD, 1998, University of Washington

Liebow, Edward Bruce 1987, (Affiliate); MA, 1978, Arizona State University; PhD, 1986, Arizona State University

Llobera, Marcos 2004; MSc, 1993, University of Leicester (UK); DPhil, 1999, University of Oxford (UK)

Lowe, Celia 1999; MPhil, 1996, Yale University; PhD, 2000, Yale University

Assistant Professors

Amrute, Sareeta Bipin 2008; MA, 2001, University of Chicago; PhD, 2007, University of Chicago

Eisenberg, Daniel Thomas Abraham 2012; PhD, 2012, Northwestern University

Etnier, Michael A. 1993, (Affiliate); MA, 1997, University of Washington; PhD, 2002, University of Washington

Gonzalez, Sara Lynae 2013; MA, 2006, University of California (Berkeley); PhD, 2011, University of California (Berkeley)

Marwick, Benjamin 2008; MA, 2002, University of West Australia; PhD, 2008, Australian National University

Minichillo, Thomas Joseph 1996, (Affiliate); MA, 1995, Ohio State University; PhD, 2005, University of Washington

Norman, Karma 1997, (Affiliate); MA, 2001, University of Washington; PhD, 2007, University of Washington
 Taylor, Katherine Markham 2000, (Affiliate); MA, 1992, University of Arizona; PhD, 2000, University of Arizona
 Wall-Scheffler, Cara 2007, (Affiliate); MPhil, 2001, University of Cambridge (UK); PhD, 2005, University of Cambridge (UK)

Willson, Margaret Elizabeth 2008, (Affiliate); MA, 1982, Western Washington University; MPhil, 1985, London School of Economics (UK); PhD, 1989, London School of Economics (UK)

Senior Lecturer

Bentz, Marilyn Grace * 1968, (Emeritus); MSW, 1967, University of Illinois; PhD, 1984, University of Washington

Lecturers

Barker, Holly M. 2004; MA, 1993, American University; PhD, 2000, American University

Carney, Megan Anne 2012; MA, 2009, University of California (Santa Barbara); PhD, 2012, University of California (Santa Barbara)

Johnson, Jessica Ann 2003; MA, 2006, University of Washington; PhD, 2010, University of Washington

Olson, Krisjon Rae 2013; MA, 2001, University of California (Berkeley); PhD, 2007, University of California (Berkeley)

Perez, Michael Vincente 2011; MA, 2006, Michigan State University; PhD, 2011, Michigan State University

Taylor, Matthew Strickland 2013; MA, 2001, Texas Technological University; PhD, 2006, University of Albany

Applied Mathematics

Professors

Adams, Loyce Mae * 1985; MS, 1978, University of Virginia; PhD, 1983, University of Virginia

Criminale, William O. * 1968, (Emeritus); PhD, 1960, Johns Hopkins University

De Boor, Carl R. 2004, (Affiliate); Diploma, 1959, University of Hamburg (Germany); PhD, 1966, University of Michigan
 Deconinck, Bernard 1999; MSc, 1995, University of Colorado (Boulder); PhD, 1998, University of Colorado (Boulder)
 Greenbaum, Anne 1997; MA, 1978, University of California (Berkeley); PhD, 1981, University of California (Berkeley)

Kutz, Jose Nathan 1997; PhD, 1994, Northwestern University

LeVeque, Randall John * 1985; PhD, 1982, Stanford University

Lewis, Mark Alun 1988, (Affiliate); PhD, 1990, Oxford University (UK)

Martin, Richard Douglas * 1969; MS, 1965, University of Washington; PhD, 1969, Princeton University

Murray, James Dickson * 1988, (Emeritus); PhD, 1956, University of St. Andrews (UK); MA, 1961, Oxford University (UK); DSc, 1968, Oxford University (UK)

O'Malley, Robert Edmund Jr. * 1990, (Emeritus); MS, 1961, University of New Hampshire; PhD, 1966, Stanford University

Pearson, Carl Erik * 1965, (Emeritus); PhD, 1949, Brown University

Qian, Hong 1997; PhD, 1989, Washington University

Schmid, Peter Josef * 1993, (Affiliate); MS, 1989, Technical University of Munich (Germany); PhD, 1993, Massachusetts Institute of Technology

Swanson, Kristin Rae 1996, (Affiliate); MD, 1998, University of Washington; PhD, 1999, University of Washington

Tung, Ka Kit 1988; MS, 1972, California Institute of Technology; PhD, 1977, Harvard University

Wan, Frederic Yui-Ming * 1983, (Affiliate); MS, 1963, Massachusetts Institute of Technology; PhD, 1965, Massachusetts Institute of Technology

Associate Professors

Hetmaniuk, Ulrich Ladislav 2008; MS, 2002, University of Colorado (Boulder); PhD, 2002, University of Colorado (Boulder)

Kot, Mark * 1989; MS, 1979, Cornell University; MS, 1984, University of Arizona; MS, 1987, University of Arizona; PhD, 1987, University of Arizona

Shea-Brown, Eric Todd 2007; MS, 2001, Princeton University; PhD, 2004, Princeton University

Todorov, Emanuil 2009; BS, 1993, West Virginia Wesleyan College

Assistant Professors

Dimitrov, Dobromir T. 2008, (Affiliate); MSc, 2003, University of Texas (Arlington); PhD, 2005, University of Texas (Arlington)

Lorig, Matthew James 2014; PhD, 2011, University of California (Santa Barbara)

Shlizerman, Eli 2009; MSc, 2005, Weizmann Institute For Science (Israel); PhD, 2009, Weizmann Institute For Science (Israel)

Art and Art History

Professors

Berger, Paul Eric * 1978, (Emeritus); MFA, 1973, State University of New York (Buffalo)

Bravmann, Rene A. 1968, (Emeritus); MA, 1963, Indiana University; PhD, 1971, Indiana University

Brody, David * 1996; MFA, 1983, Yale University

Carraher, Ronald G. * 1967, (Emeritus); MA, 1961, San Jose State University

Casteras, Susan P. * 1996; MA, 1973, Yale University; MPhil, 1975, Yale University; PhD, 1977, Yale University

Celentano, Francis * 1966, (Emeritus); MA, 1957, New York University

Cheng, Karen 1997; MDes, 1996, University of Cincinnati
 Christofides, Constantine George * 1966, (Emeritus); MA, 1949, University of Michigan; MA, 1950, University of Michigan; PhD, 1956, University of Michigan

Clausen, Meredith Leslie 1979; MA, 1972, University of California (Berkeley); PhD, 1975, University of California (Berkeley)

Cummins, Rebecca Jean 2001; MA, 1982, University of New Mexico; PhD, 2003, University of Technology (Australia)

Failing, Patricia A. * 1982, (Emeritus); MA, 1974, University of California (Berkeley)

Gale, Ann Elizabeth 1995; MFA, 1991, Yale University

Garvens, Ellen Jo * 1994; MA, 1983, University of New Mexico; MFA, 1987, University of New Mexico

Gates, Mary Gardner 1995, (Affiliate); MA, 1969, University of Iowa; PhD, 1981, Yale University

Goldsmith, Layne * 1983; MA, 1975, San Jose State University; MFA, 1979, Cranbrook Academy of Art

Govedare, Philip Bainbridge * 1991; MFA, 1984, Tyler School of Art

Hixson, William John * 1950, (Emeritus); MFA, 1950, University of Oregon

Holm, Bill * 1968, (Emeritus); MFA, 1951, University of Washington

Hu, Mary Lee * 1980, (Emeritus); MFA, 1967, Southern Illinois University

Hurley, Denzil * 1994; MFA, 1979, Yale University

Jones, Robert C. * 1960, (Emeritus); MS, 1959, Rhode Island School of Design

Kartsonis, Anna D. 1983, (Emeritus); MA, 1968, New York University; PhD, 1982, New York University

Kehl, Richard Lee * 1962, (Emeritus); MFA, 1961, Kansas City Art Institute

Kingsbury, Martha 1968, (Emeritus); MA, 1963, Harvard University; PhD, 1969, Harvard University

Lin, Zhi 2001; MFA, 1989, University of London, UK; MFA, 1992, University of Delaware

Lundin, Norman Kent * 1964, (Emeritus); MFA, 1963, University of Cincinnati

Marshall, John Carl * 1970, (Emeritus); MFA, 1968, Syracuse University

Opperman, Hal N. * 1967, (Emeritus); MA, 1963, University of Chicago; PhD, 1972, University of Chicago

O'Toole, Helen Josephine 1996; MFA, 1989, The School of Art Institute of Chicago

Ozubko, Christopher * 1981; MFA, 1981, Cranbrook Academy of Art

Pawula, Kenneth John 1965, (Emeritus); MA, 1962, University of California (Berkeley)

Spafford, Michael Charles * 1963, (Emeritus); MA, 1960, Harvard University

Taylor, Norman Jeffrey * 1968, (Emeritus); MA, 1967, University of Iowa; MFA, 1967, University of Iowa

Wadden, Douglas James * 1970; MFA, 1970, Yale University

Walker, James S. * 1987; MFA, 1983, Rhode Island School of Design

Warashina, M. Patricia * 1970, (Emeritus); MFA, 1964, University of Washington

Whitehill-Ward, John * 1975, (Emeritus); MS, 1974, Chicago Institute of Design & Technology

Wright, Robin Kathleen 1983; MA, 1977, University of Washington; PhD, 1985, University of Washington

Associate Professors

Ahn, Sang-Gyeun 2006; MA, 2000, Purdue University; MFA, 2002, University of Illinois

Cabeen, Louise Ellen * 1993; MFA, 1989, The School of Art Institute of Chicago

Gould, Annabelle K. 2003; MFA, 1999, Cranbrook Academy of Art

Jeck, Doug A. * 1996; MFA, 1989, The School of Art Institute of Chicago

Labitzke, Curt Wayne * 1984; MFA, 1984, University of Notre Dame

Lingo, Estelle C. 2006; MA, 1993, Brown University; PhD, 1999, Brown University

Lingo, Stuart Patrick 2006; MA, 1986, University of London, UK; PhD, 1998, Harvard University

Matthews, Kristine 1989; MA, 1997, Royal College of Art (UK)

McNeel, Amie Laird 2007; MFA, 1990, University of California (Berkeley)

Praczkowski, Edward * 1965, (Emeritus); MFA, 1965, Cranbrook Academy of Art

Proctor, Richard Macfarlane * 1962, (Emeritus); MA, 1962, Michigan State University

Roesler, Axel 2005; Diploma, 2000, Burg Giebichenstein (Germany); MFA, 2001, Ohio State University; PhD, 2005, Ohio State University

Scheier, Shirley Elizabeth * 1986; MFA, 1985, University of Wisconsin (Madison)

Wang, Haicheng 2008; MA, 2000, Peking University (China); PhD, 2007, Princeton University

Wieczorek, Marek Krzysztof 1997; MA, 1990, University of Amsterdam (Netherlands); MPhil, 1992, Columbia University; PhD, 1997, Columbia University

Zirpel, Mark 2008; MFA, 1989, San Francisco Art Institute

Assistant Professors

Drpic, Ivan 2011; MA, 2005, Harvard University; PhD, 2011, Harvard University
Hirsch, Tad 2011; MDes, 2000, Carnegie Mellon University; MS, 2004, Massachusetts Institute of Technology; PhD, 2008, Massachusetts Institute of Technology
Khullar, Sonal 2009; MA, 2004, University of California (Berkeley); PhD, 2009, University of California (Berkeley)
Norlen, Linda Christine 2006, (Affiliate); MFA, 2007, Goucher College

Lecturers

Berk, Leo Saul 1997; MFA, 1999, University of Washington
Burns, Erin Elyse 2007; MFA, 2009, University of Washington
Chang, Alex Y 1996; MA, 2014, University of Washington
Cowie, Claire M. 1998; MFA, 1999, University of Washington
Freeman, Julia E. 2006; MA, 2007, University of Washington
Johnson, Eirik Anders 1997; MFA, 2003, San Francisco Art Institute
Kennedy, David A. 2011; MFA, 2013, University of Washington
Muren, Dominic Laberge 2008; MA, 2007, The University of the Arts
Rice, Kolya 1994; MA, 1993, Rice University
Seisler, Nicole Yvette 2014; MFA, 2011, Art Institute of Chicago
Smith, Michael P. 2005; MA, 2006, University of Washington
Tihanyi, Timea 2001; MD, 1993, Semmelweis Medical University (Hungary); MFA, 2003, University of Washington

Asian Languages and Literature

Professors

Boltz, William G. * 1978; MA, 1969, University of California (Berkeley); PhD, 1974, University of California (Berkeley)
Cox, Collett Davis * 1985; MA, 1974, Columbia University; MPhil, 1976, Columbia University; PhD, 1983, Columbia University
Knechtges, David Richard 1972, (Emeritus); MA, 1965, Harvard University; PhD, 1968, University of Washington
Pauwels, Heidi Rika Maria 1990; MA, 1986, Catholic University of Leuven (Belgium); PhD, 1994, University of Washington
Salomon, Richard Geoffrey * 1978; PhD, 1975, University of Pennsylvania
Shapiro, Michael Charles 1970; MA, 1970, University of Chicago; PhD, 1973, University of Chicago
Yue-Hashimoto, Anne Oi-Kan * 1980; MA, 1963, University of Texas (unspecified); PhD, 1966, Ohio State University

Associate Professors

Atkins, Paul Stephen 2002; MA, 1994, Stanford University; PhD, 1999, Stanford University
Bhowmik, Davinder Leslie 1987; MA, 1993, University of Washington; PhD, 1997, University of Washington
Brandauer, Frederick Paul * 1973, (Emeritus); MDiv, 1958, United Theological Seminary; MA, 1965, University of Pittsburgh; PhD, 1973, Stanford University
Hamm, John Christopher 1999; MA, 1994, University of California (Berkeley); PhD, 1999, University of California (Berkeley)

Handel, Zev Joseph * 1998; MA, 1992, University of California (Berkeley); PhD, 1998, University of California (Berkeley)
Kano, Tamako-Niwa * 1962, (Emeritus); MA, 1946, Radcliffe; PhD, 1956, Radcliffe
Mack, Edward Thomas 2002; MA, 1996, Columbia University; PhD, 2002, Harvard University
Ohta, Amy Snyder * 1990; MA, 1990, University of California (Los Angeles); PhD, 1993, University of California (Los Angeles)

Assistant Professors

Cho, Heekyoung 2010; MA, 1999, Yonsei University (Korea); PhD, 2010, University of Chicago
Dubrow, Jennifer Eichel 2006; MA, 2002, University of Chicago; PhD, 2011, University of Chicago
Jesty, Justin 2011; MA, 2010, University of Chicago; PhD, 2010, University of Chicago
Knechtges, Tai-Ping C. 1990, (Affiliate); MA, 1974, Tunghai University (Taiwan); PhD, 1981, University of Washington
Lien, Yeongchung Edmund 2006, (Affiliate); MS, 1970, University of California (Berkeley); PhD, 1972, University of California (Berkeley); MA, 2006, University of Washington; PhD, 2011, University of Washington

Senior Lecturers

Ahmad, Jameel 2004; MA, 1996, Jawaharlal Nehru University (India); MPhil, 1998, Jawaharlal Nehru University (India); PhD, 2011, Jawaharlal Nehru University (India)
Bi, Nyan-Ping 2000; MA, 1988, Indiana University; PhD, 2000, Indiana University
Kim, Soohye 1994; MA, 1991, Florida International University; PhD, 1999, University of Washington
Matsuda-Kiami, Izumi 1996; MA, 1992, University of Wisconsin (Madison)
Nguyen, Kim O. 1984, (Emeritus); MA, 1967, University of California (Los Angeles); PhD, 1973, University of California (Los Angeles)
Nishikawa, Itsuko 2005; MA, 1999, Columbia University
Ohta, Kaoru * 1989; MA, 1984, Meiji Gakuin University (Japan); MA, 1987, University of California (Los Angeles); PhD, 1994, University of California (Los Angeles)
Sandjaja, Desiana Pauli 2004; MA, 2000, Ohio University
Yu, Liping 2004; MA, 1988, Tsinghua University (China); MA, 1998, Louisiana State University

Lecturers

Cao, Yu Qing 1988; MA, 1992, University of Washington; PhD, 2001, University of Washington
Chapman, Ian David 2012; MA, 2001, Fudan University (China); MA, 2003, Princeton University; PhD, 2007, Princeton University
Iwata, Akiko 2004; MA, 2001, University of Minnesota; MA, 2002, Columbia University
Kesavatana-Dohrs, Wiworn 1989; MA, 1984, University of Detroit; PhD, 1989, University of Michigan
Lenz, Timothy John 1989; MA, 1994, University of Washington; PhD, 1999, University of Washington
Pahlajrai, Prem 2002; MS, 1990, Georgia Institute of Technology; MA, 2005, University of Washington; PhD, 2013, University of Washington
Turner, Bich Ngoc 2014; MA, 2003, University of Hawaii; PhD, 2011, University of Hawaii
Won, Eunyoung 2010; MA, 2004, Michigan State University

Astronomy

Professors

Agol, Eric 2003; PhD, 1997, University of California (Santa Barbara)

Anderson, Scott Frederic * 1988; MA, 1980, University of California (Los Angeles); PhD, 1985, University of Washington

Bohm-Vitense, Erika Helga Kuth * 1967, (Emeritus); PhD, 1951, University of Kiel (Germany)

Brownlee, Donald Eugene * 1965; PhD, 1971, University of Washington

Connolly, Andrew J. 2006; PhD, 1993, University of London, UK

Dalcanton, Julianne 1998; PhD, 1995, Princeton University
Hawley, Suzanne Louise * 1999; MA, 1984, University of Texas (Austin); PhD, 1989, University of Texas (Austin)

Hodge, Paul William * 1965, (Emeritus); PhD, 1960, Harvard University

Ivezic, Zeljko 2004; PhD, 1995, University of Kentucky

King, Ivan Robert 2002, (Emeritus); MA, 1947, Harvard University; PhD, 1952, Harvard University

Linnell, Albert P. 2002, (Affiliate); PhD, 1950, Harvard University

Lutz, Julie Haynes 1998, (Emeritus); MS, 1968, University of Illinois; PhD, 1972, University of Illinois

Meadows, Victoria Suzanne 2007; PhD, 1994, University of Sydney (Australia)

Quinn, Thomas Reynolds * 1993; PhD, 1986, Princeton University

Sullivan, Woodruff T. III * 1973, (Emeritus); PhD, 1971, University of Maryland

Szkody, Paula * 1975; MS, 1972, University of Washington; PhD, 1975, University of Washington

Wallerstein, George * 1965, (Emeritus); PhD, 1958, California Institute of Technology

Associate Professors

Clark, Joanne Deborah Hughes 1994, (Affiliate); PhD, 1988, Queen Mary College (UK)
Juric, Mario 2014; PhD, 2006, Princeton University

Assistant Professors

Debattista, Victor P. 2004, (Affiliate); PhD, 1998, Rutgers University
Mc Quinn, Matthew Judd 2012; MA, 2006, Harvard University; PhD, 2009, Harvard University
Murphy, Thomas Williams Jr. 2000, (Affiliate); MS, 1996, California Institute of Technology; PhD, 2000, California Institute of Technology

Senior Lecturers

Larson, Ana Marie 1987; PhD, 1996, University of Victoria (Canada)
Laws, Christopher S. 1998; MS, 2001, University of Washington; PhD, 2004, University of Washington
Smith, Toby Russell 1988; MS, 1990, University of Washington; PhD, 1995, University of Washington

Biology

Professors

Amemiya, Chris T. 2004, (Affiliate); PhD, 1987, Texas A&M University
Ammirati, Joseph Frank 1979; MA, 1967, San Francisco State; PhD, 1972, University of Michigan
Bendich, Arnold J. 1969, (Emeritus); PhD, 1969, University of Washington
Bergstrom, Carl Theodore 2001; PhD, 1998, Stanford University
Bliss, Lawrence Carroll * 1978, (Emeritus); MSc, 1953, Kent State University; PhD, 1956, Duke University
Boersma, P. Dee * 1974; PhD, 1974, Ohio State University
Bradshaw, Harvey D. 1984; PhD, 1984, Louisiana State University

Carrington, Emily 2005; PhD, 1992, Stanford University
 Cattolico, Rose Ann 1975; MA, 1968, Temple University; PhD, 1973, State Univ of New York (Stony Brook)
 Cleland, Robert Erskine * 1964, (Emeritus); PhD, 1957, California Institute of Technology
 Cloney, Richard Alan * 1954, (Emeritus); MA, 1954, Humboldt State University; PhD, 1959, University of Washington
 Daniel, Thomas Louis * 1984; MS, 1978, University of Wisconsin; PhD, 1982, Duke University
 de la Iglesia, Horacio O. 2003; MA, 1991, University of Buenos Aires (Argentina); PhD, 1997, University of Massachusetts
 Del Moral, Roger 1968, (Emeritus); MA, 1966, University of California (Santa Barbara); PhD, 1968, University of California (Santa Barbara)
 Dunwiddie, Peter William 1998, (Affiliate); MS, 1976, University of Wisconsin; PhD, 1983, University of Washington
 Ebre, Thomas Glen 1997, (Emeritus); PhD, 1968, University of Chicago
 Hall, Benjamin Downs 1963, (Emeritus); MA, 1956, Harvard University; PhD, 1959, Harvard University
 Halperin, Walter * 1968, (Emeritus); MS, 1961, Southern Connecticut State University; PhD, 1965, University of Connecticut
 Haskins, Edward F. * 1966, (Emeritus); MS, 1962, University of Minnesota; PhD, 1965, University of Minnesota
 Hille, Merrill Burr * 1969, (Emeritus); PhD, 1965, Rockefeller University
 Huey, Raymond Brunson * 1977, (Emeritus); MA, 1969, University of Texas (Austin); PhD, 1975, Harvard University
 Kenagy, George James * 1976, (Emeritus); PhD, 1972, University of California (Los Angeles)
 Kerr, Benjamin B. 2005; PhD, 2002, Stanford University
 Klicka, John Thomas 2012; MS, 1994, Texas A&M University; PhD, 1999, University of Minnesota
 Kohn, Alan Jacobs * 1961, (Emeritus); PhD, 1957, Yale University
 Kozloff, Eugene Nicholas * 1961, (Emeritus); MA, 1946, University of California (Berkeley); PhD, 1950, University of California (Berkeley)
 Kruckeberg, Arthur Rice * 1950, (Emeritus); PhD, 1950, University of California (Berkeley)
 Laird, Charles David * 1968, (Emeritus); PhD, 1966, Stanford University
 Leopold, Estella Bergere * 1976, (Emeritus); MS, 1950, University of California (Berkeley); PhD, 1955, Yale University
 Moody, William James * 1982; PhD, 1977, Stanford University
 Moore, Sue Ellen 2001, (Affiliate); MS, 1979, San Diego State University; PhD, 1997, Scripps Oceanographic Institution
 Odell, Garrett M. * 1985, (Emeritus); PhD, 1972, Johns Hopkins University
 Olmstead, Richard Glenn 1996; PhD, 1988, University of Washington
 Orians, Gordon H. * 1960, (Emeritus); PhD, 1960, University of California (Berkeley)
 Paine, Robert Treat * 1962, (Emeritus); MS, 1958, University of Michigan; PhD, 1961, University of Michigan
 Palka, John Milan * 1969, (Emeritus); PhD, 1965, University of California (Los Angeles)
 Parichy, David M. 2005; PhD, 1997, University of California (Davis)
 Peichel, Catherine L. 2003, (Affiliate); PhD, 1998, Princeton University
 Perkel, David James 2000; PhD, 1992, University of California (San Francisco)

Riddiford, Lynn Moorhead * 1973, (Emeritus); PhD, 1961, Cornell University
 Rohwer, Sievert Allen * 1973, (Emeritus); MA, 1970, University of Kansas; PhD, 1971, University of Kansas
 Ruesink, Jennifer Li 1990; MPhil, 1991, Cambridge University (UK); PhD, 1996, University of Washington
 Sebens, Kenneth 2005; PhD, 1977, University of Washington
 Sidor, Christian A. 2005; MS, 1997, University of Chicago; PhD, 2000, University of Chicago
 Strathmann, Richard Ray * 1972, (Emeritus); MS, 1966, University of Washington; PhD, 1970, University of Washington
 Summers, Adam P. 1995; MS, 1992, New York University; PhD, 1999, University of Massachusetts
 Swalla, Billie Joann 1999; MS, 1983, University of Iowa; PhD, 1988, University of Iowa
 Tewksbury, Joshua Jordan 2002; PhD, 2000, University of Montana
 Torii, Keiko Uemura * 1999; MS, 1989, University of Tsukuba (Japan); PhD, 1993, University of Tsukuba (Japan)
 Truman, James William * 1973, (Emeritus); MA, 1969, Harvard University; PhD, 1970, Harvard University
 Tsukada, Matsuo * 1969, (Emeritus); MSc, 1958, Osaka City University (Japan); PhD, 1961, Osaka City University (Japan)
 Van Volkenburgh, Elizabeth 1982; PhD, 1980, University of Washington
 Waaland, Joseph Robert 1969, (Emeritus); PhD, 1969, University of California (Berkeley)
 Wakimoto, Barbara Toshiko 1984; PhD, 1981, Indiana University
 Ward, Peter Douglas 1984; MS, 1973, University of Washington; PhD, 1976, McMaster University (Canada)
 Willows, Arthur Owen Dennis * 1969, (Emeritus); PhD, 1967, University of Oregon
Associate Professors
 Bakken, Aimee Hayes * 1973, (Emeritus); PhD, 1970, University of Iowa
 Borboroglu, Pablo Garcia 2009, (Affiliate); PhD, 2003, Univ Nacional Del Comahue (Argentina)
 Bosma, Martha Mae 1987; PhD, 1986, University of California (Los Angeles)
 Cooper, Mark Scott * 1990; PhD, 1985, University of California (Berkeley)
 Di Stilio, Veronica Sandra 2003; PhD, 1998, University of Massachusetts
 Hille Ris Lambers, Janneke 2006; PhD, 2001, Duke University
 Imaizumi, Takato 2008; MS, 1998, Tokyo Metropolitan University; PhD, 2001, Tokyo Metropolitan University
 Moens, Cecilia Bernelot * 1998, (Affiliate); PhD, 1993, University of Toronto (Canada)
 Nemhauser, Jennifer L. 2006; PhD, 2000, University of California (Berkeley)
 Parkhurst, Susan Marie 1994, (Affiliate); PhD, 1985, Johns Hopkins University
 Priess, James Raymond * 1993, (Affiliate); PhD, 1983, University of Colorado (Boulder)
 Rodriguez, Russell 1995, (Affiliate); PhD, 1983, Oregon State University
 Shou, Wenying 2008, (Affiliate); PhD, 2001, California Institute of Technology
 Stromberg, Caroline A.E. 2007; MSc, 1997, University of Lund (Sweden); PhD, 2003, University of California (Berkeley)
 Wilson, Gregory P. 2007; PhD, 2004, University of California (Berkeley)

Assistant Professors

Brunton, Bingni Wen 2012; PhD, 2012, Princeton University
 Buckley, Lauren Beth 2013; PhD, 2005, Stanford University
 Hoekstra, Jonathan M. 1995, (Affiliate); MS, 1993, Stanford University; PhD, 2001, University of Washington
 Leache, Adam 2010; MS, 2000, San Diego State University; PhD, 2008, University of California (Berkeley)
 Mills, Claudia Eileen 1989, (Affiliate); MS, 1976, Florida State University; PhD, 1982, University of Victoria (Canada)
 Paredes, Alexander Richard 2012; MS, 1999, University of California (San Diego); PhD, 2006, Stanford University
 Parrish, Jay Z. 2010; PhD, 2002, University of Colorado (Boulder)
 Riffell, Jeffrey A. 2010; PhD, 2004, University of California (Los Angeles)
 Santana Mata, Sharlene Elizabeth 2012; MSc, 2004, Universidad de Los Andes (Venezuela); PhD, 2010, University of Massachusetts
Senior Lecturers
 Doherty, Jennifer Helen 2014; PhD, 2009, University of Pennsylvania
 Kennedy, Michael Leo 1999; MS, 1980, Central Washington University; PhD, 1994, Arizona State University
 Petersen, Karen Elizabeth 1990; MS, 1977, University of New Mexico; PhD, 1983, University of New Mexico
 Zeman, Leslie Brown 1998; DVM, 1975, Michigan State University
Lecturers
 Buchwitz, Brian Joseph 1997; PhD, 2004, University of Washington
 Crowe, Alison Jane 2000; PhD, 1993, State Univ of New York (Stony Brook)
 Freeman, Scott Rider 1985; PhD, 1990, University of Washington
 Herron, Jon Charles 1987; PhD, 1996, University of Washington
 Martin-Morris, Linda E. 1994; PhD, 1991, Brandeis University
 Oakley, Amy E. 2008; PhD, 2008, University of Michigan
 Waaland, Kathryn Susan D. 1972, (Emeritus); PhD, 1969, University of California (Berkeley)
 Wenderoth, Mary Pat 1988; MS, 1981, Purdue University; PhD, 1987, Rush University

Center for Studies in Demography and Ecology

Professor

Ellis, John Mark 1999; MA, 1984, Indiana University; PhD, 1988, Indiana University

Chemistry

Professors

Andersen, Niels Hjorth * 1968; PhD, 1967, Northwestern University
 Baer, Donald R. 2004, (Affiliate); PhD, 1974, Cornell University
 Baker, William Ray 2011, (Affiliate); PhD, 1979, University of Illinois (Urbana)

Burgess, Lloyd William 1985, (Emeritus); MS, 1979, Syracuse University; PhD, 1984, Virginia Polytechnic Institute and State University

Callis, James B. * 1970, (Emeritus); PhD, 1970, University of Washington

Campbell, Charles Taylor * 1989; PhD, 1979, University of Texas (Austin)

Chiu, Daniel Teyun 2000; PhD, 1998, Stanford University
Dalton, Larry R. 1998, (Emeritus); MS, 1966, Michigan State University; MA, 1971, Harvard University; PhD, 1971, Harvard University

Davidson, Ernest Roy 2002; PhD, 1961, Indiana University
Drobny, Gary Peter 1981; PhD, 1981, University of California (Berkeley)

Dunning, Thomas Harold 1990, (Affiliate); PhD, 1970, California Institute of Technology

Engel, Thomas * 1980, (Emeritus); MA, 1964, Johns Hopkins University; PhD, 1969, University of Chicago

Epitotis, Nicholas * 1972, (Emeritus); MA, 1967, Harvard University; PhD, 1972, Princeton University

Floss, Heinz G. * 1987, (Emeritus); MS, 1959, Technical University of Berlin (Germany); PhD, 1961, Technical University of Munich (Germany)

Gamelin, Daniel Robert 2000; PhD, 1997, Stanford University

Gammon, Richard Harriss * 1977, (Emeritus); MA, 1966, Harvard University; PhD, 1970, Harvard University

Gelb, Michael Herman * 1985; PhD, 1982, Yale University
Ginger, David S. 2003; PhD, 2001, University of Cambridge (UK)

Goldberg, Karen Ila 1995; PhD, 1988, University of California (Berkeley)

Gouterman, Martin Paul * 1966, (Emeritus); MS, 1955, University of Chicago; PhD, 1958, University of Chicago

Grate, Jay W. 2004, (Affiliate); MS, 1980, University of California (San Diego); PhD, 1983, University of California (San Diego)

Haight, Gilbert Pierce 1989, (Affiliate); PhD, 1947, Princeton University

Halsey, George D. Jr. * 1951, (Emeritus); PhD, 1948, Princeton University

Heinekey, Dennis Michael * 1991; PhD, 1982, University of Alberta, Canada

Hendrickson, Herman Stewart 1996, (Emeritus); PhD, 1962, University of Illinois

Hopkins, Paul Brink * 1982; PhD, 1982, Harvard University

Keller, Sarah Lynn 2000; PhD, 1995, Princeton University

Kovacs, Julia A. * 1988; PhD, 1986, Harvard University
Mayer, James Moers * 1984, (Affiliate); PhD, 1982, California Institute of Technology

Norman, Josephus Gaston * 1972, (Emeritus); PhD, 1972, Massachusetts Institute of Technology

Quinn, Patricia Kathleen 1984, (Affiliate); PhD, 1988, University of Washington

Rathod, Pradipsinh K. 2001; PhD, 1982, Oregon Health Sciences University

Raucher, Stanley * 1975, (Emeritus); PhD, 1973, University of Minnesota

Reid, Philip James 1995; PhD, 1992, University of California (Berkeley)

Reinhardt, William Parker * 1991, (Emeritus); AM, 1966, Harvard University; PhD, 1968, Harvard University

Robinson, Bruce H. * 1980; PhD, 1975, Vanderbilt University

Rose, Norman Jenisch * 1966, (Emeritus); PhD, 1960, University of Illinois

Ruzicka, Jaromir * 1984, (Emeritus); MSc, 1959, Technical University of Prague (Czech); PhD, 1963, Technical University of Prague (Czech)

Sasaki, Tomikazu * 1989; MS, 1981, Kyoto University (Japan); PhD, 1985, Kyoto University (Japan)

Schubert, Wolfgang Manfred * 1947, (Emeritus); PhD, 1947, University of Minnesota

Schurr, J. Michael * 1966, (Emeritus); PhD, 1965, University of California (Berkeley)

Sherwood, Peter 2012, (Affiliate); MA, 1970, University of Cambridge (UK); PhD, 1970, University of Cambridge (UK); DSc, 1995, University of Cambridge (UK)

Spiro, Thomas George 2007; PhD, 1960, Massachusetts Institute of Technology

Synovec, Robert Eugene * 1986; PhD, 1986, Iowa State University

Turecek, Frantisek * 1990; MSc, 1973, Charles University (Czech Republic); PhD, 1977, Charles University (Czech Republic)

Vandenbosch, Robert * 1963, (Emeritus); PhD, 1957, University of California (Berkeley)

Varanasi, Usha Suryam 1980, (Affiliate); MS, 1964, California Institute of Technology; PhD, 1968, University of Washington

Varani, Gabriele 2001; PhD, 1987, University of Milan (Italy)

Woodman, Darrell James * 1965, (Emeritus); MA, 1965, Harvard University; PhD, 1965, Harvard University

Zoller, William H. * 1984, (Emeritus); PhD, 1969, Massachusetts Institute of Technology

Associate Professors

Khalil, Munira 2006; PhD, 2004, Massachusetts Institute of Technology

Li, Xiaosong 2005; PhD, 2003, Wayne State University

Macklin, John Welton * 1968, (Emeritus); PhD, 1969, Cornell University

Maly, Dustin James 2006; PhD, 2002, University of California (Berkeley)

Michael, Forrest E. 2004; MA, 1998, Harvard University; PhD, 2001, Harvard University

Simon, Julian A. * 1996, (Affiliate); MA, 1984, Columbia University; MPhil, 1986, Columbia University; PhD, 1991, Columbia University

Zhang, Bo 2008; MS, 2002, Peking University (China); PhD, 2006, University of Utah

Assistant Professors

Boydston, Andrew 2010; MS, 2002, University of Oregon; PhD, 2007, University of Texas (Austin)

Bush, Matthew Francis 2011; PhD, 2008, University of California (Berkeley)

Carlson, William Brenden 1998, (Affiliate); PhD, 2003, University of Washington

Chatterjee, Champak 2010; MSc, 1999, India Institute of Technology; PhD, 2005, University of Illinois

Cossairt, Brandi Michelle 2012; PhD, 2010, Massachusetts Institute of Technology

Lalic, Gojko 2008; PhD, 2004, Harvard University

Maibaum, Lutz 2011; Diploma, 2001, University of Dusseldorf, Germany; PhD, 2005, University of California (Berkeley)

Masiello, David 2004; PhD, 2004, University of Florida

Schlenker, Cody Williams 2011; PhD, 2010, University of Southern California

Stoll, Stefan 2011; MEng, 1998, Graz University of Technology (Austria); MA, 2001, University of Music and Performing Arts Graz (Austria); PhD, 2003, Eidgenossische Technische Hochschule (Switz)

Sullivan, Philip A. 2002, (Affiliate); PhD, 2006, University of Washington

Vaughan, Joshua Charles 2013; PhD, 2005, Massachusetts Institute of Technology

Zalatan, Jesse George 2014; PhD, 2008, Stanford University

Senior Lecturer

Wiegand, Deborah Hicks 1990; PhD, 1990, Northern Illinois University

Lecturers

Bryant, Jasmine Rae 1998; MA, 1997, Seattle University; PhD, 2002, University of Washington

Carroll, Andrea D. 1998; MS, 2001, University of Washington; PhD, 2003, University of Washington

Craig, Colleen Foley 2001; MS, 2004, University of Washington; PhD, 2006, University of Washington

Elangovan, Arumugasamy 2005; MS, 1991, University of Madras (India); PhD, 1999, University of Madras (India)

Goldman, Lawrence Michael 2014; PhD, 2010, Cardiff University, Wales

Classics

Professors

Blondell, Ruby * 1985; MA, 1981, Oxford University (UK); PhD, 1984, University of California (Berkeley)

Clauss, James Joseph * 1984; MA, 1976, Fordham University; PhD, 1983, University of California (Berkeley)

Connors, Catherine Marie * 1990; MA, 1986, University of Michigan; PhD, 1989, University of Michigan

Gowing, Alain Michael * 1988; MA, 1981, Bryn Mawr College; PhD, 1988, Bryn Mawr College

Halleran, Michael Ros * 1983, (Affiliate); AM, 1978, Harvard University; PhD, 1981, Harvard University

Harmon, Daniel P. * 1967, (Emeritus); MA, 1965, Northwestern University; PhD, 1968, Northwestern University

Hinds, Stephen Edward * 1992; MA, 1983, Trinity College (Ireland); PhD, 1985, St. Johns College (UK)

Mackay, Pierre A. * 1966, (Emeritus); MA, 1959, University of California (campus unspecified); PhD, 1964, University of California (campus unspecified)

Pascal, Paul * 1953, (Emeritus); PhD, 1953, University of North Carolina

Associate Professors

Hollmann, Alexander J. 2001; MA, 1990, University of Colorado (Boulder); PhD, 1998, Harvard University

Kamen, Deborah 2007; MS, 1999, Oxford University (UK); MA, 2005, University of California (Berkeley); PhD, 2005, University of California (Berkeley)

Levaniouk, Olga 2001; MA, 1994, University of Colorado (campus unspecified); PhD, 2000, Harvard University

Stroup, Sarah Culpepper 2000; MA, 1994, University of California (Berkeley); PhD, 2000, University of California (Berkeley)

Topper, Kathryn 2008; PhD, 2007, Harvard University

Assistant Professor

Levin-Richardson, Sarah 2007; MA, 2006, Stanford University; PhD, 2009, Stanford University

Communication

Professors

Baldasty, Gerald Joseph * 1974; MA, 1974, University of Wisconsin (Madison); PhD, 1978, University of Washington

Beam, Randal A. 2003; MA, 1976, Syracuse University; DPhil, 1988, University of Wisconsin

Bosmajian, Haig A. * 1965, (Emeritus); MA, 1951, University of The Pacific; PhD, 1960, Stanford University

Carter, Richard Fremont * 1967, (Emeritus); MA, 1954, University of Wisconsin; PhD, 1957, University of Wisconsin (Madison)

Ceccarelli, Leah Marie 1996; MA, 1992, Northwestern University; PhD, 1995, Northwestern University
 Domke, David Scott 1998; MA, 1992, California State University, Fullerton; PhD, 1996, University of Minnesota
 Giffard, Charles Anthony * 1978, (Emeritus); MA, 1964, University of Washington; PhD, 1968, University of Washington

Howard, Philip Edward 2002; MA, 1994, London School of Economics (UK); PhD, 2002, Northwestern University
 Lang, Gladys Engel * 1984, (Emeritus); MA, 1942, University of Washington; PhD, 1954, University of Chicago
 Lang, Kurt * 1984, (Emeritus); MA, 1952, University of Chicago; PhD, 1953, University of Chicago

Manusov, Valerie Lynn 1993; MA, 1984, Michigan State University; PhD, 1989, University of Southern California
 Moy, Patricia 1998; MS, 1993, Cornell University; PhD, 1998, University of Washington

Parks, Malcolm Ross 1978; MA, 1975, Michigan State University; PhD, 1976, Michigan State University

Pember, Don Raymond * 1969, (Emeritus); MA, 1966, Michigan State University; PhD, 1969, University of Wisconsin (Madison)

Rivenburgh, Nancy Kay * 1989; MS, 1982, Boston University; PhD, 1991, University of Washington

Scheidel, Thomas Maynard * 1955, (Emeritus); MA, 1955, University of Washington; PhD, 1958, University of Washington

Simpson, Roger Allan * 1968, (Emeritus); MS, 1961, University of Wisconsin; PhD, 1973, University of Washington

Stamm, Keith Roman * 1973, (Emeritus); MS, 1965, University of Wisconsin; PhD, 1968, University of Wisconsin (Madison)

Underwood, Douglas Mark * 1987; MA, 1974, Ohio State University

Yerxa, Fendall Winston * 1965, (Emeritus); BA, 1936, Hamilton College

Associate Professors

Bowen, Lawrence * 1973, (Emeritus); MA, 1971, University of Wisconsin; PhD, 1974, University of Wisconsin (Madison)
 Bowes, John Elliott * 1974, (Emeritus); MS, 1965, Syracuse University; PhD, 1971, Michigan State University

Cranston, Patricia * 1954, (Emeritus); MA, 1954, University of Texas (Austin)

Fearn-Banks, Kathleen A. 1990; MS, 1965, University of California (Los Angeles)

Foot, Kirsten Allegra 2001; MA, 1990, Wheaton College; PhD, 1999, University of California (San Diego)

Harold, Christine Lynn 2007; MA, 1999, Pennsylvania State University; PhD, 2003, Pennsylvania State University
 Joseph, Ralina L. 2005; MA, 2001, University of California (San Diego); PhD, 2005, University of California (San Diego)

Kielbowicz, Richard Burket * 1984; MA, 1978, University of Minnesota; PhD, 1984, University of Minnesota

Neff, Gina S. 2005; MPhil, 2001, City University of New York; PhD, 2004, Columbia University

Nishime, Leilani Linda 2008; MA, 1991, University of Michigan; PhD, 1997, University of Michigan

Post, Robert M. * 1960, (Emeritus); MA, 1958, Ohio University; PhD, 1961, Ohio University

Assistant Professors

Hill, Benjamin Mako 2013; SM, 2007, Massachusetts Institute of Technology; PhD, 2013, Massachusetts Institute of Technology

Pearce, Katy Elizabeth 2012; MA, 2006, University of London, UK; PhD, 2011, University of California (Santa Barbara)

Powers, Matthew John 2013; MA, 2005, Simon Fraser University, B.C. (Canada); PhD, 2013, New York University

Senior Lecturers

McGarrity, Matthew 2004; MA, 2000, Indiana University; PhD, 2004, Indiana University

Nyquist, Jody Deering 1966, (Emeritus); MA, 1967, University of Washington

Lecturers

Captain, Catherine 2014; MS, 1996, Northwestern University; MS, 2013, London Business School (UK)

Cook, Caley Kirstin 2013; MA, 2007, University of Southern California

Coutu, Lisa Marie 1990; MA, 1992, University of Washington; PhD, 1996, University of Washington

Mayo, Justin 2014; MJ, 1998, University of Missouri

Otanez, Andrea Kaye 2013; MA, 1990, University of Utah
 Partnow, Jessica 2009; BA, 2006, City University of New York

Robles, Jessica Sarah 2013; MA, 2005, University of Essex (UK); PhD, 2011, University of Colorado (Boulder)

Souders, Michael Christian 2013; MA, 2005, Eastern New Mexico University; PhD, 2011, University of Kansas

Stonehill, Alexander M. 2009; BA, 2003, New School University

Stuteville, Sarah R. 2009; BA, 2006, City University of New York

Yasin, Ekin 2013; MA, 2006, New York University; MA, 2008, Columbia University

Comparative History of Ideas

Lecturer

Dwyer, Anne Kristina 2006; MA, 2008, University of Washington; PhD, 2014, University of Washington

Comparative Literature

Professors

Adams, Hazard Simeon * 1977, (Emeritus); MA, 1949, University of Washington; PhD, 1953, University of Washington

Borch-Jacobsen, Mikkel * 1986; Doct, 1981, University of Strasbourg (France)

Braester, Yomi 2000; MA, 1991, Hebrew University (Israel); MA, 1992, Yale University; PhD, 1998, Yale University

Brown, Marshall Joseph 1988; MPhil, 1969, Yale University; PhD, 1972, Yale University

Rossel, Sven Hakon * 1974, (Affiliate); PhD, 1968, University of Copenhagen (Denmark)

Steele, Cynthia 1986; MA, 1979, University of California (San Diego); PhD, 1980, University of California (San Diego)

Associate Professors

Bean, Jennifer Muntzing 1998; PhD, 1998, University of Texas (Austin)

Kogoj-Kapetanica, Breda * 1973, (Emeritus); Diploma, 1954, University of Zagreb (Croatia); LittD, 1966, University of Zagreb (Croatia)

Konick, Willis Alvin * 1950, (Emeritus); MA, 1954, University of Washington; PhD, 1964, University of Washington

Tweedie, James 2004; MA, 1999, University of Iowa; PhD, 2002, University of Iowa

Assistant Professors

Groening, Stephen Francis 2014; MA, 2001, Claremont Graduate School; PhD, 2008, University of Minnesota

Mahadevan, Sudhir 2008; MA, 2000, New York University; PhD, 2009, New York University

Dance

Professors

Cooper, Elizabeth Ann 2001; MFA, 1997, University of Washington

Knapp, Joan * 1967, (Emeritus); MA, 1964, University of Illinois

Wiley, Hannah Christine * 1980; MA, 1981, New York University

Associate Professors

Coupe, James 2004; MA, 1999, University of Edinburgh (UK); MA, 2000, University of Salford (UK); PhD, 2007, University of Washington

McMains, Juliet 2006; PhD, 2003, University of California (Riverside)

Salk, Jennifer 2002; MFA, 1994, Ohio State University

Lecturers

Cinotto, Rhonda M. 1994; BA, 1997, University of Washington

Curtis, Jeffrey S. 2000; MFA, 2002, University of Washington

Haim, Mark Steven 2002; MFA, 2006, Hollins College (Virginia)

Lincoln, Rachael Elizabeth 2013; MFA, 2009, University of California (Los Angeles)

Mendieta, Wilson 2011; MFA, 2013, University of Washington

Monroe-Cook, Brenna G. 2008; MFA, 2011, University of Washington

Moore, Paul Matthew Regoli 1995; BA, 1993, University of California (Santa Barbara)

Parker, Sarah Lee 2012; BS, 1993, University of Minnesota

Drama

Professors

Bryant-Bertail, Sarah Ann * 1990, (Emeritus); MA, 1981, University of Minnesota; PhD, 1986, University of Minnesota

Clay, Jack Dewayne * 1986, (Emeritus); MA, 1956, Northwestern University

Comtois, Mary Elizabeth * 1985, (Emeritus); MA, 1962, San Francisco State; PhD, 1970, University of Colorado (Boulder)

Curtis-Newton, Valerie 1993; MA, 1996, University of Washington

Gates, Sarah Nash * 1983, (Emeritus); MA, 1974, University of California (Santa Barbara); MFA, 1983, Boston University

Johnson, David Odai 1998; MFA, 1990, University of Utah; PhD, 1994, University of Texas (Austin)

Korf, Geoffrey Leonard 2002; MFA, 1991, Yale University
 London, Todd 2014; MFA, 1981, Boston University; PhD, 1985, American University

Lynch, Thomas Plummer 2005; MFA, 1979, Yale University
 Postlewait, Thomas 2007, (Affiliate); PhD, 1976, University of Minnesota

Associate Professors

Forrester, William Donald * 1972, (Emeritus); MFA, 1969, Yale University

Jones, Zane 2012; MFA, 1994, University of Southern California

Magelssen, Scott Andrew 2013; MA, 1999, University of Minnesota; PhD, 2002, University of Minnesota

Trout, Deborah L. * 1994; MFA, 1994, Yale University

Tsao, Andrew H. 2006; MFA, 1990, California Institute of The Arts

Valentinetti, Aurora 1943, (Emeritus); MA, 1949, University of Washington

Assistant Professors

Foroutan Yekta, Payam 2014, (Affiliate); MA, 2001, Tehran University (Iran)

Frace, Jeffrey 2008; MFA, 1997, Columbia University
Mihaylova, Stefka 2011; MA, 2000, Sofia University; MA, 2001, Central European University (Budapest); PhD, 2008, Northwestern University

Samini, Nagmeh 2014, (Affiliate); MA, 2000, Tehran University (Iran); PhD, 2004, Tehran University (Iran)

Wolcott, John Rutherford * 1967, (Emeritus); MFA, 1964, Carnegie Institute of Technology; PhD, 1967, Ohio State University

Senior Lecturers

Hafso, Scott Gordon 1992; MFA, 1995, University of Washington; MMUS, 1999, University of Washington

Shahn, Judith * 1990; BFA, 1977, Carnegie Mellon University

Lecturers

Alm, Geoffrey Earle 1998; BA, 1976, Evergreen State College

Lienau, Phillip II 2011; BA, 2000, University of California (Berkeley)

Madden, Catherine Ann 1987; MA, 1977, Washington University

Platt, Myra Mae Wilson 2008; BS, 1984, Northwestern University

Richlovsky, Jane Frances 1993; BA, 1991, Columbia College

Smith, Andrew D. 2003; MFA, 2005, University of Washington

Economics

Professors

Bajari, Patrick 2011; PhD, 1997, University of Minnesota
Barzel, Yoram * 1961; MA, 1956, Hebrew University (Israel); PhD, 1961, University of Chicago

Brown, Gardner Mallard Jr. * 1965, (Emeritus); PhD, 1964, University of California (Berkeley)

Bruce, Neil * 1990; MA, 1969, Queen's University At Kingston (Canada); PhD, 1975, University of Chicago

Crutchfield, James Arthur Jr. * 1949, (Emeritus); MA, 1942, University of California (Los Angeles); PhD, 1954, University of California (Berkeley)

Duncan, Greg Michael 2012, (Affiliate); MA, 1973, University of California (Berkeley); PhD, 1976, University of California (Berkeley)

Eicher, Theo Stefan * 1994; MA, 1991, Columbia University; MPhil, 1993, Columbia University; PhD, 1994, Columbia University

Fan, Yangin 2013; MA, 1987, University of Western Ontario (Canada); PhD, 1990, University of Western Ontario (Canada)

Ghironi, Fabio Pietro 2013; MA, 1994, Bocconi University (Italy); PhD, 1999, University of California (Berkeley)

Halvorsen, Robert Francis * 1972; MBA, 1965, Harvard University; MPA, 1968, Harvard University; PhD, 1973, Harvard University

Hartman, Richard Charles * 1971, (Emeritus); MA, 1971, University of California (Berkeley); PhD, 1971, University of California (Berkeley)

Khalil, Fahad Ahmed * 1991; MA, 1988, Virginia Polytechnic Institute and State University; PhD, 1991, Virginia Polytechnic Institute and State University

Kim, Chang Jin 1985; PhD, 1989, University of Washington
Lawarree, Jacques Paul * 1990; MA, 1984, University of Liege (Belgium); PhD, 1990, University of California (Berkeley)

Lundberg, Shelly J. * 1984, (Emeritus); PhD, 1981, Northwestern University

Mc Caffree, Kenneth Maurice * 1949, (Emeritus); MA, 1942, University of Denver; PhD, 1950, University of Chicago

McGee, John Seneca 1966, (Emeritus); PhD, 1952, Vanderbilt University

Nelson, Charles Rowe * 1975, (Emeritus); MA, 1967, University of Wisconsin; PhD, 1969, University of Wisconsin (Madison)

North, Douglas Cecil 1950, (Emeritus); PhD, 1952, University of California (Berkeley)

Parks, Richard W. * 1970, (Emeritus); MA, 1964, University of California (Berkeley); PhD, 1966, University of California (Berkeley)

Silberberg, Eugene 1967, (Emeritus); PhD, 1964, Purdue University

Startz, Richard * 1984, (Emeritus); PhD, 1978, Massachusetts Institute of Technology

Thornton, Judith Grouse Leber * 1961; MA, 1958, Radcliffe; PhD, 1960, Radcliffe

Turnovsky, Stephen John * 1987; MA, 1963, Victoria University of Wellington (New Zealand); PhD, 1968, Harvard University

Wen, Quan 2013; MA, 1988, University of Western Ontario (Canada); PhD, 1991, University of Western Ontario (Canada)

Wong, Kar-Yiu * 1983; MPhil, 1979, Chinese University of Hong Kong; MPhil, 1981, Columbia University; PhD, 1983, Columbia University

Zivot, Eric W. * 1993; PhD, 1992, Yale University

Associate Professors

Brock, Philip Lawton * 1991; PhD, 1982, Stanford University

Chen, Yu-Chin 2003; MA, 1996, Harvard University; PhD, 2002, Harvard University

Hadjimichalakakis, Michael Gregory * 1969, (Emeritus); PhD, 1970, University of Rochester

Kochin, Levis A. * 1972; PhD, 1975, University of Chicago

Rose, Elaina 1993; MA, 1988, University of Pennsylvania; PhD, 1993, University of Pennsylvania

Ellis, Gregory Michael * 1988; PhD, 1992, University of California (Berkeley)

Assistant Professors

Heath, Rachel 2011; MA, 2007, Yale University; MPhil, 2008, Yale University; PhD, 2012, Yale University

Lee, Jihyung 2013; MA, 2009, Yale University; MPhil, 2010, Yale University

Leukhina, Oksana Mikhaylovna 2010; MA, 2003, University of Minnesota; PhD, 2005, University of Minnesota

Tan, Xu 2013; MS, 2011, Stanford University

Wolff, Hendrik 2007; MSc, 2000, University of Bonn (Germany); MSc, 2004, University of California (Berkeley); PhD, 2007, University of California (Berkeley)

Yang, Mu-Jeung 2012; Diploma, 2006, University of Bonn (Germany); PhD, 2012, University of California (Berkeley)

Lecturers

Ellis, Gregory Michael * 1988; PhD, 1992, University of California (Berkeley)

Knox, Melissa Ann 2009; PhD, 2008, University of California (Berkeley)

O'Dea, Dennis Charles 2012; MA, 2007, University of Illinois (Urbana); PhD, 2010, University of Illinois (Urbana)

Salehi-Esfahani, Haideh 1990; PhD, 1985, University of Pennsylvania

Turnovsky, Michelle Henriette Louise 1987; Diploma, 1963, Ecole de Haut Enseignement, Paris; MBA, 1965, Harvard University; PhD, 1978, Australian National University

English

Professors

Abrams, Robert Edward * 1971; PhD, 1973, Indiana University

Alexander, Edward * 1960, (Emeritus); MA, 1959, University of Minnesota; PhD, 1963, University of Minnesota

Allen, Carolyn Rand J. * 1972; MA, 1966, Claremont Graduate School; PhD, 1972, University of Minnesota

Bawarshi, Anis 1999; MA, 1995, University of Kansas; PhD, 1999, University of Kansas

Bierds, Linda Louise * 1981; MA, 1971, University of Washington

Blake, Kathleen Ann * 1971, (Emeritus); MA, 1967, University of California (Los Angeles); PhD, 1971, University of California (San Diego)

Cherniavsky, Eva 2005; PhD, 1990, University of California (Berkeley)

Chrisman, Laura H. 2005; DPhil, 1992, University of Oxford (UK)

Coldewey, John C. * 1972, (Emeritus); MA, 1969, Northern Illinois University; PhD, 1972, University of Colorado (Boulder)

Dillon, George Lewis * 1986, (Emeritus); MA, 1966, University of California (Berkeley); PhD, 1969, University of California (Berkeley)

Dunn, Richard J. * 1967, (Emeritus); MA, 1961, Case Western Reserve University; PhD, 1964, Case Western Reserve University

Foster, Ronald Thomas 2005; MA, 1984, University of Texas (Austin); PhD, 1990, University of Wisconsin

Frey, Charles Hubbard * 1970, (Emeritus); JD, 1960, Harvard University; PhD, 1971, Yale University

Handwerk, Gary John * 1984; PhD, 1984, Brown University

Jeffords, Susan Elizabeth * 1985; MA, 1977, University of Pennsylvania; PhD, 1981, University of Pennsylvania

