Field experience accompanying third quarter of study in Secondary Teacher Education Program. Four weeks full-time plus daily part-time in supervised school placements. Prerequisite: secondary TEP student. Credit/no-credit only.

[View course details in MyPlan: EDTEP 593](#)

EDTEP 595 Capstone Project: Tool for Reflection - Secondary ([1-3]-, max. 3)

Group discussions fostering integration of coursework, field experience, and teaching experiences through documentation and reflection on student teaching experiences. Using certification standards for teachers, students illustrate their learning through multiple forms of evidence. Final capstone project is presented to an audience. Prerequisite: secondary TEP student. Credit/no-credit only.

[View course details in MyPlan: EDTEP 595](#)

EDTEP 600 Independent Study or Research (*-)

Registration must be accompanied by a study prospectus endorsed by a Director of Teacher Education and the faculty adviser for the work proposed. Credit/no-credit only.

[View course details in MyPlan: EDTEP 600](#)

EDTEP 601 Fourth Quarter Field Experience (2-10, max. 15)

Field experience during the fourth quarter of study in a Teacher Education Program. Full-time student teaching in supervised school placements. Prerequisite: TEP student. Credit/no-credit only.

EDUCATIONAL LEADERSHIP & POLICY

STUDIES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

EDLPS 444 Constitution and American Public Education (3-6, max. 6) I&S

Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no-credit only. Offered: jointly with LAW 444.

[View course details in MyPlan: EDLPS 444](#)

EDLPS 458 Education in the Forming of American Society (5) I&S *Beadie*

Covers the development of American education in cultural context; history of schools and non-school learning from colonial period to the twentieth-century; apprenticeship and learning societies; community and market-based schooling; liberal learning and the rise of the university; and schools as agencies of economic and political integration and mediators of culture and social status. Offered: jointly with HSTAA 458.

[View course details in MyPlan: EDLPS 458](#)

EDLPS 459 History of American Education Since 1865 (3) I&S

Development of American education in cultural context: progressive education, recent criticism, continuing issues and trends. Offered: jointly with HSTAA 459.

[View course details in MyPlan: EDLPS 459](#)

EDLPS 479 Crucial Issues in Education (3)

Selected educational issues, policies, and contexts. Evolution of the American education enterprise, legal issues, professionalism, finance, and other vital educational concerns.

[View course details in MyPlan: EDLPS 479](#)

EDLPS 496 Workshop: Education Programs and Problems (1-6, max. 10)

Study of such topics as planning, development, supervision, organization, operation, or evaluation of current or emerging programs or problems in education.

[View course details in MyPlan: EDLPS 496](#)

EDLPS 499 Undergraduate Research (*)

Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

[View course details in MyPlan: EDLPS 499](#)

EDLPS 501 Introduction: Leadership Beyond the Classroom (3-6, max. 6)

First course in principal certification program; explores Washington state laws, legal principles, context of public schools, multicultural issues, changing population. Essential skills of leadership: communication, human relations, strategies for shared decision making, and dealing with conflict. (Open only to students admitted to the Danforth Principal/Program Administrator Preparation Program.)

[View course details in MyPlan: EDLPS 501](#)

EDLPS 502 Leadership Core ([3-6]-, max. 6)

Moral dimensions of leadership; modes of inquiry; organizational theory and change; instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

[View course details in MyPlan: EDLPS 502](#)

EDLPS 503 Leadership Core (-[3-6]-, max. 6)

Moral dimensions of leadership; modes of inquiry; organizational theory and change; instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Danforth Principal/Program Administrator Preparation Program.

[View course details in MyPlan: EDLPS 503](#)

EDLPS 504 Leadership Core (-[3-6], max. 6)

Moral dimensions of leadership; modes of inquiry; organizational theory and change; instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Danforth Principal/Program Administrator Preparation Program.

[View course details in MyPlan: EDLPS 504](#)

EDLPS 505 Transition to Leadership (1-, max. 3)

Designed for students in the Danforth Educational Leadership Program. Introduces students to applied educational research concepts; how to conduct inquiry project(s) within schools, with a focus on equity; and to write a research paper around the inquiry project. Prerequisite: admission to Danforth Principal/Program Administrator Program.

[View course details in MyPlan: EDLPS 505](#)

EDLPS 506 Intercollegiate Athletic Leadership: Foundations of Leadership (3) S. LOPEZ

Focuses on theoretical frameworks and research used to explore athletic leadership within higher education and issues driving athletic department policies and practices. Students develop skills and strategies for leadership and decision-making that enhance student-athlete opportunities and enrich the role of athletics within the educational experience. Offered: S.

[View course details in MyPlan: EDLPS 506](#)

EDLPS 507 Intercollegiate Athletic Leadership: Coaching Philosophy and Pedagogy (3) S. LOPEZ

Helps athletics coaches develop skills and strategies for decision-making that enhance student-athlete opportunities and enriches the role of athletics within the educational experience. In addition to examining coaching philosophy and mission, students learn and practice basic instructional techniques and coaching

pedagogy. Offered: S.

[View course details in MyPlan: EDLPS 507](#)

EDLPS 508 Intercollegiate Athletic Leadership: Development and Fundraising in Higher Education (3)

Covers the importance of a comprehensive development plan for the university and intercollegiate athletic department, along with the basic components of development including research, solicitation, stewardship, annual campaigns, and major gifts. Also explores marketing, promotions, sponsorships and communications departments. Offered: S.

[View course details in MyPlan: EDLPS 508](#)

EDLPS 509 Intercollegiate Athletic Leadership: Leadership and Management Capstone (2)

Explores the breadth of athletic management through leadership lens. Explores organization mission and culture, while examining their own leadership styles and practices. Participation in case studies, leadership training, crisis management exercises, and other activities designed to analyze and respond to real-world situations. Offered: S.

[View course details in MyPlan: EDLPS 509](#)

EDLPS 510 School Finance (3) *M. PLECKI*

Financial practices and problems in districts and schools considered, including state and federal support plans, school plant planning, school business management, resource allocation, and budgeting and educational accountability.

[View course details in MyPlan: EDLPS 510](#)

EDLPS 511 School-Community Relations (3)

Examines the dynamics of the interface between the public schools and the community. Special attention is given to the findings of research in relation to school-community power, types, and organizational influences.

[View course details in MyPlan: EDLPS 511](#)

EDLPS 512 Intercollegiate Athletic Leadership: Events and Facilities Planning and Management (3) *H. OLSON*

Athletic departments must plan and manage a variety of events including team practices, competitions, alumni activities, hosted tournaments, and outreach activities. Engages students in understanding the planning process and operations around event production, facilities management, staffing, scheduling, and other event services. Also examines capital planning. Offered: A.

[View course details in MyPlan: EDLPS 512](#)

EDLPS 513 Intercollegiate Athletic Leadership: Marketing and Communications in Intercollegiate Athletics (3) *G. GREENE*

Participants learn the inner workings of a sports organization, gaining broad insight into the areas such as: media relations, public relations, sales, recruiting, branding, sponsorship, ticket sales, event promotions, the use of social media. Students strategize and practice communication an effective message delivery through a variety of mediums. Offered: A.

[View course details in MyPlan: EDLPS 513](#)

EDLPS 514 Intercollegiate Athletic Leadership: Informing Policy and Decision-Making with Data (3) *J. HOFFMAN*

Focuses on methods of assessment and evaluation with a focus on strategic planning and decision-making, accountability systems and assessment-driven decision-making. Students learn to use practical statistical skills, with an emphasis on the use and interpretation of data to guide decision-making. Offered: W.

[View course details in MyPlan: EDLPS 514](#)

EDLPS 515 Intercollegiate Athletic Leadership: Ethical Leadership in Collegiate Athletics (3)

Examination of procedures and techniques pertinent to the management of organizational conflict. Among the areas covered are collective bargaining, grievance procedures, mediation, fact finding, and arbitration.

[View course details in MyPlan: EDLPS 515](#)

EDLPS 516 Special Education and the Law (3) *Brown*

Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions.

Offered: jointly with EDSPE 504.

[View course details in MyPlan: EDLPS 516](#)

EDLPS 517 Intercollegiate Athletic Leadership: Physical Training and Preparation (3) *D. GIULIANI*

Athletics coaches work to develop a student-centered training program that maximizes athlete performance and wellness. Students explore leadership, policy, and program planning and implementation based on human development theory and current issues with sport performance. Offered: A.

[View course details in MyPlan: EDLPS 517](#)

EDLPS 519 Special Topics in Educational Leadership ([0-10]-, max. 20)

Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues of particular concern to K-12 administrators and other educators in leadership roles in districts and schools. Topics vary.

[View course details in MyPlan: EDLPS 519](#)

EDLPS 520 Education as a Moral Endeavor (3) *J. WILLIAMSON-LOTT*

An exploration of fundamental questions that have faced educational leaders in the past and most likely will continue to face them in the future. Foundational studies in history, philosophy, and sociology provide the basis for discussion and writing about these fundamental questions.

[View course details in MyPlan: EDLPS 520](#)

EDLPS 521 Philosophy of Education (3) *D. KERDEMAN*

Philosophy of education considered as a study of the conceptual basis for educational policy and practice. Emphasis on relationships between enduring educational problems and fundamental philosophic issues; concepts that feature centrally in educational discourse; and conceptual analysis as a means for clarifying decisions regarding educational policy and practice.

[View course details in MyPlan: EDLPS 521](#)

EDLPS 522 Social Science, Social Justice, and Qualitative Research (3) *D. KERDEMAN*

Intensive study of the writings of selected contemporary philosophers of education. Offered: WS.

[View course details in MyPlan: EDLPS 522](#)

EDLPS 524 Seminar in Philosophy of Education (3, max. 6) *D. KERDEMAN*

Philosophical examination of ways in which education might be studied. Uses and limits of conventional scientific approaches in education inquiry. Consideration of alternatives. Offered: WS.

[View course details in MyPlan: EDLPS 524](#)

EDLPS 525 Educational Inquiry (3) *D. KERDEMAN*

General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence.

Prerequisite: doctoral status in education. Credit/no-credit only. Offered: A.

[View course details in MyPlan: EDLPS 525](#)

EDLPS 526 Educational Inquiry (3) *D. KERDEMAN*

General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence.

Prerequisite: doctoral status in education. Credit/no-credit only. Offered: W.

[View course details in MyPlan: EDLPS 526](#)

EDLPS 528 Current Issues in Graduate Education (3) *M. NERAD*

Examines recurrent forces impacting U.S. graduate education including but not limited to research funding, intra-institutional pressure, student unions, and accountability. Analyzes the current literature from different perspectives: historical, psychological, sociological, economic, and educational to illuminate the complexities of graduate education.

[View course details in MyPlan: EDLPS 528](#)

EDLPS 530 History of Education (3) *N. BEADIE*

Historical survey of education. Emphasis on relationship between idea and practice. Topics include education and colonialism, formation of state school systems, progressive education, equal educational opportunity, changes in textbooks and curricula, education and social structure, and education in the history of cultures.

[View course details in MyPlan: EDLPS 530](#)

EDLPS 531 History of American Higher Education (3)

Examination of the historical development of the American higher education enterprise, including pre-colonial origins. Includes attention to the colonial colleges, the rise of new institutions in the nineteenth century, and the further development of American colleges and universities in the twentieth century. Leaders in these developments are identified.

[View course details in MyPlan: EDLPS 531](#)

EDLPS 535 Historical Inquiry in Education Research (3, max. 6) *N. BEADIE*

Methods and critique of historical research in education. Examination of landmark works in education history and historiography. Hands-on experience framing historical questions, finding historical sources, using historical evidence, substantiating historical claims, and addressing issues in the history of education.

[View course details in MyPlan: EDLPS 535](#)

EDLPS 536 Historical Problems in the Transfer of Culture (4) *N. BEADIE*

Provides an analysis and interpretation of the history of education in its broadest sense: the transfer of culture across generations. Pays special attention to issues of cultural conflict, cultural change, and curricula as representations of culture. Examines problems of evidence and interpretation in exemplary historical works.

[View course details in MyPlan: EDLPS 536](#)

EDLPS 537 Perennial Debates in the History of Education (3) *J. WILLIAMSON-LOTT*

Analysis of the historical underpinnings of debates about educational issues.

[View course details in MyPlan: EDLPS 537](#)

EDLPS 538 Education for Liberation (3) *J. WILLIAMSON-LOTT*

Analyses of the different educational histories of American ethnic, social, gender, and religious groups and how they relate their own definitions of "education for liberation."

[View course details in MyPlan: EDLPS 538](#)

EDLPS 539 History of Urban Education (4) *Beadie*

Examines the complex ways that race, class, real estate interests, the quest for social mobility, and a range of government policies have interacted to structure the social and spatial distribution of educational opportunity in cities historically. Includes a comparative historical analysis of urban case studies, including Seattle.

[View course details in MyPlan: EDLPS 539](#)

EDLPS 540 Sociology of Education (3)

Examination of education and educational institutions by using the major conceptual tools of sociology. Emphasis on sociological thought and findings that have particular bearing on the understandings and judgments of educators.

[View course details in MyPlan: EDLPS 540](#)

EDLPS 542 Seminar in Educational Sociology (3)

Application of sociological principles to school problems; individual problems and investigations. For teachers,

administrators, and those using educational sociology as a field for advanced degrees.

[View course details in MyPlan: EDLPS 542](#)

EDLPS 544 Comparative Education: Introduction to Concepts and Methods (3)

Introduction to research methods used in comparative education studies. Considers ways to study familiar and unfamiliar contexts, identifies the common pitfalls of international comparisons. Reviews ethnomethodological tools of interview construction, cross-cultural observation strategies, documentary analysis. Education policy and practice is primary focus; useful for comparing other public policy issues internationally.

[View course details in MyPlan: EDLPS 544](#)

EDLPS 545 Knowledge and Data in Relation to Action ([0/3]-, max. 3)

Introduces Leadership for Learning (L4L) students to systematic inquiry - to fundamental ideas about knowing and knowledge, data and evidence, and to the applications of these ideas in settings that invite leadership action to address educational issues. Prerequisite: admission to the Leadership Learning program.

[View course details in MyPlan: EDLPS 545](#)

EDLPS 546 Leadership Inquiry I: The Design of Research on Local Problems of Practice ([0/3]-, max. 3)

Examines evaluation design, action research, critical inquiry, and mixed method research. Equips L4L students to recognize and create viable, rigorous designs for action-oriented research into local problems of practice.

Prerequisite: admission to the Leadership Learning program.

[View course details in MyPlan: EDLPS 546](#)

EDLPS 547 Inquiry and Data-Informed Leadership I ([0/3]-, max. 3)

Deepens students' understanding of a cycle of inquiry approach to strengthen their leadership, with a particular emphasis on working with evidence from a systemic, equity, and excellence stance. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

[View course details in MyPlan: EDLPS 547](#)

EDLPS 548 Inquiry and Data-Informed Leadership II ([0/3]-, max. 3)

Strengthens students' engagement with and application of cycle of inquiry approach to their leadership practice.

Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

[View course details in MyPlan: EDLPS 548](#)

EDLPS 549 Special Topics in Educational Studies (1-6, max. 20)

Readings, lectures, and discussions pertaining to significant and enduring ideas in the philosophy, history and sociology of education. Specific topics are critically examined in light of contemporary problems in education. Topics vary.

[View course details in MyPlan: EDLPS 549](#)

EDLPS 550 The Dynamics of Educational Organizations (4)

Exploration of the literature in organizational theory and leadership, the assumptions that underlie the development of various approaches to organizational theory and how these approaches are applied, and an acquaintance with different conceptual frames that can be used to determine how to improve and change organizations.

[View course details in MyPlan: EDLPS 550](#)

EDLPS 551 Organizational Theory and Educational Change (4)

Introduces students to the interdisciplinary research literature on organizations and its applicability to the research and practice of educational organizations. Engages students in understanding and critiquing organizational research and using it to develop conceptual frameworks to guide educational research and practice.

[View course details in MyPlan: EDLPS 551](#)

EDLPS 552 Organizational Change in Education (3)

Change and innovation in educational organizations. Theoretical approaches include sociopsychological,

rational planning, political perspectives, and those associated with notion of organized anarchies. Specific topics related to change and innovation (e.g., roles of beliefs, symbols and norms, diffusion of innovations, and research issues).¹⁴⁴¹

[View course details in MyPlan: EDLPS 552](#)

EDLPS 554 Professional Growth Planning I (5)

Supports students' professional growth and development, as simultaneously builds a professional culture and network among cohort members to maximize student success in the program. Prerequisite: Leadership for Learning EdD students only. Credit/no-credit only. Offered: S.

[View course details in MyPlan: EDLPS 554](#)

EDLPS 555 Professional Growth Planning II (5)

Supports students' professional growth and development, and scaffolds the internship and capstone portfolio processes within a professional culture and network that maximized student success in the program.

Prerequisite: Leadership for Learning EdD students only. Credit/no-credit only.

[View course details in MyPlan: EDLPS 555](#)

EDLPS 556 Leadership for Equitable Systems I ([2-6]-, max. 6)

Supports students in taking a systemic approach to their leadership, regardless of their formal position. Major topics include resource allocation and an introduction to policy design and implementation. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

[View course details in MyPlan: EDLPS 556](#)

EDLPS 557 Leadership for Equitable Systems II ([2-5]-, max. 5)

Supports students in taking a systemic approach to their leadership, regardless of their formal position. Major topics include governance, collaborative decision-making, and the design and redesign of organizations.

Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

[View course details in MyPlan: EDLPS 557](#)

EDLPS 558 Introduction to Qualitative Research Methods in Education (3) A. ELFERS

Provides a basic overview of qualitative research methods. Covers the purpose, design, and conduct of qualitative research.

[View course details in MyPlan: EDLPS 558](#)

EDLPS 560 Perspectives on Policy and Policy Making in Education (3)

Introduces a variety of theoretical perspectives that can be used to analyze policy content, processes and outcomes. Includes a consideration of the power and limits of policy and a discussion of the many ways people in different positions in organizations can influence policy. Credit/no-credit only.

[View course details in MyPlan: EDLPS 560](#)

EDLPS 561 Education Policies and Leadership in Political Context (3)

Systematic consideration of the structure and function of educational policies and problems of research in political context.

[View course details in MyPlan: EDLPS 561](#)

EDLPS 562 American School Law (3)

Examination of persistent legal issues, including an analysis of how these issues are manifest in public policy debates.

[View course details in MyPlan: EDLPS 562](#)

EDLPS 563 Education, The Workforce, and Public Policy (3, max. 6) W. ZUMETA

Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, underutilized workers, race and gender discrimination issues, and the role of education and training in economic development. Offered: jointly with

PUBPOL 571.

[View course details in MyPlan: EDLPS 563](#)

EDLPS 564 Seminar in Economics of Education (3) *M. PLECKI*

Current problems in school finance, including costs, ability to support schools, and financial implications of educational principles. The economics of public education. Problems of federal, state, and local school support. Financing capital outlay, research, and public relations.

[View course details in MyPlan: EDLPS 564](#)

EDLPS 565 Race, Equity, and Leading Educational Change (3)

An introduction to key leadership theories, research, and practice, with a central focus on issues of race, class, power and privilege in addressing educational inequities. Applies a leadership lens to examine research and problems of practice in organizational transformation in U.S. schools and educational organizations.

[View course details in MyPlan: EDLPS 565](#)

EDLPS 566 Education Policy Serving Disenfranchised Groups (3)

Examines programs and policies aimed at ameliorating conditions that face disenfranchised groups in contemporary K-12 schooling. Seminar members critically analyze the assumptions, design, and likely impact of these programs and policies on institutions and individuals. Designed for advanced doctoral students. Others admitted with permission of instructor.

[View course details in MyPlan: EDLPS 566](#)

EDLPS 567 Education Policy and the Improvement of Teaching and Learning (3)

Examines connections between policies and classroom practice, in P-12 and higher education settings. Of particular concern is the capacity of policy to improve the quality of curriculum and instruction. Students design and critique policies, drawing on research and feedback from policymakers.

[View course details in MyPlan: EDLPS 567](#)

EDLPS 568 Policy Evaluation in Education (3)

Examination of methods for evaluating educational policies across the educational continuum. Students design and conduct a policy evaluation which draws on the policy evaluation literature. Examination of the uses of policy evaluation information in shaping organization-decision making is also included.

[View course details in MyPlan: EDLPS 568](#)

EDLPS 569 Issues in P-12 School Reform (3-5, max. 20) *Copland, Knapp*

Offers rigorous ways to explore the meaning and action implications of contemporary reform movements in the P-12 public school system. Examines a different topic each quarter concerning reform at school, district, state, or federal levels through readings, discussion, projects, and analytical writing assignments. Offered: AWSp.

[View course details in MyPlan: EDLPS 569](#)

EDLPS 571 Instructional Leadership I ([0/3]-, max. 3)

Strengthens students' ability to exercise instructional leadership across various roles inside and outside school systems. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

[View course details in MyPlan: EDLPS 571](#)

EDLPS 572 Instructional Leadership II ([2-5]-, max. 5)

Strengthens students' ability to exercise instructional leadership across various roles inside and outside school systems with emphasis on bringing instructional leadership to scale at the district level. Prerequisite: Leadership for Learning EdD students only. Offered: AWSp.

[View course details in MyPlan: EDLPS 572](#)

EDLPS 573 Professional Learning and Instructional Renewal (2-4, max. 4)

Investigates professional learning and how to support it, based on cognitive research, sociocultural theory, and scholarship on teacher education (preservice and inservice). Offers system-level leaders ways to address the

quality of teaching and learning in classrooms. Prerequisite: admission to the Leadership Learning program.¹⁴⁴³

[View course details in MyPlan: EDLPS 573](#)

EDLPS 574 Mixed Methods in Educational Research (3) *M. PLECKI*

Introduces the principles of mixed methods research design, whereby qualitative and quantitative components inform each other in sampling, data collection, and data analysis. Explores design issues and solutions primarily in the context of education policy research. Offered: W.

[View course details in MyPlan: EDLPS 574](#)

EDLPS 575 Education Policy Implementation (4) *M. HONIG*

Analyzes influences on implementation outcomes. Focuses on how skilled use of theoretical frameworks can help reveal relationships between policy and practice and evidence-based decisions that may improve implementation. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: EDLPS 575](#)

EDLPS 579 Special Topics in Organizational and Policy Analysis ([0-6]-, max. 20)

Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to the analysis of educational organizations, policies, and policy making. Topics vary.

[View course details in MyPlan: EDLPS 579](#)

EDLPS 580 The American College and University (4)

Introduction to contemporary United States higher education, with special emphasis on emerging trends, roles of the several kinds of institutions, the composition and character of student bodies and faculty, and the state coordination of colleges and universities.

[View course details in MyPlan: EDLPS 580](#)

EDLPS 581 Principles and Practices of Adult and Continuing Education (3)

History and development of adult and continuing education in the United States: component parts of the field; issues, theory, and research; program planning for adults; professionalization of the field.

[View course details in MyPlan: EDLPS 581](#)

EDLPS 582 Seminar in the History and the Organization of Higher Education (3)

Advanced seminar in the history and organization of higher education.

[View course details in MyPlan: EDLPS 582](#)

EDLPS 583 Higher Education and the Law (3)

Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

[View course details in MyPlan: EDLPS 583](#)

EDLPS 584 Academic Governance and Collective Bargaining in Higher Education (3)

Explores the concept and operation of collective bargaining in higher education: its origin; the reasons for its growing popularity as a governance mechanism; the legal framework within which it operates; the rights, powers, and duties subsumed under its operation; and its relationship to the traditional form of faculty governance mechanisms.

[View course details in MyPlan: EDLPS 584](#)

EDLPS 585 Resource Allocation in Higher Education (3)

After attention to the basic tools of economic analysis, focus is on application of those tools to specific topics in higher education (e.g., access, budgeting, finance and policies, and funding alternatives).

[View course details in MyPlan: EDLPS 585](#)

EDLPS 586 Navigating the P-20 Pipeline (3) *J. MYERS TWITCHELL*

Introduction to programs, policies, and challenges related to supporting students as they transition from K-12

schools to institutions of higher education. Exploration of localized/region-based efforts to decrease the post-secondary opportunity gap, including funding models, collaborations and networks, and data and measurement strategies to increase rates of post-secondary attainment. Offered: A.

[View course details in MyPlan: EDLPS 586](#)

EDLPS 587 Seminar in Teaching and Learning in Higher Education (3, max. 9)

Theory and practice of instruction and learning in higher education.

[View course details in MyPlan: EDLPS 587](#)

EDLPS 588 Leadership and Management in Higher Education (4) *J. LOTT*

Introduction to enduring and emerging philosophical and theoretical perspectives on leading and managing in college and university settings. Provides tools to be more explicit with the ways in which leaders and managers go about their work in higher education. Offered: W.

[View course details in MyPlan: EDLPS 588](#)

EDLPS 589 The Community College (3)

Intensive study of the community college-its history and present and future status. Curriculum, instruction, financial, and governance issues are also discussed.

[View course details in MyPlan: EDLPS 589](#)

EDLPS 590 Student Populations and Experiences in Higher Education (3-4)

Examines foundational literature on students in United States higher education. Focuses on student diversity, similarities and differences in their experiences, and the role of societal values, campus climate and structure, family, work, and peers on student access, engagement, well-being, and success. Offered: Sp.

[View course details in MyPlan: EDLPS 590](#)

EDLPS 591 Higher Education and Public Policy (3)

Covers public policy processes affecting higher education. Issues examined vary, but typically include fiscal context of higher education policy, access, equity, distance learning, and accountability policies.

[View course details in MyPlan: EDLPS 591](#)

EDLPS 592 Higher Education Equity, Reform, and Policy (3)

Develops the critical and analytical lens that students apply to public policy issues as they directly relate to higher education in the United States.

[View course details in MyPlan: EDLPS 592](#)

EDLPS 593 Assessment and Evaluation in Higher Education (3)

Covers the key components of evaluation design and implementation, particularly what researchers and practitioners define as good assessment and evaluation approaches. Develops competencies in planning assessment and evaluation strategies using these approaches.

[View course details in MyPlan: EDLPS 593](#)

EDLPS 594 Globalization and Internationalization of Higher Education (4) *M. NERAD*

Impact of globalization on higher education and strategies used by higher-ed institutions to achieve internationalization. Conceptual frameworks linking higher education institutions to economic competitiveness in the global economy. Critically analyzes recent local (UW, community colleges), national, and international initiatives and activities to achieve internationalization of the institutions and global awareness of students, faculty, staff. Offered: AS.

[View course details in MyPlan: EDLPS 594](#)

EDLPS 596 Secondary Data Analysis (3-5) *J. LOTT*

Introduces the conceptual and practical issues involved in conducting educational research using existing sources of data, commonly known as secondary data analysis. Covers several fundamental concepts in order to become an informed and competent researcher who uses secondary data. Prerequisite: basic understanding of

educational statistics.

[View course details in MyPlan: EDLPS 596](#)

EDLPS 597 Advanced Secondary Data Analysis (3) *J. LOTT*

Applied methods. Introduces the conceptual and practical issues involved in conducting educational research using existing sources of data, commonly known as secondary data analysis. Covers several fundamental concepts in order to become an informed and competent researcher who uses secondary data. Prerequisite: EDLPS 596.

[View course details in MyPlan: EDLPS 597](#)

EDLPS 598 Special Topics in Higher Education (1-6, max. 20)

Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to education in community colleges, four-year colleges, and universities. Topics vary.

[View course details in MyPlan: EDLPS 598](#)

EDLPS 599 Independent Studies in Education (1-10, max. 20)

Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor.

[View course details in MyPlan: EDLPS 599](#)

EDLPS 600 Independent Study or Research (*-)

Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: EDLPS 600](#)

EDLPS 601 Internship ([1-4]-, max. 20)

Name of faculty member responsible for supervising the student should be indicated on program of studies. Prerequisite: permission of Supervisory Committee Chairperson or Graduate Program Adviser. Credit/no-credit only.

COLLEGE OF EDUCATION

COLLEGE OF EDUCATION

EDUCATIONAL PSYCHOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

EDPSY 302 Child Development and Learning (5) I&S

Uses readings, discussions, naturalistic observations, and "virtual" children to understand the different ways children develop - physically, cognitively, social-emotionally, in language and literacy, and in approaches to learning - during early childhood, the interplay between each of these domains and the environmental context, and the theories about the developmental mechanisms underlying these changes.

[View course details in MyPlan: EDPSY 302](#)

EDPSY 380 Adult Learning and Development (5) I&S C. GLASS HASTINGS

Examination of current research and practice in the field of adult education, learning, and development. Offered: AWSpS.

[View course details in MyPlan: EDPSY 380](#)

EDPSY 404 Adolescent Development (5) J. LOTT

Students use readings, discussion, and interview data to understand adolescent development. Discusses multiple domains of development, as well as the contextually situated nature of adolescence. Highlights implications for educators, policy makers, and others who serve the needs of adolescents throughout the course. Offered: W.

[View course details in MyPlan: EDPSY 404](#)

EDPSY 405 Adolescents and Media: Challenges in the 21st Century Classroom (3) I&S

Encourages students to consider classrooms of the future while reflecting on their own classroom experiences. Examines adolescents' informal use of media today, some of the ways media can affect young people, and the implications of these effects in a classroom setting.

[View course details in MyPlan: EDPSY 405](#)

EDPSY 406 Learning and Teaching in our Changing World: Insights from Experience and Research (5) I&S

Human learning in the educational setting. Cognition, development, learning, motivation, affective processes, and socialization. Emphasis on skills in influencing classroom learning and discipline.

[View course details in MyPlan: EDPSY 406](#)

EDPSY 420 Bullying, Revenge, and Belonging: Cultural Perspectives on Social Power (4) I&S, DTV

Examines theories and research on bullying, revenge, and bystander behavior with a particular focus on cultural norms. Identifies the institutional, social, emotional, and ethical characteristics and processes that support exploitive relationships, revenge and their inclusive alternatives. Practical interventions are presented and evaluated. Offered: W.

[View course details in MyPlan: EDPSY 420](#)

EDPSY 425 Bullies, Victims, and Bystanders: Social Power In (4) I&S

[View course details in MyPlan: EDPSY 425](#)

EDPSY 431 Strategies for Classroom Research and Evaluation (5)

Techniques and strategies for the design and implementation of studies of classroom instruction. Directed toward classroom teachers as consumers of instructional research and as evaluators in their own classrooms. Credit/no-credit only.

[View course details in MyPlan: EDPSY 431](#)

EDPSY 447 Principles of Guidance (3)

Study of guidance programs in elementary and secondary schools. Attention is given to the roles of specialists with emphasis on the role of the classroom teacher in school guidance programs. Designed for teachers, administrators, and prospective teachers.

[View course details in MyPlan: EDPSY 447](#)

EDPSY 449 Laboratory in Educational Psychology (2-6, max. 6)

Special studies for counselors, teachers, administrators, and others concerned with student personnel and psychological services in schools and colleges. Focuses on special topics that have either local or contemporary significance.

[View course details in MyPlan: EDPSY 449](#)

EDPSY 471 Educational Neuropsychology (5) NW *Berninger*

Covers brain systems underlying normal development and academic learning: sensory and motor, language, cognitive, social emotional, and executive-functions for self-regulation alone and interaction with the physical and social worlds in and out of school.

[View course details in MyPlan: EDPSY 471](#)

EDPSY 472 Teaching Reading, Writing, and Math with Brain in Mind (5) I&S

Students learn evidence-based guiding principles for designing and implementing instruction with brain in mind (developing mental worlds through other -regulated and self-regulated interactions with external physical and social environments that are multi-culturally sensitive and support learning that creates reading, writing, and math brains). Prerequisite: EDPSY 471. Instructors: Berninger Offered: Sp.

[View course details in MyPlan: EDPSY 472](#)

EDPSY 490 Basic Educational Statistics (3) NW, QSR

Measures of central tendency and variability, point and interval estimation, linear correlation, hypothesis testing. Offered: AWSpS.

[View course details in MyPlan: EDPSY 490](#)

EDPSY 491 Intermediate Educational Statistics (3) QSR

Covers intermediate-level concepts in analysis of variance and regression methods. Emphasizes understanding appropriate use of methods, conducting analyses using software, and correctly interpreting statistical results. Includes SPSS/PASW software instruction. Prerequisite: EDPSY 490. Instructors: Abbott, Sanders Offered: W.

[View course details in MyPlan: EDPSY 491](#)

EDPSY 495 Introduction to Educational Measurement (3) QSR

Practical understanding of test reliability, validity, and derived scores as they apply to external educational assessments; concepts of criterion and norm-referenced testing; review of group administered norm-referenced

and criterion-referenced tests and/or testing programs; test interpretation; issues and ethics in large scale¹⁴⁸ assessment. Prerequisite: EDPSY 490. Offered: Sp.

[View course details in MyPlan: EDPSY 495](#)

EDPSY 499 Undergraduate Research (*)

Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSpS.

[View course details in MyPlan: EDPSY 499](#)

EDPSY 500 Field Study I: Academic Consultation (1-3, max. 6) K. MISSALL

Includes study and practice in methods of Tier II academic consultation within an MTSS framework. Prepares students to effectively work with other professionals to better meet the social-emotional and behavioral needs of students and improve the learning environment for students identified as behaviorally and academically 'at-risk'. Prerequisite: EDPSY 554. Offered: WSp.

[View course details in MyPlan: EDPSY 500](#)

EDPSY 501 Human Learning and Educational Practice (3)

Systematic examination of current research about human learning in educational settings, including the study of behavioral, information processing, social construction, and the developmental perspectives on learning. Offered: AWSpS.

[View course details in MyPlan: EDPSY 501](#)

EDPSY 502 Developmental Foundations of Early Learning (3)

Perceptual-motor, language, and overall cognitive development in children from birth through primary-school age. Emphasis on Piagetian and Vygotskian approaches to development with a special focus on the connections between learning and development. Field-based course projects may be required. Prerequisite: EDPSY 501 or permission. Offered: Sp.

[View course details in MyPlan: EDPSY 502](#)

EDPSY 503 Culture Learning and Development (4) M. BANG

Explores influential contemporary research and theory they view culture as foundational to learning and development. Considers these issues in a range of settings (classrooms, informal environments, families, early childhood to adult learners, etc.) and within specific domains (e.g. science, literacy, mathematics. Prerequisite: EDPSY 501 and graduate status in education or psychology. Credit/no-credit only. Offered: A.

[View course details in MyPlan: EDPSY 503](#)

EDPSY 504 Intercollegiate Athletic Leadership: Athlete and Team Wellness (3) P. DECANO

Explores the responsibility of athletics coaches to develop a team culture oriented toward the welfare of student-athletes. Discusses how psychological and physiological factors affect athlete performance and overall wellness. Explores strategies for team motivation, group cohesion, and resiliency. Offered: Sp.

[View course details in MyPlan: EDPSY 504](#)

EDPSY 505 Field Study II: Tier III Interventions (1-2, max. 3)

Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: EDPSY 557 Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: EDPSY 505](#)

EDPSY 506 Instructional Theory (3)

Sources, current state, and utility of prescriptive instructional theories with emphasis upon theories having a potential for guiding the design of instruction. Prerequisite: EDPSY 501 or equivalent.

[View course details in MyPlan: EDPSY 506](#)

EDPSY 507 Reading, Writing, and Arithmetic: Educational Assessment and Consultation (5)

Students administer and interpret tests of reading, writing, arithmetic, and related developmental skills; integrate test, observational, interview, and portfolio information in staffings and written reports; and consult with

teachers regarding educational interventions. Prerequisite: graduate standing in the school psychology¹⁴⁴⁹ specialization and permission of instructor. Instructors: Cook Offered: A.

[View course details in MyPlan: EDPSY 507](#)

EDPSY 508 Advanced Practicum in Supervision and School Mental Health (2-6, max. 20) S. KING

Advanced practicum in providing in counseling, consultation, and behavioral interventions in schools while also supervising field study students in providing basic interventions. Offered: A.

[View course details in MyPlan: EDPSY 508](#)

EDPSY 509 Educational Issues in Human Development (5)

Human development theories and models. Educational implications of theory, methodology, and application. Current research complements the historical antecedents of current practice. Age range covered varies as function of current issues in professional literature. Prerequisite: 15 credits in educational psychology or psychology.

[View course details in MyPlan: EDPSY 509](#)

EDPSY 510 Cognition in the Context of the School Curriculum (3)

Contemporary issues and trends in human learning, with a focus on reasoning within subject-matter areas such as mathematics, history, and science. Prerequisite: EDPSY 501 or equivalent. Instructors: Bell, McCutchen

[View course details in MyPlan: EDPSY 510](#)

EDPSY 511 Seminar in Applied Educational Psychology (1, max. 6)

Designed for graduate students in educational psychology. Applications of theoretical constructs to particular problems encountered in school counseling, practice.

[View course details in MyPlan: EDPSY 511](#)

EDPSY 512 Classroom Assessment Strategies (3)

Development and evaluation of traditional, observational, essay, performance-based, portfolio assessments and grading models as they are used in classroom assessment; some review of current research on classroom-based assessment; classroom assessment ethics. Prerequisite: EDPSY 490 or equivalent.

[View course details in MyPlan: EDPSY 512](#)

EDPSY 513 Instrument Development (3)

Instrument development techniques including construct development, test and item specifications, item writing, planning for reliability and validity studies; ethics in test administration and interpretation. Intended for doctoral or master's students to develop instruments for their own research. Prerequisite: EDPSY 490 or equivalent.

[View course details in MyPlan: EDPSY 513](#)

EDPSY 514 History of Educational Technology (3)

Examines the role of technology in education through history. Early systems of instruction, advent of textbooks, models for school architecture, instructional devices and teaching machines, mediated and distance learning. Focuses on the interplay between designed educational approaches and contexts in which they were implemented, and consequent success for failure.

[View course details in MyPlan: EDPSY 514](#)

EDPSY 515 Current Issues in Technology and Education (3)

Examines current genres of learning technology, novel approaches for integrating technology into curriculum and instruction, and recent theoretical perspectives that inform future work in educational technology.

[View course details in MyPlan: EDPSY 515](#)

EDPSY 516 Survey of Educational Technology Research (2-, max. 4)

Critically examines active research projects in educational technology. Critiques of research practice.

[View course details in MyPlan: EDPSY 516](#)

EDPSY 518 Assessment and Diagnosis of Reading Disabilities (3)

Techniques for individual assessment of students with reading difficulties (K-12) including formal assessment using standard assessment tools and informal diagnostic teaching. Appropriate for classroom teachers, reading specialists, and school psychologists. Includes conducting and analyzing case studies. Prerequisite: EDC&I 460, EDC&I 462, other reading courses, or permission of instructor. Instructors: Valencia

[View course details in MyPlan: EDPSY 518](#)

EDPSY 519 Vulnerable Children and Families in Comparative Perspective: Psychosocial Development Processes (3) *Jegatheesan*

Research and theory examining the effects of disability, poverty, trauma, and immigration and its impact on child development across cultures, effective interventions in educational and non-educational settings, and the consequences of critical issues in the context of psycho-social and development processes in different cultural and international contexts. Offered: Sp.

[View course details in MyPlan: EDPSY 519](#)

EDPSY 520 Psychology of Reading (3)

Reviews current empirical research on cognitive processes in reading, including word and sub-word processes, syntax and comprehension, reading and perception, word recognition, concept development, and meaning in reading, psychology of reading interests, and skills. Prerequisite: EDPSY 501 or equivalent. Instructors: McCutchen Credit/no-credit only. Offered: WS.

[View course details in MyPlan: EDPSY 520](#)

EDPSY 521 Psychology of Writing (3)

Examines writing as a cognitive process and reviews current empirical research on writing, emphasizing primarily studies from a psychological perspective. Explores both developmental differences and individual differences in writing skills, together with instructional implications. Prerequisite: EDPSY 501 or equivalent. Instructors: McCutchen Credit/no-credit only. Offered: WS.

[View course details in MyPlan: EDPSY 521](#)

EDPSY 522 Teaching Reading, Writing, and Math with Brain in Mind (5)

Students learn evidence-based guiding principles for designing and implementing instruction with brain in mind (developing mental worlds through other -regulated and self-regulated interactions with external physical and social environments that are multi-culturally sensitive and support learning that creates reading, writing, and math brains). Prerequisite: EDPSY 471, EDPSY 577, or permission of instructor. Instructors: Berninger Offered: Sp.

[View course details in MyPlan: EDPSY 522](#)

EDPSY 523 Foundations of Ethnographic Research (3) *Jegatheesan*

Exploration of the main components of ethnographic endeavor. Students conduct ethnographic research including field entry, observing, listening, data analysis, and writing; typical issues and quandaries encountered in carrying fieldwork in a variety of settings, ethical issues, comprehension, intrusion, and access, experience and empathy, and power dynamics, and predicament.

[View course details in MyPlan: EDPSY 523](#)

EDPSY 524 Problem Solving and Critical Thinking in Education (3)

Study of the classic and contemporary research literature concerned with human problem solving and critical thinking with emphasis upon applications to educational practice and further research. Prerequisite: EDPSY 501 or equivalent.

[View course details in MyPlan: EDPSY 524](#)

EDPSY 525 Creativity and Education (3)

Study of the classic and contemporary research literature about creativity with emphasis upon applications to educational practice, evaluation of strategies to promote creativity in the schools, and further research. Prerequisite: EDPSY 501 or equivalent.

[View course details in MyPlan: EDPSY 525](#)

EDPSY 526 Seminar on Metacognition (3)

Students read and discuss theoretical and research papers from the extensive literature on metacognition. Focuses on defining the concept of metacognition, establishing its range of applicability to educational matters, and becoming familiar with excellent examples of metacognitive research. Prerequisite: graduate status in education or psychology and permission of instructor. Instructors: Nolan

[View course details in MyPlan: EDPSY 526](#)

EDPSY 527 Transfer of Teaching (3)

Students read and discuss a representative sample of theoretical and research papers from extensive literature on teaching to promote transfer of what students learn to non-teaching environments. Historical approach to the topic is followed by analysis of current writings on transfer. Prerequisite: EDPSY 501 and graduate status in education or psychology. Instructors: Bell, Shouse Credit/no-credit only.

[View course details in MyPlan: EDPSY 527](#)

EDPSY 528 Achievement Motivation in Education (3)

Critical review of current research and major theories of achievement motivation in schools and other educational settings. Emphasis on the relationship of theories to the contexts and practice of education. Prerequisite: EDPSY 501 or permission of instructor. Instructors: Nolan Offered: WS.

[View course details in MyPlan: EDPSY 528](#)

EDPSY 529 Developmental Psychopathology and the DSM (2) *W. LAU*

Provides an opportunity for advanced doctoral students to learn the basics of using the Diagnostic and Statistical Manual for Mental Disorders (DSM) for assessment and diagnosis in clinical practice; and learn about childhood disorders across the lifespan. Offered: A.

[View course details in MyPlan: EDPSY 529](#)

EDPSY 530 Vygotsky's Socio-Cultural Approach to Mind (5)

Critical reading and discussion of the work of L.S. Vygotsky as well as contemporary psychologists and educators who have investigated cognition in social context. Discusses the implications of these approaches for the design of learning environments. Prerequisite: EDPSY 501. Instructors: Herrenkohl Credit/no-credit only. Offered: W.

[View course details in MyPlan: EDPSY 530](#)

EDPSY 531 Socialization of School-Age Children (3)

Study of personal social development and behavior from preschool ages through adolescence. Developmental theory and research are reviewed on the socialization influences of parents and peers and on such topics as aggression, emotional regulation, and social cognition. Prerequisite: EDPSY 501 or equivalent.

[View course details in MyPlan: EDPSY 531](#)

EDPSY 532 Adolescence and Youth (3)

Developmental processes and patterns examined with major theoretical and current research themes from behavioral sciences as applied to middle school and senior high students. Educational issues, social problems associated with adolescence in Western culture. Prerequisite: EDPSY 501 or equivalent.

[View course details in MyPlan: EDPSY 532](#)

EDPSY 533 Current Research in Adolescence (3)

Contemporary trends and patterns of adolescent research are examined with emphasis upon theoretical foundations, contrasting methodologies, and implications for further research. Exemplary studies and integrative reviews of research on adolescence are featured. Prerequisite: EDPSY 532 and EDPSY 591 or equivalents.

[View course details in MyPlan: EDPSY 533](#)

EDPSY 534 School Problems of Adolescence (3)

Study of the classic, contemporary, and emerging school problems of school age youth with emphasis upon problem solving strategies for educators and associated youth service personnel. Includes problems of academic

achievement, interpersonal relations, and social deviancy in the schools. Prerequisite: EDPSY 532 or equivalent.¹⁴⁵²
[View course details in MyPlan: EDPSY 534](#)

EDPSY 535 Education and the Highly Capable Learner (3) *N. HERTZOG*

Examination of major issues and problems in study and nurturance of highly capable children and youth in the educational setting. Emphasis placed on contributions of theory and research to educational problem solving for multiple aspects of advanced human capacity. Prerequisite: EDPSY 501 or equivalent.

[View course details in MyPlan: EDPSY 535](#)

EDPSY 536 Immigrant and Indigenous Children: Social Context of Learning (3) *Jegatheesan*

Focuses on the broad context of family, school, and society of immigrant and indigenous young children in the United States. Introduces the complex interplay of socio-cultural and psychological factors that impact these children's learning. Offered: WS.

[View course details in MyPlan: EDPSY 536](#)

EDPSY 537 Teaching and Learning Science with Indigenous Students (3) *M. BANG*

Provides an overview of the opportunities and challenges in teaching science to Indigenous learners. Students develop relevant pedagogical frameworks to approach problems of practice and develop high-leverage instructional practices for Indigenous students. Focused on Indigenous students however is relevant to other under-achieving populations. Offered: Sp.

[View course details in MyPlan: EDPSY 537](#)

EDPSY 540 School Psychological Assessment (5)

Study of assessment of human intelligence with supervised training in the administration, scoring, and interpretation of individual intelligence tests. Prerequisite: admission to School Psychology program.

Instructors: Jones Offered: A.

[View course details in MyPlan: EDPSY 540](#)

EDPSY 544 Counseling (4) *J. MAZZA*

Competency-based skills training for beginning counseling and school psychology students. Covers attending, listening, focusing, and intervening behaviors for use with adults and children. Introduction to theories of helping. Prerequisite: admission to School Psychology program. Offered: W.

[View course details in MyPlan: EDPSY 544](#)

EDPSY 545 Prepracticum (3)

Competency-based skills training for beginning counseling and school psychology students. Attending, listening, focusing, and intervening behaviors for use with adults and children. Introduction to theories of helping. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

[View course details in MyPlan: EDPSY 545](#)

EDPSY 546 Counseling Practicum (3-5, max. 20) *J. MAZZA*

Supervised practice in counseling. Prerequisite: admission to School Psychology program; EDPSY 544. Offered: Sp.

[View course details in MyPlan: EDPSY 546](#)

EDPSY 548 Educational Implications of Personality Theory (5) *J. MAZZA*

Study of personality development and personality theories with continuous attention to the meaning of these in educational practice, testing, and counseling. Prerequisite: admission to the School Psychology program. Offered: A.

[View course details in MyPlan: EDPSY 548](#)

EDPSY 549 Seminar in Consultation Methods (3)

Theory and practice of process consultation in educational settings. Field practice in teams with clients. Prerequisite: admission to the School Psychology program. Instructors: Cook Offered: W.

[View course details in MyPlan: EDPSY 549](#)

EDPSY 550 Family Counseling (3)

Introduction to family counseling theory and practice, emphasizing family dynamics and communication analysis. Prerequisite: graduate standing in school psychology or permission of instructor. Instructors: Jones
Offered: W.

[View course details in MyPlan: EDPSY 550](#)

EDPSY 551 Group and Behavioral Intervention (3)

Introduction to competency-based skills for beginning school psychology students. Includes basic processes of group management skills with children including group process in social skills training, problem-solving techniques, behavioral principles, and parent training. Prerequisite: admission to School Psychology program. Instructors: Cook
Offered: Sp.

[View course details in MyPlan: EDPSY 551](#)

EDPSY 552 Multicultural Issues in School Counseling and School Psychology (3)

Examination of multicultural issues as they relate to the delivery of services provided by school counselors and school psychologists. Theoretical and applied aspects emphasized and case study format utilized. Prerequisite: admission to School Psychology program. Offered: Sp.

[View course details in MyPlan: EDPSY 552](#)

EDPSY 553 School Psychology Services with Special Populations (3)

Examines current issues in working with youth in special populations, as well as intervention strategies to help these students within the mainstream school environment. Prerequisite: admission to School Psychology program. Instructors: Murphy
Credit/no-credit only. Offered: W.

[View course details in MyPlan: EDPSY 553](#)

EDPSY 554 Introduction to Multi-Tiered Systems of Support (3) K. MISSALL

Teaches the Multi-Tiered Systems of Support framework and provides instruction on how to conduct assessment, consultation, and evaluation intervention program effectiveness using both a direct service delivery as well as an indirect model (consultation). Offered: A.

[View course details in MyPlan: EDPSY 554](#)

EDPSY 556 Applied Social Psychology: Implications for Education (3)

Provides students with the knowledge and understanding of how social psychology is applied within school settings and how it can be used to help develop effective strategies for psychological services. Prerequisite: admission to School Psychology program. Instructors: Cunningham, Mazza
Credit/no-credit only. Offered: W.

[View course details in MyPlan: EDPSY 556](#)

EDPSY 557 Tier III Interventions for School Psychologists (3)

Provides school psychology students with a milt-tier framework in working with challenging students in schools. Provides explicit instruction on functional behavioral assessment, including content and training in how to work with youth who are at-risk or have engaged in self-harming and/or suicidal behavior. Prerequisite: admission to School Psychology program. Instructors: Cook, Mazza
Offered: Sp.

[View course details in MyPlan: EDPSY 557](#)

EDPSY 560 Advanced Practicum in Personality Assessment (3)

Designed for doctoral-level school psychologists to learn advanced personality assessment for diagnosis of emotional and behavior disorders. Prerequisite: admission to School Psychology program; EDPSY 540; EDPSY 564. Open to doctoral students only. Instructors: Jones

[View course details in MyPlan: EDPSY 560](#)

EDPSY 562 Group Counseling in Schools (3)

Provides students with the opportunity to co-facilitate groups in elementary, middle, and secondary schools, supplemented by weekly didactic presentations of counseling and guidance models. Prerequisite: EDPSY 561 or permission of instructor. Offered: W.

[View course details in MyPlan: EDPSY 562](#)

EDPSY 564 Practicum in School Psychology (1-6, max. 20)

Practicum in assessment and consultation, emphasizing diagnosis of behavior and learning disabilities, and focusing on techniques acquired in EDPSY 507 and EDPSY 540. Prerequisite: admission to School Psychology program; EDPSY 507; EDPSY 540. Instructors: Jones, Lau Offered: W.

[View course details in MyPlan: EDPSY 564](#)

EDPSY 565 Advanced Practicum in Clinical Practice for Children and Adolescents with Psychopathology (4, max. 20)

Designed for doctoral level school psychologists to learn advanced skills in clinical practice for working with children and adolescents with a range of childhood psychopathologies, under the supervision of a licensed psychologist. Prerequisite: either EDPSY 544, EDPSY 546, or equivalent and advanced graduate standing in the school psychology program. Offered: AWSp.

[View course details in MyPlan: EDPSY 565](#)

EDPSY 566 Case Study Seminar (1-6, max. 20)

Integrating theoretical concepts with practice/service issues. Cases selected for discussion represent a wide range of problems found in schools. Activities include group supervision and peer review. Prerequisite: graduate standing in school psychology. Instructors: Grady Offered: AWSp.

[View course details in MyPlan: EDPSY 566](#)

EDPSY 567 Applied Quasi-experimental Research in Education and other Social Sciences (3) *M. SUN*

Introduces research designs and statistical models that are often applied to large-scale longitudinal data. These models include, but not limited to , instrumental variables, difference-indifferences, propensity score matching, regression discontinuity, and fixed-effect estimates. Offered: A.

[View course details in MyPlan: EDPSY 567](#)

EDPSY 568 Seminar in Professional Issues and Ethics (3)

Professional ethics codes and cases, history of counseling or school psychology, legal problems, credentialing issues, conditions of practice, continuing education, publishing, and presenting research papers. Prerequisite: graduate standing in College of Education or permission of instructor. Instructors: Provenzano Credit/no-credit only. Offered: W.

[View course details in MyPlan: EDPSY 568](#)

EDPSY 569 Learning and the Interaction Order (3) *K. TAYLOR*

Covers research methods course for students using video and/or audio recordings as data in studies of learning and teaching. Students learn how to make evidence-based inferences about people's learning or teaching as captured by video/audio recordings by content logging, selecting, transcribing, and analyzing moments of interaction. Offered: S.

[View course details in MyPlan: EDPSY 569](#)

EDPSY 570 Introduction to School Psychology (2, max. 20) *J. MAZZA*

Current issues in professional psychology practice and research. Prerequisite: admission to School Psychology program. Offered: A.

[View course details in MyPlan: EDPSY 570](#)

EDPSY 571 Educating Individuals with Biologically Based Disabilities (5)

Reviews the history of neural science and its interdisciplinary roots, brain imaging methods and web resources, basic terminology and concepts for microscopic and larger neurological structures, functions, organizing principles and chemical bases, with focus on application to diagnosing and teaching students with developmental, learning, psychiatric, neurological, and medical disorders. Prerequisite: graduate standing in school psychology or inst Offered: W.

[View course details in MyPlan: EDPSY 571](#)

EDPSY 572 Social-Emotional Assessment (3)

Techniques in social-emotional assessment of school-aged children. Diagnostic systems presented in

conjunction with assessment techniques. Emphasis on an integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: admission to School Psychology program. Instructors: Cunningham Offered: A.

[View course details in MyPlan: EDPSY 572](#)

EDPSY 573 Psychological Assessment of Preschool Children (5)

Students learn to give and interpret tests of intellectual development to assess language, play, and social/emotional functioning, and to write psychological assessment reports for infants, toddlers, and preschoolers. Prerequisite: graduate standing in school psychology and permission of instructor. Instructors: Olson Offered: Sp.

[View course details in MyPlan: EDPSY 573](#)

EDPSY 575 Structural Equation Modeling (3)

Theory and data analysis using linear structural equation models. Application to data in educational research. Prerequisite: EDPSY 594 or equivalent. Instructors: Abbott Offered: WS.

[View course details in MyPlan: EDPSY 575](#)

EDPSY 576 Hierarchical Linear Models (3)

Theory and data analysis for research models where random factors are nested, such as multi-level data, growth curve analysis, and meta-analysis. Prerequisite: EDPSY 593 or equivalent. Instructors: Abbott Offered: WS.

[View course details in MyPlan: EDPSY 576](#)

EDPSY 577 Neuropsychology of Learning and Behavior Problems (5)

Brings together our understanding of neuropsychology and specific behavioral and learning problems to provide a foundation for practitioners to consider neuropsychological contributors to problems observed in clinical and educational settings. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: EDPSY 577](#)

EDPSY 578 Educational Applications of Neuropsychology: Assessment and Intervention (5)

Students observe and administer neuropsychological tests and plan and carry out educational interventions for children with neuropsychological disorders. Content focuses on various neuropsychological disorders for which school psychologists can provide assessment and consultation. Prerequisite: EDPSY 540 or equivalent course in individual testing, and EDPSY 577 or permission of the instructor. Instructors: Berninger

[View course details in MyPlan: EDPSY 578](#)

EDPSY 579 Advanced Practicum in Neuropsychological Assessment and Neurodevelopmental Intervention (2, max. 4) R. BERNIER, E. OLSON

Provides advanced clinical training on the neuropsychological assessment of children. Training includes supervised administration of neuropsychological testing measures and the preparation and presentation of testing results in clinic settings that provide services to children with suspected neurocognitive disabilities. Offered: AW.

[View course details in MyPlan: EDPSY 579](#)

EDPSY 580 Seminar: The Emergence of Educational Psychology (3)

Examination of documents by selected contributors to the field of educational psychology. Special focus on period from mid-nineteenth century to the later twentieth century.

[View course details in MyPlan: EDPSY 580](#)

EDPSY 581 Seminar in Educational Psychology (1-5, max. 20)

Advanced seminar on selected topics in educational psychology. A critical appraisal of current research. Offered: AWSpS.

[View course details in MyPlan: EDPSY 581](#)

EDPSY 582 Seminar in Development and Socialization (3, max. 15)

Advanced seminar on selected topics concerned with human development and socialization processes. Emphasis

placed upon empirical research and its theoretical underpinnings in such areas as cognitive development,¹⁴⁵⁶ moral development and education, self-concept development, and related concerns. Prerequisite: graduate standing in College of Education or instructor permission. Instructors: Herrenkohl, Jegatheesan, Nolen, Kazemi
[View course details in MyPlan: EDPSY 582](#)

EDPSY 583 Seminar in Learning and Thinking (3, max. 15)

Seminar in the psychology of learning language and language learning. Each seminar is offered with predesignated emphasis in one of the following topics: linguistics, phonology, pragmatics, psycholinguistics, semantics. Prerequisite: graduate standing in College of Education or instructor permission.

[View course details in MyPlan: EDPSY 583](#)

EDPSY 584 Seminar in Quantitative Methods (3, max. 15)

Seminar on such topics as measurement techniques, research design, psychometrics, and statistics. Prerequisite: EDPSY 490 and instructor permission. Instructors: Li, Taylor

[View course details in MyPlan: EDPSY 584](#)

EDPSY 585 History, Systems, and Contemporary Issues in School Psychology (3)

Covers the history, systems, and research relating to the contemporary issues relevant to research and practice of school psychology. Meets APA and Washington state requirements for course in history and systems of psychology. Prerequisite: admission to School Psychology program. Instructors: Jones, Mazza Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: EDPSY 585](#)

EDPSY 586 Qualitative Methods of Educational Research I (4)

Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics, and permission of instructor. Offered: A.

[View course details in MyPlan: EDPSY 586](#)

EDPSY 587 Qualitative Methods of Educational Research III (5)

[View course details in MyPlan: EDPSY 587](#)

EDPSY 588 Survey Research Methodology and Theory (3)

Survey research, research, theory, and methodology. Probability theory, sampling, human subjects considerations, instrumentation, and analysis techniques. Review and critique by students of theoretical issues in survey research and development of a survey instrument. Prerequisite: EDPSY 490 or equivalent. Offered: W.

[View course details in MyPlan: EDPSY 588](#)

EDPSY 589 Scholarly Writing in Education and Psychology (3)

Introduction to the demands and expectations for technical writing in education and psychology, including aspects of the culture of scholarship. Designed for competent writers. Does not address basic grammar and composition. Prerequisite: doctoral standing, and permission of instructor. Credit/no-credit only.

[View course details in MyPlan: EDPSY 589](#)

EDPSY 590 Computer Utilization in Educational Research (3)

Computer utilization in solution of research problems, data reduction to forms amenable to computer solution, appropriate framing of problems for solutions by computer. Using an interactive system, editors, and program packages. Prerequisite: EDPSY 490.

[View course details in MyPlan: EDPSY 590](#)

EDPSY 591 Methods of Educational Research (3)

Introduction to educational research. Primary focus on hypothesis development, experimental design, use of controls, data analysis, and interpretation. Prerequisite: EDPSY 490. Offered: WSp.

[View course details in MyPlan: EDPSY 591](#)

EDPSY 592 Advanced Educational Measurements (3)

Theory of measurement; an examination of assumptions involved in test theory, errors of measurement, factors affecting reliability and validity, and item analysis and standards for educational and psychological tests.

Prerequisite: EDPSY 490. Instructors: Li Offered: Sp.

[View course details in MyPlan: EDPSY 592](#)

EDPSY 593 Experimental Design and Analysis (5)

Experimental design with emphasis on the analysis of variance. Prerequisite: EDPSY 490 or equivalent.

Offered: W.

[View course details in MyPlan: EDPSY 593](#)

EDPSY 594 Advanced Correlational Techniques (5)

Multivariate analysis, including regression and multiple correlation; matrix algebra; factor analysis. Prerequisite: EDPSY 490 or equivalent. Instructors: Abbott Offered: Sp.

[View course details in MyPlan: EDPSY 594](#)

EDPSY 595 Item Response Theory Models of Testing (3)

In depth exploration of IRT models and their roles in the development of large scale educational and psychological tests. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 594.

[View course details in MyPlan: EDPSY 595](#)

EDPSY 596 Program Evaluation (3)

Advanced course in evaluation research emphasizing nontraditional designs, especially those that impose severe ecological constraints on the evaluators. Prerequisite: EDPSY 593, EDPSY 594, EDC&I 597, or permission of instructor. Instructors: Mazza

[View course details in MyPlan: EDPSY 596](#)

EDPSY 597 Technical Requirements of Large Scale Tests (3)

Theoretical and practical understanding of the quantitative aspects of large-scale tests, including: scaling, norms development, and the development of derived and interpretive scores, evidence for validity and reliability.

Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 595.

[View course details in MyPlan: EDPSY 597](#)

EDPSY 599 Independent Studies in Education (*)

Independent studies or readings of specialized aspects of education. Offered: AWSpS.

[View course details in MyPlan: EDPSY 599](#)

EDPSY 600 Independent Study or Research (*-)

Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: EDPSY 600](#)

EDPSY 601 Internship (3-10, max. 30)

Offered: AWSpS.

COLLEGE OF EDUCATION

COLLEGE OF EDUCATION

SPECIAL EDUCATION

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

EDSPE 404 Exceptional Children (3) I&S, DIV

Covers the knowledge of the field of special education including laws, practices, procedures, and controversies. Focuses on information about children with disabilities studied from the point of view of education. Offered: WSp.

[View course details in MyPlan: EDSPE 404](#)

EDSPE 414 Introduction to Early Childhood Special Education I&S (3) I&S

Provides students with a comprehensive overview of major aspects of the field of early childhood special education. Theoretical foundations and program development and implementation are presented in an approach that integrates theory, research, and practice. Offered: WSp.

[View course details in MyPlan: EDSPE 414](#)

EDSPE 422 (dis) Ability, Education, and the Arts (5) VLPA, DIV

Cultural perspectives on disability and education, as interpreted through arts-based inquiry.

[View course details in MyPlan: EDSPE 422](#)

EDSPE 427 Introduction to Applied Behavior Analysis (5) I&S I. SCHWARTZ

Introduction to the science of behavior, known as applied behavior analysis. Focuses on basic behavioral principles (e.g., reinforcement), defining behaviors, measuring behaviors, effective strategies to teach new skills, and the ethics involved in behavior change programs. Offered: WSp.

[View course details in MyPlan: EDSPE 427](#)

EDSPE 435 Introduction to Autism Spectrum Disorders (5) I&S, DIV

Provides an overview of the characteristics, causes, treatments, and controversies about autism spectrum disorder (ASD). Addresses information about the history of the disorder, assessment strategies, and types of interventions. Offered: Sp.

[View course details in MyPlan: EDSPE 435](#)

EDSPE 460 Early Literary Instruction (3)

Covers the theory and educational practices in early literacy including emergent literacy development, risk

factors for poor literacy outcomes, methods to promote language needed for literacy, phonemic awareness, word identification. Emphasizes instructional strategies useful in childcare settings, preschools, early intervention, and programs for students with developmental disabilities.

[View course details in MyPlan: EDSPE 460](#)

EDSPE 499 Undergraduate Research (*)

Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSpS.

[View course details in MyPlan: EDSPE 499](#)

EDSPE 500 Practicum ([1-6]-, max. 20)

Practicum in the field under the direction of a faculty member. Prerequisite: enrollment in a special education program, approved plan of study, and permission of the instructor. Offered: AWSpS.

[View course details in MyPlan: EDSPE 500](#)

EDSPE 501 FOUNDATIONS IN SPECIAL EDUCATION (3)

Comprehensive review of the field of special education, including historical perspectives, current best practices, legal issues, and current controversies. Offered: A.

[View course details in MyPlan: EDSPE 501](#)

EDSPE 502 Collaboration: Working with Parents and Professionals (3)

Provides students with knowledge and skills for working collaboratively with other professionals, family members, and paraeducators. Focus is on the role of the special educator in forming and sustaining school, family, and community partnerships.

[View course details in MyPlan: EDSPE 502](#)

EDSPE 503 Classroom Management for Elementary School Educators ([1-3]-, max. 4)

Examines how to set up effective classrooms to facilitate learning and the development of social behaviors. Focuses on strategies for effectively managing whole group (classroom) and individual behavior of students in the context of public schools.

[View course details in MyPlan: EDSPE 503](#)

EDSPE 504 Special Education and the Law (3) *Brown*

Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions.

Offered: jointly with EDLPS 516.

[View course details in MyPlan: EDSPE 504](#)

EDSPE 505 Curriculum Development of Students with Moderate to Severe Disabilities (4)

Addresses issues and practices in the development of appropriate curriculum, accessing the general education curriculum, and meaningful assessment for students with moderate to severe disabilities in educational settings. Topics include: assessing general education curriculum, inclusion, and development of Individualized Educational Plans (IEPs), assessment using environmental strategies, and identifying students' needs for assistive technology.

[View course details in MyPlan: EDSPE 505](#)

EDSPE 507 Instructional Methods for Students with Moderate to Severe Disabilities (4) *Davis*

Details a systematic instructional process for the education of students with moderate to severe or profound disabilities. Includes instructional methods and materials designed to promote the development of skills that are required in school, home, and community settings, and to reduce challenging behaviors.

[View course details in MyPlan: EDSPE 507](#)

EDSPE 510 Behavioral Measurement and Management in the Classroom (3)

Response measurement in the classroom; use of data analysis for instructional decisions and behavior

management for children with disabilities.

[View course details in MyPlan: EDSPE 510](#)

EDSPE 511 Methods of Applied Behavior Analysis Research (3)

Characteristics of applied behavior analysis are presented: direct, daily measurement, and the systematic investigation of important variables. Representative studies from various applied situations are discussed in terms of dependent and independent variables, research design, reliability, validity, and data analysis.

Prerequisite: EDSPE 510 or equivalent preparation. Instructors: Schwartz

[View course details in MyPlan: EDSPE 511](#)

EDSPE 513 Principles of Assessment (3)

Focuses on the principles, administration, and interpretation of a variety of assessments. Includes opportunities to choose appropriate assessments; administer formal and informal assessments accurately; and interpret assessment results to inform instructional decisions. Offered: A.

[View course details in MyPlan: EDSPE 513](#)

EDSPE 514 Fundamentals of Reading and Writing for Students with Disabilities (4) *R. HUDSON*

Emphasis on fundamentals of reading and writing processes, assessment, and instruction for students with disabilities. Helps students apply what is learned to their work with students with disabilities in classrooms.

Prerequisite: EDC&I 460. Offered: W.

[View course details in MyPlan: EDSPE 514](#)

EDSPE 515 Problems and Issues in Special Education (3, max. 9)

Intensive examination of the issues pertinent to special education, such as legislation, interdisciplinary functions, and the role of special education in general education and placement practices.

[View course details in MyPlan: EDSPE 515](#)

EDSPE 517 Practicum in Research Design and Analysis in Special Education (1-4, max. 10)

Critical analysis of current research in special education and related fields serves as background for designing applied research projects. Projects are examined, evaluated, and revised in seminar discussion. Prerequisite: EDPSY 490 and EDSPE 591 or equivalent and permission of instructor. Offered: AWSpS.

[View course details in MyPlan: EDSPE 517](#)

EDSPE 518 Seminar in Special Education Research (1-4, max. 20)

Designed for doctoral students in special education during their first year of residency. Each candidate selects a dissertation problem and submits a proposal. Topics such as the procurement of subjects, the reporting and communication of research findings, and the evaluation of research are stressed. The seminar leads to the evolution of a viable dissertation proposal. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: EDSPE 518](#)

EDSPE 520 Seminar in Applied Special Education (1-12, max. 20)

Designed for graduate students in special education. Focus on contemporary topics relating to the application of the theoretical constructs to special education. Offered: AWSp.

[View course details in MyPlan: EDSPE 520](#)

EDSPE 521 Communication and Language in Young Exceptional Children (3)

Review and critical examination of theories of language acquisition and their psychological implications for developing cognition. Emphases include a survey of language growth from the fields of linguistics, psychology, and sociology and combining these disciplines into the service of studying individual language development from the points of view of educational attainment and social relationships. Offered: Sp.

[View course details in MyPlan: EDSPE 521](#)

EDSPE 522 Seminar on the Education of Students with Severe Disabilities (3)

Advanced graduate seminar arranged to study and discuss the essential components of providing a comprehensive approach to the identification and education of infants, children, adolescents, and young adults

with severe disabilities.

[View course details in MyPlan: EDSPE 522](#)

EDSPE 523 Fundamentals of Math for Children with Disabilities (3)

Provides educators with basic elementary math content and techniques for teaching elementary students with disabilities in inclusive settings. Prerequisite: either EDTEP 522 or equivalent. Offered: Sp.

[View course details in MyPlan: EDSPE 523](#)

EDSPE 524 Functional Behavioral Assessment (3)

Provides a solid foundation in the theory and practice of functional behavioral assessment (FBA). FBA is a required practice under special education law and considered a best practice for students with challenging behavior.

[View course details in MyPlan: EDSPE 524](#)

EDSPE 525 Autism and Other Social, Communication, and Developmental Disabilities (3)

Focuses on the identification, etiology, education, and outcomes of individuals with Autism Spectrum Disorder and related social, communication, and developmental disorders. Offered: SpS.

[View course details in MyPlan: EDSPE 525](#)

EDSPE 526 Techniques for Instructing Social Behaviors for Elementary Students with Mild Disabilities (3)

Provides prospective and practicing teachers with foundational theory and knowledge to select specific techniques to promote social competency in elementary children with mild disabilities. Discusses research related to use of these techniques and interventions. Develops schoolwide, classroom, and individual plans for teaching social skills. Offered: Sp.

[View course details in MyPlan: EDSPE 526](#)

EDSPE 527 Application of Behavioral Principles (3)

Presents principles of applied behavior analysis. Focuses on the use of principles in classroom, home, and community settings to influence learning. Emphasis on the use of data collection and progress monitoring the use of principles and outcomes for learning. Offered: A.

[View course details in MyPlan: EDSPE 527](#)

EDSPE 528 Inquiry and Methods in Writing Instruction (3)

Covers methods of assessment and teaching written composition, spelling, and handwriting to children and youth with, and without, disabilities. Particular attention is given to how to establish a strong writing program in elementary classrooms and how to teach writing strategies. Offered: Sp.

[View course details in MyPlan: EDSPE 528](#)

EDSPE 529 Ethics in Applied Behavior Analysis (5)

Examines ethical issues and responsibilities in regard to service provision to people with disabilities in education. Informed consent, protection of confidentiality, legal requirements to demonstrate changes in student learning, and selection of least intrusive, least restrictive behavior procedures presented and discussed within the context of readings and discussion of cases.

[View course details in MyPlan: EDSPE 529](#)

EDSPE 530 Advanced Readings in Applied Behavior Analysis (1, max. 20) *Schwartz*

Provides opportunities to read and discuss core texts from applied behavior analysis (ABA). Covers the conceptual underpinnings of ABA and discusses examples of application of the principles. Offered: AWSp.

[View course details in MyPlan: EDSPE 530](#)

EDSPE 531 Planning Comprehensive Behavioral Interventions (3)

Gives special educators the knowledge and skills they need to develop comprehensive behavior plans to address challenging behavior in children with disabilities in their classrooms. Offered: W.

[View course details in MyPlan: EDSPE 531](#)

EDSPE 532 A Tiered Approach to Inclusive Education (3)

Prepares educators to work in inclusive educational environments. Explores evidence based instructional strategies, discusses ways to use behavior analytic strategies to promote inclusion, and explores strategies to collaborate with general education teachers. Students also learn how to write high-quality Individualized Education Plans.

[View course details in MyPlan: EDSPE 532](#)

EDSPE 540 Fieldwork Seminar (1-2, max. 16)

Provides an opportunity for self-evaluation and reflection on practice as well as assist students with working with children with disabilities and their families in the field. Linked to a required fieldwork experience in a special education setting. Offered: AWSp.

[View course details in MyPlan: EDSPE 540](#)

EDSPE 541 Education of Children with Behavior Disorders (3)

Introductory course covering characteristics of and educational practices for children with emotional/behavioral disabilities. Reviews theory, definitional issues, models, assessment, and instructional methods for educating children with emotional and behavioral disorders. Students develop a working knowledge of educational approaches for teaching students with emotional/behavioral disabilities. Offered: A.

[View course details in MyPlan: EDSPE 541](#)

EDSPE 545 Instructional Modifications for the Education of Children with Mild Disabilities (3)

In-depth analysis and application of several modifications of instructional techniques necessary for the education of students with mild disabilities.

[View course details in MyPlan: EDSPE 545](#)

EDSPE 546 Seminar in Educating Children with Behavior Disorders (3, max. 9)

Advanced-level seminars focus on contemporary research topics relating to the effective education of children with serious behavior disorders. Students analyze and review research pertinent to the chosen topics and prepare a scholarly manuscript for dissemination.

[View course details in MyPlan: EDSPE 546](#)

EDSPE 548 Special Topics in the Education of the Learning Disabled (3, max. 12)

In-depth analysis of empirical findings in the specialty of learning disabilities with focus on the synthesis of research findings and their application to the educational environment. A paper suitable for publication required. Prerequisite: course in learning theory, introductory course in learning disabilities, or equivalent preparation.

[View course details in MyPlan: EDSPE 548](#)

EDSPE 561 Educational Assessment of Young Children with Special Needs (3)

Special standardized and educational measurement and evaluation procedures for use with young children with a variety of disabling conditions. Observation, ecological assessment, and programming strategies are discussed in combination with practical application of the skills within an educational framework.

[View course details in MyPlan: EDSPE 561](#)

EDSPE 562 Curriculum and Assessment for Young Children with Disabilities (3)

Examines recommended practices and meaningful curricula for young children with disabilities. Covers theoretical models and approaches to curricula for preschoolers with disabilities. Includes discussion of definitional issues, theoretical frameworks, curriculum models, and application of recommended instructional and assessment practices within an early childhood educational framework. Offered: W.

[View course details in MyPlan: EDSPE 562](#)

EDSPE 563 Collaborating with Families and Educational Teams (4) *Meeker*

Explores issues, theories, models, research, and recommended practices related to family-professional partnerships and collaborative teaming in education. Explores the dynamics of interactions with families and other team members including roles and responsibilities, decision-making, communication, and collaboration.

Focuses on families and teaming in special education. Offered: AW.

[View course details in MyPlan: EDSPE 563](#)

EDSPE 564 Infants and Toddlers with Disabilities and Other Special needs (3) *Sandall*

Examines early intervention policies, programs, and practices for infants and toddlers with disabilities and other special needs. Topics include theoretical, philosophical, and learning and research base for early intervention.

Offered: W.

[View course details in MyPlan: EDSPE 564](#)

EDSPE 565 Approaches to Early Childhood Education (3, max. 9)

Provides an overview of basic early childhood content in math, science, social studies, physical education, and the arts. Includes active exploration and demonstration of ways to adapt and embed these concepts into thematic units and early childhood classroom routines. Offered: Sp.

[View course details in MyPlan: EDSPE 565](#)

EDSPE 566 Current Research in Early Childhood Special Education (2, max. 6)

Explores theory, research, and practice in early intervention with infants, toddlers, and their families. Topics include typical and atypical development, assessment, curriculum, and intervention strategies.

[View course details in MyPlan: EDSPE 566](#)

EDSPE 599 Independent Studies in Education (*)

Independent studies or readings of specialized aspects of education. Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: AWSpS.

[View course details in MyPlan: EDSPE 599](#)

EDSPE 600 Independent Study or Research (*-)

Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: AWSpS.

[View course details in MyPlan: EDSPE 600](#)

EDSPE 601 Internship (1-10, max. 20)

Prerequisite: graduate standing and permission based on prearrangement of internship placement and approval by adviser. Offered: AWSpS.

[View course details in MyPlan: EDSPE 601](#)

College of Engineering

[Display as tabs](#)

College Overview

Dean

Michael B. Bragg
371 Loew

Associate Deans

Eve Riskin, Academic Affairs
Dawn Lehman, Infrastructure
Santosh Devasia, Research and Graduate Studies

Engineering is the science and art of applying scientific and mathematical principles, experience, judgment, and common sense to design devices and systems that benefit society. Engineers are fascinated by questions of how and why things work. They use their training in mathematics, physics, and chemistry to understand the physical world and develop creative solutions to society's complex needs. Engineers may be designers, planners, managers, analysts, researchers, consultants, sales specialists, and more. Engineering graduates have many career possibilities open to them.

The primary goal of College of Engineering educational programs is to prepare students for a professional career in engineering by providing the technical foundation required for success in industry, government, or academia. Other goals of the College are to instill within its students the highest ethical standards, the capability for lifelong learning, and a curiosity about the world. Excellence in undergraduate and graduate academic programs remains the College's highest priority.

For undergraduates, the College of Engineering offers a flexible curriculum that not only accommodates varied student needs, both in established departmental programs and interdisciplinary studies, but also culminates in a major and meaningful design experience. (See [Interdisciplinary Engineering Studies Program](#) for interdisciplinary undergraduate programs.)

For graduate students, the College of Engineering offers master's and doctoral programs in aeronautics and astronautics, bioengineering, chemical, civil and environmental, computer, electrical, human centered design and engineering, industrial and systems engineering, materials science, and mechanical engineering.

The College offers active educational and research programs, both departmental and interdisciplinary, at the graduate levels. (See [Interengineering Graduate Program](#) for interdisciplinary graduate programs.)

[Graduate Programs](#)

[Time Schedule](#)

[Academic Planning Worksheet](#)

[Departmental Web Page](#)

The College of Engineering has been a major unit of the University since 1899. The first engineering degrees were authorized in mining engineering and metallurgical engineering in 1898. Degrees were added for civil engineering (1901), electrical engineering (1902), mechanical engineering (1906), chemical engineering (1907), ceramic engineering (1919), aeronautical engineering (1929), bioengineering (1983), industrial engineering (1986), and computer engineering (1987). A degree program in technical communication was implemented in 1989. The new human centered design and engineering degree title replaced technical communication in 2009. In 2011, 2,229 upper-division undergraduate majors and 1,787 graduate students were enrolled in engineering programs taught by a faculty of 228 tenure track and 184 other engineering faculty members.

College Facilities

Teaching and research activities of the College are conducted in fourteen major campus buildings (and portions of others), which contain the College's offices, classrooms, and research and teaching laboratories. The Engineering Library, a branch of the University Libraries, provides outstanding collections of books, periodicals, technical reports, and patents of interest to engineers. Computers and terminals are available in all departments and through the Student Access and Computing Group (SACG).

Student Organizations and Activities

All major professional engineering societies have student chapters on campus, and all engineering students are encouraged to join the chapter that represents their field of interest. The UW Chapter of Engineers Without Borders (EWB) students.washington.edu/ewbuw is a registered student-run organization of the University of Washington with members from many engineering as well as non-engineering backgrounds.

The College also has student chapters of the Society of Women Engineers, American Indian Science and Engineering Society, National Society of Black Engineers, the Society of Hispanic Professional Engineers, and the Phi Sigma Rho engineering sorority. Students are encouraged to join the University-wide Science and Engineering Business Association (SEBA).

The honor society open to engineering students is Tau Beta Pi.

Students serve with faculty members on engineering policy committees which make recommendations concerning instructor evaluation, curriculum revisions, advising, grading systems, and other matters of interest to students and faculty.

Undergraduate Program

Engineering Adviser
301 Loew, Box 352180
(206) 543-1770
engradv@uw.edu

The College of Engineering provides curricula that offer a variety of educational experiences to its students. The curricula also facilitate transfer from community colleges and from other four-year colleges and universities.

Student Academic Services

301 Loew

Students are encouraged to contact Student Academic Services for program, course, or career information and discussion. The Student Academic Services advising office assists any student interested in planning the initial portion of an engineering degree program, and distributes information about prerequisites for application to all departments in the College.

For more information, visit the [Student Academic Services](#) Website.

Financial Aid

The College offers financial assistance to undergraduates through industrial scholarships and loan funds. Scholarship information is available at the College of Engineering Student Academic Services office (301 Loew), and at the Office of Student Financial Aid (105 Schmitz). Most scholarships are given after a year or more in residence by the student.

Honors Program

The University Honors Program provides a special learning context for high-achieving students looking for a rigorous and enhanced educational experience. All departments in the College of Engineering participate in the UW Honors program.

There are two types of Honors degrees available within the College of Engineering: College Honors and Departmental Honors. Students in either program are part of the University Honors Program.

College Honors

To be eligible for College Honors, students must be accepted to the University Honors Program in their freshman year. Additionally, students must be accepted into the departmental honors program (See information below on Departmental Honors) for their major, which usually occurs during the junior year. Students who complete both the Honors Core Curriculum (See the University Honors Program for more information) and the departmental honors requirements graduate "With College Honors in Name of Major".

Departmental Honors

Students who do not participate in or complete the Honors Core Curriculum but are admitted into and complete departmental honors requirements receive a degree "With Honors in Name of Major".

Admission Requirements: All engineering departments require students to have at least a 3.30 cumulative UW GPA to be eligible for departmental honors. Also, most departments require students to complete a specified number of departmental courses with a minimum departmental GPA.

Departmental honors requirements vary by major and are established by the individual departments. Most departments in the College of Engineering require 9 to 10 credits of Honors courses in the major and an Honors senior project or thesis.

International Study

Given the increased likelihood that engineering students will have overseas work experiences or do business with international clients and competitors, the College encourages students to study foreign languages in addition to their engineering coursework and to take advantage of opportunities for study at foreign universities either at the undergraduate or graduate level. The College has exchange agreements with approximately thirty universities in seventeen countries. Foreign-language courses at the third-quarter level or above (e.g., GERMAN 103) may be applied toward the VLPA general education requirement. For more information about international study, visit the College of Engineering International Studies website at www.engr.washington.edu/curr_students/international.html. Engineering students can also participate in the Global Engineering Education Exchange program (through the Center for Workforce Development, located in 101 Wilson Annex) for opportunities to study abroad. Through the UW Chapter of Engineers Without Borders (EWB) students.washington.edu/ewbuw, students work with disadvantaged communities worldwide in order to improve their quality of life through the implementation of environmentally sustainable, equitable, and economical engineering projects.

Admission

Students follow a variety of pathways in gaining admission to programs in the College of Engineering. Details on the processes and information on prerequisite coursework are available on the individual department websites or from the Student Academic Services advising office in 301 Loew Hall. The information below provides an overview of the admission processes.

Direct Freshman Admission: All engineering departments enroll a small number of high-achieving students directly from high school, prior to completion of University-level prerequisites. Freshman applicants who have been accepted to the UW and who have specified a department with a direct admission program as their preferred major are automatically considered. Consult individual department listings for more information on Direct Freshman Admission. Direct Freshman Admission is for autumn quarter only. All students not admitted directly to an engineering department are admitted to the College of Engineering with pre-engineering status. Students without pre-engineering status who wish to pursue an engineering degree may have their coding changed to pre-engineering upon request at the Student Academic Services advising office (301 Loew Hall). To retain pre-engineering status, students must maintain a cumulative GPA of 2.50 in prerequisite courses in mathematics, chemistry, physics, engineering fundamentals, English composition, and technical writing; maintain a minimum quarterly GPA of 2.00; and complete a minimum of 25 credits of the prerequisite and other specified courses per academic year. A detailed description of pre-engineering continuation requirements is available from the Student Academic Services advising office, 301 Loew Hall.

Early Admission: Most engineering programs offer an Early Admission option at the end of the freshman year. In general, Early Admission application requirements include one year of calculus, English composition, and 10 to 20 credits of required chemistry or physics. Early Admission is for autumn quarter only.

Upper-Division Admission: All engineering programs offer an Upper-Division Admission process. In general, Upper-Division Admission occurs at the end of the sophomore year; Chemical Engineering and Bioengineering, however, admit their upper-division students for spring quarter of the sophomore year. Typical application requirements include one year of calculus, differential equations or linear algebra, one or two quarters of general chemistry, two to three quarters of physics, English composition, and several engineering fundamentals courses. Student Academic Services or the individual department or program

has a list of specific entrance requirements. All departments, with the exception of Bioengineering and Chemical Engineering, offer Upper-Division Admission for autumn quarter. Bioengineering and chemical engineering offer Upper-Division Admission for a spring quarter start. Several other departments also offer a spring quarter option.

To apply for admission to an engineering program, enrolled students must submit the online College of Engineering application. The application deadline for autumn admission is July 1. For programs that accept students for spring quarter, the application deadline is February 1.

Transfer Students

After completing the University transfer-student application, transfer students who have completed all upper-division application requirements for their desired program also need to submit the online College of Engineering application by the specified deadline. Transfer students who have not completed upper-division application requirements may apply for admission to the University as pre-engineering students.

Types of Programs

The College offers three basic programs leading to Bachelor of Science degrees:

Departmental Major: This program leads to a Bachelor of Science degree in a designated field of engineering (e.g., Bachelor of Science in Civil Engineering). It is designed for students who intend to practice as professional engineers in a standard branch of engineering or who plan to undertake graduate study in that field. The curricula for these degrees are accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. Accreditation requirements stipulate certain course-distribution requirements for the undergraduate degree. A description of how each of the accredited baccalaureate programs meets the ABET requirements is available from the department office and from the College office. Accredited four-year curricula leading to baccalaureate degrees are offered in aeronautics and astronautics, bioengineering, chemical, civil and environmental, computer, electrical, industrial and systems, mechanical, materials science and engineering, and bioresource science and engineering (formerly paper science and engineering). (The bioresource science and engineering major is offered in the School of Environmental and Forest Sciences and is a joint program with the School of Environmental and Forest Sciences and the College of Engineering.)

The following programs in the College of Engineering are accredited by the Engineering Accreditation Commission of ABET:

- Aeronautical and Astronautical Engineering
- Bioengineering
- Chemical Engineering
- Civil and Environmental Engineering
- Computer Engineering
- Electrical Engineering
- Industrial and Systems Engineering
- Materials Science and Engineering
- Mechanical Engineering

A curriculum leading to a baccalaureate degree is also offered by Human Centered Design and Engineering.

Application to a department or program at the upper-division level is made at the time lower-division requirements are satisfied. Currently enrollment limits imposed by faculty size and available laboratory/classroom space are such that entry into a specific department or program is usually competitive. In general, a student applicant must demonstrate scholastic aptitude, as evidenced by the attainment of grades averaging a minimum 2.50 or above (depending upon the program) in mathematics, the natural sciences, English composition, and other courses. A 2.50 GPA is a minimum only. In reality, the GPA of those offered admission is higher. The student is urged to plan ahead by learning the intended department or program requirements and particularly noting which requirements must be fulfilled by the time application is made.

Non-departmental Professional Program: This program leads to a Bachelor of Science in Engineering degree and is designed for students who have well defined, special educational objectives that departmental programs do not satisfy. Graduates can practice as professional engineers in newly developing fields, or they may embark on graduate study in these or allied fields (see [Interdisciplinary Engineering Studies Program](#)).

Nonprofessional Program: Leading to a Bachelor of Science degree, this program is intended for students who wish to have significant exposure to science and engineering courses, but do not plan to engage in professional engineering practice (see [Interdisciplinary Engineering Studies Program](#)).

Graduation Requirements

To graduate, students must meet or exceed the requirements of the University and their particular program or department. All program or departmental requirements are given in the specific section that describes that program or department.

All departments of the College have continuation policies that specify a minimum rate of progress as well as minimum academic-performance levels. These policies may be more restrictive than those generally applied by the University and may change with time. Information on current policy is available at the departmental offices.

Selecting courses that fulfill graduation requirements is the responsibility of each student. Students are urged to check carefully the course and credit requirements of the program in which they are enrolled.

Special Programs and Resources

Engineering Co-op and Internship Program

014 Loew, Box 352180

engrcoop@uw.edu

The Engineering Co-op and internship program provides an opportunity for pre-engineering and engineering students to combine practical, full-time, on-the-job engineering experience with academic study before graduation. Students typically work full-time for three months or more and then return to full-time academic status upon completion of the co-op assignment. Some students work part-time while continuing coursework. In addition, students receive academic credit for the co-op experience. In

several engineering departments, the credit earned can be applied toward degree requirements in the major. Advantages of participation include: assistance in deciding which field of engineering to follow, early experience in the industrial sector and industrial exposure that can help guide a student's remaining studies; additional income to help defray college expenses, relevance and motivation for study based on real engineering work, and work experience and employment contacts that may result in regular employment after graduation.

Information may be obtained from the Engineering Co-op and Internship Program office, College of Engineering, Box 352180 (014 Loew), or by visiting the [Engineering Co-op and Internship Program](#) website.

Engineering Undergraduate Research Program

014 Loew, Box 352180

Educational Outreach

Fulfilling a commitment to lifelong learning, the College of Engineering is partnered with UW Professional and Continuing Education (UWPCE) to offer master's degree programs, certificate programs, courses, workshops, and conferences to respond to the professional development needs of practicing engineers and related technical professionals worldwide. Thousands of practicing engineers update their technical knowledge or pursue advanced degrees each year through UWPCE. The College of Engineering works with UW Educational Outreach's Education at a Distance for Growth and Excellence (EDGE) to provide multimedia and class capture services either in an EDGE classroom or at a remote location. Go to [UWPCE website](#) for more information. Go to [EDGE website](#) for more information.

Office of Research and Graduate Studies

376 Loew, Box 352180

The Office of Research and Graduate Studies promotes, stimulates, and coordinates faculty and graduate research in all fields of engineering. Its primary role is to encourage and develop interdisciplinary research programs and national research initiatives. The Office of Research and Graduate Studies also reviews grant and contract proposals, tracks awards, and provides information on funding opportunities. This office allocates limited matching funds to College units to increase the quality of research in the College of Engineering. The College currently has the following research programs or centers:

- **Bio-Sciences**

- **Center for Sensorimotor Neural Engineering (CSNE)** -- An NSF-funded Engineering Research Center launched in July 2011 to advance the integration of technologies with human neural systems. The center brings together leaders in robotics, neuroscience, computer science, and other disciplines.
- **Genetically Engineered Materials Science and Engineering Center (GEMSEC)** -- Adapts techniques in molecular biology and genomics for developing new materials and systems.
- **Molecular Engineering & Sciences Institute (MoES)** -- Catalyzes translational research in the clean tech and biotech areas. The Institute serves both as an intellectual accelerator to bring fresh approaches and ideas to societal grand challenges in sustainable energy and materials, and in medical

therapeutics and diagnostics, and as a physical incubator where new interdisciplinary teams can come together in a shared space. Creates and coordinates new interdisciplinary education programs for undergraduate and graduate students in the College of Arts and Sciences and the College of Engineering. The Institute is located in the new Molecular Engineering and Sciences Building, a facility specially designed to promote collaborative molecular-scale research.

- **National ESCA Surface Analysis Center for Biomedical Problems (NESAC/BIO)** -- Develops and applies new surface analysis technologies for biomedical research.

- **Education and Learning**

- **Center for Engineering Learning and Teaching (CELT)** -- Combines two missions: to conduct internationally recognized research in engineering learning and to promote teaching effectiveness in UW engineering classrooms.

- **Electronics and Computing**

- **Center for Collaborative Technologies (CCT)** -- An effort funded by Microsoft Research to develop the ConferenceXP platform and apply the technologies to a wide range of educational and collaborative scenarios.
- **Center for Design of Analog-Digital Integrated Circuits (CDADIC)** -- One of the few research consortiums in the country that addresses problems associated with analog and mixed-signal research.
- **Intel Research Seattle** -- A collaboration among Intel and university researchers to explore new technologies (such as personal robotics and "Trustworthy Wireless") to support the ubiquitous computing environments of the future.
- **Turing Center** -- Investigates problems at the crossroads of natural language processing, data mining, web search, and the Semantic Web.

- **Energy**

- **Bioenergy Program** -- Researches how to balance the technological, environmental, and social dimensions of a sustainable energy economy. (The full program name is Bioresource-Based Energy for Sustainable Societies.)
- **Northwest National Marine Renewable Energy Center (NNMREC)** -- A DOE-funded partnership between OSU and UW. UW is be responsible for tidal energy issues. The role of the center is to close key gaps in understanding of marine energy and to inform the public, regulators, research institutions, and device and site developers.
- **Plasma Science and Innovation Center (PSI)** -- Develops predictive capability for emerging concept experiments, allowing new experiments in fusion science and in other areas of plasma science without actual construction.

- **Materials and Structures**

- **Center for Intelligent Materials and Systems (CIMS)** -- A collaboration of botanists and engineers to advance the bio-inspired design of intelligent materials and systems.
- **Center of Excellence for Advanced Materials in Transport Aircraft Structures (AMTAS)** -- Seeks solutions to problems associated with existing,

near- and long-term applications of composites and advanced materials for large transport commercial aircraft.

- **Institute of Advanced Materials and Technology (i-AMT)** -- Facilitates interdisciplinary research in photonics, electronics, and magnetic materials; materials for energy generation and storage; biomaterials for the bio-nano interface; and multifunctional composites.

- **Transportation**

- **Pacific Northwest Transportation Consortium (PacTrans)** -- A multi-university, regional transportation center led by the University of Washington and funded by the US Department of Transportation. PacTrans focuses on safe and sustainable transportation in environments ranging from busy urban centers to remote mountainous terrain.
- **Washington State Transportation Center (TRAC)** -- A collaboration among Washington State University, the University of Washington, and the Washington State Department of Transportation to coordinate both state and commercial transportation research efforts and to develop research opportunities nationally and locally.

- **Other Centers Involving Engineering Faculty**

- **Center for Materials and Devices for Information Technology Research (CMDITR)** -- Established by the National Science Foundation in 1987 to fund interdisciplinary research and education activities and encourage technology transfer.
- **Center for Process Analytical Chemistry (CPAC)** -- A consortium established at the UW in 1984 to develop and foster collaboration on new measurement approaches, including the miniaturization of traditional instrumentation and the development of new sensors and non-traditional instruments.
- **Microfabrication Laboratory (MFF)** -- Provides a wide range of fabrication and characterization capabilities in a user facility that is open to academic as well as industrial researchers and engineers, including advanced electron beam lithography, thin film processing, and wet and dry etching in a 15,000 square foot cleanroom.

For more information, see the Office of Research and Graduate Studies web page, www.engr.washington.edu/facresearch/researchcenters.html.

Interdisciplinary Engineering Studies Programs

The College of Engineering directly administers non-departmental undergraduate and graduate degree programs.

The Interdisciplinary Engineering Studies (IES) Program is intended for students whose desired course of study does not fall within one of the traditional engineering departments. An interdisciplinary program combines coursework from at least one engineering department as well as other department(s) on campus (engineering or other) to allow students to create a program of study not available through the existing undergraduate degree programs. Although coursework may involve departments outside the College of Engineering, the major thrust must be in engineering.

Undergraduate Programs

Bachelor of Science in Engineering and Bachelor of Science

The IES Program offers a nonprofessional degree program leading to the Bachelor of Science (BS) and a professional degree program for the Bachelor of Science in Engineering (BSE).

Due to the uniqueness of each interdisciplinary student's program of studies, the BS and BSE degrees are not accredited by the Engineering Accreditation Commission of ABET. The experience requirement to obtain a professional engineering license is two years longer for a BSE graduate, except in surveying, than for a graduate of an accredited program. A BS graduate is not eligible for a professional engineering license.

Interdisciplinary students develop personal programs of study approved by a faculty adviser with similar interests. Contact Student Academic Services, email: engradv@uw.edu or phone: (206) 543-1770, for information on established procedures and applications for entry into the BSE and BS programs. Entrance requirements and the continuation policy for participation in these programs are consistent with those of other departments in the College.

Bachelor of Science in Engineering

Admission to this program (usually after completion of 90 credits) is competitive with a minimum GPA of 2.80 in technical courses required for entry. A minimum of 75 credits must be completed after entering the program before a BSE degree is awarded. Detailed information regarding the BSE degree can be obtained from an adviser in Student Academic Services (301 Loew).

Bachelor of Science

The nonprofessional Bachelor of Science degree provides greater flexibility than does the Bachelor of Science in Engineering degree. It can be an excellent base for subsequent professional studies in law, medicine, or business. It may also be the primary educational objective in such fields as technical writing, engineering sales, or environmental studies. Detailed requirements are available from the adviser in Student Academic Services (301 Loew).

Graduate Programs

Master of Science in Engineering and Master of Science

The College offers graduate programs leading to the Master of Science in Engineering and Master of Science degrees, without designation of a specific major. For graduate degrees within specific majors, see the individual departmental listings.

The civil, mechanical, and chemical departments, and inter-engineering offer approved programs that lead to the Master of Science in Engineering degree. The civil, and to the M.S. degree in civil engineering department, inter-engineering, and the materials science and engineering department offer approved programs that lead to the Master of Science degree.

The Interengineering Master of Science in Engineering (MSE) and Master of Science (MS) program is intended for students whose desired course of study does not fall within one of

the traditional engineering graduate programs. An interengineering program combines coursework from at least one graduate engineering department as well as other graduate department(s) on campus (engineering or other) to allow students to create a program of study not available through the existing graduate degree programs. Applications and files of students entering the MS or MSE option are handled by the designated engineering department. Admission to the inter-engineering option requires a statement describing the applicant's objectives. This statement should state why the student wants to enter the MS/MSE program rather than one of the traditional engineering graduate programs. Applicants to the MS/MSE program must have well-defined educational objectives which cannot be satisfied by established engineering programs.

Admission Requirements

MSE/MS applicants are required to have a bachelor's degree in engineering, mathematics, or science with a minimum 3.00 GPA in courses taken in the junior and senior years. Students entering without an accredited engineering undergraduate degree and seeking an MSE degree must satisfy the minimum general requirements of the College of Engineering baccalaureate degree. Students are expected to complete the degree within two years. Situations requiring longer than this must be approved by the student's faculty adviser.

Development of the Plan of Study: When applying to the MSE/MS program, the applicant must submit a plan of study that sets out the intended 400- and 500-level coursework and proposed thesis topic. Before applying to the MSE program, the student must consult with a faculty member from each department in which the student intends to work, and identify at least one to serve as the student's faculty adviser. The other faculty members can serve on the student's supervisory committee if the student is admitted. Working with the faculty adviser(s), each student must develop a plan of study and research that meets the general degree requirements (below) and satisfies the student's own program objectives. The program of studies must include in-depth coursework from two or more departments and be approved by the faculty adviser(s). The proposed program is then set out on the student's application to the Interengineering MSE/MS program.

Development of the Statement of Objectives: Students must submit a one-page statement of study, degree, and career objectives for seeking the Interengineering MSE or MS degree. This statement should explain why the student wants to enter the MSE/MS program rather than one of the traditional engineering graduate programs. Also, students should include in this statement any additional information to be considered as part of the application. This may include work experience, outside interests, and unusual circumstances that may contribute to a better understanding of the student's record. Applicants to the MSE/MS program must have well-defined educational objectives that cannot be satisfied by established engineering programs.

Degree Requirements

Students develop their own plan of study for the MS or MSE degree in consultation with faculty adviser(s) as a requirement for admission to the program. The plan of study must contain at least 39 credits of coursework, with no more than 9 credits of engineering courses at the 400 level and at least 21 credits of engineering courses at the 500 level. The plan of study must also include at least 9 credits of thesis study/preparation.

COLLEGE OF ENGINEERING ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ENGR 100 Introduction to Engineering Design (5) I&S

Introduction to design and communication principles through engineering project approach, stressing teamwork, design process, specialties and tools of engineering, creative and analytical thinking, professionalism and ethics, social, economic and political context, open-ended problems. Grading based on quality of engineering projects and presentation of design through written, oral, and graphical communication. Offered: AWSp.

[View course details in MyPlan: ENGR 100](#)

ENGR 101 Engineering Exploration (1-2, max. 3)

Presentations and discussions on topics of current interest in engineering. Explores various areas of engineering research, engineering disciplines, and the relevance to today's students. Topics vary by quarter.

[View course details in MyPlan: ENGR 101](#)

ENGR 102 Studying Engineering (1-3, max. 6)

Intensive seminar focusing on topics relating to the successful study of engineering. Topics include an introduction to the university culture, learning skills development, engagement with critical resources, and an introduction to engineering disciplines and professions. Topics vary by quarter. Credit/no-credit only.

[View course details in MyPlan: ENGR 102](#)

ENGR 120 STARS Mathematics Problem Solving (4)

Lectures and intensive problem solving in mathematics designed to strengthen academic and study skills. Enrollment restricted to students in the STARS program.

[View course details in MyPlan: ENGR 120](#)

ENGR 121 STARS Chemistry Problem Solving (3) NW

Lectures and intensive problem solving in mathematics designed to strengthen academic and study skills. Enrollment restricted to students in the STARS program.

[View course details in MyPlan: ENGR 121](#)

ENGR 122 STARS Physics Problem Solving (3)

Lectures and intensive problem solving in physics designed to strengthen academic and study skills. Enrollment restricted to students in the STARS program.

[View course details in MyPlan: ENGR 122](#)

ENGR 197 Engineering Problem Solving (1, max. 12)

Lectures and problem sessions in mathematics, chemistry, and physics with engineering applications. Enrollment restricted to Minority Science, Engineering Program (MSEP), and Women in Science and Engineering (WiSE) students. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: ENGR 197](#)

ENGR 199 Special Projects (1-3, max. 3)

Students propose problems to solve to an engineering faculty member. Problems selected from the student's own experiences and interests, from the interest of faculty members, or from other sources such as faculty or graduate students doing research projects, or from personnel in physical medicine, occupational therapy, hospital, industry, or government. Required corroboration by an engineering faculty member. Project suggestions available. Offered: AWSpS.

[View course details in MyPlan: ENGR 199](#)

ENGR 202 Special Topics (1-5, max. 10)

Topics of current interest to engineering students. Offered: AWSp.

[View course details in MyPlan: ENGR 202](#)

ENGR 231 Introduction to Technical Communication (3)

Examines basics of researching and presenting technical information for different audiences and purposes. Individually and in teams, students learn to construct document and presentations, following conventions of oral, written, and visual communication. Assignments are grounded in ethical and sustainable engineering practices. Prerequisite: Both ENGL 109 and ENGL 110, or any of the following: C LIT 240, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: AWSpS.

[View course details in MyPlan: ENGR 231](#)

ENGR 296 Engineering Study Abroad (1-6, max. 18)

Lower-division engineering course taken abroad for which there are no direct UW equivalents. May apply toward UW faculty-led programs or to courses taught approved study abroad programs. Credit does not apply to major requirements without approval.

[View course details in MyPlan: ENGR 296](#)

ENGR 297 Vertically Integrated Projects ([1-2]-, max. 8)

Project-based, design and exploration experiences for lower division students. Through this class, students will take on entry level roles on faculty-led project/research teams while being mentored by upper division students, faculty, and graduate students.

[View course details in MyPlan: ENGR 297](#)

ENGR 320 Engineering Cooperative Education (1-10, max. 12)

Engineering practicum; includes integration of classroom theory with on-the-job training. Open only to students who have been admitted to the Engineering Cooperative Education Program. Credits are deducted from student record. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ENGR 320](#)

ENGR 321 Engineering Cooperative Education ([1-2]-, max. 16)

Engineering practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to the Engineering Cooperative Education Program. Requires subsequent completion of ENGR 322 to obtain credit. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ENGR 321](#)

ENGR 322 Engineering Cooperative Education Postwork Seminar (-0)

Reporting and evaluation of co-op work experience, and discussion of current topics in engineering. To be taken during the first quarter in school following each work session. Offered: AWSpS.

[View course details in MyPlan: ENGR 322](#)

ENGR 360 Introductory Acoustics (3) NW

Introduction to propagation of acoustical waves; emphasis on propagation of sound waves in air, but material is applicable to propagation of sound waves in liquids, including underwater acoustics, and to propagation of stress waves in solids. Includes a historical development of acoustics, terminology, and units employed. Prerequisite: either MATH 136 or MATH 307; PHYS 123. Offered: Sp.

[View course details in MyPlan: ENGR 360](#)

ENGR 380 Design for Sustainability in the Developing World (2, max. 8) I&S Bolton

Introduction to issues in international sustainable development from an engineering perspective. Combines lectures on current approaches and potential pitfalls with work on group projects related to sustainable development efforts of Engineers Without Borders. Develops research and design skills using real life projects. Intended for students from all backgrounds. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: ENGR 380](#)

ENGR 401 Leadership Development to Promote Equity in Engineering Relationships (3) I&S, DIV

Engages engineering students' energy, creativity, social conscience, and on-the-ground perspectives in advancing diversity and inclusion in engineering. Students explore topics such as diversity in science and engineering, impact of unconscious bias, the role of allies, community engagement, and leadership in supporting all current and potential engineers. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: ENGR 401](#)

ENGR 496 Engineering Study Abroad (1-6, max. 18)

Upper-division engineering course taken abroad for which there are no direct UW equivalents. May apply toward UW faculty-led programs or to courses taught approved study abroad programs. Credit does not apply to major requirements without approval.

[View course details in MyPlan: ENGR 496](#)

ENGR 497 Vertically Integrated Projects ([1-2]-, max. 10)

Advanced project based, design and exploration experiences for upper division students. Students will take on leadership roles and faculty-led research teams while mentoring participating lower division students and engaging with faculty and graduate students.

[View course details in MyPlan: ENGR 497](#)

ENGR 498 Special Topics in Engineering (1-5, max. 6)

Offered: AWSpS.

[View course details in MyPlan: ENGR 498](#)

ENGR 499 Special Projects in Engineering (1-3, max. 6)

Offered: AWSpS.

[View course details in MyPlan: ENGR 499](#)

ENGR 598 Seminar Series in Engineering (1, max. 12)

Graduate seminar series on topics of interest to all engineering students.

[View course details in MyPlan: ENGR 598](#)

ENGR 601 Internship ([1-2]-, max. 24)

Engineering practicum; includes integration of classroom theory with on-the-job training for graduate students. Open only to students who have been admitted to the Engineering Cooperative Education Program. Offered: AWSpS.

[View course details in MyPlan: ENGR 601](#)

Aeronautics and Astronautics

[Display as tabs](#)

Department Overview

211 Guggenheim Hall

Aeronautics and astronautics deals with the design, analysis, and performance of air and space vehicles and a broad spectrum of related engineering science, such as aerodynamics, structural mechanics, automatic controls, flight mechanics, space dynamics, propulsion, plasma dynamics, and related topics.

Undergraduate Program

Adviser

211C Guggenheim Hall, Box 352400
(206) 616-1115

ugadvising@aa.washington.edu

The department offers the following program of study:

- The Bachelor of Science in Aeronautical and Astronautical Engineering degree

Bachelor of Science in Aeronautical and Astronautical Engineering

Suggested First- and Second-Year College Courses: During the first year, students should take the required calculus, chemistry, English composition, and computer programming. If possible, begin taking the physics sequence. It is recommended that some VLPA and I&S courses be taken to balance the course load.

Department Admission Requirements

Applicants are considered in three groups -- Direct Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; application deadline is July 1.

Direct Freshman Admission

The department enrolls a select number of students directly from high school, prior to completion of University-level prerequisites. Students accepted to the UW who indicate aeronautics and astronautics as their preferred major on the freshman application are

[Course Descriptions](#)

automatically considered. Competitive applicants have taken or are taking calculus and at least two years of laboratory science (physics and chemistry preferred) in high school.

Admission is for autumn quarter only.

Early Admission (Limited number of students admitted through this process)

Applicants must be currently enrolled at the UW and must have a minimum 15 credits of the prerequisites listed below, taken in residence at the UW.

1. *Course Requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical science courses plus accompanying laboratory at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142 or above; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. Admission is for autumn quarter only.
2. *Grade Requirements:* At least 15 credits completed, with a minimum grade of 2.0 in each prerequisite course required for admission, and a minimum 2.50 GPA in all courses required for admission.
3. *Completion of minimum requirements does not guarantee early admission.* Admission is highly competitive. Typically early admission students have cumulative GPAs significantly above 3.0.

Upper-Division Admission

1. *Course Requirements:* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, MATH 324, PHYS 121, PHYS 122, PHYS 123, CHEM 142, A A 210, A A 260, AMATH 301, CEE 220, M E 230, and 5 credits of English composition. (AMATH 301 and/or MATH 324 may be taken as late as the autumn quarter of admission but would create an extremely heavy course load if both are taken the same quarter.)
2. *Grade Requirements:* At least 75 credits completed, with a minimum grade of 2.0 in each prerequisite course required for admission and a minimum 2.50 GPA in all courses required for admission.
3. Completion of minimum requirements does not guarantee admission.

Graduation Requirements

180 credits, as follows:

1. General Education Requirements (78 credits)

a. *Areas of Knowledge* (49 credits):

- i. *Visual, Literary, and Performing Arts (VLPA) and Individuals & Societies (I&S):* 24 credits, to include a minimum 10 credits in VLPA and a minimum 10 credits of I&S, plus 4 additional credits in either area.
- ii. *Natural World:* 25 credits to include CHEM 142, PHYS 121, PHYS 122, PHYS 123, and an additional 5 credits of Natural World courses (consult department for list of approved courses.)

b. *Mathematics* (24 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 324.

- c. *Written and Oral Communication*: One 5-credit English composition course from the University list. Additional writing credits are built into the major core courses.

2. Major Requirements (89 credits)

- a. *Engineering Fundamentals (16 credits)*: A A 210, A A 260, CEE 220, and M E 230.
- b. *Departmental Core (73 credits)*: A A 301, A A 302, A A 310, A A 311, A A 312, A A 320, A A 321, A A 322, A A 331, A A 332, A A 360; either A A 410 and A A 411 or A A 420 and A A 421; A A 447, A A 496, AMATH 301; 15 credits of senior technical electives. With approval, 3 credits of the latter may be chosen from another area of engineering.
- c. Minimum 1.7 grade in each 300- and 400-level A A course applied to major requirements
- d. Minimum 2.00 cumulative GPA for courses applied to major requirements

3. Free Electives (13 credits)

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, please contact the departmental adviser or see [departmental web page](#) for more details.

Minor

Minor Requirements

Minimum 32 credits to include:

1. *Core (24 credits)*: A A 210; A A 260; A A 310; A A 311; CEE 220; M E 230
2. *Electives (minimum 8 credits)*: Selected from an approved list of upper-division electives. Minimum one course taken at the 400 level. See adviser for approved list.
3. Minimum 16 credits taken in residence through the UW
4. Minimum 16 credits taken within the Aeronautics and Astronautics Department
5. Minimum 2.00 cumulative GPA in courses applied to the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The goals and objectives of the undergraduate program are to provide a challenging and comprehensive education, to develop necessary functional skills and an understanding of the societal context in which engineering is practiced, to provide a solid foundation in the engineering sciences related to aerospace engineering, to provide a systems perspective, to develop engineering creativity through design experience, and to prepare graduates to succeed in engineering careers and lifelong learning.

Graduates of aeronautics and astronautics are skilled in engineering fundamentals, engineering design, laboratory skills, synthesis of various engineering disciplines, and working in a team environment. Graduates are highly regarded by employers in aeronautics, astronautics, energy systems, and related fields. They develop

interpersonal skills and a desire for life-long learning that helps them succeed in their chosen careers. Graduates have been successful and valued at local, national, and international industries, as well as at government organizations and institutions of higher learning.

- *Instructional and Research Facilities:* Visit the department web page to view current research activities. Undergraduates are encouraged to participate in research activities.
- *Honors Options Available:* With College Honors (completion of Honors core curriculum and Departmental Honors requirements). With Honors (completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are arranged individually. See adviser for details.
- *Department Scholarships:* Scholarships are limited and are usually reserved for students who have junior and senior standing in the department. Deadline for scholarship applications is April 1.
- *Student Organizations/Associations:* American Institute of Aeronautics and Astronautics (AIAA) student chapter. Sigma Gamma Tau

Graduate Program

Graduate Program Coordinator
211B Guggenheim Hall Box 352400
(206) 616-1113
gradadvising@aa.washington.edu

The Department of Aeronautics and Astronautics offers programs that provide a foundation in the aerospace engineering sciences and expertise in various specialized application areas. Three graduate degree options are offered: Master of Science in Aeronautics and Astronautics, Master of Aerospace Engineering, and Doctor of Philosophy.

Master of Science in Aeronautics and Astronautics (MSAA)

Admission Requirements

1. *Grade Point Average:* The Graduate School requires that applicants hold a minimum 3.00 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework. Applicants admitted by the department normally have a minimum 3.30 GPA. Applicants with less than a 3.30 GPA may still be considered if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
2. *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* Each transcript is individually reviewed. The department recognizes that some academic institutions are more competitive and high grades are more difficult to obtain.
3. *GRE General Test:* Applicants take the general portion of the Graduate Record Examination. Although no minimum GRE score is required, the typical successful applicant has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0

Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, scores should be received before February 15.

4. *Two Letters of Recommendation:* Confidential letters may be submitted electronically by recommenders indicated on the online application, or placed in sealed envelopes and included with application materials, or sent directly to the department by the recommenders. Writers should be able to rank the applicant's performance as a student and/or researcher. A referrer should send the recommendation in letter format; no special form is used.
5. *Statement of Objectives:* Provides the department information not found in transcripts and other official documents. For example, statements can include personal histories, professional and academic goals, and specific research interests if applicable.
6. *English Requirements for Foreign Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam for foreign students whose native language is not English.
7. *Prior Degrees:* Prospective students should hold an undergraduate degree in aerospace or mechanical engineering. Applicants with grades (3.50 and above) in related disciplines (physics, other engineering disciplines) are considered.

Degree Requirements

39-45 credits, as follows:

1. All MSAA degree candidates must have a program of study plan approved by the department's graduate committee.
2. Before completing 12 credits of graduate coursework, candidates file a program of study plan prepared with the assistance of the adviser or the Graduate Program Adviser and submitted to the graduate committee for approval.
3. The minimum MSAA program consists of either ten courses plus 9 thesis credits, or 13 courses. No more than three of the courses may be at the 400 level (none in a student's depth area). All courses counted toward the degree must be graded. In addition, each student must enroll in the graduate seminar (A A 520) during every quarter of full-time studies.

The student's program of study is tailored to the needs and interests of the student. However, each program must include depth in a field of specialization, breadth to include at least one course in each of two different subject areas outside the field of specialization, and analytical strength to include three mathematical courses. Senior sequences in engineering, science, or other appropriate professional fields may make up part of the individualized graduate program. However, only three undergraduate courses may be counted toward the minimum requirements (and none in the student's depth area).

The thesis, if that degree option is chosen, is approved by the student's adviser and second reviewer and submitted to the Graduate School. After submitting one copy of the thesis to the department on a CD/DVD, two signed, unbound copies and receipt for binding fee are submitted to the Graduate School by the last day of the quarter.

Normally one-and-a-half to two years of full-time study are needed to complete the requirements for an MSAA degree. The Graduate School imposes a time limit of six years for any master's degree.

Master of Aerospace Engineering (MAE)

The MAE program is intended for recent graduates or engineers who wish to expand their knowledge in multidisciplinary areas while also learning other aspects of aerospace engineering, such as business, management, manufacturing, or technical communication.

Admission Requirements

1. *Grade Point Average:* The Graduate School requires that applicants hold a minimum 3.00 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework. Applicants admitted by the department normally have a minimum 3.30 GPA. Applicants with less than a 3.30 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
2. *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* Each transcript is individually reviewed. The department recognizes that some academic institutions are more competitive and high grades are more difficult to obtain.
3. *GRE General Test:* Applicants take the general portion of the Graduate Record Examination. Although the department does not specify minimum GRE scores, the typical successful applicant has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15.
4. *Two Letters of Recommendation:* Confidential letters may be submitted electronically by recommenders indicated on the on-line application, or placed in sealed envelopes and included with application materials, or sent directly to the department by the recommenders. Writers should be able to rank an applicant's performance as a student and/or researcher. A referrer should send the recommendation in letter format; no special forms are used.
5. *Statement of Objectives:* Provides the department information about the applicant not found in the transcripts and other official documents. For example, statements can include personal histories, professional and academic goals, and specific research interests if applicable.
6. *English Requirements for Foreign Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam for foreign students whose native language is not English.
7. *Prior Degrees:* Prospective students should hold an undergraduate degree in aerospace or mechanical engineering. Applicants with grades (3.50 and above) in related disciplines (physics, other engineering disciplines) are considered.

Degree Requirements

45-54 credits

Students create their own programs of study based on departmental distribution requirements and subject to departmental approval, to include courses in a specialty area, technical and non-technical electives, analytical courses, and a group or independent project. The MAE program includes twelve courses plus 8 credits for the project, or ten courses and one of three business certificate programs.

Doctor of Philosophy (PhD)

The doctoral program consists of lectures, seminars, discussions, and independent study, enabling the student to master and to make original contributions to a particular field.

Admission Requirements

1. *Grade Point Average:* The Graduate School requires that applicants hold a minimum 3.00 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework. Applicants admitted by the department normally have a minimum 3.40 GPA. Applicants with less than a 3.40 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
2. *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* Each transcript is individually reviewed. The department recognizes that some academic institutions are more competitive and high grades are more difficult to obtain.
3. *GRE General Test:* Applicants must take the general portion of the Graduate Record Examination. Although the department does not specify minimum GRE scores, the typical successful applicant has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 4.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15.
4. *Two Letters of Recommendation:* Confidential letters may be submitted electronically by recommenders indicated on the on-line application, or placed in sealed envelopes and included with application materials, or sent directly to the department by the recommenders. Writers should be able to rank the applicant's performance as a student and/or researcher. A referrer should send the recommendation in letter format; no special forms are used.
5. *Statement of Objectives:* Provides the department information about the applicant not found in the transcripts and other official documents. For example, statements can include personal histories, professional and academic goals, and specific research interests.
6. *English Requirements for Foreign Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam for foreign students whose native language is not English.
7. *Prior Degrees:* Prospective students should hold undergraduate and graduate degrees in aerospace or mechanical engineering with a 3.40 minimum GPA. Applicants with strong grades in related disciplines (physics, other engineering disciplines) are considered.

Degree Requirements

Minimum 90 credits

In addition to the formal steps for obtaining the degree listed below, students must complete an approved program of study consisting of 18 credits of coursework beyond that required for the Master of Science in Aeronautics and Astronautics, for a total of 90 credits for the PhD.

1. *The Departmental Qualifying Examination:* To take the department qualifying examination, students must have a 3.40 GPA in technical coursework at the graduate level. In addition, they must have a MSAA degree or its equivalent, must have a faculty member accept them into their research program and agree to serve as their thesis adviser, supervise their PhD research, and chair their qualifying examination committee.
2. *The General Examination:* Upon successful completion of the qualifying examination, a PhD Supervisory Committee chaired by the student's major adviser is appointed. The general examination is expected to be taken within one year after the qualifying exam, but no sooner than two years after the beginning of graduate study. At least three weeks prior to the exam, students provide the members of their committee a document outlining their proposed research.
3. *Completion of Coursework:* At least 18 credits of coursework in addition to that for the MSAA degree. A form listing the courses to be taken must be approved by the student's adviser and placed in the student's file.
4. *Preparation of the Dissertation:* The dissertation normally requires the equivalent of at least one year of full-time study, and must demonstrate original and independent research and achievement.
5. *The Final Examination:* When the dissertation is completed to the satisfaction of the chair of the Supervisory Committee, a reading committee of three is appointed from the student's committee. If the reading committee agrees that the dissertation is satisfactory, then the final examination is scheduled. That examination is generally devoted to a presentation and defense of the dissertation.

Research Activities

Current areas of research in the Department of Aeronautics and Astronautics include guidance and control systems, aerodynamics and fluid mechanics, propulsion and energy systems, advanced composite materials and structures, and plasma dynamics and fusion reactors. Research in controls includes autonomous systems involving spacecraft, aircraft, and underwater vehicles, flight systems integration, and development of unmanned aerial vehicles. Among fluid dynamics research topics are turbulent mixing, vortex dynamics and flow control, compressible flow, fluids in microgravity, and advanced fluid flow diagnostics development. Research programs in the areas of propulsion and energy include hypervelocity mass launchers, advanced technologies for generating space and terrestrial energy, combustion, and studies of planetary resources utilization. Structural mechanics research involves damage-tolerant composite structures, structural dynamics, fatigue, and fracture, and multidisciplinary design optimization. Experimental and computational research in plasma science has an emphasis on advanced, alternative concepts for achieving controlled fusion, as well as plasma propulsion for space applications.

Facilities

Facilities that support research activities in controls include unmanned aerial vehicle (UAV) and autonomous flight systems laboratories, and laboratories for underwater vehicle and distributed space systems research. Fluids, propulsion, and energy facilities include the Kirsten 8 x 12 foot low-speed wind tunnel, two water tunnels, a Mach 5, enthalpy blow-down wind tunnel, the Ram Accelerator hypervelocity launcher, a combustion laboratory, and a Mars environment simulation facility. Research in structures is conducted in a composite-material laboratory with material and structural test machines. Various plasma and fusion-research and engineering physics laboratories, including the Redmond Plasma Physics Laboratory (RPPL), exist to support research in plasmas. Lastly a variety of

computer facilities is available, including a single 20-processor and two 8-processor servers, and a 16-computer heterogeneous cluster, as well as several stereographic visualization systems.

Financial Support

Most students are financially supported by the department as teaching or research assistants, or by their employers. For further information on this or other aspects of department programs, contact the Graduate Program Coordinator, 211B Guggenheim Hall, Box 352400, or visit the department's [website](#).

COLLEGE OF ENGINEERING AERONAUTICS & ASTRONAUTICS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

A A 101 AIR AND SPACE VEHICLES (5) NW

[View course details in MyPlan: A A 101](#)

A A 198 Special Topics in Aeronautics and Astronautics (1-5, max. 10) NW *Knowlen*

Introduces the field of Aeronautics and Astronautics. Topics include aircraft flight, rocket propulsion, space travel, and contemporary space missions. May include hands-on activities. For non-majors.

[View course details in MyPlan: A A 198](#)

A A 210 Engineering Statics (4) NW

Applies vector analysis to equilibrium of rigid body systems and subsystems. Includes force and moment resultants, free body diagrams, internal forces, and friction. Analyzes basic structural and machine systems and components. Prerequisite: minimum grade of 2.0 in either MATH 126 or MATH 136; minimum grade of 2.0 in PHYS 121. Offered: AWS.

[View course details in MyPlan: A A 210](#)

A A 260 Thermodynamics (4) NW

Introduction to the basic principles of thermodynamics from a macroscopic point of view. Emphasis on the First and Second Laws and the State Principle, problem solving methodology. Prerequisite: minimum grade of 2.0 in either CHEM 140, CHEM 142, CHEM 144, or CHEM 145; minimum grade of 2.0 in either MATH 126, MATH 129, or MATH 136; minimum grade of 2.0 in PHYS 121. Offered: SpS.

[View course details in MyPlan: A A 260](#)

A A 299 Undergraduate Research (1-5, max. 10)

Research on special topics under the supervision of a faculty member. Application of fundamentals learned in the classroom to real problems in research. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: A A 299](#)

A A 301 Compressible Aerodynamics (4)

Covers aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere; kinematics and dynamics of flow fields; thin airfoil theory; compressible fluids; one-dimensional compressible flow; and two-dimensional supersonic flow. Prerequisite: either A A 260 or M E 323. Offered: W.

[View course details in MyPlan: A A 301](#)

A A 302 Incompressible Aerodynamics (4)

Aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere. Kinematics and dynamics of flow fields; incompressible flow about bodies. Thin airfoil theory; finite wing theory. Prerequisite: minimum grade of 1.7 in A A 301; PHYS 123; either AMATH 351, MATH 136, or MATH 307. Offered: Sp.

[View course details in MyPlan: A A 302](#)

A A 310 Orbital and Space Flight Mechanics (4)

Newton's law of gravitation. Two-body problem, central force motion, Kepler's laws. Trajectories and conic sections. Position and velocity as functions of time. Orbit determination and coordinate transformations. Rocket dynamics, orbital maneuvers, Hohmann transfer. Interplanetary trajectories, patched conics. Planetary escape and capture. Gravity assist maneuvers. Prerequisite: M E 230. Offered: A.

[View course details in MyPlan: A A 310](#)

A A 311 Atmospheric Flight Mechanics (4)

Applied aerodynamics, aircraft flight "envelope," minimum and maximum speeds, climb and glide performance. Range and endurance, take-off and landing performance, using both jet and propeller power plants. Longitudinal and dynamic stability and control, wing downwash, stabilizer and elevator effectiveness, power effects. Lateral and directional stability and control. Prerequisite: M E 230 Offered: A.

[View course details in MyPlan: A A 311](#)

A A 312 Structural Vibrations (4)

Vibration theory. Characteristics of single and multi degree-of-freedom linear systems with forced inputs. Approximate methods for determining principal frequencies and mode shapes. Application to simple aeroelastic problems. Prerequisite: M E 230. Offered: W.

[View course details in MyPlan: A A 312](#)

A A 320 Aerospace Instrumentation (3)

Hands-on laboratory experience for understanding the design and function of electronic circuits and instrumentation utilized in aerospace engineering. Topics include Ohm's law, Kirchoff's laws, DC and AC circuits, passive and active components, op-amps and comparators, sensors, signal conditioning, electromechanical systems and actuators, digital systems, and data acquisition. Prerequisite: PHYS 123. Offered: A.

[View course details in MyPlan: A A 320](#)

A A 321 Aerospace Laboratory I (3)

The design and conduct of experimental inquiry in the field of aeronautics and astronautics. Laboratory experiments on supersonic flow, structures, vibrations, material properties, and other topics. Theory, calibration, and use of instruments, measurement techniques, analysis of data, report writing. Prerequisite: A A 311; and A A 320 Offered: W.

[View course details in MyPlan: A A 321](#)

A A 322 Aerospace Laboratory II (3)

Design and conduct of experimental inquiry in the field of aeronautics and astronautics. Student groups propose, design, build, and conduct laboratory experiments in one of the following broad topic areas: aerodynamics, structures, propulsion, or energetics. Results are presented in written and oral reports. Prerequisite: minimum grade of 1.7 in A A 321. Offered: Sp.

[View course details in MyPlan: A A 322](#)

A A 331 Aerospace Structures I (4)

Analysis and design of aerospace structures. Reviews concepts of stress, strain, and equations of elasticity. Plane stress and plane strain. Application to aerospace structural elements including general bending and torsion of rods and beams, and open and closed thin-walled structures and box beams. Prerequisite: CEE 220. Offered: W.

[View course details in MyPlan: A A 331](#)

A A 332 Aerospace Structures II (4)

Shear flow in multi-cell thin walled sections. Bending of rectangular and circular plates. Buckling analysis of beams and plates. Energy principles in elasticity. Introduction to the finite element method. Elements of fracture mechanics and fatigue. Prerequisite: minimum grade of 1.7 in A A 331. Offered: Sp.

[View course details in MyPlan: A A 332](#)

A A 360 Propulsion (4)

Study of the aero- and thermodynamics of jet and rocket engines. Air-breathing engines as propulsion systems. Turbojets, turbofans, turboprops, ramjets. Aerodynamics of gas-turbine engine components. Rocket vehicle performance. Introduction to space propulsion. Prerequisite: minimum grade of 1.7 in A A 301. Offered: Sp.

[View course details in MyPlan: A A 360](#)

A A 400 Gas Dynamics (3)

Introduction to kinetic theory and free molecule flow. Review of thermodynamics. One-dimensional gas dynamics: one-dimensional wave motion, combustion waves. Ideal and real gas application. Prerequisite: PHYS 123; either A A 260 or CHEM E 260. Offered: W.

[View course details in MyPlan: A A 400](#)

A A 402 Fluid Mechanics (3)

Introduction to fluid mechanics, dimensional analysis, effects of gravity on pressure, kinematics, conservation of mass and momentum, control-volume method, conservation of energy, vorticity and viscosity, viscous effects, Navier-Stokes solutions, and boundary layers. Prerequisite: MATH 324; A A 301. Offered: A.

[View course details in MyPlan: A A 402](#)

A A 405 Introduction to Aerospace Plasmas (3)

Development of introductory electromagnetic theory including Lorentz force and Maxwell's equations. Plasma description. Single particle motions and drifts in magnetic and electric fields. Derivation of plasma fluid model. Introduction to plasma waves. Applications to electric propulsion, magnetic confinement, and plasmas in space and Earth's outer atmosphere. Prerequisite: PHYS 123; MATH 324. Offered: A.

[View course details in MyPlan: A A 405](#)

A A 410 Aircraft Design I (4-)

Conceptual design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and performance. Satisfaction of stability, control, and handling qualities requirements. Prerequisite: A A 320; A A 311; A A 332; and A A 360 Offered: W.

[View course details in MyPlan: A A 410](#)

A A 411 Aircraft Design II (-4)

Preliminary design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and performance. Satisfaction of stability, control, and handling qualities requirements. Prerequisite: A A 410. Offered: Sp.

[View course details in MyPlan: A A 411](#)

A A 419 Aerospace Heat Transfer (3)

Fundamentals of conductive, convective, and radiative heat transfer with emphasis on applications to atmospheric and space flight. Prerequisite: PHYS 123; MATH 307. Offered: W.

[View course details in MyPlan: A A 419](#)

A A 420 Spacecraft and Space Systems Design I (4-)

Design of space systems and spacecraft for advanced near-Earth and interplanetary missions. Astrodynamics, space environment, space systems engineering. Mission design and analysis, space vehicle propulsion, flight mechanics, atmospheric entry, aerobraking, configuration, structural design, power systems. thermal management, systems integration. Oral presentations and report writing. Design topics vary. Prerequisite: A A 301; A A 310; A A 332; and A A 360. Offered: W.

[View course details in MyPlan: A A 420](#)

A A 421 Spacecraft and Space System Design II (-4)

A continuation of A A 420. Course content varies from year to year and is dependent on the design topic chosen for A A 420. Prerequisite: A A 420. Offered: Sp.

[View course details in MyPlan: A A 421](#)

A A 430 Finite Element Analysis in Aerospace (3)

Introduction to the finite element method and application. One-, two-, and three-dimensional problems including trusses, beams, box beams, plane stress and plane strain analysis, and heat transfer. Use of finite element software. Prerequisite: CEE 220. Offered: A.

[View course details in MyPlan: A A 430](#)

A A 432 Composite Materials for Aerospace Structures (3)

Introduction to analysis and design of aerospace structures utilizing filamentary composite materials. Basic elastic properties and constitutive relations of composite laminates. Failure criteria, buckling analysis, durability, and damage tolerance of composite structures. Aerospace structure design philosophy and practices.

Prerequisite: A A 332. Offered: W.

[View course details in MyPlan: A A 432](#)

A A 440 Flight Mechanics I (3)

Calculation of aerodynamic characteristics of aircraft and components including stability derivatives. Relation to wind tunnel and flight data. Vehicle equations of motion within the atmosphere, characteristics of propulsion systems and components including propellers. Prediction of performance, stability, and control characteristics for a specific aircraft. Prerequisite: A A 311; A A 312; and A A 447. Offered: W.

[View course details in MyPlan: A A 440](#)

A A 441 Flight Test Engineering (3)

Determination in flight of performance, stability, and control characteristics of aircraft; and comparison with predicted and wind tunnel results. Prerequisite: A A 311; A A 440. Offered: Sp.

[View course details in MyPlan: A A 441](#)

A A 447 Control in Aerospace Systems (4)

Overview of feedback control. Dynamic models for control systems design including ODE, transfer function, and state-space. Linearization of nonlinear models. Analysis of stability, controllability, observability, time/frequency domain techniques. Frequency of response design techniques. Design of control systems via case studies. Prerequisite: minimum grade of 1.7 in A A 312; M E 230; MATH 308. Offered: A.

[View course details in MyPlan: A A 447](#)

A A 448 Control Systems Sensors and Actuators (3)

Overview of feedback control. Study of control systems components and formulation of their mathematical models. Discussion and analysis of amplifiers, DC servomotors, magnetic-actuators, accelerometers, potentiometers, shaft encoders and resolvers, proximity sensors, and force transducers. Experimental determination of component models and model parameters. Two three-hour laboratories per week. Prerequisite: A A 447.

[View course details in MyPlan: A A 448](#)

A A 449 Special Topics in Controls (3-5)

Topics of current interest in controls. Offered: Sp.

[View course details in MyPlan: A A 449](#)

A A 461 Advanced Air Breathing Propulsion (3)

Examines gas turbine engine design methodology. Covers aerodynamics or gas dynamics of air breathing engine components: inlets, compressors, turbines, and nozzles. Studies the on-design and off-design performance of gas turbine engines. Includes combustion, emissions, noise, and advanced air breathing propulsion systems.

Prerequisite: A A 360. Offered: A.

[View course details in MyPlan: A A 461](#)

A A 462 Rocket Propulsion (3)

Covers the physical and performance characteristics of chemical rocket propulsion systems. Includes combustion chamber thermochemistry, propellant properties and handling, and rocket system component interactions. Prerequisite: A A 260. Offered: Sp.

[View course details in MyPlan: A A 462](#)

A A 470 Systems Engineering (4)

Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Introduction to risk analysis and reliability, failure modes and effects analysis, writing specifications, and lean manufacturing. Offered: jointly with IND E 470; A.

[View course details in MyPlan: A A 470](#)

A A 480 Systems Dynamics (3)

Equations of motion and solutions for selected dynamic problems; natural frequencies and mode shapes; response of simple systems to applied loads. Prerequisite: A A 312. Offered: Sp.

[View course details in MyPlan: A A 480](#)

A A 496 Undergraduate Seminar (1, max. 4)

Lectures and discussions on topics of current interest in aviation and space technology by guest speakers. Topics vary. Credit/no-credit only. Offered: W.

[View course details in MyPlan: A A 496](#)

A A 498 Special Topics (1-5, max. 15)

Topics of current interest in the Department of Aeronautics and Astronautics.

[View course details in MyPlan: A A 498](#)

A A 499 Undergraduate Research (1-5, max. 10)

Research on special topics under the supervision of a faculty member. Application of fundamentals learned in the classroom to real problems in research. A maximum of 6 credits may be applied toward senior technical electives. Offered: AWSpS.

[View course details in MyPlan: A A 499](#)

A A 501 Physical Gasdynamics I (3)

Equilibrium kinetic theory; chemical thermodynamics; thermodynamic properties derived from quantum statistical mechanics; reacting gas mixtures; applications to real gas flows and gas dynamics. Offered: W, odd years.

[View course details in MyPlan: A A 501](#)

A A 503 Continuum Mechanics (3)

Reviews concepts of motion, stress, energy for a general continuum; conservation of mass, momentum, and energy; and the second law; constitutive equations for linear/nonlinear elastic, viscous/inviscid fluids, and general materials; and examples/solutions for solid/fluid materials. Offered: jointly with M E 503; A.

[View course details in MyPlan: A A 503](#)

A A 504 Compressible Fluid Mechanics (3)

Reviews the fundamentals with application to external and internal flows; supersonic flow, 1D and Quasi-1D, steady and unsteady flow, oblique shocks and expansion waves, linearized flow, 2D flow, method of characteristics; and transonic and hypersonic flow. Offered: A.

[View course details in MyPlan: A A 504](#)

A A 506 Vortex-Dominated Flows (3)

Examines the vorticity equation, baroclinic torque, solenoidality, Biot-Savart's formula, diffusion of vorticity, Burger vortex, system of vortices, Kelvin-Helmholtz instability, effects of density, shear, and surface tension on

instability, swirling flows, and other special topics. Offered: Sp, even years.

[View course details in MyPlan: A A 506](#)

A A 507 Fluid Mechanics (3)

Covers inviscid and viscous incompressible flows, exact solutions of laminar flows, creeping flows, boundary layers, free-shear flows, vorticity equation, and introduction to vortex dynamics. Offered: jointly with M E 507; W.

[View course details in MyPlan: A A 507](#)

A A 508 Turbulence (3)

The phenomena of turbulence; transition prediction; Reynolds stresses; turbulent boundary-layer equations. Approximate methods for turbulent boundary layers. Prerequisite: A A/M E 507 or permission of instructor. Offered: Sp, odd years.

[View course details in MyPlan: A A 508](#)

A A 510 Mathematical Foundations of Systems Theory (4)

Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with CHEM E 510/E E 510/M E 510.

[View course details in MyPlan: A A 510](#)

A A 516 Stability and Control of Flight Vehicles (3)

Static and dynamic stability and control of flight vehicles in the atmosphere. Determination of stability derivatives. Effects of stability derivatives on flight characteristics. Flight dynamic model. Responses to control inputs and external disturbances. Handling qualities. Control system components, sensor characteristics. Stability augmentation systems. Offered: A.

[View course details in MyPlan: A A 516](#)

A A 518 Automatic Control of Flight Vehicles (3)

Specifications of flight vehicle performance. Synthesis of stability augmentation systems and autopilot control laws in the frequency-domain and using multivariable control methods. Reduced-order controller synthesis, digital design, and implementation. Use of computer-aided control design packages. Prerequisite: A A 516 and A A 548. Offered: Sp, odd years.

[View course details in MyPlan: A A 518](#)

A A 523 Special Topics in Fluid Physics (3)

Offered: AWSp.

[View course details in MyPlan: A A 523](#)

A A 524 Aeroacoustics (3)

Reviews the fundamental concepts of acoustics which include sound measurements, reflection, resonance, transmission, radiation, scattering, diffraction, ray acoustics, wave guide, turbo-machinery noise, sound suppression, jet noise, and airframe noise and acoustic problems in rockets and other propulsion systems.

Offered: A, odd years.

[View course details in MyPlan: A A 524](#)

A A 525 Special Topics in Advanced Airbreathing Engines (3)

Reviews the fundamental concepts of advanced airbreathing engines including advanced gas turbines, ramjets, scramjets and variants, detonations engines, flow with chemical energy release, shock dynamics, Chapman-Jouguet, ZND model, and multi-cellular and spinning detonation. Offered: W, even years.

[View course details in MyPlan: A A 525](#)

A A 527 Space Power Systems (3)

Explores the theoretical background and technology of power systems for satellites, space science missions, and

planetary and lunar outposts. Focuses on photovoltaic, solar-thermal, and nuclear systems, as well as chemical systems for storage. Addresses thermal management. Offered: A, even years. ¹⁴⁹³

[View course details in MyPlan: A A 527](#)

A A 528 Spacecraft Dynamics and Control (3)

Examines spacecraft dynamics and control. Includes basic orbital mechanics - the restricted three body problem, Hill's theory, perturbation theory, orbit determination, rigid body kinematics and dynamics, attitude control, and spacecraft formation flying. Prerequisite: MATH 307; MATH 308. Offered: W, odd years.

[View course details in MyPlan: A A 528](#)

A A 529 Space Propulsion (3)

Nucleonics, and heat transfer of nuclear-heated rockets. Electrothermal, electromagnetic, and electrostatic thrusters. Power/propulsion systems. Prerequisite: permission. Offered: Sp, odd years.

[View course details in MyPlan: A A 529](#)

A A 530 Mechanics of Solids (3)

General concepts and theory of solid mechanics. Large deformations. Behavior of elastic, viscoelastic, and plastic solids. Linear theory of elasticity and thermoelasticity. Wave propagation in solids. Offered: A.

[View course details in MyPlan: A A 530](#)

A A 532 Mechanics of Composite Materials (3)

Analysis and design of composite materials for aerospace structures. Micromechanics. Anisotropic elasticity. Laminated plate theory. Thermo-viscoelastic behavior and fracture of composites. Prerequisite: coursework in mechanics of materials or permission of instructor. Offered: A.

[View course details in MyPlan: A A 532](#)

A A 535 Advanced Composite Structural Analysis (3)

Covers advanced stress analysis methods for composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A A 532. Offered: jointly with M E 500; Sp, odd years.

[View course details in MyPlan: A A 535](#)

A A 538 Introduction to Structural Optimization (3)

Includes the formulation of engineering design problems as optimization problems, gradient based numerical optimization methods, design oriented structural analysis, structural sensitivity analysis, approximation concepts, and introduction to multidisciplinary design optimization. Prerequisite: coursework in structural analysis; finite elements; and computer programming; or permission of instructor. Offered: A, odd years.

[View course details in MyPlan: A A 538](#)

A A 540 Finite Element Analysis I (3)

Formulation of the finite element method using variational and weighted residual methods. Element types and interpolation functions. Application to elasticity problems, thermal conduction, and other problems of engineering and physics. Offered: W.

[View course details in MyPlan: A A 540](#)

A A 541 Finite Element Analysis II (3)

Advanced concepts of the finite element method. Hybrid and boundary element methods. Nonlinear, eigenvalue, and time-dependent problems. Prerequisite: A A 540 or permission of instructor. Offered: Sp.

[View course details in MyPlan: A A 541](#)

A A 543 Computational Fluid Dynamics (3)

Examines numerical discretization of the inviscid compressible equations of fluid dynamics; finite-difference and finite-volume methods; time integration, iterative methods, and explicit and implicit algorithms; consistency, stability, error analysis, and properties of numerical schemes, grid generation; and applications to

the numerical solution of model equations and the 2D Euler equations. Offered: W.

[View course details in MyPlan: A A 543](#)

A A 544 Turbulence Modeling and Simulation (3)

Examines numerical discretization of the incompressible Navier-Stokes equation; projection method, introduction to turbulence; Reynolds Averaged Navier-Stokes equations; algebraic, one-equation, and two-equation turbulence models; large-eddy simulation; direct numerical simulation; and applications to the numerical solution of laminar and turbulent flows in simple geometries. Offered: Sp.

[View course details in MyPlan: A A 544](#)

A A 545 Computational Methods for Plasmas (3)

Develops the governing equations for plasma models - particle, kinetics, and MHD. Applies the governing equation to plasma dynamics through the PIC method and integration of fluid evaluation equations. Examines numerical solution to equilibrium configurations, and linear stability by energy principle and variational method. Prerequisite: A A 405 or A A 557. Offered: Sp, odd years.

[View course details in MyPlan: A A 545](#)

A A 546 Advanced Topics in Control System Theory (3)

Topics of current interest for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor.

[View course details in MyPlan: A A 546](#)

A A 547 Linear Systems Theory (4)

Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Offered: jointly with E E 547/M E 547.

[View course details in MyPlan: A A 547](#)

A A 548 Linear Multivariable Control (3)

Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 548/M E 548.

[View course details in MyPlan: A A 548](#)

A A 549 Estimation and System Identification (3)

Fundamentals of state estimation for linear and nonlinear systems. Discrete and continuous systems. Probability and stochastic systems theory. Models with noise. Kalman-Bucy filters, extended Kalman filters, recursive estimation. Numerical issues in filter design and implementation. Prerequisite: either A A 547, E E 547, or M E 547. Offered: jointly with E E 549/M E 549.

[View course details in MyPlan: A A 549](#)

A A 550 Nonlinear Optimal Control (3)

Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with E E 550/M E 550.

[View course details in MyPlan: A A 550](#)

A A 553 Vibrations of Aerospace Systems (3)

Continuous and discrete systems, natural frequencies, and modal analysis; forced vibrations and motion-dependent forces. Structural damping; control augmented structures. Measurements for structural dynamic testing. Prerequisite: A A 571 or equivalent. Offered: Sp, odd years.

[View course details in MyPlan: A A 553](#)

A A 554 Aeroelasticity (3)

Static and dynamic aeroelasticity, unsteady aerodynamics, aeroservoelastic modeling, and active control.

Offered: A, even years.

[View course details in MyPlan: A A 554](#)

A A 556 Space and Laboratory Plasma Physics (3)

Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent, or permission of instructor. Offered: jointly with ESS 576; W, odd years.

[View course details in MyPlan: A A 556](#)

A A 557 Physics of Fusion Plasmas (3)

Review and comparison of single particle and fluid descriptions of plasmas. MDH equilibrium, flux surfaces, and basic toroidal description. Collisional processes including physical and velocity space diffusion.

Introduction to island formation, stochasticity, and various plasma instabilities. Prerequisite: A A 405 or GPHYS 505. Offered: W, even years.

[View course details in MyPlan: A A 557](#)

A A 558 Plasma Theory (3)

Equilibrium, stability, and confinement. Classical transport, collisionless and resistive skin depths. Ideal MHD equations formally derived and properties of plasmas in the ideal limit are studied. Straight and toroidal equilibrium. Linear stability analysis with examples. Taylor minimum energy principle. Prerequisite: either A A 405, A A 556, A A 557, ESS 576, or GPHYS 537. Offered: Sp, even years.

[View course details in MyPlan: A A 558](#)

A A 559 Plasma Science Seminar (1, max. 30)

Current topics in plasma science and controlled fusion with presentations by invited speakers, on-campus speakers, and students. Students expected to give a seminar once or twice a year with instructor reviewing the method of presentation and material used for the presentation. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: A A 559](#)

A A 560 Plasma Diagnostics (3)

Discusses plasma measurement methods including material probes and optical methods. Covers techniques for making measurement in a high electrical noise environment. Presents methods for measuring electron and ion temperatures, density, impurities, magnetic fields, fluctuations, and neutrals. Prerequisite: A A 405 or equivalent. Offered: A, even years.

[View course details in MyPlan: A A 560](#)

A A 564 Kinetic Theory/Radiative Transfer (3)

Boltzmann and Collisionless Boltzmann (Vlasov) equations. Instabilities in homogeneous and inhomogeneous plasma, quasi-linear diffusion, wave-particle interaction, collisional (Fokker-Plank) equation. Introduction to radiative non-equilibrium, scattering and absorption processes. Integral equation of radiative transfer.

Prerequisite: A A 501 or permission of instructor. Offered: Sp, even years.

[View course details in MyPlan: A A 564](#)

A A 565 Fusion Reactor Fundamentals (3)

Introduction to basic engineering features of fusion power plants. Brief description of basic fusion physics and discussion of power plants for leading thermonuclear concepts. Engineering problems; blanket, shield neutronics; materials, thermal hydraulics; tritium, superconducting systems. Prerequisite: completion of or concurrent enrollment in A A 405 or permission of instructor. Offered: W, odd years.

[View course details in MyPlan: A A 565](#)

A A 570 Manifolds and Geometry for Systems and Control (3)

Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate vs.

coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with E E 570/M E 570; W, even years.

[View course details in MyPlan: A A 570](#)

A A 571 Principles of Dynamics I (3)

Systems of particles, rotating axes, rigid-body dynamics; calculus of variations. Lagrangian mechanics. Hamilton's principle. Kane's equations. Periodic and quasiperiodic motion. Stability of dynamical systems. Offered: A.

[View course details in MyPlan: A A 571](#)

A A 578 Convex Optimization (4)

Basics of convex analysis: Convex sets, functions, and optimization problems. Optimization theory: Least-squares, linear, quadratic, geometric and semidefinite programming. Convex modeling. Duality theory. Optimality and KKT conditions. Applications in signal processing, statistics, machine learning, control communications, and design of engineering systems. Prerequisite: A A 510, CHEM E 510, E E 510 or M E 510. Offered: jointly with E E 578/M E 578; W.

[View course details in MyPlan: A A 578](#)

A A 580 Geometric Methods for Non-Linear Control Systems (3)

Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with E E 580/M E 580; Sp, even years.

[View course details in MyPlan: A A 580](#)

A A 581 Digital Control System Design (4) M. BERG

Digital control system design by classical methods. Discrete-time systems and the z-transform. Modeling sampled-data systems. Frequency response of discrete time systems and aliasing. Nyquist stability criterion and gain and phase margins. Discrete-time control law determination by direct z-plane root locus and loop shaping methods. Includes hands-on-with-hardware projects. Prerequisite: AA/EE 447 or ME 471. Offered: jointly with E E 581/M E 581; W.

[View course details in MyPlan: A A 581](#)

A A 582 Introduction to Discrete Event Systems (3)

Modeling DES with automata and Petri nets. Languages. State estimation and diagnostics. Control specifications. Feedback control. Dealing with uncontrollability and unobservability. Dealing with blocking. Timed automata and Petri nets. Prerequisite: A A 447/E E 447/ M E 471. Instructors: Berg Offered: jointly with E E 582/M E 582; Sp, even years.

[View course details in MyPlan: A A 582](#)

A A 583 Nonlinear Control Systems (3)

Analysis of nonlinear systems and nonlinear control system design. Phase plane analysis. Lyapunov stability analysis. Describing functions. Feedback linearization. Introduction to variable structure control. Prerequisite: A A 447/E E 447/M E 471. Offered: jointly with E E 583/M E 583.

[View course details in MyPlan: A A 583](#)

A A 585 System Identification and Adaptive Control (3)

Theory and methods of system identification and adaptive control. Identification of linear-in-parameter systems, using recursive LS and extended LS methods; model order selection. Indirect and direct adaptive control. Controller synthesis, transient and stability properties. Offered: jointly with E E 585/M E 585.

[View course details in MyPlan: A A 585](#)

A A 589 Special Topics in Solid Mechanics (4)

Offered: AWSp.

[View course details in MyPlan: A A 589](#)

A A 591 Robotics and Control Systems Colloquium (1, max. 30)

Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with CHEM E 591/E E 591/M E 591.

[View course details in MyPlan: A A 591](#)

A A 593 Feedforward Control (3)

Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with E E 593/M E 593; Sp, even years.

[View course details in MyPlan: A A 593](#)

A A 594 Robust Control (3)

Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 594/M E 594; Sp, odd years.

[View course details in MyPlan: A A 594](#)

A A 595 Global Integrated Systems Engineering ([4/5]-, max. 9) C. MASTRANGELO

Covers systems engineering, project management, finance and economics in a global environment. Offered: jointly with IND E 595; AW.

[View course details in MyPlan: A A 595](#)

A A 596 Global Integrated Systems Engineering Project (3)

Project-based systems design course. Prerequisite: A A/INDE 595. Instructors: Mastrangelo Offered: jointly with IND E 596; Sp.

[View course details in MyPlan: A A 596](#)

A A 597 Networked Dynamics Systems (3)

Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 597/M E 597.

[View course details in MyPlan: A A 597](#)

A A 598 Special Topics in Aeronautics and Astronautics (1-5, max. 30)

Introduction of special topics in the field of aeronautics and astronautics. Topics introduced by regular and guest speakers and includes a variety of information that is of current interest in aeronautics and astronautics. Offered: AWSp.

[View course details in MyPlan: A A 598](#)

A A 599 Special Projects (1-5, max. 30)

Investigation on a special project by the student under the supervision of a faculty member. Offered: AWSpS.

[View course details in MyPlan: A A 599](#)

A A 600 Independent Study or Research (*-)

Offered: AWSpS.

[View course details in MyPlan: A A 600](#)

A A 700 Master's Thesis (*-)

Offered: AWSpS.

[View course details in MyPlan: A A 700](#)

A A 800 Doctoral Dissertation (*-)

Offered: AWPpS.

COLLEGE OF ENGINEERING AERONAUTICS & ASTRONAUTICS AEROSPACE ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

A E 501 Analytical Methods for Aerospace Engineering (4)

Applications of analytical and mathematical methods for aerospace engineering, including: ordinary differential equations, partial differential equations, linear algebra, vector calculus, integral theorems, complex analysis, optimization, and probability. Prerequisite: permission of instructor. Offered: A.

[View course details in MyPlan: A E 501](#)

A E 510 Linear Systems Theory (4)

Covers theoretic methods for state-space linear systems including linearization of nonlinear systems, time-varying and time-invariant linear systems, discrete time and continuous time representations, canonical state space representations, linear system stability, time evolution of systems, controllability, and observability.

Prerequisite: A E 501. Offered: W.

[View course details in MyPlan: A E 510](#)

A E 511 Classical Control Theory (4)

Covers theoretic methods for linear systems in the frequency domain including nonlinear and linear systems; linearization of nonlinear systems; stability, controllability, and observability of linear systems; linear system representations in frequency and time domains; dynamic system response in time and frequency domain; and frequency domain control design. Prerequisite: A E 501. Offered: A, even years.

[View course details in MyPlan: A E 511](#)

A E 512 Dynamics, Stability, and Control of Vehicles (4)

Covers stability derivatives; effects of stability derivatives on flight characteristics; dynamics of rigid bodies in air, space and underwater applications; responses to control inputs and external disturbances; handling qualities; control system components; sensor characteristics; stability augmentation systems; guidance and navigation; human factors; effects of limited communication; and multivehicle systems. Prerequisite: A E 501. Offered: Sp, odd years.

[View course details in MyPlan: A E 512](#)

A E 513 Multivariable Control (4)

An introduction to control of systems with multiple inputs and multiple outputs. Topics to be addressed include:

successive single loop design comparison; Lyapunov stability theory; full state feedback controller design¹⁵⁰⁰; linear quadratic regulator (LQR) and linear quadratic Gaussian (LQG) methods (development, incorporation of noise, design, analysis); separation principle; stability robustness; introduction to H-infinity control. Prerequisite: A E 501, or A E 510. Offered: A, odd years.

[View course details in MyPlan: A E 513](#)

A E 514 Estimation Theory (4)

Development of computational tools for estimation and filtering of state variables from sensor measurements. Methods are presented for both linear and nonlinear systems. Topics include discrete and continuous system structures for both linear and nonlinear dynamical systems with noise; rigid body dynamics; least squares; Bayesian estimation; Kalman filtering; extended Kalman filtering; unscented Kalman filtering; particle filtering; smoothing. Prerequisite: A E 501, A E 510 Offered: Sp, even years.

[View course details in MyPlan: A E 514](#)

A E 519 Special Topics in Aerospace Engineering: Controls (4, max. 16)

Current research and advanced special topics in the area of aerospace engineering - controls. Prerequisite: A E 501.

[View course details in MyPlan: A E 519](#)

A E 520 Fundamentals of Fluid Dynamics (4)

Flow kinematics and dynamics, inviscid and viscous flows, incompressible and compressible flows, shock-waves, boundary layers, vorticity, and turbulence. Prerequisite: A E 501. Offered: Sp.

[View course details in MyPlan: A E 520](#)

A E 521 Aircraft Propulsions (4)

Aircraft propulsion (propellers, turboprop, turbojet, turbofan, ramjets). Aerodynamics of gas-turbine/air breathing engine components (inlets, compressors, turbines, afterburners, nozzles). Engine design methodology and measurement (ground vs flight, thrust/drag accounting). Prerequisite: A E 520 Offered: A, odd years.

[View course details in MyPlan: A E 521](#)

A E 522 Rocket Propulsion (4)

Covers rocket propulsion (nozzle gas dynamics, non-ideal flow effects); rocket vehicle performance; chemical rockets (solid, liquid propulsion, components and design); physical; and performance characteristics of rockets; and mission requirements; Introduction to electric thrusters. Prerequisite: A E 520. Offered: Sp, odd years.

[View course details in MyPlan: A E 522](#)

A E 523 Aircraft Noise (4)

Covers noise characterization; federal aircraft noise regulation; interrelationship between the engine types and noise; aircraft noise generation, propagation, and radiation; noise measurements; and methods for noise reduction. Prerequisite: A E 520.

[View course details in MyPlan: A E 523](#)

A E 524 Computational Aerodynamics (4)

Panel methods, finite volume method, grid generation, CFD and its applications to aerodynamics. Prerequisite: A E 520 Offered: W, odd years.

[View course details in MyPlan: A E 524](#)

A E 529 Special Topics in Aerospace Engineering: Fluids (4, max. 16)

Current research and advanced topics in the area of aerospace engineering - fluids. Prerequisite: A E 501.

[View course details in MyPlan: A E 529](#)

A E 532 Rocket Propulsion (4)

Covers rocket propulsion (nozzle gas dynamics, non-ideal flow effects); rocket vehicle performance; chemical rockets (solid, liquid propulsion, components and design); physical; and performance characteristics of rockets;

and mission requirements; Introduction to electric thrusters. Prerequisite: A E 520. Offered: Sp, odd years.¹⁵⁰¹

[View course details in MyPlan: A E 532](#)

A E 539 Special Topics in Aerospace Engineering: Propulsion, Plasma, and Power (4, max. 8)

Current research and advanced special topics in the area of aerospace engineering - propulsion/plasma/power.

Prerequisite: A E 501.

[View course details in MyPlan: A E 539](#)

A E 540 Mechanics of Solids (4)

Covers general concepts, theory, and application of solid mechanics; mechanical behavior of elastic, plastic and viscoelastic solids; fracture of aerospace structural materials. Prerequisite: A E 501. Offered: W.

[View course details in MyPlan: A E 540](#)

A E 541 Finite Element Analysis (4)

Covers theory and application of the finite element methods; element types, stiffness matrix and solution procedures; and solution of elasticity, thermal conduction, and other practical problems in aerospace engineering. Prerequisite: A E 540. Offered: Sp, odd years.

[View course details in MyPlan: A E 541](#)

A E 542 Fatigue and Fracture in Aerospace Structures (4)

Covers theory of failure for metallic aerospace structures; fatigue properties, fatigue load spectrum, fatigue crack propagation, fracture mechanics, damage tolerance, fretting and corrosion fatigue, design applications, and case studies. Prerequisite: A E 540. Offered: A, even years.

[View course details in MyPlan: A E 542](#)

A E 543 Structural Vibrations (4)

Foundations of linear structural dynamics and vibrations of continuous and discrete systems: Physical phenomena, equations of motion, analytical and numerical solution methods, test methods. Prerequisite: A E 540 Offered: A, odd years.

[View course details in MyPlan: A E 543](#)

A E 544 Additive Manufacturing (4)

Introduction to Additive manufacturing (AM), development of AM technology, generalized AM process chain, designing for AM vat photopolymerization process, powder bed fusion, extrusion-based systems, sheet lamination process, composite laminates, automatics tape laying, designing laminated composites. Project-based examination of model parameters and designing and building an aerospace structure. Offered: W.

[View course details in MyPlan: A E 544](#)

A E 549 Special Topics in Aerospace Engineering: Structures (4, max. 16)

Current research and advanced special topics in the area of aerospace engineering - structures. Prerequisite: A E 501.

[View course details in MyPlan: A E 549](#)

A E 550 Mechanics of Composite Materials (4)

Covers the analysis and design of advanced composite materials for aerospace structures including material properties, micromechanics, anisotropic elasticity, theory of laminated plates, bending and buckling, and fracture of composites. Prerequisite: A E 501. Offered: Sp.

[View course details in MyPlan: A E 550](#)

A E 551 Aerospace Composite Design I (4)

Introduction to advanced stress analysis methods of composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints.

Prerequisite: A E 550 Offered: A, even years.

[View course details in MyPlan: A E 551](#)

A E 552 Aerospace Composite Design II (4)

Introduction to concepts of certification by analysis supported by test evidence in aircraft structures, emphasizing regulatory agency requirements and industry approaches. Subjects include allowable approach, bolted and bonded joints, damage resistance and tolerance, specialized test methods, and inspection techniques. Prerequisite: A E 550 Offered: A, even years.

[View course details in MyPlan: A E 552](#)

A E 553 Advanced Composite Structural Analysis (4)

Covers advanced stress analysis methods of composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A E 550. Offered: A, odd years.

[View course details in MyPlan: A E 553](#)

A E 554 Manufacture of Aerospace Composites (4)

Fundamentals of composite materials manufacturing and processing, emphasizing modern aviation industry practices. Discussions of auto and out-of-the-autoclave processing of carbon fiber composites, test methods, tooling, secondary processing, commercial processes, and several other topics related to manufacturing of composites. Emphasis on aircraft structures, but applicable to all high-performance lightweight structures. Prerequisite: A E 550 Offered: W, even years.

[View course details in MyPlan: A E 554](#)

A E 559 Special Topics in Aerospace Engineering: Composites (4, max. 16)

Current research and advanced special topics in the area of aerospace engineering - composites. Prerequisite: A E 501

[View course details in MyPlan: A E 559](#)

A E 598 Aerospace Engineering Colloquium (1, max. 30)

Covers the latest research in aerospace engineering. Includes current trends in professional aerospace engineering (e.g., manufacturing, systems, etc.) and professional development for aerospace engineers (e.g., project management, job searches, etc.). Lectures and discussions led by guest speakers. Credit/no-credit only. Offered: AWSp.

Chemical Engineering

[Display as tabs](#)

Department Overview

105 Benson

The chemical engineering profession is a close-knit group with a common background in chemical processes, systems analysis, and systems economics. Chemical engineering training occurs through course and laboratory work addressing mathematical, scientific, and engineering fundamentals. With a strong background in mathematics, chemistry, and physics, chemical engineering students study transport phenomena (the description of momentum, heat, and mass transfer in chemical processes); chemical kinetics and reaction engineering; process control and design; and optimization of chemical processes. These subjects are common throughout the traditional chemical industry, applying as well to other industries such as electronics manufacture and biological and biochemical engineering. Chemical engineers find industrial employment in areas of electronics, petroleum, consulting, chemical, automotive, forest products, biotechnology, and energy. Chemical engineers also find careers in academia and government and military service.

Undergraduate Program

Adviser

105 Benson, Box 351750

(206) 543-2252

advising@cheme.washington.edu

The Department of Chemical Engineering offers the following programs of study:

- Bachelor of Science in Chemical Engineering (BSChE) degree
- Bachelor of Science in Chemical Engineering (BSChE) degree, with an option in nanoscience and molecular engineering

Bachelor of Science in Chemical Engineering

Suggested College Courses for First Five Quarters: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, PHYS 121, PHYS 122, PHYS 123, ENGL 131 (or equivalent), AMATH 301 (or CSE 142)

Department Admission Requirements

Core courses within the department form a seven-quarter curriculum designed to start in spring quarter of the sophomore year. Applicants are considered in three groups: Direct

Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. Applicants not admitted under one admission group may subsequently apply to another admission group after completing more coursework. All applicants have the right to petition and appeal the department's admission decision.

Nanoscience and Molecular Engineering Option (NME): Admission to the NME option is competitive, and normally occurs upon completion of NME 220. Admission is based on grades, including NME 220 and any CHEM E courses already taken. A small number of students may be admitted into the NME option upon application to the department. Admission is based on the student's academic record and prior experience/work in the field of nanoscience and/or molecular engineering. Students applying for the NME option should so indicate on their chemical engineering application and discuss their interests and background in the essay.

1. *Direct Freshman Admission*

The department enrolls up to 30 percent of its incoming class directly from high school, prior to completion of University-level prerequisites. Students accepted to the UW who indicate chemical engineering as their preferred major on the freshman application are automatically considered. Competitive applicants have taken or are taking calculus and at least two years of laboratory science (physics, chemistry preferred) in high school. Admission is for autumn quarter only.

2. *Early Admission*

The department enrolls up to 30 percent of its class from students who have taken one year of college-level coursework through the UW. The application is available at www.engr.washington.edu/uapp. Admission is for autumn quarter only. Application deadline is July 1.

Course Requirements: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; PHYS 121; and 5 credits of English composition, chosen from C LIT 240, ENGL 109-ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281.

All courses must be completed prior to the July 1 application deadline.

Credit Requirements: Applicants must be completing their freshman year at the UW and must have completed a minimum 15 credits taken in residence at the UW.

Grade Requirements: Minimum 2.0 grade in each prerequisite course and minimum 2.50 GPA

3. *Upper-Division Admission*

The department enrolls the majority of its student through Upper-Division Admission. Upper-division applicants have completed at least four quarters of equivalent college-level coursework and are on track to begin the department curriculum in spring quarter of their sophomore year. Application for the department is available at www.engr.washington.edu/uapp. Students not at UW must also apply for admission to the UW for spring quarter, following the admission rules found at admit.washington.edu.

Admission is for spring quarter only. The department application deadline is February 1. The UW application deadline is December 15.

Course Requirements: Minimum 55 academic credits at time of application, including the following: MATH 124, MATH 125, MATH 126, MATH 307 (18 credits); CHEM 142, CHEM 152, CHEM 162 (15 credits); PHYS 121, PHYS 122 (10 credits); and one 5-credit English composition course, chosen from C LIT 240, ENGL 109-ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281.

Applicants are considered for admission if they have completed all but two of the required courses and are currently enrolled in those courses at the time of application to the major (e.g., MATH 307 and PHYS 122). See department adviser with questions.

General Expectations of Academic Progress: To be fully prepared for major coursework and to be on track to complete the degree in a timely manner, students must have completed all admission requirements as well as the following courses by the start of the autumn quarter following admission: organic chemistry I and II (CHEM 237 and CHEM 238, CHEM 223 and CHEM 224, or CHEM 335 and CHEM 336), PHYS 123, AMATH 301 (or CSE 142), MATH 308, CHEM E 310. Students unable to meet the continuation requirement are automatically dropped from the program (appeals for readmission are considered in case of special circumstances). Applicants should take general education or elective credits as space allows. See department academic adviser with questions related to academic progress.

Credit and Grade Requirements: 55 credits completed by application deadline, with a minimum overall 2.50 GPA and minimum 2.0 grade in all courses required for admission. Historically a substantially higher GPA in these categories is required for admission to the major. See department adviser with questions.

Factors included in the admission decision include the course record as indicated above and qualitative considerations such as difficulty of completed courses, frequency of incomplete or withdrawal grades, number of repeated courses, applicable work experience and maturity of attitude, record of honors, a demonstrated ability to take at least 12 credits per quarter, and special circumstances disclosed by the applicant.

Graduation Requirements

180 credits, as follows:

General Education Requirements (97 credits)

1. *Written and Oral Communications (8 credits):* one 5-credit English composition course from the University list; HCDE 231. University required 4 additional writing credits are met by major core courses.
2. *Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (24 credits):* Minimum of 10 credits required in each area
3. *Natural World (65 credits)*
 - a. *Physics (15 credits):* PHYS 121, PHYS 122, PHYS 123

- b. *Mathematics (24 credits)*: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 309 (or MATH 390 or IND E 315)
- c. *Chemistry (26 credits)*: CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 455

Major Requirements (74 credits)

1. *Engineering Fundamentals (4 credits)*: AMATH 301 or CSE 142
2. *Chemical Engineering Core Courses (51 credits)*: CHEM E 310, CHEM E 325, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 457, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. *Molecular and Nanoscience Engineering (3 credits)*: CHEM E 455
4. *Engineering Elective Courses (16 credits)*: Only one, 1-credit seminar is allowed to count toward engineering electives. A maximum of 9 credits of undergraduate research (CHEM E 299, CHEM E 499, of which no more than 3 credits may be CHEM 299) may count toward engineering electives.

Unspecified Electives (9 credits): to reach 180 credits

Nanoscience and Molecular Engineering Option Major Requirements (77 credits)

1. *Engineering Fundamentals (4 credits)*: AMATH 301 or CSE 142
2. *Chemical Engineering Core Courses (51 credits)*: CHEM E 310, CHEM E 325, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 457, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. *Nanoscience and Molecular Engineering Courses (22 credits)*: CHEM E 299, CHEM E 455, CHEM E 499 (3-6 credits, maximum 3 credits from CHEM E 299), NME 220, NME 221, NME 321, NME 421; minimum two additional approved nanoscience and molecular engineering electives. See adviser for list of approved electives.

Unspecified Electives (6 credits): to reach 180 credits.

A minimum 2.00 GPA in core chemical engineering courses, based on the first time each course is taken, is required for graduation.

Many engineers design new equipment and processes or design modifications to them. The design experience is integrated throughout the curriculum, with open-ended problems (sometimes involving economic constraints) in several courses: design of heat exchangers (CHEM E 340) and distillation towers (CHEM E 435), design of piping and pumping systems (CHEM E 330), design of chemical reactors (CHEM E 465). The design experience culminates in two capstone design courses (CHEM E 485 and CHEM E 486 or CHEM E 497) which involve the design of an integrated chemical system. An optional 9-credit specialty area allows each student to develop special competence in a selected subject by taking a minimum of three courses in that area. Engineering and free electives may be used for this purpose. The areas are biotechnology; fuel cells and energy; polymers, composites, colloids, and interfaces; computers applied to chemical engineering; environmental engineering; and nuclear engineering.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Chemical engineering graduates possess knowledge (including safety and environmental aspects) of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; and process design. They also gain ability to apply knowledge of mathematics, science, and engineering; ability to design and conduct experiments, as well as to analyze and interpret data; ability to design a system, component, or process to meet desired needs; ability to function on multidisciplinary teams; and ability to identify, formulate, and solve engineering problems. They also possess an understanding of professional and ethical responsibility; an ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; a knowledge of contemporary issues; and an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
- *Instructional and Research Facilities:* The chemical engineering building, Benson Hall, contains classrooms, offices, stockrooms, computer rooms, machine and electronics shops, and laboratories. The Unit Operations Laboratory holds a variety of experiments designed to give undergraduate students the experience of using real chemical process equipment and to deepen their understanding of chemical engineering fundamentals of fluid flow, heat transfer, separation processes, and reactor behavior. Departmental computer facilities include a network of PCs located in a keyed room for the exclusive use of chemical engineering students. Ten of these machines have hardware for computer data acquisition (to collect experimental data and support experiments on process automation). All have fast connections to the Internet and to larger UW computers.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students are encouraged to participate in internships, which are generally facilitated through the [Engineering Co-op Office](#).
- *Department Scholarships:* The department awards 20-25 full-tuition scholarships per year. See departmental website for application procedures.
- *Student Organizations/Associations:* The undergraduates in the department run a dynamic chapter of the American Institute of Chemical Engineers.

Of Special Note:

Entrance into most chemical engineering courses is ordinarily limited to majors in chemical engineering and bioresource science and engineering. Other students who wish to take departmental courses must meet the prerequisites and obtain instructor approval (except for CHEM E 485 and CHEM E 486, which are open to majors only).