Johnson, Charles Richard * 1976, (Emeritus); MA, 1973, Southern Illinois University; PhD, 1988, State Univ of New York (Stony Brook)

Kaplan, Sydney Janet * 1971; MA, 1966, University of California (Los Angeles); PhD, 1971, University of California (Los Angeles)

Kaup, Monika 2000; MA, 1988, Ruhr Universität Bochum (Germany); PhD, 1991, Ruhr Universität Bochum (Germany)

Kenney, Richard Laurence * 1987; BA, 1970, Dartmouth College

Korg, Jacob * 1955, (Emeritus); MA, 1947, Columbia University; PhD, 1952, Columbia University

Lockwood, Thomas Frank * 1967; PhD, 1967, Rice University

Matchett, William Henry * 1954, (Emeritus); MA, 1950, Harvard University; PhD, 1957, Harvard University

Mc Hugh, Heather * 1982, (Emeritus); MA, 1972, University of Denver

McCracken, James David * 1966, (Emeritus); MA, 1962, University of Chicago; PhD, 1966, University of Chicago

Modiano, Raimonda * 1973; Diploma, 1968, University of Bucharest (Romania); PhD, 1973, University of California (San Diego)

Reed, Brian Matthew 2000; PhD, 2000, Stanford University

Remley, Paul Gardner * 1988; MA, 1985, University of Cambridge (UK); MPhil, 1987, Columbia University; PhD, 1990, Columbia University

Rose, Christine M. 1994, (Affiliate); AM, 1977, Boston College; PhD, 1985, Tufts University

Sale, Roger H. * 1962, (Emeritus); MA, 1954, Cornell University; PhD, 1957, Cornell University

Searle, Leroy Frank * 1977; MA, 1968, University of Iowa; PhD, 1970, University of Iowa

Shields, David Jonathan * 1988; MFA, 1980, University of Iowa

Shulman, Robert Philip * 1961, (Emeritus); MA, 1959, Ohio State University; PhD, 1959, Ohio State University

Silberstein, Sandra Valerie * 1982; MA, 1971, University of Michigan; PhD, 1982, University of Michigan

Staten, Henry Jesse * 1998; PhD, 1978, University of Texas (Austin)

Stevick, Robert David * 1962, (Emeritus); MA, 1951, University of Tulsa; PhD, 1956, University of Wisconsin (Madison)

Streitberger, William Richard * 1973; MA, 1971, University of Illinois; PhD, 1973, University of Illinois

Stygall, Gail * 1990; PhD, 1989, Indiana University

Tollefson, James William * 1980, (Emeritus); MA, 1973, Purdue University; PhD, 1978, Stanford University

Vaughan, Miceal Francis * 1973; MA, 1973, Cornell University; PhD, 1973, Cornell University

Wong, Shawn Hsu * 1984; MA, 1974, San Francisco State University; Kathleen Middlekauff 2000; PhD, 1976, University of California (San Diego)

Associate Professors

Bosworth, David Leslie * 1984; BA, 1969, Brown University; Burstein, Jessica Lee 1998; MA, 1990, University of Chicago; PhD, 1998, University of Chicago

Butwin, Joseph Mazo * 1970; MA, 1966, Harvard University; PhD, 1971, Harvard University

Chude-Sokei, Louis 2010; PhD, 1995, University of California (Los Angeles)

Cummings, Katherine M. * 1985; MA, 1979, Montclair State University; PhD, 1985, University of Wisconsin (Madison)

Feld, Andrew E. 2006; MFA, 1998, University of Houston; Griffith, John W. * 1968; PhD, 1969, University of Oregon; Guerra, Juan Cruz * 1990; MA, 1983, University of Illinois; PhD, 1992, University of Illinois

Harkins, Gillian Hannah 2002; PhD, 2002, University of California (Berkeley)

Ibrahim, Habiba 2006; PhD, 2005, State University of New York (Albany)

Knight, Jeffrey Todd 2011; MPhil, 2007, Cambridge University (UK); PhD, 2009, Northwestern University

Laguardia, Eric Henry * 1961, (Emeritus); AM, 1955, Columbia University; PhD, 1961, University of Iowa

LaPorte, Charles P. 2005; MA, 1997, University of Virginia; PhD, 2004, University of Michigan

Longyear, Christopher Rudston * 1972, (Emeritus); MA, 1955, University of Michigan; PhD, 1961, University of Michigan

Moore, Colette 2005; PhD, 2004, University of Michigan

Motha, Mary Natasha Suhanthie 2008; MEd, 1995, University of Maryland; PhD, 2004, University of Maryland

Mussetter, Sally Ann * 1978, (Emeritus); MA, 1962, Ohio State University; PhD, 1975, Cornell University

Palomo, Dolores Josephine * 1971, (Emeritus); MA, 1966, Wayne State University; PhD, 1972, State University of New York (Buffalo)

Patterson, Mark Raymond * 1981; PhD, 1981, Princeton University

Reddy, Chandan C. 2001; MA, 1995, Columbia University; MPhil, 1999, Columbia University; PhD, 2004, Columbia University

Shields, Juliet D. 2008; MA, 1999, University of Pennsylvania; PhD, 2004, University of Pennsylvania

Simpson, Caroline Chung * 1994; MA, 1989, University of Houston; PhD, 1994, University of Texas (Austin)

Smith, Eugene Herbert * 1958, (Emeritus); MA, 1954, University of Washington; PhD, 1963, University of Washington

Sonenberg, Maya * 1993; MA, 1984, Brown University; Stanton, Robert Bruce * 1956, (Emeritus); MA, 1950, University of Missouri (Kansas City); PhD, 1953, Indiana University

Triplett, Pimone E. 2006; MFA, 1990, University of Iowa

Webster, John M. * 1972; MA, 1969, University of California (Berkeley); PhD, 1974, University of California (Berkeley)

Weinbaum, Alys Eve 1998; MA, 1990, University of Sussex (UK); MA, 1992, Columbia University; PhD, 1998, Columbia University

Assistant Professors

Bou Ayash, Nancy 2013; MA, 2006, American University of Beirut (Lebanon); PhD, 2013, University of Louisville

Buckroyd, Peter 2014, (Affiliate); MA, 1970, McMaster University (Canada); PhD, 1974, McMaster University (Canada)

Chaney, Eve Christine 1991, (Affiliate); MA, 1993, University of Washington; PhD, 1998, University of Washington

Griffith, Malcolm Anstett * 1966, (Emeritus); MA, 1962, Ohio State University; PhD, 1966, Ohio State University

Malone, Erin C. 1995, (Affiliate); MFA, 1996, University of Washington

Rai, Candice Samjhana 2008; MA, 2001, University of Illinois; PhD, 2008, University of Illinois

Sandhu, Priti 2010; MA, 2003, Lancaster University (UK); PhD, 2010, University of Hawaii

Taylor, Jesse Oak 2013; MA, 2005, University of Wisconsin (Madison); PhD, 2010, University of Wisconsin (Madison)

Villegas, Julie Elizabeth 1986, (Affiliate); MA, 1990, University of Washington; PhD, 1997, University of Washington

Senior Lecturers

Beyer, Catharine Hoffman 1984; MA, 1970, University of Michigan

Gillis-Bridges, Kimberlee Lynne 1989; MA, 1990, University of Washington

Laufenberg, Henry J. 2003; MA, 1994, University of Washington; MA, 1996, San Francisco State; PhD, 2001, University of California (Riverside)

Liu, Michelle Su-Mei 2001; MA, 1996, Yale University; PhD, 2003, Yale University

Matthews, Carrie Robertson 2008; MA, 2001, University of North Carolina; PhD, 2007, University of North Carolina

McCue, Frances A. 1991; MFA, 1988, University of Washington; MEd, 1996, Columbia University; EdD, 2001, Columbia University

O'Neill, John Joseph 1985; MA, 1986, University of Washington

Popov, Nikolai Borissov 1982; PhD, 1994, University of Washington

Stein, Holly 1990; MEd, 1992, University of Washington; PhD, 2000, University of Washington

Wacker, Norman J. 1979; MA, 1976, University of Washington; PhD, 1986, University of Washington

Lecturers

Brenner, Patricia Jenkins 1983; MA, 1976, University of Arkansas

George, Elizabeth Laurie * 1991; MA, 1980, University of Oregon; PhD, 1984, University of Oregon

Mc Namara, Robert James 1985; MA, 1975, Colorado State University; PhD, 1985, University of Washington

Simmons-O'Neill, Elizabeth 1985; MA, 1982, University of Washington; PhD, 1988, University of Washington

Stansbury, Heather Lyn 2001; MA, 2003, University of Washington; PhD, 2008, University of Washington

Van Buren, Amy Noel 1998; PhD, 2012, University of Washington

Gender, Women, and Sexuality Studies

Professors

Bose, Christine Ellen 2014, (Affiliate); PhD, 1973, Johns Hopkins University

Brainard, Suzanne Gage 1987, (Affiliate); MA, 1968, Ohio State University; PhD, 1972, Ohio State University

Ginorio, Angela Beatriz * 1981, (Emeritus); MA, 1971, University of Puerto Rico; PhD, 1979, Fordham University

Jacobs, Sue-Ellen * 1974, (Emeritus); MA, 1966, University of Colorado (campus unspecified); PhD, 1970, University of Colorado (campus unspecified)

Ramamurthy, Priti 1997; MBA, 1978, Indian Institute of Management, India; MRP, 1982, Syracuse University; PhD, 1995, Syracuse University

Yee, Shirley Jo-Ann * 1988; MA, 1983, Ohio State University; PhD, 1987, Ohio State University

Associate Professors

Habell-Pallan, Michelle 1998; MA, 1993, University of California (San Diego); MA, 1994, University of California (San Diego); PhD, 1997, University of California (Santa Cruz)

Ross, Luana K. 1999; MSW, 1981, Portland State University; PhD, 1992, University of Oregon

Swarr, Amanda L. 2005; MA, 1998, University of Minnesota; PhD, 2003, University of Minnesota

Welland, Sasha 2004; MA, 1998, University of California (Santa Cruz); PhD, 2005, University of California (Santa Cruz)

Assistant Professors

Barbas, Samantha 2006, (Affiliate); PhD, 2000, University of California (Berkeley)

Boyer, Debra Kay 1988, (Affiliate); MA, 1983, University of Washington; PhD, 1986, University of Washington

Fraczek, Claire Elizabeth 2002, (Affiliate); MEd, 2005, University of Washington; PhD, 2011, University of Washington

Pope-Levison, Priscilla 2007, (Affiliate); MDiv, 1983, Duke University; PhD, 1989, University of St. Andrews (UK)

Segall, Kimberly 2006, (Affiliate); PhD, 2000, Northwestern University

Lecturer

Lee, Regina Yung 2014; MA, 2007, University of Alberta, Canada; PhD, 2013, University of California (Riverside)

Geography

Professors

Beyers, William B. * 1962, (Emeritus); PhD, 1967, University of Washington

Braden, Kathleen 1989, (Affiliate); MA, 1974, University of Washington; PhD, 1981, University of Washington

Brown, Michael Peter * 1997; MA, 1990, University of British Columbia (Canada); PhD, 1994, University of British Columbia (Canada)

Chan, Kam Wing * 1991; MSc, 1983, University of Hong Kong; PhD, 1988, University of Toronto (Canada)

Elwood-Faustino, Sarah A. 2006; MA, 1996, University of Minnesota; PhD, 2000, University of Minnesota
England, Kim Victoria Louise 1999; MA, 1984, Ohio State University; PhD, 1988, Ohio State University
Herbert, Steven Kelly 2000; MA, 1987, University of Minnesota; PhD, 1995, University of California (Los Angeles)
Jarosz, Lucy Antonia * 1990; MA, 1979, University of Wisconsin; PhD, 1990, University of California (Berkeley)
Krumme, Gunter * 1970, (Emeritus); PhD, 1966, University of Washington

Lawson, Victoria Anne * 1986; MA, 1982, Ohio State University; PhD, 1986, Ohio State University
Mayer, Jonathan David * 1977; MA, 1975, University of Michigan; PhD, 1977, University of Michigan
Mitchell, Katharyne Wilcox 1993; MA, 1989, University of California (Berkeley); PhD, 1993, University of California (Berkeley)

Morrill, Richard L. * 1955, (Emeritus); MA, 1957, University of Washington; PhD, 1959, University of Washington
Nyerges, Timothy Lee * 1985; MA, 1976, Ohio State University; PhD, 1980, Ohio State University

Sparke, Matthew Brookman * 1995; MA, 1991, University of British Columbia (Canada); PhD, 1996, University of British Columbia (Canada)

Velikonja, Joseph * 1964, (Emeritus); PhD, 1948, State University (Italy)

Associate Professors

Chang, Kuei-Sheng * 1966, (Emeritus); MA, 1950, University of Michigan; PhD, 1955, University of Michigan
Conway, Richard Scott Jr. 1975, (Affiliate); MBA, 1971, University of Washington; MA, 1972, University of Pennsylvania; PhD, 1976, University of Pennsylvania

Kakiuchi, Hiroaki George * 1957, (Emeritus); MA, 1953, University of Michigan; PhD, 1957, University of Michigan
Withers, Suzanne Davies 1997; MA, 1988, Queen's University At Kingston (Canada); PhD, 1992, University of California (Los Angeles)

Assistant Professors

Bergmann, Luke Robert 2011; MA, 2006, University of Minnesota; PhD, 2012, University of Minnesota
Biermann, Christine Patricia 2014; MS, 2009, University of Tennessee; PhD, 2014, Ohio State University
Ybarra, Megan 2014; PhD, 2010, University of California (Berkeley)

Lecturer

Hannah, Joseph J. 1992; MA, 1989, Cornell University; PhD, 2007, University of Washington

Germanics

Professors

Ames, Eric Christopher 2000; MA, 1993, University of Washington; PhD, 2000, University of California (Berkeley)
Ammerlahn, Hellmut H. * 1963, (Emeritus); Abitur, 1957, Taunusschule Gymnasium; MA, 1960, University of Vermont; PhD, 1965, University of Texas (Austin)
Bansleben, Manfred Wolf * 1988, (Emeritus); PhD, 1979, Vienna University of Technology
Barrack, Charles M. * 1968; MA, 1966, University of Washington; PhD, 1969, University of Washington
Behler, Diana Ipsen * 1969, (Emeritus); MA, 1966, University of Washington; PhD, 1970, University of Washington
Brown, Jane Kurshan * 1988, (Emeritus); MPhil, 1969, Yale University; PhD, 1971, Yale University
Gray, Richard Terrence * 1991; MA, 1976, University of Cincinnati; PhD, 1981, University of Virginia

Prutti, Brigitte * 1991; MA, 1987, University of Colorado (campus unspecified); DPhil, 1988, University of Graz (Austria); PhD, 1991, University of California (Irvine)
Voyles, Joseph Bartle * 1965, (Emeritus); MA, 1962, Indiana University; PhD, 1965, Indiana University
Wilke, Sabine * 1988; PhD, 1986, University of Mainz (Germany)

Associate Professors

Block, Richard 2004; MA, 1979, University of Washington; PhD, 1998, Northwestern University
Brandl, Klaus Karl 1991; MA, 1987, University of Texas (unspecified); PhD, 1991, University of Texas (Austin)
McLean, Sammy Kay * 1967, (Emeritus); MA, 1957, University of Michigan; PhD, 1963, University of Michigan

Assistant Professors

Canfield-Budde, David A. 1995, (Affiliate); MA, 1997, University of Washington; PhD, 2004, University of Washington
Tilghman, Heidi Rauscher 1988, (Affiliate); MA, 1989, University of Washington; PhD, 1989, University of Washington
Wiggins, Ellwood Holler 2012; MA, 2003, St. John's College (New Mexico); MA, 2006, Johns Hopkins University; PhD, 2011, Yale University

Lecturer

Terrasi, Shayna Kye-hee 2014; MA, 2004, San Francisco State; PhD, 2011, University of California (Los Angeles)

History

Professors

Alden, Dauril * 1959, (Emeritus); MA, 1952, University of California (Berkeley); PhD, 1959, University of California (Berkeley)
Bacharach, Jere L. * 1967, (Emeritus); MA, 1962, Harvard University; PhD, 1967, University of Michigan
Baiklin, Jordanna 2001; MA, 1994, Stanford University; PhD, 1998, Stanford University
Behlmer, George Kinkel * 1979; MA, 1972, Stanford University; PhD, 1977, Stanford University
Bergquist, Charles Wylie * 1989, (Emeritus); MA, 1968, Stanford University; PhD, 1973, Stanford University
Conlon, Frank F. * 1968, (Emeritus); MA, 1963, University of Minnesota; PhD, 1969, University of Minnesota
Ebrey, Patricia Buckley * 1997; MA, 1970, Columbia University; PhD, 1975, Columbia University
Felak, James Ramon * 1989; MA, 1985, Indiana University; PhD, 1989, Indiana University
Ferrill, Arther L. * 1964, (Emeritus); MA, 1961, University of Illinois; PhD, 1964, University of Illinois
Findlay, John Moorman * 1987; MA, 1978, University of California (Berkeley); PhD, 1982, University of California (Berkeley)
Fowler, Wilton Bonham * 1969, (Emeritus); MA, 1962, Yale University; PhD, 1966, Yale University
Gil, Carlos Brambila * 1974, (Emeritus); MA, 1963, Georgetown University; PhD, 1975, University of California (Los Angeles)
Glenn, Susan A. * 1993; MA, 1975, University of California (San Diego); PhD, 1983, University of California (Berkeley)
Gregory, James Noble * 1993; MA, 1977, University of California (Santa Barbara); PhD, 1983, University of California (Berkeley)
Guy, Robert Kent * 1980, (Emeritus); MA, 1974, Harvard University; PhD, 1981, Harvard University
Hankins, Thomas Leroy * 1964, (Emeritus); MAT, 1958, Harvard University; PhD, 1964, Cornell University

Johnson, Richard Rigby * 1972; MA, 1965, University of California (Berkeley); PhD, 1972, University of California (Berkeley)
Jonas, Raymond Anthony * 1985; MA, 1980, University of California (Davis); PhD, 1985, University of California (Berkeley)
Joshel, Sandra Rae 1993; MA, 1970, Rutgers University; PhD, 1977, Rutgers University
Kirkendall, Richard Stewart * 1988, (Emeritus); MS, 1953, University of Wisconsin (Madison); PhD, 1958, University of Wisconsin (Madison)
Levy, Fred Jacob * 1960, (Emeritus); AM, 1956, Harvard University; PhD, 1960, Harvard University
Rafael, Vicente L. 2003; MA, 1982, Cornell University; PhD, 1984, Cornell University
Rorabaugh, William Joseph * 1976; MA, 1970, University of California (Berkeley); PhD, 1976, University of California (Berkeley)
Saum, Lewis Oliver * 1965, (Emeritus); MA, 1959, University of Missouri; PhD, 1962, University of Missouri
Schmidt, Benjamin 1996; MA, 1988, Harvard University; PhD, 1994, Harvard University
Sears, Laurie Jo * 1989; MA, 1977, University of Arizona; PhD, 1986, University of Wisconsin (Madison)
Stacey, Robert Charles 1988; MA, 1978, Yale University; MPhil, 1979, Yale University; PhD, 1983, Yale University
Stacey, Robin Chapman * 1988; MA, 1979, Yale University; MLitt, 1982, Oxford University (UK); MPhil, 1983, Yale University; PhD, 1986, Yale University
Taylor, Quintard * 1995; MA, 1971, University of Minnesota; PhD, 1977, University of Minnesota
Thomas, Carol Sue Guggenheim * 1964; MA, 1961, Northwestern University; PhD, 1965, Northwestern University
Thomas, Lynn Marie 1997; MA, 1989, Johns Hopkins University; MA, 1993, Northwestern University; PhD, 1997, University of Michigan
Toews, John Edward * 1979; MA, 1968, Harvard University; PhD, 1973, Harvard University
Ullman, Joan Connelly * 1966, (Emeritus); MA, 1953, Bryn Mawr College; PhD, 1963, Bryn Mawr College
Waugh, Daniel Clarke * 1972, (Emeritus); MA, 1965, Harvard University; PhD, 1972, Harvard University
Young, Glennys Jeanne * 1992; MA, 1983, University of California (Berkeley); PhD, 1989, University of California (Berkeley)

Associate Professors

Campbell, Elena 2007; MA, 1994, St. Petersburg State University (Russia); MA, 1996, European University; PhD, 1999, Russian Academy of Sciences (Russia)
Dhavan, Purnima 2005; MA, 1998, University of Virginia; PhD, 2003, University of Virginia
Hevly, Bruce William * 1989; PhD, 1987, Johns Hopkins University
Jung, Moon-Ho 2001; MA, 1995, Cornell University; PhD, 2000, Cornell University
Nash, Linda L. 1993; MS, 1989, University of California (Berkeley); PhD, 2000, University of Washington
O'Mara, Margaret Pugh 2007; MA, 2002, University of Pennsylvania; PhD, 2002, University of Pennsylvania
O'Neil, Mary Rose * 1980; MA, 1971, Stanford University; PhD, 1982, Stanford University
Rodríguez-Silva, Ileana M. 2004; MA, 1997, University of Wisconsin (Madison); PhD, 2004, University of Wisconsin (Madison)
Smallwood, Stephanie 2006; PhD, 1999, Duke University
Thurtle, Phillip Stevens 1998; MA, 1994, Stanford University; PhD, 1999, Stanford University
Walker, Joel Thomas 1997; MA, 1994, Princeton University; PhD, 1998, Princeton University

Warren, Adam W. 2004; MA, 2000, University of California (San Diego); PhD, 2004, University of California (San Diego)
 Werrett, Simon Roy Edward 2002, (Affiliate); MPhil, 1996, Cambridge University (UK); PhD, 2000, Cambridge University (UK)

Assistant Professors

Bet-Shlmon, Arbella Herutha 2006; MA, 2006, University of Michigan; AM, 2008, Harvard University; PhD, 2012, Harvard University

Spafford, David 2007, (Affiliate); MA, 2006, University of California (Berkeley); PhD, 2006, University of California (Berkeley)

Lecturers

Garcia, Chad Daniel 2007; MA, 2007, Indiana University; PhD, 2012, University of Washington

Osborn, Julie Annette Rigg 2007; MA, 2007, University of Hawaii; PhD, 2013, University of Washington

Roberts, Nathan E 2005; MA, 2007, University of Washington

Urbanski, Charity Leah 2008; MA, 1999, University of California (Berkeley); PhD, 2007, University of California (Berkeley)

International Studies

Professors

Aloisi, Jonathan Mark 2009, (Affiliate); MA, 1982, University of Michigan; MA, 1998, National War College

Anchordoguy, Marie Christine * 1989; MBA, 1982, University of California (Berkeley); PhD, 1986, University of California (Berkeley)

Bachman, David Mark * 1991; MA, 1977, Stanford University; PhD, 1984, Stanford University

Butow, Robert J. C. * 1960, (Emeritus); MA, 1948, Stanford University; PhD, 1953, Stanford University

Chiro, Daniel * 1974; PhD, 1973, Columbia University

Dong, Wonmo 2001, (Affiliate); MA, 1961, University of Kentucky; PhD, 1965, Georgetown University

Dong, Yue 1996; MA, 1989, Beijing University, China; MA, 1991, University of Oregon; PhD, 1996, University of California (San Diego)

Ellings, Richard James 1984, (Affiliate); MA, 1976, University of Washington; PhD, 1983, University of Washington

Fuller, James Leslie 1979, (Affiliate); MS, 1972, University of Florida; PhD, 1975, University of Florida

Godoy, Angelina Snodgrass 2002; MA, 1997, University of California (Berkeley); PhD, 2001, University of California (Berkeley)

Graham, Thomas 2003, (Affiliate); JD, 1961, Harvard University

Ha, Yong-Chool 2003; MA, 1978, Kent State University; PhD, 1985, University of California (Berkeley)

Hamilton, Gary Glen 1993; MA, 1970, University of Washington; PhD, 1975, University of Washington

Hanley, Susan Bell * 1970, (Emeritus); MA, 1964, Yale University; PhD, 1971, Yale University

Hellmann, Donald Charles * 1967, (Emeritus); MA, 1960, University of California (Berkeley); PhD, 1964, University of California (Berkeley)

Jaffee, Martin Steven * 1987, (Emeritus); MA, 1974, Florida State University; PhD, 1980, Brown University

Kasaba, Resat * 1985; MA, 1979, State Univ of New York (Binghamton); PhD, 1986, State Univ of New York (Binghamton)

Lacey, Michael J. 2002, (Affiliate); MPhil, 1974, George Washington University; PhD, 1979, George Washington University

Lavelly, William Roger * 1985; MA, 1977, University of California (Berkeley); PhD, 1982, University of Michigan

Legters, Lyman H. * 1966, (Emeritus); MA, 1956, Boston University; PhD, 1958, Freie University of Berlin (Germany)

Meeker, Michael Elliot 2006, (Affiliate); MA, 1966, University of Chicago; PhD, 1970, University of Chicago

Migdal, Joel Samuel * 1980; MA, 1968, Harvard University; PhD, 1972, Harvard University

Mines, Mattison 2007, (Affiliate); MA, 1965, University of Washington; PhD, 1969, Cornell University

Pekkanen, Robert J. 2004; MA, 1992, Harvard University; PhD, 2002, Harvard University

Pekkanen, Saadia 2004; MA, 1988, Columbia University; PhD, 1996, Harvard University

Poznanski, Kazimierz * 1987; MA, 1969, University of Warsaw (Poland); PhD, 1974, University of Warsaw (Poland)

Pyle, Kenneth Birger * 1964; PhD, 1965, Johns Hopkins University

Rouyer, Alwyn R. 2003, (Affiliate); MA, 1966, Georgetown University; PhD, 1971, Tulane University

Sakata, Hiromi Lorraine 1968, (Affiliate); MA, 1968, University of Washington; PhD, 1976, University of Washington

Sorensen, Clark Wesley * 1989; MA, 1974, University of Washington; PhD, 1981, University of Washington

Undem, Halvor Andrew 2011, (Affiliate); MS, 1977, University of North Dakota; PhD, 1985, Air Force Institute of Technology

Wall, Philip Roy 2009, (Affiliate); MA, 1975, University of Washington; MBA, 1978, University of Washington

Webb, Eugene * 1966, (Emeritus); MA, 1962, Columbia University; PhD, 1965, Columbia University

Wellman, James Kenneth 1997; MDiv, 1985, Princeton Theological Seminary; PhD, 1995, University of Chicago

Williams, Michael Allen * 1976; MA, 1970, Miami University (Ohio); PhD, 1977, Harvard University

Woods, Ronald E. 1992, (Affiliate); BSFS, 1961, Georgetown University

Yamamura, Koza * 1970, (Emeritus); PhD, 1964, Northwestern University

Yang, Anand Alan 2002; PhD, 1976, University of Virginia

Associate Professors

Callahan, Mary P. 1999; MSc, 1984, London School of Economics (UK); MA, 1991, Cornell University; PhD, 1996, Cornell University

Curran, Sara R. 2005; MS, 1990, North Carolina State University; PhD, 1994, University of North Carolina

Friedman, Kathie 1987; MA, 1979, State Univ of New York (Binghamton); PhD, 1992, State Univ of New York (Binghamton)

Garcia, Maria Elena 2008; MA, 1996, Brown University; PhD, 2001, Brown University

Giebel, Christoph Johannes Friedrich 1998; MA, 1989, Cornell University; MA, 1991, Cornell University; PhD, 1996, Cornell University

Jones, Christopher Downer * 1984; MA, 1969, Harvard University; PhD, 1975, Harvard University

Lang, Sabine 2002; MA, 1985, Free University Berlin; PhD, 1997, Free University Berlin

Lucero, Jose Antonio 2008; MA, 1997, Princeton University; PhD, 2002, Princeton University

Nam, Hwasook Bergquist 1993; MA, 1989, Seoul National University (Korea); PhD, 2003, University of Washington

Novetzke, Christian Lee 2007; MS, 1996, Harvard University; PhD, 2002, Columbia University

Pianko, Noam 2004; PhD, 2004, Yale University

Porter, Deborah Lynn 2002; PhD, 1989, Princeton University

Radnitz, Scott Brian 2007; PhD, 2006, Massachusetts Institute of Technology

Robinson, Cabeiri Debergh 2003; MA, 1999, Cornell University; PhD, 2005, Cornell University

Warren, Jonathan Winddance 1996; MA, 1990, University of California (Berkeley); PhD, 1997, University of California (Berkeley)

Assistant Professors

Ahuvia, Mika 2014, (Acting); MA, 2008, University of Michigan

Bessner, Daniel M. 2014; MA, 2010, Duke University; PhD, 2013, Duke University

Kale, Sunila 2007; PhD, 2007, University of Texas (Austin)

Naar, Devin Emmanuel 2011; MA, 2010, Stanford University; PhD, 2011, Stanford University

Weber, Rebecca Herman 2014, (Acting); MA, 2010, University of California (Berkeley); PhD, 2014, University of California (Berkeley)

Williams, Nathalie Elizabeth 2012; PhD, 2009, University of Michigan

Senior Lecturers

Lorenz, Frederick Michael 1999; JD, 1971, Marquette University; LLM, 1982, George Washington University

Tokuno, Kyoko 2001; MA, 1983, University of California (Berkeley); PhD, 1994, University of California (Berkeley)

Lecturers

Basic, Denis 2006; MA, 1992, University of Vienna, Austria; PhD, 2006, University of Washington

Begun, Jeffrey C. 2003; MA, 2003, University of Colorado (Denver); PhD, 2009, University of Washington

Montgomery, Scott 2002; MS, 1978, Cornell University

Law, Societies, and Justice

Professor

Beckett, Katherine Ann 2000; MA, 1989, University of California (Los Angeles); PhD, 1994, University of California (Los Angeles)

Associate Professors

Osanloo, Arzoo 2002; JD, 1993, American University; PhD, 2002, Stanford University

Rodriguez-Garavito, Cesar 2010, (Affiliate); JD, 1996, University of Los Andes Law School, Columbia; MA, 1999, National University of Colombia; MA, 2001, New York University; MS, 2003, University of Wisconsin (Madison); PhD, 2007, University of Wisconsin (Madison)

Assistant Professor

Jackson, Peter Hardin 1999, (Affiliate); BArch, 1995, Georgetown University

Lecturers

Wender, Jonathan Marcus 2006; PhD, 2004, Simon Fraser University, B.C. (Canada)

Woiak, Joanne Dawn 2001; MA, 1990, University of Toronto (Canada); PhD, 1998, University of Toronto (Canada)

Linguistics

Professors

Bender, Emily R. Menon 2003; MA, 1997, Stanford University; PhD, 2000, Stanford University

Contreras, Heles * 1964, (Emeritus); MA, 1959, Indiana University; PhD, 1961, Indiana University

Hargus, Sharon Louise * 1985; MA, 1981, University of California (Los Angeles); PhD, 1985, University of California (Los Angeles)

Herschensohn, Julia Ann Rogers 1985; MA, 1970, University of California (Santa Barbara); PhD, 1976, University of Washington

Hoard, James Ellsworth 1990, (Affiliate); MA, 1966, University of Washington; PhD, 1967, University of Washington
Kaisse, Ellen Maud * 1976; PhD, 1977, Harvard University
Klausenburger, Jurgen 1969, (Emeritus); MA, 1966, University of Michigan; PhD, 1969, University of Michigan

Newmeyer, Frederick Jaret * 1969, (Emeritus); MA, 1967, University of Rochester; PhD, 1969, University of Illinois
Tarlinskaya, Marina * 1982, (Emeritus); Diploma, 1957, Moscow Institute of Foreign Languages; PhD, 1967, Moscow Institute of Foreign Languages; DPhil, 1976, Moscow Institute of Foreign Languages

Wright, Richard Albert 1998; MA, 1993, University of California (Los Angeles); PhD, 1996, University of California (Los Angeles)

Zagona, Karen Thordis * 1987; PhD, 1982, University of Washington

Associate Professors

Aldridge, Edith 2007; MA, 1992, Sophia University (Japan); PhD, 2004, Cornell University

Citko, Barbara 2005; PhD, 2000, Stony Brook University
Evans, Betsy Erin 2007; MA, 1992, Kent State University; PhD, 2001, Michigan State University

Levow, Gina-Anne 2010; SM, 1993, Massachusetts Institute of Technology; PhD, 1998, Massachusetts Institute of Technology

Ogihara, Toshiyuki * 1991; MA, 1983, Sophia University (Japan); PhD, 1989, University of Texas (unspecified)

Wassink, Alicia Beckford 1998; PhD, 1999, University of Michigan

Xia, Fei 2005; MS, 1997, University of Pennsylvania; PhD, 2001, University of Pennsylvania

Assistant Professors

Aoki, Paul K. 1988, (Affiliate); MA, 1976, University of Washington; PhD, 1981, University of Washington

Lewis, William D. 2005, (Affiliate); MA, 1999, University of Arizona; PhD, 2002, University of Arizona

Solti, Imre 2007, (Affiliate); MD, 1992, Albert Szent-Gyorgyi Medical University; PhD, 2006, Virginia Commonwealth University

Tjalve, Michael 2009, (Affiliate); MA, 1999, University of Copenhagen (Denmark); PhD, 2007, University of London, UK

Senior Lecturer

Forshay, Lance 2007; MS, 1998, Southern Christian University

Lecturers

McGarrity, Laura Wilbur 2004; MA, 1999, Indiana University; PhD, 2003, Indiana University

Winter, Kristi Gay 2010; MA, 2008, Gallaudet University

Mathematics

Professors

Billey, Sara Cosette 2002; MA, 1991, University of California (San Diego); PhD, 1994, University of California (San Diego)

Brownell, Francis Herbert * 1950, (Emeritus); MS, 1947, Yale University; PhD, 1949, Princeton University

Bube, Kenneth Paul * 1986; MS, 1976, Stanford University; PhD, 1978, Stanford University

Burdzy, Krzysztof * 1988; MA, 1979, Maria Curie-Skłodowska University; PhD, 1984, University of California (Berkeley)

Burke, James Vincent * 1985; PhD, 1983, University of Illinois

Chen, Zhen-Qing * 1998; MS, 1987, East China Normal University; PhD, 1992, Washington University

Collingwood, David H. * 1987; PhD, 1983, University of Utah

Curjel, Caspar R. * 1964, (Emeritus); Diploma, 1954, Eidgenössische Technische Hochschule (Switz); DSc, 1960, Eidgenössische Technische Hochschule (Switz)

Duchamp, Thomas Eugene 1979; MS, 1969, University of Illinois; PhD, 1976, University of Illinois

Folland, Gerald Budge * 1973, (Emeritus); MA, 1970, Princeton University; PhD, 1971, Princeton University

Gangolli, Ramesh A. * 1962, (Emeritus); PhD, 1961, Massachusetts Institute of Technology

Goldstein, Allen Abbey * 1964, (Emeritus); MA, 1952, Georgetown University; PhD, 1954, Georgetown University
Goodearl, Kenneth Ralph * 1998, (Affiliate); MS, 1969, University of Washington; PhD, 1971, University of Washington

Graham, Charles Robin * 1984; MA, 1976, Rice University; PhD, 1981, Princeton University

Greenberg, Ralph * 1978; PhD, 1970, Princeton University
Grunbaum, Branko * 1960, (Emeritus); MA, 1954, Hebrew University (Israel); PhD, 1957, Hebrew University (Israel)

Hoffman, Christopher 1999; MS, 1994, Stanford University; PhD, 1996, Stanford University

Irving, Ronald Scott * 1980; PhD, 1977, Massachusetts Institute of Technology

Kas, Arnold * 1995, (Affiliate); PhD, 1966, Stanford University

Koblitz, Neal Irving * 1979; PhD, 1974, Princeton University

Kovacs, Sandor Jozsef 2000; MS, 1990, Eotvos Lorand University (Hungary); PhD, 1995, University of Utah

Lauter, Kristin Estella 2008, (Affiliate); MS, 1991, University of Chicago; PhD, 1996, University of Chicago

Lee, John Marshall * 1986; PhD, 1982, Massachusetts Institute of Technology

Lind, Douglas Allen * 1975, (Emeritus); MA, 1971, Stanford University; PhD, 1973, Stanford University

Marshall, Donald Eddy * 1976; MA, 1972, University of California (Los Angeles); PhD, 1976, University of California (Los Angeles)

McGovern, William Montgomery * 1990; PhD, 1987, Massachusetts Institute of Technology

Mitchell, Stephen A. * 1985; PhD, 1981, University of Washington

Morrow, James Allen 1969; PhD, 1967, Stanford University
Namioka, Isaac * 1963, (Emeritus); EE, 1948, Kobe Technical College; MA, 1953, University of Kansas; PhD, 1956, University of California (Berkeley)

Nijenhuis, Albert * 1988, (Affiliate); PhD, 1952, University of Amsterdam (Netherlands)

Novik, Isabella 2001; MS, 1996, Hebrew University (Israel); PhD, 1999, Hebrew University (Israel)

Palmieri, John Harold 1999; PhD, 1991, Massachusetts Institute of Technology

Pollack, Daniel * 1996; MS, 1986, University of Pennsylvania; PhD, 1991, Stanford University

Ragozin, David Lawrence * 1969, (Emeritus); MA, 1963, Harvard University; PhD, 1967, Harvard University

Rockafellar, Ralph Tyrrell * 1966, (Emeritus); MS, 1959, Marquette University; PhD, 1963, Harvard University

Rohde, Steffen Rudolf * 1998; MS, 1987, Technical University of Berlin (Germany); PhD, 1989, Technical University of Berlin (Germany)

Segal, Jack * 1960, (Emeritus); MS, 1957, University of Miami (Florida); PhD, 1960, University of Georgia

Smith, Hart Francis * 1991; PhD, 1989, Princeton University

Smith, Sholto Paul * 1986; MSc, 1978, University of London, UK; PhD, 1981, University of Leeds (UK)

Solomyak, Boris * 1990; MSc, 1981, Leningrad University (Russia); PhD, 1986, Leningrad University (Russia)

Stein, William A. 2006; PhD, 2000, University of California (Berkeley)

Stout, Edgar Lee * 1969, (Emeritus); MA, 1961, University of Wisconsin; PhD, 1964, University of Wisconsin

Sullivan, John Brendan * 1973, (Emeritus); PhD, 1971, Cornell University

Sylvester, John * 1987; MS, 1977, New York University; PhD, 1980, New York University

Thomas, Rekha Rachel 2000; MS, 1992, Cornell University; PhD, 1994, Cornell University

Toro, Tatiana * 1996; MS, 1989, Stanford University; PhD, 1992, Stanford University

Tuncel, Selim * 1982; MSc, 1979, University of Warwick (UK); PhD, 1982, University of Warwick (UK)

Uhlmann, Gunther A. * 1984; PhD, 1976, Massachusetts Institute of Technology

Warner, Garth William Jr. * 1966; PhD, 1966, University of Michigan

Westwater, Michael John * 1970, (Emeritus); PhD, 1967, Cambridge University (UK)

Yuan, Yu 2001; MS, 1993, Academia Sinica, China; PhD, 1998, University of Minnesota

Zhang, Jian James * 1994; MS, 1985, Fudan University (China); PhD, 1991, Massachusetts Institute of Technology

Associate Professors

Arms, Judith Meryl * 1980; MA, 1974, University of California (Berkeley); PhD, 1977, University of California (Berkeley)

Devinatz, Ethan Sander * 1991; PhD, 1985, Massachusetts Institute of Technology

Dumitriu, Ioana 2006; PhD, 2003, Massachusetts Institute of Technology

Holroyd, Alexander Edward 2007, (Affiliate); MA, 1999, University of Cambridge (UK); PhD, 2000, University of Cambridge (UK)

King, James Richard * 1974, (Emeritus); MA, 1967, University of California (Berkeley); PhD, 1969, University of California (Berkeley)

Lieblich, Max 2009; PhD, 2004, Massachusetts Institute of Technology

Lubetzky, Eyal 2008, (Affiliate); PhD, 2008, Tel Aviv University (Israel)

Monk, George Stephen * 1964, (Emeritus); PhD, 1966, University of Minnesota

Pal, Soumik 2008; MS, 2002, Indian Statistical Institute; PhD, 2006, Columbia University

Pevtsova, Julia 2005; PhD, 2002, Northwestern University

Wilson, David Bruce 2000, (Affiliate); PhD, 1996, Massachusetts Institute of Technology

Assistant Professors

Drusvyatskiy, Dmitriy 2014; MS, 2010, Cornell University; PhD, 2013, Cornell University

Nachmias, Asaf 2011, (Affiliate); MSc, 2004, Tel Aviv University (Israel); PhD, 2008, University of California (Berkeley)

Ozols, Vilnis * 1968, (Emeritus); MA, 1965, University of California (Berkeley); PhD, 1967, University of California (Berkeley)

Rothvoss, Thomas 2014; Diploma, 2006, University of Dortmund; PhD, 2009, Ecole Polytechnique Federale De Lausanne

Viray, Bianca 2014; PhD, 2010, University of California (Berkeley)

Senior Lecturers

Conroy, Matthew Michael 2001; MS, 1990, University of Lowell; PhD, 1997, University of Colorado (Boulder)

Loveless, Andrew 2005; MS, 2004, Washington State University; PhD, 2005, Washington State University

Nichifor, Alexandra 1997; MSc, 1997, Syracuse University

Perkins, Patrick Thomas 1995; PhD, 1988, University of Washington

Taggart, Jennifer Lyn 2001; MA, 1993, University of Colorado (Boulder); PhD, 1997, University of Colorado (Boulder)

Lecturers

Bekyel, Ebru 2005; PhD, 2002, Brown University

Ostroff, Jonah K. 2013; PhD, 2013, Brandeis University

Warfield, Virginia McShane 1973, (Emeritus); MA, 1965, Brown University; PhD, 1971, Brown University

Music

Professors

Bernard, Jonathan Walter * 1987; MA, 1973, Yale University; MPhil, 1975, Yale University; PhD, 1977, Yale University

Bozarth, George S. * 1978; MFA, 1973, Princeton University; PhD, 1978, Princeton University

Campbell, Patricia Shehan 1989; MM, 1975, University of Akron; PhD, 1981, Kent State University

Carlsen, James C. * 1967, (Emeritus); MA, 1958, University of Washington; PhD, 1962, Northwestern University

Collier, Thomas W. 1980; BA, 1971, University of Washington; BMus, 1971, University of Washington

Demorest, Steven McGregor * 1993, (Affiliate); MM, 1983, Westminster Choir College; PhD, 1989, University of Wisconsin (Madison)

Dempster, Stuart R. * 1968, (Emeritus); MA, 1967, San Francisco State

Dissanayake, Ellen 1998, (Affiliate); MA, 1970, University of Maryland

Durand, Joel-Francois * 1991; MM, 1984, Musikhochschule, Freiburg (Germany); PhD, 1988, State Univ of New York (Stony Brook)

Ellingson, Terry J. * 1981; MA, 1970, University of Chicago; PhD, 1979, University of Wisconsin (Madison)

Grossman, Arthur * 1968, (Emeritus); Diploma, 1955, Curtis Institute of Music

Kaplan, Abraham * 1977, (Emeritus); Diploma, 1953, Juilliard School; Diploma, 1953, Israel Academy of Sciences and Humanities, Jerusalem; Diploma, 1957, Juilliard School

Kappy, David Lawrence * 1979, (Emeritus); MM, 1971, University of Wisconsin (Madison)

Karpen, Richard Scott * 1989; MA, 1986, Stanford University; DMA, 1989, Stanford University

Kechley, Gerald Raymond * 1947, (Emeritus); MA, 1950, University of Washington

Lundquist, Barbara Cooke Reeder * 1966, (Emeritus); MS, 1959, Montana State University; DMA, 1973, University of Washington

McCabe, Robin Lue 1987; MMUS, 1973, Juilliard School; DMA, 1978, Juilliard School

Morlot, Ludovic 2012, (Affiliate); DMus, 2000, Royal Academy of Music (London)

Morrison, Steven Joseph 1997; MM, 1988, University of Wisconsin (Madison); PhD, 1995, Louisiana State University

Rahn, John * 1975, (Emeritus); Diploma, 1967, Juilliard School; MFA, 1972, Princeton University; PhD, 1974, Princeton University

Salzman, Timothy Owen * 1987; MM, 1979, Northern Illinois University

Seales, Marc Anthony 1980; BA, 1978, Western Washington University

Sheppard, Craig Douglass * 1993; MSc, 1971, Juilliard School

Siki, Bela * 1965, (Emeritus); Diploma, 1945, Franz Liszt Music Academy; Diploma, 1948, Conservatoire De Musique (Switzerland)

Smith, William Overton * 1966, (Emeritus); MA, 1952, University of California (campus unspecified)

Starr, Lawrence 1977; PhD, 1973, University of California (Berkeley)

Storch, Laila * 1968, (Emeritus); BA, 1964, Wilkes College

Terry, Carole Ruth * 1979; MM, 1973, University of Rochester; DMA, 1977, Stanford University

Associate Professors

Benshoof, Kenneth Wayne 1963, (Emeritus); MA, 1963, San Francisco State

Boers, Geoffrey Paul 1996; MS, 1985, Portland State University; DMA, 1987, University of Arizona

Dudley, Shannon Kingdon 1996; MA, 1988, University of California (Berkeley); PhD, 1997, University of California (Berkeley)

Harper, Thomas Lee 1998; MM, 1976, University of Arkansas

Jussila, Clyde F. 1971, (Emeritus); MS, 1951, Kansas State University

Michaelian, Patricia * 1984, (Emeritus); Diploma, 1970, Curtis Institute of Music; Diploma, 1971, Curtis Institute of Music

Pampin, Juan Carlos 1999; MA, 1995, National Conservatory of Music, France; PhD, 2000, Stanford University; DMA, 2000, Stanford University

Rosinbum, Ralph Rambo 1942, (Emeritus); MA, 1948, University of Washington

Rumph, Stephen Charles 2002; MA, 1992, University of California (Berkeley); PhD, 1997, University of California (Berkeley)

Schuyler, Philip Daniel 1999, (Emeritus); MA, 1974, University of Washington; PhD, 1979, University of Washington

Sunardi, Christina Michelle 2007; MA, 2003, University of California (Berkeley); PhD, 2007, University of California (Berkeley)

Taricani, JoAnn * 1980; MA, 1977, University of Pennsylvania; PhD, 1986, University of Pennsylvania

Velinzon, Alexander 2014, (Affiliate); MEnvSc, 1998, Juilliard School

Vu, Cuong 2007; BM, 1993, New England Conservatory of Music

Watras, M. Melia 2004; MM, 1995, Indiana University

Wyers, Giselle E. 2006; MM, 1996, Westminster Choir College; PhD, 2000, University of Arizona

Assistant Professors

Anderson, Joseph Lloyd 2013, (Affiliate); MM, 2003, University of Birmingham (UK); PhD, 2003, University of Birmingham (UK)

Hodge, Huck John 2008; MA, 2004, Columbia University; DMA, 2008, Columbia University

Roberts, John Christopher 1992, (Affiliate); MA, 2007, University of Washington; PhD, 2012, University of Washington

Sercombe, Laurel 1979, (Affiliate); MA, 1977, University of Washington; PhD, 2001, University of Washington

Shin, Donna Young 2007; MM, 1999, New England Conservatory of Music; DMA, 2007, Eastman School of Music

Lecturers

Berry, Michael 2011; MM, 2000, Temple University; PhD, 2007, City University of New York

Cobb, Brian Allen 2003; MM, 2000, University of Massachusetts; DMA, 2006, University of Washington

Farley, Alison 2009; Biomedical Engineering Degree, 2003, University of Kansas; MM, 2009, University of Louisville; PhD, 2014, University of Washington

Hanford, John Cavanaugh 2004; MA, 1997, University of Washington; PhD, 2003, University of Washington

Harreld, Nicole R 2009; MM, 2014, University of Washington

Near Eastern Languages and Civilization

Professors

Cirtautas, Ilse Dorothea * 1968; Abitur, 1944, Gymnasium, Treuburg (East Prussia); PhD, 1958, University of Hamburg (Germany)

Heer, Nicholas Lawson * 1965, (Emeritus); PhD, 1955, Princeton University

Noegel, Scott B. 1995; MA, 1993, Cornell University; PhD, 1994, Cornell University

Reid, Donald M. 2006, (Affiliate); PhD, 1969, Princeton University

Sokoloff, Naomi B. * 1985; MA, 1979, Princeton University; PhD, 1980, Princeton University

Ziadeh, Farhat J. * 1966, (Emeritus); LLB, 1940, University of London, UK

Associate Professors

Brown, Jonathan Ac 2006, (Affiliate); PhD, 2006, University of Chicago

Deyoung, Terri Lynn * 1991; MA, 1981, American University in Cairo; PhD, 1988, University of California (Berkeley)

Elkhafaifi, Hussein M. 2004; MA, 1977, University of Utah; PhD, 1985, University of Utah

Kuru, Selim Sirri 1999; MA, 1993, Bogazici University (Istanbul); PhD, 2000, Harvard University

Assistant Professors

Alavi, Samad Josef 2013; MA, 2006, University of Chicago

Mahmood, Hamza 2013; MA, 2011, Cornell University; PhD, 2014, Cornell University

Lecturers

Badiee, Maryam 2012; MA, 1996, Islamic Azad University (Tehran)

Benson, Susan E. 2005; MA, 1983, University of Utah

Martin, Gary Dean 2001; MA, 2003, University of Washington; PhD, 2007, University of Washington

Mawkanuli, Talant 2008; MA, 1988, Xinjiang University (China); PhD, 1999, Indiana University

Romano, Tovi 2009; BEd, 1990, Levinski College of Education (Israel)

Selover, Stephanie LeSan 2014; MA, 2008, University of Chicago; PhD, 2015, University of Chicago

Shams, Shahrzad 2009; MA, 1995, California State University, Fullerton

Philosophy

Professors

Blake, Michael I. 2005; PhD, 1998, Stanford University

BonJour, Laurence Alan * 1977, (Emeritus); PhD, 1969, Princeton University

Clatterbaugh, Kenneth C. * 1966, (Emeritus); PhD, 1966, Indiana University

Coburn, Robert Craig * 1970, (Emeritus); MA, 1958, Harvard University; PhD, 1958, Harvard University

Cohen, Saul Marc * 1973, (Emeritus); PhD, 1967, Cornell University

Fine, Arthur I. 2001, (Emeritus); MS, 1960, Illinois Institute of Technology; PhD, 1963, University of Chicago

Gardiner, Stephen M. 2004; MA, 1993, University of Colorado (Boulder); PhD, 1999, Cornell University

Hankinson Nelson, Lynn 2002; PhD, 1987, Temple University

Keyt, David * 1957, (Emeritus); MA, 1953, Cornell University; PhD, 1955, Cornell University

Marks, Charles Emil * 1966, (Emeritus); PhD, 1972, Cornell University

Moore, Ronald Melville * 1977; PhD, 1971, Columbia University

Potter, Karl Harrington * 1970, (Emeritus); MA, 1952, Harvard University; PhD, 1955, Harvard University

Roberts, Jean Valerie * 1991; MA, 1978, University of Pittsburgh; PhD, 1982, University of Pittsburgh

Rosenthal, Michael 2002; MA, 1996, University of Chicago; PhD, 1996, University of Chicago

Talbott, William Johnson 1989; PhD, 1976, Harvard University

Wylie, Margaret Alison 2005; MA, 1979, State Univ of New York (Binghamton); PhD, 1982, State Univ of New York (Binghamton)

Associate Professors

Goering, Sara L. 2003; MA, 1994, University of Colorado (Denver); PhD, 1998, University of Colorado (Denver)

Manchak, John Byron 2009; PhD, 2009, University of California (Irvine)

Mishalani, James Karam * 1963, (Emeritus); MA, 1958, Brown University; PhD, 1961, Brown University

Smith, Angela Marie 1999, (Affiliate); PhD, 1999, Harvard University

Weller, Cass Jordan 1990; MA, 1981, University of Pittsburgh; PhD, 1983, University of Pittsburgh

Woody, Andrea Isaacs 1997; PhD, 1996, University of Pittsburgh; PhD, 1997, University of Pittsburgh

Assistant Professors

Berk, Mary 2009, (Affiliate); MA, 2000, University of Denver; PhD, 2004, University of Denver

Dumas, Bob Alan 2002, (Affiliate); CPH, 1984, University of California (Berkeley); PhD, 1992, University of California (Berkeley)

Keyt, Christine Mullikin 1977, (Affiliate); MA, 1970, University of Wisconsin; MA, 1978, University of Washington; PhD, 1980, University of Washington

Klein, Eran 2012, (Affiliate); PhD, 2002, Georgetown University; MD, 2004, Georgetown University

Lee, Carole Jane 2008; PhD, 2006, University of Michigan
Lone, Jana Mohr 1992, (Affiliate); JD, 1985, George Washington University; MA, 1990, University of Washington; PhD, 1996, University of Washington

Lucian, Miriam Laura 1972, (Affiliate); MS, 1970, Harvard University; PhD, 1970, Harvard University

Marshall, Colin Robert 2013; MA, 2007, New York University; PhD, 2010, New York University

Mayo-Wilson, Conor Andrew 2014; MS, 2009, Carnegie Mellon University; PhD, 2012, Carnegie Mellon University

Schellenberg, Ingra 2007; MA, 2000, Queen's University (UK); MA, 2003, University of North Carolina, Chapel Hill; PhD, 2006, University of North Carolina, Chapel Hill

Lecturers

Baker, Ann Michelle 1981; MA, 1983, University of Washington; PhD, 1990, University of Washington

Nichols, Lauren Hartzell 2009; PhD, 2009, Stanford University

Physics

Professors

Adelberger, Eric George * 1970, (Emeritus); PhD, 1967, California Institute of Technology

Alberg, Mary Ann 1974, (Affiliate); MS, 1970, University of Washington; PhD, 1974, University of Washington

Andreev, Anton 2004; MA, 1993, Johns Hopkins University; PhD, 1996, Massachusetts Institute of Technology

Baker, Marshall * 1962, (Emeritus); PhD, 1958, Harvard University

Balantekin, Akif Baha 1997, (Affiliate); MS, 1976, Middle East Technical University (Turkey); MPhil, 1979, Yale University; PhD, 1982, Yale University

Bardeen, James Maxwell * 1966, (Emeritus); PhD, 1965, California Institute of Technology

Barrett, Bruce Richard 2000, (Affiliate); MS, 1964, Stanford University; PhD, 1967, Stanford University

Bertsch, George Frederick * 1992; PhD, 1965, Princeton University

Bichsel, Hans 1958, (Affiliate); PhD, 1951, University of Basel (Switzerland)

Boulware, David George * 1965, (Emeritus); MA, 1960, Harvard University; PhD, 1962, Harvard University

Bowles, Thomas Joseph 1995, (Affiliate); PhD, 1978, Princeton University

Boynton, Paul E. * 1970, (Emeritus); PhD, 1967, Princeton University

Brown, Lowell S. * 1968, (Emeritus); MA, 1958, Harvard University; PhD, 1961, Harvard University

Bulgac, Aurel * 1993; MSc, 1973, Leningrad State University; PhD, 1977, Leningrad Nuclear Physics Inst (Russia)

Burnett, Thompson Humphrey * 1975, (Emeritus); PhD, 1968, University of California (San Diego)

Cahn, John Werner 1984, (Affiliate); PhD, 1953, University of California (Berkeley)

Chaloupka, Vladimir * 1980; PhD, 1975, University of Geneva (Switzerland)

Cleveland, Bruce Taylor 2001, (Affiliate); PhD, 1970, Johns Hopkins University

Cobden, David Henry 2001; MSc, 1987, St. Andrews College; PhD, 1992, Cambridge University (UK)

Cook, Victor * 1963, (Emeritus); PhD, 1962, University of California (Berkeley)

Cramer, John Gleason Jr. * 1964, (Emeritus); MA, 1959, Rice University; PhD, 1961, Rice University

Dehmelt, Hans Georg * 1955, (Emeritus); MA, 1948, University of Gottingen (Germany); PhD, 1950, University of Gottingen (Germany)

Den Nijs, Marcel P. M. * 1981; PhD, 1979, Katholieke University (Netherlands)

Doe, Peter J. * 1994, (Research); MSc, 1974, University of Durham (UK); PhD, 1977, University of Durham (UK)

Elliott, Steven Ray * 1995, (Affiliate); MS, 1984, University of California (Irvine); PhD, 1987, University of California (Irvine)

Fortson, Edward Norval * 1963, (Emeritus); PhD, 1964, Harvard University

Friedman, William Albert 2004, (Affiliate); PhD, 1966, Massachusetts Institute of Technology

Garcia, Alejandro 1986; PhD, 1991, University of Washington

Goussiou, Anna 2007; PhD, 1995, University of Wisconsin (Madison)

Gundlach, Jens Horst 1984; PhD, 1990, University of Washington

Halpern, Isaac * 1953, (Emeritus); PhD, 1948, Massachusetts Institute of Technology

Hastings, Matthew 2014, (Affiliate); PhD, 1997, Massachusetts Institute of Technology

Heckel, Blayne Ryan * 1983; MA, 1978, Harvard University; PhD, 1981, Harvard University

Henley, Ernest Mark * 1954, (Emeritus); PhD, 1952, University of California (Berkeley)

Heron, Paula 1995; MS, 1992, University of Ottawa (Canada); PhD, 1995, University of Western Ontario (Canada)

Hertzog, David W. 2008; MS, 1979, College of William And Mary; PhD, 1983, College of William And Mary

Ingalls, Robert L. * 1966, (Emeritus); MS, 1960, Carnegie Institute of Technology; PhD, 1962, Carnegie Institute of Technology

Kaplan, David B. * 1994; PhD, 1985, Harvard University

Karch, Andreas 2002; MA, 1996, University of Texas (Austin); PhD, 1998, Humboldt University (Germany)

Levanyuk, Arkady 2013, (Affiliate); PhD, 1964, Moscow State University (Russia); DSc, 1977, Academy of Science (Ussr)

Lubatti, Henry J. * 1969; MS, 1963, University of Illinois; PhD, 1966, University of California (Berkeley)

Magierski, Piotr 1998, (Affiliate); MSc, 1992, Technical University of Warsaw (Poland); PhD, 1995, Technical University of Warsaw (Poland)

McDermott, Lillian C. * 1967; MA, 1956, Columbia University; PhD, 1959, Columbia University

Miller, Gerald Alan * 1975; SM, 1968, Massachusetts Institute of Technology; PhD, 1972, Massachusetts Institute of Technology

Mockett, Paul Markley * 1972, (Emeritus); PhD, 1965, Massachusetts Institute of Technology

Nelson, Ann E. * 1994; MA, 1981, Harvard University; PhD, 1984, Harvard University

Nordtvedt, Kenneth 2003, (Affiliate); PhD, 1964, Stanford University

Olmstead, Marjorie Ann * 1991; MA, 1979, Swarthmore College; MA, 1982, University of California (Berkeley); PhD, 1985, University of California (Berkeley)

Puff, Robert David * 1962, (Emeritus); PhD, 1960, Harvard University

Reddy, Sanjay Kumar 1998; MSc, 1993, Indian Institute of Technology (India); PhD, 1998, State Univ of New York (Stony Brook)

Rehr, John Jacob * 1974; PhD, 1972, Cornell University

Riedel, Eberhard Karl * 1975, (Affiliate); Diploma, 1961, University of Zu Koln (Germany); Diploma, 1964, University of Zu Koln (Germany); PhD, 1966, Technical University of Munich (Germany)

Robertson, Robert G. Hamish * 1994; MA, 1965, Oxford University (UK); PhD, 1971, McMaster University (Canada)

Rosenberg, Leslie 2005; MS, 1980, San Francisco State; PhD, 1985, Stanford University

Rothberg, Joseph Eli * 1969, (Emeritus); MA, 1958, Columbia University; PhD, 1963, Columbia University

Savage, Martin John * 1996; MSc, 1985, University of Auckland (New Zealand); PhD, 1990, California Institute of Technology

Schick, Michael * 1969; MS, 1964, Stanford University; PhD, 1967, Stanford University

Seidler, Gerald Todd 1996; MA, 1991, University of Chicago; PhD, 1993, University of Chicago

Shaffer, Peter Scott 1985; PhD, 1993, University of Washington

Sharpe, Stephen Roger * 1986; PhD, 1983, University of California (Berkeley)

Snover, Kurt Albert * 1972, (Emeritus); MS, 1968, Stanford University; PhD, 1969, Stanford University

Sorensen, Larry Brice * 1983; MS, 1974, University of Illinois; PhD, 1979, University of Illinois

Spivak, Boris * 1991; PhD, 1978, Leningrad Polytechnic Institute (Russia)

Stern, Edward Abraham * 1965, (Emeritus); PhD, 1955, California Institute of Technology

Storm, Derek W. * 1979, (Emeritus); PhD, 1970, University of Washington

Strassler, Matthew James 2002, (Affiliate); PhD, 1993, Stanford University

Stubbs, Christopher William * 1981, (Affiliate); MS, 1983, University of Washington; PhD, 1988, University of Washington

Thouless, David James * 1980, (Emeritus); PhD, 1958, Cornell University

Trainor, Thomas A. * 1973, (Research); PhD, 1973, University of North Carolina

Van Bibber, Karl Albert 2007, (Affiliate); PhD, 1976, Massachusetts Institute of Technology

Van Dyck, Robert Spaulding Jr. * 1971, (Emeritus); PhD, 1971, University of California (Berkeley)

Van Kolck, Ubirajara Lourencao 1993, (Affiliate); MSc, 1987, Instituto De Fisica Teorica (Brazil); PhD, 1993, University of Texas (unspecified)

Vilches, Oscar E. * 1968, (Emeritus); PhD, 1966, National University of Cuyo (Argentina)

Watts, Gordon Thomas 1999; PhD, 1995, University of Rochester

Weitkamp, William George * 1964, (Emeritus); MS, 1961, University of Wisconsin (Madison); PhD, 1965, University of Wisconsin (Madison)

Wettlaufer, John Scott 1987, (Affiliate); PhD, 1991, University of Washington

Wilkerson, John Franklin * 1994, (Affiliate); MS, 1979, University of North Carolina; PhD, 1982, University of North Carolina

Wilkes, Richard Jeffrey * 1974; MS, 1969, University of Wisconsin; PhD, 1974, University of Wisconsin (Madison)

Williams, Robert Walter * 1959, (Emeritus); MA, 1943, Princeton University; PhD, 1948, Massachusetts Institute of Technology

Witten, Edward 2014, (Affiliate); MA, 1974, Princeton University; PhD, 1976, Princeton University

Yaffe, Laurence Gregory * 1988; MS, 1977, Princeton University; PhD, 1980, Princeton University

Associate Professors

Beane, Silas Robert III 1999; PhD, 1994, University of Texas (Austin)

Blinov, Boris B. 2005; Diploma, 1995, Moscow State University (Russia); PhD, 2000, University of Michigan

Gupta, Subhadeep 2003; PhD, 2003, Massachusetts Institute of Technology

Morales, Miguel 2008; PhD, 2002, University of California (Santa Cruz)

Roche, Kenneth John 2008, (Affiliate); MS, 2002, University of Tennessee

Assistant Professors

Detwiler, Jason Albert 2005; PhD, 2005, Stanford University

Forbes, Michael 2004, (Affiliate); MSc, 2000, University of British Columbia (Canada); PhD, 2005, Massachusetts Institute of Technology

Fu, Kai-Mei Camilla 2010; PhD, 2007, Stanford University
Hsu, Shih-Chieh 2012; MS, 2001, National Taiwan University; PhD, 2008, University of California (San Diego)

Laumann, Christopher Richard 2013; MSc, 2004, University of Edinburgh (UK); PhD, 2010, Princeton University

Miller, Michael L. 1999, (Affiliate); PhD, 2004, Yale University

Mueller, Peter 2012, (Affiliate); PhD, 2003, Johannes Gutenberg University, Germany

Schwenk, Achim 2003, (Affiliate); Diploma, 1997, University of Heidelberg (Germany); MA, 1999, State Univ of New York (Stony Brook); PhD, 2002, State Univ of New York (Stony Brook)

Tolich, Nikolai Rubin 2007; MSc, 1999, University of Auckland (New Zealand); PhD, 2005, Stanford University

Wiggins, Paul Alexander 2010; PhD, 2005, California Institute of Technology

Xu, Xiaodong 2010; PhD, 2008, University of Michigan

Senior Lecturers

Pengra, David B. 1986; MS, 1988, University of Washington; PhD, 1991, University of Washington

Robertson, Charles Edward 1977, (Emeritus); MS, 1963, University of Washington; MS, 1981, University of Washington

Lecturers

Messina, Donna L. 1994; MEd, 1988, Seattle University

Pedigo, Robert Daryl 1995; MA, 1972, Stanford University; PhD, 1977, University of Texas (Austin)

Political Science

Professors

Barreto, Matthew A. 2005; MS, 2003, University of California (Irvine); PhD, 2005, University of California (Irvine)

Bennett, Walter Lance * 1974; MPhil, 1973, Yale University; PhD, 1974, Yale University

Brass, Paul Richard * 1965, (Emeritus); MA, 1959, University of Chicago; PhD, 1964, University of Chicago

Caporaso, James Albert * 1988; MA, 1965, Villanova University; PhD, 1968, University of Pennsylvania

Fraga, Luis Ricardo 2007, (Affiliate); MA, 1981, Rice University; PhD, 1984, Rice University

Gill, Anthony James * 1994; MA, 1989, University of California (Los Angeles); PhD, 1994, University of California (Los Angeles)

Goldberg, Ellis Jay * 1985, (Emeritus); MA, 1970, University of California (Berkeley); PhD, 1983, University of California (Berkeley)

Gore, William J. * 1951, (Emeritus); MA, 1950, University of Southern California; PhD, 1952, University of Southern California

Hartsock, Nancy Carolyn Mosher * 1984, (Emeritus); MA, 1967, University of Chicago; PhD, 1972, University of Chicago

Levi, Margaret Anne * 1974, (Emeritus); PhD, 1974, Harvard University

Lovell, George Ivan 2001; MA, 1990, University of North Carolina; PhD, 1997, University of Michigan

Majeski, Stephen John * 1984; MA, 1975, University of New Hampshire; PhD, 1981, Indiana University

May, Peter Jeffrey * 1979; MPP, 1976, University of California (Berkeley); PhD, 1979, University of California (Berkeley)

Mayerfeld, Jason Matthew * 1991; MA, 1988, Princeton University; PhD, 1992, Princeton University

Mc Cann, Michael William * 1982; MA, 1976, University of California (Berkeley); PhD, 1983, University of California (Berkeley)

Mc Crone, Donald James * 1979, (Emeritus); PhD, 1966, University of North Carolina

Mercer, Jonathan Loveridge * 1996; MIA, 1987, Columbia University; PhD, 1993, Columbia University

Prakash, Aseem 2002; MBA, 1988, Indian Institute of Management, India; PhD, 1997, Indiana University

Reshetar, John Stephen * 1957, (Emeritus); MA, 1946, Harvard University; PhD, 1950, Harvard University

Smith, Mark Alan 1997; PhD, 1997, University of Minnesota

Taylor, Michael John * 1985, (Emeritus); MSc, 1965, University of Essex (UK); PhD, 1976, University of Essex (UK)

Wilkerson, John David * 1990; MA, 1986, University of Arizona; MA, 1989, University of Rochester; PhD, 1991, University of Rochester

Associate Professors

Adolph, Christopher A. 2004; MA, 2000, Harvard University; PhD, 2005, Harvard University

Cichowski, Rachel Aileen 2001; MA, 1997, University of California (Irvine); PhD, 2001, University of California (Irvine)

Di Stefano, Christine * 1985; MA, 1984, University of Massachusetts; PhD, 1984, University of Massachusetts

Kier, Elizabeth Lavelly * 1998; MA, 1985, Columbia University; PhD, 1992, Cornell University

Litfin, Karen Therese * 1991; MA, 1978, University of Maryland; PhD, 1992, University of California (Los Angeles)

Parker, Christopher S. 2006; MA, 1996, University of Chicago; PhD, 2001, University of Chicago

Turner, Jack III 2007; MPhil, 2001, University of Cambridge (UK); PhD, 2006, Princeton University

Whiting, Susan Hayes * 1994; PhD, 1995, University of Michigan

Assistant Professors

Arnold, Jeffrey Bernard 2014, (Acting); MA, 2012, University of Rochester

Francis, Megan Ming 2014; MA, 2005, Princeton University; PhD, 2008, Princeton University

Long, James Dunaway IV 2012; MSc, 2004, University of London, UK

Menaldo, Victor 2009; MA, 2003, Claremont Graduate School; PhD, 2009, Stanford University

Thorpe, Rebecca 2010; PhD, 2009, University of Maryland

Lecturer

Sanders, Rachel Leigh 2007; MA, 2010, University of Washington; PhD, 2013, University of Washington

Psychology

Professors

Aylward, Elizabeth Hoppes 1997, (Affiliate); MA, 1976, University of Connecticut; PhD, 1982, Cornell University

Baer, John S. * 1985, (Research); MS, 1982, University of Oregon; PhD, 1986, University of Oregon

Barash, David P. * 1973; MA, 1968, University of Wisconsin (Madison); PhD, 1970, University of Wisconsin (Madison)

Bassok, Maria 1997; MA, 1978, Hebrew University (Israel); PhD, 1984, Hebrew University (Israel)

Becker, Joseph * 1965, (Emeritus); MA, 1952, George Washington University; PhD, 1958, Duke University

Beecher, Michael Donovan * 1978; MA, 1965, Boston University; PhD, 1970, Boston University

Bernstein, Ilene Lyn * 1972, (Emeritus); MA, 1967, Columbia University; PhD, 1972, University of California (Los Angeles)

Boynton, Geoffrey 2006; MA, 1989, University of California (Santa Barbara); PhD, 1994, University of California (Santa Barbara)

Brenowitz, Eliot A. * 1987; PhD, 1982, Cornell University

Buck, Steven Louis 1976; MA, 1974, University of California (San Diego); PhD, 1976, University of California (San Diego)

Casseday, John Herbert * 1996, (Emeritus); MA, 1963, Indiana University; PhD, 1970, Indiana University

Cauce, Ana Mari 1986; MS, 1979, Yale University; PhD, 1984, Yale University

Covey, Ellen * 1996; MS, 1976, University of Houston; PhD, 1980, Duke University

Dawson, Geraldine * 1985, (Emeritus); PhD, 1979, University of Washington

Diaz, Jaime * 1978; MA, 1972, University of California (Los Angeles); PhD, 1975, University of California (Los Angeles)

Fiedler, Fred Edward * 1969, (Emeritus); AM, 1947, University of Chicago; PhD, 1949, University of Chicago

Fine, Ione 2007; MA, 1996, University of Rochester; PhD, 1999, University of Rochester

Foster, Robin Lea 1989, (Affiliate); PhD, 1992, University of Washington

George, William Henry * 1990; PhD, 1982, University of Washington

Gottman, John Mordechai * 1986, (Emeritus); MS, 1964, Massachusetts Institute of Technology; MA, 1967, University of Wisconsin; PhD, 1971, University of Wisconsin

Greenwald, Anthony G. * 1986; AM, 1961, Harvard University; PhD, 1963, Harvard University

Guralnick, Michael J. 1986; MS, 1964, Lehigh University; PhD, 1967, Lehigh University

Ha, James * 1990, (Research); MA, 1983, Wake Forest University; PhD, 1989, Colorado State University

Hunt, Earl Busby * 1966, (Emeritus); PhD, 1960, Yale University

Kahn, Peter H. 2000; MA, 1984, University of California (Berkeley); PhD, 1988, University of California (Berkeley)

Kim, Jeansok J. 2003; MA, 1989, University of California (Los Angeles); PhD, 1991, University of California (Los Angeles)

Kohlenberg, Robert Joseph * 1968; MS, 1963, University of Wisconsin; PhD, 1968, University of California (Los Angeles)

Kyes, Randall Charles * 1993, (Research); MA, 1985, Bucknell University; PhD, 1989, University of Georgia

Lengua, Liliana Josephine 1993; PhD, 1994, Arizona State University

Linehan, Marsha Marie * 1977; MA, 1970, Loyola University (campus unspecified); PhD, 1971, Loyola University (campus unspecified)

Lockard, Joan Saliba * 1962, (Emeritus); MS, 1961, San Diego State College; PhD, 1963, University of Wisconsin (Madison)

Loftus, Elizabeth Jane Fishman * 1973, (Affiliate); MA, 1967, Stanford University; PhD, 1970, Stanford University
Loftus, Geoffrey Russell * 1972; PhD, 1971, Stanford University

Mc Mahon, Robert Joseph * 1987, (Emeritus); MS, 1977, University of Georgia; PhD, 1979, University of Georgia

Meltzoff, Andrew 1974; PhD, 1976, Oxford University (UK)

Mizumori, Sheri Jane Yayoi 2000; MS, 1983, University of California (Berkeley); PhD, 1985, University of California (Berkeley)

Olavarria, Jaime Francisco * 1990; MD, 1974, State University of Chile; PhD, 1984, University of California (Berkeley)

Osterhout, Lee E. * 1991; MS, 1987, Tufts University; PhD, 1990, Tufts University

Sackett, Gene Paul * 1970, (Emeritus); MA, 1961, Claremont Graduate School; PhD, 1963, Claremont Graduate School

Sanquist, Thomas Frederick 1991, (Affiliate); MA, 1975, University of California (Los Angeles); PhD, 1980, University of California (Los Angeles)

Sarason, Barbara R. * 1966, (Emeritus); MA, 1954, Iowa State University; PhD, 1956, Indiana University

Sarason, Irwin G. * 1956, (Emeritus); MA, 1953, University of Iowa; PhD, 1955, Indiana University

Shoda, Yuichi * 1996; PhD, 1990, Columbia University

Simoni, Jane Marie 2001; MA, 1988, University of California (Los Angeles); PhD, 1990, University of California (Los Angeles)

Smith, Ronald Edward * 1969; MA, 1964, Southern Illinois University; PhD, 1968, Southern Illinois University

Smoll, Frank Louis * 1970; MS, 1966, University of Wisconsin; PhD, 1970, University of Wisconsin

Stone, Wendy 2009; MS, 1978, University of Miami (Florida); PhD, 1981, University of Miami (Florida)

Zoellner, Lori Ann 2000; MA, 1992, University of California (Los Angeles); PhD, 1997, University of California (Los Angeles)

Associate Professors

Beauchaine, Theodore Patrick 2000, (Affiliate); MA, 1997, State Univ of New York (Stony Brook); PhD, 2000, State Univ of New York (Stony Brook)

Bricker, Jonathan Baruch 1997, (Affiliate); MS, 1999, University of Washington; PhD, 2003, University of Washington

Brown, Jonathon David * 1989; PhD, 1986, University of California (Los Angeles)

Cheryan, Sapna 2007; PhD, 2007, Stanford University
Dorsey, Shannon 2007; MS, 2003, University of Georgia; PhD, 2003, University of Georgia

Flaherty, Brian P. 2005; MS, 1997, Pennsylvania State University; PhD, 2003, Pennsylvania State University

Joslyn, Susan L. 1988; MS, 1994, University of Washington; PhD, 1995, University of Washington

Kaiser, Cheryl Robin 2006; MA, 1999, University of Vermont; PhD, 2001, University of Vermont

Kenney, Nancy Jane * 1976; MA, 1972, University of Virginia; PhD, 1974, University of Virginia

Kerr, Frances Beth * 1968, (Emeritus); MS, 1968, University of North Carolina; MSPE, 1969, University of North Carolina; MA, 1973, University of Oregon; PhD, 1974, University of Oregon

King, Kevin Michael 2007; MA, 2002, Arizona State University; PhD, 2007, Arizona State University

Miyamoto, John Michael * 1984; MA, 1978, University of Michigan; PhD, 1985, University of Michigan

Murray, Scott O. 2005; MA, 1997, University of Hawaii; PhD, 2002, University of California (Davis)

Norris, Jeanette 1985, (Affiliate); MS, 1980, University of Washington; PhD, 1983, University of Washington

Repacholi, Betty Mae 2001; MS, 1986, University of West Australia; PhD, 1996, University of California (Berkeley)

Rose, Richard Michael * 1966, (Emeritus); MA, 1961, University of Pennsylvania; PhD, 1964, University of Pennsylvania

Sisneros, Joseph A. 2003; MA, 1989, California State University, Long Beach; PhD, 1999, Florida Institute of Technology

Sommerville, Jessica Alice 2002; MA, 2000, University of Chicago; PhD, 2002, University of Chicago

Assistant Professors

Ambinder, Michael Scott 2010, (Affiliate); MA, 2005, University of Illinois; PhD, 2008, University of Illinois

Bentson, Kathleen L. 1989, (Affiliate); PhD, 1997, University of Washington

Bernstein, Daniel Mark 2001, (Affiliate); MA, 1995, Brock University (Canada); PhD, 2001, Simon Fraser University, B.C. (Canada)

Brewer, Devon D. 1985, (Affiliate); MA, 1992, University of California (Irvine); PhD, 1994, University of California (Irvine)

Catz, Sheryl Lynn 2003, (Affiliate); MA, 1991, College of William And Mary; PhD, 1997, Louisiana State University

Crockett, Carolyn Martha 1971, (Affiliate); PhD, 1971, University of Washington

Finocchio, Dom V. 1969, (Emeritus); MS, 1952, University of Pittsburgh; PhD, 1954, University of Pittsburgh

Leonesio, Roger Jacob 1987, (Affiliate); MS, 1985, University of Washington; PhD, 1993, University of Washington

Leu, Janxin 2006, (Affiliate); MA, 1997, Stanford University; PhD, 2004, University of Michigan

McLaughlin, Katie Anne 2012; MS, 2004, Pennsylvania State University; MPhil, 2006, Yale University; PhD, 2008, Yale University

Olson, Kristina Reiss 2012; MA, 2005, Harvard University; PhD, 2008, Harvard University

Plaks, Jason E. 2001, (Affiliate); MA, 1997, Columbia University; MPhil, 1999, Columbia University; PhD, 2000, Columbia University

Prat, Chantel Spring 2010; MA, 2001, University of California (San Diego); PhD, 2004, University of California (San Diego)

Reid, Melissa Jamila 1997, (Affiliate); PhD, 1997, State Univ of New York (Stony Brook)

Reynolds, Sarah Katherine 1997, (Affiliate); MA, 1994, University of Iowa; PhD, 1999, University of Iowa

Sedlins, Mara 2003, (Affiliate); PhD, 2012, University of Washington

Wood, Jason 2007, (Affiliate); PhD, 2003, University of California (Davis)

Worlein, Julie May 1986, (Affiliate); PhD, 1993, University of Washington

Senior Lecturer

Passer, Michael Warren * 1977; MA, 1972, University of California (Los Angeles); PhD, 1977, University of California (Los Angeles)

Lecturers

Fagan, Corey N. * 1989; MA, 1982, University of Massachusetts; PhD, 1988, University of Massachusetts

Little, Laura Margaret 1997; JD, 1981, University of Texas (unspecified); MS, 1993, University of New Mexico; PhD, 1998, University of New Mexico

Montoya, Heidi Dylani 2003; PhD, 2010, University of Washington

Nelson, Dana C. 1993; PhD, 2005, University of Washington

Savelli, Sonia 2001; PhD, 2009, University of Washington

Voorhies, Ann C. 1999; PhD, 2006, University of Washington

Romance Languages and Literature

Professors

Anderson, Farris Furman * 1967, (Emeritus); MA, 1962, Duke University; PhD, 1968, University of Wisconsin

Geist, Anthony Leo 1987; MA, 1969, University of California (Berkeley); PhD, 1978, University of California (Berkeley)

O'Hara, Edgar * 1989; MA, 1985, Catholic University; PhD, 1989, University of Texas (unspecified)

Rafferty, Ana Maria Gomez-Bravo 2012; MA, 1986, Universidad Autonoma de Madrid; PhD, 1991, University of California (Berkeley)

Associate Professors

Collins, Douglas P. * 1980; MA, 1972, University of Missouri; PhD, 1978, University of Missouri

Dale, Robert Charles * 1963, (Emeritus); MA, 1960, University of Wisconsin

Delcourt, Denyse * 1990; MA, 1980, University of Montreal (Canada); PhD, 1987, University of Montreal (Canada)

Fernandez Dobao, Ana 2007; MA, 1999, University of Santiago, Spain; PhD, 2005, University of Santiago, Spain

Gaylard, Susan L. 2005; MA, 1999, University of California (Berkeley); PhD, 2004, University of California (Berkeley)

Gilbert, Donald W. 2002; MA, 1991, University of California (Berkeley); PhD, 1997, University of California (Berkeley)

Mackenzie, Louisa 2001; MA, 1997, University of California (Berkeley); PhD, 2001, University of California (Berkeley)

Mercer, Leigh 2005; MA, 1998, University of Texas (Austin); PhD, 2004, Boston University

Petersen, Suzanne Helen * 1973, (Emeritus); MA, 1967, University of Wisconsin; PhD, 1976, University of Wisconsin (Madison)

Sbragia, Albert John * 1989; MA, 1983, University of California (Berkeley); PhD, 1988, University of California (Berkeley)

Shipley, George Arthur * 1967, (Emeritus); MA, 1962, Harvard University; PhD, 1967, Harvard University

Turnovsky, Geoffrey 2006; MA, 1995, Columbia University; PhD, 2001, Columbia University

Watts, Richard Henry 2009; MA, 1993, Yale University; MPhil, 1994, Yale University; PhD, 1998, Yale University

Assistant Professors

Albarran, Raquel 2012, (Acting); MA, 2008, University of Pennsylvania

Arduini, Beatrice 2012; MA, 2005, Indiana University; PhD, 2008, Indiana University

Smith, Maya Angela Davis 2013; MA, 2005, New York University

Senior Lecturers

Leporace, Giuseppe 1987; MA, 1989, University of Washington

Mazzola, Claudio 2000; MA, 1982, University of Washington; PhD, 1986, University of Washington

Meyer, Hedwige Marie 1988; MA, 1992, University of Washington

Raneda Cuartero, Maria Inmaculada 1997; MA, 1994, University of Wisconsin (Madison)

Vilavella, Helene 1984; MA, 1983, University of Paris (France); MA, 1986, University of Washington; PhD, 1996, University of Washington

Yowell, Donna Lynne * 1988, (Emeritus); MA, 1982, University of California (Berkeley); PhD, 1987, University of California (Berkeley)

Lecturers

Baraboi, Otilia Georgera 2001; MA, 2003, University of Washington; PhD, 2010, University of Washington

Bodden, Rodney Vernon 1965, (Emeritus); MA, 1961, University of Toronto (Canada); PhD, 1969, University of Wisconsin (Madison)

Fernandez, Victor Orlando 2014; MA, 2008, University of Montreal (Canada)

Fox, Joan H. 1984, (Emeritus); MA, 1973, University of British Columbia (Canada)

Gillman, Maria 1990; MA, 1986, Oregon State University

Gonzalez, Jorge 1988; MM, 1986, University of Wisconsin

Jaffee, Samuel Jay 2013; MA, 2006, Washington University; PhD, 2013, University of California (Irvine)

Markley, Phillip Lynn 1994; MA, 1982, Ohio State University; MA, 1984, Ohio State University; PhD, 1994, University of Texas (Austin)

Shaw, Aimie Maureen 2010; MA, 2007, University of Victoria (Canada)

Taradel, Ruggero M. 2003; BA, 1992, University of Rome (Italy)

Tassone, Giuseppe 1997; BA, 1997, University of Washington

Witte, Anna B. 2003; MA, 1986, University of Texas (Austin); PhD, 1991, University of Texas (Austin)

Scandinavian Studies

Professors

Gavel Adams, Ann-Charlotte * 1986; MA, 1968, University of Uppsala (Sweden); MA, 1975, Linköping University (Sweden); PhD, 1990, University of Washington

Hjort, Anne Mette 2008, (Affiliate); MA, 1985, McGill University (Canada); PhD, 1989, Ecole des Hautes Etudes en Sciences Sociales, Paris

Ingebritsen, Christine 1992; MA, 1986, Columbia University; PhD, 1993, Cornell University

Kelertas, Violeta 2008, (Affiliate); PhD, 1984, University of Wisconsin (Madison)

Leiren, Terje Ivan * 1977; MA, 1970, California State University, campus unspecified; PhD, 1978, North Texas State University

Nestingen, Andrew 1997; MA, 1999, University of Washington; PhD, 2001, University of Washington

Sjavik, Jan Ivar * 1978; MA, 1976, Harvard University; PhD, 1979, Harvard University

Stecher, Marianne Tranberg * 1986; MA, 1981, University of Washington; PhD, 1990, University of California (Berkeley)

Steene, Birgitta Kerstin * 1955, (Emeritus); MA, 1955, University of Washington; PhD, 1960, University of Washington; PhD, 1966, University of Uppsala (Sweden)

Associate Professors

Bergusson, Claudia Jean 1999, (Affiliate); MA, 1987, University of Minnesota; MA, 1992, Lesley College; PhD, 2003, University of Washington

Graden, Lizette 2012, (Affiliate); PhD, 2003, University of Stockholm (Sweden)

Hanson, Katherine Jane 1977, (Affiliate); MA, 1970, University of Washington; PhD, 1978, University of Washington

Rees, Ellen Rebecca 1988, (Affiliate); MA, 1992, University of Washington; PhD, 1995, University of Washington

Sehmsdorf, Henning Kurt * 1967, (Emeritus); MA, 1964, University of Chicago; PhD, 1968, University of Chicago

Smidchens, Guntis I. 1993; MA, 1988, Indiana University; PhD, 1996, Indiana University

Assistant Professors

Larson, Katherine Louise 2014, (Affiliate); MPA, 1976, University of Washington; PhD, 2011, University of Washington

Lund, Jens 1988, (Affiliate); MA, 1975, Bowling Green State University; PhD, 1983, Indiana University

Magnusson, Brian K. 1965, (Affiliate); MA, 1967, University of Washington; PhD, 1988, University of Wisconsin (Madison)

Norlen, Paul Richard 1991, (Affiliate); MA, 1992, University of Washington; PhD, 1995, University of Washington

Purs, Aldis Edvards 2006, (Affiliate); MA, 1992, University of Toronto (Canada); PhD, 1998, University of Toronto (Canada)

Stolen, Marianne 1997, (Affiliate); PhD, 1990, University of Washington

Senior Lecturer

Dubois, la G. 1989; MA, 1981, University of California (Los Angeles); PhD, 1991, University of Washington

Slavic Languages and Literatures

Professors

Augerot, James Edward 1960, (Emeritus); MA, 1959, New Mexico Highlands University; PhD, 1968, University of Washington

Crnkovic, Gordana * 1993; MA, 1991, Stanford University; PhD, 1993, Stanford University

Diment, Galya * 1989; MA, 1978, Claremont Graduate School; PhD, 1987, University of California (Berkeley)

Dziwerek, Katarzyna Anna * 1993; MA, 1984, University of Illinois; MA, 1985, University of Lodz (Poland); MA, 1987, University of California (San Diego); PhD, 1991, University of California (San Diego)

Kapetanac, Davor * 1970, (Emeritus); MA, 1954, University of Zagreb (Croatia); PhD, 1972, University of Zagreb (Croatia)

Associate Professors

Alaniz, Jose 2003; PhD, 2003, University of California (Berkeley)

Coats, Herbert S. * 1968, (Emeritus); MA, 1964, Fordham University; PhD, 1970, University of Illinois

Ekeltschik, Serguei 2009, (Affiliate); PhD, 2000, University of Alberta, Canada

Henry, Barbara Jane 2003; MA, 1990, University of London, UK; DPhil, 1997, Oxford University (UK)

West, James D. * 1972; MA, 1969, University of Cambridge (UK); PhD, 1970, University of Cambridge (UK)

Senior Lecturers

Belic, Bojan 2005; MA, 2000, University of Illinois; PhD, 2005, Ohio State University

Holdsworth, Nora 1963, (Emeritus); BA, 1965, University of Washington

Polack, Zoya M. 1973; MA, 1975, University of Washington

Lecturers

Soldanova, Jaroslava M. 1998, (Emeritus); MA, 1977, Palackeho University, Czech Republic

Zaitseva, Valentina A. 2005; MA, 1988, Harvard University; PhD, 1992, Harvard University

Sociology

Professors

Borgatta, Edgar F. * 1980, (Emeritus); MA, 1949, New York University; PhD, 1952, New York University

Burstein, Paul * 1985, (Emeritus); MA, 1971, Harvard University; PhD, 1974, Harvard University

Campbell, Frederick Lawrence * 1966, (Emeritus); MA, 1962, University of Michigan; PhD, 1967, University of Michigan

Crowder, Kyle 1988; PhD, 1997, State University of New York (Albany)

Crutchfield, Robert Douglas * 1979; MA, 1976, Vanderbilt University; PhD, 1980, Vanderbilt University

Guest, Avery Mason * 1972, (Emeritus); MS, 1964, Columbia University; MA, 1967, University of Wisconsin (Madison); PhD, 1970, University of Wisconsin (Madison)

Hargens, Lowell Lavern 2002, (Emeritus); MA, 1969, University of Wisconsin (Madison); PhD, 1971, University of Wisconsin (Madison)

Hechter, Michael * 1970, (Emeritus); PhD, 1972, Columbia University

Herting, Jerald Roy * 1996; MA, 1977, State Univ of New York (Stony Brook); PhD, 1987, University of Washington

Hirschman, Charles * 1987; MA, 1969, University of Wisconsin (Madison); PhD, 1972, University of Wisconsin (Madison)

Howard, Judith A. * 1982; MA, 1977, University of Oregon; PhD, 1982, University of Wisconsin (Madison)

Kiser, Edgar Vance * 1988; MA, 1980, University of Arizona; PhD, 1987, University of Arizona

Laslett, Barbara 2004, (Affiliate); MA, 1959, University of Chicago; PhD, 1969, University of Washington

Marx, Gary Trade 2000, (Affiliate); MA, 1962, University of California (Berkeley); PhD, 1966, University of California (Berkeley)

Matsueda, Ross Lawrence * 1998; MA, 1980, University of California (Santa Barbara); PhD, 1984, University of California (Santa Barbara)

Morris, Wanda Martina 2000; MA, 1986, University of Chicago; PhD, 1989, University of Chicago

Opp, Karl-Dieter 2003, (Affiliate); MA, 1963, University of Cologne (Germany); PhD, 1967, University of Cologne (Germany)

Pfaff, Steven James * 1999; MA, 1994, University of North Carolina; MA, 1995, University of North Carolina; PhD, 1999, New York University

Reskin, Barbara F. 2002, (Emeritus); MA, 1970, University of Washington; PhD, 1973, University of Washington

Schmitt, David R. * 1968, (Emeritus); MA, 1962, Washington University; PhD, 1963, Washington University

Schwartz, Pepper Judith Jean * 1972; MA, 1968, Washington University; MPhil, 1970, Yale University; PhD, 1974, Yale University

Scott, Joseph Walter * 1985, (Emeritus); MA, 1959, Indiana University; PhD, 1963, Indiana University

Tolnay, Stewart Emory 2000; MA, 1975, University of Washington; PhD, 1981, University of Washington

Van Den Bergh, Pierre Louis * 1965, (Emeritus); MA, 1953, Stanford University; MA, 1959, Harvard University; PhD, 1960, Harvard University

Wager, Leonard Wesley * 1954, (Emeritus); MA, 1952, University of Washington; PhD, 1959, University of Chicago

Weis, Joseph George * 1974; MCrim, 1969, University of California (Berkeley); DCrim, 1974, University of California (Berkeley)

Associate Professors

Brines, Julie Ellen * 1993; MA, 1985, Harvard University; PhD, 1990, Harvard University

Clark, Samuel J. 2004; MA, 1995, University of Pennsylvania; PhD, 2001, University of Pennsylvania

Harris, Alexes 1995; MA, 1999, University of California (Los Angeles); PhD, 2002, University of California (Los Angeles)

Lee, Hedwig 2009; MA, 2005, University of North Carolina; PhD, 2009, University of North Carolina

Rosenfeld, Jake Hoffmann 2007; MA, 2004, Princeton University; PhD, 2007, Princeton University

Stovel, Katherine Wellesley 1997; MA, 1994, University of North Carolina; PhD, 1999, University of North Carolina

Assistant Professors

Cubbins, Lisa Ann 1983, (Affiliate); MS, 1986, University of Washington; PhD, 1992, University of Washington

Eger, Maureen A 2002, (Affiliate); MA, 2000, Stanford University; MA, 2005, University of Washington; PhD, 2010, University of Washington

Gonzales, Roberto G. 2008, (Affiliate); AM, 1999, University of Chicago; MA, 2004, University of California (Irvine); PhD, 2008, University of California (Irvine)

Jackson, Julie Elizabeth 1988, (Affiliate); MA, 1996, University of Washington; PhD, 2010, University of Washington

Melber, Barbara Desow 1970, (Affiliate); MA, 1969, University of Chicago; PhD, 1974, University of Chicago

Mulcahy, Michael J. 2007, (Affiliate); MA, 1993, Ruhr Universität Bochum (Germany); MA, 1998, University of Arizona; PhD, 2004, University of Arizona

Quinn, Sarah 2010; MA, 2006, University of California (Berkeley); PhD, 2010, University of California (Berkeley)

Schoenberg, Ronald James 1991, (Affiliate); MS, 1972, University of Washington; PhD, 1975, University of Washington

Zagheni, Emilio 2014; MA, 2006, University of California (Berkeley); MA, 2008, University of California (Berkeley); PhD, 2010, University of California (Berkeley)

Senior Lecturers

Pitchford, Susan R. * 1987; MA, 1990, University of Washington; PhD, 1994, University of Washington

Lecturers

Kistner, Kelly M. 2005; MA, 2008, University of Washington; PhD, 2014, University of Washington

Speech and Hearing Sciences

Professors

Coggins, Truman Earl * 1974; MS, 1971, University of Redlands; PhD, 1976, University of Wisconsin (Madison)

Folsom, Richard C. * 1976; MS, 1970, Portland State University; PhD, 1979, University of Washington

Kuhl, Patricia Katherine 1976; MA, 1971, University of Minnesota; PhD, 1973, University of Minnesota

Minifie, Fred Delwin * 1971, (Emeritus); MA, 1962, University of Iowa; PhD, 1963, University of Iowa

Olswang, Lesley Barrett * 1977, (Emeritus); MA, 1971, University of Illinois; PhD, 1978, University of Washington

Prins, David * 1969, (Emeritus); MA, 1957, University of Michigan; PhD, 1961, University of Michigan

Stoel-Gammon, Caroline * 1977, (Emeritus); MA, 1968, Stanford University; PhD, 1974, Stanford University

Tremblay, Kelly Louise 1998; MSc, 1987, Dalhousie University (Canada); PhD, 1998, Northwestern University

Werner, Lynne A. * 1986; MA, 1980, Loyola University (campus unspecified); PhD, 1980, Loyola University (campus unspecified)

Wilson, Wesley Raymond * 1963, (Emeritus); MA, 1961, University of Redlands; PhD, 1969, University of Washington

Associate Professors

Bierer, Julie A. 2005; PhD, 2001, University of Michigan; MS, 2003, San Francisco State

Burns, Edward McKee * 1984, (Emeritus); MS, 1966, University of Arizona; PhD, 1977, University of Minnesota

Carpenter, Robert L. * 1970, (Emeritus); MA, 1965, Northwestern University; PhD, 1969, Northwestern University

Cooker, Harry Sidney * 1976, (Emeritus); MA, 1961, University of Iowa; PhD, 1963, University of Iowa

Eadie, Tanya L. 2003; MS, 1999, University of Western Ontario (Canada); PhD, 2003, University of Western Ontario (Canada)

Kendall, Diane Lynne 2008; MA, 1989, California State University, Fullerton; PhD, 1999, University of Pittsburgh

Max, Ludo 2009; MA, 1992, Katholieke Universiteit Leuven (Belgium); PhD, 2000, Kent State University

Moon, Christine Marie 1998, (Affiliate); MA, 1983, Columbia University; PhD, 1985, Columbia University

Spencer, Kristie A. 1999; MS, 1992, University of Pittsburgh; PhD, 2003, University of Washington

Stecker, George Christopher 2005, (Affiliate); MA, 1998, University of California (Berkeley); PhD, 2000, University of California (Berkeley)

Assistant Professors

Kover, Sara 2014; MS, 2007, University of Wisconsin (Madison); PhD, 2012, University of Wisconsin (Madison)

Lee, Adrian KC 2011; ScD, 2007, Massachusetts Institute of Technology

Peter, Beate 1998, (Affiliate); MA, 1981, Justus-Liebig University (Germany); MS, 2001, University of Washington; PhD, 2006, University of Washington

Sullivan, Jessica Renee 2010; MS, 2000, Lamar University; PhD, 2010, University of Texas (Dallas)

Senior Lecturers

Dowden, Patricia Ann 1981; MS, 1980, University of Washington; PhD, 1992, University of Washington

Harney, Martha L. 1988; MS, 1984, University of Washington

Miller, Robert Michael 1976, (Emeritus); MA, 1969, University of Redlands; PhD, 1976, University of Washington

Nevdahl, Martin 1993; MS, 1984, University of Washington

Lecturers

Alarcon, Nancy Burge 1988; MS, 1981, University of Wisconsin (Madison)

Anderson, Susan Jean 2007; MA, 1989, University of Northern Colorado; AD, 2005, Pennsylvania College of Optometry

Burns, Michael Ian 2008; MA, 2000, California State University, Fresno; PhD, 2013, University of Washington

Dunlap, Julie Ann 1992; MS, 1995, University of Washington

Gray, Jennifer Lynn 2011; MSPA, 1979, University of Washington; AuD, 2009, Arizona School of Health Sciences

Illich, Lisa Louise 2006; MS, 1992, University of Montana

Miller, Christi Wise 2007; MA, 2001, University of Texas (Austin)

Snow, Laura A. 1995; MA, 1996, University of Washington; PhD, 2007, University of Washington

Thorne, John Carl 2003; MA, 1989, New Mexico State University; MS, 1997, University of New Mexico; PhD, 2010, University of Washington

Statistics

Professors

Bookstein, Fred L. 2005; MA, 1971, Harvard University; PhD, 1977, University of Michigan

Drton, Mathias 2001; Diploma, 2000, University of Augsburg (Germany); PhD, 2004, University of Washington

Gneiting, Tilmann Joachim 1997, (Affiliate); MA, 1992, Boston University; PhD, 1997, Bayreuth University (Germany)

Guttorp, Peter * 1980; MA, 1976, University of California (Berkeley); PhD, 1980, University of California (Berkeley)

Handcock, Mark Stephen 2000, (Affiliate); PhD, 1989, University of Chicago

Hoff, Peter David 2000; MS, 1994, University of Wisconsin; PhD, 2000, University of Wisconsin

Longini, Ira M. 2006, (Affiliate); MS, 1973, University of Florida; PhD, 1977, University of Minnesota

Mason, David Michael 1989, (Affiliate); MA, 1972, University of Washington; PhD, 1977, University of Washington

Meek, Christopher 2010, (Affiliate); MS, 1994, Carnegie Mellon University; PhD, 1996, Carnegie Mellon University

Perlman, Michael D. * 1979; MS, 1965, Stanford University; PhD, 1967, Stanford University

Raftery, Adrian Elmes * 1985; MSc, 1977, Trinity College (Ireland); Doct, 1980, Universite De Paris Vi (France)

Richardson, Thomas Stuart * 1996; MS, 1995, Carnegie Mellon University; PhD, 1996, Carnegie Mellon University

Rudas, Tamas 2004, (Affiliate); MSc, 1978, Eotvos Lorand University (Hungary); PhD, 1985, Eotvos Lorand University (Hungary)

Sampson, Paul David * 1981, (Research); MS, 1974, Brown University; PhD, 1979, University of Michigan

Scholz, Friedrich-Wilhelm * 1972, (Affiliate); Diploma, 1966, University of Göttingen (Germany); PhD, 1971, University of California (Berkeley)

Shorack, Galen Richard * 1965; MA, 1962, University of Oregon; PhD, 1965, Stanford University

Stuetzle, Werner * 1984; PhD, 1977, Swiss Federal Institute of Technology

Thompson, Elizabeth Alison * 1985; MA, 1974, University of Cambridge (UK); PhD, 1974, Cambridge University (UK)
 Wakefield, Jonathan Clive * 1999; PhD, 1992, University of Nottingham (UK)

Wellner, Jon August * 1983; PhD, 1975, University of Washington

Zeh, Judith E. * 1961, (Emeritus); MS, 1969, University of Washington; PhD, 1979, University of Washington

Associate Professors

Altschul, Roberto Eduardo 1977, (Affiliate); MSc, 1969, Case Western Reserve University; PhD, 1973, Case Western Reserve University

Dobra, Adrian 2006; MS, 1996, University of Bucharest (Romania); PhD, 2001, Carnegie Mellon University

Erosheva, Elena Aleksandrovna 2002; MS, 1998, Utah State University; PhD, 2002, Carnegie Mellon University

Gottardo, Raphael 2002, (Affiliate); MS, 2001, Portland State University; PhD, 2005, University of Washington

Meila-Predoviciu, Marina 2000; MS, 1985, University Politehnica of Bucharest (Romania); PhD, 1999, Massachusetts Institute of Technology

Minin, Volodymyr 2007; MS, 2002, University of Idaho; MS, 2004, University of California (Los Angeles); PhD, 2007, University of California (Los Angeles)

Witten, Daniela Mottel 2010; MS, 2006, Stanford University; PhD, 2010, Stanford University

Assistant Professors

Chiu, Grace Shung-Lai 2003, (Affiliate); MSc, 1996, University of British Columbia (Canada); PhD, 2002, Simon Fraser University, B.C. (Canada)

Fox, Emily Beth 2012; MEng, 2005, Massachusetts Institute of Technology; EE, 2008, Massachusetts Institute of Technology; PhD, 2009, Massachusetts Institute of Technology

Lindstrom, Johan Ludwig 2009, (Affiliate); MSc, 2003, Lund University; PhD, 2008, Lund University

McCormick, Tyler Harris 2011; MA, 2008, Columbia University; MS, 2008, University of Connecticut; MPhil, 2010, Columbia University; PhD, 2011, Columbia University

Narayanan, Hariharan 2012; MS, 2006, University of Chicago (Illinois); PhD, 2009, University of Chicago (Illinois)

Reynolds, Joel Howard 1989, (Affiliate); MS, 1989, University of California (Los Angeles); PhD, 1996, University of Washington

Lecturers

Cardoso, Tamre 1989; MS, 1985, California State University, Long Beach; PhD, 2004, University of Washington

Grove, Ranjini 2011; MS, 1993, Cornell University; PhD, 1995, Cornell University

Marzban, Caren 2001; PhD, 1988, University of North Carolina, Chapel Hill

Morita, June Gloria 1981; MA, 1978, University of California (Berkeley); PhD, 1984, University of California (Berkeley)

College of Built Environments

Architecture

Professors

Badanes, Steven Paul * 1988; MArch, 1971, Princeton University

Bonsteel, David Le Van 1963, (Emeritus); MArch, 1964, University of Washington

Bosworth, Thomas Lawrence 1968, (Emeritus); MA, 1954, Oberlin College; MArch, 1960, Yale University

Ching, Francis D.K * 1985, (Emeritus); BArch, 1966, University of Notre Dame

Finrow, Jerry Victor * 1995, (Emeritus); MArch, 1968, University of California (Berkeley)

Hildebrand, Grant 1964, (Emeritus); MArch, 1964, University of Michigan

Jacobson, Phillip Lee 1962, (Emeritus); MArch, 1969, Finnish Institute of Technology

Johnston, Norman John * 1960, (Emeritus); MCP, 1959, University of Pennsylvania; PhD, 1964, University of Pennsylvania

Kolb, Keith Robert 1952, (Emeritus); MArch, 1950, Harvard University

Loveland, Joel Eugene * 1980; MArch, 1980, University of California (Los Angeles)

Lovett, Wendell Harper 1948, (Emeritus); MArch, 1948, Massachusetts Institute of Technology

Miller, David Edward * 1985; MArch, 1972, University of Illinois

Millet, Marietta * 1976, (Emeritus); MArch, 1972, Massachusetts Institute of Technology

Ochsner, Jeffrey Karl * 1987; MArch, 1976, Rice University

Oshima, Ken Tadashi 2005; MArch, 1993, University of California (Berkeley); MPhil, 1998, Columbia University; PhD, 2003, Columbia University

Prakash, Vikramaditya * 1996; MA, 1989, Cornell University; PhD, 1994, Cornell University

Pyatok, Michael * 1990, (Emeritus); MArch, 1967, Harvard University

Seligmann, Claus Arthur * 1964, (Emeritus); DipArc, 1951, London Polytechnic (UK)

Small, Robert E. 1965, (Emeritus); MArch, 1955, University of Oregon

Streissguth, Daniel Michener * 1955, (Emeritus); MArch, 1949, Massachusetts Institute of Technology

Sutton, Sharon Egretta * 1998; MArch, 1973, Columbia University; MPhil, 1981, City University of New York; MA, 1982, City University of New York; PhD, 1982, City University of New York

Associate Professors

Albrecht, Robert George * 1960, (Emeritus); MSCE, 1960, Massachusetts Institute of Technology

Anderson, Alex Thomas 1998; MArch, 1990, University of Pennsylvania; MS, 1995, University of Pennsylvania; PhD, 1997, University of Pennsylvania

Borys, Ann Marie 2006; MArch, 1988, Syracuse University; PhD, 1998, University of Pennsylvania

Cohan, Peter Scott 1989; MFA, 1977, Northern Illinois University; MArch, 1984, University of Washington

Corser, Robert 2008; MArch, 1993, University of Virginia; MDes, 2003, Harvard University

Deines, Katrina Louise * 1978, (Emeritus); MA, 1975, University of Minnesota; MArch, 1979, University of Washington

Donnette, James Joseph * 1966, (Emeritus); MArch, 1969, University of Washington

Griggs, James K. S. 2008; MArch, 1984, Yale University

Heerwagen, Dean Reese * 1975; MS, 1967, Massachusetts Institute of Technology; MArch, 1971, Massachusetts Institute of Technology

Heerwagen, Judith Hannula 1981, (Affiliate); PhD, 1982, University of Washington

Huber, Nicole 2005; MArch, 2001, Universität Der Künste, Berlin

Huppert, Ann C. 2008; MA, 1992, University of Virginia; PhD, 2001, University of Virginia

Iarocci, Louisa Maria 2004; MA, 1992, Washington University; MA, 1994, Washington University; PhD, 2003, Boston University

Inanici, Mehlika Nur 2005; MSc, 1995, Middle East Technical University (Turkey); MSc, 2002, University of Michigan; PhD, 2004, University of Michigan

Johnson, Brian Robert 1978; MArch, 1981, University of Washington

Jones, Susan Hannen * 1991, (Affiliate); MArch, 1988, Harvard University

Latourelle, Evelyn Elaine Day * 1975, (Emeritus); MArch, 1964, Yale University

McLaren, Brian Lloyd 2001; MSc, 1986, Columbia University; PhD, 2001, Massachusetts Institute of Technology

Merlino, Kathryn Rogers 1999; MArch, 1999, University of Virginia

Minah, Galen Franklin * 1970; MArch, 1968, University of Pennsylvania

Mohler, Richard Ernest Johnson 1986; MArch, 1984, University of Pennsylvania

Pena, Robert Bernard 2007; MArch, 1987, University of California (Berkeley)

Sasanoff, Robert * 1963, (Emeritus); MCP, 1968, University of California (Berkeley)

Simonen, Kathrina Lois 2009; MS, 1991, University of California (Berkeley); MArch, 1992, University of California (Berkeley)

Assistant Professors

Golden, Elizabeth M. 2009; MSAcct, 1994, Columbia University

Hutchison, Robert Scott 1995, (Affiliate); MArch, 1996, University of Washington

Proksch, Gundula 2008; DipArc, 1997, Tech University of Braunschweig (Germany); MArch, 2000, Cornell University

Sprague, Tyler Stevens 2004; MS, 2006, University of Washington; PhD, 2013, University of Washington

Strauss, David Michael 1991, (Affiliate); MArch, 1985, University of Washington; MS, 1992, University of Pennsylvania; PhD, 1999, University of Pennsylvania

Senior Lecturers

Nicholls, James Keith 1995; BA, 1982, University of Alberta, Canada; BArch, 1986, University of British Columbia (Canada)

Zuberbuhler, Douglas Ralph 1967, (Emeritus); MArch, 1968, University of Washington

Lecturers

Anderson, Charles Holt 1989; MArch, 1984, Columbia University

Brachvogel, Peter William 2004; MArch, 1984, University of Michigan

Dee, Jennifer 1982; MArch, 1984, University of Washington

Gregga, Kailin Marie 2000; MArch, 2007, Parsons School of Design

Hudacek, David John 1985; MArch, 1988, University of Washington

Maul, Thomas Boyer 2006; MArch, 1996, University of Washington

Riske, Casey Jon 2011; BArch, 1984, North Dakota State University; BS, 1984, North Dakota State University

Stettler, Daniel Dominic 2004; MA, 1993, University of Oregon

Swain, Judith Dexter 1991; MArch, 1987, University of Oregon

Villanueva, Ray Glen 2006; MArch, 2007, University of Washington

West, Penelope 1995; MArch, 2001, University of Washington

Wong, Gail Lynn 1991; MArch, 1987, University of Washington

Construction Management

Professors

Bender, William John 2014; MSCE, 1989, Oregon State University; PhD, 2000, University of Maryland

Daniali, Saeed 1997; MSCE, 1972, Strasbourg School for Water and Environment Engineering (France); PhD, 1975, University of Lille (France)

Schaufelberger, John Edgar 1994; MSCE, 1970, University of Illinois; PhD, 1971, University of Illinois

Associate Professors

Lin, Ken-Yu 2008; MS, 1999, National Taiwan University; PhD, 2005, University of Illinois (Urbana)

Abdel Aziz, Ahmed 2002; MSc, 1992, Zagazig University (Egypt); PhD, 2000, University of British Columbia (Canada)

Dossick, Carrie Sturts 2005; MS, 1998, Columbia University; PhD, 2001, Columbia University

Goldblatt, Steven Melvin 1982, (Emeritus); JD, 1977, Golden Gate University

Kim, Yong-Woo 2007; MS, 1999, University of California (Berkeley); PhD, 2002, University of California (Berkeley)

Migliaccio, Giovanni Ciro 2010; MS, 2000, Politecnico di Bari (Italy); MS, 2007, University of Texas (Austin); PhD, 2007, University of Texas (Austin)

Nemati, Kamran Mostashar 1998; MS, 1982, University of California (Irvine); MEng, 1985, University of California (Berkeley); MCP, 1989, University of California (Berkeley); PhD, 1994, University of California (Berkeley)

Torrence, Gerard Rutgers 1954, (Emeritus); MS, 1950, Massachusetts Institute of Technology

Assistant Professor

El-Anwar, Omar Hossam 2009, (Affiliate); MSc, 2005, Cairo University (Egypt); PhD, 2009, University of Illinois (Urbana)

Lecturers

Bjork, Larry David 2011; BS, 1969, University of Washington

Holm, Arnold Leonard 1993; BS, 1980, University of Washington; BA, 1984, University of Washington

Nyrop, Karin Lisa 1997; JD, 1984, University of Puget Sound

Landscape Architecture

Professors

Buchanan, Robert Thomas * 1970, (Emeritus); MLA, 1956, Harvard University

Haag, Richard 1958, (Emeritus); MLArch, 1952, Harvard University

Hou, Jeffrey 2001; MArch, 1993, University of Pennsylvania; MArch, 1994, University of California (Berkeley); PhD, 2001, University of California (Berkeley)

Jones, Grant Richard 1970, (Affiliate); MLA, 1966, Harvard University

Schauman, Sally * 1979, (Emeritus); MS, 1971, University of Michigan

Winterbottom, Daniel M. * 1993; MLA, 1988, Harvard University

Associate Professors

Horner, Richard Ray * 1981, (Emeritus); MD, 1966, University of Pennsylvania; PhD, 1978, University of Washington
Johnson, Julie Marie 1995; MCP, 1988, Massachusetts Institute of Technology

Manzo, Lynne Catherine 2001; MA, 1988, City University of New York; PhD, 1994, City University of New York

Robertson, Iain McNaughton * 1982; MLA, 1975, University of Pennsylvania

Rottle, Nancy Dawn 2001; MLA, 1987, University of Oregon
Way, Thaisa 2007; MArch, 1991, University of Virginia; PhD, 2005, Cornell University