Graduate Program

Graduate Program Coordinator
105 Benson, Box 351750
(206) 543-2250
grad.admissions@cheme.washington.edu

The department offers studies leading to the degrees of Doctor of Philosophy, Master of Science in Chemical Engineering, and Master of Science in Engineering. The doctoral degree is centered on the dissertation with a foundation in coursework; it is generally completed in four to five years beyond the baccalaureate degree. In the master's program primary emphasis is placed on coursework, and the degree generally requires 21 months of study. Thesis and non-thesis options are available.

The program of study includes basic subjects of importance to all chemical engineers, such as thermodynamics, transport phenomena, kinetics, and applied mathematics. In addition, students are invited to take more-specialized courses in chemical engineering or in other departments. Students usually take three courses during their first quarter. In subsequent quarters, less time is spent on coursework, and more on research and independent study.

The department has about seventy full-time graduate students, most of whom are working toward a doctorate. They study and collaborate with faculty members in an atmosphere that is informal, friendly, and intellectually vigorous. Faculty interests are broad, so students become familiar with a variety of areas while receiving individual guidance in a specialty.

Master of Science in Chemical Engineering

Admission Requirements

Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements. To be competitive, applicants must:

1. Be highly ranked (top 10 percent) in a respected chemical engineering program
2. Score at least 750 on the quantitative portion of the GRE
3. Score at least 600 (paper-based), 250 (computer-based), or 70 (Internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

Thesis Option

39 credits to include:

1. At least 18 credits in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Numerical grades must be received for at least 18 credits of coursework. These must be 500-599 or approved 400-level courses. They must include five courses from at least four of the following five categories. (The courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)

- a. *Math/Computer/Statistics*: CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, CHEM E 575, CHEM 526, STAT 421
 - b. *Thermodynamics*: CHEM E 455, CHEM E 525, CHEM E 526, CHEM 552
 - c. *Transport Phenomena*: CHEM E 530, CHEM E 531, M E 533, M E 534
 - d. *Reaction Phenomena*: CHEM E 461, CHEM E 560, CHEM E 564, CHEM E 565
 - e. *Materials and Biotech*: CHEM E 467, CHEM E 554, CHEM E 558, CHEM E 570, CHEM E 590
2. Approved 400-level courses presented for the 18 graded credits include 400-level CHEM E courses not required for the BS degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.
 3. A minimum 3.00 cumulative GPA in the graduate program
 4. At least 30 credits taken through the UW
 5. A thesis describing original research. At least 9 credits of thesis are required (CHEM E 700).
 6. Final examination consisting of an oral presentation of the thesis.
 7. Serve as TA for at least one quarter.

Non-Thesis Option

The non-thesis allows a student to receive graduate-level training with the primary focus on coursework. The degree requirements can be completed in four quarters (completion in three is possible).

39 credits, and other requirements, to include:

1. At least 18 credits in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Numerical grades must be received for at least 18 credits of coursework. These must be 500-599 or approved 400-level courses. They must include five courses from at least four of the following five categories. (The courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
 - a. *Math/Computer/Statistics*: CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, CHEM E 575, CHEM 526, STAT 421
 - b. *Thermodynamics*: CHEM E 455, CHEM E 525, CHEM E 526, CHEM 552
 - c. *Transport Phenomena*: CHEM E 530, CHEM E 531, M E 533, M E 534
 - d. *Reaction Phenomena*: CHEM E 461, CHEM E 560, CHEM E 564, CHEM E 565
 - e. *Materials and Biotech*: CHEM E 467, CHEM E 554, CHEM E 558, CHEM E 570, CHEM E 590
2. Approved 400-level courses presented for the 18 graded credits include 400-level CHEM E courses not required for the BS degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.
3. A project consisting of at least 6 CHEM E 600 credits (with a numerical grade of 2.7 or above, or an S grade). A member of the chemical engineering graduate faculty must supervise and grade the work. A written report is required.

4. Thesis research (i.e., CHEM E 700 or CHEM E 800) cannot count toward the 39 credits.
5. Minimum 3.00 cumulative GPA in the graduate program
6. At least 30 credits taken through the UW
7. Final examination consisting of an oral presentation of the CHEM E 600 project

Master of Science in Engineering

Admission Requirements

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

To be competitive, applicants must:

1. Be highly ranked (top 10 percent) in a respected chemical engineering program
2. Score at least 750 on the quantitative portion of the GRE
3. Score at least 600 (paper-based), 250 (computer-based), or 70 (internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

39 credits

The requirements are the same as for the MSChE thesis option, except that the research adviser considers the student's background and research objectives and tailors the course requirements accordingly (subject to Graduate Program Coordinator approval). Relative to the MSChE options, usually less emphasis is on chemical engineering, more on engineering science and related subjects.

Doctor of Philosophy

Admission Requirements

Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

To be competitive, applicants must:

1. Be highly ranked (top 10 percent) in a respected chemical engineering program
2. Score at least 750 on the quantitative portion of the GRE
3. Score at least 600 (paper-based), 250 (computer-based), or 70 (internet-based, not including speaking score) on the TOEFL, if an international applicant

Degree Requirements

90-108 credits, as follows:

1. *Minimum Graduate School Requirements:* Satisfy Graduate School minimum requirements, summarized below. NOTE: Graduate School policy imposes the requirements in force at the time of graduation (not at the time of program entry).
 - a. Complete at least 18 credits of courses numbered 500-600 through the University of Washington.
 - b. Complete at least 18 numerically graded credits of 400- and 500-level UW courses prior to the general examination. Any 400-level courses must have departmental approval.
 - c. Complete a minimum of 90 credits, at least 60 of which are UW credits.
 - d. Compile a minimum of 27 dissertation credits (CHEM E 800) over a period of at least three quarters. With the exception of summer, students may take a maximum of 10 dissertation credits per quarter.
 - e. Maintain a minimum cumulative GPA of 3.00.
 - f. Pass the general examination.
 - g. Pass the final examination (includes approval of the dissertation by student's Supervisory Committee).
 - h. Maintain full- or part-time graduate student registration at the UW for the quarter in which the above examinations are completed and the degree is conferred.
 - i. Complete all work for the doctoral degree within ten years.
2. *Students with a Chemical Engineering Undergraduate Degree:* In addition to the requirements listed above, doctoral students must:
 - a. Complete the non-thesis MSChE degree prior to the general examination. (Students with an MS in chemical engineering from another university may petition the Graduate Program Coordinator for an exemption.)
 - b. Serve as a TA for at least three quarters. Students should plan on one quarter per year in years 2-4.
 - c. Complete at least six graded courses numbered 500-599 or approved 400-level courses to satisfy the following:
 - d. Take five courses from at least four of the following five categories. (Courses listed in each category are typical. Others may qualify subject to approval by the Graduate Program Coordinator.)
 1. *Math/Computer/Statistics:* CHEM E 481, CHEM E 482, CHEM E 510, CHEM E 512, CHEM E 575, CHEM 526, STAT 421
 2. *Thermodynamics:* CHEM E 455, CHEM E 525, CHEM E 526, CHEM 552
 3. *Transport Phenomena:* CHEM E 530, CHEM E 531, M E 533, M E 534
 4. *Reaction Phenomena:* CHEM E 461, CHEM E 560, CHEM E 564, CHEM E 565
 5. *Materials and Biotech:* CHEM E 467, CHEM E 554, CHEM E 558, CHEM E 570, CHEM E 590
 - e. Take one CHEM E course in a topic outside the student's main research area.

3. *Non-Chemical Engineering Undergraduates:* Students whose undergraduate degree is in engineering or science (e.g., BS in chemistry or materials science) but not chemical engineering must pass or serve as a TA in the following courses in addition to the requirements listed in the previous section: CHEM E 330 (5), CHEM E 340, CHEM E 435, CHEM E 465, CHEM E 485
4. Students lacking a strong background in thermodynamics are advised (but not required) to take CHEM E 326 prior to attempting CHEM E 525. It is possible to take some graduate courses while completing the required undergraduate courses.

Research Facilities

Benson Hall contains classrooms, offices, stockrooms, a machine shop, laboratories, and a variety of specialized research equipment. Each graduate student is provided desk space in a small laboratory or office as well as access to larger laboratories in the building. Students also may use the services of the Academic Computer Center, instrument-making shops, research centers (e.g., biomaterials, nanotechnology, chemical analysis), and the Chemistry and Engineering Libraries.

Financial Aid

The department has various sources of support for qualified graduate students. Those interested in applying for admission and support should visit the department's website: www.cheme.washington.edu, which provides details on application procedures. Offers of admission with financial support are usually made in January through March.

COLLEGE OF ENGINEERING CHEMICAL ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

CHEM E 299 Undergraduate Research (1-3, max. 9)

Research or special topics under the supervision of a faculty member. Offered: AWSpS.

[View course details in MyPlan: CHEM E 299](#)

CHEM E 301 Leadership Seminar (1) *Schwartz*

Forum for industrial, academic, and government leaders to share their experiences and insights with students. Includes topics related to leadership in the chemical engineering profession including career planning, management skills, interpersonal skills, effective planning, entrepreneurship, ethics, and strategic decisions.

Credit/no-credit only. Offered: A.

[View course details in MyPlan: CHEM E 301](#)

CHEM E 309 Creativity and Innovation (2) *VLPA G. ALLAN*

Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Offered: jointly with BSE 309; Sp.

[View course details in MyPlan: CHEM E 309](#)

CHEM E 310 Material and Energy Balances (4)

Chemical and physical process calculations: steady- and unsteady-state material and energy balances with specific examples in vapor-liquid contact operations and multiphase extraction, and introductory thermochemistry. Prerequisite: PHYS 122 and MATH 307. Offered: Sp.

[View course details in MyPlan: CHEM E 310](#)

CHEM E 325 Energy and Entropy (4)

Introduction to the basic principles of thermodynamics from both microscopic and macroscopic points of view. Emphasis on equilibrium phenomena, and the trade-off of energy and disorder in determining structure and properties. Applications of thermodynamics in process design and analysis. Prerequisite: CHEM E 310. Offered: A.

[View course details in MyPlan: CHEM E 325](#)

CHEM E 326 Chemical Engineering Thermodynamics (4)

Phase equilibria and chemical equilibria in multicomponent systems; theories of solution; chemical reaction analysis. Prerequisite: CHEM E 325. Offered: W.

[View course details in MyPlan: CHEM E 326](#)

CHEM E 330 Transport Processes I (5)

Diffusive transport of momentum, heat, and mass; general aspects of fluid flow; the Navier-Stokes equations; one-dimensional flow with engineering applications. Prerequisite: CHEM E 310; either MATH 136 or MATH 307. Offered: A.

[View course details in MyPlan: CHEM E 330](#)

CHEM E 340 Transport Processes II (4)

Heat transfer, basic principles, and applications. Conduction, convection, and radiation. Prerequisite: CHEM E 330. Offered: W.

[View course details in MyPlan: CHEM E 340](#)

CHEM E 341 Energy and Environment (3) NW

Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with ENVIR 341/M E 341; A.

[View course details in MyPlan: CHEM E 341](#)

CHEM E 355 Biological Frameworks for Engineers (3)

For engineers with no prior experience in the biological sciences. Hands-on, project-based course covers fundamental concepts and language of biology, from an engineering perspective. Topics include functions of life, information processing, proteins, DNA, genetic variability, control loops, energetics, tissues, organisms, ecosystems. Prerequisite: either CHEM 142 or CHEM 145; PHYS 123; either MATH 307 or AMATH 351. Instructors: Shen Offered: W.

[View course details in MyPlan: CHEM E 355](#)

CHEM E 375 Chemical Engineering Computer Skills (2) *Pfaendtner*

Use Excell, Matlab, and AspenPlus to solve typical chemical engineering problems. Solve realistic problems and explore alternatives that would be inaccessible for hand calculations. Includes equations of state, chemical equilibrium of simultaneous reactions, phase equilibria, plug flow reactors, heat transfer in 1-D, and time-dependent heat transfer. Offered: W.

[View course details in MyPlan: CHEM E 375](#)

CHEM E 435 Transport Processes III (4)

Mass transfer, basic principles, and applications to equipment design. Physical separation processes. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.

[View course details in MyPlan: CHEM E 435](#)

CHEM E 436 Chemical Engineering Laboratory I (3)

Lectures on statistics, experimental design, instrumentation, laboratory safety, and report writing; laboratory experiments on fluid mechanics and heat transfer. Emphasis on teaming, experimental planning, procedures, report writing, and oral presentations. Prerequisite: CHEM E 326; CHEM E 340 which may be taken concurrently; HCDE 231. Offered: ASp.

[View course details in MyPlan: CHEM E 436](#)

CHEM E 437 Chemical Engineering Laboratory II (3)

Continuation of CHEM E 436. Laboratory investigation of chemical engineering principles applied to equipment design with emphasis on mass transfer operations and chemical reactors. Prerequisite: CHEM E 435; CHEM E 436; CHEM E 465. Offered: W.

[View course details in MyPlan: CHEM E 437](#)

CHEM E 440 Energy Materials, Devices, and Systems (3) *D. GINGER JR*

Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Prerequisite: CHEM 455 or CHEM 475 which may be taken concurrently Offered: jointly with CHEM 466/MSE 466; AWSp.

[View course details in MyPlan: CHEM E 440](#)

CHEM E 442 Renewable Energy (4) *NW P. MALTE*

Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either M E 323, CHEM E 325, A A 260, or E E 351. Offered: jointly with M E 442; W.

[View course details in MyPlan: CHEM E 442](#)

CHEM E 445 Fuel Cell Engineering (3)

Introduction to electrochemical fuel cells for use in transportation and stationary power applications. Topics covered include types of fuel cells, single cell operation, stack engineering, overall system design, and safety, with emphasis on proton exchange membrane and solid oxide fuel cells. Prerequisite: CHEM E 330. Instructors: Stuve

[View course details in MyPlan: CHEM E 445](#)

CHEM E 455 Surface and Colloid Science Laboratory (3) *Berg, Pozzo*

Laboratory techniques, equipment, and underlying fundamentals in surface and colloid science. Experiments in the measurement of surface tension, adsorption, wetting and spreading, colloid properties, emulsion preparation and stability, electrophoresis, and interfacial hydrodynamics. Offered: ASp.

[View course details in MyPlan: CHEM E 455](#)

CHEM E 457 Principles of Molecular Engineering (3)

Covers the basic aspects of statistical mechanics, focusing primarily on the canonical ensemble. Develops and applies a set of tools to regular liquid solutions, phase formation, spinodal decomposition, adsorption, polymer thermodynamics, chemical kinetics, and physical kinetics. Prerequisite: CHEM E 310; CHEM E 325; CHEM 455. Instructors: Hillhouse Offered: Sp.

[View course details in MyPlan: CHEM E 457](#)

CHEM E 458 Surface Analysis (3) *B. RATNER*

Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger): ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 492; Sp.

[View course details in MyPlan: CHEM E 458](#)

CHEM E 460 Polymer chemistry Laboratory (3) *C. DEFOREST*

Laboratory techniques, equipment, and underlying fundamentals in polymer chemistry, synthesis, and design. Quantitative understanding of polymerization reaction engineering will be developed through careful examination of kinetics and structure-property relationships. Selection of laboratory polymerization and characterization techniques, as well as recent innovations in polymer research, will be highlighted. Prerequisite: CHEM 238. Offered: Sp.

[View course details in MyPlan: CHEM E 460](#)

CHEM E 461 Electrochemical Engineering (3) *Schwartz*

Explores role of thermodynamics, charge transfer kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic rate processes, ionic transport, nucleation and growth theories. Applications to chemical sensors, batteries, corrosion, thin film deposition. In-class demonstrations to illustrate concepts.

[View course details in MyPlan: CHEM E 461](#)

CHEM E 465 Reactor Design (4)

Application of chemical kinetics and transport phenomena to the design of chemical reactors; characterization of batch and continuous-flow reactors in homogeneous and heterogeneous systems. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.

[View course details in MyPlan: CHEM E 465](#)

CHEM E 467 Biochemical Engineering (3) *F. BANEYX*

Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with BIOEN 467; W.

[View course details in MyPlan: CHEM E 467](#)

CHEM E 468 Air-Pollution Control Equipment Design (3)

Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CEE 494/M E 468.

[View course details in MyPlan: CHEM E 468](#)

CHEM E 480 Process Dynamics and Control (4)

Dynamics of process units and systems; instrumentation and control system design and analysis. Includes weekly laboratory. Prerequisite: CHEM E 435; CHEM E 465. Offered: W.

[View course details in MyPlan: CHEM E 480](#)

CHEM E 481 Process Optimization (3) *Holt*

Concepts and techniques of optimizing chemical engineering processes and systems, including classical and direct methods of search, linear and nonlinear programming, dynamic programming, statistical experimental design, and evolutionary operation. Offered: A.

[View course details in MyPlan: CHEM E 481](#)

CHEM E 482 Advanced Topics in Process Control (3)

Current topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern frequency response techniques, discrete control, adaptive control, model-based control, and nonlinear control. Prerequisite: CHEM E 480. Instructors: Holt, Ricker

[View course details in MyPlan: CHEM E 482](#)

CHEM E 484 Electronic and Optoelectronic Polymers (3)

Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Instructors: Jenekhe Offered: A.

[View course details in MyPlan: CHEM E 484](#)

CHEM E 485 Process Design I (4)

Applied economics in chemical engineering design and operations; measures of profitability; capital and operating cost estimates; introduction to design and design strategies. Prerequisite: CHEM E 480 which may be taken concurrently. Offered: W.

[View course details in MyPlan: CHEM E 485](#)

CHEM E 486 Process Design II (5)

Comprehensive design of a specific process or product, including economic feasibility studies, utilization of market survey and plant location studies, process equipment design and optimization, and overall plant

integration and layout. Prerequisite: CHEM E 485. Offered: Sp.

[View course details in MyPlan: CHEM E 486](#)

CHEM E 490 Engineering Materials for Biomedical Applications (3)

Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with BIOEN 490; A.

[View course details in MyPlan: CHEM E 490](#)

CHEM E 491 Controlled-Release Systems (3) S. PUN

Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral, and in vivo. Some special case studies covered in detail. Offered: jointly with BIOEN 491; W.

[View course details in MyPlan: CHEM E 491](#)

CHEM E 493 Advanced Surface Analysis (3) D. CASTNER

Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 458 or BIOEN 492. Offered: jointly with BIOEN 493; W.

[View course details in MyPlan: CHEM E 493](#)

CHEM E 497 Special Projects in Chemical Engineering Design ([1-6]-, max. 12)

Chemical engineering design instruction and experience in special projects, such as industrially motivated, timely, or interdisciplinary projects. Project subject and content varies. Majors only. Prerequisite: CHEM E 340.

[View course details in MyPlan: CHEM E 497](#)

CHEM E 498 Special Topics in Chemical Engineering (1-4, max. 12)

Topics of current interest in the field. Subject matter changes from quarter to quarter.

[View course details in MyPlan: CHEM E 498](#)

CHEM E 499 Undergraduate Research ([1-6]-, max. 12)

Independent research projects in chemical engineering. Offered: AWSpS.

[View course details in MyPlan: CHEM E 499](#)

CHEM E 510 Mathematical Foundations of Systems Theory (4)

Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with A A 510/E E 510/M E 510.

[View course details in MyPlan: CHEM E 510](#)

CHEM E 511 Biomaterials Seminar (1, max. 18) D. CASTNER, L. GAMBLE

Presentation of student research results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with BIOEN 511.

[View course details in MyPlan: CHEM E 511](#)

CHEM E 512 Methods of Engineering Analysis (3)

Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Prerequisite: MATH 308, MATH 307 or AMATH 351, MATH 324, or permission of instructor. Offered: jointly with AMATH 512; A.

[View course details in MyPlan: CHEM E 512](#)

CHEM E 514 Advanced Chemical Engineering Laboratory (3) *Q. YU*

Instrumentation and laboratory techniques for chemical, biological, clean energy, and nano technologies. Experiments include surface modification, thin film formation, nanoparticle synthesis, micro/nanoscale fabrication, protein adsorption, microorganism identification, and photovoltaic device fabrication/evaluation using advanced instrumentation. Offered: W.

[View course details in MyPlan: CHEM E 514](#)

CHEM E 515 Experimental Methods in Chemical Engineering Research (3) *Baneyx, Berg, Jiang*

Lecture and laboratory studies in current research methods of chemical engineering. Includes surface science, biochemical engineering, colloidal chemistry, light scattering, and nanoscience techniques. Offered: A.

[View course details in MyPlan: CHEM E 515](#)

CHEM E 523 Seminar in Chemical Engineering (0-1, max. 30)

Topics of current interest in chemical engineering. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: CHEM E 523](#)

CHEM E 525 Chemical Engineering Thermodynamics (4)

Review of principles of thermodynamics. Applications to problems in multiphase and multicomponent systems; theories of solutions. Prerequisite: undergraduate thermodynamics. Offered: A.

[View course details in MyPlan: CHEM E 525](#)

CHEM E 530 Momentum, Heat, and Mass Transfer I (4)

Derivation of the differential equations for mass, energy, and momentum transport. Principles of fluid mechanics; creeping flow, turbulence, boundary-layer theory. Offered: A.

[View course details in MyPlan: CHEM E 530](#)

CHEM E 531 Momentum, Heat, and Mass Transfer II (3)

Continuation of CHEM E 530. Flows of fluid-particle systems; convective heat transfer, natural convection. Prerequisite: CHEM E 530.

[View course details in MyPlan: CHEM E 531](#)

CHEM E 540 Energy Materials, Devices, and Systems (3) *D. GINGER JR*

Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Offered: jointly with CHEM 566/MSE 566; AWSp.

[View course details in MyPlan: CHEM E 540](#)

CHEM E 554 Nanoscale Science I: Contact Mechanics and Rheology on the Nanoscale (3) *Overney*

Introductory nanoscale science with emphasis on contact mechanics, principle and concept of forces, scanning force microscopy, tribology (friction, wear, lubrication), rheology, ultrathin organic films, physical properties of polymers, and computer simulation. Offered: W.

[View course details in MyPlan: CHEM E 554](#)

CHEM E 556 Colloidal Systems (3) *Berg, Pozzo*

Examines the unique properties and application of colloidal materials, i.e., dispersions of micro- or nano-sized particles in various media are described. Explores their inherent instability, and their kinetic, phoretic, electric, optical, and rheological properties. Offered: W.

[View course details in MyPlan: CHEM E 556](#)

CHEM E 558 Surface Analysis (3) *B. RATNER*

Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and

thermodynamic methods. Offered: jointly with BIOEN 592.

[View course details in MyPlan: CHEM E 558](#)

CHEM E 560 Reactions at Solid Surfaces (3)

Fundamental studies of adsorption and reactions on metallic and non-metallic surfaces with emphasis on heterogeneous catalysis and electrochemistry, including fuel cells. Topics include gas phase and liquid phase surface reactions, analyzed both experimentally and computationally. Prerequisite: undergraduate level course in kinetics or catalysis. Instructors: Stuve

[View course details in MyPlan: CHEM E 560](#)

CHEM E 565 Kinetics and Catalysis (3)

Homogeneous and heterogeneous systems with emphasis on chemical engineering principles applied to industrial reactor design. Prerequisite: CHEM E 525. Instructors: Stuve

[View course details in MyPlan: CHEM E 565](#)

CHEM E 580 Topics in Chemical Engineering Design (3, max. 9)

Lectures and seminars on current design methods in chemical engineering, including technical and economic feasibility of processes, design and optimization of process equipment, and environmental and social constraints. Prerequisite: undergraduate chemical engineering design, admission to chemical engineering master's program, or permission of instructor.

[View course details in MyPlan: CHEM E 580](#)

CHEM E 584 Electronic and Optoelectronic Polymers (3)

Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Instructors: Jenekhe Offered: A.

[View course details in MyPlan: CHEM E 584](#)

CHEM E 588 Research in Applied Microbiology (1, max. 30)

Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Prerequisite: permission of instructor. Instructors: Lidstrom Credit/no-credit only. Offered: jointly with MICROM 588; AWSpS.

[View course details in MyPlan: CHEM E 588](#)

CHEM E 590 Advanced Topics in Biomaterials (3)

Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with BIOEN 590.

[View course details in MyPlan: CHEM E 590](#)

CHEM E 591 Robotics and Control Systems Colloquium (1, max. 30)

Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/E E 591/M E 591.

[View course details in MyPlan: CHEM E 591](#)

CHEM E 593 Advanced Surface Analysis (3) D. CASTNER

Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 558 or BIOEN 592. Offered: jointly with BIOEN 593; W.

[View course details in MyPlan: CHEM E 593](#)

CHEM E 599 Current Topics in Chemical Engineering (1-5, max. 12)

Readings or lectures and discussions of topics of current interest in the field of chemical engineering. Subject matter changes from year to year. Prerequisite: permission of instructor.

[View course details in MyPlan: CHEM E 599](#)

CHEM E 600 Independent Study or Research (*-)

Offered: AWSpS.

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

NME 220 Introduction to Molecular and Nanoscale Principles (4) NW

Introduction to theories and concepts of molecular and nanoscale systems to raise awareness of technological and societal transformations anticipated through progress in nanotechnology. Prerequisite: either CHEM 142, CHEM 144, or CHEM 145; either MATH 126 or MATH 136; PHYS 121.

[View course details in MyPlan: NME 220](#)

NME 221 Nanoscience and Molecular Engineering Seminar I (1)

Introduces nanoscience and molecular engineering, and offers the opportunity of a first intellectual and interdisciplinary forum with interactions with members of research groups in the field. First in a series of three. Prerequisite: NME 220, which may be taken concurrently. Instructors: Overney Credit/no-credit only.

[View course details in MyPlan: NME 221](#)

NME 321 Nanoscience and Molecular Engineering Seminar II (1) Overney

Demonstrates how to tackle research challenges, put results into the framework of the open literature, and present and interpret data. Discusses contemporary societal and ethical aspects in nanoscience and molecular engineering. Second in a series of three. Credit/no-credit only.

[View course details in MyPlan: NME 321](#)

NME 421 Nanoscience and Molecular Engineering Seminar III (1)

Provides students with the opportunity to present their research results obtained during undergraduate research studies. Assessing the work of their peers and receiving feedback on their work, students further refine their ability in conducting and presenting research. Third in a series of three. Prerequisite: NME 321. Instructors: Overney Credit/no-credit only.

Civil and Environmental Engineering

[Display as tabs](#)

Department Overview

201 More

Civil and environmental engineering is a profession which interfaces closely with society in the planning, design, construction, and management of facilities serving the needs of people. These activities focus on: transportation infrastructure and construction; heavy construction; hydrology and hydrodynamics; structures, mechanics, and geotechnical engineering; wastewater treatment, and water-quality management; solid- and hazardous-waste disposal; and air quality management.

A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The work frequently provides close associations with the legal profession, urban and regional planners, economists, public officials, biologists, chemists, financial consultants, architects, and system analysts. Education and practice require a consideration not only of the technological-science aspects of a particular problem but also of its relationship to social, economic, political, and environmental constraints. Civil and environmental engineers create and maintain infrastructure in a heavily human-influenced ecosystem.

To accommodate these wide interests, the department is organized into six academic areas: construction engineering; transportation engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and hydrology and hydrodynamics.

Undergraduate Program

Adviser
201 More, Box 352700
(206) 543-5092
ceadvice@uw.edu

The Department of Civil and Environmental Engineering offers the following program of study:

- The Bachelor of Science in Civil Engineering degree

The BSCE degree is appropriate for students interested in civil and environmental engineering. The BS program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Bachelor of Science in Civil Engineering

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126, MATH 308; CHEM 142; PHYS 121, PHYS 122; AMATH 301 (preferred) or CSE 142; A A 210; CEE 220; M E 230; English composition.

Department Admission Requirements

Applicants are considered in three groups - Direct Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only. Applications for Early and Upper-Division Admission are accepted through the College of Engineering [online application form](#). For more information, see information for prospective students on the department [website](#).

Direct Freshman Admission

The department enrolls up to 20% of its incoming class directly from high school, prior to completion of University-level prerequisites. Students accepted to the UW who indicate Civil and Environmental Engineering as their preferred major on the freshman application are automatically considered. Competitive applicants have taken or are taking calculus and at least two years of laboratory science (physics, chemistry preferred) in high school. Admission is for autumn quarter only.

Early Admission

1. Admission is for autumn quarter only. Departmental application deadline is July 1.
2. *Course Requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical science courses plus accompanying laboratory at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.
3. Applicants must be currently enrolled at the UW and must have a minimum 15 credits taken in residence at the UW.
4. *Grade Requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission
5. *Completion of minimum requirements does not guarantee admission.*

Upper-Division Admission

1. Admission is for autumn quarter only. Departmental application deadline is July 1.
2. *Course requirements:* MATH 124, MATH 125, MATH 126, MATH 308; CHEM 142; PHYS 121, PHYS 122; AMATH 301 (preferred) or CSE 142; AA 210; CEE 220; M E 230; and 5 credits of English composition.
3. *Grade requirements:* Minimum grade of 2.0 in each course and a minimum cumulative GPA of 2.50:
4. *Completion of minimum requirements does not guarantee admission.*

Graduation Requirements

Minimum 180 credits as follows:

1. General Education Requirements (85-87 credits)

- a. *Written and Oral Communication (8 credits)*: English composition; HCDE 231
- b. *Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (24 credits)*: Minimum 10 credits in VLPA and minimum 10 credits in I&S plus 4 additional credits in either area.
- c. *Economics (4-5 credits)*: ECON 200 or IND E 250. ECON 200 may also be applied toward the I&S requirement. IND E 250 may also be applied toward the requirement for an additional Engineering Fundamentals course.
- d. *Natural World (49-50 credits)*
 - i. *Mathematics (21 credits)*: MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352)
 - ii. *Statistics (3-4 credits)*: IND 315 (preferred) or STAT 390
 - iii. *Science (25 credits)*: CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

2. Major Requirements (94-97 credits)

- a. *Engineering Fundamentals (20 credits)*: AMATH 301 or CSE 142, A A 210, CEE 220, and ME 230. Students who complete STAT 390 must complete an additional engineering fundamentals course from A A 260, IND E 250, IND E 280, M E 123, E E 215, or MSE 170. Students who complete IND E 315 must complete either an additional Engineering Fundamentals course from the above list, or an additional 300-level math course other than statistics.
- b. *Civil Engineering Core (40 credits)*: CEE 307, CEE 317, CEE 327, CEE 337, CEE 347, CEE 357, CEE 367, and CEE 377.
- c. *Professional Practice and Capstone Design (7 credits)*: CEE 440 and one course from CEE 441, CEE 442, CEE 444, or CEE 445. Minimum 2.0 grade required for both courses in this two-course sequence.
- d. *Civil Engineering Technical Electives (15 credits)*: CEE 400-level coursework selected from an approved list (see adviser or department website for list), with at least one core course from three separate areas of concentration within the department. Minimum 2.0 grade required for each of the three courses used to fulfill the core-courses requirement.
- e. *Upper-Division Engineering and Science (12 credits)*: Choice of additional CEE 400-level courses or courses from an approved list from outside the department. Maximum 6 credits of CEE 498 and 3 credits of CEE 499 allowed toward upper-division engineering and science.
- f. *Grade Requirements*: Minimum 2.00 GPA in all engineering courses with no grade below 1.0 in these courses.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, statistical, scientific, and engineering principles in formulating and solving civil and environmental engineering problems; demonstrate sufficient mastery of core civil and environmental engineering topics suitable for entry into the profession and for graduate study; gain significant experience in

designing systems and components in civil and environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.

- *Instructional and Research Facilities:* The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental science and hazardous waste research laboratory facilities include more than 7,000 square feet of lab space, well equipped with sophisticated research instruments, including state-of-the-art analytical capability for trace organic compounds. The lake-stream laboratory is equipped with limnological equipment, as well as an auto-analyzer, bench-top incubators, and research microscopes. The structural research laboratory contains an earthquake simulator, a modern MTS testing system, and a 2.4 million pound capacity Baldwin universal hydraulic testing machine. The geotechnical engineering laboratory contains soil testing equipment, including triaxial testing devices, a computer-controlled GDS pressure control system, a Bishop-Wesley cell, a recently developed cuboidal shear device, a CKC cyclic triaxial device, and a SBEL (Stokoe) resonant column.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Distinction Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Students typically work at internships in private companies and government agencies in the summer after their junior year, with some part-time internships continuing during the academic year. Many companies advertise internship and job openings through the department and meet with students for on-campus recruiting sessions.
- *Department Scholarships:* The department offers numerous annual scholarships. The application deadline for departmental scholarships is April 1. For more information, see department website. Scholarships are also available through the College of Engineering, the UW Scholarship Office, and external sources, including professional associations and industry.
- *Student Organizations/Associations:* American Society of Civil Engineers. Chi Epsilon, national honor society for civil engineering undergraduate and graduate students. See adviser for details.

Graduate Program

Graduate Program Coordinator
201 More, Box 352700
(206) 543-2574
ceginfo@uw.edu

The Department of Civil and Environmental Engineering offers programs of study leading to the degrees of Master of Science in Civil Engineering (MSCE), Master of Sustainable Transportation (MST), Master of Supply Chain Transportation and Logistics (MSCTL), and Doctor of Philosophy.

Graduate work is offered in most fields of civil and environmental engineering, including transportation and construction engineering; geotechnical engineering; structural

engineering and mechanics; environmental engineering; and hydrology and hydrodynamics.

Graduate Online Programs:

Construction Engineering Master's Program: The Department of Civil and Environmental Engineering, in collaboration with the Department of Construction Management in the College of Built Environments, offers an online Master of Science in Civil Engineering degree in Construction Engineering. Designed for working professionals, this program can be completed entirely online and at the student's own pace. Areas covered include heavy construction project management, infrastructure construction, and qualitative construction management. For more information on this program, see the Construction Engineering [website](#).

Master in Sustainable Transportation Program: The Department of Civil and Environmental Engineering, in partnership with UW Professional and Continuing Education, offers an online Master of Sustainable Transportation degree (MST). The program provides transportation engineers and planners with the latest knowledge, skills, and tools needed to become leaders in developing and maintaining sustainable transportation practices. Students develop an awareness of green transportation strategies and gain a solid background with practical applications. In a part-time online format, the MST program covers three areas of concentration: Planning and Livable Communities; Environmental Issues and Impacts; and Policy Development, Health and Economics. For more information on this program, see the Master of Sustainable Transportation [website](#).

Supply Chain Transportation and Logistics Master's Program (beginning Autumn 2013): The Department of Civil and Environmental Engineering, in partnership with UW Professional and Continuing Education, offers an online Master of Supply Chain Transportation and Logistics degree. Combining engineering and business principles with industry best practices, this program provides students with the knowledge needed to successfully design, implement, and manage complex supply chain transportation and logistics strategies. Students study cross-functional areas, such as operations, inventory management, and IT systems, to develop skills in the end-to-end management of transportation in a global supply chain. For more information on this program, see the Master of Supply Chain Transportation and Logistics [website](#).

Master of Science in Civil Engineering

Admission Requirements

Priority for admission is based on an applicant's apparent ability to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance; usually, at least a "B" or 3.00 GPA in the junior and senior years is required. Consideration is also given to Graduate Record Examination scores and other information.

Degree Requirements

42 credits, as follows:

Two options are available -- thesis and non-thesis.

- *Thesis option:*
 - 30 credits of coursework with at least 18 credits at the 500 level
 - 3 credits (maximum) of CEE 500

- 9 credits of master's thesis, CEE 700
- *Non-thesis option:*
 - 39 credits of coursework with at least 18 credits at the 500 level
 - 3 credits (maximum) of CEE 500

Doctor of Philosophy

Admission Requirements

Priority for admission is based on an applicant's apparent ability to progress satisfactorily in a research-based graduate degree program. The applicant's scholastic record is of major importance; usually, at least a "B" or 3.00 GPA in the junior and senior years is required. Consideration is also given to Graduate Record Examination scores and other information.

Degree Requirements

90 credits, as follows:

- 60 coursework credits
- 27+ dissertation credits
- 3 seminar credits (for those without a master's degree from CEE at UW)

With the approval of the department, an appropriate master's degree from an accredited institution may be applied towards 30 of the 60 coursework credits.

Because this is a research-based degree, course requirements are individualized depending on student's background and PhD topic area.

Financial Aid

Research and teaching assistantships are available on a competitive basis. The number of positions depends upon the current level of funding. Additionally there are a limited number of fellowships, scholarships, and traineeships.

Research Facilities

More Hall has structural, concrete, bituminous materials, soil mechanics, computer, water-quality, solid-wastes, and air-quality laboratories as well as an air-monitoring station and equipment for fieldwork in the construction, water, air, and solid-waste programs. Facilities for experimental studies in hydrology and hydrodynamics are located in the Harris Hydraulics Laboratory.

CEE 100 Twenty-First Century Civil and Environmental Engineering (1)

Introduction to the modern discipline of civil and environmental engineering including major sub-disciplines, professional careers, projects, and departmental faculty. Explores the different disciplines and their relevance to today's students. Credit/no-credit only. Offered: W.

[View course details in MyPlan: CEE 100](#)

CEE 220 Introduction to Mechanics of Materials (4) NW

Introduction to the concepts of stress, deformation, and strain in solid materials. Development of basic relationships among loads, stresses, and deflections of structural and machine elements such as rods, shafts, and beams. Load-carrying capacity of these elements under tension, compression, torsion, bending, and shear forces. Prerequisite: minimum grade of 2.0 in A A 210. Instructors: Berman, Reed Offered: AWSp.

[View course details in MyPlan: CEE 220](#)

CEE 250 Environmental Processes and flows (3) NW

Introduces the concepts of environmental materials and energy balance within the context of Pacific Northwest case studies, in particular nutrient loading, eutrophication, hypoxia/fish kills, water treatment, and global climate change and its regional impacts on water resources and hydrologic cycles. Prerequisite: either MATH 120, or MATH 124. Instructors: Brett Offered: Sp.

[View course details in MyPlan: CEE 250](#)

CEE 291 Introduction to AutoCAD for Civil Engineers (2) NW

Provides an introduction to engineering drafting and graphical communication. Includes application of drafting standards and structure as well as creating and modifying basic drawings in 2D and 3D drafting in AutoCAD. Introduces reading plan sets and creating portions of plan sets applied to civil and environmental engineering fields. Prerequisite: MATH 124 or MATH 112. Offered: AWSp.

[View course details in MyPlan: CEE 291](#)

CEE 297 Foreign Study (3-5, max. 15)

For participants in approved foreign-study programs. May not be used to satisfy upper-division major

requirements.

[View course details in MyPlan: CEE 297](#)

CEE 298 Special Topics in Civil and Environmental Engineering (1-5, max. 10)

Explores special topics in civil and environmental engineering.

[View course details in MyPlan: CEE 298](#)

CEE 299 Independent Project (1-5, max. 10)

Research on special topics under supervision of a faculty member. May not be used to satisfy upper-division major requirements. Offered: AWSpS.

[View course details in MyPlan: CEE 299](#)

CEE 307 Construction Engineering (5)

Introduces construction engineering including construction methods, engineering economics, contracts, project delivery methods, plan and specifications, scheduling, estimating, productivity, environmental regulations, safety and green construction. Uses scheduling and estimating software tools and emphasizes communication engineering information. Offered: AW.

[View course details in MyPlan: CEE 307](#)

CEE 317 GeoSurveying (5)

Measurement and digital mapping techniques; integration of surveying methods and techniques, monitoring of structures; spatial data collection and integration with surveying data; adjustment of measurements, concepts of error; surveying control; coordinate systems, transformation; highway vertical curves; Earthwork, leveling and datum consideration, photogrammetry, GPS, GIS, remote sensing, cadastral and construction surveys, digital mapping. Prerequisite: either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: A.

[View course details in MyPlan: CEE 317](#)

CEE 327 Transportation Engineering (5)

Studies vehicular transportation fundamentals including vehicle dynamics, geometric design, pavement design, traffic flow concepts, level of service analysis, intelligent transportation systems, travel demand prediction methods, freight logistics, and management of transportation systems. Includes a review of relevant vehicle operating characteristics. Prerequisite: PHYS 121; either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: WSp.

[View course details in MyPlan: CEE 327](#)

CEE 337 Construction Materials (5)

General treatment of physical and mechanical properties and engineering behavior of metallic and nonmetallic materials. Steel, aluminum, aggregates, portland cement concrete, bituminous materials, asphalt concrete, wood. Laboratory testing, instrumentation, and investigation into macro-behavior. Sustainability issues including recycling, energy requirements, and greenhouse gas production associated with the materials. Prerequisite: CEE 220. Offered: ASp.

[View course details in MyPlan: CEE 337](#)

CEE 347 Introduction to Fluid Mechanics (5)

Introduces the mechanics of incompressible fluids and their applications. Hydrostatic pressure forces.

Kinematics, potential flows, and the Bernoulli equation. Conservation of mass, momentum, and energy. Laminar and turbulent flows. Flow in pipes, pipe networks, and open channel flows. Prerequisite: CEE 220; ME 230; PHYS 122. Instructors: Horner-Devine, Lundquist, Thomson Offered: AW.

[View course details in MyPlan: CEE 347](#)

CEE 348 Hydrology and Environmental Fluid Mechanics (4) A. HORNER-DEVINE, E.

ISTANBULLUOGLU, J. LUNDQUIST

Introduction to the physical processes that govern transport and mixing in the environment. The course uses fluid mechanical principles to understand flow in the atmosphere, river basins, groundwater, lakes and estuaries with implications for the movement of water, contaminant and other tracers through the environment.

Prerequisite: CEE 347 and PHYS 123. Offered: Sp.

[View course details in MyPlan: CEE 348](#)

CEE 349 Case Studies in Environmental Engineering (3)

Case studies are used to introduce fundamental environmental engineering concepts with a focus on engineering approaches that consider the interconnectedness of human and environmental systems. Prerequisite: CHEM 162. Offered: A.

[View course details in MyPlan: CEE 349](#)

CEE 350 Mass and Energy Balances in Environmental Engineering (4)

Introduces concepts of mass balance, energy balance, and mass transport, and movement of water, chemicals, and energy through natural and engineered environmental systems, with application to water treatment, global elemental cycles, the earth's energy balance. Credit cannot be applied toward graduation for both CEE 350 and CHEM E 310 Prerequisite: CHEM 162, PHYS 122, AMATH 351, or MATH 307. .

[View course details in MyPlan: CEE 350](#)

CEE 352 Introduction to Environmental Chemistry and Microbiology (4)

Introduction to chemical and microbiological processes in natural and engineered environmental systems. Identification of key classes of chemicals and microorganisms; thermodynamics and kinetics of chemical and microbiological processes, their impacts on ecological and human health, and their importance in biogeochemical cycles and in environmental engineering applications. Prerequisite: CHEM 162, AA 260, CHEM E 326, or ME 323; and BIOL 180.

[View course details in MyPlan: CEE 352](#)

CEE 354 Environmental Engineering Applications (5)

Examines sources, impacts, and regulation of soil, water, and air pollutants, with emphasis on technologies for preventing and mitigating environmental pollution. Introduces applications of mass and energy balances and principles of chemistry and microbiology in design and operation of subsurface remediation, water and wastewater treatment, and air pollution control processes. Prerequisite: CEE 350, or CHEME 310; and CEE 352, or CHEM 237, or CHEM 223. Offered: W.

[View course details in MyPlan: CEE 354](#)

CEE 356 Quantitative and Conceptual Tools for Sustainability (4)

Conceptual and quantitative tools are introduced that incorporate sustainability principles into environmental engineering. It uses a systems analysis perspective to address critical issues in environmental engineering. Topics include life cycle analysis and long-term system mass balances that facilitate decision making and process optimization at generational time scales. Offered: Sp.

[View course details in MyPlan: CEE 356](#)

CEE 357 Environmental Engineering (5)

Describes water and air resources, parameters that characterize their quality, and how their use alters their properties. Elements of hydrology. Mass and energy balances as applied to environmental systems. Global environmental change. Basics of aquatic chemistry and microbiology applied to municipal water and wastewater treatment operation. Groundwater contamination and treatment. Prerequisite: CHEM 142; either MATH 126, MATH 134, MATH 135, or MATH 136. Offered: WSp.

[View course details in MyPlan: CEE 357](#)

CEE 367 Geotechnical Engineering (5)

Fundamental engineering properties of soil and rock; depositional processes and physical characteristics, hydro-conductive properties and advective flow; volume change characteristics including short- and long- term deformation; shear strength properties; and applications of basic concepts to practical problems such as foundation design and slope stability. Prerequisite: CEE 347. Instructors: Arduino, Kramer, Wartman Offered: WSp.

[View course details in MyPlan: CEE 367](#)

CEE 377 Introduction to Structural Design (5) *Berman, Eberhard, Reed, Roeder*

Introduces the concepts, approaches, procedures, and codes for the structural design. Characterization of structural loads. Structural systems and system behavior. Analysis of statically determinate structures and introduction to analysis of statically indeterminate structures including approximate methods. Introduction to the behavior and design of fundamental structural member. Prerequisite CEE 220. Offered: AW.

[View course details in MyPlan: CEE 377](#)

CEE 404 Infrastructure Construction (4) *S. MUENCH*

Basic concepts of large transportation infrastructure construction projects including planning, scheduling, life-cycle cost analysis (LCCA), construction cost, logistics, productivity and, where applicable, traffic impacts. Term project is designed around a large-scale I-5 pavement reconstruction project involving construction, traffic, and the interaction between the two. Involves presentations on local transportation infrastructure projects. Prerequisite: CEE 307. Offered: W.

[View course details in MyPlan: CEE 404](#)

CEE 409 Engineering Rome: Study Abroad (5) *Muench*

Covers Roman civil engineering over 3,000 years from Ancient Rome to the present day. Introduces civil engineering topics reinforced by practical engineering calculations, local experts, and site visits. Provides international and historical perspective on engineering and the contributions of engineers to infrastructure and society.

[View course details in MyPlan: CEE 409](#)

CEE 410 Traffic Engineering Fundamentals (3)

General review of the fundamentals of traffic engineering, including their relationship to transportation operations management and planning, with emphasis on calculations and procedures in the Highway Capacity Manual; field surveys and data analysis. Prerequisite: CEE 327. Offered: W.

[View course details in MyPlan: CEE 410](#)

CEE 412 Transportation Data Management (3)

Introduction to modern concepts, theories, and tools for transportation data management and analysis. Applications of software tools for transportation data storage, information retrieval, knowledge discovery, data exchange, online information sharing, statistical analysis, system optimization, and decision support. Prerequisite: CEE 327. Instructors: Wang Offered: W.

[View course details in MyPlan: CEE 412](#)

CEE 416 Urban Transportation Planning and Design (3)

Brief review of major issues in urban transportation planning. Planning process discussed and transportation models introduced. Uses a systems framework, including goals and objectives, evaluation, implementation, and monitoring. A design term project, individual or small groups, utilizes material presented on a contemporary problem. Prerequisite: CEE 327. Offered: A.

[View course details in MyPlan: CEE 416](#)

CEE 418 Computer-Aided Planning of Urban Systems (3)

Survey of online planning applications; use of various on-line systems to solve urban systems design problems; investigations of hardware/software tradeoffs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with URBPD 429.

[View course details in MyPlan: CEE 418](#)

CEE 420 Engineering with Developing Communities (3) *DIV*

Introduces key technologies, theories, and challenges of infrastructure design for development. Covers technologies for energy, water, sanitation, and disaster response in low-resource contexts. Explores development theory and cross-cultural communication as they pertain to global infrastructure design.

[View course details in MyPlan: CEE 420](#)

CEE 421 Pavement Design & Construction (4) *J. MAHONEY, S. MUENCH, J. YAMAURA*

Structural design and construction processes associated with bituminous and concrete pavements. Covers theory, practice, and software tools for structural thickness design and layered elastic analysis; as well as construction methods, materials, and logistics. Includes small group case-study work on actual paving projects and state-of-the-art mobile project inspection software use. Prerequisite: CEE 337. Offered: Sp.

[View course details in MyPlan: CEE 421](#)

CEE 422 Energy and Transportation (3) *T. LARSON, J. MAHONEY*

Introduces climate change; vehicles, energy requirements and pollution; transportation fuels; energy and power plant terminology; traditional fossil fuel, nuclear, and renewable energy plants; permitting power plants and projects. Prerequisite: CEE 327. Offered: Sp.

[View course details in MyPlan: CEE 422](#)

CEE 424 GIS for Civil Engineers (3)

GIS in civil engineering applications. Geographic and spatial data types and acquiring considerations. Data models and structures. Projections and transformations. Attribute-based operation, spatial operations. Surfaces and near neighbors. Training on Arc GIS software. Prerequisite: CEE 317. Offered: AS.

[View course details in MyPlan: CEE 424](#)

CEE 425 Reinforced Concrete Construction (3) *D. JANSSEN*

Processes in constructing reinforced concrete structures. Identification and development of solutions to potential constructability problems. Lectures augmented with industry speakers and a field trip to a building under construction. Requires senior or graduate standing in Civil Engineering or Construction Management and familiarity with reinforced concrete design/construction. Prerequisite: either CEE 291 or AutoCAD experience; a minimum grade of 2.5 in either CEE 428 or CEE 452. Offered: Sp.

[View course details in MyPlan: CEE 425](#)

CEE 428 Lightweight Cementitious Composites ([0-2]-, max. 2) *Janssen*

Introduces the process of designing within constraints and introductory experimental design. Covers the importance of proper laboratory documentation. Examines the characteristics of cementitious binders and elementary composite behavior. Considers constructability. Interprets pre- and post-cracking elastic behavior. Includes organization and production of technical report the documents work performed. Offered: A.

[View course details in MyPlan: CEE 428](#)

CEE 429 Sustainability in Building Infrastructure (3)

Provides an overview of how to plan, design, construct, and manage high performance building infrastructures. Topics include integrated project delivery, green building rating systems, green building design codes and energy standards, measurement and verification of building performance, and retrofitting existing building through building energy audit. Prerequisite: CEE 307. Offered: A.

[View course details in MyPlan: CEE 429](#)

CEE 431 Seismology and Earthquake Engineering (3) *NW*

Presents an overview of earthquake processes and details of the characteristics of destructive ground motion; illustrates the effects of such motion on engineering structures; reviews current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either ESS 310, MATH 126, MATH 134, or both MATH 307 and MATH 308. Offered: jointly with ESS 465.

[View course details in MyPlan: CEE 431](#)

CEE 436 Foundation Design (3)

Design considerations for foundations and retaining structures. Subsurface investigations and determination of soil properties for design. Design of shallow and deep foundations and retaining structures. Foundations and soil considerations for waterfront structures. Prerequisite: CEE 367. Offered: AW.

[View course details in MyPlan: CEE 436](#)

CEE 437 Engineering Geology I (3)

General overview of engineering geology and its importance to civil engineers. Topics include geologic processes, hazards, subsurface investigations, classification of geologic materials, data synthesis, and natural construction materials.

[View course details in MyPlan: CEE 437](#)

CEE 440 Professional Practice Studio (2)

Fundamentals of integrated civil engineering design, professional services marketing, project management, team dynamics, total quality management, value engineering, professional liability, and applied ethics in engineering practice. Emphasis on written and oral communications and on ethical, social, and economic factors. Offered: W.

[View course details in MyPlan: CEE 440](#)

CEE 441 Transportation and Construction Capstone Design Project (5)

Comprehensive design project focusing on planning, design, and construction of a transportation project such as highways, transit, and airports. Prerequisite: CEE 327; CEE 440; either CEE 404, CEE 410, CEE 412, CEE 416, CEE 421, CEE 424, or CEE 425. Offered: Sp.

[View course details in MyPlan: CEE 441](#)

CEE 442 Structural Geotechnical Capstone Design Project (5)

Comprehensive team design project focusing on structural and geotechnical engineering. Requires design drawings, written reports, and oral presentations interfacing with related fields such as aesthetics and architecture, mechanical systems, traffic, environmental planning. Prerequisite: CEE 440; either CEE 451 or CEE 452; one additional course from CEE 436, CEE 451, CEE 452, CEE 453, CEE 454, CEE 456, or CEE 457. Offered: Sp.

[View course details in MyPlan: CEE 442](#)

CEE 444 Water Resources and Hydraulic Engineering Capstone Design Project (5)

Opportunity to effect design solutions for projects or major project components in such representative areas as reservoirs and associated systems for flood control, water supply, irrigation, and hydroelectric power, surface water control systems, fisheries related projects, small harbors, and coastal engineering problems. Prerequisite: either CEE 345 or CEE 347; CEE 440; either CEE 475, CEE 476, CEE 482, CEE 483, or CEE 484. Offered: Sp.

[View course details in MyPlan: CEE 444](#)

CEE 445 Environmental Engineering Capstone Design Project (5)

Individual and group design studies addressing environmental engineering problems such as stormwater management, water and wastewater treatment facilities, and residual processing. Prepare proposals, engineering reports, and alternative evaluations; process equipment design, present reports on selected design problems. Prerequisite: either CEE 345 or CEE 347; CEE 440; either CEE 473, CEE 475, CEE 476, CEE 481, CEE 482, CEE 483, or CEE 484. Offered: Sp.

[View course details in MyPlan: CEE 445](#)

CEE 451 Design of Metal Structures (3) *J. BERMAN, C. ROEDER*

Introduction to the design and behavior of metal structures using LRFD concepts. Application of design methods and codes to columns, beams, frames, connections, and tension members. Prerequisite: CEE 377. Offered: A.

[View course details in MyPlan: CEE 451](#)

CEE 452 Design of Reinforced Concrete Structures (3) *D. LEHMAN, D. REED, J. STANTON*

Fundamentals of design of buildings in reinforced concrete in accordance with current codes and practices. Prerequisite: CEE 377. Offered: AS.

[View course details in MyPlan: CEE 452](#)

CEE 453 Prestressed Concrete Design (3)

Analysis, design, and construction of prestressed concrete structures. Prerequisite: CEE 452. Instructors:

Eberhard, Stanton Offered: W.

[View course details in MyPlan: CEE 453](#)

CEE 454 Design of Timber Structures (3)

Includes the design and construction of timber structures, using elements made of sawn wood, glued-laminated wood, and manufactured wood products. Prerequisite: CEE 377. Instructors: Berman, Reed Offered: W.

[View course details in MyPlan: CEE 454](#)

CEE 455 Structural Unit Masonry (3)

Structural behavior and design of reinforced brick, tile, and unit concrete masonry structures. Prerequisite: CEE 377. Instructors: Tawresey Offered: jointly with ARCH 426.

[View course details in MyPlan: CEE 455](#)

CEE 456 Structural Analysis (5)

Fundamental analysis and modeling of civil structural systems. Equilibrium, kinematics, and constitutive relations; formal solution procedures emphasizing element-based stiffness methods; computer-based and manual techniques; verification and interpretation of results; case studies involving real structures; introduction to finite element analysis of 2D continua. Prerequisite: CEE 377. Instructors: Berman, Eberhard, Lowes Offered: Sp.

[View course details in MyPlan: CEE 456](#)

CEE 457 Advanced Structures I (3) L. LOWES

Introduction to the finite element method for modeling civil structures. Formulation of line and continuum elements using virtual work and the principal of minimum potential energy. MATLAB programming of the finite element method. Use of commercial software to model real structures. Prerequisite: CEE 456. Offered: W.

[View course details in MyPlan: CEE 457](#)

CEE 458 Advanced Structures II (3)

Introduction to stability, including a consideration of elastic and inelastic buckling with applications to beam-columns and plates. Introduction to plastic analysis. Prerequisite: CEE 456. Instructors: Miller, Stanton

[View course details in MyPlan: CEE 458](#)

CEE 459 Advanced Structural Mechanics (3)

Formulation and solution of the basic equations of elasticity. Applications in 2-D stress analysis, torsion, thermal stresses, and beams on elastic foundation. Plate theory optional. Prerequisite: CEE 377.

[View course details in MyPlan: CEE 459](#)

CEE 462 Applied Limnology and Pollutant Effects on Freshwater (3) NW

Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication; acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals. Offered: W.

[View course details in MyPlan: CEE 462](#)

CEE 463 Limnology Laboratory (2) NW

Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/FISH 473/CEE 462, which may be taken concurrently. Offered: jointly with BIOL 474/FISH 474; A.

[View course details in MyPlan: CEE 463](#)

CEE 472 Introduction to Hydraulics in Water Resources (3)

Hydraulics related to environmental issues. Global hydrology; stratified flows; two-phase (bubble) flows; pollutant transport and mixing in reservoirs, lakes, coastal waters, and oceans; diffuser design and related case studies. Prerequisite: CEE 347.

[View course details in MyPlan: CEE 472](#)

CEE 473 Coastal Engineering I (3)

Linear theory of water waves, wave transformations near shore, sediment motion, and elementary tidal theory; shoreline protection methods; and applications illustrated by selected case histories. Prerequisite: CEE 347.

Instructors: Thomson

[View course details in MyPlan: CEE 473](#)

CEE 474 Hydraulics of Sediment Transport (3) A. HORNER-DEVINE

Introduction to sediment transport in steady flows with emphasis on physical principles governing the motion of sediment particles. Topics include sediment characteristics, initiation of particle motion, particle suspension, bedforms, streambed roughness analysis, sediment discharge formulae, and modeling of scour and deposition in rivers and channels. Prerequisite: CEE 347. Offered: Sp.

[View course details in MyPlan: CEE 474](#)

CEE 475 Analysis Techniques for Groundwater Flow (3) R. NEUMANN

Presents the fundamentals of subsurface flow and transport, emphasizing the role of groundwater in hydrologic cycle, the relation of groundwater flow to geologic structure, and the management of contaminated groundwater. Concepts are applied to well-known hydrogeologic sites. Prerequisite: CEE 347. Offered: W.

[View course details in MyPlan: CEE 475](#)

CEE 476 Physical Hydrology (3)

Global water picture, data sources and data homogeneity, precipitation and streamflow hydrography analysis; calculation of surface runoff, evapotranspiration, and groundwater recharge. Hydrologic data frequency analysis and probability theory. Hydrologic design: flood mitigation, drainage. Introduction to deterministic and stochastic models. Prerequisite: CEE 347. Instructors: Istanbuluoglu Offered: A.

[View course details in MyPlan: CEE 476](#)

CEE 477 Open-Channel Flow (3)

Water flow in natural and engineered channels, rivers, and streams. Analysis and design of channels (lined, vegetated), flow controls (weirs, spillways), and structures affecting fish passage (culverts). Prediction of water surface profiles. Introduction to river mechanics. Design-oriented problems. Prerequisite: CEE 347. Instructors: Jessup. Offered: W.

[View course details in MyPlan: CEE 477](#)

CEE 480 Air-Quality Modeling (3) NW

Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Emphasis on models used for air pollution permits. Emphasizes current problems. Prerequisite: MATH 125. Offered: jointly with ATM S 480; W.

[View course details in MyPlan: CEE 480](#)

CEE 481 Hydraulic Design for Environmental Engineering (3) E. ISTANBULLUOGLU

Introduction to the theory and the practice of planning and design of urban water supply distribution, pump stations, sewage and storm-water collection systems, and green stormwater infrastructure. Engineering methods and computer programs are applied for designing basic system elements. Prerequisite: CEE 347; CEE 357. Offered: W.

[View course details in MyPlan: CEE 481](#)

CEE 482 Wastewater Reuse and Resource Recovery (3)

Introduces wastewater treatment and systems, emphasizing fundamental biological, chemical, and physical processes related to protection of public health environmental quality and water reuse. Process analysis of the configuration and sizing of major types of treatment processes for various sizes of plants and effluent requirements. Prerequisite: CEE 357. Offered: A.

[View course details in MyPlan: CEE 482](#)

CEE 483 Drinking Water Treatment (3)

Studies scientific, engineering, and regulatory principles underlying drinking water treatment; development of

conceptual models for how and why treatment processes work and mathematical models describing their performance under various design and operating scenarios; field trips to water treatment systems. Prerequisite: CEE 357. Offered: A.

[View course details in MyPlan: CEE 483](#)

CEE 484 Decentralized and On-Site Wastewater Management and Reuse (3)

Design and performance of on-site and decentralized wastewater treatment. Determination of appropriate alternatives based on endpoints of water reuse, economics, policy, management, water quality, and ecological considerations. Meeting sanitation and water reuse for situations including, individual homes, rural areas, developing countries, and high density urban dwellings. Prerequisite: CEE 357.

[View course details in MyPlan: CEE 484](#)

CEE 487 Solid-Waste Disposal (3)

Describes sources and handling of municipal and industrial solid waste, with examination of collection, processing, recycling and resource recovery, and disposal alternatives. Public policy issues, local agencies and solid waste facilities, the legal and regulatory framework are all addressed in context of solid waste engineering.

[View course details in MyPlan: CEE 487](#)

CEE 488 Hazardous Waste Engineering (3)

Classification of hazardous wastes; resource conservation, Recovery Act regulations; characteristics and behavior of toxic organics; superfund; groundwater contamination, solutions. Hazardous waste site remedial action; case histories; sampling; landfill design. Stabilization and processing technologies, including incineration, carbon adsorption, emerging techniques. Prerequisite: CEE 357. Offered: Sp.

[View course details in MyPlan: CEE 488](#)

CEE 489 Water and Air Quality Sampling (2)

Samples collected from lakes, streams, precipitation, and air. Resulting (and supplemental) data interpreted for cause-effect and statistical inference. Design for water and air quality monitoring programs. Prerequisite: CEE 462.

[View course details in MyPlan: CEE 489](#)

CEE 490 Air-Pollution Control (4)

Fundamental concepts of air pollution Control including emission sources, atmospheric dispersion, ambient concentrations, and emission standards, with emphasis on processes and equipment for controlling emissions. Offered: jointly with ENV H 461; ASp.

[View course details in MyPlan: CEE 490](#)

CEE 491 Deterministic Systems (3)

Development of quantitative methods for mathematical problem solving with emphasis on computer applications. Linear programming, mathematics of the simplex algorithm, sensitivity analysis, dynamic programming, systems simulation, and goal programming. Class project required. Offered: A.

[View course details in MyPlan: CEE 491](#)

CEE 492 Stochastic Systems (3)

Introduction to probability distributions and statistics useful in systems analysis, conditional distributions, queuing theory and applications, Monte Carlo simulation, chance-constrained mathematical programming, and stochastic dynamic programming. Emphasis on application of the techniques to civil engineering systems problems, including transportation, water resources, and structures. Prerequisite: CEE 491.

[View course details in MyPlan: CEE 492](#)

CEE 493 Air-Pollution Source Testing and Equipment Evaluation (3)

Engineering evaluation of air pollutant sources and air control equipment. Fundamentals of source testing and stack sampling, including laboratory exercises.

[View course details in MyPlan: CEE 493](#)

CEE 494 Air-Pollution Control Equipment Design (3)

Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CHEM E 468/M E 468.

[View course details in MyPlan: CEE 494](#)

CEE 495 Sustainability and Design for Environment (3) *Cooper*

Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVIR 415/M E 415.

[View course details in MyPlan: CEE 495](#)

CEE 496 Fate and Transport of Chemicals in the Environment (3) *Neumann*

Presents a general introduction to the fundamental physical, chemical, and biological processes governing the movement and fate of chemicals in surface water and groundwater. Provides basic literacy in environment transport and fate processes, creating a solid foundation for accessing and synthesizing material on these topics. Offered: A.

[View course details in MyPlan: CEE 496](#)

CEE 497 Engineering Jordan: Water in an Arid Land Study Abroad (5) *Gough*

Examines impacts of a hot dry climate on water engineering systems by studying the engineered water cycle in Jordan including: water cycles and sources in Jordan; drinking water treatment and desalination; wastewater treatment and reuse; decentralized and on-site treatment; and ancient water engineering.

[View course details in MyPlan: CEE 497](#)

CEE 498 Special Topics (1-5, max. 12)

Special topics in civil engineering offered as course with lecture or laboratory.

[View course details in MyPlan: CEE 498](#)

CEE 499 Independent Study/Research (1-5, max. 12)

Individual undergraduate research project.

[View course details in MyPlan: CEE 499](#)

CEE 500 Civil and Environmental Engineering Seminars (1, max. 3)

Prerequisite: graduate standing in Civil and Environmental Engineering. Credit/no-credit only.

[View course details in MyPlan: CEE 500](#)

CEE 501 Structural Mechanics (6) *Mackenzie, Miller*

Equations of a continuum for small displacements, applications to linear elasticity. Kirchoff plate theory, problems in advanced strength of materials. Virtual work, minimum potential energy, force and displacement methods of structural analysis. Direct stiffness method. Approximate solutions, geometric stiffness matrix. Linearized buckling. Offered: A.

[View course details in MyPlan: CEE 501](#)

CEE 502 Structural Dynamics (3)

Lagrange's equations. Free vibrations of linear, single, and multiple degree of freedom systems. Damping. Mode superposition. Forced vibrations by time history and by response spectrum methods. Free and forced vibrations of continuous systems. Wave propagation in rods and beams. Prerequisite: CEE 501. Instructors: Eberhard, Stanton Offered: W.

[View course details in MyPlan: CEE 502](#)

CEE 503 Materials Modeling (3)

Behavior of materials used in civil engineering structures. Yield and failure surfaces. Physical and

phenomenological models of plastic and viscoelastic behavior. Fracture mechanics. Fatigue models and¹⁵³⁹ predictions. Damping and friction. Behavior of anisotropic and composite materials. Offered: S.

[View course details in MyPlan: CEE 503](#)

CEE 504 Finite Element Methods in Structural Mechanics (3)

Extension of the matrix methods of structural analysis to the solution of elasticity, plate, and shell problems by use of finite element approximations. Discussion of convergence and bounding and extension to investigation of stability and finite deformations. Prerequisite: CEE 501 or permission of instructor. Instructors: Mackenzie, Lowes, Miller Offered: W.

[View course details in MyPlan: CEE 504](#)

CEE 505 Engineering Computing (3) *Lowes, Mackenzie, Miller*

Applied computing in civil and environmental engineering contexts, including physical systems modeling, graphics and visualization, and data management. Program development using contemporary tools and strategies. Computer architecture fundamentals, theoretical and practical issues affecting memory use and performance. Offered: A.

[View course details in MyPlan: CEE 505](#)

CEE 506 Nonlinear Analysis of Structural Systems (3)

Formulation, solution, and interpretation of nonlinear numerical models of structural systems. Material and geometric nonlinearities for truss, beam, and frame systems. Resultant-based material laws. Large deformations. Solutions procedures, arc-length methods. Introduction to parameter identification. Prerequisite: CEE 501. Instructors: Lowes, Miller, Mackenzie Offered: Sp.

[View course details in MyPlan: CEE 506](#)

CEE 507 Structural Stability (3) *M. MOTLEY, R. WIEBE*

Covers concepts and fundamental principles of mechanics of equilibrium states and their stability properties; analysis of the stability and critical loads of columns; beams, and frames with various boundary conditions and loads; application of design formulas; and approximate method to calculate elastic and inelastic buckling loads. Prerequisite: CEE 501. Offered: W.

[View course details in MyPlan: CEE 507](#)

CEE 509 Engineering Rome: Study Abroad (5) *Muench*

Covers Roman civil engineering over 3,000 years from Ancient Rome to the present day. Introduces civil engineering topics reinforced by practical engineering calculations, local experts, and site visits. Provides international and historical perspective on engineering and the contributions of engineers to infrastructure and society.

[View course details in MyPlan: CEE 509](#)

CEE 511 Advanced Reinforced Concrete (3)

Behavior and design of reinforced concrete members and structures. Members subject to torsion and torsion combined with flexure and shear; members with small shear span/depth ratios, slabs. Prerequisite: CEE 452 or equivalent. Instructors: Eberhard, Stanton Offered: A.

[View course details in MyPlan: CEE 511](#)

CEE 512 Advanced Structural Systems (3)

Examines structural design of floor systems for buildings, including one-way and two-way slabs, strip method, yield line theory, prestressed concrete slabs. Lateral load resisting systems for buildings. Prerequisite: CEE 453; CEE 502. Instructors: Eberhard, Stanton Offered: Sp.

[View course details in MyPlan: CEE 512](#)

CEE 513 Advanced Steel I (3)

Factors influencing strength and serviceability of steel structures; LRFD limit state design procedures. Use of theories of plasticity and stability in development of design methods and specifications, bolted and welded connections, temperature effects, and affect of different fabrication methods on behavior of structure.

Prerequisite: CEE 501. Instructors: Berman, Roeder Offered: W.

[View course details in MyPlan: CEE 513](#)

CEE 515 Earthquake Engineering I (3)

Earthquake mechanism and ground shaking, response spectra, linear elastic methods for prediction of behavior, displacement prediction methods for inelastically behaving structures, modeling and solution schemes, earthquake design philosophy, capacity design. Reinforced concrete, steel, and base-isolated structures.

Prerequisite: CEE 501, CEE 502. Instructors: Roeder Offered: Sp.

[View course details in MyPlan: CEE 515](#)

CEE 516 Earthquake Engineering II (3)

Performance-based design, development of fragility curves, characteristics and effects of ground-shaking records, design methods, passive and active control, dynamic inelastic time history analysis, design of parts, system detailing, soil-structure interaction, repair and retrofit of structures. Prerequisite: CEE 515. Instructors: Roeder Offered: A.

[View course details in MyPlan: CEE 516](#)

CEE 517 Wind Engineering Design (3) *Reed*

Wind effects on structures, including atmospheric boundary layer flow; bluff body aerodynamics; structural dynamics and aeroelasticity; development and use of the ASCE Standards; estimation of along-wind, across-wind, and torsional response of tall buildings; design strategies for avoiding wind-induced discomfort.

Fundamentals of wind tunnel testing. Offered: A.

[View course details in MyPlan: CEE 517](#)

CEE 518 Reliability and Design (3) *Reed*

Introduction to theory of structural reliability and its application to design procedures in civil engineering, including probability theory; assessment of uncertainties; code specification and the related concept of risk and the influence of socioeconomic factors; loads, load combinations, and probabilities of damage. Offered: AS.

[View course details in MyPlan: CEE 518](#)

CEE 521 Seepage and Consolidation (3)

Confined and unconfined seepage through porous media, flow net solutions, consolidation, settlement, numerical solution of seepage, and consolidation problems. Prerequisite: CEE 367 or equivalent.

[View course details in MyPlan: CEE 521](#)

CEE 522 Shear Strength and Slope Stability (3)

Shear strength of cohesive and granular soils and slope stability analysis of natural and man-made slopes.

Prerequisite: CEE 367 or equivalent.

[View course details in MyPlan: CEE 522](#)

CEE 523 Advanced Foundation Engineering (3)

Design of shallow and deep foundations for bearing capacity and settlement. Construction considerations.

Prerequisite: CEE 522 and CEE 527.

[View course details in MyPlan: CEE 523](#)

CEE 524 Lateral Earth Pressures and Retaining Structures (3)

Lateral earth pressure theory. Design of temporary and permanent retaining structures including in situ reinforcement. Prerequisite: CEE 523; CEE 527.

[View course details in MyPlan: CEE 524](#)

CEE 525 Soil Dynamics (3)

Dynamics of discrete systems; dynamics of continuous systems, wave propagation; dynamic soil properties; linear, nonlinear, and equivalent linear ground response analysis; vibrations of footings; construction vibrations; vibration isolation.

[View course details in MyPlan: CEE 525](#)

CEE 526 Geotechnical Earthquake Engineering (3)

Plate tectonics and elastic rebound theory of earthquakes and faults; characterization of ground motions; seismicity; seismic risk analysis; effect of local soil conditions on ground response; development of design ground motions; liquefaction; dynamic lateral earth pressures; seismic slope stability. Prerequisite: CEE 525 or permission of instructor.

[View course details in MyPlan: CEE 526](#)

CEE 527 Advanced Geotechnical Laboratory (4)

Soil and site investigation, classification and engineering properties of soils and rock as determined by standard and advanced test procedures and equipment. Evaluation of test data. Report writing. Prerequisite: CEE 367 or equivalent. Offered: A.

[View course details in MyPlan: CEE 527](#)

CEE 528 Geosynthetic Engineering (3)

Identification and testing of geosynthetics. Design of geosynthetic filters, roadway stabilization, earth reinforcement, and waste containment systems. Prerequisite: CEE 522 and CEE 523.

[View course details in MyPlan: CEE 528](#)

CEE 529 Foundation Soil Improvement (3)

Analysis and design of physical and chemical treatment techniques commonly applied to problem foundation soils for civil engineering structure. Prerequisite: CEE 523.

[View course details in MyPlan: CEE 529](#)

CEE 530 Engineering Geology II (3)

Application of engineering geology fundamentals to: location, design, and maintenance of engineered structures; policy decisions related to potential geological hazards. Case histories, governmental policy discussions, interpretation of geological maps for engineering purposes. Prerequisite: CEE 437 or permission of instructor.

[View course details in MyPlan: CEE 530](#)

CEE 531 Rock Engineering (3)

Engineering classification, physical and mechanical properties of rocks, failure modes and initial stresses in rocks, laboratory and field testing of rocks, rock slope engineering, underground openings, foundations on rocks. Prerequisite: CEE 437 or permission of instructor.

[View course details in MyPlan: CEE 531](#)

CEE 540 Microbiological Process Fundamentals (3)

Fundamental concepts for microbial processes including organic chemical structure, nomenclature and environmental properties, principles of microbial metabolism, study of specific types of bacteria important to environmental engineering and their metabolism, development of microbial kinetic equations, including substrate utilization, energetics, and stoichiometry. Prerequisite: permission of instructor. Instructors: Stahl
Offered: A.

[View course details in MyPlan: CEE 540](#)

CEE 541 Biological Treatment Systems (3)

Basic reactions, design principles, current design models, and operational considerations for biological treatment systems used in environmental engineering. Applications include activated sludge design and optimization, fixed film reactors, nitrification, nitrogen removal, phosphorus removal, anaerobic treatment, biomethane production, resource recovery, and toxic organics removal. Prerequisite: either both CEE 540 and CEE 482 or equivalent. Offered: W.

[View course details in MyPlan: CEE 541](#)

CEE 543 Aquatic Chemistry (4)

Principles of chemical equilibrium applicable to natural water systems and water and waste treatment processes. Chemical thermodynamics. Characteristics of acid/base, gas/liquid, solid/liquid, and oxidation/reduction

equilibria. Computer models for chemical speciation. Offered: A.

[View course details in MyPlan: CEE 543](#)

CEE 544 Physical-Chemical Treatment Processes (4)

Principles and design of major physical-chemical unit processes used in water, wastewater, and hazardous waste treatment. Topics include chemical kinetics, reactor design and analysis, ion exchange, adsorption, and gas transfer. Development of mathematical models and evaluation of current design practice. Offered: W.

[View course details in MyPlan: CEE 544](#)

CEE 545 Environmental Organic Chemistry (3)

Covers characterization and modeling of properties and processes governing the distribution, fate, and transformation of organic pollutants in environmental systems. Explores linear free energy relationships and their application to examining the water/soil/air partitioning, bioaccumulation, substitution and redox reaction kinetics, and abiotic transformations of organic pollutants. Prerequisite: CEE 543 or permission of instructor. Offered: W.

[View course details in MyPlan: CEE 545](#)

CEE 546 Topics in Ecological Effects of Wastewater (3)

Application of ecological concepts for analysis and interpretation of bioenvironmental problems and data (eutrophication, acid rain, and toxicity). Students participate in presentation and discussion of current research. Prerequisite: CEE 462 or BIOL 473 or permission of instructor.

[View course details in MyPlan: CEE 546](#)

CEE 547 Lake and Watershed Management (3)

Application of current techniques for lake and watershed analysis and modeling using fundamentals of limnology. Approaches to restoring eutrophic lakes, land use impacts on water quality. Practical exercises using data from real lake systems. Prerequisite: CEE 462/FISH 434, BIOL 473, or permission of instructor. Offered: Sp.

[View course details in MyPlan: CEE 547](#)

CEE 549 Advanced Topics in Environmental Engineering, Chemistry, and Biology (3)

Special topics of current importance in environmental engineering. Application of fundamental chemical and biological principles to the study of such phenomena as the behavior of aqueous colloids, corrosion processes, and bacterial metabolism in chemically complex solutions. Prerequisite: CEE 540, CEE 541. Offered: Sp.

[View course details in MyPlan: CEE 549](#)

CEE 550 Environmental Chemical Modeling (3)

Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications focus on groundwater systems. Prerequisite: CEE 551. Offered: Sp.

[View course details in MyPlan: CEE 550](#)

CEE 551 Fate and Transport of Chemicals in the Environment (3) *Neumann*

Presents a general introduction to the fundamental physical, chemical, and biological processes governing the movement and fate of chemicals in surface water and groundwater. Provides basic literacy in environment transport and fate processes, creating a solid foundation for accessing and synthesizing material on these topics. Offered: A.

[View course details in MyPlan: CEE 551](#)

CEE 552 Environmental Regulations (3) I&S

Principal emphasis on regulations pertaining to construction site stormwater runoff, including regulatory background and requirements, how to analyze potential site problems and prepare plans to solve them, and specifying practices to avoid or reduce water pollutant releases. Briefer coverage of regulations concerning air pollutions, wetlands, hazardous wastes, and endangered species.

[View course details in MyPlan: CEE 552](#)

CEE 553 Seminar - Topics in Atmospheric Chemistry (1-3, max. 6)

Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with ATM S 525.

[View course details in MyPlan: CEE 553](#)

CEE 554 Acoustics of Environmental Noise (4)

Offered: jointly with M E 528.

[View course details in MyPlan: CEE 554](#)

CEE 555 Topics in Environmental Health (3)

Introduction to human biology, including physiology, epidemiology, and toxicology. Study of contemporary environmental health problems and practices as they relate to radiological health, solid-waste disposal, occupational health, biometeorology, and bioengineering.

[View course details in MyPlan: CEE 555](#)

CEE 557 Air Resources Management (3)

Technical, administrative, and legal aspects of air conservation. Topics include urban and regional scale air quality measurement and modeling systems, receptor modeling based on chemical fingerprinting of sources and current case studies involving engineering analysis, air-quality modeling, and regulatory aspects at local, state, and federal governmental levels. Offered: A.

[View course details in MyPlan: CEE 557](#)

CEE 560 Risk Assessment for Environmental Health Hazards (3/4)

Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with ENV H 577/PUBPOL 589; A.

[View course details in MyPlan: CEE 560](#)

CEE 561 Transportation Planning and Design (5) *Avery*

Provides an overview of transportation planning and how sustainability fits into this field. Topics include institutional frameworks, legal/legislative issues, land use, capacity analysis, supply management and Intelligent Transportation Systems (ITS). Covers tasks/tools of transportation planning at the site, city, region, and state levels. Offered: A.

[View course details in MyPlan: CEE 561](#)

CEE 562 Livable Communities and Design (4) *Bassok*

Explores the positives and negatives affecting livability. Covers sprawl and compact cities, energy issues and environmental quality, transit-oriented and traditional neighborhood development, and mixed-use and mixed income developments. Includes context-sensitive solutions to transportation projects. Offered: A.

[View course details in MyPlan: CEE 562](#)

CEE 563 Transportation Choices and Technology (4) *Rutherford*

Explores the range of sustainable transportation choices for both people and goods. Studies passenger modes of transportation including bicycles, single-occupancy vehicles, care and van pools, shared autos, bus, rail, ferries, trolleys, and foot travel in the context of sustainability. Offered: A.

[View course details in MyPlan: CEE 563](#)

CEE 564 Sustainable Transportation from a Systems Perspective (5) *McCormack*

Covers tools to evaluate and develop sustainable transportation systems. Emphasizes design approaches that support sustainable transportation, methods to evaluate the full life cycle impacts of transportation systems, and tools to assess transportation networks as resilient systems. Offered: A.

[View course details in MyPlan: CEE 564](#)

CEE 565 Climate Change and Energy (5) *Larson, Mahoney*

Covers the nature of global climate systems, global warming, ozone depletion, and human influences. Introduces tools to evaluate current and alternative energy production and conversion options for transportation. Explores the nexus between transportation and energy in the context of climate change adaptation and mitigation.

Offered: W.

[View course details in MyPlan: CEE 565](#)

CEE 566 Environmental Analysis and Assessment (5) *Watkins*

Reviews statistical methods necessary to analyze environmental issues. Uses environmental data to demonstrate how significant impacts are measured and reported. Discusses transportation data sources, sustainable transportation indicators, and related statistical analysis. Includes travel demand forecasting and a review of engineering economy. Offered: Sp.

[View course details in MyPlan: CEE 566](#)

CEE 567 Health and Sustainable Transportation (5) *Rowangould*

Examines how transportation policy is driven by human health impacts. Highlights water and air impacts on health along with the health benefit of human powered transportation. Presents legal and regulatory issues. Case studies provide examples of application of these principles to real world transportation issues. Offered: A.

[View course details in MyPlan: CEE 567](#)

CEE 568 Transportation Economics (5) *Niemeier*

Economics applied to transportation planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; and the effect of uncertainty. Presents the effect of tolls, parking pricing, transit subsidies, and other pricing and incentive policies. Offered: W.

[View course details in MyPlan: CEE 568](#)

CEE 569 Policy Development, Finance, and Sustainable Transportation (5) *Rutherford*

Covers the development and implementation of transportation policies to support sustainable transportation systems. Reviews regulations and finance opportunities at the local, state, and federal level highlighting those that promote sustainable transportation. Offered: Sp.

[View course details in MyPlan: CEE 569](#)

CEE 570 Hydrodynamics (4) *A. HORNER-DEVINE*

Applications of the equations of motion to ideal and real fluid flow, with topics in Environmental Fluid Mechanics. Kinematics, Navier-Stokes equations, viscous flows, Coriolis, density driven flows, free surface flows, and introduction to turbulence. Applications include: tidal flushing, lakes, estuaries, gravity currents and river plumes. Prerequisite: CEE 357 or equivalent. Offered: Sp.

[View course details in MyPlan: CEE 570](#)

CEE 571 Hydrodynamics in Water Quality (3)

Theoretical, field study, and laboratory model approaches to diffusion in transport problems of concern to water resources engineers. Prerequisite: CEE 342 or permission of instructor.

[View course details in MyPlan: CEE 571](#)

CEE 572 Water Wave Mechanics for Coastal Engineers (4) *J. THOMSON*

Covers theory and numerical modeling of water waves; classical water wave problem and approximate solution techniques; evolution equations and their solutions for wave systems; viscous damping effects and mass transport; nonlinear shallow-water waves and the Korteweg-deVries equation; and waves on beaches and structures. Prerequisite: CEE 347. Offered: Sp, even years.

[View course details in MyPlan: CEE 572](#)

CEE 573 Snow Hydrology (3) *Lundquist*

Introduces snow hydrology research, emphasizing current research methods and results in both measurements and modeling. Explores the impact of snow on hydrology and water resources. Offered: W.

[View course details in MyPlan: CEE 573](#)

CEE 574 Advanced Hydrology (3) *E. ISTANBULLUOGLU*

Detailed treatment of statistical methods used in hydrology: trend analysis, hypothesis testing, flood frequency, and elements of stochastic hydrology and data generation. Detailed examination of hydrologic models with emphasis on evapotranspiration and water budget, use of a watershed model (e.g., Stanford Watershed Model) in catchment. Offered: Sp.

[View course details in MyPlan: CEE 574](#)

CEE 576 Water Resources Planning (3)

Engineering, social, and economic factors involved in water resource development and management; water policies, programs, and administration; use relationships and conflicts; considerations for regional water resource systems.

[View course details in MyPlan: CEE 576](#)

CEE 577 Water-Quality Management (3)

Application of biological, ecological, and chemical processes to modeling of water quality and use of such models in appropriate management of water resource systems. Includes units on the modeling of temperature, BOD, nutrient, phytoplankton, zooplankton, and other processes in lakes, streams, and estuaries. Offered: Sp.

[View course details in MyPlan: CEE 577](#)

CEE 578 Water Resource System Management and Operations (3)

Readings in recent literature related to the modeling and management of water resources. Topics include drought management, expansion of existing water supplies, hydropower production, streamflow forecasting, water demand forecasting, regional water planning, climate change, and other topical issues. Offered: Sp.

[View course details in MyPlan: CEE 578](#)

CEE 579 Advanced Traffic Detection Systems (3) *Wang*

Introduction to advanced tracking and detection technologies in transportation engineering, including Global Positioning Systems (GPS), inductance loop detection systems, remote traffic microwave radar, computer-vision based technologies, and other emerging detection technologies with cutting-edge research in these areas.

[View course details in MyPlan: CEE 579](#)

CEE 580 Urban Transportation Planning (4) *Rutherford*

Introduction to transportation planning, including trends and issues, land use and transportation interaction, surveys, public involvement, demand management, technology, forecasting, impacts, and policy strategies. Offered: A.

[View course details in MyPlan: CEE 580](#)

CEE 581 Travel Demand Forecasting (4)

Application of mathematical models to forecast urban travel behavior. Introduces emerging methods, land use models, travel demand models, including trip generation, trip distribution, mode choice, and network assignment. Discusses validation and ethics. Offered: A.

[View course details in MyPlan: CEE 581](#)

CEE 582 Intelligent Transportation Systems (3)

Application of modern computer and communication technologies to transportation systems. Benefits to public agencies, commercial companies, and travelers. Coordination between private and public sectors. Intelligent Transportation System's (ITS) social, organizational, and operational changes. Offered: A.

[View course details in MyPlan: CEE 582](#)

CEE 583 Transportation Energy and Sustainability (3) *D. MACKENZIE*

Addresses technical and policy options for making transportation more sustainable, considering economic, environmental, and equity impacts. Topics include transportation demand management; vehicle technologies; alternative fuels; dynamics of technology change; and roles of state, federal, and international policy. Prepares students to think broadly, analyze systematically, and communicate effectively in this area. Offered: Sp.

[View course details in MyPlan: CEE 583](#)

CEE 584 Analytical Methods in Transportation I (3)

Application of analytical and statistical methods to issues in transportation and driving. Analysis of probability distributions that describe variables. Development of statistical models for predicting transportation phenomena. Elementary sampling theory hypothesis testing, regression analysis, time series analysis, applied to transportation data. Prerequisite: either IND E 315, MATH 390/STAT 390, or equivalent. Instructors: Boyle
Offered: jointly with IND E 546; W.

[View course details in MyPlan: CEE 584](#)

CEE 585 Analytical Methods in Transportation II (3)

Applications of advanced econometric methods to transportation issues. Topics include, but not limited to, systems of equations, duration models, limited dependent variable approaches, and count models. Hands-on modeling, with numerous data sets, available for application. Collaborative projects. Prerequisite: CEE 584 or permission of instructor.

[View course details in MyPlan: CEE 585](#)

CEE 586 Pedestrian Travel, Land Use, and Urban Form (3)

Seminar concentrating on walking as a mode of transportation in cities and city-regions, including social, cognitive, and perceptual dimensions of pedestrian movement and behavior theory. Offered: jointly with URBDP 576.

[View course details in MyPlan: CEE 586](#)

CEE 587 Global Trade, Transportation, and Logistics Management (4)

Provides an overview of trade, transportation, and logistics activities. Develops an understanding of the physical and information flows in supply chains, and the economic drivers of supply chain choices. Includes methods to analyze and improve logistics and transportation systems, including applications of policy, technology, and infrastructure. Offered: Sp.

[View course details in MyPlan: CEE 587](#)

CEE 588 Energy Infrastructure and the Environment (3) *Larson, Mahoney*

Focuses on energy infrastructure, including site selection, permitting, design, construction, and maintenance. Includes electrical production facilities as well as transmission, focusing on permitting and construction of renewable energy facilities. Covers renewable energy infrastructure, emphasizing wind, solar, and geothermal. Offered: A.

[View course details in MyPlan: CEE 588](#)

CEE 589 Transit Systems Planning (3)

Planning, operational methods for urban public transportation. Review of technological, operating characteristics of vehicles and systems; financing, management, institutional aspects. Paratransit. Short-range planning, operational strategies, revenue-fare structures. Service monitoring. Mode choice, transit demand relating to service. Computer-aided methods for planning, design of transit systems. Offered: Sp.

[View course details in MyPlan: CEE 589](#)

CEE 590 Traffic Systems Operations (3) *Goodchild, McCormack*

Operational planning, management of arterial and freeway traffic systems. Review of transportation system management strategies to achieve more efficient use of existing infrastructure, including improved and innovative traffic control systems and demand management policies, measures of effectiveness, impact assessment, traveler response. Introduction to use of relevant computer models and packages. Prerequisite: CEE 327. Offered: A.

[View course details in MyPlan: CEE 590](#)

CEE 591 Freight Transportation (3)

Overview of the technical and institutional aspects of transporting freight. Topics include the different modes of moving freight, the technology of transferring freight between modes at ports and terminals, issues that impact freight movement such as congestion and government regulation, and the future of freight mobility. Also covers

regional freight demand modeling techniques. Offered: A.

[View course details in MyPlan: CEE 591](#)

CEE 592 Statistical Fundamentals for Construction and Materials Applications (3) *S. MUENCH*

Overview of statistical measures used in various construction and materials decision-making processes. Subjects include data distributions, hypothesis tests (making decisions with statistics), regression analysis, sampling, quality control and assurance, and experimental design. Uses construction data to illustrate these measures.

Offered: Sp.

[View course details in MyPlan: CEE 592](#)

CEE 593 Construction Labor Law (3) *Goldblatt*

In-depth study of construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Examines importance of labor relations in construction firms, whether in a union setting or an open shop environment.

[View course details in MyPlan: CEE 593](#)

CEE 594 Computer-Aided Construction (3)

Application of information technology to construction management and cost estimating. Topics include, but not limited to, computerized construction, fundamentals of computer hardware, construction management software tools, web publishing, GPS application, and construction data management. Offered: S.

[View course details in MyPlan: CEE 594](#)

CEE 595 Construction Materials (3) *Mahoney*

Examines the use of aggregates, bituminous mixtures, Portland cement concrete, roller compacted concrete, soil and site stabilization, utility cuts, and flowable backfill in construction projects. Emphasis on behavior of materials in various construction applications. Offered: W.

[View course details in MyPlan: CEE 595](#)

CEE 596 Pavement Construction (3) *Muench*

Examines pavement construction, including pavement contracts and specifications, quality control and assurance programs, and plant and laydown operations. Reviews both national and international pavement construction practices. Offered: Sp.

[View course details in MyPlan: CEE 596](#)

CEE 598 Engineering Jordan: Water in an Arid Land Study Abroad (5) *Gough*

Examines impacts of a hot dry climate on water engineering systems by studying the engineered water cycle in Jordan including: water cycles and sources in Jordan; drinking water treatment and desalination; wastewater treatment and reuse; decentralized and on-site treatment; and ancient water engineering.

[View course details in MyPlan: CEE 598](#)

CEE 599 Special Topics in Civil and Environmental Engineering (1-5, max. 20)

Special topics in civil and environmental engineering offered occasionally by permanent or visiting faculty members.

[View course details in MyPlan: CEE 599](#)

CEE 600 Independent Study or Research ([1-5]-)

Topics covered depend on faculty and student interest. Prerequisite: permission of instructor.

[View course details in MyPlan: CEE 600](#)

CEE 601 Internship (2)

Internship in an established program between industry, government, and the University. Prerequisite: permission of Graduate Program Coordinator and committee chair.

[View course details in MyPlan: CEE 601](#)

CEE 700 Master's Thesis (*-)

Prerequisite: permission of adviser.

[View course details in MyPlan: CEE 700](#)

CEE 800 Doctoral Dissertation (*-)

Prerequisite: permission of adviser.

COLLEGE OF ENGINEERING CIVIL AND ENVIRONMENTAL ENGINEERING CONSTR,ENERGY,AND SUSTAINABLE INFRSTRCTR

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

CESI 501 Distributed Renewable Power Systems (3)

Electrical distributed renewable generation. The depth of coverage is suitable for civil engineers and their role as project managers. Topics covered include: (1) microgrids, (2) renewable generation fundamentals, (3) utility economics, and (4) energy planning and simulation. Prerequisite: Graduate Standing Offered: Sp.

[View course details in MyPlan: CESI 501](#)

CESI 502 Geomatics in Energy Infrastructure (3)

Overview of basic techniques for location measurements in energy construction projects using traditional surveying techniques, recently developed technologies for surface creation, and data management and analysis using GIS. Prerequisite: Graduate Standing Offered: A.

[View course details in MyPlan: CESI 502](#)

CESI 503 Operation of a Power Plant (3)

Explores power plant operations. Topics include plant operating principles, regulatory permitting, maintenance requirements, and plant design and upgrades. Prerequisite: Graduate Standing Offered: Sp.

[View course details in MyPlan: CESI 503](#)

CESI 504 Buildings, LEED, and Energy Use (3)

Overview on how to plan, design, construct and manage high performance building infrastructures. Topics include integrated project delivery, green building rating systems, building energy modeling, indoor environmental qualities, and green building economics. Prerequisite: Graduate Standing Offered: SpS.

[View course details in MyPlan: CESI 504](#)

CESI 505 Air Pollution Control and Occupational Safety and Health (3)

Overview on the fundamental air pollution issues involved in construction and operation of energy facilities and the management of large vehicle fleets. Topics include emission estimation, control technology assessment, ambient air impacts, and technology specific issues of worker safety and health. Prerequisite: Graduate Standing

Offered: WSp.

[View course details in MyPlan: CESI 505](#)

CESI 506 Management of Site Remediation, Hazardous Waste, and On-Site Treatment (3)

Covers the project management practices to ensure protection of human health and the environment when handling sites contaminated with hazardous waste generated by traditional and renewable energy sources. It includes identification of hazards, communication of risks and introduces alternatives for hazardous waste clean-up. Prerequisite: Graduate Standing Offered: Sp.

[View course details in MyPlan: CESI 506](#)

CESI 508 Accounting and Finance for Construction (3)

Introduction to construction oriented financial management. Explains why construction financial management is different than financial management in other industries. Describes how to account for a company's financial resources and how to build a company's accounting system. Prerequisite: Graduate Standing Offered: W.

[View course details in MyPlan: CESI 508](#)

CESI 510 Electric Grids (1)

Overview of utility design, operation and construction including an electrical grid's system components and functions. This includes generation, transmission, sub-transmission and distribution. These grid components will be explained as to how they are operated by a utility. Credit/no-credit only. Offered: A.

[View course details in MyPlan: CESI 510](#)

CESI 511 Grid Integration of Variable Sources of Generation (1)

Overview of the advantages and challenges associated with the integration of variable sources of generation into the electric grid and distribution systems. It will focus on weather-driven renewables such as wind, solar, and hydropower. Credit/no-credit only. Offered: W.

[View course details in MyPlan: CESI 511](#)

CESI 512 Regulating Electric Utilities (1)

Overview on how state utility commissions function including how they regulate utilities, influence permitting and participate in grid management and regional electric markets. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: CESI 512](#)

CESI 513 Operation and Maintenance of a Wind Farm (1)

Operation and maintenance associated with a wind and solar project owned and operated by a major utility in Washington State. Included is an overview of the project including construction aspects, how it is managed and the major maintenance issues. Credit/no-credit only. Offered: W.

[View course details in MyPlan: CESI 513](#)

CESI 514 Hydroelectric Project Relicensing (1)

Relicensing of a hydroelectric project in Washington State and includes an overview of the project and the issues faced by the owner in applying for an extension to its federal operating license. This includes the design and construction of a floating fish enhancement structure. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: CESI 514](#)

CESI 519 Trends and Applications in E-Construction (1)

Developments in eConstruction. The focus will be heavy construction such as bridges, pavements and energy infrastructure. Specific content will be on eConstruction inspector tools and related construction applications. Emphasis will be placed on the use of mobile multi-platform tools and devices. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: CESI 519](#)

CESI 520 Electricity Fundamentals (1)

Refresher for engineers as to the basics associated with electricity as it relates to power production and

distribution. Credit/no-credit only. Offered: A.

[View course details in MyPlan: CESI 520](#)

CESI 521 Introduction to AutoCAD and Bluebeam (1)

Introduction to engineering drafting and graphical communication. Includes application of drafting standards and structure as well as creating and modifying basic drawings in AutoCAD and Bluebeam software. It should only be taken by those without prior knowledge of this topic area. Credit/no-credit only. Offered: W.

[View course details in MyPlan: CESI 521](#)

CESI 522 Introduction to AutoTURN (1)

Focus on AutoTURN which is used to analyze road and site design projects including vertical and horizontal curves, intersections, haul roads and vehicle clearances and turning maneuvers. The software is commonly used in energy infrastructure design and construction activities. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: CESI 522](#)

CESI 524 Statistical Methods for Construction (1)

Overview of basic statistical measures used in construction and materials decision-making including data distributions, hypothesis testing, regression analysis, sampling and quality control/assurance. Credit/no-credit only. Offered: A.

Computer Science and Engineering

[Display as tabs](#)

Department Overview

AC101 Paul G. Allen Center for Computer Science and Engineering

UW Computer Science & Engineering (CSE) educates students to become leaders in the design and implementation of the computing systems that touch every aspect of modern society. CSE is widely recognized as one of the top programs in the world, with passionate faculty bringing the latest advances into the classroom and the lab.

CSE offers two undergraduate degrees: Computer Science (through the College of Arts & Sciences) and Computer Engineering (through the College of Engineering). While the degree requirements differ in some details, undergraduate majors working toward either degree have the same broad opportunities to take the wide array of courses that CSE offers. Many of our graduates go on to careers at the world's great technology companies, from the largest industry titans to the smallest start-ups. Others join innovative companies and non-profit organizations outside the traditional computing industry to use software, hardware, and data to solve the world's greatest challenges. Still others go on to challenging graduate programs in a variety of fields.

At the graduate level, CSE offers (1) an integrated Master's program for some of our undergraduate majors seeking a deeper education before leaving campus, (2) an evening Master's program for currently employed software professionals, and (3) a PhD program for students seeking a research career.

The field of computing is broad and growing, and CSE's course catalog reflects this breadth. Beyond the popular introductory programming courses taken by thousands of students from every major on campus, our courses cover everything from the mathematical foundations of what computers can and cannot do; to hands-on experiences building software and hardware artifacts with a range of programming languages and tools; to advanced courses in software engineering, human-computer interaction, computer graphics and animation, artificial intelligence, machine learning, large-scale data management, natural language processing, computer networking, computational biology, robotics, computer security and privacy, and much more.

Computers are the most flexible and powerful machines ever created. While the applications of computing continue to grow and change, the core magic of CSE is timeless: computer scientists and engineers combine creative problem-solving, rigorous design, and the creation of algorithms, software, and hardware systems to build solutions that change the world.

Undergraduate Program

Adviser

101 Paul G. Allen Center for Computer Science and Engineering, Box 352350
(206) 543-1695
ugrad-advisor@cs.washington.edu

The Department of Computer Science and Engineering offers the following programs of study:

- The Bachelor of Science in Computer Engineering degree
- The Bachelor of Science degree with a major in computer science (see [Computer Science](#) in the Arts and Sciences section of this catalog)

The core requirements of the two undergraduate majors are similar. The computer engineering major includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole. It may be more appropriate for students who are interested in building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints.

The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program, who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the design of software systems and applications.

Bachelor of Science in Computer Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CSE 142, CSE 143; English composition.

Department Admission Requirements

Applicants are considered in two groups: Direct Admission and Regular Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission.

1. *Direct Admission:* Computer Science and Engineering enrolls up to 30 percent of its incoming class directly out of high school, prior to completion of university-level prerequisites. Freshman applicants to the University listing Computer Science or Computer Engineering as their intended major are automatically considered. Competitive applicants have taken calculus and at least one year of laboratory science (preferably physics) upon entering the University. Admission is for autumn quarter only.
2. *Regular Admission*
 - a. Minimum 2.0 grade in each of the following courses: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121; CSE 142, CSE 143; and at least five credits of English composition.
 - b. Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.
 - c. Individual application prerequisites may be waived or substituted with departmental permission for matriculated students who have excelled in CSE

introductory courses. Information is available from the department adviser.

Graduation Requirements

180 credits as follows:

General Education Requirements (83 credits)

1. *Written and Oral Communication (12 credits)*: 5-credit course in English composition from the University-approved list; HCDE 231; 4 credits of UW approved writing (W) or additional UW approved composition (C) courses.
2. *Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (30 credits)*: Minimum 10 credits required in each area.
3. *Natural World (41 credits)*:
 - a. *Mathematics (15-18 credits)*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken)
 - b. *Science (20 credits)*: PHYS 121, PHYS 122, and 10 additional credits from the list of approved natural science courses in the CS&E handbook
 - c. *Mathematics or Science (3-6 credits)*: 3 to 6 additional credits of math/science (to bring total to 41) chosen from approved natural science courses in the CS&E handbook: STAT 390, STAT 391, STAT 394, MATH 307, MATH 309, MATH 334, MATH 335, AMATH 351, or AMATH 353 (STAT 391 recommended)

Major Requirements (72 credits)

1. *Required Courses (36 credits)*: CSE 142, CSE 143, CSE 311, CSE 312, CSE 332, CSE 351, CSE 369, CSE 371/E E 371, E E 215 or E E 205
2. *CSE Electives (36 credits)*:
 - a. One course chosen from: CSE 403, CSE 474/E E 474, or CSE 484
 - b. Three additional courses chosen from the computer engineering systems electives list in the online CSE handbook
 - c. Two additional courses chosen from the CSE core course list in the online CSE handbook
 - d. A design capstone course from the approved list in the CSE handbook.
 - e. 4 credits of College of Engineering courses from the CSE elective list
 - f. Additional (0-5 credits) CSE electives to bring total CSE electives to 36 credits
3. Minimum 2.0 grade for any course applied to the major, Natural World, or Written and Oral Communications requirements. Transfer students must earn a minimum of 24 graded credits toward the major through the UW.
4. Free Electives (20-25 credits, to bring total for the degree to 180)

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*

Engineering Quality: Graduates engage in the productive practice of computer engineering to identify and solve significant problems across a broad range of application areas.

Leadership: Graduates engage in successful careers in industry, academia, and public service, providing technical leadership for their business, profession, and community.

Economic Impact: Graduates enhance the economic well-being of Washington State through a combination of technical expertise, leadership, and entrepreneurship.

Lifelong Learning: Graduates adapt to new technologies, tools, and methodologies to remain at the leading edge of computer engineering practice with the ability to respond to the challenges of a changing environment.

The computer engineering undergraduate degree is housed in the College of Engineering and is thereby accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. The department has adopted the following student outcomes. Upon graduation from the computer engineering program, students have:

- a. An ability to apply knowledge of mathematics, science, and engineering
 - b. An ability to design and conduct experiments, as well as to analyze and interpret data
 - c. An ability to design a computing system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
 - d. An ability to function on multi-disciplinary teams
 - e. An ability to identify, formulate, and solve computer engineering problems
 - f. An understanding of professional and ethical responsibility
 - g. An ability to communicate effectively
 - h. The broad education necessary to understand the impact of computer engineering solutions in a global, economic, environmental, and societal context
 - i. A recognition of the need for, and an ability to engage in life-long learning
 - j. Knowledge of contemporary issues
 - k. An ability to use the techniques, skills, and modern computer engineering tools necessary for engineering practice.
- *Instructional and Research Facilities:* The department is housed in the state-of-the-art [Paul G. Allen Center for Computer Science and Engineering](http://www.washington.edu/students/gencat/academic/cse.html). The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

CSE general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. CSE special-purpose laboratories provide tailored support for activities such as mobile robotics, computer

graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center is one of the finest computer science and computer engineering facilities in the nation. All of its capabilities are available to all CSE students.

- *Honors Options Available:* With College Honors (Completion of Honors Core and Departmental Honors requirements). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships and co-op opportunities are available for computer science undergraduates. See www.engr.washington.edu/coop and careers.washington.edu for information.
- *Departmental Scholarships:* CSE has a limited number of scholarships available to current CSE majors. Scholarship information is listed at www.cs.washington.edu/education/ugradscholars/scholarships.html.
- *Student Organizations/Associations:* A student chapter of the Association for Computing Machinery (ACM) operates within CSE. The ACM helps to coordinate new student orientations, research nights, technical talks, and various tutorials.

Graduate Program

Graduate Program Coordinator

AC101 Paul G. Allen Center for Computer Science and Engineering, Box 352350
(206) 543-1695

grad-admissions@cs.washington.edu

The Department of Computer Science and Engineering offers programs of study leading to the degrees of Master of Science and Doctor of Philosophy. Students can pursue full-time graduate study leading to a PhD with an integrated MS. Students can also pursue part-time graduate study in the evening, leading to an MS. Moreover, current undergraduate computer science and computer engineering majors can apply to a full-time MS program integrated with the bachelor's degree. Programs are designed to provide considerable breadth of knowledge, as well as depth in an area of specialization.

CSE has a large faculty, with expertise across the range of modern computing topics and with considerable focus on several interdisciplinary topics. Topics in graduate-level courses and opportunities for independent research reflect this breadth.

Combined Bachelor of Science/Master of Science - 5th year Program

Admission Requirements

Open only to students currently enrolled as computer science or computer engineering majors at the University of Washington. Students must apply and be admitted to be eligible for this master's degree. To apply, students must complete all required 300-level CSE courses for their CS or CE degree. Applications are generally accepted once a year in the spring.

Degree Requirements

40 credits, as follows:

Students complete master's requirements primarily through a combination of approved coursework from the PhD-track master's courses, the Professional Master's Program courses, and 400-level courses.

1. Minimum 36 credits of approved graded 400-level and 500-level courses except as substituted by research credit:
 - a. Minimum 32 credits in computer science and engineering courses. Students who wish to substitute courses in other fields for computer science and engineering courses may petition to do so by presenting a coherent course plan and written justification for this plan to the program adviser for approval by the start of their master's degree program.
 - b. Minimum 20 credits from 500-level computer science and engineering 4-credit graded courses or other approved computer science and engineering graded coursework at the 500-level.
2. Four additional credits of computer science and engineering research colloquia (CSE 519 or CSE 520) or single-credit research seminars (CSE 590).
3. Students may substitute up to 12 credits of CSE 600, which includes a final written report on research, in place of graded computer science and engineering courses in 1.a. above. Of these, 4 credits of research may be substituted for graded credits in 1.b. above.
4. Subsequent to admission to the master's program, students must complete:
 - a. Either an approved internship/co-op or at least 3 credits of computer science and engineering research.
 - b. At least one approved course from the computer science and engineering Integrated Project (capstone) course list. These include new 500-level capstone-style courses to be developed as well as CSE 428, CSE 454, CSE 441, CSE 460, CSE 468, CSE 477, and CSE 481.
5. Courses taken prior to completion of the bachelor's degree may apply to the master's requirements only if all the following points are met:
 - a. Courses numbered 500-level or higher
 - b. Courses fulfil master's requirements as outlined above.
 - c. Courses taken after a student is admitted to the BS/MS program
 - d. Credits do not satisfy any undergraduate requirements, such as departmental requirements or general elective credits.
 - e. A maximum of 12 graduate credits taken as an undergrad may apply to the master's degree.

Master of Science

Degree Requirements

40 credits, as follows:

Non-Thesis Option

1. 20 credits in courses numbered 500 or above; 30 credits in CSE courses. 10 credits may be in one or more supporting fields

2. MS qualifying evaluation. The faculty assesses whether the student has satisfactorily completed a breadth requirement and an independent project requirement as described below.
3. A breadth requirement, satisfied through coursework. The required course list may change from time to time. Students may meet requirements in place when they are admitted. Students must take one course in four of five areas below plus two additional courses in any area (18 credits total) for graded credit (a waiver is possible for graduate courses taken elsewhere):
 - a. Theory: CSE 521, CSE 525, or CSE 531
 - b. Systems: CSE 548, CSE 550, CSE 551, CSE 552, CSE 561, or CSE 567
 - c. Programming Systems: CSE 501, CSE 503, CSE 505, CSE 507, or CSE 544
 - d. AI: CSE 515, CSE 546, CSE 547/STAT 548, or CSE 573
 - e. Applications: CSE 510, CSE 512, CSE 517, CSE 527, CSE 557, CSE 564, CSE 576
 - f. Non-CSE: GENOME 540; HCDE 544 or INSC 570 (Non-CSE courses do not belong in any of the five areas above.)
4. An independent project completed under the supervision of a primary and a secondary faculty adviser. A written summary and an oral presentation are required.

Thesis option

1. 9 credits CSE 700, master's thesis - a written thesis acceptable to a CSE Supervisory Committee and an oral examination on the thesis work
2. Of the 31 remaining credits,
 - a. 24 credits in CSE courses
 - b. At least 16 credits numbered 500 or above
 - c. 7 credits may be in one or more supporting fields such as engineering, mathematics, natural sciences, business administration, linguistics, philosophy, psychology, or medicine.

Professional Master's Program

Degree Requirements

40 credits, as follows:

Eight 4-credit PMP (Professional Master's Program) courses (determined in consultation with an adviser) and other courses for 8 additional credits. The additional credits may be earned through participation in the department's colloquium series, which features leading-edge researchers and developers in computer science from around the world. Students who take one course per quarter, plus 1 credit of colloquium, complete the program in two-and-a-half years.

Doctor of Philosophy

Admission Requirements

Most entering students are expected to have a solid background in computer science, including programming, machine organization, data structures, discrete mathematics, automata theory, and programming systems (i.e., the equivalent of CSE 321, CSE 322, CSE 326,, and CSE 378, and either CSE 401 or CSE 451). Some exceptions are made for

otherwise promising students. Graduate Record Examination scores are required, earned within the preceding five years. The Computer Science and Engineering Graduate Program home page for prospective students gives full details of application procedures.

Application deadline is December 15 for both U.S. and international students for autumn quarter admission.

Degree Requirements

90 credits, to include:

1. PhD qualifying evaluation, to include:
 - a. A breadth requirement, satisfied through coursework. The required course list may change from time to time. Students may meet requirements in place when they are admitted.
 - b. One course in four of five areas below plus two additional courses in any area (18 credits total) for graded credit (a waiver is possible for graduate courses taken elsewhere):
 - i. Theory: CSE 521, CSE 525, or CSE 531
 - ii. Systems: CSE 548, CSE 550, CSE 551, CSE 552, CSE 561, or CSE 567
 - iii. Programming Systems: CSE 501, CSE 503, CSE 505, CSE 507, or CSE 544
 - iv. AI: CSE 515, CSE 546, CSE 547/STAT 548, or CSE 573
 - v. Applications: CSE 510, CSE 512, CSE 517, CSE 527, CSE 557, CSE 564, CSE 576
 - vi. Non-CSE: GENOME 540; HCDE 544 or INSC 570. (Non-CSE courses do not belong in any of the five areas above.)
 - c. An independent project completed under the supervision of a primary and a secondary faculty adviser. A written summary and an oral presentation are required.
2. General examination. The applicant must demonstrate depth of knowledge in a principal area acceptable to the PhD Supervisory Committee.
3. At least 90 credits of coursework, at least 40 of which are numbered 500 or above. 45 credits should be in courses chosen from the computer science course list. At least two CSE courses numbered 500 or above (or approved courses in related disciplines) must be taken for graded credit in addition to courses taken to satisfy the breadth component of the qualifying evaluation. Coursework taken toward the MS degree is applicable toward the PhD degree.
4. Two quarters of teaching assistantship within the department
5. Dissertation acceptable to the Supervisory Committee. Students must register for at least 27 credits of CSE 800 (Dissertation).
6. Oral examination on the dissertation work.

Assistantships

Research and teaching assistantships are allocated on the basis of scholastic excellence and potential. All students accepted are awarded three years of funding. Students applying for

assistantships starting in autumn quarter should complete applications to the Graduate School and the department by December 15.

COLLEGE OF ENGINEERING COMPUTER SCIENCE & ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

CSE 120 Computer Science Principles (5) NW, QSR

Introduces fundamental concepts of computer science and computational thinking. Includes logical reasoning, problem solving, data representation, abstraction, the creation of digital artifacts such as web pages and programs, managing complexity, operation of computers and networks, effective web searching, ethical, legal and social aspects of information technology. May not be taken for credit if credit earned in CSE 100/INFO 100.

[View course details in MyPlan: CSE 120](#)

CSE 131 Science and Art of Digital Photography (4) VLPA *Hemingway*

Covers the fundamentals of digital photography, including computational imaging; the elements of photographic composition and design; and the future of internet-enabled photography.

[View course details in MyPlan: CSE 131](#)

CSE 142 Computer Programming I (4) NW, QSR

Basic programming-in-the-small abilities and concepts including procedural programming (methods, parameters, return, values), basic control structures (sequence, if/else, for loop, while loop), file processing, arrays, and an introduction to defining objects. Intended for students without prior programming experience. Offered: AWSpS.

[View course details in MyPlan: CSE 142](#)

CSE 143 Computer Programming II (5) NW, QSR

Continuation of CSE 142. Concepts of data abstraction and encapsulation including stacks, queues, linked lists, binary trees, recursion, instruction to complexity and use of predefined collection classes. Prerequisite: CSE 142. Offered: AWSpS.

[View course details in MyPlan: CSE 143](#)

CSE 154 Web Programming (5) QSR

Covers languages, tools, and techniques for developing interactive and dynamic web pages. Topics include page styling, design, and layout; client and server side scripting; web security; and interacting with data sources such as databases. Prerequisite: minimum grade of 2.0 in either CSE 142, CSE 143, or CSE 160.

[View course details in MyPlan: CSE 154](#)

CSE 160 Data Programming (4) NW, QSR

Introduction to computer programming. Assignments solve real data manipulation tasks from science, engineering, business, and the humanities. Concepts of computational thinking, problem-solving, data analysis, Python programming, control and data abstraction, file processing, and data visualization. Intended for students without prior programming experience. No credit if CSE 143 has been taken.

[View course details in MyPlan: CSE 160](#)

CSE 190 Current Topics in Computer Science and Engineering (1-5, max. 15)

[View course details in MyPlan: CSE 190](#)

CSE 301 CSE Internship Education (1-2, max. 12)

CSE Internship practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to CSE Internship Program or by special permission of the Department. Offered credit/no credit only. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: CSE 301](#)

CSE 311 Foundations of Computing I (4) QSR

Examines fundamentals of logic, set theory, induction, and algebraic structures with applications to computing; finite state machines; and limits of computability. Prerequisite: CSE 143; either MATH 126 or MATH 136.

[View course details in MyPlan: CSE 311](#)

CSE 312 Foundations of Computing II (4) QSR

Examines fundamentals of enumeration and discrete probability; applications of randomness to computing; polynomial-time versus NP; and NP-completeness. Prerequisite: CSE 311.

[View course details in MyPlan: CSE 312](#)

CSE 331 Software Design and Implementation (4)

Explores concepts and techniques for design and construction of reliable and maintainable software systems in modern high-level languages: specifications; program structure and design; program-correctness approaches, including testing; and event-driven programming (e.g., graphical user interface). Prerequisite: CSE 143

[View course details in MyPlan: CSE 331](#)

CSE 332 Data Structures and Parallelism (4)

Covers abstract data types and structures including dictionaries, balanced trees, hash tables, priority queues, and graphs; sorting; asymptotic analysis; fundamental graph algorithms including graph search, shortest path, and minimum spanning trees; multithreading and parallel algorithms; P and NP complexity classes. No credit if CSE 373 has been taken. Prerequisite: CSE 311.

[View course details in MyPlan: CSE 332](#)

CSE 333 Systems Programming (4)

Includes substantial programming experience in languages that expose machine characteristics and low-level data representation (e.g., C and C++); explicit memory management; modern libraries and language features; interacting with operating-system services; introduction to concurrent programming. Prerequisite: CSE 351.

[View course details in MyPlan: CSE 333](#)

CSE 341 Programming Languages (4)

Basic concepts of programming languages, including abstraction mechanisms, static and dynamic typing, scope, syntax vs. semantics, first-class function closures, and algebraic datatypes. Detailed study of functional programming and other paradigms. No credit if CSE 413 has been taken. Prerequisite: CSE 143.

[View course details in MyPlan: CSE 341](#)

CSE 344 Introduction to Data Management (4)

Introduces database management systems and writing applications that use such systems; data models (e.g., relational, semi-structured), query languages (e.g., SQL, XQuery), language bindings, conceptual modeling,

transactions, security, database tuning, data warehousing, parallelism, and web-data management. Prerequisite: CSE 311.

[View course details in MyPlan: CSE 344](#)

CSE 351 The Hardware/Software Interface (4)

Examines key computational abstraction levels below modern high-level languages; number representation, assembly language, introduction to C, memory management, the operating-system process model, high-level machine architecture including the memory hierarchy, and how high-level languages are implemented.

Prerequisite: CSE 143.

[View course details in MyPlan: CSE 351](#)

CSE 352 Hardware Design and Implementation (4)

Covers digital circuit design, processor design, and systems integration and embedded-systems issues. Includes substantial hardware laboratory. Prerequisite: CSE 311; CSE 351.

[View course details in MyPlan: CSE 352](#)

CSE 369 Introduction to Digital Design (2)

Introduces the implementation, specification, and simulation of digital logic. Boolean algebra; combinational circuits including arithmetic circuits and regular structures; sequential circuits including finite-state-machines; and use of field-programmable gate arrays (FPGAs). Emphasizes simulation, high-level specification, and automatic synthesis techniques. No credit if EE 271 has been taken. Prerequisite: CSE 311.

[View course details in MyPlan: CSE 369](#)

CSE 371 Design of Digital Circuits and Systems (5)

Provides a theoretical background in, and practical experience with, tools, and techniques for modeling complex digital systems with the Verilog hardware description language, maintaining signal integrity, managing power consumption, and ensuring robust intra- and inter-system communication. Prerequisite: either E E 205 or E E 215; either E E 271 or CSE 369. Offered: jointly with E E 371.

[View course details in MyPlan: CSE 371](#)

CSE 373 Data Structures and Algorithms (4)

Fundamental algorithms and data structures for implementation. Techniques for solving problems by programming. Linked lists, stacks, queues, directed graphs. Trees: representations, traversals. Searching (hashing, binary search trees, multiway trees). Garbage collection, memory management. Internal and external sorting. Intended for non-majors. Not open for credit to students who have completed CSE 332. Prerequisite: CSE 143.

[View course details in MyPlan: CSE 373](#)

CSE 374 Intermediate Programming Concepts and Tools (3)

Covers key software development concepts and tools not in introductory courses. Concepts of lower-level programming (C/C++) and explicit memory management; techniques and tools for individual and group software development; design, implementation, and testing strategies. Intended for non-majors. Cannot be taken for credit if credit received for CSE 333. Prerequisite: CSE 143.

[View course details in MyPlan: CSE 374](#)

CSE 390 Special Topics in Computer Science and Engineering (1-5, max. 10)

Covers topics of current interest in computer science and engineering.

[View course details in MyPlan: CSE 390](#)

CSE 391 System and Software Tools (1)

Introduction to tools commonly used in software development. Topics include using a command-line interface, writing scripts for file and string manipulation, managing user permissions, manipulating text with regular expressions, using build-management tools, and using version-control systems. Prerequisite: CSE 143.

Credit/no-credit only.

[View course details in MyPlan: CSE 391](#)

CSE 399 CSE Foreign Study (*)

Upper-division computer science or computer engineering course, taken through an approved study abroad program, for which there is no direct University of Washington equivalent. Credit/no-credit only.

[View course details in MyPlan: CSE 399](#)

CSE 401 Introduction to Compiler Construction (4)

Fundamentals of compilers and interpreters; symbol tables; lexical analysis, syntax analysis, semantic analysis, code generation, and optimizations for general purpose programming languages. No credit to students who have taken CSE 413. Prerequisite: CSE 332; CSE 351.

[View course details in MyPlan: CSE 401](#)

CSE 403 Software Engineering (4)

Fundamentals of software engineering using a group project as the basic vehicle. Topics covered include the software crisis, managing complexity, requirements specification, architectural and detailed design, testing and analysis, software process, and tools and environments. Prerequisite: CSE 331; CSE 332.

[View course details in MyPlan: CSE 403](#)

CSE 410 Computer Systems (3)

Structure and components of hardware and software systems. Machine organization, including central processor and input-output architectures; assembly language programming; operating systems, including process, storage, and file management. Intended for non-majors. No credit to students who have completed CSE 351 or CSE 451. Prerequisite: CSE 373.

[View course details in MyPlan: CSE 410](#)

CSE 413 Programming Languages and Their Implementation (3)

Basic concepts and implementation strategies for modern functional and object-oriented programming languages such as Scheme and Java. Intended for non-majors. No credit to students who have completed CSE 341 or CSE 401. Prerequisite: CSE 373.

[View course details in MyPlan: CSE 413](#)

CSE 414 Introduction to Database Systems (4)

Introduces database management systems and writing applications that use such systems; data models, query languages, transactions, database tuning, data warehousing, and parallelism. Intended for non-majors. Not open for credit to students who have completed CSE 344. Prerequisite: minimum grade of 2.5 in CSE 143.

[View course details in MyPlan: CSE 414](#)

CSE 415 Introduction to Artificial Intelligence (3) NW

Principles and programming techniques of artificial intelligence: LISP, symbol manipulation, knowledge representation, logical and probabilistic reasoning, learning, language understanding, vision, expert systems, and social issues. Intended for non-majors. Not open for credit to students who have completed CSE 473.

Prerequisite: CSE 373.

[View course details in MyPlan: CSE 415](#)

CSE 416 Introduction to Machine Learning (4) NW

Provides practical introduction to machines learning. Modules include regression, classification, clustering, retrieval, recommender systems, and deep learning, with a focus on an intuitive understanding grounded in real-world applications. Intelligent applications are designed and used to make predictions on large, complex datasets. Prerequisite: CSE 143 or CSE 160; and STAT 311 or STAT 390 Offered: jointly with STAT 416.

[View course details in MyPlan: CSE 416](#)

CSE 417 Algorithms and Computational Complexity (3)

Design and analysis of algorithms and data structures. Efficient algorithms for manipulating graphs and strings. Fast Fourier Transform. Models of computation, including Turing machines. Time and space complexity. NP-complete problems and undecidable problems. Intended for non-majors. Prerequisite: CSE 373.

[View course details in MyPlan: CSE 417](#)

CSE 421 Introduction to Algorithms (3)

Techniques for design of efficient algorithms. Methods for showing lower bounds on computational complexity. Particular algorithms for sorting, searching, set manipulation, arithmetic, graph problems, pattern matching.

Prerequisite: CSE 312; CSE 332.

[View course details in MyPlan: CSE 421](#)

CSE 427 Computational Biology (3)

Algorithmic and analytic techniques underlying analysis of large-scale biological data sets such as DNA, RNA, and protein sequences or structures, expression and proteomic profiling. Hands-on experience with databases, analysis tools, and genome markers. Applications such as sequence alignment, BLAST, phylogenetics, and Markov models. Prerequisite: CSE 312; CSE 332.

[View course details in MyPlan: CSE 427](#)

CSE 428 Computational Biology Capstone (5)

Designs and implements a software tool or software analysis for an important problem in computational molecular biology. Prerequisite: CSE 312; CSE 331; CSE 332.

[View course details in MyPlan: CSE 428](#)

CSE 431 Introduction to Theory of Computation (3)

Models of computation, computable and noncomputable functions, space and time complexity, tractable and intractable functions. Prerequisite: CSE 312.

[View course details in MyPlan: CSE 431](#)

CSE 440 Introduction to HCI: User Interface Design, Prototyping, and Evaluation (5)

Human-Computer Interaction (HCI) theory and techniques. Methods for designing, prototyping, and evaluating user interfaces to computing applications. Human capabilities, interface technology, interface design methods, and interface evaluation tools and techniques. Prerequisite: CSE 332.

[View course details in MyPlan: CSE 440](#)

CSE 441 Advanced HCI: Advanced User Interface Design, Prototyping, and Evaluation (5)

Human-Computer Interaction (HCI) theory and techniques. Advanced methods for designing, prototyping, and evaluating user interfaces to computing applications. Novel interface technology, advanced interface design methods, and prototyping tools. Prerequisite: CSE 440.

[View course details in MyPlan: CSE 441](#)

CSE 442 Data Visualization (4)

Techniques for creating effective visualizations of data based on principles from graphic design, perceptual psychology, and statistics. Topics include visual encoding models, exploratory data analysis, visualization software, interaction techniques, graphical perception, color, animation, high-dimensional data, cartography, network visualization, and text visualization. Prerequisite: CSE 332.

[View course details in MyPlan: CSE 442](#)

CSE 444 Database Systems Internals (4)

The relational data model and the SQL query language. Conceptual modeling: entity/relationships, normal forms. XML, XPath, and XQuery. Transactions: recovery and concurrency control. Implementation of a database system. A medium sized project using a relational database backend. Prerequisite: CSE 332; CSE 344.

[View course details in MyPlan: CSE 444](#)

CSE 446 Machine Learning (4)

Methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling: decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering. Prerequisite: CSE 332; either STAT 390, STAT 391, or CSE 312.

[View course details in MyPlan: CSE 446](#)

CSE 450 Animation Production Seminar (1)

Open to all students who have an interest in digital animation. Reviews and analyzes films, animated feature films, and television commercials. Emphasizes the technical and aesthetic basics of animation production in industry studio environments.

[View course details in MyPlan: CSE 450](#)

CSE 451 Introduction to Operating Systems (4)

Principles of operating systems. Process management, memory management, auxiliary storage management, resource allocation. No credit to students who have completed CSE 410. Prerequisite: CSE 351; CSE 332; CSE 333.

[View course details in MyPlan: CSE 451](#)

CSE 452 Introduction to Distributed Systems (4)

Covers abstractions and implementation techniques in the construction of distributed systems, including cloud computing, distributed storage systems, and distributed caches. Prerequisite: CSE 451.

[View course details in MyPlan: CSE 452](#)

CSE 454 Advanced Internet and Web Services (5)

Design of Internet search engines, including spider architecture, inverted indices, frequency rankings, latent semantic indexing, hyperlink analysis, and refinement interfaces. Construction of scalable and secure web services. Datamining webserver logs to provide personalized and user-targeted services. Large project.

Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.

[View course details in MyPlan: CSE 454](#)

CSE 455 Computer Vision (4)

Introduction to image analysis and interpreting the 3D world from image data. Topics may include segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: CSE 333; CSE 332.

[View course details in MyPlan: CSE 455](#)

CSE 456 Story Design for Computer Animation (4)

Animation principles and production for story development and design. Design, development, and production of several storyreels, which are a tool for the pre-production of animated features and shorts. Student use authoring tools to present finished work.

[View course details in MyPlan: CSE 456](#)

CSE 457 Computer Graphics (4)

Introduction to computer image synthesis, modeling, and animation. Topics may include visual perception, displays and framebuffers, image processing, affine and projective transformations, hierarchical modeling, hidden surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, character animation, and animation principles. Prerequisite: CSE 333; CSE 332.

[View course details in MyPlan: CSE 457](#)

CSE 458 Computer Animation (5)

Introduction to basic principles of computer generated animation. Focus on the modeling and lighting of animated characters. Students from art, CSE, and music team up on projects to be built on commercially-available modeling and lighting packages. Prerequisite: CSE 457.

[View course details in MyPlan: CSE 458](#)

CSE 459 Pre-Production for Collaborative Animation (5)

Pre-production of collaboratively designed animated shorts. In-depth analysis of classical and computer generated works. Character design and pre-planning, model sheets, character rigging, storyreel and animatics, character motion, design for multiple characters, and principles of animation as applied to character motion and effects. Prerequisite: CSE 458.

[View course details in MyPlan: CSE 459](#)

CSE 460 Animation Capstone (5)

Apply the knowledge gained in previous animation courses to produce a short animated film. Topics include scene planning, digital cinematography, creature and hard surface modeling, animatics and basics of character animation, and rendering techniques. Prerequisite: CSE 458, CSE 459.

[View course details in MyPlan: CSE 460](#)

CSE 461 Introduction to Computer-Communication Networks (4)

Computer network architectures, protocol layers, network programming. Transmission media, encoding systems, switching, multiple access arbitration. Network routing, congestion control, flow control. Transport protocols, real-time, multicast, network security. Prerequisite: either CSE 326 or CSE 332; either CSE 303 or CSE 333.

[View course details in MyPlan: CSE 461](#)

CSE 464 Advanced Topics in Digital Animation (1-5, max. 10)

Students design individual animated works for professional quality demo reels. 2- and 3-D animatics, special effects design, advanced character animation techniques, 3-D paint techniques and integration, short design, sequence planning, non-photorealistic rendering options, interactive animation for pre-planning, and advanced production techniques and strategies.

[View course details in MyPlan: CSE 464](#)

CSE 467 Advanced Digital Design (4)

Advanced techniques in the design of digital systems. Hardware description languages, combinational and sequential logic synthesis and optimization methods, partitioning, mapping to regular structures. Emphasis on reconfigurable logic as an implementation medium. Memory system design. Digital communication including serial/parallel and synchronous/asynchronous methods. Prerequisite: CSE 352; CSE 332.

[View course details in MyPlan: CSE 467](#)

CSE 469 Computer Architecture I (5)

Introduction to computer architecture. Assembly and machine language, microprocessor organization including control and datapath. Computer arithmetic. Memory systems and caching. Performance modeling of microprocessors. Prerequisite: either E E 271 or CSE 369; CSE 143 Offered: jointly with E E 469; AWSp.

[View course details in MyPlan: CSE 469](#)

CSE 470 Computer Architecture II (4)

Advanced computer architecture. Performance evaluation and energy efficiency. Instruction set architectures. Instruction-level parallelism. Modern microprocessor micro-architecture. Thread-level parallelism. Cache coherency and memory consistency in shared-memory multiprocessors. Memory hierarchy. GPU architecture. Warehouse-scale computing. Trends in computer design. Prerequisite: CSE 351; either CSE 469, E E 469, or E E 471. Offered: jointly with E E 470.

[View course details in MyPlan: CSE 470](#)

CSE 472 Introduction to Computational Linguistics (5) VLPA/NW E. BENDER

Introduction to computational approaches to modeling language, for linguistic research and practical applications, including analyses at different levels of linguistic structure and symbolic as well as statistical approaches. Prerequisite: either LING 200 or LING 400; either LING 461 or CSE 311. Offered: jointly with LING 472.

[View course details in MyPlan: CSE 472](#)

CSE 473 Introduction to Artificial Intelligence (3)

Principal ideas and developments in artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Not open for credit to students who have completed CSE 415. Prerequisite: CSE 332.

[View course details in MyPlan: CSE 473](#)

CSE 474 Introduction to Embedded Systems (4)

Introduces the specification, design, development, and test of real time embedded system software. Use of a modern embedded microcomputer or microcontroller as a target environment for a series of laboratory projects and a comprehensive final project. Prerequisite: CSE 143. Offered: jointly with E E 474; AWSpS.

[View course details in MyPlan: CSE 474](#)

CSE 475 Embedded Systems Capstone (5)

Capstone design experience. Prototype a substantial project mixing hardware, software, and communications. Focuses on embedded processors, programmable logic devices, and emerging platforms for the development of digital systems. Provides a comprehensive experience in specification, design, and management of contemporary embedded systems. Prerequisite: either E E 271 or CSE 369; either CSE 466, E E 472, or CSE 474/E E 474. Offered: jointly with E E 475; AWSpS.

[View course details in MyPlan: CSE 475](#)

CSE 481 Capstone Software Design (5, max. 15)

Student teams design and implement a software project involving multiple areas of the CSE curriculum. Course emphasizes the development process, rather than the product. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.

[View course details in MyPlan: CSE 481](#)

CSE 482 Capstone Software Design to Empower Underserved Populations (5, max. 15) DIV

Students work in teams to design and implement a software project involving multiple areas of the CSE curriculum, for the purpose of empowering marginalized or underserved populations. Prerequisite: CSE 332; CSE 351; either CSE 331 or CSE 352.

[View course details in MyPlan: CSE 482](#)

CSE 484 Computer Security (4)

Foundations of modern computer security, including software security, operating system security, network security, applied cryptography, human factors, authentication, anonymity, and web security. Prerequisite: CSE 332; CSE 351.

[View course details in MyPlan: CSE 484](#)

CSE 486 Introduction to Synthetic Biology (3)

Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 423/E E 423; A.

[View course details in MyPlan: CSE 486](#)

CSE 487 Advanced Systems and Synthetic Biology (3)

Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology.

Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with BIOEN 424/E E 424; W.

[View course details in MyPlan: CSE 487](#)

CSE 488 Laboratory Methods in Synthetic Biology (4)

Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with BIOEN 425/E E 425; W.

[View course details in MyPlan: CSE 488](#)

CSE 490 Special Topics in Computer Science and Engineering (1-5, max. 15)

Lectures, discussions, and possibly labs on topics of current interest in computer science and engineering not covered by other CSE undergraduate courses.

[View course details in MyPlan: CSE 490](#)

CSE 491 Data Science and Society Seminar (1)

Current topics related to the societal implications of data science. Topic selection will vary from quarter to quarter and may include data privacy and security, data anonymization, hypothesis-testing on a shared database, impact of data science-based decisions on society. Includes both guest speakers and case-study or article-based discussions. Credit/no-credit only. Credit/no-credit only.

[View course details in MyPlan: CSE 491](#)

CSE 495 Project Practicum ([1-5]-, max. 5)

Available in special situations for computer science majors to compete, under instructor guidance, a substantial computing project that deepens one's knowledge and experience in the field. Projects may involve a group of students.

[View course details in MyPlan: CSE 495](#)

CSE 497 Undergraduate Research Seminar (1)

Students prepare and give a public talk on their faculty-sponsored research projects.

[View course details in MyPlan: CSE 497](#)

CSE 498 Senior Project ([1-9]-, max. 9)

A report (and perhaps demonstration) describing a development, survey, or small research project in computer science or an application to another field. Objectives: (1) integrating material from several courses, (2) introducing the professional literature, (3) gaining experience in writing a technical document, and (4) showing evidence of independent work.

[View course details in MyPlan: CSE 498](#)

CSE 499 Reading and Research (1-24, max. 24)

Available in special situations for advanced computer science majors to do reading and research in field, subject to approval of undergraduate adviser and CSE faculty member. Free elective, but does not replace core course or computer science elective. Credit/no-credit only.

[View course details in MyPlan: CSE 499](#)

CSE 501 Programming Language Analysis and Implementation (4)

Design and implementation of compilers and run-time systems for imperative, object-oriented, and functional languages. Intra- and interprocedural analyses and optimizations. Prerequisite: CSE 341.

[View course details in MyPlan: CSE 501](#)

CSE 503 Software Engineering (4)

Specification, implementation, and testing of large, multiperson, software systems. Topics include abstraction, information hiding, software development environments, and formal specifications.

[View course details in MyPlan: CSE 503](#)

CSE 504 Advanced Topics in Software Engineering (4)

Topics vary but may include software design and evolution, formal methods, requirements specifications, software and system safety, reverse engineering, real-time software, metrics and measurement, programming environments, and verification and validation.

[View course details in MyPlan: CSE 504](#)

CSE 505 Principles of Programming Languages (4)

Design and formal semantics of modern programming languages, includes functional and object-oriented languages. Prerequisite: CSE 341.

[View course details in MyPlan: CSE 505](#)

CSE 506 Advanced Topics in Programming Languages (4)

May include functional, object-oriented, parallel, and logic programming languages; semantics for languages of these kinds; type declaration, inference, and checking (including polymorphic types); implementation issues, such as compilation, lazy evaluation, combinators, parallelism, various optimization techniques. Implementation project required. Prerequisite: CSE 501 which may be taken concurrently, and CSE 505.

[View course details in MyPlan: CSE 506](#)

CSE 507 Computer-Aided Reasoning for Software (4)

Covers theory, implementation, and applications of automated reasoning techniques, such as satisfiability solving, theorem proving, model checking, and abstract interpretation. Topics include concepts from mathematical logic and applications of automated reasoning to the design, construction, and analysis of software.

[View course details in MyPlan: CSE 507](#)

CSE 510 Advanced Topics in Human-Computer Interaction (4)

Content varies, including interface issues for networks, embedded systems, education applications, safety and critical systems, graphics and virtual reality, databases, and computer-supported cooperative work.

[View course details in MyPlan: CSE 510](#)

CSE 512 Data Visualization (4)

Covers techniques and algorithms for creating effective visualizations based on principles from graphic design, visual art, perceptual psychology, and cognitive science. Topics include data and image models; visual encoding; graphical perception; color; animation; interaction techniques; graph layout; and automated design. Lectures, reading, and project.

[View course details in MyPlan: CSE 512](#)

CSE 515 Statistical Methods in Computer Science (4)

Introduction to the probabilistic and statistical techniques used in modern computer systems. Graphical models, probabilistic inference, statistical learning, sequential models, decision theory. Prerequisite: either CSE 312, STAT 341, STAT 391 or equivalent.

[View course details in MyPlan: CSE 515](#)

CSE 517 Natural Language Processing (4)

Overview of modern approaches for natural language processing. Topics include language models, text, classification, tagging, parsing, machine translation, semantic, and discourse analysis.

[View course details in MyPlan: CSE 517](#)

CSE 519 Current Research in Computer Science (1, max. 18)

Weekly presentations on current research activities by members of the department. Only computer science graduate students may register, although others are encouraged to attend. Credit/no-credit only.

[View course details in MyPlan: CSE 519](#)

CSE 520 Computer Science Colloquium (1, max. 18)

Weekly public presentations on topics of current interest by visiting computer scientists. Credit/no-credit only.

[View course details in MyPlan: CSE 520](#)

CSE 521 Design and Analysis of Algorithms I (4)

Principles of design of efficient algorithms: recursion, divide and conquer, balancing, dynamic programming, greedy method, network flow, linear programming. Correctness and analysis of algorithms. NP-completeness. Prerequisite: either CSE 332 or equivalent.

[View course details in MyPlan: CSE 521](#)

CSE 522 Design and Analysis of Algorithms II (4)

Analysis of algorithms more sophisticated than those treated in CSE 521. Content varies and may include such topics as algebraic algorithms, combinatorial algorithms, techniques for proving lower bounds on complexity,

and algorithms for special computing devices such as networks or formulas. Prerequisite: CSE 521. 1571
[View course details in MyPlan: CSE 522](#)

CSE 523 Computational Geometry (4)

Algorithms for discrete computational geometry. Geometric computation, range searching, convex hulls, proximity, Voronoi diagrams, intersection. Application areas include VLSI design and computer graphics. Prerequisite: CSE 521.

[View course details in MyPlan: CSE 523](#)

CSE 524 Parallel Algorithms (4)

Design and analysis of parallel algorithms: fundamental parallel algorithms for sorting, arithmetic, matrix and graph problems, and additional selected topics. Emphasis on general techniques and approaches used for developing fast and efficient parallel algorithms and on limitations to their efficacy. Prerequisite: CSE 521.

[View course details in MyPlan: CSE 524](#)

CSE 525 Randomized Algorithms and Probabilistic Analysis (4)

Examines algorithmic techniques: random selection, random sampling, backwards analysis, algebraic methods, Monte Carlo methods, and randomized rounding; random graphs; the probabilistic method; Markov chains and random walks; and analysis tools: random variables, moments and deviations, Chernoff bounds, martingales, and balls in bins. Prerequisite: either CSE 521 or equivalent.

[View course details in MyPlan: CSE 525](#)

CSE 527 Computational Biology (4)

Introduces computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenetic inference, regulatory analysis. Techniques such as dynamic programming, Markov models, expectation-maximization, local search.

[View course details in MyPlan: CSE 527](#)

CSE 528 Computational Neuroscience (3)

Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or permission of instructor. Offered: jointly with NEURO 528.

[View course details in MyPlan: CSE 528](#)

CSE 529 Neural Control of Movement: A Computational Perspective (3)

Systematic overview of sensorimotor function on multiple levels of analysis, with emphasis on the phenomenology amenable to computational modeling. Topics include musculoskeletal mechanics, neural networks, optimal control and Bayesian inference, learning and adaptation, internal models, and neural coding and decoding. Prerequisite: vector calculus, linear algebra, MATLAB, or permission of instructor. Offered: jointly with AMATH 533.

[View course details in MyPlan: CSE 529](#)

CSE 531 Computational Complexity I (4)

Deterministic and nondeterministic time and space complexity, complexity classes, and complete problems. Time and space hierarchies. Alternation and the polynomial-time hierarchy. Circuit complexity. Probabilistic computation. Exponential complexity lower bounds. Interactive proofs. Prerequisite: either CSE 311 or equivalent.

[View course details in MyPlan: CSE 531](#)

CSE 532 Computational Complexity II (4)

Advanced computational complexity including several of the following: circuit complexity lower bounds, #P and counting classes, probabilistically-checkable proofs, de-randomization, logical characteristics of complexity, communication complexity, time-space tradeoffs, complexity of data structures.

[View course details in MyPlan: CSE 532](#)

CSE 533 Advanced Topics in Complexity Theory (4)

An in-depth study of advanced topics in computational complexity.

[View course details in MyPlan: CSE 533](#)

CSE 544 Principles of Database Systems (4)

Data models and query languages (SQL, datalog, OQL). Relational databases, enforcement of integrity constraints. Object-oriented databases and object-relational databases. Principles of data storage and indexing. Query-execution methods and query optimization algorithms. Static analysis of queries and rewriting of queries using views. Data integration. Data mining. Principles of transaction processing.

[View course details in MyPlan: CSE 544](#)

CSE 546 Machine Learning (4)

Explores methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling; decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering. Prerequisite: either CSE 312, STAT 341, STAT 391 or equivalent.

[View course details in MyPlan: CSE 546](#)

CSE 547 Machine Learning for Big Data (4)

Covers machine learning and statistical techniques for analyzing datasets of massive size and dimensionality. Representations include regularized linear models, graphical models, matrix factorization, sparsity, clustering, and latent factor models. Algorithms include sketching, random projections, hashing, fast nearest-neighbors, large-scale online learning, and parallel learning (Map-Reduce, GraphLab). Prerequisite: either STAT 535 or CSE 546. Instructors: Fox, Guestrin Offered: jointly with STAT 548; W.

[View course details in MyPlan: CSE 547](#)

CSE 548 Computer Systems Architecture (4)

Notations for computer systems. Processor design (single chip, look-ahead, pipelined, data flow). Memory hierarchy organization and management (virtual memory and caches). Microprogramming. I/O processing. Multiprocessors (SIMD and MIMD). Prerequisite: CSE 451.

[View course details in MyPlan: CSE 548](#)

CSE 549 High-Performance Computer Architectures (4)

Algorithm design, software techniques, computer organizations for high-performance computing systems. Selected topics from: VLSI complexity for parallel algorithms, compiling techniques for parallel and vector machines, large MIMD machines, interconnection networks, reconfigurable systems, memory hierarchies in multiprocessors, algorithmically specialized processors, data flow architectures. Prerequisite: CSE 548 or permission of instructor.

[View course details in MyPlan: CSE 549](#)

CSE 550 Computer Systems (4)

Explores computer system design, implementation, and evaluation. Covers principles, techniques, and examples related to the construction of computer systems, including concepts that span network systems, operating systems, web servers, parallel computing, and databases. Prerequisite: CSE 451.

[View course details in MyPlan: CSE 550](#)

CSE 551 Operating Systems (4)

Operating system design and construction techniques. Concurrent programming, operating system kernels, correctness, deadlock, protection, transaction processing, design methodologies, comparative structure of different kinds of operating systems, and other topics. Prerequisite: CSE 451.

[View course details in MyPlan: CSE 551](#)

CSE 552 Distributed and Parallel Systems (4)

Principles, techniques, and examples related to the design, implementation, and analysis of distributed and

parallel computer systems. Prerequisite: CSE 551.

[View course details in MyPlan: CSE 552](#)

CSE 553 Real-Time Systems (4)

Design and construction of software for real-time computer systems. Software architectures. Requirements and specification methods. Scheduling algorithms and timing analysis. Real-time operating systems. Real-time programming languages. Selected case studies. Prerequisite: CSE 451.

[View course details in MyPlan: CSE 553](#)

CSE 557 Computer Graphics (4)

Introduction to image synthesis and computer modeling, emphasizing the underlying theory required for undertaking computer graphics research. Topics include color theory, image processing, affine and projective geometry, hidden-surface determination, photorealistic image synthesis, advanced curve and surface design, dynamics, realistic character animation. Prerequisite: solid knowledge of linear algebra.

[View course details in MyPlan: CSE 557](#)

CSE 558 Special Topics in Computer Graphics (4)

Advanced topics in computer graphics not treated in CSE 557. Topics vary from year to year but typically include advanced aspects of image synthesis, animation, and 3D photography. Prerequisite: CSE 557 or permission of instructor.

[View course details in MyPlan: CSE 558](#)

CSE 561 Computer Communication and Networks (4)

Fundamentals of data transmission: coding, message formats, and protocols. Organization of computer networks. Examples of network implementations. Prerequisite: either CSE 451 or equivalent.

[View course details in MyPlan: CSE 561](#)

CSE 564 Computer Security and Privacy (4)

Examines the fundamentals of computer security including: human factors; attack detection, measurements, and models; cryptography and communications security; system design and implementation; and side channels.

[View course details in MyPlan: CSE 564](#)

CSE 567 Principles of Digital Systems Design (4)

Principles of logic design, combinational and sequential circuits, minimization techniques, structured design methods, CMOS technology, complementary and ratioed gates, delay estimation and performance analysis, arithmetic circuits, memories, clocking methodologies, synthesis and simulation tools, VLSI processor architecture. Prerequisite: basic knowledge of logic design.

[View course details in MyPlan: CSE 567](#)

CSE 568 Introduction to VLSI Systems (4)

Introduction to CMOS technology and circuit design; combinational logic-design alternatives; register-design and system-clocking methodologies; datapath and subsystem design; VLSI system-design methodologies; CAD tools for synthesis, layout, simulation, and validation; design of a complex VLSI chip. Prerequisite: either CSE 567 or permission of instructor.

[View course details in MyPlan: CSE 568](#)

CSE 571 AI-based Mobile Robotics (4)

Overview of mobile robot control and sensing. Behavior-based control, world modeling, localization, navigation, and planning. Probabilistic sensor interpretation, Bayes filters, particle filters. Projects: Program real robots to perform navigation tasks. Prerequisite: either CSE 473 or permission of instructor.

[View course details in MyPlan: CSE 571](#)

CSE 573 Artificial Intelligence I (4)

Intensive introduction to artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Prerequisite: either

CSE 421 or equivalent; exposure to logic, probability, and statistics.

[View course details in MyPlan: CSE 573](#)

CSE 574 Artificial Intelligence II (4)

Advanced topics in artificial intelligence. Subjects include planning, natural language understanding, qualitative physics, machine learning, and formal models of time and action. Students are required to do projects.

Prerequisite: CSE 573.

[View course details in MyPlan: CSE 574](#)

CSE 576 Computer Vision (3)

Principles and methods for interpreting the three-dimensional world from images. Topics include feature detection, image segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: solid knowledge of linear algebra; good programming skills. Offered: jointly with E E 576.

[View course details in MyPlan: CSE 576](#)

CSE 577 Special Topics in Computer Vision (3)

Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE 576/E E 576. Offered: jointly with E E 577.

[View course details in MyPlan: CSE 577](#)

CSE 579 Intelligent Control through Learning and Optimization (3)

Design or near-optimal controllers for complex dynamical systems, using analytical techniques, machine learning, and optimization. Topics from deterministic and stochastic optimal control, reinforcement learning and dynamic programming, numerical optimization in the context of control, and robotics. Prerequisite: vector calculus; linear algebra; MATLAB. Offered: jointly with AMATH 571.

[View course details in MyPlan: CSE 579](#)

CSE 583 Software Development for Data Scientists (4)

Provides students outside of CSE with a practical knowledge of software development that is sufficient to do graduate work in their discipline. Modules include Python basics, software version control, software design, and using Python for machine learning and visualization.

[View course details in MyPlan: CSE 583](#)

CSE 586 Introduction to Synthetic Biology (3)

Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/E E 523/MOLENG 525.

[View course details in MyPlan: CSE 586](#)

CSE 587 Advanced Systems and Synthetic Biology (3)

Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with BIOEN 524/E E 524; W.

[View course details in MyPlan: CSE 587](#)

CSE 590 Research Seminar (*, max. 50)

Several offerings each quarter, on topics of current interest.

[View course details in MyPlan: CSE 590](#)

CSE 591 Group Projects in Computer Science (1-3, max. 25)

Focuses on specialized topics and research activities in computer science.

[View course details in MyPlan: CSE 591](#)

CSE 599 Special Topics in Computer Science (1-5, max. 30)

Studies of emerging areas and specialized topics in computer science.

[View course details in MyPlan: CSE 599](#)

CSE 600 Independent Study or Research (*-)

Credit/no-credit only.

[View course details in MyPlan: CSE 600](#)

CSE 601 Internship (1-2, max. 12)

CSE Internship practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to CSE Internship Program or by special permission of the Department. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: CSE 601](#)

CSE 700 Master's Thesis (*-)

Credit/no-credit only.

[View course details in MyPlan: CSE 700](#)

CSE 800 Doctoral Dissertation (*-)

Credit/no-credit only.

CSE P 501 Compiler Construction (4)

Principles and practice of building efficient implementations of modern programming languages. Lexical, syntactic, and semantic analysis of programs. Intermediate program representations. Intra- and interprocedural analysis and optimization. Run-time system techniques. Related programming environment facilities such as source-level debuggers and profilers.

[View course details in MyPlan: CSE P 501](#)

CSE P 503 Principles of Software Engineering (4)

Study of major developments in software engineering over the past three decades. Topics may include design (information hiding, layering, open implementations), requirements specification (informal and formal approaches), quality assurance (testing, verification and analysis, inspections), reverse and re-engineering (tools, models, approaches).

[View course details in MyPlan: CSE P 503](#)

CSE P 504 Advanced Topics in Software Systems (4)

Topics include software architecture, software tools, programming language analysis, type systems, formal reasoning, and other pertinent topics in software engineering and programming languages research.

[View course details in MyPlan: CSE P 504](#)

CSE P 505 Programming Languages (4)

A study of non-imperative programming paradigms such as functional, object-oriented, logic, and constraint programming. Programming language semantics and type theory.

[View course details in MyPlan: CSE P 505](#)

CSE P 510 Human Computer Interaction (4)

Topics in human-computer interaction, including tools and skills for user interface design, user interface software architecture, rapid prototyping and iterative design, safety and critical systems, evaluation techniques,

and computer supported cooperative work.

[View course details in MyPlan: CSE P 510](#)

CSE P 517 Natural Language Processing (4)

Provides an overview of modern approaches for natural language processing. Topics include language models, text classification, tagging, parsing, machine translation, semantics, and discourse analysis.

[View course details in MyPlan: CSE P 517](#)

CSE P 521 Applied Algorithms (4)

Principles of design of efficient algorithms with emphasis on algorithms with real world applications. Examples drawn from computational geometry, biology, scientific computation, image processing, combinatorial optimization, cryptography, and operations research.

[View course details in MyPlan: CSE P 521](#)

CSE P 524 Parallel Computation (4)

Survey of parallel computing including the processing modes of pipelining, data parallelism, thread parallelism, and task parallelism; algorithmic implications of memory models; shared memory and message passing; hardware implementations; bandwidth and latency; synchronization, consistency, interprocessor communication; programming issues including implicit and explicit parallelism, locality, portability.

[View course details in MyPlan: CSE P 524](#)

CSE P 527 Computational Biology (4)

Introduction to the use of computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenetic inference, motif discovery, expression analysis, and regulatory analysis. Techniques such as dynamic programming, Markov models, MCMC, expectation-maximization, and local search.

[View course details in MyPlan: CSE P 527](#)

CSE P 531 Computability and Complexity Theory (4)

Survey of the theory of computation including Turing Machines, Church's Thesis, computability, incompleteness, undecidability, complexity classes, problem reductions, Cook's theorem, NP-completeness, randomized computation, cryptography, parallel computation, and space complexity. Some emphasis placed on historical and philosophical aspects of the theory of computation.

[View course details in MyPlan: CSE P 531](#)

CSE P 544 Database Management System (4)

Introduction to the principles of database management systems. Topics include database system architecture, data models, theory of database design, query optimization, concurrency control, crash recovery, and storage strategies.

[View course details in MyPlan: CSE P 544](#)

CSE P 545 Transaction Processing (4)

Technology supporting reliable large-scale distributed computing, including transaction programming models, TP monitors, transactional communications, persistent queuing, software fault tolerance, concurrency control and recovery algorithms, distributed transactions, two-phase commit, data replication.

[View course details in MyPlan: CSE P 545](#)

CSE P 546 Data Mining (4)

Methods for identifying valid, novel, useful, and understandable patterns in data. Induction of predictive models from data: classification, regression, probability estimation. Discovery of clusters and association rules.

[View course details in MyPlan: CSE P 546](#)

CSE P 548 Computer Architecture (4)

Architecture of the single-chip microprocessor: instruction set design and processor implementation (pipelining, multiple issue, speculative execution). Memory hierarchy: on-chip and off-chip caches, TLBs and their

management, virtual memory from the hardware viewpoint. I/O devices and control: buses, disks, and RAID¹⁵⁸⁰s.

[View course details in MyPlan: CSE P 548](#)

CSE P 551 Computer Operating Systems (4)

A study of developments in operating systems from the 1960s to the present. Topics include operating system structure, protection, virtual memory, communication mechanisms, concurrency, lightweight threads, object-oriented systems, distributed systems, and transaction support in operating systems.

[View course details in MyPlan: CSE P 551](#)

CSE P 552 Distributed Systems (4)

Principles, techniques, and examples related to the design, implementation, and analysis of distributed computer systems.

[View course details in MyPlan: CSE P 552](#)

CSE P 557 Current Trends in Computer Graphics (4)

Introduction to computer image synthesis, modeling, and animation emphasizing the state-of-the-art algorithm applications. Topics may include visual perception, image processing, geometric transformations, hierarchical modeling, hidden-surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, realistic character animation, and traditional animation principles.

[View course details in MyPlan: CSE P 557](#)

CSE P 561 Network Systems (4)

Current choices and challenges in network systems. Fundamental concepts combined with emphasis on evaluation of design/operations alternatives. Topics include alternative link, network, and transport-layer technologies, topologies, routing, congestion control multimedia, Ipv6, ATM v. IP, network management and policy issues.

[View course details in MyPlan: CSE P 561](#)

CSE P 564 Computer Security and Privacy (4)

Examines the fundamental of computer security including: human factors; attack detection, measurements, and models; cryptography and communications security; system design and implementation; and side channels.

[View course details in MyPlan: CSE P 564](#)

CSE P 567 Design and Implementation of Digital Systems (4)

Overview of current implementation technologies for digital systems including custom integrated circuits, field-programmable logic, and embedded processors. Systems components such as buses and communications structures, interfaces, memory architectures, embedded systems, and application-specific devices. Focus on the design of large systems using modern CAD tools.

[View course details in MyPlan: CSE P 567](#)

CSE P 573 Applications of Artificial Intelligence (4)

Introduction to the use of Artificial Intelligence tools and techniques in industrial and company settings. Topics include foundations (search, knowledge representation) and tools such as expert systems, natural language interfaces, and machine learning techniques.

[View course details in MyPlan: CSE P 573](#)

CSE P 576 Computer Vision (4)

Provides an overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, pre-attentive image processing, boundary and region representations, and case studies of vision architectures.

[View course details in MyPlan: CSE P 576](#)

CSE P 590 Special Topics in Computer Science (1-4, max. 20)

[View course details in MyPlan: CSE P 590](#)

CSE P 595 Software Entrepreneurship (4)

Provides an overview of the major elements of entrepreneurial activity in software, including market identification and analysis, evaluation and planning of the business, financing, typical operating and administrative problems, and alternatives for growth or sale.

[View course details in MyPlan: CSE P 595](#)

CSE P 596 Business Basics Computer Science Professionals (4)

Business principles relevant to the software industry in four areas: competitive strategy, finance, accounting, and human resources. Organized as a series of case studies and lectures. Progresses from an emphasis on tools to a more high-level look at competitive dynamics in high-tech industries.

Electrical Engineering

[Display as tabs](#)

Department Overview

AE100R Paul Allen Center

Electrical engineering is concerned with the understanding and utilization of electricity and with providing society useful, efficient, and economic products and services. It encompasses everything from batteries and power supplies to crystal fabrication, autonomous robots, and devices that can recognize human speech. Electrical engineers design, produce, study, and operate all manner of devices and systems that use electric and electromagnetic energy. They also work on systems at the macro scale of electric power grids and at the micro scale of nanotechnology.

Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical engineering. Rapid improvements in communication technologies, computer visualization, and information access continue to have a significant impact on manufacturing, medicine, transportation, and environmental monitoring. Dramatic advances in personal communication services, digital imaging, and network hardware and software are changing the texture of everyday life for an increasing portion of the world's population.

Undergraduate Program

Adviser

AE 100R Paul Allen Center

(206) 543-2142

undergrad@ee.washington.edu

The Department of Electrical Engineering offers the following programs of study:

- The Bachelor of Science in Electrical Engineering degree
- The Bachelor of Science in Electrical Engineering degree with an option in nanoscience and molecular engineering

Bachelor of Science in Electrical Engineering

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; CHEM 142; English composition; PHYS 121 (and beyond if possible). Students should start in math courses right away and follow with physics, chemistry, computer programming, etc., as soon as possible. The department publishes a sample four-year plan of study for

fulfilling all degree requirements, including those to be taken during the first year, online at www.engr.washington.edu/files/curr_students/docs/EE_2014.pdf.

Department Admission Requirements

Because resources are limited, students must apply for admission to the electrical engineering program. Admission to the department is competitive and completion of the requirements does not guarantee admission. Appeal of the department's admission decision is possible only if there was an error in the data considered by the admissions committee. Additional information on the program and admission is available through the department's website.

Direct Freshman Admission

The Department of Electrical Engineering enrolls up to one-third of its incoming class directly out of high school, prior to completion of University-level prerequisites. Freshman applicants to the UW who list electrical engineering as their intended major are automatically considered. Competitive applicants have taken or are taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

General Admission

Application for general admission is through the online College of Engineering Departmental Application. Application deadlines are February 1 for spring quarter and July 1 for autumn quarter

1. *Course Requirements:* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CHEM 142; 5 credits of English composition.
2. *Grade Requirements:* minimum overall 2.50 GPA and minimum 2.50 GPA in courses required for admission.

Nanoscience and Molecular Engineering Option (NME): Admission to the NME option is by self-selection and normally occurs in winter quarter of the junior year, upon completion of all electrical engineering prerequisites and formal admission to the BS electrical engineering major. Students who have completed NME 220 with a minimum 2.0 grade are eligible. To declare, students schedule an appointment with an EE undergraduate adviser. Students applying for the NME option should indicate that interest on their electrical engineering major application and discuss their interests/background in their application personal statement.

Graduation Requirements

General Education Requirements (81 credits)

1. *Written and Oral Communications:* 12 credits, to include one 5-credit English composition course from the University list; HCDE 231; HCDE 333 (or department-approved alternative).
2. *Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S) (25 credits):* Minimum 10 credits required in each area.
3. *Natural World (44 credits):*
 - a. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), and MATH 324.

b. *Science (20 credits)*: CHEM 142; PHYS 121, PHYS 122, PHYS 123

Major Requirements (80-81 credits)

1. *Computer Programming (9 credits)*: CSE 142, CSE 143
2. *Electrical Engineering Core (14 credits)*: E E 215, E E 233, E E 235
3. *Electrical Engineering Major Concentration Area (24 credits minimum)*
4. *Electrical Engineering Electives (up to 20 credits)*: See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
5. *Professional Issues*: One course. See adviser for list of acceptable courses. Course may also be counted toward Electrical Engineering Core, Electrical Engineering Major Concentration Area, or Electrical Engineering Electives requirement.
6. *Engineering Electives (10 credits)*: See adviser for list of acceptable courses.
7. *Statistics (3-4 credits)*: STAT 390/MATH 390 or IND E 315
8. *Grade Requirements*: Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Nanoscience and Molecular Engineering Option Requirements (80-81 credits)

1. *Computer Programming (9 credits)*: CSE 142, CSE 143
2. *Electrical Engineering Core (14 credits)*: E E 215, E E 233, E E 235
3. *Nanoscience and Molecular Engineering Courses (6 credits)*: NME 220, NME 221, NME 421
4. *Electrical Engineering Major Concentration Area (24 credits minimum)* See adviser for list of acceptable courses.
5. *Electrical Engineering Electives (up to 20 credits)*: See adviser for list of acceptable courses. Number of credits of the major concentration and electives should total 44.
6. *Professional Issues*: One course. See adviser for list of acceptable courses. Course may also be counted toward Electrical Engineering Core, Electrical Engineering Major Concentration Area, or Electrical Engineering Electives requirement.
7. *Engineering Electives (10 credits)*: See adviser for list of acceptable courses.
8. *Statistics (3-4 credits)*: STAT 390/MATH 390 or IND E 315
9. *Grade Requirements*: Minimum 2.00 GPA in all E E courses with no grade below 2.0 in any of these courses.

Electives (18-19 credits)

1. *Approved Non-Electrical Engineering Electives (10 credits)*: Selected from courses listed in the departmental handbook.
2. *Free Electives (8-9 credits)*

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Graduates with a degree in electrical engineering find employment in industries such as aerospace, communications, computer manufacturing, power distribution, consumer electronics, and biomedical engineering. Positions can be found focusing on the research, design, and testing of

new products; in technical sales and marketing; business consulting; and even growing areas such as intellectual property. Students who pursue graduate studies are quite successful in highly competitive national and international programs.

The BSEE program is accredited by the Accrediting Board for Engineering and Technology (ABET) and the department has adopted the following student outcomes:

- a. ability to apply knowledge of mathematics, science, and engineering
 - b. ability to apply knowledge of probability and statistics, including applications appropriate to the program name and objectives
 - c. ability to apply knowledge of mathematics through differential and integral calculus, basic science, and engineering sciences necessary to analyze and design complex electrical and electronic devices, software, and systems containing hardware and software components
 - d. ability to apply knowledge of advanced mathematics, typically involving differential equations, linear algebra, complex variables, and discrete mathematics
 - e. ability to design and conduct experiments, as well as to analyze and interpret data
 - f. ability to design a system, component, or process to meet desired needs
 - g. ability to function on multi-disciplinary teams
 - h. ability to identify, formulate, and solve engineering problems
 - i. understanding of professional and ethical responsibility
 - j. ability to communicate effectively
 - k. the broad education necessary to understand the impact of engineering solutions in a global and societal context
- *Instructional and Research Facilities:* The department maintains a number of instructional and research laboratories to support courses and independent study activities. There are three general-purpose computing laboratories. Instructional laboratories include a large instrumentation laboratory supporting numerous electronics courses; individual laboratories for digital design courses; a power laboratory to support the power/energy systems classes; and laboratories that support capstone design classes. Students participating in undergraduate research and independent study generally have access to the research laboratories of their supervising faculty member.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Many electrical engineering students participate every year in internship and co-op (cooperative education) programs. [The Engineering Co-op Office](#) is one source for companies recruiting for internship and co-op students. [The Center for Career Services](#) also lists a variety of internship opportunities.
 - *Department Scholarships:* Many scholarships specifically for electrical engineering majors and based on merit and financial need are awarded each year. Students interested in applying for these and other College of Engineering scholarships may

obtain information from the Department of Electrical Engineering Scholarship Award Committee Chair.

- *Student Organizations/Associations:* [The Institute of Electrical and Electronics Engineers \(IEEE\)](#), UW student chapter organizes social activities, workshops, field trips and other professional development opportunities. [Eta Kappa Nu \(HKN\)](#) is an invitation-only honor society for electrical engineering students. HKN organizes tutoring services, tutorial workshops, social activities, and community services projects.

Graduate Program

Graduate Program Coordinator
AE100R Paul Allen Center, Box 352500
(206) 543-2142
grad@ee.washington.edu

The Department of Electrical Engineering offers graduate programs leading to the degrees of Master of Science in Electrical Engineering (MSEE) and Doctor of Philosophy (PhD). Graduate courses and research programs are offered in biosystems, circuits and network theory, computational intelligence, computer networks and distributed systems, computer architecture, digital systems, software engineering, operating systems, microprocessors, VLSI design, control systems, electromagnetics (including optics and radio science), electronic materials (including devices and micro-electronics), energy systems (including power electronics and electric drives), signal and image processing, telecommunications, and virtual reality. Numerous interdisciplinary research opportunities exist, including projects relating to bioengineering, computer engineering, and marine acoustics. The department does extensive research in coordination with the University of Washington's Applied Physics laboratory and Washington Technology Center.

The MSEE degree may be earned in three ways, each of which requires the accumulation of 45 credits. A student may perform research and write a thesis; a student may pursue a one-quarter project as part of his or her studies; or a student may simply accumulate a suitable distribution of 45 credits of coursework. Coursework for each of the options is developed with the advice of faculty advisers as well as through the department advising staff.

For the PhD degree, students must pass the departmental qualifying examination, pass an advanced General Examination, pursue an original research problem, and report the results of that research in a dissertation that must be a contribution to knowledge. At least one year of coursework beyond the MSEE degree is usually desirable.

Master of Science in Electrical Engineering

Admission Requirements

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required. Official test scores must be submitted, along with a formal application, a statement of purpose, and a minimum of two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following

some additional preparation. Such applicants are strongly encouraged to contact the department for further information.

For more information on admission qualifications, visit the department's website at www.ee.washington.edu/admissions/graduate/index.html.

Degree Requirements

Master's students have the option of choosing between two different pathways for pursuing their degree:

1. *Thesis option:* The thesis option is best for students who wish to pursue an in-depth research experience with intended preparation for pursuing a PhD
2. *Coursework option:* A student whose main goal is to work in industry immediately upon graduation may find the coursework option more suitable to his or her needs.

These two options have several related requirements:

1. Complete a plan of study by second quarter of study
2. Complete a minimum of 45 credits
3. Register full time (10 credits) per quarter (less in summer)
4. Apply no more than 3 credits of E E 500. 1 credit required
5. Apply no more than 5 credits of E E 599 to the degree
6. Take 1 credit of E E 592, offered autumn quarter

Thesis Option

45 credits, as follows:

1. 9-12 credits of E E 700
2. At least 20 credits in E E courses numbered 500 and above
3. No more than 12 credits in E E 400-level courses
4. No more than 9 credits from non-E E courses

The thesis option is an opportunity to pursue an individual problem in depth and in close collaboration with a faculty member. Typical problems involve basic research or application of classroom principles to a professional problem beyond the routine practice of electrical engineering. Students who choose the thesis option must complete a written thesis and oral examination based upon the thesis material before their degree is granted.

Coursework Option

45 credits, as follows:

1. At least 25 credits in E E courses numbered 500 and above
2. No more than 12 credits in E E 400-level courses
3. No more than 9 credits from non-E E courses

The coursework option allows students to pursue the MSEE by taking a prearranged course load specific to each of the seven curriculum areas. A generic coursework option is also available. The curriculum group chair and the Graduate Program Coordinator must approve deviation from these prearranged plans.

Doctor of Philosophy

Admission Requirements

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required. Official test scores must be submitted, along with a formal application, a statement of purpose, and a minimum of two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following some additional preparation. Such applicants are strongly encouraged to contact the department for further information.

For more information on admission qualifications, visit the department's Website at www.ee.washington.edu/admissions/graduate/index.html.

Degree Requirements

Minimum 90 credits, to include:

The PhD is awarded based on general proficiency and distinctive attainments in electrical engineering, particularly on the demonstrated ability of independent investigation. As evidence of ability, the student must produce a doctoral dissertation embodying original research yielding a new contribution to knowledge and presented with a satisfactory degree of literary skill. The majority of PhD students hold master's degrees within the same field, although students with degrees in the physical sciences and other engineering fields are also admitted. To earn a PhD, students must:

1. Pass the department qualifying examination
2. Complete an individualized course of study approved by the student's PhD Supervisory Committee
3. Pass the University general examination
4. Prepare and defend a satisfactory dissertation based on original research
5. Complete at least 90 credits of coursework, independent study, and dissertation (60 of which must be completed at the UW), 18 of which must be graded credits
6. Maintain a cumulative minimum GPA of 3.00.
7. Complete 30 credits of dissertation credits (E E 800)

Research Groups

Facilities in the Department of Electrical Engineering include research laboratories for advanced digital systems, advanced power technology, applied electromagnetics, optics, remote sensing, applied signal and image processing, mechatronics and intelligent control, modern sensors, and semiconductor technology

Financial Aid

Research assistantships, teaching assistantships, scholarships, and graduate fellowships are available to qualified graduate students in all areas of electrical engineering. Most awards include a monthly stipend plus payment of tuition and fees.

E E 135 The Digital World of Multimedia (4) NW

Introduces signal processing concepts behind multimedia creation, storage, and communication. Includes digitizing, decomposing, and modifying sounds and images; coding information for compression, errors, and security; and basics of network communication. Team-oriented labwork involves creating digital sounds and images using MATLAB, and experiments with streaming media technology.

[View course details in MyPlan: E E 135](#)

E E 205 Introduction to Signal Conditioning (4) QSR

Introduces analog circuits interfacing sensors to digital systems. /includes connection, attenuation, amplification, sampling, filtering, termination, controls, Kirchhoff's Laws, sources, resistors, op amps, capacitors, inductors, PSice, and MATLAB. Intended for non-EE majors. Prerequisite: either MATH 126 or MATH 136; PHYS 122. Offered: W.