Yocom, Kenneth P. 2000; MLA, 2002, University of Washington; PhD, 2007, University of Washington

Assistant Professors

Diers, James Alan 2003, (Affiliate); BA, 1975, Grinnell College

Gastil, Raymond Wesley 2010, (Affiliate); MArch, 1991, Princeton University

Spencer, Benjamin Robinson 2008; MLA, 2004, University of Virginia

Senior Lecturers

Parrett, Julie Lynne 2002; MLA, 1997, University of Pennsylvania

Smith, Luanne 1993; MLA, 1984, University of Oregon

Lecturers

Krtak, Srna 2014; MS, 2014, University of Zagreb (Croatia)

Umbanhowar, Elizabeth Ann 2000; MLA, 2007, University of Washington

Urban Design and Planning

Professors

Alberti, Marina * 1996; PhD, 1992, Massachusetts Institute of Technology

Bell, Earl Jennings * 1966, (Emeritus); PhD, 1965, University of California (Berkeley)

Blanco, Hilda Joan * 1996, (Emeritus); MRP, 1984, University of California (Berkeley); PhD, 1989, University of California (Berkeley)

Dermisi, Sofia 2014; Diploma, 1998, University of Thessaly (Greece); MA, 1999, Harvard University; PhD, 2002, Harvard University

Kasprisin, Ronald J. * 1980; MUP, 1968, University of Washington

Lindell, Michael Keith 2014, (Affiliate); PhD, 1975, University of Colorado (Boulder)

Ludwig, Richard Lowell * 1971, (Emeritus); MUP, 1965, University of Washington; PhD, 1971, University of Pittsburgh

Miller, Donald Harlan * 1970; MCP, 1960, University of California (Berkeley); PhD, 1972, University of California (Berkeley)

Mugerauer, Robert 2000; PhD, 1973, University of Texas (Austin)

Purcell, Mark Hamilton 1999; MA, 1995, University of California (Los Angeles); PhD, 1998, University of California (Los Angeles)

Shen, Qing 2009; MA, 1986, University of British Columbia (Canada); PhD, 1993, University of California (Berkeley)

Untermann, Richard Karl 1971, (Emeritus); MLA, 1967, Harvard University

Vernez-Moudon, Anne * 1980; DSc, 1987, Ecole Polytechnique Federale De Lausanne

Associate Professors

Abramson, Daniel Benjamin 2001; MArch, 1992, Massachusetts Institute of Technology; MCP, 1992, Massachusetts Institute of Technology; PhD, 1998, Tsinghua University (China)

Bae, Chang-Hee Christine 1996; MRP, 1986, State University of New York (Albany); PhD, 1994, University of Southern California

Born, Branden Michael 2003; MS, 1998, University of Wisconsin (Madison); PhD, 2003, University of Wisconsin (Madison)

Chalana, Manish 2004; MArch, 1995, School of Planning & Architecture (India); MArch, 1999, Pennsylvania State University; PhD, 2005, University of Colorado (campus unspecified)

Rolfe, George Richard 1984; MArch, 1968, University of Pennsylvania; MCP, 1968, University of Pennsylvania

Ryan, Dennis Michael * 1974, (Emeritus); MCP, 1968, University of Pennsylvania; PhD, 1976, University of Pennsylvania

Tovar, Joseph W. 2003, (Affiliate); MUP, 1979, University of Washington

Turner, Ronald C. 2005, (Affiliate); BA, 1953, Pratt Institute
Westerlund, Frank Victor * 1971, (Emeritus); MUP, 1971, University of Washington; PhD, 1977, University of Washington

Wolfe, Charles Robert 1994, (Affiliate); MRP, 1982, Cornell University; JD, 1984, University of Oregon

Assistant Professors

Bitter, Christopher 2009; MA, 1996, University of Arizona; PhD, 2008, University of Arizona

Meisner, Jennifer Ann 1990, (Affiliate); MArch, 1994, University of Washington

Sheridan, Frances Amelia 2001, (Affiliate); MS, 1973, Oregon State University; MUP, 1994, University of Washington

Whittington, Janice Marie 2005; MA, 1993, Calif Polytechnic State (San Luis Obis); PhD, 2008, University of California (Berkeley)

Senior Lecturer

Campbell, Christopher David 2000; MA, 1994, University of California (Los Angeles); PhD, 2002, University of California (Los Angeles)

Foster School of Business

Accounting

Professors

Bowen, Robert M. * 1978, (Emeritus); MBA, 1971, Washington University; PhD, 1978, Stanford University
Burgstahler, David Curtis * 1980; PhD, 1981, University of Iowa

Dukes, Roland Edward * 1979; MBA, 1970, Stanford University; PhD, 1974, Stanford University

Heath, Loyd Curtis * 1962, (Emeritus); MBA, 1953, Northwestern University; PhD, 1965, University of California (Berkeley)

Hodge, Frank Douglas 2000; MBA, 1996, Indiana University; PhD, 2000, Indiana University

Jiambalvo, James * 1977; MAS, 1973, University of Illinois; PhD, 1977, Ohio State University

Matsumoto, Dawn A. 1993; PhD, 1998, University of Washington

Mueller, Gerhard G. * 1960, (Emeritus); MBA, 1957, University of California (Berkeley); PhD, 1961, University of California (Berkeley)

Noreen, Eric Warren * 1976, (Emeritus); MBA, 1974, Stanford University; PhD, 1976, Stanford University

Palmrose, Zoe-Vonna 2011, (Acting); MBA, 1978, University of Washington; PhD, 1982, University of Washington

Ramanathan, Kavasseri Vaidianatha * 1969, (Emeritus); MBA, 1962, Northwestern University; PhD, 1969, Northwestern University

Sefcik, Stephan E. * 1986; MAS, 1976, University of Illinois; PhD, 1983, University of Illinois

Shevlin, Terrence James 1985, (Emeritus); MA, 1981, Monash University (Australia); PhD, 1986, Stanford University

Sundem, Gary Lewis * 1971, (Emeritus); MBA, 1969, Stanford University; PhD, 1971, Stanford University

Associate Professors

Ge, Weili 2006; MBA, 2001, Washington University; PhD, 2006, University of Michigan

McVay, Sarah Elizabeth 2012; PhD, 2004, University of Michigan, Ann Arbor

Shores, Donna Jo * 1986; MS, 1980, University of Wisconsin (Madison); PhD, 1986, Stanford University

Thornock, Jacob 2010; MAcc, 2006, Brigham Young University; PhD, 2010, University of North Carolina

Assistant Professors

Blackburne, Terrence Patrick 2014; MA, 2003, Stanford University; PhD, 2014, University of Pennsylvania

Curtis, Asher 2012; MCom, 2003, University of New S. Wales (Australia); PhD, 2007, University of New S. Wales (Australia)

Demerjian, Peter 2013; MBA, 2002, College of William And Mary; PhD, 2007, University of Michigan

Patrick, Paige 2013; MAIS, 2002, Arizona State University
Quinn, Phillip James 2014; PhD, 2014, University of Iowa
Tanlu, Lloyd J. 2008; MA, 1999, Brandeis University; PhD, 2009, Harvard University

Senior Lecturers

Gillick, James Vincent 1986, (Emeritus); BBA, 1957, Manhattan College

Resler, William Moncrieff 1979; JD, 1972, University of Washington; LL.M., 1973, New York University

Rice, Steven James 1975, (Emeritus); MS, 1971, Oklahoma State University; PhD, 1974, University of Texas (Austin)

Wells, William Lloyd 1988, (Emeritus); MBA, 1973, Syracuse University; MPACC, 1989, University of Washington

Lecturers

Dimeo, Michael 2005; MS, 1977, Wichita State University
Phillips, Thomas E. 1991; MBA, 1992, University of Washington

Reich, Jane M. 2003; MBA, 1979, Boston University

Weber, Elizabeth L. 2007; MTAX, 2012, University of Washington

Finance and Business Economics

Professors

Bessembinder, Hendrik 2003, (Affiliate); MBA, 1978, Washington State University; PhD, 1986, University of Washington

Bradford, William Donald 1994; MBA, 1968, Ohio State University; PhD, 1972, Ohio State University

Brown, Stephen 2009, (Affiliate); MBA, 1974, University of Chicago; PhD, 1976, University of Chicago

Frost, Peter Ayars * 1969, (Emeritus); MA, 1961, University of California (Los Angeles); PhD, 1966, University of California (Los Angeles)

Haley, Charles Wallace * 1966, (Emeritus); MBA, 1964, Stanford University; PhD, 1968, Stanford University

Harford, Jarrad 2001; MS, 1995, University of Rochester; PhD, 1998, University of Rochester

Hess, Alan Carter * 1967, (Emeritus); MS, 1967, Carnegie Institute of Technology; PhD, 1969, Carnegie Institute of Technology

Higgins, Robert Carlisle * 1967, (Emeritus); MBA, 1965, Harvard University; PhD, 1969, Stanford University

Kamara, Avraham * 1984; MSc, 1978, Hebrew University (Israel); MPhil, 1981, Columbia University; PhD, 1986, Columbia University

Karpoff, Jonathan Mark * 1983; MA, 1980, University of California (Los Angeles); PhD, 1982, University of California (Los Angeles)

Malatesta, Paul Henry * 1980; MS, 1976, University of Rochester; PhD, 1982, University of Rochester

Schall, Lawrence Delano * 1968; PhD, 1969, University of Chicago

Associate Professors

Bond, Alan Philip 2013; MA, 1999, University of Chicago; PhD, 1999, University of Chicago

Dewenter, Kathryn Louise * 1992; MA, 1985, Stanford University; MBA, 1985, Stanford University; PhD, 1993, University of Chicago

Duchin, Ran 2012; MBA, 2003, Hebrew University (Israel); PhD, 2008, University of Southern California

Koski, Jennifer Lynch * 1991; MBA, 1987, Harvard University; PhD, 1991, Stanford University

Rice, Edward Morton * 1979; MBA, 1973, University of Rochester; PhD, 1978, University of California (Los Angeles)

Siegel, Stephan 2005; MPhil, 2002, Columbia University; PhD, 2006, Columbia University

Assistant Professors

Brogaard, Jonathan A. 2011; PhD, 2012, Northwestern University

Gilbert, Thomas 2008; MS, 2002, Imperial College; MS, 2005, University of California (Berkeley); PhD, 2008, University of California (Berkeley)

Hrdlicka, Christopher Michael 2010; AM, 2005, Washington University; PhD, 2010, University of Chicago

Schulz, Florian 2014; Diploma, 2005, Johann Wolfgang Goethe Universität, Frankfurt am Main (Germany); MBA, 2006, University of Iowa; MSc, 2008, London Business School (UK); PhD, 2014, University of California (Los Angeles)

Westerfield, Mark W. 2012; PhD, 2004, Massachusetts Institute of Technology

Senior Lecturers

Glassman, Debra Ann 1989; MS, 1979, University of Wisconsin; PhD, 1980, University of Wisconsin (Madison)

Seslen, Tracey 2012; PhD, 2003, Massachusetts Institute of Technology

Young, Lance A. 2003; MBA, 1997, University of Washington; MS, 1999, University of Rochester; PhD, 2005, University of Rochester

Lecturer

Maloy, Frances Jeanne 1986; MA, 1985, Southern Illinois University; PhD, 1999, University of Washington

Information Systems and Operations Management

Professors

Chiu, John S. Y. * 1960, (Emeritus); MS, 1955, University of Kentucky; PhD, 1960, University of Illinois

Dey, Debabrata * 1997; MS, 1989, Syracuse University; MS, 1992, University of Rochester; PhD, 1994, University of Rochester

Klasterin, Theodore D. * 1974; PhD, 1973, University of Texas (Austin)

Moinzadeh, Kamran * 1984; MS, 1982, Stanford University; PhD, 1985, Stanford University

Siegel, Andrew Francis * 1982; MS, 1975, Stanford University; PhD, 1977, Stanford University

Tamura, Hirokuni * 1967, (Emeritus); MS, 1961, University of Michigan; PhD, 1967, University of Michigan

Tan, Yong 1987; MS, 1988, University of Washington; PhD, 1993, University of Washington; PhD, 2000, University of Washington

Associate Professors

Fan, Ming 2002; MA, 1991, University of Akron; PhD, 1999, University of Texas (Austin)

Hillier, Mark Stanton * 1993; MS, 1991, Stanford University; PhD, 1994, Stanford University

Jain, Apurva 1999; MS, 1989, National Inst Training Engin (Bombay); PhD, 1999, Purdue University

Zhou, Yongpin 2000; MA, 1995, Johns Hopkins University; MA, 1997, University of Pennsylvania; PhD, 2000, University of Pennsylvania

Assistant Professors

Chen, Shi 2013; MS, 2008, Tsinghua University (China)
Iravani, Foad 2012; MSc, 2007, University of Toronto (Canada); PhD, 2012, University of California (Los Angeles)

Mamani, Hamed 2008; PhD, 2008, Massachusetts Institute of Technology

Wagner, Michael R. 2012; MEng, 2001, Massachusetts Institute of Technology; PhD, 2006, Massachusetts Institute of Technology

Wu, Jianqing 2014, (Acting); MBA, 2009, Purdue University

Senior Lecturers

Burrows, William Edward 1968, (Emeritus); MBA, 1972, University of Washington

Ou, Shaosong 2007; MA, 1999, University of Illinois; PhD, 2006, University of Southern California

Parameswaran, Manoj 2010; MTech, 1994, Indian Institute of Science (India); PhD, 1999, University of Texas (Austin)
 Pilcher, Martha Geraldine * 1987; MS, 1978, Georgia Institute of Technology; PhD, 1985, Georgia Institute of Technology

Studer-Ellis, Erich 2009; MBA, 1986, Indiana University; PhD, 1996, Duke University

Management and Organization

Professors

Avolio, Bruce 2008; MA, 1978, University of Akron; PhD, 1981, University of Akron

Boeker, Warren * 1998; PhD, 1987, University of California (Berkeley)

Chen, Xiao-Ping 1999; MEd, 1988, Hangzhou University; MA, 1992, University of Illinois; PhD, 1998, University of Illinois

Henning, Dale Ansgar * 1955, (Emeritus); MBA, 1949, University of Pennsylvania; PhD, 1954, University of Illinois

Hill, Charles William Leslie * 1988; PhD, 1983, University of Manchester (UK)

Huber, Vandra Lee * 1987; MS, 1978, University of Utah; MBA, 1981, Indiana University; DBA, 1982, Indiana University

Jones, Thomas Morgan 1977; MBA, 1970, University of Washington; PhD, 1977, University of California (Berkeley)

Kast, Fremont Ellsworth * 1951, (Emeritus); MBA, 1949, Stanford University; DBA, 1956, University of Washington

Kotha, Suresh * 1996; MARCH, 1982, Rensselaer Polytechnic Institute; MBA, 1983, Rensselaer Polytechnic Institute; MS, 1986, Rensselaer Polytechnic Institute; PhD, 1988, Rensselaer Polytechnic Institute

Lee, Thomas William 1983; MA, 1977, Bowling Green State University; PhD, 1984, University of Oregon

Mitchell, Terence Robert * 1969, (Emeritus); MA, 1967, University of Illinois; PhD, 1969, University of Illinois

Moxon, Richard Williams * 1971, (Emeritus); MS, 1964, Stanford University; DBA, 1973, Harvard University

Newell, William T. * 1960, (Emeritus); MBA, 1955, University of Denver; PhD, 1962, University of Texas (unspecified)

Nolan, Richard Lewis 2004, (Emeritus); MBA, 1963, University of Washington; PhD, 1966, University of Washington

Steensma, Harvey Kevin 2000; MBA, 1988, Washington State University; PhD, 1996, Indiana University

Vesper, Karl Hampton * 1969, (Emeritus); MBA, 1960, Harvard University; MS, 1966, Stanford University; PhD, 1969, Stanford University

Associate Professors

Bigley, Gregory Allan 2000; MBA, 1991, University of California (Irvine); PhD, 1995, University of California (Irvine)

Buck, Vernon Ellis * 1968, (Emeritus); MS, 1960, Cornell University; PhD, 1963, Cornell University

Johnson, Michael D. 2006; MA, 1999, University of Phoenix; PhD, 2006, Michigan State University

Kienast, Philip Kenneth * 1970, (Emeritus); MLIR, 1966, Michigan State University; PhD, 1972, Michigan State University

Reynolds, Scott Jason 2002; MA, 1995, Brigham Young University; PhD, 2002, University of Minnesota

Sirmon, David 2012; MBA, 1997, University of Montana; PhD, 2004, Arizona State University

Strong, Dennis Fulton * 1956, (Emeritus); PhD, 1959, University of Washington

Umphress, Elizabeth 2011; PhD, 2003, Tulane University

Wickman, James Allen * 1953, (Emeritus); MBA, 1954, University of Washington; DBA, 1961, University of Washington

Assistant Professors

Barnes, Christopher 2013; MBA, 2003, Webster University; PhD, 2009, Michigan State University

Fehr, Ryan 2010; MA, 2007, University of Maryland; PhD, 2010, University of Maryland

Hallen, Benjamin Lee 2014; MS, 2002, University of Virginia; PhD, 2007, Stanford University

Pahnke, Emily 2010; MBA, 2000, Brigham Young University; MA, 2010, Stanford University; PhD, 2010, Stanford University

Tan, David 2013; PhD, 2009, Emory University

Welsh, David Thomas 2014; JD, 2010, University of Utah; PhD, 2014, University of Arizona

Senior Lecturer

Fong, Christina Ting 2003; MA, 2000, Stanford University; PhD, 2003, Stanford University

Lecturers

Huwe, Ruth Ann 1990; MA, 1990, San Diego State University; PhD, 1995, University of Washington

McCormack, Timothy Brian 2014; JD, 1997, University of Oregon

Palmanteer-Holder, Nancy Lynn 2001; MEd, 1999, Washington State University

Preston, Susan Louise 1987; JD, 1985, Seattle University

Reynolds, Jane 1989; MBA, 1995, University of Washington; PhD, 1995, University of Washington

Marketing and International Business

Professors

Agrawal, Nidhi 2011; MBA, 1999, Mudra Institute of Communications (India); PhD, 2006, New York University

Erickson, Gary * 1980, (Emeritus); MBA, 1973, Stanford University; PhD, 1978, Stanford University

Etcheson, Warren Wade * 1954, (Emeritus); MA, 1951, State University of Iowa; PhD, 1956, State University of Iowa

Forehand, Mark Robeck 1997; PhD, 1997, Stanford University

Jain, Shailendra 2008; MBA, 1984, Indian Institute of Management, India; MPhil, 1992, New York University; PhD, 1995, New York University

MacLachlan, Douglas Lee * 1970, (Emeritus); MBA, 1965, University of California (Berkeley); MA, 1970, University of California (Berkeley); PhD, 1971, University of California (Berkeley)

Mizik, Natalie V. 1996; MS, 1995, Moscow State Institute of International Relations (Russia); PhD, 2002, University of Washington

Moinpour, Reza * 1966, (Emeritus); MBA, 1966, Ohio State University; PhD, 1970, Ohio State University

Narver, John Colin * 1966, (Emeritus); MBA, 1960, University of California (Berkeley); PhD, 1965, University of California (Berkeley)

Palmatier, Robert W. 2007; MSEE, 1984, Georgia Institute of Technology; MBA, 1989, Georgia Institute of Technology; PhD, 2004, University of Missouri

Schlosser, Ann Elizabeth 2000; MA, 1995, University of Illinois; PhD, 1997, University of Illinois

Spratlen, Thaddeus Hayes * 1972, (Emeritus); MA, 1957, Ohio State University; PhD, 1962, Ohio State University

Sullivan, Jeremiah Joseph * 1975, (Emeritus); MA, 1967, New York University; PhD, 1970, New York University; MBA, 1975, University of Washington

Yalch, Richard Frank * 1971; MS, 1970, Carnegie Mellon University; PhD, 1974, Northwestern University

Associate Professors

Rutz, Oliver 2011; MBA, 2003, University of California (Los Angeles); PhD, 2007, University of California (Los Angeles)

Shulman, Jeffrey D. 2006; PhD, 2006, Northwestern University

Assistant Professors

Borah, Abhishek 2013; MA, 2005, University of Delhi (India); PhD, 2013, University of Southern California

Dunn, Lea 2014; PhD, 2014, University of British Columbia (Canada)

Sayed Rosh Khar, Seyed Amin 2014; MSc, 2009, Carnegie Mellon University; PhD, 2012, Carnegie Mellon University

Yoganarasimhan, Hema 2014; MA, 2006, Yale University; MPhil, 2008, Yale University; PhD, 2009, Yale University

Zhang, Zaozao 2010; MPhil, 2007, Columbia University; PhD, 2011, Columbia University

Senior Lecturers

Beard, Oleta 1981; MBA, 1980, University of Washington

Kalitzki, Judith Ann 1974; PhD, 1979, University of Washington

Stearns, Elizabeth P. 1995; MBA, 1978, New York University

Lecturers

Matthews, Martha Nixon 1992; MA, 1986, University of Central Florida; PhD, 1994, University of North Carolina

Nevraumont, Edward Jules 2014; MS, 1999, Queen's University At Kingston (Canada); MBA, 2005, University of Pennsylvania

Rhodes, John Henry 1998; BA, 1961, University of Washington

Turner, Daniel J. 1999; MBA, 1993, Washington University; PhD, 2001, Northwestern University

Whelan, John Frederick 1985; MA, 1977, Yale University

School of Dentistry

Professors

Abolofia, Jeff Steve 1976, (Affiliate); DDS, 1975, University of Washington

Albright, Steven J. 1987, (Affiliate); DDS, 1978, Marquette University

Anderson, Howard Sam 1954, (Affiliate); DDS, 1951, University of Washington

Assael, Leon A. 2005, (Affiliate); DMD, 1975, Harvard University

Barrett, Ernest Earl 1971, (Affiliate); DDS, 1969, University of Washington

Bassett, Kathy B. 2014, (Affiliate); MS, 1980, Eastern Washington University; MEd, 1997, Lesley College

Becker, William 1994, (Affiliate); DDS, 1961, Marquette University; MSD, 1966, Baylor College of Medicine

Beikler, Thomas 2006, (Affiliate); MD, 1995, Ludwig-Maximilians University (Germany); DDS, 1999, Julius Maximilians University (Germany); PhD, 2004, Westfalian-Wilhelms-University, Germany

Beirne, Owen Ross * 1985; DMD, 1972, Harvard University; PhD, 1976, University of California (San Francisco)

Senior Lecturers

Anderson, Jens Martin 1966; DDS, 1965, University of Washington

Phillips, Sandra Linsky 1988; MPA, 1985, University of Washington

Rafferty, Katherine Louisa 1997; MA, 1991, New York University; PhD, 1996, Johns Hopkins University

Lecturers

Christensen, Rolf Molloy 1998; DDS, 1980, University of Washington

Grubbs, Robert D. 2005; MS, 1977, University of Kansas; PhD, 1981, University of Kansas

Jeffrey, Susanne Kolare 2005; DDS, 1984, Karolinska Institute (Sweden); PhD, 1990, Karolinska Institute (Sweden)

Marashi, Ahmad A. 2000; DDS, 2001, University of Washington

Pickrell, Jacqueline 1993; MS, 2001, University of Washington; PhD, 2005, University of Washington

Speed-McIntyre, Pollene 2004; MS, 1976, University of Washington; DDS, 1980, University of Washington

Stewart, Dorothy Jean 2007; DDS, 1982, University of Washington

Strand, Harvey Allen 1961, (Emeritus); DDS, 1957, University of Washington

Townsend, John Deaville 1972; DDS, 1967, McGill University (Canada); MSD, 1973, University of Washington

College of Education

Professors

Abbott, Robert Dean 1975; MS, 1968, University of Washington; PhD, 1970, University of Washington

Affleck, James Quinn * 1967, (Emeritus); MA, 1963, San Francisco State; EdD, 1968, Columbia University

Banks, James Albert 1969; MA, 1967, Michigan State University; PhD, 1969, Michigan State University

Beadie, Nancy Elizabeth 1993; MS, 1987, Syracuse University; PhD, 1989, Syracuse University

Bell, Philip Laverne 1998; MA, 1996, University of California (Berkeley); PhD, 1998, University of California (Berkeley)

Berninger, Virginia Wise 1986; MEd, 1970, University of Pittsburgh; PhD, 1981, Johns Hopkins University

Billingsley, Felix Foster 1977, (Emeritus); MA, 1966, Western Washington College; PhD, 1974, University of Washington

Bolton, Dale Leroy * 1962, (Emeritus); MS, 1953, Oklahoma State University; PhD, 1958, University of Wisconsin (Madison)

Brammer, Lawrence Martin * 1963, (Emeritus); MA, 1948, Stanford University; PhD, 1950, Stanford University

Bransford, John D. 2003, (Emeritus); PhD, 1970, University of Minnesota

Burgess, Charles Orville * 1964, (Emeritus); MS, 1958, University of Wisconsin; PhD, 1962, University of Wisconsin (Madison)

Cheney, Douglas Alan 1989; MS, 1975, University of Oregon; PhD, 1992, University of Washington

Doi, James I. * 1979, (Emeritus); MA, 1950, University of Chicago; PhD, 1952, University of Chicago

Driscoll, John Parke * 1967, (Emeritus); MS, 1950, University of California (Los Angeles); PhD, 1957, Pennsylvania State University

Edgar, Eugene Bayard 1972, (Emeritus); MA, 1968, George Peabody College; PhD, 1972, George Peabody College

Evans, Ellis Dale * 1964, (Emeritus); MEd, 1962, Indiana University; EdD, 1964, Indiana University

Forster, Jerald Ray * 1966, (Emeritus); PhD, 1966, University of Minnesota

Frederiksen, John Roland 2001, (Emeritus); MA, 1966, Princeton University; PhD, 1966, Princeton University

Gay, Geneva 1989; MA, 1969, University of Akron; PhD, 1972, University of Texas (Austin)

Gehrke, Nathalie Jean 1979, (Emeritus); MA, 1972, Northwestern University; PhD, 1976, Arizona State University

Glenn, Allen D. 1989, (Emeritus); MS, 1968, Kansas State Teacher's College; MA, 1970, University of Michigan; PhD, 1970, University of Michigan

Goodlad, John I. * 1983, (Emeritus); MA, 1946, University of British Columbia (Canada); PhD, 1949, University of Chicago; EdD, 1982, Eastern Michigan University

Haring, Norris Grover * 1965, (Emeritus); MA, 1950, University of Nebraska, campus unspecified; EdD, 1956, Syracuse University

Herrenkohl, Leslie Rupert 1996; MA, 1991, Clark University; PhD, 1995, Clark University

Hertzog, Nancy 2010; MA, 1981, University of Connecticut; PhD, 1995, University of Illinois (Urbana)

Hune, Shirley 2007; PhD, 1979, George Washington University

Hunkins, Francis Peter * 1966, (Emeritus); MEd, 1963, Boston University; PhD, 1966, Kent State University

Jarolimek, John * 1962, (Emeritus); MA, 1949, University of Minnesota; PhD, 1955, University of Minnesota

Jenkins, Joseph Robert 1978, (Emeritus); PhD, 1967, University of Minnesota

Jones, Diane Carlson 1996, (Emeritus); MA, 1969, University of Texas (unspecified); MA, 1977, Wayne State University; PhD, 1980, Wayne State University

Kaltsounis, Theodore * 1967, (Emeritus); MA, 1959, University of Wichita; PhD, 1961, University of Illinois

Kazemi, Elham 1999; MA, 1997, University of California (Los Angeles); PhD, 1999, University of California (Los Angeles)

Kerr, Donna Hanneman 1973, (Emeritus); PhD, 1973, Columbia University

Kerr, Stephen Thomson 1985, (Emeritus); MA, 1969, Columbia University; PhD, 1975, University of Washington

Knapp, Michael Sturgis 1990; MEd, 1976, Harvard University; MA, 1979, Stanford University; PhD, 1981, Stanford University

Lowenbraun, Sheila * 1968, (Emeritus); MA, 1962, Columbia University; PhD, 1969, Columbia University

Madsen, David Lawrence * 1962, (Emeritus); MA, 1954, University of Chicago; PhD, 1961, University of Chicago

Mazza, James J. 1996; MS, 1990, University of Wisconsin (Madison); PhD, 1993, University of Wisconsin (Madison)

Mc Cartin, Rosemarie Elizabeth * 1965, (Emeritus); MA, 1960, Immaculate Heart College, Ca; PhD, 1964, University of Southern California

McCutchen, Deborah 1986; MA, 1978, University of Pittsburgh; PhD, 1985, University of Pittsburgh

Mizokawa, Donald Tsuneo 1973, (Emeritus); MEd, 1969, University of Hawaii; PhD, 1974, Indiana University

Morishima, James Kenji * 1960, (Emeritus); PhD, 1967, University of Washington

Nerad, Maresi 2001; MA, 1973, Darmstadt University of Tech, Germany; PhD, 1988, University of California (Berkeley)

Nolen, Susan Bobbitt 1990; MEd, 1976, Lewis And Clark College; PhD, 1986, Purdue University

Olswang, Steven Glenn 1975, (Emeritus); JD, 1971, University of Illinois; PhD, 1977, University of Washington

Parker, Walter C. 1985; MA, 1978, University of Colorado (Denver); PhD, 1982, University of Washington

Peck, Charles A. 2003; MA, 1976, Sonoma State University; PhD, 1984, University of California (Santa Barbara)

Peckham, Percy Donald * 1968, (Emeritus); MA, 1955, University of Denver; PhD, 1968, University of Colorado (Denver)

Ryckman, David Bertrand * 1969, (Emeritus); AM, 1961, University of Chicago; EdD, 1966, University of Illinois

Sandall, Susan R. 1996; MS, 1977, University of Oregon; PhD, 1986, University of Washington

Schwartz, Ilene Sharon 1991; MA, 1986, University of Kansas; PhD, 1989, University of Kansas

Sebesta, Sam Leaton * 1963, (Emeritus); MA, 1960, Northwestern University; EdD, 1963, Stanford University

Standal, Timothy Clyde 1976, (Emeritus); MEd, 1974, Western Washington College; PhD, 1976, University of Minnesota

Stowitschek, Joseph James 1986, (Emeritus); MS, 1969, Oregon College of Education (Monmouth); EdD, 1973, Utah State University

Taylor, Catherine Sue 1991, (Emeritus); MSE, 1978, University of Kansas; PhD, 1986, University of Kansas

Taylor, Edward 1990; MA, 1983, Gonzaga University; PhD, 1994, University of Washington

Thompson, Marie Denman 1971, (Emeritus); MA, 1968, University of Washington; PhD, 1970, University of Washington

Tostberg, Robert Eugene * 1962, (Emeritus); MA, 1958, University of Wisconsin; PhD, 1960, University of Wisconsin (Madison)

Valencia, Sheila Denise Weinberg 1987; MEd, 1976, State University of New York (Buffalo); PhD, 1978, University of Colorado (Boulder)

Williams, Donald Thomas Jr. * 1966, (Emeritus); MA, 1957, Stanford University; PhD, 1963, Stanford University

Williams, Richard Charles * 1990, (Emeritus); MA, 1963, University of Minnesota; PhD, 1966, University of Minnesota

Windschittl, Mark Andrew 1996; MS, 1993, Iowa State University; PhD, 1995, Iowa State University

Zeichner, Kenneth M. 2009; MA, 1970, Syracuse University; PhD, 1976, Syracuse University

Associate Professors

Beal, Jack Lee * 1973, (Emeritus); MS, 1962, University of Kansas; PhD, 1972, University of Nebraska

Brown, Robert Lewis * 1964, (Emeritus); MEd, 1956, Trinity University, Texas; EdD, 1961, University of Arkansas

Contreras, Frances E. 2004, (Affiliate); MEd, 1995, Harvard University; PhD, 2003, Stanford University

Cook, Clayton 2010; MA, 2005, University of California (Riverside); PhD, 2008, University of California (Riverside)

Davis, Carol Ann 1998; MEd, 1989, University of Houston; EdD, 1992, University of Houston

Gallucci, Chrysan J. 1997, (Emeritus); MEd, 1988, University of Washington; PhD, 2002, University of Washington

Gray, Carol Ann * 1971, (Emeritus); MEd, 1968, Western Washington State College; PhD, 1971, University of Washington

Hansen-Krening, Nancy Margaret * 1974, (Emeritus); MEd, 1973, University of Oregon; PhD, 1974, University of Oregon

Honig, Meredith Ivy 2006; PhD, 2001, Stanford University

Hudson, Roxanne Frances 2006; MEd, 1994, Western Washington University; PhD, 2002, University of Florida

Jegatheesan, Brinda India 2006; MEd, 2000, University of Hawaii; PhD, 2005, University of Illinois

Jones, Janine 2002; MA, 1994, University of Southern California; PhD, 1999, University of Texas (Austin)

Joseph, Gail E. 2007; MEd, 1995, Western Washington University; PhD, 2001, University of Washington

Kerdeman, Deborah 1990; MEd, 1981, University of Southern California; MA, 1981, Hebrew Union College; MA, 1988, Stanford University; PhD, 1991, Stanford University

Lenges, Anita K. 1994, (Acting); MEd, 1994, University of Washington; PhD, 2004, University of Washington

Li, Min 2001; MA, 1997, Beijing Normal University (China); PhD, 2002, Stanford University

Lott, Joe 2007; MPA, 2000, Louisiana State University; PhD, 2005, Louisiana State University

McDonald, Morva Ann 2006; MA, 1999, Stanford University; PhD, 2003, Stanford University

Minstrell, James Arthur 2002, (Affiliate); MS, 1966, University of Pennsylvania; PhD, 1978, University of Washington

Plecki, Margaret L. 1994; MS, 1976, University of Illinois; PhD, 1991, University of California (Berkeley)

Smith, John Preston * 1969, (Emeritus); MEd, 1963, University of Missouri; EdD, 1969, Stanford University

Thalberg, Stanton Philip * 1965, (Emeritus); MA, 1959, University of Iowa; PhD, 1964, University of Iowa

Varghese, Manka Mary 2000; MS, 1994, University of Pennsylvania; PhD, 2000, University of Pennsylvania

Vasquez, James A. * 1975, (Emeritus); MA, 1971, University of California (Los Angeles); PhD, 1973, University of California (Los Angeles)

West, Elizabeth Anne 1998; MEd, 1994, University of Washington; PhD, 2003, University of Washington

Williamson-Lott, Joy Ann 2007; MA, 1995, University of Illinois (Urbana); PhD, 1998, University of Illinois (Urbana)

Assistant Professors

Bang, Megan 2011; PhD, 2009, Northwestern University

Barajas, Filiberto 2010; MA, 2001, Claremont Graduate School; PhD, 2009, University of California (Los Angeles)

Bashey, Husain Ismail 1964, (Emeritus); MA, 1955, University of Bombay; MA, 1960, Macmurray College; PhD, 1975, University of Oregon

Dabach, Dafney Blanca 2010; MA, 2001, University of California (Berkeley); PhD, 2009, University of California (Berkeley)

Hebard, Heather T. 2010; MA, 1999, Santa Clara University; PhD, 2010, Stanford University

Hoffman, Jennifer L. 1989; MA, 1998, Seattle University; PhD, 2006, University of Washington

Ishimaru, Ann 2012; MA, 1994, Stanford University; EdM, 2008, Harvard University; EdD, 2011, Harvard University

Jackson, Kara 2013; MA, 2005, University of Pennsylvania; PhD, 2010, University of Pennsylvania

Lewis, Jeffrey L. 2003, (Affiliate); MA, 1983, University of Rochester; PhD, 1986, University of Rochester

Lewis, Katherine Elizabeth 2013; MSc, 2003, Trinity College (Ireland); MA, 2007, University of California (Berkeley); PhD, 2011, University of California (Berkeley)

Meeker, Kathleen 2013; MEd, 2003, Ohio State University; PhD, 2010, Vanderbilt University

Rigby, Jessica Goodman 2014; MA, 2006, Stanford University; PhD, 2012, University of California (Berkeley)

Sanders, Elizabeth 2004; MEd, 2004, University of Washington; PhD, 2011, University of Washington

Schindler, Holly S. 2012; PhD, 2007, Boston College

Sun, Min 2014; MA, 2006, Beijing Normal University (China); PhD, 2011, Michigan State University

Thompson, Jessica J. 1992; MEd, 2001, University of Washington; PhD, 2006, University of Washington

Senior Lecturers

Beitlers, Anne 2014; MAT, 1999, University of Washington; PhD, 2014, New York University

Halverson, Thomas Joseph 1992; MEd, 1990, Western Washington University; PhD, 1996, University of Washington

Kimball, Kathleen Louise 1987, (Emeritus); MEd, 1972, University of Utah; EdD, 1993, University of Washington

Lindsay, Jennifer 2002; MAT, 1994, Lewis And Clark College; PhD, 2009, University of Washington

Lopez, Sara L. 2000; MEd, 2003, University of Washington

Massey, Dixie Dick 2004; MA, 2000, University of North Carolina; PhD, 2003, University of North Carolina

O'Doherty, Ann 2012; MEd, 1992, University of Texas (Austin); EdD, 2007, University of Texas (Austin)

Powell, Selma Meral 2014; MA, 1999, University of South Florida; PhD, 2012, University of Central Florida

Lecturers

Macgregor, Robert R. 2006; MEd, 1987, Central Washington University; EdD, 2012, University of Washington

Wardrop, Terri Tisha Million 2011; MEd, 1988, University of Washington

College of Engineering

Aeronautics and Astronautics

Professors

Andrews, Dana Gene 2011, (Affiliate); MS, 1967, California Institute of Technology; PhD, 1973, Stanford University

Bauer, Pascal 2007, (Affiliate); MS, 1973, Université de Poitiers (France); PhD, 1977, Université de Poitiers (France)

Bollard, Richard John Holden * 1961, (Emeritus); ME, 1949, Canterbury College; PhD, 1954, Purdue University

Bragg, Michael 2013; MS, 1977, University of Illinois (Urbana); PhD, 1981, Ohio State University

Breidenthal, Robert Edward * 1980; MS, 1974, California Institute of Technology; PhD, 1978, California Institute of Technology

Bruckner, Adam Peter * 1972; MA, 1968, Princeton University; PhD, 1972, Princeton University

Christiansen, Walter Henry * 1967, (Emeritus); PhD, 1961, California Institute of Technology

Decher, Reiner * 1967, (Emeritus); SM, 1962, Massachusetts Institute of Technology; PhD, 1968, Massachusetts Institute of Technology

Den Hartog, Daniel J. 2005, (Affiliate); MS, 1985, University of Wisconsin; PhD, 1989, University of Wisconsin

Fyfe, Ian Millar * 1959, (Emeritus); ArtC, 1950, Royal College of Science and Technology (Glasgow); MME, 1954, University of Delaware; PhD, 1957, Stanford University

Hermanson, James Carl 1986; MS, 1980, California Institute of Technology; PhD, 1985, California Institute of Technology

Hoffman, Alan Lowell * 1989, (Emeritus); PhD, 1967, California Institute of Technology

Holsapple, Keith A. * 1965; MS, 1964, University of Washington; PhD, 1965, University of Washington

Housen, Kevin R. 2003, (Affiliate); MS, 1979, University of Arizona; PhD, 1981, University of Arizona

Jarboe, Thomas Richard 1989; PhD, 1974, University of California (Berkeley)

Khalil, Gamal 1983, (Affiliate); MS, 1973, University of Washington; PhD, 1978, Florida State University

Kurosaka, Mitsuru * 1987; MS, 1961, University of Tokyo (Japan); PhD, 1968, California Institute of Technology

Lin, Kuen-Yuan * 1984; MSc, 1963, National Taiwan University; MA, 1967, Princeton University; PhD, 1970, Princeton University

Livne, Eliezer * 1990; MSc, 1982, Israel Institute of Technology; PhD, 1990, University of California (Los Angeles)

Mani, Ramani 2011, (Affiliate); MS, 1964, California Institute of Technology; PhD, 1967, California Institute of Technology

Mesbahi, Mehran 2002; MS, 1991, University of Southern California; MS, 1995, University of Southern California; PhD, 1996, University of Southern California

Parmeter, R. Reid * 1963, (Emeritus); MS, 1959, California Institute of Technology; PhD, 1963, California Institute of Technology

Rassaian, Mostafa 2009, (Affiliate); MS, 1974, Illinois Institute of Technology; PhD, 1979, Illinois Institute of Technology

Russell, David Allison * 1967, (Emeritus); MSc, 1957, California Institute of Technology; PhD, 1961, California Institute of Technology

Shumlak, Uri 1994; PhD, 1992, University of California (Berkeley)

Vagners, Juris * 1967, (Emeritus); MS, 1963, Stanford University; PhD, 1967, Stanford University

Varanasi, S. Rao 2014, (Affiliate); MS, 1961, California Institute of Technology; PhD, 1968, University of Washington

Associate Professors

Chappelle, Douglas Eugene 2001, (Affiliate); MS, 1993, University of Washington

Cummings, Mary Louise 2013, (Affiliate); MS, 1994, Naval Postgraduate School; PhD, 2004, University of Virginia

Dabiri, Dana 2002; MS, 1987, University of California (Berkeley); PhD, 1992, University of California (San Diego)

Dougherty, Robert Patrick 2010, (Affiliate); MS, 1982, Iowa State University; PhD, 1986, Iowa State University

Hill, Kristi Ann Morgansen 2002; MS, 1996, Harvard University; PhD, 1999, Harvard University

Ly, Uy-Loi * 1988, (Affiliate); MS, 1976, California Institute of Technology; PhD, 1983, Stanford University

Mattick, Arthur Thomas * 1975, (Emeritus); MS, 1971, Massachusetts Institute of Technology; PhD, 1975, Massachusetts Institute of Technology

McGeer, Brian Theodore 1997, (Affiliate); MS, 1980, Stanford University; PhD, 1984, Stanford University

Mohaghegh, Michael 1989, (Affiliate); MS, 1965, University of California (Berkeley); PhD, 1972, University of Washington

Mor, Marat 2003, (Affiliate); PhD, 2003, Israel Institute of Technology

Murphy, Susan 2008, (Affiliate); MS, 2003, City University (Bellevue)

Nelson, Chester Paul 2006, (Affiliate); BS, 1978, University of Minnesota

Paisley, David John 2006, (Affiliate); PhD, 1985, Cranfield Institute of Technology (UK); MS, 2000, Antioch University, Seattle

Schmidt, Eckart Walter 1997, (Affiliate); MS, 1962, University of Tübingen (Germany); PhD, 1964, University of Tübingen (Germany)

Slough, John Thomas * 1992, (Research); MA, 1976, Columbia University; PhD, 1981, Columbia University

Zube, Dieter M. 2005, (Affiliate); Diploma, 1990, University of Stuttgart (Germany); PhD, 1995, University of Stuttgart (Germany)

Assistant Professors

Afshari, Shahin 1998, (Affiliate); BS, 1999, University of Washington

Ferrante, Antonino 2008; MS, 1997, von Karman Institute for Fluid Dynamics; PhD, 2004, University of California (Irvine)

Lukin, Vyacheslav 2007, (Affiliate); MA, 2003, Princeton University

Narang, Anshu 2013; MS, 2008, Indian Institute of Technology (India); PhD, 2012, Texas A&M University

Stickler, Patrick B. 2004, (Affiliate); MS, 1990, Lehigh University; MS, 1998, University of Washington; PhD, 2001, University of Washington

Yang, Jinkyu 2013; MS, 2001, Stanford University; PhD, 2005, Stanford University

You, Setthivoine 2008; MSc, 1997, Imperial College; PhD, 2002, Imperial College

Lecturers

Folsom, Robert John 2014; MBA, 1991, Pepperdine University

Golingo, Raymond Peter 1989; MS, 1998, University of Washington; PhD, 2003, University of Washington

Knowlen, Carl 1983; MS, 1985, University of Washington; PhD, 1991, University of Washington

Lum, Christopher W.M. 2001; MS, 2005, University of Washington; PhD, 2009, University of Washington

Smith, Roger James 1998; MS, 1980, University of Washington; PhD, 1989, University of Washington

Chemical Engineering

Professors

Babb, Albert Leslie * 1952, (Emeritus); MS, 1949, University of Illinois; PhD, 1951, University of Illinois

Baneyx, Francois * 1992; PhD, 1991, University of Texas (Austin)

Berg, John Calvin * 1964; PhD, 1964, University of California (Berkeley)

Bowen, J. Ray * 1981, (Emeritus); MS, 1957, Massachusetts Institute of Technology; PhD, 1963, University of California (Berkeley)

Castner, David Gordon * 1986; PhD, 1979, University of California (Berkeley)

Heideger, William Joseph * 1957, (Emeritus); MSE, 1955, Princeton University; PhD, 1959, Princeton University

Hillhouse, Hugh 2010; MS, 1996, University of Washington; MS, 1999, University of Massachusetts; PhD, 2000, University of Massachusetts

Homola, Jiri 1997, (Affiliate); MS, 1988, Technical University of Prague (Czech); PhD, 1993, Academy of Science (USSR)

Jenekhe, Samson Ally 2000; MS, 1980, University of Minnesota; MA, 1981, University of Minnesota; PhD, 1985, University of Minnesota

Jiang, Shaoyi 1999; MS, 1988, Nanjing University of Technology (China); PhD, 1993, Cornell University

Lidstrom, Mary Elizabeth 1977; MS, 1975, University of Wisconsin (Madison); PhD, 1977, University of Wisconsin (Madison)

Overney, Rene Marcel * 1996; MS, 1989, University of Basel (Switzerland); PhD, 1992, University of Basel (Switzerland)

Ribe, Fred Linden * 1977, (Emeritus); PhD, 1951, University of Chicago

Schwartz, Daniel Todd 1991; MS, 1985, University of California (Davis); PhD, 1989, University of California (Davis)

Seebergh, Jill Elisabeth 1989, (Affiliate); MS, 1991, University of Washington; PhD, 1995, University of Washington

Sleicher, Charles Albert * 1960, (Emeritus); MS, 1949, Massachusetts Institute of Technology; PhD, 1955, University of Michigan

Stuve, Eric Michael * 1985; MS, 1979, Stanford University; PhD, 1983, Stanford University

Van Schalkwijk, Walter Arthur 2001, (Affiliate); MSc, 1977, Carleton University (Canada); PhD, 1983, University of Ottawa (Canada)

Woodruff, Gene Lowry * 1965, (Emeritus); MS, 1963, Massachusetts Institute of Technology; PhD, 1966, Massachusetts Institute of Technology

Associate Professors

Adler, Stuart Blake 2001; MS, 1989, University of California (Berkeley); PhD, 1993, University of California (Berkeley)

Dudgeon, Douglas 1990, (Affiliate); PhD, 1995, University of Washington

Holt, Bradley Raymond * 1984; PhD, 1984, University of Wisconsin

Krieger-Brockett, Barbara * 1975, (Emeritus); MS, 1972, Wayne State University; PhD, 1975, Wayne State University

Pozzo, Lilo D. 2007; MS, 2006, Carnegie Mellon University; PhD, 2006, Carnegie Mellon University

Subramanian, Venkat R. 2014; PhD, 2001, University of South Carolina

Tyler, Bonnie June 1986, (Affiliate); PhD, 1992, University of Washington

Assistant Professors

Carothers, James Matthew 2012; PhD, 2005, Harvard University

DeForest, Cole 2013; PhD, 2011, University of Colorado (Boulder)

Hayes, Brian Steven * 1992, (Affiliate); PhD, 1997, University of Washington

Nguyen, Felix Nhanchau 2002, (Affiliate); PhD, 2007, University of Washington

Pfaendtner, Walter James 2009; PhD, 2007, Northwestern University

Sunkel, Jorge 1992, (Affiliate); MS, 1992, University of California (Berkeley); PhD, 1998, University of Washington

Whitaker, John D. 1998, (Affiliate); PhD, 2003, University of Washington

Lecturers

Kim, Anthony Young 2014; MS, 1993, University of California (Davis); PhD, 2002, University of Washington

Newbloom, Gregory Matthew 2009; MS, 2011, University of Washington; PhD, 2014, University of Washington

Civil and Environmental Engineering

Professors

Arduino, Pedro 1997; MSCE, 1992, University of Puerto Rico; MSCE, 1996, Georgia Institute of Technology; PhD, 1996, Georgia Institute of Technology

Benjamin, Mark Millard * 1977; MS, 1973, Stanford University; PhD, 1979, Stanford University

Bogan, Richard Herbert * 1954, (Emeritus); MS, 1952, Massachusetts Institute of Technology; DSc, 1954, Massachusetts Institute of Technology

Brett, Michael T. * 1997; MSc, 1985, University of Maine; PhD, 1990, University of Uppsala (Sweden)

Brown, Colin B. * 1969, (Emeritus); PhD, 1962, University of Minnesota

Burges, Stephen J. * 1970, (Emeritus); MS, 1968, Stanford University; PhD, 1970, Stanford University

Carlson, Dale Arvid * 1955, (Emeritus); MSCE, 1951, University of Washington; PhD, 1960, University of Wisconsin (Madison)

Chang, Yu-Jung 1989, (Affiliate); MSCE, 1992, University of Washington; PhD, 1996, University of Washington

Eberhard, Marc Olivier * 1989; MS, 1986, University of Illinois; PhD, 1989, University of Illinois

Eikum, Arild Schanke 1974, (Affiliate); MSCE, 1967, University of Washington; PhD, 1973, University of Washington

Elias, Ziad Malek * 1969, (Emeritus); DSc, 1963, Massachusetts Institute of Technology

Evans, Roger James * 1966, (Emeritus); MSc, 1959, Brown University; PhD, 1965, University of California (Berkeley)

Hawkins, Neil Middleton 1968, (Affiliate); MS, 1959, University of Illinois; PhD, 1961, University of Illinois

Holtz, Robert Dean II * 1988, (Emeritus); MSCE, 1962, University of Minnesota; PhD, 1970, Northwestern University

Jacoby, Jean Marie * 1986, (Affiliate); MS, 1981, University of Washington; PhD, 1986, University of Washington

Korshin, Gregory * 1991; PhD, 1983, Chemical Engineering Institute (Russia)

Kramer, Steven Lawrence * 1984; MEng, 1979, University of California (Berkeley); PhD, 1984, University of California (Berkeley)

Larson, Timothy * 1970; MS, 1972, University of Washington; PhD, 1976, University of Washington

Lehman, Dawn Ellen 1998; MEng, 1992, University of California (Berkeley); PhD, 1998, University of California (Berkeley)

Lettenmaier, Dennis Patrick * 1973; MS, 1973, George Washington University; PhD, 1975, University of Washington

Mahoney, Joe Paul * 1978; MSCE, 1970, Texas A&M University; PhD, 1979, Texas A&M University

Malcolm, David J 2013, (Affiliate); MSc, 1969, McGill University (Canada); PhD, 1973, University of Calgary (Canada)

Mattock, Alan Hanson * 1964, (Emeritus); MSc, 1949, University of London, UK; PhD, 1955, University of London, UK

Miller, Gregory R. * 1983; MSCE, 1981, Northwestern University; PhD, 1984, Northwestern University

Nece, Ronald Elliott * 1959, (Emeritus); MS, 1951, Lehigh University; DSc, 1958, Massachusetts Institute of Technology

Niemeier, Debra 1991, (Affiliate); MSCE, 1991, University of Maine; PhD, 1994, University of Washington

Nihan, Nancy Lucille * 1973, (Emeritus); MSCE, 1967, Northwestern University; PhD, 1970, Northwestern University

Palmer, Richard Neal * 1979, (Affiliate); MS, 1973, Stanford University; PhD, 1979, Johns Hopkins University

Pavlovec, Brian 2012, (Affiliate); BS, 1982, Iowa State University

Pilat, Michael Joseph * 1967, (Emeritus); MS, 1963, University of Washington; PhD, 1967, University of Washington

Reed, Dorothy Aubrey * 1983; MSE, 1977, Princeton University; PhD, 1980, Princeton University

Reiber, Steve Harold 1983, (Affiliate); MHS, 1975, Johns Hopkins University; ME, 1977, University of Michigan; PhD, 1983, University of Utah

Roeder, Charles William * 1977; MS, 1971, University of Illinois; PhD, 1977, University of California (Berkeley)

Rutherford, George Scott 1980; MSCE, 1968, Washington State University; PhD, 1974, Northwestern University

Schneider, Jerry Bruce * 1967, (Emeritus); MCP, 1961, University of California (campus unspecified); PhD, 1966, University of Pennsylvania

Stahl, David Allan 2000; MS, 1975, University of Illinois (Urbana); PhD, 1978, University of Illinois (Urbana)

Stanton, John Francis 1978; MSCE, 1975, Cornell University; PhD, 1978, University of California (Berkeley)

Stensel, H. David * 1983; ME, 1968, Cornell University; PhD, 1971, Cornell University

Tawresey, John Godwin 1985, (Affiliate); MS, 1968, Cornell University; MBA, 1975, University of Washington

Taylor, Andrew Warren 2005, (Affiliate); MSCE, 1985, University of Washington; PhD, 1990, University of Texas (Austin)

Wang, Yinhai 1998; MSCE, 1991, Tsinghua University (China); PhD, 1998, University of Tokyo (Japan)

Welch, Eugene B. * 1962, (Emeritus); MS, 1959, Michigan State University; PhD, 1967, University of Washington

Wood, Eric Franklin 1993, (Affiliate); MS, 1972, Massachusetts Institute of Technology; ScD, 1974, Massachusetts Institute of Technology

Yearsley, John Ross 1976, (Affiliate); MSME, 1966, University of Washington; MS, 1968, Massachusetts Institute of Technology; PhD, 1989, University of Washington

Yeh, Harry Hsiu-Jen * 1983, (Affiliate); MS, 1977, Washington State University; PhD, 1983, University of California (Berkeley)

Associate Professors

Berman, Jeffrey William 2006; MS, 2003, State University of New York (Buffalo); PhD, 2006, State University of New York (Buffalo)

Chen, Qiuzi 2009; MS, 1995, New Jersey Institute of Technology; PhD, 2001, University of California (Davis)

Goodchild, Anne V. 2005; MS, 2002, University of California (Berkeley); PhD, 2005, University of California (Berkeley)

Horner-Devine, Alexander R. 2004; MEng, 1998, Stanford University; DPhil, 2003, Stanford University

Hossain, Faisal 2014; MEng, 1999, National University of Singapore; PhD, 2004, University of Connecticut

Istanbulluoglu, Erkan 2009; MS, 1998, University of Uludag (Turkey); PhD, 2003, Utah State University

Kent, Joseph Chan * 1952, (Emeritus); MS, 1948, Stanford University; PhD, 1952, University of California (Berkeley)

Keough, William M. 2011, (Affiliate); MFA, 1994, University of Houston

Lowes, Laura Nicole 2000; MS, 1999, University of California (Berkeley); PhD, 1999, University of California (Berkeley)

Lundquist, Jessica D. 2006; MS, 2000, University of California (San Diego); PhD, 2004, University of California (San Diego)

Muench, Stephen T. 1990; MSCE, 1998, University of Washington; PhD, 2004, University of Washington

Spyridakis, Dimitris Emmanuel * 1970, (Emeritus); MS, 1959, University of Wisconsin; PhD, 1965, University of Wisconsin (Madison)

Swanson, David Bryan 1989, (Affiliate); MSCE, 1991, University of Washington

Wartman, Joseph 2010; MSCE, 1996, University of California (Berkeley); MEng, 1996, University of California (Berkeley); PhD, 1999, University of California (Berkeley)

Assistant Professors

Ahmed, Kamal Mostafa 1993, (Affiliate); MSc, 1988, Cairo University (Egypt); PhD, 1999, University of Washington

Avery, Ryan P. 2002, (Affiliate); MSCE, 2005, University of Washington; PhD, 2008, University of Washington

Bassok, Alon 2003, (Affiliate); MUP, 2004, University of Washington; PhD, 2009, University of Washington

Cai, Zhenxiao 2006, (Affiliate); MS, 2006, Tsinghua University (China); MS, 2008, University of Washington; PhD, 2011, University of Washington

Chang, Kevin N. 1998, (Affiliate); MSCE, 1997, University of Washington; PhD, 2005, University of Washington

Chickadel, C. Christopher 2006, (Affiliate); MS, 2003, Oregon State University; PhD, 2007, Oregon State University

Creswell, Joel 2012, (Affiliate); MS, 2006, Yale University; PhD, 2011, University of Wisconsin (Madison)

Devries, Paul Edward 1996, (Affiliate); MSE, 1994, University of Washington; PhD, 2000, University of Washington

Dodd, Michael 2009; MSEE, 2003, Georgia Institute of Technology; PhD, 2008, Swiss Federal Institute of Technology

Kainz, Martin 2008, (Affiliate); MSc, 1995, University of Vienna, Austria; PhD, 2001, Universite du Quebec

Kaminsky, Jessica Ann 2014; PhD, 2013, University of Colorado (Boulder)

Kim, Amy Ahim 2014; MS, 2008, Illinois Institute of Technology; PhD, 2014, Texas A&M University

Kuder, Katherine G. 2006, (Affiliate); MS, 2002, Northwestern University; PhD, 2005, Northwestern University

Latch, Douglas 2012, (Affiliate); MS, 2002, University of Minnesota; PhD, 2005, University of Minnesota

Mackenzie, Donald 2013; SM, 2009, Massachusetts Institute of Technology; PhD, 2013, Massachusetts Institute of Technology

Motley, Michael R 2012; MS, 2004, Virginia Polytechnic Institute and State University; MA, 2010, Princeton University; PhD, 2011, Princeton University

Neumann, Rebecca 2010; PhD, 2009, Massachusetts Institute of Technology

Parsons, Jeffrey David * 2000, (Affiliate); MSCE, 1995, University of Illinois (Urbana); PhD, 1998, University of Illinois (Urbana)

Petroff, Catherine M. * 1993, (Affiliate); MS, 1983, Stanford University; PhD, 1993, California Institute of Technology

Rowangould, Dana 2013, (Affiliate); MS, 2009, University of California (Davis)

Shogren, Robert G 2009, (Affiliate); MBA, 2000, Gonzaga University; PhD, 2009, University of Washington

Vandenbossche, Julie M. 2008, (Affiliate); MSCE, 1995, Michigan State University; PhD, 2002, University of Minnesota

Wiebe, Richard 2014; MAS, 2009, University of Waterloo (Canada); PhD, 2012, Duke University

Lecturer

Le, Tom Ngoc 2009; MS, 2013, University of Washington

Computer Science and Engineering

Professors

Abel, Mark J 2012, (Affiliate); MS, 1980, Stanford University

Alverson, Gail Abdelnour 1986, (Affiliate); MS, 1988, University of Washington; PhD, 1990, University of Washington

Anderson, Richard John * 1986; PhD, 1985, Stanford University

Anderson, Thomas Edward * 1987; MS, 1990, University of Washington; PhD, 1991, University of Washington

Baer, Jean-Loup Edgar * 1969, (Emeritus); MS, 1963, Grenoble (France); PhD, 1968, University of California (Los Angeles)

Beame, Paul William 1987; MS, 1982, University of Toronto (Canada); PhD, 1987, University of Toronto (Canada)

Bernstein, Philip Alan 1996, (Affiliate); MSc, 1972, University of Toronto (Canada); PhD, 1975, University of Toronto (Canada)

Bershad, Brian * 1986, (Affiliate); MS, 1990, University of Washington; PhD, 1990, University of Washington

Borning, Alan H. * 1980; MS, 1974, Stanford University; PhD, 1979, Stanford University

Borriello, Gaetano 1987; MS, 1980, Stanford University; PhD, 1988, Stanford University

Briggs, Preston Pengra 1998, (Affiliate); MS, 1992, Rice University; PhD, 1992, Rice University

Burger, Douglas Christopher 2008, (Affiliate); MS, 1993, University of Wisconsin (Madison); PhD, 1998, University of Wisconsin (Madison)

Callahan, Charles David 1990, (Affiliate); MS, 1986, Rice University; PhD, 1987, Rice University

Chambers, Craig David * 1991, (Affiliate); PhD, 1992, Stanford University

Cohen, Michael F. 1998, (Affiliate); MS, 1985, Cornell University; PhD, 1992, University of Utah

Curless, Brian Lee 1998; MSEE, 1991, Stanford University; PhD, 1997, Stanford University

Cutler, David N. 1985, (Affiliate); BA, 1965, Olivet College
De Rose, Anthony David * 1985, (Affiliate); PhD, 1985, University of California (Berkeley)

Deline, Robert 2004, (Affiliate); MS, 1993, University of Virginia; PhD, 1999, Carnegie Mellon University

Domingos, Pedro Morais Delgado 1999; MS, 1992, Technical University of Lisbon (Portugal); MS, 1994, University of California (Irvine); PhD, 1997, University of California (Irvine)

Drucker, Steven Mark 2007, (Affiliate); MS, 1988, Massachusetts Institute of Technology; PhD, 1994, Massachusetts Institute of Technology

Ebeling, William Henry Carl * 1986, (Emeritus); MS, 1976, Southern Illinois University; PhD, 1986, Carnegie Mellon University

Eggers, Susan Jane * 1989, (Emeritus); PhD, 1989, University of California (Berkeley)

Ernst, Michael D. 2009; MS, 1992, Massachusetts Institute of Technology; MS, 1997, University of Washington; PhD, 2000, University of Washington

Etzioni, Oren Willi 1991; MS, 1988, Carnegie Mellon University; PhD, 1991, Carnegie Mellon University

Fishkin, Kenneth Paul 2003, (Affiliate); MS, 1983, University of California (Berkeley)

Fox, Dieter 2000; MSc, 1993, University of Bonn (Germany); PhD, 1998, University of Bonn (Germany)

Golde, Hellmut * 1959, (Emeritus); MS, 1955, Stanford University; PhD, 1959, Stanford University

Gray, Terence Eugene 1988, (Affiliate); PhD, 1978, University of California (Los Angeles)

Gribble, Steven David 2000; MS, 1997, University of California (Berkeley); PhD, 2000, University of California (Berkeley)

Halevy, Alon Yitzchak * 1998, (Affiliate); PhD, 1993, Stanford University

Illes, Judy 2008, (Affiliate); MA, 1983, McGill University (Canada); PhD, 1987, Stanford University

Jain, Kamal 2012, (Affiliate); PhD, 2000, Georgia Institute of Technology

Kahan, Simon Hersh 1986, (Affiliate); MSEE, 1985, University of California (Berkeley); PhD, 1991, University of Washington

Karlin, Anna Rochelle * 1994; PhD, 1987, Stanford University

Kautz, Henry Alexander 2000, (Affiliate); MA, 1980, Johns Hopkins University; MS, 1982, University of Toronto (Canada); PhD, 1987, University of Rochester

Kehl, Theodore Herbert * 1963, (Emeritus); MS, 1958, University of Wisconsin; PhD, 1961, University of Wisconsin (Madison)

Khuller, Samir 2011, (Affiliate); MS, 1989, Cornell University; PhD, 1990, Cornell University

Ladner, Richard Emil 1971; PhD, 1971, University of California (Berkeley)

Lazowska, Edward Delano * 1977; MSc, 1974, University of Toronto (Canada); PhD, 1977, University of Toronto (Canada)

Levy, Henry Marc * 1983; MS, 1981, University of Washington

Lewis, John Gregg 1984, (Affiliate); MA, 1968, University of California (Berkeley); PhD, 1977, Stanford University

Lecturers

Chen, Tai-Chang 1991; MS, 1993, University of Washington; PhD, 1997, University of Washington

Ecker, Allan Christopher 2003; MSEE, 2005, University of Washington

Lam, Leo Li 1998; MSEE, 2000, University of Washington; PhD, 2014, University of Washington

Peckol, James Kenneth 1994; MS, 1975, University of Washington; PhD, 1985, University of Washington

Potter, William Wesley 1955, (Emeritus); MSEE, 1959, US Naval Postgraduate School

Human Centered Design and Engineering

Professors

Atman, Cynthia Jayne 1998; MS, 1983, Ohio State University; PhD, 1990, Carnegie Mellon University

Bereano, Philip Leon * 1975, (Emeritus); JD, 1965, Columbia University; MRP, 1971, Cornell University

Coney, Mary Bridget * 1976, (Emeritus); MA, 1963, University of Illinois; PhD, 1973, University of Washington

Farkas, David Kalman * 1983, (Emeritus); MA, 1969, University of Chicago; PhD, 1976, University of Minnesota

Haselkorn, Mark Paul * 1985; MA, 1973, University of Michigan; PhD, 1977, University of Michigan; MA, 1980, University of Michigan

Kolko, Beth Elise 2000; MA, 1991, University of Texas (Austin); PhD, 1994, University of Texas (Austin)

Ramey, Judith Ann * 1983, (Emeritus); MA, 1971, University of Texas (unspecified); PhD, 1983, University of Texas (unspecified)

Spyridakis, Jan Huddleston * 1977; MAT, 1972, University of Washington; PhD, 1986, University of Washington

Tsutsui, Michio * 1990; MA, 1980, University of Illinois; PhD, 1984, University of Illinois

Turns, Jennifer Anne 1999; MS, 1990, University of Virginia; PhD, 1999, Georgia Institute of Technology

Zachry, Mark R. 2006; MA, 1992, Arizona State University; PhD, 1998, Iowa State University

Associate Professors

Aragon, Cecilia 2010; MS, 1987, University of California (Berkeley); PhD, 2004, University of California (Berkeley)

Kientz, Julie A. 2008; PhD, 2008, Georgia Institute of Technology

Lee, Charlotte P. 2008; MA, 1997, San Jose State University; PhD, 2004, University of California (Los Angeles)

McDonald, David Wright 2002; MS, 1992, California State University, Hayward; MS, 1995, University of California (Irvine); PhD, 2000, University of California (Irvine)

Assistant Professors

Boyd, Suzanne Maria 1999, (Affiliate); MA, 2000, University of Washington

Hsieh, Gary 2013; PhD, 2010, Carnegie Mellon University
Munson, Sean Arthur 2010; BS, 2006, Franklin W. Olin College of Engineering

Rosner, Daniela 2013; MS, 2006, University of Chicago; PhD, 2008, University of California (Berkeley)

Starbird, Catharine 2012; BS, 1999, Stanford University

Sullivan, Kent Daniel 2007, (Affiliate); BA, 1989, Purdue University

Senior Lecturers

Davidson, Andrew Harley 2006; MSE, 1982, University of Pennsylvania

Sanocki, Elizabeth 1988; PhD, 1994, University of Washington

Wagner, Linda 2013; MS, 1998, Illinois Institute of Technology

Lecturers

Barksdale, Jeremy Totton 2014; MS, 2002, North Carolina A & T State University; MPA, 2012, Virginia Polytechnic Institute and State University; PhD, 2013, Virginia Polytechnic Institute and State University

Jenkins, Mary-Colleen 2010; MA, 1992, Ohio University

Loucks-Jaret, Christine M. 1997; MS, 1999, University of Washington

Mobrand, Kathryn A. 2005; MS, 2003, University of Washington

Spyridakis, Irini K. 2007; MS, 2010, University of Washington

Industrial Engineering

Professors

Boyle, Linda T. 1992; MS, 1994, University of Washington; PhD, 1998, University of Washington

Chaovalitwongse, Wanpracha Art 2010; MS, 2000, University of Florida; PhD, 2003, University of Florida
Furness, Thomas Adrian * 1989; PhD, 1981, University of Southampton (UK)

Kapur, Kailash Chander * 1992, (Emeritus); MTech, 1965, Indian Institute of Technology (India); MS, 1967, University of California (Berkeley); PhD, 1969, University of California (Berkeley)

Lee, John Davidson 2011, (Affiliate); MS, 1989, University of Illinois; PhD, 1992, University of Illinois

Liu, Chen-Ching 1983, (Affiliate); MSEE, 1978, National Taiwan University; PhD, 1983, University of California (Berkeley)

Storch, Richard Lee * 1975, (Emeritus); MS, 1968, Massachusetts Institute of Technology; PhD, 1978, University of Washington

Zabinsky, Zelda Barbara * 1985; MS, 1984, University of Michigan; PhD, 1985, University of Michigan

Associate Professors

Beamon, Benita Michele * 1999; MS, 1990, Cornell University; PhD, 1994, Georgia Institute of Technology

Brayman, Vladimir M. 1993, (Affiliate); MS, 1996, University of Washington; PhD, 2003, University of Washington

Drui, Albert B. * 1959, (Emeritus); MS, 1957, Washington University

Ghate, Archis Vijay 2006; MS, 2003, Stanford University; PhD, 2006, University of Michigan

Mastrangelo, Christina M. 2002; MS, 1990, Arizona State University; PhD, 1993, Arizona State University

Zak, Yevgeniy J. Eugene 1999, (Affiliate); MS, 1973, Moscow Aviation Institute, Russia; MS, 1976, Moscow State University (Russia); PhD, 1981, Moscow Inst of Physics & Tech (Russia)

Assistant Professors

Huang, Shuai 2014; PhD, 2012, Arizona State University

Liu, Shan 2013; SM, 2008, Massachusetts Institute of Technology; PhD, 2013, Stanford University

Montgomery, Stephen W. 2009, (Affiliate); MSME, 1996, Purdue University; PhD, 2000, Purdue University; MBA, 2008, University of Washington

Yen, Joyce Wen-Hwei 2000, (Affiliate); MS, 1997, University of Michigan, Ann Arbor; PhD, 2000, University of Michigan, Ann Arbor

Materials Science and Engineering

Professors

Bordia, Rajendra Kumar * 1991, (Emeritus); MS, 1981, Cornell University; PhD, 1986, Cornell University

Cao, Guozhong 1996; MS, 1985, Shanghai Institute of Ceramics, China; PhD, 1991, Eindhoven University of Technology(Neth)

Chambers, Scott Alexander 1992, (Affiliate); PhD, 1977, Oregon State University

Das, Khandelwal Bhagwan 1978, (Affiliate); MSc, 1956, Osmania University (India); MS, 1961, Purdue University; MSME, 1963, University of Illinois; PhD, 1971, University of Washington

De Yoreo, James 2013, (Affiliate); PhD, 1985, Cornell University

Dogan, Fatih * 1990, (Affiliate); MS, 1984, Technische Universität (Germany); PhD, 1989, Technische Universität (Germany)

Fisher, Robert M. * 1987, (Emeritus); PhD, 1962, Cambridge University (UK)

Henager, Charles Henry 1988, (Affiliate); PhD, 1983, University of Washington

Hinds, Bruce Jackson III 2014; MS, 1992, Northwestern University; PhD, 1996, Northwestern University

Inoue, Kanryu * 1993, (Affiliate); MS, 1971, Osaka University (Japan); PhD, 1977, Osaka University (Japan)

Jen, Alex Kwan-Yue 1999; PhD, 1984, University of Pennsylvania

Koike, Yasuhiro 2009, (Affiliate); MSE, 1979, Keio University (Japan); PhD, 1982, Keio University (Japan)

Krishnan, Kannan M. 2001; MS, 1980, State Univ of New York (Stony Brook); PhD, 1984, University of California (Berkeley)

Ohuchi, Fumio * 1992; MS, 1974, Sophia University (Japan); PhD, 1981, University of Florida

Polonis, Douglas H. * 1955, (Emeritus); MA, 1953, University of Toronto (Canada); PhD, 1955, University of British Columbia (Canada)

Rao, Yalamanchili Krishna * 1976, (Emeritus); PhD, 1965, University of Pennsylvania

Sarikaya, Mehmet 1984; MS, 1979, University of California (Berkeley); PhD, 1982, University of California (Berkeley)

Scott, William Doane * 1965, (Emeritus); MS, 1959, University of California (Berkeley); PhD, 1961, University of California (Berkeley)

Stoebe, Thomas Gaines * 1966, (Emeritus); MS, 1963, Stanford University; PhD, 1965, Stanford University

Zhang, Miqin 1999; MAS, 1994, University of Victoria (Canada); PhD, 1999, University of California (Berkeley)

Associate Professors

Arola, Dwayne Dale 1991; MS, 1991, University of Washington; PhD, 1996, University of Washington

Brush, Lucien Noyes * 1990; ME, 1984, Carnegie Mellon University; PhD, 1988, Carnegie Mellon University

Luscombe, Christine K. 2006; MSc, 2000, University of Cambridge (UK); MA, 2003, University of Cambridge (UK); PhD, 2005, University of Cambridge (UK)

Miller, Alan Dale * 1957, (Emeritus); PhD, 1967, University of Washington

Roland, Marco 2008; MS, 2000, University of London, UK; PhD, 2005, Stanford University

Stang, Robert George * 1973, (Emeritus); MS, 1965, University of California (Los Angeles); PhD, 1972, Stanford University

Yang, Jihui 2011; MS, 1991, University of Oregon; MS, 1993, Wayne State University; PhD, 2000, University of Michigan, Ann Arbor

Assistant Professors

Chikow, Toyohiro 1994, (Affiliate); MS, 1985, Waseda University (Japan); PhD, 1989, Waseda University (Japan)

Pauzauskie, Peter J. 2010; PhD, 2007, University of California (Berkeley)

Mechanical Engineering

Professors

Balise, Peter Louis Jr. * 1950, (Emeritus); MS, 1950, Massachusetts Institute of Technology

Chalupnik, James Dvorak * 1964, (Emeritus); MS, 1960, University of Texas (unspecified); PhD, 1964, University of Texas (Austin)

Cooper, Joyce Smith 1998; MS, 1992, Duke University; PhD, 1996, Duke University

Corlett, Richard Collister * 1964, (Emeritus); MME, 1958, Rensselaer Polytechnic Institute; PhD, 1963, Harvard University

Day, Emmett Elbert * 1947, (Emeritus); MS, 1947, Massachusetts Institute of Technology

Depew, Creighton Arthur * 1960, (Emeritus); MS, 1957, University of California (Berkeley); PhD, 1960, University of California (Berkeley)

Devasia, Santosh 2000; MS, 1990, University of California (Santa Barbara); PhD, 1993, University of California (Santa Barbara)

Dorri, Bijan 2014, (Affiliate); MS, 1978, University of Washington; PhD, 1983, University of Washington

Emery, Ashley Francis * 1961; MS, 1958, University of California (Berkeley); PhD, 1961, University of California (Berkeley)

Fabien, Brian Cyriacus * 1993; MSME, 1983, Columbia University; MPhil, 1990, Columbia University; PhD, 1990, Columbia University

Firey, Joseph Carl 1954, (Emeritus); MSME, 1941, University of Wisconsin

Galle, Kurt Robert * 1960, (Emeritus); MSME, 1949, Purdue University; PhD, 1951, Purdue University

Ganter, Mark Anthony * 1986; MS, 1981, University of Wisconsin; PhD, 1985, University of Wisconsin (Madison)

Gao, Dayong 2004; PhD, 1991, Concordia College

Garbini, Joseph L. 1979; MS, 1973, University of Washington; PhD, 1977, University of Washington

Gessner, Frederick Benedict * 1967, (Emeritus); MSME, 1960, Purdue University; PhD, 1964, Purdue University

Hashish, Mohamed Ahmed 2005, (Affiliate); PhD, 1977, Concordia University

Homsy, George 2013, (Affiliate); MS, 1967, University of Illinois; PhD, 1969, University of Illinois

Jorgensen, Jens Erik * 1968, (Emeritus); SM, 1963, Massachusetts Institute of Technology; DSc, 1969, Massachusetts Institute of Technology

Kobayashi, Albert Satoshi * 1958, (Emeritus); MS, 1952, University of Washington; PhD, 1958, Illinois Institute of Technology

Kramlich, John Charles * 1991; MS, 1975, Washington State University; PhD, 1980, Washington State University

Kumar, Vipin 1988; MS, 1972, University of Rhode Island; MBA, 1974, University of Rhode Island; PhD, 1988, Massachusetts Institute of Technology

Li, Jiangyu 2006; MS, 1996, University of Colorado (Boulder); MS, 1998, University of Colorado (Boulder); PhD, 1998, University of Colorado (Boulder)

Malte, Philip Charles * 1979; MSE, 1966, University of Michigan; PhD, 1971, University of Michigan

Mamidala, Ramulu * 1978; MTech, 1976, Indian Institute of Technology (India); PhD, 1982, University of Washington

McCormick, Norman J. * 1966, (Emeritus); MS, 1961, University of Illinois; PhD, 1965, University of Michigan

Pratt, David T. * 1981, (Emeritus); MS, 1962, University of California (Berkeley); PhD, 1968, University of California (Berkeley)

Reinhall, Per Gustaf * 1982; MS, 1978, California Institute of Technology; PhD, 1982, California Institute of Technology

Riley, James Joseph * 1983; PhD, 1971, Johns Hopkins University

Saito, Makoto 2012, (Affiliate); MS, 1973, Osaka University (Japan); PhD, 1998, Nagoya University (Japan)

Sanders, Daniel Gordon 2007, (Affiliate); MS, 2002, Central Washington University; PhD, 2008, University of Washington

Shen, I-Yeu * 1993; MS, 1986, National Taiwan University; PhD, 1991, University of California (Berkeley)

Sidles, John Arthur 1984, (Affiliate); PhD, 1982, University of Washington

Storti, Duane William * 1983; MS, 1981, Cornell University; PhD, 1983, Cornell University

Taggart, Raymond * 1959, (Emeritus); PhD, 1956, Queen's University (UK)

Taya, Minoru 1986; MS, 1973, Northwestern University; PhD, 1977, Northwestern University

Tuttle, Mark E. 1985; MS, 1978, Michigan Technological University; PhD, 1984, Virginia Polytechnic Institute and State University

Wilson, William Robert Dunwoody * 1999, (Emeritus); PhD, 1967, Queen's University of Belfast (Ireland)

Zhao, Gang 2014, (Affiliate); ME, 2004, University of Science and Technology of China

Associate Professors

Adee, Bruce Harvey * 1970, (Emeritus); MS, 1968, University of California (Berkeley); PhD, 1972, University of California (Berkeley)

Aliseda, Alberto 2006; MS, 1998, Universidad Politecnica; MSc, 2000, University of California (San Diego); PhD, 2004, University of California (San Diego)

Berg, Martin Conrad * 1986; MSME, 1978, University of Washington; PhD, 1986, Stanford University

Bodoia, John Rodger * 1964, (Emeritus); MS, 1957, Carnegie Institute of Technology; PhD, 1959, Carnegie Institute of Technology

Chalk, William Spencer 1957, (Emeritus); MSME, 1961, University of Washington

Chung, Jaehyun 2005; MS, 1997, Sungkyunkwan University (Korea); PhD, 2004, Northwestern University

Einstein, Daniel R. 1996, (Affiliate); PhD, 2002, University of Washington

Fried, Amy Shen 2008, (Affiliate); MS, 1994, Tongji Medical University (China); MS, 1996, University of Illinois; PhD, 2000, University of Illinois (Urbana)

Holt, Richard Edwin * 1947, (Emeritus); MS, 1957, University of Washington

Kielling, William Clayton * 1956, (Emeritus); MSME, 1959, University of Washington

Klute, Glenn Kenneth 1993, (Affiliate); MS, 1990, Pennsylvania State University; PhD, 1999, University of Washington

Ledoux, William Raymond li 1999, (Affiliate); MS, 1993, University of Pennsylvania; PhD, 1999, University of Pennsylvania

Mescher, Ann Marie 1996; MS, 1992, Ohio State University; PhD, 1995, Ohio State University

Ochoa, Jorge Alexander 2006, (Affiliate); MSME, 1987, Purdue University; PhD, 1991, Purdue University

Posner, Jonathan D 2011; MS, 1997, von Karman Institute for Fluid Dynamics; MS, 1998, University of California (Irvine); PhD, 2001, University of California (Irvine)

Scheibe, Robert Reynolds 1991, (Affiliate); MSME, 1982, University of Wisconsin; PhD, 1996, University of Washington

Shuman, Teodora Rutar 1992, (Affiliate); MSME, 1994, University of Washington; PhD, 2000, University of Washington

Sniadecki, Nathan John 2007; MS, 2003, University of Maryland; PhD, 2003, University of Maryland

Wang, Junlan 2008; MS, 1997, Univ. of Science And Technology (China); PhD, 2002, University of Illinois

Xu, Chunye 2000, (Affiliate); MSc, 1990, Northwest Institute of Textile Science and Technology, China; PhD, 1998, Nara Women's University (Japan)

Assistant Professors

Alsem, Daan Hein 2010, (Affiliate); MS, 2002, University of Groningen (Netherlands); PhD, 2006, University of California (Berkeley)

Aubin, Patrick Mark 2004, (Affiliate); MS, 2006, University of Washington; PhD, 2010, University of Washington

Boechler, Nicholas Sebastian 2012; MS, 2008, California Institute of Technology; PhD, 2011, California Institute of Technology

Brunton, Steven Lee 2012; PhD, 2012, Princeton University

Iaquinto, Joseph M 2012, (Affiliate); MS, 2006, Virginia Commonwealth University; PhD, 2010, Virginia Commonwealth University

Ihn, Jeong-Beom 2007, (Affiliate); MS, 1998, Stanford University; PhD, 2003, Stanford University

Johnston, Scott R. 2000, (Affiliate); MS, 1995, Kansas State University; MS, 1998, University of Missouri; PhD, 2000, University of Washington

Kintner-Meyer, Michael 1989, (Affiliate); MSME, 1985, Rheinisch Westfaelische Technische Hochschule, Germany; PhD, 1993, University of Washington

Lee, Kyong-Hoon 2010, (Affiliate); MS, 1994, Seoul National University (Korea); PhD, 1999, University of Tokyo (Japan)

Liu, Jonathan Teng-Chieh 2014; MS, 2000, Stanford University; PhD, 2005, Stanford University

Mason, Gregory Steven 1988, (Affiliate); MSME, 1984, Georgia Institute of Technology; PhD, 1992, University of Washington

Nelson, Leonard Y. 2010, (Affiliate); PhD, 1969, University of California (Berkeley)

Neumann, Thomas 1996, (Affiliate); MD, 1994, University of Hale

Picone, Rico Allan Russell 2008, (Affiliate); MSc, 2010, University of Washington; PhD, 2014, University of Washington

Polagye, Brian L. 2002; MSME, 2005, University of Washington; PhD, 2009, University of Washington

Rombokas, Eric Scott 2005, (Affiliate); MS, 2001, Rice University; PhD, 2012, University of Washington

Steele, Katherine Muterspaugh 2012; MS, 2009, Stanford University

Steinhauer, David Ethan 1992, (Affiliate); MS, 1998, University of Maryland; PhD, 2000, University of Maryland

Tourovskaja, Anna V. 1997, (Affiliate); MS, 1994, Ural State University (Russia); PhD, 2006, University of Washington

Weller, John E. 1989, (Affiliate); MSME, 1991, University of Washington; PhD, 1996, University of Washington

College of the Environment

Aquatic and Fishery Sciences

Professors

Anderson, James J. * 1969, (Research); PhD, 1977, University of Washington

Armstrong, David A. * 1978; MS, 1974, Oregon State University; PhD, 1978, University of California (Davis)

Bailey, Kevin McLean 1981, (Affiliate); MA, 1977, University of Washington; PhD, 1981, University of Washington

Beauchamp, David Anthony 1987; MS, 1982, University of Washington; PhD, 1987, University of Washington

Bisson, Peter Andre 1988, (Affiliate); MS, 1969, Oregon State University; PhD, 1975, Oregon State University

Bottom, Daniel Lee 2003, (Affiliate); MS, 1975, University of Delaware

Chew, Kenneth Kendall * 1955, (Emeritus); MS, 1958, University of Washington; PhD, 1962, University of Washington

Clarke, Elizabeth 2006, (Affiliate); MS, 1979, University of Alaska; PhD, 1984, Scripps Oceanographic Institution

Conquest, Loveday Loyce * 1976, (Emeritus); MS, 1972, Stanford University; PhD, 1975, University of Washington

Davis, Jonathan Putnam 1984, (Affiliate); MS, 1982, Yale University; PhD, 1994, University of Washington

Elston, Ralph Arthur 1985, (Affiliate); MS, 1975, University of California (Davis); PhD, 1980, Cornell University

Essington, Timothy Edwin 2003; MS, 1995, University of Minnesota; PhD, 1999, University of Wisconsin (Madison)

Francis, Robert Colgate * 1980, (Emeritus); MS, 1966, University of California (Santa Barbara); PhD, 1970, University of Washington

Friedman, Carolyn Suzanne 2001; PhD, 1990, University of California (Davis)

Gallucci, Vincent Frank * 1972; MSc, 1966, State University of New York (Buffalo); PhD, 1971, North Carolina State University

Gunderson, Donald R. * 1978, (Emeritus); MS, 1966, Montana State University; PhD, 1975, University of Washington

Harvell, Catherine Drew 1988, (Affiliate); PhD, 1985, University of Washington

Hilborn, Ray William * 1987; PhD, 1974, University of British Columbia (Canada)

Holland, Daniel 2013, (Affiliate); MS, 1993, University of Illinois; PhD, 1998, University of Rhode Island

Hollowed, Anne Babcock 1994, (Affiliate); MS, 1982, Old Dominion University; PhD, 1990, University of Washington

Horne, John Kenneth 1999; MSc, 1988, Dalhousie University (Canada); PhD, 1995, Memorial University of Newfoundland

Ianelli, James N. 1988, (Affiliate); PhD, 1993, University of Washington

Karp, William A. 1995, (Affiliate); MS, 1975, University of Washington; PhD, 1982, University of Washington

Karr, James Richard * 1991, (Emeritus); MSc, 1967, University of Illinois; PhD, 1970, University of Illinois

Kocan, Richard Michael * 1976, (Emeritus); MS, 1965, Michigan State University; PhD, 1967, Michigan State University

Leaman, Bruce Michael 1998, (Affiliate); MS, 1976, University of British Columbia (Canada); PhD, 1988, University of British Columbia (Canada)

Liston, John * 1957, (Emeritus); PhD, 1955, University of Aberdeen (UK)

Livingston, Patricia Ann 1989, (Affiliate); MS, 1980, University of Washington; MPA, 1988, University of Washington

Mathews, Stephen Barstow * 1963, (Emeritus); MA, 1962, University of California (Berkeley); PhD, 1967, University of Washington

Methot, Richard Donald 1992, (Affiliate); PhD, 1981, University of California (San Diego)

Miller, Bruce Stuart * 1971, (Emeritus); MS, 1965, University of Washington; PhD, 1969, University of Washington

Naiman, Robert Joseph 1988, (Emeritus); MA, 1971, University of California (Los Angeles); PhD, 1974, Arizona State University

Orensanz, Jose Maria 1986, (Affiliate); PhD, 1988, University of Washington

Orr, James Wilder 1987, (Affiliate); MS, 1987, Auburn University; PhD, 1995, University of Washington

Parrish, Julia Kathryn 1990; PhD, 1988, Duke University

Piatt, John F. 2005, (Affiliate); PhD, 1987, Memorial University of Newfoundland

Pietsch, Theodore W. * 1978; MS, 1969, University of Southern California; PhD, 1973, University of Southern California

Plisetskaya, Erika Michael * 1980, (Emeritus); PhD, 1958, Academy of Science (Ussr); DSc, 1973, Academy of Science (Ussr)

Punt, Andre Eric * 1992; MSc, 1988, University of Cape Town (South Africa); PhD, 1991, University of Capetown (South Africa)

Quinn, Thomas Peter * 1986; MS, 1978, University of Washington; PhD, 1981, University of Washington

Ruckelshaus, Mary 1985, (Affiliate); MSc, 1988, University of Washington; PhD, 1994, University of Washington

Schindler, Daniel Edward 1997; MS, 1992, University of Wisconsin; PhD, 1995, University of Wisconsin (Madison)

Simenstad, Charles Arthur * 1969, (Research); MS, 1971, University of Washington

Skalski, John Raymond * 1987; MS, 1976, Oregon State University; MS, 1978, Cornell University; PhD, 1985, Cornell University

Smith, Anthony D.M. 2013, (Affiliate); PhD, 1979, University of British Columbia (Canada)

Smith, Lynwood Stephen * 1957, (Emeritus); MS, 1955, University of Washington; PhD, 1962, University of Washington

Swanson, Penny 1987, (Affiliate); MS, 1980, University of Wisconsin; PhD, 1986, University of Washington

Swartzman, Gordon Leni * 1973, (Emeritus); MSEE, 1965, University of Michigan; PhD, 1969, University of Michigan

Taub, Frieda Blou * 1959, (Emeritus); MS, 1957, Rutgers University; PhD, 1959, Rutgers University

Utter, Fred Madison 1971, (Affiliate); MS, 1964, University of Washington; PhD, 1969, University of California (Davis)

Wade, Paul Robert 2000, (Affiliate); MS, 1986, Montana State University; PhD, 1994, University of California (San Diego)

Waples, Robin Snowden 1989, (Affiliate); PhD, 1986, Scripps Oceanographic Institution

Williams, John Gordon 1989, (Affiliate); MS, 1975, University of Washington; PhD, 1978, University of Washington

Winton, James Robert 1988, (Affiliate); PhD, 1981, Oregon State University

Wissmar, Robert Charles * 1972, (Emeritus); MS, 1968, University of Idaho; PhD, 1972, University of Idaho

Young, Graham 2004; PhD, 1980, University of Sheffield (UK)

Associate Professors

Anderson, Christopher M. 2012; PhD, 2001, California Institute of Technology

Aydin, Kerim Y. 1995, (Affiliate); PhD, 2000, University of Washington

Bengtson, John Luther 1996, (Affiliate); MS, 1980, University of Minnesota; PhD, 1981, University of Minnesota

Bentzen, Paul * 1993, (Affiliate); MSc, 1982, University of British Columbia (Canada); PhD, 1989, McGill University (Canada)

Brodeur, Richard Davide 1986, (Affiliate); MS, 1983, Oregon State University; PhD, 1990, University of Washington

Canino, Michael Francis 1986, (Affiliate); MA, 1981, College of William And Mary; PhD, 2003, University of Washington

Dorn, Martin W. 2009, (Affiliate); MSc, 1989, University of Washington; PhD, 1998, University of Washington

Elliott, Diane Godsey 1986, (Affiliate); MS, 1975, University of Washington; PhD, 1985, University of Washington

Grue, Christian Ebbesen * 1989; MS, 1977, Northern Arizona University; PhD, 1977, Texas A&M University

Hard, Jeffrey J. 2008, (Affiliate); MS, 1984, University of Alaska; PhD, 1991, University of Oregon

Hare, Steven 1990, (Affiliate); MS, 1989, University of Washington; PhD, 1996, University of Washington

Hauser, Lorenz 2002; MSc, 1989, University of Vienna, Austria; MSc, 1990, University of Wales (U.K.); PhD, 1996, University of Wales (U.K.)

Helser, Thomas Earl 2012, (Affiliate); MS, 1987, Auburn University; PhD, 1992, Louisiana State University

Hershberger, Paul Keith 1993, (Affiliate); MS, 1995, University of Washington; PhD, 1999, University of Washington

Herwig, Russell Paul * 1983, (Emeritus); MA, 1978, College of William And Mary; PhD, 1989, University of Washington

Holmes, Elizabeth Eli 1989, (Affiliate); PhD, 1995, University of Washington

Matarese Kiernan, Ann M. 1996, (Affiliate); PhD, 1990, University of Washington

McClure, Michelle Marie 2014, (Affiliate); PhD, 1998, Cornell University

Melvin, Edward F. 1990, (Affiliate); MS, 1980, Humboldt State University

Naish, Kerry-Ann 2000; MSc, 1990, Rhodes University, South Africa; PhD, 1993, University of Wales (U.K.)

Olden, Julian David 2006; MS, 2000, University of Toronto (Canada); PhD, 2004, Colorado State University

Pauley, Gilbert Buckhannon 1974, (Emeritus); MS, 1965, University of Washington; PhD, 1971, University of California (Irvine)

Roberts, Steven Beyer 2006; PhD, 2002, University of Notre Dame

Roni, Philip 1990, (Affiliate); MS, 1992, University of Washington; PhD, 2000, University of Washington

Stevenson, Duane 1996, (Affiliate); MS, 1996, University of Charleston; PhD, 2002, University of Washington

Thom, Ronald Mark 1982, (Affiliate); MS, 1976, California State University, Long Beach; PhD, 1978, University of Washington

Trainer, Vera Lynn 1991, (Affiliate); PhD, 1990, University of Miami (Florida)

Vanblaricom, Glenn Richard * 1993; PhD, 1978, University of California (San Diego)

Warheit, Kenneth Ira 1992, (Affiliate); PhD, 1990, University of California (Berkeley)

Winans, Gary Albert 1987, (Affiliate); MS, 1975, Florida Institute of Technology; PhD, 1980, University of Hawaii

Zabel, Richard 1988, (Affiliate); MS, 1988, University of Michigan, Ann Arbor; PhD, 1994, University of Washington

Assistant Professors

Adams, Dawn Page Noren 2009, (Affiliate); MS, 1997, University of California (Santa Cruz); MA, 1999, University of California (Santa Cruz); PhD, 2002, University of California (Santa Cruz)

Branch, Trevor 2000; MSc, 1998, University of Capetown (South Africa); PhD, 2004, University of Washington
 Buckley, Raymond Milo 1975, (Affiliate); MS, 1968, University of Washington; PhD, 1997, University of Washington
 Clark, William G. 1984, (Affiliate); PhD, 1975, University of Washington

Duffy-Anderson, Janet T. 1999, (Affiliate); PhD, 1996, University of Delaware

Hanson, Morris Bradley 2009, (Affiliate); MS, 1988, University of Washington; PhD, 2001, University of Washington

Hendrix, Albert Noble 1994, (Affiliate); MS, 2000, University of Washington; PhD, 2003, University of Washington
 Holtgrieve, Gordon William 2003; MS, 2001, Stanford University; PhD, 2009, University of Washington

Horner-Devine, Marie Claire 2004, (Affiliate); PhD, 2004, Stanford University

Pess, George Robert 2001, (Affiliate); MFS, 1992, Yale University; PhD, 2009, University of Washington

Scheuerell, Mark D. 1997, (Affiliate); MS, 1996, Cornell University; PhD, 2002, University of Washington

Steel, Elizabeth Ashley 1990, (Affiliate); MS, 1993, University of Washington; MS, 1996, University of Washington; PhD, 1999, University of Washington

Lecturers

Jensen, Gregory Carlton 1984; PhD, 1990, University of Washington

Lubetkin, Susan Crane 1994; MS, 1997, University of Washington; PhD, 2008, University of Washington

Atmospheric Sciences

Professors

Ackerman, Thomas Peter 2002; MS, 1971, University of Washington; PhD, 1976, University of Washington

Battisti, David Stephen * 1983; MS, 1981, University of Washington; PhD, 1988, University of Washington

Bitz, Cecilia Marie 1988; MS, 1990, University of Washington; PhD, 1997, University of Washington

Bretherton, Christopher Stephen * 1984; PhD, 1984, Massachusetts Institute of Technology

Brown, Robert Alan * 1969, (Emeritus); MS, 1962, University of California (Berkeley); PhD, 1969, University of Washington

Businger, Joost Alois * 1958, (Emeritus); PhD, 1954, University of Utrecht (Netherlands)

Charlson, Robert J. * 1962, (Emeritus); MS, 1959, Stanford University; PhD, 1964, University of Washington

Chen, Shuyi S. * 1991, (Affiliate); MS, 1985, University of Oklahoma; PhD, 1990, Pennsylvania State University

Covert, David Spencer * 1974, (Emeritus); MS, 1971, University of Washington; PhD, 1974, University of Washington
 Durran, Dale Richard * 1987; MS, 1975, University of California (Berkeley); PhD, 1981, Massachusetts Institute of Technology

Fu, Qiang 2000; MS, 1985, Peking University (China); PhD, 1991, University of Utah

Grenfell, Thomas C. * 1968, (Emeritus); MS, 1968, University of Chicago; PhD, 1972, University of Washington

Hakim, Gregory John * 1999; MS, 1993, University of Albany; PhD, 1997, University of Albany

Hartmann, Dennis Lee * 1977; MA, 1973, Princeton University; PhD, 1975, Princeton University

Hegg, Dean Arnold * 1975, (Emeritus); MS, 1976, University of Washington; PhD, 1979, University of Washington

Houze, Robert A. * 1972; MS, 1969, Massachusetts Institute of Technology; PhD, 1972, Massachusetts Institute of Technology

Jaegle, Lyatt * 2000; MS, 1992, California Institute of Technology; PhD, 1996, California Institute of Technology
 Mass, Clifford Fred * 1981; PhD, 1978, University of Washington

Overland, James Edward * 1983, (Affiliate); MS, 1971, University of Washington; PhD, 1973, New York University
 Radke, Lawrence F. * 1964, (Affiliate); MS, 1967, University of Washington

Rasch, Philip John 2008, (Affiliate); MS, 1979, Florida State University; PhD, 1984, Florida State University

Sarachik, Edward Stuart * 1984, (Emeritus); MS, 1963, Brandeis University; PhD, 1966, Brandeis University
 Tillman, James Eugene 1971, (Emeritus); MS, 1961, Massachusetts Institute of Technology

Wallace, John Michael * 1966, (Emeritus); PhD, 1966, Massachusetts Institute of Technology

Warren, Stephen George * 1981, (Emeritus); MA, 1969, Harvard University; PhD, 1973, Harvard University

Wood, Robert 2001; PhD, 1997, University of Manchester (UK)

Associate Professors

Bates, Timothy Shawn * 1990, (Affiliate); MS, 1978, University of Washington; PhD, 1988, University of Washington

Bond, Nicholas Anderson 1980, (Affiliate); PhD, 1986, University of Washington

Colman, Bradley Ray 1999, (Affiliate); ScD, 1984, Massachusetts Institute of Technology

Eckel, Frederick Anthony 2010, (Affiliate); MS, 1998, Air Force Institute of Technology; PhD, 2003, University of Washington

Frierson, Dargan Michael Wright 2007; MS, 2002, Princeton University; PhD, 2005, Princeton University

Harrison, Halstead * 1971, (Emeritus); PhD, 1960, Stanford University

Light, Bonnie 1990, (Affiliate); MS, 1990, University of Maryland; PhD, 2000, University of Washington

Mote, Philip Whitfield 1989, (Affiliate); PhD, 1994, University of Washington

Stoelinga, Mark Theodore 1987, (Affiliate); PhD, 1993, University of Washington

Suess, Becky Alexander 2004; PhD, 2002, University of California (San Diego)

Thornton, Joel A. 2004; PhD, 2002, University of California (Berkeley)

Yuter, Sandra Ellyn 1990, (Affiliate); PhD, 1996, University of Washington

Assistant Professors

Cziczo, Daniel James 2008, (Affiliate); MS, 1997, University of Chicago; PhD, 1999, University of Chicago

Kim, Daehyun 2014; PhD, 2010, Seoul National University (Korea)

Swann, Abigail 2012; MA, 2005, Columbia University; PhD, 2010, University of California (Berkeley)

Senior Lecturer

McMurdie, Lynn Alison 1988; MS, 1983, University of Washington; PhD, 1989, University of Washington

Lecturer

Wilton, Darren 2000; MS, 2005, University of Washington; PhD, 2011, University of Washington

Earth and Space Sciences

Professors

Adams, John Bright * 1961, (Emeritus); MS, 1958, University of Washington; PhD, 1961, University of Washington

Anderson, Patricia Marie 1982, (Emeritus); MA, 1976, Brown University; PhD, 1982, Brown University

Atwater, Brian Franklin * 1986, (Affiliate); MS, 1974, Stanford University; PhD, 1980, University of Delaware

Baker, Marcia Bourgin * 1971, (Emeritus); MS, 1960, Stanford University; PhD, 1971, University of Washington

Bergantz, George Walter * 1988; MS, 1985, Georgia Institute of Technology; PhD, 1988, Johns Hopkins University

Bernard, Eddie Nolan 2005, (Affiliate); MS, 1970, Texas A&M University; PhD, 1976, Texas A&M University

Booker, John Ratcliffe 1971, (Emeritus); MS, 1965, University of California (San Diego); PhD, 1968, University of California (San Diego)

Booth, Derek Blake 1980, (Affiliate); MS, 1980, Stanford University; PhD, 1984, University of Washington

Bourgeois, Joanne * 1980; PhD, 1980, University of Wisconsin (Madison)

Brown, John Michael 1984; MS, 1978, University of Washington; PhD, 1980, University of Minnesota

Buick, Roger 2001; PhD, 1986, University of West Australia

Catling, David Charles 2001; DPhil, 1994, Oxford University (UK)

Cheney, Eric Swensen * 1964, (Emeritus); PhD, 1964, Yale University

Cowan, Darrel Sidney * 1974; PhD, 1972, Stanford University

Creager, Kenneth Clark 1986; PhD, 1984, University of California (San Diego)

Crosson, Robert S. 1966, (Emeritus); MS, 1963, University of Utah; PhD, 1966, Stanford University

Evans, Bernard William * 1969, (Emeritus); PhD, 1959, Oxford University (UK)

Frankel, Arthur 2009, (Affiliate); MA, 1978, Columbia University; PhD, 1982, Columbia University

Ghiorso, Mark S. * 1980, (Affiliate); MA, 1978, University of California (Berkeley); PhD, 1980, University of California (Berkeley)

Ghose, Subrata 1972, (Emeritus); MSc, 1955, University of Calcutta (India); MS, 1959, University of Chicago; PhD, 1959, University of Chicago

Gomberg, Joan 2006, (Affiliate); PhD, 1986, University of California (San Diego)

Gonzalez, Frank Ignacio 2005, (Affiliate); PhD, 1974, University of Hawaii

Greene, Mott Tuthill 1979, (Affiliate); MA, 1974, University of Washington; PhD, 1978, University of Washington

Hallet, Bernard * 1979; PhD, 1975, University of California (Los Angeles)

Holzworth, Robert Haviland II 1982; MA, 1974, University of California (Berkeley); PhD, 1977, University of California (Berkeley)

Houston, Heidi B. 2006; MS, 1980, University of Wisconsin (Madison); PhD, 1987, California Institute of Technology

Irving, Anthony John * 1979, (Affiliate); PhD, 1972, Australian National University

Iverson, Richard Matthew * 1990, (Affiliate); MS, 1980, Stanford University; MS, 1981, Stanford University; PhD, 1984, Stanford University

Joughin, Ian R. 1990, (Affiliate); MS, 1990, University of Vermont; PhD, 1995, University of Washington

Maykut, Gary Allen * 1969, (Emeritus); PhD, 1969, University of Washington

McCallum, Ian Stewart * 1970, (Emeritus); PhD, 1968, University of Chicago

McCord, Thomas B. 2002, (Affiliate); MS, 1966, California Institute of Technology; PhD, 1968, California Institute of Technology

Merrill, Ronald T. 1967, (Emeritus); MS, 1961, University of Michigan; PhD, 1967, University of California (Berkeley)

Montgomery, David Richard * 1991; PhD, 1991, University of California (Berkeley)

Nelson, Bruce Kert 1986; MS, 1980, University of Kansas; PhD, 1985, University of California (Los Angeles)

Parks, George Kung * 1971, (Emeritus); PhD, 1966, University of California (Berkeley)

Porter, Stephen Cummings 1962, (Emeritus); MS, 1958, Yale University; PhD, 1962, Yale University

Raymond, Charles Forest * 1969, (Emeritus); PhD, 1969, California Institute of Technology

Rensberger, John M. 1966, (Emeritus); MA, 1961, University of California (campus unspecified); PhD, 1967, University of California (campus unspecified)

Roe, Gerard Hugh 1999; PhD, 1999, Massachusetts Institute of Technology

Sack, Richard Olmsted 1993, (Affiliate); MA, 1975, Harvard University; PhD, 1979, Harvard University

Schreiber, B. Charlotte 2005, (Affiliate); MA, 1966, Rutgers University; PhD, 1974, Rensselaer Polytechnic Institute

Smith, Stewart W. * 1970, (Emeritus); MS, 1958, California Institute of Technology; PhD, 1961, California Institute of Technology

Steig, Eric J. 1989; MS, 1992, University of Washington; PhD, 1996, University of Washington

Stuiver, Minze * 1969, (Emeritus); PhD, 1958, University of Groningen (Netherlands)

Tudhope, Alexander William 2004, (Affiliate); PhD, 1983, Edinburgh University, Scotland

Vidale, John E. 2006; PhD, 1987, California Institute of Technology

Waddington, Edwin Donald 1984; MSc, 1973, University of Alberta, Canada; PhD, 1981, University of British Columbia (Canada)

Winglee, Robert Matthew 1991; PhD, 1984, University of Sydney (Australia)

Associate Professors

Aalto, Rolf Erhart 1992, (Affiliate); MS, 1995, University of Washington; PhD, 2002, University of Washington

Bachmann, Olivier 2001, (Affiliate); MSc, 1997, University of Geneva (Switzerland); PhD, 2000, University of Geneva (Switzerland)

Bust, Gary Steven 2012, (Affiliate); PhD, 1989, University of Texas (Austin)

Gorman-Lewis, Drew Johnston 2008; PhD, 2006, University of Notre Dame

Huntington, Katharine Watson 2008; PhD, 2006, Massachusetts Institute of Technology

Moran, Seth C. 1988, (Affiliate); MS, 1992, University of Washington; PhD, 1997, University of Washington

Nesbitt, Elizabeth A. * 1993; PhD, 1982, University of California (Berkeley)

Odom, Robert I. Jr. * 1990, (Research); MSE, 1973, University of Washington; PhD, 1980, University of Washington

Putkonen, Jaakko Kalervo 1994, (Affiliate); MS, 1990, University of Helsinki (Finland); PhD, 1997, University of Washington

Schmidt, David 2012; PhD, 2002, University of California (Berkeley)

Smith, Benjamin E. 2000, (Affiliate); MS, 1999, University of Wisconsin; PhD, 2005, University of Washington

Stone, John Owen Hardwick 1998; PhD, 1986, Cambridge University (UK)

Swanson, Brian Douglas 1982, (Emeritus); MS, 1985, University of Washington; PhD, 1992, University of Washington

Teng, Fang-Zhen 2012; PhD, 2005, University of Maryland

Thomas, Jeremy N. 2000, (Affiliate); MS, 2002, University of Washington; PhD, 2005, University of Washington

Vance, Joseph Alan * 1957, (Emeritus); PhD, 1957, University of Washington

Assistant Professors

Brand, Brittany D. 2008, (Affiliate); MS, 2004, Boise State University; PhD, 2008, Arizona State University

Brown, Thomas Alexander 1987, (Affiliate); MSc, 1985, Simon Fraser University, B.C. (Canada); PhD, 1994, University of Washington

Christianson, Knut Andrew 2014, (Affiliate); PhD, 2012, Pennsylvania State University

Cladouhos, Trenton Thomas 1995, (Affiliate); PhD, 1993, Cornell University

Crider, Juliet G. 1991; MS, 1993, University of Washington; PhD, 1998, Stanford University

Decosmo, Janice Mary 1984, (Affiliate); MS, 1984, University of Oregon; PhD, 1991, University of Washington

Duvall, Alison Renee 2012; MS, 2003, University of California (Santa Barbara); PhD, 2011, University of Michigan

Haugerud, Ralph Albert 2000, (Affiliate); MS, 1980, Western Washington University; PhD, 1985, University of Washington

Hawley, Robert L. 1993, (Affiliate); PhD, 2005, University of Washington

Matsuoka, Kenichi 2002, (Affiliate); MS, 1997, Hokkaido University (Japan); PhD, 2002, Hokkaido University (Japan)

Neumann, Thomas A. 1996, (Affiliate); PhD, 2003, University of Washington

Petrie, Gregg 2011, (Affiliate); MS, 1978, Western Washington University

Sherrod, Brian Louis 1995, (Affiliate); MS, 1989, University of Pittsburgh; PhD, 1998, University of Washington

Titov, Vasily V. 1997, (Affiliate); MS, 1984, Novosibirsk State University (Russia); PhD, 1997, University of Southern California

Ziemba, Timothy M. 1998, (Affiliate); MS, 1997, University of Washington; PhD, 2003, University of Washington

Senior Lecturers

Collins, Brian David 1998; MS, 1984, University of Washington; PhD, 2009, University of Washington

Troost, Kathy 1996; MS, 1999, University of Washington; PhD, 2012, University of Washington

Lecturers

Harrell, Michael Damian 1993; MS, 1994, University of Oregon; PhD, 2002, University of Washington

Swanson, Terry Woodrow 1988; MA, 1989, University of California (Davis); PhD, 1994, University of Washington

Walters, Steven 2006; MS, 1994, Purdue University; PhD, 2002, University of Maryland

Program on the Environment

Lecturers

Helmiere, Frederica R. 2010; MEnvSc, 2010, Yale University; MAR, 2010, Yale Divinity School

McDonald, Patrick Sean 1998; PhD, 2006, University of Washington

Environmental and Forest Sciences

Professors

Agee, James Kent * 1978, (Emeritus); MS, 1968, University of California (Berkeley); PhD, 1973, University of California (Berkeley)

Allan, George Graham 1966; PhD, 1956, University of Glasgow (UK); DSc, 1971, University of Strathclyde (UK)

Aubry, Keith Baker 1983, (Affiliate); MF, 1977, Yale University; PhD, 1983, University of Washington

Bare, Barry Bruce * 1969; MS, 1965, University of Minnesota; PhD, 1969, Purdue University

Bilby, Robert Eugene 1994, (Affiliate); PhD, 1979, Cornell University

Bolton, Susan Margot 1992; MS, 1979, University of North Dakota; MS, 1985, New Mexico State University; PhD, 1991, New Mexico State University

Bradley, Gordon Allan 1972; MLA, 1972, University of California (Berkeley); PhD, 1986, University of Michigan

Brubaker, Linda Beck 1973, (Emeritus); MS, 1967, University of Michigan; PhD, 1973, University of Michigan

Cole, Dale Warren * 1958, (Emeritus); MS, 1957, University of Wisconsin (Madison); PhD, 1963, University of Washington

DeLuca, Thomas Henry 2012; MS, 1987, Montana State University; PhD, 1993, Iowa State University

Eastin, Ivan Louis 1987; MSc, 1985, Michigan Technological University; MSc, 1989, University of Washington; PhD, 1992, University of Washington

Edmonds, Robert Leslie 1973, (Emeritus); MSF, 1968, University of Washington; PhD, 1971, University of Washington

Ewing, Kern B. 1990; MA, 1970, Texas Technological University; MS, 1978, University of Washington; PhD, 1982, University of Washington

Ford, Edward David * 1985, (Emeritus); PhD, 1968, University College, London (UK)

Franklin, Jerry Forest 1986; MS, 1961, Oregon State University; PhD, 1966, Washington State University

Fridley, James Lee 1988; MS, 1980, Michigan State University; PhD, 1984, University of Washington

Fritschen, Leo Joseph * 1966, (Emeritus); MS, 1958, Kansas State University; PhD, 1960, Iowa State University

Gara, Robert Imre 1968, (Emeritus); MS, 1962, Oregon State University; PhD, 1964, Oregon State University

Graumlich, Lisa 2010; MS, 1978, University of Wisconsin; PhD, 1985, University of Washington

Greulich, Francis Edward 1977; MS, 1967, University of California (Berkeley); PhD, 1976, University of California (Berkeley)

Gustafson, Richard Roy * 1986; PhD, 1982, University of Washington

Halpern, Charles Bernard * 1991, (Research); PhD, 1987, Oregon State University

Harrison, Robert Boyd 1987; MS, 1981, University of New Hampshire; PhD, 1985, Auburn University

Hessburg, Paul 2003, (Affiliate); PhD, 1984, Oregon State University

Hinckley, Thomas Metcalf * 1980, (Emeritus); PhD, 1971, University of Washington

Hodgson, Kevin Thomas * 1991, (Emeritus); MS, 1980, Carnegie Mellon University; PhD, 1986, University of Washington

Hogans, Mack L. 2011, (Affiliate); MS, 1976, University of Washington

Jenkins, Kurt 2013, (Affiliate); MS, 1980, Oregon State University; PhD, 1985, University of Idaho

Johnson, Jay Allan * 1980, (Emeritus); MS, 1970, State University of New York (Syracuse); PhD, 1973, University of Washington

Kaplan, Rachel 1997, (Affiliate); MA, 1960, University of Michigan, Ann Arbor; PhD, 1962, University of Michigan, Ann Arbor

Koontz, Fred Wilson 2014, (Affiliate); MS, 1980, University of Maryland; PhD, 1984, University of Maryland

Lee, Robert Godfrey 1978, (Emeritus); MFS, 1969, Yale University; PhD, 1973, University of California (Berkeley)

Lippke, Bruce Robert * 1990, (Emeritus); MSEE, 1959, New Mexico State University; MSIE, 1966, University of California (Berkeley)