[View course details in MyPlan: E E 205](#)

E E 215 Fundamentals of Electrical Engineering (4) NW

Introduction to electrical engineering. Basic circuit and systems concepts. Mathematical models of components. Kirchhoff's laws. Resistors, sources, capacitors, inductors, and operational amplifiers. Solution of first and second order linear differential equations associated with basic circuit forms. Prerequisite: either MATH 136, or MATH 126 and either MATH 307 or AMATH 351, either of which may be taken concurrently; PHYS 122. Offered: AWSpS.

[View course details in MyPlan: E E 215](#)

E E 233 Circuit Theory (5)

Electric circuit theory. Analysis of circuits with sinusoidal signals. Phasors, system functions, and complex frequency. Frequency response. Computer analysis of electrical circuits. Power and energy. Two port network theory. Laboratory in basic electrical engineering topics. Prerequisite: 1.0 in E E 215. Offered: AWSpS.

[View course details in MyPlan: E E 233](#)

E E 235 Continuous Time Linear Systems (5)

Introduction to continuous time signal analysis. Basic signals including impulses, pulses, and unit steps. Periodic signals. Convolution of signals. Fourier series and transforms in discrete and continuous time. Computer laboratory. Prerequisite: either MATH 136, MATH 307, or AMATH 351, any of which may be taken

concurrently; PHYS 122; either CSE 142 or CSE 143, either of which may be taken concurrently. Offered: ¹⁵⁹¹AWSp.

[View course details in MyPlan: E E 235](#)

E E 271 Digital Circuits and Systems (5)

Overview of digital computer systems. Covers logic, Boolean algebra, combinational and sequential circuits and logic design; programmable logic devices; and the design and operation of digital computers, including ALU, memory, and I/O. Weekly laboratories. No credit if CSE 369 has been taken. Prerequisite: either CSE 142 or CSE 143. Offered: AWSpS.

[View course details in MyPlan: E E 271](#)

E E 294 Innovation Readiness: Cultivating an Innovation Mindset (5) I&S/NW

Explores concepts and principles of innovation readiness and entrepreneurial thinking. Looks at innovation as a process, not an accident. Develops set of skills for innovation in companies, communities, teams and schools, in technology, education, arts, retail, and science. Prerequisite: either C LIT 240, both ENGL 109 and 110, ENGL 111, ENGL 212, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: Sp.

[View course details in MyPlan: E E 294](#)

E E 299 Introductory Topics in Electrical Engineering (1-5, max. 10) NW

New and experimental approaches to basic electrical engineering. May include design and construction projects.

[View course details in MyPlan: E E 299](#)

E E 331 Devices and Circuits I (5)

Physics, characteristics, applications, analysis, and design of circuits using semiconductor diodes and field-effect transistors with an emphasis on large-signal behavior and digital logic circuits. Classroom concepts are reinforced through laboratory experiments and design exercises. Prerequisite: 1.0 in E E 233. Offered: AWSpS.

[View course details in MyPlan: E E 331](#)

E E 332 Devices and Circuits II (5)

Characteristics of bipolar transistors, large- and small- signal models for bipolar and field effect transistors, linear circuit applications, including low and high frequency analysis of differential amplifiers, current sources, gain stages and output stages, internal circuitry of op-amps, op-amp configurations, op-amp stability and compensation. Weekly laboratory. Prerequisite: 1.0 in E E 331. Offered: AWSpS.

[View course details in MyPlan: E E 332](#)

E E 341 Discrete Time Linear Systems (5)

Discrete time signals and systems, impulse response, convolution, Z-transforms, discrete time Fourier analysis. Computer laboratory. Prerequisite: 1.0 in E E 235. Offered: WSpS.

[View course details in MyPlan: E E 341](#)

E E 351 Energy Systems (5)

Develops understanding of modern energy systems through theory and analysis of the system and its components. Discussions of generation, transmission, and utilization are complemented by environmental and energy resources topics as well as electromechanical conversion, power electronics, electric safety, renewable energy, and electricity blackouts. Prerequisite: 1.0 in E E 233. Offered: ASp.

[View course details in MyPlan: E E 351](#)

E E 361 Applied Electromagnetics (5)

Introductory electromagnetic field theory and Maxwell's equations in integral and differential forms; uniform plane waves in linear media; boundary conditions and reflection and transmission of waves; guided waves; transmission lines and Smith chart; electrostatics. Prerequisite: 1.0 in E E 233; MATH 324; PHYS 123. Offered: AW.

[View course details in MyPlan: E E 361](#)

E E 371 Design of Digital Circuits and Systems (5)

Provides a theoretical background in, and practical experience with, tools, and techniques for modeling complex digital systems with the Verilog hardware description language, maintaining signal integrity, managing power consumption, and ensuring robust intra- and inter-system communication. Prerequisite: either E E 205 or E E 215; either E E 271 or CSE 369. Offered: jointly with CSE 371.

[View course details in MyPlan: E E 371](#)

E E 393 Advanced Technical Writing in Electrical Engineering (4)

Develops formal technical writing skills for engineering students. Includes organization and structure of papers and reports, clear and concise technical language, choice of appropriate terminology, and an overview of common grammatical errors. Covers implementation of figures, equations, and literature citations, with specific recommendations for electrical engineers. Prerequisite: either ENGR 231 or HCDE 231. Offered: AWSp.

[View course details in MyPlan: E E 393](#)

E E 398 Introduction to Professional Issues (1)

Covers topics of interest to students planning their educational and professional path, including salaries, the value of advanced degrees, societal expectations of engineering professionals, the corporate enterprise, ethical dilemmas, patents and trade secrets, outsourcing, and the global market. Offered: AWSp.

[View course details in MyPlan: E E 398](#)

E E 399 Special Topics in Electrical Engineering (1-5, max. 10)

New and experimental approaches to current electrical engineering problems. May include design and construction projects.

[View course details in MyPlan: E E 399](#)

E E 400 Advanced Topics in Electrical Engineering (1-5, max. 10)

Contemporary topics at the advanced undergraduate elective level. Faculty presents advanced elective topics not included in the established curriculum.

[View course details in MyPlan: E E 400](#)

E E 406 Engineering Design for K-12 Outreach (3)

Design process targeted toward development of relevant activities for K-12 audiences in such areas of science and engineering. Instruction in basic design process, design specification combined with an overview of relevant cognitive/social development in K-12. Prerequisite: either E E 271, E E 331, E E 341, E E 351 or E E 361.

[View course details in MyPlan: E E 406](#)

E E 415 Computer-Aided System Analysis and Design (3)

Concepts, principles, and techniques concerned with the design, testing, and application of general-purpose problem-oriented computer programs for analyzing large-scale systems.

[View course details in MyPlan: E E 415](#)

E E 416 Random Signals for Communications and Signal Processing (4)

Probability and random processes in communications. Random variables, distributions, and expectation. Statistical filter design for detection and estimation. Prerequisite: E E 341; either STAT 390 or IND E 315. Offered: A.

[View course details in MyPlan: E E 416](#)

E E 417 Modern Wireless Communications (4)

Introduction to wireless networks as an application of basic communication theorems. Examines modulation techniques for digital communications, signal space, optimum receiver design, error performance, error control coding for high reliability, multipath fading and its effects, RF link budget analysis, WiFi and Wimax systems. Prerequisite: E E 341; either IND E 315, MATH 390, or STAT 390. Offered: W.

[View course details in MyPlan: E E 417](#)

E E 418 Network Security and Cryptography (3)

Fundamental principles of cryptography and its application to network and communication security. An introduction to the fundamental tools in cryptography and the protocols that enable its application to network and communication security. Prerequisite: MATH 308; either MATH 390, STAT 390, or IND E 315. Offered: A.

[View course details in MyPlan: E E 418](#)

E E 420 Design in Communications (4)

Design projects in communications. Frequent projects solved by student teams. Reports and presentations. Prerequisite: 1.0 in E E 417 which may be taken concurrently. Offered: Sp.

[View course details in MyPlan: E E 420](#)

E E 423 Introduction to Synthetic Biology (3)

Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 423/CSE 486; A.

[View course details in MyPlan: E E 423](#)

E E 424 Advanced Systems and Synthetic Biology (3)

Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology.

Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with BIOEN 424/CSE 487; W.

[View course details in MyPlan: E E 424](#)

E E 425 Laboratory Methods in Synthetic Biology (4)

Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy.

Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with BIOEN 425/CSE 488; W.

[View course details in MyPlan: E E 425](#)

E E 426 Capstone Project in Synthetic Biology (4) *E. KLAVINS*

Capstone design experience in synthetic biology. Provides students with skills in handling open-ended design problems in synthetic biology. Students participate on a team that designs, builds and tests a new transgenic microorganism with potential applications ranging from advanced materials, bio-sensing and/or remediation, or human health. Prerequisite: either BIOEN 425, E E 425, or CSE 488; CSE 142 Offered: Sp.

[View course details in MyPlan: E E 426](#)

E E 433 Analog Circuit Design (5)

Design of analog circuits and systems applying modern integrated circuit technology: operational amplifiers, differential amplifiers, active filters, voltage references and regulators. Prerequisite: 1.0 in E E 332. Offered: A.

[View course details in MyPlan: E E 433](#)

E E 436 Medical Instrumentation (4)

Introductory course in the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound systems, electrical safety, and the design of clinical electronics. Laboratory included. For upper-division and first-year graduate students preparing for careers in bioengineering - both research and industrial. Prerequisite: E E 332. Offered: Sp.

[View course details in MyPlan: E E 436](#)

E E 438 Instrumentation Design Project Capstone (5) *R. DARLING*

Team-based design for developing an electronic instrumentation system and constructing and validating a

prototype using modern printed circuit board technology. Teams develop design requirements; investigate tradeoffs for miniaturization, integration, performance, and cost; and consider use cases, failure modes, manufacturability, and testability. Includes extensive laboratory. Prerequisite: either E E 433 or E E 436. Offered: Sp.

[View course details in MyPlan: E E 438](#)

E E 440 Introduction to Digital Imaging Systems (4)

Image representation and standards, visual perception and color spaces, spatial domain image filtering and enhancement, image restoration, image transforms, image and video coding, image geometrical transformation and camera modeling. Prerequisite: E E 341. Offered: A.

[View course details in MyPlan: E E 440](#)

E E 442 Digital Signals and Filtering (3)

Methods and techniques for digital signal processing. Review of sampling theorems, A/D and D/A converters. Demodulation by quadrature sampling. Z-transform methods, system functions, linear shift-invariant systems, difference equations. Signal flow graphs for digital networks, canonical forms. Design of digital filters, practical considerations, IIR and FIR filters. Digital Fourier transforms and FFT techniques. Prerequisite: 1.0 in E E 341. Offered: W.

[View course details in MyPlan: E E 442](#)

E E 443 Design and Application of Digital Signal Processing (5)

Application of learned theories/algorithms and available computer technologies to modern image and speech processing problems. Two-dimensional signals and systems. Image transform, enhancement, restoration, coding. Characteristics of speech signals, linear predictive coding (LPC) of speech, pitch detection, and LPC speech synthesis, speech recognition, hardware designs for signal processing. Prerequisite: 1.0 in E E 442. Offered: Sp.

[View course details in MyPlan: E E 443](#)

E E 447 Control System Analysis I (4)

Linear Servomechanism theory and design principles. Pole-zero analysis, stability of feedback systems by root locus and real-frequency response methods. Design methods of Bode and Nichols. Introduction to advanced topics in automatic control theory, state variable methods. Prerequisite: E E 233; E E 235; MATH 308. Offered: A.

[View course details in MyPlan: E E 447](#)

E E 448 Systems, Controls, and Robotics Capstone (4-)

In-depth control engineering design experience in small design teams. Includes project planning and management, reporting, and technical communication. Student teams design, implement, test, and report on their project results, Includes lectures on selected topics, e.g., project management, intellectual property, and some control engineering topics. Prerequisite: E E 447. Offered: W.

[View course details in MyPlan: E E 448](#)

E E 449 Systems, Controls, and Robotics Capstone (-4)

In-depth control engineering design experience in small design teams. Includes project planning and management, reporting, and technical communication. Student teams design, implement, test, and report on their project results, Includes lectures on selected topics, e.g., project management, intellectual property, and some control engineering topics. Prerequisite: E E 448. Offered: Sp.

[View course details in MyPlan: E E 449](#)

E E 451 Wind Energy (4)

Covers the operation and modeling of wind energy, wind statistics, wind generators and converters, wind energy systems, challenges to wind energy development, impacts of wind energy on the power grid, and existing and potential solutions to wind energy integration. Prerequisite: E E 351. Offered: Sp, odd years.

[View course details in MyPlan: E E 451](#)

E E 452 Power Electronics Design (5)

Electronic conversion and control of electrical power. Includes semiconductor switching devices, power converter circuits, design of magnetics, and control of power converters. Also ac/ac, ac/dc, and dc/dc power converters; circuit simulation; extensive laboratory work; a four-week power converter design project.

Prerequisite: 1.0 in E E 331; 1.0 in E E 351. Offered: A.

[View course details in MyPlan: E E 452](#)

E E 453 Electric Drives (5)

Elements of drive systems, speed-torque characteristics of electric motors and industrial loads, solid-state converter. Starting and braking methods of loaded motors. Speed control of electric motors. Solid-state drives. Transient analysis of loaded motors. Special forms of individual- and multimotor drives. Prerequisite: 1.0 in E E 452. Offered: W.

[View course details in MyPlan: E E 453](#)

E E 454 Power System Analysis (4)

Introduction to methods of analyzing power systems. Includes symmetrical components, calculation of line parameters, representation of transmission lines and power components, and power flow control. Prerequisite: 1.0 in E E 351. Offered: A.

[View course details in MyPlan: E E 454](#)

E E 455 Power System Dynamics and Protection (4)

Analysis of symmetrical and unsymmetrical power systems' networks, fault analysis, and stability studies.

Prerequisite: 1.0 in E E 351. Offered: W.

[View course details in MyPlan: E E 455](#)

E E 456 Computer-Aided Design in Power Systems (4)

Design-oriented course in power system engineering. Students are assigned a project concerning system operation and planning, steady-state and dynamic behaviors of power systems, or distribution systems. Each involves formulation of design criteria, development of approach, application of existing software. Prerequisite: either 1.0 in E E 454 or 1.0 in E E 455. Offered: Sp.

[View course details in MyPlan: E E 456](#)

E E 457 Electric Energy Distribution Systems (4)

Introduction to electric utility distribution systems. Primary and secondary network analysis and design, distribution substation problems, distribution transformers, capacitor application, overcurrent and overvoltage protection. System planning and reliability. Prerequisite: 1.0 in E E 351. Offered: W.

[View course details in MyPlan: E E 457](#)

E E 461 Introduction to Computer-Communication Networks (4)

Computer network architectures and protocols. OSI Layers and performance analysis. Transmission media, switching, multiple access arbitration. Network routing, congestion control, flow control. Transport protocols, real-time, multicast, network security. Prerequisite: CSE 143; either MATH 390/STAT 390, STAT 391, or IND E 315. Offered: Sp.

[View course details in MyPlan: E E 461](#)

E E 462 Electromagnetics I: Microwave Engineering (4)

Covers microwave transmission line models and their applications; electromagnetic waves in layered media; mode structures in metallic and dielectric waveguides; resonators and cavities; and Green's functions.

Prerequisite: minimum grade of 1.0 in E E 361. Offered: A.

[View course details in MyPlan: E E 462](#)

E E 463 Microwave Electronic Design (4)

Design of microwave circuits using S-parameter techniques. Measurement techniques, CAD of microwave systems. Includes design, fabrication, and evaluation of a microwave amplifier. Prerequisite: E E 361; E E 332,

which may be taken concurrently. Offered: W.

[View course details in MyPlan: E E 463](#)

E E 464 Antennas: Analysis and Design (4)

Fundamentals of antennas, analysis, synthesis, and computer-aided design, and applications in communications, remote sensing, and radars. Radiation pattern, directivity, impedance, wire antennas, arrays, numerical methods for analysis, horn antennas, microstrip antennas, and reflector antennas. Prerequisite: 1.0 in E E 361. Offered: Sp.

[View course details in MyPlan: E E 464](#)

E E 465 Fiber Optics, Devices, and Applications (4)

Wave propagation in optical waveguiding structures, signal distortion, coupling of modes, modulation, sources and detectors, fabrication and measurement methods, communication and sensor systems. Prerequisite: E E 331; E E 361.

[View course details in MyPlan: E E 465](#)

E E 469 Computer Architecture I (5)

Introduction to computer architecture. Assembly and machine language, microprocessor organization including control and datapath. Computer arithmetic. Memory systems and caching. Performance modeling of microprocessors. Prerequisite: either E E 271 or CSE 369; CSE 143 Offered: jointly with CSE 469; AWSp.

[View course details in MyPlan: E E 469](#)

E E 470 Computer Architecture II (4)

Advanced computer architecture. Performance evaluation and energy efficiency. Instruction set architectures. Instruction-level parallelism. Modern microprocessor micro-architecture. Thread-level parallelism. Cache coherency and memory consistency in shared-memory multiprocessors. Memory hierarchy. GPU architecture. Warehouse-scale computing. Trends in computer design. Prerequisite: CSE 351; either CSE 469, E E 469, or E E 471. Offered: jointly with CSE 470.

[View course details in MyPlan: E E 470](#)

E E 473 Linear Integrated Circuits (5)

Design of linear integrated circuits applying modern MOS and BJT integrated circuit technologies: single-stage amplifiers; current-mirror DC bias and active load circuits; stability and frequency compensation of single-stage and two-stage operational amplifiers; output stages; current and voltage reference circuits. Prerequisite: 1.0 in E E 332. Offered: W.

[View course details in MyPlan: E E 473](#)

E E 474 Introduction to Embedded Systems (4)

Introduces the specification, design, development, and test of real time embedded system software. Use of a modern embedded microcomputer or microcontroller as a target environment for a series of laboratory projects and a comprehensive final project. Prerequisite: CSE 143. Offered: jointly with CSE 474; AWSpS.

[View course details in MyPlan: E E 474](#)

E E 475 Embedded Systems Capstone (5)

Capstone design experience. Prototype a substantial project mixing hardware, software, and communications. Focuses on embedded processors, programmable logic devices, and emerging platforms for the development of digital systems. Provides a comprehensive experience in specification, design, and management of contemporary embedded systems. Prerequisite: either E E 271 or CSE 369; either CSE 466, E E 472, or CSE 474/E E 474. Offered: jointly with CSE 475; AWSp.

[View course details in MyPlan: E E 475](#)

E E 476 Digital Integrated Circuit Design (5)

Comprehensive view of digital integrated circuit design. Topics to be covered include the design of inverters, static logic circuits, switch logic, and synchronous logic. Students design, simulate, and layout a complete digital IC using modern computer-aided design tools. Prerequisite: either E E 205 or E E 215; E E 271. Offered:

A.

[View course details in MyPlan: E E 476](#)**E E 477 VLSI II (5)**

Provides a fairly deep understanding of how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 331; E E 476. Offered: W.

[View course details in MyPlan: E E 477](#)**E E 482 Semiconductor Devices (4)**

Fundamentals of semiconductor theory: carrier diffusion and drift; concept of direct and indirect energy materials, effective mass of mobile carriers; device physics: homo- and heterojunctions, operating principles of bipolar, junction, and MOS field-effect transistors. Prerequisite: E E 331; E E 361. Offered: A.

[View course details in MyPlan: E E 482](#)**E E 483 Nanotechnology Design (4) S. DUNHAM**

Open-ended design of a nanoscale solid state device using advanced technology computer-aided design (TCAD) tools. Prerequisite: EE 482. Offered: W.

[View course details in MyPlan: E E 483](#)**E E 484 Sensors and Sensor Systems (4)**

Introduction to optical and solid-state chemical and physical sensors. Topics include transduction mechanisms, design parameters, fabrication methods and applications. Prerequisite: E E 331. Offered: Sp.

[View course details in MyPlan: E E 484](#)**E E 485 Introduction to Photonics (4)**

Introduction to optical principles and phenomena. Topics include electromagnetic theory of light, interference, diffraction, polarization, photon optics, laser principles, Gaussian beam optics, semiconductor optics, semiconductor photonic devices. Prerequisite: E E 361 or PHYS 123. Offered: W.

[View course details in MyPlan: E E 485](#)**E E 486 Fundamentals of Integrated Circuit Technology (3)**

Processing physics, chemistry, and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation, laser annealing, oxidation, chemical vapor deposition, photoresists. Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: EE 331 or MSE 351. Offered: jointly with MSE 486; AW.

[View course details in MyPlan: E E 486](#)**E E 488 Photonics Design Capstone (4)**

Design of optical and optoelectronic devices using fundamental principles of photonics. Recent advances in contemporary research. Construction of microscopes or spectrometers. Involves a major design experience. Prerequisite: E E 485.

[View course details in MyPlan: E E 488](#)**E E 490 Reading and Research (1-5, max. 25)**

Reading and research in the field under supervision of an E E faculty member. Credit/no-credit only.

[View course details in MyPlan: E E 490](#)**E E 491 Undergraduate Seminar (1, max. 2)**

Weekly seminars on current topics in electrical engineering. Credit/no-credit only.

[View course details in MyPlan: E E 491](#)**E E 492 Electrical Engineering Leadership Seminar (1)**

Weekly seminar with program alumni presenting their workforce experience, demonstrating the depth and

breadth possible in the field and best practices. Credit/no-credit only. Offered: W.

[View course details in MyPlan: E E 492](#)

E E 497 Engineering Entrepreneurial Capstone I (4)

Completion of an industry-motivated and mentored engineering project to develop design skills. Overseen by UW Faculty and guided by practicing engineers sponsored by industry. Emphasizes cross-disciplinary teamwork. Offered: W.

[View course details in MyPlan: E E 497](#)

E E 498 Engineering Entrepreneurial Capstone II (4)

Completion of an industry-motivated and mentored engineering project to develop design skills. Overseen by UW Faculty and guided by practicing engineers sponsored by industry. Emphasizes cross-disciplinary teamwork. Prerequisite: E E 497. Offered: Sp.

[View course details in MyPlan: E E 498](#)

E E 499 Undergraduate Research and Special Projects (1-5, max. 10)

Undergraduate research or design project carried out under the supervision of a faculty sponsor.

[View course details in MyPlan: E E 499](#)

E E 500 Graduate Seminar (1, max. 9)

Weekly seminars on current topics in electrical engineering. More than one section may be offered in a given quarter. Credit/no-credit only.

[View course details in MyPlan: E E 500](#)

E E 501 Academic Writing (4) *A. MAMISHEV*

Develops formal technical writing skills for graduate engineering students. Covers organization and structure of archival papers, theses, reports, and proposals; concise technical language; terminology; literature search; peer review process; analysis of grammatical and stylistic errors; organization of multi-authored writing and implementation of figures, equations, and citations. Offered: Sp.

[View course details in MyPlan: E E 501](#)

E E 503 Modeling of MEMS (4)

Microelectro mechanical systems (MEMS) including lumped modeling, conjugate power variables, electrostatic and magnetic actuators, linear transducers, linear system dynamics, design optimization, and thermal analysis. Numerical modeling topics include electro (quasi) static, mechanical, electro mechanical, magneto (quasi) static, and fluidic phenomena; parametric analysis, visualization of multi-dimensional solutions; and verification of results.

[View course details in MyPlan: E E 503](#)

E E 504 Introduction to Microelectro Mechanical Systems (4)

Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with M E 504/MSE 504.

[View course details in MyPlan: E E 504](#)

E E 505 Probability and Random Processes (4)

Foundations for the engineering analysis of random processes: set theoretic fundamentals, basic axioms of probability models, conditional probabilities and independence, discrete and continuous random variables, multiple random variables, sequences of random variables, limit theorems, models of stochastic processes, noise, stationarity and ergodicity, Gaussian processes, power spectral densities. Prerequisite: graduate standing and understanding of probability at the level of E E 416.

[View course details in MyPlan: E E 505](#)

E E 506 Fundamentals of Wireless Communication (4)

Reviews fundamentals of wireless communications including signal and noise theory, modulation techniques, fading channels, error analysis, synchronization, and coding. Prerequisite: E E 505.

[View course details in MyPlan: E E 506](#)

E E 507 Communication Theory II (3)

Review of stochastic processes. Communication system models. Channel noise and capacity. Optimum detection, modulation, and coding, convolutional coders and decoders. Typical channels, random and fading channels. Waveform communication, optimum filters. Prerequisite: E E 506.

[View course details in MyPlan: E E 507](#)

E E 508 Stochastic Processes in Engineering (3) A. GHATE

Non-measure theoretic introduction to stochastic processes. Topics include Poisson processes, renewal processes, Markov and semi-Markov processes, Brownian motion, and martingales, with applications to problems in queuing, supply chain management, signal processing, control, and communications. Prerequisite: E E 505. Offered: jointly with IND E 508; W.

[View course details in MyPlan: E E 508](#)

E E 510 Mathematical Foundations of Systems Theory (4)

Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with A A 510/CHEM E 510/M E 510.

[View course details in MyPlan: E E 510](#)

E E 511 Introduction to Statistical Learning (4)

Covers classification and estimation of vector observations, including both parametric and nonparametric approaches. Includes classification with likelihood functions and general discriminant functions, density estimation, supervised and unsupervised learning, feature reduction, model selection, and performance estimation. Prerequisite: either E E 505 or CSE 515.

[View course details in MyPlan: E E 511](#)

E E 512 Graphical Models in Pattern Recognition (4)

Bayesian networks, Markov random fields, factor graphs, Markov properties, standard models as graphical models, graph theory (e.g., moralization and triangulation), probabilistic inference (including pearl's belief propagation, Hugin, and Shafer-Shenoy), junction trees, dynamic Bayesian networks (including hidden Markov models), learning new models, models in practice. Prerequisite: E E 508; E E 511.

[View course details in MyPlan: E E 512](#)

E E 514 Information Theory I (4)

Includes entropy, mutual information, Shannon's source coding theorem, data compression to entropy limit, method of types, Huffman coding, Kraft inequality, arithmetic coding, Kolmogorov complexity, communication at channel capacity (channel coding), coding theory, introduction to modern statistical coding techniques, differential entropy, and Gaussian channels. Prerequisite: E E 505.

[View course details in MyPlan: E E 514](#)

E E 515 Information Theory II (4)

Includes advanced modern statistical coding techniques (statistical coding), advanced codes and graphs, source coding with errors (rate distortion), alternating minimization principles, channel coding with errors, network information theory, multiple description coding, and information theory in other areas including pattern recognition, bio-informatics, natural language processing, and computer science. Prerequisite: E E 514.

[View course details in MyPlan: E E 515](#)

E E 516 Computer Speech Processing (4)

Introduction to automatic speech processing. Overview of human speech production and perception.

Fundamental theory in speech coding, synthesis and reproduction, as well as system design methodologies.¹⁶⁰⁰
Advanced topics include speaker and language identification and adaptation. Prerequisite: E E 505; E E 518.
[View course details in MyPlan: E E 516](#)

E E 517 Continuous-Space Language Processing (4)

Introduction to human language technology, with in-depth coverage of continuous-space statistical models of language and application to natural language processing tasks. Methods covered include low rank distributional representations, neural networks, and log bilinear statistical models, which are leveraged for language modeling, similarity scoring, classification, and translation/generation. Prerequisite: E E 505.

[View course details in MyPlan: E E 517](#)

E E 518 Digital Signal Processing (4)

Covers discrete-time processing of continuous-time signals; sampling rate conversion; frequency magnitude, phase delay, and group delay; design techniques for non-recursive (FIR) filters; multirate signal processing; all-pass/minimum phase decompositions; discrete Fourier transforms, fast Fourier transforms; overlap-add; short-time Fourier analysis; and filter banks. Includes applications such as machine learning. Prerequisite: E E 442.

[View course details in MyPlan: E E 518](#)

E E 519 Stochastic Analysis of Data From Physical Systems (4)

Computer systems for acquisition and processing of stochastic signals. Calculation of typical descriptors of such random processes as correlation functions, spectral densities, probability densities. Interpretation of statistical measurements made on a variety of physical systems (e.g., electrical, mechanical, acoustic, nuclear). Lecture plus laboratory. Prerequisite: E E 505.

[View course details in MyPlan: E E 519](#)

E E 520 Spectral Analysis of Time Series (4)

Estimation of spectral densities for single and multiple time series. Nonparametric estimation of spectral density, cross-spectral density, and coherency for stationary time series, real and complex spectrum techniques. Bispectrum. Digital filtering techniques. Aliasing, prewhitening. Choice of lag windows and data windows. Use of the fast Fourier transform. Prerequisite: one of STAT 342, STAT 390, STAT 481, STAT 509/CS&SS 509/ECON 580, or IND E 315. Offered: jointly with STAT 520.

[View course details in MyPlan: E E 520](#)

E E 521 Quantum Mechanics for Engineers (4)

Covers the basic theory of quantum mechanics in the context of modern examples of technological importance involving 1D, 2D, and 3D nanomaterials. Develops a qualitative and quantitative understanding of the principles of quantization, band structure, density of states, and Fermi's golden rule (optical absorption, electron-impurity/phonon scattering). Prerequisite: MATH 307 or AMATH 351.

[View course details in MyPlan: E E 521](#)

E E 523 Introduction to Synthetic Biology (3)

Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/CSE 586/MOLENG 525.

[View course details in MyPlan: E E 523](#)

E E 524 Advanced Systems and Synthetic Biology (3)

Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with BIOEN 524/CSE 587; W.

[View course details in MyPlan: E E 524](#)

E E 525 VLSI II (5)

Analyzes how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525.

Prerequisite: E E 476.

[View course details in MyPlan: E E 525](#)

E E 526 VLSI III (4)

Ultra-high speed digital logical families based on output prediction logic; high-speed division; input and output pad design; state-of-the-art latch and flip-flop design; clock distribution, including PLLs and DLLs; noise considerations in high-speed digital IC design. Prerequisite: E E 477 or E E 525.

[View course details in MyPlan: E E 526](#)

E E 527 Microfabrication (4)

Principles and techniques for the fabrication of microelectronics devices and integrated circuits. Includes clean room laboratory practices and chemical safety, photolithography, wet and dry etching, oxidation and diffusion, metallization and dielectric deposition, compressed gas systems, vacuum systems, thermal processing systems, plasma systems, and metrology. Extensive laboratory with limited enrollment.

[View course details in MyPlan: E E 527](#)

E E 528 Physics and Modeling of VLSI Fabrication (4)

Physics of VLSI fabrication, emphasizing processing modeling and simulation. CMOS process, sequences, point defects and diffusion, ion implantation and annealing, film growth kinetics, deposition and etching, advanced photolithography. Process interactions and process integration. Extensive use of process simulation software.

Prerequisite: either E E 486/MSE 467, E E 502/M E 504/MSE 504, or E E 527. Offered: jointly with MSE 528.

[View course details in MyPlan: E E 528](#)

E E 529 Semiconductor Optoelectronics (4)

Covers optical processes in semiconductors; optical waveguide theory; junction theory; LEDs; lasers photodetectors; photovoltaics; and optical modulators and switches. Prerequisite: E E 485. Offered: jointly with MSE 529.

[View course details in MyPlan: E E 529](#)

E E 530 Wavelets: Data Analysis, Algorithms, and Theory (3)

Review of spectral analysis. Theory of continuous and discrete wavelets. Multiresolution analysis. Computation of discrete wavelet transform. Time-scale analysis. Wavelet packets. Statistical properties of wavelet signal extraction and smoothers. Estimation of wavelet variance. Prerequisite: some Fourier theory and linear algebra; MATH 390/STAT 390, ECON 481 or STAT 481, STAT 509/CS&SS 509/ECON 580, STAT 513, or IND E 315.

Offered: jointly with STAT 530; Sp.

[View course details in MyPlan: E E 530](#)

E E 531 Semiconductor Devices and Device Simulation (4)

Physical principles in semiconductor devices. Generation, recombination, p-n junctions, MOS, metal-semiconductor and other interface structures. Carrier transport at low and high level injection levels. Device simulation used to demonstrate physical principles and basic device operation. Project using device simulation.

Prerequisite: E E 482.

[View course details in MyPlan: E E 531](#)

E E 533 Photodetectors and Photodetection (4)

Includes both the device physics and signal processing aspects of photodetection. Photodiodes, photoconductors, photomultipliers, and solar cells. Noise, signal-to-noise ratios, and imaging considerations. Prerequisite: E E 482.

[View course details in MyPlan: E E 533](#)

E E 534 Power Electronics (4)

Detailed study of DC-to-AC inverters, pulse-width modulated and resonant DC-to-DC converter topologies; drive and protection circuits for efficient switching of semiconductor devices. Includes extensive computer-aided circuit simulation and power supply control.

[View course details in MyPlan: E E 534](#)

E E 536 Design of Analog Integrated Circuits and Systems (4)

Design of analog VLSI: specifications, design, simulation, layout. Covering CMOS and Bi CMOS technologies. Prerequisite: E E 433.

[View course details in MyPlan: E E 536](#)

E E 537 Computation Methods for Circuit Analysis and Simulation (3)

Introduction to numerical algorithms and computer-aided techniques for the simulation of electronic circuits. Theoretical and practical aspects of important analyses: large-signal nonlinear DC, small-signal AC, nonlinear transient, and large-signal steady-state. Simulation concepts applied to the modeling and characterization of various electronic devices.

[View course details in MyPlan: E E 537](#)

E E 538 Topics in Electronic Circuit Design (1-5, max. 16)

Topics of current interest in electronic circuit and system design. Course content varies from year to year, based on current professional interests of the faculty member in charge.

[View course details in MyPlan: E E 538](#)

E E 539 Advanced Topics in Solid-State Electronics (1-5, max. 16)

Lectures or discussions of topics of current interest in the field of solid-state electronics for advanced graduate students having adequate preparation in solid-state theory. Subject matter may vary according to the interests of students and faculty.

[View course details in MyPlan: E E 539](#)

E E 540 VLSI Testing (4)

VLSI testing and design-for-test techniques, covering digital systems, mixed analog-digital systems, integrated sensor systems, and radio-frequency systems. Projects include test algorithm design, testing of fabricated circuits, and parametric testing of state-of-the-art industry circuits. Prerequisite: either E E 477 or E E 525.

[View course details in MyPlan: E E 540](#)

E E 541 Automatic Layout of Integrated Circuits (4)

Examines the algorithms behind the following commonly used physical design automation tools: floorplanning, partitioning, placement, routing, compaction, and verification. Prerequisite: either E E 271 or CSE 370; CSE 143.

[View course details in MyPlan: E E 541](#)

E E 542 Advanced Embedded Systems Design (5)

Studies advanced embedded system design principles and practices. Emphasizes formal design methodologies such as hardware-software co-design, investigates techniques for performance optimization, and examines distributed embedded systems. Prerequisite: E E 478.

[View course details in MyPlan: E E 542](#)

E E 543 Models of Robot Manipulation (4)

Mathematical models of arbitrary articulated robotic (or biological) arms and their application to realistic arms and tasks, including the homogeneous coordinate model of positioning tasks, the forward and inverse kinematic models, the Jacobian Matrix, and the recursive Newton-Euler dynamic model. Prerequisite: linear algebra.

[View course details in MyPlan: E E 543](#)

E E 546 Advanced Topics in Control System Theory (1-5, max. 16)

Topics of current interest in control system theory for advanced graduate students with adequate preparation in

linear and nonlinear system theory. Prerequisite: permission of instructor. Offered when adequate enrollment develops prior to close of advance registration.

[View course details in MyPlan: E E 546](#)

E E 547 Linear Systems Theory (4)

Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Offered: jointly with A A 547/M E 547.

[View course details in MyPlan: E E 547](#)

E E 548 Linear Multivariable Control (3)

Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 548/M E 548.

[View course details in MyPlan: E E 548](#)

E E 549 Estimation and System Identification (3)

Fundamentals of state estimation for linear and nonlinear systems. Discrete and continuous systems. Probability and stochastic systems theory. Models with noise. Kalman-Bucy filters, extended Kalman filters, recursive estimation. Numerical issues in filter design and implementation. Prerequisite: either A A 547, E E 547, or M E 547. Offered: jointly with A A 549/M E 549.

[View course details in MyPlan: E E 549](#)

E E 550 Nonlinear Optimal Control (3)

Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with A A 550/M E 550.

[View course details in MyPlan: E E 550](#)

E E 551 Wind Energy (4)

Covers the operation and modeling of wind energy, wind statistics, wind generators and converters, wind energy systems, challenges to wind energy development, impacts of wind energy on the power grid, and existing and potential solutions to wind energy integration. Prerequisite: E E 351.

[View course details in MyPlan: E E 551](#)

E E 552 Power Systems Dynamics and Control (4)

Advanced computer modeling and analysis of power systems. Application of modern systems and control theories. Prerequisite: E E 351 and E E 455.

[View course details in MyPlan: E E 552](#)

E E 553 Power System Economics (4)

Economic structure of power systems. Problem formulation, optimization methods and programming for economic analysis of power system operation and planning. Economic dispatch, load forecasting, unit commitment, interchange, planning and reliability analysis. Provides background to pursue advanced work in planning and operation.

[View course details in MyPlan: E E 553](#)

E E 554 Large Electric Energy Systems Analysis (4)

Deals with problems whose solution depends upon the inversion of sparse matrices that occur in the planning and operational studies of large interconnected energy systems. Application studies include system model development, state estimation, and load flow. Prerequisite: E E 456.

[View course details in MyPlan: E E 554](#)

E E 556 Analyzing the Power Grid (4)

Discusses the models of the various components of an electricity grid and how they are combined into a set of equations that can be used to analyze the grid under normal, steady state conditions, as well as to calculate fault currents and assess its transient stability.

[View course details in MyPlan: E E 556](#)

E E 557 Dynamics of Controlled Systems (4)

Explores control techniques for high precision motion control. Covers state variable feedback of linear and nonlinear, multivariable systems in depth. Uses physical system modeling, graphical analysis, and numerical analysis to describe system performance. Uses simulation mini-projects to emphasize the dynamics of controlled systems and their performance.

[View course details in MyPlan: E E 557](#)

E E 558 Substation and Distribution Automation (4)

Examines how smart grid technologies affect substation and distribution operations and how history, customer expectations, and state and federal policies have shaped the existing infrastructure. Studies the capabilities of various emerging technologies to assess how they are able to solve existing issues.

[View course details in MyPlan: E E 558](#)

E E 559 Special Topics in Electrical Energy Systems (1-5, max. 16)

Topics of current interest in electrical power and energy devices and systems. Content varies from year to year, based on current professional interests of faculty member in charge.

[View course details in MyPlan: E E 559](#)

E E 560 Advanced Electric Machines and Drives (4)

Fundamentals of electric machines and drives, including brush DC, brushless DC, PM synchronous, induction machines, inverter topologies, and control techniques. Evaluation of torque production and control in machines with electronic drives (motor controllers).

[View course details in MyPlan: E E 560](#)

E E 562 Artificial Intelligence for Engineers (3)

Covers main areas of artificial intelligence (AI) without need for extensive prerequisites. Programming languages for AI; problem solving; representations; control strategies; searching strategies; predicate calculus; rule-based deduction; goal-directed planning; knowledge-based systems. Prerequisite: CSE 373.

[View course details in MyPlan: E E 562](#)

E E 565 Computer-Communication Networks I (4)

Network architectures and protocols; layered model; reliable transmission protocols at the data control layer; Transmission Control Protocols (TCP); routing algorithms; performance modeling, and analysis of packet-switched networks. Multi-access. Projects involving routing and multi-access principles. Prerequisite: E E 505.

[View course details in MyPlan: E E 565](#)

E E 566 Computer-Communication Networks II (3)

Local area, metropolitan area, satellite, and packet radio networks; routing algorithms for wide area networks; optimal design of packet-switched networks; congestion and flow control; fast packet switching; gigabit networks. Prerequisite: E E 565.

[View course details in MyPlan: E E 566](#)

E E 567 Mobile Radio Networks (4)

Wireless communication networks, including digital broadcasting, wireless LAN, wireless access networks and ultra wide band (UWB); OFDM modem design; dirty-paper coding; MAC and RLP; TCP/UDP over wireless; multi-radio networks; cross-layer protocol optimization; radio network planning. Prerequisite: E E 506; E E 565.

[View course details in MyPlan: E E 567](#)

E E 568 Digital Image Processing (4)

Digital image processing techniques and various special topics such as image restoration, image segmentation, multi-resolution imaging with wavelet transform, and image registration. Prerequisite: permission of instructor.

[View course details in MyPlan: E E 568](#)

E E 570 Manifolds and Geometry for Systems and Control (3)

Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate vs. coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with A A 570/M E 570; W, even years.

[View course details in MyPlan: E E 570](#)

E E 571 High Frequency Circuits and Antennas: Computation of Fields and Waves (4)

Planar microstrip structures are high frequency circuits and antennas used in communication, aerospace and computer industries. Examines the computation of fields and waves in such structures. How to calculate circuit parameters and radiation characteristics. Structures studied include microstrip lines, coupled lines, antennas, resonators, and discontinuities. Prerequisite: either E E 482 or E E 572.

[View course details in MyPlan: E E 571](#)

E E 572 Electromagnetics I: Microwave Engineering (4)

Covers microwave transmission line models and their applications; electromagnetic waves in layered media; mode structures in metallic and dielectric waveguides; resonators and cavities; and Green's functions.

Prerequisite: E E 361. Offered: A.

[View course details in MyPlan: E E 572](#)

E E 573 Electromagnetics II (4)

Covers Green's functions; radiation from apertures and beam waves; periodic structures and coupled-mode theory; dispersion and anisotropic media; antennas, apertures, and arrays; and scattering of waves by conducting and dielectric objects. Prerequisite: E E 572.

[View course details in MyPlan: E E 573](#)

E E 574 Antennas: Analysis and Design (4)

Covers fundamentals of antennas, analysis, synthesis, and computer-aided design; applications in communications, remote sensing, and radars; radiation pattern; directivity; impedance; wire antennas; arrays; numerical methods for analysis; horn antennas; microstrip antennas; and reflector antennas. Offered: Sp.

[View course details in MyPlan: E E 574](#)

E E 575 Radar Remote Sensing (4)

Introduces radar remote sensing. Covers the fundamentals of radar systems, monostatic and bistatic topologies, radar equation, range-time diagram; ambiguity function, pulse compression, elementary estimation and detection theory, spectrum estimation for underspread and overspread targets; interferometry, source imaging; and Time Difference of Arrival, Aperture Synthesis (SAR and ISAR).

[View course details in MyPlan: E E 575](#)

E E 576 Computer Vision (3)

Principles and methods for interpreting the three-dimensional world from images. Topics include feature detection, image segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: solid knowledge of linear algebra; good programming skills. Offered: jointly with CSE 576.

[View course details in MyPlan: E E 576](#)

E E 577 Special Topics in Computer Vision (3)

Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE 576/E E 576. Offered:

jointly with CSE 577.

[View course details in MyPlan: E E 577](#)

E E 578 Convex Optimization (4)

Basics of convex analysis: Convex sets, functions, and optimization problems. Optimization theory: Least-squares, linear, quadratic, geometric and semidefinite programming. Convex modeling. Duality theory. Optimality and KKT conditions. Applications in signal processing, statistics, machine learning, control communications, and design of engineering systems. Prerequisite: A A 510, CHEM E 510, E E 510 or M E 510. Offered: jointly with A A 578/M E 578; W.

[View course details in MyPlan: E E 578](#)

E E 579 Advanced Topics in Electromagnetics, Optics, and Acoustics (1-5, max. 16)

Topics of current interest in electromagnetics, optics, and acoustics. Content varies from year to year, based on current professional interests of faculty member in charge.

[View course details in MyPlan: E E 579](#)

E E 580 Geometric Methods for Non-Linear Control Systems (3)

Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with A A 580/M E 580; Sp, even years.

[View course details in MyPlan: E E 580](#)

E E 581 Digital Control System Design (4) *M. BERG*

Digital control system design by classical methods. Discrete-time systems and the z-transform. Modeling sampled-data systems. Frequency response of discrete time systems and aliasing. Nyquist stability criterion and gain and phase margins. Discrete-time control law determination by direct z-plane root locus and loop shaping methods. Includes hands-on-with-hardware projects. Prerequisite: AA/EE 447 or ME 471. Offered: jointly with A A 581/M E 581; W.

[View course details in MyPlan: E E 581](#)

E E 582 Introduction to Discrete Event Systems (3)

Modeling DES with automata and Petri nets. Languages. State estimation and diagnostics. Control specifications. Feedback control. Dealing with uncontrollability and unobservability. Dealing with blocking. Timed automata and Petri nets. Prerequisite: A A 447/E E 447/ M E 471. Instructors: Berg Offered: jointly with A A 582/M E 582; Sp, even years.

[View course details in MyPlan: E E 582](#)

E E 583 Nonlinear Control Systems (3)

Analysis of nonlinear systems and nonlinear control system design. Phase plane analysis. Lyapunov stability analysis. Describing functions. Feedback linearization. Introduction to variable structure control. Prerequisite: A A 447/E E 447/M E 471. Offered: jointly with A A 583/M E 583.

[View course details in MyPlan: E E 583](#)

E E 585 System Identification and Adaptive Control (3)

Theory and methods of system identification and adaptive control. Identification of linear-in-parameter systems, using recursive LS and extended LS methods; model order selection. Indirect and direct adaptive control. Controller synthesis, transient and stability properties. Offered: jointly with A A 585/M E 585.

[View course details in MyPlan: E E 585](#)

E E 586 Digital Video Coding Systems (4)

Introduction to digital video coding algorithms and systems. Theoretical and practical aspects of important topics on digital video coding algorithms, motion estimation, video coding standards, systems issues, and visual communications.

[View course details in MyPlan: E E 586](#)

E E 587 Multimedia Compression and Networking (4)

Addresses four major components of multimedia: 1) data compression of multimedia (e.g., speech, audio, image, and video); 2) quality of service (QoS) issues for data transmission over IP; 3) multimedia streaming and conferencing applications; and 4) intellectual property management and protection (IPMP) of multimedia contents. Co-requisite: E E 518.

[View course details in MyPlan: E E 587](#)

E E 589 Advanced Topics in Sensors and Sensor Systems (3)

Topics of current interest in sensors and sensor systems.

[View course details in MyPlan: E E 589](#)

E E 590 Advanced Topics in Digital Computers (2-5, max. 16)

Lectures or discussions of topics of current interest in the field of digital systems. Subject matter may vary from year to year.

[View course details in MyPlan: E E 590](#)

E E 591 Robotics and Control Systems Colloquium (1, max. 30)

Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/CHEM E 591/M E 591.

[View course details in MyPlan: E E 591](#)

E E 592 Electrical Engineering Research Survey (1, max. 2)

Weekly presentations on current research activities by members of the department. Credit/no-credit only.

[View course details in MyPlan: E E 592](#)

E E 593 Feedforward Control (3)

Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with A A 593/M E 593; Sp, even years.

[View course details in MyPlan: E E 593](#)

E E 594 Robust Control (3)

Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 594/M E 594; Sp, odd years.

[View course details in MyPlan: E E 594](#)

E E 595 Advanced Topics in Communication Theory (1-5, max. 16)

Extension of E E 507, E E 508, E E 518, E E 519, E E 520. Material differs each year, covering such topics as: detection theory, decision theory, game theory, adaptive communication systems, nonlinear random processes.

[View course details in MyPlan: E E 595](#)

E E 596 Advanced Topics in Signal and Image Processing (2-5, max. 16)

Topics of current interest in signal and image processing. Content may vary from offering to offering.

[View course details in MyPlan: E E 596](#)

E E 597 Networked Dynamics Systems (3)

Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance

measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 597/M E 597.
[View course details in MyPlan: E E 597](#)

E E 598 Special topics in Electrical Engineering (1-5, max. 16)

Topics of current interest in non-traditional areas of electrical engineering. Offered: AWSpS.
[View course details in MyPlan: E E 598](#)

E E 599 Special Projects in Electrical Engineering (1-5, max. 15)

Prerequisite: permission of instructor.
[View course details in MyPlan: E E 599](#)

E E 600 Independent Study or Research (*-)

[View course details in MyPlan: E E 600](#)

E E 700 Master's Thesis (*-)

Human Centered Design and Engineering

[Display as tabs](#)

Department Overview

423 Sieg

In the Department of Human Centered Design and Engineering (HCDE), students are designing the future by building innovative technologies and systems. Putting people first, HCDE students and faculty research, design, and engineer interactions between humans and technology. HCDE students and faculty focus on understanding human needs and interests as they design and build engineering solutions to the world's problems.

HCDE faculty are award-winning and interdisciplinary, with graduate degrees in fields such as computer science, information studies, industrial engineering, design, education, English, linguistics, public policy, and technology and society studies.

HCDE prepares students for leadership roles in user interface design, user experience research and design, human-computer interaction, information and communication systems, computer-supported cooperative work, and related specializations, all from a human-centered perspective, internationally and globally. Whatever their professional direction, classes, directed research groups, and capstone projects, students develop portfolio quality products. HCDE graduates obtain jobs, primarily in the high-tech industry (e.g., Microsoft, Intel, Amazon, Facebook, T-Mobile, Google, Boeing), researching and designing user interfaces, websites, and other form factors to improve the user experience.

HCDE emphasizes student-centered, hands-on learning. Beyond taking traditional classroom courses, students join research groups and work side-by-side with top-ranked professors and graduate students to enhance the knowledge base of this dynamic field. The educational mission is supported by up-to-date facilities.

HCDE prepares students to assume positions of intellectual leadership in industry, government, non-profit organizations, and academia, HCDE students learn the research skills appropriate to their interests, the most effective design strategies, and the most current technologies and practices. They also learn enduring theory and principles so they can dynamically respond to the evolving field of human centered design and engineering.

Technical communicators use their language, visual, and analytical skills, as well as training and research in electronic and other media, to create and enhance communication in scientific and technical environments. Human centered design and engineering prepares students to design, create, edit, and evaluate technical and scientific discourse. The department provides coursework in the development of online help systems and in the design of general-audience content for delivery by means of advanced communication technologies such as the web.

[Course Descriptions](#)

The complexities of modern life have greatly increased the number of people who need to communicate about technical and other specialized topics. Scientific journal articles, manuals, proposals, and other genres are important for a vast array of readers. With the Information Age, gaining and sharing technological understanding and capability has become a crucial human activity. People communicate in more genres, address broader (often global) audiences, and face more complex rhetorical problems than ever before.

To achieve success in their communication activities, progressive organizations are employing sophisticated planning and development methods, including user-centered design and evaluation, content management, and systems-based analyses. In addition, they undertake research projects and apply existing research to their own needs. Contemporary research in technical communication ranges from controlled empirical research on the processing of text, graphics, and multimedia content to observational research on how meaning is created and negotiated in business environments and virtual communities.

Other major interests include the human-computer interface, hypermedia, communications technology, rhetoric of technical discourse, international communication, visual communication, publications and communications management, policy analysis of technological systems, and research and testing.

www.hcde.washington.edu

The Department of Human Centered Design and Engineering (HCDE) offers the following programs of study:

- Bachelor of Science in Human Centered Design and Engineering degree
- A minor in technical Japanese

Bachelor of Science in Human Centered Design and Engineering

Suggested First-Year College Courses: See regular admission requirements

Department Admission Requirements

Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision.

Direct Freshman Admission

The department enrolls up to 30% of its incoming class directly from high school, before completion of University-level prerequisites. Students accepted to the UW are automatically considered for admission to HCDE if they indicate Human Centered Design and Engineering as their preferred major on the freshman application. Competitive applicants have taken or are taking calculus and at least two years of laboratory science (physics and chemistry preferred) in high school. Admission is for autumn quarter only.

Regular Admission

1. *Course requirements:*
 - a. Minimum 5 credits of mathematics: MATH 120 or MATH 124
 - b. Minimum 3 credits of statistics: STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, STAT 390/MATH 390, IND E 315, QMETH 201, or Q SCI 381
 - c. Minimum 10 credits of science: BIOL 118, BIOL 180, BIO A 201, CHEM 142, CHEM 152, PHYS 114, PHYS 115, PHYS 121, PHYS 122, or PSYCH 202
 - d. Minimum 5 credits of English composition
 - e. CSE 142 or CSE 160
 - f. All courses must be completed before July 1 or February 1 application deadlines.
2. Application deadline: July 1 for autumn quarter; February 1 for spring quarter
3. *Grade requirement:* Minimum 2.00 cumulative GPA

Graduation Requirements

180 credits as follows:

General Education Requirements (88 credits)

1. *Written and Oral Communication (8 credits):* 5 credits English composition from the University list; HCDE 231. University-required additional 5 writing credits are built into the major core requirements
2. *Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S) (30 credits):* Minimum 10 credits required in both areas
3. *Natural World (50 credits):*
 - a. *Mathematics* (minimum 15 credits; see list of qualifying courses on HCDE [website](#))
 - b. *Science* (minimum 15 credits; see list of qualifying courses on HCDE [website](#))

Major Requirements (83-87 credits)

1. *HCDE Core (46 credits):* HCDE 300, HCDE 301, HCDE 308, HCDE 310, HCDE 313, HCDE 318, HCDE 321, HCDE 322, HCDE 492, HCDE 493, HCDE 495 (3), HCDE 496 (2)
2. *Engineering Fundamentals (minimum 12 credits):* either CSE 142 or CSE 160; see department for approved list of additional courses
3. *HCDE Electives (25-29 credits)*
 - a. Standard Option: See department for approved list of HCDE electives
 - b. *HCI (Human-Computer Interaction) Option:* At least one course in HCI foundations, and three additional courses from at least two of the four HCI course areas – user interface, software, and technology; design; usability, and user research; and social and ethical dimensions. See department website for approved area courses. Students take additional approved HCDE elective courses to reach the overall electives requirements (25-29 credits)

Free Electives (as needed)

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirements: Technical Japanese: Minimum 25 credits to include HCDE 461, HCDE 462, HCDE 463, plus 10 credits from the approved list of elective courses. For more information, contact the departmental adviser.

Student Outcomes and Opportunities

- *Expected Outcomes:* HCDE BS graduates contribute to society by applying design and engineering processes to solve problems through a deep understanding of people and their contexts. In particular, they are leaders in:
 - Investigating people and systems, using quantitative and qualitative methods, to identify opportunities for new systems and strengths and weaknesses of existing systems.
 - Designing, building, and evaluating systems according to a variety of perspectives, with an emphasis on understanding the relationships between social and technical elements of systems.
 - Bringing ideas to actualization through expertise in design strategy and processes, effective communication and collaboration skills, and ethical perspectives.
 - Identifying and learning new skills, perspectives, and tools that help them and others accomplish their goals.

The Department of Human Centered Design and Engineering prepares students to assume positions in industry, government, and non-profit organizations and to apply to graduate programs.

- *Instructional and Research Facilities:* Department facilities include the HCDE Design Laboratory and Laboratory for Usability Testing and Evaluation (LUTE).
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* HCDE undergraduates are required to complete at least one 3-credit internship. The supervised internship must be approved by the faculty internship adviser. As an internship substitution, students may elect to take part in a six-month co-op, sponsored by the Engineering Co-op program. Additionally, undergraduates work in research groups with HCDE faculty and graduate students.
- *Department Scholarships:* HCDE selects one recipient of a College of Engineering Scholarship annually. The criteria for this scholarship are the applicant's academic history and likelihood for success in the technical communication field.
- *Student Organizations/Associations:* Students in the HCDE degree program participate in student activities such as the HCDE Student Association, the Minority Science and Engineering Program (MSEP), and Women in Science and Engineering (WISE).

Of Special Note: The HCDE department is an inclusive, interdisciplinary academic community. Students generally call their professors by their first name and have the opportunity to work individually on projects and research supervised by HCDE faculty. Undergraduate students are encouraged to work in research groups and to attend conferences and professional meetings.

Graduate Programs

Graduate Program Coordinator
1428 Sieg Hall, Box 352315
(206) 543-1798
hcde@uw.edu

Master of Science in Human Centered Design and Engineering

The Department of Human Centered Design and Engineering (HCDE) offers a Master of Science in Human Centered Design and Engineering (MS HCDE) — an engineering degree. An evening program is offered through UW Educational Outreach, serving full time and part time students. HCDE offers a Master of Science in Human Centered Design and Engineering (MSHCDE). (An evening program is offered through UW Educational Outreach.) A total of 48 credits is required for the MSHCDE degree, which includes 25 credits of required HCDE graduate courses and 23 credits of approved electives. MSHCDE students may elect to pursue a master's thesis or project report with the approval of their Supervisory Committee.

Upon completion of the HCDE MS degree, students assume leadership roles in human-centered design and engineering in academia, industry, government, and non-profits. HCDE MS graduates are able to:

- Evaluate and understand human needs as a basis for designing and engineering new technologies.
- Master conceptual frameworks that motivate interdisciplinary research and design in HCDE.
- Select and critically evaluate user research methods for a variety of stakeholders and product contexts.
- Create visual, interactive, experience, and systems designs and prototypes.
- Translate organizational requirements into interface and product solutions, while accounting for all stakeholder perspectives and working ethically and collaboratively.
- Communicate effectively in oral, written, and visual forms, while scaling communications to audience needs and sociotechnical contexts.

Admission Requirements

In making recommendations for admission, the faculty consider the following from an applicant's record:

1. Undergraduate GPA
2. Undergraduate degree program and work experience

3. Test of English as a Foreign Language (TOEFL) score (if applicable)
4. Letters of recommendation
5. Statement of goals and career objectives. A limited number of prerequisite undergraduate courses may be required.

Degree Requirements

48 credits, to include:

1. Core courses (22 credits): HCDE 501, HCDE 503, HCDE 517, HCDE 518, HCDE 521 (1 credit required, max. 2), HCDE 592, HCDE 593
2. Specialized content areas (minimum 12 credits): minimum 4 credits in each of the three areas: research, design, and engineering. Research courses: HCDE 502, HCDE 516, HCDE 519; design courses: HCDE 508, HCDE 511, HCDE 520, HCDE 536; engineering courses: HCDE 530, HCDE 532, HCDE 537, HCDE 539. Students are encouraged to gain depth in any or all of the three areas by taking additional courses beyond the minimum.
3. Additional coursework to complete at least 48 HCDE credits. May include credits from electives, directed research groups, and optional internships. Students select electives based on specific academic, research, and professional goals.
4. Students may also pursue a formal transcribed option in User-Centered Design (UCD).

Certificate in User-Centered Design (UCD)

An evening, graduate-level, one-year, four-course program for students who wish to explore a wide range of UCD issues. Involves sophisticated methods for planning and developing intuitive, user-friendly product designs. Students study the latest user research and design theories and practices for placing user needs at the forefront of each stage of the design process.

Focuses on usability studies, user-centered design theory and practice, visual communication and information visualization, and web design.

12 of the 13 credits earned for the UCD certificate may later count toward the MS in Human Centered Design and Engineering if students apply for Graduate Non-Matriculated Status prior to taking coursework.

Certificate Requirements

1. HCDE 517 (autumn)
2. HCDE 518 (winter)
3. HCDE 521 (winter only)
4. One of the following electives: HCDE 508, HCDE 511, HCDE 536, HCDE 537 (optional prerequisite for HCDE 537 is HCDE 532)

Inter-Engineering Master's in Technical Japanese

The inter-engineering master's in technical Japanese is a two-year degree program that combines the study of engineering and technical Japanese. Students take classes in an

engineering specialty and in advanced Japanese. After their first year, they spend summer quarter and optionally the following autumn quarter in Japan doing a required internship in a Japanese company or research lab. Students graduate with an inter-engineering MSE or MS degree.

Admission Requirements

Program no longer accepts applications: 2014 - 2015 is its last year.

Degree Requirements

Minimum 54 credits, to include:

1. *Engineering Fields*: Students must select an engineering field (usually the same as the undergraduate area of concentration) from among the following:
 - a. Aeronautics and Astronautics
 - b. Bioengineering
 - c. Chemical Engineering
 - d. Civil and Environmental Engineering
 - e. Computer Science and Engineering
 - f. Electrical Engineering
 - g. Mechanical Engineering
2. *Credit Requirements*:
 - a. *Distribution*: 24 credits in one engineering specialty, 27 credits of coursework in technical Japanese, and 3 credits of summer internship in Japan. Note: 3 credits of internship may be substituted for 3 credits of coursework.
 - b. Technical Japanese coursework:
 - i. Oral communication in technical and business settings: HCDE 471, HCDE 472, HCDE 473
 - ii. Reading techniques in technical Japanese: HCDE 461, HCDE 462, HCDE 463
 - iii. Advanced Japanese for technical and business professionals: HCDE 561, HCDE 562, HCDE 563

Doctor of Philosophy

The Department of Human Centered Design and Engineering (HCDE) offers a PhD in Human Centered Design and Engineering (PhD HCDE)—an engineering degree. The program provides unparalleled depth and experience for students interested in studying the conception, design, implementation, use, evaluation, and effects of technologies.

HCDE is an interdisciplinary engineering department at the University of Washington in Seattle, an internationally ranked, R1 research institution. HCDE's interdisciplinary faculty have graduate degrees from fields such as computer science, industrial engineering, information studies, design, education, English, linguistics, public policy, and technology and society studies. The faculty's research and teaching focus on six areas of study: influencing awareness, thinking, and behavior; design for emergent collaborations and organizations; low resource and underserved populations; material and embodied

technologies, and ubiquitous computing; data visualization and big data; and learning in professional and technical environments.

The HCDE doctoral program prepares students for careers as scholars and researchers through relevant coursework, mentorship from faculty, and collaboration with peers. Early in the program, students may explore different topics and research areas through directed research groups and other independent projects.

Goals of the HCDE PhD program are as follows:

- To prepare graduates for a career as researchers, teachers, and intellectual leaders in the discipline of HCDE
- To enable graduates to develop theoretical frameworks, apply investigative methods, and translate theory and research findings into technical or strategic innovations in the field of HCDE
- To foster the development and dissemination of new knowledge in HCDE
- To foster the development of an international, multi-cultural perspective and a diverse, inclusive student body and workforce in HCDE

Admission Requirements

Completion of either an undergraduate degree or a master's degree in HCDE or a relevant field (up to 30 credits of master's work may be applied toward the 105-credit requirement). Applicants often come from a wide range of backgrounds.

Applicants must submit the following:

1. UW HCDE PhD admission forms
2. Official transcripts of all academic study
3. Evidence of a minimum 3.00 GPA
4. Three letters of recommendation
5. A curriculum vitae
6. A personal statement of objectives and research area of interest.

International students must also submit a TOEFL iBT test score of at least 106 (including a speaking sub-score of 26), obtained within the last two years.

Degree Requirements

105 credits, to include:

1. 34 core credits (HCDE 541, HCDE 542, HCDE 543, HCDE 544, HCDE 545, HCDE 546, HCDE 547, HCDE 548); 12 credits of directed research (HCDE 596); HCDE 521, HCDE 523; 30 credits of approved electives to include HCDE 518 and one additional graded, graduate-level course in each of four thematic areas; minimum 27 dissertation credits
2. Preliminary examination
3. Select committee chair within two quarters of passing preliminary examination
4. Successfully complete all course distribution and credit-hour requirements

5. Successfully complete the requirements for directed research.
6. Pass a general examination to attain formal candidacy for the PhD program (candidate's certificate).
7. Successfully defend a dissertation proposal before a supervisory committee.
8. Successfully defend the dissertation itself before a reading committee (final examination).

Students are encouraged but not required to teach.

Early in the program, students often explore different topics and research areas through directed research groups and other independent projects. No later than the end of the quarter following passing the preliminary exam (usually the end of the fourth quarter in the program), students choose a dissertation adviser and begin to focus on a research area for the dissertation. Students are often supported by a research assistantship by that adviser.

Students who enter the PhD program with a previous graduate degree relevant to HCDE can petition to have up to 30 credits transferred toward this program. Check with the doctoral adviser for details.

Research Facilities

The Department of Human Design and Engineering has well-equipped laboratories that effectively support its courses and research projects. Also, HCDE graduate students can utilize significant College of Engineering and University-level research facilities.

Financial Aid

A limited number of teaching and research assistantships and scholarships are available for the financial support of graduate students in HCDE. More information and application forms can be obtained by contacting the department.

COLLEGE OF ENGINEERING

HUMAN CENTERED DESIGN AND ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

HCDE 100 Introduction to Human Centered Design and Engineering (5)

Topics may include: virtual communities, human-computer interaction, web design, usability testing, visual design, and others. Explores course content through individual and group hands-on projects. Offered: A.

[View course details in MyPlan: HCDE 100](#)

HCDE 210 Explorations in Human Centered Design (3) I&S

Explores the core principles, methodologies, and applications of human centered design practice. Areas of investigation include user research, ideation, interaction design, visualization, prototyping, and usability.

Offered: AWSp.

[View course details in MyPlan: HCDE 210](#)

HCDE 231 Introduction to Communication in HCDE (3)

Examines fundamentals of researching, writing, and presenting technical information for diverse audiences and purposes. Students learn to conduct secondary research; design and present information written and orally; revise for content, organization and style; and work individually and collaboratively in teams. Assignments are framed around ethical and sustainable human-centered design practices. Prerequisite: either C LIT 240, both ENGL 109 and ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: AWSp.

[View course details in MyPlan: HCDE 231](#)

HCDE 300 Foundations of Human Centered Design and Engineering (5)

Examines principles and practices of human centered design and engineering. Includes overview of conceptual problems in human centered design and engineering, issues related to communicating scientific and technical information to a variety of audiences, and human centered design approaches. Includes attention to social contexts and environments (legal, ethical, cultural).

[View course details in MyPlan: HCDE 300](#)

HCDE 301 Advanced Communication in HCDE (5)

Reviews writing as an iterative process. Students learn to analyze purpose, use, and audience; write and design communications that meet the needs of stakeholders with differing priorities and cultures; work with different

genres; understand the impact of writing style and the ethical implications of communication decisions¹⁶¹⁹ in human-centered design. Prerequisite: HCDE 231 or ENGR 231.

[View course details in MyPlan: HCDE 301](#)

HCDE 303 Project Management and Computer Supported Collaboration and Work (5)

Addresses how to understand and manage communication practices and projects in scientific and technical organizations. Topics include: system design, project design, supporting workflow, communication practices, information structures, and planning. Focuses on CMC and CSC principles and practices.

[View course details in MyPlan: HCDE 303](#)

HCDE 308 Visual Communication in Human Centered Design and Engineering (5) VLPA

Introduces principles of visual communication and design used in human centered design and engineering so that students gain a systematic understanding as they create visual communication components of print, interactive, and video media. Students develop this understanding through hands-on exercises, design critiques, discussions, lectures, and readings in a studio environment.

[View course details in MyPlan: HCDE 308](#)

HCDE 310 Interactive Systems Design and Technology (5)

Provides opportunities to identify and build interactive systems to solve problems in human centered design and engineering. Students specify, design, build, and justify design solutions in terms of user experience and technical design choices. Prerequisite: CSE 142 or CSE 160. Offered: A.

[View course details in MyPlan: HCDE 310](#)

HCDE 313 Introduction to User Research (5)

Introduces user research methods, such as interviews, surveys, usability tests, content analysis, and focus groups. Reviews selecting an appropriate research method, how to conduct research and analyze results, conveying research data in the form of design requirements, and ethics.

[View course details in MyPlan: HCDE 313](#)

HCDE 318 Introduction to User-Centered Design (5)

Explores the user-centered design paradigm from a broad perspective, with an emphasis on the importance of developing and applying design processes and strategies. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design.

[View course details in MyPlan: HCDE 318](#)

HCDE 321 Portfolio (2)

Covers recent trends in design and communication portfolios, as well as foundational considerations for portfolio development. Credit/no-credit only.

[View course details in MyPlan: HCDE 321](#)

HCDE 322 Organizational Teamwork (2)

Introduces students to teamwork and leadership competencies of particular significance to interdisciplinary, design-oriented, creative, and distributed work of human-centered design and engineering. Particular emphasis on competencies related to interpersonal interactions, group dynamics, and civic responsibility. Credit/no-credit only.

[View course details in MyPlan: HCDE 322](#)

HCDE 333 Advanced Technical Writing and Oral Presentation (4)

Emphasizes the principles of written and oral communication for the engineering workplace. Designs solutions to professional communication problems: technical reports, proposals, correspondence, resumes, and oral presentations. Focuses on needs assessment and designing solutions that call for effective selection and integration of verbal and visual components. For engineering majors. Prerequisite: HCDE 231. Offered: AWSpS.

[View course details in MyPlan: HCDE 333](#)

HCDE 407 Software User Assistance (5)

Concepts, skills, and industry practices for designing the full spectrum of information resources that users need to master complex interfaces. Includes interface text, embedded and standard help, manuals, wizards, tutorials, SDK documentations and troubleshooting (Knowledge Base) content, and the role of social media and user-generated content. Prerequisite: HCDE 310. Offered: Sp.

[View course details in MyPlan: HCDE 407](#)

HCDE 408 Public Documents: Proposals, EISs, Assessments (3)

Analyzing special documents of public character: proposals, EISs, questionnaires, technology assessments. Understanding socio-political milieu in which they are planned, organized, written; the specialized audiences (e.g., agencies with their missions, guidelines, constituencies; citizen groups; commercial interests) they serve. Documents, the decision-making process. Offered: Sp, odd years.

[View course details in MyPlan: HCDE 408](#)

HCDE 411 Information Visualization (5) VLPA/I&S

Introduces the design and presentation of digital information. Covers the use of graphics, animation, sound, and other modalities in presenting information to the user; understanding vision and perception; methods of presenting complex information to enhance comprehension and analysis; and the incorporation of visualization techniques into human-computer interfaces. Prerequisite: HCDE 308 and HCDE 310.

[View course details in MyPlan: HCDE 411](#)

HCDE 417 Usability Research Techniques (5)

Introduces usability research methods used in the product-development process; contextual inquiry, surveys and interviews, focus groups, user profiling, usability testing, cognitive walkthroughs, heuristics, and others. Prerequisite: HCDE 313.

[View course details in MyPlan: HCDE 417](#)

HCDE 418 User Experience Design (5)

Provides a project-based introduction to the user interface design process and is oriented toward practical methods for approaching a design problem. Focuses on developing conceptual designs based on user need. Prerequisite: HCDE 318.

[View course details in MyPlan: HCDE 418](#)

HCDE 419 Concepts in Human-Computer Interaction (5) I&S

Studies the social, cognitive, behavioral, and contextual aspects of information systems and informational dimensions of the human-computer interface, and other user-centered design concepts. Surveys research literature of human information behavior, as well as ethical standards. Prerequisite: HCDE 300.

[View course details in MyPlan: HCDE 419](#)

HCDE 421 Current Practices in Technical Communication (3)

Covers principles and practices of writing to communicate scientific and technical information to a variety of readers. Teaches how to write for the expert, general scientific and technical reader, manager, and general public.

[View course details in MyPlan: HCDE 421](#)

HCDE 422 Style in Technical Communication (3)

Covers principles and practices of writing publication-ready American English writing for global audiences. Teaches how to write for the expert, general scientific and technical reader, manager, and general public.

[View course details in MyPlan: HCDE 422](#)

HCDE 423 Introduction to Technical Editing (3)

Covers editorial practices and responsibilities in communication of scientific and technical information. Includes the editor's role as an editor of documents, a collaborator in document development, and a manager of publication projects and groups.

[View course details in MyPlan: HCDE 423](#)

HCDE 424 The Computer in Technical Communication (4)

Introduces popular tools used by TC professionals. Students examine the tools' functionality, the types of design activities supported, and techniques for designing effective solutions. Project-driven course project teaches students how to transform unformatted content, using these tools, into a polished set of documents in multiple formats.

[View course details in MyPlan: HCDE 424](#)

HCDE 426 Software User Assistance (3)

Covers how to write effective documentations for a variety of software users, from end-users to developers. Students produce a complete documentation set for a software product or service using the most appropriate delivery mechanisms for the content and the audience. Prerequisite: HCDE 310.

[View course details in MyPlan: HCDE 426](#)

HCDE 427 Production Editing (4)

Covers the editorial role in the preparation of text and visual materials, both print and online, for production. Teaches the editor's responsibilities and prerogatives as they relate to those of other professionals in the production phase of the publication's field.

[View course details in MyPlan: HCDE 427](#)

HCDE 435 Introduction to Content Management (3)

Principles and practices of building, managing, and using content management systems in the workplace. Examines both the intricacies of collaborative workflow technologies and the organizational contexts that surround them.

[View course details in MyPlan: HCDE 435](#)

HCDE 437 Web Design and Web Publishing (5) VLPA/I&S

Design principles and skills including navigation, functional design, visual design, and content development. Includes the ongoing process of Web publishing. Addresses societal issues pertaining to the web and Internet. Students build a website and plan for ongoing web publishing. Prerequisite: HCDE 318. Offered: W.

[View course details in MyPlan: HCDE 437](#)

HCDE 438 Web Technologies (5)

Markup languages and styles, JavaScript, Flash, Photoshop, and the fundamentals of digital sound and video. Includes an introduction to server-side technologies. Students expand their existing design skills to encompass the use of these web technologies. Prerequisite: HCDE 310. Offered: Sp.

[View course details in MyPlan: HCDE 438](#)

HCDE 439 Physical Computing (5)

Introduction to engineering and prototyping interactive systems and environments for human-centered applications that employ basic digital electronics components and circuits. Students build systems using micro-controllers and software tools. Provides hands-on experience in a project-based, studio environment.

Prerequisite: HCDE 310 or permission of instructor.

[View course details in MyPlan: HCDE 439](#)

HCDE 451 User Experience Prototyping Techniques (5)

Introduces students to a variety of prototyping techniques for different kinds of user experience design problems. Structured as a series of independent explorations, each on a different prototyping methodology, aimed at many platforms. Prerequisite: HCDE 318.

[View course details in MyPlan: HCDE 451](#)

HCDE 455 User Interface Design (4) *Furness*

Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with IND E 455; A.

[View course details in MyPlan: HCDE 455](#)

HCDE 461 Japanese for Technical and Business Professions I (5) VLPA Kato

Strengthens knowledge of grammar and vocabulary and applies this to basic technical business communication situations. Covers cultural concepts underlying these situations. Reviews authentic materials on technology-related topics. Teaches skills to analyze sentence structure for accurate interpretation. Laboratory work required. Placement test before admission. Offered: A.

[View course details in MyPlan: HCDE 461](#)

HCDE 462 Japanese for Technical and Business Professions II (5) VLPA

Covers the functional/situational conversation skills necessary in technical and business communication situations, plus the cultural concepts underlying these situations. Reviews skills (such as prediction) for more effective reading and improves skills for analyzing complex sentence structure. Additional grammar, vocabulary, and kanji are introduced. Laboratory work required. Prerequisite: HCDE 461. Instructors: Kato Offered: W.

[View course details in MyPlan: HCDE 462](#)

HCDE 463 Japanese for Technical and Business Professions III (5) VLPA

Covers the functional/situational conversation skills necessary in technical and business communication situations, plus the cultural concepts underlying these situations. Further improves skills introduced in previous courses and reviews skills for understanding inter-sentence structure. Additional grammar, vocabulary, and kanji introduced. Laboratory work required. Prerequisite: HCDE 462. Instructors: Kato Offered: Sp.

[View course details in MyPlan: HCDE 463](#)

HCDE 492 Capstone Planning (2)

Helps students define capstone topics, form project teams, and develop initial concepts, deliverables, and schedules for the HCDE capstone project. Prerequisite: HCDE 300; HCDE 301; HCDE 308; HCDE 310; HCDE 313; and HCDE 318. Credit/no-credit only.

[View course details in MyPlan: HCDE 492](#)

HCDE 493 Senior Capstone (5)

Capstone design experience. Integrates knowledge and skills acquired during major program into one paper or project. Prerequisite: HCDE 492.

[View course details in MyPlan: HCDE 493](#)

HCDE 495 Professional Practice (3-10, max. 10)

Supervised internship in a publications organization approved by the faculty adviser. A minimum of one internship is required of students majoring in human centered design and engineering. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: HCDE 495](#)

HCDE 496 Directed Research in Human Centered Design and Engineering (1-5, max. 10)

Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: HCDE 496](#)

HCDE 497 Study Abroad: Human Centered Design and Engineering (3-5, max. 15)

Upper-division human centered design and engineering courses, for which there are no direct University of Washington equivalents, taken through the Department of Human Centered Design and Engineering's study abroad program. Credit/no-credit only. Offered: S.

[View course details in MyPlan: HCDE 497](#)

HCDE 498 Special Topics (1-5, max. 15)

Special topics in human centered design and engineering to be offered occasionally by permanent or visiting faculty members.

[View course details in MyPlan: HCDE 498](#)

HCDE 499 Special Projects (1-5, max. 10)

Individual undergraduate projects in human centered design and engineering. Offered: AWSpS.

[View course details in MyPlan: HCDE 499](#)

HCDE 501 Theoretical Foundations of Human Centered Design and Engineering (4)

Examination of the theories that inform work in human centered design and engineering, focusing particularly on communication and interaction design theories. Topics include the complexities of communication as it is configured in different theoretical frameworks, the implications of these different configurations, and why these differences matter to people engaged in professional practice or research. Prerequisite: admission to an engineering master's program or permission of instructor. Offered: A.

[View course details in MyPlan: HCDE 501](#)

HCDE 502 Empirical Traditions in Human Centered Design and Engineering (4)

Introduction to empirical traditions that inform research and practice in field of human centered design and engineering. Topics include epistemological assumptions underlying empirical research, empirical methods, and survey of results of empirical research on effects of text and visual media on comprehension, recall, and performance. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

[View course details in MyPlan: HCDE 502](#)

HCDE 503 Navigating Design in Organizations (4)

Examines how to manage the incubation and development of an idea, communicate it effectively to stakeholders, and deliver a quality product. Students learn to manage a design project from start to finish, collaborating across disciplines, working with partners and end-users, and communicating strategies for project management in organizations.

[View course details in MyPlan: HCDE 503](#)

HCDE 505 Computer-Assisted Communication (4)

Explores computer-assisted communication from three perspectives: (1) cultural roles of communication technologies; (2) relationships between communication and information including information technologies in the workplace, academe, and other settings; and (3) application to design including models for audience analysis, task analysis, and cognitive systems engineering. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

[View course details in MyPlan: HCDE 505](#)

HCDE 508 Visual Communication (4)

Reviews principles of visual communication and design used in HCDE so that students gain a systematic and critical understanding so they can create visual communication components of print and interactive media. Students develop this understanding through hands-on exercises, design critiques, discussions, lectures, and readings in a studio environment.

[View course details in MyPlan: HCDE 508](#)

HCDE 509 Writing the Scientific Article (3)

Examination of principles and practice of writing research manuscripts, articles, abstracts, and oral presentations. Detailed examination of scientific publication process includes issues of style, organization, and ethics. Students draft, critique, and revise their own manuscripts and learn to review the manuscripts of others. Offered: Sp.

[View course details in MyPlan: HCDE 509](#)

HCDE 510 Information Design (4)

Examination of the design principles and procedures underlying the creation of both print and electronic information presentations. Topics include: print vs. electronic media, designing for the page and screen, information topologies, and hypermedia. Seminar includes a design project. Prerequisite: HCDE 501 or permission of instructor. Offered: A.

[View course details in MyPlan: HCDE 510](#)

HCDE 511 Information Visualization (4)

Covers the design and presentation of digital information. Uses graphics, animation, sound, and other modalities in presenting information to users. Studies understanding vision and perception. Includes methods of presenting complex information to enhance comprehension and analysis; and incorporation of visualization techniques into human-computer interfaces.

[View course details in MyPlan: HCDE 511](#)

HCDE 512 International User Experience and Communication (4)

Covers theory, research, and approaches for creating digital media for international audiences. Topics include cultural schemata and contrastive rhetoric, content, and text types and corresponding translation and localization strategies, market relevance and adaptation, international user research and usability, international politics and geopolitics, and cross-cultural business management and team work. Offered: Sp.

[View course details in MyPlan: HCDE 512](#)

HCDE 513 Globalization and Localization Management (4) *Spyridakis*

Examines globalization and localization business processes. Topics include localization challenges for various business sectors and audiences as well as selecting localization software, services, and content; project types; and associated start-to-finish processes. Offered: S.

[View course details in MyPlan: HCDE 513](#)

HCDE 514 Strategies for International Product Management (4)

Examines best practices in establishing localization work in technology companies. Covers facets important to research, planning, and decision-making processes, including use of internal company data, and economic, marketing, and technology factors. Uses real-life scenarios to demonstrate how companies have instituted localization processes given user-centered practices. Prerequisite: HCDE 512; HCDE 513; or permission of instructor. Instructors: Spyridakis

[View course details in MyPlan: HCDE 514](#)

HCDE 516 Experimental Research Methods (4)

Introduction to experimental research methods in human centered design and engineering. Examines the relationship between theory and research, hypothesis testing, experimental designs, modes of observation, sampling, validity, and data analysis and interpretation. Prerequisite: introductory statistics course. Offered: Sp.

[View course details in MyPlan: HCDE 516](#)

HCDE 517 Usability Studies (4)

Discusses the human-computer interface (HCI) as the communicative aspect of a computer system. Analyzes usability issues in HCI design, explores design-phase methods of predictability, and introduces evaluative methods of usability testing. Prerequisite: substantial experience with computers and graduate standing, or permission of instructor. Offered: A.

[View course details in MyPlan: HCDE 517](#)

HCDE 518 User-Centered Design (4)

Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with IND E 545; W.

[View course details in MyPlan: HCDE 518](#)

HCDE 519 Qualitative Research Methods (4)

Provides hands-on experience with qualitative research methods, such as interviewing and participant observation, as used in human-centered design and engineering. Students learn to develop appropriate research questions, collect observational data, develop interview protocols, conduct interviews, analyze data, and communicate findings.

[View course details in MyPlan: HCDE 519](#)

HCDE 520 Design and Management of Complex Systems (4)

Focuses on how to design and implement improvements to complex work systems. Emphasis on Agile development, including sprints using scrum teams to achieve rapid iteration design with system users, developers and owners. Investigates decision support systems, including sense making and adaptation in ambiguous situations.

[View course details in MyPlan: HCDE 520](#)

HCDE 521 Seminar: Current Issues in Human Centered Design and Engineering (1-2, max. 3)

Presentations on current issues in human centered design and engineering. Prerequisite: HCDE graduate student status or permission of instructor. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: HCDE 521](#)

HCDE 523 Design Use Build (DUB) Seminar (1, max. 3)

Exploration of advanced issues in human centered design and engineering research and practice. Students are encouraged to join the dub mailing list for calendar of events. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: HCDE 523](#)

HCDE 530 Computational Concepts in HCDE (4)

Introduces basic computational concepts and programming skills needed to work with interactive systems in HCDE. Draws on topics such as log analysis, visualization, prototyping, and data mining. Students analyze data to inform user research and design.

[View course details in MyPlan: HCDE 530](#)

HCDE 532 Web Design Studio (2)

Provides an overview of basic principles and practices of professional web site design and programming. Students gain hands-on experience with designing and building a successful website using industry standard techniques. For students planning to take HCDE 535 or HCDE 537 without previous programming experience.

[View course details in MyPlan: HCDE 532](#)

HCDE 534 Designing a Human Centered Venture (4)

Explores the planning of a new venture related to human-centered design. Examines relevant topics, such as team formation, user and market research, value creation, and the iterative demand planning for a new venture.

[View course details in MyPlan: HCDE 534](#)

HCDE 536 Interaction Design and Prototyping (4)

Investigates advanced topics in the theory and practice of interaction design, using a project-oriented approach. Develops expertise in design, development, and critique of solutions in online and mobile platforms. Examines issues such as interaction theory, requirements and specifications, design language, prototyping, and presentation of projects. Prerequisite: HCDE 518.

[View course details in MyPlan: HCDE 536](#)

HCDE 537 User-Centered Web Design (4)

Theory and practice of the user-centered web development process. Principles and processes for documenting and implementing various development stages, including requirements analysis, user needs analysis, information architecture, prototyping, mock-ups, and production. Prerequisite: HCDE 518.

[View course details in MyPlan: HCDE 537](#)

HCDE 539 Physical Computing and Prototyping (4)

Reviews fundamentals of designing and prototyping human-centered interactive systems and environments that include software and hardware components. Students build projects using electronic devices and fabrication tools. Provides hands on experience in a project-based, studio environment.

[View course details in MyPlan: HCDE 539](#)

HCDE 541 Grant Writing for Career Development (4)

Introduces the steps on compiling a grant proposal, with an emphasis on increasing research fluency. Provides

hands-on experience with communicating research topics, particularly for the purpose of applying for¹⁸²⁶ grant support.

[View course details in MyPlan: HCDE 541](#)

HCDE 542 Theoretical Foundations in Human Centered Design and Engineering (4)

Examines theories that inform work in human centered design and engineering, focusing particularly on theories of communication and interaction design. Topics include complexities of interaction as it is configured in different theoretical frameworks, implications of these different configurations, and why these differences matter to people engaged in professional practice/research.

[View course details in MyPlan: HCDE 542](#)

HCDE 543 Empirical Traditions in Human Centered Design and Engineering (4)

Introduces empirical traditions that inform research and practice in the field of human centered design and engineering. Topics include epistemological assumptions underlying research approaches and a survey of empirical methods.

[View course details in MyPlan: HCDE 543](#)

HCDE 544 Research Methods I (4)

Introduces experimental, quasi-experimental, and related research methods in human centered design and engineering. Examines the relationship between theory and research, hypothesis testing, experimental designs, modes of observation, sampling, validity, and data analysis and interpretation. Students undertake an intensive research project. Prerequisite: Introductory statistics course.

[View course details in MyPlan: HCDE 544](#)

HCDE 545 Research Methods II (4)

Provides hands-on experience with qualitative research methods with particular emphasis on how ethnographic fieldwork methods (e.g., interviewing and participant observation) are used in human centered design and engineering. Students undertake an intensive research project at a field site, collecting and analyzing data.

[View course details in MyPlan: HCDE 545](#)

HCDE 546 Design Thinking (4)

Examines how design is enacted within disciplines, exploring commonalities and differences in design practices. Surveys empirical studies of design practices and approaches.

[View course details in MyPlan: HCDE 546](#)

HCDE 547 Academic Development Seminar (1, max. 10)

Addresses academic research and professional competencies necessary for doctoral students. Credit/no-credit only.

[View course details in MyPlan: HCDE 547](#)

HCDE 548 Advanced Topics in Human Centered Design and Engineering (4, max. 20)

In-depth examination of a specialized topic in an emerging area of human centered design and engineering.

[View course details in MyPlan: HCDE 548](#)

HCDE 592 Capstone Planning (1)

Helps students define capstone topics, form project teams, and develop initial concepts, deliverables, and schedules for the HCDE capstone project.

[View course details in MyPlan: HCDE 592](#)

HCDE 593 Capstone (4)

Capstone design experience. Integration of knowledge and skills acquired during program into one project. Prerequisite: HCDE 518; HCDE 592.

[View course details in MyPlan: HCDE 593](#)

HCDE 596 Directed Research in Human Centered Design and Engineering (1-5, max. 18)

Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: HCDE 596](#)

HCDE 597 Approaches to Teaching Technical Communication (1-2, max. 2)

Examines theory and practice of teaching engineering undergraduate students written and oral technical communication competencies, strategies for developing teaching skills and philosophies. Teaching seminar for instructors of HCDE 231 and HCDE 333. Prerequisite: concurrent teaching appointment or permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: HCDE 597](#)

HCDE 599 Special Projects (1-5, max. 5)

Written report required. Prerequisite: permission of graduate adviser or committee chair. Offered: AWSpS.

[View course details in MyPlan: HCDE 599](#)

HCDE 600 Independent Study or Research (*-)

[View course details in MyPlan: HCDE 600](#)

HCDE 601 Internship (2-10, max. 10)

Written report required. Prerequisite: permission of committee chair. Offered: AWSpS.

[View course details in MyPlan: HCDE 601](#)

HCDE 700 Master's Thesis (*-)

Prerequisite: permission of thesis adviser. Offered: AWSpS.

[View course details in MyPlan: HCDE 700](#)

HCDE 800 Doctoral Dissertation ([1-10]-)

Prerequisite: permission of thesis adviser. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: HCDE 800](#)

Industrial and Systems Engineering

[Display as tabs](#)

Department Overview

G-7 Mechanical Engineering Building

Industrial and systems engineering (ISE) prepares students for careers in an increasingly diverse, dynamic, and technological world. Industrial engineers focus on the integration of humans, machines, materials, and information to achieve optimum performance of operating systems. This focus on the "big picture" makes industrial and systems engineering one of the most people-oriented and customer-focused of the engineering disciplines.

Industrial and systems engineering involves the study of engineering design, system integration, optimization, quality and reliability, supply chain management, virtual reality, and manufacturing.

Being an industrial engineer is about choices. Industrial engineers have the opportunity to work in many different kinds of businesses and nonprofit organizations. The most distinctive aspect of industrial engineering is the flexibility it offers. Many industrial engineers eventually move into supervisory or management positions where they continue to draw on their technical background. Demand for industrial engineers has grown dramatically over the past two decades.

Undergraduate Program

Adviser

G7 Mechanical Engineering, Box 352650

(206) 543-5041

ieadvise@uw.edu

Industrial and Systems Engineering offers the following program of study:

- The Bachelor of Science in Industrial Engineering degree (BSIE)

Bachelor of Science in Industrial Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; English composition; courses to fulfill VLPA and I&S requirements.

Department Admission Requirements

Applicants are considered in three groups -- Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive, and completion of the minimum requirements does not necessarily guarantee admission. Applicants not admitted under one admission group may subsequently apply to another admission group after completing more coursework. All applicants have the right to petition and appeal the department's admission decision.

Freshman Admission

The UW Industrial and Systems Engineering program enrolls up to 10 percent of its incoming class directly out of high school, prior to completion of university-level prerequisites. Freshman applicants to the UW who have listed industrial and systems engineering as their intended major are automatically considered. Competitive applicants have taken or are taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

Early Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical-science courses plus accompanying laboratory, at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. Admission is for autumn quarter only.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.
3. *Grade requirements:* Minimum 2.0 grade in each prerequisite course and a minimum 2.50 overall GPA.

Upper-Division Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; and at least 5 credits of English composition.
2. 45 credits completed by application deadline. Applications are accepted for autumn quarter admission only. Application deadline is July 1.

Graduation Requirements

180 credits as follows:

General Education Requirements (91 credits)

1. *Written and Oral Communications (12 credits):* 5-credits English composition from the University-approved list; HCDE 231; HCDE 333 (or department-approved alternative).
2. *Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (30 credits):* Minimum 10 credits in each area
3. *Natural World (49 credits)*
 - a. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; IND E 315

b. *Science (25 credits)*: CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (89 credits)

1. *Engineering Fundamentals (28 credits)*: CSE 142, MSE 170, A A 210, E E 215, CEE 220, M E 230, IND E 250
2. *Industrial Engineering Core (24 credits)*: IND E 316, IND E 337, IND E 410, IND E 411, IND E 494, IND E 495
3. *Technical Electives (37 credits)*: At least one class from approved courses in each of the following areas: operations research, statistics, production/operations, design, and general engineering. See adviser for list of approved technical electives.
4. *Grade Requirements*: Minimum 2.00 cumulative GPA in all engineering courses with no grade below 1.0 in these courses.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Industrial and systems engineering graduates are proficient in mathematics, sciences, engineering fundamentals, and the use of computers; use a broad knowledge of industrial engineering methods and tools associated with operations research, quality engineering, and human factors; apply engineering design methods and tools to represent, integrate, and solve problems, including the ability to recognize problem context and integrate knowledge and skills from allied disciplines; communicate effectively; and possess the professional characteristics of leadership, ethics, and the ability to motivate and work with others.

IE prepares students to serve as the efficiency experts of organizational change. Students are encouraged to take a systems view when solving problems, recognize the organizational and societal impact of technical decisions, develop good oral and written communication skills, participate in teams, and take initiative. Industrial engineers draw upon specialized knowledge and skills in math, the physical sciences, and social sciences together with the principles and methods of engineering analysis and design.

- *Instructional and Research Facilities*: Industrial and systems engineering provides designated computing facilities for undergraduate students. Research facilities include the Human Interface Technology Laboratory, the Production Systems Laboratory, the Manufacturing Laboratory, and the Center for Engineering Learning and Teaching.
- *Honors Options Available*: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major).. See adviser for requirements.
- *Research, Internships, and Service Learning*: Students have the opportunity to pursue cooperative and internship programs at the College level through the College's Engineering Co-op Program (www.engr.washington.edu/coop/).
- *Department Scholarships*: ISE offers scholarships to outstanding undergraduate students. All applicants to the BSIE program are considered for these scholarships. Awards are made based on both merit and financial need.
- *Student Organizations/Associations*: Students are actively involved in the UW student chapter of the Institute of Industrial Engineers (IIE); the ISE National Honor

Society, Alpha Pi Mu; and the IE Student Advisory Board.

Graduate Program

Graduate Program Coordinator
G7 Mechanical Engineering, Box 352650
(206) 543-5041
ieadvise@uw.edu

The Department of Industrial and Systems Engineering offers graduate programs leading to the Master of Science in Industrial Engineering (M.S.I.E.) and Doctor of Philosophy (Ph.D.). Graduate courses and research programs are offered in manufacturing, operations research, large-scale assembly, experimental statistics, production planning, quality control, reliability engineering, computer-integrated manufacturing, simulation, supply chain, human factors, virtual reality, and human interface technology.

Master of Science in Industrial and Systems Engineering

Admission Requirements

For consideration, applicants are expected to have a bachelor's degree in engineering, mathematics, or science, with a minimum 3.00 GPA.

Degree Requirements

41 credits, as follows:

1. *Coursework Only Program:*

- a. 21 graded credits in industrial engineering (500 level or above) courses
- b. 17 graded credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
- c. 3 credits of industrial engineering seminar: IND E 591, IND E 592, IND E 593

2. *Thesis Program:*

- a. 18 graded credits in industrial engineering (500 level or above) courses
- b. 11 graded credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
- c. 9 credits of master's thesis (IND E 700)
- d. 3 credits of industrial engineering seminar: IND E 591, IND E 592, IND E 593

Doctor of Philosophy

Admission Requirements

For consideration to the Ph.D. in Industrial Engineering degree, applicants should have, or be close to completing, their master's degree in any discipline of engineering when applying, with a minimum 3.00 GPA.

Degree Requirements

90 credits, as follows:

1. 3 credits of industrial engineering graduate seminar: IND E 591, IND E 592, IND E 593 (1, 1, 1)
2. 60 credits of coursework, with at least 18 credit hours of 500-level courses. A master's degree from the UW or another institution may be used as a substitute for 30 of these 60 credits.
3. General examination
4. Dissertation: 27 credits of dissertation (IND E 800) over a period of at least three quarters.
5. Final examination

COLLEGE OF ENGINEERING

INDUSTRIAL AND SYSTEMS ENGINEERING

INDUSTRIAL ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

IND E 101 Introduction to Industrial Engineering (1) I&S

Examines the basic concepts and methods of industrial engineering through team-based hands-on activities. Explores the profession of industrial engineering. Discusses resources available to industrial engineering students at the University of Washington. Offered: A.

[View course details in MyPlan: IND E 101](#)

IND E 250 Fundamentals of Engineering Economy (4) NW *W. CHAOVALITWONGSE, C. LIU*

Basics of industrial cost analysis and accounting. Application of interest computations to engineering decision making. Analysis of engineering alternatives based on use of interest computations, valuations, depreciation, and cost estimates. Offered: ASp.

[View course details in MyPlan: IND E 250](#)

IND E 315 Probability and Statistics for Engineers (3) NW *L. BOYLE, P. JOHNSON, C. MASTRANGELO*

Application of probability theory and statistics to engineering problems, distribution theory and discussion of particular distributions of interest in engineering, statistical estimation and data analysis. Illustrative statistical applications may include quality control, linear regression, and analysis of engineering data sets. Prerequisite: either MATH 136, MATH 307, or AMATH 351. Offered: AWSpS.

[View course details in MyPlan: IND E 315](#)

IND E 316 Design of Experiments and Regression Analysis (4) NW *L. BOYLE*

Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with STAT 316; W.

[View course details in MyPlan: IND E 316](#)

IND E 321 Statistical Quality Control (4)

Design of quality control and assurance systems. Statistical Process Control (SPC) design and implementation. Control charts for attributes and variables. Process capability analysis and process improvement techniques.

Statistical tolerance design. Quality management and recent developments. Prerequisite: IND E 315¹⁶²⁴ Offered: W.
[View course details in MyPlan: IND E 321](#)

IND E 337 Introduction to Manufacturing Systems (4) *J. HEIM*

Description of manufacturing systems. Includes discussion of current trends in manufacturing. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification.

[View course details in MyPlan: IND E 337](#)

IND E 351 Human Factors in Design (4) *Boyle*

Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations. Offered: Sp.

[View course details in MyPlan: IND E 351](#)

IND E 410 Linear and Network Programming (4)

Modeling and optimization of linear network problems. Topics include: optimization of linear systems, mathematical model design, simplex method, primal-dual algorithms, parametric programming, goal programming, network problems and algorithms, and PERT/CPM. Prerequisite: either MATH 136 or MATH 308; CSE 142. Instructors: Ghate, Zabinsky Offered: A.

[View course details in MyPlan: IND E 410](#)

IND E 411 Stochastic Models and Decision Analysis (4) *A. GHATE, Z. ZABINSKY*

Stochastic systems analysis to industrial engineering problems. Topics include: Markov chains, queueing theory, queueing applications, and decision analysis. Prerequisite: IND E 315; IND E 410. Offered: W.

[View course details in MyPlan: IND E 411](#)

IND E 412 Integer and Dynamic Programming (4)

Modeling and optimization of problems and dynamic programming approach to optimization. Topics include: integer programming formulation techniques, linear and Lagrangian relaxation, branch-and-bound and cutting-plane methods, integer programming applications, and dynamic programming. Prerequisite: IND E 411.

Instructors: Ghate, Zabinsky Offered: Sp.

[View course details in MyPlan: IND E 412](#)

IND E 424 Simulation (4) *A. BANERJEE, J. HEIM*

Discrete-event simulation methodology emphasizing model formulation and construction with modern simulation languages and environments, statistical basis for evaluating model results, design and management of simulation projects. Application to manufacturing, retail, and service industries. Prerequisite: IND E 337, which may be taken concurrently; IND E 411 Offered: W.

[View course details in MyPlan: IND E 424](#)

IND E 426 Reliability Engineering and System Safety (4)

Reliability and system safety measures. Life distributions and their applications in reliability. System reliability models. Design by reliability and probabilistic design. Reliability and safety analysis through FMECA and FTA. Reliability estimation and measurement by testing for binomial, exponential, and Weibull distributions.

Prerequisite: IND E 315.

[View course details in MyPlan: IND E 426](#)

IND E 430 Manufacturing Scheduling and Inventory (4) *W. CHAOVALITWONGSE*

Manufacturing scheduling and inventory control for different work organizations. Coverage of workforce scheduling, job- and flow-shop scheduling and order release, production line balancing, MRP II, Lean Production, and data management. Particular attention to computer-based aspects of management and scheduling for manufacturing and service industries. Prerequisite: IND E 337; IND E 410, both of which may be taken concurrently. Offered: A.

[View course details in MyPlan: IND E 430](#)

IND E 439 Plant Layout and Material Handling (4) *W. CHAOVALITWONGSE*

Design of new or expanding industrial facilities. Consideration of work organization and layout. Study of basic design of plant systems, including plumbing, electrical, HVAC, illumination, acoustics, and waste handling. In depth coverage of material handling system design and equipment choices. Prerequisite: IND E 410 which may be taken concurrently. Offered: A.

[View course details in MyPlan: IND E 439](#)

IND E 455 User Interface Design (4) *Furness*

Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with HCDE 455; A.

[View course details in MyPlan: IND E 455](#)

IND E 470 Systems Engineering (4)

Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Introduction to risk analysis and reliability, failure modes and effects analysis, writing specifications, and lean manufacturing. Offered: jointly with A A 470; A.

[View course details in MyPlan: IND E 470](#)

IND E 494 Design in the Manufacturing Firm (4)

Engineering design in manufacturing firms is presented. Topics include design methodology, concurrent engineering, and project management. Focus on the relationship between product design and manufacturing (design for production and assembly). Prerequisite: IND E 337. Instructors: Mastrangelo Offered: W.

[View course details in MyPlan: IND E 494](#)

IND E 495 Industrial Engineering Design (4)

Capstone senior design project involving identification and synthesis of industrial engineering skills. Students apply their knowledge of industrial engineering to actual industrial problems. Prerequisite: IND E 494.

Instructors: Mastrangelo Offered: Sp.

[View course details in MyPlan: IND E 495](#)

IND E 496 Technology-Based Entrepreneurship (3) *Furness*

Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Offered: jointly with M E 496; Sp.

[View course details in MyPlan: IND E 496](#)

IND E 498 Special Topics in Industrial Engineering (1-5, max. 9)

Lecture and/or laboratory.

[View course details in MyPlan: IND E 498](#)

IND E 499 Special Projects (2-5, max. 12)

[View course details in MyPlan: IND E 499](#)

IND E 508 Stochastic Processes in Engineering (3) *A. GHATE*

Non-measure theoretic introduction to stochastic processes. Topics include Poisson processes, renewal processes, Markov and semi-Markov processes, Brownian motion, and martingales, with applications to problems in queuing, supply chain management, signal processing, control, and communications. Prerequisite: E E 505. Offered: jointly with E E 508; W.

[View course details in MyPlan: IND E 508](#)

IND E 512 Introduction to Optimization Models (3) *Chaovalitwongse, Zabinsky*

Presents optimization models that are used in applications such as industrial engineering, production,

transportation, financial investment, healthcare systems, and environmental ecology. Problems span a variety of continuous and integer optimization models, with discussion of multi-objectives and incorporating randomness into optimization models.

[View course details in MyPlan: IND E 512](#)

IND E 513 Linear Optimization Models in Engineering (3) *W. CHAOVALITWONGSE, A. GHATE, Z. ZABINSKY*

Advanced formulation techniques to expand applications of linear programming to large-scale models. Appreciation of role of optimization models in engineering applications through introduction of techniques such as decomposition. Individual engineering projects. Prerequisite: IND E 410 and MATH 308 or permission of instructor.

[View course details in MyPlan: IND E 513](#)

IND E 515 Fundamentals of Optimization (5)

Maximization and minimization of functions of finitely many variables subject to constraints. Basic problem types and examples of applications; linear, convex, smooth, and nonsmooth programming. Optimality conditions. Saddlepoints and dual problems. Penalties, decomposition. Overview of computational approaches. Prerequisite: linear algebra and advanced calculus. Offered: jointly with AMATH 515/MATH 515.

[View course details in MyPlan: IND E 515](#)

IND E 516 Applications of Optimization in Engineering Design (3)

Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for problems otherwise computationally intractable. Individual projects in engineering optimal design. Prerequisite: AMATH 515/MATH 515/IND E 515 and MATH 328 or permission of instructor. Instructors: Zabinsky

[View course details in MyPlan: IND E 516](#)

IND E 519 Healthcare Modeling and Decision Making (3)

Applications of operations research in healthcare. Introduction to a variety of modeling techniques including decision analysis, cost-effectiveness analysis, Markov models, Markov decision processes, dynamic programming, simulation, queuing, scheduling, machine learning and their applications in healthcare management and medical decision making.

[View course details in MyPlan: IND E 519](#)

IND E 521 Quality Control in Manufacturing (3)

Design of quality control systems in manufacturing. Use of advanced statistical process controls, sampling inspection techniques, process capability, and other statistical tools. Also includes vendor sourcing and control tools, methods for establishing specifications and tolerances, quality function deployment, and other quality control techniques.

[View course details in MyPlan: IND E 521](#)

IND E 524 Robust Design and Quality Engineering (3)

Introduction to robust design and quality engineering. Applications of design of experiments for product and process design optimization. Experimental design using orthogonal arrays and linear graphs. System models using Chebyshev's orthogonal polynomials. Robustness in design and quality improvement for complex systems including Taguchi methods for quality engineering. Prerequisite: IND E 316 or equivalent. Instructors: Kapur

[View course details in MyPlan: IND E 524](#)

IND E 526 Reliability in Product Design and Testing (3)

Product assurance including reliability and quality engineering. Reliability design, measurement, and optimization. Advanced topics in probabilistic design. Design of reliability test plans and analysis of test data. Design of reliability programs and their management.

[View course details in MyPlan: IND E 526](#)

IND E 535 Engineering Simulation (3) *A. BANERJEE, J. HEIM*

Advanced applications of discrete event, continuous, and combined discrete-continuous simulation modeling, detailed examination of fundamental computer programming concepts underlying the design and development of simulation languages, variance reduction techniques, and output analysis for various engineering, service systems, and manufacturing applications. Prerequisite: IND E 424 or equivalent.

[View course details in MyPlan: IND E 535](#)

IND E 537 Introduction to Manufacturing Systems (3) *A. BANERJEE, J. HEIM*

Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with ENV H 537; A.

[View course details in MyPlan: IND E 537](#)

IND E 543 Virtual Interface Technology (3)

Explores advanced concepts and technologies for interfacing humans to complex machines, with focus on virtual interfaces. Interface design principles reviewed from psychological and technological perspectives. Hardware, software, and mindware aspects of virtual interfaces investigated. Applications postulated and designed. Prerequisite: graduate standing in College of Engineering or permission of instructor. Instructors: Furness

[View course details in MyPlan: IND E 543](#)

IND E 544 Virtual World Development (3)

Software implementation, physiological and cognitive constraints, and the mathematics and philosophy of inclusion. Development of software tools, editing and interaction techniques, disposition of virtual world entities, nature of space, situated knowledge, divergent models for multiple participants, experiential mathematics, cyberspace. Cultural, legal, moral, ethical issues. Prerequisite: IND E 543 or permission of instructor. Instructors: Furness

[View course details in MyPlan: IND E 544](#)

IND E 545 User-Centered Design (4)

Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with HCDE 518; W.

[View course details in MyPlan: IND E 545](#)

IND E 546 Analytical Methods in Transportation I (3)

Application of analytical and statistical methods to issues in transportation and driving. Analysis of probability distributions that describe variables. Development of statistical models for predicting transportation phenomena. Elementary sampling theory hypothesis testing, regression analysis, time series analysis, applied to transportation data. Prerequisite: either IND E 315, MATH 390/STAT 390, or equivalent. Instructors: Boyle Offered: jointly with CEE 584; W.

[View course details in MyPlan: IND E 546](#)

IND E 549 Human Factors in Engineering Design (3) *L. BOYLE*

Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations. Covers traditional human factors material with a project-based focus/emphasis. Offered: jointly with ENV H 549; Sp.

[View course details in MyPlan: IND E 549](#)

IND E 564 Recognition of Health and Safety Problems in Industry (2)

Develops skills in occupational health and safety hazard recognition in a variety of important Northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of

several local facilities, stressing a multidisciplinary approach. Offered: jointly with ENV H 564; A.

[View course details in MyPlan: IND E 564](#)

IND E 566 Introduction to Ergonomics (3)

Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/NSG 508; W.

[View course details in MyPlan: IND E 566](#)

IND E 567 Applied Occupational Health and Safety (3)

Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with ENV H 559/NSG 505; Sp, even years.

[View course details in MyPlan: IND E 567](#)

IND E 569 Occupational Biomechanics (4)

Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with ENV H 569; Sp, even years.

[View course details in MyPlan: IND E 569](#)

IND E 570 Supply Chain Systems (3)

Develops concepts related to the design, evaluation, and performance of supply chain systems through an exploration of contemporary practice and research, focusing on current issues, analytical frameworks, and case studies. Prerequisite: IND E 315 or equivalent. Instructors: Beamon

[View course details in MyPlan: IND E 570](#)

IND E 575 Inventory Management (5) *Jain*

Examines modeling and analysis of inventory flow in supply chains in order to improve service and decrease cost. Covers tools and methods for making long-term and short-term inventory related decisions for items with different demand and supply characteristics. Topics include forecasting, production planning, deterministic and stochastic inventory models, and supply management. Offered: jointly with SCTL 503; W.

[View course details in MyPlan: IND E 575](#)

IND E 576 Facility Design and Operations Management (5) *Heim*

Introduces the fundamental principles, concepts, and procedures for designing and managing supply-chain networks of factories, suppliers, warehouses, and distribution centers. Students learn to use engineering systems design methodologies and software to construct appropriately detailed quantitative models, evaluate alternative supply network configurations, and assess the management of their operations. Offered: jointly with SCTL 504; Sp.

[View course details in MyPlan: IND E 576](#)

IND E 581 Navigating the Business Environment (3) *Mastrangelo*

Covers the fundamentals of finance and accounting, marketing, strategy, and business communication as well as the skill of identifying and influencing the key decision maker. Offered: A.

[View course details in MyPlan: IND E 581](#)

IND E 582 Technical Leadership (3) *Mastrangelo*

Includes how to motivate, reach consensus, work virtually, recruit, and work with engineers from different cultures. Offered: W.

[View course details in MyPlan: IND E 582](#)

IND E 583 Decision Analysis in Engineering (3) Mastrangelo

Examines multi-criteria decision tools involving qualitative and quantitative methods. Covers decision trees, subjective probability, utility and value theories, goals and objectives, risk, optimization, and simulation. Includes case studies in decision and systems analysis. Offered: Sp.

[View course details in MyPlan: IND E 583](#)

IND E 584 Project Performance (3) Mastrangelo

Examines the fundamentals of project performance and application of systems engineering theory, concepts, and tools and techniques to plan, manage, and accomplish organizational objectives in a project framework. Also considers the critical roles leadership and team development plays in successful completion of projects. Offered: S.

[View course details in MyPlan: IND E 584](#)

IND E 585 Systems Architecture and Model-Based Systems Engineering (3) C. MASTRANGELO

Introduction to systems architecture through development of system requirements, allocations of functionality and reintegration. Utilizes model systems engineering as a graphical, mathematical, and modeling tool for systems analysis. Offered: A.

[View course details in MyPlan: IND E 585](#)

IND E 586 Systems Engineering Risk: Assessment and Management (3)

Management of systems engineering risk ensures costs, schedule, and technical performance objectives are achieved. Covers analysis methods and stochastic modeling for assessing and making decisions about projects and financial and technical risks associated with complex systems engineering projects. Also covers balancing risks across the systems development life cycle.

[View course details in MyPlan: IND E 586](#)

IND E 591 Seminar (1-)

Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor. Credit/no-credit only. Offered: A.

[View course details in MyPlan: IND E 591](#)

IND E 592 Seminar (-1-)

Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor. Credit/no-credit only. Offered: W.

[View course details in MyPlan: IND E 592](#)

IND E 593 Seminar (-1)

Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: IND E 593](#)

IND E 595 Global Integrated Systems Engineering ([4/5]-, max. 9) C. MASTRANGELO

Covers systems engineering, project management, finance and economics in a global environment. Offered: jointly with A A 595; AW.

[View course details in MyPlan: IND E 595](#)

IND E 596 Global Integrated Systems Engineering Project (3)

Project-based systems design course. Prerequisite: A A/INDE 595. Instructors: Mastrangelo Offered: jointly with A A 596; Sp.

[View course details in MyPlan: IND E 596](#)

IND E 599 Special Topics in Industrial Engineering (1-5, max. 9)

Prerequisite: permission of supervisor.

Materials Science and Engineering

[Display as tabs](#)

Department Overview

302 Roberts

Materials science and engineering is an interdisciplinary field that addresses the structure, processing, and property relationships in materials for engineering applications. Basic principles of chemistry and physics are applied to provide an understanding of the structure of materials and the manner in which the structure determines the properties. Scientific processing methods are then applied to yield the necessary properties, which then can be integrated with, and designed to accommodate the needs of, modern technology.

Advances in materials enable technological progress in many fields. Historically, this connection between materials and technology has been so intimate that major periods in civilization have been named after the dominant material used in that era (e.g., Bronze Age, Iron Age). In the past few decades, at the core of the progress in such diverse fields as transportation, communication, electronics, energy and environment are significant advances in materials. Materials science and engineering is a broad and growing discipline.

Materials Science and Engineering at the University of Washington has recently experienced rapid expansion into new research areas, including polymers, hybrids, biomaterials, biomimetics, nanomaterials, photonic and magnetic materials. These areas have applications in current and emerging industries, and complement existing strength in ceramics, metals, electronic materials, and composites.

Undergraduate Program

Adviser

302A Roberts, Box 352120

(206) 543-2600

mse@uw.edu

The Department of Materials Science and Engineering offers the following programs of study:

- The Bachelor of Science in Materials Science and Engineering degree
- The Bachelor of Science in Materials Science and Engineering degree with an option in nanoscience and molecular engineering
- A minor in materials science and engineering

Bachelor of Science in Materials Science and Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; English composition; CSE 142 or AMATH 301; MSE 170.

Department Admission Requirements

Applicants are considered in three groups - Direct Freshman Admission, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. Applicants not admitted under one admission group may subsequently apply to another admission group after completing more coursework. All applicants have the right to appeal the department's admission decision.

Nanoscience and Molecular Engineering Option (NME): Admission to the NME option for MSE majors is by self-selection and normally occurs upon completion of NME 220, all MSE prerequisites, and formal admission to the MSE Department. A small number of advanced students may be admitted into the NME option upon application to the department. Admission is based on the student's academic record, including grades in NME 220 and any MSE courses already taken and on prior experience/work in the field of nanoscience and/or molecular engineering. Students applying for the NME option should indicate that interest in the Materials Science and Engineering application and discuss their interests and background in the essay.

Direct Freshman Admission

1. Open to freshman students formally admitted to the UW
2. High school GPA of 3.70 or higher; SAT (or equivalent) scores of 1300 or higher
3. Indication on the application that Materials Science and Engineering is the first choice for the major

Early Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or above; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW. Applications are accepted for autumn quarter only. Application deadline is July 1.
3. *Grade requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission

Upper-Division Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122; CHEM 142, CHEM 152; CSE 142 or AMATH 301; MSE 170; 5 credits of English composition
2. 64 credits completed by application deadline. Applications are accepted for autumn quarter only. Application deadline is July 1.
3. *Grade requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Graduation Requirements

Minimum 180 credits to include:

General Education Requirements (87-92 credits)

1. *Written and Oral Communications*: 8 credits, to include one 5-credit English composition course from the University list; HCDE 231. University-required 4 additional writing credits are met by major core courses.
2. *Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S) (24 credits)*: Minimum 10 credits required in each area.
3. *Natural World (55-60 credits)*:
 - a. *Mathematics (24-25 credits)*: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308 (or MATH 318); one from MATH 309, MATH 324, IND E 315, or STAT 390
 - b. *Science (31-35 credits)*: CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; two additional natural science courses from the department's approved list

Major Requirements (93credits)

1. *Engineering Fundamentals (24 credits)*: CSE 142 or AMATH 301, MSE 170, A A 210, CEE 220; two of the following: E E 215, M E 123, A A 260 or CHEM E 325, IND E 250, CHEM E 220
2. *Materials Science and Engineering Core (53 credits)*: MSE 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 399, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499
3. *Technical Electives (16 credits)*: See department advising office for list of acceptable courses.
4. *Grade Requirement*: Minimum 2.00 departmental cumulative GPA

Major Requirements for Nanoscience and Molecular Engineering Option (97 credits)

1. *Engineering Fundamentals (24 credits)*: CSE 142 or AMATH 301, MSE 170, A A 210, CEE 220; two of the following: E E 215, M E 123, A A 260 or CHEM E 325, IND E 250, CHEM E 220
2. *Materials Sciences and Engineering Core (53 credits)*: MSE 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 399, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499. The senior project (MSE 499) must be in an NME area.
3. *Nanoscience and Molecular Engineering Courses (20 credits)*: NME 220, NME 221, NME 321, NME 421; additional approved nanoscience and molecular engineering electives to reach 20 credits. See adviser for list of approved electives.
4. *Grade Requirements*: Minimum 2.00 departmental cumulative GPA

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy contact the department adviser or refer to the department website (<http://www.mse.washington.edu/current/undergrad/continuation>)

Minor

Minor Requirements: 30 credits as follows: MSE 170, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362. Minimum 2.0 grade of 2.0 required for each course.

The following courses serve as prerequisites for the departmental courses in the minor: MATH 124, MATH 125, MATH 126, MATH 307, and MATH 308 or MATH 318; CHEM 142 or CHEM 145, CHEM 152 or CHEM 155; PHYS 121, PHYS 122, PHYS 123; MSE 170; English composition. Students should take these courses before beginning the minor program.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*

Undergraduate students are offered both broad core and in-depth courses. The broad core provides the needed background and understanding of all types of engineering materials, including metals, ceramics, polymers, electronic materials, and composites. The curriculum provides an opportunity to use basic knowledge in science and engineering fundamentals to synthesize and design materials for engineering applications. The undergraduate curriculum emphasizes hands-on experience, oral and written communication, and teamwork, and encourages participation in research. Graduates with a degree in materials science and engineering find employment in a broad range of industries including aerospace, biomedical, electronic manufacturing, materials processing, and transportation.

The Bachelor of Science in Materials Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:

- a. An ability to apply knowledge of mathematics, science and engineering
- b. An ability to design and conduct experiments, as well as to analyze and interpret data
- c. An ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability
- d. An ability to function on multi-disciplinary teams
- e. An ability to identify, formulate and solve engineering problems
- f. An understanding of professional and ethical responsibilities
- g. An ability to communicate effectively
- h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
- i. A recognition of the need for, and an ability to engage in life-long learning
- j. Knowledge of contemporary issues
- k. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice
- l. An ability to apply advanced science (such as chemistry and physics) and engineering principles to ceramics, metals, polymers and composite materials

systems

- m. An integrated understanding of the scientific and engineering principles underlying the four major elements of the field: structure, properties, processing and performance related to material systems
 - n. An ability to apply and integrate knowledge from each of the four major elements of the field to solve materials selection and design problems
 - o. An ability to utilize experimental, statistical and computational methods consistent with the goals of the program
 - p. Experience in laboratory work and in research and/or design problem solving
 - q. Preparation, as appropriate to the student and the area of interest, to enter graduate degree programs.
- *Instructional and Research Facilities:* Facilities include equipment for electron and optical microscopy, x-ray diffraction, high-temperature heat treatment and mechanical testing, specialized processing equipment, including hot and cold isostatic presses, nitrogen reaction furnaces, and automated TGA, DTA analysis systems. Equipment for analyses of particle size, surface areas, and pore size is also available. Students have liberal access to University computing facilities.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* Materials Science and Engineering students interested in paid internship experiences should contact the Engineering Co-op and Internship Program, 301 Loew Hall, Box 352180, (206) 543-8711, coop@engr.washington.edu.
 - *Department Scholarships:* In addition to need-based aid provided through the University's Office of Student Financial Aid, companies and individuals with interest in developing materials science and engineering students have provided scholarships for students admitted to the program. Specific information and application forms are available from the academic counselor in 302 Roberts.
 - *Student Organizations/Associations:* Keramos (materials honor society); American Ceramic Society (ACerS); ASM/TMS (the joint student chapter of ASM International and TMS); Society for the Advancement of Materials and Process Engineering (SAMPE).

Of Special Note:

Combined BS/MS Degree Program

The goal of the combined BS/MS program in Materials Science and Engineering is to provide a more direct route to the master's degree for well-qualified undergraduate students who wish for more in-depth graduate-level work in preparation for work in industry or for a PhD program. The combined program creates a more efficient and continuous academic experience that leads directly to the Master of Science degree. Students earn both the BS and MS degrees in five years. This program is available to students after they are admitted to the department. Information is available below.

Graduate Program

Graduate Program Coordinator
302 Roberts, Box 352120
(206) 543-2600
mse@uw.edu

The Department of Materials Science and Engineering offers programs of study leading to the Master of Science in Materials Science and Engineering (MSMSE) and the Doctor of Philosophy in either materials science and engineering or materials science and engineering/nanotechnology.

In addition, the degree of Master of Science (without designation) is offered through the College of Engineering. This degree is intended to accommodate students with undergraduate majors outside physical science or engineering who desire a special graduate program to encompass a broad range of materials science studies.

The primary goals of the master's and doctoral programs are to prepare students for industrial employment and research/development careers and to generate new knowledge. The specific objectives are as follows:

- Deepen knowledge and capabilities broadly and in a chosen specialty area: A student's knowledge, attained through coursework and scholarly investigation of literature relevant to thesis project, should be commensurate with that of leading researchers in the field.
- Master and develop state-of-the-art research techniques appropriate to specialty: Analytical, computational, and experimental tools are learned via instruction by adviser(s) and peers in conjunction with maintaining currency with literature.
- Contribute new knowledge of lasting value to the field by creative and independent research: A student's thesis research must demonstrate originality and high quality, as judged by faculty committee.
- Broaden candidate's knowledge of field and societal issues: Through coursework, department and group seminars, and attendance at professional meetings, a student learns to appreciate context of specialty within materials science and engineering and gain ability to apply knowledge and methods to a spectrum of engineering and scientific challenges.
- Learn to work effectively with colleagues and contribute to professional community: Attained by cooperation in team research projects, presentation of research and professional meetings.

Combined Bachelor of Science/Master of Science

Admission Requirements

Students may apply to enter the combined BS/MS program any time after they are accepted into the MSE department as an undergraduate major. Requirements for application include:

1. Overall minimum 3.20 GPA in the last 90 credits before application
2. At least 15 credits of MSE courses completed with a minimum 3.40 GPA
3. Statement of interest in and goals for the MS degree
4. Interview with admissions committee

Students accepted into the combined BS/MS program by the department apply to the Graduate School in December of their senior year. These students normally enroll in the materials science option for the MS degree.

Degree Requirements

216 credits.

Requirements are the same as for the current BS and MS programs. However, up to 7 credits of 400- or 500-level courses taken as an undergraduate over and above the BS requirement may be counted towards the MS degree. These credits transfer to the graduate program when the student enters as a graduate student, subject to approval of the MSE Graduate Program Committee. The Graduate School waives the restrictions on transfer credits for this purpose.

Students admitted into the BS/MS program combine their BS senior project requirement (MSE 499) with the MS thesis requirement (MSE 700) and begin research starting summer or autumn quarter of their senior year. The student receives 4 credits of MSE 499 for the undergraduate portion of the research program, then registers for 9 or more credits of MSE 700 for the thesis. Written and oral reports are required to complete the MSE 499 credits, to be submitted before the end of the senior year. The thesis is required for completion of the MS degree.

Master of Science in Materials Science and Engineering

Admission Requirements

The applicant must have a minimum 3.00 undergraduate GPA in the last 90 graded quarter hours or the last 60 graded semester hours. Graduate Record Examination (GRE) results are also required for the general test.

Students with backgrounds in engineering and the physical sciences are admitted into the MSMSE program. After admission, students with a minimum three years' industrial experience in an engineering position may apply for the engineering materials (practice-oriented, non-thesis) option.

Specific program pre-requisites, which may be satisfied after entry into the program, are as follows:

1. Knowledge of fundamentals of Materials Science and Engineering equivalent to MSE 170
2. Knowledge of crystallography equivalent to MSE 331
3. Background in materials properties equivalent to MSE 362 and MSE 351
4. Knowledge of kinetics equivalent to MSE 322
5. Understanding of thermodynamics equivalent to the level of MSE 421

Degree Requirements

36 credits, as follows:

1. At least 27 credits must be for coursework, including 3 credits of MSE 520 seminar (see below). Of these 27 credits, 18 must be in courses numbered in the 500 series (these 18 may include the 3 seminar credits). Numerical grades from approved 400-

level and all 500-level courses must be received for at least 18 quarter credits of coursework taken at the UW. A minimum 3.00 cumulative GPA is required for a graduate degree at the University. Required courses may not be taken on the S/NS grading option. The S/NS grading option in other courses must have the approval of the student's faculty adviser.

2. Thesis Option

1. Three required core courses (9 credits): MSE 510, MSE 525, MSE 541
2. Three optional core courses
3. 3 credits of seminar (MSE 520)
4. 9 credits of thesis work (MSE 700)
5. 6 credits of electives (400- or 500-level physical science or engineering courses) to meet the 36-credit requirement

3. Non-Thesis Option

1. Three required core courses (9 credits): MSE 510 , MSE 525 , MSE 541
2. Four practice-oriented materials or related engineering courses, 12 credits minimum, chosen to complement the student's program
3. Materials engineering project, MSE 598, 4 credits, taken during the last quarter of the master's program
4. Electives to meet the 36 credit requirement.
5. Of the above credits, all must be at the 400 or 500 level, with a minimum of 18 at the 500 level, and other Graduate School requirements must be met. Numerical grades are also required for at least 18 credits of 400- or 500-level coursework.

Doctor of Philosophy

Admission Requirements

The applicant must have a minimum 3.00 GPA in the last 90 graded quarter hours or the last 60 graded semester hours. Graduate Record Examination (GRE) results are also required for the general test.

In general, entering graduate students with only the BS degree are required to enroll as MS students.

Prerequisite:

1. Knowledge of fundamentals of materials science and engineering equivalent to MSE 170
2. Knowledge of crystallography equivalent to MSE 331
3. Background in materials properties equivalent to MSE 362 and MSE 351
4. Knowledge of kinetics equivalent to MSE 322

The department also requires that all entering graduate students have an understanding of thermodynamics equivalent to the level of MSE 421. If the student does not have two undergraduate thermodynamics courses upon entry to the graduate program, then MSE 421 is required for the PhD degree.

Students interested in materials science and engineering with the nanotechnology option must make formal application to the UW's Center for Nanotechnology after being admitted to the MSE graduate program.

Degree Requirements

90 credits as follows:

1. 30 credits from MSMSE degree or equivalent
2. Three required core courses (9 credits): MSE 510 , MSE 525 , MSE 541
3. 6 credits of seminar (MSE 520)
4. 9 credits of elective MSE courses
5. 36 credits of MSE 800
6. Qualifying examination
7. General examination
8. Portfolio review
9. Dissertation
10. Final examination

Advising and Progress to Degree

The graduate coursework is designed to provide a higher level expertise than a BS in both core topics and specialty areas chosen by the student. Thus, all students must take three required core courses (MSE 510, MSE 525, and MSE 541) and a series of elective courses. Students are also required to enroll for the department seminar series.

Graduate students are advised by their Supervisory/Thesis Committee chair, members of the Supervisory/Thesis Committee, and the academic counselor, each with a specific advising role. The department also maintains a Graduate Student Handbook, given to each graduate student upon entry. Graduate students work closely with their committee chairs. Through this interaction, students develop a professional identity which includes learning how to do research, defining research problems, research supervision, data analysis and synthesis, presentation and participation in professional meetings, writing papers and reports, writing research proposals, and receiving information and advice regarding career options and help with placement.

Financial Support

Graduate students are eligible for a variety of competitive financial awards while they pursue their MSE degrees. Awards include teaching and research assistantships and a broad spectrum of internal and external fellowships. Almost all graduate students receive some financial support. Further details are on the departmental website and in the Graduate Student Handbook.

Engineering Materials Option for the Master of Science

The Engineering Materials option for an MS in Materials Science and Engineering is a non-thesis program designed for students with substantive industrial experience who want a master's degree to further their career goals or to meet work requirements. Students selecting this degree option should be practicing materials engineers with a bachelor of

science degree. This program contains practice-oriented courses in addition to the usual graduate core courses. In place of a research-oriented thesis, students carry out a complete analysis and develop recommended solutions to an engineering materials problem. This project is industrially oriented, undertaken at an industrial site and supervised by an experienced engineer in industry and an MSE faculty member. Written and oral final project reports are required. The engineering materials option is designed to be completed in one year (four quarters) for on-campus students; it is also available for part-time students through the Education at a Distance for Growth and Excellence (EDGE) program.

COLLEGE OF ENGINEERING MATERIALS SCIENCE & ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MSE 170 Fundamentals of Materials Science (4) NW

Fundamental principles of structure and properties of materials utilized in practice of engineering. Properties of materials are related to atomic, molecular, crystalline structure. Metals, ceramics, multiphase systems, and polymeric materials. Relationships between structure and electrical, mechanical, thermal, chemical properties. For advanced freshmen and sophomores. Prerequisite: either CHEM 152, CHEM 154, or CHEM 155. Offered: AWSpS.

[View course details in MyPlan: MSE 170](#)

MSE 273 Introduction to Molecular Engineering of Interfaces and Surfaces (2) NW

Covers interfaces and surfaces critical in every field of science, engineering, and medicine from catalytic reactions, drug delivery systems, biocompatibility, carbon fiber composites, semiconductor design, and global warming. Combines active learning, case studies, and hands-on laboratory exploration in nanotechnology. Offered: W.

[View course details in MyPlan: MSE 273](#)

MSE 298 Introduction to Modern Materials (1)

Materials and advances in materials are at the core of a large number of significant technological advances. Seminar format highlights processing, properties, and uses of a broad class of materials for a variety of applications, each introduced by a faculty member from the department. Offered: ASp.

[View course details in MyPlan: MSE 298](#)

MSE 310 Introduction to Materials Science and Engineering (3)

Introduces the materials field to new department majors. Examples are drawn from ceramics, metals, polymers, electronic materials, and composites. Structure-properties-manufacturing-design relationships are emphasized. Materials selection design project. Introduction to research. Offered: A.

[View course details in MyPlan: MSE 310](#)

MSE 311 Integrated Junior Laboratory I (3)

Laboratory experimental techniques including writing, literature search, research planning, and computer applications. Optical microscopy experiments, sample preparations, X-ray equipment, and X-ray diffraction analysis of materials. Prerequisite: MSE 170. Offered: A.

[View course details in MyPlan: MSE 311](#)

MSE 312 Integrated Junior Laboratory II (3)

Materials processing related laboratory experiments, including powder synthesis, redox reactions of particulate materials, grain growth, recrystallization, phase transformation, green tape processing, particle interaction and rheology, slip and tape casting and dry processing, sol-gel processing, polymer processing, sintering behavior, metal welding, and heat treatment. Prerequisite: MSE 311. Offered: W.

[View course details in MyPlan: MSE 312](#)

MSE 313 Integrated Junior Laboratory III (3)

Kinetics and phase transformation related laboratory experiments, including solidification. Mechanical properties related laboratory experiments, including stress-strain behavior of materials and elastic modulus of materials, effect of work hardening on stress strain behavior, and effect of surface condition of the strength of glass. Prerequisite: MSE 312. Offered: Sp.

[View course details in MyPlan: MSE 313](#)

MSE 321 Thermodynamics and Phase Equilibrium (4)

Phase equilibria in materials systems of one, two, and three components. Determination of phase diagrams. Quantitative applications of thermodynamics to systems of interest to materials scientists; detailed review of thermodynamic laws and principles. Offered: A.

[View course details in MyPlan: MSE 321](#)

MSE 322 Kinetics and Microstructural Evolution (4)

Applications of thermodynamic and kinetic principles to the study of transport processes, transformations and reactions in engineering materials. Thermal activation and rates of processes, nucleation and growth, phase transformations, grain growth, sintering, among other processes. Prerequisite: MSE 321. Offered: W.

[View course details in MyPlan: MSE 322](#)

MSE 331 Crystallography and Structure (3)

Theory and practice of x-ray diffraction with applications to materials sitemaps. Principles of crystal symmetry, lattice systems, and stereographic projections. Bragg's law of diffraction, Laue conditions, diffraction by X-rays, single crystal and powder diffraction techniques and their applications to lattice, phase, strain, and texture analyses. Prerequisite: MSE 170. Offered: A.

[View course details in MyPlan: MSE 331](#)

MSE 333 Materials Characterization (3)

Principles and applications of analytical techniques, imaging, diffraction and spectroscopy for materials characterization including crystal structures, texture formation, phase analysis. Nano- and micro-structures of materials including defects and second phases, chemistry, bonding, compositions of materials. Demonstrations and lab experiments involving light scattering and diffraction techniques. Prerequisite: MSE 170; MSE 331; MSE 351. Offered: Sp.

[View course details in MyPlan: MSE 333](#)

MSE 342 Materials Processing I (3)

Provides students with the fundamentals and applications of metal and alloy processing techniques. Focuses on relationships between the processing fundamentals and practice, and between processing, microstructure, and properties. Ferrous and non-ferrous metal and alloy processing discussed. Prerequisite: MSE 170; MSE 321. Offered: W.

[View course details in MyPlan: MSE 342](#)

MSE 351 Electronic Properties of Materials (3)

Introduction to elementary solid-state concepts in materials, free electrons, and band theories. Principles to conduction in metals, insulators, semiconductors, and applications of semiconductors and devices. Prerequisite: MSE, 170, MSE 331. Offered: W.

[View course details in MyPlan: MSE 351](#)

MSE 352 Functional Properties of Materials I (3)

Introduction to thermal properties, electrical (ionic and polaron) conduction and optical properties, including origins of color, interaction of light wave with materials, lasers and optoelectronics. Focuses on the relations between physical properties and chemical composition, crystal structure, and microstructure. Prerequisite: MSE 351. Offered: Sp.

[View course details in MyPlan: MSE 352](#)

MSE 362 Mechanical Behavior of Materials I (3)

Influence of structure on the mechanical properties materials. Definition of different mechanical properties and experimental techniques to measure them. Elastic, viscoelastic, and plastic deformation. Introduction to fracture. Prerequisite: MSE 170. Offered: Sp.

[View course details in MyPlan: MSE 362](#)

MSE 399 Undergraduate Research Seminar (1)

Introduces MSE majors to various research projects available to MSE faculty laboratories. Credit/no-credit only. Offered: W.

[View course details in MyPlan: MSE 399](#)

MSE 421 Case Studies in Thermodynamics (3)

Applications of thermodynamics to the steady state. Statistical interpretation of entropy. Heterogeneous equilibria. Thermodynamics of solutions. Defects in solids and thermodynamics of surfaces. Prerequisite: MSE 321, MSE 322. Offered: W.

[View course details in MyPlan: MSE 421](#)

MSE 431 Failure Analysis and Durability of Materials (3)

Treats the areas of failure analysis and durability in a wide range of materials applications. Reviews concepts in mechanical and environmental behavior of materials. Includes instruments available to engineers, both destructive and nondestructive, and case studies. Prerequisite: MSE 333; MSE 342; MSE 362. Offered: W.

[View course details in MyPlan: MSE 431](#)

MSE 442 Materials Processing II (3)

Develops a basic understanding of both engineering and science aspects of ceramic processing. Fundamentals of powder processing and characterization, green body formation, sintering, microstructural development and properties. Prerequisite: MSE 342. Offered: A.

[View course details in MyPlan: MSE 442](#)

MSE 443 Process Principles in Ferrous and Non-Ferrous Materials Production (3)

Ironmaking and steelmaking processes analyzed by methods of material and heat balances, computational thermodynamics, and process kinetics. Hydrometallurgical and electrometallurgical operations. Process optimization. Prerequisite: MSE 321. Offered: Sp.

[View course details in MyPlan: MSE 443](#)

MSE 450 Magnetism, Magnetic Materials, and Related Technologies (3)

Introduces magnetism, magnetic materials, and related applications. Discusses intrinsic and phenomenological concepts of magnetism, ordered magnetics materials, structure-sensitive properties, magnetic phenomena, small particles, thin films, and applications (magnetic recording, permanent magnets, and spin-electronics).

[View course details in MyPlan: MSE 450](#)

MSE 452 Functional Properties of Materials II (3)

Functional materials including dielectrics, ferroelectrics, piezoelectrics, pyroelectrics, opto-electronics, and magnetic materials. Detailed discussion of fundamental relations between the chemical composition, crystal structure, microstructure, and physical properties. Description of general devices and applications of these functional materials. Prerequisite: MSE 352. Offered: W.

[View course details in MyPlan: MSE 452](#)

MSE 462 Mechanical Behavior of Materials II (3)

Structural influences on mechanical properties of materials and strengthening mechanisms. States of stress and strain, failure criteria, multiaxial loads. Dynamic loading, kinematic and isotropic hardening, plasticity; Flaws and material reliability, probabilistic failures, fracture and toughening mechanisms. Stress life fatigue, fatigue crack growth, viscoelasticity, viscoplasticity. Prerequisite: AA 210; CEE 220; MSE 362. Offered: Sp.

[View course details in MyPlan: MSE 462](#)

MSE 463 Corrosion and Wear of Materials (3)

Mechanisms of corrosion, thermodynamics, kinetics of corrosion. Passivity; Pourbaix diagrams; corrosion rate testing and measurements; forms of corrosion; effects of alloy and environmental variables; corrosion testing. Wear mechanisms: adhesive, abrasive, erosive. Fretting; surface roughness, wear testing. Coatings for corrosion and wear protection. Offered: Sp.

[View course details in MyPlan: MSE 463](#)

MSE 466 Energy Materials, Devices, and Systems (3) *D. GINGER JR*

Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Prerequisite: CHEM 455 or CHEM 475 which may be taken concurrently Offered: jointly with CHEM 466/CHEM E 440; AWSp.

[View course details in MyPlan: MSE 466](#)

MSE 471 Introduction to Polymer Science and Engineering (3)

Introduction of preparative methods of polymers; physical chemistry of polymeric molecules in solution, liquid and solid phase; thermodynamics of polymers; methods of characterization; mechanical properties; fabrication techniques; properties of commercial polymers. Offered: A.

[View course details in MyPlan: MSE 471](#)

MSE 473 Noncrystalline State (3)

Chemistry and physics of inorganic glass and amorphous semiconductors; structure, properties, and processing of vitreous materials. Prerequisite: MSE 342; MSE 351. Offered: Sp.

[View course details in MyPlan: MSE 473](#)

MSE 475 Introduction to Composite Materials (3)

Microstructural design and processing of composite materials; polymeric, metallic, and ceramic matrices; fibers and fiber-reinforced composites, thermal, mechanical, and electrical properties. Offered: A.

[View course details in MyPlan: MSE 475](#)

MSE 476 Introduction to Optoelectronic Materials (3)

Introduces the optical properties of dielectrics, semiconductors, and metals, and their applications in optoelectronic and photonic devices used in telecommunications, biomedical, and renewable energy industries. Prerequisite: CSE 142 or AMATH 301; Completion or concurrent enrollment in MSE 331; or permission of instructor.

[View course details in MyPlan: MSE 476](#)

MSE 477 High Temperature Materials (4)

Chemical and mineralogical composition; processing methods; thermal, physical, and chemical properties and tests; application in high-temperature processes. Prerequisite: MSE 310, MSE 321. Offered: Sp.

[View course details in MyPlan: MSE 477](#)

MSE 481 Science and Technology of Nanostructures (3)

Comprehensive introduction to the developing field of nanoscience and nanotechnology. Includes materials properties as a function of length-scale and dimensionality, applications in medicine/biology, electronics, magnetism, and electro-mechanical systems. Cooperative learning approaches involving student participation

with team assignments, class activities, lectures, and laboratory visits. Offered: W.

[View course details in MyPlan: MSE 481](#)

MSE 482 Biomaterials/Nanomaterials in Tissue Engineering (3)

Provides fundamental understanding of biomaterials, implant applications, and their design consideration. Includes the fundamentals of synthesis, properties, and biocompatibility of metallic, ceramic, polymeric, composite, and biological materials and their applications for both hard and soft tissue replacement, and controlled drug delivery.

[View course details in MyPlan: MSE 482](#)

MSE 483 Nanomedicine (3)

Covers methods of synthesis and characterization of nano-sized materials and specific considerations for use in biological systems.

[View course details in MyPlan: MSE 483](#)

MSE 484 Electronic and Optoelectronic Polymers (3) NW

Covers the chemistry, physics, materials science, and applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 453 or CHEM 455. Offered: jointly with CHEM 484; ASp.

[View course details in MyPlan: MSE 484](#)

MSE 485 Introduction to Electronic Packaging and Materials (3)

The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Instructors: Taya Offered: jointly with M E 485; AW.

[View course details in MyPlan: MSE 485](#)

MSE 486 Fundamentals of Integrated Circuit Technology (3)

Processing physics, chemistry, and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation, laser annealing, oxidation, chemical vapor deposition, photoresists. Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: EE 331 or MSE 351. Offered: jointly with E E 486; AW.

[View course details in MyPlan: MSE 486](#)

MSE 487 Laboratory in Electronic Packaging and Materials (1) Taya, Stoebe

Laboratory course to accompany M E 485 Experiments related to design, processing and reliability of electronic packaging used in consumer electronics. Co-requisite: M E 485. Offered: jointly with M E 487.

[View course details in MyPlan: MSE 487](#)

MSE 491 Design in Materials Engineering I (2)

Integration of technical materials engineering concepts with professional components related to materials engineering. Reviews materials design, teamwork, leadership, engineering economics, and ethics. Reports on the professional components important to the senior thesis and begins a two-quarter, team design project on materials engineering. Prerequisite: MSE 313. Offered: A.

[View course details in MyPlan: MSE 491](#)

MSE 492 Design in Materials Engineering II (2)

Integration of technical materials engineering concepts with professional components related to materials engineering. Reviews process design, manufacturability, and quality control. Completes the two-quarter team design project on materials engineering. Prerequisite: MSE 491. Offered: W.

[View course details in MyPlan: MSE 492](#)

MSE 497 Undergraduate Research (1-5, max. 12)

Research in materials under faculty supervision other than the MSE senior project. Cannot be used toward the technical elective requirements in the MSE major. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MSE 497](#)

MSE 498 Special Topics (1-5, max. 15)

Special topics in materials science and engineering offered as a course with lectures, conferences, or laboratory. Offered: AWSpS.

[View course details in MyPlan: MSE 498](#)

MSE 499 Special Project (*-, max. 5)

Materials science and engineering field or laboratory investigations in group or individual setting. Written report required. Offered: AWSpS.

[View course details in MyPlan: MSE 499](#)

MSE 501 Advanced Processing of Inorganic Materials (3)

Discusses advanced processes of inorganic materials including metals, ceramics, and electronic materials, such as high temperature processing, sintering, solidification, single crystal growth from liquid, and vapor phase deposition. Emphasizes both the fundamentals and practical approaches of these processing techniques. Offered: A, even years.

[View course details in MyPlan: MSE 501](#)

MSE 502 Sol-Gel Processing (3)

Fundamentals of colloid science and the physics and chemistry of the sol-gel process. Emphasizes the synthesis and applications of various materials, such as multi-component oxides, nano-composites, meso- and microporous materials, organic/inorganic hybrids, and biomaterials that have important applications in both leading technologies and modern industries. Offered: A, odd years.

[View course details in MyPlan: MSE 502](#)

MSE 504 Introduction to Microelectro Mechanical Systems (4)

Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with E E 504/M E 504.

[View course details in MyPlan: MSE 504](#)

MSE 510 Bonding, Crystallography, and Symmetry-Related Properties of Materials (3)

Rigorous introduction to the fundamentals of bonding, symmetry, crystallography, and related properties. Quantum mechanical foundation of cohesion and properties of solids. Geometric approach to understanding symmetry elements in 2-D and 3-D, including point groups, space groups, stereographic projections, and bravais lattices. Tensor properties of crystals related to crystallography and symmetry. Offered: A.

[View course details in MyPlan: MSE 510](#)

MSE 512 Experimental Transmission Electron Microscopy (3)

Fundamentals of electron optics as applied to microscopy; applications of contrast theories and electron diffraction with emphasis on defects and multiphase structures in crystalline solids. Prerequisite: MSE 510. Offered: W, odd years.

[View course details in MyPlan: MSE 512](#)

MSE 513 Transmission Electron Microscopy Laboratory (2)

One four-hour laboratory and one two-hour discussion/demonstration per week; metallic, ceramic, electronic biological sample preparation techniques; diffraction, imaging, and spectroscopy techniques in electron microscopy. Prerequisite: MSE 512 which may be taken concurrently. Offered: W, odd years.

[View course details in MyPlan: MSE 513](#)

MSE 515 Advanced Transmission Electron Microscopy (3)

Principles of image formation in crystalline and amorphous materials at the atomic resolution level; high spatial resolution electron diffraction with emphasis on convergent beam electron diffraction; quantitative elemental compositional and chemical analysis with energy dispersive X-ray spectroscopy and electron energy loss spectroscopy; high voltage electron microscopy. Prerequisite: MSE 512 and MSE 513.

[View course details in MyPlan: MSE 515](#)

MSE 518 Advanced Mineralogy (3)

Crystal symmetry: point groups, space groups. Mathematical description of crystal structures; group theory, irreducible representations; tensor description of physical properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation and creep crystals; elasto-viscous properties of Earth's mantle, crystal chemistry, solid state reactions. Offered: jointly with ESS 537; A.

[View course details in MyPlan: MSE 518](#)

MSE 520 Seminar (1, max. 6)

Review of research problems in recent literature. Registration required for all graduate students. Credit/no-credit only. Offered: AWP.

[View course details in MyPlan: MSE 520](#)

MSE 524 Applied Rate Phenomena (3)

Introduction to rate theory and transport processes. The principal thrust is on applications in ceramics and metallurgy. Prerequisite: basic course in transport phenomena or permission of instructor. Offered: W.

[View course details in MyPlan: MSE 524](#)

MSE 525 Kinetics and Phase Transformations (3)

Thermodynamic basis for kinetic processes, including diffusion and phase transformation kinetics. Diffusion problems and solution methodologies, statistical treatment of diffusion, solid-liquid and solid-solid transformations, ordering transitions. Special topics related to grain growth, sintering, martensitic transformations. Prerequisite: MSE 322 and MSE 421 or equivalent. Offered: Sp.

[View course details in MyPlan: MSE 525](#)

MSE 528 Physics and Modeling of VLSI Fabrication (4)

Physics of VLSI fabrication, emphasizing processing modeling and simulation. CMOS process, sequences, point defects and diffusion, ion implantation and annealing, film growth kinetics, deposition and etching, advanced photolithography. Process interactions and process integration. Extensive use of process simulation software. Prerequisite: either E E 486/MSE 467, E E 502/M E 504/MSE 504, or E E 527. Offered: jointly with E E 528.

[View course details in MyPlan: MSE 528](#)

MSE 529 Semiconductor Optoelectronics (4)

Covers optical processes in semiconductors; optical waveguide theory; junction theory; LEDs; lasers photodetectors; photovoltaics; and optical modulators and switches. Prerequisite: E E 485. Offered: jointly with E E 529.

[View course details in MyPlan: MSE 529](#)

MSE 541 Defects in Materials (3)

Detailed study of the general properties and effects of point, line, and planar defects in crystalline solids. Prerequisite: MSE 331 or equivalent. Offered: W.

[View course details in MyPlan: MSE 541](#)

MSE 550 Magnetism, Magnetic Materials, and Related Technologies (3)

Introduce magnetism, magnetic materials, and related applications. Discusses intrinsic and phenomenological concepts of magnetism, ordered magnetic materials, magnetic phenomena, small particles, thin films, and applications (magnetic recording, permanent magnets, and spin-electronic). Offered: Sp.

[View course details in MyPlan: MSE 550](#)

MSE 555 Biomimetics: Bioinspired Design and Processing of Materials (4)

How biological organisms produce materials with controlled structure, chemistry, and hierarchy to attain physical properties far superior to traditional engineering materials. Fundamental biological building materials, their synthesis, and their self-assembly with emphasis on examples of soft and hard tissues. Offered: W, even years.

[View course details in MyPlan: MSE 555](#)

MSE 560 Organic Electronic and Photonic Materials/Polymers (3)

Physical and material concepts determining properties of organic electronic and photonic materials. Discusses electronic structure, physico-chemical characterization, and device application. Includes introduction of electronic band structure of polymers, electrically conducting polymers; organic nonlinear optical electroluminescent materials; polymer optical fibers; two-photon absorption materials for 3-D microfabrication. Offered: jointly with CHEM 564/MOLENG 530; W.

[View course details in MyPlan: MSE 560](#)

MSE 562 Introduction to Electronic Composites (3) Taya

Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic, and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Offered: jointly with M E 562; Sp.

[View course details in MyPlan: MSE 562](#)

MSE 563 Advanced Composites: Design and Manufacturing (3)

Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: MSE 475 or M E 450 or equivalent by permission of instructor. Offered: jointly with M E 563; Sp.

[View course details in MyPlan: MSE 563](#)

MSE 565 Electron Theory of Materials (3)

Solid-state concepts of materials. Atomic bonding, statistical mechanics, Brillouin zone theory. Applications to conduction, optical, and magnetic properties of metals, semiconductors, and insulators. Offered: W, odd years.

[View course details in MyPlan: MSE 565](#)

MSE 566 Energy Materials, Devices, and Systems (3) D. GINGER JR

Provides project based training for synthesis & characterization of new energy materials, for generation and storage, and the integration of renewables into energy systems using instruments at the Clean Energy Research Training Testbed. Topics include nanoparticle synthesis, solar cells, impedance analysis, characterization with solar simulator, coin cell battery assembly & testing, photochemistry, semiconductor w/ 2D materials, grid simulation Offered: jointly with CHEM 566/CHEM E 540; AWSp.

[View course details in MyPlan: MSE 566](#)

MSE 568 Active and Sensing Materials (3) Taya

Fundamental knowledge of the nano-structure property relations of active and sensing materials, and their devices. Examples of the active and sensing materials include: shape memory alloys (SMAs), ferromagnetic SMAs, ferroelectric, pyroelectric and piezoelectric materials, thermoelectrics, electroactive and conducting polymers, photoactive polymers, photovoltaics, and electrochromic materials. Offered: jointly with M E 568; Sp.

[View course details in MyPlan: MSE 568](#)

MSE 570 Graduate Tutorial in Materials Science and Engineering (3)

A materials science and engineering tutorial for beginning graduate students who did not major in the field as an undergraduate, or who wish to broaden their knowledge of materials science and engineering. Focuses on materials' physical and chemical structures, and their relationship to mechanical, electrical, dielectric, optical,

magnetic, and thermal properties.

[View course details in MyPlan: MSE 570](#)

MSE 576 Introduction to Optoelectronic Materials (3)

Introduces the optical properties of dielectrics, semiconductors, and metals, and their applications in optoelectronic and photonic devices used in telecommunications, biomedical, and renewable energy industries.

[View course details in MyPlan: MSE 576](#)

MSE 582 Biomaterials/Nanomaterials in Tissue Engineering (3)

Provides fundamental understanding of biomaterials, implant applications, and their design consideration. Includes the fundamentals of synthesis, properties, and biocompatibility of metallic, ceramic, polymeric, composite, and biological materials and their applications for both hard and soft tissue replacement, and controlled drug delivery.

[View course details in MyPlan: MSE 582](#)

MSE 583 Nanomedicine (3)

Covers methods of synthesis and characterization of nano-sized materials and specific considerations for use in biological systems.

[View course details in MyPlan: MSE 583](#)

MSE 598 Engineering Materials Problems (4)

Involves a concentrated project which may include the design of a system or process, or analysis of a set of data related to the materials engineering area. Requires a professional quality report and an oral presentation of the results. Offered: AWSpS.

[View course details in MyPlan: MSE 598](#)

MSE 599 Special Topics in Materials Science (1-5, max. 15)

Studies of special advanced topics in materials science. Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: MSE 599](#)

MSE 600 Independent Study or Research (*-)

Offered: AWSpS.

[View course details in MyPlan: MSE 600](#)

MSE 700 Master's Thesis (*-)

Offered: AWSpS.

Mechanical Engineering

[Display as tabs](#)

Department Overview

143 Mechanical Engineering Building

Mechanical engineering is one of the broadest and oldest of the engineering disciplines and therefore provides some of the strongest interdisciplinary opportunities in the engineering profession. Power utilization (and power generation) is often used to describe the focus of mechanical engineering. Within this focus are such diverse topics as thermodynamics, heat transfer, fluid mechanics, machine design, mechanics of materials, manufacturing, stress analysis, system dynamics, numerical modeling, vibrations, turbomachinery, combustion, heating, ventilating, and air conditioning. Degrees in mechanical engineering open doors to careers not only in the engineering profession but also in business, law, medicine, finance, and other non-technical professions.

(206) 543-5090

meadvise@uw.edu

The Department of Mechanical Engineering offers the following program of study:

- The Bachelor of Science in Mechanical Engineering (BSME) degree
- The Bachelor of Science in Mechanical Engineering (BSME) degree with an option in mechatronics
- The Bachelor of Science in Mechanical Engineering (BSME) degree with an option in nanoscience and molecular engineering

Bachelor of Science in Mechanical Engineering

Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only.

Nanoscience and Molecular Engineering Option (NME)

Admission to the NME option for mechanical engineering majors is by self-selection and normally occurs upon completion of NME 220, all mechanical engineering prerequisites, and formal admission to the mechanical engineering major. A small number of advanced students (either UW or transfer) may be admitted into the NME option upon application to the department. Admission is based on the student's academic record, including grades in NME 220 and any mechanical engineering courses already taken and on prior experience/work in the field of nanoscience or molecular engineering. Students applying for the NME option should indicate that interest on their mechanical engineering application and discuss their interests and background in the essay.

Early Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or higher; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.
3. *Grade requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission

Upper-Division Admission

1. *Course requirements:* MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122; CHEM 142, CHEM 152; A A 210; CEE 220; M E 230; 5 credits of English composition
2. 65 credits completed by July 1 application deadline
3. *Grade requirements:* Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission

Graduation Requirements

180 credits as follows:

General Education Requirements (85 credits)

1. *Written and Oral Communication:* 12 credits, to include one 5-credit English composition course from the University list; HCDE 333 (or department-approved alternative).
2. *Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S) (24 credits):* Minimum 10 credits in each area
3. *Natural World (49 credits):*
 - a. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), MATH 309 (or AMATH 353 or MATH 324)
 - b. *Science (25 credits):* CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (95-102 credits)

1. *Engineering Fundamentals (31 credits):* A A 210; AMATH 301; CEE 220; E E 215; IND E 315 (or MATH 390/STAT 390); M E 123; M E 230; MSE 170

2. *Mechanical Engineering Core Courses (45 credits)*: M E 323, M E 331, M E 333, M E 354, M E 355, M E 356, M E 373, M E 374, M E 395, M E 495
3. *Mechanical Engineering Option Courses (19-26 credits)*
 - a. Standard Option (19 credits): See department for approved list of engineering electives.
 - b. Mechatronics Option (19-21 credits): ME 471, M E 473, M E 477, M E 494; two of M E 469, M E 470, M E 478, M E 480, PHYS 334, PHYS 335
 - c. Nanoscience and Molecular Engineering Option (26 credits): NME 221, NME 321, and NME 421; M E 410, M E 411; 13 credits of approved nanoscience and molecular engineering electives. See department for approved list.
4. Minimum 2.00 cumulative GPA

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:*

1. *Success in the Profession*. The department's goal is success for its graduates in industry, research, and academic careers by virtue of skills and attributes learned in the program. Graduates succeed in their professional and academic positions by:
 - a. using fundamental science and analysis to solve engineering problems,
 - b. successfully executing engineering designs, and
 - c. performing effectively in design teams, in the use of management tools, and through effective oral, written, and graphical communication.
2. *Contribution to Society*. Graduates should be critical thinkers in the tradition of the broad liberal arts education. They succeed in this goal by being able to:
 - a. think critically, in the sense of broadly educated individuals (i.e., be informed evaluators/consumers of information),
 - b. perform independent, informed analysis on issues inside and outside of technology, and
 - c. continue lifelong learning.

The BSME program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700, and the department has adopted the following student outcomes:

- a. An ability to apply knowledge of mathematics, science, and engineering
- b. An ability to design and conduct experiments, as well as to analyze and interpret data
- c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- d. An ability to function on multi-disciplinary teams
- e. An ability to identify, formulate, and solve engineering problems
- f. An understanding of professional and ethical responsibilities
- g. An ability to communicate effectively

- h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- i. A recognition of the need for, and an ability to engage in, life-long learning
- j. Knowledge of contemporary issues
- k. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Each student's success is measured by demonstration of the following learning outcomes:

1. Ability to apply this knowledge to the formulation and solution of mechanical engineering problems
 2. Ability to design thermal and mechanical components to achieve a desired goal. Ability to develop, conduct, and analyze experiments or tests that may aid in this design process.
 3. An understanding of the necessary professional abilities of a practicing engineer including ethical conduct, teamwork in the pursuit of a goal, and effective communication
 4. Ability to conduct computer-based design and analysis in engineering applications
 5. Exposure to a general education program that aids in the understanding of and increases the appreciation for the "non-technical" world
 6. Realization of the business environment in which engineering is practiced.
 7. Awareness and necessity of continuing education, graduate study, and other lifelong learning experiences
 8. Interest groups within the faculty provide instruction in four areas: design; energy and fluids; mechanics, materials and manufacturing; and systems and dynamics. Departmental thrust areas for graduate and undergraduate research include: environment; healthcare; information technology; and manufacturing. Several on-going senior capstone design projects provide both undergraduate and graduate students with hands-on, interdisciplinary, team-driven opportunities that encompass such diverse topics as Formula SAE car; human-powered submarine, mechatronics, and fuel cell technology.
- *Instructional and Research Facilities:* The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department website to view faculty research areas.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning:* The department participates in [the College of Engineering Co-op Program](#). [The Center for Career Services](#) also lists internship opportunities.
- *Department Scholarships:* The department offers approximately forty scholarships each year. Scholarship applications are available on the College of Engineering Website. The deadline for scholarship applications is April 1. Sophomores may apply for scholarship consideration before being admitted to the department.
- *Student Organizations/Associations:*
 - American Society of Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE)
 - American Society of Mechanical Engineers (ASME)
 - Pi Tau Sigma - Mechanical Engineering Honor Society (PTS)
 - Society of Automotive Engineers (SAE)
 - Society of Manufacturing Engineers (SME)
 - Society of Naval Architects and Marine Engineers (SNAME)
 - Society of Women Engineers (SWE)

Graduate Program

Graduate Program Coordinator
143 Mechanical Engineering Bldg, Box 352600
(206) 543-5090
megrad@uw.edu

The Department of Mechanical Engineering offers graduate programs leading to the degrees of Master of Science in Mechanical Engineering (MSME) and Doctor of Philosophy (PhD). The department also provides authorized options leading to the College-wide Master of Science in Engineering (MSE) degree. These degrees provide balanced combinations of formal instruction and independent research or design experience. Although there are thesis and non-thesis options for the MSME, completion of a thesis is highly recommended.

Individual projects may be drawn from a wide spectrum of topics, which include mechanical and energy conservation systems, heat transfer, combustion, fluid mechanics, applied mechanics, computational mechanics, computer-aided design and manufacturing, production systems, materials behavior, robotics, controls, vibrations, and applications of mechanical engineering science to a variety of such interdisciplinary fields as bioengineering, ocean engineering, environmental engineering, nanotechnology, micro electro-mechanical systems, and acoustics. Flexible requirements for coursework provide opportunities both for a broad scientific and professional background and for specialty training.

Master of Science in Mechanical Engineering

Admission Requirements

1. *Grade Point Average:* The Graduate School requires a minimum 3.00 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework to

receive consideration. The department prefers an minimum overall 3.20 undergraduate GPA. In addition, the department prefers that PhD applicants have a minimum 3.5 MS GPA.

2. Quality and difficulty of courses taken and universities and colleges attended.
3. *GRE General Test*: Minimum GRE scores of 450 Verbal (350 if English is not a native language), 650 Quantitative, and 4.0 Analytical Writing
4. Three letters of recommendation
5. Statement of purpose
6. Official transcripts from all colleges/universities attended
7. Professional experience, if applicable
8. *English requirements for foreign nationals*: TOEFL scores for foreign nationals whose native language is not English, with a minimum score of 580 for the paper examination and 237 for the computer-based examination

Degree Requirements

42 credits, as follows:

1. Thesis-option students must register for 12 credits of thesis research and 30 credits of related numerically graded coursework. Non-thesis option students must take all 42 credits in numerically graded courses.
2. Course grades must be 2.7 or above
3. At least 12 credits for the thesis option and 18 credits for the non-thesis option must be taken in 500-level mechanical engineering courses, including 6 credits of mathematical and engineering analysis requirements: M E 564 and M E 565.
4. At least 3 credits of computational or numerical analysis must be taken from the following list of approved courses (or from an approved plan of individual study conducted as part of thesis research): M E 535, AA 543, A A 540, CEE 504, E E 578, AMATH 581, and AMATH 584.
5. The remaining credits (18 for thesis-option students and 24 for non-thesis option students) may be from other departments, and may include a maximum of 9 credits (12 credits for non-thesis) at the 400 course level (excluding M E 498 and M E 499).
6. Non-thesis option students may substitute up to 6 credits of M E 599 Special Projects (not to be confused with the class M E 599) for 6 credits of classroom courses. Permission forms for project proposals can be obtained from the Mechanical Engineering Student Services Office. The student must write a research paper under the supervision of a faculty member and the credits must be taken for a numerical grade.

For thesis-option students, special projects courses such as M E 599 and M E 600 do not count toward the 42-credit total unless the project is recommended by the student's faculty supervisor and pre-approved by the Graduate Program Coordinator. Seminar requirement: All full-time students must register for a seminar course every quarter while in the master's program. Quarterly registration for seminars is necessary for satisfactory progress in the program, but does not count toward the 42 credits of numerically graded coursework and thesis research required for graduation.

Doctor of Philosophy

Admission Requirements

1. *Grade Point Average:* The Graduate School requires a minimum 3.00 GPA for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework for admission. The department prefers an overall minimum 3.20 undergraduate GPA. In addition, the department prefers that PhD applicants have a minimum 3.50 MS GPA.
2. Quality and difficulty of courses taken and universities and colleges attended
3. *GRE General Test:* The department requires the following minimum GRE scores: 450 Verbal (350 if English is not a native language), 650 Quantitative, and 4.0 Analytical Writing.
4. Three letters of recommendation
5. Statement of purpose
6. Official transcripts from all colleges/universities attended
7. Professional experience, if applicable
8. *English requirements for foreign nationals:* TOEFL scores for foreign nationals whose native language is not English, with a minimum score of 580 for the paper exam and 237 for the computer-based exam

Degree Requirements

90 credits, to include:

1. *Advisory Committee:* During the first year of post-master's study, the student should select a two- to three-person advisory committee from the Mechanical Engineering Department.
2. *Coursework:* All new post-master's students must successfully complete two to three graduate courses per quarter in their first year of study, as approved by the advisory committee. Normally this includes a sequence in advanced applied mathematics.
3. *Seminar Requirement:* Post-master's students register for the mechanical engineering seminar (M E 520), in the autumn quarter of their matriculation year. Otherwise, students are encouraged to register for engineering seminar courses offered by other UW engineering programs, i.e., M E 518, M E 523, M E 591, AMATH 501, IND E 591, IND E 592, IND E 593, MSE 520. Seminar must be taken on a quarterly basis throughout the entire PhD program.
4. *Research:* Post-master's students must conduct initial research in their first year of study under the direction of the advisory committee. This requirement applies even if the student holds a teaching assistantship.
5. *Qualifying Examination:* Every full-time student in the department's PhD program is required to take the examination within one calendar after entry into the program.
6. *Supervisory Committee:* A graduate student is not considered a doctoral student until a Supervisory Committee has been appointed by the Dean of the Graduate School. Students need to provide the name of the committee chair, Graduate School Representative (GSR), and at least two mechanical engineering faculty for approval to the Graduate Program Coordinator (GPC). The department requires that at least three members of the committee be Mechanical Engineering faculty, two of whom must be core Mechanical Engineering faculty. This committee, established before the end of the second year of PhD study and no less than four months prior to scheduling the general examination, replaces the first-year Advisory Committee.

7. *Dissertation Proposal*: Prepared after the student has conducted one or two quarters of in-depth research, during which time the student should meet frequently with the committee chair. Submit copies of the proposal to all members of the Supervisory Committee prior to the examination. The proposal must be approved by the committee chair before the general examination is scheduled.
8. *Dissertation Research*: Registration for a minimum of 27 credits of dissertation research over a period of at least three quarters -- and at least two quarters after the general examination.
9. *Reading Committee*: The reading committee, consisting of three members drawn from the Supervisory Committee, must include at least two core Mechanical Engineering faculty.
10. *Final Examination*
11. *Dissertation Defense*

Research Facilities

The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department website to view faculty research areas.

Financial Aid

Financial aid is offered to full-time graduate students as funds permit. Funds, however, are limited and the assignment of assistantships and fellowships is highly competitive. Aid may be in the form of a research assistantship for sponsored programs, a fellowship provided by the University or industry, or a teaching assistantship.

COLLEGE OF ENGINEERING MECHANICAL ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

M E 123 Introduction to Visualization and Computer-Aided Design (4) VLPA/NW Adee

Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional skills through freehand sketching and computer-aided design using parametric solid modeling.

Offered: AWSpS.

[View course details in MyPlan: M E 123](#)

M E 124 Visualization and Computer-Aided Design Laboratory (2) VLPA/NW Adee

Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional visualization skills through computer-aided design using parametric solid modeling. Offered:

AWSpS.

[View course details in MyPlan: M E 124](#)

M E 230 Kinematics and Dynamics (4) NW

Kinematics of particles, systems of particles, and rigid bodies; moving reference frames; kinetics of particles, systems of particles, and rigid bodies; equilibrium, energy, linear momentum, angular momentum. Prerequisite:

A A 210. Instructors: Fabien

[View course details in MyPlan: M E 230](#)

M E 323 Engineering Thermodynamics (5)

Engineering thermodynamics, including thermodynamic concepts and properties, the first and second laws of thermodynamics, energy conversion, refrigeration, humidification, and combustion. Engineering design applications. Prerequisite: either CHEM 142 or CHEM 144; MATH 126; PHYS 121. Instructors: Kramlich

[View course details in MyPlan: M E 323](#)

M E 331 Introduction to Heat Transfer (4)

Study of heat transfer by conduction, radiation, and convection; elementary heat-exchanger design. Prerequisite: either M E 333 or CEE 342. Instructors: Emery

[View course details in MyPlan: M E 331](#)

M E 333 Introduction to Fluid Mechanics (5)

Introduction to the basic fluid laws and their application. Conservation equations, dynamic similarity, potential flow, boundary-layer concepts, effects of friction, compressible flow, fluid machinery, measurement techniques.

Prerequisite: AMATH 301; M E 323; either MATH 307 or AMATH 351. Instructors: Riley

[View course details in MyPlan: M E 333](#)

M E 341 Energy and Environment (3) NW

Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with CHEM E 341/ENVIR 341; A.

[View course details in MyPlan: M E 341](#)

M E 354 Mechanics of Materials Laboratory (5)

Properties and behavior of engineering materials including stress-strain relations, strength, deformation mechanisms, strength, deformation, fracture, creep, and cyclic fatigue. Introduces experimental techniques common to structural engineering, interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Lecture and laboratory. Prerequisite: MSE 170, CEE 220. Instructors: Tuttle

[View course details in MyPlan: M E 354](#)

M E 355 Introduction to Manufacturing Processes (4)

Study of manufacturing processes, including interrelationships between the properties of the material, the manufacturing process, and the design of components. Interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Prerequisite: M E 354. Instructors: Ramulu

[View course details in MyPlan: M E 355](#)

M E 356 Machine Design Analysis (4)

Analysis, design, and selection of mechanical and electromechanical subsystems and elements, such as gears, linkages, cams, motors, and bearings. Prerequisite: M E 354. Instructors: Chung

[View course details in MyPlan: M E 356](#)

M E 373 Introduction to System Dynamics (5)

Mathematical modeling, analysis, and design of physical dynamic systems involving energy storage and transfer by lumped-parameter linear elements. Time-domain response by analytical methods and numeric simulation. Laboratory experiments. Prerequisite: either AMATH 351 or MATH 307; either AMATH 352 or MATH 308; E E 215; M E 230. Instructors: Garbini

[View course details in MyPlan: M E 373](#)

M E 374 Systems Dynamic Analysis and Design (5)

Extension of M E 373. Frequency response analysis, generalized impedance concepts and applications, Fourier series analysis and Laplace transform techniques. Modeling and analysis of electromechanical actuators and rotating machinery. Laboratory experiments and design projects. Prerequisite: AMATH 301; M E 373.

Instructors: Garbini

[View course details in MyPlan: M E 374](#)

M E 395 Introduction to Mechanical Design (4)

Design process and methodology; decision making; optimization techniques; project planning; engineering economics; probabilistic and statistical aspects of mechanical design; ethical and legal issues. Prerequisite: M E 123; M E 323; IND E 315 or MATH 390/STAT 390 either of which may be taken concurrently. Instructors: Cooper

[View course details in MyPlan: M E 395](#)

M E 406 Corrosion and Surface Treatment of Materials (3) *Sandwith*

Corrosion fundamentals and forms (galvanic, crevice, pitting, stress corrosion, erosion, hydrogen, and leaching). Principles of design, materials selection, cathodic protection and surface treatments (coatings, carburizing, nitriding, and plating) applied to reduce corrosion. Failure analysis applied to case studies.

[View course details in MyPlan: M E 406](#)

M E 409 Introduction to Numerical Control and Computer-Aided Manufacturing (3)

Control system fundamentals, numerical control (NC) machine control systems, and the design aspect of NC machine tools, programming methods of NC machines, computer-aided manufacturing, CNC, DNC, and process optimization. Prerequisite: M E 355 which may be taken concurrently. Instructors: Ramulu

[View course details in MyPlan: M E 409](#)

M E 410 Nanodevices: Design and Manufacture (3) *Chung*

Examines design, fabrication, and manufacture of nano devices with state-of-the-art nanotechnology. Covers classification and selection of nanoscale materials and manufacturing methods: Includes nanodevice design projects. Offered: A.

[View course details in MyPlan: M E 410](#)

M E 411 Biological Frameworks for Engineers (3) *Sniadecki*

Introduces the fundamentals of biology for an engineer. Covers mechanisms and biomechanics of DNA, proteins, cells, connective tissue, musculoskeletal tissue, and cardiovascular tissue, integration principles of living systems, structure-function relationships, and techniques to study biology and medicine, and tissue engineering. Offered: A.

[View course details in MyPlan: M E 411](#)

M E 414 Engineering Innovation and Medicine (3) *J. POSNER, P. REINHALL, K. STEELE*

Introduces the role of innovation and engineering in the design of medical devices and healthcare technologies, applicable both to medical practice and healthcare-focused engineering. May serve as the first course in a medically related senior design project sequence. Discusses medical practice, clinical needs finding, FDA regulation, insurance reimbursement, intellectual property, and the medical device design process. Offered: A.

[View course details in MyPlan: M E 414](#)

M E 415 Sustainability and Design for Environment (3) *Cooper*

Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/ENVIR 415.

[View course details in MyPlan: M E 415](#)

M E 416 Engineering Innovation in Medicine Design Preparation (3) *J. POSNER, K. STEELE*

Team based design of solutions to challenges in healthcare. Second course in a health focused senior capstone design project sequence. Student teams are asked to define the clinical need, identify core functions and design specifications, identify prior art, ideate and evaluate designs, and develop engineering models of designs. Prerequisite: M E 414. Offered: W.

[View course details in MyPlan: M E 416](#)

M E 425 HVAC Engineering (4)

Heating, ventilating, and air conditioning of built environment. Human comfort, psychometric processes, load computations, fluid distribution, and controls. Design analysis of HVAC system is taught in the lectures and applied in the class project. Prerequisite: M E 323; M E 331. Instructors: Emery

[View course details in MyPlan: M E 425](#)

M E 426 Renewable Energy II (3) *B. POLAGYE*

Explores renewable energy principles and practices of energy conversion, focusing on energy conversion from wind and water. Prerequisite: M E 333.

[View course details in MyPlan: M E 426](#)

M E 430 Advanced Energy Conversion Systems (4)

Advanced and renewable energy conversion systems and technologies are treated. Included are high efficiency combined cycles; renewable energy conversion involving solar, wind, and biomass; direct energy conversion and fuel cells; and nuclear energy. Environmental consequences of energy conversion and environmental control

are discussed. Prerequisite: M E 323. Instructors: Kramlich

[View course details in MyPlan: M E 430](#)

M E 431 Advanced Fluid Mechanics (4)

Advanced topics in fluid mechanics, including kinematics, potential theory and vortex dynamics, viscous flow, turbulence, experimental and numerical methods, and design. Prerequisite: M E 333. Instructors: Mescher

[View course details in MyPlan: M E 431](#)

M E 433 Turbomachinery (4) *Aliseda*

Thermodynamics, gas dynamics, and fluid mechanics of axial and centrifugal compressors, pumps, and turbines. Selection of components for engineering applications. Design problems and/or laboratory experiments to illustrate operating characteristics of turbomachines.

[View course details in MyPlan: M E 433](#)

M E 440 Advanced Mechanics of Materials and Solids (3)

Study of mechanics of deformable bodies, including three-dimensional stress and strain tensors and their transformations. Equations of compatibility, continuity and equilibrium. Elastic constants. Failure criteria including fracture, yield, and instability. Deflection relations for complex loading and shapes. Indeterminate problems. Design applications and numerical methods. Prerequisite: M E 354.

[View course details in MyPlan: M E 440](#)

M E 442 Renewable Energy (4) *NW P. MALTE*

Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either M E 323, CHEM E 325, A A 260, or E E 351. Offered: jointly with CHEM E 442; W.

[View course details in MyPlan: M E 442](#)

M E 445 Introduction to Biomechanics (4) *J. SANDERS*

Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with BIOEN 440; Sp.

[View course details in MyPlan: M E 445](#)

M E 450 Introduction to Composite Materials and Design (3) *Tuttle*

Stress and strain analysis of continuous fiber composite materials. Orthotropic elasticity, lamination theory, failure criterion, and design philosophies, as applied to structural polymeric composites.

[View course details in MyPlan: M E 450](#)

M E 459 Introduction to Fracture Mechanics (3)

Deformation processes leading to fracture, and linear elastic fracture mechanics. Fatigue crack propagation. Fracture control and failure analysis. Prerequisite: M E 354; M E 356. Instructors: Ramulu

[View course details in MyPlan: M E 459](#)

M E 460 Kinematics and Linkage Design (3) *Ganter*

Synthesis of linkage-type mechanisms using graphical and computer methods.

[View course details in MyPlan: M E 460](#)

M E 461 Mechanics of Thin Films (3) *Wang*

Provides an overview of the thin film deposition processes; the stress and microstructure development during film growth; the mechanisms of adhesion; delamination and fracture; and the state-of-the-art characterization techniques for the microstructure and mechanical properties of thin films, coatings, and nanomaterials. Offered: A.

[View course details in MyPlan: M E 461](#)

M E 468 Air-Pollution Control Equipment Design (3)

Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CEE 494/CHEM E 468.

[View course details in MyPlan: M E 468](#)

M E 469 Applications of Dynamics in Engineering (4)

Application of the principles of dynamics to selected engineering problems, such as suspension systems, gyroscopes, electromechanical devices. Includes introduction to energy methods, Hamilton's principle and Lagrange equations, and the design of dynamic system. Prerequisite: M E 374. Instructors: Storti

[View course details in MyPlan: M E 469](#)

M E 470 Mechanical Vibrations (3)

Single-degree-of-freedom linear systems techniques. Matrix techniques for multi-degree-of-freedom linear systems. Applications in vibration isolation, transmission, and absorption problems and instrumentation.

Prerequisite: M E 373. Instructors: Reinhall

[View course details in MyPlan: M E 470](#)

M E 471 Automatic Control (4)

Dynamic system modeling; control system stability and performance analysis; compensator design by Bode and root-locus methods. Prerequisite: M E 374. Instructors: Berg

[View course details in MyPlan: M E 471](#)

M E 473 Instrumentation (4)

Principles and practice of industrial and laboratory measurement. Dynamics of instrument response; generalized performance analysis of sensor systems; theory of transducers for motion, force, pressure, flow, and other measurements. Lecture and laboratory. Prerequisite: M E 374. Instructors: Garbini

[View course details in MyPlan: M E 473](#)

M E 477 Embedded Computing in Mechanical Systems (4)

Analysis of electromechanical systems employing microcomputers for control or data acquisition.

Microcomputer architecture, memory organization, C language programming, interfaces, and communications. Particular emphasis on design of hardware and software interfaces for real-time interaction with mechanical systems. Weekly laboratory. Prerequisite: M E 374. Instructors: Garbini

[View course details in MyPlan: M E 477](#)

M E 478 Finite Element Analysis (4)

Development of theory and concepts of finite element analysis. Applications in all areas of mechanical engineering, including mechanics of solids, heat transfer, and design of dynamical systems. Weekly computer exercises. Prerequisite: M E 123; M E 374; either MATH 308 or AMATH 352. Instructors: Reinhall

[View course details in MyPlan: M E 478](#)

M E 480 Introduction to Computer-Aided Technology (4)

Principles of computer-aided technology. Computer-aided design, engineering, drafting, and manufacturing; computer-aided design systems, geometry, computer graphics, hardware, computer-aided vehicle/system design synthesis. System demonstrations, laboratories, and site visits. Prerequisite: M E 123; AMATH 301. Instructors: Ganter

[View course details in MyPlan: M E 480](#)

M E 481 Internal Combustion Engines (4)

Internal combustion engines including spark and compression ignition piston engines, with focus on engine performance and the thermodynamics, combustion, emissions, and efficiency of engines. Impact of greenhouse gas constraints on engines. Prerequisite: either M E 323, A A 260, or CHEM E 325. Instructors: Kramlich,

Malte

[View course details in MyPlan: M E 481](#)

M E 485 Introduction to Electronic Packaging and Materials (3)

The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Instructors: Taya Offered: jointly with MSE 485; AW.

[View course details in MyPlan: M E 485](#)

M E 487 Laboratory in Electronic Packaging and Materials (1) *Taya, Stoebe*

Laboratory course to accompany M E 485 Experiments related to design, processing and reliability of electronic packaging used in consumer electronics. Co-requisite: M E 485. Offered: jointly with MSE 487.

[View course details in MyPlan: M E 487](#)

M E 494 Mechatronics Design Preparation (1)

Design laboratory preparation. Covers the development of functional specifications; exploration of prior art; static and dynamic modeling. Prerequisite: M E 471; M E 473. Instructors: Garbini Offered: W.

[View course details in MyPlan: M E 494](#)

M E 495 Mechanical Engineering Design (4)

Design laboratory involving the identification and synthesis of engineering factors to plan and achieve specific project goals. Current literature and prerequisite texts used as reference sources. Prerequisite: M E 395.

Instructors: Cooper

[View course details in MyPlan: M E 495](#)

M E 496 Technology-Based Entrepreneurship (3) *Furness*

Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Offered: jointly with IND E 496; Sp.

[View course details in MyPlan: M E 496](#)

M E 498 Special Topics in Mechanical Engineering (1-5, max. 6)

Lecture and/or laboratory. Maximum of 6 credits may be applied toward an undergraduate degree.

[View course details in MyPlan: M E 498](#)

M E 499 Special Projects (2-5, max. 6)

Written report required.

[View course details in MyPlan: M E 499](#)

M E 500 Advanced Composite Structural Analysis (3)

Covers advanced stress analysis methods for composite structures made of beams, laminates, sandwich plates, and thin shells; stress and buckling analyses of solid and thin-walled composite beams; shear deformable theory for bending of thick laminated plates; and stress and fracture mechanics analysis of bonded joints. Prerequisite: A A 532. Offered: jointly with A A 535; Sp, odd years.

[View course details in MyPlan: M E 500](#)

M E 501 Modern Manufacturing Processes (3) *Ramulu*

General survey and introduction to modern manufacturing engineering processes. Fundamental principles and practices of modern manufacturing processes. Case studies and exercises relating the course material directly to modern industrial practice. Offered: A.

[View course details in MyPlan: M E 501](#)

M E 503 Continuum Mechanics (3)

Reviews concepts of motion, stress, energy for a general continuum; conservation of mass, momentum, and energy; and the second law; constitutive equations for linear/nonlinear elastic, viscous/inviscid fluids, and general materials; and examples/solutions for solid/fluid materials. Offered: jointly with A A 503; A.

[View course details in MyPlan: M E 503](#)

M E 504 Introduction to Microelectro Mechanical Systems (4)

Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with E E 504/MSE 504.

[View course details in MyPlan: M E 504](#)

M E 507 Fluid Mechanics (3)

Covers inviscid and viscous incompressible flows, exact solutions of laminar flows, creeping flows, boundary layers, free-shear flows, vorticity equation, and introduction to vortex dynamics. Offered: jointly with A A 507; W.

[View course details in MyPlan: M E 507](#)

M E 508 Theory and Design for Mechanical Measurements (3)

Fundamental concepts of mechanical measurements, principles of sensors and transducers, signal conditioning and data acquisition, advanced experiment planning and analysis, and applications in mechanical engineering.

[View course details in MyPlan: M E 508](#)

M E 510 Mathematical Foundations of Systems Theory (4)

Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Offered: jointly with A A 510/CHEM E 510/E E 510.

[View course details in MyPlan: M E 510](#)

M E 511 Biological Frameworks for Engineers (3) *Sniadecki*

Introduces the fundamentals of biology for an engineer. Covers mechanisms and biomechanics of DNA, proteins, cells, connective tissue, musculoskeletal tissue, and cardiovascular tissue, integration principles of living systems, structure-function relationships, and techniques to study biology and medicine, and tissue engineering. Offered: A.

[View course details in MyPlan: M E 511](#)

M E 515 Life Cycle Assessment (3) *Cooper*

Presents and discusses the computation structure and data sources for environmental Life Cycle Assessment. Uses Life Cycle Assessment to analyze materials, products, and services. The analysis either identifies opportunities for improvements or selects a superior alternative on the basis of pollution prevention and resource conservation. Offered: W.

[View course details in MyPlan: M E 515](#)

M E 520 Seminar (-1, max. 6)

Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: M E 520](#)

M E 521 Thermodynamics (3)

Fundamental concepts of temperature, thermodynamic properties, and systems. The first, second, and combined laws. Development of the relations of classical thermodynamics. Introduction to statistical thermodynamics.

Prerequisite: M E 323 and graduate standing in mechanical engineering or permission of instructor. Instructors: Kramlich Offered: A.

[View course details in MyPlan: M E 521](#)

M E 522 Thermodynamics (3)

Topics from statistical thermodynamics, including the Boltzmann, Bose-Einstein, and Fermi-Dirac statistics. Solutions of the Schrodinger wave equation and evaluation of the partition function for translation, rotation, and vibration. Prerequisite: M E 521 or permission of instructor. Instructors: Malte

[View course details in MyPlan: M E 522](#)

M E 523 Energy and Environment Seminar (1, max. 20) Malte

Student discussions of topics in combustion science and technology, alternative fuels, renewable energy, environmental consequences of energy conversion, and design for environment. Also, presentations by outside experts. May be repeated for credit. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: M E 523](#)

M E 524 Combustion (3)

Chemical and physical processes of combustion with applications to design of combustors, fuel selection, and consideration of environmental effects. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Instructors: Kramlich Offered: Sp, odd years.

[View course details in MyPlan: M E 524](#)

M E 525 Applied Acoustics I (3)

Introduces acoustics through various applications such as medical ultrasound, underwater sound, noise control and vibrations. Includes linear acoustics, wave equation, planewave solutions, acoustics scales; reflection, refraction, scattering and diffraction, acoustic sources, radiation from transmission through plates. Prerequisite: graduate standing in Engineering, allied field, or permission of instructor. Instructors: Dahl, Reinhall Offered: Sp.

[View course details in MyPlan: M E 525](#)

M E 526 Special Topics in Acoustics (3)

Advanced study of special topics in acoustics, such as medical ultrasound, underwater sound, noise control and vibrations. Prerequisite: ME 525, or permission of instructor. Instructors: Dahl, Reinhall Offered: A.

[View course details in MyPlan: M E 526](#)

M E 527 Musculoskeletal Biomechanics (4) R. CHING

Engineering principles and mechanics applied to the musculoskeletal system including structure-function property relationships of musculoskeletal tissues, the biomechanics of joint systems, and applications of biomechanics in industry and research. Offered: jointly with BIOEN 520; W.

[View course details in MyPlan: M E 527](#)

M E 528 Acoustics of Environmental Noise (4)

Offered: jointly with CEE 554.

[View course details in MyPlan: M E 528](#)

M E 529 Advanced Energy Conservation Systems (4) Kramlich

Covers advanced energy conversion systems and technologies, including high efficiency combined cycles, advanced rankine, integrated gasification combined cycle, nuclear, biomass thermal conversion, and fuels cells. Discusses environmental consequences. Offered: A.

[View course details in MyPlan: M E 529](#)

M E 530 Radiative Heat Transfer (3) Mescher

Covers black and gray body radiation, radiative material properties, radiation exchange between surfaces, radiation in participating media, and combined radiation with conduction or convection. Offered: W.

[View course details in MyPlan: M E 530](#)

M E 531 Conductive Heat Transfer (3)

Analysis of steady-state and transient heat conduction in single- and multidimensional systems by mathematical, graphical, numerical, and analogical methods. Prerequisite: graduate standing in mechanical engineering or

permission of instructor.

[View course details in MyPlan: M E 531](#)

M E 532 Convective Heat Transfer (3)

Introduction to fluid flow and boundary-layer theory as applicable to forced- and natural-convection heat transfer. Condensation and boiling heat transfer. Prerequisite: graduate standing or permission of instructor.

Instructors: Kramlich Offered: Sp.

[View course details in MyPlan: M E 532](#)

M E 534 Fluid Mechanics II (3)

Review of basic principles, some exact solutions and their interpretation, waves (water waves, sound waves, shock waves), boundary layers, jets and wakes, flow stability, turbulence, applications. Prerequisite: M E 507 or permission of instructor. Instructors: Riley Offered: W.

[View course details in MyPlan: M E 534](#)

M E 535 Computational Techniques in Mechanical Engineering (3)

Advanced heat transfer studies of interest to mechanical engineers. Subject coverage varies from year to year.

Prerequisite: permission of instructor. Instructors: Emery Offered: Sp.

[View course details in MyPlan: M E 535](#)

M E 536 Micro and Nanoscale Fluid Transport Phenomena (3) *Posner, Shen*

Focuses on fundamental fluid transport physics at the micro/ and nanometer scale for applications in micro/nanofluidic devices. Presents the core concepts of low-Reynolds number Newtonian fluid mechanics; mass transfer; charged double layers; electrokinetically driven flow and transport; and surface tension. Discusses state of the art micro and nanoscale total analytical devices. Offered: WSp.

[View course details in MyPlan: M E 536](#)

M E 537 Topics in Fluid Mechanics (3)

Selected fluid mechanics relevant to current advances in research and application. Topics selected vary with faculty and student interest, but have included flow stability, special topics in turbulence, and turbulent reacting flows.

[View course details in MyPlan: M E 537](#)

M E 538 Advanced Fluid Mechanics (4) *J. RILEY*

Advanced topics in fluid mechanics, including kinematics; potential theory and vortex dynamics; viscous flow; turbulence; numerical methods; and design. Offered: A.

[View course details in MyPlan: M E 538](#)

M E 539 Renewable Energy I (4) *Malte*

Renewable energy, principles and practices of energy conversion, with focus on solar energy and bio-energy. Offered: W.

[View course details in MyPlan: M E 539](#)

M E 540 Renewable Energy II (3) *Malte*

Explores renewable energy, principles and practices of energy conversion, focusing on wind and hydrokinetic energy. Offered: Sp.

[View course details in MyPlan: M E 540](#)

M E 541 Fatigue of Materials (3) *Ramulu*

Macro and micro aspects of fatigue of metals and fatigue mechanisms. Analytical methods for fatigue and life assessment in advanced materials. Offered: W.

[View course details in MyPlan: M E 541](#)

M E 543 Fluid Turbulence (3)

Methods of characterizing fluid turbulence; probability concepts; spatial and temporal velocity correlations;

spectral energy transfer; turbulent diffusion; isotropic turbulence and Kolmogoroff's hypothesis; Taylor's hypothesis; hot-wire measurement techniques. Prerequisite: 3 credits of graduate level fluid mechanics or permission of instructor. Offered: W, even years.

[View course details in MyPlan: M E 543](#)

M E 544 Advanced Turbulence Modeling Techniques (3)

The Reynolds stress transport equations; plane homogeneous shear flow; modeling the pressure-strain, diffusion, and dissipation rate correlation tensors; one and two-equation turbulence models; near-wall turbulence and wall functions; limitations of length scale and eddy viscosity modeling. Prerequisite: 3 credits of turbulence-related coursework. Instructors: Riley Offered: Sp, even years.

[View course details in MyPlan: M E 544](#)

M E 546 Micro-Scale Heat Transfer (3) Mescher

Covers advanced heat conduction and radiation principles, emphasizing micro-scale applications. Offered: Sp, odd years.

[View course details in MyPlan: M E 546](#)

M E 547 Linear Systems Theory (4)

Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Offered: jointly with A A 547/E E 547.

[View course details in MyPlan: M E 547](#)

M E 548 Linear Multivariable Control (3)

Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 548/E E 548.

[View course details in MyPlan: M E 548](#)

M E 549 Estimation and System Identification (3)

Fundamentals of state estimation for linear and nonlinear systems. Discrete and continuous systems. Probability and stochastic systems theory. Models with noise. Kalman-Bucy filters, extended Kalman filters, recursive estimation. Numerical issues in filter design and implementation. Prerequisite: either A A 547, E E 547, or M E 547. Offered: jointly with A A 549/E E 549.

[View course details in MyPlan: M E 549](#)

M E 550 Nonlinear Optimal Control (3)

Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Offered: jointly with A A 550/E E 550.

[View course details in MyPlan: M E 550](#)

M E 551 Elasticity I: Elastostatics (3) Taya

Elastostatics, including general formulations of 2D and 3D elastostatic problems (stress function method, complex variable method, displacement potential method). Eshelby's method is emphasized and used to solve 2D and 3D problems with special application to composite materials. Offered: W.

[View course details in MyPlan: M E 551](#)

M E 552 Viscoelasticity and Plasticity (3) Taya

Covers viscoelasticity, including the stress-strain equations in terms of convolution integral, Fourier transform, and Laplace transform modes. Plasticity focuses on generalized plastic behavior.

[View course details in MyPlan: M E 552](#)

M E 553 Adhesion Mechanics (3)

Introduction to adhesive systems and test/evaluation techniques. Stress/strain analysis methods used with adhesive joints. Examples of practical applications. Prerequisite: graduate student status or permission of instructor. Instructors: Tuttle Offered: Sp, even years.

[View course details in MyPlan: M E 553](#)

M E 555 Thermoelasticity (3)

Basic equations of thermoelasticity for isotropic elastic solids. Analysis of disks, cylinders, spheres, beams, and plates under steady temperature and sudden and slow heating and cooling. Introduction to thermoelastic stability. Prerequisite: M E 551 or permission of instructor. Instructors: Emery

[View course details in MyPlan: M E 555](#)

M E 556 Experimental Stress Analysis I (3)

Theory and practice of experimental techniques including strain gages and strain gage-based devices, thermocouples, LVDTs, and transducer design. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Instructors: Tuttle Offered: A.

[View course details in MyPlan: M E 556](#)

M E 557 Experimental Stress Analysis II (3)

Theory and practice of optical mechanics, including interferometric techniques (moiré and holographic), geometric moiré methods, and photoelasticity. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Instructors: Tuttle Offered: W, even years.

[View course details in MyPlan: M E 557](#)

M E 559 Introduction to Fracture Mechanics (3) *Ramulu*

Applications of linear fracture mechanics to failure analysis and fracture control based on actual case studies. Fracture toughness and fatigue testing techniques, crack initiation, and propagation fatigue life prediction of mechanical components subjected to environmental effects. Offered: W.

[View course details in MyPlan: M E 559](#)

M E 561 Mechanics of Thin Films (3) *Wang*

Provides an overview of the thin film deposition processes; the stress and microstructure development during film growth; the mechanisms of adhesion; delamination and fracture; and the state-of-the-art characterization techniques for the microstructure and mechanical properties of thin films, coatings, and nanomaterials. Offered: A.

[View course details in MyPlan: M E 561](#)

M E 562 Introduction to Electronic Composites (3) *Taya*

Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic, and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Offered: jointly with MSE 562; Sp.

[View course details in MyPlan: M E 562](#)

M E 563 Advanced Composites: Design and Manufacturing (3)

Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: MSE 475 or M E 450 or equivalent by permission of instructor. Offered: jointly with MSE 563; Sp.

[View course details in MyPlan: M E 563](#)

M E 564 Mechanical Engineering Analysis (3)

Application of mathematical methods to the description and analysis of systems in mechanical engineering. Analogies in heat transfer, fluid flow, stress distribution, dynamics, and feedback control. Prerequisite: graduate

standing in mechanical engineering or permission of instructor. Instructors: Storti Offered: A.

[View course details in MyPlan: M E 564](#)

M E 565 Mechanical Engineering Analysis (3)

Applications of vectors, matrices, and partial differential equations to mechanical engineering systems, including computational techniques and analogies. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Instructors: Storti Offered: W.

[View course details in MyPlan: M E 565](#)

M E 567 Micro- and Nanostructured Biosensors (3)

Focuses on biosensors based on micromachining and nanotechnology. The working principles on molecular detection and analysis are introduced with the fabrication process, system integration and evaluation. Helps students to classify biosensors detecting molecules, design the fabrication process and identify the evaluation methods. Offered: jointly with MOLENG 567; W.

[View course details in MyPlan: M E 567](#)

M E 568 Active and Sensing Materials (3) Taya

Fundamental knowledge of the nano-structure property relations of active and sensing materials, and their devices. Examples of the active and sensing materials include: shape memory alloys (SMAs), ferromagnetic SMAs, ferroelectric, pyroelectric and piezoelectric materials, thermoelectrics, electroactive and conducting polymers, photoactive polymers, photovoltaics, and electrochromic materials. Offered: jointly with MSE 568; Sp.

[View course details in MyPlan: M E 568](#)

M E 570 Manifolds and Geometry for Systems and Control (3)

Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate vs. coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with A A 570/E E 570; W, even years.

[View course details in MyPlan: M E 570](#)

M E 572 Methodologies for Engineering Design: Conceptual Design (3)

Methodologies particularly useful in the conceptual or preliminary phase of a design. The design process. Impact of formulating independent functional requirements. Physical and functional coupling in design. Case studies in conceptual design of products and processes. Prerequisite: graduate standing or permission of instructor. Instructors: Kumar Offered: W, even years.

[View course details in MyPlan: M E 572](#)

M E 578 Convex Optimization (4)

Basics of convex analysis: Convex sets, functions, and optimization problems. Optimization theory: Least-squares, linear, quadratic, geometric and semidefinite programming. Convex modeling. Duality theory. Optimality and KKT conditions. Applications in signal processing, statistics, machine learning, control communications, and design of engineering systems. Prerequisite: A A 510, CHEM E 510, E E 510 or M E 510. Offered: jointly with A A 578/E E 578; W.

[View course details in MyPlan: M E 578](#)

M E 580 Geometric Methods for Non-Linear Control Systems (3)

Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Offered: jointly with A A 580/E E 580; Sp, even years.

[View course details in MyPlan: M E 580](#)

M E 581 Digital Control System Design (4) M. BERG

Digital control system design by classical methods. Discrete-time systems and the z-transform. Modeling

sampled-data systems. Frequency response of discrete time systems and aliasing. Nyquist stability criterion and gain and phase margins. Discrete-time control law determination by direct z-plane root locus and loop shaping methods. Includes hands-on-with-hardware projects. Prerequisite: AA/EE 447 or ME 471. Offered: jointly with A A 581/E E 581; W.

[View course details in MyPlan: M E 581](#)

M E 582 Introduction to Discrete Event Systems (3)

Modeling DES with automata and Petri nets. Languages. State estimation and diagnostics. Control specifications. Feedback control. Dealing with uncontrollability and unobservability. Dealing with blocking. Timed automata and Petri nets. Prerequisite: A A 447/E E 447/ M E 471. Instructors: Berg Offered: jointly with A A 582/E E 582; Sp, even years.

[View course details in MyPlan: M E 582](#)

M E 583 Nonlinear Control Systems (3)

Analysis of nonlinear systems and nonlinear control system design. Phase plane analysis. Lyapunov stability analysis. Describing functions. Feedback linearization. Introduction to variable structure control. Prerequisite: A A 447/E E 447/M E 471. Offered: jointly with A A 583/E E 583.

[View course details in MyPlan: M E 583](#)

M E 585 System Identification and Adaptive Control (3)

Theory and methods of system identification and adaptive control. Identification of linear-in-parameter systems, using recursive LS and extended LS methods; model order selection. Indirect and direct adaptive control. Controller synthesis, transient and stability properties. Offered: jointly with A A 585/E E 585.

[View course details in MyPlan: M E 585](#)

M E 588 Dynamics and Vibrations (3)

Variational techniques, Hamilton's principle, Lagrange's equations applied to dynamics of particles and rigid bodies. Vibration analysis of multi-degree-of-freedom and continuous systems. Prerequisite: graduate standing in engineering or permission of instructor. Instructors: Shen Offered: A.

[View course details in MyPlan: M E 588](#)

M E 589 Vibrations (3)

Study of systems with nonlinear damping and restoring forces excited by deterministic or random inputs. Applications in measurement, testing, and design of mechanical systems. Nonlinear systems are emphasized. Prerequisite: M E 588 or permission of instructor. Instructors: Storti Offered: W, even years.

[View course details in MyPlan: M E 589](#)

M E 591 Robotics and Control Systems Colloquium (1, max. 30)

Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no-credit only. Offered: jointly with A A 591/CHEM E 591/E E 591.

[View course details in MyPlan: M E 591](#)

M E 593 Feedforward Control (3)

Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Instructors: Devasia Offered: jointly with A A 593/E E 593; Sp, even years.

[View course details in MyPlan: M E 593](#)

M E 594 Robust Control (3)

Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Prerequisite: A A 547/E E 547/M E 547. Offered:

jointly with A A 594/E E 594; Sp, odd years.

[View course details in MyPlan: M E 594](#)

M E 597 Networked Dynamics Systems (3)

Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 597/E E 597.

[View course details in MyPlan: M E 597](#)

M E 598 Graduate Projects (1-6)

Doctoral seminar. Offered: AWSpS.

[View course details in MyPlan: M E 598](#)

M E 599 Special Topics (1-5, max. 9)

Written report required. Prerequisite: permission of department chairperson. Offered: AWSpS.

[View course details in MyPlan: M E 599](#)

M E 600 Independent Study or Research (*-)

Written report required. Offered: AWSpS.

[View course details in MyPlan: M E 600](#)

M E 700 Master's Thesis (*-)

Offered: AWSpS.

[View course details in MyPlan: M E 700](#)

M E 800 Doctoral Dissertation (*-)

Offered: AWSpS.

College of the Environment

[Display as tabs](#)

College Overview

Dean

Lisa Graumlich
209 Ocean Sciences

Associate Deans

Bruce Nelson, Research
Julia Parrish, Academic Affairs and Diversity

Rapidly changing interactions between the Earth's environment and human activities drive the research and teaching at the College of the Environment. By connecting some of the world's leading educators and researchers with students, practitioners, and citizens, the College cultivates communities that work with and learn from each other as they tackle the environmental challenges of the twenty-first century.

For decades the UW has been recognized as home to one of the strongest constellations of environmental and intellectual talent in the world. In fulfillment of a vision for a bold, resourced, enduring, and effective environmental hub, the UW launched the College of the Environment in July 2009. The College fosters existing and new collaborations between faculty, staff, and students who are engaged in the study of the Earth's dynamic land, water, and atmosphere systems; the development and application of engineering and technological advances; and the impact of policy and human dimensions on the environment and the management of natural resources.

Offering more than 20 degree programs, ranging from bachelor to doctoral, and granting more than 450 degrees annually, the College is comprised of the following core units:

- School of Aquatic and Fishery Sciences
- Department of Atmospheric Sciences
- Department of Earth and Space Sciences
- Program on the Environment
- School of Environmental and Forest Sciences
- School of Marine and Environmental Affairs
- School of Oceanography
- Friday Harbor Laboratories
- Joint Institute for the Study of the Atmosphere and Ocean
- Washington NASA Space Grant Consortium
- Washington Sea Grant Program

College Facilities

The College of the Environment main office is in the Ocean Sciences Building, Suite 200, located at 1492 NE Boat Street. For locations of all College of the Environment buildings, see the [Academics-at-a-Glance](#) page for links to campus maps showing the College's school and departmental buildings.

The College's facilities and field stations include the following, among others: Center for Sustainable Forestry at Pack Forest, Friday Harbor Laboratories, Pacific Northwest Seismic Network, Research Vessel Thomas G. Thompson, and Wind River Crane Canopy Research Center.

Undergraduate Program

The College of the Environment offers the following undergraduate degree options:

Bachelor Degree Programs

Bachelor of Science:

- Aquatic and Fishery Sciences
- Atmospheric Sciences
- Bioresource Science and Engineering
- Earth and Space Sciences (degree options areas: biology, environmental, geology, and physics)
- Environmental Science and Resource Management (degree option areas: landscape ecology and conservation, restoration ecology and environmental horticulture, sustainable forest management, and wildlife conservation)
- Oceanography

Bachelor of Arts:

- Environmental Studies

Minors

- Aquatic and Fishery Sciences
- Arctic Studies
- Atmospheric Sciences
- Climate Science
- Earth and Space Sciences
- Environmental Science and Resource Management
- Environmental Studies

- Oceanography
- Restoration Ecology

Admission

The College does not have admission requirements beyond those required for admission to the University of Washington. Most of the majors within the College are open admission and can be declared at any time by students in good academic standing, except for the major in Bioresource Science and Engineering within the School of Environmental and Forest Sciences, which has a competitive admission process.

General Education Requirements

Minimum 85 credits as follows:

- *Written & Oral Communication*: One 5-credit English composition (C) course from the approved University list with a minimum 2.0 grade; 10 additional writing credits.
- *Quantitative & Symbolic Reasoning (QSR)*: 10 credits. See departmental lists for specific quantitative and symbolic reasoning requirements.
- *Areas of Knowledge*
 - *Visual, Literary, & Performing Arts*: 10 credits. Visual, Literary, & Performing Arts (VLPA) includes courses such as literature, art, music, and drama which stress the essential qualities of individual forms of expression. First- and second-quarter language courses may not be counted toward the VLPA requirement. (May substitute first-year language courses for VLPA requirements by completing a third quarter of a three-course sequence. Language courses at the second-year level and beyond may be counted toward the VLPA requirement.)
 - *Individuals & Societies (I&S)*: 20 credits, with at least 10 credits out of major*. Individuals & Societies includes courses in subjects such as history, economics, psychology, and sociology which stress the social nature of mankind, and the development and analysis of societies and social institutions.
 - *Natural World (NW)*: 20 credits, with at least 10 credits out of major*. See departmental list for specific natural world requirements.
 - *Additional Areas of Knowledge*: 10 credits

* Definition of "out of major": Course must have an out-of-major prefix and may not overlap with courses required for the major. This includes cross-listed courses.

Graduate Program

The College of the Environment offers the following graduate degree options:

- **Master's Degree Programs**
 - Master of Science:
 - Aquatic and Fishery Sciences
 - Atmospheric Sciences
 - Earth and Space Sciences

- Forest Resources
- Oceanography
- Science for Teachers
- Other Master's Degrees:
 - Master of Environmental Horticulture
 - Master of Forest Resources
 - Master of Marine Affairs
- **Doctoral Degree Programs**
 - Doctor of Philosophy:
 - Aquatic and Fishery Sciences
 - Atmospheric Sciences
 - Earth and Space Sciences
 - Forest Resources
 - Geologic Sciences
 - Geophysics
 - Oceanography
- **Graduate Certificate Programs**
 - Astrobiology
 - Climate Sciences
 - Environmental Management

Science for Teachers Program Overview

The Master of Science in Science for Teachers (MSST) is a graduate degree in science developed specifically for teachers and administered by the College of the Environment. Because science is moving at ever-increasing speeds, with new breakthroughs, innovations and technologies, keeping pace requires science educators to engage in hands-on, high-level, real-life science. The MSST program has three core components: practicing science through an independently-designed research project, deepened disciplinary content knowledge, and the development of an interdisciplinary skill set. These components work together to give teachers the opportunity to experience directly how the three dimensions of the Next Generation Science Standards (cross-cutting concepts, science and engineering practices, core disciplinary ideas) are integrated and realized in cutting-edge contemporary science.

Master of Science (Science for Teachers)

The College of the Environment offers the Master of Science in Science for Teachers (MSST), a graduate degree in science developed specifically for teachers. The MSST program provides a unique opportunity to conduct scientific research with world-renowned UW faculty and research professionals as a mechanism to strengthen and broaden content knowledge and scientific skill sets. This degree is designed to:

- Move science teachers through the skills that are fundamental to today's scientific practice – experimental design, data manipulation, data visualization, and science communication
- Create a flexible and personally-tailored elective set within the student's discipline of choice
- Culminate in the design and implementation of an individualized and independent scientific research project

The flexible course structure is especially designed to fit the needs of K-12 teachers. Course work can be taken throughout the UW, and faculty research mentors range across Colleges of the Environment, Arts and Sciences, Public Health, and Medicine. MSST is intended to be completed in two years and may be compatible with part-time work or teaching. Students may take additional time to complete their degree if needed.

The Master of Science in Science for Teachers does not lead to teacher certification.

Admission Requirements

Admission to the Master of Science (Science for Teachers) degree program is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general test scores, three letters of recommendation, official academic transcripts, minimum GPA of 3.0 required for last two years of study, a bachelor's degree in a science field (or demonstrated equivalency), and experience working in an educational setting. Applicants must apply directly to, and be accepted by, the University's Graduate School. Applications are accepted for Autumn Quarter only.

Degree Requirements

36 total credits as follows:

1. 18 credits at the 500-level or higher
2. Minimum 2.7 grade in 18 credits at the 400-level or higher
3. Minimum 3.00 GPA
4. Core courses based on shared skills sets, with a secondary focus on developing student cohorts:
 - SCI T 501; SCI T 502; SCI T 503; SCI T 600 (9-10 credits)
5. Statistics course (5 credits) at the 300-500 level
6. An elective pathway that the student and Graduate Program Coordinator develop based on the disciplinary needs of the student.

Financial Aid

The Master of Science (Science for Teachers) program does not provide funding to students. Applicants in need of support are encouraged to contact the UW Office of Student Financial Aid to explore options for grants, loans, scholarships, and work-study; to apply for College of the Environment Scholarships; and to investigate outside sources of funding.

C ENV 110 Introduction to Food and the Environment (5) I&S/NW Hilborn

Relates the production and consumption of food to the major areas of environmental science including energy use, water consumption, biodiversity loss, soil loss, pollution, nutrient cycles, and climate change. Studies the basic science and how food production impacts the key processes.

[View course details in MyPlan: C ENV 110](#)

C ENV 190 Introductory Topics in Environment (1-5, max. 15)

Covers topics related to all areas of the environment.

[View course details in MyPlan: C ENV 190](#)

C ENV 410 MESA Introductory Tutor Training Workshop (1)

Tutor skills and cultural competence training designed to prepare tutors to work in small groups with Seattle middle and high school students in math and science. Credit/no-credit only. Offered: ASp.

[View course details in MyPlan: C ENV 410](#)

C ENV 420 MESA Introductory Tutor Training Seminar (1-2)

Second course in the tutor training program. Continued development of tutoring skills and cultural competence training designed to prepare tutors to work in small groups with Seattle middle and high school students in math and science. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: C ENV 420](#)

C ENV 425 MESA Tutoring Practicum (1-3, max. 15)

Trained MESA tutors work in small groups with Seattle middle and high school students in math and science. Develop tutoring skills, share best practices, and problem solve through online interactions with the MESA tutoring program. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: C ENV 425](#)

C ENV 430 MESA Advanced Tutor Training Seminar (1-2)

Advanced tutor training program. Continued development of tutoring skills and cultural competence training designed to prepare tutors to work in small groups with Seattle middle and high school students in math and science. Credit/no-credit only. Offered: A.

[View course details in MyPlan: C ENV 430](#)

COLLEGE OF THE ENVIRONMENT

FRIDAY HARBOR LABS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

FHL 101 Introduction to Marine Biology in the San Juan Islands (1) NW M. DETHIER

One-weekend, one-credit course designed to introduce students to the marine ecosystem of the San Juan Archipelago and the facilities of the Friday Harbor Laboratories, while doing basic exploration of marine biology. Students will spend two full-schedule days doing a variety of field and lab studies. Offered: Sp.

[View course details in MyPlan: FHL 101](#)

FHL 305 Biology of Fishes (5) NW

Covers the morphological, physiological, behavioral, and ecological diversity of fishes worldwide; provides a basic foundation for advanced courses in all areas of aquatic sciences. Participants engage in field-based collecting, copious dissection/illustration laboratories, and delve into scientific literature on this fascinating group's biology. Recommended: Recommended: 10 credits biological science. Offered: ASp.

[View course details in MyPlan: FHL 305](#)

FHL 333 Special Topics in Marine Science (3/5)

Selected topics in marine science, from science-content courses to courses in communicating science. Format may range from seminar/discussion to formal lectures to laboratory work. 5-credit versions will involve additional lab or working group time. Offered: ASp.

[View course details in MyPlan: FHL 333](#)

FHL 375 Marine Mammals of the Salish Sea (5) NW D. GILES

An overview of the marine mammals found in the Salish Sea: their biology, habitats and conservation. Field trips throughout the San Juan Archipelago allow observation of common species, involving identification and recording of behavior in nature. Prerequisite: BIOL 180, FISH 250, ENVIR 100, OCEAN 101, or OCEAN 200. Offered: Sp.

[View course details in MyPlan: FHL 375](#)

FHL 430 Marine Zoology (5) NW

Survey of groups of invertebrate animals represented in the San Juan Archipelago; natural history, functional morphology, ecology, distribution, habitat, adaptation, trophic interrelationships, and evolution. Prerequisite: BIOL 445, which must be taken concurrently; permission of Friday Harbor director. Offered: jointly with BIOL

430.

[View course details in MyPlan: FHL 430](#)**FHL 432 Marine Invertebrate Zoology (9) NW**

Comparative morphology and biology of marine invertebrates with emphasis on field and laboratory studies. Representatives of all major and most minor phyla are collected, observed live, and studied in detail. Taken at Friday Harbor Laboratories. Not open for credit to students who have taken BIOL 434. Offered: jointly with BIOL 432; S.

[View course details in MyPlan: FHL 432](#)**FHL 435 Research Apprenticeship in Marine Science (15) NW**

Immersive quarter in research in close collaboration with one-three faculty mentors on a specific topic that varies with the apprenticeship. Students engage in laboratory or field research in marine science, involving gathering, analyzing, and communicating results as part of a research team. Offered: jointly with BIOL 435/MARBIO 435; ASpS.

[View course details in MyPlan: FHL 435](#)**FHL 440 Marine Botany (5) NW**

Survey of plants represented in marine environments; natural history; ecology, distribution, habitat, adaptation, and trophic interrelationships. Taken at Friday Harbor laboratories. Prerequisite: either BIOL 220, B BIO 220, or TESC 140; BIOL 430, which must be taken concurrently. Offered: jointly with BIOL 445.

[View course details in MyPlan: FHL 440](#)**FHL 446 Marine Botany: Diversity and Ecology (9) NW *T. MUMFORD***

Introduces marine plants - the diversity, life histories, physiology, and ecology of seaweeds, seagrasses, and marsh plants in the Salish Sea. Emphasizes field and laboratory work, including the application of molecular techniques to explore algal diversity and evolution. Offered: S.

[View course details in MyPlan: FHL 446](#)**FHL 450 Nearshore Ecology Research Experience (6) NW *M. DETHIER***

A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research around a thematic focus of ecology of nearshore marine ecosystems, with lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with MARBIO 450; ASp.

[View course details in MyPlan: FHL 450](#)**FHL 460 Aquatic Animals Research Experience (6) NW *P. DITSCHKE-KURU***

A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research around a thematic focus of aquatic animals, with lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with MARBIO 460; ASp.

[View course details in MyPlan: FHL 460](#)**FHL 470 Research in Marine Biology (1-15, max. 15) NW *B. SWALLA***

A hands-on introduction of "doing science" in close collaboration with a faculty member. Students engage in research in marine biology; credits vary with the scale of the project with may include lab experiments and field work. Students gather, analyze, write up, and present their own data. Offered: jointly with MARBIO 470; ASp.

[View course details in MyPlan: FHL 470](#)**FHL 490 Marine Sciences Seminar (1, max. 3) NW *P. DITSCHKE-KURU***

Students attend seminars by marine scientists each week and ask questions about their seminars. Offered: ASpS.

[View course details in MyPlan: FHL 490](#)**FHL 492 Ecology and Conservation of Marine Birds and Mammals (9/15) NW**

An intensive, field-based course that offers motivated students the opportunity to learn about these ecologically and culturally important marine animals and the conservation problems they face. Emphasizes first-hand

learning and individual research projects. Offered: jointly with FISH 492/MARBIO 492; S.

[View course details in MyPlan: FHL 492](#)

FHL 528 Advanced Topics in Fish Biology (9, max. 27)

Focuses on various aspects of fish biology, such as functional morphology, sensory biology, or swimming mechanics. Taught at Friday Harbor Laboratories. Offered: S.

[View course details in MyPlan: FHL 528](#)

FHL 536 Comparative Invertebrate Embryology (9)

Studies diversity in developmental patterns in major marine taxa. Analyzes evolutionary changes in development, with emphasis on observation of live embryos and larvae. Offered: jointly with BIOL 536; S.

[View course details in MyPlan: FHL 536](#)

FHL 548 Advanced Topics in Evolution and Development (9, max. 27)

Focuses on various aspects of evolution and development of marine organisms, such as larval biology or evolution and development of metazoans. Students work on individual projects during the course. Taught at Friday Harbor Laboratories. Offered: S.

[View course details in MyPlan: FHL 548](#)

FHL 568 Advanced Topics in Ecology and Biomechanics (9, max. 27)

Focuses on various aspects of ecology and biomechanics of marine organisms, such as experimental ecology, ocean acidification, deep sea biodiversity, or biomechanics. Taught at Friday Harbor Laboratories. Offered: S.

[View course details in MyPlan: FHL 568](#)

FHL 578 Special Topics in Science Communication (9) NW

This FHL course focuses on different aspects of linkages between scientists and the public, including multiple ways to communicate science. Offered at Friday Harbor Laboratories; see FHL website for topic for next summer.

[View course details in MyPlan: FHL 578](#)

FHL 585 Advanced Topics in Neurobiology and Physiology (9, max. 27)

Focuses on various aspects of neurobiology or physiology of marine organisms, such as neurobiology, ethology, or marine chemosensory biology. Taught at Friday Harbor Laboratories. Offered: S.

Aquatic and Fishery Sciences

[Display as tabs](#)

School Overview

116 Fishery Sciences

The School of Aquatic and Fishery Sciences (SAFS) encompasses multi-disciplinary programs at the interface between the traditional fields of natural history, environmental biology, and natural resource management. Primary foci are the management of sustainable fisheries of commercially important species; biocomplexity and ecosystem-based management; and sustainable aquaculture. In addition, human-induced effects on natural ecosystems (including habitat change and restoration, impacts of climate change, emerging diseases, the effects of invasive species, and processes affecting endangered species and declining populations) are major areas of research. In pursuit of these objectives, a variety of basic sciences are used, including ecology and evolution, population biology, behavior, physiology, microbiology, and genetics. The scope of aquatic systems ranges from watersheds, rivers and lakes, to estuarine and near-shore shelf, open ocean systems and culture facilities. Graduates of the School of Aquatic and Fishery Sciences are uniquely qualified for careers in universities as well as other educational settings, natural resources management agencies at the local to international levels, environmental consulting, and non-profit organizations with an environmental focus.

Undergraduate Program

Adviser

116 Fishery Sciences, Box 355020

(206) 543-7457

safsadv@uw.edu

The School of Aquatic and Fishery Sciences (SAFS) offers the following programs of study:

- The Bachelor of Science, with a major in aquatic and fishery sciences
- A minor in aquatic and fishery sciences
- An interdisciplinary minor in marine biology
- An interdisciplinary minor in quantitative science

The school's undergraduate program has been substantially modified in recent years to reflect student and faculty interests in ecology and conservation biology, as well as more traditional fields such as stock assessment and fishery management. Faculty dedication to teaching, substantial benefit gained in close faculty contact within a relatively small

program, and significant experiential training and research have made SAFS an appealing major that has doubled in recent years. The bachelor of science degree provides an underpinning in sciences such as biology, chemistry, and mathematics/statistics, then adds a core curriculum within aquatic sciences. Students study within areas of individual interest, grouped in three primary areas: aquatic ecology, conservation and management of aquatic resources, and biology and culture of aquatic animals.

Bachelor of Science

Suggested First- and Second-Year College Courses: Recommended courses for first year students: English composition; calculus; CHEM 120 or CHEM 142, and CHEM 220; BIOL 180; and FISH 250 and/or FISH 101. Recommended courses for second year students: BIOL 200 and BIOL 220; Q SCI 381; FISH 310 and/or FISH 311; and any additional courses that meet the College general education requirements. Students should start FISH core courses as soon as they meet the appropriate prerequisites.

Department Admission Requirements

Students in good academic standing may declare this major at any time, including on their application for admission to the UW. After notification of admission and before registration, new students should visit or email the Student Services Office for help in planning their programs.

Graduation Requirements

180 credits

General Education Requirements

All majors must satisfy the College of the Environment general education requirements.

Major Requirements

1. Foundation Courses (50-55 credits)

- a. *Mathematics (15 credits):* either MATH 124 and MATH 125, or Q SCI 291 and Q SCI 292; Q SCI 381
- b. *Chemistry (9-10 credits):* either CHEM 120 or CHEM 142;
- c. *Biology (15 credits):* BIOL 180, BIOL 200; either BIOL 220 or FISH 270/OCEAN 270/MARBIO 270
- d. *Physics (4-5 credits):* either PHYS 114 or PHYS 121
- e. *Two of the following (7-10 credits):* either PHYS 115 or PHYS 122; either PHYS 116 or PHYS 123; OCEAN 210; GEOG 205; ATM S 211; OCEAN 230/ESS 230; OCEAN 285; FISH 330/ENVIR 330; ENVIR 313/ESS 315. See adviser for other acceptable courses in this category.

2. Core (minimum 29 credits)

- a. FISH 290; FISH 300/OCEAN 300/MARBIO 300; FISH 310; FISH 311/BIOL 311
- b. Minimum 15 credits from three of the following: FISH 312, FISH 323, FISH 324, and FISH 340/BIOL 340

3. *Electives (minimum 16 credits, four courses)*: 400-level courses from within the School of Aquatic and Fishery Sciences for the major, excluding FISH 453/OCEAN 453, and FISH 477BIOL 477/OCEAN 477
 - a. Maximum 3 credits total from FISH 479/BIOL 479/OCEAN 479, FISH 492/FHL 492/MARBIO 492, FISH 498, FISH 499
 - b. Maximum 5 credits from each of FISH 489 and FISH 491
4. *Capstone (7-13 credits)*: FISH 493, FISH 494, FISH 495
5. Minimum 2.00 cumulative GPA in all core, elective, and capstone courses applied to the major.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Minor

Aquatic and Fishery Sciences

Minor Requirements: Minimum 28 credits to include three courses (two of which must be at least at the 300 level) from FISH 101, FISH 250, FISH 310, FISH 311, FISH 312, FISH 323, and FISH 324; Q SCI 381 or Q SCI 482; minimum two upper-division FISH courses totaling at least 8 credits. Maximum 11 credits may overlap with a student's major.

Marine Biology

The minor in marine biology is sponsored jointly by the School of Aquatic and Fishery Sciences, the School of Oceanography, and the College of Arts and Sciences, and is designed to immerse students in the study of marine organisms and ecosystems, starting in the freshman year. Because the experience of marine sciences cannot be taught entirely within the classroom, the minor is structured to provide ample opportunity for fieldwork and research within the coursework. A description of the minor can be found [under the Interdisciplinary Undergraduate Program](#) section of the catalog.

Quantitative Science

Students interested in quantitative skills applied to biological and ecological fields should consider minoring in quantitative science, an interdisciplinary minor supported by the School of Aquatic and Fishery Sciences and the School of Environmental and Forest Sciences. More information may be found on the [Center for Quantitative Science website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Aquatic and fishery sciences is a life science major designed to provide students a broad framework of knowledge and sets of skills for employment in a variety of areas (e.g., natural resource management, environmental consulting, fish or aquatic wildlife biology, aquaculture). In addition, students receive excellent preparation for graduate study in a number of life science fields. Expected student outcomes include:
 1. Skills in written and oral communication, data analysis, field and laboratory skills. Skill sets have been integrated into all core and flagship courses.

2. Exposure to career paths in the field and interaction with professionals. Skills gained allow students to obtain an entry-level aquatic scientist position or admission to graduate school.
3. Emphasis in one of three focus areas (aquatic ecology, conservation and management, aquatic biology and culture); students get a broad overview, then may specialize in one of the three areas.
4. Strong encouragement to pursue multiple internship and research experiences, including opportunities like FHL research apprenticeships and Alaska Ecological Research Program.
5. Understanding not only of the science, but also the socio-political-economic environment and its impact on the field of aquatic and fishery sciences.
6. All students participate in a capstone experience that requires them to demonstrate acquired skill sets (including public presentation in an undergraduate research symposium).

SAFS graduates pursue careers in the private sector (environmental consulting firms, private companies), the public sector (state and federal agencies, non-profit organizations, non-governmental agencies, education), and many continue into graduate programs in either research or policy. The undergraduate degree prepares students for either direct employment in a number of fields within public and private sectors, or for competitive entry into applicable graduate programs worldwide.

- *Instructional and Research Facilities:* The School of Aquatic and Fishery Sciences is housed in several buildings on the University of Washington campus. In addition, the school maintains various facilities off campus, including field research stations in Washington State and Alaska.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major).
- *Research, Internships, and Service Learning:* SAFS scientists work closely with employers in both the public and private sectors, leading to opportunities for undergraduates to receive both internship and research experience. Scientists from area agencies (NOAA, National Marine Fisheries, Alaska Fisheries Sciences Center, National Marine Mammal Lab, the U.S. Forest Service, the Student Conservation Association, and the Seattle Aquarium) come to the school to attend weekly SAFS departmental seminars; undergraduates are encouraged to attend. The School of Aquatic and Fishery Sciences is second only to the UW Medical School in federal research dollars brought to the UW campus, providing many paid hourly student positions within the department.
- *Department Scholarships:* Scholarships are awarded on the basis of academic merit, financial need, and other factors. The annual application process for continuing students begins in spring; check with the Office of Student Services for applications and deadlines. All undergraduates, both freshmen and transfers, are considered for recruitment scholarships if they have declared AFS as their major on their application to the University of Washington.
- *Student Organizations/Associations:* SURF (Society for Undergraduate Resources in Fisheries) organizes social, career, and educational activities for undergraduates in aquatic and fishery sciences. SURF also prints t-shirts, welcomes new students to the program, represents the program at events, and collaborates with student groups in other related departments on events.

Of Special Note:

- The School of Aquatic and Fishery Sciences has sent a small group of students and three faculty members to two Alaska Salmon Field Stations for a six-week course in aquatic ecology. These students receive education in ecology, limnology, population modeling, field techniques, scientific writing, and presentation skills.

Graduate Program

Graduate Program Coordinator
116 Fishery Sciences, Box 355020
(206) 616-5893
safs@uw.edu

The School of Aquatic and Fishery Sciences, established in 1919, offers courses and conducts research on the conservation, management, and effective use of natural resources. Education and research in the school include studies of aquatic ecology; ichthyology; population dynamics; management of free-ranging stocks; restoration ecology; and effects of human activities on freshwater and marine ecosystems. SAFS is recognized internationally for its graduate programs, especially in the area of quantitative fisheries management, all research programs are well respected.

Students may apply for admission into programs leading to the master of science or doctor of philosophy. Students who apply for the PhD program must hold a master's degree prior to beginning their doctoral studies. All students who receive a master's degree from the school and wish to pursue a PhD are reviewed by the Recruitment, Admissions, and Scholarship Committee before being accepted into the PhD program.

Master of Science

Admission Requirements

1. A bachelor's degree from an institution of recognized standing with a minimum 3.00 GPA in the last two years (90 quarter credits or 60 semester credits) of college work
2. Typically at least a 500 on both the verbal and quantitative portions of the GRE and a 5 on the analytic portion (a 500 if taken before October 2002)
3. If an international student, a minimum TOEFL score of 580 on written examination or 237 on computerized examination, or 70 on Internet-based examination

Degree Requirements

45 credits as follows:

1. *School of Aquatic and Fishery Sciences Core Courses:*
 - a. Q SCI 482
 - b. At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514, FISH 578, or QERM 597
 - c. FISH 521
 - d. FISH 522

e. 18 credits of thesis research: FISH 700

2. *Additional Course Requirements:* At least 12 credits of coursework at the 400 or 500 level, in addition to the SAFS core courses listed above. 4 of the 12 credits must be in 500-level courses. At least 9 of the additional 12 credits must be numerically graded.

Doctor of Philosophy

Admission Requirements

1. Minimum 3.00 GPA for last two years (90 quarter credits or 60 semester credits) of graded college work
2. GRE scores of 500 on the verbal and quantitative sections and 5 on the analytical section (500 if before October 2002)
3. If an international student, a minimum TOEFL score of 580 on written examination or 237 on computerized examination, or 70 on Internet-based examination

Admission to the PhD Program after Receiving an MS Degree from the School of Aquatic and Fishery Sciences

Students who wish to continue study toward the doctoral degree after receiving a master's from the School must apply to the Graduate Program Coordinator by way of the Student Services Office; the application is considered by the Recruitment, Admissions, and Scholarship Committee and a recommendation is then sent to the director for concurrence or denial. Applications must be submitted by the sixth week of the quarter in which the master's degree is conferred. For more information, refer to the SAFS website.

Bypassing the Master's Degree

Students admitted to the school at the pre-master's level may, under exceptional circumstances, proceed directly to post-master's study. Application should be made to the Graduate Program Coordinator via the Student Services Office for consideration by the Recruitment, Admissions and Scholarship Committee. More information is available on the SAFS website.

Students who bypass the master's degree must complete all PhD requirements within ten years of beginning graduate study, including MS coursework if used to fulfill any PhD requirements.

Degree Requirements

Minimum 90 credits, as follows:

1. *SAFS Core Courses:* Same as those required of MS students. Must be taken as part of the doctoral program if they or their equivalents have not been taken during an MS program.
 - a. Q SCI 482
 - b. At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514, FISH 578, or QERM 597
 - c. FISH 521
 - d. FISH 522

e. 27 credits of doctoral dissertation: FISH 800 (a maximum of 10 dissertation credits may be taken in any one academic quarter)

2. *Additional Course Requirements:* At least 48 credits of coursework at the 400 level or above, including dissertation credits, are required in addition to the required core courses listed above. Of those, at least 9 credits must be numerically graded.

Financial Aid

General information on graduate student support is available from the Office of Student Financial Aid, 105 Schmitz. The majority of first-year graduate students are offered research assistantships by appropriate faculty members, depending on the availability of research funding. The School of Aquatic and Fishery Sciences also has a limited number of fellowship opportunities for outstanding entering students. Other students may have their studies supported by the agency for which they work or they may be international students with scholarships from their home countries.

Graduate applicants are urged to discuss their financial needs with professors in their potential major fields during the early stages of the graduate application process. The graduate applicant is automatically considered for any fellowships, research assistantships, or teaching assistantships available from the School of Aquatic and Fishery Sciences when the admission application is submitted.

COLLEGE OF THE ENVIRONMENT SCHOOL OF AQUATIC AND FISHERY SCIENCES FISHERIES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

FISH 101 Water and Society (5) I&S/NW

Examines ecological and social issues associated with water resources as human populations increase and climate warms. Offered: W.

[View course details in MyPlan: FISH 101](#)

FISH 230 Economics of Fisheries and Oceans (5) I&S/NW, QSR C. ANDERSON

Examines how and why people and businesses make choices that lead to over-fishing, hypoxic zones, and oil spills in aquatic environments. Applies economic principles to understand how alternative policies might change these decisions, and how distributional effects influence politically feasible solutions. Offered: jointly with ECON 230; Sp.

[View course details in MyPlan: FISH 230](#)

FISH 250 Marine Biology (3/5) I&S/NW

Lecture-laboratory course in marine biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Weekend field trip. Honors section research project. Offered: jointly with BIOL 250/OCEAN 250; AS.

[View course details in MyPlan: FISH 250](#)

FISH 260 Recreational Fisheries: Science, Management, and Policy (3/5) I&S/NW *Grue*

Provides an overview of Washington's recreational fisheries emphasizing science, management, and policy. Optional laboratory focuses on science and technology behind fishing tactics, tackle, and equipment, ways to minimize impacts and enhance conservation, and politics associated with opportunities for recreational anglers. Suitable for students with or without a strong science background. Offered: Sp.

[View course details in MyPlan: FISH 260](#)

FISH 261 Recreational Fisheries Seminar (1) C. GRUE

Overview of issues and perspectives associated with management of Washington's recreational fisheries:

opportunity; science and technology behind tactics, tackle and equipment; ways to minimize environmental impacts and enhance conservation of target and non-target species; etiquette; and challenges of enforcing regulations. Suitable for undergraduate students with or without a science background. Offered: S. ¹⁷⁰²

[View course details in MyPlan: FISH 261](#)

FISH 270 Aquatic Ecophysiology (5) NW

Focuses on fundamental physiology, with an emphasis on processes relevant to living in a variety of aquatic environments. Includes a broad survey of taxa, from prokaryotes to mammals, and a variety of aquatic habitats. Prerequisite: BIOL 200. Offered: jointly with MARBIO 270/OCEAN 270.

[View course details in MyPlan: FISH 270](#)

FISH 290 Scientific Writing and Communication (3)

Designed to teach undergraduate students how to gather information on scientific questions; critically read scientific writing; learn the structure and functions of scientific papers to effectively communicate; learn techniques for effective communication of science in oral and poster presentations; and understand the ethical boundaries associated with scientific communication. Offered: AW.

[View course details in MyPlan: FISH 290](#)

FISH 296 Study Abroad: Aquatic and Fishery Sciences (1-15, max. 30) NW

For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit not does not apply to major requirements without approval.

[View course details in MyPlan: FISH 296](#)

FISH 300 Exploring Opportunities in Marine Science (1)

Explores academic, research, and career opportunities in the field of marine science and helps prepare students for graduation. Intended for junior and transfer students studying marine science. Credit/no-credit only. Offered: jointly with MARBIO 300/OCEAN 300; W.

[View course details in MyPlan: FISH 300](#)

FISH 310 Biology of Shellfishes (5) NW

Aquatic invertebrates with emphasis on taxa with economic and cultural significance. Dramatic diversity, adaptation to environment, and evolutionary forces highlighted. Laboratories, field trips. Offered: Sp.

[View course details in MyPlan: FISH 310](#)

FISH 311 Biology of Fishes (3/5) NW

Covers morphological, physiological, behavioral, and ecological diversity of fishes of the world; designed to provide a basic foundation for advanced courses in all areas of aquatic sciences. 3-credit option does not include laboratory. Offered: jointly with BIOL 311; W.

[View course details in MyPlan: FISH 311](#)

FISH 312 Fisheries Ecology (3/5) NW

Ecological characteristics of fishes and shellfishes in the important freshwater and marine habitats of North America. Relationship between physical aspects of the habitats and community structure. Impacts of human activities on diversity and abundance. Prerequisite: BIOL 220 or FISH 270. Offered: Sp.

[View course details in MyPlan: FISH 312](#)

FISH 323 Conservation and Management of Aquatic Resources (5) NW

Topics include population dynamics, extinction risk, meta-populations, marine reserves, bioeconomics, protection of endangered species, sustainable harvesting, and management institutions. Examines case studies such as salmon, albatross, and whales as representative of conservation issues in aquatic sciences. Sampling, experimental design, computer skills, and research writing. Offered: A.

[View course details in MyPlan: FISH 323](#)

FISH 324 Aquatic Animal Physiology and Reproduction (3/5) NW

Adaptations of aquatic animals to environmental challenges. Energy pathways from feeding and digestion

through maintenance (metabolism, movement, repair), homeostasis (respiration, osmoregulation, thermoregulation), growth and reproduction (sex determination, manipulation, sex change). Roles of sensory, nervous, and endocrine systems in mediating environmental information. Hands-on laboratory. Prerequisite: BIOL 220 or FISH 270. Offered: W.

[View course details in MyPlan: FISH 324](#)

FISH 328 Forestry-Fisheries Interactions (4) NW

Offered: jointly with ESRM 328.

[View course details in MyPlan: FISH 328](#)

FISH 330 Climate Change Impacts on Marine Ecosystems (5) NW

Links physics of climate to marine ecosystem processes, exploring both observed climate impacts from the past and projected ecosystem changes due to human-caused climate change in the future. Case studies include polar, sub-arctic, temperate, tropical, and upwelling ecosystems, and ocean-acidification and its projected impacts. Recommended: Requires high school or college physics and algebra with a basic understanding of Newton's Laws and the ability to comprehend and construct vector diagrams. Offered: jointly with ENVIR 330; Sp.

[View course details in MyPlan: FISH 330](#)

FISH 340 Genetics and Molecular Ecology (5) NW

Application of molecular markers to ecology, evolution, and the management of living resources. Emphasis on understanding the strengths and weaknesses of the approach based on case studies. Prerequisite: BIOL 200.

Offered: jointly with BIOL 340; A.

[View course details in MyPlan: FISH 340](#)

FISH 370 Marine Evolutionary Biology (5) NW

Emphasizes geobiological patterns of marine evolutionary biology environment; processes of evolution; marine prokaryote and eukaryote diversity; and applications of evolutionary principles to ocean change, and conservation and management of marine biodiversity. Prerequisite: either FISH 270/OCEAN 270/MARBIO 270 or BIOL 220. Offered: jointly with MARBIO 370/OCEAN 370; Sp.

[View course details in MyPlan: FISH 370](#)

FISH 404 Diseases of Aquatic Animals (5) NW

Overview of communicable and noncommunicable diseases that affect fish and shellfish. Major pathogens of free-ranging as well as captive animals discussed. Students learn to recognize, prevent, and control economically and ecologically important disease syndromes. Offered: Sp, even years.

[View course details in MyPlan: FISH 404](#)

FISH 423 Aquatic Invasion Ecology (4) QSR

Explores the patterns, drivers, and consequences of species invasions in freshwater, estuary, and marine ecosystems. Focuses on the science and management needs for preventing, controlling, and eradicating invasive species. Topics illustrated with cases from the Pacific Northwest and the world. Prerequisite: either BIOL 462 or BIOL 180.

[View course details in MyPlan: FISH 423](#)

FISH 424 Biology and Culture of Aquatic Organisms (5) NW

Explores the concept of sustainability and the interrelationship between environment, aquatic species, and culture of aquatic animal and plant species globally. Current practices, animal biology and health, near-shore ecosystem conservation, water quality, and strategies to improve the sustainability of aquaculture for food production and species conservation. Offered: Sp, odd years.

[View course details in MyPlan: FISH 424](#)

FISH 428 Stream and Watershed Restoration (5) NW

Overview of restoration principles and techniques with specific application to freshwater aquatic systems. Develops knowledge and skills to assess ecosystems conditions, identify and prioritize restoration opportunities, and evaluate them from a scientific and economic perspective. Prerequisite: either BIOL 356, ESRM 304, or

FISH 312. Offered: Sp, even years.

[View course details in MyPlan: FISH 428](#)

FISH 437 Fisheries Oceanography (4)

Investigates how the environment influences distributions and abundances of marine vertebrate and invertebrate species. Uses studies to understand fish and zooplankton life histories, predict trends in populations, reduce uncertainty in resource management, and to decouple anthropogenic from natural effects on aquatic populations.

Offered: W.

[View course details in MyPlan: FISH 437](#)

FISH 441 Integrative Environmental Physiology (3/5) NW

Comparative advanced aquatic physiology focusing on the functional response of organisms to natural and human-associated environmental stress. Offered: A.

[View course details in MyPlan: FISH 441](#)

FISH 444 Conservation Genetics (5) NW

Advanced genetic concepts and methods related to species' conservation and management. Includes genetic diversity and evolution, small populations and fragmentation, genetic viability, management of wild and captive populations, reintroductions, hatchery-wild interactions and forensics. Labs include molecular techniques.

Offered: W.

[View course details in MyPlan: FISH 444](#)

FISH 447 Watershed Ecology and Management (3) NW *G. HOLTGRIEVE*

Investigation of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and function of flowing aquatic ecosystems and their catchments. Topics include river/stream hydrology, geomorphology, nutrient spiraling, food webs, and global change. Case studies explore human interactions with rivers and approaches to river management. Prerequisite: BIOL 180 or ESRM 201 or FISH 101. Offered: jointly with ESRM 447; Sp.

[View course details in MyPlan: FISH 447](#)

FISH 448 Watershed Ecology and Management Lab (2)

Hands-on examination of river and stream ecosystems with emphasis on physical and biological processes, field methods, analysis of data, and writing scientific papers, includes field trips. Prerequisite: ESRM 447 or FISH 447 which may be taken concurrently. Offered: jointly with ESRM 448; Sp.

[View course details in MyPlan: FISH 448](#)

FISH 450 Salmonid Behavior and Life History (3/5) NW

Behavior, ecology, life history, and conservation of salmon and trout, including their distribution, homing migration, reproduction, ecology of juveniles in different freshwater habitats, seaward migration, and the ecological and evolutionary factors affecting them. Offered: A.

[View course details in MyPlan: FISH 450](#)

FISH 452 Marine Geospatial Information Science (3) NW

Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with OCEAN 452; A.

[View course details in MyPlan: FISH 452](#)

FISH 454 Ecological Modeling (5) NW *T. ESSINGTON*

Examines concepts in ecological modeling focusing on the rationale, interpretation, and motivation for modeling in ecological sciences. Explores individual, population, and ecosystem-based models. Excel-based computer exercises, model building and interpretation, readings. Offered: jointly with Q SCI 454; W.

[View course details in MyPlan: FISH 454](#)

FISH 455 Fish and Wildlife Toxicology (3/5) NW

Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with ESRM 457; W.

[View course details in MyPlan: FISH 455](#)

FISH 458 Modeling and Estimation in Conservation and Resource Management (4) NW T. BRANCH

Explores the use of models in the evaluation of alternative management policies for natural resources, including modeling approaches, fitting models to data, and evaluating alternative management policies. Emphasizes calculating risk of extinction, and design of biological reserves. Offered: jointly with Q SCI 458; Sp.

[View course details in MyPlan: FISH 458](#)

FISH 461 Resource Economics for Management and Policy (4) I&S, DIV

Examines how and why resource users make decisions leading to over fishing and pollution. Introduces market and non-market economic tools that support the natural resource management process. Evaluates incentives presented by alternative policies, with an emphasis on regional and global fishery management case studies. Prerequisite: either FISH 230/ECON 230, ENVIR 235/ESRM 235/ECON 235, or a 300-level FISH course. Offered: A.

[View course details in MyPlan: FISH 461](#)

FISH 464 Arctic Marine Vertebrate Ecology (4) NW

Explores the structure and function of Arctic ecosystems, life history, and adaptations of vertebrates, and how species are affected by climate warming. Emphasizes upper-level trophic interactions, evolutionary drivers, food chains, energy transport paths, and influence of sea ice. Case studies provide background on Arctic conservation and management. Prerequisite: BIOL 180. Offered: W, odd years.

[View course details in MyPlan: FISH 464](#)

FISH 473 Limnology (3) NW

Ecology, conservation, and management of inland aquatic ecosystems. Explores interactions among biological, chemical, and physical features of lakes and other aquatic habitats. Prerequisite: BIOL 180. Offered: jointly with BIOL 473; A.

[View course details in MyPlan: FISH 473](#)

FISH 474 Limnology Laboratory (2) NW

Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/FISH 473/CEE 462, which may be taken concurrently. Offered: jointly with BIOL 474/CEE 463; A.

[View course details in MyPlan: FISH 474](#)

FISH 475 Marine Mammalogy (3/5) NW

Evolution, taxonomy, physiology, life history, and behavior of marine mammals; the techniques of studying and the management and conservation of them. Offered: Sp.

[View course details in MyPlan: FISH 475](#)

FISH 477 Seminar in Marine Biology (3) NW

Reviews current research in marine biology. Emphasizes critical readings and discussion of primary literature. Prerequisite: FISH 250, OCEAN 250, or BIOL 250; Q SCI 381, STAT 220, or STAT 311. Offered: jointly with BIOL 477/OCEAN 477; W.

[View course details in MyPlan: FISH 477](#)

FISH 478 Topics in Sustainable Fisheries (3, max. 9) I&S/NW

Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Conservation/restoration in practice. Pre-seminar discussion section focusing on select readings. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species,

citizen action, co-management, and marine ethics. Offered: jointly with BIOL 478/ENVIR 478.

[View course details in MyPlan: FISH 478](#)

FISH 479 Research in Marine Biology (1-15, max. 15)

Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/OCEAN 479; AWSpS.

[View course details in MyPlan: FISH 479](#)

FISH 480 Human Dimensions of Fishery Management (3) I&S/NW

Techniques and philosophy for conservation, management, and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with SMEA 480.

[View course details in MyPlan: FISH 480](#)

FISH 489 Peer Teaching Assistants in Aquatic and Fishery Sciences (1-5, max. 10)

Designed to prepare graduate and public school teaching by developing mentoring and communication skills through direct experience. Skills gained through attending lectures and weekly preparation sessions, directed discussions with faculty and TAs, and teaching course lab or discussion sections. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: FISH 489](#)

FISH 491 Aquatic Ecological Research in Alaska (12) NW

Intensive, full-time research training experience where a team of students works on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Examines behavioral ecology, limnology, and population dynamics. Students also choose specific research questions for their own exploration. Course location: Alaska. Offered: S, even years.

[View course details in MyPlan: FISH 491](#)

FISH 492 Ecology and Conservation of Marine Birds and Mammals (9/15) NW

An intensive, field-based course that offers motivated students the opportunity to learn about these ecologically and culturally important marine animals and the conservation problems they face. Emphasizes first-hand learning and individual research projects. Offered: jointly with FHL 492/MARBIO 492; S.

[View course details in MyPlan: FISH 492](#)

FISH 493 Capstone Preparation (1)

Includes defining a capstone research question, conducting a literature review, preparing a project proposal and budget, reviewing peer proposals, and attending/critiquing the quarterly capstone symposium. Prerequisite: FISH 290. Offered: ASp.

[View course details in MyPlan: FISH 493](#)

FISH 494 Capstone Project I ([1-9]-, max. 9)

Self-directed research or project under direction of a faculty member. Includes defining research question, determining methodology, data collection and analysis, writing a paper, and presenting findings. Required for graduation for majors. May be taken concurrently with FISH 495. Prerequisite: either FISH 290 or FISH 493; Q SCI 381.

[View course details in MyPlan: FISH 494](#)

FISH 495 Capstone Project II (-[3/4])

Self-directed research project under direction of a faculty member. Typically includes defining a research question, determining methodology, data collection and analysis, writing a paper, and presenting findings. May be taken concurrently with FISH 494 with permission of instructor.

[View course details in MyPlan: FISH 495](#)

FISH 496 Study Abroad: Aquatic and Fishery Sciences (1-15, max. 30) NW

For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit not does not apply to major requirements without approval.

[View course details in MyPlan: FISH 496](#)

FISH 497 Special Topics in Aquatic and Fishery Sciences (1-15, max. 15) NW

One-time offerings of topics in fisheries by resident or visiting faculty.

[View course details in MyPlan: FISH 497](#)

FISH 498 Internship/Experiential Learning (1-15, max. 15)

Structured, practical training in the fishing industry, government agencies, and other areas utilizing fisheries, food science, or quantitative science expertise. Experiences are supervised and evaluated. Written reports required. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: FISH 498](#)

FISH 499 Undergraduate Research (1-15, max. 15)

Individual research within the School of Aquatic and Fishery Sciences. Each project supervised by an individual faculty member. Written reports required. Offered: AWSpS.

[View course details in MyPlan: FISH 499](#)

FISH 502 Marine Geospatial Information Science (3)

Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with OCEAN 502; A.

[View course details in MyPlan: FISH 502](#)

FISH 503 Geospatial Pattern Analysis and Geostatistics (3) *Logsdon*

Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Offered: jointly with OCEAN 503; W.

[View course details in MyPlan: FISH 503](#)

FISH 507 Special Topics in Fisheries (1-15, max. 15)

[View course details in MyPlan: FISH 507](#)

FISH 510 Current Topics in Genetics and Physiology (1-5, max. 15)

Contemporary problems and issues in genetics and physiology as they relate to aquatic and fisheries sciences.

[View course details in MyPlan: FISH 510](#)

FISH 511 Current Topics in Evolution, Ecology, and Behavior (1-5, max. 15)

Contemporary problems and issues in evolution, ecology, and behavior as they relate to aquatic and fisheries sciences.

[View course details in MyPlan: FISH 511](#)

FISH 512 Current Topics in Quantitative Science (1-5, max. 15)

Contemporary problems and issues in quantitative science as they relate to aquatic and fisheries sciences.

[View course details in MyPlan: FISH 512](#)

FISH 513 Current Topics in Management, Conservation, and Restoration (1-5, max. 15)

Contemporary problems and issues in management, conservation, and restoration as they relate to aquatic and fisheries sciences.

[View course details in MyPlan: FISH 513](#)

FISH 514 Current Topics Aquaculture, Utilization, and Pathology (1-5, max. 15)

Contemporary problems and issues in aquaculture, utilization, and pathology as they relate to aquatic and fisheries sciences.

[View course details in MyPlan: FISH 514](#)

FISH 520 Advanced Ecology of Marine Fishes (4)

Focuses on the unique ecological challenges facing marine fishes, including individual, population, community, and ecosystem-scale processes. In-depth discussions of issues based on extensive reading of primary literature and analysis.

[View course details in MyPlan: FISH 520](#)

FISH 521 Research Proposal Writing for Graduate Students (4)

Practice in reading, writing, critiquing, and evaluating research grant and contract proposals. Lecture and discussion of funding resources, structure of proposals, proposal review, evaluation criteria, and agency feedback. Examples of successful and unsuccessful grant applications. Preparing proposals and critiquing others' efforts. Offered: W.

[View course details in MyPlan: FISH 521](#)

FISH 522 Hot Topics in Aquatic and Fishery Sciences (2)

Discussion of the primary literature of aquatic and fishery sciences. All readings are current, high profile papers which spark a new avenue of investigation, set out a new paradigm, or define a central problem, etc. Credit/no-credit only. Offered: A.

[View course details in MyPlan: FISH 522](#)

FISH 526 Ecology of Aquatic Ecosystems (3)

Explores natural and human-driven processes regulating the structure and functioning of freshwater and marine ecosystems. Topics include biogeochemistry, energy, and material flows among habitats, evolution in ecological time, commonality of marine and freshwater habitats, and the issues of scale in understanding ecosystem dynamics.

[View course details in MyPlan: FISH 526](#)

FISH 530 Application of Bioenergetics Models to Aquatic Food Webs (4)

Modeling framework quantifying bioenergetics, including consumption, growth, nutrient recycling and contaminant bioaccumulation; links physiology and behavior of individual organisms to ecological processes within populations and aquatic food webs. Common applications include estimating predation, carrying capacity, or growth potential in different habitats. Offered: Sp, odd years.

[View course details in MyPlan: FISH 530](#)

FISH 531 Aquatic Food Web Processes (4)

Examines how temporal-spatial variability in environmental conditions, nutrient, food supply, predation, and competition among species and life stages regulate species in freshwater and marine food webs. Demonstrates how behavior and physiology of individuals are mechanistically linked to distribution, trophic interactions, and processes relevant to ecosystem-based management. Offered: Sp, even years.

[View course details in MyPlan: FISH 531](#)

FISH 538 Fisheries Acoustics (3-5) Horne

Studies the use of sound as an aquatic sampling tool and application of acoustic technologies to resource management and aquatic research. Topics include: sonar equation, survey design, equipment use, and abundance estimates. Uses case studies in bio-acoustic predation, habit evaluation, ocean observatories, and marine renewable energy. Offered: A.

[View course details in MyPlan: FISH 538](#)

FISH 539 U.S. Fisheries Management and Policy (3)

Examination of basic laws and policies in the US that govern fisheries management and their implementation by managers at federal, tribal, state, and international levels. Includes lectures, guest speakers, and field trips.

Offered: jointly with SMEA 539.

[View course details in MyPlan: FISH 539](#)

FISH 541 Integrative Environmental Physiology (3/5)

Comparative advanced aquatic physiology focusing on the functional response of organisms to natural and human-associated environmental stress. Includes lecture, laboratory work, and team-based research project.

[View course details in MyPlan: FISH 541](#)

FISH 545 Applied Population Genetics (3)

Collection, analysis, and interpretation of genetic data (allele frequencies, microsatellite data, DNA sequences) for detection of population structure, population assignment, estimation of population size, and phylogenography. Includes discussion of scientific papers and analysis of example data sets.

[View course details in MyPlan: FISH 545](#)

FISH 546 Bioinformatics for Environmental Sciences (3)

Examines how to incorporate molecular information into environmental and conservation sciences, with an emphasis on analysis of DNA and RNA sequence information. Prerequisite: introductory biology, genetics, and statistics courses.

[View course details in MyPlan: FISH 546](#)

FISH 547 River Ecology and Watershed Management (3)

Investigation of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and dynamics of flowing aquatic ecosystems and the riparian zone. Case studies explore human interactions with rivers and approaches to river management.

[View course details in MyPlan: FISH 547](#)

FISH 552 Introduction to R Programming for Natural Scientists (2)

Introduces R, a freely available and widely used platform for statistical analysis. Covers reading, storing, and manipulating data; introductory graphics; basic statistical analyses; and fitting linear models. Credit/no-credit only. Offered: A.

[View course details in MyPlan: FISH 552](#)

FISH 553 Advanced R Programming for Natural Scientists (2)

Covers the use of maximum likelihood estimation and programming in R. Uses R functions to estimate parameters of models and to quantify uncertainty. Prerequisite: FISH 552; Q SCI 381 or Q SCI 482, or permission of instructor. Credit/no-credit only. Offered: A.

[View course details in MyPlan: FISH 553](#)

FISH 554 Beautiful Graphics in R (2) *Branch*

Explores how to create beautiful scientific graphics in the open-source language R. Covers the theory of visualization, critically examines elements of good and bad graphics, and teaches students how to translate data in their graduate theses into publication-quality graphics. Offered: W.

[View course details in MyPlan: FISH 554](#)

FISH 557 Estimation of Population Parameters (4)

Statistical analysis of population data; design and analysis of mark-recapture experiments on natural populations; laboratory work on computers. Offered: W, even years.

[View course details in MyPlan: FISH 557](#)

FISH 558 Decision Analysis in Natural Resource Management (4)

Focuses on age and size-structured population models; Bayesian methods; Sample Importance Resample algorithm; Markov chain Monte Carlo algorithm; policy evaluation; and risk analysis and uncertainty in fisheries management. Offered: A, odd years.

[View course details in MyPlan: FISH 558](#)

FISH 559 Numerical Computing for the Natural Resources (5)

Focuses on generalized linear and mixed effects models; numerical integration and differentiation; Bayesian and maximum likelihood parameter estimation; root finding; ADMB and WinBUGS coding; and risk analysis.

Offered: A, even years.

[View course details in MyPlan: FISH 559](#)

FISH 560 Applied Multivariate Statistics for Ecologists (4)

Use and interpretation of multivariate analysis, including the majority of approaches in common use by ecologists. Emphasizes the conceptual understanding and practical use of the methods, illustrated with ecological case studies. Prerequisite: Q SCI 482 or equivalent.

[View course details in MyPlan: FISH 560](#)

FISH 561 Resource Economics for Management and Policy (4)

Examines how and why resource users make decisions leading to over fishing and pollution. Introduces market and non-market economic tools that support the natural resource management process. Evaluates incentives presented by alternative policies, with an emphasis on regional and global fishery management case studies.

Offered: A.

[View course details in MyPlan: FISH 561](#)

FISH 562 Ecosystem Based Fisheries Management (2)

Theory and practice of ecosystem based fisheries management. Areas of emphasis includes by-catch avoidance, the interaction between physical and biotic habitat and fish productivity, trophic ecosystem models, area based management and dynamics of fishing fleets. Offered: Sp, odd years.

[View course details in MyPlan: FISH 562](#)

FISH 563 Ecosystem Based Fisheries Management Laboratory (2)

Laboratory covering the theory and practice of ecosystem based fisheries management. Areas of emphasis includes by-catch avoidance, the interaction between physical and biotic habitat and fish productivity, trophic ecosystem models, area based management and dynamics of fishing fleets. Recommended: either Fish 454, Fish 458, or Fish 558; R programming experience. Offered: Sp, odd years.

[View course details in MyPlan: FISH 563](#)

FISH 567 Topics in Advanced Ecology (3, max. 6)

Discusses literature on active research areas or controversies in different branches of ecology. Offered: jointly with BIOL 567/SEFS 567; W.

[View course details in MyPlan: FISH 567](#)

FISH 578 Graduate Topics in Sustainable Fisheries (2, max. 6)

Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Case studies. Conservation/restoration in practice. Post-seminar discussion section led by speaker on topics covered in lecture. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Credit/no-credit only.

[View course details in MyPlan: FISH 578](#)

FISH 581 Case Study Research: Design and Methods (3)

Provides in-depth training in case study theory, design, and methods. Designed for exploring prospectus ideas or beginning analysis of thesis research. Through readings, discussions, exercises, and lectures, students learn how to select units of analysis, control data quality, and collect, analysis, and report data. Offered: jointly with SMEA 581.

[View course details in MyPlan: FISH 581](#)

FISH 600 Independent Study or Research (*-)

Credit/no-credit only.

[View course details in MyPlan: FISH 600](#)

FISH 700 Master's Thesis (*-)

Credit/no-credit only.

[View course details in MyPlan: FISH 700](#)

FISH 800 Doctoral Dissertation (*-)

Credit/no-credit only.

Atmospheric Sciences

[Display as tabs](#)

Department Overview

416 Atmospheric Sciences-Geophysics Building

Atmospheric sciences is a wide-ranging discipline that includes topics as diverse as weather forecasting, global warming, air quality, Pacific Northwest weather and climate, mountain weather, marine weather, El Nino, the ozone hole, ice ages, and the weather of Mars. It considers problems that are both scientifically challenging and critical for the welfare of modern society. These problems are addressed with theory, measurements, and computer simulations.

Undergraduate Program

Adviser

416 Atmospheric Sciences-Geophysics Building, Box 351640
(206) 543-4576

advise@atmos.washington.edu

The Department of Atmospheric Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in atmospheric sciences
- A minor in atmospheric sciences
- The minor in Climate Science is offered jointly with the Department of [Atmospheric Sciences](#), the Department of [Earth and Space Sciences](#), and the School of [Oceanography](#).

Bachelor of Science

Suggested First- and Second-Year Courses: ATM S 220; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CSE 142. The first upper-division core course is ATM S 301, which is offered autumn quarter only. Any lower-division atmospheric sciences courses except ATM S 220 count as electives and not as part of the major.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Minimum 97-117 credits as follows:

1. *Core requirements* (58-59 credits): MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; either STAT 390/MATH 390, or Q SCI 381; ATM S 220, ATM S 301, ATM S 321, ATM S 340, ATM S 341, ATM S 370, ATM S 431.
2. *Options* (39 to 58 credits):
 - a. *Meteorology* (42-45 credits)
 - i. *Core* (33 credits): AMATH 301; ATM S 358, ATM S 441, ATM S 442, ATM S 444, ATM S 451, ATM S 452; CSE 142
 - ii. *Advanced Mathematics* (9-12 credits): MATH 324; either AMATH 351 and AMATH 353 or MATH 307, MATH 308, and MATH 309
 - b. *Climate* (39-49 credits)
 - i. *Core* (27-29 credits): AMATH 301; ATM S 358, ATM S 380, ATM S 460, ATM S 487; CSE 142; either ESS 431 or ESS 433; either OCEAN 423 or OCEAN 450
 - ii. *Electives* (12-20 credits): minimum four courses from an approved list. See adviser for approved list of electives.
 - c. *Chemistry* (52-58 credits)
 - i. *Core* (40 credits): ATM S 451, ATM S 458, ATM S 480; CHEM 142, CHEM 152, CHEM 162, CHEM 223, CHEM 224, CHEM 321
 - ii. *Electives* (12-18 credits): minimum four courses from an approved list. See adviser for approved list of electives.
3. Minimum 2.0 grade in courses applied to the major

Pre-graduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

Minor

Minor Requirements: 25 credits to include ATM S 301 plus other approved courses. The minor may include a maximum of 6 independent study credits. Prerequisites include MATH 126 or MATH 136, and PHYS 123. Some courses may require further math or chemistry experience.

Minor in Climate Science: See description in the [Climate Science](#) listing in the Undergraduate Interdisciplinary Programs section of the General Catalog.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The degree program qualifies students for professional employment in weather forecasting, air-quality control and monitoring, and other areas of atmospheric sciences and related fields. The baccalaureate degree also is appropriate preparation for graduate study in atmospheric sciences.
- *Instructional and Research Facilities:* Extensive computer resources are available in the departmental computer laboratory. The department also maintains an extensive collection of weather data in graphical and numerical electronic format. A study area

is provided for undergraduates. An instrument laboratory is maintained with a wide range of observing and data collection systems. Students also have access to a machine shop and an electronics laboratory.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are available either within the department or with outside organizations, providing a valuable opportunity to test a student's interests in various meteorological career paths and to extend the student's knowledge. A limited number of departmental scholarships are available each year, based on academic excellence or financial need. Employment opportunities are often available in one of the many departmental research groups, and some internships are paid.

Students majoring in atmospheric sciences may take advantage of a variety of opportunities to enhance their education. Undergraduate students are welcome at the department's many seminars and colloquia and are encouraged to join in the annual forecast contest. They may work on independent research projects under the guidance of a faculty member, or be an active participant in a field program.

- *Department Scholarships:* The Bruce Caldwell Memorial Scholarship and the Anonymous Donor Atmospheric Sciences Scholarship are both awarded annually, based on both academic excellence and financial need.
- *Student Organizations/Associations:* Student Chapter of American Meteorological Society, Puget Sound American Meteorological Society Chapter, Weekly Weather Discussion for all majors.

Graduate Program

Graduate Program Coordinator
416 Atmospheric Sciences-Geophysics, Box 351640
(206) 543-4576
advise@atmos.washington.edu

Rapid growth of research in atmospheric sciences began in the late 1940s in response to needs and opportunities in weather forecasting. Extensive research is now underway to extend the time scale over which useful forecasts can be made and to increase the amount of regional and temporal detail in short-range forecasts. In addition, the atmospheric sciences now address a broad range of other problems of fundamental interest and importance. Examples include changes in climate that could result from increases in atmospheric CO₂ and other greenhouse gases, and the application of remote-sensing techniques to the monitoring and understanding of weather and climate.

Graduate students in the atmospheric sciences come from a variety of disciplines: physics, chemistry, engineering, atmospheric, or geophysical sciences, and applied mathematics. Opportunities are broad enough that each of these backgrounds is valuable for specific subfields within the atmospheric sciences. However, students of atmospheric sciences should have in common a sound background in the fundamentals of physics and applied mathematics and an interest in complex natural phenomena. Research projects and

graduate courses in the Department of Atmospheric Sciences are closely related, and the well-prepared graduate student may expect to begin research work rather quickly.

Master of Science

Admission Requirements

1. Complete Graduate School application (a copy must be sent to the department)
2. Official copy of transcripts
3. Statement of interest(s) – one page essay, must address reasons why the student wishes to pursue a graduate program in atmospheric sciences
4. GRE General Examination scores sent from the Educational Testing Service
5. Three letters of recommendation, either submitted online or, using the appropriate forms, sent directly to the department by the evaluators
6. For international applicants: TOEFL scores, sent by the testing service
7. Deadline: December 31, for admission the following autumn. Autumn is the only quarter for which the department accepts applications.

Degree Requirements

36 credits, to include

1. *Core classes (25-28 credits):* ATM S 501, ATM S 502, ATM S 532, ATM S 535, ATM S 558. One of the following sequences: ATM S 505, ATM S 509, ATM S 542; or ATM S 503, ATM S 504
2. The two-course dynamics sequence (ATM S 503, ATM S 504) is intended for those whose research specialty is outside the realm of dynamic meteorology. Most students are encouraged to take the three-course sequence in dynamics (ATM S 505, ATM S 509, ATM S 542).
3. Master's students need 36 credits to graduate (excluding seminars and colloquia); 27 of the credits presented must be from graded courses numbered 500 or above, of which at least 3 credits must be in approved applied mathematics courses and 24 must be in core atmospheric sciences courses. The remaining 9 credits are for the master's thesis. However, students intending to pursue a PhD should take all the courses required above.

Doctor of Philosophy

Admission Requirements

1. All students admitted into the Atmospheric Sciences graduate program are admitted initially to the MS track of study. Students in the MS track who seek entry into the PhD program are evaluated by the departmental committee on graduate studies.
2. A student who wishes to be considered by the committee must first write a letter to the academic counselor and also to the student's MS committee, requesting admission into the PhD program, and choosing one of the three following evaluation options:
 - a. MS thesis in atmospheric sciences or a closely related discipline, completed before entering the department, submitted the first week of autumn quarter of the student's second academic year in the department.

- b. Draft of UW Department of Atmospheric Sciences MS thesis approved by the MS Supervisory Committee.
- c. Manuscript of a peer-reviewed journal article on which the student is lead author.

Degree Requirements

Minimum 90 credits, to include:

1. Coursework

- a. ATM S 501, ATM S 502
- b. ATM S 505, ATM S 509 (Students whose anticipated research has minimal connection with atmospheric dynamics, such as laboratory or fieldwork in atmospheric chemistry or cloud microphysics, may take ATM S 503 and ATM S 504 in place of ATM S 505 and ATM S 509. See Graduate Program Coordinator before enrolling in ATM S 503.)
- c. Either ATM S 532 or ATM S 558
- d. ATM S 535, ATM S 542
- e. Each of the following, every quarter coursework is taken: ATM S 520, either ATM S 521 or ATM S 524, and ATM S 600 (up to 10 credits each quarter)
- f. *Electives*: Courses in the student's areas of interest, as determined in consultation with adviser
- g. *Applied math*: Either AMATH 401, AMATH 567 or AMATH 581; either AMATH 402 or AMATH 568
- h. ATM S 700 (10 credits each quarter, beginning the second year of the program)

2. General examination

3. Dissertation

4. Final examination

Assistantships

Nearly all graduate students are supported by either research assistantships or fellowships. Students are usually a teaching assistant during at least one quarter, in the second year of study. Students are supported full-time during the summer.

COLLEGE OF THE ENVIRONMENT ATMOSPHERIC SCIENCES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ATM S 101 Weather (5) NW

The earth's atmosphere, with emphasis on weather observations and forecasting. Daily weather map discussions. Highs, lows, fronts, clouds, storms, jet streams, air pollution, and other features of the atmosphere. Physical processes involved in weather phenomena. Intended for nonmajors. Offered: AWWSpS.

[View course details in MyPlan: ATM S 101](#)

ATM S 103 Hurricanes and Thunderstorms: Their Science and Impact (3) I&S/NW

Explores the science, history, and impacts of thunderstorms and hurricanes. Includes basic processes responsible for thunderstorms and hurricanes and for the lightning, hail, high winds, and storm surges that accompany them. Presents significant historical examples, along with the impact on human activities, strategies for personal safety, and societal adaptation. Offered: Sp.

[View course details in MyPlan: ATM S 103](#)

ATM S 111 Global Warming: Understanding the Issues (5) I&S/NW *Ackerman, Anderson, Bitz, Fu, Jaegle, Thornton*

Includes a broad overview of the science of global warming. Discusses the causes, evidence, future projections, societal and environmental impacts, and potential solutions. Introduces the debate on global warming with a focus on scientific issues. Offered: AWWSp.

[View course details in MyPlan: ATM S 111](#)

ATM S 211 Climate and Climate Change (5) I&S/NW

The nature of the global climate system. Factors influencing climate including interactions among the atmosphere, oceans, solid earth, and biosphere. Stability and sensitivity of climate system. Global warming, ozone depletion, and other human influences. Intended for nonmajors. Offered: AWWSp.

[View course details in MyPlan: ATM S 211](#)

ATM S 212 Air Pollution: From Urban Smog to the Ozone Hole (5) I&S/NW *Alexander, Jaegle, Thornton*

Introduction to air pollution on local, regional, and global scales, with focus on the sources, transformation, and dispersion of pollutants responsible for urban smog, acid rain, climate change, and the ozone hole. Health and environmental effects of air pollutants, technological solutions, and international policy regulations.

[View course details in MyPlan: ATM S 212](#)

ATM S 220 Exploring the Atmospheric Sciences (1, max. 2) NW

Focuses on current research in the atmospheric sciences and the related implications for public health, business, and environmental policy. Credit/no-credit only.

[View course details in MyPlan: ATM S 220](#)

ATM S 290 The Weather Challenge (1, max. 8) NW *McMurdie*

Includes participation in a national weather forecast contest; weekly discussion on forecast models, forecasting methods, and unique considerations for specific forecast locations. Prerequisite: either ATM S 101 or ATM S 301. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: ATM S 290](#)

ATM S 301 Introduction to Atmospheric Sciences (5) NW

Composition and structure of the atmosphere. Clouds and weather phenomena. Thermodynamic processes. Solar and terrestrial radiation. Air motions. Daily weather discussions and forecasts. For majors and nonmajors.

Prerequisite: minimum grade of 2.0 in each of MATH 124; MATH 125; MATH 126; PHYS 121; PHYS 122; and PHYS 123. Offered: A.

[View course details in MyPlan: ATM S 301](#)

ATM S 321 The Science of Climate (3) NW

Evolution and present state of earth's climate. Emphasis on physical processes determining the climate of the earth's atmosphere and surface: radiative transfer, energy balance, hydrologic cycle, and atmospheric and oceanic energy transport. Factors controlling climate change. Prerequisite: minimum of grade of 2.0 each of MATH 124; MATH 125; MATH 126; PHYS 121; PHYS 122; PHYS 123. Offered: Sp.

[View course details in MyPlan: ATM S 321](#)

ATM S 340 Introduction to Thermodynamics and Cloud Processes (3) NW

Examines thermodynamics and hydrostatics. Studies cloud and precipitation processes with emphasis on the microphysics. Prerequisite: ATM S 301. Offered: W.

[View course details in MyPlan: ATM S 340](#)

ATM S 341 Atmospheric Radiative Transfer (3)

Comprehensive introduction to atmospheric radiation, including solar and infrared radiation, the earth's radiation budget, and remote sensing. Prerequisite: ATM S 301. Offered: Sp.

[View course details in MyPlan: ATM S 341](#)

ATM S 358 Fundamentals of Atmospheric Chemistry (3) NW

Review of basic principles of physical chemistry; evolution and chemical composition of earth's atmosphere; half-life, residence and renewal time; sources, transformation, transport and sinks of gases in the troposphere; atmospheric aerosols; chemical cycles; air pollution; stratospheric chemistry. Offered: Sp.

[View course details in MyPlan: ATM S 358](#)

ATM S 370 Atmospheric Structure and Analysis (5) NW

Structure and evolution of extratropical cyclones, fronts, and convective systems. Surface and upper air analysis techniques. Radar and satellite data. Real-world applications of basic dynamical principles. Introduction to operational products and forecasting. Prerequisite: ATM S 301. Offered: W.

[View course details in MyPlan: ATM S 370](#)

ATM S 380 Weather and Climate Prediction (3) NW

Applies weather and climate models to solve problems in atmospheric sciences. Includes visualization of atmospheric phenomena and Earth's energy and hydrologic cycles; and basics in numerical modeling and high-performance computing. Prerequisite: MATH 126; PHYS 122; either ATMS 101, ATM S 111, ATM S 211, ATM S 301, ASTR 150, ASTR 321, or ESS 201. Offered: W.

[View course details in MyPlan: ATM S 380](#)

ATM S 390 Honors Tutorial in Atmospheric Sciences (*, max. 6)

Review and discussion of selected problems in atmospheric sciences. Introduction to research methods.

Presentation of a research paper. Offered: AWSpS.

[View course details in MyPlan: ATM S 390](#)

ATM S 431 Boundary-Layer Meteorology (3) NW

Introduction to boundary-layer meteorology. Surface energy budgets, structure and evolution of boundary layers, and basic ideas of turbulence theory. Prerequisite: either ATM S 340 or PHYS 224. Offered: A.

[View course details in MyPlan: ATM S 431](#)

ATM S 441 Atmospheric Motions I (3) NW

Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Prerequisite: either AMATH 353 or MATH 309; MATH 324. Offered: A.

[View course details in MyPlan: ATM S 441](#)

ATM S 442 Atmospheric Motions II (5) NW

Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation. Includes laboratory exercises. Prerequisite: ATM S 441. Offered: W.

[View course details in MyPlan: ATM S 442](#)

ATM S 444 Design and Application of Ensemble Prediction Systems (4) NW

Covers the fundamental of chaos theory to help compare and contrast traditional, deterministic forecasting versus ensemble forecasting. Explores the various components of an ensemble prediction system. Introduces decision science to show how to apply probabilistic weather information in optimal decision making.

Prerequisite: ATM S 370; either STAT/MATH 390 or Q SCI 381; AMATH 301. Offered: Sp.

[View course details in MyPlan: ATM S 444](#)

ATM S 451 Instruments and Observations (5) NW

Principles of operating instruments for measuring important atmospheric parameters (e.g., temperature, humidity, aerosol concentration). Concepts of sensitivity, accuracy, representativeness, time response. Manipulation of output data including signal processing and statistical analysis. Experimental design and implementation of the design in actual field experiments is included. Prerequisite: ATM S 370; either STAT/MATH 390 or Q SCI 381.

[View course details in MyPlan: ATM S 451](#)

ATM S 452 Weather Forecasting and Advanced Synoptic Meteorology (5) NW

Basic forecasting techniques. Application of numerical modeling and statistical approaches. Structure, evolution, and forecasting of convective systems. Radar applications. Diurnal and topographically-forced circulations. Aviation meteorology. Laboratories include extensive practice in forecasting and surface map analysis.

Prerequisite: ATM S 370; ATM S 442; either STAT/MATH 390 or Q SCI 381. Offered: Sp.

[View course details in MyPlan: ATM S 452](#)

ATM S 458 Air Pollution Chemistry (4) NW

Global atmosphere as a chemical system emphasizing physical factors and chemical processes that give rise to elevated surface ozone, particulate matter, and air toxics; international issues of air pollution transport and changing tropospheric background composition; and regulatory control strategies and challenges. Aimed at science and engineering majors. Offered: jointly with CHEM 458; A.

[View course details in MyPlan: ATM S 458](#)

ATM S 460 Water in the Environment (3) NW

Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either ESS 310, MATH 126, or MATH 136; PHYS 123. Offered: jointly with ESS 424/PHYS 460.

[View course details in MyPlan: ATM S 460](#)

ATM S 475 Current Research in Climate Science Seminar (3, max. 6)

Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ESS 475/OCEAN 475; A.

[View course details in MyPlan: ATM S 475](#)

ATM S 480 Air-Quality Modeling (3) NW

Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Emphasis on models used for air pollution permits. Emphasizes current problems. Prerequisite: MATH 125. Offered: jointly with CEE 480; W.

[View course details in MyPlan: ATM S 480](#)

ATM S 487 Fundamentals of Climate Change (3)

Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Prerequisite: ATM S 321.

[View course details in MyPlan: ATM S 487](#)

ATM S 490 Current Weather Analysis (1, max. 6) NW

Reviews and analyzes current weather situations and forecasts. Promotes active discussion between the leader and attendees, and provides exposure to practical aspects of forecasting, the structure of synoptic and local weather phenomena, and applications of basic meteorological concepts. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: ATM S 490](#)

ATM S 492 Readings in Meteorology or Climatology (*, max. 15)

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ATM S 492](#)

ATM S 495 EarthGames Studio (2-6, max. 15) D. FRIERSON

Students will work in teams to create their own video games or interactive digital experience relating to climate change or other pressing environmental issues. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ATM S 495](#)

ATM S 497 Undergraduate Internship (1-5, max. 30)

Internship experience with a public agency or private company, supervised and approved by a faculty member. Requires preparation of a professional report reflecting on the experience. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ATM S 497](#)

ATM S 499 Undergraduate Independent Research (1-5, max. 30)

Individual research supervised by a faculty member. May involve laboratory work, fieldwork, or surveys. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ATM S 499](#)

ATM S 501 Fundamentals of Physics and Chemistry of the Atmosphere (5)

Fundamentals of hydrostatics, thermodynamics, radiation, cloud physics, and atmospheric chemistry. Offered: A.

[View course details in MyPlan: ATM S 501](#)

ATM S 502 Introduction to Synoptic Meteorology (3)

Overview of weather systems; atmospheric observations and data assimilation. Elementary manual and computer-aided synoptic analysis techniques. Interpretation of satellite and ground-based observations. Kinematics. Fronts and frontogenesis; life cycles of extratropical cyclones; related mesoscale phenomena.

Numerical weather prediction; interpretation of forecast products. Offered: Sp.

[View course details in MyPlan: ATM S 502](#)

ATM S 503 Atmospheric Motions I (3)

Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Offered: A.

[View course details in MyPlan: ATM S 503](#)

ATM S 504 Atmospheric Motions II (5)

Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation.

Prerequisite: either ATM S 441 or ATM S 503. Offered: W.

[View course details in MyPlan: ATM S 504](#)

ATM S 505 Introduction to Fluid Dynamics (4)

Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: either a course in partial differential equations or permission of instructor. Offered: jointly with AMATH 505/OCEAN 511; A, odd years.

[View course details in MyPlan: ATM S 505](#)

ATM S 508 Geochemical Cycles (4)

Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with CHEM 523/OCEAN 523.

[View course details in MyPlan: ATM S 508](#)

ATM S 509 Geophysical Fluid Dynamics I (4)

Dynamics of rotating stratified fluid flow in the atmosphere/ocean and laboratory analogues. Equations of state, compressibility, Boussinesq approximation. Geostrophic balance, Rossby number. Poincare, Kelvin, Rossby waves, geostrophic adjustment. Ekman layers. Continuously stratified dynamics: Inertia-gravity waves, potential vorticity, quasigeostrophy. Prerequisite: OCEAN 511 or ATM S 505/AMATH 505. Offered: jointly with OCEAN 512; W.

[View course details in MyPlan: ATM S 509](#)

ATM S 510 Physics of Ice (3)

Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Offered: jointly with ESS 531.

[View course details in MyPlan: ATM S 510](#)

ATM S 511 Snow and Ice on the Earth's Surface (3)

Snow and ice climatology. Formation of the ice crystals in clouds. Snow metamorphism. Transfer of radiative, sensible, and latent heat at snow and ice surfaces. Remote sensing of snow and ice. Growth and melt of sea ice. Climatic records from ice. Prerequisite: permission of instructor. Offered: jointly with ESS 532.

[View course details in MyPlan: ATM S 511](#)

ATM S 512 Dynamics of Snow and Ice Masses (3)

Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ESS 533.

[View course details in MyPlan: ATM S 512](#)

ATM S 514 Ice and Climate (3)

Examines the role of ice and snow in climate. Polar climate dynamics. Polar-global interactions. Modeling snow

cover, sea ice, and ice-sheet balance, and flow in the climate system. Prerequisite: permission of instructor.
Offered: jointly with ESS 535.

[View course details in MyPlan: ATM S 514](#)

ATM S 519 Scientific Writing and Graphics (2) *Waddington, Warren*

Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ESS 519/OCEAN 518; Sp, odd years.

[View course details in MyPlan: ATM S 519](#)

ATM S 520 Atmospheric Sciences Colloquium (1, max. 24)

Seminars on current research in advanced topics related to atmospheric sciences, conducted by faculty and visiting professors/scientists. Includes presentation of doctoral dissertations by department graduate students. For Atmospheric Sciences graduate students only. Prerequisite: permission of department. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: ATM S 520](#)

ATM S 521 Seminar in Atmospheric and Climate Dynamics (*, max. 24)

Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: ATM S 521](#)

ATM S 523 Seminar in Atmospheric Physics and Chemistry (*, max. 24)

Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: ATM S 523](#)

ATM S 524 Seminar in Climate Dynamics and Energy Transfer (*, max. 24)

Directed at current research in the subject. For advanced students. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

[View course details in MyPlan: ATM S 524](#)

ATM S 525 Seminar - Topics in Atmospheric Chemistry (1-3, max. 6)

Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with CEE 553.

[View course details in MyPlan: ATM S 525](#)

ATM S 532 Atmospheric Radiation: Introductory (3)

Fundamentals of radiative transfer; absorption and scattering by atmospheric gases; elementary applications to constraints on the thermal structure, photochemistry, and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: Sp.

[View course details in MyPlan: ATM S 532](#)

ATM S 533 Atmospheric Radiation: Advanced (3)

Optical properties and particle absorption and scattering; solutions of radiative transfer equation in multiple scattering atmospheres; applications to atmospheric and surface energy balance and remote sensing. Prerequisite: ATM S 532/ESS 571 or permission of instructor.

[View course details in MyPlan: ATM S 533](#)

ATM S 534 Remote Sensing of the Atmosphere and Climate System (3)

Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiance measurements. Applications to research. Prerequisite: ATM S 532 or ATM S 533.

[View course details in MyPlan: ATM S 534](#)

ATM S 535 Cloud Microphysics and Dynamics (3)

Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models.

Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ESS 573; Sp.

[View course details in MyPlan: ATM S 535](#)

ATM S 536 Mesoscale Storm Structure and Dynamics (3)

Techniques of observing storm structure and dynamics by radar and aircraft, observed structures of precipitating cloud systems, comparison of observed structures with cloud models. Prerequisite: either ATM S 535, ATM S 504, or ATM S 509.

[View course details in MyPlan: ATM S 536](#)

ATM S 542 Synoptic and Mesoscale Dynamics (3)

Quasi-geostrophic theory, baroclinic instability, symmetric instability, tropical disturbances, frontogenesis, orographic disturbances, convective storms. Prerequisite: ATM S 509/OCEAN 512 and AMATH 402 or equivalents. Offered: Sp.

[View course details in MyPlan: ATM S 542](#)

ATM S 544 Design and Application of Ensemble Prediction Systems (4)

Covers the fundamental of chaos theory to help compare and contrast traditional, deterministic forecasting versus ensemble forecasting. Explores the various components of an ensemble prediction system. Introduces decision science to show how to apply probabilistic weather information in optimal decision making.

Prerequisite: ATM S 501; ATM S 502; and ATM S 552 or permission of instructor. Offered: Sp.

[View course details in MyPlan: ATM S 544](#)

ATM S 545 General Circulation of Atmosphere (3)

Requirements of the global angular momentum, heat, mass, and energy budgets upon atmospheric motions as deduced from observations. Study of the physical processes through which these budgets are satisfied.

Prerequisite: ATM S 509/OCEAN 512 or permission of instructor. Offered: A.

[View course details in MyPlan: ATM S 545](#)

ATM S 547 Boundary Layer Meteorology (3)

Turbulence, turbulent fluxes, averaging. Convection and shear instability. Monin-Obukhov similarity theory, surface roughness. Wind profiles. Organized large eddies. Energy fluxes at ocean and land surfaces, diurnal cycle. Convective and stably stratified boundary layers. Cloud-topped boundary layers. Remote sensing. Boundary layer modeling and parameterization. Prerequisite: ATM S 505, AMATH 505, or OCEAN 511.

[View course details in MyPlan: ATM S 547](#)

ATM S 551 Atmospheric Structure and Analysis I: Synoptic Scale Systems (4)

Extratropical cyclones and cyclogenesis. Jet streams. Upper waves in the westerlies. Diagnosis of vertical motions. Fronts and frontogenesis. Prerequisite: ATM S 502 and ATM S 509/OCEAN 512.

[View course details in MyPlan: ATM S 551](#)

ATM S 552 Objective Analysis (3)

Review of objective analysis techniques commonly applied to atmospheric problems; examples from the meteorological literature and class projects. Superposed epoch analysis, cross-spectrum analysis, filtering, eigenvector analysis, and optimum interpolation techniques. Offered: W.

[View course details in MyPlan: ATM S 552](#)

ATM S 554 Paleoclimate Proxies (3) *Alexander, Sachs*

Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ESS 554/OCEAN 554.

[View course details in MyPlan: ATM S 554](#)

ATM S 555 Planetary Atmospheres (3)

Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all;

roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter,¹⁷²⁴ and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ESS 581.

[View course details in MyPlan: ATM S 555](#)

ATM S 556 Planetary-Scale Dynamics (3)

Zonally symmetric circulations, planetary waves, equatorial waves, dynamics of the middle atmosphere, trace constituent transport, nonlinear aspects of atmospheric flows. Prerequisite: ATM S 542 or permission of instructor.

[View course details in MyPlan: ATM S 556](#)

ATM S 558 Atmospheric Chemistry (3)

Photochemistry of urban, rural, and marine tropospheric air, and of the natural and perturbed ozone in the middle atmosphere. Unity of the chemistries in these apparently different regimes. Prerequisite: ATM S 458 or ATM S 501 or CHEM 457 or permission of instructor. Offered: Sp.

[View course details in MyPlan: ATM S 558](#)

ATM S 559 Climate Modeling (3)

Principles of Earth system modeling. Emphasis on atmosphere, ocean sea ice, and land-surface components. Climate forcing. Appropriate use of models. Topics of current interest including carbon cycle, atmosphere chemistry, and biogeochemistry. Prerequisite: either ATM S 587/OCEAN 587/ESS 587, ATM S 504 or ATM S 505. Instructors: Bitz, Thompson Offered: jointly with ESS 559/OCEAN 558.

[View course details in MyPlan: ATM S 559](#)

ATM S 560 Atmosphere/Ocean Interactions (3)

Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Prerequisite: ATM S 509/OCEAN 512. Credit/no-credit only. Offered: jointly with OCEAN 560.

[View course details in MyPlan: ATM S 560](#)

ATM S 564 Atmospheric Aerosol and Multiphase Atmospheric Chemistry (3)

Physics and chemistry of particles and droplets in the atmosphere. Statistics of size distributions, mechanics, optics, and physical chemistry of atmospheric aerosols. Brownian motion, sedimentation, impaction, condensation, and hygroscopic growth. Prerequisite: permission of instructor.

[View course details in MyPlan: ATM S 564](#)

ATM S 571 Advanced Physical Climatology (3)

Physical processes that determine the climate of Earth and its past and future changes. Greenhouse effect. Climate modeling. Radiative and dynamical feedback processes. Orbital parameter theory. Critical analysis of climate change predictions. Prerequisite: permission of instructor. Offered: A.

[View course details in MyPlan: ATM S 571](#)

ATM S 575 Large Scale Dynamics of the Tropical Atmosphere (3)

Observations and underlying dynamics of large-scale tropical circulations. Factors that determine regions of large-scale persistent precipitation in the tropics, thermal forcing of atmospheric circulations by these regions, and temporal variability of the forcing and response. Prerequisite: ATM S 509/OCEAN 512, ATM S 542.

[View course details in MyPlan: ATM S 575](#)

ATM S 581 Numerical Analysis of Time Dependent Problems (5)

Numerical methods for time-dependent differential equations, including explicit and implicit methods for hyperbolic and parabolic equations. Stability, accuracy, and convergence theory. Spectral and pseudospectral methods. Prerequisite: either AMATH 581, AMATH 584/MATH 584, AMATH 585/MATH 585, or permission of instructor. Offered: jointly with AMATH 586/MATH 586; Sp.

[View course details in MyPlan: ATM S 581](#)

ATM S 582 Advanced Numerical Modeling of Geophysical Flows (3)

Topics of current interest including: efficient time differencing, semi-implicit and multiple time-step techniques. Semi-lagrangian schemes. Treatment of poorly resolved gradients. Flux-corrected transport. Positive definite advection schemes. Aliasing error and nonlinear instability. Wave permeable boundary conditions. Prerequisite: ATM S 581 and AMATH 586 or MATH 586.

[View course details in MyPlan: ATM S 582](#)

ATM S 585 Climate Impacts on the Pacific Northwest (4) *Mantua, Snover*

Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ENVIR 585/ESS 585/SMEA 585; Sp.

[View course details in MyPlan: ATM S 585](#)

ATM S 586 Current Research in Climate Change (2, max. 20)

Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ESS 586/OCEAN 586.

[View course details in MyPlan: ATM S 586](#)

ATM S 587 Fundamentals of Climate Change (3)

Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ESS 587/OCEAN 587.

[View course details in MyPlan: ATM S 587](#)

ATM S 588 The Global Carbon Cycle and Climate (3) *Emerson*

Oceanic and terrestrial biogeochemical processes controlling atmospheric CO₂ and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ESS 588/OCEAN 588; W.

[View course details in MyPlan: ATM S 588](#)

ATM S 589 Paleoclimatology: Data, Modeling, and Theory (3)

Evidence for past changes in land and sea surface temperature, in precipitation and atmospheric dynamics, and in ocean circulation: both long and interannual timescales. Paleoclimate modeling and theory. Time series analysis and climate noise. Rapid climate change. Statistical reconstruction of interannual variability. Offered: jointly with ESS 589/OCEAN 589.

[View course details in MyPlan: ATM S 589](#)

ATM S 591 Special Topics (1-4, max. 9)

Lecture series on topics of major importance in the atmospheric sciences. Prerequisite: permission of instructor.

[View course details in MyPlan: ATM S 591](#)

ATM S 593 Climate Science Seminar (1) *Mote*

Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ESS 593/OCEAN 593; W.

[View course details in MyPlan: ATM S 593](#)

ATM S 596 Climate Science Capstone Project (1-5, max. 5) *Mote*

Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective

communication of climate science. Offered: jointly with ESS 596/OCEAN 596; AWSpS.

[View course details in MyPlan: ATM S 596](#)

ATM S 600 Independent Study or Research (*-)

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ATM S 600](#)

ATM S 700 Master's Thesis (*-)

Offered: AWSpS.

[View course details in MyPlan: ATM S 700](#)

ATM S 800 Doctoral Dissertation (*-)

Offered: AWSpS.

Earth and Space Sciences

[Display as tabs](#)

Department Overview

070 Johnson Hall

Earth and space sciences seeks to further the understanding of the Earth, the solar system, and their histories. The scope extends from the center of Earth to the rim of the solar system, and activities cut across traditional disciplines of physics, chemistry, biology, geology, and mathematics. The discipline examines Earth's interior structure, chemistry, motion, and dynamics; geologic hazards; processes affecting the surface environment and climate; the surrounding space environment; planetary processes; and geobiology.

Undergraduate Program

Adviser

070 Johnson Hall, Box 351310

(206) 616-8511

advising@ess.washington.edu

The Department of Earth and Space Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in earth and space sciences, with options in biology, geology, physics, and environmental earth sciences
- The Bachelor of Arts degree with a major in earth and space sciences
- A minor in earth and space sciences
- A minor in climate science (offered jointly with the Department of [Atmospheric Sciences](#) and the School of [Oceanography](#))

The Bachelor of Science degree is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector where field and technology experiences and problem-solving skills are an important asset. The biology option enables B.S. students interested in paleontology and paleobiology to emphasize biology courses. The physics option allows for an emphasis in physics and geophysics. The environmental earth sciences option is designed for students interested in environmentally focused courses and careers. The Bachelor of Arts degree is designed for students who wish to obtain a broad understanding of earth sciences as a background for careers such as science journalism, environmental law, K-12 teaching, or environmental policy.

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

101 credits as follows:

1. *Science Core (35 credits):*

- a. *Basic Supporting Science (20 credits):* MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students wishing to pursue the ESS Physics Option must take PHYS 121.)
- b. *ESS Required Core Courses (15 credits):* ESS 211, ESS 212, ESS 213. (Students in the ESS Physics Option may substitute ESS 205 for one of these.)

2. *One of the four ESS Options below (minimum 61-71 credits, depending on option):*

a. *Biology Option (69 credits)*

- i. *Supporting science (26 credits):* CHEM 152, CHEM 162; BIOL 180, BIOL 200; and one of BIOL 220, PHYS 115/PHYS 118, PHYS 122, MATH 126, STAT 311.
- ii. *ESS required (31 credits):* Three of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400; ESS 418.
- iii. *ESS electives (12 credits):* ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered ESS 489 through ESS 499).

b. *Environmental Earth Sciences Option (69-71 credits)*

- i. *Supporting science (15 credits):* STAT 311 or Q SCI 381; CHEM 152 or CHEM 220; and one of CHEM 162, PHYS 115/PHYS 118, or PHYS 122, MATH 126
- ii. *ESS required (44 to 46 credits):* ESS 201; two of ESS 311, ESS 312, ESS 313, ESS 314; ESS 326; two from ESS 315, ESS 421, ESS 426, ESS 427, ESS 454, ESS 455, ESS 456, ESS 457, ESS 459; ESS 400; ESS 418.
- iii. *Electives (10 credits):* Additional courses chosen from any ESS 311-series course not taken as a required course above, from ESS 400-level courses (may not include independent study or seminar courses numbered ESS 489 through ESS 499), or from an approved list of courses outside ESS.

c. *Geology Option (67-71 credits)*

- i. *Supporting Science (18-20 credits):* MATH 126, PHYS 115/PHYS 118 or PHYS 122 and two of PHYS 116/PHYS 119 or PHYS 123; CHEM 152, MATH 307, MATH 308, STAT 311
- ii. *ESS Required (31 credits):* Three of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400; ESS 418

iii. *ESS Electives (18-20 credits)*: ESS 400-level courses or any ESS 311-series course not taken as a required course, above. May not include independent study or seminar courses numbered ESS 489 through ESS 499).

d. *Physics Option (61-67 credits)*

i. *Supporting science (32-35 credits)*: MATH 126, MATH 308, MATH 324 or MATH 136, MATH 324; PHYS 122, PHYS 123, PHYS 227, PHYS 228, PHYS 321, PHYS 322.

ii. *ESS required (14 credits)*: Two of ESS 311, ESS 312, ESS 313, ESS 314, ESS 418.

iii. *ESS electives (15-18 credits)*: ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered ESS 489 through ESS 499) .

3. All courses counted towards the major must be completed with a minimum grade of 2.0

Bachelor of Arts

Suggested First- and Second-Year College Courses: Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121; CHEM 142.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

90 credits as follows:

1. *Supporting Science (35 credits)*:

a. *Basic Supporting Science (20 credits)*: CHEM 142; Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121.

b. *Additional courses*: 15 credits from department's approved list of courses in science and mathematics. See adviser for current list.

2. *ESS Courses (55 credits)*:

1. *Required courses (15 credits)*: Two of ESS 211, ESS 212, ESS 213. One of ESS 311, ESS 312, ESS 313, ESS 314.

2. *Elective Courses*: 40 upper-division credits (300 and 400 level) with at least 10 credits at the 400 level (may not include independent study or seminar courses numbered ESS 489 through ESS 499.)

3. All courses counted towards the major must be completed with a minimum grade of 2.0

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](http://www.washington.edu/students/gencat/academic/ess.html).

Minor

Minor Requirements: 30 ESS credits with at least 15 at the upper-division level (300- or 400-level) of which at least 3 credits must be at the 400-level (may not include independent study or seminar courses numbered ESS 489 through ESS 499.) All courses must be completed with a minimum grade of 2.0.

Minor in Climate Science: See description in the [Climate Science](#) listing in the Undergraduate Interdisciplinary Programs section of the General Catalog.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Students who graduate with an undergraduate degree in Earth and Space Sciences (ESS) have achieved these learning goals:
 1. Have a general knowledge of the basic areas of solid earth geology and geophysics, geobiology, surface processes, space physics, and analogues of processes within the solar system.
 2. Be proficient in one of the core disciplines through the completion of requirements in one of four options: standard (geology), (geo)biology, (geo)physics, or environmental.
 3. Think critically and obtain quantitative predictions using skill sets that involve multiple disciplines and all core sciences.
 4. Have obtained hands-on experience from extensive fieldwork and/or laboratory experience.
 5. Have the ability to communicate scientific information clearly and precisely, both orally and in writing.
 6. Have the ability to read, understand, and use scientific literature.
- *Instructional and Research Facilities:* See below, at end of graduate program requirements.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors in the major). See adviser or department website for requirements.
- *State Licensing Endorsement Available:* Students interested in pursuing State Licensing for Geologists can receive guidance in course selection that meets state requirements for the geologist licensing examination (see adviser for requirements or visit department website).
- *Research, Internships, and Service Learning:* Job and internship possibilities are posted in the department and forwarded by email to all undergraduate students.
- *Department Scholarships:* A limited number of departmental scholarships are available. Scholarship applications are invited from all undergraduate students in the major during spring quarter. The awards are applicable to the following academic year.
- *Student Organizations/Associations:* Geo Club organizes field trips and social gatherings. Information about meetings and events is forwarded to undergraduate majors by email.

Graduate Program

Graduate Program Coordinator
070 Johnson Hall , Box 351310
206-616-8511
advising@ess.washington.edu

The Department of Earth and Space Sciences offers graduate programs leading to the Master of Science (M.S.) degree and the Doctor of Philosophy (PhD) degree in both geological sciences and geophysics. The programs emphasize a rigorous quantitative approach in conjunction with detailed in-situ and/or laboratory observations to address significant problems that lead to a better understanding of the Earth and its environment.

Major areas of interest are the internal and surface structures and materials of the Earth and planets, dynamic processes within the earth, oceans, atmosphere, and space environments, their history and the interaction of life with these environments. The required curriculum is flexible to facilitate interdisciplinary research approaches. Earth and Space Sciences is also one of the core departments (with the Department of Atmospheric Sciences and the School of Oceanography) in the interdisciplinary graduate program on climate change and a participant in the astrobiology program.

Master of Science

Admission Requirements

1. Official test scores for the Graduate Record Exam (GRE)
2. Official TOEFL scores for international applicants. TSE scores are not required.
3. One copy of official transcripts for all colleges and universities attended, in sealed envelopes, if possible. International transcripts must be in the original language and accompanied by a certified English translation.
4. Three letters of recommendation (submitted via the UW Web Application for Graduate Admission)
5. Departmental application form (submitted via the UW Web Application for Graduate Admission)
6. Personal resume and personal statement (submitted via the UW Web Application for Graduate Admission)

Degree Requirements

36-45 credits, as follows:

Since the department encourages interdisciplinary courses of study tailored to each student, there are few formal requirements for the M.S. degree beyond those specified by the Graduate School.

Departmental requirements for graduate students in Earth and Space Sciences include the following:

1. Courses determined in consultation with the student's advisory committee to insure both depth and breadth
2. ESS 594, each quarter offered in the first year

3. ESS 599, every quarter (except summer)
4. Two ESS introductory breadth courses (any 50X course)
5. An experiential learning experience
6. A data analysis course or a research project with a significant data analysis component
7. Preliminary examination (see below)
8. Draft thesis or research paper
9. Final examination

With Thesis: 36 credits, of which 18 must be in courses at the 400 level or above and up to 9 may be for thesis (ESS 700). Final examination consists of oral presentation and defense of thesis.

Without Thesis: 45 credits, of which 18 must be in courses at the 400 level or above, which includes a 5-credit research paper (ESS 600). Final examination is oral and is administered by a Supervisory Committee.

Preliminary Examination: Required for every graduate student in the department's program. Provides one component the department uses to evaluate admission to the PhD program early in the student's second year. Along with the first-year research seminar sequence, the preliminary examination encourages students to learn how to develop and present a research project, and get an early, structured start on graduate research. All entering graduate students must present and defend a research proposal before a Student Evaluation Committee (SEC) at the beginning of their second year in the department.

For the preliminary examination, a graduate student must demonstrate the ability to think critically, logically, and creatively and to communicate effectively; and must show knowledge of the disciplines that underlie the student's general area of interest (e.g., geology, geophysics, physics, math, chemistry, biology).

Doctor of Philosophy

Admission Requirements

1. Official test scores for the Graduate Record Exam (GRE)
2. Official TOEFL scores for international applicants. TSE scores are not required.
3. One copy of official transcripts for all colleges and universities attended, in sealed envelopes, if possible. International transcripts must be in the original language and accompanied by a certified English translation.
4. Three letters of recommendation (submitted via the UW Online Application for Graduate Admission)
5. Departmental application form (submitted via the UW Online Application for Graduate Admission)
6. Personal resume and personal statement (submitted via the UW Online Application for Graduate Admission)

Degree Requirements

90 credits, to include:

Since the department encourages interdisciplinary courses of study tailored to each student, there are few formal requirements for the PhD degree beyond those specified by the Graduate School.

Departmental requirements for graduate students in both geological sciences and geophysics include the following:

1. Courses determined in consultation with the student's advisory committee to insure both depth and breadth
2. ESS 594, each quarter offered in the first year
3. ESS 599, every quarter (except summer)
4. Two ESS introductory breadth courses (any 50X course)
5. An experiential learning experience
6. A data analysis course or a research project with a significant data analysis component
7. Preliminary examination (see below)
8. General examination
9. Draft dissertation
10. Dissertation defense

Preliminary Examination: An ESS requirement for every graduate student. Provides one component the department uses to evaluate admission to the PhD program early in the second year. Along with the first-year research seminar sequence, the preliminary examination encourages students to learn how to develop and present a research project, and get an early, structured start on graduate research. All entering graduate students must present and defend a research proposal before a Student Evaluation Committee (SEC) at the beginning of their second year in the department.

For the preliminary examination, a student must demonstrate the ability to think critically, logically, and creatively and to communicate effectively; and must show knowledge of the disciplines that underlie the student's general area of interest (e.g., geology, geophysics, physics, math, chemistry, biology).

Research Facilities

Extensive laboratory facilities are available for a wide range of experimental/field work. These include a wet chemistry laboratory, a JEOL 733 Superprobe with EDS/WDS and a high resolution laser Raman spectrometer for mineral analysis, a thermal-ionization mass spectrometer, a multi-collector inductively-coupled-plasma mass spectrometer and associated clean laboratories for analysis of stable and radiogenic isotopes, a computer laboratory, a remote-sensing laboratory with an image-processing system with LANDSAT tape library and spectral reflectance equipment, and high temperature controlled atmosphere furnaces. There is also field equipment for electromagnetic induction studies; a high-pressure/temperature laboratory, including a laser-induced phonon spectrometer and diamond anvil cells for studying such rock and mineral properties as compression, sound velocities, and thermal conductivity; a permanent, regional seismic network; a portable telemetered seismic network for studying volcanoes and active faults in western North America; geodetic-quality global-positioning-system receivers; a cold laboratory for studying problems in snow-cover geophysics, glaciology, and sea-ice research; a geophysical-fluids laboratory; two cloud microphysics laboratories; a space physics and

aeronomy laboratory for preparing ground-based, balloon, rocket, and satellite experiments; and a laboratory for the study of advanced plasma propulsion concepts. Additional facilities are provided by the Quaternary Research Center (which houses state-of-the art cosmogenic isotope and stable-isotope research laboratories, palynology, snow and ice research, and a periglacial laboratory) and the Burke Memorial Washington State Museum (which houses paleontological laboratories and extensive reference collections of invertebrate, vertebrate, and plant fossils, and minerals).

Financial Aid

Most graduate students receive support in the form of teaching or research assistantships, and endowed fellowships and scholarships.

COLLEGE OF THE ENVIRONMENT EARTH AND SPACE SCIENCES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ESS 100 Dinosaurs (2) NW

Biology, behavior, ecology, evolution, and extinction of dinosaurs, and a history of their exploration. With dinosaurs as focal point, course also introduces the student to how hypotheses in geological and paleobiological science are formulated and tested.

[View course details in MyPlan: ESS 100](#)

ESS 101 Introduction to Geological Sciences (5) NW

Survey of the physical systems that give the earth its form. Emphasizes the dynamic nature of interior and surface processes and their relevance to mankind and stresses the value of rocks and earth forms in the understanding of past events. A course with laboratory for non-science majors. Not open for credit to students who have taken ESS 105, or ESS 210. Field trips. Offered: AWSp.

[View course details in MyPlan: ESS 101](#)

ESS 102 Space and Space Travel (5) I&S/NW

Explores the sun, solar storms, observations from space and from Earth; Earth's space environment, radiation belts and hazards, plasma storms and auroras, rockets and propulsion, human exploration efforts, societal impact, planetary systems and resources, and project highlighting space and its exploration. Open to non-majors. Offered: AWSp.

[View course details in MyPlan: ESS 102](#)

ESS 103 Minerals and Gems (3) NW

Introduction to the nature of minerals: composition, structure, physical properties, and origins, with emphasis on gem minerals. Focuses on topics of particular interest in gemology, such as mechanisms of color, history and lore of gems, and uses of gems. Hands-on laboratories using about one hundred representative gems and minerals.

[View course details in MyPlan: ESS 103](#)

ESS 104 Prehistoric Life (3) NW

Fossils and how they are preserved. What fossils tell us about past life and environments. How the history of life unfolded and what caused the great events in biological evolution. Open to non-science majors, but also lays a foundation for higher-level geobiology courses.

[View course details in MyPlan: ESS 104](#)

ESS 105 The Earth: Its Processes and Hazards (5) NW

Introduction to physical and environmental geology. Focuses on both large-scale tectonics forces that create Earth's continents and oceans, and surficial forces that shape Earth's landscapes. Emphasizes processes that endanger human populations (such as earthquakes, volcanic eruptions, and floods). Not open for credit to students who have taken ESS 101.

[View course details in MyPlan: ESS 105](#)

ESS 106 Living with Volcanoes (3) I&S/NW

Explores volcanoes and volcanic eruptions on Earth and in the solar system. Examines how volcanoes work and how they affect the environment, life, and human societies. Illustrates principles using local examples of recent volcanism and ancient examples of mega-eruptions. Evaluates the possibility of predicting future eruptions.

[View course details in MyPlan: ESS 106](#)

ESS 115 Astrobiology: Life in the Universe (5) NW *R. BUICK, D. CATLING, V. MEADOWS, W. SULLIVAN*

Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors.

Offered: jointly with ASTBIO 115/ASTR 115/BIOL 114/OCEAN 115.

[View course details in MyPlan: ESS 115](#)

ESS 119 Introduction to Laboratories (1, max. 3)

Reviews research being performed in visited and independent research opportunities and possibilities. Includes weekly visits to labs in ESS and related fields. Credit/no-credit only.

[View course details in MyPlan: ESS 119](#)

ESS 201 The Earth System and Climate (5) NW

Earth's dynamic environment, global energy balance, interplay of chemical, physical, and biological processes shaping the Earth's surface and climate. Emphasis on quantitative methods for measuring, evaluating, and understanding contemporary changes relative to the last several thousand years. Prerequisite: either MATH 124, MATH 134, or Q SCI 291.

[View course details in MyPlan: ESS 201](#)

ESS 202 Earthquakes (5) I&S/NW

Earthquakes of the Pacific Northwest and around the world - their cause and relationship to plate tectonics; why, where, and when they occur. How earthquakes affect human life: shaping landscape, hazards. Laboratory explores physical processes associated with earthquakes. One field trip. Open to non-science majors.

[View course details in MyPlan: ESS 202](#)

ESS 203 Glaciers and Global Change (5) I&S/NW

Explores how glaciers record climate change and human activities through bubbles of ancient air and trace impurities in the ice. Also reviews glaciers impact on societies through sea-level, coastlines, water supplies, and transportation routes. Open to non-science majors.

[View course details in MyPlan: ESS 203](#)

ESS 204 The Paleobiology and Geobiology of Mass Extinctions (3-4) NW *P. WARD*

Covers the origin and diversification of life on Planet Earth, and abrupt die-offs in mass extinctions. Explores how new instrumentation and experimentation in biology and chemistry, and improved sampling of the fossil record in geology, combine with astrobiology and geobiology to revise out history of Earth and its life.

Prerequisite: a minimum grade of 1.7 in ESS 100. Offered: W.

[View course details in MyPlan: ESS 204](#)

ESS 205 Access to Space (5) NW

Group development of student experiments to the outer rim of our atmosphere and the beginning of space; investigation of stratosphere, mesosphere, thermosphere, magnetosphere, development of exploration packages; basic electronic fabrication, global positioning, radio tracking, expectations at high altitudes. Open to all

disciplines. No previous experience of electronics required.

[View course details in MyPlan: ESS 205](#)

ESS 209 Interdisciplinary Earth Sciences Field Seminar (3-12, max. 12) NW

Miscellaneous field-based and experiential learning activities in earth and space sciences.

[View course details in MyPlan: ESS 209](#)

ESS 210 Physical Geology (5) NW

Introduction to the physical and chemical processes of the earth's surface and interior. Plate tectonics, earthquakes, volcanism, glaciation. Optional field trips to Cascades and Olympics. Background in geology not required but science background desirable. Not open for credit to students who have taken ESS 101.

Recommended: High school or college precalculus and high school or college chemistry.

[View course details in MyPlan: ESS 210](#)

ESS 211 Physical Processes of the Earth (5) NW

Overview of Earth. Deformation of soil, sediment, and rock. Erosional and depositional processes and landforms. Seismicity and plate-tectonics. Structural, geomorphic, and climatic interactions in major tectonic regimes. Use of stereonet, air photos, geologic maps, and cross sections. Two one-day field excursions.

Prerequisite: a minimum grade of 1.7 in either MATH 124, MATH 134, or Q SCI 291, either of which may be taken concurrently; a minimum grade of 1.7 in either both PHYS 114 and PHYS 117 or PHYS 121. Offered: A.

[View course details in MyPlan: ESS 211](#)

ESS 212 Earth Materials and Processes (5) NW

Crystallography, crystal chemistry, and characteristics of rock-forming and ore minerals. Description, phase equilibria, origin, and associations of igneous, sedimentary, and metamorphic rocks. Laboratory study of hand specimens. Two one-day field excursions. Prerequisite: minimum grade of 1.7 in CHEM 142, or CHEM 145.

Offered: W.

[View course details in MyPlan: ESS 212](#)

ESS 213 Evolution of the Earth (5) NW

Introduction to paleontology, types of stratigraphy, and radiometric dating. The physical, chemical, biological, and plate tectonic evolution of the earth's crust, seawater, and atmosphere. Comparison with other planets.

Climate changes and man as a geologic agent. Two one-day field excursions. Prerequisite: minimum grade of 1.7 in either ESS 210, ESS 211, or ESS 212. Offered: Sp.

[View course details in MyPlan: ESS 213](#)

ESS 230 Rivers and Beaches (3/5) NW

Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focuses on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with OCEAN 230.

[View course details in MyPlan: ESS 230](#)

ESS 290 Special Topics (1-10, max. 20) NW

Selected topics in earth and space sciences.

[View course details in MyPlan: ESS 290](#)

ESS 301 Geology of the Northwest (5) NW

Geologic history of Washington, Oregon, and Idaho. Emphasis on use of geologic principles in interpreting evidence found in landscapes and rocks. Weekend field trips optional. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

[View course details in MyPlan: ESS 301](#)

ESS 302 Great Ice Age (5) NW

Growth of mile-thick ice sheets, worldwide lowering of sea level, and other geological and paleoclimatological

changes that accompany the harsh environments of a global glaciation. Geology of the last three million¹⁷³⁸ years, focusing on the causes and effects of global glaciation and future climate change. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

[View course details in MyPlan: ESS 302](#)

ESS 304 Volcanoes and Glaciers of the Pacific Northwest (5) NW

Introduction to volcanic and glacial processes, emphasizing examples in the Pacific Northwest. Volcanic products, landforms, hazards, prediction, and history. Relationship to tectonics. Nature and distribution of present and former glaciers in Washington. Two all-day Saturday field trips to Cascade volcanoes required.

[View course details in MyPlan: ESS 304](#)

ESS 305 Geology of the National Parks (5) NW

Reviews a wide range of fundamental geological processes, using North American parks and monuments as examples of natural laboratories. Includes plate-tectonic history, volcanism, mountain-building, and glacial, fluvial, and a host of other geomorphic forces as preserved in geologic exposures of National Parks.

Prerequisite: either ESS 101, ESS 105, ESS 210, or ESS 211.

[View course details in MyPlan: ESS 305](#)

ESS 306 Planetary Geology (5) NW

Up-to-date survey of geological features and processes on and within planets and their moons deduced from sampling, remote sensing, spacecraft imagery, and theory. Comparative discussion of volcanism, tectonics, surface processes, and thermal evolution. Examination of moon rocks and meteorites. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

[View course details in MyPlan: ESS 306](#)

ESS 307 Diversity Outreach Program in Earth and Space Sciences (3-5) I&S/NW, DIV

Students will lead Earth and Space Sciences outreach events to underserved and underrepresented populations in the Northwest. Gain an understanding to the barriers to education and participate in events to remove some of these barriers. Prerequisite: ESS 101, ESS 102, ESS 211, ESS 212, ESS 213, or ESS 472.

[View course details in MyPlan: ESS 307](#)

ESS 310 Mathematical Methods in the Earth Sciences (5) NW

Presents mathematical methods for Earth Sciences applications. Focuses on setting up equations and on the quality of written solutions. Prerequisite: either Q SCI 292, MATH 125 or MATH 135; either PHYS 114/PHYS 117 or PHYS 121.

[View course details in MyPlan: ESS 310](#)

ESS 311 Geomechanics (5) NW

Introduction to continuum mechanics: elasticity, fluid dynamics, diffusion, porous flow, multiphase flow, dimensional analysis, and natural convection. Example applications: earthquakes and rock mechanics, flow of glaciers, slope stability, debris flows, groundwater flow, contaminant transport, flow in rivers and channels, mantle and magma convection. Prerequisite: 2.0 in either MATH 125, MATH 135, or QSCI 292; 2.0 in either PHYS 114 and 117 or PHYS 121; and ESS 211; recommended: Previous experience with MATLAB. Offered: W.

[View course details in MyPlan: ESS 311](#)

ESS 312 Geochemistry (5) NW

Geochemical concepts essential to earth science studies. Crystal chemistry and elemental affinities, thermodynamics of geologic processes, trace element and isotopic fractionation, weathering, cosmochemistry, and exploration of basic global geochemical cycles. Laboratory exercises explore the dynamics of geochemical processes. Prerequisite: 2.0 in CHEM 142 or CHEM 145; 2.0 in either MATH 125, MATH 135, or QSCI 292; ESS 212 Offered: Sp.

[View course details in MyPlan: ESS 312](#)

ESS 313 Geobiology (5) NW

Introduction to the early record of life on earth. Environmental factors leading to life's diversification. The role of life in biomineralization. The history of biodiversity. The role of life in landform and soil formation. Laboratory exercises demonstrate specimens and techniques. Prerequisite: 2.0 in either CHEM 142 or CHEM 145; ESS 213. Offered: A.

[View course details in MyPlan: ESS 313](#)

ESS 314 Geophysics (5) NW

Introduction to geophysical methods including refraction and reflection seismology, gravity, magnetics, electrical resistivity, heat flow, and geodesy. Laboratory exercises explore interpretation of geophysical data to determine elastic wave speed, density, magnetic susceptibility, and electrical conductivity at depth. Prerequisite: 2.0 in either MATH 126, MATH 136, or ESS 310; 2.0 in either PHYS 115 and PHYS 118 or PHYS 122. Offered: A.

[View course details in MyPlan: ESS 314](#)

ESS 315 Environmental Earth Science (5) NW

Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211. Offered: jointly with ENVIR 313.

[View course details in MyPlan: ESS 315](#)

ESS 326 Geomorphology (5) NW

Introduction to landforms and surficial deposits. Emphasis on landscape-forming processes. Intended for students who wish to take additional courses in geomorphology. Prerequisite: either PHYS 114 or PHYS 121.

[View course details in MyPlan: ESS 326](#)

ESS 345 The Environment of Fuel and Mineral Deposits (3) I&S/NW

Fuels and nonmetallic ores as the substrate of industrial civilization. Provides non-majors with sufficient information about these resources to allow for informed decisions of related geological, environmental, and societal issues. Prerequisite: either ESS 210 or ESS 211.

[View course details in MyPlan: ESS 345](#)

ESS 400 Field Geology (12) NW

Six weeks of geologic mapping in a variety of rock types in the Western United States. Enhances students' knowledge of geologic phenomena and processes. Development of skills in mapping, field interpretation, and report writing. Students responsible for own living expenses while in the field. Prerequisite: ESS 211; ESS 212 ; ESS 213; one course selected from ESS 311, ESS 312, ESS 313, or ESS 314. Offered: S.

[View course details in MyPlan: ESS 400](#)

ESS 401 Regional Geology of the Pacific Northwest (3) NW

Explores the geological diversity of the Pacific Northwest temporally (Archean to Pleistocene), tectonically (craton, terranes, and cover sequences), and lithologically (ophiolites to coal). Three weekend field trips required.

[View course details in MyPlan: ESS 401](#)

ESS 402 International Field Geology (3-12, max. 12) NW

Supervised geological field work in classic, instructive international sites. Venue varies from year to year. Work may include geologic mapping, construction of cross sections, measurement and analysis of stratigraphic sections, field excursion, and supervised individual research projects.

[View course details in MyPlan: ESS 402](#)

ESS 403 Global Tectonics (5) NW

Introduction to large-scale plate tectonics processes and observations including motions on a sphere, polar-wander paths, plate-boundary seismicity, focal mechanisms, gravity, magnetics, and heat flow. Also includes

observations and theories of plate deformation and continental dynamics with emphasis on Western North America. Prerequisite: PHYS 121; recommended: either MATH 126, MATH 136, or ESS 310; PHYS 123; either ESS 311 or 314; a background in quantitative analysis using a computer based environment like MATLAB.

[View course details in MyPlan: ESS 403](#)

ESS 406 Earth Sciences for Middle and High School Science Teachers: Solid Earth (3) NW

Topics of contemporary interest selected to meet state academic standards. Topics include Pacific Northwest earthquakes and volcanoes, global and regional plate tectonics, history of the Earth, the Earth's interior, planetary geology, and surface processes on the Earth. Does not count toward the ESS degree. Prerequisite: ESS 101.

[View course details in MyPlan: ESS 406](#)

ESS 408 Great Geological Issues (3) NW

History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Offered: A.

[View course details in MyPlan: ESS 408](#)

ESS 410 Marine Geology and Geophysics (4) NW

Explores the geological and geophysical processes that form and shape the ocean basins and continental margins. Prerequisite: either ESS 210, ESS 211, or ESS 212. Offered: jointly with OCEAN 410; A.

[View course details in MyPlan: ESS 410](#)

ESS 411 Geophysical Continuum Mechanics (5) NW

Analysis of stress and strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the Earth's lithosphere. Creep of solids and flow of geological materials. Prerequisite: either MATH 136, both MATH 307 and MATH 308, or both AMATH 351 and AMATH 352.

[View course details in MyPlan: ESS 411](#)

ESS 412 Introduction to Seismology (3) NW

Examines stress and strain, the wave equation, travel times, amplitude and phase, reflection seismology, surface waves, and source theory, including moment tensors, radiation patterns, far-field wave shapes, source spectra, stress drop, and magnitude. Prerequisite: either MATH 136, both MATH 307 and MATH 308, or both AMATH 351 and AMATH 352; recommended: ESS 411 and PHYS 123.

[View course details in MyPlan: ESS 412](#)

ESS 413 Geophysics: The Earth (3) NW

The Earth and its interior; gravity, magnetism, heat flow, seismology. Earth's outer structure, studied through the unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Prerequisite: either ESS 412 or PHYS 322.

[View course details in MyPlan: ESS 413](#)

ESS 414 Geophysics: Fluids (3) NW

Introduction to geophysical fluid dynamics. An overview of fluids in geophysics with emphasis on the oceans. A nonrigorous development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Prerequisite: either MATH 136, both MATH 307 and MATH 308, or both AMATH 351 and AMATH 352; and PHYS 322.

[View course details in MyPlan: ESS 414](#)

ESS 415 Space and Plasmas (3) NW

Survey of various phenomena occurring in outer regions of Earth's atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Prerequisite: PHYS 321.

[View course details in MyPlan: ESS 415](#)

ESS 416 Geophysics: The Atmosphere (3) NW

Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Prerequisite: ESS 414.

[View course details in MyPlan: ESS 416](#)

ESS 418 Geoscience Communication (4)

Covers principles of organizing, developing, and writing geoscience information including abstracts, presentations, scientific articles, correspondences, and proposals. Reviews writing conventions, use of illustrations, style, and tone. Prerequisite: Two of ESS 201, ESS 205, ESS 211, ESS 212, ESS 213, any of which may be taken concurrently. Offered: WSp.

[View course details in MyPlan: ESS 418](#)

ESS 420 Introduction to Geographic Information Systems for the Earth Sciences (5) *S. WALTERS*

Examines principles of GISA applied to the geological sciences. Covers basics of GIScience, data types, and GIS analyses. Includes hands-on analysis applied to geologic patterns and phenomena: sources geological data; geological mapping; measures of topography; hydrologic flow patterns; and topics of the students' own interests. Offered: ASp.

[View course details in MyPlan: ESS 420](#)

ESS 421 Introduction to Geological Remote Sensing (4) NW

Principles of image interpretation for geologists. Study of land forms, structure, lithology, surface processes using aircraft and satellite data. Use of digital multispectral images and radar images for geological mapping.

[View course details in MyPlan: ESS 421](#)

ESS 422 Intermediate Spectral Remote Sensing (4) NW

Explores spectral image processing with ENVI software, used in individualized projects involving satellite or aircraft images. Emphasis on integration of remote sensing and field measurement using process models and Geographic Information Systems (GIS). Prerequisite: ESS 421.

[View course details in MyPlan: ESS 422](#)

ESS 424 Water in the Environment (3) NW

Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either ESS 310, MATH 126, or MATH 136; PHYS 123. Offered: jointly with ATM S 460/PHYS 460.

[View course details in MyPlan: ESS 424](#)

ESS 425 Tectonic Geomorphology (3) *A. DUVALL*

Advanced-level survey of tectonic geomorphology topics, focusing on the interplay between tectonic and surface processes that shape the landscape in regions of active deformation and at time scales ranging from days to millions of years. Prerequisite: either ESS 311, ESS 326, ESS 426, or ESS 427. Offered: Sp.

[View course details in MyPlan: ESS 425](#)

ESS 426 Fluvial Geomorphology (5)

Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, report writing. Prerequisite: either ESS 311 or ESS 326.

[View course details in MyPlan: ESS 426](#)

ESS 427 Hillslope Geomorphology (5) NW

Theoretical, laboratory, and field study of hillslope evolution by mass wasting and water erosion. Prerequisite: either ESS 311 or ESS 326.

[View course details in MyPlan: ESS 427](#)

ESS 431 Principles of Glaciology (4) NW

Covers snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, Ice Age theories. Prerequisite: PHYS 121.

[View course details in MyPlan: ESS 431](#)

ESS 432 Glacial Geology (5) NW

Interpretation of glacial environments and history through study of sediments and landforms. The laboratory component is largely field based and visits some spectacular glaciated landscapes. Provides students an experiential learning approach to the field as well as an opportunity to conduct independent research.

[View course details in MyPlan: ESS 432](#)

ESS 433 Environmental Change in the Glacial Ages (5) NW

Physical, biological evidence of climatic change during Quaternary Period; emphasizing stratigraphy, chronology. Impact of alternating glacial/interglacial cycles on earth's terrestrial, marine environments. Theories on causes of climatic variation.

[View course details in MyPlan: ESS 433](#)

ESS 435 Glacial-Periglacial Geomorphology NW (3) NW

Introduces glacial processes that shape mountainous and polar regions, creating a wealth of characteristic landforms; and periglacial processes that profoundly impact nearly twenty percent of the land surface of the planet and Mars through frost action and thermal fluctuations. Prerequisite: either Q SCI 292, MATH 125, or MATH 135; either PHYS 114 and PHYS 117 or PHYS 121; ESS 211; ESS 326.

[View course details in MyPlan: ESS 435](#)

ESS 437 Mineralogy (5) NW

Symmetry of crystals and crystal structures. Rules of crystal chemistry. Microscopic, diffraction, and spectroscopic techniques of mineral characterization. Transformation processes in minerals: order-disorder, phase transition, and exsolution. Crystal chemistry and phase relations. Reactions on mineral surfaces. Physical properties, deformation, and creep. Prerequisite: CHEM 142 or CHEM 145; ESS 212; ESS 312.

[View course details in MyPlan: ESS 437](#)

ESS 439 Petrology of Igneous Rocks (5) NW

Systematic study of the major families of volcanic and plutonic igneous rocks with emphasis on tectonic setting, phase relations, geochemistry, and models of their origin and evolution throughout geologic time. Laboratory emphasizes thin-section study of rocks using transmitted and reflected light. Prerequisite: ESS 312.

[View course details in MyPlan: ESS 439](#)

ESS 440 Petrography and Petrology of Metamorphic Rocks (5) NW

Mineralogy, textures, and origins of metamorphic rocks; metamorphic facies and metamorphic phase equilibria; controls of metamorphism. Prerequisite: ESS 312.

[View course details in MyPlan: ESS 440](#)

ESS 441 Petrology and Petrography of Sedimentary Rocks (5) NW

Mineralogy, textures, and origin of sedimentary rocks, using petrographic microscope. Prerequisite: ESS 312.

[View course details in MyPlan: ESS 441](#)

ESS 445 Geology of Ore Deposits (5) NW

The geologic principles, environmental aspects, and exploration strategies of selected types of metallic and nonmetallic ore deposits and coal. Prerequisite: ESS 312.

[View course details in MyPlan: ESS 445](#)

ESS 447 Engineering Geology: Methods and Application (4)

Applies the application of geologic principles to geotechnical and environmental problems; includes investigation and characterization of soil and rock properties. Includes two weekend field trips. Prerequisite:

ESS 210 or ESS 211; either ESS 311, ESS 411, ESS 463, or CEE 220.

[View course details in MyPlan: ESS 447](#)

ESS 449 Intensive Field Experience in Biology (3-5) NW

Introduces field methods and research in various areas of biology, e.g., paleontology, ecology, climate change, and mycology. Includes two or more weeks away from campus at field site. Offered: jointly with BIOL 475; S.

[View course details in MyPlan: ESS 449](#)

ESS 450 Paleobiology (3) NW

Biological evolution over the past 500 million years, considering how the reciprocal interactions between environment and evolution have influenced the major episodes in life's history and providing a background for assessing the evolutionary impact of modern environmental change.

[View course details in MyPlan: ESS 450](#)

ESS 451 Invertebrate Paleontology (5) NW

Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology. Offered: jointly with BIOL 451.

[View course details in MyPlan: ESS 451](#)

ESS 452 Vertebrate Paleontology (5) NW C. SIDOR

Examines fossil vertebrate life, focusing on systematics and morphology of major lineages (fish, reptiles, bird, and early mammal relatives). Examines fossil and modern vertebrates from the Burke Museum collection in the lab. Weekend field trip. Prerequisite: either BIOL 354, BIOL 452, BIOL 453 or ESS 100. Offered: jointly with BIOL 450.

[View course details in MyPlan: ESS 452](#)

ESS 453 Fossil Mammals (5) NW

Evolutionary relationships of fossil mammals, from mammal-like reptiles of late Paleozoic to diverse Cenozoic groups. Morphology, adaptations, extinctions, evolutionary patterns. Structures and relationships of most major groups. Field trip. Prerequisite: either ESS 100 or ESS 452.

[View course details in MyPlan: ESS 453](#)

ESS 454 Hydrogeology (4) NW

Covers the analysis of groundwater flow systems, geologic controls, and hydrologic properties; basics of chemistry and solute transport in groundwater; and the use of numerical models. Considers local examples and groundwater resource management. Prerequisite: either ESS 311 or ESS 314; recommended: either MATH 126, MATH 136, or ESS 310; a background in quantitative analysis using spreadsheets or MATLAB

[View course details in MyPlan: ESS 454](#)

ESS 455 Stratigraphy (4) NW

Systematic study of stratified rocks and space-time implications. Principles of stratigraphy, including biostratigraphy, magnetostratigraphy, seismic stratigraphy, subsurface analysis. Basin analysis, evolution of sedimentary basins and continental margins. Prerequisite: ESS 213.

[View course details in MyPlan: ESS 455](#)

ESS 456 Depositional Environments (4) NW

Principles of sedimentary facies analysis, including survey of modern processes that produce sedimentary sequences. Recognition of various depositional environments represented in the geologic record, including terrestrial, marine terrigenous, and carbonate environments. Two field trips required. Prerequisite: ESS 213; recommended: ESS 311 and either ESS 326, ESS 425, ESS 426, or ESS 427

[View course details in MyPlan: ESS 456](#)

ESS 457 Environmental Geochemistry (4) NW

Geochemistry of natural waters, emphasizing applications in geology. Topics include groundwater composition, weathering, mineral adsorption, equilibrium computer modeling, clay minerals, organic geochemistry, and

groundwater quality. Prerequisite: ESS 312, CHEM 152, or CHEM 155. Offered: W.

[View course details in MyPlan: ESS 457](#)

ESS 459 Environmental Isotope Geology (3) NW

The geochemistry of stable isotopes. Topics include the theory of isotope fractionation, application of isotopes in earth surface processes, climate, and biogeochemical cycles. Includes extensive laboratory experience.

Prerequisite: ESS 312.

[View course details in MyPlan: ESS 459](#)

ESS 460 Cosmogenic Nuclides in Geomorphology (3) NW

Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Open to undergraduate students only. Prerequisite: either ESS 311 or ESS 312.

[View course details in MyPlan: ESS 460](#)

ESS 461 Geological Time (3) NW

Principles of radiometric dating. Methods applicable to Earth history from planetary formation to the recent past. Radiocarbon dating; geological dating with long-lived isotopes; uranium series, trapped charge and cosmogenic isotope techniques. Applications in archaeology, climate change, geomorphology, tectonics, and Earth evolution.

[View course details in MyPlan: ESS 461](#)

ESS 462 Volcanic Processes (4) NW

Pre-eruption, eruption, and post-eruption processes. Examines triggers of magma ascent, controls on volatile build-up and loss, magma fragmentation, magma-groundwater interaction, eruption column dynamics, gravity-controlled eruptive phenomena, syn- and post-eruption lahars and other re-working of deposits. Prerequisite: either ESS 212, ESS 311, or ESS 312.

[View course details in MyPlan: ESS 462](#)

ESS 463 Structure and Tectonics (5) NW

Geometry, kinematics, and tectonic setting of major types of structures, including those in contractional fold-and-thrust belts; extended crust; strike-slip-dominated regimes; and shear zones. Laboratory exercises develop basic tools of structural geology. Prerequisite: ESS 211; ESS 212; and ESS 213.

[View course details in MyPlan: ESS 463](#)

ESS 465 Seismology and Earthquake Engineering (3) NW

Presents an overview of earthquake processes and details of the characteristics of destructive ground motion; illustrates the effects of such motion on engineering structures; reviews current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either ESS 310, MATH 126, MATH 134, or both MATH 307 and MATH 308. Offered: jointly with CEE 431.

[View course details in MyPlan: ESS 465](#)

ESS 467 Seismic Exploration and Stratigraphy (5) NW

Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: either ESS 311 or OCEAN 410; either MATH 126 or MATH 136 or ESS 310; and PHYS 123. Offered: jointly with OCEAN 412.

[View course details in MyPlan: ESS 467](#)

ESS 471 Introduction to Space Physics (3) NW

Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the earth. Prerequisite: PHYS 123.

[View course details in MyPlan: ESS 471](#)

ESS 472 Rockets and Instrumentation (2-4, max. 12)

Students launch science payloads to high altitude using high power amateur rockets, providing design, fabrication, test, integration, and management experience; covers science motivation, engineering aspects, and delivery systems. Project may vary each year. Offered: AW.

[View course details in MyPlan: ESS 472](#)

ESS 475 Current Research in Climate Science Seminar (3, max. 6)

Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ATM S 475/OCEAN 475; A.

[View course details in MyPlan: ESS 475](#)

ESS 480 Advanced Methods in Isotope Geochemistry (3, max. 18) NW

Studies new developments in isotope geochemistry. Topics vary by quarter and may include clumped isotopes, triple-oxygen isotopes, rate isotopes, mass-independent fractionation, and their incorporation into Earth system models. Introduces theory, measurement, and applications to processes in Earth, ocean, atmospheric, planetary, and climate science. Prerequisite: either ESS 312, ESS 424, ESS 457, ESS 459. Instructors: Huntington, Steig

[View course details in MyPlan: ESS 480](#)

ESS 482 Environmental Geochemistry Laboratory (4) NW

Laboratory techniques and experiments relevant to analyses of natural waters. Topics include alkalinity measurements, iron analyses, colorimetric analyses, heavy metal adsorption and geochemical modeling. Prerequisite: ESS 312 or ESS 457. Offered: Sp.

[View course details in MyPlan: ESS 482](#)

ESS 489 Honors Seminar (3)

Covers current scientific topics in earth and space sciences; philosophy and methodology of science strategies for developing research projects; scientific education and career planning. May require colloquium or local conference attendance. Offered: A.

[View course details in MyPlan: ESS 489](#)

ESS 490 Special Topics (1-10, max. 20) NW

[View course details in MyPlan: ESS 490](#)

ESS 492 Undergraduate Teaching Experience and Outreach (1-3, max. 12) NW

Designed to help undergraduate majors acquire effective teaching skills at the college and public school level. Teaching experience gained through assisting graduate student teaching assistant or K-12 public school outreach. Involves classroom teaching experience and improving communications and presentation skills.

[View course details in MyPlan: ESS 492](#)

ESS 495 NASA Science and Engineering Research Seminar (1, max. 4) NW

Review of current space science-related research. Emphasis varies, but topics may include planetary geology, astronomy, global change, aeronautical engineering, and remote sensing. Credit/no-credit only.

[View course details in MyPlan: ESS 495](#)

ESS 498 Undergraduate Thesis (5) NW

The thesis must be submitted at least one month before graduation.

[View course details in MyPlan: ESS 498](#)

ESS 499 Undergraduate Research (*, max. 15)

[View course details in MyPlan: ESS 499](#)

ESS 501 Geochemical Systems (3)

Geochemical systems through time, from solar system origin to present. Explores fundamental geochemical concepts using current research issues and discussion. Concepts include radiogenic and stable isotope

systematic, thermodynamics, high and low temperature chemistry of rocks and water, geochemical cycles¹⁷⁴⁶ through Earth's history. Prerequisite: graduate student standing or permission of instructor. Instructors: Nelson
[View course details in MyPlan: ESS 501](#)

ESS 502 The Solid Earth (3)

Concepts of internal earth processes: Earth as heat engine and chemical processor, style of mantle convection, origin and evolution of the Earth's magnetic field, Cascadia subduction and hazards. Introduces seismology, fluid dynamics, heat flow, gravity, and geomagnetism. Focuses on the analysis, critique, and communication of ideas from scientific literature.

[View course details in MyPlan: ESS 502](#)

ESS 503 Introduction to Solar Terrestrial Physics (3)

Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the Earth. Prerequisite: PHYS 123.

[View course details in MyPlan: ESS 503](#)

ESS 504 The Earth Surface (3)

Investigates the coupled tectonic and geomorphic processes that shape the surface of the Earth, creates the surface environment that sustains humanity and other life systems, and produces natural hazards. Introduces modern tools, techniques, and theories applicable to analysis of this coupled dynamic system.

[View course details in MyPlan: ESS 504](#)

ESS 505 The Cryosphere (4)

Covers snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, and Ice Age theories. Prerequisite: PHYS 121. Instructors: Waddington, Warren Offered: A.

[View course details in MyPlan: ESS 505](#)

ESS 508 Great Geological Issues (3)

History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Requires a term paper analyzing primary material. Prerequisite: graduate standing in earth sciences, or in history of science, or permission of instructor.

[View course details in MyPlan: ESS 508](#)

ESS 509 Field Methods in Applied Geology I (3)

Introduction to problems and techniques of applied geology. Studies the interactions among land use, infrastructure, and the dynamic landscape of the Pacific Northwest. Includes nine-day intensive, mid-September field course held near Mount Rainier. Prerequisite: strong background in field methods and geology. Instructors: Crider Offered: A.

[View course details in MyPlan: ESS 509](#)

ESS 510 Field Methods in Applied Geology II (3)

Application of applied geology core curriculum to field problems. Includes nine-day intensive, mid-June field course held on the Olympic Peninsula and coastal Puget Sound. Prerequisite: ESS 509; three of ESS 420, ESS 454, ESS 526, ESS 527, or ESS 547. Instructors: Troost Offered: S.

[View course details in MyPlan: ESS 510](#)

ESS 511 Geophysical Continuum Mechanics (5)

Analysis of stress and strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the Earth's lithosphere. Creep of solids and flow of geological materials. Includes advanced, research-oriented problems. Prerequisite: MATH 307 and MATH 308 or equivalent.

[View course details in MyPlan: ESS 511](#)

ESS 512 Seismology (3)

Examines stress and strain, the wave equation, travel times, amplitude and phase, reflection seismology, surface waves, and source theory, including moment tensors, radiation patterns, far-field wave shapes, source spectra, stress drop, and magnitude. Prerequisite: either ESS 511 or PHYS 123 and one of MATH 307 or MATH 308.

[View course details in MyPlan: ESS 512](#)

ESS 513 Geophysics: The Earth (3)

Study of gravity, magnetism, heat flow, seismology. Earth's outer structure studied through unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Includes advanced, research-oriented problems. Prerequisite: ESS 512; PHYS 322.

[View course details in MyPlan: ESS 513](#)

ESS 514 Geophysics: Fluids (3)

Geophysical fluid dynamics. Fluids in geophysics with emphasis on the oceans. Development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Includes advanced, research-oriented problems. Prerequisite: PHYS 322, MATH 307, and MATH 308 or equivalent.

[View course details in MyPlan: ESS 514](#)

ESS 515 Geophysics: Space (3)

Various phenomena occurring in outer regions of Earth's atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Includes advanced, research-oriented problems. Prerequisite: PHYS 321 or equivalent.

[View course details in MyPlan: ESS 515](#)

ESS 516 Geophysics: The Atmosphere (3)

Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Includes advanced, research-oriented problems. Prerequisite: ESS 514.

[View course details in MyPlan: ESS 516](#)

ESS 517 Early Earth Evolution (3)

Geological, biological, and environmental evolution of the Earth over the first 4 billion years of its history, as an analogue for the development of other habitable planets.

[View course details in MyPlan: ESS 517](#)

ESS 518 Technical Communication in Applied Geosciences (1, max. 3)

Reading, writing, and presentation of technical information in the geosciences. Topics vary by quarter Offered: AWSp.

[View course details in MyPlan: ESS 518](#)

ESS 519 Scientific Writing and Graphics (2) *Waddington, Warren*

Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ATM S 519/OCEAN 518; Sp, odd years.

[View course details in MyPlan: ESS 519](#)

ESS 520 Application in Geographic Information Systems for the Earth Sciences (4) *S. WALTERS*

Covers applied uses of GIS in the applied earth sciences. Includes hands-on instruction in and discussion of analysis of geologic patterns and phenomena: terrain analysis and interpretation; riverbed modeling; floodplain analysis; rainfall patterns and effects; landslide forecasting; isostatic phenomena; and topics of the students' own interest. Also covers basic instruction in geospatial statistics. Prerequisite: ESS 420 or permission of instructor. Offered: W.

[View course details in MyPlan: ESS 520](#)

ESS 522 Geophysical Data Collection and Analysis (3)

Theory and practical application of data collection and analysis applied to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing system.

[View course details in MyPlan: ESS 522](#)

ESS 523 Geophysical Inverse Theory (3) *K. CREAGER*

Introduction to the mathematical techniques for estimating properties of physical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are quite general and have a wide range of applicability in the field of data interpretation. Offered: Sp, even years.

[View course details in MyPlan: ESS 523](#)

ESS 524 Numerical Heat and Mass Flow Modeling in the Earth Sciences (3)

Numerical solution of steady and transient advective-diffusion equations describing heat and mass transport processes in earth sciences, emphasizing finite-volume methods and their relationship to finite-difference and finite-element methods. Topics include discretization methods; coordinate systems; boundary conditions; accuracy; and stability. Prerequisite: MATH 307; MATH 308 or equivalent; or permission of instructor. Instructors: Waddington Offered: Sp, even years.

[View course details in MyPlan: ESS 524](#)

ESS 525 Tectonic Geomorphology (3) *A. DUVALL*

Advanced-level survey of tectonic geomorphology topics, focusing on the interplay between tectonic and surface processes that shape the landscape in regions of active deformation and at time scales ranging from days to millions of years. Offered: Sp.

[View course details in MyPlan: ESS 525](#)

ESS 526 Fluvial Geomorphology (5) *Collins*

Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises and independent project emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, and report writing.

[View course details in MyPlan: ESS 526](#)

ESS 527 Hillslope Geomorphology (5) *Duvall*

Theoretical and applied study of hillslope processes including erosion and deposition; mass wasting; and slope forms and evolution.

[View course details in MyPlan: ESS 527](#)

ESS 528 Interpretation of Sedimentary Structures (2-4, max. 4)

Physical and environmental analysis of sedimentary structures, including biogenic sedimentary structures. Clastic sediments and rocks. Field trips required.

[View course details in MyPlan: ESS 528](#)

ESS 529 Principles of Fluid Dynamics, Heat, and Mass Transfer in Earth Sciences (3)

Introduction to the quantitative treatment of transport phenomena with applications to mantle and magma convection, volcanic eruptions, landslides, porous flow, and reaction. Emphasis on the governing equations of fluid dynamics including porous and multiple flow, chaotic convection, mixing, heat transfer, rheology, analytical, numerical, and scaling solutions.

[View course details in MyPlan: ESS 529](#)

ESS 531 Physics of Ice (3)

Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Offered: jointly with ATM S 510.

[View course details in MyPlan: ESS 531](#)

ESS 532 Snow and Ice on the Earth's Surface (3)

Snow and ice climatology. Formation of the ice crystals in clouds. Snow metamorphism. Transfer of radiative, sensible, and latent heat at snow and ice surfaces. Remote sensing of snow and ice. Growth and melt of sea ice. Climatic records from ice. Prerequisite: permission of instructor. Offered: jointly with ATM S 511.

[View course details in MyPlan: ESS 532](#)

ESS 533 Dynamics of Snow and Ice Masses (3)

Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ATM S 512.

[View course details in MyPlan: ESS 533](#)

ESS 535 Ice and Climate (3)

Examines the role of ice and snow in climate. Polar climate dynamics. Polar-global interactions. Modeling snow cover, sea ice, and ice-sheet balance, and flow in the climate system. Prerequisite: permission of instructor. Offered: jointly with ATM S 514.