Manuwal, David Allen 1972, (Emeritus); MS, 1968, University of Montana; PhD, 1972, University of California (Los Angeles)

Martin, Douglas J. 2010, (Affiliate); MS, 1976, University of Washington; PhD, 1985, University of Washington

Marzluff, John Mark 1997; MSc, 1983, Northern Arizona University; PhD, 1987, Northern Arizona University

Mc Kean, William Thomas * 1974, (Emeritus); PhD, 1970, University of Washington

Michaelis, Lynn Otto 1993, (Affiliate); MA, 1972, Washington State University; PhD, 1975, Washington State University

Perez-Garcia, John Manuel * 1990; MS, 1982, University of Puerto Rico; DF, 1990, Yale University

Pickford, Stewart Gerald * 1973, (Emeritus); MSF, 1966, University of Washington; PhD, 1972, University of Washington

Raedeke, Kenneth John * 1979, (Affiliate); PhD, 1979, University of Washington

Raphael, Martin George 1999, (Affiliate); MS, 1976, University of California (Berkeley); PhD, 1980, University of California (Berkeley)

Reichard, Sarah Elizabeth 1986; MS, 1989, University of Washington; PhD, 1994, University of Washington

Ryan, Clare Mary 1997; MS, 1990, University of Michigan, Ann Arbor; PhD, 1996, University of Michigan, Ann Arbor

Schiess, Peter 1975, (Emeritus); MS, 1968, Swiss Federal Institute of Technology; PhD, 1975, University of Washington

Schreuder, Gerard Fritz 1971, (Emeritus); MS, 1960, Wageningen University (The Netherlands); MS, 1967, University of North Carolina; PhD, 1968, Yale University

Sillett, Stephen Charles 2014, (Affiliate); MS, 1991, University of Florida; PhD, 1995, Oregon State University

Sprugel, Douglas George * 1984, (Emeritus); MPhil, 1974, Yale University; PhD, 1974, Yale University

Stettler, Reinhard Friederich * 1963, (Emeritus); Diploma, 1955, Swiss Federal Institute of Technology; PhD, 1963, University of California (Berkeley)

Taber, Richard Douglas * 1968, (Emeritus); MS, 1949, University of Wisconsin; PhD, 1951, University of California (Berkeley)

Thorud, David Bruce * 1981, (Emeritus); MS, 1960, University of Minnesota; PhD, 1964, University of Minnesota

Tukey, Harold B. * 1980, (Emeritus); MS, 1956, Michigan State University; PhD, 1958, Michigan State University

Underwood, Daniel August 2010, (Affiliate); PhD, 1986, University of Utah

Vogt, Kristiina Ann 1976; MS, 1974, New Mexico State University; PhD, 1976, New Mexico State University

Wagar, John Alan 1967, (Emeritus); MF, 1956, University of Michigan; PhD, 1961, University of Michigan

Waggener, Thomas Runyan * 1966, (Emeritus); MF, 1963, University of Washington; MA, 1965, University of Washington; PhD, 1966, University of Washington

West, Stephen Douglas 1979, (Emeritus); MS, 1974, University of Alaska; PhD, 1979, University of California (Berkeley)

Wott, John Arthur 1981, (Emeritus); MS, 1966, Cornell University; PhD, 1968, Cornell University

Wurster, Charles 2006, (Affiliate); MS, 1954, University of Delaware; PhD, 1957, Stanford University

Zabowski, Darlene 1992; MS, 1983, University of Washington; PhD, 1988, University of Washington

Associate Professors

Acker, Steven Anthony 2004, (Affiliate); PhD, 1988, University of Wisconsin

Antos, Joseph Avery 1992, (Affiliate); MA, 1977, University of Montana; PhD, 1984, Oregon State University

Bakker, Jonathan 2006; MSc, 1996, University of Regina (Saskatchewan); PhD, 2005, Northern Arizona University

Barbour, Roy James 1996, (Affiliate); MS, 1983, University of Washington; PhD, 1990, University of Washington

Blahna, Dale Jeffrey 2009, (Affiliate); MS, 1978, University of Wisconsin (Stevens Point); PhD, 1985, University of Michigan

Bura, Renata 2006; MSc, 2000, University of Toronto (Canada); PhD, 2004, University of British Columbia (Canada)

Chalker-Scott, Linda Kay 1997, (Affiliate); MS, 1981, Oregon State University; PhD, 1988, Oregon State University

Dabek, Lisa Fran 1986, (Affiliate); MS, 1991, University of Washington; PhD, 1994, University of Washington

Deal, Robert Leslie 2011, (Affiliate); MS, 1987, University of Washington; PhD, 1999, Oregon State University

Doty, Sharon L. 1989; PhD, 1995, University of Washington

Ettl, Gregory John 1988; MAT, 1989, University of Washington; PhD, 1995, University of Washington

Fuller, William Scott 1982, (Affiliate); MS, 1967, University of Washington

Johnson, Darryll R. 2001, (Affiliate); MA, 1970, South Dakota State University

Kim, Soo-Hyung 2006; MS, 1994, Seoul National University (Korea); PhD, 2001, University of California (Davis)

Wang, Haidong 2008; MA, 2003, Peking University (China); MA, 2004, University of Pennsylvania; PhD, 2008, University of Pennsylvania

Senior Lecturers

Gonzales, Virginia 1993; MSW, 1971, University of California (Berkeley); MPH, 1974, University of California (Berkeley); EdD, 1988, Harvard University

Mercer, Mary Anne * 1996; MPH, 1981, Johns Hopkins University; DrPH, 1987, Johns Hopkins University

School of Law

Professors

Allen, Craig Howard 1994; JD, 1989, University of Washington

Andersen, William Robert * 1964, (Emeritus); LLM, 1958, Yale University

Anderson, Helen Allison 1994; JD, 1984, University of Washington

Anderson, Robert Thomas 2000; JD, 1983, University of Minnesota

Andrews, Thomas Roderick * 1985; MA, 1973, Northwestern University; JD, 1979, University of Pennsylvania

Bodansky, Daniel Michael 1989, (Affiliate); MPhil, 1981, Cambridge University (UK); JD, 1984, Yale University

Boxx, Karen E. 1996; JD, 1983, University of Washington

Calandrillo, Steve P. 2000; JD, 1998, Harvard University

Cammack, Mark E. 2006, (Affiliate); JD, 1983, University of Wisconsin (Madison)

Clarke, Donald Clary 1988, (Affiliate); MSc, 1983, University of London:King's College (UK); JD, 1987, Harvard University

Eddy, Jonathan Andrew 1979; JD, 1969, University of Washington

Fan, Mary 2010; JD, 2003, Yale University; MPhil, 2008, University of Cambridge (UK)

Foote, Daniel Harrington 1988; JD, 1981, Harvard University

Gomulkiewicz, Robert William 1997; MA, 1987, University of Washington; JD, 1987, University of Washington

Haley, John Owen 1974, (Affiliate); LLM, 1971, University of Washington

Hatfield, Michael Wayne 2012; MA, 1993, Texas A&M University; JD, 1996, New York University

Hicks, Gregory Alan 1984; JD, 1978, University of Texas (Austin)

Huston, John C. * 1967, (Emeritus); LLD, 1952, University of Washington; LLM, 1955, New York University

Jay, Stewart * 1980; JD, 1976, Harvard University

Junker, John Michael * 1964, (Emeritus); JD, 1962, University of Chicago

Kelly, Lisa Ann 2002; JD, 1982, University of Pennsylvania

Kuszler, Patricia Carol 1994; MD, 1978, Mayo Medical School/Graduate School; JD, 1991, Yale University

Lombardi, Clark B. 2004; JD, 1998, Columbia University; PhD, 2001, Columbia University

Maranville, Deborah Ann 1989; JD, 1975, Harvard University

Mastroianni, Anna Catherine 1996; JD, 1986, University of Pennsylvania; MPH, 1997, University of Washington

McMurtrie, Jacqueline 1989; JD, 1983, University of Michigan

Nicolas, Peter 2000; MPP, 1992, University of Michigan; JD, 1999, Harvard University

O'Connor, Sean M. 2002; MA, 1995, Arizona State University; JD, 1998, Stanford University

O'Neill, Kathleen Marie 1993; JD, 1980, Columbia University

Ramasastri, Anita Gonsalves 1996; MA, 1989, University of Sydney (Australia); JD, 1992, Harvard University

Rodgers, William Hamilton * 1967; AB, 1961, Harvard University; LLB, 1965, Columbia University

Rombauer, Marjorie Dick * 1960, (Emeritus); LLB, 1960, University of Washington

Sato, Yasunobu 2006, (Affiliate); LLM, 1989, Harvard University; PhD, 2000, University of London, UK

Schnapper, Eric 1995; MA, 1963, Johns Hopkins University

Schumacher, Scott A. 2000; JD, 1990, Seattle University; LLM, 1991, New York University

Smith, Charles Zellender * 1973, (Emeritus); LLB, 1955, University of Washington

Smith, Francis Winston Jr. * 1968, (Emeritus); LLM, 1968, Harvard University

Takenaka, Toshiko * 1992; LLM, 1990, University of Washington; PhD, 1992, University of Washington

Taylor, Allyn L. 2014, (Affiliate); JD, 1987, University of California (Berkeley); LLM, 1990, Columbia University; JSD, 2000, Columbia University

Testy, Kellye 2009; JD, 1991, Indiana University

Vaughn, Lea Beth * 1984; JD, 1978, University of Michigan

Watts, Kathryn A. 2007; JD, 2001, Northwestern University

Winn, Jane Kaufman 2002; JD, 1987, Harvard University

Wolcher, Louis Edward 1986, (Emeritus); JD, 1973, Harvard University

Young, Michael Kent 2011; JD, 1976, Harvard University

Associate Professors

Drake, Dwight Julian 2004; JD, 1973, University of Washington

Howard, Maureen Andrea 1994; JD, 1986, University of Washington

Kirtley, Alan * 1984; JD, 1972, Indiana University

Krug, Anita 2010; AM, 1996, Harvard University; JD, 1997, Harvard University; PhD, 2000, Harvard University

Laster, Daniel 2003, (Affiliate); JD, 1983, University of Michigan

McCormack, Shannon 2012; JD, 2000, Harvard University; LLM, 2006, Georgetown University

Ngugi, Joel M. 2004, (Affiliate); LLM, 1999, Harvard University; SJD, 2002, Harvard University

Sanford, Sallie Thieme 2000; JD, 1991, University of California (Los Angeles)

Townsend, Michael Edward * 1992; MA, 1978, University of Michigan; PhD, 1982, Yale University; JD, 1989, Yale University

Walsh, Walter John 1996; LLM, 1989, Yale University

Zang, Dongsheng 2005; LLM, 1996, Harvard University; SJD, 2004, Harvard University

Assistant Professors

Bledsoe, David John 2006, (Affiliate); JD, 1993, University of Puget Sound; LLM, 1995, University of Washington

Calo, Michael Ryan 2012; JD, 2005, University of Michigan

Durkee, Melissa 2013; JD, 2004, Yale University

Knudsen, Sanne H. 2011; MS, 2002, University of Michigan, Ann Arbor; JD, 2002, University of Michigan, Ann Arbor

Manheim, Elisabeth 2011; JD, 2005, Yale University

Mitchell, Robert Gostin 1992, (Affiliate); JD, 1987, University of Washington; LLM, 1993, University of Washington

Porter, Elizabeth Gilbert 2010; EdM, 1992, Harvard University; MA, 2000, Columbia University; JD, 2000, Columbia University

Said, Zahr Kassim 2011; PhD, 2003, Harvard University; JD, 2008, Columbia University

Whitener, Ronald John 1999, (Affiliate); JD, 1994, University of Washington

Senior Lecturers

Cobb, Thomas Dillon 2004; MALS, 1993, Reed College; MA, 1997, University of Chicago; JD, 2001, University of Minnesota

Covington, William Edward 2003; JD, 1977, University of Michigan

McGinnis, Kathleen Marie 1994; JD, 1984, University of California (Berkeley)

Myhre, Theodore 1994; MA, 1991, Drew University; MA, 1994, Boston College; JD, 2000, Seattle University

Lecturers

Bailey, William Scherer 1992; JD, 1974, Northwestern University

Cohan, Molly Martin 2006; JD, 1977, University of Washington

Fan, Jennifer Shiu-Li 2010; JD, 1998, University of Pennsylvania

Gold, Julia Ann 1995; JD, 1983, University of South Carolina

Tolin, Anna 2011; JD, 1992, Cornell University

Williams, Brenda Elizabeth 1996; MPA, 1997, University of Washington; JD, 1997, University of Washington

Ziff, David Joseph Sidney 2012; JD, 2005, Columbia University

School of Medicine

Anesthesiology

Professors

Anderson, Corrie T.M. 2001; MS, 1985, Boston University
 Artru, Alan Arthur 1980; MD, 1975, Medical College of Wisconsin

Parson, William W. * 1967, (Emeritus); PhD, 1965, Case Western Reserve University

Petra, Philip Hue * 1966, (Emeritus); PhD, 1966, Tulane University

Roberts, James Michael * 1989, (Affiliate); MD, 1984, Columbia University; PhD, 1984, Columbia University

Roth, Mark Brantly * 1994, (Affiliate); PhD, 1988, University of Colorado (Boulder)

Ruohola-Baker, Hannele Tarja 1993; MSc, 1984, University of Helsinki (Finland); PhD, 1989, University of Helsinki (Finland)

Shapiro, Bennett M. * 1970, (Affiliate); MD, 1964, Jefferson Medical College

Stoddard, Barry Leonard * 1994, (Affiliate); PhD, 1990, Massachusetts Institute of Technology

Teller, David Chambers 1965, (Emeritus); PhD, 1965, University of California (Berkeley)

Tsukiyama, Toshio * 1999, (Affiliate); MS, 1987, Obihiro University of Agriculture and Veterinary Medicine, Japan; DVM, 1987, Obihiro University of Agriculture and Veterinary Medicine, Japan; PhD, 1991, University of Horishima (Japan)

Walsh, Kenneth Andrew * 1958, (Emeritus); MS, 1953, Purdue University; PhD, 1959, University of Toronto (Canada)

Weiner, Alan Matthew 2000; PhD, 1973, Harvard University

Young, Elton Theodore 1969, (Emeritus); PhD, 1967, California Institute of Technology

Associate Professors

Cole, Douglas G. 2003, (Affiliate); PhD, 1990, Washington State University

Copie, Valerie 2003, (Affiliate); PhD, 1990, Massachusetts Institute of Technology

Gonen, Tamir 2005, (Affiliate); PhD, 2002, University of Auckland (New Zealand)

Kennedy, Brian Keith 2001, (Affiliate); PhD, 1996, Massachusetts Institute of Technology

Langer, Pamela Joyce 2001, (Affiliate); PhD, 1980, Massachusetts Institute of Technology

Merz, Alexey J. 2004; PhD, 2000, Oregon Health Sciences University

Muller, Eric George Davis * 1988, (Research); PhD, 1981, Yale University

Roberts, Kenneth P. 2008, (Affiliate); PhD, 1989, Washington State University

Schief, William R. Jr. 1991, (Affiliate); MS, 1992, University of Washington; PhD, 1999, University of Washington

Stayton, Mark Manley 2001, (Affiliate); PhD, 1980, Iowa State University

Teintze, Martin 2000, (Affiliate); PhD, 1981, University of California (San Diego)

Verlinde, Christophe L. M. J. 1992; PhD, 1988, Catholic University of Leuven (Belgium)

Assistant Professors

Ailion, Michael Edward 2000; PhD, 2000, University of Washington

Bai, Jihong 2011, (Affiliate); MS, 1998, Tsinghua University (China); PhD, 2003, University of Wisconsin (Madison)

Bradley, Philip Harlan 2001, (Affiliate); PhD, 2001, Massachusetts Institute of Technology

Chauvin, Theodore R. 2012, (Affiliate); MS, 1999, Northern Illinois University; PhD, 2003, Washington State University

Dimaio, Frank 2007; PhD, 2007, University of Wisconsin (Madison)

Fortunato, Elizabeth A. 2001, (Affiliate); PhD, 1995, University of California (San Diego)

Hoppins, Suzanne 2013; PhD, 2005, University of Alberta, Canada

Kollman, Justin Michael 2014; PhD, 2005, University of California (San Diego)

Miller, Dana L. 2010; PhD, 2003, Johns Hopkins University

Ranish, Jeffrey Alan 1992, (Affiliate); PhD, 1999, University of Washington

Bioethics and Humanities

Professors

Berryman, Jack William * 1975; MS, 1971, University of Massachusetts; MA, 1974, University of Massachusetts; PhD, 1976, University of Maryland

Bowen, Deborah Jane * 1986; PhD, 1986, Uniformed Services University of The Health Sciences

Boyer, Bert B. 2004, (Affiliate); PhD, 1988, Louisiana State University

Braddock, Clarence Henry * 1993, (Affiliate); MD, 1981, University of Chicago; MPH, 1995, University of Washington

Burke, Wylie Gilman 1974; PhD, 1974, University of Washington; MD, 1978, University of Washington

Dudzinski, Denise Marie 2001; MS, 1993, Vanderbilt University; PhD, 2001, Vanderbilt University

Edwards, Kelly Alison 1993; MA, 1995, University of Washington; PhD, 2000, University of Washington

Holland, Suzanne 2001, (Affiliate); MA, 1991, Louisville Seminary; PhD, 1997, Graduate Theological Union

Jecker, Nancy Ann Silbergeld * 1982; MA, 1982, Stanford University; MA, 1984, University of Washington; PhD, 1986, University of Washington

Jonsen, Albert R. * 1987, (Emeritus); MA, 1956, Gonzaga University; STM, 1963, Santa Clara University; PhD, 1967, Yale University

Menzel, Paul Theodore 1988, (Affiliate); PhD, 1971, Vanderbilt University

Press, Nancy 2011, (Affiliate); MA, 1978, Hunter College; PhD, 1985, Duke University

Risse, Guenter B. 2002, (Affiliate); MD, 1958, University of Buenos Aires (Argentina); MA, 1966, University of Chicago; PhD, 1971, University of Chicago

Whorton, James Clifton * 1970, (Emeritus); PhD, 1969, University of Wisconsin (Madison)

Associate Professors

Fullerton, Stephanie Malia 2005; DPhil, 1995, University of Oxford (UK)

Starks, Helene E. 1989; MPH, 1989, University of California (Berkeley); PhD, 2004, University of Washington

Assistant Professors

Blacksher, Erika A. 2010; MA, 1996, University of Virginia; PhD, 2007, University of Virginia

Forster, David Grant 1992, (Affiliate); MA, 1996, University of Washington; JD, 1996, University of Washington

Grant, George Henry 2000, (Affiliate); PhD, 2001, Boston University

James, Rosalina 1995; PhD, 2002, University of Washington

King, Stephen Duane Watkins 2010, (Affiliate); PhD, 1993, Vanderbilt University

Milam, Steven Dwight 1989, (Affiliate); JD, 1969, University of Oregon
Robey, Thomas E 2001, (Affiliate); PhD, 2007, University of Washington; MD, 2009, University of Washington
Taulii, Maile M. 1991, (Affiliate); MPH, 2004, University of Washington; PhD, 2009, University of Washington

Senior Lecturer

McCormick, Thomas Richard * 1974, (Emeritus); MDiv, 1960, Drake University; DMin, 1976, Southern Methodist University

Biological Structure

Professors

Adman, Elinor T. * 1967, (Emeritus); MA, 1964, Brandeis University; PhD, 1967, Brandeis University
Bailey, Raymond 2008, (Affiliate); MA, 1969, California State University, Long Beach; PhD, 1973, Johns Hopkins University
Bajorath, Jurgen 1995, (Affiliate); PhD, 1988, Free University Berlin
Brinkley, James F. III * 1974; MD, 1974, University of Washington; PhD, 1984, Stanford University
Clark, John Irwin 1982; PhD, 1974, University of Washington
Cusick, Catherine Grace 2011, (Affiliate); PhD, 1979, University of Washington
Dacey, Dennis M. 1986; PhD, 1983, University of Chicago
Farr, Andrew Grant * 1982, (Emeritus); PhD, 1975, University of Chicago
Floerchinger, Steven Lyle 1996, (Affiliate); MD, 1987, University of Washington
Goodman, Anthony Allen 2000, (Affiliate); MD, 1965, Cornell University
Graney, Daniel Owen 1966, (Emeritus); MA, 1962, University of California (San Francisco); PhD, 1965, University of California (San Francisco)
Hendrickson, Anita Elizabeth * 1964, (Emeritus); PhD, 1964, University of Washington
Koehler, James Klaus * 1963, (Emeritus); MS, 1958, University of California (Berkeley); PhD, 1961, University of California (Berkeley)
Lee, Minako Yoshioka * 1974, (Emeritus); MD, 1963, Tokyo Women'S Medical College (Japan)
Quinlan, Roy Andrew 2009, (Affiliate); PhD, 1981, University of Kent
Raible, David Woolven 1995; PhD, 1989, University of Pennsylvania
Reh, Thomas A. 1989; PhD, 1981, University of Wisconsin
Reuveni, Zipora * 1979; MSc, 1975, Weizmann Institute For Science (Israel); PhD, 1979, University of Windsor (Canada)
Robinson, Farrel R. 1986; PhD, 1982, Brown University
Rosse, Cornelius * 1967, (Emeritus); MBChB, 1964, University of Bristol (UK); MD, 1974, University of Bristol (UK); DSc, 1983, University of Bristol (UK)
Sherk, Helen Adelaide * 1982; PhD, 1978, Massachusetts Institute of Technology
Stenkamp, Ronald Eugene 1975; MS, 1971, University of Washington; PhD, 1975, University of Washington
Wong, Rachel O. 2006; PhD, 1986, Australian National University
Xu, Wenqing 1999; MS, 1988, Chinese Academy of Sciences (China); PhD, 1995, Massachusetts Institute of Technology
Associate Professors
Bermingham-McDonogh, Olivia 1996; PhD, 1987, University of California (Los Angeles)

De Vito, June Logan * 1953, (Emeritus); MA, 1949, University of British Columbia (Canada); PhD, 1954, University of Washington
Gaddum-Rosse, Penelope * 1966, (Emeritus); PhD, 1965, University of Liverpool (UK)
Harris, Roger Mason * 1982, (Emeritus); PhD, 1975, University of Washington
Kapas, Levente Sandor 2009, (Affiliate); MD, 1985, Medical University, Hungary
Pasupathy, Anitha Karambakkam 2006; MS, 1994, McGill University (Canada); PhD, 2001, Johns Hopkins University
Pfeiffer, David C. 2004, (Affiliate); MS, 1990, University of British Columbia (Canada); PhD, 1997, University of British Columbia (Canada)
Pittack, Catrin 1989, (Affiliate); PhD, 1995, University of Washington
Prothero, John William * 1965, (Emeritus); PhD, 1960, University of Western Ontario (Canada)
Stenkamp, Deborah L. 2003, (Affiliate); PhD, 1993, Johns Hopkins University
Sundsten, John Wallin 1962, (Emeritus); PhD, 1961, University of California (Los Angeles)
Assistant Professors
Alexander, Brenda Mae 2010, (Affiliate); MS, 1988, University of Wyoming; PhD, 1999, University of Wyoming
Bair, Wyeth Daniel 2011; PhD, 1996, California Institute of Technology
Balemba, Onesmo Begira 2010, (Affiliate); MVSc, 1997, Sokoine University of Agriculture (Tanzania); PhD, 2001, Royal Veterinary and Agricultural University, Denmark
Brown, Ronald Lane 2012, (Affiliate); PhD, 1991, Stanford University
Conley, David Marshall 1987, (Affiliate); MS, 1987, Washington State University
Dhaka, Ajay 2009; PhD, 2002, University of California (Los Angeles)
Harris, Julie Ann 2000, (Affiliate); PhD, 2006, University of Washington
Hinterberger, Timothy James 1996, (Affiliate); MS, 1981, University of Illinois (Urbana); PhD, 1987, University of Illinois (Urbana)
Lampa, Steven Jeffrey 2008, (Affiliate); MS, 1994, Washington State University; PhD, 2004, Washington State University
Lefcort, Frances Brenda 1996, (Affiliate); PhD, 1988, University of California (San Francisco)
Seegmiller, Jeffrey G. 2008, (Affiliate); MS, 1996, Illinois State University; EdD, 2003, Illinois State University
Shafer, Gavriela 2002, (Affiliate); MSc, 1995, Tel Aviv University (Israel); PhD, 2002, Hebrew University (Israel)
Szentirmai, Eva 2009, (Affiliate); MD, 2004, University of Szeged (Hungary)
Wang, Liguó 2011; PhD, 2003, Cornell University
Wisor, Jonathan Paul 2009, (Affiliate); PhD, 1997, University of California (Los Angeles)
Lecturers
Buckley, Cadie Lin 2013; PhD, 2011, University of Hawaii
Mulligan, Kathleen Anne 1987; PhD, 1985, University of New South Wales(Australia)

Biomedical Informatics and Medical Education

Professors

Carline, Jan Dana * 1977; MEd, 1976, University of Washington; PhD, 1979, University of Washington

Foster, James A. 2003, (Affiliate); MS, 1987, Illinois Institute of Technology; PhD, 1990, Illinois Institute of Technology
Fuller, Sherrilynne Shirley * 1988; MLS, 1968, Indiana University; PhD, 1984, University of Southern California
Gantenbein, Rex E. 1997, (Affiliate); MS, 1983, University of Iowa; PhD, 1986, University of Iowa
Heckerman, David 2006, (Affiliate); MS, 1979, University of California (Los Angeles); MS, 1983, Stanford University; PhD, 1990, Stanford University; MD, 1992, Stanford University
Horvitz, Eric Joel 1995, (Affiliate); PhD, 1991, Stanford University; MD, 1994, Stanford University
Joyce, Paul Joseph 1988, (Affiliate); MS, 1982, Montana State University; PhD, 1988, University of Utah
Kolker, Eugene Evgeni 1996, (Affiliate); MSc, 1986, Kishinev University, Ussr; PhD, 1996, Weizmann Institute For Science (Israel)
Masys, Daniel Richard 2011, (Affiliate); MD, 1974, Ohio State University
Robins, Lynne Stephanie * 1999; PhD, 1990, University of Michigan
Robinson, Timothy Jay 2011, (Affiliate); MS, 1994, Virginia Polytechnic Institute and State University; PhD, 1997, Virginia Polytechnic Institute and State University
Schaad, Douglas Craig * 1975; MEd, 1974, University of Washington; PhD, 1986, University of Washington
Scott, Craig Stanley * 1979; MA, 1970, California State University, Sacramento; PhD, 1973, University of Iowa
Shelby, Nancy Jane 2010, (Affiliate); MS, 1991, University of Utah; PhD, 1993, University of Utah
Tarczy-Hornoch, Peter 1992; MD, 1989, Stanford University
Wetter, Thomas 2011, (Affiliate); MSc, 1976, University of Aachen (Germany); PhD, 1984, University of Aachen (Germany)
Wolf, Fredric Marc 1997; MEd, 1977, Kent State University; PhD, 1980, Kent State University
Associate Professors
Abernethy, Neil F. 2008; PhD, 2005, Stanford University
Curioso, Walter H. 2003, (Affiliate); MD, 2002, Universidad Peruana Cayetano Heredia
Daratha, Kenneth Blake 2010, (Affiliate); MBA, 1986, Eastern Washington University; PhD, 2004, Washington State University
Gennari, John H. 2002; MS, 1985, University of Wisconsin; PhD, 1990, University of California (Irvine)
Putnam, Elizabeth A. 2003, (Affiliate); PhD, 1989, University of Texas (Houston)
Rossini, Anthony Joseph 1998, (Affiliate); ScD, 1994, Harvard University
Vanderwende, Lucretia Henrica 2011, (Affiliate); MS, 1985, Georgetown University; PhD, 1995, Georgetown University
Assistant Professors
Capurro Nario, Daniel 2010, (Affiliate); MD, 2003, Pontificia Universidad Catolica De Chile; PhD, 2012, University of Washington
Murray, Kathleen 1989, (Affiliate); MLS, 1976, University of Washington
Wenrich, Marjorie D. 1980, (Affiliate); MPH, 1994, University of Washington
Yetisgen, Meliha 2002; MS, 2000, Middle East Technical University (Turkey); PhD, 2007, University of Washington
Lecturer
Masuda, David Lee 1997; MD, 1980, University of North Dakota; MS, 1996, University of Wisconsin (Madison)

Comparative Medicine

Professors

Dennis, Melvin Best Jr. * 1971, (Emeritus); DVM, 1961, Washington State University

Di Giacomo, Ronald Francis * 1974, (Emeritus); DVM, 1965, University of Pennsylvania; MPH, 1974, University of Washington

Iritani, Brian M. 1992; DVM, 1988, Washington State University; PhD, 1997, University of Washington

Knowles, Donald Patrick 2005, (Affiliate); DVM, 1982, University of Illinois; PhD, 1988, Washington State University

Ladiges, Warren Carl 1975; DVM, 1971, Washington State University; MS, 1978, Washington State University

Liggitt, Harry Denny 1989; DVM, 1972, Colorado State University; PhD, 1979, Colorado State University

Price, Lillian M. * 1984; DVM, 1972, University of Pennsylvania; PhD, 1983, University of Pennsylvania

Taylor, Stephen Maxwell 2012, (Affiliate); PhD, 1978, University of Sydney (Australia)

Van Hoosier, Gerald Leonard * 1975, (Emeritus); DVM, 1957, Texas A&M University

Ware, Carol Britton 1995; PhD, 1986, University College (Ireland)

Associate Professors

Colby, Lesley Ann 2012; DVM, 1996, Virginia Polytechnic Institute and State University; MS, 1997, Virginia Polytechnic Institute and State University

Frevort, Charles Wayne 1995; DVM, 1984, Iowa State University; ScD, 1994, Harvard University

Hargis, Ann Mae 1990, (Affiliate); DVM, 1973, Colorado State University; MS, 1976, Colorado State University

Jerome, Christopher Paul 2009, (Affiliate); PhD, 1983, University of California (Davis)

O'Hara, Todd Michael 2005, (Affiliate); MS, 1985, Villanova University; PhD, 1988, Virginia Commonwealth University; DVM, 1992, University of Wisconsin

Treuting, Piper M. 1996; DVM, 1996, Louisiana State University; MS, 2000, University of Washington

Waggie, Kimberly Sue 1997, (Affiliate); DVM, 1980, Iowa State University; MS, 1984, University of Missouri; PhD, 1984, University of Missouri

Washington, Ida Margaret 2006, (Affiliate); MA, 1982, Duke University; DVM, 1987, North Carolina State University; PhD, 1991, University of North Carolina

Weigler, Benjamin Jared * 1997, (Affiliate); DVM, 1986, Colorado State University; MPH, 1988, University of California (Berkeley); PhD, 1991, University of California (Davis)

Assistant Professors

Bennett, Tracy Drew 2014, (Affiliate); DVM, 1994, Washington State University

Buetow, Bernard S. 1996, (Affiliate); DVM, 1989, University of Illinois; PhD, 2003, University of Washington

Graham, Jennifer E. 2004, (Affiliate); DVM, 1999, Auburn University

Hagan, Catherine Elizabeth 2004, (Affiliate); DVM, 2004, University of California (Davis); PhD, 2010, University of Washington

Hsu, Charlie Chun 2012; DVM, 2002, University of Pennsylvania; PhD, 2007, University of Missouri (Columbia)

Kramer, Robert William 1995, (Affiliate); DVM, 1987, University of California (Davis)

Mison, Michael Bueno 2005, (Affiliate); DVM, 1998, University of Florida

Pritchett, Kathleen Ripperton 1992, (Affiliate); DVM, 1993, Washington State University

Runstadler, Jonathan Andrew 2006, (Affiliate); MS, 1992, University of New Hampshire; DVM, 1999, University of California (Davis); PhD, 2003, University of California (Davis)

Wiley, Jesse Carey 1994, (Affiliate); MS, 2003, University of Washington; PhD, 2003, University of Washington

Lecturers

Chang, Mary Y. 1992; PhD, 1991, Massachusetts Institute of Technology

Dowling, Susan Christine 1997; DVM, 1986, Washington State University

Lucas, Molly K. 2005; MS, 1997, University of Hawaii; DVM, 2003, University of California (Davis)

Sanders, George Eldridge 1997; DVM, 1997, Louisiana State University; MS, 2001, University of Washington

Family Medicine

Professors

Baldwin, Laura Mae 1984; MD, 1980, University of Southern California; MPH, 1986, University of Washington

Ballweg, Ruth Ann 1981; PA, 1978, University of Washington; MPA, 1998, University of Washington

Berg, Alfred Oren 1977, (Emeritus); MD, 1974, Washington University; MPH, 1979, University of Washington

Cherkin, Daniel Craig 1974, (Affiliate); MS, 1974, University of Washington; PhD, 1978, University of Washington

Dobie, Sharon Ann 1987; MD, 1979, University of California (San Francisco)

Drezner, Jonathan 1999; MD, 1996, University of California (Los Angeles)

Farber, Stuart Julian 1978; MD, 1974, University of Washington

Force, Rex William 2005, (Affiliate); PharmD, 1991, University of Texas (Austin)

Geyman, John P. 1976, (Emeritus); MD, 1960, University of California (San Francisco)

Gordon, Michael Joseph * 1973, (Emeritus); MA, 1970, Michigan State University; PhD, 1973, Michigan State University

Greer, Hilton Thomas 1977; MD, 1974, University of Mississippi; MPH, 1979, University of Washington

Harmon, Kimberly Garrison 1989; MD, 1993, Indiana University

Losh, David Paul 1992; MD, 1974, University of Kansas

Marchand, Lucille Rachel 2014; MD, 1987, University of California (San Francisco)

Norris, Thomas Elmore 1988; MD, 1973, University of Texas (Galveston)

Parchman, Michael Leo 2012, (Affiliate); MD, 1982, University of Texas (Southwestern); MPH, 2001, University of Texas (Houston)

Rosenblatt, Roger Alan * 1971; MPH, 1971, Harvard University; MD, 1971, Harvard University

Schneeweiss, Ronald 1977, (Emeritus); MBChB, 1964, University of Capetown (South Africa)

Stevens, Nancy Gray 1982; MD, 1979, University of Washington; MPH, 1982, University of Washington

Sugarman, Jonathan Reuel * 1981, (Clinical); MD, 1981, Albert Einstein College of Medicine; MPH, 1990, University of Washington

Thompson, Matthew James 1999; MBChB, 1989, University of Glasgow (UK); MPH, 2001, University of Washington; DPhil, 2007, Oxford University (UK)

Associate Professors

Beard, John Mark 1989; MD, 1986, University of Missouri

Brock, Douglas Michael 1985; MEd, 1987, University of Washington; PhD, 1995, University of Washington

Chen, Frederick Ming 1996; MPH, 1995, University of California (Berkeley); MD, 1996, University of California (San Francisco)

Dickey, John Hanford 2005, (Affiliate); MS, 1975, Idaho State University; PhD, 1982, Wayne State University

Ellsbury, Kathleen Elise 1982, (Emeritus); MD, 1977, Johns Hopkins University; MPH, 1982, University of Missouri

Evans, David Vreeland 2012; MD, 1993, University of Pittsburgh

Godfrey, Emily M. 2012; MD, 1997, Medical College of Wisconsin; MPH, 2003, University of Rochester

Hefflinger, Roger Glenn 1992, (Affiliate); PharmD, 1986, Nebraska College of Pharmacy

Hoffman, Sandra Jo 2005, (Affiliate); MS, 1986, University of California (Los Angeles); MD, 1988, Michigan State University

Huntington, Jane Hoskins 1991; MD, 1994, University of Washington

Keen, Misbah 2006; MBBS, 1993, Government Medical College, India; MS, 2008, Oregon Health Sciences University; MPH, 2009, Johns Hopkins University

Luboga, Samuel Abimerech 2007, (Affiliate); MBChB, 1974, Makerere University, Uganda; MMed, 1979, Makerere University, Uganda; PhD, 1987, Makerere University, Uganda

Maestas, Ramoncita Raquel 1986; MD, 1983, University of Washington

Morgan, James Forrest 2001, (Affiliate); MD, 1980, Boston University

O'Kane, John William 1993; MD, 1993, University of Vermont

Oliver, Lynn Marie 1983; MD, 1983, University of Washington

Pauwels, Judith 1995; MS, 1978, University of Wisconsin; MD, 1983, University of Wisconsin

Sanford, Christopher Allen 2000; MD, 1985, University of California (San Diego); MPH, 2005, Harvard University

Solbrig, Ronald Mark 2005, (Affiliate); MD, 1987, University of Washington

Taylor, Thomas Raymond 1979, (Emeritus); MBChB, 1957, University of Glasgow (UK); PhD, 1972, University of Glasgow (UK)

Assistant Professors

Brandes, Lisa Kae 2006, (Affiliate); MD, 1993, University of Kansas

Cole, Allison Marion 2010; MD, 2002, University of Iowa

Dyer, Donald Alan 2005, (Affiliate); MD, 1972, University of Tennessee

Hornecker, Jaime Rose 2006, (Affiliate); PharmD, 2003, University of Wyoming

Horrocks, Mark Trimming 2005, (Affiliate); MD, 1994, University of Washington

Kost, Amanda Rhea 2005; MD, 2005, State University of New York (Buffalo)

Rao, Ashwin Laxminarayana 2003; MD, 2003, Case Western Reserve University

Shih, Grace 2013; MD, 2003, University of Florida; MS, 2010, University of California (San Francisco)

Thompson, Angela Michelle 2013, (Affiliate); PharmD, 2010, University of Colorado (campus unspecified)

Veauthier, Brian Michael 2007, (Affiliate); MD, 2001, Georgetown University

Vorvick, Linda Jean 1987; MD, 1982, University of Washington

Wick, Keren 1990; MA, 1991, University of Leeds (UK); PhD, 1996, University of Leeds (UK)

Senior Lecturers

Coerver, Donald August 1997; MA, 1983, Alaska Pacific University; PhD, 2005, Gonzaga University

Davis, Ardis Keepin 1981; MSW, 1979, University of Washington

Halperin, Abigail Carol 1990; MD, 1983, Albert Einstein College of Medicine

Levy, William S. 2002; PA-C, 1982, University of Washington

Mauksch, Larry Bernard 1985; MEd, 1982, University of Washington

Naidu, Ameer Srikanth 2007; MS, 1999, Midwestern University

Quigley, Timothy F. 2010; MPH, 1999, University of Kansas
Ross, Valerie Regina 1990; MS, 1994, Seattle Pacific University

Scott, Terry Bruce 1983; MPA, 2011, University of Washington

Stoll, Henry Wagner 1978; BA, 1971, Brown University

Lecturers

Alvitre, John Jeffrey 2014; BA, 1997, California State University, Chico; BS, 2003, University of Nebraska, Omaha
Bester, Vanessa Smith 2012; MPAS, 2003, University of Florida

Carrol, Jennifer S 2014; MA, 2002, Seattle University

Cope, Robin Marie 2012; BA, 1981, University of Texas (Austin)

Garcia, Drew Anthony 2013; MA, 2004, University of Nebraska, Omaha

Gianola, Fred Joseph 1975; PA-C, 1973, University of Washington

Hahn, Patricia Lynn 2013; MSN, 1995, Whitworth College
Haverkamp, Kenneth 1996; BA, 1990, Whitman College
Hawkins, Marc Antonio 2013; PA-C, 1980, University of Washington; MA, 2000, University of Nebraska, Omaha
Jackson, Jo Ann 1986; MS, 1975, University of Michigan; MD, 1979, Michigan State University

Jain, Anju 2014; MS, 1997, Western Washington University
Kempe, Christine 2013; MS, 2001, Brigham Young University

Kolojejchick-Coslett, Denise Ann 2009; MS, 2003, King's College, Pennsylvania

Marquardt, Ashley Frederick 2009; BS, 1999, Excelsior College

McIntyre, Susan Reba 2010; MSW, 1982, Eastern Washington University; MPA, 1988, Eastern Washington University; PhD, 2001, Gonzaga University

Plummer, William Taylor 1992, (Emeritus); BS, 1974, University of Nebraska

Quella, Alicia Katherine 2010; MPAS, 1999, University of Iowa; PhD, 2010, University of Iowa

Riley, John O. 2002; MS, 1982, University of Wisconsin

Serpinas, Sarah L. 2014; BCHS, 2010, University of Washington

Siegel, Malinda Selby 2007; JD, 1989, University of Baltimore

Skaggs, Steven Anthony 2009; MPA, 2001, University of Nebraska, Omaha

Smith, Michael Benjamin 2014; MFS, 1997, University of Nebraska, Omaha; MNS, 2012, A.T. Still University of Health Sciences

Stewart, Betty L. 1990; BS, 1996, Seattle University; BCHS, 1998, University of Washington

Thetford, Lois Catherine 1994; BA, 1967, Cornell University

Tozier, William L. 2011; MPH, 1990, University of Oklahoma; PhD, 1999, University of Denver

Vader, Kira Susan 2005; MA, 1999, Fuller Theological Seminary; MHS, 2002, Duke University

Wachtel, Dianna Lynn 2007; MS, 2008, A.T. Still University of Health Sciences

Genome Sciences

Professors

Akey, Joshua Michael 2004; PhD, 2002, University of Texas (Houston)

Berg, Celeste Antoinette 1990; MS, 1981, Yale University; PhD, 1986, Yale University

Brewer, Bonita J. 1979; PhD, 1979, University of Washington

Bruce, James 2008; PhD, 1992, University of Florida

Eichler, Evan E. 2004; PhD, 1995, Baylor College of Medicine

Felsenstein, Joseph 1967; PhD, 1968, University of Chicago

Fields, Stanley 1995; MA, 1978, Cambridge University (UK); PhD, 1981, Cambridge University (UK)

Gallant, Jonathan Abraham 1961, (Emeritus); PhD, 1961, Johns Hopkins University

Gottschling, Daniel E. * 1996, (Affiliate); MS, 1980, University of Colorado (campus unspecified); PhD, 1984, University of Colorado (campus unspecified)

Green, Philip Palmer III * 1994; PhD, 1976, University of California (Berkeley)

Hartwell, Leland H. 1967, (Emeritus); PhD, 1964, Massachusetts Institute of Technology

Hawrylycz, Michael John 2014, (Affiliate); MA, 1984, Wesleyan University; PhD, 1994, Massachusetts Institute of Technology

Henikoff, Steven 1977, (Affiliate); PhD, 1977, Harvard University

Hood, Leroy E. * 1991, (Affiliate); MD, 1964, Johns Hopkins University; PhD, 1968, California Institute of Technology

MacCoss, Michael J. 2004; PhD, 2001, University of Vermont

Manoil, Colin Christy 1986; PhD, 1979, Stanford University

Nickerson, Deborah Ann 1992; PhD, 1978, University of Tennessee

Noble, William Stafford 2002; MS, 1996, University of California (San Diego); PhD, 1998, University of California (San Diego)

Olson, Maynard V. 1975, (Emeritus); PhD, 1970, Stanford University

Pallanck, Leo Joseph 1997; MS, 1989, Albert Einstein College of Medicine; PhD, 1992, Albert Einstein College of Medicine

Sibley, Carol Hopkins 1976, (Emeritus); MA, 1966, University of Rochester; MS, 1970, University of Rochester; PhD, 1974, University of California (San Francisco)

Swanson, Willie James 2002; PhD, 1998, University of California (San Diego)

Thomas, James Horsfall 1988; PhD, 1985, Massachusetts Institute of Technology

Trask, Barbara Jo * 1992, (Emeritus); MS, 1979, Leiden University (The Netherlands); PhD, 1985, Leiden University (The Netherlands)

Waterston, Robert Hugh 2002; MD, 1972, University of Chicago; PhD, 1972, University of Chicago

Associate Professors

Borenstein, Elhanan 2009; PhD, 2007, Tel Aviv University (Israel)

Breeden, Linda Louise 1994, (Affiliate); PhD, 1981, University of Colorado (Boulder)

Dunham, Maitreya 2008; PhD, 2003, Stanford University
Malik, Harmat S. 2004, (Affiliate); MS, 1999, University of Rochester; PhD, 1999, University of Rochester

Paddison, Patrick John 2013, (Affiliate); PhD, 2004, Watson School of Biological Sciences (Cold Spring Harbor, NY)

Queitsch, Christine 2007; MSc, 1993, Martin Luther Univ Halle-Wittenberg; PhD, 2001, University of Chicago

Shendure, Jay Ashok 2007; PhD, 2005, Harvard University; MD, 2007, Harvard University

Stamatoyannopoulos, John A. 2005; MD, 1995, University of Washington

Ventura, Mario 2007, (Affiliate); PhD, 2003, University of Bari (Italy)

Assistant Professors

Bloom, Jesse David 2011, (Affiliate); MPhil, 2002, Cambridge University (UK); PhD, 2007, California Institute of Technology

Bradley, Robert Kurata 2011, (Affiliate); PhD, 2008, University of California (Berkeley)

Dudley, Aimee Marie 2008, (Affiliate); PhD, 1999, Harvard Medical School

Fowler, Douglas McKay 2007; PhD, 2007, The Scripps Research Institute

Trapnell, Bruce Cole 2014; PhD, 2010, University of Maryland

Villen, Judit 2010; MSc, 1999, University of Barcelona (Spain); PhD, 2003, University of Barcelona (Spain)

Wolf Yadin, Alejandro M. 2010; MS, 2001, University of Chile; PhD, 2007, Massachusetts Institute of Technology

Senior Lecturer

Schivell, Amanda Elizabeth 1994; PhD, 2000, University of Washington

Lecturers

Carlson, Keisha Dawn 2008; BS, 2008, Brown University
Cheong, Ka Yan 2011; PhD, 2010, Johns Hopkins University

Munn, Maureen 1993; PhD, 1986, University of California (San Francisco)

Paul, Anne Sandilands 1980; MS, 1994, University of Washington

Immunology

Professors

Aderem, Alan Arnold * 1996, (Affiliate); PhD, 1979, University of Capetown (South Africa)

Bevan, Michael John * 1990; MSc, 1968, University of London, UK; PhD, 1972, National Inst For Medical Research (UK)

Fink, Pamela Jean 1990; PhD, 1981, Massachusetts Institute of Technology

Gale, Michael J. 1983; PhD, 1994, University of Washington

Goverman, Joan M. 1992; PhD, 1981, University of California (Los Angeles)

Isaak, Dale Darwin 2001, (Affiliate); MS, 1973, Montana State University; PhD, 1976, Montana State University

Jutila, Mark Arthur 2002, (Affiliate); MS, 1984, Washington State University; PhD, 1986, Washington State University

Maizels, Nancy 2000; PhD, 1974, Harvard University

Nepom, Gerald Thomas * 1982, (Affiliate); PhD, 1977, University of Washington; MD, 1978, University of Washington

Perlmutter, Roger Matthew * 1984, (Affiliate); MD, 1979, Washington University; PhD, 1979, Washington University

Strong, Roland Kirk * 1994, (Affiliate); PhD, 1990, Harvard University

Ziegler, Steven Frank * 1984, (Affiliate); PhD, 1984, University of California (Los Angeles)

Associate Professors

Campbell, Daniel 2004, (Affiliate); PhD, 1998, University of California (Berkeley)

Hamerman, Jessica Ann 1994, (Affiliate); PhD, 2001, University of Washington

Lacy-Hulbert, Adam 2014, (Affiliate); PhD, 1995, Cambridge University (UK)

Stetson, Daniel 2008; PhD, 2002, University of California (San Francisco)

Assistant Professors

Bettelli, Estelle 2009, (Affiliate); MS, 1996, Universite of Paris VII; PhD, 2001, Universite of Paris VII

Knall, Cindy 2006, (Affiliate); PhD, 1994, University of Colorado (Denver)

Oberst, Andrew Atwell 2012; PhD, 2005, Univ of Pierre & Marie Curie (France); PhD, 2005, University of Rome Tor Vergata (Italy)

Pepper, Marion 2011; PhD, 2006, University of Pennsylvania

Savan, Ram 2011; MSc, 2001, University of Agricultural Sciences (India); PhD, 2004, Kagoshima University

Laboratory Medicine

Professors

Aston, Michael Lee * 1991, (Clinical); MD, 1989, University of Pennsylvania; PhD, 1989, University of Pennsylvania

Chatrian, Gian Emilio 1959, (Emeritus); MD, 1951, University of Naples (Italy)

Chou, David * 1998; MD, 1974, University of Pittsburgh; MS, 1979, University of Minnesota

Clarridge, Jill E. 2002; MS, 1962, University of Michigan; PhD, 1973, Purdue University

Cookson, Brad Theodore 1991; MD, 1991, Washington University; PhD, 1991, Washington University

Coombs, Robert William * 1985; PhD, 1977, Dalhousie University (Canada); MD, 1981, Dalhousie University (Canada)

Corey, Lawrence * 1975; MD, 1971, University of Michigan

Coyle, Marie Bridget * 1973, (Emeritus); MS, 1963, St. Louis University; PhD, 1965, Kansas State University

Detter, James Cox * 1962, (Emeritus); MD, 1962, University of Kansas

Fang, Ferric C. 2001; MD, 1983, Harvard University

Fine, James Stephen * 1977; MD, 1972, University of Minnesota; MS, 1977, University of Minnesota

Hess, John Rider 2012; MD, 1972, University of Washington; MPH, 1979, University of Hawaii

Jerome, Keith Robert 1993; PhD, 1992, Duke University; MD, 1993, Duke University

Kenny, Margaret A. * 1968, (Emeritus); PhD, 1968, University of Illinois

Labbe, Robert Ferdinand * 1957, (Emeritus); MS, 1949, Oregon State University; PhD, 1951, Oregon State University

Morrow, Rhoda Ashley * 1979; PhD, 1977, University of California (Davis)

Plorde, James J. * 1960, (Emeritus); MD, 1959, University of Minnesota

Rainey, Petrie Morrison 2000; PhD, 1973, University of California (Berkeley); MD, 1980, University of North Carolina, Chapel Hill

Raisys, Vidmantas A. * 1971, (Emeritus); MS, 1965, University of Illinois; PhD, 1969, State University of New York (Buffalo)

Rutledge, Joe Cathey * 1976; MD, 1976, Vanderbilt University

Schmer, Gottfried * 1968, (Emeritus); MD, 1956, University of Vienna, Austria

Stephens, Karen Gayle 1989; MA, 1978, Indiana University; PhD, 1982, Indiana University

Tait, Jonathan Francis * 1983; MD, 1983, Washington University; PhD, 1983, Washington University

Wener, Mark Howard * 1980; MD, 1974, Washington University

Wood, Brent Lee 1990; PhD, 1988, Loma Linda University; MD, 1990, Loma Linda University

Zimring, James Charles 2013; MD, 1999, Emory University; PhD, 1999, Emory University

Associate Professors

Bankson, Daniel Duke 1993; MS, 1981, Massachusetts Institute of Technology; PhD, 1985, Massachusetts Institute of Technology

Cherian, Sindhu 2005; MD, 2000, Emory University

Delaney, Collene Jayne * 1972, (Emeritus); MS, 1967, University of Illinois; PhD, 1972, University of Illinois

Fromm, Jonathan R. 1998; MD, 1997, University of Iowa; PhD, 1997, University of Iowa

Hoofnagle, Andrew Norbert 2004; PhD, 2002, University of Colorado (Boulder); MD, 2004, University of Colorado (Denver)

Morishima, Chihiro 1991; MD, 1988, Washington University

Nester, Theresa Ann 2001; MD, 1994, University of Rochester

Opheim, Kent Edgar * 1975; PhD, 1972, Cornell University

Qin, Xuan 2005; PhD, 1995, State University of New York (Albany)

Sabath, Daniel Eliot * 1989; MD, 1989, University of Pennsylvania; PhD, 1989, University of Pennsylvania

Schiller, Harvey Stuart * 1972; MD, 1966, Washington University

Tsuchiya, Karen D. 1990; MD, 1990, University of Michigan

Wu, David 2008; PhD, 2001, Massachusetts Institute of Technology; MD, 2003, Harvard University

Zhu, Tuofu 1997; MD, 1984, Tiangxi (Jiangxi) Medical School, China; PhD, 1990, Peking Union Medical College (China)

Zhu, Tuofu 1997; MD, 1984, Tiangxi (Jiangxi) Medical School, China; PhD, 1990, Peking Union Medical College (China)

Assistant Professors

Abbott, April Nicole 2009; PhD, 2009, University of Texas (Houston)

Baird, Geoffrey S. 2003; PhD, 2001, University of California (San Diego); MD, 2003, University of California (San Diego)

Butler-Wu, Susan 2007; PhD, 2005, Tufts University

Daniel-Johnson, Jennifer A. 2010; MBBS, 1995, University of Melbourne (Australia)

Delaney, Meghan 2009; DO, 2004, University of New England; MPH, 2010, University of Washington

Edlefsen, Kerstin Lara 1998; MD, 2002, University of Washington

Grisson, Ricky Darnell II 2013; MBA, 2004, Emory University; MD, 2007, Harvard College; MPH, 2012, Dartmouth College

Haver, Virginia Mary * 1986, (Clinical); PhD, 1980, University of Virginia

Hoffman, Noah Gabriel 2005; PhD, 2003, University of North Carolina; MD, 2005, University of North Carolina

Le Crone, Carol N. * 1967, (Emeritus); MS, 1966, Colorado State University

Murphy, Sean Christopher 2008; PhD, 2006, Northwestern University; MD, 2008, Northwestern University

Pagano, Monica Beatriz 2009; MD, 1999, University of Buenos Aires (Argentina)

Pritchard, Colin Christopher 1996; PhD, 2005, University of Washington; MD, 2007, University of Washington

Salipante, Stephen Joseph 2003; PhD, 2009, University of Washington; MD, 2011, University of Washington

Shirts, Brian Hanson 2012; PhD, 2006, University of Pittsburgh; MD, 2008, University of Pittsburgh

Soma, Lorinda Anne 2012; MD, 1998, University of Minnesota

Swenson, Paul David 1987, (Affiliate); PhD, 1979, Virginia Commonwealth University

Zhou, Yi 2013; MD, 1987, Beijing Medical University (China); PhD, 1995, Louisiana State University

Senior Lecturer

Hansen-Suchy, Kara Fran 2012; MEd, 2005, Weber State University

Medicine

Professors

Abkowitz, Janis Lynne 1980; MD, 1977, Harvard University

Abrass, Christine Kreger 1984, (Emeritus); MD, 1973, Case Western Reserve University

Abrass, Itamar B. 1983, (Emeritus); MD, 1966, University of California (San Francisco)

Aguilar-Bryan, Lydia 2007, (Affiliate); MD, 1975, U Nacional Autonoma De Mexico (Mexico); PhD, 1985, University of Texas (Houston)

Ahmad, Suhail 1976; MBBS, 1968, University of Allahabad (India)

Aitken, Moira Lesley 1982; MBChB, 1978, University of Edinburgh (UK)

Albers, John J. * 1971, (Research); MS, 1967, University of Illinois; PhD, 1969, University of Illinois

Altman, Leonard Charles * 1969, (Clinical); MD, 1969, Harvard University

Amory, John Kenneth 1997; MD, 1994, University of California (San Francisco)

Microbiology

Professors

Baliga, Nitin 2005, (Affiliate); MSc, 1994, Goa University (India); PhD, 2000, University of Massachusetts

Bohach, Carolyn Hovde 2003, (Affiliate); PhD, 1985, University of Minnesota

Champoux, James J. 1972; PhD, 1970, Stanford University

Clark, Edward Alan * 1979; PhD, 1977, University of California (Los Angeles)

Emerman, Michael 1994, (Affiliate); PhD, 1986, University of Wisconsin

Feldmann, Heinrich 2008, (Affiliate); MD, 1987, University of Giessen (Germany); PhD, 1988, Philipps University (Germany)

Galloway, Denise Allene * 1982, (Research); PhD, 1976, City University of New York

Greenberg, E. Peter 2005; MS, 1972, University of Iowa; PhD, 1977, Harvard University

Harold, Franklin Marcel 2001, (Affiliate); PhD, 1955, University of California (Berkeley)

Hartzell, Patricia Louise 2003, (Affiliate); PhD, 1986, University of Illinois

Harwood, Caroline Stone 2005; MA, 1976, Boston University; PhD, 1982, University of Massachusetts

Katze, Michael Gerald * 1987; MS, 1978, Hahnemann Medical College; PhD, 1980, Hahnemann Medical College