[View course details in MyPlan: ESS 535](#)

ESS 537 Advanced Mineralogy (3)

Crystal symmetry: point groups, space groups. Mathematical description of crystal structures; group theory, irreducible representations; tensor description of physical properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation and creep crystals; elasto-viscous properties of Earth's mantle, crystal chemistry, solid state reactions. Offered: jointly with MSE 518; A.

[View course details in MyPlan: ESS 537](#)

ESS 538 Petrogenesis of Igneous Rocks (3)

Origin of one or more of the major groups of igneous rocks. Selected petrogenetic problems in light of tectonic setting, petrography, geochemistry, and experimental studies. Prerequisite: ESS 439 or equivalent.

[View course details in MyPlan: ESS 538](#)

ESS 540 Advanced Igneous Petrology (4)

Crystal-liquid-vapor equilibria in magmatic systems. Physical properties of silicate melts. Geothermometry and geobarometry in igneous rocks. Models of fractionation, assimilation, and magma mixing. Trace elements, radiogenic isotopes, and stable isotopes as tracers in magmatic processes. Nucleation, crystal growth, and diffusion in melts. Prerequisite: ESS 312; ESS 439.

[View course details in MyPlan: ESS 540](#)

ESS 541 Applied Fluvial Geomorphology (4)

Application of theory in fluvial geomorphology to framing and addressing questions in basic research and problems in applied contexts such as river engineering, land use planning, resource management, and river restoration. Prerequisite: either ESS 426, ESS 526, or permission of instructor.

[View course details in MyPlan: ESS 541](#)

ESS 544 Applied Tsunami Hazard Science (4)

Broad introductory overview of tsunami science and physical, social, and economic impacts of tsunami hazards. Designed for scientific, engineering, earth-science professionals, and graduate students interested in tsunami hazard assessment, mitigation, or warning. Prerequisite: MATH 126; PHYS 123; AMATH 301, or equivalents. Instructors: Gonzalez

[View course details in MyPlan: ESS 544](#)

ESS 546 Continental-Margin Sedimentation (3)

Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities.

Offered: jointly with OCEAN 546.

[View course details in MyPlan: ESS 546](#)

ESS 547 Engineering Geology: Methods and Application (4)

Applies the application of geologic principles to geotechnical and environmental problems; includes investigation and characterization of soil and rock properties. Includes two weekend field trips.

[View course details in MyPlan: ESS 547](#)

ESS 550 Electromagnetic and Potential Field Methods (3)

Development of equations of electromagnetic fields in conducting media. Solution of forward and inverse problems with natural and controlled sources: magnetotelluric and related methods. Includes the special case of static fields: DC resistivity, gravity, and magnetic interpretation. Prerequisite: PHYS 323; ESS 522; and either ESS 413 or ESS 513; or permission of instructor.

[View course details in MyPlan: ESS 550](#)

ESS 551 Mineral Physics (3)

Applications of condensed matter physics to various geophysical problems. Topics vary, but usually include the thermal properties of relevant geophysical materials, the equation of state for the Earth's mantle and core, defects in solids and their roles in tectonophysics. Prerequisite: permission of instructor.

[View course details in MyPlan: ESS 551](#)

ESS 553 Electron Beam Microanalysis (4)

Materials analysis using electron beams, including electron-target interactions, wave and energy dispersive x-ray analysis, scanning electron microscopy, and applications of these and related techniques to geological problems.

[View course details in MyPlan: ESS 553](#)

ESS 554 Paleoclimate Proxies (3) *Alexander, Sachs*

Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/OCEAN 554.

[View course details in MyPlan: ESS 554](#)

ESS 555 Physics and Chemistry of the Earth's Interior (3)

Emphasizes current issues in global tectonics and mantle dynamics. Examples include global seismic tomography and its bearing on geodynamics, the fate of subducted lithosphere and geochemical constraints on mantle convection. Prerequisite: permission of instructor.

[View course details in MyPlan: ESS 555](#)

ESS 557 Vertebrate Paleontology (5)

Examines the biology of vertebrate animals, emphasizing their diversity, adaptations, and evolutionary history. Introduces aspects of behavior, physiology, morphology, and ecology that emerge from the comparative study of vertebrates. Laboratory includes local field trips and introduction to regional vertebrate fauna. Offered: jointly with BIOL 557.

[View course details in MyPlan: ESS 557](#)

ESS 558 Introduction to Graduate Research in Paleobiology (1)

Introduction to paleobiology techniques and resources. Credit/no-credit only. Offered: jointly with BIOL 555; A.

[View course details in MyPlan: ESS 558](#)

ESS 559 Climate Modeling (3)

Principles of Earth system modeling. Emphasis on atmosphere, ocean sea ice, and land-surface components. Climate forcing. Appropriate use of models. Topics of current interest including carbon cycle, atmosphere chemistry, and biogeochemistry. Prerequisite: either ATM S 587/OCEAN 587/ESS 587, ATM S 504 or ATM S 505. Instructors: Bitz, Thompson Offered: jointly with ATM S 559/OCEAN 558.

[View course details in MyPlan: ESS 559](#)

ESS 560 Cosmogenic Nuclides in Geomorphology (3)

Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Prerequisite: either AMATH 301, AMATH 351, or permission of instructor.

[View course details in MyPlan: ESS 560](#)

ESS 562 Observational Seismology (1, max. 18)

Quarterly research themes introduce students to a variety of digital and analog seismograms and techniques for their interpretation. Students present results of short investigations in an informal seminar setting. Credit/no-credit only.

[View course details in MyPlan: ESS 562](#)

ESS 563 Theoretical Seismology I (3)

Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisite: either ESS 412, ESS 512, or permission of instructor.

[View course details in MyPlan: ESS 563](#)

ESS 564 Theoretical Seismology II (3)

Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisite: ESS 563.

[View course details in MyPlan: ESS 564](#)

ESS 567 Environmental Geochemistry (4) NW

Geochemistry of natural waters, emphasizing applications in geology. Topics include groundwater composition, weathering, mineral adsorption, equilibrium computer modeling, clay minerals, organic geochemistry, and groundwater quality. Offered: W.

[View course details in MyPlan: ESS 567](#)

ESS 568 Oceanic Lithosphere (3)

Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with OCEAN 545.

[View course details in MyPlan: ESS 568](#)

ESS 573 Cloud Microphysics and Dynamics (3)

Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ATM S 535; Sp.

[View course details in MyPlan: ESS 573](#)

ESS 575 Advanced Rockets and Instrumentation (2-4, max. 12)

Students launch science payloads to high altitude using high power amateur rockets, providing design, fabrication, test, integration, and management experience; covers science motivation, engineering aspects, and delivery systems. Project may vary each year. Offered: AW.

[View course details in MyPlan: ESS 575](#)

ESS 576 Space and Laboratory Plasma Physics (3)

Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent, or permission of instructor. Offered: jointly with A A 556; W, odd years.

[View course details in MyPlan: ESS 576](#)

ESS 577 Advanced Space Plasma Physics (3)

Formation by the interaction of solar wind with geomagnetic field. Trapped particles. Electromagnetic waves in anisotropic plasma. Dynamic disturbances and plasma instabilities. Prerequisite: ESS 415, or permission of instructor.

[View course details in MyPlan: ESS 577](#)

ESS 578 Kinetic Theory and Simulation of Space Plasmas (3)

Wave-particle interactions in space plasmas. Generation of different wave modes, electrostatic and electromagnetic, Langmuir waves to Alfvén waves. Beam, Weibel, and masers instabilities, heavy ion interactions. Particle simulations, electrostatic and electromagnetic, for non-linear wave evolution and particle heating.

[View course details in MyPlan: ESS 578](#)

ESS 579 Computational Methods and Modeling in Geophysics I (3)

Solution of complex dispersion equations including multiple root finding. Data analysis, fitting, smoothing, fast integration. Ray tracing and particle tracking in 2-D and 3-D. Computer simulation of fluid interactions, unmagnetized and magnetized, compressible and incompressible, and flow around objects.

[View course details in MyPlan: ESS 579](#)

ESS 580 Advanced Methods in Isotope Geochemistry (3, max. 18)

Studies new developments in isotope geochemistry. Topics vary by quarter and may include clumped isotopes, triple-oxygen isotopes, rate isotopes, mass-independent fractionation, and their incorporation into Earth system models. Introduces theory, measurement, and applications to processes in Earth, ocean, atmospheric, planetary, and climate science. Prerequisite: one of ESS 312, ESS 424, ESS 457, ESS 459, ESS 501, ESS 554, OCEAN 583, or permission of instructor. Instructors: Huntington, Steig

[View course details in MyPlan: ESS 580](#)

ESS 581 Planetary Atmospheres (3)

Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ATM S 555.

[View course details in MyPlan: ESS 581](#)

ESS 582 Environmental Geochemistry Laboratory (4) NW

Laboratory techniques and experiments relevant to analyses of natural waters. Topics include alkalinity measurements, iron analyses, colorimetric analyses, heavy metal adsorption and geochemical modeling. Offered: Sp.

[View course details in MyPlan: ESS 582](#)

ESS 583 Origin of the Solar System (3)

Nebular and nonnebular theories of the solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557.

[View course details in MyPlan: ESS 583](#)

ESS 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover

Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ENVIR 585/SMEA 585; Sp.

[View course details in MyPlan: ESS 585](#)

ESS 586 Current Research in Climate Change (2, max. 20)

Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only. Offered: jointly with ATM S 586/OCEAN 586.

[View course details in MyPlan: ESS 586](#)

ESS 587 Fundamentals of Climate Change (3)

Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/OCEAN 587.

[View course details in MyPlan: ESS 587](#)

ESS 588 The Global Carbon Cycle and Climate (3) *Emerson*

Oceanic and terrestrial biogeochemical processes controlling atmospheric CO₂ and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/OCEAN 588; W.

[View course details in MyPlan: ESS 588](#)

ESS 589 Paleoclimatology: Data, Modeling, and Theory (3)

Evidence for past changes in land and sea surface temperature, in precipitation and atmospheric dynamics, and in ocean circulation: both long and interannual timescales. Paleoclimate modeling and theory. Time series analysis and climate noise. Rapid climate change. Statistical reconstruction of interannual variability. Offered: jointly with ATM S 589/OCEAN 589.

[View course details in MyPlan: ESS 589](#)

ESS 590 Special Topics (2-10, max. 20)

[View course details in MyPlan: ESS 590](#)

ESS 592 Professional Practice in Applied Geosciences (1, max. 3)

Covers major issues and current topics in the practice of Geosciences: professional licensing, ethics, business trends, environmental regulation, emerging technologies. Includes internships and career guidance, as well as weekly guest speakers. Offered: AWSp.

[View course details in MyPlan: ESS 592](#)

ESS 593 Climate Science Seminar (1) *Mote*

Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ATM S 593/OCEAN 593; W.

[View course details in MyPlan: ESS 593](#)

ESS 594 Introduction to Earth and Space Sciences Research (1-2, max. 4)

Introduces research of faculty and advanced graduate students to first-year graduate students and provides experience for the formulation, oral presentation, and defense of research proposals and results.

[View course details in MyPlan: ESS 594](#)

ESS 595 Earth and Space Sciences Research Methods (2, max. 30)

Current research methodology and results based on recent literature and on faculty and student research. Designed to develop student perspective on observational and theoretical methods and on relation of specific research to broader developments in geophysics and interdisciplinary aspects of geophysics through faculty-guided presentations and discussion by students. Credit/no-credit only.

[View course details in MyPlan: ESS 595](#)

ESS 596 Climate Science Capstone Project (1-5, max. 5) *Mote*

Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ATM S 596/OCEAN 596; AWSpS.

[View course details in MyPlan: ESS 596](#)

ESS 597 Applied Geoscience Investigation (1-5, max. 10)

Independent investigation in applied geosciences guided by a faculty member and commonly in association with an off-campus mentor or stakeholder organization. Must complete project agreement in advance of registration.

Prerequisite: ESS 592 and permission of instructor Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ESS 597](#)

ESS 599 Seminar (1, max. 24)

Review of current literature in geophysics and graduate student research with faculty participation. Credit/no-credit only.

[View course details in MyPlan: ESS 599](#)

ESS 600 Independent Study or Research (*-)

Credit/no-credit only.

[View course details in MyPlan: ESS 600](#)

ESS 601 Internship (*)

Graduate internship and final exam. Prerequisite: permission of instructor. Instructors: Crider, Troost

[View course details in MyPlan: ESS 601](#)

ESS 700 Master's Thesis (*-)

[View course details in MyPlan: ESS 700](#)

ESS 800 Doctoral Dissertation (*-)

Program on the Environment

[Display as tabs](#)

Program Overview

Wallace Hall, Suite 12
3737 Brooklyn Ave NE
Seattle, WA 98195-5679
poe.washington.edu
poe@uw.edu

The Program on the Environment (PoE) is the home for Environmental Studies education at the University of Washington. Environmental Studies focuses on the interactions between humans and environments, drawing on an interdisciplinary approach to understand and address complex environmental issues.

The Environmental Studies program offers a BA major in Environmental Studies, a minor in Environmental Studies, and a Graduate Certificate in Environmental Management.

Building on a foundation of natural science, social science, and humanities courses, the curriculum offers students flexibility in choosing an individual course of study. Internship, research, and study abroad opportunities develop skills and leadership for careers in environmental policy, sustainability, conservation, education, or consulting.

(206) 616-1208
poeadv@uw.edu

The Program on the Environment offers the following programs of study:

- The Bachelor of Arts degree with a major in environmental studies
- A minor in environmental studies

Bachelor of Arts

Suggested First and Second-Year College Courses: ENVIR 100, ENVIR 200, ENVIR 250, and all foundational courses listed below.

Program Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

All majors must satisfy the College of the Environment general education requirements.

Major Requirements

82-88 credits, as follows:

1. *Core Courses (20 credits)*: ENVIR 100, ENVIR 200, ENVIR 250, ENVIR 300
2. *Foundation Courses (31-35 credits)*
 - a. *Biology (5 credits)*: BIOL 180 and one course (or sequence) from among BIOL 200, BIOL 118/BIOL 119, BIOL 250/FISH 250/OCEAN 250, ENVIR 280
 - b. *Biological Systems (3-5 credits)*: one course from BIOL 200, BIOL 250/FISH 250/OCEAN 250, ENVIR 240, ENVIR 280
 - c. *Chemistry (5 credits)*: CHEM 120 or CHEM 142
 - d. *Earth Systems Literacy (3-5 credits)*: one course from ATM S 211, ATM S 212, or ESS 201, ESS 210, ESS 230/OCEAN 230, OCEAN 200, GEOG 205
 - e. *Statistics (5 credits)*: one course from Q SCI 381, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311
 - f. *Economics (5 credits)*: one course from ENVIR 235/ESRM 235/ECON 235 or FISH 230/ECON 230
 - g. *Values and Cultures (5 credits)*: one course from ANTH 210, ANTH 211/ENVIR 211, ENVIR 239, GEOG 272, HSTAA 221/ENVIR 221, or ENVIR 243/PHIL 243
3. *Analytical Methods (3-5 credits)*: one course from ESRM 304, ESRM 430, ESS 421, OCEAN 452/FISH 452, GEOG 360, GEOG 471, Q SCI 482
4. *Environmental Perspectives and Experiences (18 credits)*: Minimum 18 credits from the list of approved courses (see department website or advising office for list). Minimum 3 credits in each of the six following categories: *perspectives*: human and social dimensions; natural sciences, and policy and decision making; *experiences*: bioregional; international; and fieldwork. Courses listed under both *perspectives* and *experiences* may count toward either, but not both. Environmentally related independent study courses, study abroad programs, and other courses not on the approved list may count toward this requirement if approved in advance by the Environmental Studies adviser.
5. *Capstone Experience (10 credits)*: ENVIR 490, ENVIR 491, ENVIR 492
6. *GPA Requirements*: Minimum 2.00 cumulative GPA for courses within the major.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirement: 30 credits, including ENVIR 100; either ENVIR 200 or ENVIR 250. Five (5) credits from among ECON 235/ENVIR/235/ESRM235, HSTAA 221/ENVIR 221, and PHIL 243/ENVIR 243.

Remaining 15 credits drawn from the environmental perspectives course list (see program website adviser for list). At least one course (minimum 3 credits) in each environmental perspectives course category, i.e. natural sciences, human and social dimensions, and policy and decision making. Ten (10 of these 15 credits must be at the 300 or 400 level. Minimum 2.0 for each course presented for the minor.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The environmental studies major offers a rigorous, interdisciplinary, experiential curriculum designed to prepare future environmental leaders to respond to bioregional and global environmental opportunities and challenges. It takes advantage of the extraordinary environmental research at the UW, and makes that social, scientific, humanistic, and professional expertise accessible to students in innovative ways.
- Students completing the BA in environmental studies have developed skills in the following:
 1. Earth Systems Knowledge: Understand the structure, function, and integration of the Earth, its inhabitants, and its four major spheres: land, water, living things, and air.
 2. Interdisciplinary Approach: Apply an interdisciplinary approach to the study of the environment, integrating multiple kinds of information, tools, methods, and scholarship from a variety of disciplines, in order to analyze and construct arguments about complex environmental issues.
 3. Experiential Learning: Understand the connections between classroom and experiential learning and successfully practice multiple forms of hands-on, real world applications.
 4. Communication: Demonstrate proficiency in multiple modes of communication (writing for different audiences and purposes, using a range of disciplinary norms; oral presentations and public speaking; online publishing; and visual display of environmental information).
 5. Public Policy and Decision Making: Understand how uncertainty, risk, law, politics, ethics, economics, and culture interact with environmental public policy and decision making.
 6. Teamwork: Collaborate as members of teams, effectively working with multiple stakeholders from various backgrounds to address environmental issues.
 7. History of Environmental Inquiry: Understand and reflect critically on the intellectual and cultural history of environmental studies including the history of environmental preservation and conservation.
 8. Temporal Scales: Understand various temporal scales inherent in environmental studies and situate themselves on the continuum of geologic time, evolutionary history, human environment history, and decision making for future generations.
 9. Spatial Scales: Understand various spatial scales inherent in environmental studies spanning the continuum from the local/bioregional to the international/global.

10. Diversity: Understand how environmental perspectives, policies, and decisions are related to issues of diversity, privilege, and power.
 11. Technical Knowledge: Be familiar with some of the technological tools commonly used to address environmental challenges.
 12. Professional Development: Understand how their education will serve them as environmental professionals.
- *Instructional and Research Facilities:* The Program on the Environment office in Wallace Hall Suite 12 includes a commons area for student and faculty events and presentations, four study areas, and a computer lab. Because PoE is an interdisciplinary program, students access resources, laboratories, and field stations across a range of UW departments, colleges, and schools.
 - *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
 - *Research, Internships, and Service Learning:* All environmental studies majors complete a senior capstone experience, which includes an internship with a community-based organization or government agency, an undergraduate research project, and/or international fieldwork or study abroad.
 - *Student Organizations/Associations:* SAGE (Student Association for Green Environments) is a club to spread awareness for environmental issues on and off campus and to promote events for a greener, sustainable environment. SAGE is committed to community engagement and education and creating professional development opportunities for environmental studies students.

COLLEGE OF THE ENVIRONMENT PROGRAM ON THE ENVIRONMENT

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ENVIR 100 Introduction to Environmental Studies (5) I&S/NW *T. BILLO, K. STRAUS, Y. WENG, E. WHEAT*

Introduces environmental studies through interdisciplinary examination of the ethical, political, social, and scientific dimensions of current and historical environmental issues. Integrates knowledge from different disciplines, and applies insights and methods to actual environmental problems and situations at scales from local to global. Offered: AWSp.

[View course details in MyPlan: ENVIR 100](#)

ENVIR 103 Society and the Oceans (5) I&S/NW

Explores the social and policy dimensions of the ocean environment and ocean management policy. Pays attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons." Offered: jointly with JSIS B 103/SMEA 103.

[View course details in MyPlan: ENVIR 103](#)

ENVIR 110 Introduction to Food and the Environment (5) I&S/NW *R. HILBORN*

Relates the production and consumption of food to the major areas of environmental science including energy use, water consumption, biodiversity loss, soil loss, pollution, nutrient cycles, and climate change. Studies the basic science and how food production impacts the key processes. Offered: A.

[View course details in MyPlan: ENVIR 110](#)

ENVIR 200 Communication for Environmental Studies (5) VLPA/I&S *E. SCHAUMBERG*

Helps develop the skills necessary to engage, analyze, write, and speak about complex environmental issues in a variety of disciplinary contexts with particular values and emphases. Focuses on reading, writing, presentation, and critical analysis of written material. Prerequisite: minimum grade of 2.0 in ENVIR 100; minimum grade of 2.0 in either C LIT 240, ENGL 109 and ENGL 110; ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, ENGL 281, ENGL 297, ENGL 298, or ENGL 299. Offered: AWSp.

[View course details in MyPlan: ENVIR 200](#)

ENVIR 211 Environmental Justice (5) I&S, DIV *D. PENA*

Examines introductory studies of environmental racism and ecological injustice in the United States and select areas of the world. Reviews environmental justice theories and methods applied to risk science, ecosystem

management, biodiversity conservation, and sustainable development. Includes comparative studies of social movements for "eco-justice." Offered: jointly with AES 211/ANTH 211.

[View course details in MyPlan: ENVIR 211](#)

ENVIR 221 Environmental History of the U.S. (5) I&S *L. NASH*

Surveys the relationship between nature and human history, including the impact of the non-human environment on American history and the environmental effects of colonization, urbanization, and consumerism; the cultural construction of nature in different eras and its social implications; the sources and limits of modern environmental politics. Offered: jointly with HSTAA 221; A.

[View course details in MyPlan: ENVIR 221](#)

ENVIR 235 Introduction to Environmental Economics (5) I&S/NW *S. RABOTYAGOV*

Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: jointly with ECON 235/ESRM 235; SpS.

[View course details in MyPlan: ENVIR 235](#)

ENVIR 239 Sustainability: Personal Choices, Broad Impacts (3-5) I&S/NW *K. STRAUS*

Presents frameworks of sustainability via exploration of key pillars of sustainability, the history of sustainability movements, and sustainability in action. Students examine personal and global aspects of sustainability through issues such as smart growth, environmental and natural building, green business and energy, ecotourism, and international policy. Offered: AW.

[View course details in MyPlan: ENVIR 239](#)

ENVIR 240 The Urban Farm (5) NW *E. WHEAT*

Develops students' understanding the ecological connections between food production, human health, and planetary sustainability. Teaches basic skills needed for food production in urban areas and the ethics behind sustainable urban agriculture, including a hands-on component on the farm at the biology greenhouse. Offered: Sp.

[View course details in MyPlan: ENVIR 240](#)

ENVIR 243 Environmental Ethics (5) VLPA/I&S *L. NICHOLS*

Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change. Offered: jointly with PHIL 243.

[View course details in MyPlan: ENVIR 243](#)

ENVIR 250 Research Methods in Environmental Studies (5) NW, QSR *T. BILLO, K. STRAUS, Y. WENG, E. WHEAT*

Introduces the processes involved in research design, including methods for environmental data collection, analysis, and presentation. Introduces ecological and social research methods through case studies, followed by practical lab and field work. Offered: AWSp.

[View course details in MyPlan: ENVIR 250](#)

ENVIR 280 Natural History of the Puget Sound Region (5) NW *T. BILLO*

Focuses on identification and ecology of defining organisms in major habitats of the Puget Sound region. Geology, climate, and early human history provide a framework for understanding the distribution and development of these habitats. Emphasizes a variety of techniques for the observation and description of nature. Offered: ASp.

[View course details in MyPlan: ENVIR 280](#)

ENVIR 295 Special Topics in Environmental Studies (1-5, max. 10)

Selected topics in environmental studies. Format may range from seminar/discussion to formal lectures to laboratory or modeling work. Offered: AWSpS.

[View course details in MyPlan: ENVIR 295](#)

ENVIR 296 Study Abroad - Environmental Studies (1-15, max. 15)

Environmental studies course taken through an approved study abroad program, for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.

[View course details in MyPlan: ENVIR 296](#)

ENVIR 300 Analysis of Environmental Cases (5) I&S/NW *T. BILLO, K. STRAUS, Y. WENG, E. WHEAT*

Guides students through the analysis of environmental case studies. Encourages synthesis of information from diverse sources and stakeholder perspectives. Frameworks are provided to help students work through the complexities of socioecological systems in a systematic way. Culminates with significant group project and presentation. Prerequisite: minimum grade of 2.0 in ENVIR 200 and ENVIR 250. Offered: ASp.

[View course details in MyPlan: ENVIR 300](#)

ENVIR 313 Environmental Earth Science (5) NW

Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211. Offered: jointly with ESS 315.

[View course details in MyPlan: ENVIR 313](#)

ENVIR 330 Climate Change Impacts on Marine Ecosystems (5) NW

Links physics of climate to marine ecosystem processes, exploring both observed climate impacts from the past and projected ecosystem changes due to human-caused climate change in the future. Case studies include polar, sub-arctic, temperate, tropical, and upwelling ecosystems, and ocean-acidification and its projected impacts. Recommended: Requires high school or college physics and algebra with a basic understanding of Newton's Laws and the ability to comprehend and construct vector diagrams. Offered: jointly with FISH 330; Sp.

[View course details in MyPlan: ENVIR 330](#)

ENVIR 341 Energy and Environment (3) NW

Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with CHEM E 341/M E 341; A.

[View course details in MyPlan: ENVIR 341](#)

ENVIR 350 Internship (1-5, max. 15)

Fieldwork, coursework, or other learning experience conducted off-campus, but supervised by UW faculty. Credit/no-credit only.

[View course details in MyPlan: ENVIR 350](#)

ENVIR 360 Environmental Norms in International Politics (5) I&S *Ingebritsen*

Surveys development of international environmental consciousness from 1960s to present. Models of "green development"; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with JSIS B 350/SCAND 350.

[View course details in MyPlan: ENVIR 360](#)

ENVIR 362 Introduction to Restoration Ecology (5) NW/I&S *J. BAKKER*

An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ESRM 362; A.

[View course details in MyPlan: ENVIR 362](#)

ENVIR 371 Anthropology of Development (5) I&S

Development refers to social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, rural-

urban relations, workers, business, environment. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 371.

[View course details in MyPlan: ENVIR 371](#)

ENVIR 379 Environmental Sociology (5) I&S/NW S. ASAH

Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ESRM 371/SOC 379; A.

[View course details in MyPlan: ENVIR 379](#)

ENVIR 384 Global Environmental Politics (5) I&S K. LITFIN

Examines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interlinked economic, technological, cultural, and political processes. Offered: jointly with POL S 384.

[View course details in MyPlan: ENVIR 384](#)

ENVIR 385 Political Ecology of the World Food System (5) I&S/NW K. LITFIN

Investigates the intersection of globalization and food politics, the pivotal role of petroleum in the world food system, and the commodity chains for some foods. Includes an optional service learning component. Offered: jointly with POL S 385.

[View course details in MyPlan: ENVIR 385](#)

ENVIR 410 Growing Stuff: Ecology, Economy, and Culture of Resource-Production Ecosystems (5) I&S/NW S. HARRELL

Examines the connections between ecological, economic, and cultural aspects of local ecosystems that produce natural resources, through three case studies involving reading, writing, class discussion, and three required Saturday or weekend field trips. Case studies may include forest products, seafood, dairy products, biofuels, orchard crops, or others. Offered: jointly with ANTH 410/ESRM 405; Sp.

[View course details in MyPlan: ENVIR 410](#)

ENVIR 415 Sustainability and Design for Environment (3) Cooper

Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/M E 415.

[View course details in MyPlan: ENVIR 415](#)

ENVIR 416 Ethics and Climate Change (5) I&S S. GARDINER, L. NICHOLS

Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with PHIL 416.

[View course details in MyPlan: ENVIR 416](#)

ENVIR 417 Advanced Topics in Environmental Philosophy (5) I&S S. GARDINER

Critical examination of issues in environmental philosophy. Topics vary. Prerequisite: one philosophy course. Offered: jointly with PHIL 417.

[View course details in MyPlan: ENVIR 417](#)

ENVIR 418 Communication and the Environment (5) I&S

Examines how communication about the environment influences beliefs, values, and treatment of the natural world. Topics include new coverage of the environment; media strategies and rhetoric used by activists, government agencies, and industry to address environmental issues; representations of the environment in

popular culture; and/or political argumentation about environmental policy. Offered: jointly with COM 418.
[View course details in MyPlan: ENVIR 418](#)

ENVIR 431 Ecopsychology (5) I&S *P. KAHN*

Explores psychology of the human relationship with nature. Critically examines how ecopsychology can impact urban sustainability, human health, environmental education, and the design of new technologies. Specific topics include evolutionary psychology; human-animal interaction; biophilia; children and nature; indigenous cultures; and ecotherapy. Offered: jointly with ESRM 431/PSYCH 431; W.

[View course details in MyPlan: ENVIR 431](#)

ENVIR 433 Environmental Degradation in the Tropics (5) I&S/NW *Christie*

Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with JSIS B 433/SMEA 433.

[View course details in MyPlan: ENVIR 433](#)

ENVIR 439 Attaining a Sustainable Society (3) I&S/NW *E. WHEAT*

Discusses diverse environmental issues, the importance of all areas of scholarship to evaluating environmental challenges, and the connections between the past and the future, to reveal integrative approaches to protect the long-term interests of human society. Offered: W.

[View course details in MyPlan: ENVIR 439](#)

ENVIR 440 Environmental Pedagogy (3) I&S/NW

Introduces the art of teaching in non-traditional settings. Designed to help students become effective environmental educators such as park naturalists, interpretive guides, or urban garden educators. Students learn pedagogical philosophy and gain skills to become more effective environmental educators. Offered: A.

[View course details in MyPlan: ENVIR 440](#)

ENVIR 459 Culture, Ecology, and Politics (5) I&S, DIV *D. PENA*

Critical studies of class, gender and race differences in environmental politics. The political-economic dimensions of ecological change. Contemporary environmental movements including the varieties of bioregionalism, deep ecology, ecofeminism, ecosocialism, environmental justice, and social ecology. Offered: jointly with ANTH 459.

[View course details in MyPlan: ENVIR 459](#)

ENVIR 460 Power, Privilege, and Preservation (5) I&S/NW, DIV

Critically examines strategies of resource managers to integrate local communities and cultures in protected areas management. Explores issues of power, privilege, and injustice and their impacts on individuals, society, and resource management decisions. Examines the potential for more socially just and ecologically sustainable approaches to protected areas management. Offered: jointly with ESRM 460; A.

[View course details in MyPlan: ENVIR 460](#)

ENVIR 476 Introduction to Environmental Law and Process (3) I&S *Bryant*

Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with SMEA 476; A.

[View course details in MyPlan: ENVIR 476](#)

ENVIR 478 Topics in Sustainable Fisheries (3, max. 9) I&S/NW

Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Conservation/restoration in practice. Pre-seminar discussion section focusing on select readings. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with BIOL 478/FISH 478.

[View course details in MyPlan: ENVIR 478](#)

ENVIR 480 Sustainability Studio (5, max. 10)

Exploration of definitions and critical concepts of sustainability and analysis of sustainability practices on the UW campus. Student research teams analyze specific sustainability practices related to food, water, energy, and climate, among other topics. Sustainability project topic focus is different each quarter. Offered: AWSp.

[View course details in MyPlan: ENVIR 480](#)

ENVIR 485 Environmental Planning and Permitting in Practice (5) I&S T. WILDERMUTH

Advanced survey of environmental planning and permitting as encountered by environmental and natural resource professionals in Washington State and beyond. Focuses on Washington State acts (SEPA, SMA, GMA) and Federal systems (NEPA, CWA ESA) that shape environmental land use planning and federal planning and permitting systems Offered: jointly with ESRM 485; W.

[View course details in MyPlan: ENVIR 485](#)

ENVIR 489 Peer Teaching Assistants in Environmental Studies (1-5, max. 10)

Develops and enhances teaching skills through supervised direct teaching experience. Prepares students for graduate school teaching or other teaching by developing leadership, mentoring, and communication skills. Includes attending lectures and weekly preparation sessions, directed discussions with faculty and TAs, and teaching course lab, field, or discussion sections. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ENVIR 489](#)

ENVIR 490 Capstone Preparation (2) P. MCDONALD

Students engage with representatives of established projects or develop a project around their own interests. Students complete a project learning contract and proposal and take part in professional development activities. First in a series of three. Prerequisite: minimum grade of 2.0 in ENVIR 300. Offered: ASp.

[View course details in MyPlan: ENVIR 490](#)

ENVIR 491 Environmental Studies Capstone: Internship and Research ([1-12]-, max. 12)

Projects arranged during ENVIR 490 may include internships, directed environmental research, or other experiential learning opportunities working in a professional setting either on campus or with an outside organization. Students complete assignments connecting their hand-on professional experience to scholarly research on related topics. Second in a series of three. Prerequisite: ENVIR 490. Offered: AWSpS.

[View course details in MyPlan: ENVIR 491](#)

ENVIR 492 Environmental Studies Capstone: Synthesis and Communication (-3) P. MCDONALD

Students synthesize knowledge gained through hand-on, applied work with academic research. Students refine their writing skills, get practice conveying information orally and visually, and make formal presentations. Professional development exercises help students market their experience and expertise. Third in a series of three. Prerequisite: ENVIR 491. Offered: ASp.

[View course details in MyPlan: ENVIR 492](#)

ENVIR 495 Advanced Topics in Environmental Studies (1-5, max. 15)

Advanced topics in environmental studies. Offered: AWSpS.

[View course details in MyPlan: ENVIR 495](#)

ENVIR 496 Study Abroad - Advanced Environmental Studies (1-15, max. 15)

Environmental studies course taken through an approved study abroad program for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.

[View course details in MyPlan: ENVIR 496](#)

ENVIR 497 Seminar in Environmental Studies (1-3, max. 6)

Intensive and advanced reading and discussion of selected works in interdisciplinary environmental studies. Topics vary. Credit/no-credit only.

[View course details in MyPlan: ENVIR 497](#)

ENVIR 498 Independent Study (1-5, max. 15)

Independent reading and/or research. Limited to majors and minors in Environmental Studies.

[View course details in MyPlan: ENVIR 498](#)

ENVIR 499 Undergraduate Research (1-15, max. 15)

Undergraduate research in environmental studies. Offered: AWSpS.

[View course details in MyPlan: ENVIR 499](#)

ENVIR 500 Graduate Seminar in Environmental Studies (1-5, max. 15)

Exploration of interdisciplinary themes in environmental science communication. Topics vary.

[View course details in MyPlan: ENVIR 500](#)

ENVIR 501 Graduate Seminar in Environmental Management (1-5, max. 15)

Addresses a contemporary interdisciplinary issue in environmental management by integrating the perspectives and theories of science/technology, public policy, and business. Format emphasizes interactive, hands-on approaches to problem solving, with visiting lectures by academic and/or external practitioners.

[View course details in MyPlan: ENVIR 501](#)

ENVIR 502 Business Strategy and the Natural Environment (4)

Applies economic and business principles (marketing, accounting, operations) to understand interactions between business and the natural environment and how environmental issues influence business strategy. Theory and case studies explore strategies that both respond to and seek competitive advantage from firms' interactions with the environment.

[View course details in MyPlan: ENVIR 502](#)

ENVIR 511 Environmental Management - Keystone Project I (4)

First in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business. Offered: A.

[View course details in MyPlan: ENVIR 511](#)

ENVIR 512 Environmental Management - Keystone Project II (4)

Second in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business. Prerequisite: ENVIR 511. Offered: W.

[View course details in MyPlan: ENVIR 512](#)

ENVIR 585 Climate Impacts on the Pacific Northwest (4) *Mantua, Shover*

Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ESS 585/SMEA 585; Sp.

[View course details in MyPlan: ENVIR 585](#)

ENVIR 600 Independent Study or Research ([1-5]-)

Independent reading and research. Limited to students enrolled in the Program on the Environment's graduate certificate programs.

[View course details in MyPlan: ENVIR 600](#)

School of Environmental and Forest Sciences

[Display as tabs](#)

School Overview

Director

Thomas DeLuca
107 Anderson

The School of Environmental and Forest Sciences, through teaching, research, and outreach, generates and disseminates knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services. Its vision is to provide internationally recognized knowledge and leadership for environmental and natural resource issues.

Founded in 1907, the school holds a position of national and international leadership in instruction and research. Its location in one of the world's largest forested regions provides students access to a unique urban-to-wildland world-class laboratory in which to study. Approximately 400 undergraduate and 175 graduate students are enrolled, taught by more than 50 faculty members. Students enjoy small classes and close association with faculty, as well as the diversity and superior facilities of a large research university.

The school's programs focus on the sustainability and functionality of complex natural resource and environmental systems, using an integrated, interdisciplinary approach across multiple scales involving the urban-to-wildland gradient. Its programs serve society generally, and natural resource professions in particular, with graduates well equipped to contribute to discussions and solutions to resource problems facing the region and the world. Interdisciplinary research and outreach centers and cooperatives include the Center for International Trade in Forest Products (CINTRAFOR), the Water Center, the UW Botanic Gardens, which include the Center for Urban Horticulture and the Washington Park Arboretum, the Olympic National Resources Center (ONRC), the Stand Management Cooperative (SMC), and the Precision Forestry Cooperative. For current information on these centers and cooperatives, visit www.sefs.washington.edu/centersPrograms/.

Office of Student and Academic Services

Director, Student and Academic Services
130 Anderson
sefsadv@uw.edu

The Office of Student and Academic Services in the School of Environmental and Forest Sciences assists prospective students with admission to the school and advises current students, including interpretation of school and University requirements and assistance in course planning. At the graduate level, faculty advisers assist students in choosing a course plan to help build an appropriate academic background for their research areas.

The office also helps to sponsor a career fair winter quarter. Students are strongly urged to seek summer employment and internship positions relevant to their career goals.

Research Programs

Areas of research are closely tied to the school's graduate program research areas. These include bioresource science and engineering; forest ecology; forest soils; forest systems and bioenergy; restoration ecology and environmental horticulture; social sciences; sustainable resource management; and wildlife science.

Outreach Programs

The school, through its interdisciplinary centers and through collaboration with UW and external partners, undertakes and promotes continuing public and professional education for citizens of the state.

Facilities

The school occupies three central Seattle campus buildings: Alfred H. Anderson Hall, the Hugo Winkenwerder Forest Sciences Laboratory, and Julius H. Bloedel Hall. In addition, the Center for Urban Horticulture, a part of the UW Botanic Gardens, is located near the Union Bay natural area on the east side of the Seattle Campus. The center maintains a library that serves students, faculty, landscape professionals, and the public. The center's herbarium supports fieldwork in environmental horticulture, restoration ecology, and dendrology. Containing representative plant material from all parts of the United States, the collection includes dried, mounted specimens of shrubs, hardwood trees, and conifers. Another herbarium, complete in plants native to the Pacific Northwest and maintained by the Burke Museum and Department of Biology, is available for use by the school's students.

The school's laboratory facilities represent an extensive array of modern equipment for research, including optical equipment, electronic instrumentation for a wide variety of uses, gas chromatographs, spectrophotometers, and physical-test equipment. Specific laboratories are designed to study soil chemistry and soil physics, hydrology, polymer chemistry, tree physiology, genetics, wood and extractives chemistry, physics of fibrous composites, applied mechanics, wood process technology, silviculture, ecology, paleoecology, pathology, entomology, wildlife, landscape management systems, horticultural physiology, and horticultural plant materials.

The school computing facilities include computer systems and staff dedicated to specific research areas, a computer student laboratory, and a local area network with several servers offering access to the Internet and local printers.

Field Facilities

School field facilities include two major forested areas covering more than 4,000 acres, an arboretum, a natural area, and several cooperative research centers and stations. These lands offer a wide variety of terrestrial and aquatic characteristics favorable to a full range of scientific investigations. They also provide a natural-science laboratory for the many disciplines in the school concerned with the research and teaching of natural resources science and management.

The 4,200-acre Charles Lathrop Pack Experimental Forest is located 65 miles south of the University, near Eatonville, Washington, and is home to the Center for Sustainable Forestry at Pack Forest. Broad forest and soil diversity in this area has led to extensive biological, management, and engineering research. A full-time resident staff manages the facility, harmonizing its public-education objectives with academic and research objectives. Rustic but comfortable facilities which provide housing and support to research programs are also used extensively for conferences both within and outside the University. The Center for Sustainable Forestry is charged with discovering, teaching, and demonstrating the concepts of sustainable forestry, with special emphasis on the school's strategic themes of sustainable forest enterprise and sustainable land and ecosystem management in an urbanizing world.

The Olympic Natural Resources Center (ONRC) is a 19,000-square-foot research and education facility located on the west side of the Olympic Peninsula. The mission of the center is to conduct research and education on natural-resources management practices that integrate ecological and economic values. Innovative management methods that integrate environmental and economic interests into pragmatic management of forest and ocean resources are demonstrated. Both a forest management program and a marine program are in place to study the relationship between the terrestrial and marine environment.

The Lee Memorial Forest, approximately 160 acres, is located about 22 miles northeast of the University, near Maltby. This forested property provides valuable academic and research opportunities near the campus. Characterized by forest types and soils common to Western Washington lowlands, Lee Forest is used extensively for short field trips and for long-term research and demonstration projects especially related to changing land uses.

The Allan E. Thompson Research Center and the Joe E. Monahan Findley Lake Reserve and Research Area in the Cedar River watershed are used by the school in cooperation with Seattle Public Utilities for studies in forest ecology and soil science in representative low and high elevation forest ecosystems.

The UW Botanic Gardens include the Center for Urban Horticulture, which has offices, laboratories, public-education resources, and field sites for teaching and research along the shore of Union Bay. Its 10-acre Union Bay Gardens emphasize unusual ornamental and native woody landscape plants. The 60-acre Union Bay Natural Area, a former landfill, now a naturalized habitat, is used by University classes and the public to study principles and practices of restoration ecology. The Douglas Research Conservatory is a modern plant-growing facility with greenhouses, growth chambers, nursery, and classrooms. The Otis Douglas Hyde Herbarium is dedicated to plants of urban and environmental horticultural significance. The Miller Seed Vault stores seeds of Washington's rare and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Library is the Northwest's foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center for Urban Horticulture also conducts courses, lectures, and special events for the public and professionals as part of the school's outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the center.

The UW Botanic Gardens' largest facility is the Washington Park Arboretum, a 230-acre collection of trees and shrubs in a naturalistic setting on the south shore of Lake Washington. Managed in cooperation with the City of Seattle Department of Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about woody plants'

diversity, natural ecology, and urban landscape use, as well as conserving endangered natural and cultivated plants. Classes in botany, dendrology, horticulture, wildlife, and landscape architecture make use of the collections, while the grounds are used for studies in soil science, ecology, and other research projects, including many independent student projects. The arboretum, established in 1934, offers numerous formal and informal classes for the general public and, in addition, serves the community as a public park and open space.

Undergraduate Program

Adviser

116 Anderson

(206) 543-3077

sefsadv@uw.edu

The School of Environmental and Forest Sciences offers the following programs of study:

- Bachelor of Science degree with a major in environmental science and terrestrial resource management. Within this major, options in landscape ecology and conservation, restoration ecology and environmental horticulture, sustainable forest management, and wildlife conservation are offered.
- Bachelor of Science degree with a major in bioresource science and engineering. Bioresource science and engineering has ABET accreditation which is recognized by the Council on Postsecondary Accreditation and the U.S. Department of Education as the accrediting agency for engineering in the United States.
- Minors in ecological restoration (available through Bothell, Seattle, and Tacoma campuses), and environmental science and terrestrial resource management.

Bachelor of Science

Suggested First- and Second-Year School Courses:

- *Environmental Science and Terrestrial Resource Management:* ENGL 131 (or other 5-credit English composition course); COM 220; BIOL 180, BIOL 200, BIOL 220; CHEM 120, CHEM 220; any 5-credit VLPA course; MATH 120 or Q SCI 291; ESRM 210.
- *Bioresource Science and Engineering:* CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238; ECON 200; ENGL 131 (or other 5-credit English composition course); HCDE 231; CHEM E 260; MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122, PHYS 123; Q SCI 381; BSE 150; BSE 201, BSE 202, BSE 248, and BSE 450.

Department Admission Requirements

- *Environmental Science and Terrestrial Resource Management:* Students in good academic standing may declare this major at any time.
- *Bioresource Science and Engineering:* Students may apply for freshman admission or upper-division admission. Applications are available in Student and Academic Services, 116 Anderson, or through the College of Engineering, 356 Loew, or by visiting the school website. Prospective upper-division BSE applicants should have

most pre-engineering coursework completed before applying (see suggested sequencing at: www.sefs.washington.edu/academicPrograms/undergrad/bse/BSEflier.pdf), especially MATH 126 and CHEM 238. See adviser for further information. Admission is competitive; completion of requirements does not guarantee admission. Students may also apply to the chemical engineering degree program through the College of Engineering advanced admission program (see College of Engineering section for advanced admission entrance and continuation requirements).

Graduation Requirements

Environmental Science and Terrestrial Resource Management

180 credits, to include:

1. General Education Requirements (70 credits)

- a. *Written Communication (12 credits)*: 5 credits English composition (ENGL 131 preferred); and seven additional credits.
- b. *Quantitative and Symbolic Reasoning (20 credits)*: Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
- c. *Natural World (30 credits)*: BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
- d. *Visual, Literary, & Performing Arts (VLPA) (10 credits)*: COM 202 or COM 220; five additional credits from the University VLPA list.
- e. *Individuals & Societies (I&S) (10 credits)*: ENVIR 235/ECON 235 or ECON 200 or ECON 201; and five additional credits, which are satisfied by core courses shown below.

2. Major Requirements (62 credits for the major):

- a. *Core Courses (17 credits)*: ESRM 200, ESRM 201, ESRM 300, ESRM 304.
- b. *Restricted Electives (minimum 35 credits)*: 300- or 400-level courses from within the School of Environmental and Forest Sciences for the major; 35 credits may come from one of the specified option course lists; 15 credits must be at the 400 level.
- c. *Capstone (10 credits)*: ESRM 462 and ESRM 463 and ESRM 464; or ESRM 494 and ESRM 496; or ESRM 494 and ESRM 495
- d. All ESRM courses must be completed with a minimum 2.0 grade to count toward major requirements.

3. Free electives: As needed to bring minimum total to 180 credits.

Environmental Science and Terrestrial Resource Management voluntary program options:

All requirements for any of the four voluntary options are the same as for the major shown directly above.

1. *Landscape Ecology and Conservation Option (minimum 35 credits)*: ESRM 323; ESRM 350; ESRM 381; ESRM 400; ESRM 426; ESRM 470. Minimum one course each from the two approved lists. See adviser for approved lists.

2. *Restoration Ecology and Environmental Horticulture Option (minimum 35 credits)*: Courses selected from an approved list. See adviser for approved list.
3. *Sustainable Forest Management Option (minimum 35 credits)*: ESRM 323, ESRM 368; ESRM 430; ESRM 461; ESRM 470. Minimum one course each from the three approved lists. See adviser for approved lists.
4. *Wildlife Conservation Option (minimum 35 credits)*: ESRM 350; ESRM 351; ESRM 441; ESRM 450; ESRM 455 (taken twice); ESRM 458; Q SCI 482.

Bioresource Science and Engineering

1. *General Education Requirements (105 credits)*
 - a. *Written Communication (12 credits total, 4 of which are satisfied by major requirements, shown below)*: 5 credits English composition (ENGL 131 preferred); HCDE 231 (3 credits).
 - b. *Natural World (NW) (68 credits)*: MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352); Q SCI 381 or IND E 315 or STAT 390. CHEM 152, CHEM 162; CHEM 237, CHEM 238; PHYS 121, PHYS 122, PHYS 123; A A 260; 10 credits from the University NW list (outside the major).
 - c. *Visual, Literary, & Performing Arts (VLPA) (10 credits)*, chosen from the University VLPA list.
 - d. *Individuals & Societies (I&S) (20 credits, totally, 5 of which are satisfied by BSE requirements, shown below)*: ECON 200; 10 credits chosen from the University I&S list (outside the major).
2. *Major Requirements (74 credits)*
 - a. *Bioresource Science (59 credits)*: BSE 150, BSE 201, BSE 202, BSE 248, BSE 391, BSE 392, BSE 406, BSE 420, BSE 421, BSE 422, BSE 426, BSE 430, BSE 436, BSE 480, BSE 481, BSE 497. All required BSE courses must be completed with a minimum 2.0 grade.
 - b. *Engineering Electives (15 credits minimum)*: Taken from a list of approved engineering electives.
 - c. *Business Option (additional 12 credits minimum)*: ESRM 320, ESRM 321, and one course from approved list.
3. *Free Electives*: To bring minimum total to 180 credits.

Minors

Ecological Restoration

Minor Requirements: 25 credits as follows:

1. *Introduction to Restoration Ecology (5 credits)*: Either ESRM 362/ENVIR 362, BES 362, or TESC 362.
2. *Capstone (10 credits)*: One of the following sequences: ESRM 462/ENVIR 462, ESRM 463/ENVIR 463, ESRM 464/ENVIR 464; or BES 462, BES 463, BES 464; or TESC 462, TESC 463, TESC 464.
3. *Electives*: 10 credits from approved list of electives maintained by each campus.
4. Minimum 2.00 cumulative GPA for courses presented for the minor.

5. Minimum 15 credits from outside the student's major.

6. Minimum 15 credits completed through the UW.

Environmental Science and Terrestrial Resource Management

Minor Requirements: Minimum 25 ESRM credits, 20 of which must be upper division. Maximum 5 credits from BSE courses allowed.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Forest resources emphasizes interactions between biotic and human systems at landscape to regional scales. It also provides a knowledge base to answer critical questions about how individual organisms and biotic systems respond to perturbations and stresses imposed by human activities, as well as how the environment affects human behavior and institutions. This knowledge enables the design of methods for the conservation, restoration, and sustainable use of biotic systems, and is critical for environmental decision making.

The goal of the bioresource science and engineering curriculum is to provide students with the training, tools, and experiences needed to be successful professionals in the paper and allied industries. At the same time, it provides a comprehensive education so graduates can effectively work and live in the world's complex society.

The goal of the environmental science and terrestrial resource management curriculum is to present fundamental knowledge and problem-solving experiences that enable students to understand the interdisciplinary dimensions of natural resource and environmental sciences and management. The structure of this curriculum provides great flexibility for students to pursue specialized fields through the formal program options, which include: landscape ecology and conservation; restoration ecology and environmental horticulture; sustainable forest management; and wildlife conservation; or to construct individual coursework to fit their educational goals.

Career opportunities abound in the area of environmental science and terrestrial resource management in both private and public sectors. One example is the projected need in the U.S. Forest Service, where it is estimated that one-third of the workforce will be retiring within the next five years.

- *Instructional and Research Facilities:* See the main school page for details.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements or visit www.sefs.washington.edu/academicPrograms/undergrad/honors.shtml.
- *Research, Internships, and Service Learning:* The Office of Student and Academic Services regularly receives internship announcements, which are forwarded to all SEFS students via email and placed in the office's Career Corner. Students are strongly encouraged to pursue these opportunities, which include work experience with federal, state, and private organizations in environmental science, forestry, engineering, conservation, wildlife, horticulture, and other related fields.

Undergraduate research opportunities are available. Students should contact faculty members in their areas of interest. There are also foreign study and field opportunities within the College. Some are formal study with faculty members, others are through other agencies. Contact the Office of Student and Academic Services for more information.

- *Department Scholarships:* For majors, the School of Environmental and Forest Sciences has a strong scholarship program that provides in-state tuition to students, based on merit or need. Application information can be found at www.sefs.washington.edu/academicPrograms/scholarship/index.shtml.

The Washington Pulp and Paper Foundation provides scholarships for students enrolled in the bioresource science and engineering curriculum. For information, contact Professor Rick Gustafson in Bloedel 364 or visit the foundation website at: depts.washington.edu/wppf/.

- *Student Organizations/Associations:* The School has student organizations which organize student symposia, field trips, parties, slide shows and talks, public service projects, and other social activities. Current SEFS student organizations can be found at www.sefs.washington.edu/people/organizations.shtml.

Of Special Note: Some classes include field trips or require laboratory supplies or material duplication at student expense.

Graduate Program

Graduate Program Adviser
116 Anderson, Box 352100
(206) 543-7081
sefsadv@uw.edu

Graduate programs in forest resources are designed to accommodate a wide range of education and career objectives. A student may concentrate on development of advanced professional skills and knowledge or on exploration of forest-related science.

Graduate programs offered in forest resources lead to the degrees of Master of Environmental Horticulture, Master of Forest Resources in sustainable forest management, master of science, and doctor of philosophy. Graduate students may center their study in one of the special fields within the school's divisions.

Master of Environmental Horticulture

Admission Requirements

1. Evidence of academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
 - c. Adequate scores on the GRE (156 Verbal; 148 Quantitative; 5.0 Writing recommended)

- d. *International applicants only*: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study.
 - a. Clearly written statement of objectives in pursuing further education.
 - b. Ideally work or field experience in the planned area of study.
3. Supporting evidence from reference persons (three recommendations total).
 - a. Recommendations from references familiar with applicant's academic ability and potential
 - b. Recommendations from employers in field related to applicant's educational goals
 - c. Application deadline is December 1 for admission the following autumn quarter.

Degree Requirements

45 credits, as follows:

1. SEFS 500, SEFS 503, SEFS 549, SEFS 561, ESRM 411, ESRM 451, ESRM 480, ESRM 481; and 13 credits of restricted electives.
2. *Internship/independent research*: A formal public presentation and written professional paper are required. A member of the EHUF faculty advise the student on his/her project, which is completed as SEFS 601 (9 credits minimum)
3. Electives (7 credits)

Master of Forest Resources - Forest Management

Admission Requirements

1. Evidence of academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
 - c. Adequate scores on the GRE (156 Verbal; 148 Quantitative; 5.0 Writing recommended)
 - d. *International applicants only*: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study
 - a. Clearly written statement of objectives in pursuing further education.
 - b. Ideally work or field experience in the planned area of study
3. Supporting evidence from reference persons (3 recommendations total)
 - a. Recommendations from references familiar with applicant's academic ability and potential.
 - b. Recommendations from employers in field related to applicant's educational goals

- c. Application deadline is December 1 for admission the following autumn quarter.

Degree Requirements

45 credits, as follows:

1. SEFS 500, SEFS 509, SEFS 526
2. *Directed electives*: 24 credits distributed among the following four areas, with at least two classes required in each area: forest biology/ecology, forest management, forest measurements, forest policy and administration. See adviser for list of approved courses for each area.
3. *Unrestricted electives*: 9 credits
4. *Capstone project*: SEFS 600 or SEFS 601

Master of Forest Resources - Peace Corps Master International Admission Requirements

1. Evidence of academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
 - c. Adequate scores on the GRE (156 Verbal; 148 Quantitative; 5.0 Writing recommended)
 - d. *International applicants only*: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study
 - a. Clearly written statement of objectives in pursuing further education.
 - b. Ideally work or field experience in the planned area of study
3. Supporting evidence from reference persons (3 recommendations total)
 - a. Recommendations from references familiar with applicant's academic ability and potential.
 - b. Recommendations from employers in field related to applicant's educational goals
 - c. Application deadline is December 1 for admission the following autumn quarter.

Degree Requirements

45 credits, as follows:

1. SEFS 500, SEFS 504, SEFS 550, SEFS 590, ESRM 403, ESRM 411, Q SCI 482 (24 credits)
2. Directed electives in applied research (4 credits)
3. Graduate-level free electives (8 credits)

4. SEFS 600. Independent research - study complete on return from Peace Corps (9 credits)

Master of Science

Admission Requirements

1. Evidence of academic readiness for the program
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
 - c. Adequate Scores on the GRE (156 Verbal; 148 Quantitative; 5.0 Writing recommended)
 - d. *International applicants only*: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study
 - a. Clearly written statement of objectives in pursuing further education
 - b. Ideally work or field experience in the planned area of study
3. Supporting evidence from reference persons (3 recommendations total)
 - a. Recommendation from references familiar with applicant's academic ability and potential
 - b. Letters of recommendation from employers in field related to applicant's educational goals

Degree Requirements

Minimum 45 credits, to include:

1. *Orientation*: SEFS 500
2. *Social and Natural Sciences Applied to Natural Resource and Environmental Issues*: SEFS 509
3. *Disciplinary Knowledge*: minimum 10 credits from list of approved courses according to interest area
4. *Research Design and Quantitative Analysis*: minimum 8 credits from list of approved courses according to interest area
5. *Current Topics*: 2 credits (500 level), topics vary from year to year
6. *Thesis Research*: SEFS 700 (9 credits minimum)

Current interest groups:

- Forest ecology
- Forest soils
- Bioresource science and engineering
- Restoration ecology and environmental horticulture
- Social sciences

- Sustainable resource management
- Wildlife science

Doctor of Philosophy

Admission Requirements

1. Evidence of academic readiness for the program.
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours
 - b. Type and level of courses completed (generally students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study)
 - c. Adequate Scores on the GRE (156 Verbal; 148 Quantitative; 5.0 Writing recommended).
 - d. *International applicants only*: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internet-based, and 7 for IELTS tests)
2. Evidence of knowledge of intended area of study
 - a. Clearly written statement of objectives in pursuing further education. PhD applicants should have earned a master's degree; most apply for the master's and then continue on to the PhD.
 - b. Ideally work or field experience in the planned area of study
 - c. Publications written by the student related to the planned area of study
3. Supporting evidence from reference persons (3 recommendations total).
 - a. Recommendations from references familiar with applicant's academic ability and potential
 - b. Recommendations from employers in field related to applicant's educational goals
 - c. Application deadline is December 1 for admission the following autumn quarter.

Degree Requirements

90 credits, to include:

1. Same as for Master of Science degree (above) with one additional course in each of the categories:
 - a. Disciplinary knowledge
 - b. Research design and quantitative analysis
 - c. Current topics
2. Qualifying examination
3. General examination
4. Dissertation research: SEFS 800 (27 credits minimum)
5. Final examination

Financial Assistance

The school has a limited number of appointments for teaching and research assistantships that provide a stipend, tuition waiver, and benefits. Teaching and research assistant responsibilities are half-time, allowing time to pursue a full academic load. Students may contact faculty directly about available research assistantships.

Fellowships without teaching or research obligations are also available. Requests for consideration must be submitted by December 31 for the following academic year. Applications are in the school's admission packet, available on the school's website at: www.sefs.washington.edu/academicPrograms/graduate/applicant.shtml.

COLLEGE OF THE ENVIRONMENT

SCHOOL OF ENVIRONMENTAL & FOREST SCIENCE

SCHOOL OF ENVIRONMENT AND FOREST RSRCS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

SEFS 500 Graduate Orientation Seminar (1)

Introduction to graduate study at the School, student resources and services, and current research. Required for all new graduate students in SEFS. Offered: A.

[View course details in MyPlan: SEFS 500](#)

SEFS 501 Forest Ecosystems - Community Ecology (5)

Community ecology of forest ecosystems. Quantitative methods of community description. Role of limiting factors, competition, and disturbance in determining community composition, structure, and stability.

Introduction to forest ecosystem productivity. History and application of successional theory. Prerequisite: basic ecology course or permission of instructor. Offered: A.

[View course details in MyPlan: SEFS 501](#)

SEFS 502 Analytical Techniques for Community Ecology (4) J. BAKKER

Analysis of ecological data, focusing on community-level data. Topics include distance measures, group comparison methods (Mantel test, permutational MANOVA), ordinations (PCA, DCA, NMS), methods of identifying groups (cluster analysis, classification trees), as well as Indicator Species Analysis, diversity measures, and related topics. Prerequisite: Q SCI 482, which may be taken concurrently. Offered: W.

[View course details in MyPlan: SEFS 502](#)

SEFS 503 Current Issues in Restoration Ecology and Environmental Horticulture (1, max. 10)

Critical evaluation and discussion of published research in urban horticulture and restoration. Students and faculty present and discuss research methods and questions from current literature. Credit/no-credit only.

Offered: AWSp.

[View course details in MyPlan: SEFS 503](#)

SEFS 504 Research Processes in Forest Resources (4)

Comprehensive survey of research processes for entering graduate students. Diagnostic and prescriptive evaluation of student research capabilities. Problem and hypothesis formulation, study design, multi-method strategies for gathering and analyzing data, and interpretation and presentation of results.

[View course details in MyPlan: SEFS 504](#)

SEFS 505 Introduction to Pulp, Paper, and Bioproducts (3) *R. GUSTAFSON*

Introduction to pulp and paper technology for BSE graduate students who do not have a prior background in pulp and paper. Broad overview of pulp and paper technology and the pulp and paper industry. Offered: A.

[View course details in MyPlan: SEFS 505](#)

SEFS 507 Soils and Land Use Problems (4)

Environmental concerns of soils; how soil properties control potential and reasonable possibilities of land use. Includes factors controlling soil stability, hydrology, fertility, and movement of pollutants. Field trip oriented with weekly activity summaries. Students also conduct field trips to soil-use problem sites. Offered: W.

[View course details in MyPlan: SEFS 507](#)

SEFS 509 Analysis of Research Problems (3) *S. RABOTYAGOV*

Natural resource issues emerge from interactions between humans and their biophysical world. Understanding resource problems and solutions requires integration of numerous areas of knowledge and methods of discovery. Objectives include exposure to, and development of, fundamental issues and skills essential for natural resource professionals, including development of a research plan. Offered: W.

[View course details in MyPlan: SEFS 509](#)

SEFS 510 Graduate Studies in Forest Soils (1-5, max. 15)

Offered: AWSpS.

[View course details in MyPlan: SEFS 510](#)

SEFS 512 Biogeochemical Cycling in Soils and Forest Ecosystems (3)

Elemental cycles in forests and soils. Fundamentals of processes involved in cycling are addressed along with alterations resulting from environment, vegetation, and soil types. Consideration of cycles of nutrients, metals, and other elements. Weekly discussion section reviews literature on biogeochemical cycling. Prerequisite: one soils course or permission of instructor. Offered: W, even years.

[View course details in MyPlan: SEFS 512](#)

SEFS 513 Advanced Soil Genesis and Classification (5)

Soil formation, morphology, classification, and relationship to the environment. Labs and field trips illustrate properties and processes of forest and grassland soils in Washington. Requires two weekend field trips and a graduate project. Prerequisite: CFR 510 or permission of instructor. Offered: Sp, even years.

[View course details in MyPlan: SEFS 513](#)

SEFS 514 Advanced Forest Soil Fertility and Chemistry (4) *R. HARRISON*

Chemical properties of soil, nutrient, and toxic elements; supply, retention, and loss of nutrients in soils; utilization of geochemical and ecosystem models such as GEOCHEM, MAGIC, TRICLE-DOWN, and ILWAS in developing a quantitative understanding of the chemical function of forest ecosystems. Prerequisite: general chemistry and geology of soils. Offered: Sp, odd years.

[View course details in MyPlan: SEFS 514](#)

SEFS 515 Advanced Soil and Plant Analysis (3) *R. HARRISON*

Plants and animals must acquire nutrient elements from their environment. Quantifying the composition of samples is the first step in understanding the processes in natural and manmade systems. Sampling, handling, preparation, storage, and analysis stressed. Prerequisite: one botany or plant science course, instrumental analysis, soils. Offered: Sp, even years.

[View course details in MyPlan: SEFS 515](#)

SEFS 519 Conducting Financial, Environmental, and Social Responsibility Performance Research¹⁷⁸¹ (3, max. 12) D. PAUN

Focuses on the concepts of accounting, finance, and financial statement analysis; techniques for analyzing firm performance; and conducting competitor analyses. Conduct in-depth, comparative performance analyses of U.S. and Canadian paper firms and publish the findings as a peer-reviewed manuscript in a journal. Offered: WSp.

[View course details in MyPlan: SEFS 519](#)

SEFS 520 Geographic Information Systems in Forest Resources (5) J. LAWLER

Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSp.

[View course details in MyPlan: SEFS 520](#)

SEFS 521 Current Topics in Forest Resources (2-5, max. 10)

Critical evaluation and discussion of published research in the broad field of forest resources. Topics and requirements vary. Offered: AWSp.

[View course details in MyPlan: SEFS 521](#)

SEFS 522 Plant-Microbe Interactions (1, max. 3) S. DOTY

Discusses current research related to forest tree-microbe interactions. Credit/no-credit only. Offered: W, odd years.

[View course details in MyPlan: SEFS 522](#)

SEFS 523 Environmental Applications of Plants: Bioenergy and Bioremediation (3) S. DOTY

Covers phytoremediation (removing pollutants using plants), biofuel production, and carbon sequestration. Focuses on the biology rather than the chemistry. Emphasizes the latest research on how current practices in these areas are being improved. Offered: A.

[View course details in MyPlan: SEFS 523](#)

SEFS 524 Current Topics in Phytoremediation (2) S. DOTY

Discussion of current scientific research in the use of plants for remediation of pollution. One paper is student-presented per week and critiqued and discussed in class. Prerequisite: SEFS 523 Credit/no-credit only.

[View course details in MyPlan: SEFS 524](#)

SEFS 525 Advanced Wildland Hydrology (4)

Advanced treatment of hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Graduate focus on a detailed field or modeling hydrologic analysis. Offered: W.

[View course details in MyPlan: SEFS 525](#)

SEFS 526 Seminar in Advanced Silviculture (3)

Seminar on current and emerging silvicultural issues and underlying biological principles. Topics include: stand management to enhance wildlife, biodiversity, and high productivity in sub-tropical and tropical regions; computer simulation of stand growth; adaptation to changes in management objectives; soil conditions and productivity during stand rotation; and minimizing effects of catastrophic disruption. Prerequisite: ESRM 428. Offered: W.

[View course details in MyPlan: SEFS 526](#)

SEFS 527 Ecosystems Seminar (1)

Discussion by invited speakers on current research related to ecosystems. Credit/no-credit only.

[View course details in MyPlan: SEFS 527](#)

SEFS 529 School of Environmental and Forest Sciences Seminar (1, max. 6)

Weekly seminars covering School of Environmental and Forest Sciences topics, with lectures from scientists on

and off campus. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: SEFS 529](#)

SEFS 530 Introduction to Restoration Ecology (3/5) *J. BAKKER*

Provides introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: A.

[View course details in MyPlan: SEFS 530](#)

SEFS 533 Airborne Lidar for Remote Sensing of Vegetation and Geomorphology (5) *L. MOSKAL*

Focuses on the applications of lidar data, its interpretation, and processing. Students apply information learned from lectures and laboratory projects to a final project that analyzes vegetation structure, geomorphology, or hydrology. Prerequisite: either ESRM 250, SEFS 520, ESRM 430, FISH 452, FISH 502, FISH 552, or GEOG 360. Offered: Sp.

[View course details in MyPlan: SEFS 533](#)

SEFS 535 Fire Ecology (4) *E. ALVARADO-CELESTIN*

Fire regime concept as applied to fire ecology. Methodology for fire history research. History and function of forest fire in Western United States with emphasis on Pacific Northwest. One weekend field trip. Offered: A.

[View course details in MyPlan: SEFS 535](#)

SEFS 540 Optimization Techniques for Natural Resources (5) *S. TOTH*

Studies optimization techniques for natural resources managers including spatial optimization; linear, integer, and multi-objective programming; and stochastic and combinatorial optimization. Emphasizes model building rather than on algorithmic concepts. Prerequisite: MATH 308 or permission of instructor. Offered: Sp.

[View course details in MyPlan: SEFS 540](#)

SEFS 541 Advanced Landscape Ecology (5) *J. LAWLER*

Hands-on, applied, project-based research class. Students work in a team in conjunction with one or more outside partners to address real landscape-scale conservation problems. Covers scaling, landscape processes, pattern measurement, connectivity, landscape modeling, and conservation planning. Prerequisite: SEFS 501. Offered: W, odd years.

[View course details in MyPlan: SEFS 541](#)

SEFS 549 Urban Horticulture Seminar (1, max. 6)

Discussion by invited speakers on current topics in urban horticulture. Credit/no-credit only. Offered: A.

[View course details in MyPlan: SEFS 549](#)

SEFS 550 Graduate Seminar (2-5, max. 10)

Graduate seminar to evaluate and discuss current research topics. Topics and requirements vary. Offered: AWSp.

[View course details in MyPlan: SEFS 550](#)

SEFS 554 Wildlife Seminar (1-2, max. 10)

Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: SEFS 554](#)

SEFS 561 Public Presentation in Urban Horticulture (2)

Students learn to make public presentations in scientific, professional, and popular contexts and to interpret technical information for professional and lay audiences. Support materials, such as audiovisuals and graphics, are discussed. Offered: Sp.

[View course details in MyPlan: SEFS 561](#)

SEFS 564 Advanced Forest Biometry (3/5) *E. TURNBLOM*

Classical problems in analysis of forest populations and growth theory, and principles of parametric analysis and

estimation processes in forest biometry. Offered: W, even years.

[View course details in MyPlan: SEFS 564](#)

SEFS 567 Topics in Advanced Ecology (3, max. 6)

Discusses literature on active research areas or controversies in different branches of ecology. Offered: jointly with BIOL 567/FISH 567; W.

[View course details in MyPlan: SEFS 567](#)

SEFS 570 Seminar in Environmental Sociology (3)

Offered: jointly with SOC 570.

[View course details in MyPlan: SEFS 570](#)

SEFS 571 Resource Policy and Administration (4)

Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with PUBPOL 592.

[View course details in MyPlan: SEFS 571](#)

SEFS 574 Restoration Problem Solving: Ecological Engineering (5) *J. FRIDLEY*

Exposes students to real-life problem solving that involves the design and manipulation of natural systems to perform ecological function. Focuses on the analysis, design, and implementation of discrete projects. Includes projects dealing with plants, hydrology, earthwork, waste and pollution management, as well as other resources and problems. Offered: A.

[View course details in MyPlan: SEFS 574](#)

SEFS 590 Graduate Studies (1-5, max. 10)

Study of emerging scientific developments in forest resources that may develop into regular course offerings. Offered: AWSpS.

[View course details in MyPlan: SEFS 590](#)

SEFS 591 Seminar in Resource Policy and Management (1)

Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the School of Environmental and Forest Sciences. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with PUBPOL 591.

[View course details in MyPlan: SEFS 591](#)

SEFS 592 Environmental Policy Processes (3-4)

Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with PUBPOL 590.

[View course details in MyPlan: SEFS 592](#)

SEFS 595 Graduate Teaching Practicum (1-5, max. 5)

Principles of teaching and learning applied to undergraduate instruction in the School of Environmental and Forest Sciences. Development, delivery, and evaluation of lectures and homework assignments. Graduate teaching experience for SEFS students only. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: SEFS 595](#)

SEFS 600 Independent Study or Research (*-)

Offered: AWSpS.

[View course details in MyPlan: SEFS 600](#)

SEFS 601 Internship (3-9, max. 9)

Graduate internship under the supervision of a faculty member. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: SEFS 601](#)

SEFS 700 Master's Thesis (*-)

Offered: AWSpS.

[View course details in MyPlan: SEFS 700](#)

SEFS 800 Doctoral Dissertation (*-)

Offered: AWSpS.

[View course details in MyPlan: SEFS 800](#)

COLLEGE OF THE ENVIRONMENT SCHOOL OF ENVIRONMENTAL & FOREST SCIENCE BIORESOURCE SCIENCE & ENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

BSE 150 Bioresource Science and Engineering Seminar (1) R. GUSTAFSON

Introduces the science and technology of bioresources, including paper. Faculty, advisers, and guest lectures present on topics throughout the quarter. Credit/no-credit only. Offered: A.

[View course details in MyPlan: BSE 150](#)

BSE 190 Special Topics (1-5, max. 10) NW R. BURA

Introduces current topics or courses under development to address the latest issues in bioresource science and engineering.

[View course details in MyPlan: BSE 190](#)

BSE 201 Introduction to Pulp, Paper, and Bioproducts (3) NW

Broad overview of the science and technology of producing pulp and paper. Introduction of the BSE major course sequence and various career options. Examination of Pacific Northwest pulp and paper production facilities. Offered: W.

[View course details in MyPlan: BSE 201](#)

BSE 202 Pulp and Paper Lab and Field Studies (1) NW

Laboratory and field trip studies in pulp and paper technology. Visits to local forest product manufacturing facilities. Required for BSE majors. Credit/no-credit only. Offered: W.

[View course details in MyPlan: BSE 202](#)

BSE 211 Creativity and Society (5) VLPA/I&S G. ALLAN

Explores the nature of creativity and innovation in U.S. and other societies. Investigates the processes of thinking and techniques of idea generation in fields such as art, music, science, engineering and medicine. Offered: AWS.

[View course details in MyPlan: BSE 211](#)

BSE 231 Technical Communication for Process Engineers (3) NW *S. EWANICK*

Introduces technical communication skills for process engineers. Topics covered include general communication, technical writing, oral presentations and engineering ethics. Students work individually and in teams to complete oral and written assignments based on modern, industrially relevant bioresource and process engineering problems. Prerequisite: Either C LIT 240, both ENGL 109 and ENGL 110, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: Sp.

[View course details in MyPlan: BSE 231](#)

BSE 248 Paper Properties (4) NW

Acquaints students with raw material characteristics, physical and mechanical concepts, nomenclature, and procedures related to evaluating paper and paperboard product properties. Emphasizes structural, optical, mechanical, and moisture related properties. Offered: A.

[View course details in MyPlan: BSE 248](#)

BSE 309 Creativity and Innovation (2) VLPA *G. ALLAN*

Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Offered: jointly with CHEM E 309; Sp.

[View course details in MyPlan: BSE 309](#)

BSE 391 Engineering Principles of Biorefineries (5) NW *F. PACHECO DE RESENDE*

Introduction to biofinery processes, including material and energy balances; sustainability aspects and environmental issues; and process modeling. Application of conservation laws to calculation of flow rates, chemical composition, and heat requirements of non-reactive and reactive systems typical of processes involving lignocellulosic biomass. Prerequisite: A A 260; either CHEM 237 or CHEM 223; MATH 307 Offered: A.

[View course details in MyPlan: BSE 391](#)

BSE 392 Bioresource Transport Phenomena (5) NW *F. PACHECO DE RESENDE*

Focuses on transport phenomena involved in the biofinery processes, including: momentum, heat, and mass transfer; paper drying, transport in biochemical and thermochemical processes, and product separation; and computational tools. Application of conservation laws to calculations of flow rates, chemical composition, and heat requirements involving lignocellulosic biomass. Prerequisite: minimum grade of 2.0 in BSE 391. Offered: W.

[View course details in MyPlan: BSE 392](#)

BSE 399 Undergraduate Internship (1-5, max. 15)

Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: BSE 399](#)

BSE 406 Natural Products Chemistry (5) NW *R. BURA*

Provides knowledge of chemistry of aqueous and solvent-rich systems, natural and synthetic polymers, and of interactions with inorganic materials and trace substances present in biomass processing systems. Covers the chemistry of lignocellulosic biomass components: cellulose, hemicellulose, lignin, and extractives. Presents the fundamental chemistry of biomass conversion process. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

[View course details in MyPlan: BSE 406](#)

BSE 420 Bioresource Engineering I (4) *R. BURA*

Covers chemistry and reaction kinetics of conversion of biomass into molecules and fibers for use in making fuels and high value products. Includes chemical, biological, and thermal conversion of biomass. Develops

applications of reaction kinetics to design reactor configurations. Prerequisite: BSE 406. Offered: W. ¹⁷⁸⁷
[View course details in MyPlan: BSE 420](#)

BSE 421 Bioresource Engineering II (4) R. GUSTAFSON

Introduces basic mass transfer processes and physical basis: diffusion, convection, and mass transfer coefficients. Analyzes separation processes used in forest products and bioresources industries: membrane separations, flow through porous media, leaching and extraction, and evaporation. Includes industrial processes: dialysis, reverse osmosis, fiber web formation, pulp washing, and black liquor evaporation. Prerequisite: minimum grade of 2.0 in both BSE 392 and BSE 420. Offered: Sp.

[View course details in MyPlan: BSE 421](#)

BSE 422 Bioresource Engineering III (4) R. GUSTAFSON

Introduces process simulators and their application to model unit operations and large scale integrated facilities such as biorefineries and pulp and paper mills. Covers applications to optimize processes for production and environmental impact, basic control equipment, process models used in control, types of controllers, and simple controller tuning. Prerequisite: minimum grade of 2.0 in BSE 421. Offered: A.

[View course details in MyPlan: BSE 422](#)

BSE 426 Bioresource Laboratory (4) R. BURA

Covers bioconversion laboratory techniques, focusing on design and operation of conversion processes to produce high value biorenewable products based on chemistry of biomass. Products include ethanol, pulp, glycols, and sugar streams. Includes significant product design component, and hands-on laboratory creation of products based on design. Prerequisite: minimum grade of 2.0 in BSE 420; Q SCI 381 or STAT 311 which may be taken concurrently. Offered: Sp.

[View course details in MyPlan: BSE 426](#)

BSE 430 Papermaking Processes (5)

Examines stock preparation operations (refining, screening, and cleaning) for papermaking and sheet forming as a unit of operations. Considers related unit operations of fluid dynamics and heat transfer as they apply to the commercial process. Covers sheet finishing operations of surface sizing, calendaring, and rewinding. Analyzes physics of fiber webs. Prerequisite: either BSE 392 or CHEM E 340. Offered: A.

[View course details in MyPlan: BSE 430](#)

BSE 436 Pulp and Paper Laboratory II (4)

Paper testing, paper additives, flocculation, drainage, retention, heat transfer, and fluid dynamics in papermaking from virgin and recycled raw materials. Prerequisite: BSE 430. Offered: W.

[View course details in MyPlan: BSE 436](#)

BSE 480 Bioresource Design I (4) I&S/NW R. GUSTAFSON

Design and production of biomass derived products meeting given specifications and financial constraints, integrating coursework knowledge to solve complex, open-ended design problems. Specific considerations in design include: economic, marketability, environmental, sustainability, ethical, health and safety, social, and political. Prerequisite: minimum grade of 2.0 in BSE 406; 2.0 in BSE 420; 2.0 in BSE 430. Offered: W.

[View course details in MyPlan: BSE 480](#)

BSE 481 Bioresource Design II (5) I&S/NW R. GUSTAFSON

Comprehensive design of pulp and paper processes, including: economic feasibility studies; process equipment design, optimization, and control; and overall process integration and layout. Safety and ethics in the design process. Prerequisite: BSE 480. Offered: Sp.

[View course details in MyPlan: BSE 481](#)

BSE 489 Foreign Study (1-5, max. 15)

Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

[View course details in MyPlan: BSE 489](#)

BSE 490 Special Topics (1-5, max. 15)

Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSp.

[View course details in MyPlan: BSE 490](#)

BSE 497 Pulp and Paper Internship (1, max. 3)

Technical and economic analysis of commercial pulp and paper installations. Structured visits to industrial operations to observe technical aspects of pulp and paper curriculum in practice. Preparation of visitation reports and analysis in seminar setting. Offered: AWSpS.

[View course details in MyPlan: BSE 497](#)

BSE 499 Undergraduate Research (1-5, max. 15)

Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

[View course details in MyPlan: BSE 499](#)

COLLEGE OF THE ENVIRONMENT

SCHOOL OF ENVIRONMENTAL & FOREST SCIENCE

ENVIRONMENTAL SCI & RESOURCE MANAGEMENT

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ESRM 100 Introduction to Environmental Science (5) I&S/NW R. HARRISON

Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Cannot be taken for credit if ESC 110 already taken. Offered: AWSpS.

[View course details in MyPlan: ESRM 100](#)

ESRM 101 Forests and Society (5) I&S/NW K. VOGT

Survey course covering forest ecosystems of the world, history of forestry and forest conservation, how forest ecosystems function, wildlife in forests, environmental issues in forestry, forest management, economics and products, and new approaches to forest management. Open to majors and nonmajors. Cannot be taken for credit if CFR 101 already taken. Offered: ASp.

[View course details in MyPlan: ESRM 101](#)

ESRM 150 Wildlife in the Modern World (5) I&S/NW

Covers major wildlife conservation issues in North America. Some global issues are also treated. Examples of topics include the conservation of large predators, effects of toxic chemicals on wildlife, old-growth wildlife, conservation of marine wildlife, recovery of the bald eagle, and gray wolf. Offered: A.

[View course details in MyPlan: ESRM 150](#)

ESRM 200 Society and Sustainable Environments (5) I&S/NW S. ASAH, P. KAHN

Introduces the application of social concepts and theories to understanding and managing urban, urbanizing, and wildland landscapes in a sustainable manner. Of particular interest are factors that shape patterns on the landscape and resulting social and economic benefits. Explores landscapes across the urban to wildland gradient. Offered: WSp.

[View course details in MyPlan: ESRM 200](#)

ESRM 201 Sustaining Pacific Northwest Ecosystems (5) I&S/NW *D. BUTMAN, S. DOTY*

Introduces the principles of ecology across an urban to wildland gradient and discusses how these landscapes can be sustainably managed. Explores basic ecological theories, plant communities, soil, climate, pollution, hydrology, and wildlife in classroom, labs, and field trips. Offered: ASp.

[View course details in MyPlan: ESRM 201](#)

ESRM 210 Introductory Soils (5) NW

Physical, chemical, and biological properties that affect distribution and use patterns of this important ecosystem component. Includes soil morphology and genesis, plant nutrition and nutrient cycling, soil water, microbiology, and application of soil properties to environmental concerns. One Saturday field trip. Offered: A.

[View course details in MyPlan: ESRM 210](#)

ESRM 235 Introduction to Environmental Economics (5) I&S/NW *S. RABOTYAGOV*

Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: jointly with ECON 235/ENVIR 235; SpS.

[View course details in MyPlan: ESRM 235](#)

ESRM 250 Introduction to Geographic Information Systems in Forest Resources (5) NW, QSR

Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSpS.

[View course details in MyPlan: ESRM 250](#)

ESRM 300 Principles of Sustainability (2) I&S/NW

Overview of principles of sustainability, including discussion of current literature, presentation, and discussion with practitioners, and methods for balancing social, economic, and ecological consequences of proposed policies and actions. Students develop a plan to further their studies in natural resources and environmental sustainability. Credit/no-credit only. Offered: W.

[View course details in MyPlan: ESRM 300](#)

ESRM 304 Environmental and Resource Assessment (5) NW, QSR *E. TURNBLOM, D. VOGT*

The processes of measuring, monitoring, and assessment; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Offered: ASpS.

[View course details in MyPlan: ESRM 304](#)

ESRM 311 Soils and Land Use (3) NW

Intended for students concerned with environmental problems in the Puget Sound basin; also for those who intend to become professionally involved in land-planning decisions. Focus is on the significance of soils in understanding environmental problems and in promoting intelligent land-use decisions. Basic concepts of soil systems are presented, stressing those aspects important in making land-planning decisions. Offered: W.

[View course details in MyPlan: ESRM 311](#)

ESRM 315 Natural Resource Issues: Old-Growth and Forest Management (5) I&S/NW *J. FRANKLIN*

Biological and social elements of current conflicts, especially those associated with old-growth and its disposition. Ecology of Pacific Northwest forests and landscapes, history of forest practices, application of emerging science, proposed alternative practices and policies, including analysis of current proposal and its predecessors and successors. Open to majors and nonmajors. Offered: Sp.

[View course details in MyPlan: ESRM 315](#)

ESRM 320 Marketing and Management from a Sustainability Perspective (5) I&S/NW *D. PAUN*

Introduction to business concepts relating to marketing, human resource management, small businesses and

entrepreneurship, and economics in the context of environmental resource management. Offered: AS.¹⁷⁹¹

[View course details in MyPlan: ESRM 320](#)

ESRM 321 Finance and Accounting from a Sustainability Perspective (5) I&S/NW D. PAUN

Introduction to business concepts relating to finance, accounting, and international business in the context of environmental resource management. Offered: WS.

[View course details in MyPlan: ESRM 321](#)

ESRM 323 Silviculture (5) NW E. TURNBLOM

Silviculture techniques, including nursery practices, clear-cutting, seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Multiple-use field trips.

Offered: Sp.

[View course details in MyPlan: ESRM 323](#)

ESRM 325 Environmental Applications of Plants: Bioenergy and Bioremediation (3) NW S. DOTY

Explores current topics in forest bioresources with an emphasis on bioenergy, remediation of pollutants, and carbon sequestration. Offered: A.

[View course details in MyPlan: ESRM 325](#)

ESRM 328 Forestry-Fisheries Interactions (4) NW

Offered: jointly with FISH 328.

[View course details in MyPlan: ESRM 328](#)

ESRM 331 Landscape Plant Recognition (3) NW

Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens.

Hardiness and landscape applications. Offered: jointly with BIOL 331; Sp.

[View course details in MyPlan: ESRM 331](#)

ESRM 350 Wildlife Biology and Conservation (5) NW A. WIRSING

Wildlife ecology and population biology, and interrelationships between wild animals and humans, including encouragement of wildlife population growth and productivity, control of pest populations, and preservation of endangered species with emphasis on forest environments and forest faunas. Prerequisite: either BIOL 162, BIOL 180, BIOL 220, or ESRM 162, any of which may be taken concurrently. Offered: A.

[View course details in MyPlan: ESRM 350](#)

ESRM 351 Wildlife Research Techniques (5) NW

Scientific approaches to the field study of wildlife populations including study design, species identification, data collection, and report writing. Emphasis on direct experience with current field techniques used in the study of vertebrate populations. Prerequisite: either BIOL 162, BIOL 180, ESRM 162, or ESRM 350. Offered: Sp.

[View course details in MyPlan: ESRM 351](#)

ESRM 362 Introduction to Restoration Ecology (5) NW/I&S J. BAKKER

An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ENVIR 362; A.

[View course details in MyPlan: ESRM 362](#)

ESRM 368 Natural Resource Measurements (4) NW E. TURNBLOM

Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either IND E 315, Q SCI 381, STAT 220, or STAT

311. Offered: W.

[View course details in MyPlan: ESRM 368](#)

ESRM 371 Environmental Sociology (5) I&S/NW S. ASAH

Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ENVIR 379/SOC 379; A.

[View course details in MyPlan: ESRM 371](#)

ESRM 381 Management of Wildland Recreation and Amenities (3) NW

Introduction and overview of wildland recreation and amenities management. Agency history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: A.

[View course details in MyPlan: ESRM 381](#)

ESRM 399 Field or Teaching Internship (1-5, max. 15)

Internship experience in undergraduate teaching or in the environmental field, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ESRM 399](#)

ESRM 400 Natural Resource Conflict Management (3) I&S/NW C. RYAN

Introduction to the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.

[View course details in MyPlan: ESRM 400](#)

ESRM 401 Spring Comes to the Cascades (3) NW

Examines the interaction between forests, environment, and growth at three locations in the Cascades, from lowlands to alpine. Field trips and associated observations are linked to classroom or group project activities and are used to understand a number of ecological, physiological, and meteorological concepts. Offered: Sp.

[View course details in MyPlan: ESRM 401](#)

ESRM 403 Forest and Economic Development in the Developing World (4) NW

Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of forest-based economic development in different countries and regions. Offered: A.

[View course details in MyPlan: ESRM 403](#)

ESRM 404 Plant Microbiology Laboratory (5) NW S. DOTY

Focuses on measuring impacts of beneficial microorganisms on plants. Assays include colonization of plants, N stress alleviation, photosynthesis, and growth enhancement. Microorganisms are characterized by phytohormone production, provision of nutrients, and growth. Microbial strains are identified using standard molecular analysis methods (PCR, cloning, sequencing). Includes short lectures. Prerequisite: Prerequisite: BIOL 180; either CHEM 120 or CHEM 142; recommended ESRM 201. Offered: WS.

[View course details in MyPlan: ESRM 404](#)

ESRM 405 Growing Stuff: Ecology, Economy, and Culture of Resource-Production Ecosystems (5) I&S/NW S. HARRELL

Examines the connections between ecological, economic, and cultural aspects of local ecosystems that produce

natural resources, through three case studies involving reading, writing, class discussion, and three required¹⁷⁹³ Saturday or weekend field trips. Case studies may include forest products, seafood, dairy products, biofuels, orchard crops, or others. Offered: jointly with ANTH 410/ENVIR 410; Sp.

[View course details in MyPlan: ESRM 405](#)

ESRM 409 Soil Ecology (5) NW

Soil organisms in forest and other ecosystems, decomposition, nutrient cycling. Nitrogen transformation, mycorrhizae, effects of forest management. Offered: A, even years.

[View course details in MyPlan: ESRM 409](#)

ESRM 410 Forest Soils and Site Productivity (5) NW

Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required. Offered: A, odd years.

[View course details in MyPlan: ESRM 410](#)

ESRM 411 Plant Propagation: Principles and Practice (3) NW S. KIM

Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Offered: Sp.

[View course details in MyPlan: ESRM 411](#)

ESRM 412 Native Plant Production (3) NW J. BAKKER

Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Offered: Sp.

[View course details in MyPlan: ESRM 412](#)

ESRM 413 Soil Genesis and Classification (5) NW

Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest and grassland soils in Washington. Offered: Sp, even years.

[View course details in MyPlan: ESRM 413](#)

ESRM 414 Forest Soil Fertility and Chemistry (3) NW

Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Offered: Sp, odd years.

[View course details in MyPlan: ESRM 414](#)

ESRM 415 Biology, Ecology, and Management of Plant Invasions (5) NW

Explores how biological invasions are one of the most serious threats to the preservation of biodiversity worldwide. Explores the vectors which move plants and their pests, the biology and impacts of the invasive species, and management and policy approaches. Prerequisite: either BIOL 162, BIOL 220, BIOL 333, BIOL 471, BIOL 472, ESRM 201, ESRM 401, ESRM 472, or ESRM 473. Offered: A.

[View course details in MyPlan: ESRM 415](#)

ESRM 420 Wildland Fire Management (5) NW E. ALVARADO-CELESTIN

Principles of wildland fire behavior, ecology, and management. Weather, fuels, and topography effects on fire behavior. Forest structure influence on historical and current fire ecology. Principles of firesafe forests. Management issues of fire control and use in wilderness, multiple-use forest, and the wildland-urban interface. Offered: Sp.

[View course details in MyPlan: ESRM 420](#)

ESRM 425 Ecosystem Management (5) NW J. FRANKLIN

Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Offered: A.

[View course details in MyPlan: ESRM 425](#)

ESRM 426 Wildland Hydrology (4) NW

Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.

[View course details in MyPlan: ESRM 426](#)

ESRM 428 Principles of Silviculture and Their Application (5) NW

Focuses on the biology of major tree species in the PNW and their use in silviculture, stand development in plantation forest systems and its relationship to forest yield, the advantages and limitations of plantation silviculture relating to specific biotic, abiotic, and economic conditions, and management for objectives other than time yield. Prerequisite: ESRM 323. Offered: A.

[View course details in MyPlan: ESRM 428](#)

ESRM 429 Environmental Science and Resource Management Seminar (1, max. 6) NW

Weekly presentations covering environmental topics by scientists on and off campus Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: ESRM 429](#)

ESRM 430 Remote Sensing of the Environment (5) NW Moskal

Focuses on hyperspatial remote sensing fundamentals, interpretation and manipulation of aerial photography, satellite imagery, and Light Detection and Ranging (LiDAR). Uses traditional and 'state of the art' image processing techniques. Students learn to evaluate available hyperspatial remote sensing data sources and design simple projects related to environmental applications. Offered: W.

[View course details in MyPlan: ESRM 430](#)

ESRM 431 Ecopsychology (5) I&S P. KAHN

Explores psychology of the human relationship with nature. Critically examines how ecopsychology can impact urban sustainability, human health, environmental education, and the design of new technologies. Specific topics include evolutionary psychology; human-animal interaction; biophilia; children and nature; indigenous cultures; and ecotherapy. Offered: jointly with ENVIR 431/PSYCH 431; W.

[View course details in MyPlan: ESRM 431](#)

ESRM 433 Airborne Lidar for Remote Sensing of Vegetation and Geomorphology (5) L. MOSKAL

Focuses on the applications of lidar data, its interpretation, and processing. Students apply information learned from lectures and laboratory projects to a final project that analyzes vegetation structure, geomorphology, or hydrology. Prerequisite: either ESRM 250, SEFS 520, ESRM 430, FISH 452, FISH 502, FISH 552, or GEOG 360 Offered: Sp.

[View course details in MyPlan: ESRM 433](#)

ESRM 435 Insect Ecology (3) NW

Covers major principles of ecology as they apply to insects, and follows a level of organization from the individual to populations to communities. Applications of insect ecology are extended to insect ecosystem services, conservation, and pest management. Prerequisite: BIOL 161, BIOL 180, BIOL 200, BIOL 220, or ESRM 161. Offered: Sp.

[View course details in MyPlan: ESRM 435](#)

ESRM 436 Laboratory in Insect Ecology (2) NW

Supplements the lecture course (ESRM 435) by providing hands-on lab and field experience on ecological principles as they pertain to insects. Prerequisite: ESRM 435, which may be taken concurrently.

[View course details in MyPlan: ESRM 436](#)

ESRM 441 Landscape Ecology (5) NW *J. LAWLER*

Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resources management (e.g., cumulative effects, cutting, patterns, anadromous fisheries, management of wildlife populations, and open-space planning). Offered: A.

[View course details in MyPlan: ESRM 441](#)

ESRM 447 Watershed Ecology and Management (3) NW *G. HOLTGRIEVE*

Investigation of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and function of flowing aquatic ecosystems and their catchments. Topics include river/stream hydrology, geomorphology, nutrient spiraling, food webs, and global change. Case studies explore human interactions with rivers and approaches to river management. Prerequisite: BIOL 180 or ESRM 201 or FISH 101. Offered: jointly with FISH 447; Sp.

[View course details in MyPlan: ESRM 447](#)

ESRM 448 Watershed Ecology and Management Lab (2)

Hands-on examination of river and stream ecosystems with emphasis on physical and biological processes, field methods, analysis of data, and writing scientific papers, includes field trips. Prerequisite: ESRM 447 or FISH 447 which may be taken concurrently. Offered: jointly with FISH 448; Sp.

[View course details in MyPlan: ESRM 448](#)

ESRM 450 Wildlife Ecology and Conservation (5) NW *A. WIRSING*

Covers principles of wildlife ecology such as habitat use and selection, population and metapopulation dynamics, and predator-prey interactions, and illustrates how they apply to wildlife conservation problems with terrestrial, aquatic, and marine wildlife. Prerequisite: minimum grade of 2.0 in ESRM 350. Offered: W.

[View course details in MyPlan: ESRM 450](#)

ESRM 452 Field Ornithology (3) NW *J. MARZLUFF*

Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques, feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: ESRM 456 which may be taken concurrently; either BIOL 162, BIOL 180, or BIOL 220, any of which may be taken concurrently. Offered: A.

[View course details in MyPlan: ESRM 452](#)

ESRM 455 Wildlife Seminar (1, max. 8) NW

Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: ESRM 455](#)

ESRM 456 Biology and Conservation of Birds (3) NW *J. MARZLUFF*

Major principles of natural history, avian reproductive biology, population ecology, and national and international conservation strategies for both hunted and un hunted birds. Emphasis on western United States. Prerequisite: either BIOL 162, BIOL 180, or BIOL 220, ESRM 162, any of which may be taken concurrently. Offered: A.

[View course details in MyPlan: ESRM 456](#)

ESRM 457 Fish and Wildlife Toxicology (3/5) NW

Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with FISH 455; W.

[View course details in MyPlan: ESRM 457](#)

ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW *J. MARZLUFF*

Biological underpinnings and political realities of endangered species management, including: legal issues,

recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction,¹⁷⁹⁶ species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: W.
[View course details in MyPlan: ESRM 458](#)

ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW *J. MARZLUFF, A. WIRSING*

Extended field course offers wildlife science students personal interactions with wildlife managers and wildlife populations in strategic public and private lands in the northwestern United States and southern Canada. Students share costs of trip. Offered when there is sufficient student demand. Prerequisite: ESRM 350; may not be repeated. Offered: Sp.

[View course details in MyPlan: ESRM 459](#)

ESRM 460 Power, Privilege, and Preservation (5) I&S/NW, DIV

Critically examines strategies of resource managers to integrate local communities and cultures in protected areas management. Explores issues of power, privilege, and injustice and their impacts on individuals, society, and resource management decisions. Examines the potential for more socially just and ecologically sustainable approaches to protected areas management. Offered: jointly with ENVIR 460; A.

[View course details in MyPlan: ESRM 460](#)

ESRM 461 Forest Management and Economics (5) I&S/NW

Presents important contemporary decision tools, especially how they are used by forest managers to interpret, critique, and develop their basic applications in forestry. Topics include optimization techniques, including linear and nonlinear programming, concepts in interest and time evaluation of alternatives, marginal cost analysis, and computer spreadsheet assisted analysis. Prerequisite: Q SCI 381 or STAT 311; Q SCI 291 or MATH 124. Offered: Sp.

[View course details in MyPlan: ESRM 461](#)

ESRM 462 Restoration Ecology Capstone: Introduction (2-) NW

First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with BES 462/T BIOL 462.

[View course details in MyPlan: ESRM 462](#)

ESRM 463 Restoration Ecology Capstone: Proposal and Plan (-3-) NW

Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462. Offered: jointly with BES 463/T BIOL 463.

[View course details in MyPlan: ESRM 463](#)

ESRM 464 Restoration Ecology Capstone: Field Site Restoration (-5) NW

Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with BES 464/T BIOL 464.

[View course details in MyPlan: ESRM 464](#)

ESRM 465 Economics of Conservation (3) I&S/NW

Economic principles and their use in the analysis of contemporary conservation problems. Particular emphasis directed toward the conservation of forest resources in the Pacific Northwest and related policy issues. Offered: A.

[View course details in MyPlan: ESRM 465](#)

ESRM 468 Forest Operations (5)

Examines forest land surveying, low volume road access planning, and timber harvesting concepts. Low volume road design principles and practical application of field road location. Overview of road drainage design, construction techniques and maintenance. Reviews basic harvest systems and setting design processes, including cost, production control, environmental and safety considerations. Prerequisite: ESRM 250; ESRM 368; ESRM

323 which may be taken concurrently. Offered: Sp.

[View course details in MyPlan: ESRM 468](#)

ESRM 470 Natural Resource Policy and Planning (5) I&S/NW

Introduction to and analysis of environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: A.

[View course details in MyPlan: ESRM 470](#)

ESRM 473 Restoration in North America (5) NW K. EWING

Investigates the vegetation and climate of North American ecosystems. Includes an ecosystem by ecosystem review of how restoration is done in each system, including some tropical ecosystems. Offered: W.

[View course details in MyPlan: ESRM 473](#)

ESRM 474 Restoration Problem Solving: Ecological Engineering (5) J. FRIDLEY

Exposes students to real-life problem solving that involves the design and manipulation of natural systems to perform ecological function. Focuses on the analysis, design, and implementation of discrete projects. Includes projects dealing with plants, hydrology, earthwork, waste and pollution management, as well as other resources and problems. Offered: A.

[View course details in MyPlan: ESRM 474](#)

ESRM 478 Plant Ecophysiology (5) NW S. KIM

Explores physiological mechanisms that underlie ecological observations, including how above- and below-ground microclimates develop and affect plant physiological processes. Discusses acclimation to environmental change along with species differences in physiological processes and plant's occupation of heterogeneous environments. Laboratories emphasize field measurement techniques. Prerequisite: either BIOL 180, B BIO 180, TESC 120, ESRM 201, ESRM 162, or FISH 162. Offered: jointly with BIOL 424; W.

[View course details in MyPlan: ESRM 478](#)

ESRM 479 Restoration Design (5) I&S/NW K. EWING, J. FRIDLEY

Covers the design process in ecosystem restoration by presenting a series of weekly design problems that students solve as teams. Categorizes problems by disturbance type, including restoration necessitated by agriculture, urbanization, salt-marsh filling or diking, construction of transport corridors, etc. Includes a team design portfolio. Offered: Sp.

[View course details in MyPlan: ESRM 479](#)

ESRM 480 Landscape Plant Science and Sustainable Management (5) NW S. KIM

Principles and practices of plant management in urban and modified landscapes. Physiological basis for plant management and selection; site analysis and preparation; plant installation and aftercare; plant performance evaluation; long-term sustainable management and plant health care. Offered: A, even years.

[View course details in MyPlan: ESRM 480](#)

ESRM 485 Environmental Planning and Permitting in Practice (5) I&S T. WILDERMUTH

Advanced survey of environmental planning and permitting as encountered by environmental and natural resource professionals in Washington State and beyond. Focuses on Washington State acts (SEPA, SMA, GMA) and Federal systems (NEPA, CWA ESA) that shape environmental land use planning and federal planning and permitting systems Offered: jointly with ENVIR 485; W.

[View course details in MyPlan: ESRM 485](#)

ESRM 489 Foreign Study (1-5, max. 15)

Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

[View course details in MyPlan: ESRM 489](#)

ESRM 490 Special Topics (1-5, max. 15)

Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSpS.

[View course details in MyPlan: ESRM 490](#)

ESRM 491 Field Studies (1-5, max. 10)

Independent field study or one time organized field courses with emphasis outside the traditional classroom. Offered: AWSpS.

[View course details in MyPlan: ESRM 491](#)

ESRM 494 Senior Capstone Proposal (5-)

Selection of a capstone topic and type, either thesis or project. Students select a faculty adviser to assist them in the proposal writing process. Regular or Honors credit. Prerequisite: ESRM 200; ESRM 201; ESRM 300; ESRM 304. Offered: AWSpS.

[View course details in MyPlan: ESRM 494](#)

ESRM 495 Senior Project (-5)

Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

[View course details in MyPlan: ESRM 495](#)

ESRM 496 Senior Thesis (-5)

Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisers to complete field or laboratory research and then prepare the senior thesis. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

[View course details in MyPlan: ESRM 496](#)

ESRM 499 Undergraduate Research (1-5, max. 15)

Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

[View course details in MyPlan: ESRM 499](#)

Marine and Environmental Affairs

[Display as tabs](#)

School Overview

3707 Brooklyn Avenue Northeast

The School of Marine and Environmental Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses in marine affairs, economics, law, marine sciences, and public affairs, with emphasis on human dimensions of the environment.

Master of Marine Affairs

The School of Marine and Environmental Affairs offers an internationally recognized master's degree program for launching careers in marine policy and administration. Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water.

A major program objective is to prepare students for professional careers in policy making, management, teaching, and research. Breadth of study is emphasized, and all students are expected to gain familiarity with relevant aspects of the social, technological, and environmental sciences. In addition, each student is expected to develop a professional and scholarly proficiency in a particular aspect of marine affairs.

Completion of the MMA program normally requires two academic years for students who have received a baccalaureate degree. During the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. During the second year, a special competence is developed in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and a thesis is prepared and presented under the guidance of a faculty Supervisory Committee. Individual courses of study may be adjusted to accommodate prior experience and academic

background. Mid-career and other qualifying students can apply to follow a non-thesis track emphasizing additional coursework and a degree project.

Admission Requirements

Admission to the School of Marine Environmental Affairs is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general-test scores, completed departmental supplementary information form, three letters of recommendation, official academic transcripts, and a statement of career objectives. Applicants must apply directly to, and be accepted by, the University's Graduate School. Course sequences begin each autumn quarter, and new students normally are admitted only at that time.

Degree Requirements

59 credits as follows:

- **The Core Curriculum (29 credits minimum)**

1. Introduction to Marine Affairs: SMEA 500 , SMEA 501
2. Economics: SMEA 536 . (The Graduate Program Coordinator may waive SMEA 536 for students with adequate undergraduate training, but students must take at least one economics course at the 400 or 500 level. The following courses are suggested: SMEA 537 , SMEA 538 , ECON 435 , ECON 436 .)
3. Marine Law: SMEA 506/LAW 561 or SMEA 515/LAW 565
4. Policy Analysis: SMEA 519 or PB AF 513
5. Policy Processes: one of the following: SMEA 507 , SMEA 508 , SMEA 521 , SMEA 523 , PB AF 590/CFR 592 (when course content appropriate; check with Graduate Program Coordinator); PB AF 592/FM 571
6. Marine Science: SMEA 591 . (The Graduate Program Coordinator may waive from SMEA 591, but students must take at least one 400- or 500-level science course. The following courses are suggested: SMEA 510 ; FISH 450 (4); FISH 454 ; BIOL 472 ; or BIOL 473 .)
7. Quantitative Skills: one of the following: The required skill level is equivalent to intermediate statistics, including an understanding of point estimates, confidence intervals and regression equations. Students not meeting this requirement through undergraduate classes or experience should take one appropriate course while at SMEA. Recommended courses include: Q SCI 381 , STAT 301 , or STAT 311 . (Although 300-level courses do not qualify for graduation credits, the school waives 3 credits of the 59-credit SMEA graduation requirement for students completing one of these courses.)
8. Social Science Data Collection and Analysis: one of the following: SMEA 476 , SMEA 512 , PB AF 507 , GEOG 425 , or CRF 400
9. Marine Affairs Seminar: SMEA 550

- **Electives (20 credits minimum – or 10 additional elective credits for non-thesis track):** Elective credits must qualify as graduate credit (typically 400- or 500-level courses) offered in any UW department or school. Students should consult their advisor or thesis committee chair in choosing a set of elective courses. At least 6 credits, and two courses must come from the following list of SMEA courses: SMEA 433 , SMEA 480 , SMEA 485 , SMEA 499 (var.) (when subject is African Population, Development and Marine Environment), SMEA 509 , SMEA 510 , SMEA 514 , SMEA

516 , SMEA 517 , SMEA 540 , SMEA 555 , SMEA 581 , SMEA 550 (cannot simultaneously be used to meet core requirements).

- **The Thesis and Thesis Presentation (10 credits minimum – for thesis track students):** SMEA 700 (minimum 9 credits); SMEA 570 .
- **Career Skills (non-credit requirement):** First year: One career counseling appointment during fall quarter. One resume review session during winter quarter. Second year: One career counseling appointment during fall quarter. One resume review session during winter quarter.

Financial Aid

The School of Marine Affairs has a limited number of positions for graduate student appointments as research assistants. Applicants in need of support are urged to investigate outside sources of funding.

COLLEGE OF THE ENVIRONMENT SCHOOL OF MARINE & ENVIRONMENTAL AFFAIRS SCHOOL MARINE AND ENVIRONMENTAL AFFAIRS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

SMEA 103 Society and the Oceans (5) I&S/NW

Explores the social and policy dimensions of the ocean environment and ocean management policy. Pays attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons." Offered: jointly with ENVIR 103/JSIS B 103.

[View course details in MyPlan: SMEA 103](#)

SMEA 407 International Organizations and Ocean Management (3) I&S

Surveys the manner in which international regimes and organizations govern and manage ocean use. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain organizations in different issues or regions, such as climate change or the Arctic.

[View course details in MyPlan: SMEA 407](#)

SMEA 430 Development and the Environment (3) I&S, DIV Dolsak

Critically examines policy approaches that balance economic development, natural resource use/environmental protection, and socioeconomic and political diversity. Examined policy approaches include market instruments, standards, information-based regulation, and corporate responsibility. Offered: A.

[View course details in MyPlan: SMEA 430](#)

SMEA 433 Environmental Degradation in the Tropics (5) I&S/NW Christie

Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with ENVIR 433/JSIS B 433.

[View course details in MyPlan: SMEA 433](#)

SMEA 476 Introduction to Environmental Law and Process (3) I&S Bryant

Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with ENVIR 476; A.

[View course details in MyPlan: SMEA 476](#)

SMEA 480 Human Dimensions of Fishery Management (3) I&S/NW

Techniques and philosophy for conservation, management, and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with FISH 480.

[View course details in MyPlan: SMEA 480](#)

SMEA 485 Pacific Recreation and Tourism Issues (3) I&S/NW, DIV Miller

Examines how marine tourism links people to one another and to the environment. Utilizes concepts from cultural anthropology, sociology, political science, geography, ecology, conservation biology, and planning. Topics include: ecotourism, ethnic tourism, marine parks and protected area, fisheries, sustainable development, tourism ethics, and marine environmental education.

[View course details in MyPlan: SMEA 485](#)

SMEA 499 Undergraduate Research (1-15, max. 15)

Research on assigned topics under the supervision of faculty members.

[View course details in MyPlan: SMEA 499](#)

SMEA 500 Introduction to the Human Dimensions of Global Change (3) D. FLUHARTY, T. LESCHINE

Introduces students to human dimensions of global change in the marine environment. Examines how changes are physical, social, and institutional; and how global climate change affects the ability of ecosystems to provide services that support humankind. Explores changes the use of coastal and ocean resources. Offered: A.

[View course details in MyPlan: SMEA 500](#)

SMEA 501 Integrated Marine Affairs Practice (3)

Survey of tools used in integrated assessment of contemporary problems in marine affairs explored through evaluation and comparison of theory and practical application. Prerequisite: SMEA 500 plus two of the following: SMEA 519, SMEA 536, SMEA 591, or permission of instructor. Instructors: Allison Offered: W.

[View course details in MyPlan: SMEA 501](#)

SMEA 502 Decision Making and Action Taking in Marine Affairs (3) P. CHRISTIE

Focuses on the dynamic interaction between human- and natural-world marine environmental systems and the policy- and decision-making, implementation, evaluation, and adjustment that must follow for effective response to problems that emerge within the human dimensions of global change in the marine environments framework. Prerequisite: SMEA 500; SMEA 501.

[View course details in MyPlan: SMEA 502](#)

SMEA 506 International Law of the Sea (3)

[View course details in MyPlan: SMEA 506](#)

SMEA 507 International Organizations and Ocean Management (3)

Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with PUBPOL 538.

[View course details in MyPlan: SMEA 507](#)

SMEA 508 National Marine Policy Processes (3) Dolsak

Comparative institutional dimensions of marine policy processes. Marine policy context at the national level and

the dynamics that drive policy formulation and policy implementation.

[View course details in MyPlan: SMEA 508](#)

SMEA 509 Integrated Coastal Management (3)

Managing multiple uses of coastal waters and the adjacent land; conflicts arising from competition for space and resources; organization, scientific, and economic problems associated with coastal management; planning and management experience in the United States and Southeast Asia. Prerequisite: SMEA 500 or permission of instructor. Instructors: Christie

[View course details in MyPlan: SMEA 509](#)

SMEA 510 Topics in Marine Ecology (3) *Klinger*

Study of ecological principles as they apply to marine species, populations, and ecosystems, using current examples from the primary literature, including contemporary issues such as species declines, species additions, pollution, and global change. Offered: W.

[View course details in MyPlan: SMEA 510](#)

SMEA 511 Coastal Environment Management (3)

Evaluation of human uses of the coastal and upland areas in the context of coupled social-ecological systems. Concepts and techniques for evaluation and practical application.

[View course details in MyPlan: SMEA 511](#)

SMEA 512 Interviewing Methods and Environmental Topics (3) *Miller*

Focuses on qualitative techniques employed by social scientists and other researchers (e.g., sociologists, cultural anthropologists, political scientists, journalists, reporters) in interview situations. Students conduct interviews and limited participant observation with people in public, private, and activist sectors. Relevant to students with interests in marine affairs, forestry, fisheries, and environmental studies.

[View course details in MyPlan: SMEA 512](#)

SMEA 514 Marine Pollution Management Issues (3) *Leschine*

Management and policy aspects of marine environmental protection, emphasizing the two-way interaction between environmental managers and environmental and policy scientists which shapes policy.

[View course details in MyPlan: SMEA 514](#)

SMEA 515 U.S. Coastal and Ocean Law (3-5) *Kelly*

Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation.

[View course details in MyPlan: SMEA 515](#)

SMEA 517 Marine Uses: Transportation and Commerce (3)

Role of the oceans in the transportation of people and materials, character and trends in vessel design and terminal facilities, pattern and nature of industry organization, regulations, economics of the shipping industry, management of fleets and vessels, individuals at sea and ashore, national policies affecting the merchant marine and port facilities. Prerequisite: SMEA 500 or permission of instructor.

[View course details in MyPlan: SMEA 517](#)

SMEA 519 Marine Policy Analysis (3) *Dolsak*

Goal is appreciation for and basic working knowledge of techniques used in policy analysis. Techniques are explored in both quasi-realistic settings and in application to real world problems of marine policy.

[View course details in MyPlan: SMEA 519](#)

SMEA 521 Climate Change Governance (3)

Exploration of major scientific, policy, and legal issues pertaining to governance of global climate change mitigation and adaptation by a diverse set of governmental and non-governmental actors. Offered: A.

[View course details in MyPlan: SMEA 521](#)

SMEA 523 International Science and Technology Policy (3) *Dolsak*

Analyzes the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries. Deals with international implications as countries make policies in regional and global organizations. Examples chosen from space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploration.

[View course details in MyPlan: SMEA 523](#)

SMEA 525 Marine Protected Area Management and Science (3) *Fluharty*

Examines management and scientific issues involved with the design, establishment, operation, and maintenance of MPAs. Offered: Sp.

[View course details in MyPlan: SMEA 525](#)

SMEA 530 Development and the Environment (3) *Dolsak*

Examines two intertwined concepts that are frequently in conflict, economic development and the environment. Examines sustainable development, growth management, sustainable yield, and corporate social responsibility; the emergence, effectiveness, and their relationships with democracy and equity. Offered: A.

[View course details in MyPlan: SMEA 530](#)

SMEA 536 Applied Microeconomics for Marine Affairs (3)

Acquaints students with microeconomic tools commonly employed in policy analysis. Emphasis is placed on mastery of basic concepts, definitions, and models useful to marine policy, including determinants of price and outputs in competitive markets, effects of other market structures, market failure, and applied welfare economics.

[View course details in MyPlan: SMEA 536](#)

SMEA 537 Economic Aspects of Marine Policy (3)

Development of pertinent economic concepts and their application to selected topics in marine policy decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with ECON 537; W.

[View course details in MyPlan: SMEA 537](#)

SMEA 538 Economics of Living Marine Resources (3)

Develops pertinent economic concepts and applications for conservation, regulation, and restoration of fisheries and other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Offered: jointly with ECON 538; Sp.

[View course details in MyPlan: SMEA 538](#)

SMEA 539 U.S. Fisheries Management and Policy (3)

Examination of basic laws and policies in the US that govern fisheries management and their implementation by managers at federal, tribal, state, and international levels. Includes lectures, guest speakers, and field trips. Offered: jointly with FISH 539.

[View course details in MyPlan: SMEA 539](#)

SMEA 540 International Strategic Planning for Marine Resources (3)

Marine economies are affected by declining resources, population pressure, and economic globalization. International examples and case studies are used to explore opportunities for strategic planning. Prerequisite: SMEA 500 or permission of instructor. Instructors: Kaczynski Offered: A.

[View course details in MyPlan: SMEA 540](#)

SMEA 550 Special Topics in Marine Studies (1-3, max. 18)

Examination of various aspects of marine studies. Content varies, depending upon the interests of the faculty and students. Intended for the joint participation by the faculty and advanced students in the investigation of selected topics. One or more groups are organized each quarter.

[View course details in MyPlan: SMEA 550](#)

SMEA 570 Thesis Presentation (1) *Fluharty*

Completion of the thesis requirement for SMEA. Prepare a professional presentation to a peer audience.

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: SMEA 570](#)

SMEA 571 Non-Thesis Seminar (1) *Leschine*

Capstone course for students enrolled in non-thesis track to synthesize and integrate their learning into concrete products. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: SMEA 571](#)

SMEA 581 Case Study Research: Design and Methods (3)

Provides in-depth training in case study theory, design, and methods. Designed for exploring prospectus ideas or beginning analysis of thesis research. Through readings, discussions, exercises, and lectures, students learn how to select units of analysis, control data quality, and collect, analysis, and report data. Offered: jointly with FISH 581.

[View course details in MyPlan: SMEA 581](#)

SMEA 584 Statistics for Marine and Environmental Policy (3) *S. JARDINE*

Surveys statistical approaches to data analysis with applications to marine and environmental policy, including descriptive statistics, data visualization, and hypothesis testing. Students learn how to make and use data-based claims, critically examine properties and limitation of various datasets relevant for marine and environmental policy, and use appropriate statistical software. Offered: A.

[View course details in MyPlan: SMEA 584](#)

SMEA 585 Climate Impacts on the Pacific Northwest (4) *Mantua, Snover*

Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ENVIR 585/ESS 585; Sp.

[View course details in MyPlan: SMEA 585](#)

SMEA 591 Marine Science in the Coastal Zone (3) *R. KELLY*

Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with OCEAN 591; A.

[View course details in MyPlan: SMEA 591](#)

SMEA 600 Independent Study or Research (*-)

[View course details in MyPlan: SMEA 600](#)

SMEA 650 Marine and Environmental Affairs Capstone Project (4-5, max. 9) *N. DOLSAK*

Student teams develop, manage, and complete an applied project relevant to marine or environmental affairs, in collaboration with an outside stakeholder and in consultation with faculty adviser.

Oceanography

[Display as tabs](#)

School Overview

108 Oceanography Teaching Building

Oceanography - study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere - is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean's resources for the benefit of humanity. As an interdisciplinary science, oceanography integrates the basic principles of biology, chemistry, geology, physics, geophysics, mathematics, botany, zoology, meteorology, and geography. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. Oceanography is divided into four areas of emphasis:

Biological Oceanography examines the processes governing the distribution, abundances, and production of plants, animals, and nutrients in the oceanic ecosystem. Emphasis is on investigations of bacteria, phytoplankton, zooplankton, and benthic organisms.

Chemical Oceanography investigates the complex chemistry, distribution, and cycling of dissolved substances, nutrients, and gases in seawater, the mechanisms controlling them, and their origins and fates.

Marine Geology and Geophysics studies marine sediments (their formation, transport, and deposition); ocean basin formation (plate tectonics); processes governing shoreline formation; and the origin, structure, and history of the oceanic crust and upper mantle.

Physical Oceanography endeavors to understand and predict motions in the sea from millimeters through tidal and current scales to the great ocean gyres, the distribution of physical properties (temperature, salinity, sea ice), and air-sea interaction and its implications for climate.

student@ocean.washington.edu

The School of Oceanography offers the following programs of study:

- Bachelor of Arts degree with a major in oceanography
- Bachelor of Science degree with a major in oceanography
- Specializations include biological, chemical, or physical oceanography, or marine geology and geophysics
- A minor in oceanography
- A minor in marine biology (offered jointly with the Departments of [Biology](#) and [Aquatic and Fishery Sciences](#))
- A minor in climate science (offered jointly with the Departments of [Atmospheric Sciences](#) and [Earth and Space Sciences](#))
- A minor in arctic studies (offered jointly between the [Jackson School of International Studies](#) and the [School of Oceanography](#))

Bachelor of Arts

Suggested Pre-College Courses: Interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, physics, and earth sciences recommended.

Suggested First- and Second-Year College Courses: MATH 124; CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS 211; PHYS 121; either OCEAN 215 or CSE 160; OCEAN 200, OCEAN 201, OCEAN 210, OCEAN 220, OCEAN 285, and OCEAN 295; and English composition.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

All majors must satisfy the College of the Environment general education requirements. University-required additional writing credits may include OCEAN 220, OCEAN 443, and OCEAN 445.

Major Requirements

Minimum 104 credits, to include the following:

1. Core requirements (74 credits): PHYS 121; MATH 124, MATH 125; CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS 211; OCEAN 200, OCEAN 201, OCEAN 210, either OCEAN 215 or CSE 160, OCEAN 220, OCEAN 285, OCEAN 295, OCEAN 320, OCEAN 330, OCEAN 351
2. Elective foundational science (5 credits): one of PHYS 122, MATH 126, CHEM 152, BIOL 220, or OCEAN 270
3. 300- or 400-level oceanography coursework that may include the senior thesis sequence, selected in the student's area of specialization, in consultation with a faculty adviser (minimum 15 credits)
4. Upper-division science, mathematics, or engineering, selected in the student's area of specialization, in consultation with a faculty adviser (10 credits)

Bachelor of Science

Suggested Pre-College and First- and Second-Year College Courses: Same as for Bachelor of Arts degree (shown above)

Department Admission Requirements

Students in good academic standing may declare this major at any time.

General Education Requirements

Same as for the Bachelor of Arts degree (shown above).

Major Requirements

Minimum 116 credits, to include the following:

1. *Core requirements (74 credits):* PHYS 121 ; MATH 124, MATH 125; CHEM 142; BIOL 180, BIOL 200; ESS 210 or ESS211; OCEAN 200, OCEAN 201, OCEAN 210, either OCEAN 215 or CSE 160, OCEAN 220, OCEAN 285, OCEAN 295, OCEAN 320, OCEAN 330, OCEAN 351.
2. *Senior thesis sequence (8 credits):* OCEAN 443, OCEAN 444, OCEAN 445
3. *Elective foundational science (5 credits):* one of PHYS 122, MATH 126, CHEM 152, BIOL 220, or OCEAN 270
4. 300- or 400-level oceanography coursework selected in the student's area of specialization, in consultation with a faculty adviser (9 credits)
5. Upper-division science, mathematics, or engineering, selected in the student's area of specialization, in consultation with a faculty adviser (20 credits)

Students with introductory science and mathematics courses equivalent to those listed are encouraged to contact the Oceanography adviser.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Minor

Minor Requirements: 26 credits as follows:

1. OCEAN 200, OCEAN 210
2. One of the following sequences: OCEAN 285 and OCEAN 320, or OCEAN 295 and OCEAN 330
3. 9 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

Minor in Arctic Studies: See entry for [Arctic Studies](#) in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Minor in Marine Biology: See entry for [Marine Biology](#) in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Minor in Climate Science: See entry for [Climate Science](#) in the Interdisciplinary Undergraduate Programs section of the General Catalog.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard oceanographic research and data analysis and interpretation. Students engage in fieldwork and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally students acquire familiarity with the specialized instruments of oceanographic research.

The program prepares students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.

- *Instructional and Research Facilities:* The school has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The school operates two research vessels: the 274 foot R/V *Thomas G. Thompson*, used chiefly for open ocean research throughout the world, and the 65 foot R/V *Clifford A. Barnes*, used for research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Special opportunities for oceanography majors are provided by involving students in undergraduate research projects and part-time employment.
- *Department Scholarships:* See adviser for availability.
- *Student Organizations/Associations:* The Student Oceanographic Society (SOS) provides peer advice, organizes field trips, sponsors alumni career panels, and holds social gatherings.

Graduate Program

Graduate Student Services
108 Ocean Teaching, Box 357940

(206) 543-5039

student@ocean.washington.edu

The School of Oceanography provides instruction and research opportunities at the graduate level: biological, chemical, and physical oceanography, and marine geology and geophysics. The program emphasizes independent research in conjunction with basic and specialized courses. Interdisciplinary research is encouraged, and students work across scientific boundaries. Coursework during the first two years is required in each option; specialized coursework is structured to fit the student's background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

Master of Science

Includes coursework in the student's area of interest and the other oceanography options, as well as completion of an approved research project and oral presentation of the results. Thesis and non-thesis programs are offered; most students select the non-thesis option.

Admission Requirements

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives, which may include any or all of the following: how or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms. Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), should include at least one letter from academic faculty.

Degree Requirements

36 credits, as follows:

1. *Thesis program*: Minimum 36 quarter credits (27 course credits and 9 credits of thesis). *Non-thesis program*: Minimum 36 quarter credits of coursework.
2. Minimum 18 credits numbered 500 and above. (In a thesis program, 9 credits may be OCEAN 700. With the exception of summer quarter, students are limited to 9 thesis credits per quarter.)
3. Numerical grades in at least 18 quarter credits taken through the UW. Minimum cumulative 3.00 GPA
4. Minimum three full-time quarters of residence credit. Part-time quarters may be accumulated to meet this requirement.
5. A final master's examination, either oral or written, as determined by the student's Supervisory Committee

Biological Oceanography Option: OCEAN 530 , OCEAN 531 , OCEAN 532 , OCEAN 533 . Master's level students must take a minimum 3 credits of advanced biological oceanography courses.

Chemical Oceanography Option: OCEAN 520 . Master's level students must take a minimum three advanced chemical oceanography courses.

Marine Geology and Geophysics Option: OCEAN 540 , OCEAN 541 , OCEAN 545 .

Physical Oceanography Option: OCEAN 500 , OCEAN 510 , OCEAN 511 , OCEAN 512 , OCEAN 513 , OCEAN 514 , OCEAN 515 , OCEAN 517. Three courses in applied mathematics.

Out-of-Option Requirement: All graduate students take a minimum of one 3-credit, numerically graded, 500-level course from each option outside their own (9 credits). See department website for list of suitable courses. Students complete this breadth requirement prior to receiving an MS degree.

Doctor of Philosophy

The degree program places a strong emphasis on research following completion of course requirements and the general examination. Upon successful completion of the general examination, the student undertakes an original research investigation, which is described in the dissertation and defended during the final examination.

Admission Requirements

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives (to be defined in online application), which may include any or all of the following: how or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms (available in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

Degree Requirements

Minimum 90 credits, as follows:

1. Completion of a program of study and research as planned by the Graduate Program Coordinator in the student's major department or college and the Supervisory Committee. Half the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of coursework at the 500 level and above must be completed prior to scheduling the general examination.

2. Minimum three years (nine full-time quarters) of resident study, two being at the UW with at least one year in continuous full-time residence. The year of full-time residence, satisfied by completing any three full-time quarters (not necessarily continuous) at the UW, must be completed prior to the general examination. Residence requirement cannot be met solely by part-time study. Minimum two academic years of resident study must be completed prior to scheduling the general examination.
3. With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may be applied toward one year of resident study at the UW.
4. Numerical grades in at least 18 quarter credits of coursework taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative 3.00 GPA is required for a graduate degree at the University.
5. Creditable passage of a examination. Registration as a graduate student is required the quarter the examination is taken and candidacy is conferred.
6. Preparation and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credits. The candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters. At least one quarter must come after the student passes the general examination. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of dissertation (OCEAN 800).
7. Creditable passage of a final examination, usually devoted to defense of the dissertation and the field with which it is concerned. General and final examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the examination is taken and the degree is conferred.
8. Completion of all work for the doctoral degree within ten years. This includes quarters spent on leave or out of status as well as applicable work from the master's degree from the UW or a master's degree from another institution, if applied toward one year of resident study.

Biological Oceanography Option: Core curriculum consists of OCEAN 530 , OCEAN 531 , OCEAN 532 , OCEAN 533 . Doctoral level students take a minimum 9 credits of advanced biological oceanography courses.

Chemical Oceanography Option: Core curriculum consists of OCEAN 520 . Doctoral-level students must take a minimum of six advanced chemical oceanography courses.

Marine Geology and Geophysics Option: Core curriculum consists of OCEAN 540 , OCEAN 541 , OCEAN 545 .

Physical Oceanography Option: Core curriculum consists of OCEAN 500 , OCEAN 510 , OCEAN 511 , OCEAN 512 , OCEAN 513 , OCEAN 514 , OCEAN 515 , OCEAN 517. Students take a sequence of three courses in applied mathematics.

Out-of-Option Requirement: All graduate students take a minimum of one 3-credit, numerically graded, 500-level course from each option outside their own for a total of three courses (9 credits). Each option provides a list of courses that can be taken to fulfill this requirement. See department website or adviser for list of suitable courses. Students complete this breadth requirement prior to receiving an MS degree. A graduate student

affairs committee, chaired by the Graduate Program Coordinator, addresses any requests for waivers.

Financial Aid

Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources. Most appointments continue through the summer when students are engaged in research.

COLLEGE OF THE ENVIRONMENT

SCHOOL OF OCEANOGRAPHY

OCEANOGRAPHY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

OCEAN 100 Explore Oceanography at UW (1)

Explores the research and experiences of the Oceanography school's faculty, graduate students, and undergraduate students. Intended for freshmen, new transfer students, and other considering oceanography as a major. Credit/no-credit only. Offered: A.

[View course details in MyPlan: OCEAN 100](#)

OCEAN 101 Oceanography of the Pacific Northwest (5) NW

Introduces the fundamental principles of oceanography by focusing on the waters that surround us - the Washington coast and Puget Sound. Investigates the geologic history of the Pacific Northwest, and the physics, chemistry, and biology of coastal waters using case studies. Intended for nonmajors. Offered: A.

[View course details in MyPlan: OCEAN 101](#)

OCEAN 102 The Changing Oceans (5) I&S/NW

Historical case studies of research on the ancient oceans, deep-sea exploration, climate change and the oceans, and human impacts on marine life. Students consider societal factors affecting progress in marine science, changing popular attitudes toward the oceans, and key current policy implications of marine science. Intended for nonmajors. Offered: W.

[View course details in MyPlan: OCEAN 102](#)

OCEAN 115 Astrobiology: Life in the Universe (5) NW R. BUICK, D. CATLING, V. MEADOWS, W. SULLIVAN

Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTBIO 115/ASTR 115/BIOL 114/ESS 115.

[View course details in MyPlan: OCEAN 115](#)

OCEAN 121 Deep Sea Exploration: Submarine Volcanoes and Novel Life Forms (2) NW

Examines the dynamic marine processes that shape the planet and cutting-edge oceanographic technologies used to explore the deepest oceans. Includes imagery of rarely seen submarine volcanic eruptions, hot springs, and novel life forms highlighting the interconnected geological-biological processes creating the most extreme

environments on Earth. Offered: W.

[View course details in MyPlan: OCEAN 121](#)

OCEAN 200 Introduction to Oceanography (3) NW

Focuses on importance of ocean processes for the functioning of our planet. Interdisciplinary case studies are used to examine relationships and interactions at macro-, meso-, and microscales in the ocean. Case studies build upon previous topics and examines human influence on these systems. Intended for science majors.

Offered: Sp.

[View course details in MyPlan: OCEAN 200](#)

OCEAN 201 Introduction to Oceanography Lab (2) NW

Provides opportunities to experiment with oceanographic concepts through laboratory and field experiences. Students apply the scientific method of inquiry as it applies to the study of geology, physics, chemistry, and biology of the ocean. Emphasizes topics that explore current challenges faced by the ocean and its ecosystem.

Co-requisite: OCEAN 200. I Offered: Sp.

[View course details in MyPlan: OCEAN 201](#)

OCEAN 210 Integrative Oceans (4) NW

Presents fundamentals of ocean science through regional case studies that illustrate the relationship between interdependent physical, chemical, biological, and geological process. Students apply tools from these scientific disciplines to understand major changes predicted for future oceanic environments. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/FISH 250. Offered: A.

[View course details in MyPlan: OCEAN 210](#)

OCEAN 215 Methods of Oceanographic Data Analysis (4)

Statistics, graphical representations, and analysis methods for oceanographic datasets using the PYTHON programming language. Prerequisite: Prerequisite: MATH 125. Offered: A.

[View course details in MyPlan: OCEAN 215](#)

OCEAN 220 Introduction to Field Oceanography (3/5) NW

Design and conduct a field study in oceanography. Focuses on active learning, deployment of instruments, data collection, interpretation, and presentation. Required field trip during spring break. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/FISH/250. Offered: Sp.

[View course details in MyPlan: OCEAN 220](#)

OCEAN 230 Rivers and Beaches (3/5) NW

Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focuses on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with ESS 230.

[View course details in MyPlan: OCEAN 230](#)

OCEAN 235 Arctic Change (2/3) I&S/NW

Investigates the Arctic system of ocean, ice, atmosphere, and sea-floor; how human interact with it, and what the future of the Arctic means to the world. Includes sea-ice loss, climate impacts, and Arctic resource exploitation.

Offered: W.

[View course details in MyPlan: OCEAN 235](#)

OCEAN 240 Special Topics in Oceanography (1-5, max. 9) NW

Selected topics of contemporary interest in oceanography such as hydrothermal vents, planetary volcanism, biogeochemical cycling, the ecology of Puget Sound, and the ocean's role in climate.

[View course details in MyPlan: OCEAN 240](#)

OCEAN 250 Marine Biology (3/5) I&S/NW

Lecture-laboratory course in marine biology focusing on physical, biological, and social aspects of the marine

environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Weekend field trip. Honors section research project. Offered: jointly with BIOL 250/FISH 250; AS.

[View course details in MyPlan: OCEAN 250](#)

OCEAN 261 Introduction to Ocean Technology (2) NW M. LOGSDON

Introduces ocean science and technology in observational ocean science. Covers the basics of underwater sensor design, power, and data communication, and introduces the design and build process and the operational scope of the ERIS cabled observatory. Offered: S.

[View course details in MyPlan: OCEAN 261](#)

OCEAN 270 Aquatic Ecophysiology (5) NW

Focuses on fundamental physiology, with an emphasis on processes relevant to living in a variety of aquatic environments. Includes a broad survey of taxa, from prokaryotes to mammals, and a variety of aquatic habitats. Prerequisite: BIOL 200. Offered: jointly with FISH 270/MARBIO 270.

[View course details in MyPlan: OCEAN 270](#)

OCEAN 285 Physics Across Oceanography: Fluid Mechanics and Waves (3) NW

In the context of oceanography applications, explores fluid mechanics, waves, light, acoustics, and heat transfer. Prerequisite: either MATH 125 or Q SCI 292, which may be taken concurrently; either PHYS 114 or PHYS 121; recommended: OCEAN 210 concurrently. Offered: A.

[View course details in MyPlan: OCEAN 285](#)

OCEAN 286 Physics Across Oceanography: Fluid Mechanics and Waves Laboratory (2) NW

Laboratory and tutorial further exploring the oceanography applications of fluid mechanics, waves, light, acoustics, and heat transfer. Prerequisite: OCEAN 285, which must be taken concurrently; either MATH 125 or Q SCI 292, either of which may be taken concurrently; either PHYS 114 or PHYS 121. Offered: A.

[View course details in MyPlan: OCEAN 286](#)

OCEAN 295 Chemistry of Marine Organic Carbon (5) NW

Explores the movement of organic carbon through the global carbon cycle, in the context of earth sciences and marine biogeochemical cycles. Prerequisite: either CHEM 152 or CHEM 120. Offered: W.

[View course details in MyPlan: OCEAN 295](#)

OCEAN 300 Exploring Opportunities in Marine Science (1)

Explores academic, research, and career opportunities in the field of marine science and helps prepare students for graduation. Intended for junior and transfer students studying marine science. Credit/no-credit only. Offered: jointly with FISH 300/MARBIO 300; W.

[View course details in MyPlan: OCEAN 300](#)

OCEAN 310 Marine Geology and Geochemistry (5) NW

This course focuses on marine geologic processes including the formation and evolution of the ocean crust; marine sedimentation and diagenesis; subduction zone dynamics; the role of marine geology in seawater composition and sustaining the deep biosphere; and the relationship between marine geological processes and climate. Prerequisite: OCEAN 200; and either ESS 210 or ESS 211; and OCEAN 285 which may be taken concurrently. Offered: A.

[View course details in MyPlan: OCEAN 310](#)

OCEAN 320 Coastal Oceanography (5) NW

The formation of, and processes within, coastal ocean systems emphasizing the geological evolution of coastal and estuarine environments and the physical dynamics within them, including waves, currents, river plumes, and sedimentary processes. Influences of physical processes on marine chemical cycling and biological productivity in the coastal ocean. Prerequisite: OCEAN 285; ESS 210. Offered: Sp.

[View course details in MyPlan: OCEAN 320](#)

OCEAN 330 Marine Biogeochemical Cycles (5) NW

Covers the distribution of life and chemical elements in the ocean; the relationship between them; and the physical processes affecting these patterns. Emphasizes how marine organisms and the structure of marine ecosystems influence the fate of carbon and other elements in the ocean. Prerequisite: OCEAN 210; OCEAN 295; BIOL 200. Offered: Sp.

[View course details in MyPlan: OCEAN 330](#)

OCEAN 340 Interdisciplinary Topics in Oceanography (1-5) NW

Special topics of an interdisciplinary nature setting ocean into a broader context.

[View course details in MyPlan: OCEAN 340](#)

OCEAN 351 Foundations of Ocean Sensors (3) NW, QSR

Experiential learning giving students foundational knowledge of methods used to observe key quantities that characterize marine environments. Includes theory and application of sensor design and construction principles, in the context of inferences and hypothesis-testing about key physical, biological, chemical, and geological dynamics in the oceans. Prerequisite: OCEAN 215; OCEAN 285. Offered: W.

[View course details in MyPlan: OCEAN 351](#)

OCEAN 355 From Big Bang to the Blue Planet (3) NW

Explores the origin and evolution of the Earth, ocean, atmosphere, and life, with an emphasis on climate as the integrator of changes in the biosphere, cryosphere, hydrosphere, atmosphere, and lithosphere. Prerequisite: either CHEM 120 or CHEM 142; either PHYS 114 or PHYS 121; either BIOL 161, or BIOL 180.

[View course details in MyPlan: OCEAN 355](#)

OCEAN 361 Ocean Technology I: Introduction to Underwater Observational Sensor Design and Build (2) NW

Combines ocean science and technology in a design and build course utilizing the ERIS cabled observatory at the UW Oceanography dock. Students apply the basics of sensor design, power, and data communication to individual underwater observatory projects. Prerequisite: OCEAN 261, which may be taken concurrently. Offered: S.

[View course details in MyPlan: OCEAN 361](#)

OCEAN 365 Practicing Sustainability Science (8) I&S/NW *S. Veirs, V. Veirs*

Intensive off-campus experience. Studies sustainability science, marine policy, and "clean" technologies. Includes interaction with community stakeholders for five weeks and experimentation with sustainable technologies and practices in the marine environment during a five-week cruise aboard an energy-efficient sailing catamaran. Offered: ASp.

[View course details in MyPlan: OCEAN 365](#)

OCEAN 370 Marine Evolutionary Biology (5) NW

Emphasizes geobiological patterns of marine evolutionary biology environment; processes of evolution; marine prokaryote and eukaryote diversity; and applications of evolutionary principles to ocean change, and conservation and management of marine biodiversity. Prerequisite: either FISH 270/OCEAN 270/MARBIO 270 or BIOL 220. Offered: jointly with FISH 370/MARBIO 370; Sp.

[View course details in MyPlan: OCEAN 370](#)

OCEAN 400 Chemical Oceanography (4) NW

Physical and chemical properties of seawater and marine products; processes determining the chemical makeup of the oceans. Prerequisite: either CHEM 152 or CHEM 155; OCEAN 210. Offered: W.

[View course details in MyPlan: OCEAN 400](#)

OCEAN 401 Special Topics in Chemical Oceanography (3) NW

[View course details in MyPlan: OCEAN 401](#)

OCEAN 409 Marine Pollution (3) I&S/NW

Explores anthropogenic impacts on the oceans and marine organisms. Examines how scientific understanding informs environmental management, thereby linking science and society. Students develop a detailed understanding of the major categories of anthropogenic pollutants on marine systems, how they impact the environment, their sources, and fates. Prerequisite: either OCEAN 200 or OCEAN 250; OCEAN 210. Offered: A.

[View course details in MyPlan: OCEAN 409](#)

OCEAN 410 Marine Geology and Geophysics (4) NW

Explores the geological and geophysical processes that form and shape the ocean basins and continental margins. Prerequisite: either ESS 210, ESS 211, or ESS 212. Offered: jointly with ESS 410; A.

[View course details in MyPlan: OCEAN 410](#)

OCEAN 411 Special Topics in Marine Geology and Geophysics (3) NW

[View course details in MyPlan: OCEAN 411](#)

OCEAN 412 Seismic Exploration and Stratigraphy (5) NW

Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: either ESS 311 or OCEAN 410; either MATH 126 or MATH 136 or ESS 310; and PHYS 123. Offered: jointly with ESS 467.

[View course details in MyPlan: OCEAN 412](#)

OCEAN 421 Special Topics in Physical Oceanography (3) NW

[View course details in MyPlan: OCEAN 421](#)

OCEAN 423 Ocean Circulation and Climate (3) NW

Quantitative treatment of ocean basin to global scale ocean circulation systems and their interaction with climate variability. Prerequisite: MATH 125; and PHYS 123 or OCEAN 285.

[View course details in MyPlan: OCEAN 423](#)

OCEAN 430 Biological Oceanography (4) NW

Examines marine organisms, their quantitative distribution in time and space, and their interactions with the ocean. Emphasizes dominant pelagic forms of phytoplankton, bacterioplankton, and archaeoplankton; and their predators, viruses, and zooplankton. Case studies explore extreme environments, coral reefs, influence of climate change on oceanic ecosystems, and the coastal ocean. Prerequisite: BIOL 200; OCEAN 210. Offered: A.

[View course details in MyPlan: OCEAN 430](#)

OCEAN 431 Special Topics in Biological Oceanography (3) NW

Reviews current research. Topics include global change effects on marine organisms, marine pathogens and emerging diseases, introduced species, marine viruses, astrobiology, hydrothermal vents, symbiosis, animal physiology, larval forms and dispersal, biogeography, and environmental ethics. Prerequisite: either OCEAN 430 or any 400-level BIOL, FISH, or MICROM course.

[View course details in MyPlan: OCEAN 431](#)

OCEAN 443 Undergraduate Thesis: Proposal (3) NW

Work closely with faculty mentors to conceptualize and write a proposal for independent thesis research. Prerequisite: OCEAN 320 or OCEAN 330, which may be taken concurrently.

[View course details in MyPlan: OCEAN 443](#)

OCEAN 444 Undergraduate Thesis: Research (2)

Work closely with faculty mentors to conduct thesis research as designed in OCEAN 443 in a field, laboratory, or other guided research setting. Prerequisite: OCEAN 443. Offered: W.

[View course details in MyPlan: OCEAN 444](#)

OCEAN 445 Undergraduate Thesis: Data Analysis and Writing (3) NW

Analyze results from senior thesis experiments and present results in a series of drafts and a final paper. Results are presented at a two-day long public research symposium and on the students' individual web sites.

Prerequisite: OCEAN 444. Offered: Sp.

[View course details in MyPlan: OCEAN 445](#)

OCEAN 450 Climatic Extremes (4) NW

Course examines Earth history for extreme climatic conditions to predict future climate changes. Numerical climate models use PC-based computer programs to identify processes and feedbacks that control climate.

Offered: W.

[View course details in MyPlan: OCEAN 450](#)

OCEAN 452 Marine Geospatial Information Science (3) NW

Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 452; A.

[View course details in MyPlan: OCEAN 452](#)

OCEAN 454 Hydrothermal Systems: An Interdisciplinary View (3) NW

Provides a general, interdisciplinary overview of seafloor hydrothermal systems including important geological, chemical, and biological processes. Topics include tectonic and volcanic controls on hydrothermal systems, water/rock reactions, phase separation, temporal variability, fluxes to the deep sea, micro- and macro biology.

Offered: W.

[View course details in MyPlan: OCEAN 454](#)

OCEAN 455 Introduction to Modeling in Oceanography (3) NW, QSR

Explores roles of ocean models in understanding past, current, and future conditions in marine environments. Focuses on active learning using models to ask and answer questions about biotic and abiotic processes in marine environments. Prerequisite: either OCEAN 200, FISH 250, OCEAN 250, BIOL 250, or ATM S 211.

Instructors: Grunbaum Offered: A.

[View course details in MyPlan: OCEAN 455](#)

OCEAN 460 Marine Field Research (10) NW, QSR *S. Veirs, V. Veirs*

Intensive off-campus marine research experience. Includes five weeks designing a field experiment and a five-week cruise aboard a sailing research vessel to implement it. Offered: ASp.

[View course details in MyPlan: OCEAN 460](#)

OCEAN 461 Advanced Ocean Technology - Project Design and Management (2) NW

Project management practicum in the design, build, operations, and management of observational ocean science technology. Students oversee and mentor ongoing design and build projects, with attention to design criteria and deployment timelines. Prerequisite: OCEAN 361. Offered: S.

[View course details in MyPlan: OCEAN 461](#)

OCEAN 475 Current Research in Climate Science Seminar (3, max. 6)

Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ATM S 475/ESS 475; A.

[View course details in MyPlan: OCEAN 475](#)

OCEAN 477 Seminar in Marine Biology (3) NW

Reviews current research in marine biology. Emphasizes critical readings and discussion of primary literature. Prerequisite: FISH 250, OCEAN 250, or BIOL 250; Q SCI 381, STAT 220, or STAT 311. Offered: jointly with BIOL 477/FISH 477; W.

[View course details in MyPlan: OCEAN 477](#)

OCEAN 479 Research in Marine Biology (1-15, max. 15)

Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/FISH 479; AWSpS.

[View course details in MyPlan: OCEAN 479](#)

OCEAN 481 Puget Sound and Estuarine Oceanography (3) NW

Explores fundamental physical-biological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.

[View course details in MyPlan: OCEAN 481](#)

OCEAN 482 The Changing Arctic Ocean (3) NW

Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most recent scientific advances. Considers the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Prerequisite: OCEAN 200 or OCEAN 210 and BIOL 180, BIOL 200 or BIOL 220. Offered: Sp, even years.

[View course details in MyPlan: OCEAN 482](#)

OCEAN 492 Friday Harbor Apprenticeship (9/15) NW

Intensive, full-time research training experience where teams of students work on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Research questions vary.

[View course details in MyPlan: OCEAN 492](#)

OCEAN 494 Field Experiences in Marine Science (1-15, max. 30) NW

For participants in oceanography field work. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.

[View course details in MyPlan: OCEAN 494](#)

OCEAN 496 Study Abroad: Oceanography (1-15, max. 30) NW

For participants in UW study abroad program. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.

[View course details in MyPlan: OCEAN 496](#)

OCEAN 497 Advanced Special Topics in Oceanography (1-15, max. 15)

[View course details in MyPlan: OCEAN 497](#)

OCEAN 499 Undergraduate Research (1-15, max. 24)

Individual research supervised by a faculty member. May involve laboratory work, fieldwork, or literature surveys. Offered: AWSpS.

[View course details in MyPlan: OCEAN 499](#)

OCEAN 500 Current Problems in Oceanography (1, max. 10)

Discussion of research topics that are currently being investigated within the school. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: OCEAN 500](#)

OCEAN 502 Marine Geospatial Information Science (3)

Introduces the use of Geographic Information Systems (GIS), seafloor mapping, hydrographic surveying, and spatial analysis in ocean science. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 502; A.

[View course details in MyPlan: OCEAN 502](#)

OCEAN 503 Geospatial Pattern Analysis and Geostatistics (3) *Logsdon*

Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Offered: jointly with FISH 503; W.

[View course details in MyPlan: OCEAN 503](#)

OCEAN 506 Interdisciplinary Seminar in Oceanography (1-3, max. 12)

Lectures, discussions, and work on selected problems of an interdisciplinary nature. Prerequisite: permission of instructor.

[View course details in MyPlan: OCEAN 506](#)

OCEAN 507 Puget Sound and Estuarine Oceanography (3) *Keister; MacCready*

Explores fundamental physical-biological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.

[View course details in MyPlan: OCEAN 507](#)

OCEAN 508 The Changing Arctic Ocean (3) *Deming, Woodgate*

Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most recent advances and considering the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Offered: Sp.

[View course details in MyPlan: OCEAN 508](#)

OCEAN 509 Seminar (1, max. 30)

Introduction to current research topics for beginning graduate students. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: OCEAN 509](#)

OCEAN 510 Physics of Ocean Circulation (3)

Structure of ocean basins; physical properties of seawater and the equation of state; heat, salt, fresh water budgets; tidal potential; Coriolis effect and geostrophic balance; major current systems and water masses; mixing, stirring in the ocean; simple waves; modern experimental methods in physical oceanography.

Prerequisite: permission of instructor. Offered: A.

[View course details in MyPlan: OCEAN 510](#)

OCEAN 511 Introduction to Fluid Dynamics (4)

Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: either a course in partial differential equations or permission of instructor. Offered: jointly with AMATH 505/ATM S 505; A, odd years.

[View course details in MyPlan: OCEAN 511](#)

OCEAN 512 Geophysical Fluid Dynamics I (4)

Dynamics of rotating stratified fluid flow in the atmosphere/ocean and laboratory analogues. Equations of state, compressibility, Boussinesq approximation. Geostrophic balance, Rossby number. Poincare, Kelvin, Rossby waves, geostrophic adjustment. Ekman layers. Continuously stratified dynamics: Inertia-gravity waves, potential vorticity, quasigeostrophy. Prerequisite: OCEAN 511 or ATM S 505/AMATH 505. Offered: jointly with ATM S 509; W.

[View course details in MyPlan: OCEAN 512](#)

OCEAN 513 Geophysical Fluid Dynamics II (3)

Theories, models of large-scale dynamics of oceans, atmospheres. Potential vorticity, Q principles; Rossby waves, ray tracing, Green's function, setup of general circulation; atmospheric "channels" versus ocean "basins";

wave-mean flow interaction, mountain drag, internal momentum flux; "Lagrangian" motion of particles¹⁸²³, tracers; cascades, eddy flux of heat, moisture, Q. Prerequisite: OCEAN 512. Offered: Sp.

[View course details in MyPlan: OCEAN 513](#)

OCEAN 514 Waves (3)

Application of marine hydrodynamics principles to wave motion in oceans. Offered: W.

[View course details in MyPlan: OCEAN 514](#)

OCEAN 515 Ocean Circulation: Observations (3)

Modern large- and mesoscale ocean observations, interpreted in terms of contemporary circulation theories. Spectrum of temporal variability; eddies and eddy fluxes; ventilation; advection and diffusion in the abyss; transports of heat and salt; climatic scale of variability; modern methods for determining circulation.

Prerequisite: OCEAN 510 or permission of instructor. Offered: Sp.

[View course details in MyPlan: OCEAN 515](#)

OCEAN 517 Methods and Measurements in Physical Oceanography (3)

Principal instruments and experimental methods of physical oceanography. Devices and systems that measure pressure, temperature, electrical conductivity, sea state, and velocity. Prerequisite: permission of instructor.

[View course details in MyPlan: OCEAN 517](#)

OCEAN 518 Scientific Writing and Graphics (2) *Waddington, Warren*

Covers principles of scientific writing; methods of ensuring clarity in writing for scientific journals and research proposals; principles of graph construction; and authorship, peer review, and citations. For graduate students in Earth-science related fields. Credit/no-credit only. Offered: jointly with ATM S 519/ESS 519; Sp, odd years.

[View course details in MyPlan: OCEAN 518](#)

OCEAN 520 Marine Chemistry (3)

Processes controlling the chemical composition of seawater. Chemical distributions in the ocean, marine physical chemistry, chemical equilibrium, and concepts of mass balance. Mechanisms and models used to explain distributions of stable and radioactive isotopes, gases, trace metals, and biochemicals in the world's oceans. Offered: A.

[View course details in MyPlan: OCEAN 520](#)

OCEAN 521 Aquatic Chemistry (3)

Application of physical chemistry and thermodynamics to processes that control chemical composition of natural waters. Equilibrium approach. Acid/base chemistry, the carbonate system, dissolution and precipitation, metal ions in solution, oxidation-reduction chemistry, silicate mineral reactions. Prerequisite: OCEAN 520 or permission of instructor. Offered: A.

[View course details in MyPlan: OCEAN 521](#)

OCEAN 522 Marine Organic Geochemistry (3)

Sources, reactions, and fates of organic molecules in the marine environment along with the stable isotope geochemistry of marine organic substances. Prerequisite: CHEM 237 and CHEM 239 or permission of instructor.

[View course details in MyPlan: OCEAN 522](#)

OCEAN 523 Geochemical Cycles (4)

Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with ATM S 508/CHEM 523.

[View course details in MyPlan: OCEAN 523](#)

OCEAN 529 Seminar on Chemical Oceanography (*, max. 30)

Lectures, discussions, and readings on selected problems of current interest. Prerequisite: permission of

instructor. Offered: AWSp.

[View course details in MyPlan: OCEAN 529](#)

OCEAN 530 Marine Bacteria, Archaea, and Viruses (3)

Explores the role of marine microorganisms in transformations of dissolved and particulate organic matter. Covers the functional and phylogenetic diversity of bacteria, archaea, and viruses in the marine environment; the fate of organic carbon in the microbial loop; and the interrelationship of the carbon cycle with other biogeochemical cycles. Prerequisite: permission of instructor. Offered: W, odd years.

[View course details in MyPlan: OCEAN 530](#)

OCEAN 531 Marine Phytoplankton and Biogeochemistry (3)

Covers phytoplankton in the marine environment: evolution, ecology, primary productivity, and physiology, emphasizing their role in the global carbon cycle; spatial and temporal distributions of phytoplankton and how these patterns may change as ocean conditions change; and methods for determining distributions and rates in different ocean ecosystems. Prerequisite: permission of instructor. Offered: W, even years.

[View course details in MyPlan: OCEAN 531](#)

OCEAN 532 Marine Zooplankton Ecology (3)

Examines the roll of zooplankton in ecosystems and biogeochemical cycles. Covers the distribution and abundance of zooplankton in space and time; small-scale distributions; morphology and behavior; population dynamic, energetics, and secondary production; trophic structure and dynamics; biogeography; impacts of climate change; and models of populations and food chains.

[View course details in MyPlan: OCEAN 532](#)

OCEAN 533 Marine Benthic Ecology (3)

Analyzes marine communities associated with the porous boundaries of the ocean, from sedimented seafloor and hydrothermal vents to sea ice (inverted benthos); emphasizing nutrition to these communities, including sinking organic aggregates, themselves porous habitats, and the role of symbiosis. Prerequisite: permission of instructor. Offered: W, even years.

[View course details in MyPlan: OCEAN 533](#)

OCEAN 535 Biological Oceanography (3)

Examines major patterns and processes in upper ocean pelagic ecosystems, emphasizing quantitative analysis of mechanisms controlling production and abundances of organisms, from plankton to fish. Introduces interdisciplinary study of effects of anthropogenically induced changes in climate and ocean chemistry on organisms, ecosystem processes, and biogeochemical cycles. Offered: A.

[View course details in MyPlan: OCEAN 535](#)

OCEAN 539 Seminar in Biological Oceanography (*, max. 30)

Lectures, discussions, and work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

[View course details in MyPlan: OCEAN 539](#)

OCEAN 540 Marine Geology and Geophysics Processes (3) *Nittrouer, Solomon*

Synthesis of processes that form ocean basins and fill them with sediment, including: plate tectonics and the creation, evolution, and subduction of ocean crust; accumulation of terrestrial, biogenic, and authigenic sediments; and the history of paleoceanographic events recorded in the seafloor. Offered: W.

[View course details in MyPlan: OCEAN 540](#)

OCEAN 541 Marine Sedimentary Processes (3)

Investigates fundamental process of marine sedimentation, including equations characterizing boundary-shear flows, initiation of grain motion, bedload and suspended-load transport, and sediment accumulation. Applies concepts to sediment dispersal in rivers, deltas, estuaries, beaches, continental shelves, slopes, and rises, with emphasis on the relationships between active processes and resulting deposits.

[View course details in MyPlan: OCEAN 541](#)

OCEAN 544 Subseafloor Hydrogeology and Geochemistry (3) *Soloman*

Introduces the occurrence, composition, and movement of groundwater in the ocean crust and its role in a wide range of geologic and biogeochemical processes. Includes basic theories of groundwater motion, heat transport, solute transport, and hydromechanics with applications to diverse subseafloor environments ranging from mid-ocean ridges to subduction zones. Offered: Sp.

[View course details in MyPlan: OCEAN 544](#)

OCEAN 545 Oceanic Lithosphere (3)

Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with ESS 568.

[View course details in MyPlan: OCEAN 545](#)

OCEAN 546 Continental-Margin Sedimentation (3)

Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities. Offered: jointly with ESS 546.

[View course details in MyPlan: OCEAN 546](#)

OCEAN 549 Seminar in Geological and Geophysical Oceanography (*, max. 30)

Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

[View course details in MyPlan: OCEAN 549](#)

OCEAN 550 Geochemistry and Geophysics of Melt Generation (3)

Mantle flow beneath mid-ocean ridges and hotspots, major element systematics, constraints from trace elements and isotopes on melting and mantle reservoirs, melt extraction, and crustal thickness and axial topography. Prerequisite: OCEAN 544 or permission of instructor.

[View course details in MyPlan: OCEAN 550](#)

OCEAN 552 Seminar in Geophysics and Geological Data Analysis (1)

Practical geophysical data analysis, map projections, gridding multibeam bathymetry processing, gravity and magnetic anomalies, downward continuation, magnetic inversion, seismic refraction and reflection, and microearthquake locations. Prerequisite: permission of instructor.

[View course details in MyPlan: OCEAN 552](#)

OCEAN 554 Paleoclimate Proxies (3) *Alexander, Sachs*

Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/ESS 554.

[View course details in MyPlan: OCEAN 554](#)

OCEAN 558 Climate Modeling (3)

Principles of Earth system modeling. Emphasis on atmosphere, ocean sea ice, and land-surface components. Climate forcing. Appropriate use of models. Topics of current interest including carbon cycle, atmosphere chemistry, and biogeochemistry. Prerequisite: either ATM S 587/OCEAN 587/ESS 587, ATM S 504 or ATM S 505. Instructors: Bitz, Thompson Offered: jointly with ATM S 559/ESS 559.

[View course details in MyPlan: OCEAN 558](#)

OCEAN 559 Advanced Seminar on Mid-Ocean Ridge Processes (*, max. 9)

Lectures, discussions, and practical work on selected topics of current interest in mid-ocean ridge research. Prerequisite: permission of instructor.

[View course details in MyPlan: OCEAN 559](#)

OCEAN 560 Atmosphere/Ocean Interactions (3)

Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Prerequisite: ATM S 509/OCEAN 512.

Credit/no-credit only. Offered: jointly with ATM S 560.

[View course details in MyPlan: OCEAN 560](#)

OCEAN 569 Topics in Physical Oceanography (1-4, max. 30)

Lecture series on topics of major importance in physical oceanography. Offered: AWSp.

[View course details in MyPlan: OCEAN 569](#)

OCEAN 570 Marine Microbial Interactions (1-3, max. 9)

[View course details in MyPlan: OCEAN 570](#)

OCEAN 572 Marine Protist Ecology (1-3, max. 9)

Examines the phagotrophic (protozoa) and mixotrophic (both photosynthetic and phagotropic) protists, including: interactions with predators and prey; and adaptations to changing environments, evolutionary, and ecological implications of mixotrophy. Prerequisite: OCEAN 532 or permission of instructor. Offered: Sp.

[View course details in MyPlan: OCEAN 572](#)

OCEAN 578 Advanced Topics in Biological Oceanography (*, max. 18)

Specialized research areas. Topic varies each year. Offered at Friday Harbor Laboratories. Prerequisite: permission of director of Friday Harbor Laboratories. Offered: S.

[View course details in MyPlan: OCEAN 578](#)

OCEAN 580 Aquatic Kinetics (3)

Reaction rates and mass transport in water. Theories of chemical kinetics; experimental results from: CO₂ hydrolysis, Fe, Mn, and H₂S oxidation, stable isotope fractionation, mineral dissolution; homogeneous, heterogeneous, microbial catalysis; reaction and transport at air-water, sediment-water, and O₂/H₂S interfaces. Prerequisite: permission of instructor.

[View course details in MyPlan: OCEAN 580](#)

OCEAN 582 River Basin Biogeochemistry (3)

The function of rivers and river basins in transporting materials to the oceans and their importance in biogeochemical cycles. Origin of water and water routing within drainage basins, sources and modification of dissolved and particulate materials in transport, ecological theory, and estuarine mixing zone transformations.

Prerequisite: permission of instructor.

[View course details in MyPlan: OCEAN 582](#)

OCEAN 583 Isotope Biogeochemistry (3)

The use of stable isotopes to study biogeochemical cycles in the oceans and atmosphere; specifically carbon, nitrogen, and sulfur cycles. Isotopic effects during photosynthesis, respiration, organic matter degradation. CaCO₃ dissolution, methanogenesis, nitrification/denitrification, and sulfate reduction. Prerequisite: permission of instructor.

[View course details in MyPlan: OCEAN 583](#)

OCEAN 584 Ocean Tracers and Mixing (3)

The applications of tracers to studies of ocean circulation and ventilation. Processes within the ocean for which tracers have provided important information include gas exchange, mixed layer dynamics, thermocline ventilation, deep water formation and spreading, and mixing. Knowledge of partial differential equations suggested.

[View course details in MyPlan: OCEAN 584](#)

OCEAN 586 Current Research in Climate Change (2, max. 20)

Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers

(both UW and outside), plus one or two keynote speakers, followed by class discussion. Credit/no-credit only.¹⁸²⁷
Offered: jointly with ATM S 586/ESS 586.

[View course details in MyPlan: OCEAN 586](#)

OCEAN 587 Fundamentals of Climate Change (3)

Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/ESS 587.

[View course details in MyPlan: OCEAN 587](#)

OCEAN 588 The Global Carbon Cycle and Climate (3) *Emerson*

Oceanic and terrestrial biogeochemical processes controlling atmospheric CO₂ and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/ESS 588; W.

[View course details in MyPlan: OCEAN 588](#)

OCEAN 589 Paleoclimatology: Data, Modeling, and Theory (3)

Evidence for past changes in land and sea surface temperature, in precipitation and atmospheric dynamics, and in ocean circulation: both long and interannual timescales. Paleoclimate modeling and theory. Time series analysis and climate noise. Rapid climate change. Statistical reconstruction of interannual variability. Offered: jointly with ATM S 589/ESS 589.

[View course details in MyPlan: OCEAN 589](#)

OCEAN 590 Advanced Topics in Oceanography (9-18, max. 18)

Advanced topics examining specialized and interdisciplinary areas of oceanographic research. Offered at Friday Harbor Laboratories. Prerequisite: permission of Director of Friday Harbor Laboratories. Offered: S.

[View course details in MyPlan: OCEAN 590](#)

OCEAN 591 Marine Science in the Coastal Zone (3) *R. KELLY*

Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with SMEA 591; A.

[View course details in MyPlan: OCEAN 591](#)

OCEAN 592 Communicating Ocean Sciences (4)

Explores improving communicating scientific knowledge through instruction of inquiry-based science in school classrooms. Students practice communicating science, and receive mentoring on how to improve their presentations. Prerequisite: Marine sciences studies background. Instructors: Robigou Offered: Sp.

[View course details in MyPlan: OCEAN 592](#)

OCEAN 593 Climate Science Seminar (1) *Mote*

Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ATM S 593/ESS 593; W.

[View course details in MyPlan: OCEAN 593](#)

OCEAN 596 Climate Science Capstone Project (1-5, max. 5) *Mote*

Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ATM S 596/ESS 596; AWSpS.

[View course details in MyPlan: OCEAN 596](#)

OCEAN 600 Independent Study or Research (*-)

Offered: AWSpS.

[View course details in MyPlan: OCEAN 600](#)

OCEAN 700 Master's Thesis (*-)

Offered: AWSpS.

[View course details in MyPlan: OCEAN 700](#)

OCEAN 800 Doctoral Dissertation (*-)

Offered: AWSpS.

Quantitative Science

[Display as tabs](#)

Program Overview

The Center for Quantitative Science is an interdisciplinary program administered by the College of Environment with cooperation from the School of Aquatic and Fishery Sciences and the School of Environmental and Forest Sciences. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resources management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the [School of Environmental and Forest Sciences](#) and the [School of Aquatic and Fishery Sciences](#).

Adviser
006 Anderson Hall, Box 352100
(206) 543-1191
cqs@uw.edu

Students in environmental, biological, ecological, and resource management majors may wish to complete a minor in quantitative science to document their understanding of the mathematical and statistical methods used in these competitive and increasingly quantitative fields.

Undergraduate Program

The Center for Quantitative Science offers the following program of study:

- A minor in quantitative science

Minor

Minor Requirements: A minimum of 27 credits, as follows:

1. *Core courses (24-25 credits):* Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCI 482; Q SCI 483 (or Q SCI 403/STAT 403)
2. *Electives (3-5 credits):* Selected from an approved list of electives, a partial list of which includes Q SCI 210/ENVIR 210, Q SCI 403/STAT 403 (if not taken as part of core courses, above), Q SCI 454/FISH 454, Q SCI 480/STAT 480, Q SCI 483 (if not taken as part of core courses, above), Q SCI 486/STAT 486. See adviser for possible additional qualifying courses.

3. A minimum 2.0 grade is required in each course taken as part of the minor.

COLLEGE OF THE ENVIRONMENT COLLEGE OF THE ENVIRONMENT QUANTITATIVE SCIENCE (FISHERIES & FOR R)

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

Q SCI 190 Quantitative Analysis for Environmental Science (5) NW, QSR B. BARE

Covers applications of precalculus techniques and concepts to environmental, ecological, biological, and natural resource problems stressing the formulation, solution, and interpretation of mathematical procedures.

Prerequisite: minimum grade of 2.0 in MATH 098 or MATH 103, a score of 151-169 on the MPT-GS test, or a score of 145-163 on the MPT-AS test. Not available for credit to students who have completed MATH 124. Or higher. Offered: AWSp.

[View course details in MyPlan: Q SCI 190](#)

Q SCI 291 Analysis for Biologists I (5) NW, QSR J. JOHNSON

Introduction to differential calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include optimization and curve analysis. Prerequisite: either MATH 120, Q SCI 190, a minimum score of 2 on advanced placement test, or a score of 153-163 on MPT-AS placement test. Not available for credit to students who have completed MATH 124 with a 2.0 or higher. Offered: AWS.

[View course details in MyPlan: Q SCI 291](#)

Q SCI 292 Analysis for Biologists II (5) NW, QSR V. GALLUCCI, J. JOHNSON

Introduction to integral calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include areas under curves, volumes, and differential equations. Prerequisite: minimum grade of 7 in either Q SCI 291 or MATH 124. Not available for credit to students who have completed MATH 125 with a 2.0 or higher. Offered: WSpS.

[View course details in MyPlan: Q SCI 292](#)

Q SCI 381 Introduction to Probability and Statistics (5) NW, QSR V. GALLUCCI, G. HOLTGRIEVE, P. TOBIN

Applications to biological and natural resource problems stressing the formulation and interpretation of statistical tests. Random variables, expectations, variances, binomial, hypergeometric, Poisson, normal, chi-square, "t" and "F" distributions. Prerequisite: either MATH 120, MATH 124, MATH 125, MATH 126, Q SCI 190, or Q SCI 291, or a minimum score of 2 on advanced placement test, or a score of 153-163 on the MPT-AS

placement test. Offered: AWSpS.

[View course details in MyPlan: Q SCI 381](#)

Q SCI 403 Introduction to Resampling Inference (4) NW V. MININ

Introduction to computer-intensive data analysis for experimental and observational studies in empirical sciences. Students design, program, carry out, and report applications of bootstrap resampling, rerandomization, and subsampling of cases. Experience programming in R is beneficial. Credit allowed for STAT 403 or STAT 503 but not both. Prerequisite: either STAT 311/ECON 311, STAT 341, STAT 390/MATH 390, STAT 481/ECON 481, or Q SCI 381 and Q SCI 482. Offered: jointly with STAT 403; Sp.

[View course details in MyPlan: Q SCI 403](#)

Q SCI 454 Ecological Modeling (5) NW T. ESSINGTON

Examines concepts in ecological modeling focusing on the rationale, interpretation, and motivation for modeling in ecological sciences. Explores individual, population, and ecosystem-based models. Excel-based computer exercises, model building and interpretation, readings. Offered: jointly with FISH 454; W.

[View course details in MyPlan: Q SCI 454](#)

Q SCI 458 Modeling and Estimation in Conservation and Resource Management (4) NW T. BRANCH

Explores the use of models in the evaluation of alternative management policies for natural resources, including modeling approaches, fitting models to data, and evaluating alternative management policies. Emphasizes calculating risk of extinction, and design of biological reserves. Offered: jointly with FISH 458; Sp.

[View course details in MyPlan: Q SCI 458](#)

Q SCI 480 Sampling Theory for Biologists (3) NW J. SKALSKI

Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482. Offered: jointly with STAT 480; W, odd years.

[View course details in MyPlan: Q SCI 480](#)

Q SCI 482 Statistical Inference in Applied Research I: Hypothesis Testing and Estimation for Ecologists and Resource Managers (5) NW I. GANGULY

Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either STAT 311 or Q SCI 381. Offered: AW.

[View course details in MyPlan: Q SCI 482](#)

Q SCI 483 Statistical Inference in Applied Research II: Regression Analysis for Ecologists and Resource Managers (5) NW J. SKALSKI, P. TOBIN

Analysis of linear regression models and introduction to nonlinear models. Model selection using generalized F-tests; residual analysis. Application to categorical, count, binomial, transformed variables. Introduction to matrix formation of regression models and applications. Prerequisite: Q SCI 482. Offered: WSp.

[View course details in MyPlan: Q SCI 483](#)

Q SCI 486 Experimental Design (4) NW

Emphasizes data modeling using structured means resulting from choice of experimental and treatment design. Examines experimental designs, including crossed, nested designs; block; split-plot designs; and covariance analysis. Also covers multiple comparisons, efficiency, power, sample size, and pseudo-replication. Prerequisite: Q SCI 482. Offered: jointly with STAT 486; W, even years.

[View course details in MyPlan: Q SCI 486](#)

Q SCI 497 Special Topics in Quantitative Science (1-15, max. 15) NW

Topics not normally offered in regular curriculum. Format ranges from seminar/discussion, formal lectures,

laboratory or modeling work. Offered: AWSpS.

[View course details in MyPlan: Q SCI 497](#)

Q SCI 498 Internship (1-15, max. 15) NW

Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Offered: AWSpS.

[View course details in MyPlan: Q SCI 498](#)

Q SCI 499 Research Experience (1-15, max. 15)

Special studies in quantitative ecology and resource management for which there is not sufficient demand to warrant the organization of regular courses. Credit/no-credit only.

[View course details in MyPlan: Q SCI 499](#)

Quaternary Research Center

[Display as tabs](#)

Program Overview

19 Johnson

Quaternary studies focus on the processes that presently shape the natural environment and have operated over approximately the past two and a half million years (Quaternary period). A knowledge of Quaternary events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to present-day and future environmental changes.

Quaternary research is typically interdisciplinary, and thus it commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.

The center has the following goals:

1. To understand environments and climate changes of the past two and a half million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events.
2. To serve as a catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology/anthropology, botany, engineering, fisheries, forestry, geology, geophysics, oceanography, pedology, and zoology.
3. To provide a scientific perspective on the scale of modern and man-made environmental changes, including climate changes, in the context of recent earth history.
4. To conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies.
5. To seek applications of quaternary studies to modern environmental problems that help predict consequences of policy decisions.

[Time Schedule](#)

[Departmental Web Page](#)

[Departmental Faculty](#)

[Course Descriptions](#)

Graduate Program

Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Quaternary-related subject.

Research Facilities

The research laboratories of the center provide an array of modern facilities for investigation of Quaternary problems.

QRC Resource Center

This specialized collection, dealing with a wide range of Quaternary topics, is among the most extensive in North America. It includes books, monographs, theses, journals, and maps, and houses a large, diverse reprint collection. Searches for library material can be conducted via the QRC [web page](#).

Cosmogenic Nuclide Laboratory
John Stone, Director

The UW Cosmogenic Nuclide Laboratory analyses rare radionuclides produced by cosmic ray bombardment of the Earth's surface. These nuclides are useful for surface exposure dating and the study of geomorphic rates and processes. Current projects include work on Quaternary glaciations of Antarctica, Europe, and North America; dating of landslides and volcanic eruptions; and studies of erosion in both tectonically active and ancient, stable landscapes. The laboratory has sample preparation facilities and clean labs for extraction of Al-26, Be-10, and Cl-36. For additional information, visit the laboratory's [website](#).

Geochemistry Library
Ronald S. Sletten, director

The Geochemistry Library conducts analyses of natural waters, soil, and sediment. Instrumentation includes ICP-OES, ICP-MS, laser diffraction particle size analyzer, and total organic/inorganic carbon analyzer for water samples. The library also conducts C-13 CP-MAS-NMR for natural organic and pulsed field gradient PFG-NMR for diffusion studies of water in porous media. The primary research foci are weathering, elemental cycling, and studies of permafrost soils. Current projects include investigation of biocomplexity of carbon cycling in Arctic soils in Greenland and physicochemical soil processes in Antarctica and Alaska.

Periglacial Laboratory
Bernard Hallet, Director

Research in the Periglacial Laboratory focuses on diverse processes at the interface between glaciology and geomorphology that are fundamental to understanding landscapes and soils in alpine and polar regions. Founded by Link Washburn, the laboratory has a long history of experimental research on periglacial processes with special attention given to the complex phenomena associated with freezing soils and rocks. Recently the lab has also served as a base of support for extensive field work involving electronic instrumentation to monitor surface processes in the Arctic, Antarctica, the Himalayas, southeast Tibet, and other regions across the globe.

Stable Isotope Laboratory
Eric J. Steig, Director

The Stable Isotope Laboratory is the main center for stable isotope studies for the QRC. The current emphasis in the laboratory is the development of high-resolution climate records covering the last ten millennia, from ice cores in the Canadian Arctic, Greenland, and Antarctica. Facilities in the laboratory include off-line and online preparation systems for

D/H and $^{18}\text{O}/^{16}\text{O}$ on water $^{13}\text{C}/^{12}\text{C}$ on carbonates and organic materials, and $^{15}\text{N}/^{14}\text{N}$ on nitrate and organics. Additional information, data, and other resources are available via the laboratory's [website](#).

COLLEGE OF THE ENVIRONMENT

QUATERNARY SCIENCES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

QUAT 501 Seminar/Conference in Quaternary Environments (1, max. 6)

Interdisciplinary seminar or conference in the changing natural environments of the Quaternary Period, with emphasis on climatic changes and their effects. Speakers from the University and elsewhere present lectures on their specialties, followed by discussion. Credit/no-credit only.

[View course details in MyPlan: QUAT 501](#)

QUAT 502 Interdisciplinary Quaternary Investigations (2, max. 6)

Research course for interdisciplinary investigation of Quaternary problems. Student attends sessions of QUAT 501 and pursues a problem-oriented case study concurrently under faculty direction. Required paper on case study. Prerequisite: graduate standing. Credit/no-credit only.

[View course details in MyPlan: QUAT 502](#)

QUAT 504 Special Topics in Quaternary Sciences (1-3, max. 3)

Environments and climate changes of past two million years (Quaternary Period) in context of modern surface processes, including historical changes, prehistorical environments of postglacial period, and Ice Age events. Provides scientific perspective on scale of modern and man-made environmental changes, including those of climate, in context of recent earth history. Prerequisite: background courses in earth sciences and ecology. Credit/no-credit only.

The Information School

[Display as tabs](#)

School Overview

370 Mary Gates Hall
Box 352840

Dean

Harry Bruce

Associate Deans

Carole Palmer, Research
Matthew Saxton, Academics

Never in our society's history has there been such a great need to manage so much information quickly and efficiently. The Information School is dedicated to preparing a rising generation of information leaders to embrace the challenges associated with the way we create, find, store, manipulate, and share information.

The School offers four degree programs, leading to the Bachelor of Science in Informatics, Master of Library and Information Science, Master of Science in Information Management, and PhD in Information Science. The School also offers certificate programs, continuing education opportunities for professionals, and service courses for undergraduates in information fluency, research strategies, and technology. Graduates of the School assume a variety of professional roles in the public, private, and non-profit sectors, with positions that span from information architects to children's librarians, from web developers to information technology (IT) managers, from network and information assurance professionals to researchers and faculty in the information field.

The community is interdisciplinary, bringing together a variety of social science traditions, including: library and information science, computer science, sociology, communication, philosophy, and engineering. Most research addresses topics in the following broad categories:

- Ethics and Information
- Personal Information Management
- Human-Computer Interaction and Design
- Information Management
- Knowledge Organization
- Information Literacy
- Access to Information
- Information in Everyday Life

[School Faculty](#)

[Course Descriptions](#)

The School's work remains focused on the human impact of information. The research and curriculum of the school examines information systems and technology from a **user-centered perspective**. By retaining a focus on the human impact of information systems and technology, the School builds on our community values of trust, transparency, and mutual respect.

History

Originally established in 1911, the Information School has the oldest library and information science program west of the Mississippi, and continues to offer the most extensive American Library Association-accredited library and information science degree in the Northwest region of the United States.

In 1998, the University set out to transform the School by charging it with a new mission, to become what it is today: a broad-based information school that meets the challenges and opportunities of the information age. With the addition of three new degree programs, a new dean, faculty, and state of the art facilities, the Information School became the University's sixteenth independently organized school/college in 2001.

The School seeks to explore the theoretical and applied cutting edges of the information field and to nurture the best of both worlds: traditional library values and ever-changing information frontiers.

Vision

The School envisions a world where more effective use of information helps everyone discover, learn, innovate, solve problems, have fun, and make a better world. Information changes lives.

Mission

The School prepares information leaders through researching the problems and opportunities of information, designing solutions to information challenges, and making information work.

Informatics students design, build, implement, and secure information systems that meet human, organizational, and societal needs.

Students have a strong people focus and they excel as user experience designers, business analysts, data managers, information architects, web developers, and information assurance professionals.

Undergraduate Program

470 Mary Gates Hall
Box 352840
(206) 543-1794
informatics@uw.edu

The Information School offers a Bachelor of Science degree with a major in informatics, with options in human-computer interaction and information architecture.

Bachelor of Science

Suggested First- and Second-Year College Courses: INFO 101, INFO 200, an English composition course (selected from the University list), CSE 142, CSE 143, and STAT 221, STAT 311, STAT 293, or Q METH 201; courses that develop strong analytical, qualitative, and quantitative reasoning skills; courses that develop strong written and oral communication skills; courses that provide exposure to a variety of social science fields such as psychology, sociology, anthropology, or philosophy.

Program Admission Requirements

Regular Admission

1. INFO 200; CSE 142; either STAT 221, STAT 311, STAT 390, or QMETH 201; one English composition course selected from the University list, with a minimum 2.0 grade in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses.
2. Minimum 2.00 cumulative college GPA.
3. Admission is competitive, based on the following criteria:
 - a. Overall academic performance
 - b. Grades in courses required for admission to the major
 - c. Personal statement reflecting an interest in and commitment to becoming a major in this field
 - d. Other evidence of interest in and commitment to the field (e.g., work experience, internships).

Meeting the above criteria does not guarantee admission.

4. Application deadline is June 15. Students apply online at www.ischool.uw.edu. Admission is for autumn quarter only.
5. Admission is done annually and new students enter the program autumn quarter. Most students apply spring of their sophomore year and begin the program the following autumn quarter as a junior.
6. There is not an equivalent course to INFO 200 taught elsewhere; therefore, transfer students can apply to the program and be admitted with the provision that they complete INFO 200 with a minimum 2.0 grade before the end of their first year in the program.

Freshman Direct Admission Program (FDAP)

1. Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.
2. The number of early admission (FDAP) students does not exceed 10 percent of the number of majors admitted each year.

Major Requirements

94-99 credits as follows:

1. Courses required for admission to the program (18-19 credits, as shown above)
2. Core courses (50 credits): INFO 340, INFO 343, INFO 360, INFO 380, INFO 450, INFO 470, INFO 481, INFO 490 (4), INFO 491 (4), CSE 143, CSE 373
3. Areas of study (16-20 credits): Students may choose a transcriptable option in either human-computer interaction (HCI), information architecture (IA), information assurance and cybersecurity (IAC), or data science (See below.) Alternatively students may work with their adviser to select a minimum of four classes (16-20 credits) to create a customized program aligned with their personal interests or career goals. For example, web and mobile, as well as social computing/social informatics, are additional areas of strength within the School.
4. Free elective (10 credits): At least one additional 300- or 400-level INFO elective in any area, totalling at least 10 credits.

General Education and Areas of Knowledge

1. English composition (5 credits)
2. Quantitative/Symbolic Reasoning (5 credits)
3. Writing courses (10 credits)
4. Natural World (20 credits)
5. Individuals & Societies (20 credits)
6. Visual, Literary, & Performing Arts (20 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirement (Natural World; Individuals & Societies; Visual, Literary, & Performing Arts).

Options

Human-Computer Interaction (HCI) Option (16-20 credits): Minimum four courses from a department-approved list (<https://ischool.uw.edu/current/informatics/degree-plan/options>). INFO 360 is the informatics foundation course in HCI; however, it is a major core requirement and hence not included in the 16-20 credits.

Information Architecture (IA) Option (16-20 credits): Minimum four courses from an approved list. See department [website](#) for list.

Information Assurance and Cybersecurity Option (16-20 credits): See department [website](#) for list.

1. *Foundation Course:* INFO 310 or equivalent
2. Minimum three additional courses from an approved list (11-15 credits). Includes courses at participating departments on all three UW campuses. See program website for list: ischool.uw.edu/academics/informatics/degree-options. No more than one of these three may be a networking course (INFO 341, T INFO 250, or CSS 432).

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes

- *Learning Objectives and Expected Outcomes:* The informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science.

Graduates of the informatics program are qualified for jobs in the information and technology industry and in business, public service, and other professions. Possible job titles include user experience designer, business analyst, consultant, usability engineer, data manager, information architect, web developer, network manager, project manager, and information assurance professional.

The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information and management science, information science, biomedical informatics, business and accounting, and information technology.

Informatics student-learning outcomes include the ability to assess people's information needs and behavior; ability to design information systems to meet people's information needs; ability to work with information technologies (e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of information technologies on people; ability to communicate effectively; ability to manage projects; ability to build working systems; ability to organize and manage information; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- *Instructional and Research Facilities:* Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) laboratory, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia production, web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

- *Honors Options Available:* With College Honors; With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Distinction (Departmental Honors). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A

significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.

Informatics students are extensively engaged in faculty research and internships. A significant percentage of informatics students participates in the University's Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).

- *School Scholarships:* The Henry Scholarships, in the amount of approximately \$1500 each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.
- *Student Organizations/Associations:* Undergraduates participate in a number of the School's many student organizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technology (ASIST).

Of Special Note:

Capstone Projects: Students often use their capstone projects to identify interest areas, develop skills, and prepare for future pursuits. Through capstone projects, students demonstrate the skills, understanding, and competencies they can successfully use to prepare for employment and graduate studies.

Information Sessions: Prospective students are encouraged to attend an Informatics information session. For a schedule of information sessions, visit the School website at school.uw.edu/informatics/prospective/more_info.

Graduate Programs

The School offers graduate programs leading to the Master of Library and Information Science (MLIS), the Master of Science in Information Management (MSIM), and the Doctor of Philosophy (PhD) in Information Science.

Master of Library and Information Science

MLIS Adviser
420 Mary Gates Hall, Box 352840
(206) 543-1794
mlis@uw.edu

Admission Requirements

The MLIS program is offered in two delivery modes: residential (on-campus, full-time, two-year program) and online (part-time three-year program). When applying, applicants must indicate for which program they are applying. Applications should also include:

1. Personal statement of educational and professional goals
2. Answers to supplemental questions
3. Current resume highlighting any relevant work experience; volunteer activities; and honors, awards, and presentations
4. Three letters of recommendation
5. Transcripts from each relevant institution attended
6. TOEFL score (for international students)

Degree Requirements

63 credits, as follows:

1. *Core Curriculum (31 credits)*: LIS 500, LIS 510, LIS 520, LIS 530, LIS 550, LIS 560, LIS 570, LIS 580 , and one information technology core course.
2. *Electives (27 credits)*: Options vary and allow students to design a problem of study specific to their interests and career goals.
3. *Capstone (5 credits)*:
4. *Optional Internship*: Directed Fieldwork: LIS 590 is an elective course designed to provide students an opportunity to work in an information environment under the supervision of an experienced professional mentor.

Master of Library and Information Science, Law Librarianship

The Law Librarianship program is designed to prepare lawyers with an existing JD degree to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms.

Admission Requirements

1. Personal statement of educational and professional goals
2. Answers to supplemental questions
3. Current resume highlighting any relevant work experience; volunteer activities; and honors, awards, and presentations
4. Three letters of recommendation
5. Transcripts from each relevant institution attended
6. Earned JD prior to enrollment in the MLIS program
7. TOEFL score (for international students)

Degree Requirements

43 credits, as follows:

1. *Core Curriculum (23 credits)*: LIS 500, LIS 510, LIS 520, LIS 526, LIS 530, LIS 550, LIS 587
2. *Law Librarianship Courses (16 credits)*: LIS 592, LIS 593, LIS 594, LIS 595. The final degree project is completed as part of LIS 595.
3. *Internship (4 credits)*: directed fieldwork (LIS 590)

Master of Science in Information Management

MSIM Adviser

420 Mary Gates Hall, Box 352840

(206) 543-1794

msim@uw.edu

Admission Requirements

1. Current resume highlighting any relevant work experience; volunteer activities; and honors, awards, and presentations
2. Three letters of recommendation
3. Personal statement of educational and professional goals
4. Official transcript from each relevant institution attended
5. GRE or GMAT scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE or GMAT scores.
6. Non-native English speakers must fulfil the English language proficiency requirement. See UW Graduate School Memo 8 for additional information, <http://www.grad.washington.edu/policies/memoranda/memo08.shtml>
7. Mid-career applicants must show five years of relevant work experience in management or technology.

Degree Requirements, Full-Time Option

65 credits minimum, to include:

1. *Core Curriculum*: IMT 500, IMT 535, IMT 55, IMT 570
2. *Capstone (5 credits)*: INFX 595, INFX 596
3. *Electives (24 credits)*: Beyond the required core courses, students have the option of crafting a program of study by selecting a specialization specific to their interests and career goals, or to choose more broadly from across specializations. MSIM specializations include data science, information architecture, information security, user experience design, and information management and consulting.
4. *Internship*: MSIM internships are structured around IMT 590 and provide students an opportunity to work in an information environment under supervision of an experienced professional mentor. While not required, internships are strongly encouraged. During internship placement, the student works to meet meaningful learning objectives mutually defined by the student and internship supervisor. Internship credits fall under electives.

Degree Requirements, Mid-Career Option

47 credits minimum, to include:

1. *Core Curriculum (16 credits)*: IMT 500, IMT 535, IMT 550, IMT 570
2. *Capstone (optional 5 credits)*: INFX 595, INFX 596
3. *Electives (26 credits)*: Beyond required core courses, students craft a program of study by selecting a specialization specific to their interests and career goals, or choose more broadly from across specializations. MSIM specializations include data

science, information architecture, information security, user experience design, and information management and consulting.

All students in the MSIM program may elect to complete one or more of the following specializations:

- a. Date Science and Analytics (19-20 credit): Students use methods, tools, and frameworks for analyzing and deriving insight from large-scale, heterogeneous data.
- b. Information Architecture and Organization (17-20 credits) Students assess existing information structures and create new systems to effectively structure information.
- c. Information Management and Consulting (18-20 credits): Students develop and manage information policies, strategies, innovations, projects, and initiatives in public, private, and non-profit institutions.
- d. Information Policy and Society (13-17 credits): Students gain strategies and processes for critical analysis, development, and management of information policies and social, cultural, and policy issues.
- e. Information Security (9 credits): Students assure the quality, security, and appropriate use of information assets.
- f. User Experience (20-21 credits): Students design, prototype, and formally evaluate interactive information interfaces, systems, and experiences from a user-centered perspective.

For more information visit

<https://ischool.uw.edu/academics/msim/curriculum/specializations>

Doctor of Philosophy in Information Science

Adviser

420 Mary Gates Hall, Box 352840

(206) 543-1794

ischoolphd@uw.edu

Admission Requirements

1. Current curriculum vitae highlighting any academic and/or work experience, honors, publications, presentations, and research experience
2. Three letters of recommendation
3. Personal statement of educational and professional goals
4. Official transcript from each relevant institution attended
5. GRE Scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE scores.
6. TOEFL score (for international students)

Degree Requirements

90 credits minimum, to include:

1. *Required courses*: INSC 500, INSC 501, INSC 570, INFC 571, INSC 572; two research practica; two teaching practica

2. Additional elective coursework selected in consultation with faculty advisers
3. 18 graded credits in courses at the 500 level and above (taken prior to general examination)
4. 60 credits taken prior to general examination
5. 27 dissertation credits (INSC 800)
6. Preliminary review determined by a School-based advisory committee at the end of the required first year of full-time study
7. General examination upon completion of coursework and practica components to attain formal candidacy for the PhD program (candidate's certificate)
8. Successful defense of a dissertation before a Supervisory Committee (final examination)

Financial Aid

The University of Washington Financial Aid Office administers a variety of government and University funded financial aid programs for which applicants must submit the Free Application for Federal Student Aid form (FAFSA). For more information, contact the UW Financial Aid Office, 105 Schmitz Hall. Information on the FAFSA is also available [online](#).

Graduate Assistantships and Scholarships

Financial aid options for full-time students may include graduate assistantships and scholarships. Graduate assistants generally work 220 hours per quarter, and receive a tuition waiver as well as a monthly salary and medical benefits. Prospective MLIS and MSIM students are encouraged to apply during the admission process and throughout the year as other positions become available. Visit the Student Employment Opportunities page at ischool.uw.edu/jobs/students to apply for open positions. All students admitted to the PhD program are guaranteed a minimum four years of funding.

MLIS and MSIM admission committees have a limited number of merit-based scholarships to award to incoming students. Continuing students also have the opportunity to apply for scholarships. All eligible applicants and students are encouraged to complete the Free Application for Federal Student Aid (FAFSA) each year.

Additional scholarship and financial aid information is available on the following sites:

MLIS, <https://ischool.uw.edu/future/mlis/financial-aid>

MSIM, <https://ischool.uw.edu/future/msim/financial-aid>

PhD, <https://ischool.uw.edu/future/phd/funding>

Special Research Facilities

Located on the third and fourth floors of Mary Gates Hall, one of the University's high-technology buildings, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) lab, a Datalab for Data Science and Analytics, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia, web development, Internet exploration and collaboration, and office

productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

The School also has a dedicated information science research facility in Bloedel Hall, which includes offices, workstations, research labs, and meeting spaces.

Continuing and Professional Education

The Information School works with University of Washington Professional and Continuing Education to offer classes, workshops, and certificate programs for continuing education and professional development. Current certificate programs include web technology solutions; information assurance and cybersecurity; and school library professional. Those interested in continuing education or certificate programs should contact UW Professional and Continuing Education, 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105. Phone: (206) 543-2320 or see www.pce.uw.edu/.

THE INFORMATION SCHOOL

THE INFORMATION SCHOOL

INFORMATICS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

INFO 101 Social Networking Technologies (5) I&S/NW

Explores today's most popular social networks, gaming applications, and messaging applications. Examines technologies, social implications, and information structure. Focuses on logic, databases, networked delivery, identity, access, privacy, ecommerce, organization, and retrieval.

[View course details in MyPlan: INFO 101](#)

INFO 102 Gender and Information Technology (5) I&S, DIV

Explores the social construction of gender in relation to the history and contemporary development of information technologies. Considers the importance of diversity and difference in the design and construction of innovative information technology solutions. Challenges prevailing viewpoints about who can and does work in the information technology field. Offered: A.

[View course details in MyPlan: INFO 102](#)

INFO 198 Exploring Informatics (1-5, max. 15)

Introduces a variety of Informatics and Information Science topics to pre-Informatics and non-Informatics students.

[View course details in MyPlan: INFO 198](#)

INFO 200 Intellectual Foundations of Informatics (5) I&S

Information as an object of study, including theories, concepts, and principles of information, information seeking, cognitive processing, knowledge representation and restructuring, and their relationships to physical and intellectual access to information. Development of information systems for storage, organization, and retrieval. Experience in the application of theories, concepts, and principles.

[View course details in MyPlan: INFO 200](#)

INFO 201 Technical Foundations (5) QSR

Introduces fundamental tools and technologies necessary to transform data into knowledge. Covers the full information lifecycle, including the collection, storage, analysis and visualization of data. Core competencies underlying this process, including functional programming, use of databases, data wrangling, version control,

and command line proficiency, are acquired through real-world data-driven challenges.

[View course details in MyPlan: INFO 201](#)

INFO 240 Database Management Fundamentals I (5)

Covers database overview and history, the relational model, entity-relationship diagrams, database design and normalization, and Structured Query Language (SQL). Through labs, tests, and a project, students develop both theoretical and practical knowledge of relational database systems.

[View course details in MyPlan: INFO 240](#)

INFO 245 Database Management Fundamentals II (5)

Covers conceptual, logical, and physical database design: distributed databases; web technology and databases; advanced queries; and enterprise database administration. Through labs, tests, and a project, students develop both theoretical and practical knowledge of relational database systems. Prerequisite: INFO 240.

[View course details in MyPlan: INFO 245](#)

INFO 310 Information Assurance and Cybersecurity (5)

Provides a theoretical and practical introduction to information assurance and cyber-security (IAC). Includes methods and practices for securing information and information systems. Covers how vulnerabilities arise, recognizing evolving threats, and mitigating them. Explores the role of risk analysis, information privacy, accountability, and policy.

[View course details in MyPlan: INFO 310](#)

INFO 312 Enterprise Risk Management (4)

Examines the risk inherent in use of technology, and how to manage risk to information, data, and technology in organizations. Topics include risk management frameworks, risk tolerance, key risk indicators, the legislative and regulatory environment, compliance, and new avenues of risk such as social media and mobile.

[View course details in MyPlan: INFO 312](#)

INFO 320 Technical and Social Perspectives on Search (5)

Fundamentals of search including data acquisition and processing, index construction, query processing, ranking and display. Covers building a customized search service, search engine optimization, individual and social perspectives on search. Prerequisite: CSE 142 or CSE 143; and INFO 343 which may be taken concurrently.

[View course details in MyPlan: INFO 320](#)

INFO 330 Introduction to Information Architecture (5)

Introduction to Information Architecture (IA) methodologies and tools used to design and build information spaces. Discusses IA core concepts of navigation, labeling, data modeling, taxonomy and information personas. Also discusses wireframes, sitemaps, information design and integrating IA work with a UX strategy.

Prerequisite: minimum grade of 2.0 in INFO 360.

[View course details in MyPlan: INFO 330](#)

INFO 340 Introduction to Relational Database Management Systems (5) NW

Introduction to relational database management systems, focused on relational theory and the application of conceptual, logical, and physical database modeling. Key topics include the relational model, SQL, entity-relationship modeling, three-tier architectures, implementation of database applications, and related topics in information systems.

[View course details in MyPlan: INFO 340](#)

INFO 341 Computer Networks and Distributed Applications (5) NW

Basic concepts of local and wide-area computer networking including an overview of services provided by networks, network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses management, security, authentication, and policy issues associated with distributed systems. Prerequisite: CSE 142 or CSE 143.

[View course details in MyPlan: INFO 341](#)

INFO 343 Client-Side Web Development (5) NW

Introduction to client-side web development including markup, programming, protocols, libraries, frameworks, and techniques for creating effective, usable, dynamic, and responsive applications that meet user needs. Includes an introduction to web development roles within organizations, content management systems, and other tools to build and manage websites and applications. Prerequisite: CSE 142 or CSE 143; and INFO 201.

[View course details in MyPlan: INFO 343](#)

INFO 344 Server-Side Web Development (5)

Introduces server-side web development programming, services, tools, protocols, best practices and techniques for implementing data-driven and scalable web applications. Connects topics from human-centered design, information architecture, databases, data analytics and security to build a solution. Prerequisite: CSE 142 or CSE 143; and either INFO 343 or CSE 154; and INFO 340.

[View course details in MyPlan: INFO 344](#)

INFO 360 Design Thinking (5) I&S

Design methods for identifying user needs, devising new design concepts, prototyping these concepts, and evaluating utility and usability. Introduces theory and practice of user-centered design. Methods for identifying users' needs, understanding users' behaviors, envisioning and prototyping new systems, and evaluating the usability of systems. Emphasizes incorporating people in the entire design process.

[View course details in MyPlan: INFO 360](#)

INFO 362 Visual Information Design (5)

Build fluency in expressing information visually as diagrams, charts, maps, and icons. Learn to solve design problems, give and receive critique, follow an iterative process of design refinement, and learn technical skills. Understand the nature of visual potential, visual design principles, and the impact of color and typography.

[View course details in MyPlan: INFO 362](#)

INFO 365 Mobile Application Design (5)

Fundamentals of mobile UX & UI design through the lens of creating your own mobile OS and core mobile apps in a design studio setting. Includes creating a mobile design language and mobile patterns, app review by professional designers, and how design for mobile is unique from other mediums. Recommended: INFO 360

[View course details in MyPlan: INFO 365](#)

INFO 370 Introduction to Data Science (5) QSR

Surveys the major topics within data science, including data ingestion, cloud computing, statistical inference, machine learning, information visualization, and data ethics. Includes programming in R and Python.

Prerequisite: INFO 201; and CSE 142 or CSE 143; and either CS&SS 221, SOC 221, STAT 221, STAT 311, MATH 390, STAT 390, QMETH 201, or Q SCI 381.

[View course details in MyPlan: INFO 370](#)

INFO 371 Core Methods in Data Science (5) QSR

Introduces modern methods in applied data science. Emphasizes practical applications and analysis of real-world data through a survey of common techniques in supervised and unsupervised machine learning, and methods for experimental design and causal inference. Students learn functional, procedural, and statistical programming techniques for working with data. Prerequisite: INFO 370.

[View course details in MyPlan: INFO 371](#)

INFO 380 Information Systems Analysis and Design (5)

Prepares students to participate in structured systems analysis and design efforts. Students learn how to analyze system context, behavior, and structure; identify stakeholders; gather requirements; and redesign systems to make them more beneficial to the organization.

[View course details in MyPlan: INFO 380](#)

INFO 386 Professionalism in Informatics (4)

Examines professionalism, communication, teamwork, leadership, and interpersonal networking to strengthen

students as they seek to excel professionally. Covers developing and presenting business cases and project plans, personal branding, conducting informational interviews, and effective written and oral communication.

[View course details in MyPlan: INFO 386](#)

INFO 415 Emerging Topics in Information Assurance and Cybersecurity (1-5, max. 15)

Explores emerging topics and unique subjects in information assurance and cybersecurity (IAC) not otherwise covered in the IAC curriculum. Prerequisite: INFO 310.

[View course details in MyPlan: INFO 415](#)

INFO 431 Metadata Design (3)

Explores principles of metadata schema and application profile design and implementation using XML technologies. Examines syntactic and semantic interoperability among diverse schemas and application profiles. Prerequisite: INFO 330; INFO 340.

[View course details in MyPlan: INFO 431](#)

INFO 432 Ontology Design (3)

Covers concepts and technologies supporting semantic interoperability among different metadata and ontologies including topic maps, RDF, schema, and Web Ontology Language (OWL). Includes advanced semantic modeling of complex data. Prerequisite: INFO 431.

[View course details in MyPlan: INFO 432](#)

INFO 433 Content Strategy in Information Architecture (4) I&S

Introduces key concepts in understanding the content lifecycle in context of an organization's web, mobile, and other communication channels. Provides knowledge of key theories and principles in information architecture and practical application of skills including user research; information collection and analysis; and information organization and presentation.

[View course details in MyPlan: INFO 433](#)

INFO 444 Value-Sensitive Design (5)

Introduction to value-sensitive design (VSD), information system design that accounts for human values in a principled and comprehensive manner. Examination of existing systems from a VSD perspective. Explores VSD research methods including conceptual, technical, empirical investigations. Key values include accountability, autonomy, consent, privacy, property, trust, sustainability. Prerequisite: either INFO 360, DESIGN 383, CSE 440, or HCDE 419.

[View course details in MyPlan: INFO 444](#)

INFO 445 Advanced Database Design, Management, and Maintenance (5)

Advanced perspectives on DBMS theory, architecture, and implementation. Conceptual, logical, physical modeling. Index structures, query optimization and performance tuning, relational algebra, transaction processing, and concurrency control. Operational databases, decision support systems, and data warehousing. Projects in database implementation and integration. Social implications of large distributed database systems. Prerequisite: INFO 340.

[View course details in MyPlan: INFO 445](#)

INFO 447 Computer Supported Cooperative Work (5) I&S

Focuses on design and use of collaboration technologies to communicate, share information, and coordinate activity. Emphasis on behavioral and social aspects of adopting and using these technologies. Topics include the history of work in this and related fields, collaboration support for teams, organizations, and communities.

[View course details in MyPlan: INFO 447](#)

INFO 448 Mobile Development: Android (5)

Application development for Android devices. Covers implementation of mobile apps, including build tools, programming languages and libraries, user interfaces, application architecture, and industry practices. Focuses on harnessing communication systems and sensors specific to mobile platforms, to create interactive, user-

focused systems. programming in Java and XML. Prerequisite: CSE 143; and INFO 343 or CSE 154.¹⁸⁵³

[View course details in MyPlan: INFO 448](#)

INFO 449 Mobile Development: IOS (5)

Application development for iOS devices. Covers implementation of mobile apps, including build tools, programming languages and libraries, user interfaces, application architecture, and industry practices. Focuses on harnessing communication systems and sensors specific to mobile platforms, to create interactive, user-focused systems. Programming in Swift and XML. Prerequisite: CSE 143; and INFO 343 or CSE 154.

[View course details in MyPlan: INFO 449](#)

INFO 450 Information Ethics and Policy (5) I&S

Provides a framework for analyzing the ethical, legal, economic, and socio-political issues surrounding information, information technologies, and the information industries. Explores policy and ethical issues of information access and control including; intellectual property, file sharing, free speech, privacy, and national security.

[View course details in MyPlan: INFO 450](#)

INFO 461 Cooperative Software Design (5)

Introduces the theory and practice of cooperative user-centered software design, applying fundamental theories and techniques from social psychology, computer-supported collaborative work, and software engineering. Prerequisite: INFO 360; and INFO 343 or CSE 154.

[View course details in MyPlan: INFO 461](#)

INFO 463 Input and Interaction (5)

Introduces input and interaction techniques for desktop, mobile, and other computing environments. Combines motor and perceptual psychology, interaction design, and input devices and software in the study of human-computer systems. Emphasizes using human performance models inform the design of new interaction techniques. Prerequisite: INFO 360.

[View course details in MyPlan: INFO 463](#)

INFO 466 Immersive Information Environments (5) VLPA/I&S

Introduction to immersive technologies and approaches to analyzing, designing, and building immersive worlds utilizing game theory, 3D interactive design, environments, and learning theory. Conducted exclusively in a virtual world environment through a hands-on and practical educational approach.

[View course details in MyPlan: INFO 466](#)

INFO 467 Immersive Information Environment Design (5) VLPA

Design, build, and curate immersive environments in a hands-on studio. Learn tools and techniques for contributing to immersive information environments such as virtual worlds, 3D simulations, and serious games, Utilize 3D information architecture to create personalized, community based environments for education, business and entertainment. Prerequisite: INFO 466.

[View course details in MyPlan: INFO 467](#)

INFO 470 Research Methods in Informatics (5)

Introduction to the research methods used in informatics for understanding technology, information, and human behavior. Methods incorporate those from design, engineering, and social science. Topics include science and invention, research contribution types, research through design, theory, ethics, and qualitative/quantitative empirical methods. Prerequisite: CS&SS 221/SOC 221/STAT 221, STAT 220, STAT 311, QMETH 201, or Q SCI 381.

[View course details in MyPlan: INFO 470](#)

INFO 474 Interactive Information Visualization (5) VLPA, QSR

Techniques and theory for visualizing, analyzing, and supporting interaction with structured data like numbers, text, and relations. Provides practical experience designing and building interactive visualizations for the web. Exposes students to cognitive science, statistics, and perceptual psychology. An empirical approach will be used

to design and evaluate visualizations. Prerequisite: INFO 343 or CSE 154; and CSE 143; and either Q¹⁸⁵⁴ METH 201, Q SCI 381, STAT 221/CS&SS 221/SOC221, STAT 311, or STAT 390/MATH 390.

[View course details in MyPlan: INFO 474](#)

INFO 481 Project Management in Informatics (4)

Introduces project management principles within the context of Informatics. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and the use of computer-based project management tools.

[View course details in MyPlan: INFO 481](#)

INFO 490 Project Capstone I (4)

Student-driven team project including definition of an information problem, a method of investigation, creation of a project proposal, and completion of project deliverables. Prerequisite: INFO 360; INFO 470; INFO 481.

[View course details in MyPlan: INFO 490](#)

INFO 491 Project Capstone II (4)

Includes design and implementation of a system or development of a research question intended to solve an information problem. Incorporates stakeholder and peer feedback, creation of project deliverables, presentation of the project in a public forum, and final assessment. Prerequisite: INFO 490.

[View course details in MyPlan: INFO 491](#)

INFO 495 Internship in Informatics (1-5, max. 12)

Internship in the private or public sector, as approved by faculty member. Work jointly supervised by faculty member (or approved academic sponsor) and an on-site work supervisor.

[View course details in MyPlan: INFO 495](#)

INFO 496 Service Learning in Informatics (1-5, max. 12)

Utilization of skills in service of the community, as approved by faculty member. Work to be jointly supervised by faculty member (or approved academic sponsor) and on-site service supervisor. Credit/no-credit only.

[View course details in MyPlan: INFO 496](#)

INFO 497 Informatics Study Abroad (1-8, max. 18)

International seminar, led by Information School faculty or researchers. Addresses a specialized area of informatics. Topics vary. May require language proficiency.

[View course details in MyPlan: INFO 497](#)

INFO 498 Special Topics in Informatics (1-5, max. 15)

Various topics in informatics.

[View course details in MyPlan: INFO 498](#)

INFO 499 Independent Study (1-5, max. 15)

Readings, design projects, or research under faculty supervision.

[View course details in MyPlan: INFO 499](#)

THE INFORMATION SCHOOL

THE INFORMATION SCHOOL

INFORMATION MANAGEMENT & TECHNOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

IMT 500 Foundations of Information Management (3)

Examines the role and function of information and information management in individual, organizational, community, and social contexts. Topics include information and information management concepts; methods of managing information and information flows within organizations; and internal and external communication in professional settings.

[View course details in MyPlan: IMT 500](#)

IMT 501 Teamwork for Information Professionals (1)

Introduces the theory and skills that support functional working groups, preparing students to work together effectively in the classroom and the workforce. Major topics include: theoretical perspectives on teams; processes and structural characteristics that influence team effectiveness; dynamics of individual behavior and interpersonal relationships in team interactions; and team leadership.

[View course details in MyPlan: IMT 501](#)

IMT 502 Effective Written Communications for Information Professionals (1)

Provides the theory and skills necessary to communicate in writing in a manner that will accomplish the writer's goals. Major topics include: basic communication theory; effective organization; use of visuals; making writing accessible; managing tone; and writing online.

[View course details in MyPlan: IMT 502](#)

IMT 503 Effective Oral Communications for Information Professionals (1)

Provides the theory and skills necessary to make effective oral presentations that will accomplish the presenter's goals. Major topics include: basic communication theory; preparing effective presentations; presentation best practices; and nonverbal communication cues.

[View course details in MyPlan: IMT 503](#)

IMT 510 Human Aspects of Information Systems (4)

Social, organizational, cognitive, behavioral, and contextual aspects of information, including basic concepts in

human information behavior, conceptual and practical frameworks used to study human-information interaction, and social responses to information technology. User-based and work-based evaluation and design of information systems. Exposure to experimental and interview methodologies.

[View course details in MyPlan: IMT 510](#)

IMT 520 Information Services and Resources (4)

Concepts, processes, and skills of information involving creation, production, distribution, selection, collection, and services to facilitate access. Analysis of the information mediation process, including determining information needs; searching for, evaluation, and presentation of appropriate results; and modalities for delivery of services.

[View course details in MyPlan: IMT 520](#)

IMT 525 Information Management and Technology in Sports (3)

Explores the information perspective, including the role and the use of information, information management, and information technologies applied to the sports context. Examines modern and emerging information management and technology systems and their design and use in administering intercollegiate athletic functions.

[View course details in MyPlan: IMT 525](#)

IMT 530 Organization of Information Resources (4)

Introduction to issues in organization of information and information objects including analysis of intellectual and physical characteristics of information objects; use of metadata and metadata standards for information systems; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

[View course details in MyPlan: IMT 530](#)

IMT 535 Introduction to Information Architecture (5)

Introduces concepts and methods of front- and back-end information architecture. Covers back-end topics including data and content modeling, taxonomy, controlled vocabulary, SEO, search, and analytics. Covers front-end topics including design thinking, design process, design patterns, navigation, workflow, labeling, orientation, and information scent. Unifies front- and back-end IA.

[View course details in MyPlan: IMT 535](#)

IMT 540 Design Methods for Interactive Systems (4)

Introduction to the theory and practice of user-centered design. Examines design methods for identifying and describing user needs, specifying and prototyping new systems, and evaluating the usability of systems. Examines design methodologies such as contextual design and value-sensitive design, giving specific emphasis to human-information interaction. Prerequisite: permission of instructor.

[View course details in MyPlan: IMT 540](#)

IMT 541 Enterprise Information Systems Analysis and Design (4)

Theoretical and practical examination of information systems analysis and design processes as they apply in the workplace. Explores techniques for assessing system and technology needs, defining information and work specifications, process and data modeling, and stakeholder analysis process; and input and output design, database design, test plans and implantation strategies in the design process.

[View course details in MyPlan: IMT 541](#)

IMT 550 Policy and Ethics in Information Management (4)

Explores a range of information issues in the social and organizational context of information professionals, including professional ethics, privacy, freedom of expression, and intellectual property. Gives students tools for analysis of the kinds of social and ethical issues that will arise in their future lives as information professionals.

[View course details in MyPlan: IMT 550](#)

IMT 551 Foundations of Organizational Information Assurance (3)

Concepts, elements, strategies, skills related to life cycle of information assurance--involving policies, practices, mechanisms, dissemination, and validation--that ensure the confidentiality, integrity, and availability of

information and information systems. Analyzes the information assurance planning process, including¹⁸⁵⁷ determination and analysis of information assurance organization goals, threat spectrum, risk, and legal and ethical issues.

[View course details in MyPlan: IMT 551](#)

IMT 552 Information Assurance Risk Assessment and Management (3)

Examines the concepts, processes, and skills related to risk management in information assurance involving risk assessment, risk analysis, and mitigation planning. Analysis of the risk management process through several structured approaches that facilitate information assurance decision-making. Prerequisite: IMT 551.

[View course details in MyPlan: IMT 552](#)

IMT 553 Establishing and Managing Information Assurance Strategies (3)

Applies and combines information assurance concepts, processes, and skills to solve case studies from practitioner experiences and explore the role of policy in creating a successful information assurance program. Prerequisite: IMT 551, IMT 552.

[View course details in MyPlan: IMT 553](#)

IMT 554 Information Economics (3)

Theoretical and practical examination of how information economics impacts design decision in context of information systems and information organizations. How information is priced, commoditized, exchanged, preserved in economic transactions. How strategic decisions within organizations are made through information and strategic games, information signaling, information strategies, information-based network economics, and information incentives

[View course details in MyPlan: IMT 554](#)

IMT 556 Information and Operational Risk (3)

Examines the information dimensions of the most common types of operational risk including: internal and external fraud, regulatory noncompliance, processing errors, information security breaches, and technology failures; practical application of operational risk frameworks where the intersection of people, information, processes, systems, and external events can lead to financial loss.

[View course details in MyPlan: IMT 556](#)

IMT 557 Operational Risk Management in the Public and Private Sectors (4)

Learn to identify, monitor, and mitigate operational risk exposures in corporations and government agencies, analyze risk appetites, and drive risk awareness at each level of corporate or government hierarchies. Examines technology failure and information sharing in crisis management, intellectual property, and data risk in various infrastructure sectors. Prerequisite: IMT 556.

[View course details in MyPlan: IMT 557](#)

IMT 570 Analytic Methods for Information Professionals (4)

Sharpens critical thinking processes by studying and applying scientific methods to problem solving in the information management area. Provides a framework to resolve information management research problems, interpret research findings, and to understand the interaction among the various parts of the research process.

[View course details in MyPlan: IMT 570](#)

IMT 576 Foundations of Strategic and Managerial Business Intelligence (4)

Provides a broad overview of business intelligence (BI) including foundational BI concepts, strategies, techniques, and technologies. Primary emphasis is on the strategic and managerial perspective, focusing on how one designs, implements, and leverages business intelligence systems and strategies in management and leadership roles. Prerequisite: INFX 543

[View course details in MyPlan: IMT 576](#)

IMT 577 Business Intelligence Systems (4)

Introduces fundamentals of how to architect and develop business intelligence systems for decision making. Topics include dimensional data modeling; extracting, transforming, and loading data (ETL); online analytical

processing (OLAP); data warehouse architecture; developing data visualizations to answer key business¹⁸⁵⁸ questions. Prerequisite: INFX 543

[View course details in MyPlan: IMT 577](#)

IMT 580 Management of Information Organizations (4)

Introduction to internal and external management issues and practices in information organizations. Examines key topics drawn from the fields of organizational theory and behavior, including planning and decision-making, organizational structure, leadership, and motivation. Reviews strategic and operational issues including human and organizational issues related to technology introduction, use, and management.

[View course details in MyPlan: IMT 580](#)

IMT 582 Strategic Information Initiatives (4)

Tools, techniques, approaches for identifying and planning entrepreneurial initiatives within organizations, including business information assessments, organizational readiness assessments, alignment with organizational priorities, information audits, processes for obtaining organizational investment in and commitment to new initiatives. Focuses on building business and economic justifications and leading strategic initiatives in organizations.

[View course details in MyPlan: IMT 582](#)

IMT 583 Finance and Accounting Foundations for Information Professionals (3)

Introduction to financial accounting, including the principles of double-entry accounting, balance sheets, income, and cash flow statements. Covers key financial ratios and their use for various analytical purposes, along with the elements of a financial plan or budget.

[View course details in MyPlan: IMT 583](#)

IMT 584 Marketing Foundations for Information Professionals (3)

Introduction to the principles of marketing. Looks at how to assess an environment from a marketing perspective, consumer and business behavior, market segmentation, product/service strategies, new product development processes, pricing, channels, retail/wholesale, marketing communication, and direct selling.

[View course details in MyPlan: IMT 584](#)

IMT 585 Consulting Practices (4)

Provides an overview of Information consulting practices including consulting concepts, methodologies, approaches to consultative analysis and problem solving. Emphasizes a systems-thinking approach to practicing effective technical and interpersonal consulting behaviors as well as processes for internal and external consulting. Interpersonal/communication skills, client relationship management and change management are strongly emphasized. Prerequisite: IMT 580.

[View course details in MyPlan: IMT 585](#)

IMT 586 Information Dynamics I (4)

Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and "soft operations research," as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with INSC 586.

[View course details in MyPlan: IMT 586](#)

IMT 587 Principles of Information Project Management (4)

Introduces project management principles within information-related business contexts. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and their use of computer-based project management tools.

[View course details in MyPlan: IMT 587](#)

IMT 588 Enterprise Project Management in Information Organizations (4)

Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-

functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with INSC 588.

[View course details in MyPlan: IMT 588](#)

IMT 589 Special Topics in Information Management (1-4, max. 12)

Special study and research in topics of current concern to faculty and students.

[View course details in MyPlan: IMT 589](#)

IMT 590 Internship in Information Management (1-5, max. 10)

Internship in the private or public sector, jointly supervised by faculty member and an on-site work sponsor.

Prerequisite: enrollment in the MSIM program. Credit/no-credit only.

[View course details in MyPlan: IMT 590](#)

IMT 598 Emerging Trends in Information Management and Technology (3)

Focus on emerging trends in information management and information technology. Attention given to their impact on the functions of the chief information officer and others managing the acquisition, retention, use, and disposition of information and the enabling technologies. Exploration of methods and resources for trend discovery and tracking. Prerequisite: permission of instructor.

[View course details in MyPlan: IMT 598](#)

IMT 600 Independent Study or Research in Information Management ([1-4]-)

Supervised independent study or research. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program. Credit/no-credit only.

[View course details in MyPlan: IMT 600](#)

THE INFORMATION SCHOOL

THE INFORMATION SCHOOL

INFORMATION SCHOOL INTERDISCIPLINARY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

INFX 501 Concepts in Algorithmic Thinking for Information (1)

Presents programming concepts in the context of information science including the concepts of the algorithm, data storage, expressions, syntax, logic, objects, commands, and events. Introduces the algorithmic manipulation of information objects, and the mindset and methods of computer programming and application development. Credit/no-credit only.

[View course details in MyPlan: INFX 501](#)

INFX 502 Database Concepts for Information Professionals (3)

Introduces the terminology and concepts of managing data with relational database management systems. Students will gain introductory exposure to data modeling, relational database design, creation, and use. Credit/no-credit only. Credit/no-credit only.

[View course details in MyPlan: INFX 502](#)

INFX 503 Website Design Concepts for information Professionals (1)

Introduces the context and construction of websites presenting an integrated understanding of web design principles, information behavior, and technical skills. Emphasizes the roll of markup in information display and organization, the development of large sites, web strategy, and site construction. Credit/no-credit only.

[View course details in MyPlan: INFX 503](#)

INFX 504 Networking and Network Applications for Information Professionals (1)

Introduces the concepts, terminology, and technologies of digital networks, including how networks operate and the influence networks have on the workplace and society. Includes preparation to think critically about the impacts of networking technologies on organizations, work groups, and information systems. Credit/no-credit only.

[View course details in MyPlan: INFX 504](#)

INFX 505 Project Management Basics for Information Professionals (1)

Introduces the terminology, concepts, and skills used in working with project management and project management software. Emphasizes developing, refining, and monitoring work schedules using software tools.

Credit/no-credit only.

[View course details in MyPlan: INFX 505](#)

INFX 508 Reading Seminar (2)

Discusses theoretical works and contemporary research in areas related to information science, information management, or information technology and design. Introduces students to the intellectual traditions that underlie the field. Credit/no-credit only.

[View course details in MyPlan: INFX 508](#)

INFX 511 Introduction to Programming for Information and Data Science (4)

Introduces fundamentals of computer programming as used for data science. Covers foundational skills necessary for writing stand-alone computer scripts, including programming syntax, data structuring, and procedural definition (functions). Includes programming environments (command-line) and version control. Emphasizes skills in algorithmic thinking, abstraction, debugging, and code reuse. Assumes no previous programming background.

[View course details in MyPlan: INFX 511](#)

INFX 512 Beginning Web Development (4)

Teaches students how to build custom websites/applications from scratch, manage files in a version control system, and deploy them to publicly-accessible web servers. Focus is on client-side technologies, including HTML, CSS, and JavaScript. Existing basic programming knowledge is beneficial but not required.

[View course details in MyPlan: INFX 512](#)

INFX 531 Metadata Design (3)

Design principles of metadata schemas and application profiles - implementation of interoperable application profiles using XML technology. Focuses on achieving syntactic and semantic interoperability among diverse metadata schemas and application profiles. Prerequisite: either LIS 530 or IMT 530; INFX 542; or permission of instructor.

[View course details in MyPlan: INFX 531](#)

INFX 532 Ontology Design (3)

Studies semantic interoperability among different metadata schemas and ontologies. Elaborates on concepts and technology related to Topic Maps, RDF Schema, and Web Ontology Language (OWL) to achieve advanced and semantic data modeling of complex data that exist in the real world. Prerequisite: INFX 531 or permission of instructor.

[View course details in MyPlan: INFX 532](#)

INFX 536 Metadata for Interactive Media (3)

Explore new ideas and approaches for organizing and providing access to interactive media, particularly from a user-centered perspective. Design and conduct formative and evaluative user studies employing various qualitative and quantitative methods to determine information needs and seeking behaviors of various stakeholders in one or more interactive media domains.

[View course details in MyPlan: INFX 536](#)

INFX 537 Construction of Indexing Languages (4)

Exploration of the design, construction, evaluation, and maintenance of controlled indexing languages, including studies of how users are integrated into the design process. Through completion of thesaurus construction project, prepares students to design index languages, plan and implement a design project, and evaluate indexing languages. Prerequisite: either LIS 530 or IMT 530. Credit/no-credit only.

[View course details in MyPlan: INFX 537](#)

INFX 538 Metadata Design Studio (4)

Principles, skills and practices in the conceptualization and implementation of metadata systems with a focus on semantic web. Project-based exploration of domain and abstract data modeling, attribute/value space definition,

and machine encoding decision. Prerequisite: either LIS 530 or IMT 530; INFX 542; or permission of instructor.^{#862}
[View course details in MyPlan: INFX 538](#)

INFX 542 Information Structures Using XML (4)

Introduces the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight given to understanding structures and implementing them. Topics include information analysis and organizational methods as well as XML and metadata concepts and application. Prerequisite: INFX 503.

[View course details in MyPlan: INFX 542](#)

INFX 543 Relational Database Management Systems (4)

Introduces relational database design, implementation, and management, with a focus on using relational database management systems (DBMS) to manage data in an organization. Topics include: data modeling tools and techniques, conceptual and logical database design, physical implementation, SQL, data management, and database administration. Recommended: INFX 502.

[View course details in MyPlan: INFX 543](#)

INFX 544 Information Retrieval Systems (3)

Introduction to theory and models in information retrieval and the systems for storage and retrieval of unstructured information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation, methods and tools for document analysis, interfaces, and usability.

[View course details in MyPlan: INFX 544](#)

INFX 546 Data Communications and Networking (4)

Covers local and wide-area computer networking including topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks.

[View course details in MyPlan: INFX 546](#)

INFX 547 Social Media Data Mining and Analysis (4)

Explores techniques for collecting and analyzing social media. Students gain direct experience with methods for collecting a social media corpus, defining features of activity that are relevant for analysis, and analyzing those features. Prerequisite: either INFX 501 or permission of instructor.

[View course details in MyPlan: INFX 547](#)

INFX 551 Fundamentals of Data Curation (4)

Examines principles, practices, and trends in the curation of digital research data. Provides a foundation in data management and data services for professional in institutions involved with data intensive research, scholarship, and innovation. Emphasizes data sharing, preservation, open access, metadata, and policy for development of reusable and accessible data resources.

[View course details in MyPlan: INFX 551](#)

INFX 554 Information and Contemplation (4)

Explores how contemplative practices and perspectives can offer insights into today's information-intensive culture and how they can provide guidelines and design principles for the development of new information practices and technologies. Students explore a variety of contemplative/attentional practices and use these to investigate information trends, practices, and concerns.

[View course details in MyPlan: INFX 554](#)

INFX 561 Visualization Design (4)

Students develop a human-centered visualization design practice using real-world data. This process includes applying graphic principles of visual encoding to data; conducting design explorations using sketches and prototyping; and gathering user feedback to assess output. Design workshops provide opportunities for hands-on engagement with concepts and technical skills.

[View course details in MyPlan: INFX 561](#)

INFX 562 Interactive Information Visualization (4)

Introduces techniques for visualizing, analyzing, and supporting interaction with structured data (numbers, text, graphs). Provides experience creating interactive visualizations for the web. Exposes students to cognitive science, statistics, and perceptual psychology principles. Students design and evaluate visualizations using perceptual and statistical accuracy.

[View course details in MyPlan: INFX 562](#)

INFX 563 Advanced Relational Database Management Systems (4)

Conducts deeper investigation into construction of high-volume, robust database systems from conception through deployment. Topics include Enhanced ERDs, explicit transaction-management (control-of-flow, error-handling), coded business rules, troubleshooting and optimization. Investigation of disaster recovery, security, high-availability and scalability solutions as well as NoSQL and data warehousing topics. Prerequisite: INFX 543.

[View course details in MyPlan: INFX 563](#)

INFX 565 Designing Information Experiences (4)

Explores experience design including user experience, customer experience, and service design. Covers the philosophical foundations of experience, how to design and evaluate experiences, and the business aspects of customer experience. The focus is on experiences of and with information.

[View course details in MyPlan: INFX 565](#)

INFX 567 Strategic Management of Social Media (4)

Offers an overview of social media use in organizations of any type. Covers a variety of social media platforms and technologies, business strategies, and uses and related issues. Gives a historical perspective on social media and its development. Students learn to develop social media strategies and implementation plans for organizations.

[View course details in MyPlan: INFX 567](#)

INFX 571 Research Seminar (1-4, max. 10)

Students work in teams under the supervision of individual faculty members to engage in research or design activities and learn through hands-on participation and study. Learning activities include data collection, data analysis, building prototypes, testing or evaluation, or dissemination activities.

[View course details in MyPlan: INFX 571](#)

INFX 572 Introduction to Data Science (4)

Introduces a broad, non-technical overview of key concepts, skills, and technologies used in "data science". Provides a high-level introduction to common data science pipelines, such as experimental design, data collection and storage, basic analytics, machine learning, and data visualization, focusing on analyzing in real-world datasets using industry standard statistical packages.

[View course details in MyPlan: INFX 572](#)

INFX 573 Data Science I: Theoretical Foundations (4)

Introduces technically focused theoretical foundations of "Data Science." Provides an overview of key concepts, focusing on foundational concepts such as exploratory data analysis and statistical inference. Assignments are data-intensive, and require significant programming and statistical analysis. Students are expected to have college-level statistics and programming experience (R and python preferred). Prerequisite: either Q METH 201, IMT 570, or equivalent college coursework; either CSE 142, INFX 501, or equivalent college coursework.

[View course details in MyPlan: INFX 573](#)

INFX 574 Data Science II: Machine Learning and Econometrics (4)

Provides theoretical and practical introduction to modern techniques for the analysis of large-scale, heterogeneous data. Covers key concepts in inferential statistics, supervised and unsupervised machine learning, and network analysis. Students will learn functional, procedural, and statistical programming techniques for working with real-world data. Prerequisite: INFX 573.

[View course details in MyPlan: INFX 574](#)

INFX 575 Data Science III: Scaling, Applications, and Ethics (4)

Focuses on utilizing advanced skills for analyzing and deriving insights from large-scale, heterogeneous data. Provides methods, tools, and frameworks for analyzing large-scale data, with topics including scaling and distributed computing, and network analysis. Special attention will be paid to ethical considerations in modern Data Science. Prerequisite: INFX 574.

[View course details in MyPlan: INFX 575](#)

INFX 576 Social Network Analysis (4)

Provide students with an understanding of the fundamental concepts, common methods, and analytical tools of social network analysis. Student will gain experience applying both exploratory and inferential methods to real-world problems within the social network domain.

[View course details in MyPlan: INFX 576](#)

INFX 583 Cross Cultural Approaches to Leadership (3)

Explores alternative leadership models as reflected in the literatures of multiple cultures. Examines ethical dimensions of leadership in the context of complex relationships among the peoples and agencies that comprise the global environment. Uses imagination in the application of cross cultural forms of leadership. Prerequisite: permission of instructor.

[View course details in MyPlan: INFX 583](#)

INFX 594 Degree Research Project (3)

Includes analysis, design, completion, documentation, and presentation of a faculty-defined individual or group research project demonstrating professional-level knowledge and skills. Meets culminating experience master's degree requirement. Prerequisite: completion of 30 credits and adviser approval of an MLIS degree plan or completion of 38 MSIM core credits. Credit/no-credit only.

[View course details in MyPlan: INFX 594](#)

INFX 595 Capstone I - Project Planning (2)

Analysis and preliminary design of an approved individual or group research or implementation project demonstrating professional-level knowledge and skills. Prerequisite: either completion of all MSIM core courses or completion of 30 credit hours and advisor approval of an MLIS degree plan. Credit/no-credit only.

[View course details in MyPlan: INFX 595](#)

INFX 596 Capstone II - Project Implementation (3)

Implementation of a project demonstrating professional-level knowledge and skills based on a project plan developed in INFX 595. Prerequisite: INFX 595. Credit/no-credit only.

[View course details in MyPlan: INFX 596](#)

INFX 597 Information Science Study Abroad (1-8, max. 18)

International seminar, led by Information School faculty or researchers. Addresses a specialized area of information studies. Topics vary. May require language proficiency.

[View course details in MyPlan: INFX 597](#)

INFX 598 Special Topics (1-4, max. 30)

Introduces innovation and specialized topics relating to the study of information in any context.

[View course details in MyPlan: INFX 598](#)

THE INFORMATION SCHOOL

THE INFORMATION SCHOOL

INFORMATION SCIENCE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

INSC 500 Faculty Seminar (2)

Presentations by faculty concerning research projects in which they are involved. Credit/no-credit only.

[View course details in MyPlan: INSC 500](#)

INSC 501 Theoretical Foundations for Information Science (3)

In-depth exploration of the philosophical, theoretical, methodological, and historical foundation of information science and the study of information.

[View course details in MyPlan: INSC 501](#)

INSC 512 Community Analysis (4)

Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with LIS 512.

[View course details in MyPlan: INSC 512](#)

INSC 518 Seminar in Human Information Interaction (4)

Investigates conceptual frameworks, assumptions, analytical tools, concepts, models, and theories in human information interaction (HII). Topics may include theories of information behavior, information behavior in everyday life, social informatics, HII in organizations, or personal information management. Previous readings in HII preferred. Prerequisite: permission of instructor.

[View course details in MyPlan: INSC 518](#)

INSC 535 Classification Theory (3)

Survey of classificatory principles from bibliographic, philosophical, socio-cognitive, and linguistic perspectives. Overview of history of bibliographic classification and exploration of some existing bibliographic classification systems. Ramification of theoretical approach for classification practice. Prerequisite: LIS 530. Offered: jointly with LIS 535.

[View course details in MyPlan: INSC 535](#)

INSC 538 Seminar in Information Organization (4)

Seminar on information organization, focusing on any area of information organization, including classification theory, metadata, document theory, information organization in information systems; social and political aspects of classification, controlled vocabularies, and cataloging history.

[View course details in MyPlan: INSC 538](#)

INSC 541 HCI Design Foundations for Interactive Systems (4)

Develops knowledge and skills for design-based inquiry of interactive systems. Students practice user-centered design methods and study theories of human-computer interaction, including but not limited to: goal-based design and task analysis, scenario-based design, soft systems methodology, value sensitive design, universal design, and participatory design.

[View course details in MyPlan: INSC 541](#)

INSC 542 HCI Design Studio for Interactive Systems (4)

Develops knowledge and skills for design-based inquiry of interactive systems. Includes a quarter-long project using appropriate methods and iteratively engages research, design, prototyping, and evaluation activities. Opportunity to reflect upon practice and receive critical review of work throughout the quarter.

[View course details in MyPlan: INSC 542](#)

INSC 543 Value Sensitive Design (4)

Develops knowledge and skills to account for human values in design, development, and deployment of information systems. In-depth examination of value sensitive design theory, methods, and practice, including stakeholder project. Prerequisite: permission of instructor.

[View course details in MyPlan: INSC 543](#)

INSC 546 Assistive Technology and Inclusive Design (4)

Examines interactive technologies for users with alternative skills or in alternative contexts. Covers universal design, inclusive design, and assistive technologies. Addresses needs of users with physical limitations, children/elders, users in developing nations, and mobile users.

[View course details in MyPlan: INSC 546](#)

INSC 547 Collaborative and Social Computing (4)

Seminar on the design of collaborative and social computing systems. Introduces theories for analyzing collaborative on-line and face-to-face. Student apply a theoretical perspective through the design of a social or collaborative application. Application domains include blogging, tagging, on-line communities, social recommending, ubiquitous computing, and collaboration in domestic settings.

[View course details in MyPlan: INSC 547](#)

INSC 555 Information and Values (4, max. 12)

Explores value systems within a range of different social and technological environments.

[View course details in MyPlan: INSC 555](#)

INSC 557 Cultural and Ethnic Dimensions in Information Science (4)

Examines ethnic and cultural dimensions of information storage and transfer, knowledge creation and exchange, and information-related values in an increasingly global world. Readings from anthropology, cultural learning, cross-cultural communications, and ethnic traditions provide the basis for discussions about conducting research across culturally distinct communities. Prerequisite: permission of instructor.

[View course details in MyPlan: INSC 557](#)

INSC 561 PhD Colloquium on Professional Issue (1, max. 12)

Covers topics relating to the professional concerns of doctoral students and their future lives as academics and researchers. Credit/no-credit only.

[View course details in MyPlan: INSC 561](#)

INSC 565 Teaching Practicum I (3)

Doctoral student participation in teaching in a faculty-taught course. Credit/no-credit only.

[View course details in MyPlan: INSC 565](#)

INSC 566 Teaching Practicum II (3)

Doctoral student takes primary teaching responsibility for a course under supervision of a faculty liaison.

Prerequisite: INSC 565. Credit/no-credit only.

[View course details in MyPlan: INSC 566](#)

INSC 570 Research Design (4)

Introduction to empirical research, basics of theory construction and research design, types of research, ethical issues, instruments and techniques for descriptive research, measures of association. Employs an integrated (qualitative and quantitative) and focused approach.

[View course details in MyPlan: INSC 570](#)

INSC 571 Quantitative Methods in Information Science (5)

Describes uses, characteristics, and theoretical bases of research methods and data analysis techniques used in quantitative research, emphasizing uses in information and library science. Topics include experimental design, descriptive and inferential statistics, the normal distribution, elementary probability, nonparametric statistics, and exploratory data analysis techniques. Prerequisite: INSC 570.

[View course details in MyPlan: INSC 571](#)

INSC 572 Qualitative Methods in Information Science (5)

Principles and approaches to conducting qualitative research in information science, including how to design a qualitative study, role of context, methods of data collection and analysis, increasing the trustworthiness of data, minimizing observer effect, how to incorporate and build theory. Exposure to field research and data analysis.

Prerequisite: INSC 570.

[View course details in MyPlan: INSC 572](#)

INSC 573 Design Inquiry and Methods in Information Science (5)

Acquire theory, methods, and skills for design-based inquiry, focusing on making artifacts - technical, informational, managerial, or organizational - and devising courses of action that enable people to mobilize. Students develop knowledge for design in Information Science through practical application of design methods and scholarly investigation of selected literatures.

[View course details in MyPlan: INSC 573](#)

INSC 575 Research Practicum I (3)

Students work with a researcher from the Information School as an active member of a research team. Credit/no-credit only.

[View course details in MyPlan: INSC 575](#)

INSC 576 Research Practicum II (3)

Students work with an approved researcher as an active member of a research team. Prerequisite: INSC 575 or permission of instructor. Credit/no-credit only.

[View course details in MyPlan: INSC 576](#)

INSC 578 Research Seminar (1-2, max. 15)

Research presentations on a wide variety of topics in information science. Credit/no-credit only.

[View course details in MyPlan: INSC 578](#)

INSC 579 Research Colloquium in Information Science (2, max. 30)

Research colloquium on various research topics in information science. Faculty, visitors, and students present current research. Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: INSC 579](#)

INSC 581 Organizational Theories of Information Systems (4)

Surveys major strands of management of information systems research. Covers the behavioral, economic, strategic, and technical research perspectives of MIS research.

[View course details in MyPlan: INSC 581](#)

INSC 586 Information Dynamics I (4)

Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and "soft operations research," as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with IMT 586.

[View course details in MyPlan: INSC 586](#)

INSC 588 Enterprise Project Management in Information Organizations (4)

Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with IMT 588.

[View course details in MyPlan: INSC 588](#)

INSC 598 Special Topics in Information Science (1-5, max. 12)

[View course details in MyPlan: INSC 598](#)

INSC 599 Independent Study in Information Science (1-5, max. 15)

Readings, design projects, or research under faculty supervision. Prerequisite: permission of instructor and Ph.D. program chair.

[View course details in MyPlan: INSC 599](#)

INSC 600 Independent Study or Research (*)

Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of Supervisory Committee or graduate program adviser. Credit/no-credit only.

[View course details in MyPlan: INSC 600](#)

INSC 800 Doctoral Dissertation (*-)

Credit/no-credit only.

[View course details in MyPlan: INSC 800](#)

THE INFORMATION SCHOOL

THE INFORMATION SCHOOL

INFORMATION TECHNOLOGY APPLICATIONS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ITA 340 Introduction to Web Publishing (3)

Introduction to markup languages and publishing web content. Students gain understanding of HTML coding and extensions, image manipulation, information architecture, and web site publishing. Other topics include: the Web Accessibility Initiative, survey of Graphical User Interface (GUI) HTML editors, online privacy and security, and eXtensible Markup Language (XML).

[View course details in MyPlan: ITA 340](#)

ITA 341 Client-side Scripting and Design (3)

Introduction to web browser design environment, scripting languages, JavaScript, Document Object Model (DOM), and creation of dynamic HTML web pages (DHTML) in combination with Cascading Style Sheets (CSS). Other topics include: client-server architecture and web design principles in the contexts of technical feasibility, usability, and accessibility. Prerequisite: ITA 340.

[View course details in MyPlan: ITA 341](#)

ITA 342 Introduction to SQL and Data Storage Technologies (3)

Fundamentals of database design in a client-server architecture useful for web applications. Subsequent topics build upon foundation by introducing the Structured Query Language (SQL), open source tools MySQL and PHP for database processing, security issues in database applications, and XML as a alternate database storage technology. Prerequisite: ITA 341

[View course details in MyPlan: ITA 342](#)

ITA 343 Server-Side Programming and Web-data Integration (3)

Provides framework to integrate server-side programming concepts and techniques, database technologies, and client-side scripting to design and implement dynamic web applications. Examines techniques using PHP, design and implementation of database (MySQL) connections, web application security, and XML data publication. Prerequisite: ITA 342.

[View course details in MyPlan: ITA 343](#)

THE INFORMATION SCHOOL

THE INFORMATION SCHOOL

LIBRARY & INFORMATION SCIENCE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

LIS 462 Skills Approach to Information, Communications, and Technology (ICT) Literacy (3)

Introduction to the Big6 TM Skills approach to information, communications, and technology (ICT) literacy for personal, school, district, or higher education settings. Includes technology within the Big6 framework, connection to standards, instructional design, assessment, curriculum mapping, peer collaboration, the parent connection, program planning, and implementation.

[View course details in MyPlan: LIS 462](#)

LIS 498 Special Topics (1-5, max. 15)

Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit.

[View course details in MyPlan: LIS 498](#)

LIS 500 The Question of Information (2)

Provides an overview of the major questions, concepts, and challenges engaging library and information science through seminar discussion. Exploration of the social context in which these questions and challenges occur, and their implications for both research and practice. Credit/no-credit only.

[View course details in MyPlan: LIS 500](#)

LIS 501 History and Foundations of Libraries and Librarianship (3)

Introduces the history of libraries, major issues in contemporary library and information work, and types of libraries. Examines the role of libraries in society, the development of professional librarianship, and the role of librarians.

[View course details in MyPlan: LIS 501](#)

LIS 505 Archival and Manuscript Services (3)

Selection, organization, and uses of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions' collections. Lecture, demonstration, and laboratory.

[View course details in MyPlan: LIS 505](#)

LIS 507 Preservation and Conservation of Library Materials (3)

Consideration of the many factors contributing to the physical vulnerability of library materials of all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical background necessary.

[View course details in MyPlan: LIS 507](#)

LIS 508 History of Recorded Information (4)

Exploration of the history and ongoing transformation of recorded information within three broad spheres of human life: public communication, administrative and commercial operation, and personal communication.

[View course details in MyPlan: LIS 508](#)

LIS 510 Information Behavior (3)

Introduction to the user-centered approach to information behavior. Theoretical foundations of need, creation, seeking, sharing, assessment, management, and use. Synthesis of information behavior studies, performance of information behavior field research, and application of the results of information behavior studies to design information systems, services, and policy.

[View course details in MyPlan: LIS 510](#)

LIS 512 Community Analysis (4)

Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with INSC 512.

[View course details in MyPlan: LIS 512](#)

LIS 516 Youth Development and Information Behavior in a Digital Age (3)

Introduction to major theories of human development from birth through age eighteen and application of these theories to examine youth's information behavior and digital media use at various developmental stages.

Explores new research on the impact of digital media tools and practices on youth development. Prerequisite: either LIS 510 or permission of instructor.

[View course details in MyPlan: LIS 516](#)

LIS 520 Information Resources, Services, and Collections (4)

Concepts, processes, and skills related to information, including production, distribution, selection, collection, and services to facilitate access. Specific discussion topics include characteristics of recorded knowledge; organizations and services devoted to managing access to recorded knowledge; and principles associated with development of recorded knowledge and collections.

[View course details in MyPlan: LIS 520](#)

LIS 521 Principles of Information Services (4)

Analysis of the information mediation process, including determination and analysis of information needs; searching for, evaluation, and presentation of appropriate results; modalities for delivery of services; and current and future techniques.

[View course details in MyPlan: LIS 521](#)

LIS 522 Collection Development (3)

Access to materials as context for development and management of library collections in academic, public, school libraries. Community analysis, library mission; collection development policies, criteria, levels, responsibilities; aids to selection; collection evaluation, use studies; controversial materials.

[View course details in MyPlan: LIS 522](#)

LIS 524 Adult Reader Services in the Public Library (3)

Focuses on developing and performing readers' advisory services for contemporary adult fiction and non-fiction. Includes interpersonal and marketing skills necessary to promote reading including reading advocacy, readers' advisory interviewing, writing advisory annotations, presenting book talks, and conducting book discussion

groups.

[View course details in MyPlan: LIS 524](#)

LIS 525 Genres for Adult Readers (3)

Reviews characteristics of the most popular genres of fiction, including speculative fiction, mystery/thriller/suspense, romance, westerns, and graphic fiction/memoir. Helps to develop practice in book talking, preparing annotated booklists, and making reading suggestions to library users.

[View course details in MyPlan: LIS 525](#)

LIS 526 Government Publications (3)

Introduction to government publications of the United States and their acquisition, organization, and use. Other topics covered include the public's right to know, the Federal Depository Library Program, government influences in our daily lives, and future directions in government information. Credit/no-credit only.

[View course details in MyPlan: LIS 526](#)

LIS 527 Business Information Resources (3)

Survey of the extent and nature of business information and its sources, and of business information producers and consumers. Study and use of both print and on-line sources.

[View course details in MyPlan: LIS 527](#)

LIS 528 Health Sciences Information Needs, Resources, and Environment (3) *S. FULLER*

Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with BIME 570; Sp.

[View course details in MyPlan: LIS 528](#)

LIS 529 Digital Humanities Librarianship (3)

Investigates the intersections between content and technology in humanities librarianship with a focus on information problems and resources in the fields of philosophy, religion, the arts, language, and literature.

Prerequisite: LIS 520

[View course details in MyPlan: LIS 529](#)

LIS 530 Organization of Information and Resources (4)

Introduction to issues in organization of information and documents including: analysis of intellectual and physical characteristics of documents; principles and practice in surrogate creation, including standards and selection of metadata elements; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

[View course details in MyPlan: LIS 530](#)

LIS 531 Catalogs, Cataloging, and Classification (4)

Develops an understanding of library catalogs as information retrieval systems. Introduces library cataloging and classification. Focus on principles and standards in the creation of catalogs and cataloging records. Includes practice in descriptive and subject cataloging and classification. User perspective emphasized throughout.

Prerequisite: LIS 530.

[View course details in MyPlan: LIS 531](#)

LIS 533 Advanced Cataloging and Classification (4)

In-depth theory and practice in library cataloging and classification. Includes introduction to cataloging materials in a variety of formats. Prerequisite: LIS 530, and LIS 531.

[View course details in MyPlan: LIS 533](#)

LIS 534 Indigenous Systems of Knowledge (3)

Conceptual foundations and comparative analysis of indigenous knowledge organization systems. Feasibility and use of contemporary knowledge organization mechanisms including thesauri and ontologies in expressing

the cultures and artifacts of indigenous peoples. Prerequisite: LIS 530 or permission of instructor.

[View course details in MyPlan: LIS 534](#)

LIS 535 Classification Theory (3)

Survey of classificatory principles from bibliographic, philosophical, socio-cognitive, and linguistic perspectives. Overview of history of bibliographic classification and exploration of some existing bibliographic classification systems. Ramification of theoretical approach for classification practice. Prerequisite: LIS 530.

Offered: jointly with INSC 535.

[View course details in MyPlan: LIS 535](#)

LIS 547 Design Methods for Librarianship (4)

Focused on the human fabric of libraries - stakeholders, values, information technology, and policy - students develop theoretical knowledge and practical skills for design. Methods include futures workshops, scenarios, paper-prototyping, usability methods, among others. To conceptualize and steer design processes, the course includes an introduction to design methodologies and theory.

[View course details in MyPlan: LIS 547](#)

LIS 550 Information and Society (3)

Covers concepts, processes, and issues related to the larger social context within which the life cycle of information and knowledge in society are investigated. Discussion topics include codes of ethics, professionalization, privacy, freedom of expression, intellectual property, social inequalities, and quality of life.

[View course details in MyPlan: LIS 550](#)

LIS 551 Intellectual Freedom in Libraries (3)

Analysis of issues related to intellectual freedom, particularly to implications for libraries and librarians. Consideration of current legal climate, conformity versus freedom in modern world, librarian as censor, social responsibility and individual freedom, intellectual freedom of children, prospects for future. Credit/no-credit only.

[View course details in MyPlan: LIS 551](#)

LIS 560 Instructional and Training Strategies for Information Professionals (3)

Develops knowledge and skills in instruction while applying theories of information literacy, teaching, and learning to instruction in an information environment. Teaches students how to design, develop, and evaluate instructional programs for specific users.

[View course details in MyPlan: LIS 560](#)

LIS 561 Storytelling in a Digital Age (3)

Instruction in the art and technique of oral and digital storytelling for all ages. Addresses both traditional and contemporary modes of storytelling, including transmedia. Sources include personal and family stories, folktales, and literary stories. Also explores non-library storytelling: therapeutic storytelling, organizational storytelling, and storytelling for qualitative research.

[View course details in MyPlan: LIS 561](#)

LIS 564 Multicultural Resources for Youth (3)

Facilitates development of cross-cultural competence through authentic resources for children, tweens, and teens produced by or about ethnic minorities in the United States. "Issues" focus, providing knowledge in critical examination of various genres of multicultural resources as well as in strategies to use them.

[View course details in MyPlan: LIS 564](#)

LIS 565 Resources for Digital Age Children (3)

Introduces selection and evaluation of traditional, digital, and transmedia resources used by public and school libraries for children, birth to age twelve. Applies theories from human development, information behavior, and digital media research to the identification of developmentally appropriate selections and provision of readers'/users' advisory for children. Prerequisite: LIS 516.

[View course details in MyPlan: LIS 565](#)

LIS 566 Resources for Digital Age Teens (3)

Introduces selection and evaluation of traditional, digital, and transmedia resources used by public and school libraries for teens. Applies theories from human development, information behavior, and digital media research to the identification of developmentally appropriate selections and provision of readers'/users' advisory for teens. Prerequisite: LIS 516.

[View course details in MyPlan: LIS 566](#)

LIS 567 Libraries as Learning Labs in a Digital Age (3)

Application of theories and research on youth development to inform practice about programming and resources for youth. Create programs based on current research, including programming such as story times, book talks, and maker spaces. Prerequisite: LIS 516.

[View course details in MyPlan: LIS 567](#)

LIS 568 Information Literacy in a Digital Age (3)

Explores theories, process, and practical applications of information literacy. Examines the development of information literacy programs for libraries, community agencies, business, education, and other information settings. Explores the integral relationship between technology and information literacy, and assessment and evaluation of programs. Prerequisite: LIS 560.

[View course details in MyPlan: LIS 568](#)

LIS 570 Research, Assessment, and Design (4)

Students recognize research and design opportunities, translate them into researchable frameworks, and conduct research in libraries and other information agencies. Covers problem definition, data collection and analysis, design and validation of alternative solutions, and reporting of results.

[View course details in MyPlan: LIS 570](#)

LIS 580 Management of Information Organizations (4)

Introduction to internal and external management issues and practices in information organizations. Internal issues include organizational behavior, organizational theory, personnel, budgeting, planning. External issues include organizational environments, politics, marketing, strategic planning, funding sources. Prerequisite: LIS 500, which may be taken concurrently.

[View course details in MyPlan: LIS 580](#)

LIS 581 Marketing and Planning for Libraries (3)

Approaches to planning and marketing library products/services. Examines partnerships that can be forged between elements of marketing and appropriate futures strategies for libraries. Discusses marketing and planning as integrated processes with attention to short- and long-term goals and objectives. No particular library institutional setting is assumed.

[View course details in MyPlan: LIS 581](#)

LIS 582 Community Engagement Strategies in Information Science (3)

Introduces students to strategies for building and sustaining relationships with community partners and other organizations to provide innovative services possible inside and outside of libraries. Students examine case studies, consider partner resources and needs, evaluate outcomes, and develop partner-based services in order to achieve community impact.

[View course details in MyPlan: LIS 582](#)

LIS 584 Knowledge Management (3)

Introduction to contemporary topics in management of knowledge creation and use in organizations. Discussion topics include knowledge generation, knowledge taxonomy, knowledge transfer, organizational knowledge management practice, and knowledge management systems.

[View course details in MyPlan: LIS 584](#)

LIS 585 Administration Library Programs for Youth in a Digital Age (3)

Develops competency in administering library programs for children and youth in public and school libraries.

Management of information and technology literacy instruction, administration of reading advocacy, and information management and services. Acquiring, organizing, and managing resources for access and use, and communicating programs to young users. Prerequisite: LIS 580.

[View course details in MyPlan: LIS 585](#)

LIS 586 Public Libraries and Advocacy (3)

Examines the purpose and role of public libraries in an information society. Includes governance, services, and planning with special emphasis on advocacy for the library and community.

[View course details in MyPlan: LIS 586](#)

LIS 587 Library Technology Systems (4)

Developing criteria for selection and design of information technology systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges, such as vendor relations, financing options, personnel requirements, and design of auxiliary activities.

Prerequisite: LIS 580.

[View course details in MyPlan: LIS 587](#)

LIS 588 Special Librarianship (3)

Seminar in the practice of special librarianship in business and commercial firms, government agencies, other non-profits, and the independent consultant sector. Emphasis on management of non-traditional information organizations and the targeted information role.

[View course details in MyPlan: LIS 588](#)

LIS 590 Directed Fieldwork (1-5, max. 10)

Minimum of 50 hours, maximum 250 hours of professional, supervised fieldwork in a library or professional information setting. Fieldwork is a one quarter experience, however, may be repeated in a different setting with a different set of learning objectives for a subsequent quarter. Prerequisite: LIS 510 or LIS 547, LIS 520, LIS 530, and LIS 570 Credit/no-credit only.

[View course details in MyPlan: LIS 590](#)

LIS 591 Legal Research I (3)

Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Offered: jointly with LAW A 598.

[View course details in MyPlan: LIS 591](#)

LIS 592 Legal Research Methods (3/4)

Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor.

Offered: jointly with LAW A 599.

[View course details in MyPlan: LIS 592](#)

LIS 593 Selection and Processing of Law Library Materials (3)

Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, budgeting, cataloging, and serials. Prerequisite: LIS 591 or permission of instructor.

[View course details in MyPlan: LIS 593](#)

LIS 594 Law Library Administration (4)

Administration in law libraries, including organization, personnel, and management issues (e.g., interviewing, hiring, firing), communications, library planning, and bookkeeping. Prerequisite: LIS 591 or permission of instructor. Credit/no-credit only.

[View course details in MyPlan: LIS 594](#)

LIS 595 Current Issues in Law Librarianship ([1-4]-, max. 5)

From a list of current topics in law librarianship, students select a topic, research it fully, write a major paper, and present their paper. Topics may include citation reform, ethics, and publisher practices. Prerequisite: law librarianship majors or permission of instructor. Credit/no-credit only.

[View course details in MyPlan: LIS 595](#)

LIS 596 Professional Portfolio (3)

Preparation and presentation of reflective working and presentation portfolios representing the student's goals, achievements, knowledge and skills, experience, and professional objectives. Development of plans for ongoing professional development. Prerequisite: completion of 30 credit hours and adviser approval of MLIS degree plan. Credit/no-credit only.

[View course details in MyPlan: LIS 596](#)

LIS 598 Special Topics in Information and Library Science (1-6, max. 18)

Seminar dealing with various topics in information and library science. Offered by visitors or resident faculty. Topics are changed from quarter to quarter. May not be offered every quarter. Prerequisite: determined by specific course.

[View course details in MyPlan: LIS 598](#)

LIS 600 Independent Study or Research (*-)

Credit/no-credit only.

[View course details in MyPlan: LIS 600](#)

University of Washington Course Descriptions

Interdisciplinary Graduate Degree Programs

These programs are administered by interdisciplinary groups of the Graduate School. Certain courses carrying the particular program prefix appear below; other courses with the same prefix appear elsewhere as indicated. Other courses included in these programs are selected from many disciplines throughout the University and carry the prefix of the respective discipline.

Astrobiology

[*Display as tabs*](#)

Program Overview

C319 Physics-Astronomy Building

Astrobiology -- the study of life in the universe -- investigates the wide range of multidisciplinary factors that may influence the origin and evolution of life on Earth and beyond. Such investigation demands intense interdisciplinarity, for which the astrobiology program at the University of Washington is creating a new community of scholars, investigators, and educators -- a community skilled in multidisciplinary methods and thinking that pushes boundaries beyond the commonplace with intellectual vigor, creativity, and rigorous methodology.

Astrobiology at the University of Washington builds on the strengths of traditional academic structure to transcend the limits of specialization through the synergy of multidisciplinary cooperation in both research and education.

The internationally recognized graduate certificate program offers a rigorous, interdisciplinary curriculum in cooperation with the PhD programs of participating departments. The program's unique features bond students and faculty from widely disparate departments. Participating graduate students gain the personal and professional skills necessary to successfully engage in multidisciplinary collaborations.

The emerging field of astrobiology benefits from and is shaped by the perspectives of multiple disciplines directed at a common problem. It benefits also from the breadth of perspective offered by diversity in culture and race among the program's participants.

Graduate Certificate Program

Admission Requirements

UW academic departments participating in the graduate certificate program in astrobiology provide expertise in the following primary collaborating disciplines:

- Aeronautics and Astronautics

- Astronomy
- Atmospheric Sciences
- Biochemistry
- Biology
- Genome Sciences
- Earth and Space Sciences
- History (of Science)
- Microbiology
- Oceanography

Students wishing to participate in the astrobiology graduate certificate program must be accepted for admission by the PhD program of one of these departments. Contact the appropriate participating department for PhD program application requirements and deadlines.

Certificate Requirements

15 credits minimum, to include:

1. ASTBIO 501, ASTBIO 502
2. Three astrobiology-only seminar series (1 credit)
3. One cognate course approved by the student's advisory committee to ensure sufficient breadth (see program website for current list of cognate courses)
4. One quarter of a research rotation in an area outside the student's home discipline (3 to 10 credits)
5. Participation in a minimum of three workshops comprising the capstone experience (non-credit)
6. Astrobiology ethics seminar (variable credits)

Additional credits may be earned through:

- Other approved cognate courses
- Astrobiology public lecture series (1 credit)

Successful completion of the certificate requires a minimum cumulative 3.00 GPA for all required courses and a minimum 2.7 grade for each elective course.

- [Autumn Quarter 2017](#)

ASTBIO 115 Astrobiology: Life in the Universe (5) NW R. *BUICK, D. CATLING, V. MEADOWS, W. SULLIVAN*

Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTR 115/BIOL 114/ESS 115/OCEAN 115.

[View course details in MyPlan: ASTBIO 115](#)

ASTBIO 501 Astrobiology Disciplines (4) R. *BUICK, D. CATLING, V. MEADOWS*

Review of research and subject matter relevant to astrobiology from within the disciplines of biology, astronomy, oceanography, atmospheric science, chemistry, planetary science, and geology. Offered: A, even years.

[View course details in MyPlan: ASTBIO 501](#)

ASTBIO 502 Astrobiology Topics (4) R. *BUICK, D. CATLING, V. MEADOWS*

Investigation in detail of research topics of current interest. Offered: A, odd years.

[View course details in MyPlan: ASTBIO 502](#)

ASTBIO 550 Professional Development for Astrobiology (2)

Seminar in preparation for the academic job market; writing and reviewing grant proposals; building and managing interdisciplinary research teams; understanding the multiple career paths available in astrobiology; interdisciplinary teaching; and professional ethics. Credit/no-credit only. Offered: W, odd years.

[View course details in MyPlan: ASTBIO 550](#)

ASTBIO 575 Seminar in Astrobiology (1, max. 10)

Discussion of recent research in astrobiology. Credit/no-credit only. Offered: W, even years.

[View course details in MyPlan: ASTBIO 575](#)

ASTBIO 576 Astrobiology Colloquium (1, max. 15)

Current research topics in astrobiology. Credit/no-credit only. Offered: ASp.

[View course details in MyPlan: ASTBIO 576](#)

ASTBIO 600 Independent Study or Research (*)

Study or research under the supervision of individual faculty members.

Biomolecular Structure and Design

N107 Foege, Box 355061

[*Display as tabs*](#)

The department's graduate program is directed toward the education of doctoral students who anticipate careers that involve teaching or research in the biomedical sciences. Graduates from the program have a broad knowledge of biological structure at all levels, from the molecular to the human anatomical, with a major emphasis on the cellular level.

Graduate students select research and teaching options in their program. The research options are designed to provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. Teaching options prepare the student to teach in one of the anatomical sub-disciplines: human anatomy, neuroanatomy/neurobiology, histology, embryology/developmental biology, cell biology, and macromolecular structure.

Graduate Program

Graduate Program Coordinator
G514 Health Sciences, Box 357420

Master of Science

Admission Requirements

1. Minimum 3.00 GPA
2. A bachelor's degree in one of the following or a related area: chemistry, biology, physics, biochemistry, or biophysics.
3. GRE
4. Minimal course requirements for successful applicants:
 - a. Chemistry: general, organic, and physical
 - b. Physics: one year
 - c. Mathematics: one year of calculus; multivariable calculus and/or linear algebra are strongly recommended
 - d. Biology and/or biochemistry: one year general biology plus one advanced course in biology or biochemistry
5. Undergraduate research experience strongly recommended.
6. International students must have a minimum score on one test as follows: 7.0 IELTS; 92 TOEFL iBT; 237 TOEFLC; 580 TOEFL; 90 MLT.

Helpful links

[Graduate Program](#)

[Time Schedule](#)

[Program Web Page](#)

[Program Faculty](#)

[Course Descriptions](#)

7. International students hoping to study with BMSD faculty in the Chemistry Department must have a minimum score on one test as follows: 26 on the speaking portion of the TOEFL iBT; 7.0 on the speaking portion of the IELTS; 70 on the Versant English Test; 55 on the TSE; 230 on the SPEAK test administered at the UW.

Degree Requirements

36 credits, to include:

1. *Required courses:* BIOC 530; BMSD 540, BMSD 541, BMSD 542; BMSD 520 to be taken every quarter
2. 12 graded credits of elective courses covering at least three of the four BMSD categories of topics: biomolecular structure, techniques in biomolecular structure, molecular and cellular biology, and chemistry
3. At least one sequence of Biomedical Research Integrity workshops in the first or second year of the program. The Biomedical Research Integrity (BRI) series is a sequence of lectures and workshops offered during summer quarter each year.
4. *Teaching:* In order to gain practical teaching experience, students in the program serve as teaching assistants for two quarters.
5. *Research:* Students rotate through a minimum of two and a maximum of three participating laboratories during their first year. The opportunity exists for students to do an early rotation during summer quarter.

Biology Teaching

[Display as tabs](#)

Program Overview

The Graduate School Biology Teaching Group offers an interdisciplinary program that leads to the degree of Master of Science in science for teachers. Although designed specifically for biology teachers in K-12 schools and community colleges, other life science educators, such as those in environmental learning centers, may find the program especially worthwhile. The program emphasizes broadening the student's understanding of the various fields of biological science, with the improvement of the student's effectiveness as a teacher as the primary goal. Opportunities for coursework within the departments of the University in biological science and science education are provided. Each student is asked to perform an in-depth study of a biological science problem in the context of its relevance to the teaching of biological science. Facilities and guidance are provided by a sponsoring professor and advisory committee drawn from the Biology Teaching Group and the several biological science departments of the University.

Graduate Program

Graduate Program Coordinator
222 Hitchcock, Box 355320
(206) 543-1689

Master of Science

Admission Requirements

1. Secondary teaching certificate or evidence of professional involvement in K-12 or public education
2. Bachelor's degree in biology or closely related field. Students in related fields must have adequate preparation in science.
3. Minimum 3.00 GPA in the most recent 90 graded quarter credits (60 semester credits)
4. Graduate Record Examination test scores
5. Two or three letters of recommendation
6. Statement of professional experience and objectives

Degree Requirements

36 credits, to include:

1. Minimum 18 credits at the graduate level: minimum 18 must be graded. These categories are not mutually exclusive.
2. All coursework must be at or above the 400 level.
3. Each student plans a program to meet his or her own educational objectives, selecting at least one course from each of the following areas: botany, genetics, microbiology, zoology, and from the College of Education. One course in biochemistry is also required unless already completed in prior academic work. Courses in biomedical history, fisheries, forest resources, environmental studies, etc. may be appropriate for the student's interests. The Graduate Program Coordinator assists the student in this planning.

INTERDISCIPLINARY GRADUATE PROGRAMS

INTERDISCIPLINARY DATA SCIENCE GROUP

DATA SCIENCE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

DATA 501 Data Science Visualization Lab (1)

The Data Science Visualization Lab class will provide students additional opportunities to practice and discuss data visualization concepts, with additional emphasis on user-centered design approaches and software development. Students will work in small groups on structured data visualization exercises and UCD methods, and implement simple visualizations.

[View course details in MyPlan: DATA 501](#)

DATA 512 Human-Centered Data Science (5)

Fundamental principles of data science and its human implications. Data ethics, data privacy, differential privacy, algorithmic bias, legal frameworks and intellectual property, provenance and reproducibility, data curation and preservation, user experience design and usability testing for big data, ethics of crowdwork, data communication and societal impacts of data science.

[View course details in MyPlan: DATA 512](#)

DATA 514 Data Management for Data Science (5)

Introduces database management systems and techniques that use such systems; data models, query languages, database tuning and optimization, data warehousing, and parallel processing. Intended for professional students and non-CSE-majors.

[View course details in MyPlan: DATA 514](#)

DATA 515 Software Design for Data Science (5)

Introduces software design and engineering practices and concepts, including version control, testing, and automatic build management. Intended for professional students and non-CSE-majors. Prerequisite: CSE D/DATA 514 or permission of instructor. Offered: jointly with CSE D 515; Sp.

[View course details in MyPlan: DATA 515](#)

DATA 516 Scalable Data Systems and Algorithms (5)

Principles and algorithms for data management and analysis at scale. Designs of traditional and modern big data systems and how to use those systems. Basics of cloud computing. Prerequisite: CSE D/DATA 514 and CSE

D/DATA 515 or permission of instructor. Offered: jointly with CSE D 516; A.

[View course details in MyPlan: DATA 516](#)

DATA 556 Introduction to Statistics and Probability (5)

Overview of probability; conditional probability and independence; Bayes Theorem; discrete and continuous random variables including jointly distributed; key distributions including the normal and its spin offs; properties of expectation and variance; conditional expectation; covariance and correlation; Central Limit Theorem; law of large numbers; Parameter Estimation. Offered: jointly with BIOST 556/STAT 556; A.

[View course details in MyPlan: DATA 556](#)

DATA 557 Applied Statistics and Experimental Design (5)

Inferential statistical methods for discrete and continuous random variables including tests for difference in means and proportions; linear and logistic regression; causation versus correlation; confounding; resampling methods; study design. Prerequisite: STAT/BIOST/DATA 556 or instructor's permission. Offered: jointly with BIOST 557/STAT 557; W.

[View course details in MyPlan: DATA 557](#)

DATA 558 Statistical Machine Learning for Data Scientists (5)

Bias-variance trade-off; training versus test error; overfitting; cross-validation; subset selection methods; regularized approaches for linear/logistic regression: ridge and lasso; non-parametric regression: trees, bagging, random forests; local regression and splines; generalized additive models; support vector machines; k-means and hierarchical clustering; principal components analysis. Prerequisite: STAT/BIOST/DATA 557, or permission of instructor. Offered: jointly with BIOST 558/STAT 558; Sp.

[View course details in MyPlan: DATA 558](#)

DATA 590 Data Science Capstone I- Project Preparation (2)

Part one of a two-course capstone sequence where students organize project teams, select project topics, write a project proposal and begin preparing project data sets.

[View course details in MyPlan: DATA 590](#)

DATA 591 Data Science Capstone II- Project Implementation (3)

Part two of a two-course capstone sequence designed to build upon the student driven project from DATA 590. Students will synthesize and apply knowledge and techniques acquired throughout the MSDS program in working with large data sets, deriving insights from data and sharing insights with other people. Prerequisite: DATA 590

Environmental Management

[Display as tabs](#)

Program Overview

274 Mary Gates Hall

The graduate certificate in Environmental Management (EM) is an interdisciplinary program designed to prepare students to contribute to sustainable utilization and enhancement of the natural and human environment. Through coursework, seminars, and a culminating two-quarter-long keystone project, students acquire the tools to solve real-world environmental problems via the three avenues of science, policy, and business. Keystone projects provide a unique opportunity for graduate students to gain practical experience working in an interdisciplinary team with students from a variety of disciplines, a faculty mentor, and in collaboration with a community partner. The EM program provides education and training opportunities for a diverse array of graduate students preparing for management careers in the non-profit, for-profit, and public sectors, as well as for those who contribute legal, scientific, and technical expertise to environmental decision making locally, nationally, and internationally. Key benefits of the program include:

- Broadening knowledge, perspectives, and skills beyond the academic home discipline through core courses, keystone projects, and participation in a community of faculty and students from various departments that share the common goal of environmental stewardship and sustainability.
- Gaining practical experience crafting interdisciplinary solutions to real-world environmental issues and making connections with community partners outside the University.
- Receiving a printed certificate and record on the transcript from the Graduate School to document completion of the interdisciplinary program in Environmental Management.

The flexible curriculum is suitable for students from many backgrounds, such as engineering, physical and natural sciences, public policy, economics, geography, public health, and political science, to name a few. There is no other comparable interdisciplinary educational experience currently available to graduate students at the University of Washington.

Graduate Program

Graduate Program Coordinator
274 Mary Gates Hall
Box 352802
(206) 221-6129
envirmgt@uw.edu

Admission Requirements

1. Enrollment in a graduate and professional degree program in any school of the University of Washington
2. Completion of a one-quarter upper-level or graduate-level course in applied quantitative methods (e.g., microeconomics, numerical modeling, applied statistical methods) or pure quantitative methods (e.g., mathematics or statistics); or social or natural science
3. Facility with written argument and communication. This skill is demonstrated in the letter of application

The program is governed by the steering committee for Environmental Management.

The certificate's courses and projects prepare students to contribute legal, scientific, social science, and technical expertise to environmental decision making at the local, national, and international scales. Students are required to broaden their knowledge and skills base beyond their home discipline; to read material from other fields with critical facility; to understand and appreciate the goals and analysis methods common to other fields; and to appreciate, communicate with, and collaborate with experts from other fields, who have different perspectives and priorities.

Certificate Requirements

Minimum 20 credits, to include:

1. Three core courses (9+ credits); courses vary by year
2. Team-based keystone project (8 credits): ENVIR 511, ENVIR 512
3. Electives (3+ credits): selected in consultation with the Graduate Program Coordinator and approved by the EM director

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

GRDSCH 200 Preparing for Graduate Education (2)

Explores graduate education and its structure and organization. Students use interactive assignments, individual reflective work, and professional portfolio development to explore their preparation for graduate education, and develop strategies for pursuing graduate school. Credit/no-credit only.

[View course details in MyPlan: GRDSCH 200](#)

GRDSCH 501 TA/RA Preparation (1)

A hybrid course (in-person at the TA/RA Conference in September and online during Autumn Quarter) to support graduate students in their work as TAs and RAs. Students will gain post-conference support, opportunities to connect with other students, and strategies and resources for their teaching and research roles. Credit/no-credit only.

[View course details in MyPlan: GRDSCH 501](#)

GRDSCH 515 Teaching and Learning in Higher Education: Frameworks and Practices (2)

Designed for graduate students seeking to build knowledge and skills in effective teaching practices as a teaching assistant or independent instructor. Students will be introduced to fundamental pedagogical frameworks and practices applicable across the disciplines in: Course design, assessment, active learning strategies, teaching inclusively, and using technology effectively in teaching. Credit/no-credit only.

[View course details in MyPlan: GRDSCH 515](#)

GRDSCH 525 Interactive Theater as Pedagogy (3)

Builds skills in social change interactive theater to challenge institutional oppression, advance community dialogue, and promote inclusive educational environments. Emphasizes political education; storytelling; collaborative playwriting; rehearsal of plays and interventions; discussion; and self-reflection. Culminates in student-organized, public interactive theater performance and dialogue workshops. No previous acting experience required.

[View course details in MyPlan: GRDSCH 525](#)

GRDSCH 540 Hybrid Pedagogies: Using Technology in Teaching (2) C. CHANCELLOR, K. MALCOLM

Students explore pedagogies and practices using technologies for promoting student learning through active engagement; designing and assessing online assignments; and teaching inclusively. Through a blend of face-to-face and online class meetings, students will experience and reflect on models of hybrid teaching. Credit/no-

credit only.

[View course details in MyPlan: GRDSCH 540](#)

GRDSCH 550 Teaching in Global Classrooms: Strategies for Teaching International and Multilingual Students (1)

Explores teaching and learning opportunities created by the increasing enrollment of international and multilingual students in U.S. universities. Focuses on evidence-based teaching practices that leverage the diverse linguistic and cultural assets of global classrooms to enrich learning for all students. Credit/no-credit only.

[View course details in MyPlan: GRDSCH 550](#)

GRDSCH 595 Teaching and Learning in Higher Education: From Campus to Career (2)

Focuses on the development of teaching materials for academic job searches. Centers on developing engaging and comprehensive written materials that dovetail with research materials. Includes online group work, peer review, and mock interviews. Recommended for advanced graduate students, year 3 or beyond Credit/no-credit only.

[View course details in MyPlan: GRDSCH 595](#)

GRDSCH 610 Teaching Mentorship (3, max. 6)

Individualized project, under the direction of a faculty member, focused on issues of teaching and learning at the college/university level and designed to enhance the student's ability to make innovative contributions in teaching. Prerequisite: permission of faculty member, graduate program coordinator, and the Associate Dean of the Graduate School. Credit/no-credit only.

[View course details in MyPlan: GRDSCH 610](#)

GRDSCH 615 Teaching Assistant and Research Assistant Preparation (1-6, max. 6)

Instruction and teaching, learning, research, and resources for teaching and research assistants. Credit/no-credit only.

Health Services Administration

[Display as tabs](#)

Graduate Program

Graduate Program Coordinator -- In-Residence and Executive Programs
H660 Health Sciences, Box 357660
(206) 543-8778
mhap@uw.edu

The graduate program in Health Services Administration offers two tracks for earning a Master of Health Administration (MHA) degree: a traditional day program (MHA) and an executive program (EMHA).

Accredited by the Commission on Accreditation of Healthcare Management Education (CAHME), the MHA provides the educational foundation for careers in management, planning, consulting, and policy-making in ambulatory care organizations, hospitals, long-term care facilities, mental health care organizations, government agencies, planning agencies, and other organizational settings in the healthcare field.

Interdisciplinary by design and innovative in its approach to curriculum delivery, the program develops leaders prepared strategically and effectively to transform healthcare organizations and systems at the local, regional, and national level. The MHA program's interdisciplinary priority is evidenced by faculty that has been assembled from the graduate schools of Public Health, Foster School of Business, Public Affairs, Nursing, Medicine, and Law, as well as from the community of healthcare administration leaders in the Seattle metropolitan area.

Concurrent degree programs combining health administration with business, medicine, law, public health, or public administration are also an option for in-residence students. Many concurrent programs can be completed in three years of intensive academic study.

For in-residence MHA students, the two-year academic experience is augmented by a career development program with opportunities for mentorships with regional healthcare leaders, an internship experience in a health facility or agency – typically under the preceptorship of the administrator or director of that organization.

The Executive Master of Health Administration (EMHA) is designed primarily for mid-career physicians and other clinical practitioners, as well as experienced health services managers, who have demonstrated interest or competency in administration or management. Best-practice healthcare is a team process, and the team-based learning model, especially emphasized in year one, positions students for leadership roles within such an environment. Executive students build critical competencies while benefiting from the broad expertise already held among the working professionals in the classroom. EMHA classes convene in Bellevue, Washington, for a three-day period (Thursday through Saturday) once each month for 24 months. Additionally, once each week faculty lead students in a web-based session,

Helpful links

[Program Faculty](#)

[Course Descriptions](#)

ideal for practicing professionals who plan to continue their careers while gaining a graduate degree.

Both the MHA and EMHA programs operate under a fee-based structure and are administered in collaboration with UW Professional & Continuing Education. Complete application details can be viewed at www.mha.uw.edu and www.executivemha.edu.

Financial Aid

Students enrolled in both the MHA and EMHA programs are eligible for federal financial aid, as well as most other types of financial support that are not funded by state tuition revenues. When exploring financial aid options, students should emphasize they are applying for a fee-based program. Financial aid questions should be directed to the UW Office of Student Financial Aid (206) 543-6101, osfa@uw.edu.

HCID 510 Designing Interactive Systems (3)

Covers issues relating to the design and interactive technologies, favoring design thinking in lieu of implementation concerns. Skills include design processes, design rationale, adductive reasoning, structured brainstorming, design techniques, and design critiques.

[View course details in MyPlan: HCID 510](#)

HCID 511 Ideation Studio (5)

Introduces student to ideation: the systematic process of generating design ideas, developing idea variations, and identifying ideas that open promising design directions; with hands-on exercises that give students the skills to participate in and lead ideation processes on their own.

[View course details in MyPlan: HCID 511](#)

HCID 520 User Interface Software and Technology (3)

Covers fundamental skills in user interface prototyping and implementation, including tools for low and high fidelity prototyping, software architectures for implementing graphical user interfaces on desktop and mobile platforms, and the toolkits that use these software architectures.

[View course details in MyPlan: HCID 520](#)

HCID 521 Prototyping Studio (5)

Examines user-interface prototyping as a foundational skill in user-centered design. Introduces the tools and uses hands-on exercises to enable students to create and refine user-interface prototypes as part of a design process.

[View course details in MyPlan: HCID 521](#)

HCID 530 Usability and User Research (3)

Teaches concepts on engaging with users in the context of a technology design project. Covers both empirical and analytic evaluation techniques. Methods include user interviewing, in-lab usability testing, field deployments, heuristic evaluation, and cognitive walkthrough.

[View course details in MyPlan: HCID 530](#)

HCID 531 Evaluation Studio (5)

Teaches concepts related to conducting user research and usability evaluations. Introduces students to the methods and hands-on exercises that will enable them to determine user needs and usability and acceptability of interactive system designs.

[View course details in MyPlan: HCID 531](#)

HCID 540 Capstone Planning (1)

Students conduct initial research on topic themes, learn to form effective project teams, and identify appropriate industry sponsors, delivering formal project proposals. HCID students only. Offered: W.

[View course details in MyPlan: HCID 540](#)

HCID 541 Capstone Studio (8)

Team-based capstone design an interactive product relevant to industry challenges. Students apply iterative design, prototyping and research techniques in an studio format, with peer, faculty, and industry sponsor reviews of deliverables, culminating in a portfolio presentation documenting process and final solutions. Studio content supplemented by demonstrations and guest lecturers.

[View course details in MyPlan: HCID 541](#)

HCID 590 Design, Use, Build Seminar (1, max. 10)

Covers the latest research in human-computer interaction and design, through talks by both UW and outside researchers. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: HCID 590](#)

HCID 598 Special Topics (1-5, max. 6)

Studies of emerging areas and specialized topics in human-computer interaction and design.

[View course details in MyPlan: HCID 598](#)

HCID 599 Special Projects (1-5, max. 6)

Individual graduate projects in human-computer interaction and design.

Molecular and Cellular Biology

[Display as tabs](#)

The Molecular and Cellular Biology program (MCB) is a leader in applying the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The goal of the doctoral program is to broadly train students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. This program is appropriate for students interested in future careers in research and teaching in academia as well as biotechnology and pharmaceutical companies.

Twelve departments across three schools have faculty members actively pursuing research in molecular and cellular biology. The departments participating in the program include [Biochemistry](#), [Bioengineering](#), [Biological Structure](#), [Biology](#), [Environmental Health](#), [Genome Sciences](#), [Immunology](#), [Microbiology](#), [Pathobiology](#), [Pathology](#), [Pharmacology](#), and [Physiology and Biophysics](#).

At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of basic sciences and molecular medicine participate in the joint Molecular and Cellular Biology graduate program. Shared FHCRC facilities are available for electron microscopy, flow cytometry, tissue culture, and image analysis. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide further support for the research effort.

Recently the MCB Program has established relationships with the Institute for Systems Biology (ISB) as well as Seattle Biomed. These collaborations allow MCB students access to labs conducting research using a systems approach to biology or a global focus on infectious disease.

Faculty Interests

Over 250 faculty members from the UW, the FHCRC, the ISB, and Seattle Biomed are researching molecular and cellular biology and are skilled in the training of graduate students. Faculty research interests are categorized into eight areas of interest: cancer biology; genetics; genomics and evolution; microbiology, infection and immunity; molecular structure and computational biology; and neuroscience.

[Course Descriptions](#)

Doctor of Philosophy

Admission Requirements

1. Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.
2. GRE scores. General Test. A Subject Test (e.g., biology, biochemistry, chemistry) is not required but recommended.
3. Letters of recommendation
4. Statement of purpose
5. Personal resume

Degree Requirements

90 credits, including:

1. *Credit Requirements:* MCB students complete 21 graded credits of coursework with 9 credits of the CONJ series and 12 credits of graded elective courses. M.S.T.P. students receiving a Ph.D. through the MCB Program are required to have 18 graded credits, and should petition the MCB directors to accept medical school courses in lieu of the remaining 3 credits.
2. *First Year:* Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes six five-week modules of the MCB conjoint series, three lab rotations, three quarters of literature review and one or more graded elective classes. Following the third rotation, students generally choose a permanent adviser in whose lab they pursue research for the rest of their educational career, generally three to four years. During the summer, students complete the biomedical research integrity lecture series.
3. *Second Year:* Students form their doctoral Supervisory Committee by the end of December, define their doctoral projects, take additional elective courses, participate as teaching assistants for a minimum of one quarter, complete either a second academic teaching assistantship or an alternative education experience, and hold their first committee meeting.
4. *Third Year and Beyond:* By the end of spring quarter of the third year, the student completes the general examination and is conferred official Ph.D. candidacy by the Graduate School. The student then focuses on the dissertation research and continues to meet with the Supervisory Committee each spring quarter to report on research progress and plans for the coming year. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of the final examination and acceptance of the completed dissertation by the Graduate School, a student is conferred the degree of Doctor of Philosophy.

Financial Aid

The MCB Program provides a stipend plus tuition and health benefits for the first year of study. At the end of the first year of study, students choose a doctoral committee, and subsequent years of support are provided by the department of the committee chair. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

MOLECULAR & CELLULAR BIOLOGY

MOLECULAR AND CELLULAR BIOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MCB 511 Cell Cycle Control (3) *Breedon, Roberts, Edgar*

Studies recent advances in understanding cell-cycle control, arising from genetics and biochemical studies of fission and budding yeast, marine invertebrates, *Drosophila*, amphibians, and cultured cells. Addresses the biochemical processes and molecular interactions and the rate-limiting events in the cell cycle, and the coupling of those events to physiological signals. Offered: A.

[View course details in MyPlan: MCB 511](#)

MCB 512 Scientific Speaking Seminar (1.5) *Biggins, Peichel*

Teaches how to effectively give a scientific seminar about research. Offered: jointly with CONJ 512; W.

[View course details in MyPlan: MCB 512](#)

MCB 513 Development Journal Seminar (1, max. 12) *Moens, Soriano, Swalla*

Examines current literature about specific topics in developmental biology. The seminar chooses current monthly topics and the group meets weekly to discuss published research papers. Topics may include: germ cell specification; cell migration and morphogenesis; axis formation; somitogenesis and stem cells. Offered: AWSp.

[View course details in MyPlan: MCB 513](#)

MCB 514 Molecular and Cellular Biology Literature Review (2) *Raible*

Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology program.

[View course details in MyPlan: MCB 514](#)

MCB 515 Molecular and Cellular Biology Literature Review (2) *Emerman*

Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: W.

[View course details in MyPlan: MCB 515](#)

MCB 516 Molecular and Cellular Biology Literature Review (2) *Emerman*

Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in

the Molecular and Cellular Biology Program. Offered: S.

[View course details in MyPlan: MCB 516](#)

MCB 517 Topics in Molecular and Cellular Biology (1-5, max. 40)

Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty and invited speakers involved in research in this area. A basic knowledge of principles of molecular and cellular biology assumed.

[View course details in MyPlan: MCB 517](#)

MCB 519 Topics in Cancer (1, max. 6)

Examination of ways to integrate basic, clinical, and public health sciences to increase understanding of human biology and disease. Seminars in introduction to cancer research as viewed by basic, clinical, and public health sciences, origins of cancer, cancer prevention, cancer progression, and therapies for cancer. Credit/no-credit only.

[View course details in MyPlan: MCB 519](#)

MCB 520 Tutorial in Molecular and Cellular Biology (1-2, max. 40) *M. EMERMAN*

Special topics reading and discussion. Offered: A.

[View course details in MyPlan: MCB 520](#)

MCB 522 Development I: The Developmental Basis of Human Disease (3) *Moens*

Uses recent discoveries in human genetics to guide student learning about animal development. Explores the normal developmental function of genes that have been identified as causal in human developmental disorders such as skeletal dysmorphologies, ciliopathies, autism, and cancer. Offered: A, odd years.

[View course details in MyPlan: MCB 522](#)

MCB 529 Cell Migration (1.5) *Cooper, Moens*

Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated by the migrating cell. Offered: jointly with CONJ 529; W.

[View course details in MyPlan: MCB 529](#)

MCB 532 Human Pathogenic Viruses (3) *Emerman*

Replication, regulation, and pathogenesis of several groups of human viruses, including human immunodeficiency virus and papillomaviruses. Emphasis on the unique aspects of the viral-like cycles as they relate to effects on infected cells and organisms. Guest lecturers focus on viral immunology, measles, herpes simplex virus, and HHV-8. Offered: A.

[View course details in MyPlan: MCB 532](#)

MCB 533 Evolutionary Genetics and Genomics (3) *Malik, Peichel*

Introduces classic concepts and approaches in evolutionary genetics. Familiarizes students with genomic approaches, tools and resources, and demonstrates how evolutionary approaches and modern genomic tools are brought to bear on important biological questions. Offered: A.

[View course details in MyPlan: MCB 533](#)

MCB 539 Biological Basis of Neoplasia (3) *Kemp, Zarbl*

Introduces the major themes in research in the biology of neoplastic change. Covers principle molecular mechanisms responsible for tumor initiation and progression, with a specific emphasis on intracellular signaling, DNA repair, cell cycle checkpoints, and loss of normal tissue homeostasis. Offered: Sp.

[View course details in MyPlan: MCB 539](#)

MCB 540 Nucleic Acid Enzymes (1.5) *Stoddard*

Surveys a wide variety of enzymatic process that control the structure and modification of DNA and RNA, with particular focus on structure, function and mechanism. Unifying features of major reaction types (such as

phosphoryl transfers and base modifications) constitute core material. Offered: W.

[View course details in MyPlan: MCB 540](#)

MCB 543 Logic Constructs and Methodologies of Biological Research (3)

Explores the logic and methods of general scientific practice, from historical, logical, and practical points of view. Covers philosophical and methodological matters upon which there is consensus, and cutting issues of ongoing controversy. Includes both theoretical and practical application of scientific method.

[View course details in MyPlan: MCB 543](#)

MCB 560 Biotechnology Externship (2-12, max. 12)

Supervised research in a biotechnology company. Prerequisite: permission of instructor and doctoral candidacy. Instructors: Moon Offered: AWSpS.

[View course details in MyPlan: MCB 560](#)

MCB 580 Teaching Practicum in Molecular and Cellular Biology (2, max. 4)

Supervised training in the teaching of molecular and cellular biology. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MCB 580](#)

MCB 599 Research in Molecular and Cellular Biology (*, max. 40)

The student rotates through one research laboratory involved in the Molecular and Cellular Biology Program per quarter. Open only to first-year students in the Molecular and Cellular Biology Program. Credit/no-credit only. Offered: AWSpS.

- [Autumn Quarter 2017](#)

MOLENG 510 Molecular Engineering Principles (3)

Covers molecular aspects of condensed organic materials, particularly molecular and collective interactions and resulting interfacial forces, entropic phenomena and condensation to systems of higher complexity. Includes the exploration of molecular system constraints and the molecular origin of resulting macroscale properties.

Provides introduction into computer modeling.

[View course details in MyPlan: MOLENG 510](#)

MOLENG 515 Advanced Molecular Bioengineering (4) *P. STAYTON*

Covers fundamentals of molecular recognition and design: thermodynamics, dynamics, and kinetics. Includes molecular design of macromolecules, recognition processes for current molecular engineering applications in biomedicine, and therapeutics based on cells. Offered: jointly with BIOEN 557; A.

[View course details in MyPlan: MOLENG 515](#)

MOLENG 520 Seminar in Molecular Engineering (1, max. 30)

Weekly seminars on current topics in molecular Engineering. Credit/no-credit only. Offered: jointly with CHEM 597; AWP.

[View course details in MyPlan: MOLENG 520](#)

MOLENG 525 Introduction to Synthetic Biology (3)

Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with BIOEN 523/CSE 586/E E 523.

[View course details in MyPlan: MOLENG 525](#)

MOLENG 530 Organic Electronic and Photonic Materials/Polymers (3)

Physical and material concepts determining properties of organic electronic and photonic materials. Discusses electronic structure, physico-chemical characterization, and device application. Includes introduction of electronic band structure of polymers, electrically conducting polymers; organic nonlinear optical

electroluminescent materials; polymer optical fibers; two-photon absorption materials for 3-D microfabrication.¹⁸⁰⁷
Offered: jointly with CHEM 564/MSE 560; W.

[View course details in MyPlan: MOLENG 530](#)

MOLENG 567 Micro- and Nanostructured Biosensors (3)

Focuses on biosensors based on micromachining and nanotechnology. The working principles on molecular detection and analysis are introduced with the fabrication process, system integration and evaluation. Helps students to classify biosensors detecting molecules, design the fabrication process and identify the evaluation methods. Offered: jointly with M E 567; W.

[View course details in MyPlan: MOLENG 567](#)

MOLENG 599 Current Topics in Molecular Engineering (1-5, max. 30) M. SARIKAYA

Readings, lectures, and discussions on topics of current interest in the field of molecular engineering. Offered: AWSpS.

[View course details in MyPlan: MOLENG 599](#)

MOLENG 600 Independent Study/Research (*)

Study and research under the supervision of an affiliated faculty member.

Museology

[Display as tabs](#)

Graduate Program

The museology graduate program is designed to provide the generalized training, knowledge, and skills necessary to pursue a professional career in museum work. The program is directed toward the training of a broad range of museum professionals interested in curation and management of collections in anthropology, art, botany, geology, history, and zoology as well as in interpretive programs and museum administration.

Courses include required core museology subjects as well as a range of classes offering students the chance to specialize in interest areas. Coursework is divided between the theoretical and practical aspects of museum operations. Classes take the form of lecture courses, seminars, special lectures by guest speakers, field trips, laboratory and collection management courses, practicums, and internships.

Practical experience, an essential component of the program, is provided by several museological institutions at the University of Washington, including the Thomas Burke Memorial Washington State Museum, the Henry Art Gallery, the Herbarium, the Arboretum, the Fish Collection, and the University Libraries. The Burke Museum acts as host of the museology program. Located on the campus of the University of Washington, the Burke Museum is Washington state's natural-history and anthropology museum, and is the oldest and largest natural-history museum in the Northwest. It has nationally and internationally ranked collections focusing on the anthropology, geology, and zoology of the Pacific region and Pacific Rim.

Graduate Program Coordinator
Burke Museum, Box 353010

Master of Arts

Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications completed and postmarked on or before this date are reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

Degree Requirements

Minimum 36 credits

The museology graduate program takes two years to complete, consisting of six quarters of academic study and research. During the first year, students carry on average between 10 and

Helpful links

[Graduate Program](#)

[Time Schedule](#)

[Program Web Page](#)

[Program Faculty](#)

[Course Descriptions](#)

15 credits each quarter; during the second year, the number of credits may vary depending on research, practicum, and internship work. Students may enroll part time with permission from the program director

1. Minimum 36 quarter credits, including 27 course credits and 9 thesis or thesis-project credits, with at least 18 credits of coursework numbered 500 or above, including a thesis or thesis project
2. Minimum three quarters of full-time residence credit or part-time equivalent
3. Reading competence in one foreign language, if required by the student's supervisory committee because of the student's area of specialization
4. Internship in an off-campus museum or related agency approved by the supervisory committee prior to submission of the student's thesis or thesis project
5. Thesis proposal presented by the beginning of the fourth quarter of study
6. Oral examination, covering both the thesis topic and the field of museology in general, following submission of the thesis or thesis project
7. All degree requirements completed within six years.

The following courses are required of all students unless exempted by petition to the program coordinating committee or credited for relevant coursework completed at other universities: MUSEUM 580, MUSEUM 581; MUSEUM 583 or MUSEUM 584 or MUSEUM 585; MUSEUM 582, MUSEUM 598, MUSEUM 590, MUSEUM 593, MUSEUM 594, MUSEUM 595; MUSEUM 700 or MUSEUM 710. In addition, two or more courses are required in an academic discipline relevant to the area of specialization.

The museology program also offers a graduate certificate in museum studies as an option for graduate students in other degree programs at the University. To qualify, students must take a specified minimum set of key courses in areas that emphasize either collection research and management, or museum administration and interpretation, to include hands-on work experience. Information and application materials for the certificate can be obtained from the museology program office.

INTERDISCIPLINARY GRADUATE PROGRAMS MUSEOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MUSEUM 500 Introduction to Museology (5)

Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics.

[View course details in MyPlan: MUSEUM 500](#)

MUSEUM 520 Learning in Museums (3)

Explore a range of learning theories and frameworks and their implications for museum practice. The course is organized around three key questions: What is learning? What do we know about learning in museums, specifically? How do we design for learning in museums?

[View course details in MyPlan: MUSEUM 520](#)

MUSEUM 524 Seminar in Museum Exhibition (5)

Theory, methodology, and fundamental principles of museum exhibition process. Exhibition elements include planning, conceptual development, interpretation, design, production, installation, evaluation, and community impact of museum exhibitions. Application of exhibition principles through term exhibit project.

[View course details in MyPlan: MUSEUM 524](#)

MUSEUM 528 Advocacy and Social Change (3) K. MORRISSEY

Explore the ways museums have engaged in representing and advocating for social change and the implications of that engagement. Readings, discussion, and assignments consider the fragile and interesting boundaries between museums and society and the changing expectation of museums to contribute to the common good of society. Offered: A.

[View course details in MyPlan: MUSEUM 528](#)

MUSEUM 540 Preservation and Management of Collections (3)

Focus on fundamental issues related to collections management, ranging from artifact handling and artifact storage solutions, to cataloging and photographing, as well as registration methods such as accessioning, deaccessioning, loans, and legal aspects of managing a museum collection.

[View course details in MyPlan: MUSEUM 540](#)

MUSEUM 541 Collections Management Lab (2)

Practical training in the fundamental areas of collections management including: artifact handling, cataloging,

condition reporting, photo-documentation and various storage methods. Prerequisite: MUSEUM 540,¹⁹¹¹ or concurrent enrollment.

[View course details in MyPlan: MUSEUM 541](#)

MUSEUM 542 Preservation of Collections II (5)

Lecture and demonstrations in the recognition and treatment of museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel.

[View course details in MyPlan: MUSEUM 542](#)

MUSEUM 544 Philosophy and Ethics of Museum Collections (3)

Explores ethics and issues related to collections housed in contemporary museums, addressing collections of many types including tangible and intangible aspects. Explores the meaning of "preserving cultural/natural significance": what museums, zoos, aquaria, and botanical gardens preserve, what they do not preserve, for whom, and how.

[View course details in MyPlan: MUSEUM 544](#)

MUSEUM 560 Museum Administration and Leadership (5)

Principles and practices of museum administration and leadership. Organizational structures and policies; management and leadership theory; board issues; organizational conflicts; planning issues; collection concerns; financial constructs; professional standards; and museum/community relations from an organizational and management perspective.

[View course details in MyPlan: MUSEUM 560](#)

MUSEUM 562 Legal Issues in Museums (4)

Explores the legal issues faced by art and science museums. Topics include copyright/trademark law, how the First Amendment protects controversial exhibits, repatriating Native American remains and cultural artifacts, donor rights, art appraising, wartime looting, and the ongoing debate over stewardship and ownership of the world's natural and cultural resources. Offered: jointly with LAW E 562.

[View course details in MyPlan: MUSEUM 562](#)

MUSEUM 566 Grant Writing in Museums (3)

Students learn how to identify relevant grant funding opportunities for museums and determine the fit for a particular institution or project; gain familiarity with the components of a grant proposal; understand how proposals are reviewed, what funders typically look for, and the characteristics of a high quality grant proposal.

[View course details in MyPlan: MUSEUM 566](#)

MUSEUM 570 Research Design and Museology Practice (4) K. MORRISSEY

Prepares students to identify, interpret, analyze, and design research that advances the field of museology.

[View course details in MyPlan: MUSEUM 570](#)

MUSEUM 574 Introduction to Museum Evaluation (3)

Provides an introduction to the field of evaluation as it relates to museum practice. Introduces basic types, ethics, and practices of evaluation and practices them through readings, reflective fieldwork, mentorships, and discussions.

[View course details in MyPlan: MUSEUM 574](#)

MUSEUM 575 Museum Evaluation Project I (3) N. VISSCHER

Applies museological training in Museum Evaluation. Students participate in a quarter-long evaluation project, designed by instructors to further student skills in data collection, and provide an introduction to data management, analysis and presentation within a variety of museum settings. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: MUSEUM 575](#)

MUSEUM 576 Evaluation Project II (3, max. 9) N. VISSCHER

Applies museological training in museum evaluation. Includes design and implementation of a yearlong-long

evaluation project, intended to further student skills in evaluation planning, outcome development, instrumentation design, data analysis, and reporting in a variety of museum settings. Prerequisite: MUSEUM 574; MUSEUM 575 Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: MUSEUM 576](#)

MUSEUM 583 Directed Fieldwork in Museum Operations (1-5, max. 15)

Application of general museological training in one or more areas of supervised operation areas, including registration, education, exhibition, development, marketing or public relations. Credit/no-credit only.

[View course details in MyPlan: MUSEUM 583](#)

MUSEUM 584 Directed Fieldwork in Archaeological Collections (1-5, max. 15)

Application of museological training in curation of archeological collections at the Burke Museum. Supervised work ranges from fundamental collection documentation and research to preventive conservation, storage, and other special curation projects. Prerequisite: MUSEUM 581.

[View course details in MyPlan: MUSEUM 584](#)

MUSEUM 585 Directed Fieldwork in General Collections (1-5, max. 15)

Application of museological training in the curation of art, historic, botanical, geological, zoological, or other collections. Supervised work ranges from fundamental collection documentation and research to preventive conservation or storage, and other special curation projects. Credit/no-credit only.

[View course details in MyPlan: MUSEUM 585](#)

MUSEUM 588 Special Topics in Museology (1-5, max. 15)

In-depth examination of selected current issues within the field of museology.

[View course details in MyPlan: MUSEUM 588](#)

MUSEUM 594 Seminar in Museum Education (5)

Focus on museums as educational institutions with consideration of the place of education in the mission of museums, the educational role of museums compared to that of other institutions, the museum's diverse audiences and their needs, and the educational methods and techniques museums may employ in pursuing their goals.

[View course details in MyPlan: MUSEUM 594](#)

MUSEUM 597 Directed Fieldwork in Audience Research (1-5, max. 15)

Applies museological training in visitor studies gained from audience research coursework. Includes implementation of audience research and evaluation projects within a variety of local museums, zoos, and aquaria. Students develop and practice skills in data collection, analysis, and reporting of results. Prerequisite: MUSEUM 596. Instructors: Morrissey, Satwicz, Visscher Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: MUSEUM 597](#)

MUSEUM 599 Careers and Social Capital (3-5) *O'Donnell*

Prepares students to transition from the academic community of a world-class university to a place of responsibility within a professional community that is committed to stewardship of the vast natural and created resources of our global communities and environments, including our stories, values, knowledge, mistakes, questions, and aspirations. Offered: Sp.

Near and Middle Eastern Studies

[Display as tabs](#)

The interdisciplinary PhD program in Near and Middle Eastern Studies is designed for students who wish to pursue research with a comparative perspective in Near Eastern languages and literature: Arabic, Hebrew, Persian (or Dari or Tajik), Turkish and Central Asian Turkic languages; Near Eastern linguistics; Islamic topics, namely, Islamic law, history, institutions, theology, and mysticism; comparative religion: (Judaism, Christianity, and Islam); and interdisciplinary investigations of modern topics using the social sciences. The program, administered by an interdisciplinary Graduate School faculty group, includes courses offered in the Department of Near Eastern Languages and Civilization, the Jackson School of International Studies, and other departments on campus. Students must take courses in both the humanities and social sciences.

Graduate Program Coordinator
311 Loew Hall, Box 352192
(206) 543-6398

Doctor of Philosophy

Admission Requirements

1. MA or equivalent in a discipline or field directly related to the proposed PhD work
2. Third-year competence in a regional language, and reading knowledge of a second language pertinent to the PhD research
3. Application deadline for autumn quarter admission is February 1. Application procedures are at www.grad.washington.edu/students/interdisciplinary/nme/application.shtml.

Degree Requirements

Minimum 90 credits

Specific coursework and areas of concentration are determined by the student's interests within the framework of the degree and satisfactory progress requirements listed below.

1. Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization; Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination administered by the program.
2. Within three years of admission, completion of two advanced courses in the humanities, one of which must be in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one of which

[Course Descriptions](#)

must be in the Department of History. These courses are in addition to work the student may have done at the BA and MA level.

3. Within three years of admission, completion of a graduate seminar. Two graduate seminars are required if none was taken at the M.A. level.
4. A student is expected to have studied three languages, two of which must be regional languages and one of which must be a "Western" European language other than English, such as French, German, Italian, Russian, or Spanish. The student's Supervisory Committee decides whether a fourth language is required and whether the fourth required language is European or regional. Students pursuing language-related work may anticipate a fourth required language, whereas those pursuing social-science-related studies may not. Before the general examination (see below) may be taken, the student must complete the language requirements including the second-year level in a regional language different from the two languages offered at the time of admission if both were not regional languages.
5. Disciplinary method and theory requirements: For all students conducting fieldwork or working with documents, whether social science or humanities focused, and for all social science-oriented students, the following courses are strongly encouraged: (a) ANTH 550; and (b) POL S 491; or (c) their equivalents in appropriate disciplines.

For students doing humanities-oriented research but not conducting fieldwork, two method and theory courses in the appropriate discipline or disciplines (e.g., comparative literature, philosophy) are required.

6. Disciplinary core courses: Each student is required to take two disciplinary core courses in appropriate fields. Core courses (or field courses) survey the literature, methods, and theoretical issues involved in a broad field of inquiry, as opposed to elective topical courses, which cover a much smaller area. Core courses should be chosen according to the anticipated research interests and fields for preliminary examination of each student. For example, these core disciplinary courses might focus on comparative politics, comparative religion, feminist theory, ethnicity and nationalism, analysis of linguistic structures, seminar in cognitive anthropology, comparative legal institutions, or international political economy. Courses on a narrow field of inquiry (such as Arab-Israeli conflict) do not constitute field or core courses, though they may contribute to a student's general field.

PhD Examinations and Dissertation

1. Preliminary examinations, consisting of three written and an oral. The three written examinations include: area of specialization, theory and discipline, and a self-designated field, revolving around the student's interest. The oral examination, following the written examinations, is two hours in length and addresses all these areas.
2. General examination, consisting of a take-home part and an oral part
3. Final examination, the PhD thesis defense

Annual Review: A subcommittee of the Near and Middle Eastern Studies program faculty meets each spring to review the progress of all students in the PhD program. Either the chair of the student's committee, the program's graduate adviser, or the program's director informs students of the results of this annual review.

Neurobiology and Behavior

[Display as tabs](#)

Understanding the brain represents both a major scientific challenge and a wonderful research opportunity. Investigations into the mechanisms of neural function require an interdisciplinary approach using the knowledge base and techniques of anatomy, biochemistry, molecular biology, physiology, pharmacology, and the behavioral sciences. Neuroscientists and their students must use these different approaches in their research and training if they are to make inroads to solving the major questions in neuroscience.

The University of Washington has met this challenge by establishing the interdisciplinary graduate program in neurobiology and behavior. The laboratories of more than 120 faculty members in over 20 departments within the School of Medicine, College of Arts and Sciences, and College of Engineering have combined efforts to form the doctoral training program, continuing a long history of collaborative efforts that cross University boundaries.

The program is designed to allow students to obtain both broad training in the neurosciences and more intensive coursework in specific areas of interest. The program emphasizes flexibility and encourages students to take responsibility in the design of their own curriculum. Students have the opportunity to work with faculty whose interests span the breadth of neuroscience research. Graduates of the program are well prepared for a variety of careers involving academic, research, industrial, and public policy positions.

Doctor of Philosophy

Admission Requirements

1. Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.
2. GRE scores: general test required; subject test not required, but recommended
3. Minimum three (3) letters of recommendation
4. Statement of purpose and curriculum vitae
5. All must be submitted online via the Graduate School application process.

Applications received after the deadline are considered at the discretion of the directors.

[Time Schedule](#)

[Academic Planning Worksheet](#)

[Program Web Page](#)

[Program Faculty](#)

[Course Descriptions](#)

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record, GRE scores (including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology), and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

Degree Program Requirements

90 credits, to include:

1. *Credit Requirements:* 20 graded credits of coursework with NEUBEH core curriculum and 10 credits of graded/ungraded elective courses approved by the curriculum committee chairs and the student's advisers.
2. *First Year:* Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes the NEUBEH 501, NEUBEH 502, NEUBEH 503, NEUBEH 504, NEUBEH 532, NEUBEH 559 series, three lab rotations, and three quarters of the seminar series and journal clubs. Following the third rotation, students generally choose a permanent dissertation adviser in whose lab they pursue research for the rest of their educational career, generally four to five years.
3. *Second Year:* Students form their doctoral Supervisory Committee by the end of winter quarter, define their doctoral projects, take additional elective courses, and participate in a teaching internship for a minimum of two quarters (or equivalent), and hold their first committee meeting.
4. *Third Year and Beyond:* By the end of autumn quarter of the third year, the student completes the general examination and is conferred official PhD candidacy by the Graduate School. The student then focuses on dissertation research and continues to meet with the Supervisory Committee annually. Annual student evaluations and progress reports are due each spring quarter. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of that examination and acceptance of the completed dissertation by the Graduate School, the student is conferred the PhD degree.

Financial Aid

The NEUBEH program provides a salary with benefits (insurance plus tuition) for the first three quarters of study during rotations. Once the student has entered a dissertation laboratory, support is provided by the department of the dissertation adviser. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

INTERDISCIPLINARY GRADUATE PROGRAMS

NEUROSCIENCE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

NEURO 501 Introduction to Neurobiology (3) *Carlson*

Survey of molecular, cellular, and developmental neuroscience, including gene regulation, the cytoskeleton, protein sorting in the secretory pathway, growth factors, and neurotransmitter receptors. Includes lecture discussion of original literature.

[View course details in MyPlan: NEURO 501](#)

NEURO 502 Introduction to Neurobiology (5) *Sherk*

Systems level survey of vertebrate system, focusing on sensory system, on motor system, and on neuroanatomy. Lectures cover topics in sensory and motor systems. Laboratory includes brain dissection and study of intact, prosected, and sectioned brain and spinal cord. Emphasis is on human nervous system.

[View course details in MyPlan: NEURO 502](#)

NEURO 503 Cognitive and Integrative Neurobiology (4) *Phillips*

Survey of all aspects of neuroscience, including a discussion of higher neural processes like motivation, decision making, attention, learning, and memory. Lecture and discussion of original literature.

[View course details in MyPlan: NEURO 503](#)

NEURO 504 Biophysics of Nerve, Muscle, and Synapse (3) *Sullivan*

Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with P BIO 504.

[View course details in MyPlan: NEURO 504](#)

NEURO 510 Seminar in Neurobiology and Behavior (0.5, max. 30)

Biweekly seminar on current topics. Required for students in the graduate program in neurobiology and behavior and for students supported on Graduate Neuroscience Program Training Grant. Credit/no-credit only.

[View course details in MyPlan: NEURO 510](#)

NEURO 511 Seminar in Advanced Neurobiology (1-3, max. 30)

Weekly faculty lectures, student presentations, and discussions of past and current scientific literature in neurobiology and behavior.

[View course details in MyPlan: NEURO 511](#)

NEURO 512 Readings in Advanced Neurobiology and Behavior (1-3, max. 30)

Guided study of the primary literature of neurobiology and behavior. Emphasizes critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NEURO 512](#)

NEURO 515 Teaching Practicum in Neurobiology and Behavior (3-6, max. 30)

Supervised training in the teaching of neuroscience and related scientific topics. Prerequisite: graduate standing in the neurobiology and behavior graduate program and permission of the instructor. Credit/no-credit only.

[View course details in MyPlan: NEURO 515](#)

NEURO 526 Introduction to Laboratory Research in Neurobiology (4, max. 30)

Students become familiar with, and assist in, the performance of research on ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Prerequisite: first-year graduate students in neurobiology. Credit/no-credit only.

[View course details in MyPlan: NEURO 526](#)

NEURO 527 Current Topics in Neurobiology and Behavior (1, max. 30)

Presentation and discussion of current research provides exposure to diverse areas of neurobiology and behavior research. Prerequisite: graduate student in neurobiology and behavior program or permission of instructor.

Instructors: Rieke Credit/no-credit only.

[View course details in MyPlan: NEURO 527](#)

NEURO 528 Computational Neuroscience (3)

Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or permission of instructor. Offered: jointly with CSE 528.

[View course details in MyPlan: NEURO 528](#)

NEURO 535 Research Opportunities in Neurobiology and Behavior (1)

[View course details in MyPlan: NEURO 535](#)

NEURO 541 Neuroendocrinology (3)

Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: BIOL 220; BIOC 442 or permission of instructor. Instructors: Steiner Offered: jointly with P BIO 509; W, even years.

[View course details in MyPlan: NEURO 541](#)

NEURO 545 Quantitative Methods in Neuroscience (3)

Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection, and information theory. Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Instructors: Rieke Offered: jointly with P BIO 545.

[View course details in MyPlan: NEURO 545](#)

NEURO 548 Molecular Mechanisms of Synaptic Plasticity (2) *Barria*

Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with P BIO 548; Sp, even years.

[View course details in MyPlan: NEURO 548](#)

NEURO 550 Biophysics of Calcium Signaling (1)

Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection

and biological conclusions. Prerequisite: CONJ 531. Instructors: Hille, Santana Offered: jointly with P BIO 550; Sp, odd years.

[View course details in MyPlan: NEURO 550](#)

NEURO 554 Motor Learning: Cellular and Network Mechanisms (1) *Fetz, Perlmutter*

Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source.

Offered: jointly with P BIO 554.

[View course details in MyPlan: NEURO 554](#)

NEURO 555 Sensory Receptors (1) *Detwiler, Rieke*

Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with P BIO 555.

[View course details in MyPlan: NEURO 555](#)

NEURO 556 Axon Pathfinding Mechanisms (1) *Bothwell*

Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with P BIO 556.

[View course details in MyPlan: NEURO 556](#)

NEURO 557 Ion Channel Gating (1) *Zagotta*

Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with P BIO 557.

[View course details in MyPlan: NEURO 557](#)

NEURO 559 Neurobiology of Disease (3)

Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/P BIO 559.

[View course details in MyPlan: NEURO 559](#)

NEURO 561 From Biophysics to Neural Computation (2)

Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Offered: jointly with P BIO 561; Sp.

ugnutr@uw.edu

Minor

The minor provides a foundation of knowledge in the study of nutritional sciences, with a unique focus on the intersection of food, food systems, and population health. Students pursuing the minor are presented with a multidisciplinary perspective on the field of nutritional sciences, including its metabolic/biochemical, behavioral, and public health aspects.

Minor Requirements: 25 credits, to include the following:

1. Core (11-12 credits): NUTR 200; two courses selected from NUTR 302, NUTR 303, and NUTR 310; NUTR 400
2. Electives (minimum 13-14 credits) selected from an approved list (may include additional core course not already applied toward the minor). See [website](#) for approved list
3. Minimum 13 credits from School of Public Health
4. Minimum 15 credits of upper-division courses
5. Minimum 15 credits taken outside student's major requirements
6. Minimum 15 credits in residence through the UW
7. Minimum 2.0 cumulative GPA for courses applied toward the minor

Graduate Program

Graduate Program Coordinator
305 Raitt, Box 353410
(206) 543-1730
nutr@uw.edu

Nutritional Sciences is an interdisciplinary program in the School of Public Health that offers Master of Science (MS), Doctor of Philosophy (PhD), and Master of Public Health (MPH) degrees. The program is designed for the needs of students with a strong science background who wish to pursue (1) advanced training in nutritional science or clinical research, (2) advanced training in nutritional epidemiology and diet-disease interactions, or (3) training in public health nutrition practice.

The Graduate Coordinated Program in Dietetics (GCPD) combines the MS, MPH, and PhD programs with a supervised practice experience (internship equivalent), which gives students eligibility to take the national registration examination to become a Registered Dietitian (RD). The GCPD includes additional coursework and a nine-month practice experience at regional community, clinical, and food service facilities.

Principal areas of study are biochemical and molecular nutrition, community or public health nutrition, food safety, nutrition and chronic disease, and clinical nutrition. Members of the core faculty represent the School of Public Health, the Fred Hutchinson Cancer Research Center, and the School of Medicine. The program also draws on a larger group of affiliate and clinical faculty from the College of Arts and Sciences, schools of Medicine and Nursing, other units on campus, and from affiliated institutions in the Seattle area.

All students begin working on a research project under the supervision of an appropriate faculty member in the early stages of their graduate experience. Public health field placements, which follow the first year of required coursework, are an integral part of the MPH curriculum. For specific degree requirements, see program website.

Students have access to faculty mentors and research facilities through the Medical Center, the South Lake Union Research Hub, and the Fred Hutchinson Cancer Research Center. Clinical facilities include UW Medical Center, Harborview Medical Center, Northwest Kidney Center, Seattle Children's hospital, Seattle Cancer Care Alliance, Northwest Hospital and Medical Center, Valley Medical Center, and the Center for Human Development and Disabilities.

Students may apply to the graduate degree program after completing a bachelor's or a master's degree. Prerequisite coursework in nutrition, chemistry, biochemistry, and human physiology is required. For specific admission requirements, see program website. Students who wish to supplement their degree program with the Academy of Nutrition and Dietetics -accredited GCPD must also complete prerequisite coursework in microbiology, psychology, food science, and English. Students who have completed a didactic program in dietetics may apply to the graduate program and the GCPD.

SCHOOL OF PUBLIC HEALTH

SCHOOL OF PUBLIC HEALTH

NUTRITIONAL SCIENCE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

NUTR 141 Introduction to Foods (5) NW A. GLOSTER

Examines how foods are used by different people and cultures to deliver nutrients and energy. Explores the evolution of the global food supply, food preparation techniques, food patterns, and eating habits as they relate to diets, nutrition, and personal and public health.

[View course details in MyPlan: NUTR 141](#)

NUTR 200 Nutrition for Today (4) NW

Examines the role of nutrition in health, wellness, and prevention of chronic disease. Topics include nutrients and nutritional needs across the lifespan, food safety, food security, wellness, body weight regulation, eating disorders, sports nutrition, and prevention of chronic disease. May not be taken for credit if credit earned in NUTR 300. Offered: AWSp.

[View course details in MyPlan: NUTR 200](#)

NUTR 241 Culinary Nutrition Science (3) NW

Explores scientific principles behind modern culinary techniques that transform raw foodstuffs into prepared foods that have sensory appeal. Hands-on kitchen demonstrations show how physical and chemical forces acting on solids, liquids, and gases transform raw ingredients into foods with desirable taste, texture, and aroma. Requires access to a full kitchen to complete assignments. Cannot be taken for credit if credit earned in NUTR 441. Prerequisite: NUTR 200.

[View course details in MyPlan: NUTR 241](#)

NUTR 302 Food Studies: Harvest to Health (3) I&S/NW

Examines the many facets of the modern food supply from production and processing to distribution, marketing, and retail. Systems approach to foods studies considers geopolitical, agricultural, environmental, social, and economic factors along the pathway from harvest to health. Prerequisite: NUTR 200. Instructors: Otten Offered: Sp.

[View course details in MyPlan: NUTR 302](#)

NUTR 303 Neighborhood Nutrition (3) NW

Examines the food environment in the local community from the public health perspective. Explores where

people get their food, what influences this decision, and various aspects of the local food movement, including access to healthy food, urban agriculture, farmers markets, and farm-to-school programs. Prerequisite: NUTR 200. Instructors: Drewnowski Offered: W.

[View course details in MyPlan: NUTR 303](#)

NUTR 310 Nutrition and the Life Course (4) NW

Explores nutrient needs from infancy through adolescence and adulthood, including the physiological basis of nutrient requirements and the genetic, social, and environmental influences on food choices and nutrition status. Uses an evidence-based approach to assess the impact of nutrition across life stages and ways to improve population health by improving nutrition. Prerequisite: NUTR 200.

[View course details in MyPlan: NUTR 310](#)

NUTR 400 Nutrition Seminar (1, max. 4) I&S A. DREWNOWSKI

Examines emerging issues in food and nutrition as they relate to personal and public health. Reviews evidence in the context of health policy. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: NUTR 400](#)

NUTR 405 Physical Activity in Health and Disease (3) NW

Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 220. Offered: Sp.

[View course details in MyPlan: NUTR 405](#)

NUTR 406 Sports Nutrition (3) NW

Covers the essentials of human nutrition that improve and sustain optimal performance for sport and exercise. Discusses the effect of eating disorders (in both male and female athletes), weight management, and sport nutrition resources. Prerequisite: NUTR 200. Instructors: Kirk Offered: Sp.

[View course details in MyPlan: NUTR 406](#)

NUTR 411 Diet in Health and Disease (3) QSR

Impact of diet on health and the prevention of obesity, diabetes, cardiovascular disease, and other non-communicable diseases. Examines diet-health relationships; social, environmental, and economic factors in eating behavior; and evidence base behind dietary guidelines. Draws on seminal and recent research in nutrition science and uses examples from recent media coverage. Prerequisite: NUTR 200. Offered: Sp.

[View course details in MyPlan: NUTR 411](#)

NUTR 412 United States Food and Nutrition Policy (3) I&S

Offers a broad introduction to food and nutrition policies in the United States and their impacts on population health. Real-world controversies and debates used to illustrate policy principles, research tools, and policy analysis. Includes topics on public health nutrition, food policy related to population health, and food security. Prerequisite: NUTR 200. Instructors: Otten Offered: A.

[View course details in MyPlan: NUTR 412](#)

NUTR 420 Global Nutrition: Challenges and Opportunities (3) I&S J. GORSTEIN

Examines global dimensions of malnutrition, its assessment and classification, and global policies and programs to improve nutritional status in developing countries. Emphasizes global consequences of poor nutrition on health, cognition, and development with a focus on the first 1,000 days from conception to age two. Prerequisite: NUTR 200. Offered: A.

[View course details in MyPlan: NUTR 420](#)

NUTR 446 Food Safety and Health (3) Rosenfeld

Presentation of emerging issues in food safety and toxicology, microbiology, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international and national policies that promote regional solutions for a safe food supply and access to nutritious foods. Offered:

W.

[View course details in MyPlan: NUTR 446](#)

NUTR 465 Nutritional Anthropology (3) I&S/NW

Examines the interrelationships between biomedical, sociocultural, and ecological factors and their influence on the ability of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, and nutrition-related biobehavioral influences on human growth, development, and disease resistance. Prerequisite: BIO A 201. Offered: jointly with BIO A 465.

[View course details in MyPlan: NUTR 465](#)

NUTR 490 Special Topics in Nutritional Sciences (1-5, max. 10)

Examines emerging issues in nutrition. Reviews the evidence and potential policy implications.

[View course details in MyPlan: NUTR 490](#)

NUTR 499 Undergraduate Research (1-5, max. 10)

Independent study and research supervised by a faculty member with appropriate academic interest. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NUTR 499](#)

NUTR 500 Graduate Seminar: Current Issues in Nutrition (1, max. 4)

A review of current topics in nutritional science and public health nutrition. Provides a forum for student and faculty presentation, and review of current research efforts. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: NUTR 500](#)

NUTR 505 Physical Activity in Health and Disease (3)

Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Recommended: human physiology. Offered: jointly with EPI 502.

[View course details in MyPlan: NUTR 505](#)

NUTR 511 Survey of Advanced Nutrition (2-3) *Averill*

Advanced introduction to nutritional sciences. Topics include macronutrient and micronutrient metabolism, energy balance and obesity, nutrient utilization in physical activity, nutritional needs and recommendations throughout the lifecycle, and the relationships between nutrition and atherosclerosis, diabetes, and cancer risk. Offered: A.

[View course details in MyPlan: NUTR 511](#)

NUTR 512 United States Food and Nutrition Policy (3)

Offers a broad introduction to food and nutrition policies in the United States and their impacts on population health. Real-world controversies and debates used to illustrate policy principles, research tools, and policy analysis. Includes topics on public health nutrition, food policy related to population health, and food security. Prerequisite: NUTR 300. Instructors: Otten Offered: A.

[View course details in MyPlan: NUTR 512](#)

NUTR 513 Food and Society: Exploring Eating Behaviors in a Social, Environmental, and Policy Context (2) *J. OTTEN*

Socio-cultural, environmental, and policy factors interact with biological and psychological characteristics to influence the foods we eat, and when, where, and how we eat them. Uses contemporary readings, films, and critical discussion to explore these macro-scale influences on food, nutrition, and eating behavior. Offered: A.

[View course details in MyPlan: NUTR 513](#)

NUTR 520 Nutrition and Metabolism I (3)

Metabolic/physiologic concepts related to energy balance, carbohydrate, and protein nutrition. Addresses energy-producing pathways, as well as food sources, digestion, absorption, and utilization of carbohydrates,

protein, and various micronutrients. Additional topics include low-carbohydrate diets, vegetarianism, ¹⁹²⁹protein deficiency, and inborn errors in carbohydrate and protein metabolism. Prerequisite: biochemistry. Instructors: Rosenfeld Offered: A.

[View course details in MyPlan: NUTR 520](#)

NUTR 521 Nutrition and Metabolism II (3)

Discussion of normal lipid components of animal tissues, with review of their metabolism and physiological functions. Topics include digestion, absorption, transport, and utilization of dietary fats, cholesterol, and fat-soluble vitamins. Discusses in-depth the roles played by lipids and various micronutrients in altering risk of atherosclerosis. Prerequisite: biochemistry. Instructors: Rosenfeld Offered: W.

[View course details in MyPlan: NUTR 521](#)

NUTR 522 Nutrition and Metabolism III (3) *M. ROSENFELD*

Advanced study of biologically essential minerals and vitamins. To include absorption, transport, function, storage, and excretion; imbalance, deficiency, and toxicity; dietary structures; and role of these nutrients in prevention of diseases directly or indirectly. Recommended: biochemistry. Offered: Sp.

[View course details in MyPlan: NUTR 522](#)

NUTR 526 Maternal and Pediatric Nutrition (4)

Examines the influence of maternal, infant, and children's nourishment on growth, development, and health, including children with special healthcare needs, in both individual and population-based environments. Includes nutrition and assessment, critical evaluation of normative data, and evidence-based clinical and community nutritional care and family-centered care. Prerequisite: human nutrition and human physiology. Offered: A.

[View course details in MyPlan: NUTR 526](#)

NUTR 529 Nutrition Research Design ([1-3]-, max. 3)

Critical review of selected nutrition literature. Evaluation of experimental design, research protocols, data analyses, and data presentations. Prerequisite: BIOS 511. Credit/no-credit only. Offered: A.

[View course details in MyPlan: NUTR 529](#)

NUTR 531 Public Health Nutrition (4)

Explores the functions and essential services of public health as they apply to assuring access to a safe and nutritious food supply. Examines the practice of public health nutrition: nutrition environment, program planning, implementation, and evaluation; policy development, implementation, and evaluation; and links between basic science and public health nutrition practice. Prerequisite: introductory nutrition. Offered: W.

[View course details in MyPlan: NUTR 531](#)

NUTR 532 Fieldwork in Public Health Nutrition (1-12, max. 12)

Experience and service learning in organizations that plan, deliver, and promote population-based nutrition education and nutrition services. Prerequisite: nutritional sciences graduate student and permission of instructor. Instructors: Lund Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NUTR 532](#)

NUTR 536 Nutrition Education Principles and Practice (2)

Examines theory-based design and delivery of nutrition education, including conducting needs assessments and developing lesson plans, activities, visual aids, and evaluation material. Explores design features of written, oral, and technology-based nutrition education materials and initiatives. Addresses differing learning styles, cultural groups, and literacy levels. Offered: Sp.

[View course details in MyPlan: NUTR 536](#)

NUTR 537 Laboratory Rotation (1-4, max. 6)

Exposure to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to ongoing research for preparation of dissertation

topics. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NUTR 537](#)

NUTR 538 Nutritional Epidemiology (3) *Beresford, Kratz*

Application of epidemiological methods to studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to design studies and read the literature in nutritional epidemiology.

Prerequisite: EPI 511 or EPI 512 or instructor permission. Offered: jointly with EPI 538.

[View course details in MyPlan: NUTR 538](#)

NUTR 545 Food Safety and Health (3)

Presentation of emerging issues in food safety, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods. Offered: jointly with ENV H 540; W.

[View course details in MyPlan: NUTR 545](#)

NUTR 555 Nutrition in Developing Countries (3) *Gorstein*

Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of undernutrition and micronutrient deficiencies. Offered: jointly with G H 555; Sp, odd years.

[View course details in MyPlan: NUTR 555](#)

NUTR 559 Orientation to Clinical Dietetics Practice (3) *Averill*

Provides an orientation to dietetics in clinical settings, including the nutrition care process and integration of evidence-based practice. Offered: A.

[View course details in MyPlan: NUTR 559](#)

NUTR 560 Nutritional Counseling for Chronic Disease (1-3) *Simon*

Examines nutritional intervention strategies and counseling skills that pertain to chronic disease prevention and management. Builds knowledge and skills needed to create appropriate care plans and counseling strategies designed to meet individual client assessment/counseling situations. Offered: Sp.

[View course details in MyPlan: NUTR 560](#)

NUTR 561 Graduate Coordinated Program in Dietetics (1-10, max. 35)

Focuses on the competencies for entry-level practice in dietetics. Includes supervised practice experience in wellness, public health, food services, ambulatory care, and clinical care. Prerequisite: GCPD students only.

Instructors: Lund Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NUTR 561](#)

NUTR 562 Nutrition and Chronic Disease (4)

Epidemiology/pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes). Examines nutritional risk/protective factors in relation to public health, individual nutrition, and clinical intervention. Prerequisite: physiology, biochemistry. Instructors: Kirk Offered: Sp.

[View course details in MyPlan: NUTR 562](#)

NUTR 563 Nutrition in Acute Care (4)

Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, organ failure, burns, AIDS, and neoplastic disease. Examines specialized nutritional support and substrate requirements in the acute care setting. Prerequisite: either NUTR 562 or permission of instructor. Instructors: Averill Offered: A.

[View course details in MyPlan: NUTR 563](#)

NUTR 564 Management of Nutrition Services (3)

Examines healthcare policy and administrative issues that impact delivery of nutritional services in different healthcare settings. Topics include organizational behavior, productivity, project management, financial reporting, and human resources. Offered: S.

[View course details in MyPlan: NUTR 564](#)

NUTR 590 Special Topics in Nutritional Science (1-4, max. 4)

Examines emerging issues in nutrition. Reviews the evidence and potential policy implications. Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NUTR 590](#)

NUTR 595 Nutritional Sciences Master's Practicum (1-12, max. 12)

Supervised practice experience providing students an opportunity to learn how nutritional sciences are applied to public health settings and in the formulation and application of public health policy. Prerequisite: HSERV 511; NUTR 531; EPI 511; NUTR 520; NUTR 521; NUTR 522. Instructors: Lund Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NUTR 595](#)

NUTR 596 Nutrition Practice Capstone (1-10)

Applies and extends students' nutritional sciences, dietetics, or public health knowledge and skills to a practice-focused problem or question with the completion of a mentored capstone project and report. Credit/no-credit only. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NUTR 596](#)

NUTR 600 Independent Study or Research (*-)

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NUTR 600](#)

NUTR 700 Master's Thesis (*-)

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NUTR 700](#)

NUTR 800 Doctoral Dissertation (*-)

Credit/no-credit only. Offered: AWSpS.

Pathobiology

[Display as tabs](#)

Graduate Program

Graduate Program Coordinator
310C Harris Hydraulics, Box 357965
(206) 543-4338
pathobio@uw.edu

The Pathobiology graduate program offers graduate training in the application of basic biomedical research to diseases of public health interest. The program of study involves core courses to develop a fundamental understanding of basic cellular and molecular processes and techniques important in the application of basic biomedical research to diseases; laboratory experience to learn how to collect, analyze, interpret, and use data for solving problems; and opportunities to develop skills in communicating research findings through oral and written presentations.

Master of Science

The master's program is designed for students to develop an understanding of the applications of molecular biology to public health, epidemiology, and cellular or antigenic analysis, and microbiology or immunology. The focus in this two-year program is developing basic research skills and understanding the scientific method. Students are expected to fulfill their course requirements during the first year. Under the guidance of a faculty research mentor, students propose and complete a thesis that includes an original research project.

Admission Requirements

Students are admitted directly into the PhD program. The department does not currently accept applications for the Master of Science.

Degree Requirements

A minimum of 60 credits as follows:

1. 21.5 credits of required courses: PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1)
2. *Research Credits*: Sufficient credits of PABIO 600 and PABIO 700 to complete a research project.
3. *Electives*: Additional courses in pathobiology or the biomedical sciences may be taken to fulfill the graded course requirement, to encompass the interests of the student, or to

[Academic Planning Worksheet](#)

[Program Web Page](#)

[Program Faculty](#)

[Course Descriptions](#)

fulfill any additional requirements set forth by the student's committee.

MS Thesis Research Proposal: The M.S. thesis research proposal should be done by the end of the fourth quarter of the first year and should contain the following, in this order:

1. A brief synopsis of background relevant to the project.
2. A summary of preliminary experiments.
3. A description of experiments planned for the next year.

MS Thesis: The thesis must be provided to the MS advisory committee two weeks prior to the oral presentation. Corrections should be made following their review before submission of the document to the Graduate School.

MS Oral Presentation and Defense: Students give a formal seminar prior to the completion of the master's program.

Doctor of Philosophy

The doctoral program lasts four to five years and is designed for students to become capable of conducting independent research leading to the expansion of knowledge by developing skills to approach unfamiliar experimental systems and identify and explore important questions concerning pathogenesis and infection. Students develop familiarity with the paradigms for control, prevention, and treatment; develop an understanding of epidemiology and disease processes; learn basic methodologies used in this research including relevant areas of molecular biology, bacteriology, cell biology, virology, epidemiology, and biostatistics; and develop familiarity with the major classes of pathogens.

Admission Requirements

1. *Personal Statement:* The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of the student's background and readiness for graduate studies in pathobiology.
2. One official set of transcripts from all collegiate institutions attended.
3. Three letters of recommendation.
4. Curriculum vitae
5. Official Graduate Record Examination (GRE) scores
6. International applicants are in addition required to submit official Test of English as a Foreign Language (TOEFL) scores. The Pathobiology program does not admit international applicants who have a TOEFL score of less than 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

Degree Requirements

90 credits minimum, as follows:

1. *Required Courses:* PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1), PABIO 598 (2), PABIO 500 (variable), PABIO 600 (variable), PABIO 800 (27); either IMMUN 441 (4) or IMMUN 532 (3).

2. Students are required to attend Seminar (PABIO 580) and Journal Club (PABIO 581) every quarter of the academic year while enrolled, but may be excused for up to two quarters while writing the dissertation. Students give research presentations in the Graduate Research Symposium annually after the first year. 3 credits each of Seminar and Journal Club may be counted towards the degree.
3. *Electives*: The following are recommended tracks for elective credits:
 1. *Eukaryotic Pathogens*: PABIO 536, PABIO 548, CONJ 531 through CONJ 544, EPI 532, MICROM 444
 2. *Bacterial Pathogens*: PABIO 540, PABIO 568, EPI 520, EPI 529, MICROM 552, MICROM 555. (Students without a background in bacteriology are required to take MICROM 442 or an equivalent course as a prerequisite for entry into the Bacterial Pathogens track.)
 3. *Viral Pathogens*: Two or more of the following are strongly recommended: CONJ 531-CONJ 544, EPI 520, EPI 524, EPI 530, IMMUN 532, MICROM 540

Research Facilities

Research facilities are geographically dispersed and located in the Health Science Center of the School of Medicine, Fred Hutchinson Cancer Research Center, and Seattle Biomedical Research Institute. External support includes computer facilities and the Health Sciences Library with access to more than 345,000 volumes, 4,000 periodicals, and online bibliographic services for all national libraries of medicine and most commercial databases.

The Fred Hutchinson Cancer Research Center is a world-renowned research institution. Its mission for more than 20 years has been to eliminate cancer. Shared facilities are available, including electron microscopy, flow cytometry, tissue culture, image analysis, biotechnology center for DNA and protein synthesis and sequencing, animal facilities, biological production facility focused on monoclonal antibody production, extensive libraries, and a biocomputing center.

The Seattle Biomedical Research Institute is an independent nonprofit organization studying causes of and interventions to infectious diseases of worldwide impact, including targeted research producing leading-edge findings and applied research creating diagnostic tests and treatments.

Financial Aid

The department offers a twelve-month competitive salary, as well as paying tuition and health insurance, which includes medical, dental, and vision benefits. Students with satisfactory academic progress can anticipate funding for the duration of their studies.

Rotation through research laboratory. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PABIO 500](#)

PABIO 536 Bioinformatics and Gene Sequence Analysis (3) *T. ROSE*

Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PHG 536; Sp.

[View course details in MyPlan: PABIO 536](#)

PABIO 548 Molecular and Cellular Parasitology (3)

Molecular and cellular biology of parasites of health-related significance, emphasizing current research topics unique to parasites, particularly well-suited for study in parasites, and especially important to study in host-parasite systems. Prerequisite: familiarity with molecular and cellular biology and permission of instructor.

Instructors: Feagin

[View course details in MyPlan: PABIO 548](#)

PABIO 551 Biochemistry and Genetics of Pathogens and Their Hosts (4)

Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease.

Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor.

Instructors: L. Campbell Offered: jointly with G H 566; A.

[View course details in MyPlan: PABIO 551](#)

PABIO 552 Cell Biology of Human Pathogens and Disease (4)

Cell biology and immunology explored through diseases of public health importance. Examples of pathogen

interaction with host cell biology and immune systems, unique aspects of the cell biology of pathogens,¹⁹³⁶ perturbations of these systems in non-infectious diseases, and design of therapeutics and vaccines to combat diseases of public health importance. Prerequisite: undergraduate-level coursework in biology or molecular biology or permission of instructor. Offered: W.

[View course details in MyPlan: PABIO 552](#)

PABIO 553 Survival Skills for Scientific Research (2)

Focuses on skills needed for scientific career: writing abstracts, curriculum vitae, research proposals; preparing for oral presentations; lab management skills; discussion of mentorship/trainee relationships; case-based discussions of various topics in ethics and scientific misconduct. Credit/no-credit only. Offered: W.

[View course details in MyPlan: PABIO 553](#)

PABIO 580 Pathobiology Seminar (1, max. 21)

Research from students, faculty members, and invited speakers presented and discussed. Topics include immunochemistry, viruses, membranes, infectious diseases, immune response, and other related topics. Offered: W.

[View course details in MyPlan: PABIO 580](#)

PABIO 581 Current Literature in Pathobiology (1, max. 15)

Develops skills in analyzing data and assessing conclusions through an analysis of current literature in pathobiology. Focuses on breadth and analytical skills. Prerequisite: enrollment in the pathobiology graduate program.

[View course details in MyPlan: PABIO 581](#)

PABIO 582 Critical Thinking and Research Design in Pathobiology (1.5, max. 12)

Analysis of issues, hypothesis and experimental design and testing. Prerequisite: graduate standing in pathobiology. Instructors: Lingappa Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: PABIO 582](#)

PABIO 590 Selected Topics (1-20, max. 20)

Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format. Prerequisite: permission of instructor.

Public Health Genetics

F363 Health Sciences Building

[Display as tabs](#)

Program Overview

331 Raitt Hall, Box 353410

Public health genetics is an emerging field that applies advances in human genetics, genomics, and molecular biotechnology to improve public health and prevent disease.

Founded in 1997, the University of Washington's Institute for Public Health Genetics (IPHG) is a leader in the emerging field of public health genetics. Alone among U.S. universities, the UW, through IPHG, offers graduate degrees at both the master's and PhD levels.

The mission of the IPHG is to provide broad, interdisciplinary training for future public health professionals, to facilitate research in public health genetics, and to serve as a resource for continuing professional education.

Master of Science, Genetic Epidemiology

An interdisciplinary field that draws on training in epidemiology, genetics, and biostatistics and examines how genes and environmental factors interact to influence health and disease in human populations. Training in genetic epidemiology focuses on methods to identify genetic influences on human diseases and interactions with environmental exposures in populations, emphasizing applied research skills.

Admission Requirements

1. Statement of purpose
2. Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school
3. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable)

substitutes for the GRE).

4. International applicants: official TOEFL scores
5. Three letters of recommendation from professors, supervisors, or others who know the student's work reasonably well. At least two letters should be academic references.
6. Recent copy of resume or curriculum vitae

Degree Requirements

68 credits minimum, to include:

1. *Required Courses:* PHG 511/EPI 517 (3), PHG 518/EPI 518 (4), PHG 519/BIOST 516/EPI 516 (3), EPI 573/ENV H 573 (3), PHG 512/LAW H 504/B H 514 (3); EPI 512 (4), EPI 513 (4); BIOST 517 (4), BIOST 518 (4); PHG 536/MEBI 536/PABIO 536 (3), GENOME 552 (1.5)
2. *Elective Courses:* Elective courses (excluding independent study and thesis credits) must be in epidemiology, biostatistics, genetics, public health genetics, or be related to the biological, physical, or social/behavioral factors which affect health, in particular ethical, legal and social issues related to genetic epidemiology.
3. *Thesis:* PHG 700 (9 credits minimum)

Master of Public Health, Public Health Genetics

Public Health Genetics is an emerging, interdisciplinary field that applies the rapid advances in human genetics, genomics, and bioinformatics to improve public health and prevent disease on a population basis. Training focuses on two core knowledge areas: genomics in public health (genetic and molecular epidemiology, pharmacogenetics, clinical aspects of genomics) and implication of genetics for society (ethics and social science, law and policy, health economics, and outcomes research).

Admission Requirements

1. Statement of purpose.
2. Official sealed transcripts, including courses, grades and degrees from all institutions attended after secondary school
3. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
4. International applicants: official TOEFL scores
5. Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.
6. A recent copy of the applicant's resume or curriculum vitae

Degree Requirements

63 credits, as follows:

1. *Required Courses:* 53 credits as follows: EPI 511 (4), BIOST 511 (4), HSERV 511 (3), ENV H 511 (3), HSERV 510 (3); PHG 511 (3), PHG 512 (3), PHG 513 (3), three of PHG 521 (3), PHG 522 (3), PHG 523 (3), PHG 525 (3), and PHG 542 (3); PHG 580 (6); PHG 595(3); at least 9 credits of PHG 700

2. *Electives*: Remaining 10 credits may combine approved elective courses, PHG 600 credits, and PHG 700 credits

Doctor of Philosophy

Public Health Genetics is an emerging, interdisciplinary field that applies the rapid advances in human genetics, genomics, and bioinformatics to improve public health and prevent disease on a population basis. Training focuses on two core knowledge areas: genomics in public health (genetic and molecular epidemiology, pharmacogenetics, clinical aspects of genomics) and implications of genetics for society (ethics and social science, law and policy, health economics, and outcomes research).

Admission Requirements

1. Statement of purpose.
2. Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school.
3. Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
4. International applicants: official TOEFL scores
5. Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.
6. A recent copy of the applicant's resume or curriculum vitae.

Degree Requirements

90 credits minimum, to include:

1. Additional writing courses may be required. Students should consult their faculty adviser.
2. *Human Genetics*: required -- PHG 551 or GENOME 565 (4); highly recommended -- GENOME 552 (1.5), PHG 536 (3)
3. *Public Health*: required -- EPI 511 (4); BHOST 511 (4) or BHOST 517 (4); ENV H 511 (3); HSERV 511 (3)
4. *Core Knowledge Areas*
 - a. *Genomics in Public Health*: PHG 511 (3), PHG 513 (3), PHG 542 (3), PHG 580 (1)
 - b. *Implications of Genetics for Society*: PHG 512 (3), PHG 521 (3), PHG 522 (3) or PHG 523 (3), PHG 525 (3)
5. PHG 580 is required each quarter for all PhD students until they pass the preliminary examination.
6. *Preliminary Examination*: Following completion of required courses, usually taken at the end of the second year of study.
7. *Selective Courses for Core Knowledge Areas and Development of Dissertation Topic*: : Once students begin to develop their dissertation project, they are expected to take at least nine additional units related to that project. Students need to work with their Supervisory Committee to identify selectives that are most useful in completing their dissertation. A list of example selective courses is available on the program website.

8. General examination
9. Dissertation
10. Final examination/dissertation defense

PUBLIC HEALTH GENETICS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PHG 200 Implications of Public Health Genomics for the Modern World (3) I&S/NW J. GOGARTEN

Introduces the field of public health genomics through examples of genetic, ethical, political, and social issues emerging in the wake of the Human Genome Project. Students develop the skills to analyze and critique public health, clinical, personal, and social implications resulting from emerging genomic technologies. Offered: A.

[View course details in MyPlan: PHG 200](#)

PHG 301 Introduction to Genetic Epidemiology (3) I&S/NW J. GOGARTEN

Explores basic approaches that are used to identify genetic and environmental factors in health and disease, and how application of this information can be used to improve population health. Discusses the relevant ethical, legal, and social implications that occur in research and translation to practice. Offered: W.