Konkel, Michael 2006, (Affiliate); MS, 1987, San Diego State University; PhD, 1990, University of Arizona

Lagunoff, Michael 2001; PhD, 1995, University of Chicago

Leigh, John Arthur 1985; MS, 1979, University of Illinois; PhD, 1983, University of Illinois

Linial, Maxine L. * 1970, (Research); PhD, 1970, Tufts University

Minnich, Scott Arthur 2012, (Affiliate); MS, 1977, University of Idaho; PhD, 1980, Iowa State University

Moseley, Stephen Lloyd * 1985, (Emeritus); MS, 1978, Catholic University of America; PhD, 1981, University of Washington

Mullins, James Ivan 1994; PhD, 1978, University of Minnesota

Nester, Eugene William 1962, (Emeritus); PhD, 1959, Case Western Reserve University

Overbaugh, Julie Maureen * 1988, (Affiliate); PhD, 1983, University of Colorado (campus unspecified)

Parsek, Matthew R. 2006; PhD, 1995, University of Illinois

Ramakrishnan, Lalita 2001, (Affiliate); MD, 1983, Baroda Medical College (India); PhD, 1990, Tufts University

Reuer, Quentin Boyd 2005, (Affiliate); PhD, 1987, Montana State University

Roman, Ann 2010, (Affiliate); PhD, 1973, University of California (San Diego)

Salama, Nina Reda 2001, (Affiliate); PhD, 1995, Stanford University

Sherris, John Charles * 1959, (Emeritus); MBBS, 1948, London Contemp. Dance School (England); MD, 1950, London Contemp. Dance School (England)

Sokourenko, Evgueni Veniaminovich 1999; MD, 1985, Moscow Medical Academy (Russia); PhD, 1989, All-Union Institute of Genetics and Selection of Industrial Microorganisms (Russia)

Staley, James Trotter * 1971, (Emeritus); MS, 1963, Ohio State University; PhD, 1967, University of California (Davis)

Stewart, Philip Shook 2003, (Affiliate); MS, 1985, Stanford University; PhD, 1988, Stanford University

Tomich, Gloria 2014, (Affiliate); MS, 2007, University of Alaska

Top, Eva Maria Rachel 2003, (Affiliate); MS, 1989, University of Ghent (Belgium); PhD, 1993, University of Ghent (Belgium)

Associate Professors

Andrews, Gerard P. 2005, (Affiliate); MS, 1983, University of New Hampshire; PhD, 1993, Uniformed Services University of The Health Sciences

Bessen, Richard Alan 2005, (Affiliate); MS, 1987, University of Wisconsin; PhD, 1991, University of Wisconsin

Bumgarner, Roger Eugene 1992; MS, 1983, Eastern Illinois University; PhD, 1988, University of Arizona

Fuller, Deborah 2010; PhD, 2001, University of Wisconsin (Madison)

Hardy, Michele Elaine 2003, (Affiliate); PhD, 1993, Texas A&M University

Hill, Walter Ernest * 1992, (Affiliate); PhD, 1972, University of Washington

Johnson, Jill 2003, (Affiliate); PhD, 1994, Mayo Medical School/Graduate School

Lara, Jimmie Cano * 1972, (Emeritus); MS, 1967, California State College; PhD, 1970, University of California (San Diego)

Lei, Benfang 2005, (Affiliate); MS, 1985, Beijing Univ of Chemical Tech. (China); MS, 1989, University of Texas (El Paso); PhD, 1993, University of Houston

Mittler, John Eduard 1999; PhD, 1992, University of California (Irvine)

Mougous, Joseph David 2007; PhD, 2004, University of California (Berkeley)

Strom, Mark Stephen 1979, (Affiliate); MS, 1982, University of Washington; PhD, 1992, University of Washington

Traxler, Beth A. * 1992; PhD, 1987, Carnegie Mellon University

Wood, Derek William 1997, (Affiliate); PhD, 1997, University of Arizona

Assistant Professors

Almeida, Roy Joseph 2011, (Affiliate); MS, 1980, Florida Institute of Technology; MS, 1983, University of Texas (San Antonio); MPH, 1987, University of North Carolina; DPH, 1990, University of North Carolina

Brawner, Diane L. 2001, (Affiliate); PhD, 1985, Montana State University

Halonen, Sandra 2004, (Affiliate); MS, 1984, University of Illinois; PhD, 1993, Louisiana State University

Merrih, Houra 2011; MS, 2006, Brandeis University; PhD, 2009, Brandeis University

Miller, Myrna M 2014, (Affiliate); DVM, 1984, Colorado State University; PhD, 2005, Cornell University

Neumann, Christopher Scott 2011, (Affiliate); AM, 2004, Harvard University; PhD, 2007, Harvard University

Pullman, John 2005, (Affiliate); MD, 1977, University of Rochester

Smith, Jason Gregory 2010; PhD, 2004, Harvard University

Voyich-Kane, Jovanka 2006, (Affiliate); PhD, 2001, Montana State University

Woodward, Joshua John 2012; PhD, 2009, University of California (Berkeley)

Senior Lecturers

Anderson, Denise Gayle 1982; MS, 1985, University of Washington; MS, 1987, University of Washington

Bicknell, Mary Ellen 1966, (Emeritus); MS, 1962, University of Washington

Chandler, Mark Steven 1998; MS, 1979, University of Washington; PhD, 1998, University of Illinois

Fulton, Janis Rae 1983, (Emeritus); MS, 1977, Montana State University

Gray, Kendall McLeod 2000; PhD, 1989, University of Southern California

Lecturers

Beins, Almira S. Punjabi 2004; PhD, 2003, Medical College of Wisconsin

Memmer, Ramona 1960, (Emeritus); MS, 1957, University of Washington

Parkhurst, Dale James 1959, (Emeritus); BS, 1960, University of Washington

Neurological Surgery

Professors

Chesnut, Randall M. 2004; MD, 1984, University of Washington

Ellenbogen, Richard Glen 1997; MD, 1983, Brown University

Hevner, Robert Francis 2000; MD, 1992, University of Michigan; PhD, 1992, University of Michigan

Holland, Eric Charles 2013; PhD, 1985, University of Chicago; MD, 1990, Stanford University

Horner, Philip John 2001; MS, 1992, Ohio State University; PhD, 1995, Ohio State University

Kelly, William Albert 1959, (Emeritus); MD, 1954, University of Cincinnati

Lein, Edward Sebastian 2005, (Affiliate); PhD, 1998, University of California (Berkeley)

Loeser, John David 1962, (Emeritus); MD, 1961, New York University

Morrison, Richard Steven * 1994; PhD, 1982, University of California (Los Angeles)

Ojemann, George Alvin 1960, (Emeritus); MD, 1959, University of Iowa

Ojemann, Jeffrey George 1999; MA, 1992, Washington University; MD, 1992, Washington University

Origitano, Thomas Charles 2012, (Affiliate); PhD, 1981, Loyola University (Chicago); MD, 1984, Loyola-Stritch School of Medicine

Ramirez, Jan-Marino 2008; Diploma, 1983, University of Regensburg (Germany); PhD, 1986, University of Regensburg (Germany)

Rostomily, Robert Cullen 1987; MD, 1987, Case Western Reserve University

Sekhar, Laligam Natarajan 2004; MBBS, 1974, University of Madras (India)

Shain, William 2010; PhD, 1972, Temple University

Silber, John Randall 1978, (Emeritus); PhD, 1977, University of Florida

Silbergeld, Daniel Lance 1984; MD, 1984, University of Cincinnati

Socrate, Simona 2010, (Affiliate); MSME, 1990, Massachusetts Institute of Technology; PhD, 1991, University of Rome (Italy); PhD, 1995, Massachusetts Institute of Technology

Temkin, Nancy Rosenberg * 1977; MS, 1971, University of Connecticut; PhD, 1976, State University of New York (Buffalo)

Thompson, Peter A. 2010, (Affiliate); MD, 1984, Brown University

Associate Professors

Browd, Samuel Robert 2007; MD, 2000, University of Florida; PhD, 2000, University of Florida

Chudy, Darko 2009, (Affiliate); MD, 1988, University of Zagreb (Croatia); MS, 1995, University of Zagreb (Croatia); PhD, 2000, University of Zagreb (Croatia)

D'Ambrosio, Raimondo 1995; PhD, 1995, University of Milan (Italy)

Kim, Louis Joong 2007; MD, 1999, Columbia University

Ojemann, Linda Moretti 1966, (Emeritus); MD, 1960, University of Illinois

Zhang, Fangyi 2003; MD, 1986, Capital University

Assistant Professors

Carney, Nancy A. 2006, (Affiliate); MS, 1995, Portland State University; PhD, 1998, Portland State University

Chang, Eric C. 2013; MD, 2005, Harvard Medical School

Crane, Courtney Ann 2012; PhD, 2005, University of Virginia

Ferreira, Manuel 2009; MD, 2002, Georgetown University; PhD, 2002, Georgetown University

Gelfenbeyn, Mikhail 2002; MD, 1978, Moscow State University (Russia); PhD, 1991, Moscow State University (Russia)

Giussani, Carlo Giorgio 2008, (Affiliate); MD, 2001, Università Degli Studi di Milano

Hofstetter, Christoph Paul 2014; MD, 2005, Medical University of Vienna (Austria); PhD, 2005, Karolinska Institute (Sweden)

Kalume, Franck K. 2004; PhD, 2004, University of Tennessee

Ko, Andrew Lin 2005; MD, 2005, University of Illinois (Chicago)

Lee, Amy 2011; MD, 2003, University of Texas (San Antonio)

Macdonald, Christine Louise 2014; MS, 2005, Washington University; PhD, 2007, Washington University

Narenthiran, Ganesalingam 2012, (Affiliate); MBChB, 1996, University of Aberdeen (UK)

Petroni, Gusta 2008, (Affiliate); MD, 1990, National University of Rosario; MS, 2008, Oregon Health Sciences University

Sviri, Gill 2002, (Affiliate); MD, 1996, Haifa University (Israel); MS, 2002, Haifa University (Israel)

Vilela, Marcelo Duarte 2000, (Affiliate); MD, 1995, Federal Univ of Minas Gerais (Brazil)

Lecturers

Kinoshita, Yoshito 1990; PhD, 1982, Tohoku University, Japan

Pridgeon, James Stephen 1973; MHA, 2007, University of Minnesota

Neurology

Professors

Becker, Kyra Jo 1996; MD, 1989, Duke University

Bird, Thomas Dwight 1968, (Emeritus); MD, 1968, Cornell University

Chamberlain, Jeffrey Scott 2000; PhD, 1985, University of Washington

Chamberlain, Marc Charles 2007; MS, 1973, University of California (Berkeley); MD, 1977, Columbia University

Doddrill, Carl Burton 1973, (Emeritus); MS, 1967, Purdue University; PhD, 1970, Purdue University

Farrell, Donald Francis 1971, (Emeritus); MD, 1965, George Washington University

Garden, Gwenn Anne 1987; MD, 1994, University of Washington; PhD, 1994, University of Washington

Gospe, Sidney Maloch Jr. 2000; MS, 1975, Stanford University; PhD, 1980, Duke University; MD, 1981, Duke University

Holmes, Mark David 1987; MD, 1977, Ohio State University
Longstreth, William Thatcher Jr. 1975; MD, 1975, University of Pennsylvania; MPH, 1982, University of Washington
Marra, Christina M. 1984; MS, 1979, Oregon State University; MD, 1984, University of Oregon

Miller, John William 1999; MD, 1977, University of Illinois; PhD, 1981, University of Illinois

Moeller, Thomas 1998, (Affiliate); MSc, 1992, Rupprechts Karl University; PhD, 1996, Free University Berlin

Novotny, Edward 2009; MD, 1979, St. Louis University

Poduslo, Shirley Ellen 2013, (Affiliate); MA, 1976, Johns Hopkins University; PhD, 1980, Johns Hopkins University

Ransom, Bruce Robert * 1995; MD, 1972, Washington University; PhD, 1972, Washington University

Samii, Ali 1998; MD, 1989, McGill University (Canada)

Saneto, Russell Patrick 2001; MS, 1975, San Diego State University; PhD, 1981, University of Texas (unspecified); DO, 1994, Des Moines University

Spain, William Jonathen * 1978; MD, 1977, Columbia University

Stahl, William Louis * 1967, (Emeritus); PhD, 1963, University of Pittsburgh

Swanson, Phillip Dean 1964; MD, 1958, Johns Hopkins University; PhD, 1964, University of London, UK

Tapscott, Stephen Justice 1986; MD, 1982, University of Pennsylvania; PhD, 1982, University of Pennsylvania

Tirschwell, David Lawrence 1991; MD, 1991, Cornell University

Watson, Nathaniel F. 1996; MD, 1996, University of North Carolina

Weiss, Michael David 2001; MD, 1991, Albert Einstein College of Medicine

Wilensky, Alan Joseph 1975, (Emeritus); MD, 1967, University of Western Ontario (Canada); PhD, 1973, University of Toronto (Canada)

Zunt, Joseph Raymond 1991; MD, 1991, University of Minnesota; MPH, 1998, University of Washington

Associate Professors

Amlie-Lefond, Catherine Marion 2002; MD, 1989, University of California (Los Angeles)

Bamford, Nigel Simon 2002; MD, 1992, University of Utah
Brown, Angus McLeod 1991, (Affiliate); PhD, 1990, University of Manchester (UK)

Consens, Flavia B. 2010; MD, 1992, Universidad de la Republica (Uruguay)

Distad, Barbara Jane 2001; MD, 1994, Medical College of Ohio

Drane, Daniel Louis 2001, (Affiliate); MS, 1989, Georgia State University; MS, 1993, Fuller Theological Seminary; PhD, 1994, Fuller Graduate School of Psychology

Khot, Sandeep Prakash 2002; MPH, 2002, Tulane University; MD, 2002, Tulane University

Kollros, Peter Richard 2010; PhD, 1981, University of Chicago; MD, 1982, University of Chicago

Kraus, Eric Edward 1991; MD, 1991, University of Minnesota

Kuratani, John David 1999; MD, 1990, Tulane University
Mrugala, Maciej Michal 2006; MD, 1995, University of Warsaw (Poland); PhD, 2003, Nicolaus Copernicus University (Poland); MPH, 2006, Harvard University

Owens, James Wyche Manier Jr. 2013; PhD, 1996, University of Washington; MD, 1998, University of Washington

Poolos, Nicholas Pete 2001; MD, 1991, Stanford University; PhD, 1991, Stanford University

Weinstein, Jonathan R. 1998; MD, 1998, University of California (Irvine); PhD, 1998, University of California (Irvine)

Wundes, Annette 2003; MD, 1995, Heinrich-Heine University (Germany)

Zabetian, Cyrus Parse 1994; MS, 1988, University of Washington; MD, 1994, University of Miami (Florida)

Assistant Professors

Blume, Heidi K. 1997; MD, 1997, Harvard University

Bozarth, Xiuhua L. 2014; MBBS, 1990, China Medical University (China); PhD, 2002, University of Hong Kong

Creutzfeldt, Claire Johanna 2004; MD, 2003, Ludwig-Maximilians University (Germany)

Domoto-Reilly, Kimiko 2005; MD, 2005, New York Medical College; MS, 2013, Harvard Medical School

Ferri, Raymond T. 2003; MD, 1995, Medical College of Pennsylvania; PhD, 1995, Medical College of Pennsylvania

Gregorevic, Paul 2002, (Affiliate); PhD, 2000, University of Melbourne (Australia)

Hakimian, Shahin 2004; MA, 2000, Washington University; MD, 2000, Washington University

Hu, Shu-Ching 2001; MD, 1993, National Taiwan University; PhD, 2001, Johns Hopkins University

Jayadev, Suman 2000; MD, 2000, New York Medical College

Kim, Hojoong Michael 2003; MD, 2002, University of Illinois

Kim, Michelle Se-Kyung 2014; MA, 2006, Fuller Graduate School of Psychology; MA, 2008, Fuller Theological Seminary; PhD, 2011, Fuller Graduate School of Psychology

Lopez, Jonathan 2014; MD, 2007, Suny Brooklyn

Montano, Silvia Margarita 2006, (Affiliate); MD, 1991, Universidad De La Habana (Cuba); MPH, 2002, University of Washington

Oakes, Patricia Kathleen 2002; JD, 1992, Georgetown University; MD, 2002, University of Michigan

Oakley, John Christopher 1993; MD, 2001, University of Washington; PhD, 2001, University of Washington

Phatak, Vaishali Subhash 2007; MS, 1998, Lewis And Clark College; PhD, 2005, University of Wisconsin (Milwaukee)

Ransom, Christopher Bruce 2010; PhD, 2001, University of Alabama, Birmingham; MD, 2003, University of Alabama, Birmingham

Steinman, Kyle J. 2011; MD, 2001, University of California (Los Angeles); MS, 2008, University of California (San Francisco)

Tsai, Jeffrey Jen-Chieh 2012; MSEE, 1994, Stanford University; PhD, 2001, Cornell University; MD, 2003, Cornell University

von Geldern, Gloria 2007; MD, 2004, University of Leipzig (Germany)

Wang, Leo Hong-Li 2005; MD, 2005, Washington University; PhD, 2005, Washington University

Lecturers

Chen, Dong-Hui 1999; MD, 1990, Shanghai Medical University (China); PhD, 1999, Kobe University, Japan

Stockbridge, Margaret Ann 1999; PhD, 2011, University of Washington

Ye, Zu-Cheng 2000; MS, 1994, Peking University (China); PhD, 1999, University of Alabama

Obstetrics and Gynecology

Professors

Benedetti, Thomas Joseph * 1979; MD, 1973, University of Washington

Brown, Zane A. * 1976; MD, 1966, Temple University

Cheng, Edith Yee Tak 1987; MS, 1979, Sarah Lawrence College; MD, 1987, University of Washington

Chiang, Seine 2006; MD, 1990, Oregon Health Sciences University

Easterling, Thomas Rupert 1985; MD, 1981, University of North Carolina, Chapel Hill

Eckert, Linda O'Neal 1992; MD, 1987, University of California (San Diego)

Eschenbach, David Arthur 1968; MD, 1968, University of Wisconsin

Goff, Barbara Ann 1993; MD, 1986, University of Pennsylvania

Gravett, Michael G. 1977; MD, 1977, University of California (Los Angeles)

Greer, Benjamin Edward 1980; MD, 1966, University of Pennsylvania

Hickok, Durlin Edward * 1974, (Clinical); MD, 1973, University of Michigan; MPH, 1980, University of Washington

Hitti, Jane Evelyn 1993; MD, 1989, University of Vermont

Lein, John Nave 1963, (Emeritus); MD, 1955, University of Washington

Lentz, Gretchen Mary 1986; MD, 1986, University of Washington

Patton, Dorothy Louise 1981; MS, 1973, University of Puget Sound; PhD, 1981, University of Washington

Reed, Susan Dalton 1991; MS, 1979, Sarah Lawrence College; MD, 1986, Stanford University

Schulkin, Jay 2012, (Acting); PhD, 1983, University of Pennsylvania

Shy, Kirkwood Kline * 1973, (Emeritus); MD, 1973, Wayne State University; MPH, 1979, University of Washington

Steiner, Robert Alan 1974; PhD, 1975, University of Oregon

Stenchever, Morton A. 1976, (Emeritus); MD, 1956, State University of New York (Buffalo)

Swisher, Elizabeth Mary 1992; MD, 1992, University of California (San Diego)

Tamimi, Hisham Kamel 1977; MD, 1969, Cairo University (Egypt)

Vontver, Louis Andrew 1964, (Emeritus); MD, 1960, University of Minnesota; MEd, 1970, University of Washington

Associate Professors

Adams Waldorf, Kristina M. 1992; MD, 1998, Mayo Medical School/Graduate School

Amies Oelschlagel, Anne-Marie Elizabeth 1997; MD, 1997, Vanderbilt University

Fialkow, Michael Frederick 1994; MD, 1997, University of Washington; MPH, 2006, University of Washington

Gardella, Carolyn Marie 1995; MD, 1995, State Univ of New York (Stony Brook)

Gray, Heidi J. 1997; MD, 1997, University of California (Los Angeles)

Halbert, Sheridan Allen * 1973, (Affiliate); PhD, 1972, University of Washington

Irwin, Tracy Erin 2014; MPH, 2001, Northwestern University; MD, 2001, Northwestern University

Mao, Constance 1988; MD, 1988, University of Southern California

Mendiratta, Viksa 1998; MD, 1994, Ohio State University

Moore, Donald Earl 1977, (Emeritus); MD, 1967, Case Western Reserve University

Prager, Sarah Ward 2006; MD, 2000, University of Texas (Southwestern); MAS, 2006, University of California (San Francisco)

Assistant Professors

Debiec, Katherine Elizabeth 1999; MD, 2005, University of Washington

Hohmann, John George 1995, (Affiliate); PhD, 2001, University of Washington

Jolley, Jennifer Adams 2011; MD, 2004, University of California (Irvine)

Liao, John Ben 2010; MD, 1998, George Washington University; PhD, 2007, Yale University

Ma, Kimberly Kari 2011; MD, 2007, Vanderbilt University

Stephenson-Famy, Alyssa B. 1995; MD, 2004, University of Washington

Urban, Renata Rose 2011; MD, 2004, Boston University

Ophthalmology

Professors

Chen, Philip Peihai 1996; MD, 1991, Yale University

Kalina, Robert Edward 1967, (Emeritus); MD, 1960, University of Minnesota

Kinyoun, James Lovgren 1978; MD, 1971, University of Nebraska

Milam, Ann 1968, (Emeritus); PhD, 1967, University of Texas (Southwestern)

Neitz, John 2009; PhD, 1986, University of California (Santa Barbara)

Neitz, Maureen 2009; PhD, 1986, University of California (Santa Barbara)

Orcutt, James Craig 1977; PhD, 1976, University of Colorado (Denver); MD, 1977, University of Colorado (Denver)

Saari, John Charles * 1970, (Emeritus); MS, 1963, University of Minnesota; PhD, 1970, University of Washington

Shen, Tueng T. 2003; PhD, 1994, Massachusetts Institute of Technology; MD, 1997, Harvard University

Van Gelder, Russell Neil 2008; MD, 1994, Stanford University; PhD, 1994, Stanford University

Weiss, Avery Harold 1991; MD, 1974, Miami University (Ohio)

Associate Professors

Chuang, Elaine Lucille 1979, (Emeritus); MD, 1979, University of Texas (San Antonio)

Mudumbai, Raghu 2000; MD, 1994, Suny Brooklyn

Tarczy-Hornoch, Kristina 1998; DPhil, 1997, University of Oxford (UK); MD, 1998, University of California (San Francisco); MS, 2007, University of Southern California

Vemulakonda, Gurunadh 2008; MD, 2002, Washington University

Assistant Professors

Attaran Rezaei, Kasra 2014; MD, 2001, Tehran Azad University

Cabrera, Michelle Trager 2014; MD, 2005, University of California (San Francisco)

Chao, Jennifer Rayming 2009; PhD, 2002, Yale University; MD, 2003, Yale University

Francis, Courtney 2010; MD, 2005, University of Rochester

Hanna, Eissa M. 2012; MD, 2007, University of California (Davis)

Herlihy, Erin Patricia 2004; MD, 2003, Loyola University (Chicago)

Kelly, John Patrick 1993, (Affiliate); MA, 1989, State Univ of New York (Stony Brook); PhD, 1992, State Univ of New York (Stony Brook)

Lam, Deborah Lay Yan 2002; MD, 2002, Northwestern University

Lamba, Deepak Ashok 2003, (Affiliate); MBBS, 2000, University of Mumbai (India); MS, 2003, University of Illinois (Chicago); PhD, 2007, University of Washington

Lee, Bryan S. 2012; JD, 2005, Harvard University; MD, 2007, Washington University

Taravati, Parisa 2009; MD, 2005, University of Iowa

Wen, Joanne C. 2014; MD, 2008, University of California (Los Angeles)

Orthopaedics

Professors

Barei, David Paul 1999; MD, 1991, University of Ottawa (Canada); MSc, 1998, University of Ottawa (Canada)

Bellabarba, Carlo 1999; MD, 1992, McGill University (Canada)

Benirschke, Stephen Kurt 1985; MD, 1979, Case Western Reserve University

Bigos, Stanley James 1980, (Emeritus); MD, 1975, University of Missouri

Cavanagh, Peter Robert 2008; PhD, 1972, University of London, UK; DSc, 2004, University of London, UK

Chansky, Howard Alan 1992; MD, 1987, University of Pennsylvania

Chapman, Jens Robert 1990; MD, 1983, Technical University of Munich (Germany)

Conrad, Ernest Upshur III 1986; MD, 1979, University of Virginia

Eyre, David Rodney 1985; PhD, 1969, University of Leeds (UK)

Gross, Ted S. 2000; MS, 1985, Pennsylvania State University; PhD, 1993, State Univ of New York (Stony Brook)

Hanel, Douglas Paul 1992; MD, 1977, St Louis University

Hansen, Sigvard Theodore 1965, (Emeritus); MD, 1961, University of Washington

Henley, Michael Bradford 1988; MD, 1979, University of Washington

Leopold, Seth Samuel 2002; MD, 1993, Cornell University

Matsen, Frederick A. III * 1971; MD, 1968, Baylor College of Medicine

Mosca, Vincent Stephen 1985; MD, 1978, University of Rochester

Nork, Sean Edward 1997; MD, 1992, University of California (San Diego)

Sangeorzan, Bruce Joseph 1986; MD, 1981, Wayne State University

Smith, Douglas George 1989; MD, 1984, University of Chicago

Staheli, Lynn Taylor 1963, (Emeritus); MD, 1959, University of Utah

Strong, Douglas Michael 1989, (Affiliate); PhD, 1973, Medical College of Wisconsin

Teitz, Carol Claire 1974; MD, 1974, Yale University

Twaddle, Bruce Charles 2013; MBBS, 1984, University of Auckland (New Zealand)

Yandow, Suzanne Marie 2014, (Acting); MD, 1984, University of South Florida

Associate Professors

Allan, Christopher Hudson 1998; MD, 1992, Northwestern University

Beingessner, Daphne M. 2003; MD, 1997, University of Western Ontario (Canada); MS, 2003, University of Western Ontario (Canada)

Brage, Michael Erik 1991; MD, 1986, University of Illinois

Bransford, Richard Jackson 1996; MD, 1996, Vanderbilt University

Dunbar, Robert Paul 2002; MD, 1993, Georgetown University
Ferguson, Tania Ann 2013; MD, 1999, University of California (San Francisco); MS, 2011, University of California (Davis)
Green, John Robert III 2002; MD, 1991, University of Cincinnati
Huang, Jerry 2008; MD, 2001, University of California (Los Angeles)
Larson, Roger Vernal 1982; MD, 1973, University of Utah
Manner, Paul A. 2006; MD, 1991, McGill University (Canada)
Schmale, Gregory A. 2000; MEd, 1984, Southern Illinois University; MD, 1994, University of Washington
Taitzman, Lisa Audrie 2001; MD, 1994, Brown University; MPH, 1995, Harvard University
Warne, Winston John 2007; MD, 1989, Uniformed Services University of The Health Sciences
White, Klane Keele 2006; MS, 1993, University of Southern California; MD, 1997, George Washington University

Assistant Professors

Davidson, Darin Justyn 2011; MD, 2003, University of Ottawa (Canada); MHS, 2006, University of British Columbia (Canada)
Fernando, Navin Dhanushka 2014; MD, 2007, University of Western Ontario (Canada)
Firoozabadi, Reza 2011; MA, 2001, Boston University; MD, 2005, Boston University
Gee, Albert Ooguen 2012; MD, 2005, Washington University
Hsu, Jason E 2014; MD, 2007, Northwestern University
Kennedy, Stephen A. 2011; MD, 2006, University of British Columbia (Canada)
Kleweno, Conor Patrick 1997; MD, 2007, Harvard Medical School
Kwon, Ronald Young 2011; MS, 2005, Stanford University; PhD, 2008, Stanford University
Sassoon, Adam Anton 2014; MD, 2007, University of Southern California; MS, 2012, Mayo Medical School/ Graduate School

Otolaryngology – Head and Neck Surgery

Professors

Chen, Chu 1982, (Affiliate); MS, 1971, Ohio State University; PhD, 1982, University of Washington
Coltrera, Marc Dante 1986; MD, 1981, Yale University
Donaldson, James A. 1965, (Emeritus); MD, 1954, University of Minnesota
Duckert, Larry Gene 1978; MD, 1972, University of Minnesota; PhD, 1977, University of Minnesota
Futran, Neal David 1995; DMD, 1982, University of Pennsylvania; MD, 1987, St Univ of New York (Downstate Med Ctr)
Gates, George Arthur 1993, (Emeritus); MD, 1959, University of Michigan
Hillel, Allen David * 1983; MA, 1972, Stanford University; MD, 1976, Stanford University
Lurie, Diana Isabel 1990, (Affiliate); PhD, 1990, University of Pennsylvania
Manning, Scott Clark 1995; MD, 1980, Tulane University
Merati, Albert Lincoln 2007; MD, 1991, University of Washington
Moe, Kristen Sean 1989; MD, 1989, University of Washington

Norton, Susan J. * 1991; MS, 1973, Purdue University; PhD, 1982, University of Washington
Perkins, Jonathan Andrew 1994; DO, 1987, Osteopathic Medicine And Surgery (Iowa)
Pujol, Remy 2003, (Affiliate); PhD, 1971, University of Montpellier II (France)
Rubel, Edwin W. 1986; MS, 1967, Michigan State University; PhD, 1969, Michigan State University
Rubinstein, Jay T. 2004; MS, 1983, Brown University; MD, 1987, University of Washington; PhD, 1988, University of Washington
Sie, Kathleen C.Y. 1984; MD, 1984, University of Michigan
Tempel, Bruce L. 1988; PhD, 1983, Princeton University
Weaver, Edward Malcolm 1998; MD, 1993, Yale University; MPH, 2000, University of Washington
Weymuller, Ernest Alfred 1978; MD, 1966, Harvard University

Associate Professors

Davis, Greg E. 1995; MD, 2000, University of Washington; MPH, 2003, University of Washington
Feeney, Martin Patrick 1986, (Affiliate); MA, 1979, Washington State University; PhD, 1993, University of Washington
Hume, Clifford R. 1996; PhD, 1988, Cornell University; MD, 1996, Cornell University
Inglis, Andrew Franklin Jr. 1983; MD, 1981, Medical College of Pennsylvania
Mendez, Eduardo 1999; MD, 1999, University of Maryland
Meyer, Tanya Kim 2009; MD, 1996, University of California (San Diego)
Ou, Henry 1998; MA, 1998, Washington University; MD, 1998, Washington University
Pariikh, Sanjay Rajendra 2011; MD, 1994, University of British Columbia (Canada)
Parkinson, Aaron J 2014; MA, 1994, Macquarie University (Australia); PhD, 2006, University of Iowa
Rees, Thomas Stevenson 1971; MA, 1969, University of Redlands; PhD, 1972, University of Washington
Whipple, Mark Eliot 2001; MD, 1991, University of Washington; MS, 2001, Massachusetts Institute of Technology

Assistant Professors

Bhrany, Amit Dave 2001; MD, 2001, Boston University
Bohannon, Isaac A. 2010; MD, 2004, Drexel University
Horn, David L. 2010; MS, 1997, Georgetown University; MD, 2002, Medical College of Wisconsin
Houlton, Jeffrey J. 2014; MD, 2008, The University of Texas Medical Branch
Johnson, Kaalan Erik 2013; MD, 2004, Loma Linda University
Sardesai, Maya Guirish 2008; MD, 2002, Queens University
Lecturers
Nie, Kaibao 2005; MS, 1991, Shandong University (China); PhD, 1999, Tsinghua University (China)
Xu, Chang 2001; MS, 1989, Huazhong Agricultural University (China); MS, 2001, Bowling Green State University; PhD, 2002, Bowling Green State University

Pathology

Professors

Alpers, Charles E. 1986; MD, 1978, University of Rochester
Argenyi, Zsolt Balazs 2001; MD, 1978, Semmelweis Medical University (Hungary)
Bowen-Pope, Daniel Fick * 1979, (Emeritus); PhD, 1979, University of California (Berkeley)

Byers, Peter Howard 1974; MD, 1969, Case Western Reserve University
Crispe, Ian Nicholas 2009; MBBS, 1978, University of London, UK; PhD, 1984, University of London, UK
Disteche, Christine M. * 1980; LicMed, 1970, University of Liege (Belgium); PhD, 1976, University of Liege (Belgium)
Fang, Min 2008; MD, 1990, Shanghai Medical University (China); PhD, 1998, University of Alabama
Fligner, Corinne Lina 1976; MD, 1976, University of New Mexico
Garcia, Rochelle Lorraine 1988; MD, 1989, University of Washington
Grahame, Rodney 2010, (Affiliate); MBBS, 1955, University of London, UK; MD, 1964, University of London, UK
Hackman, Robert Cordell 1971, (Emeritus); MD, 1971, Stanford University
Horwitz, Marshall Scott 1983; PhD, 1988, University of Washington; MD, 1990, University of Washington
Kapur, Raj Paul 1988; PhD, 1986, University of Southern California; MD, 1988, University of Southern California
Kemp, Christopher James 1996, (Affiliate); MS, 1984, Oregon State University; PhD, 1989, University of Wisconsin (Madison)
Kiviat, Nancy Carol * 1975; MA, 1969, University of Washington; MD, 1975, University of Washington
Loeb, Lawrence Arthur 1978; MD, 1961, New York University; PhD, 1967, University of California (Berkeley)
Martin, George M. 1957, (Emeritus); MD, 1953, University of Washington
Miller, Arthur Dusty * 1987, (Affiliate); PhD, 1982, Stanford University
Monnat, Raymond Joseph Jr. * 1976; MD, 1976, University of Chicago
Montine, Thomas Jude 2002; PhD, 1988, University of Rochester; MD, 1991, McGill University (Canada)
Murry, Charles Emerson * 1989; MD, 1989, Duke University; PhD, 1989, Duke University
Narayanan, Appadurai Sampath * 1971, (Emeritus); MSc, 1963, University of Madras (India); PhD, 1967, University of Madras (India)
Nicosia, Roberto Francesco 1999; MD, 1976, University of Rome (Italy); PhD, 1984, Medical College of Pennsylvania
Norwood, Thomas H. * 1968; MD, 1968, University of Maryland
Porter, Peggy Lee 1987; MD, 1987, University of New Mexico
Preston, Bradley D. 2002, (Affiliate); PhD, 1983, University of Wisconsin
Promislow, Daniel Edward Lee 2013; PhD, 1990, Oxford University (UK)
Raab, Stephen Spencer 2011, (Affiliate); MD, 1988, State University of New York (Syracuse)
Rabinovitch, Peter Samuel * 1980; MD, 1979, University of Washington; PhD, 1980, University of Washington
Raines, Elaine White * 1975, (Research); MS, 1975, University of California (San Francisco)
Reay, Donald Thomas 1975, (Emeritus); MD, 1963, University of Utah; MPA, 1978, Seattle University
Reichenbach, Dennis D. 1960, (Emeritus); MD, 1958, University of Washington
Sale, George Edgar 1971, (Emeritus); MD, 1968, Stanford University
Schmidt, Rodney Alan 1984; MD, 1984, University of Washington; PhD, 1984, University of Washington
Schwartz, Stephen Mark 1967; MD, 1967, Boston University; PhD, 1973, University of Washington
Shaw, Cheng-Mei 1960, (Emeritus); MD, 1950, National Taiwan University

Shmookler Reis, Robert Joseph 2012, (Affiliate); DPhil, 1972, University of Sussex (UK)

Shulman, Howard Michael 1972, (Emeritus); MD, 1971, University of California (Los Angeles)

Siebert, Joseph Robert 1986; MS, 1975, University of Pittsburgh; MA, 1984, University of Washington; PhD, 1985, University of Washington

Sumi, Shuzo Mark 1963, (Emeritus); MD, 1956, University of Toronto (Canada)

True, Lawrence Dashiell * 1971; MD, 1971, Tulane University

Upton, Melissa Perry 2002; MD, 1978, Northwestern University

White, Lon Ray 2010, (Affiliate); MD, 1963, University of Washington; MPH, 1980, Johns Hopkins University

Wight, Thomas N. Ahum * 1973, (Affiliate); MS, 1968, University of New Hampshire; PhD, 1972, University of New Hampshire

Wolf, Norman S. * 1968, (Emeritus); DVM, 1953, Kansas State University; PhD, 1960, Northwestern University

Yeh, Meng-Che 2002; MD, 1989, National Taiwan University; PhD, 1997, University of Pennsylvania

Zhang, Jing 2002; MS, 1987, Second Military Medical University, China; PhD, 1995, Duke University

Associate Professors

Bielas, Jason H. 2003, (Affiliate); PhD, 2003, York University (Canada)

Deutsch, Gail 2008; MD, 1993, University of Chicago

Dintzis, Suzanne M. 2008; MD, 1993, Stanford University; PhD, 1993, Stanford University

Finn, Laura Susan 1998; MD, 1989, Pennsylvania State University

Hoch, Benjamin 2008; MD, 1999, Thomas Jefferson University

Kaeberlein, Matt Robert 2003; PhD, 2002, Massachusetts Institute of Technology

Kinsella, Michael George 1981, (Affiliate); PhD, 1978, University of Oregon

Laflamme, Michael A. 1999; PhD, 1998, Emory University; MD, 1999, Emory University

Loeb, Keith Randy 1995; PhD, 1994, Medical College of Wisconsin; MD, 1995, Medical College of Wisconsin

Mahoney, William 2004; PhD, 2004, University of Maryland

Myerson, David Henry * 1985; MD, 1979, Albert Einstein College of Medicine; PhD, 1979, Albert Einstein College of Medicine

Patterson, Kathleen 1992; MD, 1976, University of Iowa
Qvarnstrom, Eva Elisabet 1984, (Affiliate); DDS, 1975, University of Lund (Sweden); PhD, 1984, University of Lund (Sweden)

Ren, Jun 2005, (Affiliate); PhD, 1994, University of Alberta, Canada

Schmechel, Stephen Christopher 1998; MD, 1997, University of Minnesota; PhD, 1999, University of Minnesota

Schwarze, Ulrike 1993; MD, 1992, Technische Universität (Germany)

Smith, Kelly David 1996; MD, 1996, University of Iowa; PhD, 1996, University of Iowa

Sonnen, Joshua A. 2005, (Affiliate); MD, 2002, University of Southern California

Swisshelm, Karen Lynn * 1980, (Affiliate); PhD, 1989, University of Washington

Taniguchi, Toshiyasu 2008, (Affiliate); MD, 1990, University of Tokyo (Japan); PhD, 1999, University of Tokyo (Japan)

Thorning, David Rex 1969; MD, 1965, University of Kansas
Vasioukhin, Valeri 2002, (Affiliate); PhD, 1992, Academy of Science (Ussr)

Assistant Professors

Adler, David Alan 1982, (Affiliate); MS, 1978, State University of New York (Buffalo); PhD, 1996, University of Washington

Campbell, Jean Spear 1990, (Affiliate); PhD, 1990, University of Wisconsin (Madison)

Chen, Eleanor Y. 2013; MD, 2006, University of Minnesota; PhD, 2006, University of Minnesota

Dorschner, Michael Owen 1998; PhD, 1998, University of Wisconsin (Milwaukee)

Durnam, Diane Marie 1985, (Affiliate); PhD, 1981, University of Washington

Keene, Christopher Dirk 2005; PhD, 2003, University of Minnesota; MD, 2005, University of Minnesota

Liu, Yajuan 1995; PhD, 1995, State University of New York (Syracuse)

Najafian, Behzad 2010; MD, 1996, Tehran University (Iran)

Parrilla-Castellar, Edgardo Ramon 2013; PhD, 2004, Mayo Medical School/Graduate School; MD, 2006, University of Puerto Rico

Rendi, Mara Hester 2009; PhD, 2004, Dartmouth Medical School; MD, 2009, Dartmouth Medical School

Reyes, Morayma 2003; DPhil, 2001, University of Minnesota; MD, 2003, University of Minnesota

Risques, Rosa Ana 2003; PhD, 2001, Autonomous University of Barcelona

Sabath, Annette P. 1992, (Affiliate); MD, 1998, Oregon Health Sciences University

Tretiakova, Maria Sergeevna 2012; MD, 1994, Northwestern State Medical University named after I.I. Mechnikov (Russia); PhD, 1997, North-Western State Medical University named after I.I. Mechnikov (Russia)

Vakar-Lopez, Funda 2006; MD, 1988, University of Istanbul (Turkey)

Westerhoff, Maria Ahn 2011; MD, 2006, University of Illinois

Williams, Kandace Jo 1988, (Affiliate); PhD, 1987, Dartmouth University

Pediatrics

Professors

Adam, Margaret 2009; MS, 1993, Stanford University; MD, 1998, Stanford University

Baden, Harris Philip 1992; MD, 1989, University of Texas (Galveston)

Baker, Kevin Scott 2009; MD, 1988, University of Nebraska, Omaha; MS, 2002, University of Minnesota

Bamshad, Michael Joseph 2005; MD, 1989, University of Missouri; MA, 1991, University of Kansas

Beier, David Randolph 2012; MD, 1984, University of Washington; PhD, 1985, University of Washington

Bennett, Forrest Curt 1971; MD, 1970, University of Minnesota

Bergman, Abraham Baer 1964, (Emeritus); MD, 1958, Case Western Reserve University

Bernstein, Irwin David 1971; MD, 1967, New York University

Brei, Timothy John 2013; MD, 1984, University of Nebraska, Omaha

Breuner, Cora Collette 1991; MD, 1982, Thomas Jefferson University; MPH, 1998, University of Washington

Brogan, Thomas Vincent 1993; MD, 1990, University of California (Davis)

Burns, Jane Louise 1978; MD, 1978, University of Washington

Carpenter, Paul Andrew 1995; MBBS, 1988, University of Sydney (Australia)

Chance, Phillip Frazier 1980, (Emeritus); MD, 1978, University of Tennessee

Chen, Shi-Han 1972, (Emeritus); MS, 1963, National Taiwan University; PhD, 1968, University of Texas (Austin)

Christakis, Dimitri Alexander 1993; MD, 1993, University of Pennsylvania

Clarren, Sterling Keith 1974, (Affiliate); MD, 1973, University of Minnesota

Cox, Timothy Chilton 2006; PhD, 1994, University of Adelaide (Australia)

Cunningham, Michael Lawrence 1988; MD, 1988, University of Vermont; PhD, 1996, University of Washington

Del Beccaro, Mark Andrew 1985; MD, 1985, University of Washington

Diekema, Douglas Scott 1990; MD, 1985, University of North Carolina; MPH, 1993, University of Washington

Dobyns, William B. 2010; MD, 1978, Mayo Medical School/Graduate School

Emery, Helen M. 1973, (Emeritus); MBBS, 1971, University of Adelaide (Australia)

Englund, Janet A. 2002; MD, 1980, University of Michigan

Fantel, Alan G. * 1973, (Emeritus); MA, 1969, University of Oregon; PhD, 1974, University of Washington

Flynn, Joseph Thomas 2007; MD, 1987, State University of New York (Syracuse); MS, 2003, Albert Einstein College of Medicine

Frenkel, Lisa Marie 1994; MD, 1987, University of Kansas

Geyer, Jeffrey Russell 1982; MD, 1977, Wayne State University

Gibson, Ronald Lyne 1982; MD, 1982, Washington University; PhD, 1982, Washington University

Glass, Ian Amos 2000; MBChB, 1979, University of Otago (New Zealand); MD, 1991, University of Otago (New Zealand)

Gleason, Christine Anne 1997; MD, 1979, University of Rochester

Hahn, Sihoun 2006; MD, 1983, Korea University (Korea); PhD, 1995, Korea University (Korea)

Hansen, Thomas Nanastad 2005; MD, 1973, Baylor College of Medicine

Hawkins, Douglas Scott 1990; MD, 1990, Harvard University

Hayden, Patricia Wills 1958, (Emeritus); MD, 1953, University of Rochester

Hodson, William Alan 1966, (Emeritus); MD, 1959, University of Manitoba (Canada); MMSc, 1964, Ohio State University

Horn, Ivor Braden 2014; MD, 1994, Indiana University; MPH, 1999, George Washington University

Horslen, Simon Peter 2005; MBChB, 1984, University of Bristol (UK)

Jackson, John Craig 1979; MD, 1979, Vanderbilt University

Jenny, Carole 1983; MD, 1972, University of Washington; MBA, 1976, University of Pennsylvania

Jensen, Michael C. 2010; MD, 1990, University of Pennsylvania

Jones, Thomas Kenny 1978; MD, 1978, Jefferson Medical College

Juul Ledbetter, Sandra Elizabeth 1981; MD, 1981, University of Washington; PhD, 1997, University of Chicago

Klein, Eileen Joy 1988; MD, 1988, Johns Hopkins University

Law, Yuk Ming 2006; MD, 1987, University of California (Los Angeles)

Lewin, Mark Brent 2001; MA, 1982, University of California (Berkeley); MS, 1987, Hahnemann University; MD, 1991, University of Southern California

Liu, Lenna Li-Na 1992; MD, 1992, University of Pennsylvania; MPH, 1997, University of Washington

Majesky, Mark W. 1981; PhD, 1984, University of Washington

Mangione-Smith, Rita M. 2005; MD, 1991, Wayne State University; MPH, 1997, University of California (Los Angeles)

Marcuse, Edgar Korn 1971, (Emeritus); MD, 1967, Stanford University; MPH, 1973, University of Washington

Marshall, Susan Gayle 1979; MD, 1980, University of California (Los Angeles)

Matthews, Dana Christine 1984; MD, 1981, University of Washington

Mayock, Dennis Edward 1978; MD, 1975, Ohio State University

McDonald, Ruth Ann 1987; MD, 1987, University of Minnesota

McLaughlin, John F. 1970, (Emeritus); MD, 1970, Northwestern University

McPhillips, Heather Anne 1998; MD, 1994, University of Chicago

McQuinn, Tim Charles 2009; MD, 1979, University of Washington

Melzer, Sanford Morris 1990; MD, 1982, Mt Sinai School of Medicine

Meshinchi, Soheil 1997; PhD, 1990, University of Michigan, Ann Arbor; MD, 1994, Wayne State University

Miao, Carol H. 1981; MS, 1980, University of Wisconsin; PhD, 1987, University of Washington

Millen, Kathleen J. 2010; PhD, 1995, University of Toronto (Canada)

Murray, Karen Field 1990; MD, 1990, Johns Hopkins University

Neff, John M. 1981, (Emeritus); MD, 1960, Harvard University

Ning, Xue-Han 1994, (Affiliate); MD, 1960, Shanghai Medical University (China)

Novack, Alvin H. 1979, (Emeritus); MD, 1958, Temple University

Ochs, Hans Deiter 1968; MD, 1969, University of Freiburg (Germany)

Olson, James Michael 1991; MD, 1991, University of Michigan

Osborne, William R. A. 1975, (Emeritus); MSc, 1970, University of Bristol (UK); PhD, 1972, University of London, UK

Pagon, Roberta Anderson 1972; MD, 1972, Harvard University

Park, Julie Ruggieri 1988; MD, 1988, University of Vermont

Pendergrass, Thomas Wayne 1975; MD, 1971, University of Tennessee; MPH, 1979, University of Washington

Pihoker, Catherine Vanderwilt 1997; MD, 1987, Albany Medical College

Portman, Michael Allan 1992; MD, 1980, University of Cincinnati

Quan, Linda Knight 1971, (Emeritus); MS, 1969, Dartmouth College; MD, 1971, University of Washington

Ramsey, Bonnie Watts 1978; MD, 1976, Harvard University

Rawlings, David Jeffrey 2001; MD, 1984, University of North Carolina

Redding, Gregory James 1980; MD, 1974, Stanford University

Richardson, Laura Paul 1998; MD, 1994, University of Michigan; MPH, 2001, University of Washington

Rivara, Frederick Peter II * 1978; MD, 1974, University of Pennsylvania; PhD, 1980, University of Washington

Rose, Timothy Michael 1991; PhD, 1981, University of Geneva (Switzerland)

Rosenfeld, Margaret 1988; MD, 1988, Harvard University; MPH, 1995, University of Washington

Rubens, Craig Edward 1982, (Affiliate); PhD, 1978, Medical University of South Carolina; MD, 1982, University of Washington

Saelens, Brian E. 2006; MA, 1996, State University of New York (Buffalo)

Sanders, Jean Emily 1975, (Emeritus); MD, 1970, University of Iowa

Scharenberg, Andrew Mark 2000; MD, 1990, University of North Carolina

Lecturers

Emerson, Julia Childress 1987; MD, 1981, University of Virginia; MPH, 1987, University of Washington

Ogata Grothen, Beth W. 1997; MS, 1998, University of Washington

Polifka, Janine Edwards 1988; MA, 1984, University of Louisville; PhD, 1985, University of Louisville

Beavo, Joseph Anders Jr. 1977; PhD, 1970, Vanderbilt University

Bridges, Richard J. 2003, (Affiliate); PhD, 1984, Cornell University

Catterall, William A. * 1977; PhD, 1972, Johns Hopkins University

Chavkin, Charles 1984; PhD, 1982, Stanford University

Juchau, Mont Rawlings * 1969, (Emeritus); PhD, 1966, University of Iowa

Loomis, Ted Albert * 1947, (Emeritus); MS, 1941, University of Buffalo; PhD, 1943, University of Buffalo; MD, 1946, Yale University

McKnight, George Stanley 1976; PhD, 1976, Stanford University

Moon, Randall Todd * 1985; PhD, 1982, University of Washington

Nathanson, Neil Marc * 1979; PhD, 1975, Brandeis University

Scott, John Donald 2008; PhD, 1983, University of Aberdeen (UK)

Slattery, John Thomas 1978; PhD, 1978, State University of New York (Buffalo)

Stella, Nephi 1999; PhD, 1995, Ecole Polytechnique Federale De Lausanne

Storm, Daniel Ralph 1978; MS, 1967, University of Washington; PhD, 1971, University of California (Berkeley)

Vincenzi, Frank Foster * 1967, (Emeritus); MS, 1962, University of Washington; PhD, 1965, University of Washington

Zheng, Ning 2002; PhD, 1997, University of Texas (Southwestern)

Associate Professors

Daniels, Christopher K. 2003, (Affiliate); MS, 1975, University of Wisconsin; PhD, 1982, Stanford University

Gardner, Richard George 2006; PhD, 2000, University of California (San Diego)

Hague, Chris 2005; PhD, 2002, Creighton University

Hinds, Thomas Richard 1974, (Emeritus); PhD, 1972, Oregon State University

Shadle, Susan Emery 2003, (Affiliate); PhD, 1994, Stanford University

Wang, Edith Harriet * 1996; MA, 1987, Columbia University; MPhil, 1988, Columbia University; PhD, 1991, Columbia University

Assistant Professors

Balet Sindreu, Carlos 2004, (Affiliate); PhD, 2004, University of Barcelona (Spain)

Brunet, Sylvain 2001, (Affiliate); PhD, 1998, McGill University (Canada)

Maier, Sebastian Karl-Georg 1999, (Affiliate); MD, 1995, University of Wurzburg (Germany); DrMed, 1996, University of Wurzburg (Germany)

Ong, Shao-En 2010; PhD, 2004, University of Southern Denmark

Rohn, Tony T. 1990, (Affiliate); PhD, 1994, University of Washington

Yu, Frank Hong 1997, (Affiliate); MSc, 1990, University of British Columbia (Canada); PhD, 1997, McGill University (Canada)

Lecturer

Langeberg, Lorene 2008; BS, 1976, University of Colorado (Boulder)

Physiology and Biophysics

Professors

Almers, Wolfhard * 1974, (Affiliate); PhD, 1971, University of Rochester

Babcock, Donner Franklin 1986, (Emeritus); PhD, 1971, Oregon State University

Berger, Albert Jeffrey 1977, (Emeritus); MA, 1965, Princeton University; PhD, 1967, Princeton University; PhD, 1976, University of California (San Francisco)

Binder, Marc David 1978; MS, 1972, University of Southern California; PhD, 1974, University of Southern California

Bothwell, Mark Allen 1985; PhD, 1975, University of California (Berkeley)

Bregelmann, George Leslie * 1966, (Emeritus); PhD, 1967, University of Washington

Buck, Linda B. 2003, (Affiliate); PhD, 1980, University of Texas (unspecified)

Carlson, Steven S. 1985; PhD, 1975, University of California (Berkeley)

Cloud, Joseph G 2014, (Affiliate); MS, 1968, University of Wisconsin; PhD, 1974, University of Wisconsin

Cook, Daniel L. * 1978, (Research); MSME, 1970, University of Washington; MD, 1977, University of Washington; PhD, 1979, University of Washington

Detwiler, Peter Benton 1976; PhD, 1970, Georgetown University

Feigl, Eric O. 1969, (Emeritus); MD, 1958, University of Minnesota

Fetz, Eberhard Erich * 1967; PhD, 1966, Massachusetts Institute of Technology

Froehner, Stanley Charles 2000; PhD, 1973, California Institute of Technology

Fuchs, Albert F. * 1969, (Emeritus); MS, 1961, Drexel Institute of Technology; PhD, 1966, Johns Hopkins University Furilla, Robert Alan 2011, (Affiliate); MS, 1981, University of Alaska; PhD, 1986, University of British Columbia (Canada)

Gordon, Albert McCague * 1964, (Emeritus); PhD, 1961, Cornell University

Gordon, Sharona Elana 1993; PhD, 1993, Brown University Hildebrandt, Jacob * 1966; MSc, 1960, University of British Columbia (Canada); PhD, 1966, University of Washington

Hille, Bertil 1968; PhD, 1967, Rockefeller University Hlastala, Michael P. 1970, (Emeritus); PhD, 1969, State University of New York (Buffalo)

Klowden, Marc J. 2004, (Affiliate); MS, 1974, University of Illinois; PhD, 1976, University of Illinois

Koerker, Donna J. * 1970, (Emeritus); PhD, 1970, University of Michigan

Mackie, Kenneth Paul * 1987, (Affiliate); MD, 1984, Yale University

Raisbeck, Merl Francis 2002, (Affiliate); DVM, 1975, Colorado State University; MS, 1982, University of Missouri; PhD, 1984, University of Missouri

Reid, R. Clay 2014, (Affiliate); PhD, 1988, Rockefeller University; MD, 1991, Cornell University

Rieke, Frederick Martin 1997; PhD, 1991, University of California (Berkeley)

Rodnick, Kenneth J. 2004, (Affiliate); MS, 1983, Oregon State University; MA, 1984, Oregon State University; PhD, 1989, Stanford University

Rowell, Loring Bernard * 1962, (Emeritus); PhD, 1962, University of Minnesota

Santana, Luis Fernando 2001; MS, 1992, University of Hawaii; PhD, 1996, University of Maryland

Pharmacology

Professors

Bajjalieh, Sandra Mae 1995; MS, 1983, University of Illinois; PhD, 1989, University of Wisconsin (Madison)

Schwindt, Peter Charles * 1974, (Emeritus); MS, 1965, Massachusetts Institute of Technology; PhD, 1972, University of Washington

Shadlen, Michael Neil * 1995, (Affiliate); PhD, 1985, University of California (Berkeley); MD, 1988, Brown University
Smith, Orville Auverne * 1956, (Emeritus); MA, 1950, Michigan State University; PhD, 1953, Michigan State University
Stirling, Charles E. * 1968, (Emeritus); PhD, 1966, State Univ of New York (Upstate Med Ct)

Wise, Phyllis M. 2005, (Emeritus); MA, 1969, University of Michigan; PhD, 1972, University of Michigan

Wordeman, Linda Gay 1994; PhD, 1988, University of California (Berkeley)

Zagotta, William Nicholas * 1993; PhD, 1989, Stanford University

Associate Professors

Anderson, Curtis W. 2005, (Affiliate); MS, 1992, Northern Arizona University; PhD, 1996, Northern Arizona University
Asbury, Charles L. 2004; MS, 1993, Tulane University; PhD, 1999, University of Washington

Barria-Roman, Andres 2005; PhD, 1998, University of Chile
Buffalo, Elizabeth Ann 2013; MA, 1995, University of California (San Diego); PhD, 1999, University of California (San Diego)

Fairhall, Adrienne Louise 2003; MS, 1993, Weizmann Institute For Science (Israel); PhD, 1997, Weizmann Institute For Science (Israel)