[View course details in MyPlan: PHG 301](#)

PHG 302 Forensic Genetics (3) I&S/NW, QSR B. WEIR

Introduces the field of forensic genetics through discussion of genetic and statistical issues emerging since the introduction of DNA profiling. Students develop the skills to interpret the evidence of matching genetic profiles; to perform calculations relevant for parentage determination; the identification of remains; and to consider the implications of familial searching of DNA databases. Prerequisite: either BIOST 310, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311, Q SCI 381, or Q METH 201. Offered: jointly with BIOST 302; W.

[View course details in MyPlan: PHG 302](#)

PHG 511 Genetic Epidemiology (3) B. WEIR

Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENOME 371, or equivalent. Offered: jointly with EPI 517.

[View course details in MyPlan: PHG 511](#)

PHG 512 Legal, Ethical, and Social Issues in Public Health Genetics (3)

Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts.

Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/LAW H 504¹⁰⁴³; A.
[View course details in MyPlan: PHG 512](#)

PHG 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) *K. THUMMEL*

Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PCEUT 513; W.

[View course details in MyPlan: PHG 513](#)

PHG 519 Statistical Methods in Genetic Epidemiology (3)

Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations.

Prerequisite: either BHOST 513 or BHOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BHOST 516/EPI 535.

[View course details in MyPlan: PHG 519](#)

PHG 521 Culture, Society, and Genomics (3) *B. MCGRATH*

Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/NURS 582; Sp.

[View course details in MyPlan: PHG 521](#)

PHG 523 Genetics and the Law (3)

Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: either LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with LAW H 520; Sp.

[View course details in MyPlan: PHG 523](#)

PHG 527 Social Science Research Methods (3) *D. BOWEN*

Introduces students to research methods in bioethics, ranging from qualitative to quantitative: interviews, focus groups, surveys, and experimental and observational designs. Students write research questions, match research methods to research questions, and conclude with a proposal that uses a social sciences empirical approach to address their research question. Offered: jointly with B H 527; Sp.

[View course details in MyPlan: PHG 527](#)

PHG 536 Bioinformatics and Gene Sequence Analysis (3) *T. ROSE*

Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536; Sp.

[View course details in MyPlan: PHG 536](#)

PHG 545 Biostatistical Methods for Big Omics Data (3)

This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BHOST 512, 514, or 517. Offered: jointly with BHOST 545/GENOME 545.

[View course details in MyPlan: PHG 545](#)

PHG 580 Interactive Seminar (1, max. 30) *B. WEIR*

Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Credit/no-credit only. Offered: jointly with LAW H 579; AWSp.

[View course details in MyPlan: PHG 580](#)

PHG 590 Selected Topics in Public Health Genetics (1-6, max. 6)

Tutorials are arranged for a small number of students for in-depth examination of an area of public health genetics, usually of a current nature.

[View course details in MyPlan: PHG 590](#)

PHG 595 Master's Practicum (1-12, max. 12)

Supervised practice experience providing students an opportunity to learn how genetics is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: practicum agreement.

[View course details in MyPlan: PHG 595](#)

PHG 600 Independent Study or Research (*-)

Credit/no-credit only.

[View course details in MyPlan: PHG 600](#)

PHG 700 Master's Thesis (*-)

Credit/no-credit only.

Quantitative Ecology and Resource Management

[Display as tabs](#)

Program Overview

The Quantitative Ecology and Resource Management (QERM) interdisciplinary graduate program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to develop or enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

(206) 616-9571
qerm@uw.edu
depts.washington.edu/qerm

The Quantitative Ecology and Resource Management (QERM) Interdisciplinary Graduate Program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to further enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, sociology, anthropology, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

Both a Master of Science and Doctor of Philosophy degree are offered; graduates are capable of continuing with the development and extension of biometrical and biomathematical modeling as they enter the educational, research, or private-sector work force.

Admission Requirements

1. Background in probability and mathematical statistics, linear algebra, and differential equations. Applicants with little or no statistical background are advised to take additional coursework prior to applying. Although not mandatory, this background makes a student's application more competitive.
2. Successful completion of the following coursework (or equivalent) prior to applying: MATH 126 (or equivalent); MATH 308 (or equivalent).
3. Strongly recommended: MATH 394-MATH 395; STAT 341-STAT 342, or STAT 481.
4. Also taken into consideration:
 - a. Minimum 3.00 GPA in last 60 semester or last 90 quarter credits required.
 - b. Normally, completion of college-level courses in probability and mathematical statistics, linear algebra, and differential equations.
 - c. Scores on Graduate Record Examination (GRE). Competitive applicants generally score above the 75th percentile on the verbal and analytic sections, and above the 85th percentile on the quantitative section.
 - d. Minimum TOEFL score of 580 (237 for computer-based tests) - for international students only.
 - e. Knowledge of the intended area of study, including clearly written statement of objectives.
 - f. Recommendations from persons familiar with the applicant's academic ability and potential.
 - g. Admission is also dependent on program resources and fit between student interests and faculty research. Students should explore faculty research interests by reviewing the QERM website, depts.washington.edu/qerm, to determine if their area of research interest is conducted at the UW. Students are not required to enter the QERM program with a faculty adviser selected in advance. Typically students identify their research and faculty adviser during their first year of study.
5. Application deadline for autumn quarter is January 1.

Degree Requirements (for Master of Science and Doctor of Philosophy)

Required coursework reflects the expectation that the student already has a fundamental understanding of the principles of statistical inference and ecological modeling. Required coursework taken during the first year includes:

1. STAT 516 and STAT 517
2. IND E 513 or IND E 599 (offered alternating years)
3. AMATH 523 or AMATH 535 (offered alternating years)
4. QERM 514 and QERM 597
5. SEFS 540
6. BIOL 567/SEFS 567/FISH 567
7. Ecology elective

Following the first year of core coursework, students select elective coursework in an area of emphasis ranging from biometry, mathematical modeling, and resource management. Additional elective coursework in basic biology and ecology gives students greater insight into the environmental systems in which they expect to apply their quantitative training.

Master of Science

Minimum 36 credits

Requirements for successful completion of the master of science degree include:

1. Successful completion of a minimum 36 quarter credits, including 27 course credits and 9 thesis credits, with at least 18 credits of coursework numbered 500 or above, including a thesis
2. Receipt of numerical grades in at least 18 quarter credits of coursework taken at the UW
3. Completion of a seminar on results of the research and oral defense of the thesis
4. Completion of all University requirements for graduation

Doctor of Philosophy

Minimum 90 credits

Requirements for successful completion of the doctoral degree, minimum of 90 credits, include:

1. Successful completion of the QERM qualifying examinations at the PhD level, following the first year of study
2. Successful completion of a minimum of 90-quarter credits, including 27 dissertation credits. Completion of an MS degree may be applied toward one year of the PhD program. The core QERM courses must be taken if the student has obtained an MS from a different program
3. A seminar on results of the research and an oral defense of the dissertation
4. Completion of all University requirements for graduation

Financial Aid

The QERM program offers incoming students a nine month fellowship funded by the Graduate School. Students secure their own funding starting at year two, typically in the form of a teaching or research assistantship. Tuition and health insurance are typically included as part of the financial package. Funding decisions are made annually; attempts are made to continue support for students making satisfactory progress.

Urban Design and Planning

[Display as tabs](#)

Program Overview

The PhD in Urban Design and Planning at the University of Washington is one of 39 PhD programs in urban and regional planning in North America, and one of the oldest, founded in 1967. This program brings together faculty from disciplines ranging from architecture to sociology to focus on the interdisciplinary study of urban problems and interventions. Covering scales from neighborhoods to metropolitan areas, the program addresses interrelationships between the physical environment, the built environment, and the social, economic, and political institutions and processes that shape urban areas. The breadth of this program permits students to pursue doctoral studies in the various aspects of urban design and planning as well as in a number of related social science, natural resource, and engineering areas.

The program seeks to prepare scholars who can advance the state of research, practice, and education related to the built environment and its relationship to society and nature in metropolitan regions throughout the world. It provides a strong interdisciplinary educational experience that draws on the resources of the entire University, and on the laboratory provided by the Seattle metropolitan region and the Pacific Northwest. The program emphasizes the educational values of interdisciplinarity, intellectual leadership and integrity, and the social values of equity, democracy, and sustainability. It seeks to promote deeper understanding of the ways in which public decisions shape and are shaped by the urban physical, social, economic, and natural environment. The program envisions its graduates becoming leaders in the international community of researchers, practitioners, and educators who focus on improving the quality of life and environment in metropolitan regions.

Doctor of Philosophy

Admission Requirements

Admission to the PhD program is based on evidence of promise of high scholarly achievement and research orientation. The applicant's statement of purpose, Graduate Record Examination (GRE) test results, letters of recommendation, and examples of past work constitute the basis for the admission evaluation.

Applicants typically have a master's degree in fields ranging from planning and public affairs to natural and social sciences. Students interested in a professional degree in urban design and planning should apply to the [master's program in urban design and planning](#).

Application Deadline: All application materials are due by February 1. International applicants are encouraged to submit the Graduate School on-line application form by November 1.

For more information, see the program's [website](#).

Degree Requirements

90 credits, divided into three phases.

Phase I: The Core Curriculum

The core curriculum defines the intellectual foundation of the program. While the program retains considerable flexibility in defining a research agenda within urban and environmental planning and policy, it provides a common foundation for all students to build upon. Students enter the program with a master's degree, in fields ranging from planning and public affairs to natural and social sciences. Depending on the academic preparation of the student, the core requirements can be met within one to two years.

Required Courses: Five courses, normally completed during the first year unless schedule conflicts make this infeasible. Courses from Phase II requirements may also be taken in the first year.

1. *Core Sequence:* URBDP 591, URBDP 592, URBDP 593
2. *Restricted Electives (before completion of Phase I):*
 - a. Qualitative Research Methods - one of the following: URBDP 598, GEOG 425, HIST 598, HSERV 526, POL S 493.
 - b. Quantitative Research Methods - one of the following: CS&SS 594, CS&SS 504, CEE 584

Phase II: Area of Study

Students develop with their Supervisory Committee a description of their proposed areas of study. These areas of scholarship must demonstrate an interdisciplinary research approach to an application within urban and environmental planning and policy. The description should develop a curriculum proposal approved by the Supervisory Committee that addresses the following advanced study requirements:

Curriculum Requirements: Seven courses and a teaching seminar, in addition to advanced courses directly related to the area of study selected by the student. Some courses may be taken in the first year.

1. Urban Processes and Patterns: Three courses – For course options, see program website at depts.washington.edu/urbdpphd/Phase_II.shtml
2. Research Design and Methods: Two courses – For course options, see program Website at depts.washington.edu/urbdpphd/Phase_II.shtml
3. Urban and Environmental Design and Planning: Two courses – For course options, see program Website at depts.washington.edu/urbdpphd/Phase_II.shtml

4. Teaching Methods: One teaching seminar and experience as a TA for at least one quarter, before completion of Phase III.

General Examination: A critical review of the literature in the area of study, developed by the student, which integrates interdisciplinary research on that area of study and identifies areas of potential research opportunity that may subsequently form the basis for a dissertation proposal. The review should demonstrate broad familiarity with relevant research in the chosen area, and with the range of theory and methods applied within the reviewed literature.

Phase III: Dissertation

Once the student passes the general examination, he or she is advanced to the level of doctoral candidate, and is expected to build on the critical review of the literature to develop a dissertation proposal. The dissertation proposal should demonstrate the characteristics of interdisciplinarity, relevance to urban and environmental planning and policy, and potential for contribution to scholarship.

Financial Aid

The interdisciplinary PhD program in Urban Design and Planning attempts to provide funding for doctoral program applicants in a way that makes the program attractive to the strongest potential applicants, ensures their effective mentoring while in the program, and actively engages and energizes faculty to improve the program and to bring research funding to support students.

Bioengineering

[Display as tabs](#)

Department Overview

N107 William H. Foege Building

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the healthcare system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as a leading bioengineering program in the world. Major areas of research and education include biomaterials and regenerative medicine, molecular and cellular engineering, technology for expanding access to healthcare, instrumentation, imaging and image-guided therapy, and systems, synthetic, and quantitative biology.

Undergraduate Program

Adviser

N107 William H. Foege Building, Box 355061
(206) 685-2000

bioeng@uw.edu

depts.washington.edu/bioe/programs/bachelors/bs.html

The Bioengineering program offers the following programs of study:

- The Bachelor of Science in Bioengineering degree
- The Bachelor of Science in Bioengineering degree with an option in nanoscience and molecular engineering
- A five-year BS/MS option (consult website or adviser for details)

Bachelor of Science in Bioengineering

Suggested First- and Second-Year College Courses: CHEM 142, CHEM 152, and CHEM 162; CSE 142, English composition, MATH 124, MATH 125, MATH 126, PHYS 121.

Department Admission Requirements

Admission is competitive. Students may be admitted at three different points. Consult the department's website for more information.

1. *Direct Admission.* The department enrolls up to 35 percent of its incoming class directly from high school. Students accepted to the UW who indicate bioengineering as their preferred major on their freshman application are considered. Strong applicants have completed chemistry, biology, and calculus in high school. Admission is for autumn quarter only.
2. *Early Admission.* Students enrolled at the UW are eligible to apply at the end of the freshman year if they have completed and earned at least a 2.50 GPA in the following courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; and 5 credits of English composition. A 2.50 GPA guarantees consideration but not admission. Application deadline is July 1 for autumn quarter admission.
3. *Upper Admission.* Requires 63 credits of coursework with at least a 2.50 GPA: MATH 124, MATH 125, and MATH 126; CHEM 142, CHEM 152, CHEM 162; CHEM 223 or CHEM 237; PHYS 121, PHYS 122; BIOL 180, BIOL 200; AMATH 301; and 5 credits of English composition. Any of BIOL 180, PHYS 122, and AMATH 301 may be in progress at time of application. A 2.50 GPA guarantees consideration but not admission. Application deadline is February 1 for spring quarter. Consult the department's website or adviser for more details.

Nanoscience and Molecular Engineering Option (NME): Admission to the NME option for bioengineering majors is by self-selection and normally occurs in winter quarter of the junior year, upon completion of all bioengineering prerequisites and formal admission to the BS bioengineering major. Students applying for the NME option should indicate that interest on their bioengineering major application and discuss their interests/background in their application personal statement.

Graduation Requirements

Students follow requirements in effect at time of entry into the department. 180 credits as follows:

General Education Requirements (105 credits):

1. *Areas of Knowledge:* 24 total credits in Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S), with at least 10 credits in each area.
2. *Written and Oral Communication (5 credits):* 5 credits of English composition, from the approved University list. Additional writing credits are built into the major core courses.
3. *Mathematics (24 credits):* MATH 124, MATH 125, MATH 126; either MATH 307 or AMATH 351; either MATH 308 or AMATH 352; STAT 390 or IND E 315
4. *Natural Science (44 credits):* CHEM 142, CHEM 152, CHEM 162 and CHEM 223 (or CHEM 237); PHYS 121, PHYS 122; BIOL 180, BIOL 200, BIOL 220
5. *General Electives (8 credits); (6 credits for the NME option)*

Major Requirements (75 credits):

1. *Engineering Fundamentals (4 credits):* AMATH 301
2. *Bioengineering Core (47 credits):* BIOEN 215, BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 401; either 10 credits of BIOEN 402, or 4 credits of BIOEN 403 plus BIOEN 404 and BIOEN 405.

3. *Bioengineering Senior Electives (15 credits)*: Fifteen (15) credits from an approved departmental list, including completion of one of three concentration areas:
Molecular and Materials Bioengineering: four courses from approved departmental concentration list. *Cells, Tissue, and Systems Bioengineering*: four courses from approved departmental concentration list. *Diagnostics and Therapeutic Instruments*: PHYS 123; four courses from approved departmental concentration list. See department for approved list.
4. *Approved Engineering Electives (9 credits)*: Chosen from a departmentally approved list or from additional bioengineering senior elective credit. See department for approved list.
5. *Grade Requirements*: Minimum 2.0 grade in each bioengineering course applied to the major

Nanoscience and Molecular Engineering Option Requirements (77 credits):

1. *Engineering Fundamentals (4 credits)*: AMATH 301
2. *Bioengineering Core (47 credits)*: BIOEN 215, BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 401; either 10 credits of BIOEN 402 or 4 credits of BIOEN 403 plus BIOEN 404 and BIOEN 405
3. *Nanoscience and Molecular Engineering Courses (21 credits)*: NME 220, NME 321, NME 421; minimum four additional approved nanoscience and molecular engineering electives, to be chosen from an approved departmental list; additional senior elective credits as needed to total 15. The senior capstone (4-10 credits from BIOEN 402 or BIOEN 403) must be in an NME area.
4. *Approved Engineering Electives*: 5 credits
5. Minimum 2.0 grade in each bioengineering course applied to the major

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Bioengineering students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials. A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department's cutting-edge research. Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department's goal is to prepare students to be leaders and innovators in improving human health and healthcare. Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and

biology; the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interactions between living and non-living materials and systems.

- *Instructional and Research Facilities:* The department is housed in the newly constructed Foege North building. Amenities include instructional laboratories, an advanced computing lab for class instruction and student use, a general computer lab for student use, a student work room, a seminar room, and meeting space. Departmental offices are also located in this building. Other laboratories are located in the College of Engineering and the School of Medicine. The Department of Bioengineering houses UWEB (University of Washington Engineered Biomaterials), participates in the Center for Nanotechnology, and sponsors many other research centers relating to our five thrust areas in computational bioengineering, distributed diagnosis and home healthcare, engineered biomaterials, medical imaging and image-guided therapy, and molecular bioengineering and nanotechnology.
- *Honors Options Available:* College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). Departmental Honors (see adviser for requirements). For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* Many undergraduate bioengineers are involved in internships. The department participates in the College of Engineering Co-op Program and maintains an internship website for majors.
- *Department Scholarships:* Several scholarships are available for majors.
- *Student Organizations/Associations:* The Biomedical Engineering Society (BMES), the campus chapter of the national professional organization, organizes social events as well as events that support student interest in medical school, graduate school, and industry.

Of Special Note: Courses on technology commercialization are available to seniors.

Graduate Program

Graduate Program Coordinator
N107 William H. Foege Building, Box 355061
(206) 685-2000
bioeng@uw.edu

The Department of Bioengineering offers programs of study which lead to the Master of Science (MS), the Master of Pharmaceutical Bioengineering (PHARBE), and Doctor of Philosophy (PhD) degrees.

Master of Science

The Master of Science degree program provides breadth of knowledge of engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree prepares students for careers in academic, industrial, or hospital environments.

Admission Requirements

All application materials must be received in the appropriate office by the deadline. International applications are due by December 1; domestic applications are due by

December 15. Late and/or incomplete applications are not reviewed. Required application items include:

1. Online application: www.grad.washington.edu/applForAdmiss.
2. Department of Bioengineering Admission Form
3. Statement of Purpose
4. Resume/Curriculum Vitae
5. Three letters of recommendation
6. Unofficial transcripts only (official transcripts are requested once an offer has been made)
7. Official GRE scores (sent to code 4854, and must be sent before the deadline)
8. Official TOEFL scores (from international applicants only, and must be received before the deadline)

More information about the application is online at depts.washington.edu/bioe/education/prospective/educ_prospective.html. Materials sent in addition to those listed above are considered non-essential and do not enhance the application.

Applicants are expected to have the following courses as part of their undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, rate processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the MS program.

Degree Requirements

Course requirements for the MS in Bioengineering are detailed below. All core and elective courses must be taken for a numerical grade. Students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

Note: A single course may not count for two separate requirements.

36 credits as follows:

1. Molecular Bioengineering: BIOEN 501
2. Cellular Bioengineering: BIOEN 502
3. Systems Bioengineering: BIOEN 503
4. Biostatistics
5. Bioengineering seminar: BIOEN 510
6. Bioengineering elective courses, chosen in consultation with faculty adviser: 10 credits
7. Master's thesis: BIOEN 700

Master of Pharmaceutical Bioengineering

The Master of Pharmaceutical Bioengineering (PHARBE) program is an evening degree program designed to enable working local engineers, scientists, researchers, and

professionals in the biotechnology, pharmaceutical, and related industries to explore advanced education in the areas of molecular and cellular biology, drug discovery and design, pharmaceuticals, and translational pharmaceuticals. Professionals may also complete three certificate programs without applying for degree status.

Admission Requirements

1. BS degree or equivalent in a relevant science (field/research), public health (biomedical related) or engineering (field/research) related, or a BS degree or equivalent in unrelated field and two years' experience working within a scientific or engineering group for a biotechnology or pharmaceutical company or related industry. Clinical degrees are considered.
2. Applicants who have a bachelor's degree other than a BS, professional experience, and completed recommended prerequisite course work are also considered for admission.
3. Minimum 3.00 GPA in the last 90 quarter credit hours (60 semester credit hours). Students who have a BA/BS degree with under a 3.00 GPA and have two years' work experience may be approved for graduate non-matriculated (GNM) status for basic biosciences. Students who receive a 3.0 or above in their basic biosciences courses under GNM status are considered for degree admissions.
4. Official GRE scores
5. One set of official (unopened) transcripts from each non-UW institution attended
6. *Prerequisite Course Requirements:* The following courses must be completed with a minimum 2.0 in each course before applying to the degree program. Students whose undergraduate degree majors are in engineering, biology, chemistry or pharmacy are exempt from the prerequisite course requirement.
 - a. *Calculus:* Minimum one quarter (or one semester) of college calculus
 - b. *Chemistry:* Minimum two quarters (one semester) of college general chemistry Additional course in organic chemistry recommended.
 - c. *Biology:* Minimum one quarter (semester) of general biology
 - d. *Physics:* one quarter (PHYS 114).
7. Applicants are evaluated on professional experience, previous degrees earned, or most recent/undergraduate GPA, basic biosciences courses GPA (if applicable), letters of recommendation, statement of intent, and GRE test scores. Admission to the program is not guaranteed.
8. Applicants who do not qualify for admission to the PHARBE degree program may be admitted to courses and/or to Pharmaceutical Bioengineering Certificate programs.
9. *English Proficiency:* Students who are non-native English speakers are expected to have adequate English language proficiency. The Graduate School requires a TOEFL score of at least 580, unless applicants are citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or hold a bachelor's or advanced degree from an accredited institution in any of these countries.

Degree Requirements

Minimum 40 credits, with a minimum 3.00 cumulative GPA, as follows:

1. *Basic Biosciences Curriculum (20 credits)*: Molecular and Cellular Biology I, Molecular and Cellular Biology II, Pharmaceutics I, Pharmaceutics II, Statistics and Experimental Design
2. *Advanced Tracks*: 16 credits from one of two advanced tracks in translational pharmaceutics or drug discovery and design. Students must complete 20 credits of the basic biosciences core courses before enrolling in advanced track courses.
 - a. *Translational Pharmaceutics (16 Credits)*: Preclinical Development, Process Development, Formulation and Delivery, Clinical Development
 - b. *Drug Discovery and Design (16 Credits)*: Molecular Biotechnology, Drug Discovery & Design, Molecular Targets & Drug Classes, Systems Biology and Bioinformatics
3. Departmental Seminar (4 Credits)
4. *Optional Capstone Project*: Students have the option of completing a professional capstone project in either the drug discovery and design or Process development courses.

Doctor of Philosophy

The objective of the PhD program is to train individuals for careers in bioengineering research and teaching. The program has three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the PhD program does not require prior completion of the MS degree and may be made directly after the BS. An optional dual PhD degree in bioengineering and nanotechnology is available; see www.nano.washington.edu for more information.

Admission Requirements

See the application process detailed in the MS section.

While it is not required to complete an MS degree before beginning the PhD, every graduate student is expected to have the following courses as part of her or his undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the PhD program.

Degree Requirements

90 credits, to include:

Students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

All core and elective courses must be taken for a numerical grade. A single course may not count for two separate requirements. Required courses include:

1. Molecular Bioengineering: BIOEN 501
2. Cellular Bioengineering: BIOEN 502
3. Systems Bioengineering: BIOEN 503
4. Biostatistics
5. Bioengineering seminar: BIOEN 510
6. 16 credits of bioengineering elective courses, chosen in consultation with faculty adviser
7. 27 credits of dissertation writing (BIOEN 800)

Ordinarily, a student progressing well follows this schedule:

1. First Year: Complete one to three lab rotations and select a thesis adviser no later than the end of spring quarter.
2. Second Year: Pass the qualifying examination and form a Supervisory Committee by the end of that year.
3. Third Year: Pass the general examination.
4. Fourth Year (and subsequent years): Make an annual progress report to, and receive feedback from, the Supervisory Committee.
5. Fifth Year: Defend the dissertation.

Medical Scientist Program

A Medical Scientist Training Program (MSTP) exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the MD and PhD degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at (206) 685-0762.

Research Facilities

As the department is established within the College of Engineering and the School of Medicine, bioengineering students have access to all engineering and health science departments and facilities. A wide range of technologies and virtually all aspects of biomedical research tools are available.

Financial Support

Financial support is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the adviser.

INTERSCHOOL OR INTERCOLLEGE PROGRAMS

BIOENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

BIOEN 215 Introduction to Bioengineering Problem Solving (3) D. HENDRICKS, A. TAYLOR AMOS

Introduces bioengineering through a problem solving approach. Topics include: creative problem solving techniques, self-directed inquiry, engineering ethics, social constraints, and engineering design process.

[View course details in MyPlan: BIOEN 215](#)

BIOEN 290 Guided Independent Studies on Transformative Science (4) NW G. POLLACK

Intensive laboratory experience mixed with lectures, readings, and discussions aimed at achieving deep understanding of scientific approach, particularly the nature of paradigm shifts, role of governmental support and management of science, power of orthodoxy, role of challenger, and fate of unpopular scientific views.

Offered: W.

[View course details in MyPlan: BIOEN 290](#)

BIOEN 299 Introduction to Bioengineering (1) G. POLLACK

Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no-credit only. Offered: ASp.

[View course details in MyPlan: BIOEN 299](#)

BIOEN 315 Biochemical Molecular Engineering (3) D. RATNER

Introduces the requisite organic, physical, and biochemistry for incoming bioengineers to understand biological systems at the molecular level. Prerequisite: CHEM 223, CHEM 237 or CHEM 335; BIOL 200, which may be taken concurrently. Offered: Sp.

[View course details in MyPlan: BIOEN 315](#)

BIOEN 316 Biomedical Signals and Sensors (4) C. NEILS

Introduces the sources, detection, and processing of signals in medical instrumentation. Includes analog and digital signal processing in the time and frequency domains. Emphasizes component strengths and limitations, to develop systems that improve safety, accuracy, and reliability. Prerequisite: AMATH 301 and PHYS 122; BIOEN 317, which must be taken concurrently; either MATH 307 or AMATH 351, which may be taken concurrently. Offered: Sp.

[View course details in MyPlan: BIOEN 316](#)

BIOEN 317 Biomedical Signals and Sensors Laboratory (2) *F. CURRA*

Uses computational and experimental projects covering methods to acquire, process, and analyze signals from physiological and biochemical origins. Co-requisite: BIOEN 315 and BIOEN 316. Offered: Sp.

[View course details in MyPlan: BIOEN 317](#)

BIOEN 325 Biotransport I (4) *Y. ZHENG*

Introduces momentum and heat transport in medical and biological systems. Examines how differential and control-volume analyses produce ordinary and partial differential equations; develops analytical and computational solution methods. Prerequisite: AMATH 301; either MATH 136, MATH 307, or AMATH 351; PHYS 122. Offered: Sp.

[View course details in MyPlan: BIOEN 325](#)

BIOEN 326 Solid and Gel Mechanics (4) *W. THOMAS*

Introduces solid mechanics and interactions of biological structures and medical materials. Emphasizes the relationships between composition, structure, properties, and performance of metals and ceramics, synthetic and natural macromolecules, cells, tissues, and self assembling systems. Prerequisite: either CHEM 162, CHEM 164, or CHEM 165; PHYS 122; minimum grade of 2.0 in BIOEN 315. Offered: A.

[View course details in MyPlan: BIOEN 326](#)

BIOEN 327 Fluids and Materials Laboratory (2) *C. NEILS*

Practical exploration of the behavior of fluids and soft materials that occur in biological systems and biomedical devices; and the interaction between cells and their environment. Includes methods of measurement, analysis, and design. Co-requisite: BIOEN 325 and BIOEN 326. Offered: A.

[View course details in MyPlan: BIOEN 327](#)

BIOEN 335 Biotransport II (3) *J. BRYERS*

Studies the principles of combined mass transport in homogeneous and heterogeneous reaction systems as applied to biological processes. Introduces chemical and biochemical reaction kinetics, methods of evaluating kinetic parameters for reaction rate data, and prediction of the performance of biological and biochemical processes. Prerequisite: minimum grade of 2.0 in BIOEN 325. Offered: W.

[View course details in MyPlan: BIOEN 335](#)

BIOEN 336 Bioengineering Systems and Control (3) *H. SAURO*

Reviews linear and nonlinear systems analysis and control system design and biological and medical applications. Prerequisite: minimum grade of 2.0 in BIOEN 327; either MATH 136, MATH 308, or AMATH 352. Offered: W.

[View course details in MyPlan: BIOEN 336](#)

BIOEN 337 Mass Transport and Systems Laboratory (2) *A. TAYLOR AMOS*

Uses computational and experimental laboratory exercises to demonstrate time- and space-dependent linear and nonlinear systems with specific emphasis on bioengineering application. Prerequisite: BIOEN 327; BIOEN 335 and BIOEN 336, which must be taken concurrently; either MATH 390, STAT 390, or IND E 315, which may be taken concurrently. Offered: W.

[View course details in MyPlan: BIOEN 337](#)

BIOEN 345 Failure Analysis and Human Physiology (4) *S. PUN, M. REGNIER, Y. ZHENG*

Applies engineering analysis to understand human physiology of the engineering of solutions to medical and biological problems. Includes laboratory. Prerequisite: BIOL 220; minimum grade of 2.0 in each of BIOEN 215, BIOEN 335, BIOEN 336, and BIOEN 337. Offered: Sp.

[View course details in MyPlan: BIOEN 345](#)

BIOEN 400 Fundamentals of Bioengineering Design (3)

Preparatory project-based course that develops understanding of the engineering design process and incorporates modern tools and methodologies for developing innovative health technologies. Prerequisite: BIOEN 337;

STAT/MATH 390 or IND E 315; BIOL 180, 200, 220; PHYS 121, 122 Offered: Sp.

[View course details in MyPlan: BIOEN 400](#)

BIOEN 401 Bioengineering Capstone Principles (3) *K. WOODROW*

Teaches design principles in bioengineering and guides the development of design and research-based senior capstone projects. Prerequisite: either MATH 390, STAT 390, or IND E 315. Offered: Sp.

[View course details in MyPlan: BIOEN 401](#)

BIOEN 402 Bioengineering Capstone Research and Design ([2-6]-, max. 10)

Independent senior design project. Prerequisite: BIOEN 401. Offered: AWSpS.

[View course details in MyPlan: BIOEN 402](#)

BIOEN 403 Bioengineering Capstone Research (2-, max. 4)

Independent senior research project. Prerequisite: BIOEN 401. Offered: AW.

[View course details in MyPlan: BIOEN 403](#)

BIOEN 404 Bioengineering Team Design I (3) *C. NEILS*

First course in team design project course sequence. Prerequisite: BIOEN 401. Offered: W.

[View course details in MyPlan: BIOEN 404](#)

BIOEN 405 Bioengineering Team Design II (3) *A. TAYLOR AMOS*

Second course in team design project course sequence. Prerequisite: BIOEN 404. Offered: Sp.

[View course details in MyPlan: BIOEN 405](#)

BIOEN 410 Bioengineering Honors Seminar (1) *D. HENDRICKS*

Service-learning for departmental honors students. Credit/no-credit only. Offered: A.

[View course details in MyPlan: BIOEN 410](#)

BIOEN 420 Medical Imaging (4) *C. YUAN*

Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT optical imaging, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOEN 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization.

Prerequisite: either BIOEN 316 or E E 235; either MATH 136, MATH 308, or AMATH 352; either CSE 142 or AMATH 301.

[View course details in MyPlan: BIOEN 420](#)

BIOEN 423 Introduction to Synthetic Biology (3)

Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with CSE 486/E E 423; A.

[View course details in MyPlan: BIOEN 423](#)

BIOEN 424 Advanced Systems and Synthetic Biology (3)

Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology.

Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with CSE 487/E E 424; W.

[View course details in MyPlan: BIOEN 424](#)

BIOEN 425 Laboratory Methods in Synthetic Biology (4)

Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy.

Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered:

jointly with CSE 488/E E 425; W.

[View course details in MyPlan: BIOEN 425](#)

BIOEN 440 Introduction to Biomechanics (4) *J. SANDERS*

Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with M E 445; Sp.

[View course details in MyPlan: BIOEN 440](#)

BIOEN 447 Fundamentals of Magnetic Resonance and Ultrasound Imaging (4) *M. AVERKIOU*

Principles and uses of biomedical imaging with magnetic resonance imaging (MRI) and ultrasound are presented from an engineering viewpoint. Topics include the physics of Mri and ultrasound, principles of image formation, clinical applications, and the technology supporting important modes of modern imaging equipment. Prerequisite: BIOEN 316 or BIOEN 317. Offered: W.

[View course details in MyPlan: BIOEN 447](#)

BIOEN 449 Therapeutic and Diagnostic Ultrasound (4) *M. AVERKIOU*

Fundamentals of ultrasound leading to real-time ultrasound imaging; sound beams and signals, transducers, arrays and array beamforming; ultrasound interaction with tissue; Doppler and Color-flow; nonlinear imaging and contrast agents. Ultrasound bioeffects and therapeutic ultrasound: thermal therapies, HIFU, hyperthermia and BIO heat equation; cavitation, lithotripsy; drug delivery. Elastography, photoacoustic imaging. Prerequisite: BIOEN 316 or BIOEN 317. Offered: Sp.

[View course details in MyPlan: BIOEN 449](#)

BIOEN 455 BioMEMS (4) *A. FOLCH*

Introduction to BioMEMS. State-of-the-art techniques in patterning biomolecules, machining three-dimensional microstructures and building microfluidic devices. Various biomedical problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Biweekly labs. Prerequisite: BIOEN 316. Offered: W.

[View course details in MyPlan: BIOEN 455](#)

BIOEN 457 Advanced Molecular Bioengineering (4) *P. STAYTON*

Fundamentals of molecular recognition: thermodynamics, forces, kinetics. Manipulation of recognition processes for current molecular bioengineering research and development. Fundamental physical chemistry of molecular recognition in the context of biomedicine. Therapeutics based on cells. Prerequisite: either BIOEN 315 and BIOEN 335. Offered: A.

[View course details in MyPlan: BIOEN 457](#)

BIOEN 460 Neural Engineering (3) *L. JOHNSON DYHR*

Introduces the field of Neural Engineering: overview of neurobiology, recording and stimulating the nervous system, signal processing, machine learning, powering and communicating with neural devices, invasive and non-invasive brain-machine interfaces, spinal interfaces, smart prostheses, deep-brain stimulators, cochlear implants and neuroethics. Heavy emphasis on primary literature. Prerequisite: BIO 162 or BIO 220 and one of the following: MATH 308, AMATH 352 or AMATH 301. Offered: A.

[View course details in MyPlan: BIOEN 460](#)

BIOEN 461 Neural Engineering Tech Studio (4) *L. JOHNSON DYHR*

Neural engineering design and translational engineering. Groups design, build and present a neural engineering prototype project to a panel of industry judges. Prerequisite: BIOEN 460. Offered: W.

[View course details in MyPlan: BIOEN 461](#)

BIOEN 466 Neural Computation and Engineering Laboratory (3) *NW L. JOHNSON DYHR*

Introduces neural recording and quantitative analysis techniques to students with a background in quantitative methods. Prerequisite: AMATH 345 or BIOL 162 or BIOL 220 and one of the following: MATH 308, AMATH

352 or AMATH 301 Offered: jointly with NBIO 405.

[View course details in MyPlan: BIOEN 466](#)

BIOEN 467 Biochemical Engineering (3) *F. BANEYX*

Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with CHEM E 467; W.

[View course details in MyPlan: BIOEN 467](#)

BIOEN 474 Immunoengineering (3) *K. WOODROW*

Covers cell and tissues of immune system; lymphocyte activation and specificity; cell biology of antigen processing and preservation; and effector mechanisms. Includes discussion of concepts in theoretical immunology used to describe viral dynamics and the dynamics of immune responses. Students present case studies in the pathogenesis of immunologically mediated diseases.

[View course details in MyPlan: BIOEN 474](#)

BIOEN 485 Computational Bioengineering (4) *W. THOMAS*

Introduction to computational and mathematical analysis of biological systems, including control, stochastic, and transport systems. Lectures and laboratory sessions emphasize biochemical systems, but also include electrical, mechanical, and fluidic systems. Prerequisite: BIOEN 335; either AMATH 351 or MATH 307. Offered: Sp.

[View course details in MyPlan: BIOEN 485](#)

BIOEN 486 Tissue Engineering (3) *D. KIM*

Tissue structure and function, scaffold design, applications to specialized tissues and organs. Prerequisite: BIOEN 315. Offered: A.

[View course details in MyPlan: BIOEN 486](#)

BIOEN 487 Bioengineering and Nanotechnology (4) *X. GAO*

Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine. Prerequisite: CHEM 142, CHEM 144, or CHEM 145; BIOL 180.

[View course details in MyPlan: BIOEN 487](#)

BIOEN 488 Computational Protein Design (4) *V. DAGGETT*

Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems. Prerequisite: BIOEN 315.

[View course details in MyPlan: BIOEN 488](#)

BIOEN 490 Engineering Materials for Biomedical Applications (3)

Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; A.

[View course details in MyPlan: BIOEN 490](#)

BIOEN 491 Controlled-Release Systems (3) *S. PUN*

Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral, and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; W.

[View course details in MyPlan: BIOEN 491](#)

BIOEN 492 Surface Analysis (3) *B. RATNER*

Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger): ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 458; Sp.

[View course details in MyPlan: BIOEN 492](#)

BIOEN 493 Advanced Surface Analysis (3) *D. CASTNER*

Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 458 or BIOEN 492. Offered: jointly with CHEM E 493; W.

[View course details in MyPlan: BIOEN 493](#)

BIOEN 494 Advanced Drug Delivery (3) *S. PUN*

Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Prerequisite: BIOEN 491. Offered: Sp.

[View course details in MyPlan: BIOEN 494](#)

BIOEN 497 Bioengineering Education Outreach (1-2, max. 6)

Work with K-12 schools or community organizations. Current science education research and instructional techniques. May involve presentations or instruction in hands-on activities. Credit/no-credit only.

[View course details in MyPlan: BIOEN 497](#)

BIOEN 498 Special Topics (1-6, max. 15)

Topics of current interest in the field, offered as lectures, conferences, or laboratory. Offered: AWSpS.

[View course details in MyPlan: BIOEN 498](#)

BIOEN 499 Special Projects (1-6, max. 24)

Individual undergraduate bioengineering projects (research or independent study) under the supervision of an instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: BIOEN 499](#)

BIOEN 501 Molecular Bioengineering (4)

Examines advanced topics in molecular diffusion, reaction kinetics, and convective transport modeling as applied to biological systems. Includes mathematical analysis and numerical simulation techniques applied to: Non-Fickian diffusion, rotational versus translational diffusion, immobilized enzyme kinetics, drug release, and gene delivery. Offered: A.

[View course details in MyPlan: BIOEN 501](#)

BIOEN 502 Cellular Bioengineering (4)

Covers basic principles of cell biology (including cell structure, function, and signaling), recombinant RNA/DNA technology, and specific examples of cellular bioengineering applications including gene delivery, RNA silencing, and tissue engineering. Prerequisite: BIOEN 501. Offered: W.

[View course details in MyPlan: BIOEN 502](#)

BIOEN 503 Systems Bioengineering (4)

Explores whole-body or organ physiology topics from an engineering perspective. Uses various model systems to elucidate engineering principles such as feedback control and homeostatic regulation. Includes real-world examples, computer modeling, and research design approaches. Prerequisite: BIOEN 502. Offered: Sp.

[View course details in MyPlan: BIOEN 503](#)

BIOEN 504 Introduction to Technology Commercialization (4) *M. O'DONNELL, B. RATNER*

Explores essential business, legal, engineering, and other skills necessary to take new technology from research

to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing.

[View course details in MyPlan: BIOEN 504](#)

BIOEN 505 Biomedical Entrepreneurship (4)

Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing; introduces strategic planning, management of commercialization effort.

[View course details in MyPlan: BIOEN 505](#)

BIOEN 506 Applying Technology Commercialization (1)

Focuses knowledge of entrepreneurship within the spaces of medical devices, hardware/software, and energy, into a practical description of a potential start-up company. Corequisite: ENTRE 540. Credit/no-credit only.

[View course details in MyPlan: BIOEN 506](#)

BIOEN 509 Bioengineering Departmental Seminar (1, max. 16)

Research review and discussions centered on demonstrating approaches and solving scientific problems.

Seminar lectures led by faculty and visiting faculty in Bioengineering and related disciplines. Credit/no-credit only. Offered: WSp.

[View course details in MyPlan: BIOEN 509](#)

BIOEN 511 Biomaterials Seminar (1, max. 18) *D. CASTNER, L. GAMBLE*

Presentation of student research results. Prerequisite: permission of instructor. Credit/no-credit only. Offered: jointly with CHEM E 511.

[View course details in MyPlan: BIOEN 511](#)

BIOEN 513 Current Topics in Cardiac Physiology (1, max. 3) *M. REGNIER*

Current research in cardiac physiology. Student presentation and discussions of current research methodologies. Credit/no-credit only.

[View course details in MyPlan: BIOEN 513](#)

BIOEN 516 Medical Imaging Seminar (1)

Weekly seminars, presented by UW faculty members, researchers and graduate students from UW, other academic institutions, and industry, on image computing and medical imaging. Topics include digital video, image processing, computer graphics, video/image compression, image analysis, algorithms and systems, pattern recognition, multimedia computer architectures, and other applications. Credit/no-credit only.

[View course details in MyPlan: BIOEN 516](#)

BIOEN 518 Healthcare Transformation: Forces, Directions, Implications (2) *L. HUNTSMAN*

Introduces the history, current realities and forces driving change in healthcare and provides an opportunity to use this knowledge to evaluate contemporary attempts to innovate. Addresses implications for those involved in the science, technology, business and policy of medicine. Offered: W.

[View course details in MyPlan: BIOEN 518](#)

BIOEN 520 Musculoskeletal Biomechanics (4) *R. CHING*

Engineering principles and mechanics applied to the musculoskeletal system including structure-function property relationships of musculoskeletal tissues, the biomechanics of joint systems, and applications of biomechanics in industry and research. Offered: jointly with M E 527; W.

[View course details in MyPlan: BIOEN 520](#)

BIOEN 522 Biomechanics of Soft Tissue (3) *J. SANDERS*

Applies soft tissue biomechanics to medical research. Develops specific biomechanical questions and experiments to address those aims or hypotheses.

[View course details in MyPlan: BIOEN 522](#)

BIOEN 523 Introduction to Synthetic Biology (3)

Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 311 and MATH 308 or AMATH 352. Offered: jointly with CSE 586/E E 523/MOLENG 525.

[View course details in MyPlan: BIOEN 523](#)

BIOEN 524 Advanced Systems and Synthetic Biology (3)

Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology.

Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with CSE 587/E E 524; W.

[View course details in MyPlan: BIOEN 524](#)

BIOEN 530 Bioengineering Professional Series I: Literature Analysis (2) *V. DAGGETT*

Skills in scientific literature analysis developed through topics in bioengineering. Credit/no-credit only. Offered: A.

[View course details in MyPlan: BIOEN 530](#)

BIOEN 531 Bioengineering Professional Series II: Proposal Writing (2) *M. SCATENA*

Covers grant and fellowship proposal writing. Offered: W.

[View course details in MyPlan: BIOEN 531](#)

BIOEN 532 Bioengineering Professional Series III: Professional Skills Development (1) *C. GIACHELLI*

Key areas of professional development related to the bioengineering field, including oral communication, management, networking, and interviewing. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: BIOEN 532](#)

BIOEN 540 Bioengineering Clinical Practicum (4)

Clinical needs identification for the Master of Applied Bioengineering. Students observe diagnosis and treatment in a clinical setting to learn current practice, drivers, and constraints. Students learn to identify and communicate clinical needs not met by current technology, but with potential bioengineering design solutions. Addresses ethics, patient privacy, and medical/academic communication.

[View course details in MyPlan: BIOEN 540](#)

BIOEN 541 Design Skills I: Clinical Needs Evaluation (4)

First quarter of Design Skills sequence in Master of Applied Bioengineering. Student teams initiate design process through needs evaluation, market analysis, prior art research, identification of design specifications, and brainstorming of design concepts. Prerequisite: BIOEN 540. Offered: A.

[View course details in MyPlan: BIOEN 541](#)

BIOEN 542 Design Skills II: Clinical Needs Evaluation (4)

Second quarter of Design Skills sequence. Students conceive, evaluate, and present design options to potential clinical users, utilize feedback to revise design concepts, and prepare a formal design proposal. Prerequisite: BIOEN 541 Offered: W.

[View course details in MyPlan: BIOEN 542](#)

BIOEN 543 Design Skills III: Project Implementation (4) *M. BLANK*

Culmination of the three-quarter Design Skills sequence in the Master of Applied Bioengineering. Students create and test a proof-of-principle deliverables for the device or system proposed in the previous quarter, and prepare a formal business plan. Prerequisite: BIOEN 542. Offered: Sp.

[View course details in MyPlan: BIOEN 543](#)

BIOEN 547 Fundamentals of Magnetic Resonance and Ultrasound Imaging (4) *M. AVERKIOU*

Principles and uses of biomedical imaging with magnetic resonance imaging (MRI) and ultrasound are

presented from an engineering viewpoint. Topics include the physics of Mri and ultrasound, principles of image formation, clinical applications, and the technology supporting important modes of modern imaging equipment. Prerequisite: BIOEN 316 or BIOEN 317. Offered: W.

[View course details in MyPlan: BIOEN 547](#)

BIOEN 549 Therapeutic and Diagnostic Ultrasound (4) *M. AVERKIOU*

Fundamentals of ultrasound leading to real-time ultrasound imaging; sound beams and signals, transducers, arrays and array beamforming; ultrasound interaction with tissue; Doppler and Color-flow; nonlinear imaging and contrast agents. Ultrasound bioeffects and therapeutic ultrasound: thermal therapies, HIFU, hyperthermia and BIO heat equation; cavitation, lithotripsy; drug delivery. Elastography, photoacoustic imaging. Prerequisite: BIOEN 316 or BIOEN 317. Offered: Sp.

[View course details in MyPlan: BIOEN 549](#)

BIOEN 552 Microfabrication and Microfluidics (3) *A. FOLCH, P. YAGER*

Studies the use of 2- and 3-dimensional structures in research and biomaterials, cells, and complex liquids. Focuses on micropatterning of surfaces and microfluidic chemical analytical systems. Co-requisite: BIOEN 553.

[View course details in MyPlan: BIOEN 552](#)

BIOEN 553 Microfabrication and Microfluidics Laboratory (2) *A. FOLCH, P. YAGER*

Studies the creation of 2- and 3-dimensional structures for use in research with biomaterials, cells, and complex liquids. Each student will fabricate at least one PDMS device and demonstrate its function. Co-requisite: BIOEN 552. Credit/no-credit only.

[View course details in MyPlan: BIOEN 553](#)

BIOEN 555 Water, Nature, and Biological Function (3) *G. POLLACK*

Explores emerging concepts of water at interfaces as a new and simpler way to understand many features of chemistry, physics, and biology. Considers new understanding in cell function, energy transduction, solar energy, flow, transport, weather, green science, and other basics of nature and engineering. Offered: Sp.

[View course details in MyPlan: BIOEN 555](#)

BIOEN 557 Advanced Molecular Bioengineering (4) *P. STAYTON*

Covers fundamentals of molecular recognition and design: thermodynamics, dynamics, and kinetics. Includes molecular design of macromolecules, recognition processes for current molecular engineering applications in biomedicine, and therapeutics based on cells. Offered: jointly with MOLENG 515; A.

[View course details in MyPlan: BIOEN 557](#)

BIOEN 560 Neural Engineering (3) *L. JOHNSON DYHR*

Introduces the field of Neural Engineering: overview of neurobiology, recording and stimulating the nervous system, signal processing, machine learning, powering and communicating with neural devices, invasive and non-invasive brain-machine interfaces, spinal interfaces, smart prostheses, deep-brain stimulators, cochlear implants and neuroethics. Heavy emphasis on primary literature. Offered: A.

[View course details in MyPlan: BIOEN 560](#)

BIOEN 561 Neural Engineering Tech Studio (4) *L. JOHNSON DYHR*

Neural engineering design and translational engineering. Groups design, build and present a neural engineering prototype project to a panel of industry judges. Prerequisite: BIOEN 560 Offered: W.

[View course details in MyPlan: BIOEN 561](#)

BIOEN 566 Neural Computation and Engineering Laboratory (3)

Introduces neural recording and quantitative analysis techniques to students with a background in quantitative methods.

[View course details in MyPlan: BIOEN 566](#)

BIOEN 573 Biosensors and Biomedical Sensing (3) *P. YAGER*

In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in

sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing.

[View course details in MyPlan: BIOEN 573](#)

BIOEN 574 Immunoengineering (3) *K. WOODROW*

Covers cell and tissues of immune system; lymphocyte activation and specificity; cell biology of antigen processing and preservation; and effector mechanisms. Includes discussion of concepts in theoretical immunology used to describe viral dynamics and the dynamics of immune responses. Students present case studies in the pathogenesis of immunologically mediated diseases.

[View course details in MyPlan: BIOEN 574](#)

BIOEN 576 Laboratory Techniques in Protein Engineering (4)

Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression. Prerequisite: background in biochemistry or molecular biology or permission of instructor.

[View course details in MyPlan: BIOEN 576](#)

BIOEN 577 Cell and Protein Reaction with Foreign Materials (3) *T. HORBETT*

Study of ways in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, and cell receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor.

[View course details in MyPlan: BIOEN 577](#)

BIOEN 578 Biomembranes (3) *P. YAGER*

Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membranes; in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water.

[View course details in MyPlan: BIOEN 578](#)

BIOEN 579 Host Response to Biomaterials (3) *C. GIACHELLI*

Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthetic use, including hemostasis, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology, BIOEN 490 (may be taken concurrently), or permission of instructor.

[View course details in MyPlan: BIOEN 579](#)

BIOEN 585 Computational Bioengineering (4) *W. THOMAS*

Introduction to computational and mathematical analysis of biological systems, including control, stochastic, and transport systems. Lectures and laboratory sessions emphasize biochemical systems, but also include electrical, mechanical, and fluidic systems.

[View course details in MyPlan: BIOEN 585](#)

BIOEN 586 Tissue Engineering (3) *D. KIM*

Tissue structure and function, scaffold design, applications to specialized tissues and organs. Offered: A.

[View course details in MyPlan: BIOEN 586](#)

BIOEN 587 Bioengineering and Nanotechnology (4) *Gao*

Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine.

[View course details in MyPlan: BIOEN 587](#)

BIOEN 588 Computational Protein Design (4) *V. DAGGETT*

Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes

molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems.

[View course details in MyPlan: BIOEN 588](#)

BIOEN 590 Advanced Topics in Biomaterials (3)

Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with CHEM E 590.

[View course details in MyPlan: BIOEN 590](#)

BIOEN 591 Controlled Release Systems (3) S. PUN

Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Offered: W.

[View course details in MyPlan: BIOEN 591](#)

BIOEN 592 Surface Analysis (3) B. RATNER

Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 558.

[View course details in MyPlan: BIOEN 592](#)

BIOEN 593 Advanced Surface Analysis (3) D. CASTNER

Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 558 or BIOEN 592. Offered: jointly with CHEM E 593; W.

[View course details in MyPlan: BIOEN 593](#)

BIOEN 594 Advanced Drug Delivery (3) S. PUN

Provides students with an understanding of the current state of the art for advanced drug delivery. Covers the major families of biologic drugs, major challenges associated with their delivery and specific disease applications. Offered: Sp.

[View course details in MyPlan: BIOEN 594](#)

BIOEN 598 Research Rotation (1-10, max. 30)

Research rotation in the laboratories of core or adjunct faculty in the Department of Bioengineering. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: BIOEN 598](#)

BIOEN 599 Special Topics in Bioengineering (1-6, max. 30)

Offered at a graduate level periodically by faculty members within the Department of Bioengineering; concerns areas of research activities with current and topical interest to bioengineers. Prerequisite: undergraduate or graduate courses (or equivalent) determined individually for each special topic.

[View course details in MyPlan: BIOEN 599](#)

BIOEN 600 Independent Study or Research (*-)

Offered: AWSpS.

[View course details in MyPlan: BIOEN 600](#)

BIOEN 601 Internship (1-10, max. 10)

Bioengineering graduate internship program. Requires written report. Prerequisite: permission of supervisory

committee chair. Offered: AWSpS.

[View course details in MyPlan: BIOEN 601](#)

BIOEN 700 Master's Thesis (*-)

Offered: AWSpS.

[View course details in MyPlan: BIOEN 700](#)

BIOEN 800 Doctoral Dissertation (*-)

Offered: AWSpS.

INTERSCHOOL OR INTERCOLLEGE PROGRAMS BIOENGINEERING PHARMACEUTICAL BIOENGINEERING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PHARBE 500 Molecular and Cellular Biology for Pharmaceutical Bioengineering I (4) K. THICKMAN

Case based examination of fundamental molecular processes that occur in organisms. Topics include structure and organization of prokaryotic and eukaryotic cells, prokaryotic and eukaryotic gene structure and regulation, signaling pathways, RNA, DNA, metagenomics, and systems biology. Integrates online literature/media resources and bioinformatics. Cultivates critical thinking approaches to latest developments. Offered: A.

[View course details in MyPlan: PHARBE 500](#)

PHARBE 502 Pharmaceuticals I (4)

Covers the drug development process for both small molecules and biological form discovery stage through the end of phase 1. Addresses the science, logistics, and regulatory environment of preclinical (pharmacology, PKDM, toxicology, CMC) and early clinical development. Offered: A.

[View course details in MyPlan: PHARBE 502](#)

PHARBE 503 Pharmaceuticals II (4)

Covers phases II and III of the drug development process. Topics include clinical study design, safety, pharmacology, and statistics. Provides an overview of the preparation and filing of the New Drug Application (NDA). Uses case studies to demonstrate key concepts. Prerequisite: PHARBE 502 or permission of instructor. Offered: W.

[View course details in MyPlan: PHARBE 503](#)

PHARBE 505 Pathophysiology for Pharmaceutical Bioengineering (4) R. WONG

Introduction to human anatomy, physiology, molecular biology and cell biology of major organ systems. Emphasis on the structural, molecular, and cellular mechanisms of common pathological conditions (pathophysiology). Additional emphasis on pharmaceuticals development for common pathologic states. Students will understand the basics of normal and aberrant human physiology. Offered: W.

[View course details in MyPlan: PHARBE 505](#)

PHARBE 506 Pharmaceutical Bioengineering Seminar (2) *K. THICKMAN*

Provides a deeper understanding of the biotech and pharmaceutical industries through a mix of scientific talks, presentations by industry leaders, and discussions with program alumni. Students also practice professional skills, such as resume and cover letter writing and interviewing skills. Credit/no-credit only. Offered: A.

[View course details in MyPlan: PHARBE 506](#)

PHARBE 510 Applied Pharmacokinetics (5) *E. KELLY*

Covers basic principle of pharmacokinetics and its impact on treatment, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Offered: A.

[View course details in MyPlan: PHARBE 510](#)

PHARBE 511 Process Development (4) *Laursen*

Examines the principles involved in designed and developing production processes for protein therapeutics. Covers technologies, methods, and unit operations used in the development and GMP manufacture of biopharmaceuticals. Includes interdependencies of upstream, downstream, analytical, formulation and drug delivery technologies, illustrated with key biochemical, chemical, and physical chemical reaction examples. Offered: W.

[View course details in MyPlan: PHARBE 511](#)

PHARBE 512 Formulation and Delivery (4) *Nehilla*

Introduces drug delivery and formulation principles, systems, and applications. Reviews administration routes and associated delivery barriers, connection to drug pharmacokinetics/pharmacodynamics, and drug diffusion and permeation principles. Includes current and developmental biomaterials used for formulation and drug delivery systems. Offered: Sp.

[View course details in MyPlan: PHARBE 512](#)

PHARBE 513 Clinical Development (4)

Evaluates clinical development strategies including comprehensive drug candidate life cycle plan. Covers clinical trial design, FDA and Institutional Review Boards, ethics, consents, safety, and quality. Discusses target product profiles, phase III study synopses, informed consents, and SWOT analyses. Students present phase II results and debate go no go decisions. Offered: A.

[View course details in MyPlan: PHARBE 513](#)

PHARBE 520 Molecular Biotechnology (4) *To*

Emphasizes concepts and the techniques/methodologies used in molecular biotechnologies. Uses practice-oriented lectures and laboratories to cover issue culture and assays, recombinant DNA methodologies such as SNA isolation, restriction mapping, cloning, site-directed mutagenesis, DNA sequencing, PCR techniques and applications, protein electrophoresis, ELISA analysis, and Western/Southern blotting methodologies. Offered: A.

[View course details in MyPlan: PHARBE 520](#)

PHARBE 521 Drug Discovery and Design (5) *D. BALDWIN*

Explores general principles and current approaches involved in modern drug discovery and development. Includes specific aspects of human biology and disease, case studies in discovery, and the evolution of how these topics have merged. Covers novel drug discovery techniques, emerging non-standard therapeutics, and the history of drugs and drug discovery. Offered: A.

[View course details in MyPlan: PHARBE 521](#)

PHARBE 522 Molecular Targets and Drug Classes (4) *Wong*

Discusses select medicinal compounds, emphasizing mechanism of action, biotransformation, and structural and physical properties governing absorption, distribution, and excretion. Design of therapeutics to focus on maximizing efficacy while reducing toxicities. Compounds include classical organic small-molecules, peptides, proteins, nucleic acids, lipids, carbohydrates, and other bioactive chemical classes. Offered: Sp.

[View course details in MyPlan: PHARBE 522](#)

PHARBE 523 Systems Biology and Bioinformatics (4)

Surveys methods in bioinformatics and systems biology, including genomics, proteomics, protein-folding prediction, phylogenetics, and simulations, making particular use of tools available online. Emphasizes student presentations. Offered: A.

Global Health

[Display as tabs](#)

The Department of Global Health was established in 2007, bridging the schools of Medicine and Public Health, with a mandate to harness the expertise and interdisciplinary power of all 16 UW schools and colleges. The department is the second largest at the UW in terms of funding for research and training programs. Departmental efforts include 31 centers, programs, initiatives, and the Institute for Health Metrics and Evaluation.

The mission is to close the gap between the world's one billion people who experience relatively good health and the five billion who experience much lower levels of health, through teaching (education, training, and mentoring), research, and service programs.

The department offers an undergraduate minor, a Master of Public Health, and two PhD options: global health, and pathobiology. Four graduate certificate offerings are available for graduate students, as well as a global health pathway for UW medical students. Current and emerging focus areas include health metrics and evaluation, infectious diseases, workforce development, health system strengthening and implementation science, climate change, global trauma and violence, global medicines safety, and a strong cross-cutting focus on social justice and equity.

Undergraduate Program

The Department of Global Health offers the following program:

- A minor in global health

Minor

Minor Requirements (30 credits):

1. *Required courses (8 credits)*: G H 101/GEOG 180/JSIS B 180; and G H 210 or G H 410
2. *Perspectives in global health series (3 credits)*: G H 401; G H 402; G H 403
3. *Electives (to bring total to 30 credits)*: Minimum of one elective course from each of the four content areas selected from a list of approved courses available from the Department of Global Health website, globalhealth.washington.edu/academics/undergraduate-minor/requirements
4. Minimum 15 credits outside the student's major
5. Minimum 15 credits completed through the UW
6. Minimum 15 upper-division credits

7. Minimum 2.0 grade in courses applied to the minor

Master of Public Health

The Global Health MPH program emphasizes a social justice approach to global health with a focus on the social, economic, and political determinants of health, and the history and context of global responses to health problems. The core curriculum develops competencies in the basic tools of public health, including epidemiology, biostatistics, global health systems, environmental health, and social behavioral sciences. Courses in research methods and management are also required. A practicum provides hand-on experience with local or international agencies engaged in global health activities, and academic coursework culminates with independent scholarship leading to a research or practice thesis. The curriculum is highly interdisciplinary, with faculty and courses from across campus including natural and social sciences and the humanities. Case studies and applied learning are common approaches, and contributions by students provide a major component of the learning environment.

For current listings of MPH program options and their requirements, visit the program website.

Admission Requirements

Applicants must have completed at least a baccalaureate degree by the time of matriculation, and some tracks require at least two years of relevant post-college work or volunteer experience prior to matriculation as well. Each MPH track has its own admission requirements.

1. Completed Graduate School online application. Deadline midnight, December 1
2. Official scores from the general Graduate Record Examination (GRE), required for applicants who have not already earned a doctoral-level degree (e.g., MD, PhD, JD) from a U.S. institution of higher learning

Unofficial transcripts: Applicants upload unofficial transcripts from each college and/or university attended into the online application.

3. Three recent letters of recommendation, preferably from former supervisors and professors
4. Personal statement, including background, goals, and research interests
5. Resume - maximum three pages

Degree Requirements

63 credits, for all MPH tracks

At least 30 credits must be from graduate-level, in-classroom courses, and at least 18 of these must be from global health in-classroom courses.

All tracks require a foundation course, epidemiology, biostatistics, environmental health, social and behavioral sciences, research methods, a practicum, and a thesis. Beyond these shared requirements, each track also has its own set of requirements. See program website for track-specific requirements.

Doctor of Philosophy

Program Manager
Institute for Health Metrics and Evaluation
2301 5th Avenue, Suite 600, Box 358210
Seattle, WA
(206) 897-2870
ghpdh@u.washington.edu

The Department of Global Health, in collaboration with the Institute for Health Metrics and Evaluation and Health Alliance International, has developed a unique PhD program, building on faculty expertise in the areas of metrics and implementation science. The program provides students the most innovative tools to advance global health solutions, and includes two emphasis areas:

Metrics: Students translate evidence into useful knowledge by learning and applying advanced quantitative methods, impact evaluation techniques, and analytic tools. Students design and develop new, innovative ways to tackle critical global health measurement challenges.

Implementation Science: Students identify and address barriers to effective implementation and scale-up of evidence-based interventions by developing and applying cutting-edge methodologies and analytical approaches.

For comprehensive information, see the PhD program website.

Admission Requirements

The department recruits students who wish to pursue a long-term career in global health, whether in academic institutions, ministries of health, non-governmental organizations, or the private sector. All indicators of future success, including past work, service, and research experience; level of enthusiasm and detail in letters of recommendation; previous academic records and performance on standardized tests; applicant's written statement of purpose; and an ability to discuss research or practice work and future goals are considered. The department reviews all variables without a preset formula.

Minimum Qualifications

1. Bachelor's degree from an accredited college or university in the United States, or its equivalent from a foreign institution. Strong candidates have prior master-level training or significant experience working in the global health field, ideally in a low-resource setting.
2. Demonstrated passion and commitment to the field of global health
3. High academic standing: Minimum 3.30 cumulative GPA in previous undergraduate- and graduate-degree work, though the department expects applicants to have a minimum 3.70 GPA.

4. Graduate Record Examination (GRE) scores greater than or equal to 120 (700) on the quantitative section
5. English proficiency: For students who have not completed a degree in an institution where English is the primary language of instruction, results from the Test of English as a Foreign Language (TOEFL) are required.

Degree Requirements

Minimum 96 credits

1. *Coursework*: Minimum 27 dissertation credits, 37 credits in core requirements, 16 credits in area of emphasis, and remaining credits in electives. See details about curriculum and course paths on program website.
2. Preliminary written examination
3. General examination
4. Research and dissertation
5. Final examination

INTERSCHOOL OR INTERCOLLEGE PROGRAMS

GLOBAL HEALTH

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

G H 101 Introduction to Global Health: Disparities, Determinants, Policies, and Outcomes (5) I&S S.

GLOYD, M. SPARKE

Provides an introduction to global health, including: the burden and distribution of disease and mortality; the determinants of global health disparities; the making of global health policies; and the outcomes of global health interventions. Offered: jointly with GEOG 180/JSIS B 180; W.

[View course details in MyPlan: G H 101](#)

G H 210 Confronting Global Diseases: Introductory Biologic Principles and Context (3) NW M. PARSONS

Provides a broad introduction to the leading causes of disability and death globally. Covers the basic biologic and scientific principles of globally prevalent human health problems, including the connections between the biology of disease and current prevention and treatment interventions used in public health. Not intended for biological science majors. Offered: Sp.

[View course details in MyPlan: G H 210](#)

G H 220 Global Environmental Change and Public Health (3) I&S K. EBI, J. HESS

Humans are the primary drivers of global environmental changes that are changing the planet on the scale of geological forces. Students will be introduced to these changes and their consequences for human health and well-being, with a focus on climate change and its consequences. Offered: jointly with ENV H 220.

[View course details in MyPlan: G H 220](#)

G H 399 Global Health Study Abroad (1-5, max. 15) I&S

For participants in approved study abroad programs. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

[View course details in MyPlan: G H 399](#)

G H 401 Core Topics in Global Health (1) Gonzales, Wade

Addresses a variety of foundational topics and central themes in global health, including the history and scope of the field, the complexities and contexts for global health problems, and the multidisciplinary nature of global health work. Credit/no-credit only. Offered: A.

[View course details in MyPlan: G H 401](#)

G H 402 Contemporary Issues in Global Health (1) *J. BESCHTA, D. WADE*

Explores contemporary topics in global health. Offered: W.

[View course details in MyPlan: G H 402](#)

G H 403 Multidisciplinary Perspectives in Global Health (1) *Gonzales, Wade*

Presenters from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers illustrate how their work is influenced by communication, culture, economic and socio-political realities. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: G H 403](#)

G H 410 Advanced Biologic Principles of Global Diseases (3) *NW R. COLER*

Presents selected communicable and noncommunicable diseases of global health importance at an advanced level. Students learn about biological principles, host-pathogen interactions, and other factors that influence the burden of global health diseases. Prerequisite: either BIOL 180, G H 210, or MICROM 301. Offered: W.

[View course details in MyPlan: G H 410](#)

G H 418 Understanding and Managing the Health Risks of Climate Change (3) *K. EBI, J. HESS*

The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with ENV H 418.

[View course details in MyPlan: G H 418](#)

G H 419 War and Health (4) *I&S A. HAGOPIAN, E. KANTER*

Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with HSERV 415; Sp.

[View course details in MyPlan: G H 419](#)

G H 446 Global Perspectives on Reproductive Health (3) *I&S, DIV*

Provides comprehensive overview of global reproductive health, with an emphasis on current issues and challenges in resource-limited settings. Students will be engaged in topics from diverse disciplines, including public health, demography, epidemiology, policy, sociology, and medicine. Topics covered include contraception, abortion, human rights, HIV, access to services, and politics.

[View course details in MyPlan: G H 446](#)

G H 456 Global Mental Health (3) *I&S, DIV Rao*

Examines the socio-cultural and political forces that impact assessment, manifestation, and treatment of mental illnesses worldwide. Students take a critical view of diagnostic systems and examine cultural differences in presentation of mental illness. Also reviews treatment practices in low resource settings, cultural-specific communication, and stigma. Offered: Sp.

[View course details in MyPlan: G H 456](#)

G H 458 Global Violence and Health (3) *I&S, DIV C. MOCK, D. RAO*

Examines the socio-politico-cultural forces that give rise to violence and the impact of violence on population health. Discusses public health methods, policies, and interventions that can be used to decrease the occurrence and severity of violence in real world circumstances, including countries at all economic levels. Offered: W.

[View course details in MyPlan: G H 458](#)

G H 482 The Health of Populations (4) *I&S, DIV*

Explores what makes a population healthy or unhealthy. Examines why the United States is less healthy than all other rich countries, despite being one of the healthiest fifty years ago. Offered: jointly with HSERV 482.

[View course details in MyPlan: G H 482](#)

G H 490 Special Topics (1-5, max. 15)

Offered: AWSpS.

[View course details in MyPlan: G H 490](#)

G H 499 Undergraduate Research (1-15, max. 15)

Offered: AWSpS.

[View course details in MyPlan: G H 499](#)

G H 501 Core Topics in Global Health (1) *Gonzales, Wade*

Addresses a variety of foundational topics and central themes in global health, including the history and scope of the field, the complexities and contexts for global health problems, and the multidisciplinary nature of global health work. Offered: A.

[View course details in MyPlan: G H 501](#)

G H 502 Contemporary Issues in Global Health (1) *J. BESCHTA, D. WADE*

Explores contemporary topics in global health. Offered: W.

[View course details in MyPlan: G H 502](#)

G H 503 Multidisciplinary Perspectives in Global Health (1) *Gonzales, Wade*

Presenters from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers illustrate how their work is influenced by communication, culture, economic, and socio-political realities. Offered: Sp.

[View course details in MyPlan: G H 503](#)

G H 505 P-Advanced Global Health (2)

Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with MED 560.

[View course details in MyPlan: G H 505](#)

G H 511 Problems in Global Health ([0-4]-, max. 4) *Gloyd*

Explores social, political, economic, environmental determinants of developing countries' health; traces development of societal responses to problems. Includes: origins of primary healthcare; child survival; traditional systems; population; water; sanitation; international agencies; impact of economic policies. Case study formulating pharmaceutical policy in a developing country. Offered: A.

[View course details in MyPlan: G H 511](#)

G H 514 Global Societal Determinants of Health (2-3) *Bezruchka*

Examines societal determinants of health of nations around the globe. Asks why there is an increasing inequity in health outcomes today? Topics include early life, population health biology, medical care, mental health, and the environment. Offered: Sp.

[View course details in MyPlan: G H 514](#)

G H 516 Health and Human Rights (3)

Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with LAW H 540; W.

[View course details in MyPlan: G H 516](#)

G H 518 Understanding and Managing the Health Risks of Climate Change (3) *K. EBI, J. HESS*

The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate

continues to change. Offered: jointly with ENV H 518.

[View course details in MyPlan: G H 518](#)

G H 519 War and Health (4) *A. HAGOPIAN, E. KANTER*

Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with HSERV 515; Sp.

[View course details in MyPlan: G H 519](#)

G H 521 Leadership Development in Global Health (3)

Focus on enhancing ability to lead in complex global health environments. Self and group assessment, case studies, and small group work. Topics include personal and professional vision, mission, and values; communication and influencing strategies; understanding strengths and weaknesses as a leader. Offered: A.

[View course details in MyPlan: G H 521](#)

G H 522 Global Program Management and Leadership (3) *Downer*

Focuses on management and leadership skills for complex global health settings. Includes personal leadership strengths/values; management dilemmas, data-driven decisions; program planning design and evaluation; and resource management. Offered: W.

[View course details in MyPlan: G H 522](#)

G H 523 Policy Development and Advocacy for Global Health (3) *Katz, Lane*

Primarily taught through case- and problem-based learning and small group work, explores complex factors affecting global health policy and how context (e.g., ideology, culture, and history), international institutions, scientific knowledge, and stakeholder interests affect the structure of and changes to a nation's health system and its performance. Offered: Sp.

[View course details in MyPlan: G H 523](#)

G H 531 Research and Evaluation Methods in Global Health (3-4) *Mock, O'Malley*

Provides an overview of a range of evaluation and research designs used in global health. Students learn practical methodologies to obtain, validate, and analyze information regarding health status, services, and programs. Discusses usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, and qualitative methods. Offered: jointly with EPI 539.

[View course details in MyPlan: G H 531](#)

G H 532 Responsible Conduct of Research: Global and Local (3) *A. DRAKE, C. FARQUHAR*

Prepares international and U.S. students to develop research proposals; conduct international and domestic field research; and present scholarly work. Credit/no-credit only. Offered: jointly with EPI 586.

[View course details in MyPlan: G H 532](#)

G H 533 Survey Research Methods (4) *A. MOKDAD*

Provides students with skills in questionnaire development and survey methods. Students develop a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511/HSERV 513; BOST 517/BOST 518; or EPI 512/EPI 513, which may be taken concurrently, or permission of instructor. Students should have a survey project in mind. Offered: jointly with CS&SS 527/HSERV 527.

[View course details in MyPlan: G H 533](#)

G H 538 Advanced Qualitative Methods in Anthropology and Public Health (5) *J. PFEIFFER*

Provides students with both a theoretical foundation in qualitative approaches to research in anthropology and public health and in-depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame research questions, design, appropriate research strategies that incorporate qualitative methods, and analyze data. Offered: jointly with ANTH 519/HSERV 521; Sp, even years.

[View course details in MyPlan: G H 538](#)

G H 539 Methods, Tools, and Data in Global Health (2) *Gakidou*

Familiarizes students with current global health issues and their analytical challenges. Introduces analytical methodologies, quantitative concepts, statistical packages applied to global health challenges, and software used in health metrics and evaluations research. (Two weeks). Credit/no-credit only. Offered: A.

[View course details in MyPlan: G H 539](#)

G H 541 Fundamentals of Implementation Science in Global Health (4-5) *Sherr, Wasserheit*

Provides an introduction to the emerging field of implementation research by outlining various methods that are applied to improving implementation (including applied engineering, management tools, health systems, and policy research), and using experiential case studies from global health leaders. Addresses barriers to effective replication and scale-up in local settings. Offered: Sp.

[View course details in MyPlan: G H 541](#)

G H 543 Global Health Pharmacy: Medicines, Practice, and Policy (2) *J. BABIGUMIRA, A. STERGACHIS*

Introduces the critical role of pharmaceuticals in addressing the major diseases affecting persons in resource-limited settings, such as HIV/AIDS, malaria, and tuberculosis. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoeconomics, financing, intellectual property, and drug trade policies. Offered: W.

[View course details in MyPlan: G H 543](#)

G H 544 Maternal and Child Health in Low and Middle Income Countries (3) *D. DENNO*

Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with HSERV 544; W.

[View course details in MyPlan: G H 544](#)

G H 545 Child Health in Low and Middle Income Countries ([0-3]-, max. 3) *Denno*

Provides an understanding of the causes and functional effects of the most prominent child health problems. Examines trends and progress in global child health and explores potential explanations for these trends. Offered: Sp.

[View course details in MyPlan: G H 545](#)

G H 546 Global Perspectives on Reproductive Health (3) *I&S, DIV*

Provides comprehensive overview of global reproductive health, with an emphasis on current issues and challenges in resource-limited settings. Students will be engaged in topics from diverse disciplines, including public health, demography, epidemiology, policy, sociology, and medicine. Topics covered include contraception, abortion, human rights, HIV, access to services, and politics.

[View course details in MyPlan: G H 546](#)

G H 555 Nutrition in Developing Countries (3) *Gorstein*

Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of undernutrition and micronutrient deficiencies. Offered: jointly with NUTR 555; Sp, odd years.

[View course details in MyPlan: G H 555](#)

G H 556 Global Mental Health (3) *Rao*

Examines the socio-cultural and political forces that impact assessment, manifestation, and treatment of mental illnesses worldwide. Students take a critical view of diagnostic systems and examine cultural differences in presentation of mental illness. Also reviews treatment practices in low resource settings, cultural-specific communication, and stigma. Offered: Sp.

[View course details in MyPlan: G H 556](#)

G H 558 Global Violence and Health (3) *C. MOCK, D. RAO*

Examines the socio-politico-cultural forces that give rise to violence and the impact of violence on population health. Discusses public health methods, policies, and interventions that can be used to decrease the occurrence

and severity of violence in real world circumstances, including countries at all economic levels. Offered: W. ¹⁹⁸⁵
[View course details in MyPlan: G H 558](#)

G H 560 Principles of STD/HIV Research (2) *Graham, Winer*

Provides MD and PhD fellows and graduate students with a comprehensive overview of the current state of knowledge in specific areas of STD/HIV research, including study design, laboratory methods, production of instruments for data collection, and methods for data analysis. Credit/no-credit only. Offered: S.

[View course details in MyPlan: G H 560](#)

G H 561 Tropical Medicine (1) *F. BUCKNER, P. POTTINGER*

Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: jointly with MED 561; Sp.

[View course details in MyPlan: G H 561](#)

G H 562 AIDS: A Multidisciplinary Approach (2) *C. FARQUHAR*

Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/MED 530.

[View course details in MyPlan: G H 562](#)

G H 563 HIV/STI Prevention Research Methods (3) *J. BAETEN, R. HEFFRON*

Focuses on current research and implementation of HIV/STI prevention including biomedical, behavioral, and public health interventions. Includes analyzing strength of research evidence to support novel interventions, understanding key features of study design, and applying interventions that are most appropriate and feasible for specific settings and populations. Offered: jointly with EPI 549.

[View course details in MyPlan: G H 563](#)

G H 566 Biochemistry and Genetics of Pathogens and Their Hosts (4)

Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor. Instructors: L. Campbell Offered: jointly with PABIO 551; A.

[View course details in MyPlan: G H 566](#)

G H 571 Essential of Clinical Care and Capacity Building in Low Income Countries (2) *Pak-Gorstein, Zunt*

An interdisciplinary case-based forum of presentations by local and international lecturers and class discussions on realities of providing healthcare in low-income settings. Covers issues in prevention, socioeconomic underpinnings, management of medical and surgical conditions, and sustainable strategies to build capacity. Credit/no-credit only. Offered: W.

[View course details in MyPlan: G H 571](#)

G H 572 Global Health Fieldwork: Preparation, Integration, Reentry (2) *S. GRAHAM*

Prepares students for community-based global health experiences, and provides them the opportunity to share, discuss, and reflect on these experiences after returning to the United States. Explores the problems and promise of current global health strategies. Prerequisite: participation in International Health Opportunities Program or similar experience. Credit/no-credit only. Offered: S.

[View course details in MyPlan: G H 572](#)

G H 573 Clinical Management of HIV (2-3) *M. CHUNG, H. KIM*

Provides in-depth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with speakers who have experience in both resource-rich and resource-

limited settings. Offered: jointly with CONJ 553; Sp.

[View course details in MyPlan: G H 573](#)

G H 575 Global Health Leadership for the Clinician (3)

One-month intensive course for clinicians interested in careers in global health. Designed to teach the skills necessary to become future leaders in this field. Comprised of several different components, including field visits to local global health organizations, lectures, and small group case-based discussions. Credit/no-credit only. Offered: A.

[View course details in MyPlan: G H 575](#)

G H 576 Health in Complex Humanitarian Emergencies (2) D. TOWNES

Covers the principles of planning, implementing, and evaluating health programs for refugees and internally displaced persons during complex humanitarian emergencies in resource poor countries. Topics include rapid assessment; surveys; surveillance; nutrition; camp management; epidemiology of infectious diseases; water and sanitation; and vaccination campaigns during international relief operations for complex humanitarian emergencies. Credit/no-credit only. Offered: A.

[View course details in MyPlan: G H 576](#)

G H 580 Global Health Doctoral Seminar: Biology, Systems, and Measurement (2, max. 8) Gakidou, Lukehart, Sherr

Examines the most critical issues in global health and currently available solutions. Introduces complementary perspectives of pathobiology, metrics, and implementation science to build a multidisciplinary understanding of these issues, including effective and appropriate strategies for their control. Offered: AWSp.

[View course details in MyPlan: G H 580](#)

G H 590 Selected Topics in Global Health (1-5, max. 15)

Focuses on topics relevant to global health. Offered: AWSpS.

[View course details in MyPlan: G H 590](#)

G H 592 Program Seminars (1-6, max. 6)

Addresses specific educational needs of students within the Department of Global Health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: G H 592](#)

G H 593 MPH Workshop (1, max. 3)

Highlights include presentations from fellow students, guest lecturers from various departments and visiting activists and scholars who share their interdisciplinary, global perspectives, and expertise. Students are invited to select topics and prepare student-led sessions. Prerequisite: first-year Global Health MPH students. Offered: AWSp.

[View course details in MyPlan: G H 593](#)

G H 595 Master's Practicum (1-6, max. 6)

Supervised practice experience providing an opportunity to apply knowledge and skills in a setting of relevance to global health. Prerequisite: permission of faculty adviser. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: G H 595](#)

G H 600 Independent Study or Research (*-)

Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: G H 600](#)

G H 700 Master's Thesis (*-)

Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: G H 700](#)

G H 800 Doctoral Dissertation (*)

Prerequisite: permission of Graduate Program Advisor. Offered: AWSpS.

UCONJ 100 Introduction to Health Professions (1) *Garcia*

Opportunities in health professions. Information on educational requirements, professional/patient interaction, licensing, registering for practice in profession, salaries, and career opportunities.

[View course details in MyPlan: UCONJ 100](#)

UCONJ 290 Diversity Issues in the Healthcare Environment (1-2, max. 2) I&S

Introduction to the complexity of the issues surrounding culture and health, the interrelatedness of ethic and cultural characteristics and healthcare access, health and healthcare concerns of specific communities, traditional and alternative health-care practices, and community-based promotion and disease prevention programs.

Credit/no-credit only.

[View course details in MyPlan: UCONJ 290](#)

UCONJ 411 Psychology of Aging (3) *Kiyak*

Focuses on developing the skills necessary for critically evaluating current psychological theories of aging, research findings in this area, and the implications of findings on the aging person. Special consideration given to the effects of socioeconomic, sex, and ethnic differences in the psychology of aging. Open to upper-division undergraduates and beginning graduate students interested in the field of gerontology.

[View course details in MyPlan: UCONJ 411](#)

UCONJ 412 The Family in Later Life (3)

Focuses on issues affecting older persons and their families. Addresses demographic influences on families; roles, rules for and function of family members; inter-generational relationships; economic, political, and social policy affecting family life; and cultural variations and supportive resources for older persons and their families.

[View course details in MyPlan: UCONJ 412](#)

UCONJ 413 Current Issues in Aging (3)

Describes the population trends at work in the United States and other developed nations with significant societal implications for care and management of elders. Evaluates selected public policies related to aging. Gives students proficiency in using resources related to aging on the Internet. Evaluates alternative long-term

care models.

[View course details in MyPlan: UCONJ 413](#)

UCONJ 420 Biological Safety Practices (1) *Kenny*

General introduction to appropriate laboratory procedures used for handling potentially hazardous biological agents. Particular focus on laboratory safety and appropriate protocols that should be employed by those engaged in infectious disease and recombinant DNA research. Credit/no-credit only.

[View course details in MyPlan: UCONJ 420](#)

UCONJ 422 Sexually Transmitted Diseases: An Overview (2) *Gardner*

Clinically oriented course designed to provide a knowledge base for upper-division health science students to participate effectively in community outreach programs for the prevention of sexually-transmitted diseases. Offered cooperatively by the departments of Pharmacy and Medicine.

[View course details in MyPlan: UCONJ 422](#)

UCONJ 440 Biological Aspects of Aging (3)

Introduction to aspects of the biology of human aging and functional changes associated with normal aging and with illnesses that may be present in the elderly. Explores the relationship between changes in physical function, environment, and quality of life. Includes theoretical perspective on aging as well as the aging process in specific physiological systems. Designed for upper-level undergraduate students with an interest in aging.

[View course details in MyPlan: UCONJ 440](#)

UCONJ 442 Social and Cultural Aspects of Aging (3)

Involves faculty members from the various social science fields examining the range and variation of relationships among age-linked attitudes and cultural values related to aging; the social and economic factors that influence the elderly in contemporary society; the effects of ethnic and sex differences in sociocultural aging. Open to upper-division undergraduates and beginning graduate students interested in gerontology.

[View course details in MyPlan: UCONJ 442](#)

UCONJ 500 Seminar in Interprofessional Collaboration ([1-3]-, max. 7)

Interdisciplinary teams of students and community members placed in diverse urban settings address an identified community need by developing and implementing collaborative, community-based projects. Seminars emphasize interprofessional collaborative practice, intrapersonal understanding, interpersonal group process skills, organizational savvy, community awareness, and sociocultural sensitivity. Offered through Graduate School of Public Affairs. Offered: AWSp.

[View course details in MyPlan: UCONJ 500](#)

UCONJ 504 Advanced Interdisciplinary Case Studies in Global Health (3) *Gorstein, Kurth, Shell-Duncan*

Uses actual multidisciplinary case studies to (1) analyze quantitative parameters of diseases, (2) contrast the descriptive and analytic approaches of health sciences, anthropology, and nutritional sciences, (3) integrate diverse disciplinary perspectives into cohesive information, (4) organize class presentations, and (5) apply critical thinking in approaching complex health issues. Offered: Sp.

[View course details in MyPlan: UCONJ 504](#)

UCONJ 510 Introductory Laboratory Based Biostatistics (2)

Introduces methods of data description and statistical inference for experiments. Covers principles of design and analysis of experiments; descriptive statistics; comparison of group means and proportions; linear regression; and correlation. Emphasizes examples from laboratory-based biomedical sciences, and provides demonstrations using standard statistical programs.

[View course details in MyPlan: UCONJ 510](#)

UCONJ 517 Interdisciplinary Clinical Research Methods Seminar (2)

Provides an introduction to clinical/translational relational research methods, including selection of research questions, study design, measurement, data analysis, and practical aspects of conducting research in clinical settings. Prerequisite: Students from Health Sciences schools conducting research under the Multidisciplinary

Predoctoral Clinical Research Training Program. Credit/no-credit only. Offered: S.

[View course details in MyPlan: UCONJ 517](#)

UCONJ 520 Molecular Biophysics Research Seminar (1) *Parson*

A series of research seminars for faculty and students involved with the molecular biophysics program.

Credit/no-credit only.

[View course details in MyPlan: UCONJ 520](#)

UCONJ 524 Developmental Neurobiology (3)

Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation; electrophysiological, morphological, and neurochemical regulation of cellular phenotype; neuronal pathways and synaptic contacts; cellular and synaptic plasticity; and behavior. Examination of molecular biological, morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology, neuroanatomy, molecular neurobiology. Instructors: Raible, Reh Offered: Sp.

[View course details in MyPlan: UCONJ 524](#)

UCONJ 525 Overview of Faculty Research in Neurobiology (1)

Reviews research topics currently being studied in neurobiology. Student preparation consists of reading pertinent articles published on each topic. Prerequisite: first-year graduate student in neurobiology. Credit/no-credit only.

[View course details in MyPlan: UCONJ 525](#)

UCONJ 530 Issues in Indian Health (2)

Surveys historical and contemporary issues in Indian health. Covers Indian contributions to health, traditional Indian medicine, current disease epidemiology, development of federal Indian health policy, the Indian Health Service, tribal health programs, and consequences of major legislation on Indian health. Prerequisite: current health science student or permission of instructor.

[View course details in MyPlan: UCONJ 530](#)

UCONJ 531 Introduction to Mind Body Medicine-An Experiential Elective (2)

Sessions contain a didactic component followed by an experiential component and cover a variety of self-care techniques including meditation, exercise, and nutrition. Goals are to promote personal well being, a healthy lifestyle, reduce burnout, and reduce academic difficulties. Credit/no-credit only.

[View course details in MyPlan: UCONJ 531](#)

UCONJ 532 Health Sciences Common Book Seminar (1, max. 4) *R. ARNOLD*

Covers material related to the current health sciences common book, and provides knowledge of key barriers underserved populations face in obtaining adequate healthcare, and strategies health professions can use to effectively care for underserved individuals. Guest speakers include community leaders. Service learning course. Credit/no-credit only. Offered: W.

[View course details in MyPlan: UCONJ 532](#)

UCONJ 545 Emergency Preparedness for Health Professionals (1)

Introduces the roles of health professionals in preparing for community-wide disasters. Emergency preparedness content for graduate and professional students in health sciences. First of two interdisciplinary courses focusing on "all-hazards" preparedness. Credit/no-credit only.

[View course details in MyPlan: UCONJ 545](#)

UCONJ 546 Emergency Response for Health Professionals (2, max. 6)

Focuses on interdisciplinary emergency preparedness and response for graduate students in health professions. Includes system and policy issues with emphasis on clinical relevance for health professionals. Second of two interdisciplinary courses focusing on "all-hazards" preparedness. Credit/no-credit only.

[View course details in MyPlan: UCONJ 546](#)

UCONJ 548 Current Issues in First Nations Behavioral Health: Mental Health and Substance Abuse (3)

Historical and intergenerational antecedents of tribal psychiatric and substance abuse disorders. Oppression, economic circumstances, and family functioning as shaping mechanisms for attachment. Implications of insufficient attachment for neuro-development and developmental psychopathology. Traditional vs. mental health and substance abuse assessment and treatment. Self as provider to tribal clients, communities, systems.

[View course details in MyPlan: UCONJ 548](#)

UCONJ 550 Healthcare in the Underserved Community (1)

Gives graduate/professional students in health sciences an introduction to health related issues faced by underserved populations. Credit/no-credit only.

[View course details in MyPlan: UCONJ 550](#)

UCONJ 584 Plant Tumors (1, max. 9)

Discussion of the literature of plant tumors and current research work being done in this area at the University. Offered cooperatively by the departments of Biochemistry, Biology, and Microbiology and Immunology.

Prerequisite: offered only to persons actively pursuing work in this area. Instructors: Gordon Credit/no-credit only.

[View course details in MyPlan: UCONJ 584](#)

UCONJ 599 Selected Readings in Interdisciplinary Clinical Research (1, max. 6)

Analysis and synthesis of selected readings and works in progress related to multidisciplinary and interdisciplinary clinical research. Prerequisite: UCONJ 517; permission of instructor. Instructors: Marshall, Mitchell Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: UCONJ 599](#)

UCONJ 624 Health Equity and Community Organizing (1) *Arnold*

Equips students with tools to organize themselves and others to address social and structural injustices that perpetuate health disparities. Didactic coursework complemented with opportunities to apply skills and gain confidence through hands-on collaboration with local leaders and engagement in community-driven listening and advocacy campaigns. Credit/no-credit only. Offered: AW.

Stephanie Cox

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association's list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current *School of Law* catalog.

[School Faculty](#)

[Course Descriptions](#)

Facilities and Services

The School of Law, housed in William Gates Hall since 2003, is equipped with classroom, clinical, library, lounge, and office facilities. Eleven classrooms are equipped for multi-media presentations, wireless internet connection, and assistive-listening systems.

The Marian Gould Gallagher Law Library is among the largest university law collections on the West Coast. The collection currently contains more than 450,000 bound volumes and volume equivalents of microform. In addition to the extensive main collection, it houses important materials that support the Asian, marine, sustainable international development, and tax law graduate programs and serves as a federal depository for selected United States government documents. The library is equipped with the latest in microreaders and printers in order to make full use of the growing microform collection. The library is a subscriber to LEXIS, WESTLAW, the Western Library Network, and other research databases.

Juris Doctor Program

The Juris Doctor (JD) degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As with most law schools in the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills.

Except for a required course in professional responsibility, the public service requirement, and an advanced writing project requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. JD candidates are required to perform 60 hours of public-service legal work during the second or third year.

Admission

New students may enter the School of Law only in autumn quarter. For first-year students, instruction begins earlier than for upper-class students. Students must have earned a baccalaureate degree from an accredited college or university prior to commencing the study of law.

All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Data Assembly Service (LSDAS). Registration packets and test information are available at most law schools and from Law School Admission Council, Box 2000, Newtown, PA 18940-0998. www.lsac.org

No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in *The Official Guide to U.S. Law Schools (2000 Edition)*. Applications for admission to the next entering class must be postmarked no later than January 15. To be assured of consideration, an applicant must have complete credentials, including the LSDAS report, filed in the School of Law by February 1. An application fee (at this writing, \$50) also is required.

Transfer Applicants

Students who have completed at least one year at a member school of the Association of American Law Schools may apply for admission with advanced standing, with credit for no more than one year of such work. A student who has completed or expects to complete at least two years of work at a member school of the Association of American Law Schools and who expects to graduate from that member school may apply to this school for admission as a non-degree candidate.

Applicants should request application forms and instructions from the admissions office in time to permit filing of all application materials by July 10.

Applications are considered only if vacancies exist. Selection is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body.

Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the general University policy on the registration of nonmatriculated students.

Financial Aid

Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December at most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Box 355880, University of Washington, Seattle, WA 98195, (206) 543-6101, offa@uw.edu. Applicants for admission should not wait until they have been admitted before applying for financial aid.

School of Law grants are awarded primarily on the basis of financial need, although scholarship or other factors may be considered for certain awards. Inquiries concerning School of Law aid should be addressed to Financial Aid Coordinator, School of Law, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-3020; uwlawaid@uw.edu.

Inquiries

A more detailed statement on admission policy and application procedure is available from the School of Law. Requests for application materials and the University law school bulletin should be addressed to Law School Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-4617; admissions@law.washington.edu; (206) 543-4078.

Graduate Program

Graduate Program Coordinator
William Gates Hall, Box 353020
(206) 543-4937
gradlaw@uw.edu

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LLM) in Asian and Comparative Law, the law of sustainable international development, intellectual property law and policy, and taxation. The School of Law offers the Doctor of Philosophy (PhD) degree in Asian and Comparative Law only.

Master of Laws

Admission Requirements

1. Minimum B or 3.00 GPA in the most recent two years of study.
2. U.S. applicants must have completed their first degree in law (JD or equivalent) at a school accredited by the American Bar Association.
3. International students must have a first degree in law (LLB, BLaw) or equivalent and a minimum TOEFL score of 580 or 237 (TOEFLC).

Degree Requirements, Asian and Comparative Law

36 credits, as follows:

1. *Required courses:* LAW B 551, LAW 600, LAW B 550; two courses in Asian and comparative law
2. *Elective courses:* Additional courses, chosen in consultation with adviser, to bring total credits to 36.

Degree Requirements, Intellectual Property Law and Policy

40 credits, to include:

1. *Required core courses:* LAW P 501, LAW P 510
2. *Additional requirement for students not trained in the common law system:* LAW P 503
3. At least 16 additional credits drawn from a list of approved elective courses.
4. Research project and thesis

Degree Requirements, Law of Sustainable International Development

40 credits, as follows:

1. 15 credits in Law School classes. The remaining 25 credits may be earned in any other departments of the University. Sustainable international development students are required to take courses in at least three departments other than the Law School.
2. *Writing and Research Requirement:* Completion of a research paper is required and is generally satisfied by LAW B 578.
3. LAW A 545

Degree Requirements, Taxation

36 credits, as follows:

1. *Required courses:* LAW T 501, LAW T 502, LAW T 503, LAW T 504, LAW T 510, LAW T 511
2. *Core electives:* Two of the following courses: LAW T 515, LAW T 516, LAW T 521, LAW T 530
3. *Electives:* Additional courses, chosen in consultation with adviser, to reach 36 credits for degree

Doctor of Philosophy

Admission Requirements

Admission to the PhD program is limited to exceptional scholar-lawyers who are fluent in English and in another language. Prospective PhD students must normally complete the LLM program before being accepted as PhD students. The School does, however, welcome applications from candidates with equivalent academic standing and a demonstrated capacity for advanced research and writing.

Degree Requirements

90 credits, to include:

1. An LLM degree is counted toward the credit necessary for the PhD program.
2. Doctoral thesis seminar (4 credits)
3. Other coursework (26-29 credits): Coursework varies according to student's research interest areas and is determined in consultation with Supervising Committee
4. Doctoral dissertation (27-30 credits)

Financial Aid

Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@uw.edu; (206) 543-4937.

Inquiries

Requests for applications and program brochures for all School of Law LLM programs except the LLM in taxation, as well as information regarding application procedures, should be addressed to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195.; gradlaw@uw.edu.

Requests for applications and program brochures for the LLM in taxation should be addressed to Law School Graduate Tax Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@uw.edu.

LAW 100 Introduction to American Law (2-5, max. 5) I&S T. MYHRE

Examines the structure of the American legal system and how laws are made. Surveys key doctrinal areas of the law learning fundamental legal concepts, and explore how the law functions and evolves over time, including legal issues and decision-making related to statutory or common law. Offered: A.

[View course details in MyPlan: LAW 100](#)

LAW 300 Introduction to Law (3-6, max. 6) I&S

Understanding the legal system, its functions in the social-economic order, legal reasoning, and the world of legal education and the legal profession. Open to nonlaw students only.

[View course details in MyPlan: LAW 300](#)

LAW 301 Introduction to Common Law Legal Reasoning (3) I&S

Examines legal reasoning based on case law precedent using short, modern judicial decisions, summarizing those decisions in case briefs, breaking legal rules down into their elements, applying rules to facts, and reasoning by analogy from judicial decisions to hypothetical fact patterns.

[View course details in MyPlan: LAW 301](#)

LAW 305 Global Health and Justice (3-5) I&S

[View course details in MyPlan: LAW 305](#)

LAW 310 Law, Science, and Technology (4) I&S

[View course details in MyPlan: LAW 310](#)

LAW 410 Problems in Professional Responsibility (4) I&S

[View course details in MyPlan: LAW 410](#)

LAW 415 Criminal Justice (3) I&S

Examines pre-trial rights of persons suspected or accused of crime, primarily those rights covered by the Fourth, Fifth, Sixth, and Fourteenth Amendments of the U.S. Constitution.

[View course details in MyPlan: LAW 415](#)

LAW 416 International Contracting: Negotiation and Drafting (3) I&S

Skills course designed to introduce process and problems of negotiating and drafting international agreements. Client interviewing and counseling and negotiation and drafting of a contract between parties in the United States and Japan. Open to nonlaw students only. Credit/no-credit only.

[View course details in MyPlan: LAW 416](#)

LAW 422 Copyright (3) I&S

[View course details in MyPlan: LAW 422](#)

LAW 429 Public Land Law (3) I&S

[View course details in MyPlan: LAW 429](#)

LAW 440 Legal Issues of Internet Law (3) I&S

Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, propriety rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

[View course details in MyPlan: LAW 440](#)

LAW 442 Land Law and the Urban Environment (3) I&S

Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of nuisance law. Open to law and nonlaw students. Credit/no-credit only.

[View course details in MyPlan: LAW 442](#)

LAW 443 The Legal Process I (3/5) I&S

The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Open only to nonlaw students.

[View course details in MyPlan: LAW 443](#)

LAW 444 Constitution and American Public Education (3-6, max. 6) I&S

Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no-credit only. Offered: jointly with EDLPS 444.

[View course details in MyPlan: LAW 444](#)

LAW 445 Major Issues in American Constitutional Law (3) I&S

Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court's recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and presidential powers. Open to law and nonlaw students.

[View course details in MyPlan: LAW 445](#)

LAW 447 Critical Perspectives in Law (3) I&S

Examination of modern critical legal thought and critics views regarding proposed alternative forms of social ordering.

[View course details in MyPlan: LAW 447](#)

LAW 476 International Economic Relations and Trade Policy (3) I&S

Consideration of international control of national trade policies and permissible transnational reach of national trade or other regulation. The General Agreement on Tariffs and Trade (GATT) and the international monetary system examined from legal and economic perspective. Examination and comparison of prescriptive jurisdiction to public international law.

[View course details in MyPlan: LAW 476](#)

LAW 477 Law, Literature, and Film ([2-4]-, max. 4) VLPA/I&S

An examination of literary and cinematic portrayals of and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."

[View course details in MyPlan: LAW 477](#)

LAW 481 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment (1-6, max. 6) I&S

[View course details in MyPlan: LAW 481](#)

LAW 489 Law and Aging (3) I&S

Survey of principal areas of law of special concern to aging population, considering healthcare and healthcare decision-making, public and private income maintenance programs, taxation, guardianships, conservatorships, and other methods of protecting the property of the elderly, counseling, and professional responsibility.

[View course details in MyPlan: LAW A 529](#)

LAW A 530 Individual Income Tax ([2-6]-, max. 6)

[View course details in MyPlan: LAW A 530](#)

LAW A 531 Death and Gift Taxation (2-5, max. 5)

[View course details in MyPlan: LAW A 531](#)

LAW A 532 Taxation of Business Entities (5)

[View course details in MyPlan: LAW A 532](#)

LAW A 534 Mergers and Acquisitions (4-6)

Deals with tactics, strategy, and state and federal law relating to transactions by means of which corporations and other forms of business entity combine. Emphasizes corporate law with some treatment of federal tax and securities law issues. Prerequisite: either LAW A 515 or LAW A 567.

[View course details in MyPlan: LAW A 534](#)

LAW A 535 Trademarks and Unfair Competition (2)

[View course details in MyPlan: LAW A 535](#)

LAW A 537 Taxation of Corporations, Partnerships, and Limited Liability Companies (4-)

[View course details in MyPlan: LAW A 537](#)

LAW A 538 Estate Planning Workshop (3-4)

[View course details in MyPlan: LAW A 538](#)

LAW A 540 Land Use Planning Seminar (3)

[View course details in MyPlan: LAW A 540](#)

LAW A 541 Transnational Tax (5)

[View course details in MyPlan: LAW A 541](#)

LAW A 542 Land Law and the Urban Environment (3)

[View course details in MyPlan: LAW A 542](#)

LAW A 543 Business Reorganization Under the Bankruptcy Code (4)

[View course details in MyPlan: LAW A 543](#)

LAW A 544 Transnational Commercial Law (1-4, max. 4)

Examines the political economy of transnational commercial law. Uses select international harmonization instruments (e.g. Cape Town Convention on International Interests in Mobile Equipment, UNCITRAL Model Law on Cross-Border Insolvency, Vienna Convention on Contracts for the International Sale of Goods) to

illustrate and critique different methodological and institutional approaches.

[View course details in MyPlan: LAW A 544](#)

LAW A 545 International Environmental Law (3-4)

[View course details in MyPlan: LAW A 545](#)

LAW A 546 Patents ([2-4]-, max. 4)

[View course details in MyPlan: LAW A 546](#)

LAW A 547 Critical Perspectives on Law Seminar ([2-4]-, max. 4)

Considers law from the point of view of Continental philosophy and critical social theory. Involves close readings and intensive discussion of canonical texts from various critical traditions of thinking about law. Students also write and present papers concerning themes raised by the readings. Offered: A.

[View course details in MyPlan: LAW A 547](#)

LAW A 548 Civil Rights ([2-6]-, max. 6)

[View course details in MyPlan: LAW A 548](#)

LAW A 549 Advanced Legal Research (4)

[View course details in MyPlan: LAW A 549](#)

LAW A 550 Constitutional Law ([2-8]-, max. 8)

[View course details in MyPlan: LAW A 550](#)

LAW A 551 Global Governance Seminar (3-4)

Introduces international and transnational regimes governing issues as varied as international economic inequality and instability; conflict and peace-building; humanitarian crises and intervention; and global environmental change. Explores principles of regime design and legal architecture. Evaluates the effectiveness and legitimacy of various modes of global governance.

[View course details in MyPlan: LAW A 551](#)

LAW A 552 Antitrust Law and Policy ([2-5]-, max. 5)

[View course details in MyPlan: LAW A 552](#)

LAW A 553 Feminist Jurisprudence (4)

Explores the intersections of law and sex, gender, and sexuality with the aid of various theoretical lenses, prominently feminist legal theory. Focuses on those areas of law where notions of sex, gender, and sexuality seem conflated and confused.

[View course details in MyPlan: LAW A 553](#)

LAW A 554 Labor Relations and the Law ([1-5]-, max. 5)

[View course details in MyPlan: LAW A 554](#)

LAW A 556 Employment Discrimination ([2-4]-, max. 4)

[View course details in MyPlan: LAW A 556](#)

LAW A 558 National Security Law Seminar ([2-6]-, max. 6)

Three-quarter seminar that provides an opportunity for study and research in selected legal issues relating to national security law and its processes and institutions. Prerequisite: LAW A 507. Instructors: Allen Offered: A WS p.

[View course details in MyPlan: LAW A 558](#)

LAW A 560 Employment Issues (2/3)

Examination of issues under selected employee protection laws. Analysis of the Fair Labor Standards Act, Workers' Compensation, and Social Security Act (related to retirement, disability, and supplemental income

benefits). Includes assessment of public assistance issues for low-wage workers. Prerequisite: LAW A 509, LAW A 562, or permission of instructor.

[View course details in MyPlan: LAW A 560](#)

LAW A 561 Law and Economics (2-4, max. 4)

Offered: jointly with PUBPOL 519.

[View course details in MyPlan: LAW A 561](#)

LAW A 562 Employment Law (3-5)

Examines the law governing the employment relationship, including the establishment and termination of employment. Topics include employee duties, prohibited employment practices, regulation of wages, hours, and benefits of employment, workers' compensation, and occupational safety and health.

[View course details in MyPlan: LAW A 562](#)

LAW A 563 Local Government Law (3)

[View course details in MyPlan: LAW A 563](#)

LAW A 564 American Legal History (1-4, max. 4)

Reviews the American legal history from colonial times to the civil rights era. Readings cover early constitutionalism, the republican revolution, the antebellum movement, the end of slavery, the regulatory state, and rights of women and minority groups.

[View course details in MyPlan: LAW A 564](#)

LAW A 565 American Indian Law (3-4)

[View course details in MyPlan: LAW A 565](#)

LAW A 566 Theories of Justice ([2-4]-, max. 4)

[View course details in MyPlan: LAW A 566](#)

LAW A 567 Closely Held Business Organizations (4)

Examines elements of various unincorporated business forms and closely held corporations. Reviews relevant state statutes and case law related to each form relevant to advising small business clients on the choice of business form utilized in their ventures. Not open to students who have taken LAW A 515. Offered: A.

[View course details in MyPlan: LAW A 567](#)

LAW A 568 Collective Bargaining and Labor Arbitration (2-4)

[View course details in MyPlan: LAW A 568](#)

LAW A 569 Investments Funds and Managers Seminar (3) *Krug*

Explores U.S. regulation of investment managers and invest companies, including hedge funds and mutual funds. Topics draw heavily from federal securities laws, particularly the Investment Advisers Act and the Investment Company Act of 1940, and encompass regulatory developments/proposals and policy considerations underpinning investment industry regulation. Offered: Sp.

[View course details in MyPlan: LAW A 569](#)

LAW A 571 International Organizations Seminar (3)

Provides a critical introduction to some of the issues that are important to understanding how international organizations function today. Focuses on the role of international organizations in the modern forms of international law-making, regulation, and global governance.

[View course details in MyPlan: LAW A 571](#)

LAW A 572 Criminal Justice Policy (4)

Provides overview of key policy issues arising in the criminal justice system, such as mass incarceration, victim's rights movement, racial disparities, and wrongful conviction. Considers role of prosecutors and public defenders in contributing to or alleviating these problems, and how participants in the system can provide

leadership in addressing them.

[View course details in MyPlan: LAW A 572](#)

LAW A 574 International Law (2-4, max. 4)

[View course details in MyPlan: LAW A 574](#)

LAW A 575 Human Rights History: Rights, Revolutions, Republics, 1750-1850 (4) *Walsh*

Comparative constitutional history of rights lawyering. Includes political trials from French Revolution in Europe through postcolonial Jacksonian American Republic. Covers basic rhetoric of early human rights discourse: on treason, seditious libel, racial equality, servitude, labor conspiracy, religious liberty, consumer protection, and codification. Offered: W.

[View course details in MyPlan: LAW A 575](#)

LAW A 576 Cross-Border and International Criminal Law (3-4)

Examines responses by states and international organizations to international and transnational crimes. Covers substantive and procedural international criminal law, criminal responsibility, defenses and immunities, and the prosecution and punishment of international criminals in both national and in international tribunals.

Prerequisite: LAW A 505. Instructors: Allen Offered: W.

[View course details in MyPlan: LAW A 576](#)

LAW A 577 Immigration Law (3/4)

[View course details in MyPlan: LAW A 577](#)

LAW A 578 International Business Transactions ([1-4]-, max. 4)

[View course details in MyPlan: LAW A 578](#)

LAW A 579 Child Advocacy Seminar (2-4, max. 4)

Includes child abuse and neglect, parental rights termination, paternity, and an overview of other practice areas as they intersect with issues of child abuse and neglect. Focuses on Washington law and practice, covering applicable substantive and procedural law, local practice rules, and professional responsibility. Offered: A.

[View course details in MyPlan: LAW A 579](#)

LAW A 580 Family Law (3-5)

[View course details in MyPlan: LAW A 580](#)

LAW A 581 Washington Constitutional Law ([1-4]-, max. 4)

Studies the history, structure, content, and role of state constitutions generally, and the development of Washington's constitution in particular. Examines the important distinctions between the federal constitution and state document, and the interplay between them. Covers state declarations of rights and the substantive sections of state constitutions that relate to the structure, role, and constraints. Offered: A.

[View course details in MyPlan: LAW A 581](#)

LAW A 582 Bankruptcy (3-4)

[View course details in MyPlan: LAW A 582](#)

LAW A 583 Insurance Law (4)

[View course details in MyPlan: LAW A 583](#)

LAW A 584 American Public School Law (3)

Constitutional, statutory, and common law principles common to all public education systems within the United States. Applicable law in a variety of substantive legal areas such as torts, property, contracts, administrative law, and fundamental rights. Offered: Sp.

[View course details in MyPlan: LAW A 584](#)

LAW A 585 Admiralty (3-5)

[View course details in MyPlan: LAW A 585](#)

LAW A 586 Advanced Family Law Seminar (2-4)

Discusses family law topics previously excluded or covered only minimally including: adoption, paternity, guardianship, third-party custody, parenting plans in the child welfare context, and family law in the intimate partner violence context. Prerequisite: LAW A 580.

[View course details in MyPlan: LAW A 586](#)

LAW A 589 Elder Law (4)

[View course details in MyPlan: LAW A 589](#)

LAW A 590 Constitutional Law: Equal Protection, Fundamental Rights, and Due Process of Law (2-5, max. 5)

[View course details in MyPlan: LAW A 590](#)

LAW A 591 Constitutional Law: Freedom of Expression (4-5)

[View course details in MyPlan: LAW A 591](#)

LAW A 592 Constitutional Law II ([2-8]-, max. 8)

Examines individual constitutional rights, primarily involving guarantees of due process and equal protection found in the 5th and 14th Amendments. Focuses on constitutionality of laws that classify people on basis of race, sex, sexual orientation, and other bases, as well as laws that restrict abortion, contraception, sexual activity, and other individual freedoms. Prerequisite: LAW A 507.

[View course details in MyPlan: LAW A 592](#)

LAW A 595 Jurisprudence and Legal Philosophy ([2-4]-, max. 4)

Surveys classic jurisprudential questions in the study of the nature, norms, and justifications of legal systems. Focuses on theories of adjudication, and covers the major twentieth and twenty-first century schools of jurisprudential thought, especially American Legal Realism, Natural Law, Legal Positivism, and Critical Legal Theory.

[View course details in MyPlan: LAW A 595](#)

LAW A 597 Intensive Legal Writing Workshop (2-4)

Focuses on how the rhetorical situation of legal writing influences choices about grammar, syntax, sentence structure, and paragraph structure. Students learn to use structures that best serve law-trained readers' needs for clear, concise, cohesive writing, and practice critical reading skills and techniques for self- and peer-editing.

[View course details in MyPlan: LAW A 597](#)

LAW A 598 Legal Research I (3)

Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Offered: jointly with LIS 591.

[View course details in MyPlan: LAW A 598](#)

LAW A 599 Legal Research Methods (3/4)

Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LIS 592.

Offered: jointly with JSIS D 553.

[View course details in MyPlan: LAW B 553](#)

LAW B 554 Research Tutorial ([1-15]-, max. 15)

Introduces students to social science research methods that may be applicable to their research agenda. Focuses on reading, discussion, commentary, writing, and especially rewriting under close and targeted supervision by the professor. Offered: jointly with JSIS 595.

[View course details in MyPlan: LAW B 554](#)

LAW B 555 Roman Law (3)

[View course details in MyPlan: LAW B 555](#)

LAW B 556 Islamic Law (2-5)

Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with NEAR E 536.

[View course details in MyPlan: LAW B 556](#)

LAW B 557 Graduate Writing Seminar ([2-6]-, max. 6)

Through class instruction and individual tutoring, students select research topics, submit periodic writing assignments, and make formal presentations, culminating in the submission of a major research paper.

[View course details in MyPlan: LAW B 557](#)

LAW B 558 Doctoral Thesis Seminar (2-10, max. 10)

Students draft thesis abstracts, tables of contents, preliminary chapters, and present arguments orally to identify core theories and applied studies to incorporate in their work. Read a selection of published work and indicative articles drawn from the list of relevant sources for individual thesis-in-development.

[View course details in MyPlan: LAW B 558](#)

LAW B 559 Comparative Law: Europe, Latin America, and East Asia (4)

[View course details in MyPlan: LAW B 559](#)

LAW B 560 Criminal Justice Externship (1-18, max. 18)

Credit/no-credit only.

[View course details in MyPlan: LAW B 560](#)

LAW B 561 International Law of the Sea (3-4)

[View course details in MyPlan: LAW B 561](#)

LAW B 562 Quantitative Methods (4)

Covers logic, applications, and limits of quantitative reasoning in the law. Includes mathematics from areas such as statistics, game theory, and social-choice theory, together with legal examples from areas such as discrimination, torts, and CLS to help (re)consider issues such as proof, deterrence, and identity politics.

[View course details in MyPlan: LAW B 562](#)

LAW B 563 Marine Law and Policy Seminar ([2-6]-, max. 6)

Study and research in selected legal problems relating to ocean and coastal law, marine trade and transportation, marine resources, and protection of the marine environment. Students prepare and present a research paper and critique papers prepared by other students. Prerequisite: LAW B 561, LAW B 565.

[View course details in MyPlan: LAW B 563](#)

LAW B 565 U.S. Coastal and Ocean Law (3-5)

Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation.

[View course details in MyPlan: LAW B 565](#)

LAW B 566 Legal Problem Solving in the Corporate Context (3)

This course will focus on the lawyer as a problem-solver in advising corporate and business clients and, in particular, resolution of legal risks at the intersection of the duties of officers and directors, corporate governance, securities regulation, internal investigations, whistleblowers, alternative means of resolving disputes, and related issues. Offered: Sp.

[View course details in MyPlan: LAW B 566](#)

LAW B 567 General Externship Perspectives Seminar (2, max. 6)

Credit/no-credit only.

[View course details in MyPlan: LAW B 567](#)

LAW B 568 Field Seminar in Law, Rights, and Governance (3-5) *K. FRIEDMAN, A. GODOY, S.*

PEKKANEN, M. SPARKE

Exposes students to theoretical and policy debates about the causes and consequences of legal evolution, rule of law, and a broad range of world governance concerns. Topics include human rights, markets, commerce, climate, environment, migration, institutions, justice, order, and rule of law. Offered: jointly with JSIS 599.

[View course details in MyPlan: LAW B 568](#)

LAW B 569 Development Innovations Laboratory (1-3, max. 6) *J. LENGA*

Students work in teams on international development and human rights projects for nonprofit/nongovernmental organizations under the close supervision of faculty. The work includes legal and factual research and often fact-gathering through interviews. Students present their findings and recommendations to client organizations orally and in writing. Offered: WSp.

[View course details in MyPlan: LAW B 569](#)

LAW B 570 Bio-entrepreneurship and the Law (3)

Covers legal issues in bio-entrepreneurship by tracking product development through a VC-backed start-up

company.

[View course details in MyPlan: LAW B 570](#)

LAW B 571 PhD Colloquium (1-3, max. 3)

Designed for students to engage with research agendas in the academy and to build a professional skill set for success - from writing conference abstracts and preparing articles for publication to 'workshopping' papers and developing their dissertations. Credit/no-credit only.

[View course details in MyPlan: LAW B 571](#)

LAW B 572 Election Law (3-4)

Examines the law of elections in the United States. Major themes include the design of electoral maps; the protection of voting rights; political parties and state action; money in politics; and the administration of elections.

[View course details in MyPlan: LAW B 572](#)

LAW B 573 Supreme Court Decision Making (2-4, max. 4)

Examines Supreme Court decision making from both a theoretical and practical perspective. Surveys representative cases on the Court's current docket. Extensive preparation required of participants, who play the roles of lawyers, justices, and commentators. Emphasis on developing appellate advocacy skills.

[View course details in MyPlan: LAW B 573](#)

LAW B 575 Family Law: Selected Topics (2-3)

Covers current cutting-edge and complex areas of family law that challenge traditional definitions of "family." Examines marriage, dissolution, and parenting disputes through the lens of "nontraditional" families and families created through medical intervention. Prerequisite: LAW A 580 or permission of instructor. Instructors: Mastroianni, Price Offered: A.

[View course details in MyPlan: LAW B 575](#)

LAW B 576 Climate Justice Seminar ([1-6]-, max. 6)

[View course details in MyPlan: LAW B 576](#)

LAW B 577 Law, Literature and Film ([2-4]-, max. 4)

An examination of literary and cinematic portrayals of, and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."

[View course details in MyPlan: LAW B 577](#)

LAW B 578 Seminar on Legal Problems of Economic Development ([1-6]-, max. 6)

[View course details in MyPlan: LAW B 578](#)

LAW B 579 Law and Development: History and Theories (3-4) *Ramasastri*

Examines the role of law in fostering economic and social development in developing countries, emerging markets, and nations in transition. Provides a historical overview of the role of law in alleviating poverty and exposes students to key theoretical perspectives. Offered: A.

[View course details in MyPlan: LAW B 579](#)

LAW B 580 Externship Tutorial (2)

Credit/no-credit only.

[View course details in MyPlan: LAW B 580](#)

LAW B 581 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment ([1-6]-, max. 6)

[View course details in MyPlan: LAW B 581](#)

LAW B 582 International Development Practicum (1-8, max. 8)

Provides experience with an approved non-profit organization, business, judicial or legislative body, or intergovernmental or governmental agency on issues related to law and development and sustainable development. Students work under the guidance of experienced practitioners. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: LAW B 582](#)

LAW B 583 Comparative Commercial Law (1-2, max. 2) *J. WOOL*

Examines commercial law from a comparative perspective. Using documents and business transactions representative of real-world practice, it considers core commercial law topics including contracts, property, guarantees, secured transactions, and bankruptcy and compares the handling of those topics by seven major legal systems. Offered: W.

[View course details in MyPlan: LAW B 583](#)

LAW B 584 Indigenous Governance Law ([2-6]-, max. 6)

Covers advanced topics in Indian Law. Prerequisite: LAW A 565 or permission of instructor.

[View course details in MyPlan: LAW B 584](#)

LAW B 585 Natural Resources Law ([1-4]-, max. 4)

[View course details in MyPlan: LAW B 585](#)

LAW B 586 Global Development Law and Policy Workshop (2-, max. 4) *R. HEDIN, A. RAMASASTRY*

Students engage in hands on legal research to address current development challenges in partnership with key development organizations. Offered: WSp.

[View course details in MyPlan: LAW B 586](#)

LAW B 588 Title Leadership in Sustainable Development Colloquium (1-2, max. 2) *A. RAMASASTRY*

Professional development colloquium for students in Sustainable international Development graduate program. Students will meet with experts from the nonprofit sector, governmental and intergovernmental organizations and the private sector to learn about different career paths in the field of sustainability. Students will learn about key skills necessary for career placement. Offered: Sp.

[View course details in MyPlan: LAW B 588](#)

LAW B 589 Social Enterprise Law (2-3)

Social enterprise is increasingly driving commerce, corporate norms, and investment foals globally. Begins with an introduction of social enterprise, including underlying principles and legal framework, followed by in-depth analysis of governance, operational and investment considerations, both domestic and abroad Includes lectures, reading, and one student project. Offered: W.

[View course details in MyPlan: LAW B 589](#)

LAW B 590 Constitutional Law: Current and Future Issues Seminar (2)

Examines cutting edge constitutional claims currently making their way through the lower courts or that seem likely to be litigated in the near future. Prerequisite: LAW A 507 and LAW A 592.

[View course details in MyPlan: LAW B 590](#)

LAW B 591 Law and Society in Asia ([2-6]-, max. 6)

[View course details in MyPlan: LAW B 591](#)

LAW B 593 Natural Resources Commons Property (3)

A review of the different forms of natural resources and an exploration of the desirability of managing certain resources as commons or private property. Covers a review of the successes and failures by various groups in setting policy in this area.

[View course details in MyPlan: LAW B 593](#)

LAW B 594 Public Land Law Seminar ([2-6]-, max. 6)

[View course details in MyPlan: LAW B 594](#)

LAW B 595 International Humanitarian Law (3-5) *Lorenz*

Investigates International Humanitarian Law (sometimes called the Law of Armed Conflict), the field concerned with rules developed by civilized nations to protect victims of armed conflict, including the Geneva Conventions. Case studies include the conflict between Israel and the Palestinians, as well as developments in Afghanistan and Iraq. Offered: Sp.

[View course details in MyPlan: LAW B 595](#)

LAW B 596 International Protection of Human Rights ([2-4]-, max. 6)

Examines international treaty and customary law protecting fundamental human rights against abuse by governments. Major international systems studied are the U.N., the Council of Europe, and the O.A.S. Readings include inter-national and American judicial opinions, treaties, and studies by human rights groups and scholars.

[View course details in MyPlan: LAW B 596](#)

LAW B 597 Journal Seminar (1-3, max. 3)

Focuses on topic selection, research, and drafting to assist students on one of the law school journals. Provides students with the opportunity to explore a topic in depth, to think critically about current law, and to consider future developments by writing a substantial note or comment. Does not satisfy the advanced writing requirement.

[View course details in MyPlan: LAW B 597](#)

LAW B 598 Advanced Research and Writing Seminar ([1-6]-, max. 6)

[View course details in MyPlan: LAW B 598](#)

LAW B 599 Special Topics (1-12, max. 12)

[View course details in MyPlan: LAW E 523](#)

LAW E 524 Child Advocacy Clinic ([3-12]-, max. 12)

[View course details in MyPlan: LAW E 524](#)

LAW E 525 Poverty Law (3-4)

Overview of legal issues affecting poor people, including relevant background readings on poverty and access to

justice, and selection problems such as housing and homelessness, education, employment issues of low-wage workers, income support and welfare reform, consumer law, family law, and child care. Offered: A.

[View course details in MyPlan: LAW E 525](#)

LAW E 526 Law Reform in Transition Economies Seminar ([2-4]-, max. 6)

Using interdisciplinary perspectives and case studies, this seminar probes the assumptions, methods and outcomes of commercial law reform in transition economies. Also highlights and critiques the role of international lawyers in this important, emerging area of practice.

[View course details in MyPlan: LAW E 526](#)

LAW E 527 Bankruptcy Client Representation Project ([1-4]-, max. 4) *Kuno*

Provides an opportunity for students to interview a client, evaluate the appropriateness of different forms on bankruptcy as a solution to their debt problems, and provide representations in obtaining the bankruptcy. Student teams are paired with pro bono attorneys under the supervision of a part-time faculty member. Credit/no-credit only. Offered: W.

[View course details in MyPlan: LAW E 527](#)

LAW E 528 Appellate Advocacy Clinic (2-, max. 4)

Clinical training in appellate litigation with both seminar and practical components dealing with appellate procedure, strategy, and applicable substantive law. Students represent clients in state appellate court, writing at least one appellate brief and participating in oral argument.

[View course details in MyPlan: LAW E 528](#)

LAW E 529 Tribal Court Public Defense Clinic (4-, max. 12)

Offers clinical training in substantive areas of law implicated in representation of Native American tribal court criminal and dependency proceedings. Open to third year students in the JD program. Offered: AWSp.

[View course details in MyPlan: LAW E 529](#)

LAW E 530 Race and Justice Clinic (3-4, max. 12)

Focuses on how lawyers can address racial disparities for youth in the juvenile justice system by advocating in multiple forums. Students participate in direct representation on clients, community education, and coalition building. Topics include the history of race in juvenile justice, past efforts to reduce disproportionate minority contact in juvenile justice, the School to Prison Pipeline, skills training, community lawyering, and systems change.

[View course details in MyPlan: LAW E 530](#)

LAW E 532 Law and Neuroscience (3-5) *L. VAUGHN*

Explores the intersection of recent developments in neuroscience and its impact on law. After introducing basic neuroscience concepts and imaging techniques, considers the relationship of law and neuroscience, largely through looking at variety of focused topics such as brain death, pain and suffering, memory, bias, and adolescent brain. Offered: W.

[View course details in MyPlan: LAW E 532](#)

LAW E 533 Rights in America: Equality, liberty, and Democracy (4)

Deep historical exploration of a jurisprudentially revolutionary constitutional conflict that pits courts, local government, and the U.S. Congress in passionate struggles over gay and lesbian antidiscrimination rights; freedoms of speech and religion; and African-American political equality in the nation's capital. Offered: S.

[View course details in MyPlan: LAW E 533](#)

LAW E 534 Risk and Reward in Sustainable Development (3) *N. DENAMUR*

Focuses on the intersection of green, high performing buildings and the law. Students learn to identify and understand the risks and challenges presented by high-performing buildings, and analyze frameworks and strategies to manage and overcome these challenges. Offered: jointly with R E 559; Sp.

[View course details in MyPlan: LAW E 534](#)

LAW E 535 Basic Income Tax Concepts (3)

Basic federal income tax principles, how the tax law impacts a wide variety of business and personal transactions and decisions, and what a reformed tax law might look like.

[View course details in MyPlan: LAW E 535](#)

LAW E 536 Practical and Professional Responsibility Issues in the Small or Solo Law Practice (3-4)

Credit/no-credit only.

[View course details in MyPlan: LAW E 536](#)

LAW E 537 Refugee Law (2)

Examines the processes in the United States for the admission of refugees and for the adjudication of asylum claims. Explores international refugee policy and evolving legal norms concerning asylum, temporary protection, repatriation, resettlement, and internal displacement.

[View course details in MyPlan: LAW E 537](#)

LAW E 538 Transnational Civil Litigation in U.S. Courts (3-4)

Examines the law governing private civil disputes in U.S. courts arising from transnational transactions, including: jurisdiction; forum selection and choice-of-law clauses; extraterritorial service of process, discovery, and application of U.S. law; parallel proceedings; foreign sovereign immunity; Act of State doctrine; and recognition and enforcement of foreign judgments.

[View course details in MyPlan: LAW E 538](#)

LAW E 539 United States and European Union E-Commerce Law (2/3)

Compares the different attitudes to regulation of e-commerce and the information society in the U.S. and the European Union. Topics may include: an introduction to European Union institutions, regulatory, cultural themes in the Internet; e-society and e-commerce in Europe; regulation of illegal, harmful content, and Internet Service Provider liability, etc.

[View course details in MyPlan: LAW E 539](#)

LAW E 540 Transnational Litigation (3) *J. HALEY*

Considers transnational litigation involving civil, common, and hybrid law jurisdictions. Students learn nuances of how jurisdiction is asserted and forum determined in global transnational disputes. Offered: A.

[View course details in MyPlan: LAW E 540](#)

LAW E 541 Cannabis Law Seminar (2-3) *S. O'CONNOR*

Introduces students to federal and state laws governing medical and recreational cannabis. Guest lecturers include government officials, cannabis law practitioners, and industry leaders. Students write and present a substantial research or policy paper. Offered: A.

[View course details in MyPlan: LAW E 541](#)

LAW E 542 Queer Youth Advocacy (2)

Addresses the legal needs of lesbian, gay, bi-sexual, and transgendered youth. Topics include educational advocacy; legal consequences within the parent-child relationship, access, consent, and right to refuse physical and mental health services; and accessing services for homeless and foster youth.

[View course details in MyPlan: LAW E 542](#)

LAW E 544 Privacy Law (2)

Examines the legal doctrines of privacy and confidentiality used to protect personal information. Aims to understand how courts and legislatures seek to protect information as new technologies and institutional practices emerge. Studies scope and implications of federal statutes that attempt to establish fair information practices with respect to electronic personal information.

[View course details in MyPlan: LAW E 544](#)

LAW E 545 International Trade Law (2-4, max. 4)

Introduces the legal framework, policies, and jurisprudence of the World Trade Organization (WTO). Provides

an overview of the regulation of trade in goods, services, and intellectual property that is necessary for²⁰²³ international legal practice, and provides the policy analysis to better understand the trade dimensions of international legal disputes.

[View course details in MyPlan: LAW E 545](#)

LAW E 546 International Commercial Arbitration (2-3)

Introduces the legal framework of international commercial arbitration (ICA) with a focus on the New York Convention of 1958 and the United States Federal Arbitration Act of 1925.

[View course details in MyPlan: LAW E 546](#)

LAW E 547 Robotics Law and Policy (2)

Explores the legal and policy aspects of near-term robotics and artificial intelligence. Relevant technologies include driverless cars, drones, medical, personal or service robots, and various expert systems. Readings draw from multiple disciplines, but focus particularly on legal or policy sources. Offered: Sp.

[View course details in MyPlan: LAW E 547](#)

LAW E 549 International Investment Law and Practice (4/5)

Examines the rise of international investment law and practice, including topics such as Bilateral Investment Treaties (BITs), standards of treatment, investor-state arbitrations, and social and political controversies related to the governance of foreign direct investment (FDI) in developed and developing countries. Offered: jointly with JSIS B 549.

[View course details in MyPlan: LAW E 549](#)

LAW E 550 Complex Litigation Seminar (2-4)

Examines practical and theoretical problems associated with complex litigation, including class actions and multidistrict litigation. Prerequisite: either LAW B 500 or LAW B 507.

[View course details in MyPlan: LAW E 550](#)

LAW E 551 Law and Entrepreneurship (3/4)

Planning-oriented course uses the problem method to explore the corporate tax and securities law, general business and financial considerations related to small business formation and financing. Prerequisite: LAW A 515; LAW A 530.

[View course details in MyPlan: LAW E 551](#)

LAW E 553 Technology Law and Public Policy (2)

Survey of the domains of public policies that have been affected by the information revolution. Examines issues from Internet taxation, to personal data privacy, information warfare. Discusses the implications of the new public policies and whether it is feasible for states to enact different information policies.

[View course details in MyPlan: LAW E 553](#)

LAW E 554 Technology Law and Public Policy Clinic ([2-4]-, max. 12)

Clinical training in legislative and public policy advocacy under supervision of law school faculty. Examines legislative process, drafting, commentary and advocacy, appellate advocacy, and professional responsibility concerns. Supervised practice experience representing public interest with respect to law and technology.

Prerequisite: LAW E 553, which may be taken concurrently. Credit/no-credit only.

[View course details in MyPlan: LAW E 554](#)

LAW E 555 Legislation ([2-5]-, max. 5)

Studies topics related to legislation and the legislative process. Examines the structure and operation of legislative bodies as well as the contemporary debates and laws that surround the process. Considers the theories and canons of statutory construction and interpretation. Introduces the basic techniques of statutory drafting. Offered: W.

[View course details in MyPlan: LAW E 555](#)

LAW E 556 International Human Rights Clinic ([1-12]-, max. 12)

Interdisciplinary clinical training in international human rights. Includes seminar component on legal issues, practice skills, and reflections on human rights projects. Fieldwork on human rights projects tests, develops, and enhances skills training through real-world human rights practice with cross-campus, U.S., and international partnerships. Credit/no-credit only. Offered: AWP.

[View course details in MyPlan: LAW E 556](#)

LAW E 557 Human Rights Advocacy Seminar (2-4)

Provides interdisciplinary training in international human rights advocacy. Provides background knowledge and exposure to skills needed to participate effectively in advocacy efforts, including the Interdisciplinary International Human Rights Clinic. Offered: AWP.

[View course details in MyPlan: LAW E 557](#)

LAW E 558 Voting Rights Research and the Law (3)

Address two primary topics related to the Voting Rights Act of 1965, Sections 2 and 5, and their application today: 1) redistricting and minority representation; and 2) the protection or suppression of the right to vote. Also includes introductory research methods and statistical analysis.

[View course details in MyPlan: LAW E 558](#)

LAW E 560 Contemporary Muslim Legal Systems Seminar (2-6, max. 6)

Provides a forum for in-depth research of legal developments in nations where governments are trying to establish legal systems that ensure economic development and human rights, while at the same time ensuring that their law respects "Islamic norms." Prerequisite: LAW B 556. Instructors: Lombardi Offered: A.

[View course details in MyPlan: LAW E 560](#)

LAW E 561 Critical Race Theory (2-4)

Provides an overview of Critical Race Theory (CRT) and the contrasts between CRT and liberal and conservative analytical frameworks on race and the law. Examines the questions and criticisms raised about CRT, as well as the impact of the field on legal and political discourse.

[View course details in MyPlan: LAW E 561](#)

LAW E 562 Legal Issues in Museums (4)

Explores the legal issues faced by art and science museums. Topics include copyright/trademark law, how the First Amendment protects controversial exhibits, repatriating Native American remains and cultural artifacts, donor rights, art appraising, wartime looting, and the ongoing debate over stewardship and ownership of the world's natural and cultural resources. Offered: jointly with MUSEUM 562.

[View course details in MyPlan: LAW E 562](#)

LAW E 566 Innocence Project Northwest Clinic (3-4, max. 12)

Offers students clinical training investigating and litigating claims of actual innocence on behalf of prisoners serving lengthy sentences for serious crimes. Open to second- and third-year students in the JD program.

[View course details in MyPlan: LAW E 566](#)

LAW E 567 Technology Transfer Law and Policy Seminar (2) O'Connor

Covers the law and policy affecting university and non-profit research commercialization and technology transfer. Focuses on the Bayh-Dole Act, the laws and regulations covering data, copyrightable works, materials, tax exempt issues, employee assignments, and other matters. Offered: W.

[View course details in MyPlan: LAW E 567](#)

LAW E 568 Indian Law Clinic (4-, max. 12)

Supervised practice component on Indian law practice and procedure and advocacy skills. Provide legal advice, brief services, and representation to low income Indian clients under the direct supervision of a practicing attorney. Client counseling research, negotiation, and community education. Offered: AWP.

[View course details in MyPlan: LAW E 568](#)

LAW E 569 Advanced Mediation Practicum (3) *Ewalt*

Advanced clinical practicum in mediation under the supervision of the faculty and experienced mediators. Students convene and mediate cases referred to the Mediation Clinic from government agencies and other sources. Only for students who have successfully completed the Mediation Clinic LAW B 526, or have other comparable experience. Offered: A.

[View course details in MyPlan: LAW E 569](#)

LAW E 570 International Economic Relations and Comparative Trade Policy (3/4)

[View course details in MyPlan: LAW E 570](#)

LAW E 571 LatCrit Theory, Praxis and Community Seminar (2)

This course provides an introduction to the history of Latinas/os and the U.S. legal system and an overview of LatCrit Theory from its origins to its present focus with particular attention on contemporary legal and social issues affecting Latina/o communities.

[View course details in MyPlan: LAW E 571](#)

LAW E 572 Race and the Law (3-4)

Evaluates the legal regulation of race in the United States. Addresses the racial and legal history of major groups in the United States, including African-Americans, Asian-American, Latinos, Native Americans, and whites, and examines the nexus between law and the construction of race as a concept and locus of identity.

[View course details in MyPlan: LAW E 572](#)

LAW E 575 Veterans Legal Aid Clinic (3, max. 9)

Students provide legal aid to low income veterans on upgrading military discharges, child support, VA housing programs, correcting criminal convictions, reinstating suspended driver licenses, assistance before VA on overpayments or complex benefits issues. Specialized outreach and service provided to incarcerated veterans, veterans in treatment courts, women veterans and homeless/at-risk veterans.

[View course details in MyPlan: LAW E 575](#)

LAW E 578 LLM Early Bar Prep (2-8, max. 8) *M. SHAW*

Provides LLM students an early start on bar exam preparation. Students review heavily tested areas across several bar exam subject areas while learning test taking strategy for the Essay Multistate and MPT portions of the Washington UBE, NY, or CA bar exams. Offered: WSp.

[View course details in MyPlan: LAW E 578](#)

LAW E 579 International and Foreign Law Research (2-3)

Overview of international law materials. Examines primary materials in the vernacular and in translations: constitutions, charters, codes, administrative rules, cases, treaties, and other international agreements. Focuses on practice tools such as directories, guides, digests, and proceedings. Prerequisite: LAW A 506 or permission of instructor.

[View course details in MyPlan: LAW E 579](#)

LAW E 580 Gender Violence and the Law (3-4)

Introduces substantive legal areas including: evidence and rape shield laws; protection orders; civil liability of perpetrators and third-parties, and restorative civil remedies in housing, employment, and education contexts. Looks at national trends and primarily focuses on Washington State Law.

[View course details in MyPlan: LAW E 580](#)

LAW E 581 Reproductive Rights and Justice Seminar (4) *Ainsworth*

Provides students with an in-depth study of the constitutional framework governing reproductive rights, as well as critiques of that framework from feminist theorist, those who oppose abortion and contraception, and those whose reproduction and sexuality have been historically marginalized and regulated. Studies different bases in the law for reproductive rights claims, including privacy, equality, and dignity. Offered: A.

[View course details in MyPlan: LAW E 581](#)

LAW E 582 Information Policy: Domestic and Global (5)

National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries. Coverage includes freedom of information privacy, copyright, telecommunications, and emerging technologies.

[View course details in MyPlan: LAW E 582](#)

LAW E 583 Globalization and the Law (1-6, max. 6)

Focuses on the rise of global law, intersection of national, international, and global law, and the legitimacy of global law.

[View course details in MyPlan: LAW E 583](#)

LAW E 588 Trademark and Unfair Competition Law (3) *Hoffmann*

Provides a comprehensive review of issues relating to protection of trademarks and other trade identity symbols under the common law and the Federal Lanham Act. Offered: A.

[View course details in MyPlan: LAW E 588](#)

LAW E 590 Incarcerated Parents Advocacy Clinic ([4-5]-, max. 9)

Students advocate for incarcerated parents seeking to preserve relationships with children despite incarceration. Supervised by clinic faculty, students represent incarcerated parents in dependency and other court proceedings, working with clients and families to maintain the parent-child relationship. Students develop interviewing and counseling, negotiations, and trial preparation skills. Credit/no-credit only.

[View course details in MyPlan: LAW E 590](#)

LAW E 591 Non-Profit Organizations Clinic (1-3, max. 3)

Provides students with an opportunity to represent a real client in setting up a non-profit organization and applying for tax-exempt status. Students draft multiple documents such as articles of incorporation, applications for tax-exempt status, and client communications. Credit/no-credit only.

[View course details in MyPlan: LAW E 591](#)

LAW E 592 Federal Appellate Advocacy (1-6, max. 6)

Representation of an otherwise pro se litigant in an appeal in the Ninth Circuit. Preparation of the opening and reply brief and conduct the oral argument. Requires substantial research, multiple drafts, and painstaking familiarity with the record. Prerequisite: permission of the instructor. Credit/no-credit only.

[View course details in MyPlan: LAW E 592](#)

LAW E 594 Regulatory Environmental Law and Policy ([1-12]-, max. 12)

Examines the applied and theoretical dimensions of environmental rule-making, with particular emphasis on the development of an administrative record. Students prepare written comments on pending rules proposed by governmental agencies. Prerequisite: either LAW A 527 or LAW B 585; LAW A 509, which may be taken concurrently. Credit/no-credit only.

[View course details in MyPlan: LAW E 594](#)

LAW E 595 Animal Law (3)

Examines substantive law and procedure, specific cases, legislation, and background societal mores that force an evolution and backlash in the level of jurisprudential and legislative comfort with new ways of seeing and speaking about animals other than humans. Offered: WSp.

[View course details in MyPlan: LAW E 595](#)

LAW E 596 Wildlife Law Seminar (3) *Anderson, Knudsen*

Covers the basic issues involved in the law of fish and wildlife management. Topics include the relationship between property and wildlife, federalism issues, and international regulatory regimes.

[View course details in MyPlan: LAW E 596](#)

LAW E 597 Global Warming and Justice Seminar (4) *Rodgers*

Explores case studies (worldwide but with an emphasis on indigenous peoples) addressing multiple legal

responses to the consequences of climate change. Explores remedies under U.S. and international law. Offered: WSp.

[View course details in MyPlan: LAW E 597](#)

LAW E 598 Climate Change Law (3-4) *Rodgers*

Develops student understanding of the consequences of anticipated climate change across a spectrum of issues that include human health, the Earth, and its oceans. Covers the practice of agriculture, revised energy futures, legislative responses to climate change, and local, state, regional, and tribal efforts to address it. Offered: Sp.

[View course details in MyPlan: LAW E 598](#)

LAW E 599 Legislative Advocacy Clinic (2-6, max. 15)

Clinical training in legislative and public policy advocacy. Topics include the legislative process, drafting commentary, advocacy, building a legislative agenda, working with coalitions, and ethics. Direct work with non-profit and other organizations advocating in the state legislature to develop and move legislation as well as respond to proposed legislation. Prerequisite: LAW A 579. Offered: AWSp.

SCHOOL OF LAW

SCHOOL OF LAW

LAW (HEALTH)

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

LAW H 501 Fundamentals of Health Law (4)

Topics include: healthcare reform; obligations to provide care (including EMTALA); medical decision-making law; private health insurance and managed care (including ERISA, HIPAA, and COBRA); Medicare; Medicaid and SCHIP; regulation of healthcare providers; staff privileges and hospital-physician contracts; tax exemption; antitrust, and fraud and abuse laws.

[View course details in MyPlan: LAW H 501](#)

LAW H 502 Medical Malpractice (3-4)

[View course details in MyPlan: LAW H 502](#)

LAW H 503 Medical Ethics and Jurisprudence (3-) *Dudzinski, Kuszler*

Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with B H 535.

[View course details in MyPlan: LAW H 503](#)

LAW H 504 Legal, Ethical, and Social Issues in Public Health Genetics (3)

Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts.

Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with B H 514/PHG 512; A.

[View course details in MyPlan: LAW H 504](#)

LAW H 506 International Bioethics, Social Justice, and Health Seminar (1, max. 3) *Kuszler, Rivin*

Explores case studies of ethical dilemmas in research and medical practice and violations of international human rights norms in the design, implementation, and evaluation of health programs and policies. Bioethics and human rights law are the foundational tools for critically evaluating global health impact. Offered: AWSp.

[View course details in MyPlan: LAW H 506](#)

LAW H 507 Law, Medicine, and Ethics in the Context of Pain Management (2)

Reviews the problem of physicians failing to relieve pain of patients in the dying process and legal and ethical issues they face as well as cultural sources of the problem.

[View course details in MyPlan: LAW H 507](#)

LAW H 508 Beginning of Life: Rights and Choices (2)

Addresses the controversial legal issues engendered by our increasing control over the beginning of life. Focuses on the law, regulation, and policy implications of contraception; new reproductive and genetic technologies, including surrogate parenthood, sperm and egg donation, in-vitro fertilization, and other methods of conquering infertility; and abortion.

[View course details in MyPlan: LAW H 508](#)

LAW H 509 End of Life: Rights and Choices (2)

Address controversial legal issues engendered by our increasing control over the end of life. Focuses on patient autonomy issues at the end of life including withdrawal of life support, surrogate decision making, advance directives, and patient choice to hasten death with medical assistance (physician aid in dying). Offered: Sp.

[View course details in MyPlan: LAW H 509](#)

LAW H 510 Topics in Law and Medicine ([1-4]-, max. 4)

[View course details in MyPlan: LAW H 510](#)

LAW H 511 International Research Ethics, Law, and Policy (3) *Kuszler, Rivin*

Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, healthcare systems, and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with B H 553; A.

[View course details in MyPlan: LAW H 511](#)

LAW H 512 Public Health Law (2)

Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public health officers and healthcare industry administrators.

Offered: jointly with HSERV 551.

[View course details in MyPlan: LAW H 512](#)

LAW H 515 Global Health Law (3) *Kuszler*

Provides an examination of the legal, economic, social, ethical, and political aspects of global health. Explores the emergence of global health law as a multilateral tool to address health disparities and improve the health of the vulnerable. Offered: A.

[View course details in MyPlan: LAW H 515](#)

LAW H 516 Study Abroad: Global Health, Human Rights, and the Rights of the Child in Cambodia (10)

Study abroad exploring the theoretical underpinnings and practical aspects of the rights of the child in the context of Cambodia's health system, focusing on children with disabilities. Approaches the rights of the child from legal and health services perspectives, combining methodologies of research and analysis for practical application. Offered: S.

[View course details in MyPlan: LAW H 516](#)

LAW H 517 Legal Issues for Global Health Programs (2) *J. Lane*

Examines the role of the law, legal strategy and legal research in supporting and advancing global health programs. Provides students an outline of the legal issues impacting global health programs and instruction on working with local counsel and research partners in foreign jurisdictions. Offered: W.

[View course details in MyPlan: LAW H 517](#)

LAW H 518 Legal and Policy Solutions to Improve Global Health of Women, Adolescents, and Children (1-2, max. 2) *J. Lenga-Long, B. Shah, J. Sylker*

Explores specific examples of how legal and policy frameworks can impact health inequities for women, children, and adolescents. Teaches to formulate multi-disciplinary strategies to improve health outcomes. Credit/no-credit only. Offered: W.

[View course details in MyPlan: LAW H 518](#)

LAW H 520 Genetics and the Law (3)

Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: either LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with PHG 523; Sp.

[View course details in MyPlan: LAW H 520](#)

LAW H 521 Medicare and Medicaid Finance and Reimbursement (2-3) *Gould, Williams*

Covers the history of Medicare and Medicaid, how they are administered, how eligibility is determined, payments are made, and financing is structured. Includes changes to both programs from the Affordable Care Act, how the federal government audits providers, and the available appeals. Offered: W.

[View course details in MyPlan: LAW H 521](#)

LAW H 522 Affordable Care Act Seminar: Legal and Policy Issues in Health Reform Implementation (2)

K. Merrikin, S. Thieme Sanford

Delves into the Affordable Care Act, including its historical context, key provisions, policy choices, legal challenges, implementation issues and future directions. As part of the seminar, which utilizes a multi-disciplinary approach, each student analyses an ACA provision of interest.

[View course details in MyPlan: LAW H 522](#)

LAW H 524 Forensic Evidence (3)

Examines the application of the rules of evidence in cases that involve forensic evidence. Examines paradigmatic cases involving homicide and physical or sexual assault, although the principles examined are applicable generally in civil and criminal cases.

[View course details in MyPlan: LAW H 524](#)

LAW H 525 Business Transactions in Healthcare (3) *Snyder*

Focuses on the complex business transactions involved in modern healthcare mergers. In addition to the transactional business aspects, the students also address government rules, regulations, and prohibitions that arise. Students in teams represent different sides of the transaction in this simulated experiential learning opportunity. Offered: W.

[View course details in MyPlan: LAW H 525](#)

LAW H 526 Healthcare Employment Law (3) *Lehmann*

Focuses on employment in health care settings, and will specifically cover "at will" employment and the development of implied and express individual employment contracts; recruiting and hiring; negotiated collective bargaining agreements; managing health care employees; and termination of employment. Offered: Sp.

[View course details in MyPlan: LAW H 526](#)

LAW H 528 Health Law Practicum (1-6, max. 6)

Provides experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to health law or policy. Students work under the guidance of experienced practitioners. Both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: LAW H 528](#)

LAW H 529 HIV and the Law: Legal and Political Developments of the AIDS Crisis (2-4, max. 4) *Price*

Traces thirty years of the HIV/AIDS epidemic, beginning with the discovery of the disease through the present. Focuses on many of the socio-political-legal aspects of the HIV/IDS crisis, including discrimination, quarantine,

immigration, criminal law, insurance, public health, and family law issues. Offered: Sp.

[View course details in MyPlan: LAW H 529](#)

LAW H 530 Disability Law and Policy (3-4)

Considers the definition of disability as defined by statute (ADA, FRA), case law, and social perception. Focuses on education law and entitlements, access to and discrimination in employment, housing, public transportation, and healthcare.

[View course details in MyPlan: LAW H 530](#)

LAW H 531 Health Law Advocacy (2-4, max. 4) *Fox, Lenga-Long*

Explores select aspects of legal advocacy for vulnerable patients and surrogate decision-makers in healthcare settings. Focuses on practical, pragmatic solutions to complex health law advocacy issues, using both classroom participation and mock guardianship hearings. Offered: Sp.

[View course details in MyPlan: LAW H 531](#)

LAW H 534 Mental Health and the Law (3)

Covers medical and legal definitional issues as well as major civil and criminal law issues, including standards and procedures for involuntary commitment; consent for, and informed refusal of, treatment; de-institutionalization/community-based treatment; the insanity defense; competency to stand trial; and punishment of the mentally ill convict.

[View course details in MyPlan: LAW H 534](#)

LAW H 536 Research Ethics and Regulation (3) *Mastroianni*

Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with B H 536; W.

[View course details in MyPlan: LAW H 536](#)

LAW H 540 Health and Human Rights (3)

Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with G H 516; W.

[View course details in MyPlan: LAW H 540](#)

LAW H 545 FDA Law (3) *Kuszler*

Surveys the scope of regulatory authority accorded to the FDA. Focuses on products used in medical care, notably pharmaceutical drugs, medical devices, and biologics. Considers food safety, regulation of cosmetics, and oversight of carcinogenic substances. Offered: Sp.

[View course details in MyPlan: LAW H 545](#)

LAW H 550 Medical Products Liability Law (3)

Focuses on product liability claims arising from defective design/development, manufacture, marketing, and distribution of medical technologies. Considers the concepts of strict liability, negligence, breach of warrant, and informed consent as well as the relative roles of state and federal law. Offered: W.

[View course details in MyPlan: LAW H 550](#)

LAW H 579 Interactive Seminar (1, max. 30) *B. WEIR*

Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Credit/no-credit only. Offered: jointly with PHG 580; AWSp.

[View course details in MyPlan: LAW H 579](#)

LAW H 580 Competition in Health Care (3)

Examines the role competition and its opposite, regulation, play in the healthcare industry in the United States.

[View course details in MyPlan: LAW H 580](#)

LAW H 582 Healthcare Fraud and Abuse (2-3)

Considers federal and state laws that impose criminal and civil penalties on healthcare providers for activities ranging from payment for referrals, submissions of false claims, misconduct in medical research, the illegal disclosure of patient information, and the abuse and neglect of patients in long term care settings.

[View course details in MyPlan: LAW H 582](#)

LAW H 590 Advanced Research and Writing Seminar in Health Law (2-, max. 4) *Kuszler*

Dedicated research and writing seminar. Includes a substantial paper on a health law topic. Offered: WSp.

[View course details in MyPlan: LAW H 590](#)

LAW H 599 Health Law Tutorial (1-4, max. 4)

Focuses on a specialized area of health law. Prerequisite: limited to students in the graduate program in health law; must be approved by the program director. Offered: AWSp.

SCHOOL OF LAW

SCHOOL OF LAW

LAW (INTELLECTUAL PROPERTY)

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

LAW P 501 Intellectual Property Law Core (6-8)

Intensive study of intellectual property law core subjects: patents, copyrights, trade secrets, and trademarks. Examines fundamental principles, their underlying policies, and how the laws inter-relate. Not open to students who have taken LAW A 522, LAW A 546, LAW E 567, or LAW E 588.

[View course details in MyPlan: LAW P 501](#)

LAW P 503 Introduction to American Legal Systems and Skills (2-3)

Introduces the U.S. system of state and federal courts in the context of intellectual property. Discusses how intellectual property laws come from the common law as well as state and federal statutes and regulations. Teaches legal research, writing, case briefing, and analysis skills. Offered: A.

[View course details in MyPlan: LAW P 503](#)

LAW P 504 Economic Analysis of Intellectual Property (2-3)

Explores the intersection between intellectual property law and economics from both a macro and micro economic perspective; economic justification of intellectual property law; and portfolio management tools that can evaluate intellectual property protection as an investment. Prerequisite: either LAW P 501 or LAW E 567. Offered: W.

[View course details in MyPlan: LAW P 504](#)

LAW P 505 International Intellectual Property Law (2-3)

Focuses on international treaties as they relate to protection of trademarks and copyrights. Introduces international aspects of branches of intellectual property, including general principles of comparative and international law, and specific law related to obtaining and enforcing intellectual property rights in foreign countries. Prerequisite: either LAW A 522, LAW E 567, LAW E 588, or LAW P 501.

[View course details in MyPlan: LAW P 505](#)

LAW P 506 Transnational Intellectual Property Law Theory and Practice (4) *Takenaka*

Studies comparative intellectual property law using a series of lectures, license exercises, and a mock trial. Consists of a series of lectures on campus followed by a one-week intensive transnational seminar hosted by a

law school in Asia or Europe. Offered: Sp.
[View course details in MyPlan: LAW P 506](#)

LAW P 509 Antitrust and Intellectual Property Rights (2-4) *Bangasser*

Examines in-depth application of competition law and policy to the creation and exploration of intellectual property. Offered: Sp.

[View course details in MyPlan: LAW P 509](#)

LAW P 510 Advanced Research and Writing Seminar (2-, max. 4) *Gomulkiewicz*

Instructs IP LL.M students in the research and writing skills necessary to write a major legal research paper. Offered: A.

[View course details in MyPlan: LAW P 510](#)

LAW P 522 Advanced Copyright Law (2-5)

Advanced, in-depth study of copyright law and policy. Explores the boundaries of copyright protection and how copyright law relates to other intellectual property laws. Prerequisite: either LAW A 522, LAW E 567, or LAW P 501.

[View course details in MyPlan: LAW P 522](#)

LAW P 525 Intellectual Property Law Seminar ([1-4]-, max. 4)

Explores current controversies and important topics in intellectual property law and policy. Welcomes visiting speakers from industry, government, and the academy to discuss these cutting-edge issues.

[View course details in MyPlan: LAW P 525](#)

LAW P 528 LLM Intellectual Property Law Practicum (1-4, max. 6)

Experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to intellectual property law and policy. Students work under the guidance of experienced practitioners; both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only.

[View course details in MyPlan: LAW P 528](#)

LAW P 535 Entertainment Law (3)

A primer on the various forms of legal protection (trade secrets, copyright, trademarks, publicity law, and licensing) that form the bases for various types of entertainment. Considers key industries: books, music, movies, television, internet, and computer games. Prerequisite: LAW P 501 or permission of the instructor.

[View course details in MyPlan: LAW P 535](#)

LAW P 539 Law, Technology, and Development (2-3) *Snyder, Winn*

Provides an overview of selected principles and theories of development economies, and considers the implications of technological innovation, intellectual property rights, government regulation, trade policy, and technical standards for the achievement of development objectives. Mass media coverage of current developments enriches class discussions.

[View course details in MyPlan: LAW P 539](#)

LAW P 543 Intellectual Property Law in East Asia (2-3)

[View course details in MyPlan: LAW P 543](#)

LAW P 545 Advanced Patent Law Seminar (3)

Studies public policy and practice considerations relating to patenting research results in high technology. Examines the most up-to-date issues in legal protection of technology from the comparative law perspective. Prerequisite: either LAW A 546 or LAW P 501. Instructors: Taylor Offered: W.

[View course details in MyPlan: LAW P 545](#)

LAW P 546 Advanced Trademark Law (3)

Covers advanced procedural and substantive topics of trademark law including protection of trade dress, online

trademark infringement, and global trademark protection including gray market issues. Students write²⁰³⁵ and present a research paper on a topic related to trademark law and policy. Prerequisite: either LAW P 501 or LAW P 567. Instructors: Takenaka Offered: W.

[View course details in MyPlan: LAW P 546](#)

LAW P 547 Legal Protection for Computer Software (3)

Addresses copyright, patent, trademark, trade dress, trade secret, and contract protection for software. Also addresses how the law places boundaries around legal protection through anti-trust law and the doctrines of fair use and preemption.

[View course details in MyPlan: LAW P 547](#)

LAW P 548 Litigation Strategies in Technology Protection (3)

Deals with procedural and substantive legal issues in enforcement of patents. Proceeds through a litigation in the order that parties normally would. Teaches substantive legal issues in conjunction with procedural and strategic considerations. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

[View course details in MyPlan: LAW P 548](#)

LAW P 550 Patent Prosecution (4)

Addresses fundamentals of patent application drafting, through a combination of lectures and assignments. Addresses all aspects of proceedings before the U.S. Patent and Trademark Office, including preparing new applications, and examiner interviews. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

[View course details in MyPlan: LAW P 550](#)

LAW P 551 Patent Prosecution and Counseling Practicum (4) *T. CULBERT*

Explores the representation of under-resourced investors in prosecuting patent applications before the United States Patent and Trademark Office. Practicing patent attorneys guide the students on the mechanics of patent prosecution. A weekly lecture will provide instruction on patent law fundamentals. Classroom time will include small group collaborative exercises.

[View course details in MyPlan: LAW P 551](#)

LAW P 552 Strategic Intellectual Property Commercialization (3)

Comprehensive coverage of issues related to exploitation of intellectual property rights as a business asset for new companies, or as a source of income for existing businesses. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

[View course details in MyPlan: LAW P 552](#)

LAW P 567 Survey of Intellectual Property (3-6, max. 6)

Intended for both law students who are only interested in a general overview of intellectual property and non-law students who are seeking a certificate in intellectual property law and policy. Designed as an alternative to Patents, Trademark and Unfair Competition Law, and Copyrights. Prerequisite: either LAW A 522, LAW A 546, LAW E 588, or LAW P 501. Instructors: O' Connor Offered: W.

[View course details in MyPlan: LAW P 567](#)

LAW P 577 Drafting Intellectual Property Licenses (3)

Covers advanced drafting and negotiating licenses and other technology agreements. Credit/no-credit only.

[View course details in MyPlan: LAW P 577](#)

LAW P 589 IP Innovations in Science and Technology (2-, max. 6) *Takenaka*

Covers controversial intellectual property law and policy questions arising from evolving science, technology and e-commerce, and addresses cutting edge issues from a multidisciplinary perspective. Examines the current legal regimes and research environment and explores innovative methods for maximizing the exploitation of advanced science and technology. Offered: AWSp.

[View course details in MyPlan: LAW P 589](#)

LAW P 590 Graduate Intellectual Property Law Tutorial (1-4, max. 4)

Focuses on a specialized area of intellectual property law. Limited to students in the graduate program in intellectual property law and policy. Tutorial must be approved by the program director.

SCHOOL OF LAW

SCHOOL OF LAW

LAW (TAXATION)

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

LAW T 502 Federal Tax Controversies and Procedures (2-3)

[View course details in MyPlan: LAW T 502](#)

LAW T 503 Problems of Timing (2-3)

[View course details in MyPlan: LAW T 503](#)

LAW T 504 Income Taxation of Business and Investments (3-5) *M. HATFIELD*

Addresses the fundamental issues of the taxation of income related to businesses and investments. Topics include business deductions; capital expenditures; depreciation; below market loans; non-recourse debt; methods of accounting; gains and losses; like-kind exchanges; installment sales; passive activity losses and credits; and the at-risk rules. Offered: A.

[View course details in MyPlan: LAW T 504](#)

LAW T 505 Introduction to Income Taxation (2)

Addresses a number of fundamental income tax concepts, including the computation of individual tax liability, statutory exclusions, deductions, and gains. Also deals with issues related to character and timing.

[View course details in MyPlan: LAW T 505](#)

LAW T 506 Tax Practice and Skills (1-4, max. 4)

Orientation to core concepts of tax practice, including administrative structure and nature of tax law, nuances of statutory interpretation, and the relative authority of statutory, administrative, and judicial sources. Includes overview of print and online tools for federal tax research. Credit/no-credit only.

[View course details in MyPlan: LAW T 506](#)

LAW T 507 Federal Tax Policy Seminar (2-4, max. 4)

Examines the theoretical and policy considerations applied in assessing existing and proposed federal tax regimes. Topics include: the nature of the income tax as a tax on saving and consumption; consumption taxes as alternatives to taxes on income; tax policy and charitable giving; taxes and the poor; and more.

[View course details in MyPlan: LAW T 507](#)

LAW T 510 Estate and Gift Taxation (3)

[View course details in MyPlan: LAW T 510](#)

LAW T 511 Taxation of Partners and Partnerships ([1-4]-, max. 4)

[View course details in MyPlan: LAW T 511](#)

LAW T 512 Exempt Organizations ([2-4]-, max. 4)

[View course details in MyPlan: LAW T 512](#)

LAW T 513 Estate Planning (3)

[View course details in MyPlan: LAW T 513](#)

LAW T 514 Drafting Estate Planning Documents (2)

Includes the drafting of several documents used in contemporary estate planning practice, including wills, trusts, client letters, powers of attorney, healthcare directives, gift and estate tax returns, and opinion letters.

Prerequisite: LAW T 513, which may be taken concurrently. Instructors: Adams Offered: Sp.

[View course details in MyPlan: LAW T 514](#)

LAW T 515 International Taxation I (3)

[View course details in MyPlan: LAW T 515](#)

LAW T 516 International Taxation II (3)

[View course details in MyPlan: LAW T 516](#)

LAW T 517 Estate and Gift Taxation II (2)

[View course details in MyPlan: LAW T 517](#)

LAW T 518 Taxation of S Corporations (2)

[View course details in MyPlan: LAW T 518](#)

LAW T 519 Canadian-United States Tax Issues (2)

Overview to various cross-border issues, including the Canadian income tax (and its GST tax), residency for Canadian tax purposes, principles relating to operation of Canadian business in the United States and profit repatriation, and U.S. investment in Canada and similar repatriation issues.

[View course details in MyPlan: LAW T 519](#)

LAW T 520 Professional Regulation of Tax Lawyers (2-3)

Addresses the professional regulation of tax lawyers by Congress, the IRS, state bars, and professional associations. May address legal malpractice and criminal liability issues for tax lawyers.

[View course details in MyPlan: LAW T 520](#)

LAW T 521 Compensation and Benefits I (3)

[View course details in MyPlan: LAW T 521](#)

LAW T 522 Compensation and Benefits II (2)

[View course details in MyPlan: LAW T 522](#)

LAW T 523 International Estate Planning (2)

[View course details in MyPlan: LAW T 523](#)

LAW T 524 Transfer Pricing Seminar (2) *Andrade*

Reviews section 482 of U.S. Internal Revenue Code and the Treasury regulations thereunder with a focus on multinational corporations (MNCs) and their related party transactions that are subject to the arm's length standard. Application of U.S. transfer pricing regulations to related party transactions involving MNCs.

[View course details in MyPlan: LAW T 524](#)

LAW T 525 Advising Privately-Owned Businesses (3)

Explores the role of the lawyer as an adviser through case studies examining a range of structural planning issues and the practical and analytical challenges of the planning process. Emphasizes tax and business considerations, and creative planning strategies. Prerequisite: LAW A 530; LAW A 515, which may be taken concurrently.

[View course details in MyPlan: LAW T 525](#)

LAW T 526 Federal Tax Clinic ([2/3]-, max. 9)

Clinical training in federal tax litigation under the supervision of members of the law school faculty.

[View course details in MyPlan: LAW T 526](#)

LAW T 527 Taxation of Financial Instruments (2)

Examines the classification and tax consequences of various financial instruments including: fixed, variable, and contingent rate debt instruments; secondary market transactions in debt instruments, such as coupon stripping and market discount purchases; and transactions in common stock-equity derivatives, such as notional principal contracts, hedging transactions, and monetization strategies.

[View course details in MyPlan: LAW T 527](#)

LAW T 528 Graduate Tax Practicum (1-6, max. 6)

Field-based experience in a department-approved public or private entity, of eight hours per week minimum under the guidance of experienced practitioners. The student and practitioner produce a final report summarizing the practicum experience to the supervising faculty member, who decides whether to award academic credit. Credit/no-credit only.

[View course details in MyPlan: LAW T 528](#)

LAW T 529 International Tax Practice Seminar (2-3) *Kadet*

Utilizes case studies of real-world, multi-faceted international business transactions to develop the knowledge and skills to apply international tax principles and tools to both inbound and outbound investments. Offered: Sp.

[View course details in MyPlan: LAW T 529](#)

LAW T 530 Tax Issues in Mergers and Acquisitions (2-3)

Examines the federal income taxation of business entities and their owners. Limited to coverage of the fundamental concepts of corporate and partnership taxation.

[View course details in MyPlan: LAW T 530](#)

LAW T 531 Advanced Transactional Tax Problems (2)

Examination (through case studies) of consolidated tax returns, limits on the use of tax benefits, carryover of tax attributes, classifications of debt versus equity, and corporate penalty taxes.

[View course details in MyPlan: LAW T 531](#)

LAW T 532 Taxation of Estates, Trusts, and Beneficiaries (2-3)

[View course details in MyPlan: LAW T 532](#)

LAW T 533 Tax Crimes: Investigations, Prosecutions, and Penalties (2) *Chiconie*

Focuses on elements of tax and related crimes with a view of the governmental investigative tools and powers, including IRS summonses, search warrants, and Grand Jury investigations. Covers taxpayer's rights and defenses in a criminal case; the IRS voluntary disclosure program; and the elements of civil penalties. Offered: AWSp.

[View course details in MyPlan: LAW T 533](#)

LAW T 534 State and Local Taxation (2)

[View course details in MyPlan: LAW T 534](#)

LAW T 536 Taxation of Trans-Pacific Transactions (2-3)

[View course details in MyPlan: LAW T 536](#)

LAW T 537 Business Planning ([2-6]-, max. 6)

[View course details in MyPlan: LAW T 537](#)

LAW T 538 Estate Planning for Business Interests (2-3)

Business succession and estate planning issues for the owners of closely held business, including shareholder agreements, recapitalizations, family limited partnerships and limited liability companies, taxable acquisitions, split dollar agreements, redemptions to pay death taxes, electing small business trusts and more. Prerequisite: LAW T 510

[View course details in MyPlan: LAW T 538](#)

LAW T 539 Matrimonial Tax (2)

Covers tax aspects of married relationships and the tax impact of the dissolution of a marriage. Includes joint returns, the marriage tax penalty, innocent spouse relief from joint return liability, pre-nuptial agreements, transfer tax effects of inter-spousal transfers, alimony, child support, and marital property transfers incident to divorce.

[View course details in MyPlan: LAW T 539](#)

LAW T 540 Federal Tax Research and Writing (2-4)

[View course details in MyPlan: LAW T 540](#)

LAW T 541 Limited Liability Companies (2)

[View course details in MyPlan: LAW T 541](#)

LAW T 542 State and Local Tax II: Advanced State Tax Concepts (2) *Okimoto*

Covers the interplay between the federal tax and state tax systems. Covers attributional and economic nexus, unitary business principle, state combined reporting versus federal consolidated filings, expense disallowance, adjustments to the federal tax base, fair apportionment, alternative business tax, and state tax implications of mergers and acquisitions. Offered: W.

[View course details in MyPlan: LAW T 542](#)

LAW T 543 Advanced Partnership Tax (2)

Builds on the material covered in the basic course, Taxation of Partners and Partnership. Covers more sophisticated aspects of partnership allocations; transactions between partners and partnerships; and sale or exchange of partnership interests. Prerequisite: LAW T 511.

[View course details in MyPlan: LAW T 543](#)

LAW T 544 Tax Aspects of Charitable Giving (2)

Examines income, gift, and estate tax consequences of charitable gifts of cash and property. Includes: theoretical and policy bases of charitable deduction; technical requirements; effect of receipt of benefits; percentage limitations based on donee and type of property; application of carryover rules; effect of partial cash or cash equivalent consideration.

[View course details in MyPlan: LAW T 544](#)

LAW T 545 International Taxation of Intellectual Property (2) *Smith*

Overview of the tax consequences of various types of common commercial arrangements that involve the development, ownership, and use of intangible property within multinational groups. Explores tax efficient arrangements such as contract research and licensing arrangement, cost-sharing arrangement, and the use of intangible holding companies.

[View course details in MyPlan: LAW T 545](#)

LAW T 546 Taxation of Real Estate Interests (2)

An in-depth study and analysis of the tax consequences of acquiring, developing, operating, and disposing of interests in real property. Focuses on practical approaches to structuring sale-leaseback transactions, syndications, installment sales, and like-kind exchanges. Considers the application of the passive activity loss

rules in real estate.

[View course details in MyPlan: LAW T 546](#)

LAW T 547 International Taxation of Electronic Commerce (2-, max. 4)

Electronic commerce is defined as the exchange of digital information in connection with the purchases and sale of goods and services. Seminar and discussion format. Explores the potential methods and approaches for the taxation of earnings associated with electronic commerce.

[View course details in MyPlan: LAW T 547](#)

LAW T 548 Tax Writing (2)

Designed to improve writing skills as they relate to practice of tax law. Students draft many types of tax documents. Also considers professional responsibility aspects of tax practice.

[View course details in MyPlan: LAW T 548](#)

LAW T 549 International Merger and Acquisition Transactions (2)

Examines the rules applicable to international merger and acquisition transactions, both tax-deferred and table, including the anti-inversion rules of 7874 and the rules under 367 for a variety for tax-deferred transaction structures. Also covers the unique considerations applicable to taxable acquisitions of foreign target companies.

[View course details in MyPlan: LAW T 549](#)

LAW T 550 Global Perspectives on International Taxation (2)

Concentrates on the global perspectives on international taxation with an experiential and problem-based approach to learning. Each class addresses a separate issue in international taxation from a particular jurisdiction and will focus on legal regimes, theory, and practical application. Offered: W.

School of Medicine

[Display as tabs](#)

School Overview

Dean

Paul G. Ramsey
C314 Health Sciences

Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Wyoming, Alaska, Montana, and Idaho (WWAMI). Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School's basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Seattle Children's hospital, Northwest Hospital & Medical Center, Valley Medical Center, and the Veterans Affairs Puget Sound Healthcare System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits approximately 240 medical students to its first-year class and has a total enrollment of over 1000 students pursuing the Doctor of Medicine degree. The full-time faculty numbers more than 2,100 members and there are more than 4,500 clinical faculty located throughout the WWAMI region. The affiliated University residency-training network enrolls more than 1,200 house officers. Enrollment in the graduate programs in the basic sciences exceeds 600 students, and approximately 1,000 postdoctoral fellows are enrolled in advanced training programs. The School has baccalaureate and/or graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. The School participates in training a broad spectrum of other allied health professionals. The School is also home for the Physician Assistant Training Program known as MEDEX.