Grimes, Mark L. 2004, (Affiliate); PhD, 1986, University of Oregon

Horwitz, Gregory D. 2007; MS, 1997, Stanford University; PhD, 1999, Stanford University

Owens, Jesse Lee 2003, (Affiliate); PhD, 1987, University of Alaska

Schulte, Marvin K. 2004, (Affiliate); MS, 1989, University of Minnesota; PhD, 1992, University of Minnesota

Sullivan, Jane Madden 2002; PhD, 1990, University of Utah
Van Brederode, Johannes Frederik Michael 1987, (Affiliate); MS, 1982, University of Amsterdam (Netherlands); PhD, 1987, Medical College of Wisconsin

Wells, Richard B. 2004, (Affiliate); MS, 1979, Stanford University; PhD, 1985, University of Idaho

Assistant Professors

Coppin, Christophe M. 2008, (Affiliate); MD, 1993, Tufts University; PhD, 1993, Tufts University

Eiger, Steven Manuel 1997, (Affiliate); PhD, 1984, University of Michigan

Fuerst, Peter Gerard 2011, (Affiliate); PhD, 2003, Iowa State University

Liu, Qinghang 2011; MD, 1994, Taishan Medical University (China); MS, 1997, Shanghai Medical University (China); PhD, 2004, University of Tennessee

Olsen, Shawn 2014, (Affiliate); PhD, 2009, Harvard University

Vella, Chantal Anne 2012, (Affiliate); MS, 1997, Calif Polytechnic State (San Luis Obis); PhD, 2004, University of New Mexico

Waters, David J 2013, (Affiliate); PhD, 1997, University of London, UK

Senior Lecturers

Linder, Thomas Michael 1975; PhD, 1971, University of Washington

Melby, Anna Elizabeth 1996; MS, 1987, University of California (San Diego); PhD, 1995, University of Oregon

Psychiatry and Behavioral Sciences

Professors

Belenky, Gregory Lucas 2005, (Affiliate); MD, 1971, Stanford University

Borson, Soo 1972, (Emeritus); MD, 1969, Stanford University

Bowden, Douglas McHose 1969; MD, 1965, Stanford University

Campbell, William Howard 2009; MD, 1982, Loyola University (Chicago); MBA, 1990, Jacksonville University

Carr, John Edward * 1963, (Emeritus); MA, 1958, Syracuse University; PhD, 1963, Syracuse University

Christopher, John Chambers 2009, (Affiliate); MEd, 1987, Harvard University; PhD, 1992, University of Texas (Austin)

Cowley, Deborah Suzanne 1980; MD, 1980, University of Pennsylvania

Craft, Suzanne * 1994, (Affiliate); PhD, 1985, University of Texas (Austin)

Doerr, Hans Oskar * 1967, (Emeritus); MD, 1962, Florida State University; PhD, 1965, Florida State University

Donovan, Dennis 1981; MA, 1972, Western Washington University; PhD, 1980, University of Washington

Dorsa, Daniel Michael * 1979, (Affiliate); PhD, 1977, University of California (Davis)

Dunn, Christopher Williams 1993; MS, 1990, University of Florida; PhD, 1994, University of Florida

Dyck, Dennis Gary 1992, (Affiliate); MA, 1970, Pepperdine University; PhD, 1973, University of Oklahoma

Fann, Jesse Ruey 1990; MD, 1989, Northwestern University; MPH, 1995, University of Washington

Felker, Bradford Laird 1997; MD, 1987, University of Virginia

Fortney, John Cooper 2014; PhD, 1992, University of Iowa
Heiman, Julia Rue * 1980, (Clinical); PhD, 1975, State Univ of New York (Stony Brook)

Horita, Akira * 1954, (Emeritus); MS, 1951, University of Washington; PhD, 1954, University of Washington

Katon, Wayne Jay * 1976; MD, 1976, University of Oregon
Kaysen, Debra 2002; MA, 1997, University of Missouri; PhD, 2003, University of Missouri

King, Bryan Harry 2005; MD, 1983, Medical College of Wisconsin

Wang, Jinnan 2003, (Affiliate); MS, 2003, Tsinghua University (China); PhD, 2008, University of Washington

Rehabilitation Medicine

Professors

Anderson, Marjorie Elizabeth * 1971, (Emeritus); PhD, 1969, University of Washington

Bombardier, Charles Henry * 1989; MS, 1984, Washington State University; PhD, 1987, Washington State University

Brockway, Jo Ann * 1975, (Emeritus); MA, 1972, University of Iowa; PhD, 1975, University of Iowa

Childers, Martin Kent 2012; DO, 1990, Western University of Health Sciences; PhD, 2002, University of Missouri (Columbia)

Czerniecki, Joseph Michael * 1982; MD, 1981, University of British Columbia (Canada); MS, 1985, University of Washington

Deitz, Jean Louise * 1979, (Emeritus); MEd, 1970, University of Florida; PhD, 1976, University of Florida

Delateur, Barbara Jane * 1963, (Affiliate); MD, 1963, University of Washington; MS, 1968, University of Washington

Dikmen, Sureyya S. * 1974; MA, 1967, University of Michigan; PhD, 1973, University of Washington

Ehde, Dawn Marie 1991; MA, 1989, University of North Dakota; PhD, 1992, University of North Dakota

Esselman, Peter Carey * 1981; MPT, 1979, University of Washington; MD, 1986, University of Washington

Fraser, Robert Thomas 1976; MS, 1972, University of Southern California; PhD, 1976, University of Wisconsin; MPA, 1984, Seattle University

Goldstein, Barry * 1987; PhD, 1981, University of California (Los Angeles); MD, 1986, University of California (Los Angeles)

Halar, Eugen M. * 1968, (Emeritus); MD, 1959, University of Zagreb (Croatia)

Hammond, Margaret Campbell * 1979, (Emeritus); MD, 1978, Medical College of Wisconsin

Haselkorn, Jodie Kangas * 1985; MPH, 1985, University of Michigan; MD, 1985, Louisiana State University

Hays, Ross McGandy * 1983; MD, 1978, University of Washington

Jaffe, Kenneth Marc * 1975; MD, 1975, Harvard University; MRM, 1982, University of Washington

Jensen, Mark Philip * 1987; MA, 1984, Arizona State University; PhD, 1989, Arizona State University

Johnson, Kurt Lewis * 1990; MEd, 1979, University of Washington; PhD, 1984, University of Wisconsin

Kartin, Deborah 1984; MS, 1988, University of Washington; PhD, 1996, University of Washington

Kraft, George Howard * 1969, (Emeritus); MD, 1963, Ohio State University; MS, 1967, Ohio State University

Little, James Wendell * 1978, (Emeritus); PhD, 1976, University of Chicago; MD, 1977, University of Chicago

Massagli, Teresa Luisa * 1985; MD, 1982, Yale University

McCoy, Sarah Westcott 1980; MPT, 1979, University of Washington; PhD, 1993, University of Washington

Patterson, David Roy * 1984; PhD, 1982, Florida State University

Pepping, Mary * 1981, (Emeritus); MA, 1975, California State University, Los Angeles; PhD, 1981, Washington State University

Shumway-Cook, Anne * 1995, (Emeritus); MS, 1973, University of Oregon; PhD, 1983, University of Oregon

Slimp, Jefferson C. * 1976, (Emeritus); MA, 1974, University of Wisconsin; PhD, 1976, University of Wisconsin (Madison)

Stolov, Walter C. 1960, (Emeritus); MA, 1951, University of Minnesota; MD, 1956, University of Minnesota

Warren, Charles Gerald * 1963, (Clinical); MPH, 1971, University of Washington

Yorkston, Kathryn Mary * 1975; MS, 1972, University of Oregon; PhD, 1975, University of Oregon

Associate Professors

Apkon, Susan 2009; MD, 1994, University of Vermont

Barr, Karen Patricia 2001; MD, 1993, Northeast Ohio University College of Medicine

Britell, Catherine Wolleat * 1985, (Clinical); MD, 1973, University of Southern California

Burns, Stephen Patrick 1992; MD, 1992, Brown University

Guthrie, Mark Richard * 1983; MPT, 1980, University of Washington; PhD, 1990, University of Washington

Hafner, Brian J. 2006; PhD, 2003, University of Washington

Hakimi, Kevin N. 2000; MD, 2000, Wayne State University

Hoffman, Jeanne Marie 1999; MA, 1995, Arizona State University; PhD, 2000, Arizona State University

Jirikowic, Tracy L. 1993; MS, 1995, University of Washington; PhD, 2003, University of Washington

Kanny, Elizabeth Madeline * 1972, (Emeritus); MA, 1977, Seattle University; PhD, 1996, University of Washington

Kelly, Valerie Elizabeth 2003; MS, 1999, Washington University; PhD, 2003, Washington University

Kinney, Gregory A. 1997; PhD, 1996, Northwestern University

Maitland, Murray Ernest 2006; MS, 1989, University of British Columbia (Canada); PhD, 1996, University of Calgary (Canada)

Mc Millan, Jo Ann * 1958, (Emeritus); BS, 1953, North Texas State College

McQuade, Kevin 2004; MPH, 1986, University of Washington; PhD, 1995, University of Iowa

Molton, Ivan R. 2005; MA, 2001, University of Colorado (Colorado Springs); PhD, 2006, University of Miami (Florida)

Moritz, Chet Thomas 2004; PhD, 2003, University of California (Berkeley)

Odderson, Ib Rask * 1985; MS, 1973, University of Copenhagen (Denmark); PhD, 1979, Indiana University; MD, 1985, Vanderbilt University

Powell, Janet Marie 1998; MS, 1998, University of Washington; PhD, 2001, University of Washington

Reyes, Maria Regina L. 2004; MD, 1992, Pennsylvania State University

Rodriguez, Arthur Alfred * 1999, (Emeritus); MD, 1972, University of Wisconsin (Madison); MS, 1978, University of Minnesota

Stiens, Steve Andrew 1987; MD, 1986, University of Cincinnati; MS, 1991, University of Washington

Turner, Aaron P. 1995; MS, 1997, University of Washington; PhD, 2001, University of Washington

Wiechman, Shelley A. 1994; MS, 1994, University of Arizona; PhD, 2000, University of Washington

Williams, Rhonda Maetel 1998; MA, 1995, Arizona State University; PhD, 1999, Arizona State University

Assistant Professors

Alschuler, Kevin Nemschoff 2010; MS, 2006, Eastern Michigan University; PhD, 2010, Eastern Michigan University

Baylor, Carolyn Rae 1996; MS, 1993, University of Washington; PhD, 2007, University of Washington

Campea, Scott J 2013; MD, 2003, University of Pennsylvania

Chaytor, Naomi Sage 2004; MS, 2001, Washington State University; PhD, 2004, Washington State University

Crane, Deborah Ann 2005; MPH, 2005, Tulane University; MD, 2005, Tulane University

Dyer, Joshua R. 2008; MS, 2005, Indiana University; PhD, 2008, Indiana University

Fogelberg, Donald J. 2010; PhD, 2008, University of Southern California

Friedly, Janna L. 2001; MD, 2001, Oregon Health Sciences University

Heckman, Jeffrey Todd 2012; DO, 2006, University of New England

Holdefer, Robert N. 2009; MA, 1985, Southern Illinois University; PhD, 1985, Southern Illinois University

Johnson, Shana L. 2008; MD, 2004, Medical College of Wisconsin

Jutte, Jennifer Erin 2008; MPH, 2001, Emory University; PhD, 2009, Washington State University

Mack, David Lee 2012; MA, 1993, Indiana University; PhD, 2005, Indiana University

Martinez, Vicente 2008; PhD, 2008, University of Michigan

McGough, Ellen L. 1990; MEd, 2003, University of Washington

McNalley, Thomas Edward 2005; MA, 1987, University of Virginia; MD, 2004, University of Iowa

Morgenroth, David Crespi 2004; MD, 2003, SUNY Brooklyn

Mroz, Tracy Mitchell 2014; MS, 2005, Boston University; PhD, 2013, Johns Hopkins University

Pitonyak, Jennifer Sambrook 2014; MS, 1997, Washington University; PhD, 2013, University of the Sciences, Philadelphia

Pradhan, Sujata D. 2008; MS, 2000, University of Bombay; MS, 2002, University of Pittsburgh; PhD, 2007, University of Pittsburgh

Suri, Pradeep 2003; MD, 2002, University of Michigan, Ann Arbor; MSc, 2011, Harvard University

Svircev, Jelena Natascha 2005; MD, 2001, University of Wisconsin

White, David Martin * 1987, (Clinical); MA, 1983, University of Alabama; PhD, 1987, University of Alabama

Zumsteg, Jennifer Michelle 2005; MD, 2005, University of Chicago

Senior Lecturers

Hertling, Darlene 1964, (Emeritus); BS, 1956, University of California (Berkeley)

Okumura, Ramona Michiko 1990; BA, 1974, Valparaiso University; BS, 1975, Valparaiso University; BS, 1981, University of Washington

Yamane, Ann 1979; BS, 1976, University of Washington

Lecturers

Bennett, Kimberly Dewees 1996; PhD, 1974, University of California (Los Angeles)

Dralle, Alan Jerome 1968, (Emeritus); BS, 1968, University of Washington

Robinson, Cynthia Ann 1992; MS, 1990, Long Island University; PhD, 2010, University of Washington

Rollinger, Barbara Elizabeth 1978; MHA, 1986, University of Washington; MS, 1988, University of Washington

Surgery

Professors

Aldea, Gabriel Sorin 1998; MD, 1981, Columbia University

Allen, Margaret Dale 1985, (Affiliate); MD, 1974, University of California (San Diego)

Anderson, Benjamin Olney 1994; MD, 1985, Albert Einstein College of Medicine

Arbabi, Saman 1992; MD, 1992, University of California (Davis); MPH, 2001, University of Washington

Ashbaugh, David George 1982, (Emeritus); MD, 1957, Ohio State University

Beach, Kirk Watson * 1973, (Emeritus); MSChE, 1968, University of California (Berkeley); PhD, 1971, University of California (Berkeley); MD, 1976, University of Washington
 Bulger, Eileen Metzger 1992; MD, 1992, Cornell University
 Byrd, David Roland 1982; MS, 1978, Tulane University; MD, 1982, Tulane University

Chen, Jonathan Michael 2013; MD, 1994, Columbia University

Clowes, Alexander Whitehill * 1980; MD, 1972, Harvard University

Cuschieri, Joseph 2000; MD, 1994, Wayne State University
 Dellinger, Evan Patchen * 1977; MD, 1970, Harvard University

Engrav, Loren Henry 1977, (Emeritus); MD, 1969, University of California (Los Angeles)

Fichera, Alessandro 2012; MD, 1989, Catholic University
 Flum, David Reed 2000; MD, 1991, University of Miami (Florida); MPH, 2002, University of Washington

Foy, Hugh Martin 1978; MD, 1978, University of Nebraska
 Gibran, Nicole Simone 1990; MD, 1985, Boston University
 Gruss, Joseph Selwyn 1991; MBChB, 1969, University of Witwatersrand (S. Africa)

Hatsukami, Thomas Susumu 1982; MD, 1982, University of California (Los Angeles)

Heimbach, David Milton 1974, (Emeritus); MD, 1964, Cornell University

Horvath, Karen Dombek 1998; MD, 1990, New York Medical College

Kohler, Ted Raney 1978; MD, 1976, Harvard University

Langdale, Lorrie Aileen 1985; MD, 1979, University of Washington

Maier, Ronald Vitt 1974; MD, 1973, Duke University
 Meissner, Mark Harmon 1985; MD, 1985, University of Colorado (campus unspecified)

Miller, Donald Wesley 1975, (Emeritus); MD, 1965, Harvard University

Mock, Charles Newman 1992; MD, 1980, Brown University; MPH, 1994, University of Washington; PhD, 1997, University of Washington

Mulligan, Michael Scott 1999; MD, 1989, University of Connecticut

Neligan, Peter Camillus 2007; MBChB, 1975, Trinity College (Ireland)

Javid, Sara 2008; MD, 1999, Harvard University

Keys, Kari Anne 2006; MD, 2006, University of California (San Francisco)

Khandelwal, Saurabh 2008; MD, 2002, Rush Medical College

Ko, Jason Hyunsuk 2011; MD, 2004, Duke University

Mandell, Samuel Price 2005; MD, 2005, University of Massachusetts; MPH, 2009, University of Washington

Marquardt, Deborah Lane 2002; MD, 2002, Loma Linda University

Montenovo, Martin Ignacio 2004; MD, 2001, University of Rosario Medical School (Argentina)

Nazarian, Susanna Matsen 2013; MD, 2003, Johns Hopkins University; PhD, 2009, Johns Hopkins University

Nuri, Muhammad Ataunur Khalid 2014; MBBS, 1998, Aga Khan University (Pakistan)

Pal, Jay D. 2013; PhD, 1999, Chicago Medical School; MD, 2001, Chicago Medical School

Parr, Zoe Eden 2011; MD, 2004, University of Calgary (Canada)

Pillarisetty, Venu 2009; MD, 1999, Columbia University

Quiroga, Elina 2002; MD, 1998, University of Buenos Aires (Argentina)

Riehle, Kimberly Jean 2001; MD, 2001, Emory University

Shalhub, Sherene 2003; MPH, 1999, University of South Florida; MD, 2003, University of South Florida

Shin, Susanna Hewon 2014; MD, 2002, Eastern Virginia Medical School

Sibulesky, Lena 2013; MD, 2001, Tufts University

Smith, Jason William 2012; MD, 2002, Loyola University (Chicago)

Sweet, Matthew P 2011; MD, 2002, University of Southern California; MS, 2007, University of California (San Francisco)

Tang, Gale Lynn 2008; MD, 1998, University of Michigan

Tse, Raymond 2009; MD, 2005, University of Toronto (Canada)

Urology

Professors

Ansell, Julian S. 1959, (Emeritus); MD, 1951, Tufts University; PhD, 1959, University of Minnesota

Berger, Richard Eugene 1975, (Emeritus); MD, 1973, University of Chicago

Brannen, George Elsdon 1978, (Emeritus); MD, 1969, Northwestern University

Chapman, Warren Howe 1957, (Emeritus); MD, 1952, University of Chicago

Dalkin, Bruce 2008; MD, 1985, Northwestern University

Ellis, William John 1991; MD, 1985, Johns Hopkins University

Grady, Richard Welker 1996; MD, 1990, University of Michigan

Joyner, Byron David 1999; MD, 1988, Harvard University

Krieger, John Newton 1982; MD, 1974, Cornell University

Lange, Paul Henry 1988, (Emeritus); MD, 1967, Washington University

Lin, Daniel Wei 1994; MD, 1994, Vanderbilt University

Merguerian, Paul Arthur 2011; MD, 1980, Hadassah Medical Center; MS, 2009, Dartmouth College

Mitchell, Michael E. 1989, (Emeritus); MD, 1969, Harvard University

Vessella, Robert Louis Jr. 1989, (Emeritus); PhD, 1974, University of Mississippi

Wessells, Hunter 2000; MD, 1988, Georgetown University

Yang, Claire Cheng 1993; MD, 1988, Vanderbilt University

Associate Professors

Dash, Atreya 2013; MD, 1998, University of Vermont

Gore, John Lawrence 2009; MD, 2001, Baylor College of Medicine; MS, 2009, University of California (Los Angeles)

Harper, Jonathan David 2009; MD, 2003, University of Oklahoma

Lendvay, Thomas Sean 2004; MD, 1999, Temple University

Miller, Jane Louise 1985; MD, 1985, University of Oklahoma

Porter, Michael 1997; MD, 1997, University of Iowa; MS, 2001, University of Washington

Sutherland, Suzette Elisabeth 2013; MS, 1990, St. Cloud State University; MD, 1997, Case Western Reserve University

Voelzke, Bryan B. 2008; MD, 2000, University of Texas (San Antonio)

Walsh, Thomas James 2000; MD, 2000, Northwestern University; MS, 2004, University of Washington

Assistant Professors

Shnorhavorian, Margaret 2005; MPH, 1999, University of California (Berkeley); MD, 2000, University of California (San Diego)

Sorensen, Mathew D. 2004; MD, 2004, University of Colorado (Denver); MS, 2008, University of Washington

Wright, Jonathan Lawrence 1998; MD, 2001, University of Washington; MS, 2005, University of Washington

Lecturer

Muller, Charles Holbrook 1980; MA, 1972, University of Colorado (Boulder); PhD, 1976, University of California (Berkeley)

School of Nursing

Professors

Batey, Marjorie Viola * 1956, (Emeritus); MS, 1956, University of Colorado (Boulder); PhD, 1968, University of Colorado (Boulder)

Beaton, Randal David * 1976, (Emeritus); PhD, 1972, University of Washington

Belza, Basia L. * 1991; MN, 1982, University of Virginia; PhD, 1991, University of California (San Francisco)

Berkowitz, Bobbie Ann * 1988, (Emeritus); MN, 1981, University of Washington; PhD, 1990, Case Western Reserve University

Berry, Donna Lynn * 1988, (Affiliate); MSN, 1981, University of Texas (Houston); PhD, 1992, University of Washington

Blackburn, Susan T. * 1973, (Emeritus); MN, 1973, University of Washington; PhD, 1979, University of Washington

Booth-Laforce, Cathryn Louise * 1977; MA, 1971, Ohio State University; PhD, 1974, Ohio State University

Brandt, Patricia Ann * 1975, (Emeritus); MS, 1968, University of Colorado (Boulder); PhD, 1981, University of Washington

Brown, Marie Annette * 1975; MN, 1973, University of Washington; PhD, 1983, University of Washington

Budzynski, Helen Kogan * 1968, (Emeritus); MA, 1956, Columbia University; PhD, 1968, University of California (Los Angeles)

Chrisman, Noel Judson * 1973; PhD, 1966, University of California (Berkeley); MPH, 1967, University of California (Berkeley)

Cochrane, Barbara Bean 1985; MN, 1986, University of Washington; PhD, 1992, University of Washington

Craven, Ruth F. * 1968, (Emeritus); MN, 1968, University of Washington; EdD, 1984, Seattle University

Cunningham, Susanna Lee * 1969; MS, 1969, University of Washington; PhD, 1978, University of Washington

Demiris, George 2006; MS, 1994, University of Heidelberg (Germany); PhD, 2000, University of Minnesota

Dimond, Margaret F. * 1988, (Emeritus); MN, 1971, University of Iowa; PhD, 1978, University of Wisconsin (Madison)

Doorenbos, Ardith 2006; MSN, 2000, Madonna University; PhD, 2002, Wayne State University

Dougherty, Cynthia Marie 1985; MA, 1983, University of Iowa; PhD, 1990, University of Washington

Eggert, Leona Louise * 1973, (Emeritus); MA, 1970, University of Washington; PhD, 1984, University of Washington

Emami, Azita 2013; RN, 1993, Karolinska Institute (Sweden); MNS, 1994, Karolinska Institute (Sweden); PhD, 2000, Karolinska Institute (Sweden)

Gallucci, Betty Bierut * 1973, (Emeritus); MLifeSc, 1971, North Carolina State University; PhD, 1973, North Carolina State University

Graham, Katherine Young * 1978, (Emeritus); MN, 1967, University of Washington; MA, 1972, University of Washington; PhD, 1978, University of Washington

Hegyvary, Sue T. 1986, (Emeritus); MN, 1966, Emory University; PhD, 1974, Vanderbilt University

Heitkemper, Margaret Eunice * 1975; MN, 1975, University of Washington; PhD, 1981, University of Illinois

Horn, Barbara J. * 1977, (Emeritus); MS, 1957, Indiana University; PhD, 1971, University of Michigan

Houck, Gail M 2014; MN, 1977, Oregon Health Sciences University; PhD, 1987, University of Washington

Jarrett, Monica Eileen * 1980; MN, 1981, University of Washington; PhD, 1988, University of Washington

Kieckhefer, Gail Marie * 1987; MSN, 1977, St. Louis University; PhD, 1985, University of Washington

Killien, Marcia Gruis * 1973; MN, 1974, University of Washington; PhD, 1982, University of Washington

Kurth, Ann Elizabeth 1998, (Affiliate); MPH, 1987, Columbia University; MSN, 1990, Yale University; PhD, 2003, University of Washington

Landis, Carol Ann * 1991; MS, 1973, University of California (San Francisco); DNS, 1988, University of California (San Francisco)

Lentz, Martha Jane * 1975, (Emeritus); MA, 1975, University of Washington; PhD, 1984, University of Washington

Lewis, Frances Marcus * 1978; MN, 1968, University of Washington; MA, 1973, Stanford University; MA, 1974, Stanford University; PhD, 1977, Stanford University

Logsdon, Rebecca Goudelock * 1986, (Research); MA, 1976, Oklahoma State University; PhD, 1986, Oklahoma State University

Magyary, Diane Louise * 1981; MN, 1977, University of Washington; PhD, 1981, University of Washington

McCurry, Susan Melancon * 1991, (Research); MSc, 1977, University of Nevada (Las Vegas); MS, 1984, University of Nevada (Las Vegas); PhD, 1991, University of Nevada (Reno)

Mitchell, Pamela Holsclaw * 1965; MS, 1965, University of California (San Francisco); PhD, 1991, University of Washington

Murphy, Shirley Ann * 1985, (Emeritus); MEd, 1965, Gonzaga University; PhD, 1981, Portland State University

Osborne, Oliver H. * 1969, (Emeritus); MA, 1960, New York University; PhD, 1968, Michigan State University

Patrick, Maxine I. Lambrecht * 1951, (Emeritus); MN, 1953, University of Washington; DPH, 1970, University of California (Los Angeles)

Pollack, Sylvia * 1968, (Emeritus); PhD, 1967, University of Pennsylvania; MA, 1993, Antioch University

Prinz, Patricia Nasser 1976, (Emeritus); PhD, 1969, Stanford University

Salazar, Mary K. 1984, (Emeritus); MN, 1986, University of Washington; PhD, 1991, Seattle University

Salmon, Marla 2008; DSc, 1977, Johns Hopkins University; MS, 1999, University of Portland

Schepp, Karen Gulseth * 1988; MN, 1967, University of Washington; PhD, 1985, University of Arizona

Simpson, Terri Ann * 1991; MS, 1975, University of California (San Francisco); PhD, 1988, University of Washington

Spieker, Susan J. * 1983; PhD, 1982, Cornell University

Strickland, Carolyn June B. * 1977; MS, 1976, University of Washington; PhD, 1983, University of Washington

Swanson, Kristen Marie * 1985, (Affiliate); MSN, 1978, University of Pennsylvania; PhD, 1983, University of Colorado (Boulder)

Teri, Linda * 1984; PhD, 1980, University of Vermont

Thomas, Karen Ann Johnson * 1981; MA, 1977, University of Iowa; PhD, 1986, University of Washington

Thompson, Frances Elaine Adams * 1972, (Emeritus); MA, 1972, University of Washington; PhD, 1990, University of Washington

Webster-Stratton, Carolyn * 1976, (Emeritus); MPH, 1972, Yale University; MSN, 1972, Yale University; PhD, 1979, University of Washington

Whitney, Joanne Davis * 1982; MS, 1979, University of Michigan; PhD, 1991, University of California (San Francisco)

Wolf-Wilets, Vivian Christine * 1969, (Emeritus); MA, 1964, University of Chicago; PhD, 1969, University of Chicago

Woods, Nancy Ann Fugate 1978; MN, 1969, University of Washington; PhD, 1978, University of North Carolina

Woods, Susan Louise * 1975, (Emeritus); MA, 1975, University of Washington; PhD, 1991, Oregon Health Sciences University

Zierler, Brenda Kaye 1988; PhD, 1996, University of Washington

Associate Professors

Altman, Gaylene Marie 1975; MN, 1973, University of Washington; PhD, 1992, University of Washington

Baker, Margaret Wooding 2002; MS, 1997, Otterbein College; PhD, 2000, University of Washington

Bekemeier, Elizabeth Ruth 1997; MPH, 1994, Johns Hopkins University; MSN, 1994, Johns Hopkins University; PhD, 2007, University of Washington

Betrus, Patricia Ann * 1978; MN, 1979, University of Washington; PhD, 1985, University of Washington

Blainey, Carol Ann * 1967, (Emeritus); MN, 1967, University of Washington

Boutain, Doris M. 1995; MN, 2000, University of Washington; PhD, 2000, University of Washington

Bridges, Elizabeth J. 2004; MN, 1991, University of Washington; PhD, 1998, University of Washington

Buchanan, Diana Marie 2005; MSN, 2001, University of Virginia; PhD, 2005, University of Virginia

Carnevali, Doris Scholin Benson 1947, (Emeritus); RN, 1943, University of Washington; MN, 1961, University of Washington

Krupski, Edward 1944, (Emeritus); MS, 1941, University of Washington; PhD, 1949, University of Washington

Nelson, Wendel Lane * 1965; PhD, 1965, University of Kansas

Rettie, Allan Edward * 1984; PhD, 1983, University of Newcastle-On-Tyne (UK)

Associate Professors

Kunze, Kent Luvern 1989; PhD, 1981, University of California (San Francisco)

Totah, Rheem Angela 2002; MS, 2000, University of Kansas; PhD, 2002, University of Kansas

Assistant Professors

Lee, Kelly K. 2009; PhD, 2001, Johns Hopkins University

Nath, Abhinav 2003; PhD, 2008, University of Washington

Pharmaceutics

Professors

Ho, Rodney J.Y. * 1990; MS, 1985, University of Tennessee; PhD, 1987, University of Tennessee

Hu, Shiu-Lok 1988; PhD, 1978, University of Wisconsin (Madison)

Levy, Hanamia Rene 1970, (Emeritus); PhD, 1970, University of California (San Francisco)

Shen, Danny Dah-Ying 1984; PhD, 1975, State University of New York (Buffalo)

Thummel, Kenneth Eugene 1989; PhD, 1987, University of Washington

Unadkat, Jashvant D. * 1985; PhD, 1982, University of Manchester (UK)

Wang, Joanne 2000; MS, 1993, University of Illinois; PhD, 1998, University of California (San Francisco)

Associate Professors

Isoherranen, Nina Johanna 2003; MS, 1998, University of Helsinki (Finland); PhD, 2003, Hebrew University (Israel)

Kelly, Edward John 1991; MS, 1986, University of California (Riverside); PhD, 1996, University of Washington

Mao, Qingcheng 2002; MSc, 1988, East China Normal University; PhD, 1995, University of Berne (Switzerland)

Assistant Professors

Klatt, Nichole Rose 2012; PhD, 2009, Emory University

Lin, Yvonne S. 1997; PhD, 2002, University of Washington

Pharmacy

Professors

Anderson, Gail Denise * 1981; MS, 1981, University of Washington; PhD, 1987, University of Washington

Bauer, Larry Alan * 1980; PharmD, 1980, University of Kentucky

Beier, Manju T. 2013, (Affiliate); PharmD, 1981, University of Utah

Burkhart, Vincent Depaul 1982, (Emeritus); MS, 1972, University of Maryland

Christensen, Dale Blaquiere 1976, (Affiliate); MS, 1972, Oregon State University; PhD, 1977, University of Minnesota

Ellsworth, Allan Joseph 1981; PharmD, 1977, Philadelphia Coll of Pharmacy & Science

Fassett, William Edmond 1979, (Affiliate); MBA, 1983, University of Puget Sound; PhD, 1992, University of Washington

Fullerton, Dwight S. 1995, (Affiliate); PhD, 1971, University of California (Berkeley)

Gardner, Jacqueline S. * 1990, (Emeritus); MPH, 1972, University of Hawaii; PhD, 1980, University of Washington

Garrison, Louis P. 1983; PhD, 1981, Stanford University

Gray, Shelly Lynn 1995; PharmD, 1989, University of Michigan; MS, 2001, University of Washington

Hansten, Philip Douglas 1989, (Emeritus); PharmD, 1968, University of California (San Francisco)

Hebert, Mary Frances 1996; PharmD, 1987, University of California (San Francisco)

Horn, John R. * 1977; PharmD, 1977, University of Cincinnati

Luce, Bryan Rogers 2012, (Affiliate); MSPH, 1974, University of Massachusetts; MBA, 1975, University of Massachusetts; PhD, 1979, University of California (Los Angeles)

McCune, Jeannine S. 1998; PharmD, 1995, University of North Carolina, Chapel Hill

Odegard, Peggy Lynn Soule 1986; PharmD, 1990, University of Washington

Orr, Jack Edward 1956, (Emeritus); PhD, 1943, University of Wisconsin

Plein, Joy B. * 1966, (Emeritus); MS, 1951, University of Washington; PhD, 1956, University of Washington

Sisk, Jane E 2014, (Affiliate); MA, 1965, George Washington University; PhD, 1976, McGill University (Canada)

Sullivan, Sean Dale * 1992; MS, 1984, University of Texas (unspecified); PhD, 1992, University of California (Berkeley)

Veenstra, David Leroy 1997; PharmD, 1996, University of California (San Francisco); PhD, 1996, University of California (San Francisco)

Watkins, John Bennett 1997, (Affiliate); MS, 1976, University of Washington; MPH, 1993, University of Washington

Williams, Donald Herbert 1971, (Affiliate); BPharm, 1958, Massachusetts College of Pharmacy

Associate Professors

Baluch, William Marc 1978, (Affiliate); MS, 1978, University of Washington

Beaty, Sarah Jane 1993, (Affiliate); MBA, 1990, City University (Seattle)

Bennett, Sharon Wraith 1979, (Affiliate); BS, 1974, University of Washington

Black, Douglas John 1981; PharmD, 1983, University of Washington

Bomgaars, Donald Lee 1987, (Affiliate); MBA, 1985, University of Utah; MS, 1985, University of Utah

Boudreau, Denise Marie 1998, (Affiliate); MS, 1996, University of Rhode Island; PhD, 2002, University of Washington

Boyer, Susan Marie Teil 1987, (Affiliate); MS, 1981, Ohio State University

Brakebill, Janet Irene 1984, (Affiliate); PharmD, 1982, University of Washington

Carlson, James Arthur 1986, (Affiliate); PharmD, 1982, University of Minnesota

Chan, Ling Tak-Neander 1994; PharmD, 1996, University of Washington

Clegg, Cynthia Alison 1988, (Affiliate); BPharm, 1984, University of Washington

Devine, Emily Elizabeth 1999; PharmD, 1978, University of The Pacific; MBA, 1999, University of California (San Francisco); PhD, 2008, University of Washington

Dodge, Allene M. 2012, (Affiliate); BS, 1981, University of Washington

Donnelly, Kim A. 1985, (Affiliate); BPharm, 1982, Washington State University

Fijalka, Steven Andrew 1984, (Affiliate); PharmD, 1986, University of Washington

Fuller, Timothy S. 1975, (Affiliate); MS, 1974, Ohio State University

Graham, Daina L. 2005, (Affiliate); MS, 1977, University of Oregon

Gross, David Earl 1983, (Affiliate); PharmD, 1986, University of Washington

Hansen, Jan Elias 2011, (Affiliate); PhD, 1988, University of South Carolina

Harvey, Eric Michael 1995, (Affiliate); MBA, 1988, University of Florida; PharmD, 1988, University of Florida

Hazlet, Thomas Kurt 1996; PharmD, 1977, University of California (San Francisco); DPH, 1991, University of California (Berkeley)

Humm, Lorraine Kay 1977, (Affiliate); PharmD, 1997, University of Washington

Leith, Patricia O'Connor 1990, (Affiliate); PharmD, 1992, University of Washington

Lynch, Timothy Wayne 2001, (Affiliate); PharmD, 1998, University of Washington

Oliver, Larry William 1991, (Affiliate); PharmD, 1989, University of Utah

Penna, Peter 1977, (Affiliate); PharmD, 1969, University of California (San Francisco)

Pickette, Steven G. 1996, (Affiliate); PharmD, 2010, University of Washington

Meischke, Hendrika Wilhelmina * 1991; MPH, 1987, University of Michigan; PhD, 1992, Michigan State University
Moinpour, Carol McMillen 1982, (Affiliate); MA, 1965, Ohio State University; PhD, 1973, University of Washington

Nicola, Ray Michael 1986, (Acting); MD, 1973, University of Oregon; MHS, 1976, University of Michigan

Oberle, Mark William 1988, (Emeritus); MD, 1974, Johns Hopkins University; MPH, 1979, University of California (Berkeley)

Patrick, Donald Lee 1987; MS, 1968, Columbia University; PhD, 1972, Columbia University

Perrin, Edward Burton * 1962, (Emeritus); MA, 1956, Columbia University; PhD, 1960, Stanford University

Plough, Alonzo Louis * 1995, (Clinical); MA, 1975, Cornell University; MPH, 1977, Yale University; PhD, 1978, Cornell University

Reiber, Gayle Eliason * 1991; MPH, 1975, Johns Hopkins University; PhD, 1989, University of Washington

Richardson, Mary L. * 1977, (Emeritus); MHA, 1978, University of Washington; PhD, 1984, University of Washington

Ross, Austin 1977, (Emeritus); MPH, 1955, University of California (Berkeley)

Spigner, Clarence * 1994; MPH, 1982, University of California (Berkeley); DPH, 1987, University of California (Berkeley)

Taylor, Victoria Mary Caroline * 1989, (Research); MD, 1978, Nottingham University; MPH, 1989, University of Washington

Thompson, Engelberta 1989; MA, 1978, Western Michigan University; PhD, 1981, Western Michigan University

Urban, Nicole Denise * 1977, (Emeritus); MS, 1973, Harvard University; DSc, 1978, Harvard University

Wagner, Edward Harris * 1984, (Emeritus); MD, 1965, State University of New York (Buffalo); MPH, 1972, University of North Carolina

Associate Professors

Allan, Susan M. 2008; JD, 1977, Harvard University; MD, 1981, Harvard Medical School; MPH, 1992, Johns Hopkins University

Banta-Green, Caleb J. 1996, (Affiliate); MSW, 1996, University of Washington; MPH, 1997, University of Washington; PhD, 2008, University of Washington

Bell, Michelle * 1984, (Emeritus); MSW, 1967, University of Washington; PhD, 1984, University of Washington

Carlini, Beatriz Helena 2003, (Affiliate); PhD, 1992, Pontificia Universidade Catolica de Sao Paulo (PUC-SP); MPH, 2005, University of Washington

Farquhar, Stephanie Ann 1988, (Affiliate); MA, 1994, University of Colorado (Boulder); PhD, 2000, University of Michigan

Fishman, Paul Arthur 1985, (Affiliate); MA, 1983, American University; MA, 1990, University of Washington; PhD, 1990, University of Washington

Hannon, Margaret A. 2001; MA, 1999, University of North Carolina, Chapel Hill; MPH, 2001, University of North Carolina, Chapel Hill; PhD, 2001, University of North Carolina, Chapel Hill

Johnson, Christopher Elliot 2012; PhD, 1998, University of Minnesota

Kopjar, Branko 1997; MD, 1987, University of Zagreb (Croatia); MSc, 1991, University of Zagreb (Croatia); PhD, 1996, University of Oslo (Norway)

McGregor, Bonnie Alice 2000, (Affiliate); MS, 1999, University of Miami (Florida); PhD, 2000, University of Miami (Florida)

Ralston, James D. 1989, (Affiliate); MD, 1994, University of Washington; MPH, 2002, University of Washington

Rasmussen, Eric D. 2006, (Affiliate); MD, 1990, Stanford University

Reid, Robert John 2005, (Affiliate); MD, 1986, University of Alberta, Canada; MPH, 1993, Johns Hopkins University; PhD, 1998, Johns Hopkins University

Tu, Shin-Ping 1993, (Affiliate); MD, 1989, University of Cincinnati; MPH, 1996, University of Washington

Turner, Anne McNaughton 1989; MD, 1985, Dartmouth Medical School; MLIS, 2001, University of Washington; MPH, 2005, University of Washington

Assistant Professors

Bell, Janice F. 1991, (Affiliate); MN, 2001, University of Washington; MPH, 2001, University of Washington; PhD, 2005, University of Washington

Ceballos, Rachel M. 2005; MS, 2002, Pennsylvania State University; PhD, 2005, Pennsylvania State University

Coe, Norma Beth 2013; PhD, 2005, Massachusetts Institute of Technology

Court, Beverly Junkert 2003, (Affiliate); MHA, 1980, University of Washington; PhD, 2007, University of Washington

El-Bastawissi, Amira Y. 1997, (Affiliate); MBChB, 1981, Alexandria University, Egypt; MSc, 1984, Ohio State University; PhD, 1993, University of Texas (Houston)

Farver, Catherine Lee 1990, (Affiliate); BA, 1980, Eastern Washington University

Fink, Kenneth Stuart 1996, (Affiliate); MD, 1996, University of Pennsylvania

Hereford, James Fred 1990, (Affiliate); MS, 1989, Montana State University

Hsu, Clarissa Wen-Ling 1990, (Affiliate); PhD, 2000, University of Washington

Karasz, Hilary Nicole 1994, (Affiliate); MA, 1993, San Francisco State; PhD, 2006, University of Washington

Ko, Linda 2011; MS, 1999, University of Texas (El Paso); MPH, 2000, Boston University; PhD, 2008, University of North Carolina

Koelemay, Kathryn 2004, (Affiliate); MD, 1979, Louisiana State University; MPH, 2005, University of Washington

Lind, Bonnie Kay 1985, (Affiliate); MS, 1987, University of Washington; PhD, 2005, University of Washington

McAfee, Timothy Armstrong 1989, (Affiliate); MPH, 1984, University of California (Berkeley); MS, 1984, University of California (Berkeley); MD, 1986, University of California (San Francisco)

McCullough, Brendan John 1999, (Affiliate); PhD, 2005, University of Washington; MD, 2007, University of Washington

Ornelas, India J. 1994; MPH, 1999, University of Washington; PhD, 2009, University of North Carolina, Chapel Hill
Otten, Jennifer Jill 2012; MS, 1998, Tufts University; PhD, 2009, University of Vermont

Penfold, Robert Benjamin 2011, (Affiliate); MA, 1997, University of Waterloo (Canada); PhD, 2004, University of Toronto (Canada)

Petrescu-Prahova, Miruna 2008; MA, 2002, University of Bucharest (Romania); MA, 2008, University of California (Irvine); PhD, 2009, University of California (Irvine)

Rosenberg, Dori E. 2010, (Affiliate); MPH, 2003, San Diego State College; PhD, 2010, University of California (San Diego)

Senturia, Kirsten Diana * 1997, (Clinical); MA, 1990, University of California (Los Angeles); PhD, 1995, University of California (Los Angeles)

Solorio, Maria Rosa 1995; MD, 1989, University of California (San Diego); MPH, 1999, University of Washington

Stern, Marc Francis 2007, (Affiliate); MD, 1982, University of Buffalo; MPH, 1992, Indiana University

Taubman, Sarah L. 2012, (Affiliate); MS, 2004, Harvard University; ScD, 2008, Harvard University

Valenzuela, Matias Javier 1995, (Affiliate); MA, 1996, University of California (San Diego); PhD, 2000, University of Washington

Wernli, Karen Joanne 1999, (Affiliate); MS, 1998, University of Texas (unspecified); PhD, 2006, University of Washington

Williams, Emily Caterina 2003; MPH, 2003, Boston University; PhD, 2009, University of Washington

Senior Lecturers

Bezruchka, Stephen A. 1978; MA, 1967, Harvard University; MD, 1973, Stanford University; MPH, 1993, Johns Hopkins University

Condon, James Vincent 2014; MS, 2002, Central Michigan University; EdD, 2013, Georgia Southern University

Hanken, Mary Alice 1991; MEd, 1974, Seattle University; PhD, 1989, University of Washington

House, Peter James 1974; MHA, 1974, University of Michigan

Kwan-Gett, Tao Sheng Clifford 1991; MD, 1991, Harvard University; MPH, 1998, University of Washington

Mackenzie, Sara Louise Campbell 1992; MD, 1992, University of California (Davis); MPH, 2005, University of Washington

Murphy, Gretchen Cecelia 1992; MEd, 1973, University of Washington

Okamoto, Carole 2003; MBA, 1983, Houston Baptist University

Peterson, Kathleen 1998; MS, 1994, Central Michigan University

Sappington, Jeremy Lee 1992, (Emeritus); MPH, 1964, University of North Carolina

Steele, Marsha C. 2006; MS, 1980, University of Washington

Stillman, Dennis 1987; MHA, 1979, University of Washington

Lecturers

Katz, Aaron 1988; CPH, 1975, University of Toronto (Canada)

Thompson, John Robert 1989, (Emeritus); MSW, 1976, University of Washington

Welton, William Edwin 2001; MHA, 1972, University of Michigan; DPH, 1999, University of Michigan

Reserve Officer Training Corps

Aerospace Studies

Professor

Bigger, Brent D 2014; MS, 1996, University of Oklahoma; MA, 2008, Air University

Assistant Professors

Bowen, Spencer J. 2011; MS, 2009, Air Force Institute of Technology

Mengistu, Isseyas H. 2013; MS, 2011, Air Force Institute of Technology

Woodard, Kyle S. 2014; BS, 2010, University of Portland

Military Science

Professor

Mountcastle, John C. 2011; MA, 2003, Duke University; PhD, 2006, Duke University

Assistant Professors

Kovalsky, Michael P. 2011; BA, 2005, Seton Hall University

Pierce, Ryan N. 2010; MBA, 2010, City University (Seattle)

Pola, William 2006; BA, 1988, California State University, Sacramento

Naval Science

Professors

Deehr, John David 2014; MS, 2004, U.S. Naval War College

Melin, David Whiting 2012; MBA, 1990, University of Maine; MA, 1996, Naval War College

Associate Professor

Maxwell, Michael David 2013; MBA, 2011, Trident University

Assistant Professors

Boehm, Matthew Joseph 2013; BS, 2008, Us Naval Academy

Gardner, Daniel E. 2011; BS, 2007, Maine Maritime Academy

Hall, Alvis Gibson Jr. 2014; BBA, 2009, University of West Georgia

Kigin, Shane Michael 2013; BS, 2006, Us Naval Academy

Nelson, Garrett Dale 2013; BA, 2004, University of Illinois

Social Work

Professors

Catalano, Richard F. 1979; MA, 1976, University of Washington; PhD, 1982, University of Washington

Conte, Jon Robert * 1990; MSW, 1974, University of Washington; PhD, 1979, University of Washington

Courtney, Mark Edward 2007, (Affiliate); MA, 1987, John F. Kennedy University; MSW, 1992, University of California (Berkeley); PhD, 1992, University of California (Berkeley)

de Haan, Benjamin Daniel 2010, (Affiliate); MPA, 1986, Lewis And Clark College; PhD, 1997, Portland State University

Fredriksen Goldsen, Karen Ilene * 1993; MSW, 1986, University of Washington; PhD, 1993, University of California (Berkeley)

Gilchrist, Lewayne Dorman 1981, (Emeritus); MA, 1967, Stanford University; MSW, 1977, University of Washington; PhD, 1981, University of Washington

Gillmore, Mary Louise 1977, (Emeritus); MS, 1970, University of Michigan; MA, 1977, University of Washington; PhD, 1983, University of Washington

Hawkins, John David 1976; MA, 1969, Northwestern University; PhD, 1975, Northwestern University

Herrenkohl, Todd Ian 1995; MSW, 1993, Simmons College; PhD, 1998, University of Washington

Hooyman, Nancy Runkle * 1979; MSW, 1970, University of Michigan; PhD, 1974, University of Michigan

Levy, Rona Leslie 1975; MSW, 1972, University of Michigan; PhD, 1974, University of Michigan; MPH, 1975, University of Michigan

Longres, John Frank * 1993, (Emeritus); MSW, 1966, University of California (Los Angeles); PhD, 1970, University of Michigan

Marcenko, Maureen Olivia * 1997; MSW, 1978, Wayne State University; PhD, 1988, McGill University (Canada)

Meyers, Marcia K. 2001; MPA, 1987, Harvard University; MSW, 1992, University of California (Berkeley); PhD, 1992, University of California (Berkeley)

Morrison, Diane Marie * 1980; MS, 1979, University of Washington; PhD, 1982, University of Washington

Nagda, Biren Amritlal 1996; MSW, 1989, University of Michigan; MA, 1996, University of Michigan; PhD, 1996, University of Michigan

Nurius, Paula Suzette * 1984; MSW, 1980, University of Hawaii; MA, 1983, University of Michigan; PhD, 1984, University of Michigan

Pecora, Peter John * 1990; MSW, 1977, University of Wisconsin (Milwaukee); PhD, 1982, University of Washington

Resnick, Herman * 1967, (Emeritus); MSS, 1956, New York University; PhD, 1970, Bryn Mawr College

Richey, Cheryl Ann * 1971, (Emeritus); MSW, 1971, University of California (Berkeley); DSW, 1974, University of California (Berkeley)

Roffman, Roger Alan 1972, (Emeritus); MSW, 1965, University of Michigan; DSW, 1983, University of California (Berkeley)

Uehara, Edwina S. * 1990; MSW, 1977, University of Michigan; PhD, 1987, University of Chicago

Van Soest, Dorothy 2001, (Emeritus); MSW, 1975, University of Minnesota; DSW, 1994, Catholic University

Walters, Karina Lynn 2000; MSW, 1990, University of California (Los Angeles); PhD, 1995, University of California (Los Angeles)

Weatherley, Richard Alan * 1975, (Emeritus); MA, 1963, University of Chicago; PhD, 1975, Massachusetts Institute of Technology

Wells, Elizabeth A. 1982, (Emeritus); PhD, 1984, University of Washington

Whittaker, James Kevin * 1970, (Emeritus); MSW, 1966, University of Michigan; PhD, 1970, University of Minnesota

Associate Professors

Aisenberg, Eugene Francis 2002; MA, 1984, St. John's Seminary; MSW, 1994, University of Southern California; PhD, 2001, University of Southern California

Almgren, Gunnar Robert 1986; MA, 1975, Pacific Lutheran University; MSW, 1979, Portland State University; PhD, 1990, University of Washington

Arthur, Michael Warren * 1991, (Research); MA, 1987, University of Virginia; PhD, 1990, University of Virginia

Balassone, Mary Lou * 1986; MSW, 1980, Syracuse University; DSW, 1987, University of California (Berkeley)

Balsam, Kimberly F. 2003, (Affiliate); MA, 1994, University of Oregon; PhD, 2003, University of Vermont

Berleman, William C. * 1965, (Emeritus); MSW, 1960, University of Washington

Dear, Ronald Bruce * 1970, (Emeritus); MSW, 1957, University of Pittsburgh; DSW, 1972, Columbia University

Duran, Bonnie M. 2007; MPH, 1989, University of California (Berkeley); DPH, 1997, University of California (Berkeley)

English, Diana Jane 1988, (Affiliate); MSW, 1978, California State University, Sacramento; PhD, 1985, University of Washington

Erera, Pauline * 1993, (Emeritus); MSW, 1981, University of Haifa, Israel; PhD, 1983, Cornell University

Evans-Campbell, Teresa Ann 2000; MSW, 1994, University of California (Los Angeles); PhD, 2000, University of California (Los Angeles)

Farwell, Nancy 1998; MSW, 1989, University of California (Berkeley); PhD, 1998, University of California (Berkeley)

Gavin, Amelia Ryle 2004; MSW, 2000, University of Michigan; PhD, 2004, University of Michigan

Haggerty, Kevin Pesch 1985; MSW, 1989, University of Washington; PhD, 2011, University of Washington

Harachi, Tracy Walsh * 1987; MSW, 1988, University of Washington; PhD, 1991, University of Washington

Herrick, James E. * 1966, (Emeritus); MSW, 1958, University of California (campus unspecified); DSW, 1966, University of Southern California

Ishisaka, Anthony Hideki 1971, (Emeritus); MSW, 1968, University of California (Berkeley); DSW, 1978, University of California (Berkeley)

Kelley, Jerry Lee * 1961, (Emeritus); MA, 1949, University of Chicago

Kemp, Susan Patricia 1994; MA, 1981, University of Auckland (New Zealand); PhD, 1994, Columbia University

Kruzich, Jean Marie * 1991; MSW, 1975, University of Minnesota; MA, 1976, University of Minnesota; PhD, 1982, University of Washington

Lindhorst, Taryn 2001; MSW, 1988, Southern University At New Orleans; PhD, 2001, Louisiana State University

Lustbader, Wendy Iris 1989, (Affiliate); MSW, 1982, University of Washington

Romich, Jennifer L. 2002; MA, 2000, Northwestern University; PhD, 2002, Northwestern University

Sohng, Sung Sil * 1990; MSW, 1979, Wayne State University; PhD, 1989, University of Pittsburgh

Stuber, Jennifer 2006; PhD, 2002, Yale University

Tajima, Emiko A. 1999; MS, 1987, University of Pennsylvania; PhD, 1999, Bryn Mawr College

Teather, Edward Charles * 1966, (Emeritus); MSW, 1962, University of British Columbia (Canada)

Assistant Professors

Allen, Allethia Lee * 1966, (Emeritus); MSW, 1950, Boston University; PhD, 1986, Walden University

Crook, Barbara Jeanne 1996, (Affiliate); MSW, 1976, University of Washington

Kosturn, Carole F. 1979, (Affiliate); MSW, 1974, University of Washington

Lewis, Jordan Paul 2012; MSW, 2000, Washington University; PhD, 2009, University of Alaska

Martinson, Melissa Louise 2012; MSW, 2003, University of Minnesota; PhD, 2010, Columbia University

Moore, Megan 2012; MSW, 2006, University of California (Berkeley); PhD, 2012, University of California (Berkeley)

Richards, Martha 1979, (Affiliate); MSW, 1970, University of Washington

Ryder, Rita Maureen 1982, (Affiliate); MSW, 1971, Catholic University of America

Shaw, Mary Elizabeth 1998, (Affiliate); MSW, 1989, University of Washington

West, Margaret Ann * 1975, (Affiliate); MSW, 1968, University of Washington; PhD, 1984, University of Washington

Senior Lecturers

Amidei, Nancy Jean 1992, (Emeritus); MSW, 1968, University of Michigan

Averill, Lloyd James 1984, (Emeritus); MDiv, 1950, Colgate Rochester Divinity School; MA, 1952, University of Rochester; MTh, 1966, Colgate Rochester Divinity School

Pearce, Diana May * 1998; MSW, 1969, University of Michigan, Ann Arbor; PhD, 1976, University of Michigan, Ann Arbor

Spearmon, Margaret Lavelle 1992; MSW, 1975, Washington University; PhD, 1999, University of Washington

Lecturers

Bagshaw, Michelle Christine 1998; MEd, 1996, Western Washington University; MSW, 2004, University of Washington

Briner, Leslie R 2009; MSW, 2010, University of Washington

Brower, Jennifer 2002; MSW, 2002, University of Washington

Capestany, Sheila A 1995; MSW, 1997, University of Washington; MPH, 1998, University of Washington

Carrigan, Lynn 1981, (Emeritus); MSW, 1981, University of Washington

De Fries, Stacey A. 2010; MSW, 2000, Hunter College

De Mello, Stan J. 1996; MSW, 1982, Dalhousie University (Canada); MPA, 1983, Dalhousie University (Canada)

DeLong, James Barrett 1985; MSW, 1979, University of Washington

Etnyre, William Strickler 1990; MSW, 1975, University of Washington; PhD, 2005, Smith College

Forrester, Martha Glosson 1997; MSW, 1998, University of Washington

Hetherington, Zynovia Yvette 2000; MSW, 1995, Eastern Michigan University

Jackson, Thomas Ronald 1984; MSW, 1976, University of Washington

Preston, Leon T. 1981; MSW, 1973, University of Washington

Ranchigoda, Tanya Dawn 1999; MSW, 2001, California State University, Long Beach

Rivara, J'May Bertrand 1979; MSS, 1975, Bryn Mawr College

Roberson, Kendra Corr 2003; MSW, 1993, Boston College; PhD, 2003, University of Maryland

Ryan, Alice C. 2012; MSW, 1997, Western Michigan University

Sarka, Ebasia Belina 1994; MSW, 1996, University of Washington

Shultz, Bonnie 2002; MSW, 1985, University of Washington

Vesneski, William M. 1997; JD, 1991, Seattle University; MSW, 1998, University of Washington; PhD, 2012, University of Washington

Watts, Julie Lynne 1997; MSW, 1999, University of Washington

Wells, Aida Villeda 1991; MSW, 2000, Washington University

Wilson, Stephen Tierri 1992; MSW, 1982, University of Washington

Winn, Scott Willis 2002; MSW, 1994, University of Washington