WWAMI Program

The WWAMI program was initiated in 1971 as an effort to address the maldistribution and shortage of physicians in the Northwest region, provide a broader range of educational opportunities for students, and address the need for primary-care physicians oriented toward rural practice. It is an integral part of the undergraduate medical curriculum and is a fully accredited program of the School of Medicine. The WWAMI program is named for the five states (Washington, Wyoming, Alaska, Montana, and Idaho) that share resources and responsibilities in the regional educational program. Funds appropriated to the WWAMI program by the Wyoming, Alaska, Montana, and Idaho legislatures assure each state of positions for its students in the entering medical class each year.

[Academic Planning Worksheet](#)

[School Web page](#)

[Course Descriptions](#)

The University of Washington School of Medicine is nationally recognized for its regional training program (WWAMI). In addition to providing unique clinical learning opportunities, the WWAMI program allows a small-group learning experience at the regional training sites, which many students prefer. Students from Washington (Spokane), Alaska, Montana, and Idaho complete their 18-month foundational curriculum in small learning groups in their respective home states. Wyoming students complete their first 12-month foundational curriculum in Wyoming. The state of Washington provides two sites for medical students to complete their 18-month foundations curriculum:

Seattle: uwmedicine.washington.edu/Education/Md-Program

Spokane: www.medicalsciences.wsu.edu/prospectivestudents/wwamiprograminfo.html

Small group learning experiences are available in Spokane. All Washington residents are required to rank one or more of these two sites in order of preference in their secondary application. Every effort is made to match accepted Washington students with one of their preferred sites.

More information and video testimonials from first-year Spokane medical students are available at: uwmedicine.washington.edu/Education/MD-Program/Admissions/WWAMI-First-Year/Pages/default.aspx

Offers of acceptance are conditional upon agreement to participate in the WWAMI program.

Patient Care Phase Training

At the conclusion of the foundations of science phase, students enter the portion of the curriculum that is predominantly clinical. Required, selective, and elective clerkships are described below. As part of clinical training, students complete clerkships at the UW, at its affiliated hospitals, or at community clinical units located in the five-state region. During third- and fourth-year clerkships, School of Medicine full-time and clinical faculty members provide supervised clinical training in required as well as elective clerkships through the WWAMI region.

Academic Programs

Bachelor of Science

A program leading to a baccalaureate degree with a major in [microbiology](#) is offered through the College of Arts and Sciences.

Bachelor of Clinical Health Sciences

A program leading to a baccalaureate degree with a major in clinical health services is offered through the [MEDEX](#) program.

Bachelor of Science in Medical Technology

A curriculum in medical laboratory science is offered by the Department of Laboratory Medicine. This program provides study in basic laboratory science that includes clinical laboratory training and is designed to prepare knowledgeable and skilled laboratory scientists

for a variety of employment opportunities. Information concerning admission to the medical laboratory science program appears under [Laboratory Medicine](#) in this catalog.

Bachelor of Science in Prosthetics and Orthotics

The Department of Rehabilitation Medicine offers a Bachelor of Science degree in prosthetics and orthotics. The curriculum provides professional training in the basic sciences and the clinical application, design, and fabrication of prostheses and orthoses. Information concerning admission to the curriculum in prosthetics and orthotics may be found under [Rehabilitation Medicine](#) in this catalog.

MEDEX Northwest Physician Assistant Training

MEDEX Northwest, UW School of Medicine, is a program designed to train physician assistants. The program has been in existence since 1978 and is accredited by ARC-PA, the Accreditation Review Commission on Education for the Physician Assistant. MEDEX currently trains approximately 80 students annually in three didactic training sites (Seattle, Yakima, and Spokane). Discussions are currently underway to have a fourth training site in Anchorage, AK. Students return to their home communities in the WWAMI region (Washington, Wyoming, Alaska, Montana, Idaho) plus a variety of sites in Oregon and Nevada for their clinical year of training.

MEDEX Northwest is currently an eight-quarter program. The first four quarters consist of intense clinical and didactic instruction at one of the didactic training sites. The final four quarters are spent in clinical experiences throughout the Northwest region. At the completion of the program, students are eligible to sit for the National Certifying Examination for Physician Assistants.

Master of Occupational Therapy

The Department of Rehabilitation Medicine offers a graduate degree in occupational therapy. The curriculum provides professional training in the health sciences and in the theory and practice of occupational therapy as it impacts occupational performance across the life span and in the various arenas of practice. Occupational therapy addresses daily living skills including self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under [Rehabilitation Medicine](#) in this catalog.

Doctor of Physical Therapy

The Department of Rehabilitation Medicine offers a graduate degree in physical therapy. The curriculum provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to the physical therapy program appears under [Rehabilitation Medicine](#) in this catalog.

Master of Science and Doctor of Philosophy

Work leading to master's and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of [Biochemistry](#), [Bioengineering](#), [Biological Structure](#), [Immunology](#), [Microbiology](#), [Pathology](#), [Pharmacology](#), and [Physiology and Biophysics](#). Master's degree programs are offered by the departments of [Laboratory Medicine](#), [Medical History and Ethics](#), and [Rehabilitation Medicine](#). Students may work toward these degrees concurrently with the MD degree, taking additional years beyond the typical four-year medical curriculum.

Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in the basic sciences of medicine and the School of Public Health. A student who intends to work toward a graduate degree should confer with the chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show evidence of being able to take on this additional work load.

Doctor of Medicine

Upon completion of the curriculum of the School of Medicine, the MD degree is awarded to those candidates who (1) have given evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

Admission

(Procedures and policies described are subject to change. Information regarding changes is available from the School of Medicine [Admissions Office](#).)

Selection Factors

Candidates for admission to the University of Washington School of Medicine are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of, and exposure to, the needs of individuals and society and an awareness of healthcare delivery issues are desired.

Extenuating circumstances in an applicant's background are evaluated as they relate to these selection factors.

Applicants must submit scores from the Medical College Admission Test (MCAT). This examination must be taken no later than autumn of the year before matriculation and cannot be more than three years old at the time of matriculation. MCAT registration blanks are available through premedical advisers or through the Office of Admissions. Under exceptional circumstances, to be determined by the Admissions Committee, the GRE may be considered during the admission process; however, if accepted, the applicant is required to take the MCAT prior to matriculation.

The following science course requirements must be completed before matriculation but preferably by the time of application: A total of 32 semester hours or 48 quarter hours of undergraduate courses divided into (a) chemistry, 12 semester/18 quarter hours, which can be satisfied by taking any combination of inorganic or organic chemistry, biochemistry, or molecular biology courses; (b) physics, 4 semester/6 quarter hours; (c) biology, 8 semester/12 quarter hours; and (d) other ("open") science subjects, 8 semester/12 quarter hours, which can be met by taking other courses in any of the three categories above.

Although a biochemistry course is not absolutely required for admission to the medical school, it is very strongly suggested for entering students. The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and is taught with the presumption that participants have already mastered the

fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism. A comprehensive undergraduate biochemistry course is the most expedient way to gain this knowledge.

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in the required courses. Candidates should be proficient in the use of the English language and basic mathematics and are expected to have a basic understanding of personal computing and information technologies.

Students who entered in the fall of 2003 had a mean GPA of 3.69 and the following mean MCAT scores: Verbal, 10.0; Physical Science, 10.3; Biological Science, 10.8; and a median Writing Sample of P.

Completion of three years of coursework at an accredited college or university is the minimum required before possible matriculation; however, all entrants in recent years have earned bachelor's degrees. No specific major is advised. A broad background in the humanities and liberal arts is encouraged, indeed expected.

Pre-Medical Requirements

The following pre-medical course requirements must be completed prior to matriculation but preferably by the time of application; undergraduate or post-baccalaureate courses must be completed at a college or university accredited by the appropriate regional accrediting body. All candidates must demonstrate substantial academic ability in their major field as well as in the required science courses. Candidates should be proficient in the use of the English language and basic mathematics, and are expected to have a basic understanding of personal computing and information technology. All entrants in recent years have fulfilled requirements for a bachelor's degree. No specific major is advised. A broad background in the humanities and liberal arts is encouraged and expected.

Courses must include a minimum of:

1. 4 semesters or 6 quarters of social science or Humanities
2. 6 semesters or 9 quarters of chemistry and biology. The subject matter in these courses must include general chemistry, general biology, biochemistry, molecular genetics, and cell biology/cell physiology, although applicants are not required to take courses with these specific titles.
3. 2 semesters or 3 quarters of physics; or 1 semester or 2 quarters of physics plus 1 semester or 2 quarters of calculus or linear algebra

The following courses are recommended, but not required:

- Ethics
- Anatomy or comparative anatomy
- Human or mammalian physiology
- Embryology
- The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and it is taught with the assumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism.

For further information, consult:

- UW School of Medicine [Admissions website](#)
- The American Association of Medical Colleges' publication, 2012–2013 Medical School Admission Requirements (MSAR)
- [Email](#)

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise.

Application Procedure

The University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1 and no waivers are granted. After receiving the application from AMCAS, the School of Medicine asks qualified individuals to submit a \$35 application fee and supplemental application materials. Every attempt is made to notify applicants of the final action by the middle of April of the year of matriculation.

Residents of the states of Washington, Wyoming, Alaska, Montana, or Idaho are eligible to apply. Candidates from Wyoming, Alaska, Montana, and Idaho are required to submit residency certifications from their respective state certifying officers. Proof of legal residence for Washington residents also may be requested. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at the time of application.

Applicants from outside this five-state region who come from disadvantaged backgrounds or who have demonstrated a commitment to serving underserved populations are considered. Foreign applicants, in addition to the above requirements, must also have a permanent-resident visa.

Individuals with a demonstrated interest in research may apply for the MD/PhD program (Medical Scientist Training Program, or MSTP) regardless of residency.

Applications are not considered from persons who have failed to meet minimum standards at this or another medical or dental school.

The deadline for submitting additional application materials is January 13, 2012. These supplemental materials include:

1. A supplemental application form. This is sent to qualified applicants after the School of Medicine has received the AMCAS application.
2. An autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician with specific emphasis on steps taken to explore a career in medicine and eventual professional goals. Any other issues of importance to the candidate should also be included. The applicant may request that the personal comments section of the AMCAS application be used to fulfill this requirement.
3. Three additional short essays (250 word limit each)
 - a. How have your experiences prepared you to be a physician?
 - b. How do you imagine your personal and professional lives intersecting 10 years from now?

- c. What obstacles to your goals have you experienced and how have you dealt with them?
- d. For reapplicants: From your most recent application until now, how have you strengthened your application?
4. A premedical-committee letter of recommendation or three letters from instructors (either sciences or humanities) from whom the candidate has taken courses. These letters should critically evaluate the candidate's academic ability, strengths and weaknesses, the difficulty of coursework undertaken, motivation for medicine, personal maturity, and special attributes and assets. We accept up to three additional letters of recommendation. Letters of recommendation from current employers may be advantageous. All letters of recommendation should be submitted via the AMCAS Letters of Evaluation/Recommendation service. We must receive letters from AMCAS by the secondary application deadline (January 13, 2012).
5. A \$35 non-refundable application fee (check or money order only). This is automatically waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Admissions Office.
6. On-line acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Medical Education at the University of Washington School of Medicine: Admission, Retention, and Graduation Standards.
7. All acceptances are contingent on a criminal background check. Falsifying information may lead to the withdrawal of an acceptance.

Inquiries, address changes, or other information regarding the application should be transmitted in writing and directed to the Committee on Admissions, Office of Admissions, Box 356340, School of Medicine, University of Washington, Seattle, Washington 98195-6340; or email askuwsom@uw.edu.

Medical Curriculum

Basic Science Curriculum - 147 credits

The first two years of the medical-student curriculum are identified as the Basic Science Curriculum, consisting of three phases, or groups, of courses in the human biology series, courses in the sciences basic to medicine, organ systems courses taught by basic and clinical disciplines, and introduction to clinical medicine. The first phase is designed to provide the background in basic disciplines required for the organ-system courses. In the second phase, emphasis is placed on learning the normal and pathophysiologic properties of several human organ systems, and upon correlating these properties with clinical methods of data collection and problem formulation. Students pursue the introduction to clinical medicine course throughout the first two years, learning to interview patients, obtain a medical history, and perform the physical examination.

The academic demands of the Basic Science Curriculum are scaled so that most students are also able to take elective courses that broaden their background.

Basic Sciences Curriculum (generally defined as 500-level courses) - 159 credits

1. Required human biology (basic science) first-year courses
 - a. Biochemistry I and II

- b. Gross anatomy and embryology (including trunk and head and neck anatomy)
- c. Introduction to clinical medicine
- d. Introduction to immunology
- e. Mechanisms in cell physiology
- f. Medical information for decision making
- g. Microbiology and infectious disease
- h. Microscopic anatomy (histology)
- i. Musculoskeletal system
- j. Nervous system
- k. Systems of human behavior

2. Required human biology (basic science) second-year courses

- a. Cardiovascular system
- b. Cases in clinical ethics
- c. Clinical epidemiology and evidence-based medicine
- d. Gastro-intestinal system
- e. Genetics
- f. Hematology
- g. Hormones and nutrients
- h. Introduction to clinical medicine II
- i. Medicine, health, and society
- j. Mind, brain, and behavior
- k. Pathology II
- l. Principles of pharmacology
- m. Reproduction
- n. Respiratory system
- o. Rheumatology
- p. Skin system
- q. Urinary system

3. Required preceptorship:

A mentoring experience in which a practicing physician volunteers to give personal instruction, training, and supervision to a medical student during the first two years of medical school. Preceptorships offer the preclinical student an opportunity to follow a patient over time, to get to know the particular clinical field, and to experience a clinical setting over a period of eight weeks. Students report that preceptorships can be an excellent way of preparing for board examinations and clinical training.

4. Non-clinical selectives (500-level medical school courses) - 4 credits:

Students taking courses in the basic sciences curriculum are expected to pursue electives that enhance their personal medical education – i.e., special electives offered throughout the University relevant to medical education, but not involving direct

patient care (must be approved by the School of Medicine). All UW non-clinical selectives run on the regular quarterly academic calendar; hence, they may not correspond with other courses in the School of Medicine.

5. Independent investigative inquiry (III) - 8 credits:

Involves independent investigation in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. The purpose of this requirement is to allow the student to gain an understanding of the philosophy and methods of scientific investigation.

The III portion of the curriculum engages students in activities that foster the skills of life-long learning essential for practicing physicians in the twenty-first century. Students gain experience generating questions related to the practice of medicine and explore the various methods available to resolve such questions. Students are strongly urged to select a topic of particular interest and to investigate the subject independently, utilizing the advice of a faculty adviser and other resources in the WWAMI community. This is a unique opportunity for students to choose both the content and form of their learning and to pursue an interest that may not be included elsewhere in the curriculum

Clinical Curriculum (generally defined as 600-level courses) - 148 credits

The clinical curriculum is pursued in the third and fourth years of medical school. It includes prescribed clerkships to be completed by all students (84 credits or 42 weeks) in family medicine, internal medicine, obstetrics and gynecology, pediatrics, psychiatry, and surgery, plus clinical electives (32 credits or 16 weeks) in four clinical areas including clerkships in rehabilitation medicine/chronic care, emergency care/trauma, neurology, and surgery electives. Additional clinical or non-clinical selectives (a minimum of 32 credits or 16 weeks) are also required.

During the clinical curriculum, students gain clinical knowledge and gradually increase their clinical problem-solving abilities while working as junior members of the medical-care team. Each team is headed by a faculty clinician working in one of the medical school-affiliated hospitals, clinics, or practices.

1. Required clinical clerkships in the third year
 - a. Family Medicine (6 weeks, 12 credits)
 - b. Internal Medicine (12 weeks, 24 credits)
 - c. Obstetrics/gynecology (6 weeks, 12 credits)
 - d. Pediatrics (6 weeks, 12 credits)
 - e. Psychiatry (6 weeks, 12 credits)
 - f. Surgery (6 weeks, 12 credits)
2. Required clinical selectives in third or fourth year(s)
 - a. Emergency medicine (4 weeks, 8 credits)
 - b. Rehabilitation medicine/chronic care (4 weeks, 8 credits)
 - c. Neurology (4 weeks, 8 credits)
 - d. Surgery (4 weeks, 8 credits)
3. Other clinical electives (16 weeks, 32 credits)

Capstone: Preparation for Residency - 2 credits

Capstone is a required, one week course taught primarily in a small group and workshop format, designed as a “continuing medical education” course, in which fourth-year students (graduating in June of the current year) choose sessions to attend relating to the medical issues, evaluation, management, and procedures involved in their planned specialties. Grading is credit/no-credit only, and is based on attendance and tracked via evaluations.

Total minimum credits for the MD degree - 309 credits**Student Evaluation and Promotion**

The awarding of the Doctor of Medicine degree is contingent upon satisfactory completion of academic and noncognitive requirements. The latter includes the acquisition of behavioral patterns and attitudes consistent with the School's professional standards and the oath that all students take at the time of graduation. As such, student evaluation is based on observations by the faculty and others involved in teaching of the student's behavior and conduct as well as papers and examinations. Every student is required to pass Steps 1 and 2 of the United States Medical Licensing Examination, all University of Washington examinations, and to complete an approved independent investigative inquiry project before receiving the Doctor of Medicine degree. Periodic reviews of student performance are conducted by the School's Student Progress Committee. Students are informed of their deficiencies and the remedial requirements, if any, for these deficiencies. Dismissal from the School may occur if the student fails to maintain an acceptable academic record, fails to follow academic directives provided by the School's committees, or fails to develop attitudes and behavioral patterns appropriate to a career in medicine.

The Faculty Council on Academic Affairs (FCAA) reviews the Student Progress Committee's action, and the Dean of the School of Medicine has final approval of the committee's and council's recommendations. A review mechanism is available within this process. Once dismissal or withdrawal from the School has occurred, the student may petition for reinstatement through the FCAA. Reinstatement is not considered without substantial evidence that the problems causing the dismissal or withdrawal have been resolved. Only one petition through the FCAA is allowed. If more than one year elapses after the withdrawal or dismissal, the individual may be required to apply for readmission through the admission process. If a reinstatement petition is denied by the FCAA, the decision is final with no further avenue for review. Subsequent requests for admission must be directed through standard admission procedures.

Honor Society

Alpha Omega Alpha (AOA) is a national honor medical society. A charter as Alpha of Washington was granted to the School of Medicine in 1950 by AOA. Members are elected by AOA on the basis of high scholarship and good moral character. The purpose of AOA is to recognize and perpetuate excellence in the medical profession. Its goals are to promote scholarship and research in medical school, encourage high standards and conduct, and recognize high attainment in medical science, practice, and related fields. Its motto is "Worthy to serve the suffering."

Grading System

Grades awarded in each course in the MD curriculum are Pass or Fail in the first-year basic science curriculum; Honors, Pass, or Fail in the applied-science curriculum; and Honors, High Pass, Pass, or Fail in the clinical curriculum. The School's goal is to provide a

curriculum that defines the competencies to be achieved by the student at each level. However, a pattern of documented evaluator concerns about a student's performance may indicate unsatisfactory performance when the record is viewed as a whole, even though passing grades have been assigned. Honors may be awarded in a course on predetermined criteria that may involve additional work in the subject as selected by the student. The grading system precludes the ranking of students and no class standing is assigned.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

Graduation with Honors

A degree of Doctor of Medicine with Honors may be awarded to students with high achievement who, in addition, have demonstrated initiative and success in clinical and scholarly pursuits related to medicine. Candidates for graduation with honors are nominated by the departments each year and are selected on the basis of a review of their academic records by the Honors and Awards Committee.

Office of Multicultural Affairs

The Office of Multicultural Affairs assists students from disadvantaged backgrounds who are pursuing MD or MD-PhD degrees. The program nurtures interests in medical careers by providing a variety of support services and enrichment activities in the areas of recruitment, education, admission, retention, and professional development. The School considers applicants from disadvantaged backgrounds or those who have a demonstrated commitment to work with underserved populations. Students should contact the Office of Multicultural Affairs for assistance during the application process. The program offers counseling and advocacy, referrals to University and community resources, tutoring, financial-aid information, and numerous opportunities to interact with other minority health-care professionals within the community. Various student organizations also provide minority medical students a means to interact socially and pursue shared interests, to offer peer support, and to assist with community-outreach activities.

U-DOC, a high-school summer-enrichment program offered by the Office of Multicultural Affairs, is a six-week program for students who have completed their junior year in high school. U-DOC's goal is to foster, affirm, and encourage high school students' interest in the medical profession by allowing them to further explore medical careers and to obtain a valuable introduction to college life. U-DOC is offered in each of the five WWAMI states.

The Western Consortium Summer Medical Education Program (SMEP) offers undergraduate and some qualified postbaccalaureate students a six-week summer academic-enrichment program that includes biology, chemistry, physics, communications, study skills, and MCAT preparation. Structured clinical and research activities are also offered. Housing, stipends, and travel assistance are available.

A prematriculation program for entering minority or disadvantaged medical students is offered for six weeks during the summer. The program is designed to facilitate students' entry into medical school by providing instruction in histology as well as enrichment activities in areas such as study skills, stress management, test-taking skills, research, clinical practice, and community health. Stipends and travel assistance are available to students who qualify.

During the regular school year, the Office of Multicultural Affairs serves as a support network for both the academic and nonacademic needs of students, and facilitates students' access to the multiple resources in the School of Medicine, the WWAMI region, and the community.

The Native American Center of Excellence was established in 1992 as part of the Office of Multicultural Affairs to encourage Native American students to pursue medicine as a career, to promote research on Native American health issues, and to foster the preparation of Native American students for faculty roles in academic medicine. The Center of Excellence provides educational experiences that integrate Western medicine with the Native American way of life, offers a variety of support services to promote the academic development of students, and sponsors a variety of educational opportunities within the Native American community.

Inquiries and requests for additional information may be obtained from the Office of Multicultural Affairs, Box 357430, School of Medicine, University of Washington, Seattle, Washington 98195-7430; (206) 685-2489.

Medical Scientist Training (MD-PhD) Program

A limited number of highly qualified candidates who wish to pursue both the MD and PhD degrees are considered annually. MD/PhD students are permitted a wide choice of research specializations from among numerous disciplines and interdisciplinary areas of biomedical sciences. The program emphasizes continuity of both clinical and basic sciences exposure. Among participating graduate departments and interdepartmental disciplines are biochemistry, bioengineering, chemistry, environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, and physiology and biophysics. The participating interdepartmental and affiliate programs are neurobiology and behavior, molecular and cellular biology. Students can also conduct their research at the Fred Hutchinson Cancer Research Center.

Applicants who wish to be considered for the MD/PhD program must submit the Medical Scientist Training Program application as soon as possible. Both the application and any supplemental material requested must be completed by January 15. Serious consideration is rarely given to applicants with minimal research experience and/or a cumulative GPA of less than 3.50 or MCAT scores of less than 10 in each category.

Applicants should correspond directly with the administrator of the Medical Scientist Training Program: MSTP

University of Washington

Health Sciences Building, Room I264

Box 357470

Seattle WA 98195-7470

(206) 685-0762

mstp@pathology.washington.edu

www.pathology.washington.edu/mstp/

Financial Information

Fees and Other Charges

All fees and extra service charges are payable in U.S. dollars and due at the time specified for such fees and charges. The University reserves the right to change any of its fees and charges without notice. Resident tuition for 2003-2004 is \$4,149 per quarter; nonresident tuition is \$9,796 per quarter.

Financial Assistance

Financial aid awards are based on the demonstrated need of the students. All applicants for aid must submit the Free Application for Federal Student Aid (FAFSA). This requires

disclosure of financial information from the student and the student's parents. The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and the Primary Care Loan are the primary sources of aid. Institutional loans are also available from the School of Medicine. Limited amounts of grant funds are available to Washington state residents who meet specific funding criteria. Parental information is not required for grant funds, the Stafford Loan, or the Perkins Loan.

Scholarships are available through the School of Medicine scholarship fund. These awards vary in amount and require financial information from the student and the student's parents. There is a separate application for the School of Medicine scholarship, which has a May 31 due date.

Financial aid information is distributed to all accepted applicants. The FAFSA form may be obtained at www.fafsa.ed.gov or from the UW Office of Student Financial Aid or the School of Medicine Financial Aid Office. The deadline for receipt of the financial-aid application by the processor is February 28. Applicants must meet this deadline to be considered for all available aid sources regardless of the status of their admission file. Late applicants are awarded only Stafford and Unsubsidized Stafford loans.

Outside employment is discouraged while the student is enrolled in medical-school coursework.

Enrichment Opportunities

Students may enhance their medical education through a variety of sponsored activities that offer students an opportunity to explore areas of special interest, such as working in rural or urban clinics that serve medically underserved communities, undertaking medical research projects, or participating in an international exchange program with a developing country. Brief descriptions of two of the more formally structured programs follow.

Rural/Underserved Opportunities Program (RUOP)

This program exposes students to rural medicine and utilizes clinical training sites in all five states. For one month during the summer between the first and second years, students work with physicians in small communities, offering a chance to better understand the challenges and opportunities in these settings. Students receive a stipend supported by the Family Health Foundation, the Academy of Family Physicians, Area Health Education Centers, and the School of Medicine.

Medical Student Research Training Program

Summer research opportunities are offered to UW medical students interested in gaining valuable experience from training in medical research. This research is planned and carried out under the supervision of a faculty sponsor and is undertaken during the summer between the first and second years. Student trainees in the program receive a stipend supported largely by gifts given by donors specifically to fund student research. The project is ten weeks, full-time, on a working schedule of forty hours per week, and the student may not be enrolled in courses for credit during this time. At the conclusion of the summer, the students prepare posters that are presented as part of the Medical Student Research Forum.

Graduate Medical Education and Postdoctoral Training

The University of Washington School of Medicine offers a broad array of residency and fellowship programs. Training occurs at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Puget Sound Health Care System, Seattle Children's hospital, and other affiliated training sites in Seattle and throughout the WWAMI region. Postdoctoral research fellowship opportunities in the basic sciences are also offered.

Continuing Medical Education

The Office of Continuing Medical Education, School of Medicine, offers a wide variety of courses for physicians and healthcare professionals in the Pacific Northwest and throughout the nation.

Offerings include short courses of one to three days, one- to two-week board-review courses, visiting professorships, preceptorships, and mini-residencies. Other offerings include lecture series at hospitals, video-tape presentations, self-directed instructional materials, and other specific courses requested by members of the medical community throughout the WWAMI region. Information on offerings is available from its website at www.uwcme.org.

All physicians also are invited to participate in continuing medical education programs offered by clinical departments, such as grand rounds and regular conference series.

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians. All programs sponsored by the Office of Continuing Medical Education are applicable to physician relicensure requirements of the Washington Board of Medical Examiners and for Category I credit of the Physician's Recognition Award of the American Medical Association. Prescribed credit for the American Academy of Family Physicians and other types of credit are included in the program offerings when appropriate.

Brochures and calendars for courses are available for more detailed information. For information concerning Continuing Medical Education programs, contact:

Anesthesiology

[Display as tabs](#)

Department Overview

BB1459 Health Sciences

The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding medical student clerkships may be directed to Dr. John Bramhall at (206) 231-2847 or bramhall@uw.edu. Other training questions may be directed to the Residency Coordinator at (206) 543-2773 or lfg@uw.edu.

SCHOOL OF MEDICINE

ANESTHESIOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ANEST 498 Undergraduate Thesis (*) *Sivarajan*

By special arrangement. Time and credit to be arranged. Offered: AWSpS.

[View course details in MyPlan: ANEST 498](#)

ANEST 499 Undergraduate Research (*)

Specific research problems relating to pulmonary, cardiovascular, renal, obstetric, and central nervous system functions, and their alteration by anesthetic techniques and agents. Offered: AWSpS.

[View course details in MyPlan: ANEST 499](#)

ANEST 501 P-Preceptorship in Anesthesiology (1, max. 12)

An opportunity for first- and second-year medical students to gain experience with medical practice situations by observing clinical faculty members in the operating room. Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: ANEST 501](#)

ANEST 650 P-Pain Medicine Clerkship (8)

Participation as part of a Pain Medicine team in evaluation and management of patients experiencing short term post injury (surgery, trauma) pain and/or long- term pain. (Four weeks, full time). Prerequisite: Third- or fourth-year student.

[View course details in MyPlan: ANEST 650](#)

ANEST 663 Basic Anesthesia Clerkship - Cheyenne, WY (4)

Introduction to the principles of airway management, ventilator support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation.

[View course details in MyPlan: ANEST 663](#)

ANEST 665 P-Basic Anesthesia Clerkship - Anchorage (4)

Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

[View course details in MyPlan: ANEST 665](#)

ANEST 667 P-Basic Anesthesia Clerkship - Billings (4)

Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

[View course details in MyPlan: ANEST 667](#)

ANEST 668 P-Basic Anesthesia Clerkship - Missoula (4)

Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

[View course details in MyPlan: ANEST 668](#)

ANEST 671 P-Basic Anesthesia Clerkship - Boise (4)

Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

[View course details in MyPlan: ANEST 671](#)

ANEST 672 Basic Anesthesiology - Boise, ID VA (4)

Introduction to the principles of airway management, ventilator support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation (Two weeks, full-time). Prerequisite: third- or fourth- year Medicine student.

[View course details in MyPlan: ANEST 672](#)

ANEST 674 P-Basic Anesthesia Clerkship - Spokane (4)

Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

[View course details in MyPlan: ANEST 674](#)

ANEST 677 P-Basic Anesthesia Clerkship - Swedish (4)

Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

[View course details in MyPlan: ANEST 677](#)

ANEST 678 P-Basic Anesthesia Clerkship - VA (4)

Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

[View course details in MyPlan: ANEST 678](#)

ANEST 679 P-Basic Anesthesia Clerkship - HMC (4)

Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

[View course details in MyPlan: ANEST 679](#)

ANEST 680 P-Basic Anesthesia Clerkship - UWMC (4)

Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. (Two weeks, full-time). Prerequisite: third- or fourth-year student.

[View course details in MyPlan: ANEST 680](#)

ANEST 681 P-Advanced Clerkship in Anesthesiology - UWMC (8)

Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: Third- or fourth-year student.

[View course details in MyPlan: ANEST 681](#)

ANEST 682 P-Advanced Clerkship in Anesthesia - HMC (8)

Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. Prerequisite: Third- or fourth-year student.

[View course details in MyPlan: ANEST 682](#)

ANEST 683 P-Advanced Clerkship in Anesthesiology - VAMC (8)

Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.) Prerequisite: Third- or fourth-year student.

[View course details in MyPlan: ANEST 683](#)

ANEST 684 P-Advanced Clerkship in Anesthesiology - Spokane (8)

Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. (Four weeks, full-time.)

Prerequisite: third- or fourth-year medical students.

[View course details in MyPlan: ANEST 684](#)

ANEST 688 Advanced Anesthesia - Cheyenne, WY (8)

Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic.

[View course details in MyPlan: ANEST 688](#)

ANEST 697 P-Anesthesiology Special Electives (*, max. 24)

Special clerkships, externships, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain a special assignment form from the dean's office at least one month before advance registration. (Four to twelve weeks, full-time.).

Prerequisite: permission of instructor.

[View course details in MyPlan: ANEST 697](#)

ANEST 699 P-WWAMI Anesthesiology Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Biochemistry

[Display as tabs](#)

Program Overview

303 Bagley

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes.

Undergraduate Program

Adviser

303 Bagley, Box 351700

(206) 616-9880, (206) 543-9343, (206) 685-8376

advisers@chem.washington.edu

The Biochemistry Program offers the following programs of study:

- The Bachelor of Science degree with a major in biochemistry (requires 195 credits)
- The Bachelor of Arts degree with a major in biochemistry

Suggested First- and Second-Year Courses: BIOL 180, BIOL 200 (or BIOL 201, BIOL 202); CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165), CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 with one physics lab course strongly recommended).

Bachelor of Science

Program Admission Requirements

Application to BA and BS degree programs in biochemistry is competitive. Applicants are considered in the following groups: Direct Freshman Admission, Research/Honors Admission, Early Admission, and Regular Admission. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are considered twice each academic year and are due on the second Friday of October and the second Friday of April, with the exception of Direct Freshman Admission. The application and additional information is available at depts.washington.edu/chem/undergrad/.

Direct Freshman Admission

Helpful links

[Program Overview](#)

[Undergraduate Program](#)

[Time Schedule](#)

[Academic Planning Worksheet](#)

[Program Web Page](#)

[Program Faculty](#)

[Course Descriptions](#)

1. Open to freshman students formally admitted to the UW
2. Score of 5 on the AP chemistry examination
3. Indication on the UW freshman application of biochemistry as the student's first choice of major
4. Successful direct-admission applicants generally have received a minimum 1400 on the SAT (math and verbal sections), or minimum 30 on the ACT
5. Admission is for autumn quarter only

Research/Honors Admission

1. Students with exceptional records can apply for consideration for admission to the biochemistry major via the Honors or Research track. Students seeking admission should submit an application that includes:
 - a. Cover sheet (available on the Department of Chemistry website)
 - b. Unofficial transcript
 - c. Statement of purpose. May include a description of interest in biochemistry, career goals, undergraduate research interests, degree interest (BA or BS), and any other information applicant believes is useful in evaluating the application.
 - d. (Research track only) Written letter or recommendation from research adviser
2. Honors Track. Students participating in the chemistry Honors sequence who have completed the following courses with a minimum 3.00 cumulative GPA: CHEM 145, CHEM 155; MATH 124 and MATH 125, or MATH 134 and MATH 135
3. Research Track. Students who have performed at least 6 credits of undergraduate research (CHEM 199, CHEM 299, or higher) and who provide a strong recommendation from faculty research adviser. Chemistry undergraduate research may be considered as well.

Early Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165). BIOL 180; MATH 124, MATH 125 (or MATH 134, MATH 135)
2. Factors included in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed, frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.
3. Successful applicants for the BS biochemistry program typically have a cumulative GPA greater than 3.20 in courses listed above under course requirements. Successful applicants for the BA biochemistry program typically have a cumulative GPA greater than 3.00 in courses listed above under course requirements.

Regular Admission

1. Course requirements: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238 (or CHEM 335, CHEM 336); BIOL 180, BIOL 200; MATH 124, MATH 125 (or MATH 134, MATH 135)
2. Factors in the admission decision include academic performance as measured by GPA in courses required for application, difficulty of other courses completed,

frequency of incompletes or withdrawal grades, number of repeated courses, relevant work and life experience, and record of honors.

3. Successful applicants for the BS biochemistry program typically have over the minimum 2.5 cumulative GPA in courses listed above under course requirements, with no individual course grade lower than a 2.0. Successful applicants for the BA biochemistry program typically have a cumulative GPA greater than 2.00 in courses listed above under course requirements, with no individual grade below a 1.7.

Major Requirements

105 credits, as follows:

1. *General Chemistry*: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165)
2. *Organic Chemistry*: CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347)
3. *Physical Chemistry*: CHEM 452, CHEM 453 (or CHEM 455, CHEM 456, CHEM 457)
4. *Biochemistry*: BIOC 426, BIOC 440, BIOC 441, BIOC 442
5. *Biology*: BIOL 180, BIOL 200
6. *Mathematics*: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
7. *Physics*: PHYS 121, PHYS 122, PHY 123 (or PHYS 114, PHYS 115, PHYS 116), with the PHYS 121 sequence recommended
8. *Genome Science*: GENOME 361 or GENOME 371
9. 11 credits chosen from a current department list (available in 303 Bagley or at depts.washington.edu/chem/undergrad/degreeeqs.html) of upper-division science classes including math, biology, microbiology, chemistry, and genome sciences. Up to 9 credits of approved advanced-level undergraduate research may also be applied to this requirement. Research conducted outside chemistry or biochemistry must first be approved by a biochemistry adviser.
10. *Grade and Graduation Requirements*: A minimum 2.0 grade and a minimum 2.50 cumulative GPA required for all chemistry, biology, and biochemistry courses counted toward the major. Minimum 2.50 GPA required for the BIOC 440, BIOC 441, and BIOC 442 sequence. Minimum 2.50 cumulative GPA required for graduation.

Bachelor of Arts

Program admission requirements same as for BS degree, above.

Major Requirements

90-92 credits as follows:

1. *General Chemistry*: either CHEM 142, CHEM 152, CHEM 162, (or CHEM 145, CHEM 155, CHEM 165)
2. *Organic Chemistry*: either CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242, or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347

3. *Biochemistry*: BIOC 405, BIOC 406
4. *Physical Chemistry*: CHEM 452, CHEM 453
5. *Biology*: BIOL 180, BIOL 200
6. *Mathematics*: either MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136
7. *Physics (12-15 credits)*: either PHYS 121, PHYS 122, PHYS 123, or PHYS 114, PHYS 115, PHYS 116
8. *Science Electives*: 9 credits to be taken from a current department list available in 303 Bagley or at depts.washington.edu/chem/undergrad/degreeeqs.html. Up to 3 credits of advanced undergraduate research may count toward this requirement. Research conducted outside chemistry or biochemistry must first be approved by a biochemistry adviser.
9. *Grade and Graduation Requirements*: Minimum 1.7 grade in chemistry, biochemistry, and biology courses required for the major. Minimum 2.00 cumulative GPA required for graduation.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: At the conclusion of their studies, graduating biochemistry majors should possess a general working knowledge of the basic areas of biochemistry; be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of biochemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to biochemistry majors.

Students planning a career in biomedical research, the health professions, or biotechnology find the biochemistry degree to be an excellent choice. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

- *Instructional and Research Facilities*: Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately 52,000 square feet of research space, conference rooms, and a departmental library. In the immediate vicinity are the departments of Immunology, Genome Sciences, Microbiology, and Pharmacology, as well as programs in biomolecular structure, molecular medicine, neurobiology, and molecular and cellular biology, with which the department has common research interests. Laboratories are equipped with modern research equipment and are supported by external, centralized research

facilities. An emphasis on biomedical research is facilitated by the location of the department within the School of Medicine.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

Research, Internships, and Service Learning: No formal internship program.

Students are encouraged to pursue national and regional internships. See adviser for more information.

- *Program Scholarships:* Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department adviser for more information.
- *Student Organizations/Associations:*
 - Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
 - Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
 - The Free Radicals: a general undergraduate club for chemistry and biochemistry majors.

Of Special Note:

- The Bachelor of Science in biochemistry degree requires a minimum of 195 credits.
- Students are strongly encouraged to participate in undergraduate research.

SCHOOL OF MEDICINE

BIOCHEMISTRY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

BIOC 405 Introduction to Biochemistry (3) NW

Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Instructors: DiMaio, Hol, Hurley Offered: A.

[View course details in MyPlan: BIOC 405](#)

BIOC 406 Introduction to Biochemistry (3) NW

Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOC 405. Instructors: Ailion, Brzovic Offered: W.

[View course details in MyPlan: BIOC 406](#)

BIOC 426 Basic Techniques in Biochemistry (4) NW

Introduction to basic biochemistry experiments. Acquaints students (largely biochemistry majors) with basic biochemical laboratory techniques. Prerequisite: BIOC 440, which may be taken concurrently. Instructors: Lewis, Verlinde Offered: ASp.

[View course details in MyPlan: BIOC 426](#)

BIOC 440 Biochemistry (4) NW

Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: minimum grade of 2.5 BIOL 200; 2.5 in either CHEM 224, CHEM 239, or CHEM 337; 2.0 in either MATH 124, MATH 134, or MATH 144. Instructors: Brockerhoff, Klevit, Kollman Offered: A.

[View course details in MyPlan: BIOC 440](#)

BIOC 441 Biochemistry (4) NW

Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: minimum grade of 2.2 in

BIOC 440. Instructors: Hoppins, Miller, Morris, Weiner Offered: W.

[View course details in MyPlan: BIOC 441](#)

BIOC 442 Biochemistry (4) NW

Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: either 2.2 in BIOC 406 or 2.2 in BIOC 441, or a 2.2 in BIOC 451. Offered: Sp.

[View course details in MyPlan: BIOC 442](#)

BIOC 450 Honors Biochemistry: Visualizing Biochemical Concepts (4) NW *R. KLEVIT, A. WILLS*

For Biochemistry majors and molecular and cell biology majors. Core concepts in biochemistry, including protein structure, compartmentalization of reactions, thermodynamics and kinetics in a biological context, energy production, and regulation of metabolic pathways. HONORS BIOC covers the same topics as BIOC 440, but emphasizes group exercises and analysis of primary literature. Offered: A.

[View course details in MyPlan: BIOC 450](#)

BIOC 451 Honors Introduction to Biochemistry (4) *D. MORRIS, A. WEINER*

BIOC is the honors version of BIOC 441; it covers the same topics in metabolism and gene expression using the same textbook, but is taught as a group discussion of selected publications from the primary literature, with an emphasis on research strategy, experimental design, creative thinking, and scientific communication. Offered: W.

[View course details in MyPlan: BIOC 451](#)

BIOC 499 Undergraduate Research (*, max. 35)

Investigative work on enzymes, proteins, lipids, molecular biology, developmental biology, intermediary metabolism, physical biochemistry, and related fields. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: BIOC 499](#)

BIOC 510 ISCRM Research Updates and Stem Cell Club ([0/1]-, max. 12) *Ruohola-Baker, Ware*

Presents ongoing research at the Institute for Stem Cell and Regenerative Medicine. Includes diverse subject matter in regenerative medicine, with new, unpublished data, and opportunity to identify collaborations and contacts for discussion, and an understanding of the state of the art. Credit/no-credit only. Offered: jointly with CONJ 510.

[View course details in MyPlan: BIOC 510](#)

BIOC 520 Seminar (1) *J. HURLEY*

Seminar dealing with timely topics in the field of biochemistry. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: BIOC 520](#)

BIOC 530 Introduction to Structural Biology (3)

Graduate-level discussion of the structure, function, and chemistry of proteins, control of enzymatic reactions. Prerequisite: a comprehensive course in biochemistry and permission. Instructors: Baker, Daggett, Hol, Klevit, Merritt, Verlinde, Weiner, Zheng Offered: A.

[View course details in MyPlan: BIOC 530](#)

BIOC 533 Topics In Biochemistry (1, max. 30)

Provides in-depth examination of current topics in biochemistry, molecular biology, and structural biology. Designed to help participants in basic science departments become acquainted with latest ideas on selected topics. Emphasis on analysis of key concepts in the field with reference to classical papers and recent literature. Prerequisite: permission of instructor. Instructor: Miller Offered: AWSp.

[View course details in MyPlan: BIOC 533](#)

BIOC 534 Topics In Molecular Biophysics (1.5, max. 30)

Emphasis on methods used to study macromolecular structure and dynamics, including x-ray crystallography,

NMR, optical spectroscopy, computer modeling, protein folding and ligand binding. Two topics covered each quarter; students may register for one or both. Prerequisite: permission of instructor. Offered: AWSp.

[View course details in MyPlan: BIOC 534](#)

BIOC 540 Literature Review (2) *D. VEESLER*

Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: jointly with BPSD 540; A.

[View course details in MyPlan: BIOC 540](#)

BIOC 541 Literature Review (2) *Chamberlain, Loeb, Palmiter*

Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: W.

[View course details in MyPlan: BIOC 541](#)

BIOC 542 Literature Review (2) *Hauschka*

Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: Sp.

[View course details in MyPlan: BIOC 542](#)

BIOC 581 Introduction to Biochemical Research (4, max. 16)

Student works with one of the research groups within the department for one quarter and then rotates to other laboratories for second and third quarters. Prerequisite: graduate standing in biochemistry or permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: BIOC 581](#)

BIOC 600 Independent Study or Research (*-)

The Department of Bioethics and Humanities offers the following program of study:

- A minor in bioethics and humanities

Minor

Minor Requirements: 25 credits, as follows:

1. One of the following core courses: B H 311, B H 420, B H 456, B H 474/PHIL 411, or PHIL 242
2. One of the following core courses: B H 401, B H 481, or B H 485
3. Electives from an approved list to reach 25 credits. Core courses (listed in items 1 and 2, above) may be used as electives if they are not counted toward the core requirements. If a B H course is cross-listed with another department's course, the course may be counted toward the B H-course minimum even if taken under the other department's prefix. See program [website](#) for more information on electives.
4. Minimum 15 credits of bioethics and humanities courses
5. Minimum 2.0 grade in courses presented for the minor

Graduate Program

Graduate Program Coordinator
(206) 221-6548
gradprog@uw.edu

The department offers a two-year Master of Arts in bioethics, which provides students the foundational knowledge, skills, and experience to enrich their careers and broaden their competency in bioethics. The program offers training in research and clinical aspects of bioethics as well as empirical and normative methods of analysis.

Students have the opportunity to study with diverse and well-respected faculty from the University of Washington, the Treuman Katz Pediatric Bioethics Center, and the Seattle Veterans' Health Administration. The program helps prepare students to teach, publish, and conduct research that incorporates bioethics analysis.

Application and Admission

Qualified candidates include:

1. Practicing clinicians, biomedical scientists, health lawyers, post-doctoral fellows, and physicians accepted into a UW clinical fellowship program or the Treuman Katz Pediatric Bioethics Fellowship program.
2. Students currently enrolled in a professional degree program at the University of Washington (i.e. Law, Nursing, or Medicine).

Candidates should possess strong writing, critical thinking, and verbal communication skills. GRE scores are not required. Application due date is March 1.

Degree Requirements

40 credits, as follows:

1. Ethical theory (10 credits)
2. Empirical research methods (6 credits)
3. Clinical ethics (6 credits)
4. Research ethics (3 credits)
5. Approved electives (6 credits)
6. Practicum (3 credits)
7. Master's project (6 credits)

Students are encouraged to take additional electives based on interest and area of specialty, with guidance from their faculty mentor(s).

Opportunities for in-depth study on a topic of interest are available through elective courses, mentored research, and practicum experiences.

SCHOOL OF MEDICINE

BIOETHICS AND HUMANITIES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

B H 201 Topics in Bioethics and Humanities (2)

Introduces topics in clinical, research, and population health ethics and methods of ethical analysis and argumentation. Addresses topics such as the birth of bioethics, informed consent, end-of-life care, genomic medicine, social justice in healthcare and in population health, and global bioethics. Credit/no-credit only.

[View course details in MyPlan: B H 201](#)

B H 311 Ethical Issues in Modern Medicine (3) I&S N. JECKER

Case-based approach to ethical topics in medicine, such as abortion, genetic testing, physician-assisted death, and euthanasia. Emphasizes utilizing ethical principles and methods of case analysis. Offered: Sp.

[View course details in MyPlan: B H 311](#)

B H 402 Ethical Theory (5) I&S N. JECKER

Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Offered: jointly with PHIL 412.

[View course details in MyPlan: B H 402](#)

B H 404 Metaethical Theory (5) I&S N. JECKER

Studies the major metaethical theories, including both cognitivist and noncognitivist approaches. Emphasizes moral philosophy during the twentieth century, as well as contemporary commentary. Offered: jointly with PHIL 413.

[View course details in MyPlan: B H 404](#)

B H 420 Philosophical Problems in Bioethics (3) I&S Jecker

Introduces the philosophical concepts and controversies that underlie contemporary bioethical debates. Explores issues using the literature of bioethics and philosophy, contemporary film, works of fiction, and conversations with health professionals. Students learn philosophical methods of analysis and argument, and debate different sides of ethical issues.

[View course details in MyPlan: B H 420](#)

B H 421 History of Eugenics (5) I&S Woiak

Examines the history of ideas, policies, and practices associated with eugenics and human genetics from the late

nineteenth century to the present in American society and other national contexts. Offered: jointly with DIS ST 421.

[View course details in MyPlan: B H 421](#)

B H 440 Philosophy of Medicine (5) I&S *N. JECKER*

Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Offered: jointly with PHIL 459.

[View course details in MyPlan: B H 440](#)

B H 444 Ethical Implications of Emerging Biotechnology (3) *S. FULLERTON*

Introduces students to select biotechnology innovations and invites consideration of the ethical and policy implications surrounding their development and potential use. Offered: W.

[View course details in MyPlan: B H 444](#)

B H 456 Social Justice and Health (5) I&S *Blacksher*

Examines the moral grounds for the view that social inequalities in health are unjust using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity.

[View course details in MyPlan: B H 456](#)

B H 460 Reflections on Research, Responsibility, and Society (3) I&S

Explores ethical and policy issues that emerge in the conduct of basic, applied, translational, community-based, and collaborative research. Addresses the ethical debates that arise in the context of planning, implementing, and disseminating research.

[View course details in MyPlan: B H 460](#)

B H 474 Justice in Health Care (5) VLPA/I&S *N. JECKER*

Examination of the ethical problem of allocating scarce medical resources. Emphasizes the fundamental principles of justice that support alternative health policies. Offered: jointly with PHIL 411.

[View course details in MyPlan: B H 474](#)

B H 497 Bioethics and Humanites Special Electives (*-, max. 30)

[View course details in MyPlan: B H 497](#)

B H 499 Undergraduate Research (*, max. 5)

Investigative work in biomedical ethics or history of the biomedical sciences.

[View course details in MyPlan: B H 499](#)

B H 502 Ethical Theory (5) *Jecker*

Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Offered: A.

[View course details in MyPlan: B H 502](#)

B H 509 Ethics and the Social Determinants of Health (2) *Blacksher*

Engages student in ethical questions that confront healthcare workers who serve poor and minority patient populations. Using literature from social epidemiology, bioethics, and case studies, students examine questions about clinicians' duties and patient responsibilities, controversial disease prevention programs and policies, and broader questions of social justice. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: B H 509](#)

B H 513 P-Ethical Responsibilities of Medical Practice (2) *Dudzinski, McCormick*

Provides intensive and practical guidance about management of principal ethical and legal problems that arise in clinical practice: informed consent, confidentiality, decisions regarding life-support, advance directives and

surrogate decision-makers, duty to care for indigent and risky patients. One week intensive course. Offered: S. ²⁰⁷²
[View course details in MyPlan: B H 513](#)

B H 514 Legal, Ethical, and Social Issues in Public Health Genetics (3)

Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with LAW H 504/PHG 512; A.
[View course details in MyPlan: B H 514](#)

B H 518 Spirituality in Healthcare (2)

Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with FAMED 547/SOC W 587; Sp.
[View course details in MyPlan: B H 518](#)

B H 527 Social Science Research Methods (3) *D. BOWEN*

Introduces students to research methods in bioethics, ranging from qualitative to quantitative: interviews, focus groups, surveys, and experimental and observational designs. Students write research questions, match research methods to research questions, and conclude with a proposal that uses a social sciences empirical approach to address their research question. Offered: jointly with PHG 527; Sp.
[View course details in MyPlan: B H 527](#)

B H 535 Medical Ethics and Jurisprudence (3-) *Dudzinski, Kuszler*

Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with LAW H 503.
[View course details in MyPlan: B H 535](#)

B H 536 Research Ethics and Regulation (3) *Mastroianni*

Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with LAW H 536; W.
[View course details in MyPlan: B H 536](#)

B H 544 Ethical Implications of Emerging Biotechnology (3) *S. FULLERTON*

Introduces students to select biotechnology innovations and invites consideration of the ethical and policy implications surrounding their development and potential use. Offered: W.
[View course details in MyPlan: B H 544](#)

B H 548 Methods in Clinical Ethics (3)

Introduces the history, practice, and research methods in clinical ethics. Case-based examination of methods including principlism, casuistry, narrative methods, virtue ethics. Prerequisite: permission of instructor. Instructors: Schellenberg Offered: A.
[View course details in MyPlan: B H 548](#)

B H 551 Human Genomics: Science, Ethics, and Society (3)

Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Instructors: Fullerton Offered: jointly with GENOME 573; A.
[View course details in MyPlan: B H 551](#)

B H 552 Advanced Qualitative Methods (4) *Starks*

Examines and compares phenomenology, discourse analysis, and grounded theory. Reviews the history of ideas and critically reads examples of published articles to appreciate how each method frames questions and

produces different analyses.

[View course details in MyPlan: B H 552](#)

B H 553 International Research Ethics, Law, and Policy (3) *Kuszler, Rivin*

Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, healthcare systems, and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with LAW H 511; A.

[View course details in MyPlan: B H 553](#)

B H 556 Social Justice and Health (5) *Blacksher*

Examines the moral grounds for the view that social inequalities in health are unjust, using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity.

[View course details in MyPlan: B H 556](#)

B H 560 Genomics, Ethics, and Policy (2, max. 10) *Burke, Edwards, Fullerton, Starks*

Explores the intersection of genomics, ethics, and policy, with a particular focus on examining the benefits of genomics for medically underserved communities. Offered: S.

[View course details in MyPlan: B H 560](#)

B H 566 Introduction to Person Centered and Interprofessional Palliative Care (5)

Introduces fundamental concepts in narrative and person centered communication and interprofessional practice. Presents foundations for learning to apply an interdisciplinary approach to palliative care. Offered: A.

[View course details in MyPlan: B H 566](#)

B H 567 Advanced Topics in Person Centered and Interprofessional Palliative Care (5)

Interprofessional course presenting advanced concepts in narrative and person centered communication and interprofessional practice. Offered: Sp.

[View course details in MyPlan: B H 567](#)

B H 568 Palliative Care: Quality Metrics and System Integration (5)

Prepares students to integrate team based palliative care into a larger system, introduces community engagement, and palliative care policy issues. Specific content includes building palliative care service, engaging leadership to support palliative care, and using quality metrics to leverage and support quality care. Offered: Sp.

[View course details in MyPlan: B H 568](#)

B H 574 Justice for Healthcare (5) *N. JECKER*

Examination of the ethical problem of allocating scarce medical resources. Emphasizes fundamental principles of justice that support alternative health policies. Offered: W.

[View course details in MyPlan: B H 574](#)

B H 590 Health Ethics: Theory (4)

Explores ethical theories and shows how they are interpreted and applied in clinical contexts. Examines deontological and teleological approaches, including utilitarianism, Kant's ethics, Aristotle's ethics, Rawls's ethics, and feminist ethics. Builds knowledge of ethical theories, skills of ethical argument, and practice using theories in case analysis. Credit/no-credit only. Offered: A.

[View course details in MyPlan: B H 590](#)

B H 591 Health Ethics: Law (4)

Explores legal cases, laws, statutes as well as paradigm ethics cases that inform clinical ethics consultation. Focus on ethical and legal issues that arise for ethics consultants from conception (assisted reproductive technologies) through death (withdrawing life-sustaining treatments). Addresses equity issues inherent in our

polarized health care system. Credit/no-credit only. Offered: W.

[View course details in MyPlan: B H 591](#)

B H 592 Health Ethics: Theory (4)

Explores the methodologies through which students can employ ethical theory in clinical contexts. Coursework investigates ethical approaches, such as Virtue Theory, Feminist Ethics, and Casuistry. Assignments build the skills of communication and ethical analysis used in the clinical setting, such as writing chart notes and facilitating case discussion. Offered: Sp.

[View course details in MyPlan: B H 592](#)

B H 595 Ethics Practicum (1-6, max. 6)

Students participate in clinical ethics rounds, case discussions, review of research protocols, or other professional activities related to bioethics. Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: B H 595](#)

B H 596 Master's Research Project ([1-12]-, max. 12)

Research project culminating in a scholarly paper suitable for publication in a peer-reviewed journal. Majors only. Credit/no-credit only.

[View course details in MyPlan: B H 596](#)

B H 597 Special Topics in Medical Ethics (1-5, max. 15)

[View course details in MyPlan: B H 597](#)

B H 600 Independent Study or Research (*-)

Biological Structure

[Display as tabs](#)

Department Overview

G520 Health Sciences

The department promotes an understanding of biological processes through the study and analysis of structure-function relationships. The research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, biomolecular structure, and quantitative biology with an emphasis on computer-graphic representations of biological structures. This diversity creates a lively atmosphere in the department that provides a stimulating environment for the training of scientists with a variety of backgrounds.

The Department of Biological Structure recruits students through interdisciplinary PhD programs at the University of Washington. Faculty of the Department of Biological Structure are affiliated with one or more of these programs that provide high quality training in a wide range of scientific research areas. These multidisciplinary programs include faculty from the departments of Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genetics, Immunology, Microbiology, Molecular Biotechnology, Oceanography, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics, as well as research groups in the Fred Hutchinson Cancer Research Center.

The department does not offer a specific course of study leading to a Master of Science degree. An MS degree may be awarded, however, for students who meet the following requirements: One year of coursework (30 credits), concentrating in one or more areas that include neurobiology, cell and molecular biology, or developmental biology. Minimum 30 credits of research. Basic knowledge of statistics. One quarter of teaching as an assistant. A thesis committee approves the course of study, administers a general examination, and reviews the research proposal prior to the thesis defense.

SCHOOL OF MEDICINE

BIOLOGICAL STRUCTURE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

B STR 301 General Anatomy (4) NW

Survey of systemic human anatomy, including human skeletal system, muscular system, respiratory system, circulatory system, nervous system, digestive system, endocrine system, urinary system, and reproductive system. For second-, third-, and fourth-year undergraduates.

[View course details in MyPlan: B STR 301](#)

B STR 498 Undergraduate Thesis (*, max. 30)

Individual research projects under the supervision of an instructor. For senior medical students. Offered: AWSpS.

[View course details in MyPlan: B STR 498](#)

B STR 499 Undergraduate Research (*, max. 30)

Individual research projects in cellular and developmental biology, experimental immunology, reproductive biology, neurobiology, molecular structure, morphometrics, computer modeling, and related fields under the supervision of an instructor. Offered: AWSpS.

[View course details in MyPlan: B STR 499](#)

B STR 510 Seminar in Anatomy (1)

Scientific and historical basis of selected studies in biological structure, anatomy, and human development. Original literature used as basis for textbook descriptions. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: B STR 510](#)

B STR 515 Biological X-Ray Structure Analysis (3)

Theory of x-ray diffraction, with emphasis on applications to biological systems. Prerequisite: permission of instructor. Instructors: Stenkamp Offered: W.

[View course details in MyPlan: B STR 515](#)

B STR 519 Current Problems in Macromolecular Structure (2, max. 10) Stenkamp

Macromolecular structures related to specific areas of biological research. Emphasis on discussion of relevant research papers and use of computer graphics to visualize the molecular structures. Offered: AWSpS.

[View course details in MyPlan: B STR 519](#)

B STR 520 Structure Based Design of Drugs (3, max. 9) *Hol, Verlinde*

Research papers illustrating protein-structure- based design of new drugs. Review of methods and extensive discussion of all known mechanisms of drug resistance. Offered: W, even years.

[View course details in MyPlan: B STR 520](#)

B STR 521 Advanced Biomacromolecular Crystallography (3, max. 9) *Hol, Merritt, Stenkamp*

Aspects of protein crystallography ranging from crystal growth, phase determination methods, density averaging to refinement, fiber diffraction of DNA and proteins. Offered: W, odd years.

[View course details in MyPlan: B STR 521](#)

B STR 540 Special Problems in Anatomy (1-6, max. 6)

Special projects in anatomy under sponsorship of faculty member. Prerequisite: graduate, medical, or dental student standing and permission of instructor. Offered: AWSpS.

[View course details in MyPlan: B STR 540](#)

B STR 555 Laboratory Rotation in Biological Structure (*, max. 5)

Introduction to experimental design, research methods, and scientific thought in laboratories of faculty members. Provides hands-on experience, an entrance into the literature of the field, and opportunities for discussion with all members of the laboratory. First-year dental students only. Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: B STR 555](#)

B STR 557 Biomolecular Structure Seminar (1, max. 9)

Literature review of key research in biomolecular structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Prerequisite: graduate standing in biological structure or biochemistry and permission of instructor. Instructors: Hol Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: B STR 557](#)

B STR 580 P-Anatomy Teaching Practicum (*, max. 8)

Opportunity for medical student (or other professional student) to gain teaching experience in biological structure and human biology courses, including gross anatomy, histology, and neuroanatomy. May include lecture, laboratory, conference, depending on student interest, experience. Credit based on course credit in which student is assisting. Prerequisite: permission of course chairperson. Instructors: Clark Offered: AWSp.

[View course details in MyPlan: B STR 580](#)

B STR 584 Seminar in Neurogenesis (1, max. 16)

Current research on process by which neurons are generated in the nervous system. Prerequisite: permission of instructor. Instructors: Bermingham-McDonogh, Dhaka Offered: AWSpS.

[View course details in MyPlan: B STR 584](#)

B STR 590 Electron Cryo-Microscopy of Biological Macromolecules and Complexes (3) *Wang*

Introduces high-resolution cryo-electron microscopy (cryoEM); image formation and three-dimensional reconstruction theories and available software. Includes hands-on experience using the cryoEM facility for data collection and analysis; and presentations on student projects. Offered: ASp.

[View course details in MyPlan: B STR 590](#)

B STR 591 X-Ray and NMR Analysis of Macromolecular Structure (1, max. 9)

Current topics in research on molecular structure, usually emphasizing techniques of x-ray crystallography. Prerequisite: permission of instructor. Instructors: Hol Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: B STR 591](#)

B STR 598 Reading in Biological Structure (2)

Critical evaluation of research in biological structure, including current problems, methods, and future directions by reading and discussing research and review papers. Prerequisite: permission of instructor. Credit/no-credit

only. Offered: AWSpS.

[View course details in MyPlan: B STR 598](#)

B STR 600 Independent Study or Research (*-)

Offered: AWSpS.

[View course details in MyPlan: B STR 600](#)

B STR 700 Master's Thesis (*-)

Offered: AWSpS.

[View course details in MyPlan: B STR 700](#)

B STR 800 Doctoral Dissertation (*-)

Offered: AWSpS.

Biomedical Informatics and Medical Education

[Display as tabs](#)

Department Overview

E312 Health Sciences

The Department of Biomedical Informatics and Medical Education is comprised of two units: (1) the Division of Medical Education and Evaluation and (2) the Division of Biomedical and Health Informatics. The Division of Medical Education and Evaluation provides training, research and service in educational areas central to medical education including faculty and course evaluation, construction and scoring exams, curriculum development, implementation of innovative educational methodologies such as standardized patients and web-based simulated patients, faculty development, and research consultation (www.meded.washington.edu). The Division of Biomedical and Health Informatics consists of a research and training program that emphasizes both basic and applied aspects of informatics with a view toward making a difference in people's lives through interdisciplinary collaboration between faculty and students (www.bhi.washington.edu). BHI houses a National Library of Medicine Training Grant in Biomedical and Health Informatics supporting pre- and postdoctoral fellows.

The Department of Biomedical Informatics and Medical Education offers courses in the theory and application of medical education and biomedical and health informatics. Courses are designed for faculty, graduate and undergraduate students, postgraduates and fellows in the health sciences who desire further training in the methods, issues, research, and technology of medical education and biomedical informatics. BIME offers applied and research master's and doctoral degrees, as well as fellowship training, in biomedical and health informatics.

Graduate Program

Graduate Training Program Coordinator
I-264 Health Sciences, Box 357240
(206) 616-0369
informat@uw.edu

Master of Science

Admission Requirements

1. Possession of a baccalaureate degree from an institution within the United States *or* an equivalent degree from a recognized college or university from outside the United States

2. Minimum 3.00 undergraduate GPA, for the last 90 graded quarter credits or 60 graded semester credits.
3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts
4. GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. GRE scores must be from testing within the past five years.
5. GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD).
6. A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

Degree Requirements

60 credits, as follows:

1. *Foundational courses*: MEBI 530, MEBI 550, MEBI 552; either LIS 510 or LIS 544; two of the following courses: MEBI 534, MEBI 535, HSERV 503/EPI 503; a graduate-level statistics class
2. *Elective courses*: Four additional courses to establish depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.
3. *Research seminars*: At least 3 credits of MEBI 590 and at least 3 credits of MEBI 591
4. *Thesis and final examination*: All students must complete an M.S. thesis and pass a final examination for the master's degree.

Doctor of Philosophy

Admission Requirements

1. Possession of a baccalaureate degree from an institution within the United States *or* an equivalent degree from a recognized college or university from outside the United States.
2. A minimum 3.00 undergraduate GPA for the last 90 graded quarter credits or 60 graded semester credits.
3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
4. GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. The GRE scores must be from testing within the past five years.
5. GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD).
6. A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree

from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

Degree Requirements

90 credits, to include:

1. *Foundational courses*: MEBI 520, MEBI 530, MEBI 550, MEBI 552; either LIS 510 or LIS 544; two of the following: MEBI 534, MEBI 535, HSERV 503/EPI 503; a graduate level statistics class
2. *Courses for depth of knowledge*: Five additional courses to establish the necessary depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.
3. *Research seminars*: 12 credits of research seminars that must include at least 3 credits of MEBI 590 and at least 6 credits of MEBI 591
4. *Oral presentations*: All students must satisfactorily present material in an oral format. Students should present at least once per year. This requirement is fulfilled by journal club and research seminar (MEBI 590 and MEBI 591) presentations.
5. *Formal examinations*:
 - *The qualifying examination*: All students must pass a qualifying examination (oral and written) that covers breadth of knowledge prior to formally creating a PhD Supervisory Committee and proceeding with their dissertation research.
 - *The general examination*: The general examination includes an oral and written part. The oral portion is a public presentation of the student's area of research, and includes an oral examination covering the student's in-depth knowledge of her or his area.
 - *Final examination (dissertation defense)*: A candidate for the PhD must present a dissertation demonstrating original and independent investigation and significant achievement in the field of biomedical and health informatics.

SCHOOL OF MEDICINE

BIOMEDICAL INFORMATICS & MEDICAL EDUCATION

BIOMEDICAL INFORMATICS AND MEDICAL EDUCATION

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

BIME 498 Special Topics in Biomedical and Health Informatics (1-5, max. 15)

Readings, lectures, and discussions pertaining to significant problems or issues in biomedical and health informatics.

[View course details in MyPlan: BIME 498](#)

BIME 499 Undergraduate Research (*, max. 12)

Investigative research or directed readings in medical education and in biomedical and health informatics.

Prerequisite: permission of instructor.

[View course details in MyPlan: BIME 499](#)

BIME 520 Teaching Methods in Medical Education (2) C. SCOTT

Empirical and theoretical merits of different teaching methods as applied to medical education. Structuring and leading group discussions, using questions, organizing and delivering lectures, identifying styles of clinical supervision, providing constructive feedback, and presenting effective clinical demonstrations. Offered: Sp.

[View course details in MyPlan: BIME 520](#)

BIME 521 Evaluation of Learning in the Health Sciences (3) J. CARLINE

Basic issues and methods for evaluation of learning: cognitive performance, psychomotor skills, and reasoning abilities in classroom, laboratory, and clinical settings. Practical applications of instruments such as multiple-choice questions, essays, oral examinations, checklists, rating scales, simulations, and patient management problems.

[View course details in MyPlan: BIME 521](#)

BIME 522 Research in Medical Education (2) C. SCOTT

Individualized, problem-based overviews of research methods and research design pertinent to research and scholarship in medical education. Development and sequencing of research projects from conceptualization through literature review, including proposal development, project implementation, data management, analysis,

and write-up. Assessment and critical reading of related literature stressed. Offered: A.

[View course details in MyPlan: BIME 522](#)

BIME 530 Introduction to Biomedical and Health Informatics (3) *J. GENNARI*

Overview of biomedical and health informatics concepts, theories, and applications, including the historical evolution and the current and future research directions within the context of information flow in healthcare settings. Offered: A.

[View course details in MyPlan: BIME 530](#)

BIME 533 Public Health and Informatics (3) *A. TURNER*

Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either BIME 530 or permission of instructor. Offered: jointly with HSERV 509; W.

[View course details in MyPlan: BIME 533](#)

BIME 534 Biology and Informatics (3) *N. ABERNETHY*

Provides an introduction to some of the fundamental concepts in core fields of biology; the information representation and management problems that arise from these fields; and current and potential informatics solutions to these problems. Offered: Sp.

[View course details in MyPlan: BIME 534](#)

BIME 535 Clinical Care and Informatics (3) *D. MASUDA*

Explores the ways in which information technology affect healthcare delivery system design and delivery. Considers current and future research questions and trends as well as current and future application opportunities and challenges. Offered: A.

[View course details in MyPlan: BIME 535](#)

BIME 537 Informatics Research and Evaluation Methods (4) *N. ABERNETHY*

Introduces the many facets of evaluation and research for biomedical and health informatics projects. Focuses on formal studies of the application of information technology in medicine, conducted while an information resource is under development and after the resource is in routine service. Offered: W.

[View course details in MyPlan: BIME 537](#)

BIME 539 Teaching, Learning, and Communication in Biomedical and Health Informatics (4) *D. MASUDA*

Covers learning theory and teaching/communication skills specific to informatics practitioners and researchers. Reviews current learning theories applicable to undergraduate and graduate education. Helps to develop and practice effective teaching techniques. Offered: A.

[View course details in MyPlan: BIME 539](#)

BIME 540 Critically Appraising and Applying Evidence in Healthcare (3) *F. WOLF*

Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with HSERV 528; W.

[View course details in MyPlan: BIME 540](#)

BIME 541 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) *F. WOLF*

Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with EPI 541/HSERV 529/PHARM 529.

[View course details in MyPlan: BIME 541](#)

BIME 543 Consumer Health Informatics (3)

This course provides an introduction to consumer health informatics (CHI) including theories of health behavior and information behavior; key concepts and terminology; and application domains. The course will cover issues such as health literacy, patient-centered communication, patient empowerment, and privacy; and application domains including personal health records, m-Health, and telehealth.

[View course details in MyPlan: BIME 543](#)

BIME 550 Knowledge Representation and Applications (3) *J. GENNARI*

Defines knowledge representations and explores how knowledge presentations and ontologies are used in the semantic web and why these issues are important for biomedical informatics application builders. Uses a research focus to explore foundational theoretical issues and choices facing application builders. Offered: W.

[View course details in MyPlan: BIME 550](#)

BIME 554 Biomedical Information Interactions and Design (4)

Introduction to theoretical frameworks and research methodologies that underpin the study of human-information interactions and the design of biomedical information systems to support them. Emphasis on understanding informational needs and specifications that drive the design of health information systems. Offered: Sp.

[View course details in MyPlan: BIME 554](#)

BIME 570 Health Sciences Information Needs, Resources, and Environment (3) *S. FULLER*

Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with LIS 528; Sp.

[View course details in MyPlan: BIME 570](#)

BIME 581 Telehealth Systems and Applications (4) *G. DEMIRIS*

Prepares consumers, managers, and researchers of telehealth systems through guided exploration into the components of such systems. Introduces challenges and opportunities facing designers and managers of telehealth and remote healthcare delivery networks. Offered: jointly with NSG 540.

[View course details in MyPlan: BIME 581](#)

BIME 590 Selected Topics in Biomedical and Health Informatics (1-3, max. 12)

Computers and information technology are improving and changing healthcare education, research, and clinical practice. Informatics faculty and researchers from the UW and affiliated institutions present their research findings as well as discuss their views of national developments in their respective disciplines. Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: BIME 590](#)

BIME 591 Biomedical and Health Informatics Research Colloquium (1, max. 12)

Provides forum for extensive interactive research discussions. Format is round table with short presentations and long facilitated discussion amongst students and core BHI faculty. Both students and faculty present. Topics primarily research focused (ongoing and proposed research.), but also journal articles, current topics of debate, and other. Credit/no-credit only.

[View course details in MyPlan: BIME 591](#)

BIME 598 Special Topics in Biomedical and Health Informatics (1-4, max. 12)

Readings, lectures, and discussions pertaining to a significant biomedical and health informatics problem or an emerging issue. Topics vary.

[View course details in MyPlan: BIME 598](#)

BIME 600 Independent Study/Research ([1-10]-)

Individual readings or study, including independent study in preparation for doctoral examinations, research, etc.

Prerequisite: permission of instructor.

Comparative Medicine

[Display as tabs](#)

Department Overview

T142 Health Sciences

The Department of Comparative Medicine provides education and research opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (C MED 407) for biomedical graduate students, zoonotic diseases, and training in laboratory-animal medicine for veterinary medical students and veterinarians, combined with a Master of Science degree program in comparative medicine. Areas of current research interests include enteric disease, lymphocyte biology, biology of aging, mouse genomics, generation and characterization of transgenic animal models, somatic cell gene transfer, and animal models of gene therapy.

Postdoctoral Program

Postdoctoral training in the areas of laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of a combination of coursework, clinical residency rotations, and research leading to a Master of Science degree in comparative medicine. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Financial assistance is normally provided. A detailed description of the postdoctoral program is available on the department's website at depts.washington.edu/compmed/.

Master of Science

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission to the degree program requires acceptance into the department's postdoctoral training program. The degree option involves additional elective courses, the completion of a more-involved research project, and a thesis.

Predocotoral Program

This program is designed to acquaint veterinary medical students with laboratory-animal medicine as a veterinary specialty. Specific areas covered include control/treatment of the principal diseases of common laboratory animals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students year-round. Stipend support is normally provided.

SCHOOL OF MEDICINE

COMPARATIVE MEDICINE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

C MED 499 Undergraduate Laboratory Research (1-6, max. 12) *B. IRITANI, W. LADIGES, L. PRICE, M. RUDELLE*

Specific problems in comparative medicine. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: C MED 499](#)

C MED 512 Introduction to the Anatomical Analysis of Animal Disease (2, max. 10) *J. SNYDER, P. TREUTING*

Use of animals in experimental study of disease; techniques of animal necropsy, characterization, interpretation of gross and microscopic lesions, correlation of lesions with altered physiological processes, differentiation between naturally occurring and experimentally induced lesions. Prerequisite: PATH 444, PATH 445, or equivalent, and permission of instructor. Enrollment limited: two students per quarter. Offered: AWSpS.

[View course details in MyPlan: C MED 512](#)

C MED 514 Comparative Pathology Conference (1, max. 6) *J. SNYDER, P. TREUTING*

Focus on histopathology of naturally occurring and experimentally induced lesions of primates, laboratory and domestic animals, fish, wildlife, and birds. Participants discuss the lesions and the basic pathogenetic mechanisms that underline them. Prerequisite: PATH 500 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: C MED 514](#)

C MED 516 Research and Literature Review Seminar (1, max. 12) *C. HSU, B. IRITANI*

Alternates between research seminars and literature review presentations. Research seminar topics relate to basic and translational animal models. Literature review seminars involve critical evaluation of recent articles on laboratory animal medicine and other scientific or medical topics. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: C MED 516](#)

C MED 518 Clinical Conference and Comparative Pathology Seminar (1, max. 12) *N. REYES, P. TREUTING*

Alternates between clinical veterinary medicine and comparative pathology discussions. Clinical discussions include case reports of spontaneous and induced diseases. Comparative pathology discussions cover gross and histopathology of natural occurring and experimentally induced lesions in laboratory animals and wildlife.

Prerequisite: either PATH 500 or equivalent and permission of instructor. Credit/no-credit only. Offered: 2089
AWSpS.

[View course details in MyPlan: C MED 518](#)

C MED 520 Biology of Laboratory Animals (1) *T. BRABB, B. IRITANI, P. TREUTING*

Fundamentals of morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of commonly used laboratory animal species. Discusses similarities and differences within and between species, including humans. Other topics include husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: A.

[View course details in MyPlan: C MED 520](#)

C MED 521 Biology of Laboratory Animals (1) *T. BRABB, B. IRITANI, P. TREUTING*

Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including humans are discussed. Other topics include husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: W.

[View course details in MyPlan: C MED 521](#)

C MED 530 Diseases of Laboratory Animals (1-) *T. BRABB, B. IRITANI, P. TREUTING*

Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: A.

[View course details in MyPlan: C MED 530](#)

C MED 531 Diseases of Laboratory Animals (1-) *T. BRABB, B. IRITANI, P. TREUTING*

Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: W.

[View course details in MyPlan: C MED 531](#)

C MED 540 Animal Models (2) *T. BRABB, C. HSU, B. IRITANI, P. TREUTING*

Naturally occurring and experimentally induced analogs of human diseases in animals with emphasis on diseases lacking animal models, and approaches to identifying new models. Discusses animal models of categorical disease (e.g., cancer, atherosclerosis, gerontology). Prerequisite: permission of instructor. Offered: Sp.

[View course details in MyPlan: C MED 540](#)

C MED 590 Selected Topics in Animal Medicine (1-5, max. 10) *T. BRABB, L. COLBY, C. FREVERT, B. IRITANI, P. TREUTING*

Radiation biology, genetics, anesthesiology and experimental surgery, preventive medicine, and ethical aspects of use of animals in biomedical teaching and research. Specific topics vary from year to year, depending on expertise of the annual visiting professor. Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: C MED 590](#)

C MED 592 Comparative Pathology for the Scientist (3) *C. FREVERT*

Introduces the interpretation of pathological changes in animals used for biomedical research, with a focus on the mouse. Covers study design and interpretation, techniques to measure pathological changes in major organ systems, plus other topical material related to preclinical drug studies and translational research.

[View course details in MyPlan: C MED 592](#)

C MED 600 Independent Study or Research (*-)

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: C MED 600](#)

C MED 601 Internship Rotation - Laboratory Animal Medicine (*-)

Prerequisite: DVM degree. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: C MED 601](#)

C MED 700 Master's Thesis (*-)

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: C MED 700](#)

SCHOOL OF MEDICINE

HUMAN BIOLOGY

CONJOINT (MEDICINE)

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

CONJ 401 Human Anatomy and Physiology (4) *T. LINDER, A. MELBY*

Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: BIOL 220; either CHEM 155 or CHEM 162. Offered: A.

[View course details in MyPlan: CONJ 401](#)

CONJ 402 Human Anatomy and Physiology (4) *T. LINDER, A. MELBY*

Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 401. Offered: W.

[View course details in MyPlan: CONJ 402](#)

CONJ 403 Human Anatomy and Physiology (4) *T. LINDER, A. MELBY*

Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 402. Offered: Sp.

[View course details in MyPlan: CONJ 403](#)

CONJ 475 Alcoholism: A Course for Medical Students and Students in the Allied Health Sciences (2)

Kivlahan, Samson

For medical students in the allied health sciences in any year that covers an introduction to the epidemiology, diagnostic strategies, natural history, physiologic effects, and treatment of alcohol-related disorders. Offered: Sp.

[View course details in MyPlan: CONJ 475](#)

CONJ 480 Neuroscience for Rehabilitation Professionals (5) *Anderson, Mulligan, Slimp*

Structure and function of the central nervous system, emphasizing sensorimotor systems and higher integrative functions, coupled with clinical correlations. Required for occupational therapy, physical therapy, and prosthetic/orthotic students. Others by permission.

[View course details in MyPlan: CONJ 480](#)

CONJ 504 Topics of Molecular Medicine (1.5, max. 5)

Focuses on an important topic in medicine and science. Lectures introduce clinical and basic science background, followed by a seminar/discussion with speakers. Prerequisite: Graduate standing and permission of instructor. Offered: jointly with MOLMED 504; Sp.

[View course details in MyPlan: CONJ 504](#)

CONJ 505 P-Pain Clinic Preceptorship (1, max. 12)

One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at UW Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: Pain Center.

[View course details in MyPlan: CONJ 505](#)

CONJ 510 ISCRM Research Updates and Stem Cell Club ([0/1]-, max. 12) *Ruohola-Baker, Ware*

Presents ongoing research at the Institute for Stem Cell and Regenerative Medicine. Includes diverse subject matter in regenerative medicine, with new, unpublished data, and opportunity to identify collaborations and contacts for discussion, and an understanding of the state of the art. Credit/no-credit only. Offered: jointly with BIOC 510.

[View course details in MyPlan: CONJ 510](#)

CONJ 511 Genomic Dissection (1) *Clark, Horwitz, Shedure*

Uses state of the art technology to sequence the genome of a cadaver. Explores the structure of the genome, as well as genetic variants responsible for human individualization and disease. Credit/no-credit only. Offered: A.

[View course details in MyPlan: CONJ 511](#)

CONJ 512 Scientific Speaking Seminar (1.5) *Biggins, Peichel*

Teaches how to effectively give a scientific seminar about research. Offered: jointly with MCB 512; W.

[View course details in MyPlan: CONJ 512](#)

CONJ 513 Clinical Medical and Human Genetics (4) *Byers*

Rotations through medical genetics clinics for graduate students enrolled in the molecular medicine pathway. Students review clinical data, identify the molecular basis of genetic disorders, and assess how scientific studies have changed the assessment and natural history of these conditions. Limit of four students per quarter. Offered: jointly with MOLMED 513; AWSp.

[View course details in MyPlan: CONJ 513](#)

CONJ 514 Molecular Medicine (1.5, max. 3) *Eary, Rosen*

Introduces how basic sciences impact the practice of medicine, using patient case histories to introduce key areas of clinical research and investigative medicine. Topics include cancer biology; drug development; gene- and cell-based therapeutics; inflammation and host response; vascular disease; and obesity and weight regulation. Offered: jointly with MOLMED 514; W.

[View course details in MyPlan: CONJ 514](#)

CONJ 515 Interdisciplinary Health and Human Services Delivery in Rural Communities (1)

Provides opportunities for students in health and human services to explore current trends and issues of service delivery in rural communities. Addresses demographics, economics, community structure, culture, and professional/personal issues. Field trip fee. Prerequisite: major standing in a health or human services profession. Instructors: House Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: CONJ 515](#)

CONJ 516 What Every Physician Should Know about Oral Health (1) *Lewis, Mouradian, Slayton*

Didactic elective for students interested in understanding oral health and its relationship to systemic health. Special interest to students planning careers in primary care, public health, or who are likely to practice in rural or underserved communities. Includes weekly seminars and clinical demonstrations. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: CONJ 516](#)

CONJ 524 Structural Basis of Signal Transduction (1.5)

Focuses on the structure-function relationship of key enzymes in signal transduction (protein/lipid kinases; phosphatases etc.) and the structural consequences of protein phosphorylation. Teaches students to look into critical structural details using PC or Mac. Prerequisite: undergraduate course in biochemistry and basic cell biology, or permission of instructor. Instructors: Xu Offered: W.

[View course details in MyPlan: CONJ 524](#)

CONJ 526 Introduction to Systems Biology and Quantitative Approaches to Biomedical Sciences (1.5)

Aitchison

Covers philosophy of systems biology, experimental design, and the linkages between discovery and hypothesis-driven science. Reviews quantitative systems biology tools for genomics, proteomics, modeling and data integration, and emerging technologies. Offered: W.

[View course details in MyPlan: CONJ 526](#)

CONJ 529 Cell Migration (1.5) *Cooper, Moens*

Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated by the migrating cell. Offered: jointly with MCB 529; W.

[View course details in MyPlan: CONJ 529](#)

CONJ 530 Directing Stem Cells Toward Regenerative Medicine (3)

An introduction to the rapidly developing field of human embryonic stem cells in regenerative medicine crossing all medical disciplines including ethics. Requires a strong background in biological sciences. Offered: Sp.

[View course details in MyPlan: CONJ 530](#)

CONJ 531 Signaling Mechanisms in Excitable Cells (1.5) *W. ZAGOTTA*

Mechanisms of cellular signaling, particularly in nerve and muscle. Electrical, chemical, and mechanical signaling in the cell that lead to processes such as electrical excitability, action potentials, and muscle contraction. Prerequisite: comprehensive undergraduate course in general biochemistry and molecular biology, or permission of instructor. Offered: A.

[View course details in MyPlan: CONJ 531](#)

CONJ 532 Signal Transduction from the Cell Membrane to the Nucleus (1.5) *R. GARDNER, C. HAGUE, S. ONG, J. SCOTT, D. STORM*

Intracellular signaling pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane receptors and G-proteins, insulin/PI3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: A.

[View course details in MyPlan: CONJ 532](#)

CONJ 533 The Dynamic Chromosome (1.5)

The chromosome viewed as the ultimate organelle. How chromosomes are maintained and propagated. Epigenetic regulation of genes. Genetic, biochemical, and cytologic methods for understanding chromosome functions. Prerequisite: cell biology, biochemistry, and genetics. Instructors: Henikoff, Roth Offered: A.

[View course details in MyPlan: CONJ 533](#)

CONJ 534 Selected Problems in Nervous System Development (1.5)

Introduces students to current issues in developmental neurobiology. Topics include regionalization of the neuroectoderm, mechanisms of neurogenesis, axon patterning and plasticity, and cell death. Not intended to be comprehensive; examines the experimental basis for current views in the field of a few topical issues.

[View course details in MyPlan: CONJ 534](#)

CONJ 537 Mechanism of Transcriptional Regulations (1.5) *Tsukiyama*

Biochemical mechanisms of gene transcription covering a broad range of transcriptional regulation, including

mechanisms of transcriptional initiation, elongation, and termination. Regulation of transcription by chromatin. Includes a special lecture regarding regulation of transcription in cell growth and differentiation. Offered: A.
[View course details in MyPlan: CONJ 537](#)

CONJ 538 Genetic Instability and Cancer (1/1.5)

Seminar focusing on molecular pathways that maintain genomic stability in all cells and that carry out programmed changes in genomic structure in the immune system. Special attention devoted to understanding how failure in these pathways leads to genomic instability and malignancy. Prerequisite: permission of instructor. Instructors: Maizels, Monnat
[View course details in MyPlan: CONJ 538](#)

CONJ 539 Modern Approaches to Vaccines (1.5) *Fuller*

Covers selected topics based on recent publications in viral and bacterial vaccine research. Emphasizes understanding the latest advanced and issues in vaccine discovery, mechanisms of action, and special topics in viral vaccines. Offered: Sp.
[View course details in MyPlan: CONJ 539](#)

CONJ 540 Basic Science of Urologic Complications (3)

Introduction to the multidisciplinary nature of the most common urologic complications ranging from prostate cancer to erectile dysfunction. Covers epidemiology, clinical and surgical treatments, current dogmas and approaches/models in basic study of underlying disease mechanisms, and a journal review of each complication. Prerequisite: biological science course.
[View course details in MyPlan: CONJ 540](#)

CONJ 541 Molecular Biology of Cellular Processes (1.5)

Translational control; cytoskeleton and molecular motors; protein targeting, sorting and secretion; apoptosis; regulation of cell function by extracellular matrix. Prerequisite: comprehensive undergraduate course in biochemistry and molecular biology or permission of instructor. Instructors: Bornstein Offered: Sp.
[View course details in MyPlan: CONJ 541](#)

CONJ 542 Development (1.5)

Molecular mechanisms of development; molecules and pathways used for the patterning of developing organisms. Similarities and differences in the making of plants, invertebrates, and vertebrates. Prerequisite: comprehensive undergraduate courses in biology, molecular biology, or permission of instructor. Instructors: Li Offered: W.
[View course details in MyPlan: CONJ 542](#)

CONJ 544 Protein Structure, Modification and Regulation (1.5)

Overview of general principles of protein structure, including forces that contribute to folding and stabilization, followed by an extended coverage of the means by which protein structure and function are modified and regulated. Examples from recent developments in protein folding, processing, and allosteric regulation. Prerequisite: introductory biochemistry and cell biology. Instructors: Stoddard, Strong
[View course details in MyPlan: CONJ 544](#)

CONJ 545 Molecular Interactions and Medicine (1.5) *Verlinde*

Forces governing molecular interactions in biology; with a focus on medicine. Principles of computer modeling techniques in use for predicting the molecular behavior of proteins, ligands, and their complexes. In computer ligand discovery; drug design, and the understanding at the atomic level of some genetic diseases. Two computer lab sessions. Offered: Sp.
[View course details in MyPlan: CONJ 545](#)

CONJ 546 Survey of Technologies for Molecular Biology (1.5) *Bumgarner*

Broad overview of modern technologies used in molecular biology with particular emphasis on DNA sequencing and gene expression. In addition to methods and applications for the technologies, examines the

theoretical basis and underlying instrumentation through which these technologies are implemented. Offered: A.
[View course details in MyPlan: CONJ 546](#)

CONJ 547 Molecular Evolution of Viral-Host Interactions (1.5) *Katze*

Interactions between viruses and the cells they infect, with special emphasis on evolutionary battle that occurs between the invading virus and its host. Examines new technologies being used to molecularly dissect virus-host interactions. Offered: Sp.

[View course details in MyPlan: CONJ 547](#)

CONJ 548 Modeling Proteins and Proteomes (1.5) *Samudrala*

Hands-on experience for modeling protein structures, using the models to predict function, and applying the prediction methods to all proteins encoded by an organismal genome. Provides an overview of protein structure, how it mediates function, and its importance for understanding protein interaction networks. Technologies involved for protein structure modeling. Offered: W.

[View course details in MyPlan: CONJ 548](#)

CONJ 549 Microbial Population Biology (1.5)

Principles of ecology and evolution as they apply to microorganisms. Prerequisite: advanced undergraduates with permission of instructor. Instructors: Mittler Offered: Sp, even years.

[View course details in MyPlan: CONJ 549](#)

CONJ 550 P-Clinical Infectious Diseases (3)

Lecture series by faculty members from various departments, authorities in the field of clinically important infectious diseases. Lectures, reading assignments, and handouts emphasize epidemiology, clinical manifestations, laboratory findings, diagnosis, treatment, and prevention. Oriented for second-year medical students. Credit/no-credit only.

[View course details in MyPlan: CONJ 550](#)

CONJ 551 Immunity (1.5) *Strong*

Provides an understanding of the central cellular and molecular players in the mammalian immune system at a level appropriate for the non-specializing graduate student. Selected topics include the molecular basis of B and T cell activation and effector functions and the mechanisms of innate immunity. Offered: Sp.

[View course details in MyPlan: CONJ 551](#)

CONJ 552 Metabolic Flexibility in Biology (1.5)

Small molecules and the ways that chemistry of these molecules facilitates life under changing conditions. Includes systems from microbiology to human physiology to understand aspects of cancer, aging, and animation. Explores topics including bioenergetics/metabolic flux, adaptation, and allometric scaling. Prerequisite: undergraduate organic chemistry and biochemistry.

[View course details in MyPlan: CONJ 552](#)

CONJ 553 Clinical Management of HIV (2-3) *M. CHUNG, H. KIM*

Provides in-depth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with speakers who have experience in both resource-rich and resource-limited settings. Offered: jointly with G H 573; Sp.

[View course details in MyPlan: CONJ 553](#)

CONJ 554 Fundamentals of Hypnosis (1) *McCann, Schneeweiss*

Examines phenomena associated with hypnosis, as well as its safe use in clinical practice. Credit/no-credit only. Offered: W.

[View course details in MyPlan: CONJ 554](#)

CONJ 556 Drug Addiction: Mechanisms, Prevention, and Treatment (2) *Chavkin*

Key advances, insights, methods, and challenges for our understanding of drug addiction from psychological, pharmacological, psychiatric, community prevention, legal, and neurodevelopmental perspectives. Enhances

familiarity with the multidisciplinary approaches required to understand addiction as a disease. Offered: A.²⁰⁰⁶
[View course details in MyPlan: CONJ 556](#)

CONJ 557 Microbial Evolution and Ecology (2)

Selected topics in microbial evolution including evolution of the main lines of descent, and bacterial and archaeal speciation and co-speciation, and evidence for early microbial life on Earth. Prerequisite: MICROM 412 or general microbiology background. Offered: ASp.

[View course details in MyPlan: CONJ 557](#)

CONJ 558 Fundamentals of Prokaryotic Biology (1.5) *Harwood, Leigh*

Basic principles in prokaryotic cell structure, genomics, and metabolism. Introduction to prokaryotic physiology, bacterial pathogenesis, and microbial ecology.

[View course details in MyPlan: CONJ 558](#)

CONJ 559 Scientific Ideas at Work (1.5) *Gray, Maizels*

Examines how basic biomedical research leads to discovery of new therapeutics and diagnostics for treatment of human disease. Considers disease mechanism and impact, need for a drug, preclinical studies, clinical testing and drug approval, and how technology developed in an academic laboratory is translated into a commercial product. Offered: jointly with MOLMED 559; Sp.

[View course details in MyPlan: CONJ 559](#)

CONJ 562 Advanced Topics in Bacterial Physiology (1.5)

Covers cutting edge research and concepts pertaining to the complexity of the bacterial cell with an emphasis on primary literature and discussion. Offered: Sp.

[View course details in MyPlan: CONJ 562](#)

CONJ 570 Introduction to the Clinical Management of Transgender Patients (1)

Covers the steps and protocols providers need to know to provide culturally proficient care for trans-identified patients. Prior completion of FAMED 561 highly recommended. Prerequisite: current graduate health science student and permission of course coordinator. Credit/no-credit only.

[View course details in MyPlan: CONJ 570](#)

CONJ 571 Introduction to the Clinical Management of Patients who are Transgender (1)

Covers the steps and protocols providers need to know to provide culturally proficient care for trans identified patients. Credit/no-credit only.

[View course details in MyPlan: CONJ 571](#)

CONJ 583 Molecular Targets in Cancer Therapy (1.5) *Maizels, Monnat*

Examines how molecular targets for cancer therapies are discovered and validated. Covers disease mechanisms, need for new therapeutics, how small molecule and antibody therapeutics are identified and developed, and how preclinical studies are used to establish safety and efficacy. Offered: jointly with MOLMED 583; A.

[View course details in MyPlan: CONJ 583](#)

CONJ 585 Surgical Anatomy (1-3, max. 12)

Guided dissection of selected regions, supplemented by conferences. Offered conjointly by the departments of Biological Structure and Surgery. Prerequisite: permission of department. Coordinator: Department of Biological Structure. Instructors: Graney

[View course details in MyPlan: CONJ 585](#)

CONJ 598 P-Chronic Care Independent Study and Remediation (*, max. 8)

Designed for medical students required to complete additional study related to the required Chronic Care clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

[View course details in MyPlan: CONJ 598](#)

CONJ 605 P-Introduction to Palliative Care - Consultation (4)

Introduction to palliative care in the consultation setting. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care. Offered: AWSpS.

[View course details in MyPlan: CONJ 605](#)

CONJ 606 P-Advanced Palliative Care - Inpatient Hospice Track (8)

Intensive four week experience in palliative care in the inpatient hospice setting. Students work in interdisciplinary teams to assess and manage symptoms for patients near the end of life under appropriate supervision. Prerequisite: Required Family Medicine and/or Internal Medicine Clerkship(s) Offered: AWSpS.

[View course details in MyPlan: CONJ 606](#)

CONJ 607 P-Advanced Palliative Care (8)

Intensive four week experience in palliative care in inpatient and outpatient settings. Students work in interdisciplinary teams to treat and communicate with seriously ill patients and their families to make decisions regarding care. Includes exposure to hospice care. Prerequisite: Required Family Medicine and/or Internal Medicine Clerkship(s) Offered: AWSpS.

[View course details in MyPlan: CONJ 607](#)

CONJ 608 P-Introduction to Palliative Care, Consult Track - ANMC (4)

Introduction to palliative care in the consultation setting in Anchorage, AK. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

[View course details in MyPlan: CONJ 608](#)

CONJ 609 P-Introduction to Palliative Care, Consult Track - Bellingham, WA (4)

Introduction to palliative care in the consultation setting in Bellingham, WA. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

[View course details in MyPlan: CONJ 609](#)

CONJ 610 P-Introduction to Palliative Care, Consult Track - Olympia, WA (4)

Introduction to palliative care in the consultation setting in Olympia, WA. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

[View course details in MyPlan: CONJ 610](#)

CONJ 611 P-Introduction to Palliative Care, Consult Track - Billings, MT (4)

Introduction to palliative care in the consultation setting in Olympia, WA. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

[View course details in MyPlan: CONJ 611](#)

CONJ 612 P-Introduction to Palliative Care Consultation- Bozeman, MT (4)

Introduction to palliative care in the consultation setting in Bozeman, MT. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on communication and assisting patients with serious illness and their families to make decisions regarding care.

[View course details in MyPlan: CONJ 612](#)

CONJ 613 P-Introduction to Palliative Care Consultation- Boise, ID (4)

Introduction to palliative care in the consultation setting in Boise, ID. Students are integrated into palliative care teams and participate in interdisciplinary rounds, patient meetings, and symptom assessment. Special focus on

communication and assisting patients with serious illness and their families to make decisions regarding²⁰⁹⁸ care.

[View course details in MyPlan: CONJ 613](#)

CONJ 614 P-Correction and Addiction Medicine - Gray's Harbor County, WA (4-8)

Clinical elective primarily at Greys Harbor County Jail. Covers a variety of acute and chronic diseases common outpatient procedures in jail and addiction treatment settings. In-depth experience working with incarcerated and known addicted individuals. Offered: AWSpS.

[View course details in MyPlan: CONJ 614](#)

CONJ 615 P-Advanced Correction and Addiction Medicine - Gray's Harbor County, WA (8)

Advanced clinical elective primarily at Greys Harbor County Jail. Covers variety of acute and chronic diseases common outpatient procedures in jail and addiction treatment settings. In-depth experience working with incarcerated and known addicted individuals. Prerequisite: Required Family Medicine and/or Internal Medicine Clerkship(s) Offered: AWSpS.

[View course details in MyPlan: CONJ 615](#)

CONJ 616 P-Prison/Corrections Medicine Clerkship - Washington (*, max. 16)

Covers a wide variety of diseases in a variety of outpatient settings, including urgent care, a chronic care clinic, and a long-term care facility for elderly and medically frail inmates in a men's prison setting. Also includes the option to learn common procedures including suturing, joint injections, skin biopsies, and toenail removals. Prerequisite: completion of the medicine and family medicine required clerkships. Offered: AWSpS.

[View course details in MyPlan: CONJ 616](#)

CONJ 617 P-Subinternship in Neurocritical Care Medicine (8)

As sub-interns on the Neurocritical Care Service, students learn about critical illness, focusing on neurosurgical critical illness. Through direct patient care responsibilities, students gain experience managing traumatic brain injury, acute spinal cord injury, acute cerebral hemorrhage, and other common critical-care issues. Offered: AWSpS.

[View course details in MyPlan: CONJ 617](#)

CONJ 618 P-Sleep Medicine (4)

Exposure to sleep disorders including sleep apnea, narcolepsy, hypoventilation, parasomnias and circadian rhythm disorders. Students primarily see outpatients in the UW Medicine Sleep center at Harborview with various sleep faculty. Appropriate for students interested in internal medicine, family medicine, otolaryngology, neurology, psychiatry, anesthesiology and/or a career in sleep medicine.

[View course details in MyPlan: CONJ 618](#)

CONJ 625 Global Health Clinical Elective (*, max. 24)

Provides a better understanding of the challenges of providing medical care in international resource-limited settings. Students spend a minimum of five weeks at a developing country medical center, with the goal of learning more about the local burden of disease and strategies for diagnosis and treatment. Prerequisite: fourth year medical students. Instructors: S. McClelland Offered: WSp.

[View course details in MyPlan: CONJ 625](#)

CONJ 626 Global HIV Medicine Elective (10-20, max. 20) *Chung*

Prepares health profession students for work in developing countries. Includes experience treating HIV-positive patients in resources-poor settings, analyzing the relationship between poverty and health, recognizing tropical diseases that are common in Sub-Saharan Africa or Southeast Asia, and understanding the epidemiology of HIV in Sub-Saharan Africa or Southeast Asia. Offered: AWSpS.

[View course details in MyPlan: CONJ 626](#)

CONJ 630 P-Write Chronic Care Clerkship (8)

Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: approved by the WRITE committee.

[View course details in MyPlan: CONJ 630](#)

CONJ 654 P-Chronic Care/Pain Management - Alaska - NAPM (8)

Exposures to pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

[View course details in MyPlan: CONJ 654](#)

CONJ 655 P-Chronic Care - Olympia (8)

Exposure to rehabilitation. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

Family Medicine

[Display as tabs](#)

Department Overview

C408 Health Sciences

The University of Washington Department of Family Medicine, founded in 1971, improves the health and well-being of individuals, families, and communities through leadership in education, scholarship, and clinical care. With over 800 clinical faculty members located throughout the Washington, Wyoming, Alaska, Montana and Idaho (WWAMI) region, and approximately 40 regular faculty located at the University site in Seattle, the department is one of the largest of its kind in the country.

Direct patient care is offered primarily through the clinical operations at the UW Neighborhood Clinic in Northgate and the Family Medicine Clinic at Harborview. The Medical Student Education Section develops and delivers innovative, high-quality training to students who serve the evolving needs of the diverse individuals, families, and communities of the WWAMI region, with emphasis on rural and urban underserved and other vulnerable populations. The residency program is known for its full spectrum training of residents that allows its graduates to enter a variety of practice settings, including careers with an academic or health policy focus. The UW Family Medicine Residency Network is a group of 18 family medicine residency programs located within the WWAMI region. The network exists to promote excellence in family medicine residency education, provide academic leadership, and to respond to societal needs for family physicians. Organized in October 1977, the research section's efforts are focused primarily in four areas -- rural health, the health workforce, chronic disease, and medical education. MEDEX Northwest, established in 1969, joined the Department in 2011. Its mission is to train physician assistants who will primarily practice in medically underserved and rural areas of WWAMI.

SCHOOL OF MEDICINE

FAMILY MEDICINE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

FAMED 499 Undergraduate Research (*, max. 35) *W. PHILLIPS*

Research activities arranged with University or community-based physicians in diverse areas relating to family medicine. Prerequisite: permission of course coordinator. Offered: AWSpS.

[View course details in MyPlan: FAMED 499](#)

FAMED 501 P-Introduction to Family Medicine: Preceptorship (2, max. 12) *J. CAWSE-LUCAS*

Medical students spend one morning per week for one or more quarters working with a practicing community family physician. Prerequisite: first- and second-year medical students, permission of course coordinator.

Offered: AWSpS.

[View course details in MyPlan: FAMED 501](#)

FAMED 502 P-Preclinical Continuity Preceptorship in Family Medicine (1-8, max. 12) *J. CAWSE-LUCAS*

Introduces medical students to continuity of care in family medical settings, especially regarding what it means to be someone's doctor and what it is like to work with individuals to help them achieve optimal health for a minimum of two quarters. Prerequisite: first- and second-year medical students; permission of course coordinator. Offered: AWSpS.

[View course details in MyPlan: FAMED 502](#)

FAMED 525 African American Health and Health Care Disparity (1) *F. OVERSTREET*

Examines the most pressing health issues facing African Americans. Provides a forum to examine the root causes of health disparity in African descendants. Explores strategies to remedy problems in public health and healthcare delivery systems. Prerequisite: current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: A.

[View course details in MyPlan: FAMED 525](#)

FAMED 530 Primary Care (1) *W. PHILLIPS*

Introduces primary care, the foundation of medical care and cornerstone of healthcare reform. Addresses history, clinical content, practitioner workforce, delivery models, research methods, and policy issues. Explores the role of primary care in personal and population health. Includes lectures, discussions, student presentations, and practice observation. Prerequisite: permission of course coordinator. Offered: W.

[View course details in MyPlan: FAMED 530](#)

FAMED 540 Topics in Health and Human Services in Rural Communities (1)

Explores topics important to rural clinical practice. Includes rural health research, rural health policy, cultural competency, models of rural health practice, and others. Includes panel discussions, a case study, and a required field trip to a rural community. Prerequisite: permission of course coordinator. Instructors: Shin Offered: W.

[View course details in MyPlan: FAMED 540](#)

FAMED 541 Targeted Rural Underserved Track: Intersession 1 (3)

First of four TRUST intersessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: A.

[View course details in MyPlan: FAMED 541](#)

FAMED 542 Targeted Rural Underserved Track: Intersession 2 (3)

Second of four TRUST intersessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: W.

[View course details in MyPlan: FAMED 542](#)

FAMED 543 Targeted Rural Underserved Track: Intersession 3 (4)

Third of four TRUST intersessions. Students will spend four days and three nights together at a retreat center training to be leaders in their future practice communities. Students will discuss rural practice, leadership skills and other related topics. Regional clinical deans and other rural health leaders facilitate the retreat. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: FAMED 543](#)

FAMED 544 Targeted Rural Underserved Track: Intersession 4 (3)

Fourth of four TRUST intersessions. Students will spend a week at their TRUST Continuity Community site to gain clinical experience, address rural health topics, and discuss iii-3 and community engagement. Credit/no-credit only. Offered: A.

[View course details in MyPlan: FAMED 544](#)

FAMED 547 Spirituality in Healthcare (2)

Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/SOC W 587; Sp.

[View course details in MyPlan: FAMED 547](#)

FAMED 556 Spanish for Health Professionals (1)

Instruction in interviewing/history taking Spanish-speaking patient. Prerequisite: Spanish fluency at intermediate level; current graduate health science student; permission of course coordinator. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: FAMED 556](#)

FAMED 559 Tobacco Related Health Disparities (1/2)

Integrates multiple disciplinary perspectives to address the pressing issue of disproportionate tobacco use and related diseases among marginalized populations, including those defined by socioeconomic status, race/ethnicity, and sexual orientation. Explores links between, and intervention strategies for, smoking and mental illness, social stress, acculturation processes, and genetics. Offered: jointly with HSERV 556.

[View course details in MyPlan: FAMED 559](#)

FAMED 561 LGBTQ Health and Health Disparities (1)

Covers the history and health status of the Lesbian, Gay, Bisexual, Transgendered, Queer, and Intersex (LGBTQ) community in the United States; effective strategies and skills for working with the LGBTQ community; designed to help the learner understand and respond better to healthcare needs of the LGBTQ community. Prerequisite: permission of course coordinator. Offered: W.

[View course details in MyPlan: FAMED 561](#)

FAMED 598 P-Family Medicine Independent Study and Remediation (*, max. 8)

Designed for medical students required to complete additional study related to the required Family Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

[View course details in MyPlan: FAMED 598](#)

FAMED 630 P-WRITE Family Medicine Clinical Clerkship (*, max. 24)

Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: permission of course coordinator.

[View course details in MyPlan: FAMED 630](#)

FAMED 631 P-LIC Family Medicine Clinical Clerkship - Olympia, WA (12)

Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: permission of course coordinator.

[View course details in MyPlan: FAMED 631](#)

FAMED 632 P-Clinical Clerkship in Family Medicine - Bozeman (12)

Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

[View course details in MyPlan: FAMED 632](#)

For description and prerequisite, see FAMED 632. Offered: AWSpS.

[View course details in MyPlan: FAMED 666](#)

FAMED 667 P-Clinical Clerkship in Family Medicine - Harrison - Bremerton (12)

Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Offered: AWSpS.

[View course details in MyPlan: FAMED 667](#)

FAMED 669 P-Clinical Clerkship in Family Medicine (12)

For description and prerequisite, see FAMED 632.

[View course details in MyPlan: FAMED 669](#)

FAMED 670 P-Advanced Underserved Clerkship (*, max. 24)

Students gain experience, knowledge, and skills needed to care for rural, specific ethnic, or underserved populations. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered:

AWSpS.

[View course details in MyPlan: FAMED 670](#)

FAMED 671 P-Social and Structural Determinates of Health (8)

Students increase awareness of and begin to address the social and structural determinants of health impacting underserved populations. Time divided between community engagement and advocacy activities and advanced clinical clerkship in an underserved primary care setting. Credit/no-credit only.

[View course details in MyPlan: FAMED 671](#)

FAMED 672 P-Advanced Preceptorship International (*, max. 24)

For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on healthcare delivery. Prerequisite: late third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

[View course details in MyPlan: FAMED 672](#)

FAMED 673 P-Clinical Clerkship in Family Medicine - Spokane Sacred Heart (1-12, max. 12)

Ambulatory primary care with emphasis on comprehensive, continuity, integrated care to patients of both genders and all ages in a culturally responsive manner. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

[View course details in MyPlan: FAMED 673](#)

FAMED 674 P-Advanced Interviewing in Primary Care (8) *L. MAUKSCH*

Emphasizes developing competency in patient-centered interviewing, interview organization, and time management. Introduces primary care counseling skills and methods of health behavior change. Prerequisite: permission of course faculty.

[View course details in MyPlan: FAMED 674](#)

FAMED 676 P-Clinical Clerkship in Family Medicine - Libby (12)

For description and prerequisites, see FAMED 632. Offered: AWSpS.

FAMED 679 P-Clinical Clerkship in Family Medicine - Ferndale (12)

For description and prerequisite, see FAMED 632. Offered: AWSpS.

[View course details in MyPlan: FAMED 679](#)

FAMED 680 P-Traditional Indian Medicine Clerkship in Primary Care Setting (*, max. 16)

Broadens students' knowledge about the traditional Indian perception of health and illness, and expands their experience and skills with Traditional Indian Medicine (TIM) by interacting with a TIM practitioner, Native physician, patients and their families, and the local Native community. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.

[View course details in MyPlan: FAMED 680](#)

FAMED 681 P-Indian Healthcare Clerkship (*, max. 16)

Examines the health disparities, health systems, and cultural/community strengths associated with American Indian/Alaska Native or other indigenous peoples. Prerequisite: either UCONJ 530, Indian Health Pathway

declaration, or permission of course coordinator . Offered: AWSpS.

[View course details in MyPlan: FAMED 681](#)

FAMED 682 P-Clinical Clerkship in Family Medicine - Ellensburg (12)

For description and prerequisite, see FAMED 632. Offered: AWSpS.

[View course details in MyPlan: FAMED 682](#)

FAMED 683 P-Clinical Clerkship in Family Medicine - Lewiston (12)

For description and prerequisite, see FAMED 632. Offered: AWSpS.

[View course details in MyPlan: FAMED 683](#)

FAMED 684 P-Clinical Clerkship in Family Medicine - Butte, MT (12)

For description and prerequisite, see FAMED 632. Offered: AWSpS.

[View course details in MyPlan: FAMED 684](#)

FAMED 685 P-Clinical Clerkship in Family Medicine - Valley - Juneau, AK (12)

For description and prerequisite, see FAMED 632. Offered: AWSpS.

[View course details in MyPlan: FAMED 685](#)

FAMED 686 P-Clinical Clerkship in Family Medicine - Port Townsend (12)

For description and prerequisite, see FAMED 632.

[View course details in MyPlan: FAMED 686](#)

FAMED 687 P-Clinical Clerkship in Family Medicine - White Salmon (12)

For description and prerequisite, see FAMED 632.

[View course details in MyPlan: FAMED 687](#)

FAMED 688 P-Family Medicine Subinternship (*, max. 24)

Students serve as interns for family medicine services associated with residency programs under the supervision of family medicine residents and attending physicians. Schedules mix inpatient and ambulatory experiences as determined by the site and the fourth-year student may have the same call as R-1 on service. Prerequisite: permission of course coordinator. Offered: AWSpS.

[View course details in MyPlan: FAMED 688](#)

FAMED 689 P-Sports Medicine in Family Medicine- Spokane (4-8)

Introduces medical students to treatment of sports related injuries in the non-operative, family medicine setting. Includes routine sports physicals, advanced musculoskeletal examination, and assessment of acutely injured athletes. Offered: AWSpS.

[View course details in MyPlan: FAMED 689](#)

FAMED 697 P-Family Medicine Special Electives (*, max. 24)

Supplemental experience in rural/urban practice or a family medicine department in a setting not already established through the UW SOM family medicine curriculum. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

[View course details in MyPlan: FAMED 697](#)

FAMED 699 P-WWAMI Family Medicine Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of course coordinator. Offered: AWSpS.

Graduate Program

Graduate Program Coordinator
S-340 Foege Building, Box 355065
(206) 616-7297
gensci@uw.edu

The Department of Genome Sciences offers a graduate program leading to the doctor of philosophy degree. Students are admitted only to the doctoral program.

The faculty and students of the Department of Genome Sciences study a broad range of topics, including the genetics of *E. coli*, yeast, *C. elegans*, *Drosophila*, and mouse; human and medical genetics; mathematical, statistical, and computer methods for analyzing genomes and theoretical and evolutionary genetics; and genome-wide studies by such approaches as sequencing, transcriptional and translational analysis, polymorphism detection, and identification of protein interactions. Successful completion of the graduate program, generally over a period of five years, leads to the PhD in Genome Sciences.

The department's goal is to address leading edge questions in biology and medicine by developing and applying genetic, genomic, and computational approaches that take advantage of genomic information now available for humans, model organisms, and a host of other species.

Doctor of Philosophy

Admission Requirements

1. Baccalaureate or advanced degree, either in a science such as biology, biochemistry, or related field, or in a computational area such as computer science or mathematics. The ideal candidate has experience in both areas. The most competitive applicants have excellent GRE scores as well as extensive laboratory research experience.
2. Personal statement describing the applicant's academic and scientific background, research goals, and motivation for applying

3. Curriculum vitae
4. Unofficial copies of transcripts.
5. Unofficial copies of GRE scores (and TOEFL scores, for international applicants). Applicants who have provided official scores to the UW Graduate School need not send additional copies.
6. Three letters of reference from professors or others who are able to provide insight on the applicant's qualifications. Reference letters may be submitted online or by hard copy.
7. Applicants still in school who will have earned additional courses not yet listed on the transcript should send a list of such additional courses to be taken before graduation.

Degree Requirements

90 credits, to include:

1. *First year:* Core courses, covering such topics as gene regulation, genomics, genetic analysis, genomic informatics, computational biology, proteomics, and population genetics, as well as literature review. Students rotate through a minimum of three laboratories before selecting a thesis laboratory at the end of the first year. Actual courses are determined in consultation with adviser.

Electives focused on specific areas of interest. Students have the option of selecting mentors from core faculty members in the Department of Genome Sciences as well as from adjunct and affiliate faculty members from several UW departments and the Fred Hutchinson Cancer Research Center.

2. *Second year:* Thesis research and additional electives. At the end of the second year, the student takes the general examination for PhD candidacy.
3. *Third year:* Students serve as teaching assistants for two undergraduate courses.
4. *Final years:* Most students complete their research and defend their dissertation during their fifth year.
5. During all years, students participate in the departmental Journal Club and research reports functions, and attend presentations of well-known researchers via the departmental seminar series.

Financial Aid

Genome Sciences provides full funding, including a competitive twelve-month salary, tuition waiver, and health insurance. Support is contingent upon satisfactory academic progress.

Research Facilities

The department is located in the William H. Foege Building. Students are assigned space in the laboratories of faculty members with whom they do their rotations or dissertation research. State-of-the-art research facilities are available in the department for cellular, protein, and DNA analysis. Extensive computer and library resources are available to students.

SCHOOL OF MEDICINE

GENOME SCIENCES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

GENOME 151 Human Genetics: The Individual and Society (4) NW

Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering; ethical issues. For non-science majors only. Offered: Sp.

[View course details in MyPlan: GENOME 151](#)

GENOME 261 Genomes and Society (4) NW

Explores current technological advances in genome research and how these advances are impacting society. Topics include sequencing of the human genome, stem cell research, cloning, genetically modified foods, immunizations/public health, and genetic therapy. Appropriate for non-science majors.

[View course details in MyPlan: GENOME 261](#)

GENOME 361 Fundamentals of Genetics and Genomics (3) NW

Introduces fundamental concepts in genetics and genomics including patterns of inheritance, genetic variation, and the relationship between genotype and phenotype. Prerequisite: minimum grade of 1.5 in BIOL 200; may not be taken if GENOME 371 is already taken; may not be repeated. Offered: WSpS.

[View course details in MyPlan: GENOME 361](#)

GENOME 371 Introductory Genetics (5) NW

Covers gene transmission, including chromosome mapping, genetic pathways; mutational analysis of biological processes emphasizing mutations affecting chromosome transmission. Introduction to genomics - cloning and sequence analysis of whole genomes. Emphasizes formal genetic mechanisms, molecular techniques. For biological sciences majors. Prerequisite: minimum grade of 1.7 in BIOL 180; minimum grade of 1.7 in BIOL 200; may not be repeated. Offered: A.

[View course details in MyPlan: GENOME 371](#)

GENOME 372 Genomics and Proteomics (5) NW

Covers emerging fields of genomics and proteomics. Discusses key technologies and their applications to the study of human and model organism genomes.

[View course details in MyPlan: GENOME 372](#)

GENOME 373 Genomic Informatics (4) NW

Focuses on methods for analyzing large genetic data sets and their application to biological problems, including sequence alignment and search methods, gene prediction, phylogenetic trees, and microarray analysis.

[View course details in MyPlan: GENOME 373](#)

GENOME 414 Molecular Evolution (5) NW

Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354.

Offered: jointly with BIOL 414.

[View course details in MyPlan: GENOME 414](#)

GENOME 453 Genetics of the Evolutionary Process (3) NW

Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation.

Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENOME 361 or GENOME 371.

[View course details in MyPlan: GENOME 453](#)

GENOME 454 The Origins of Genetics (4) NW

Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel's work and its rediscovery. Evidence contributing to cornerstone of classical genetics - the chromosome theory of heredity. Prerequisite: either GENOME 351, GENOME 371, or GENOME 372. Offered: A.

[View course details in MyPlan: GENOME 454](#)

GENOME 463 Hands-On Science for Elementary School Teachers (5)

Offers prospective and practicing teachers an opportunity to learn science through the hands-on teaching methods recommended for teaching science at the elementary level.

[View course details in MyPlan: GENOME 463](#)

GENOME 465 Advanced Human Genetics (4) NW

Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Instructors: Eichler, King Offered: W.

[View course details in MyPlan: GENOME 465](#)

GENOME 466 Cancer Genetics (3) NW

Focuses on three types of cancer-related genetics. DNA repair, mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENOME 361, GENOME 371, or GENOME 372.

[View course details in MyPlan: GENOME 466](#)

GENOME 475 Debates in Genetics (3) NW

Utilizes the original scientific literature as the basis for discussion of a range of genetic issues that impact society. Discussions are student-led; evaluations are based both on participation in class and on a research paper. Prerequisite: BIOL 200; either BIOL 355, BIOL 401, BIOL 402, GENOME 361, or GENOME 371.

[View course details in MyPlan: GENOME 475](#)

GENOME 490 Undergraduate Seminar (2, max. 6) NW

Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale

for research projects and the presentation and interpretation of research findings. Offered: AWSp.

[View course details in MyPlan: GENOME 490](#)

GENOME 496 Peer Teaching Assistants in Genome Sciences (1-5, max. 5)

Direct experience in the classroom teaching a discussion section for non-majors in genome sciences courses. Peer teaching assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material. In addition, peer TAs are given training in teaching techniques and course preparation.

Prerequisite: GENOME 371. Credit/no-credit only.

[View course details in MyPlan: GENOME 496](#)

GENOME 499 Undergraduate Research (*, max. 30)

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: GENOME 499](#)

GENOME 501 Introduction to Research Materials (1-10, max. 10)

The student undertakes a research project in one of the research groups within the department for a quarter at a time. Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: GENOME 501](#)

GENOME 503 An Inquiry Approach to Teaching Genetics at the Introductory High School Level (2, max. 6)

Provides advanced science content on topics in genetics and bioethics that are taught in secondary biology classrooms, as well as pedagogical strategies for conveying concepts to pre-college students. Workshop participation required.

[View course details in MyPlan: GENOME 503](#)

GENOME 504 StarNet: Research Experiences for Students and Teachers (3, max. 9)

Explores the scientific knowledge, technical skills, and pedagogical strategies related to teaching DNA sequencing and bioethics in a high school classroom. Workshop participation required.

[View course details in MyPlan: GENOME 504](#)

GENOME 505 StarNet: Teacher Research Experience (9)

Participating teachers carry out an independent research project in a University of Washington laboratory. Teachers, scientists, and StarNet staff meet weekly for an informal research talk.

[View course details in MyPlan: GENOME 505](#)

GENOME 506 The Science Education Partnership (5, max. 15)

Provides secondary school teachers training in molecular biology, genetics, and biotechnology, as well as resources and ongoing support designed to enhance biology instruction. Workshop participation required. Credit/no-credit only.

[View course details in MyPlan: GENOME 506](#)

GENOME 520 Seminar (1, max. 30)

Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: GENOME 520](#)

GENOME 522 Journal Club (1, max. 30)

Presentation and discussion of current scientific literature. For Genome Sciences graduate students only. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: GENOME 522](#)

GENOME 523 Research Reports (1, max. 30) *Thomas*

Presentation and discussion of current student research. For Genome Sciences graduate students only. Credit/no-

credit only. Offered: AWSp.

[View course details in MyPlan: GENOME 523](#)

GENOME 525 Current Literature in Human Genetics (1)

Topics from current literature in human genetics. Students and faculty each present one topic per quarter.

Prerequisite: graduate or postdoctoral status. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: GENOME 525](#)

GENOME 531 Genetics of Human Disease (3)

Covers modern approaches to the identification of human disease genes permitted by their isolation. Reviews how functional conservation of proteins throughout eukaryotic evolution is modeled in systems such as somatic cell culture, transgenic mice, nematodes, *Drosophila*, and yeast. Credit/no-credit only.

[View course details in MyPlan: GENOME 531](#)

GENOME 540 Introduction to Computational Molecular Biology: Genome and Protein Sequence Analysis (4)

Algorithmic and probabilistic methods for analysis of DNA and protein analysis. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: permission of instructor. Offered: W.

[View course details in MyPlan: GENOME 540](#)

GENOME 541 Introduction to Computational Molecular Biology: Molecular Evolution (4)

Computational methods for studying molecular evolution. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Offered: Sp.

[View course details in MyPlan: GENOME 541](#)

GENOME 545 Biostatistical Methods for Big Omics Data (3)

This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BOST 512, 514, or 517. Offered: jointly with BOST 545/PHG 545.

[View course details in MyPlan: GENOME 545](#)

GENOME 547 Scientific Writing (1.5)

For graduate students principally in their second and third year. Focuses on the preparation of research manuscripts for publication. Also considers other scientific writing such as thesis proposals and fellowship and grant applications. Credit/no-credit only.

[View course details in MyPlan: GENOME 547](#)

GENOME 550 Methods and Logic in Genetics (3)

Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and in vivo gene function. Prerequisite: first-year genetics graduate students only. Offered: A.

[View course details in MyPlan: GENOME 550](#)

GENOME 551 Principles of Gene Regulation (1.5)

A detailed examination of the mechanisms of transcription and translation as determined by experimental genetics, molecular biology, and biochemistry.

[View course details in MyPlan: GENOME 551](#)

GENOME 552 Technologies for Genome Analysis (1.5)

Discussion of current and newly-emerging technologies in genome analysis with regard to applications in biology and medicine and to potential advantages and limitations. Prerequisite: permission of instructor. Offered: A.

[View course details in MyPlan: GENOME 552](#)

GENOME 553 Advanced Genetic Analysis (1.5)

Classical genetic analysis is a powerful approach to dissect complex biological processes. Selective removal, addition, or alteration of specific proteins to identify and order genes in a pathway, define protein function, determine tissue and temporal requirements for gene function, and distinguish among competing hypotheses to explain biological phenomena.

[View course details in MyPlan: GENOME 553](#)

GENOME 554 Genomic Informatics (1.5)

Many complete genome sequences are known. Each of these encodes the instructions for making an entire organism, but how can we hope to decipher the code? Focuses on methods for analyzing genome sequences, ranging from large-scale organizational pattern to gene prediction and detailed local alignment methods.

[View course details in MyPlan: GENOME 554](#)

GENOME 555 Protein Technology (1.5)

Focuses on current and emerging technologies and approaches in protein analysis, and considers applications of these technologies in biology, biotechnology, and medicine.

[View course details in MyPlan: GENOME 555](#)

GENOME 559 Introduction to Statistical and Computational Genomics (3)

Rudiments of statistical and computational genomics. Emphasis on basic probability and statistics, introduction to computer programming, and relevant web databases.

[View course details in MyPlan: GENOME 559](#)

GENOME 561 Molecular Population Genetics and Evolution (1.5)

Surveys recent literature to gain an understanding of the basic principles of molecular population genetics and evolution as applied to analysis of genome data. Requires some computer analysis of genome data.

[View course details in MyPlan: GENOME 561](#)

GENOME 562 Population Genetics (4)

Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Instructors:

Felsenstein Offered: W, odd years.

[View course details in MyPlan: GENOME 562](#)

GENOME 565 Advanced Human Genetics (4)

Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure, and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Instructors: Eichler, King Offered: W.

[View course details in MyPlan: GENOME 565](#)

GENOME 570 Phylogenetic Inference (3)

Methods for inferring phylogenies (evolutionary trees) - biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Instructors: Felsenstein Offered: W, even years.

[View course details in MyPlan: GENOME 570](#)

GENOME 573 Human Genomics: Science, Ethics, and Society (3)

Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Instructors: Fullerton Offered: jointly with B H 551; A.

[View course details in MyPlan: GENOME 573](#)

GENOME 576 Genetic and Genomic Analysis of Bacteria (1.5)

In-depth coverage of genetic and genomic strategies used to analyze complex biological processes in bacteria. Focuses on general approaches, with examples drawn from studies of pathogenic organisms where possible. A combination of lectures and seminar-style discussions of primary literature.

[View course details in MyPlan: GENOME 576](#)

GENOME 580 Ethics in Biomedical Research and Teaching (1)

Explores ethical issues in research and teaching and discusses avenues of responsible conduct. Credit/no-credit only.

[View course details in MyPlan: GENOME 580](#)

GENOME 581 Seminar in Drosophila Genetics (1) *Berg*

Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of Drosophila development. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: GENOME 581](#)

GENOME 582 Seminar in Mouse Genetics (1) *Braun*

Discussion of contemporary research in and novel methods for genetic, cell biological, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no-credit only.

[View course details in MyPlan: GENOME 582](#)

GENOME 584 Seminar in DNA Replication (1) *Brewer; Fangman*

Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of budding yeast, with emphasis on the mechanisms and control of DNA replication. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: GENOME 584](#)

GENOME 585 Seminar in Bacterial Genetics (1)

Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the topogenesis of membrane proteins. Credit/no-credit only.

[View course details in MyPlan: GENOME 585](#)

GENOME 586 Seminar in Mammalian Genetics (1) *Sibley*

Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/no-credit only.

[View course details in MyPlan: GENOME 586](#)

GENOME 587 Seminar in Nematode Genetics (1) *Thomas*

Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no-credit only.

[View course details in MyPlan: GENOME 587](#)

GENOME 590 Population Genetics Seminar (1)

Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Prerequisite: GENOME 562 or permission of instructor. Instructors: Felsenstein. Credit/no-credit only.

[View course details in MyPlan: GENOME 590](#)

GENOME 599 Special Topics in Molecular Biotechnology (*, max. 12)

Prerequisite: permission of instructor. Offered: AWSp.

[View course details in MyPlan: GENOME 599](#)

GENOME 600 Independent Study or Research (*-)

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: GENOME 600](#)

GENOME 700 Master's Thesis (*-)

Offered: AWSpS.

[View course details in MyPlan: GENOME 700](#)

GENOME 800 Doctoral Dissertation (*-)

Offered: AWSpS.

SCHOOL OF MEDICINE

HUMAN BIOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

HUBIO 500 P-Medical Practice Preceptorship at WWAMI Sites (1, max. 3)

Personal experience with, and insight into, medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student's preference of discipline at the WWAMI sites. Registration limited to first-year medical students at WWAMI sites. Offered: AWSpS.

[View course details in MyPlan: HUBIO 500](#)

HUBIO 501 P-Human Biology Special Projects (*)

Designed for medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum. Offered: AWSpS.

[View course details in MyPlan: HUBIO 501](#)

HUBIO 505 P-WWAMI Preceptorship (*, max. 6)

Opportunity for first-year medical students at WWAMI sites to gain personal experience with medical practice situations by being assigned to selected clinical faculty members in their offices. Offered: ASp.

[View course details in MyPlan: HUBIO 505](#)

HUBIO 510 P-Microscopic Anatomy: Histology (6) *Bermingham-McDonogh*

Lectures and laboratories in microscopic anatomy designed to provide the principles and concepts of histology, to define the morphological characteristics of the cells, tissues, and organs of the human body, and to relate this information to functional processes studied in concurrent and subsequent courses. Offered: A.

[View course details in MyPlan: HUBIO 510](#)

HUBIO 511 P-Human Anatomy and Embryology (8/13) *Clark*

Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of the cadaver and examination of the normal living body. Concentrates on exploration of the body cavities and the viscera they contain. Offered: A.

[View course details in MyPlan: HUBIO 511](#)

HUBIO 512 P-Mechanisms in Cell Physiology (5) *Detwiler*

Physiology of the cell membrane, including ionic and electrical potential gradients; active transport, excitability, and action potentials; biophysics of sensory receptors; neuromuscular transmission; muscle energetics and contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions. Offered: A.

[View course details in MyPlan: HUBIO 512](#)

HUBIO 513 P-Introduction to Clinical Medicine (3-) *Issac, Maestas*

Instruction in communication skills and interview techniques to form the basis for the doctor-patient relationship and for the skills of communicating with patients. The patient profile is obtained. Attention to developing comfort in the physician role. Offered: A.

[View course details in MyPlan: HUBIO 513](#)

HUBIO 514 P-Biochemistry I-A (4-) *Maizels*

Explores molecular biology of the genome. Examines how the genome serves as a source of information, how molecular understanding of gene function identifies new therapeutic targets and provides new therapeutic and diagnostic tools. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: A.

[View course details in MyPlan: HUBIO 514](#)

HUBIO 516 P-Systems of Human Behavior (5) *Harrington*

Effects of behavioral factors in major management problems faced in medical practice relating to cultural background, social role, sexual identity, and belief systems. Acquisition of skills in analyzing behavior, defining objectives, and designing precise treatment strategies. Offered: A.

[View course details in MyPlan: HUBIO 516](#)

HUBIO 522 P-Introduction to Clinical Medicine (-4-) *Isaac, Maestas*

Medical history is introduced and instruction in data collection is begun. Experience in conducting medical interviews with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed. Offered: W.

[View course details in MyPlan: HUBIO 522](#)

HUBIO 523 P-Introduction to Immunology (2) *Gale*

Topics covered include: basic concepts such as antigens; antibodies; complement; B-and T-lymphocyte function, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities, autoimmunity, blood transfusion, and transplantation).

[View course details in MyPlan: HUBIO 523](#)

HUBIO 524 P-Biochemistry I-B (-4) *Maizels*

Metabolism as integrated in the organs and tissue of the human body for the purpose of generating energy from food and converting small molecules to essential building block of our cells. Discusses principles of nutrition in the context of human health and disease. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: W.

[View course details in MyPlan: HUBIO 524](#)

HUBIO 530 P-Clinical Epidemiology and Evidence-Based Medicine (2) *Kestenbaum*

Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: W.

[View course details in MyPlan: HUBIO 530](#)

HUBIO 531 P-Head, Neck, Ear, Nose, and Throat (5)

[View course details in MyPlan: HUBIO 531](#)

HUBIO 532 P-Nervous System (8) *Dacey, Mulligan*

An integrated approach to the normal structure and function of the nervous system, including the eye. Presents neuropathological examples as well as clinical manifestations of neurological disease.

[View course details in MyPlan: HUBIO 532](#)

HUBIO 534 P-Microbiology and Infectious Disease (9) *Moseley*

An introduction to medical microbiology and infectious diseases. Emphasizes the biology of microbial pathogens and the mechanisms of pathogenesis. Covers clinical manifestations, epidemiology, general principles of diagnosis, therapy, and prevention of infectious disease. Offered: Sp.

[View course details in MyPlan: HUBIO 534](#)

HUBIO 535 P-Introduction to Clinical Medicine (-4) *Isaac, Maestas*

Adult screening physical examination is taught through the use of lecture, audiovisual aids, and small-group tutorial, where students in supervised setting practice the physical examination on one other. Further practice in the performance and recording of the patient profile and medical history. Offered: Sp.

[View course details in MyPlan: HUBIO 535](#)

HUBIO 540 P-Cardiovascular System (6) *Feigl*

Interdisciplinary approach to cardiovascular medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Function of the cardiovascular system in health and disease. Offered: A.

[View course details in MyPlan: HUBIO 540](#)

HUBIO 541 P-Respiratory System (4) *Culver, Luks*

Interdisciplinary approach to the respiratory system, including anatomy of thorax and lungs, ventilation mechanics, blood-gas transport, gas exchange, acid-base balance, and the physiology and pathology of obstructive, restrictive, and pulmonary-vascular diseases. Offered: A.

[View course details in MyPlan: HUBIO 541](#)

HUBIO 542 P-Introduction to Clinical Medicine (4-) *McDonough*

Advanced instruction in interview technique, history taking, and physical examination, with emphasis on detection of abnormalities. Offered: A.

[View course details in MyPlan: HUBIO 542](#)

HUBIO 543 P-Principles of Pharmacology I (5) *McKnight*

Includes general principles of pharmacology and the specific pharmacology of major drugs acting on the autonomic and cardiovascular systems. Offered: A.

[View course details in MyPlan: HUBIO 543](#)

HUBIO 547 P- Pathology IIA (5)

Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory.

[View course details in MyPlan: HUBIO 547](#)

HUBIO 548 P-Cases in Clinical Ethics (1)

Provides exposure to key issues in clinical ethics as well as the tools for ethical reasoning and critical thinking that support the student's current and future work. Prerequisite: second-year medical students. Instructors: Edwards, Timberlake

[View course details in MyPlan: HUBIO 548](#)

HUBIO 550 P-Introduction to Clinical Medicine (-4-) *McDonough*

Advanced instruction in interview technique, history taking, and physical examination, with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.

[View course details in MyPlan: HUBIO 550](#)

HUBIO 551 P-Gastro-Intestinal System (4) *Silverstein*

Anatomy of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.

[View course details in MyPlan: HUBIO 551](#)

HUBIO 552 P-Hematology (3) *Richard*

Familiarizes students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease, is stressed. Offered: W.

[View course details in MyPlan: HUBIO 552](#)

HUBIO 553 P-Musculoskeletal System (4) *Schmale*

Gross, surface, applied, and radiographic anatomy. Clinical manifestations in the musculoskeletal system and pathophysiology of trauma, aging, infection, and inflammation, as well as congenital and metabolic disorders. Dissections, physical examinations, and problem-based learning. Offered: W.

[View course details in MyPlan: HUBIO 553](#)

HUBIO 554 P-Genetics (2)

Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, amniocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.

[View course details in MyPlan: HUBIO 554](#)

HUBIO 555 P-Medicine, Health, and Society (3) *Chen, Masuda*

Interdisciplinary introduction to health services designed for future healthcare practitioners. Examines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student's ability to adopt a broad perspective across healthcare disciplines and traditional boundaries. Offered: W.

[View course details in MyPlan: HUBIO 555](#)

HUBIO 556 P-Hormones and Nutrients (4) *DeSantis*

Introduction to principles of human endocrinology, metabolism, and nutrition; the physiology and pathophysiology of endocrine systems, glucose and lipid metabolism, and fluid and salt balance; and the importance of proper nutrition in certain disease states.

[View course details in MyPlan: HUBIO 556](#)

HUBIO 557 P-Pathology IIB (2-)

Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory.

[View course details in MyPlan: HUBIO 557](#)

HUBIO 558 P-Rheumatology (1)

An intensive immersion course in rheumatology for second year students. Lectures and small group patient demonstrations link concepts of immunology, pathology and pharmacology with inflammatory and autoimmune disease, teach differential diagnosis of symptoms seen in rheumatic disease and use if diagnostic to demonstrate features of common childhood and adult rheumatic diseases and their management.

[View course details in MyPlan: HUBIO 558](#)

HUBIO 559 P-Problem Based Learning (3) *Scott*

Teaches students to methodically solve medical problems by gathering, sorting, and interpreting data. Students learn life-long self-education and self-evaluation skills. Provides practice working as a healthcare team by

including medical, nursing, and physician assistant students in each group. Offered: W.

[View course details in MyPlan: HUBIO 559](#)

HUBIO 560 P-Introduction to Clinical Medicine (-5) McDonough

Introduction to clinical and laboratory diagnosis. Offered: Sp.

[View course details in MyPlan: HUBIO 560](#)

HUBIO 562 P-Urinary System (4) Jefferson

Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.

[View course details in MyPlan: HUBIO 562](#)

HUBIO 565 P-Reproduction (4) Steiner

Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of testicular and ovarian function, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolactin and lactation, aging and infertility. Offered: Sp.

[View course details in MyPlan: HUBIO 565](#)

HUBIO 566 P-Pathology IIC (-3)

Patterns of cell and tissue response to injury. Mechanisms of cell injury, inflammatory process, thrombosis, normal and abnormal growth, neoplasia, clinicopathological correlation. Major pathologic changes associated with specific diseases in the different organ systems. Multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory.

[View course details in MyPlan: HUBIO 566](#)

HUBIO 567 P-Skin System (2) Colven

Gross and microscopic anatomy. Physiology, protection, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination and illustrating examples of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.

[View course details in MyPlan: HUBIO 567](#)

HUBIO 569 P-Mind, Brain, and Behavior (6) O. PASCUALY

Defines and describes major psychiatric disorders and presents a systematic approach to differential diagnosis. Discusses conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry; along with physiological and biochemical mechanisms, and therapeutic and adverse effects. Offered: Sp.

[View course details in MyPlan: HUBIO 569](#)

HUBIO 590 P-Medical Information for Decision Making (1)

Introduction to methods for: a) identifying and retrieving high quality, relevant documents for clinical decision making, b) applying rigorous criteria when reading primary research studies, reviews of primary studies, or other medical information sources that report on the effectiveness of therapeutic or preventive interventions.

Prerequisite: first-year medical students. Instructors: Tarczy-Hornoch Offered: W.

[View course details in MyPlan: HUBIO 590](#)

HUBIO 591 P-WWAMI Non-clinical Selectives - Pullman (*, max. 30)

Courses offered at WWAMI university site in Pullman designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

[View course details in MyPlan: HUBIO 591](#)

HUBIO 592 P-WWAMI Non-clinical Selectives - Spokane (*, max. 30)

Courses offered at WWAMI university site in Spokane designed to satisfy the non-clinical selective graduation

requirements for medical students. Offered: AWSp.

[View course details in MyPlan: HUBIO 592](#)

HUBIO 593 P-WWAMI Non-clinical Selectives - Laramie (*, max. 30)

Courses offered at WWAMI university site in Laramie, WY designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

[View course details in MyPlan: HUBIO 593](#)

HUBIO 594 P-WWAMI Non-clinical Selectives - Anchorage (*, max. 30)

Courses offered at WWAMI university site in Anchorage, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

[View course details in MyPlan: HUBIO 594](#)

HUBIO 595 P-Independent Investigative Inquiry, GHIP (8) *S. GRAHAM*

With faculty mentorship, students investigate a global health issue, work on a community health project, and create an academic poster. Prerequisite: GHIP students only. Offered: S.

[View course details in MyPlan: HUBIO 595](#)

HUBIO 596 P-WWAMI Non-Clinical Selectives - Bozeman (*, max. 30)

Courses offered at WWAMI university site in Bozeman, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

[View course details in MyPlan: HUBIO 596](#)

HUBIO 597 P-Independent investigative Inquiry (8)

Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: Sp.

[View course details in MyPlan: HUBIO 597](#)

HUBIO 598 P-WWAMI Non-Clinical Selectives - Moscow (*, max. 30)

Courses offered at WWAMI university site in Moscow, ID, designed to satisfy the non-clinical selective graduation requirement for medical students. Offered: AWSp.

[View course details in MyPlan: HUBIO 598](#)

HUBIO 599 P-Independent Study in Medical Science (6)

Independent research with faculty sponsor and completion of paper as partial fulfillment of non-clinical selective graduation requirement. Offered: Sp.

[View course details in MyPlan: HUBIO 599](#)

HUBIO 600 P-Capstone Course: Preparation for Residency (2, max. 4)

A combination of large group lectures and small group discussions and workshops reviewing clinical skills in history-taking and physical examinations, imaging studies, common and emergency drugs, ACLS, infectious disease control, common clinical problems, and other topics that are encountered in residency training. Offered: Sp.

Immunology

[Display as tabs](#)

Department Overview

H564 Health Sciences

For those contemplating careers in biomedical research, immunology provides challenging and exciting intellectual opportunities. Progress in the discipline in the past decade has been extraordinary, a fact nowhere more visible than at the University of Washington. The Department of Immunology, launched in 1989, now includes more than 30 faculty and 200 scientists, students, post-docs and staff, all engaged in elucidating fundamental immunological mechanisms and how these mechanisms impact human health, infectious, autoimmune and allergic diseases, and cancer. Current members of the department have distinguished records in the area of lymphocyte signaling, T and B cell development, macrophage function, antigen processing, immuno-tolerance, and the structure of antigen receptors.

Consider the fundamental processes that underlie immune function. First, millions of potentially injurious macromolecules must be recognized. Second, recognition of these macromolecules, generally structures associated with potential pathogens, must trigger powerful effector mechanisms that permit elimination of the offending microorganisms. Finally, these recognition and effector systems must distinguish the universe of potentially harmful molecules from an equally diverse repertoire of structurally similar 'self' components. How is such specific molecular recognition achieved? How do the cells responsible for mediating host defense develop, and what signaling systems direct their responses? These are questions being addressed by members of the program at the molecular, cellular, and whole organism levels.

Graduate Program

Graduate Program Coordinator
H564 Health Sciences, Box 357650
immgrad@uw.edu
(206) 685-3955, fax (206) 543-1013

The graduate program, organized through the Department of Immunology, occupies contemporary laboratory and office space in the H and I wings of the Health Sciences complex, where many faculty are based. Other members of the training faculty are based in contiguous wings of the Health Sciences complex or at one of four affiliated institutions: Fred Hutchinson Cancer Research Center, Benaroya Research Center at Virginia Mason, Seattle Children's hospital, and the Institute for Systems Biology. The University of Washington is a premier institution for biomedical research in the nation, ranking second

among all institutions in overall support from the NIH. The research environment is augmented by affiliated institutions, creating an open and collegial partnership for basic, translational, and clinical research in which collaborations and open sharing of ideas and reagents take place. Members of the program have been instrumental in development and application of contemporary technologies, including flow cytometry, confocal microscopy, high-throughput genomic, proteomic, and computational analysis, and generation and analysis of transgenic/knockout/knockin mice to address important immunological and biological questions. Training of students occurs in an open environment which is intellectually stimulating, scientifically diverse, and strongly interactive. All immunology graduate students are assured financial support for the term of their studies.

Master of Science

Students are not admitted to the department specifically as candidates for a master's degree. A terminal master's degree can be awarded if the faculty deems the student has made some progress in the program but not enough to be consistent with earning the Ph.D.

Doctor of Philosophy

Admission Requirements

Students are admitted for autumn quarter; application deadline is January 1 for U.S. citizens and November 1 for international applicants. Requirements for admission are flexible. However, most successful applicants have completed survey courses in biology, chemistry, and physics; one year of organic chemistry; and mathematics through integral calculus. Prior exposure to immunology through formal coursework, or especially through laboratory research, is desirable. A bachelor's degree is required, as is evidence of superior scholarship and above average performance on the GRE General Test. A GRE subject test is not required.

International students must take the Test of English as a Foreign Language (TOEFL); 250 is the minimum acceptable score on computer test.

Degree Requirements

90 credits, to include:

1. 18 graded credits in the first two years of study. First-year coursework consists of consecutive five-week-long courses taken autumn through spring quarters – two per quarter (for 1.5 to 2 graded credits each); winter quarter, all first year students also take IMMUN 532 (4 graded credits), for a total of 13 or 13.5 graded credits the first year, depending on course choices. In the second year, 4.5 or 5 additional graded credits are required, earned by taking electives winter and/or spring quarters. As part of the first- and second-year coursework, students take two five-week courses that specifically focus on cancer immunology.
2. Autumn quarter of the first year, students may take an elective and attend selected lectures of the undergraduate immunology course, IMMUN 441. Students are required to attend the departmental seminar series, Journal Club, and research-in-progress talks beginning the first quarter and continuing throughout enrollment.
3. All elective courses must be relevant to biomedical research, and be rigorous enough to include either a final examination or required written paper for a grade. Elective classes must be at the 500 level, and receive a numerical grade.

4. Each graduate student takes the qualifying examination during July immediately following the second year of classes. (MSTP students take qualifying examinations following the first year of graduate classes.) The qualifying examination is two parts - written and oral.
5. Students who pass the qualifying examination then prepare for the General Examination, which must be taken within 15 months of the qualifying examination.
6. The dissertation must meet all format requirements before being accepted by the Graduate School.

SCHOOL OF MEDICINE

IMMUNOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

IMMUN 441 Introduction to Immunology (4) NW

General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: BIOL 220; may not be repeated. Offered: A.

[View course details in MyPlan: IMMUN 441](#)

IMMUN 499 Undergraduate Research (*, max. 24)

Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: IMMUN 499](#)

IMMUN 532 Intersection of Innate and Adaptive Immunity in Disease (4)

Examines the molecular and cellular basis of immune function. Topics include: hematopoiesis, innate immunity, antigen receptor structure, lymphocyte development, antigen presentation, effector T-cell functions, and immune-mediated diseases. Prerequisite: coursework in molecular genetics; graduate standing in immunology; other graduate students with permission of instructor. Offered: W.

[View course details in MyPlan: IMMUN 532](#)

IMMUN 534 Central Issues in Immunology (3)

Presentations by participants of topics relating to the broad study of immunology. Prerequisite: graduate standing in immunology. Offered: Sp.

[View course details in MyPlan: IMMUN 534](#)

IMMUN 537 Immunological Methods (1.5) *Fink, Weinmann*

Introduces whole animal, cellular, biochemical, and molecular techniques used in immunological research. Discusses strengths and limitations of each technique and emphasizes caveats in interpreting the resulting data. Offered: A.

[View course details in MyPlan: IMMUN 537](#)

IMMUN 538 Immunological Based Diseases and Treatments (2) E. BETTELLI, R. SAVAN

Addresses the mechanisms leading to the development of immunologically based diseases. In particular, covers immunological basis and treatment of infection, autoimmunity, and cancer. Offered: Sp.

[View course details in MyPlan: IMMUN 538](#)

IMMUN 550 Selected Topics in Immunology (1, max. 30)

Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: IMMUN 550](#)

IMMUN 551 Research Conference in Regulation of T Cell-Dependent B Cell Maturation (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Clark Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 551](#)

IMMUN 552 Research Conference in Principles of Antiviral Immunity (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Prerequisite: immunology graduate student; permission of instructor. Instructors: Stetson Offered: AWSpS.

[View course details in MyPlan: IMMUN 552](#)

IMMUN 553 Research Conference in Recombination and Repair in B Cell Development (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Maizels Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 553](#)

IMMUN 554 Research Conference in Immunogenetic Aspects of Human Autoimmunity (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Nepom Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 554](#)

IMMUN 555 Research Conference in Model of Autoimmune Disease and Their Regulation (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Gorman Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 555](#)

IMMUN 556 Research in Conference in Regulation of Autoimmunity and Allergic Inflammation (1, max. 30)

Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Ziegler Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 556](#)

IMMUN 557 Research Conference in the Mechanisms and Consequences of Programmed Cell Death (1, max. 30)

Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology or permission of instructor. Instructors: Oberst Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 557](#)

IMMUN 558 Research Conference in Apoptosis and Autoimmunity (1, max. 30)

Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Elkon Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 558](#)

IMMUN 559 Research Conference in T Cell Responses during Mycobacterium tuberculosis (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate student; permission of instructor. Instructors: Urdahl Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 559](#)

IMMUN 560 Research Conference in Progress in T Cell Research (1, max. 30)

Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Bevan, Fink, Gorman, Greenberg, Pepper, Stetson Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 560](#)

IMMUN 561 Research Conference in Mechanisms of Peripheral Tolerance (1, max. 30)

Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Fink Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 561](#)

IMMUN 562 Research Conference in Structural Molecular Immunology and Vaccinology (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Prerequisite: immunology graduate students; permission of instructor. Instructors: Strong Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 562](#)

IMMUN 563 Research Conference in Macrophage Biology: Signaling and Phagocytosis (1, max. 30)

Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Aderem Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 563](#)

IMMUN 564 Research Conference in Cellular/Molecular Regulation of T Cell Responses (1, max. 30)

Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Greenberg Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 564](#)

IMMUN 565 Research Conference in Innate Immune Defenses against Virus Infection (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus on understanding virus and host regulation of innate immune processes. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Gale Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 565](#)

IMMUN 566 Research Conference in the Studies of Lymphocyte Memory (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Pepper Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 566](#)

IMMUN 567 Research Conference in the Role of miRNAs in Modulating the Immune System (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Savan Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 567](#)

IMMUN 568 Research Conference in Regulation of the Inflammatory Response of Myeloid Cells (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus placed on understanding the regulation of the inflammatory response of myeloid cells. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology.

Instructors: Hamerman Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 568](#)

IMMUN 569 Research Conference in T cells in autoimmunity (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Bettelli Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 569](#)

IMMUN 570 Research Conference in Mucosal Immunity (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Oukka Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 570](#)

IMMUN 571 Research Conference in Development and Activation of B Cells (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Rawlings Credit/no-credit only.

[View course details in MyPlan: IMMUN 571](#)

IMMUN 572 Research Conference in Signal Transduction in B-Cells (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Scharenberg Credit/no-credit only.

[View course details in MyPlan: IMMUN 572](#)

IMMUN 573 Immunology Seminar Series (1, max. 30)

Weekly discussion in which original research results are presented and discussed. Emphasis is on new and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Prerequisite: graduate standing in immunology; other graduate students with firm background in immunology and permission of instructor. Credit/no-credit only.

[View course details in MyPlan: IMMUN 573](#)

IMMUN 574 Research Conference in Kaposi's Sarcoma-Associated Herpes Virus: Interactions with B-Cells and Endothelial Cells (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Lagunoff Credit/no-credit only.

[View course details in MyPlan: IMMUN 574](#)

IMMUN 575 Research Conference in Infection and Immunity (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in

immunology. Instructors: Bevan Credit/no-credit only.

[View course details in MyPlan: IMMUN 575](#)

IMMUN 576 Research Conference in Innate Immune Mechanisms of Response and Regulation (1, max. 30) A. LACY-HULBERT

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than once conference each quarter. Prerequisite: graduate standing in immunology; permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 576](#)

IMMUN 577 Research Conference in Lymphocyte Homing and Function (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Campbell Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 577](#)

IMMUN 578 Research Conference in Immunology and the Pathogenesis of Tuberculosis (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Prerequisite: graduate standing in immunology. Instructors: Ramakrishnan Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 578](#)

IMMUN 579 Research Conference in Liver Immunology (1, max. 30)

Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Prerequisite: immunology graduate student and permission of instructor. Instructors: Crispe Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 579](#)

IMMUN 580 Research Conference in Immune Imaging and Structure-Function Biology (1, max. 30) M. GERNER

Weekly group conferences concerning ongoing graduate students and postdoctoral research in Immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 580](#)

IMMUN 581 Research Conference on the Initiation of Type 2 Immune Responses by Parasitic Worms and Allergens (1) J. VON MOLTKE

Weekly group conferences concerning ongoing graduate students and postdoctoral research in Immunology. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 581](#)

IMMUN 599 Introduction to Immunology Research (1-10, max. 40)

Current problems in immunological research. Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 599](#)

IMMUN 600 Independent Study or Research (*-)

Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 600](#)

IMMUN 700 Master's Thesis (*-)

Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: IMMUN 700](#)

IMMUN 800 Doctoral Dissertation (*-)

Prerequisite: graduate standing in immunology. Credit/no-credit only. Offered: AWSpS.

Laboratory Medicine

[Display as tabs](#)

Department Overview

NW 120, UW Medical Center

Medical laboratory science, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of healthcare, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease.

Undergraduate Program

Adviser

NW 120, UW Medical Center

(206) 598-6131

medtech@uw.edu

The Department of Laboratory Medicine offers the following program of study:

- Bachelor of Science in Medical Laboratory Science degree

Bachelor of Science

1. *Pre-professional Phase.* During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.
2. *Professional Phase.* The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable them to function effectively in the clinical laboratory.

The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.

Suggested First- and Second-Year College Work: Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include: CHEM 321, MICROM 301, GENOME 351, GENOME 371, B

STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH 410, UCONJ 420. Begin taking admission requirements, shown below.

Department Admission Requirements

1. BIOL 118, BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239); one of STAT 220, STAT 221/SOC 221/CS&SS 221, STAT 311, or Q SCI 381.
2. Complete all general education requirements including 10 credits of Individuals & Societies, and 10 credits of Visual, Literary, & Performing Arts, as well as all required English and writing courses.
3. Students admitted to the medical laboratory science program must be exempt from or have successfully completed any required English as a Second Language (ESL) courses no later than August 31 of the application year or admission is cancelled.

Application Procedure: See program adviser for application form. Application deadline is February 15, to begin the following autumn quarter.

Major requirements

152-155 credits as follows:

1. *Courses Required for Admission (48-51 credits):* See list above.
2. *Didactic Courses (59 credits):* IMMUN 441, MICROM 442, MICROM 443, MICROM 444, MICROM 445; LAB M 418, LAB M 419, LAB M 420, LAB M 421, LAB M 426, LAB M 428, LAB M 429, LAB M 430, LAB M 434, LAB M 435
3. *Clinical Rotations (50credits):* LAB M 423, LAB M 424, LAB M 425, LAB M 431, LAB M 432, LAB M 433
4. Minimum 2.0 grade in all didactic and clinical rotation courses
5. Minimum 2.00 GPA, both cumulative and in required courses

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* Graduates of the medical laboratory science program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience trouble-shooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations.

Successful medical laboratory scientists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical laboratory scientist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical laboratory

scientists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out research in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- *Instructional and Research Facilities:* The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Seattle Children's hospital, Labcorp Dynacare, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans' Affairs Puget Sound Health Care System, Virginia Mason Medical Center, Evergreen Hospital Medical Center, and Highline Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington. These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialties in these divisions. In addition, students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Internship Opportunities:* One or two internships per year in Japan available to graduates of the medical technology program.
- *Department Scholarships:* Several offered.
- *Student Organizations/Associations:* None currently active.

Of Special Note: The medical laboratory science program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119, (847) 939-3597, (773) 714-8880, (773) 714-8886 (fax), info@naaccls.org, www.naacls.org. Graduates are eligible for certification by the Board of Registry of the American Society for Clinical Pathology and by the National Credentialing Agency for Laboratory Personnel, Inc.

Graduate Program

Graduate Program Coordinator
NW 120, Box 357110
(206) 598-2148
hschil@uw.edu

The Department of Laboratory Medicine offers a Master of Science in Laboratory Medicine and prepares the graduate for advanced technical and supervisory positions in the clinical and research laboratories as well as in pharmaceutical and diagnostic industries.

The curriculum is flexible, usually two years for full-time students, and up to six years for part-time students. Students select one of five pathways and work with a mentor on a thesis project. In addition to the 25 credits of required courses, they take courses related to their area of study. The target population is medical technology (MT/MLS) graduates with ASCP certification.

The Department of Laboratory Medicine also offers a combined undergraduate/graduate program (CUG). Students may enter this CUG either as undergraduates or college graduate/postbaccalaureate students. To be admitted to the CUG program, the student must first be accepted into the undergraduate program shown above. Undergraduates or college graduate/postbaccalaureate students may apply simultaneously to the CUG program, or delay application until graduation. Once accepted into the CUG, the student completes the undergraduate program, then immediately enrolls in the Graduate School. Students receive a BS in Medical Laboratory Science at the completion of their undergraduate studies and an MS in Laboratory Medicine at the completion of their graduate studies.

Admission Requirements

The program accepts mostly ASCP certified medical laboratory scientists (MLS/MT). For medical laboratory scientists (MLS/MT), MLT (medical laboratory technician), students from a four-year program, or laboratorians with significant experience in a clinical laboratory, admission requirements include:

2. Minimum 3.00 GPA in the last 90 graded quarter credits or the last 60 graded semester credits
3. Certification as a medical laboratory scientist (MLS/MT) or equivalent, or as a medical laboratory technician (MLT) or equivalent, or as a specialist in a clinical laboratory field
4. Completion of the Graduate Record Examination (GRE) Aptitude Test within the last five years
5. Foreign students must have a satisfactory command of the English language. Results of the TOEFL, MLT, or IELTS must be submitted to the Graduate School. These scores are good for only two years.
6. A 200-300 word statement about educational and professional objectives and reasons for taking the master of science program
7. Three letters of recommendation
8. A personal interview

For students with an undergraduate degree in a scientific field such as chemistry, microbiology, or biology, without ASCP certification, the program is highly competitive. Admission requirements include:

1. Outstanding academic achievements, including a minimum 3.20 GPA in the last 90 graded quarter credits or the last 60 graded semester credits.
2. Completion of the Graduate Record Examination (GRE) Aptitude Test within the last five years, with excellent scores.
3. Foreign students must have an excellent command of the English language. Results of the TOEFL or IELTS must be submitted to the Graduate School. Scores are good for only two years.
4. A 200-300 word statement about educational and professional objectives and reasons for taking the master of science program
5. Three letters of recommendation
6. Personal interviews with department faculty

Application deadline is February 15 to begin the following autumn quarter. Application forms and procedures for admission to the Graduate School are available at www.grad.washington.edu/.

Degree Requirements

Minimum 36 credits, of which nine are thesis credits. Full-time medical laboratory scientists typically complete the program in two years. Students select one of five pathways, as follows:

1. Chemistry/Immunology

- a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
- b. Recommended: MICRO 441
- c. Electives relevant to thesis, chosen with advice from mentor: BIOC 426, BIOC 440, BIOC 441, BIOC 442, BIOC 540, BIOC 541, BIOC 542, BIOST 512, BIOST 513, CHEM 428, CHEM 429, CHEM 436, CONJ 546, IMMUN 532, IMMUN 533, IMMUN 534, IMMUN 535, PATH 500, PATH 502, PATH 513, PATH 515, PATH 516, PATH 517, P BIO 505, P BIO 506, P BIO 507, PHCOL 401, PHCOL 402

2. Hematology/Coagulation

- a. Required: BIOC 440, BIOC 441, BIOC 442, BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
- b. Recommended: PATH 516
- c. Elective relevant to thesis chosen with advice from mentor: BIOST 512, BIOST 513, CHEM 428, CHEM 429, CONJ 546, GENOME 465, IMMUN 441, IMMUN 532, P BIO 506, PATH 500, PATH 512, PATH 514, PATH 515, PATH 516, PATH 522, PATH 560 (*, max. 10).

3. Microbiology/Virology

- a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
- b. Recommended: IMMUN 441, MICRO 442, MICRO 444, MICRO 445, MICRO 555 (2.5)
- c. Electives relevant to thesis chosen with advice from mentor: BIOC 440, BIOC 441, BIOC 442, BIOC 541, BIOST 512, BIOST 513, CHEM 428, CHEM 429, CONJ 547, CONJ 550, EPI 503, EPI 507, EPI 510, EPI 511 (3-4), EPI 512, IMMUN 533, MICROM 411, MICROM 431, MICROM 450, MICROM 529, MICROM 530, MICROM 531, MICROM 553, P BIO 505, P BIO 506, PATH 512, PATH 513, PATH 515, PATH 516

4. Molecular Diagnostics/Genetics

- a. Required: BIOST 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
- b. Recommended: BIOC 440 or equivalent, BIOC 441 or equivalent, BIOC 442 or equivalent, GENOME 465
- c. Electives relevant to thesis chosen with advice from mentor: BIOST 512, BIOST 513, BIOST 516, CHEM 428, CHEM 429, CONJ 546, EPI 516, EPI

517, GENOME 411, GENOME 466, GENOME 531, IMMUN 441, IMMUN 532, IMMUN 536, MICROM 450, MICROM 530, P BIO 505, P BIO 506

5. Management/Medical Informatics

- a. Required: BIOS T 511, LAB M 502, LAB M 510, LAB M 520, LAB M 601, LAB M 700
- b. Electives relevant to thesis chosen with advice from mentor
 1. Business Administration: B A 470, B A 472
 2. Business Communications: B CMU 510
 3. Human Resource Management and Organizational Behavior (HRMOB): HRMOB 410, HRMOB 450, HRMOB 470 MGMT 403, MGMT 404

SCHOOL OF MEDICINE

LABORATORY MEDICINE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

LAB M 418 Introductory Clinical Chemistry (6) *Bankson*

Introduces the fundamentals of instrumentation and methodology in the clinical chemistry laboratory. Limited to medical laboratory science students. Offered: Sp.

[View course details in MyPlan: LAB M 418](#)

LAB M 419 Clinical Coagulation (4) *Hansen-Suchy*

Lecture and laboratory coverage of the theory of the hemostatic system, to include tests used in the diagnosis/monitoring of patients with abnormal bleeding and/or thrombosis. Instrumentation as appropriate for testing included. Quality control and quality assurance discussed. Limited to medical laboratory science students. Offered: S.

[View course details in MyPlan: LAB M 419](#)

LAB M 420 Laboratory Analysis of Urine and Body Fluids (3) *Schiller*

Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Limited to medical laboratory science students. Offered: S.

[View course details in MyPlan: LAB M 420](#)

LAB M 421 Medical Microbiology (1/6, max. 6) *Abbott*

Lecture and laboratory coverage of human infections and diagnostic procedures used for isolation, identification, and antimicrobial susceptibility testing of the microorganisms associated with disease. Limited to medical laboratory science students. Offered: S.

[View course details in MyPlan: LAB M 421](#)

LAB M 423 Clinical Chemistry (*-, max. 24) *Ianna*

Clinical testing using automated and manual methods. Measurement of pancreatic function and intestinal absorption, renal and liver function, enzymes, electrolytes, blood gases, lipids, toxicology, urinalysis, endocrinology, and immunology. Limited to medical laboratory science students. Offered: AWSp.

[View course details in MyPlan: LAB M 423](#)

LAB M 424 Clinical Microbiology (*-, max. 24) *G. VAN KEKERIX*

Techniques used in the diagnostic microbiology laboratory, including quality control, specimen evaluation,

identification of pathogenic microorganisms, and antimicrobial susceptibility testing. Limited to medical laboratory science students. Offered: AWSp.

[View course details in MyPlan: LAB M 424](#)

LAB M 425 Clinical Hematology (*-, max. 24)

Clinical study of techniques used in the diagnostic evaluation of blood cells, including production, proliferation, survival, morphologic, and functional features. Assessment of proteins and cells important in hemostasis included. Quality control and quality assurance issues considered. Biomolecular techniques appropriate for evaluation of the hematologic and hemostatic systems discussed. Limited to medical laboratory science students. Offered: AWSp.

[View course details in MyPlan: LAB M 425](#)

LAB M 426 Clinical Immunohematology ([1-7]-, max. 7) *D. SABATH*

Lecture and laboratory covering theory of transfusion medicine and serological procedures used in the evaluation of cellular antigen systems. Principles of immunology and genetics included as appropriate for the techniques performed; screening of donor units to provide a safe product discussed. Quality control and quality assurance issues considered. Limited to medical laboratory science students. Offered: A.

[View course details in MyPlan: LAB M 426](#)

LAB M 427 Selected Studies in Laboratory Medicine (*-, max. 24) *H. EGGLESTON*

Selected clinical study in the major scientific disciplines of laboratory medicine, to include molecular diagnostics, or pursuance of a clinical research study. Limited to medical laboratory science students. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: LAB M 427](#)

LAB M 428 Clinical Biochemistry for Medical Laboratory Scientists (4) *D. BANKSON*

Introduces medical applications and the clinically relevant aspects of biochemistry necessary for understanding biochemical diseases. Teaches the structures and human metabolism of proteins, carbohydrates, lipids, and nucleotides in health, along with their roles in disease processes. Stresses normal biochemical pathways and subsequent diseases when the pathways are disrupted or diverted. Limited to medical laboratory science students. Offered: A.

[View course details in MyPlan: LAB M 428](#)

LAB M 429 Foundations of Medical Laboratory Science (5)

Lecture and laboratory cover the essential theories, concepts, and practices that define medical laboratory science as a distinctive profession within Laboratory Medicine and which circumscribe its scope of practice. Instructional areas comprise the pre-analytical, analytical, and post-analytical components of contemporary medical lab services. Limited to medical laboratory science students. Offered: A.

[View course details in MyPlan: LAB M 429](#)

LAB M 430 Medical Laboratory Science: Introductory Clinical (6)

Lecture and laboratory coverage of theoretical and practical aspects important in the evaluation of blood cells, to include their production, morphology, function, and associated pathology. Instrumentation used in testing included, as well as quality control and quality assurance issues. Limited to medical laboratory science students. Prerequisite: LAB M 429. Offered: W.

[View course details in MyPlan: LAB M 430](#)

LAB M 431 Clinical Immunohematology Rotation (7-)

Practicum emphasizing application of knowledge and skills to perform a wide variety of basic testing routinely performed in contemporary blood laboratory and further develop discipline-specific competencies. Limited to medical laboratory science students. Offered: AWSp.

[View course details in MyPlan: LAB M 431](#)

LAB M 432 Phlebotomy Rotation (-2-) *G. VAN KEKERIX*

Covers the theories, concepts, and practices underlying the safe and reliable collection of blood (phlebotomy)

for analysis by medical laboratory techniques. Limited to medical laboratory science students. Offered: AWSp.
[View course details in MyPlan: LAB M 432](#)

LAB M 433 Enrichment Rotation (-9) Xu

Selected practical experience emphasizing application of knowledge and skills to perform a wide variety of testing in a clinical setting and further develop discipline-specific competency in the major scientific disciplines of laboratory medicine, including hematology, clinical chemistry, microbiology, and immunohematology or pursuance of a clinical research study. Limited to medical laboratory science students. Offered: AWSp.

[View course details in MyPlan: LAB M 433](#)

LAB M 434 Virology Laboratory (1)

Laboratory coverage of testing procedures and techniques routinely performed in the contemporary virology lab to detect and identify viruses which cause disease in humans and to monitor therapies used to treat human viral infections. Limited to medical laboratory science students. Offered: Sp.

[View course details in MyPlan: LAB M 434](#)

LAB M 435 Molecular Diagnostics for Medical Laboratory Science (2) C. PRITCHARD

Provides a comprehensive overview of the fundamental principles of molecular diagnostics and explores its use in the diagnosis of disease. Topics include: nucleic acid structure and function, genetics, DNA chemistry, nucleic acid isolation, amplification techniques, components of a molecular laboratory, and evaluation of controls to validate results obtained. Limited to medical laboratory science students. Offered: W.

[View course details in MyPlan: LAB M 435](#)

LAB M 499 Undergraduate Research (*, max. 35)

Specific project in clinical laboratory investigation. Offered: AWSpS.

[View course details in MyPlan: LAB M 499](#)

LAB M 502 Laboratory Medicine Grand Rounds (1, max. 6) Shirts

Grand rounds are concerned with current topics in the field of laboratory medicine. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: LAB M 502](#)

LAB M 510 Laboratory Medicine Research Conference (1, max. 6)

Presentation and discussion of ongoing research and development projects by faculty, residents, fellows, and graduate students. Open to graduate students in laboratory medicine and other medical sciences. Prerequisite: permission of instructor. Instructors: Hoffman Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: LAB M 510](#)

LAB M 520 Seminar in Organization and Management in Laboratory Medicine (3)

Core course for the Master of Science degree in laboratory medicine. Prerequisite: graduate student standing in Laboratory Medicine or permission of instructor. Instructors: Schiller Offered: Sp, odd years.

[View course details in MyPlan: LAB M 520](#)

LAB M 521 Advanced Laboratory Hematology (1, max. 6)

Lectures on diagnostic clinical hematology with emphasis on clinicopathological correlation. For laboratory medicine graduate students with special interest in diagnostic clinical hematology. Prerequisite: graduate standing and permission of instructor. Instructors: Sabath Offered: AWSp.

[View course details in MyPlan: LAB M 521](#)

LAB M 522 Hematopathology Seminar (2) Wood

Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with PATH 522; W, even years.

[View course details in MyPlan: LAB M 522](#)

LAB M 590 P-Research Projects in Laboratory Medicine (*)

Opportunity for laboratory experience on a research problem related to laboratory medicine. Students investigate areas of potential clinical importance. Projects selected from areas such as chemistry, coagulation, hematology, immunology, microbiology, virology, molecular diagnostics, and computer applications. Research goals established by instructor in discussion with student. Prerequisite: permission of instructor. Instructors: Tait
Offered: AWSpS.

[View course details in MyPlan: LAB M 590](#)

LAB M 600 Independent Study or Research (*-)

Prerequisite: graduate standing in laboratory medicine. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: LAB M 600](#)

LAB M 601 Internship (3-9, max. 9)

Prerequisite: graduate standing in laboratory medicine. Instructors: Schiller Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: LAB M 601](#)

LAB M 680 P-Clinical Laboratory Testing: Methods and Interpretation (*, max. 30) Wener

Provides the third- and fourth-year medical student with the opportunity to evaluate clinical laboratory data in the clinical laboratory setting. One-on-one teaching using case material and actual clinical samples. Offered: AWSpS.

[View course details in MyPlan: LAB M 680](#)

LAB M 685 P-Laboratory Case Studies for Clinical Diagnosis (4)

Clinical case presentations and discussions aimed at test selection, disease-induced alterations, efficient algorithms, factors confounding interpretation, testing economics. (Four weeks half-time). Prerequisite: completion of required clerkships. Instructors: Nester Offered: Sp.

[View course details in MyPlan: LAB M 685](#)

LAB M 699 P-WWAMI Laboratory Medicine Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

[View course details in MyPlan: LAB M 699](#)

LAB M 700 Master's Thesis (*-)

Credit/no-credit only. Offered: AWSpS.

SCHOOL OF MEDICINE

MEDEX (DEGREE PROGRAM)

MEDEX

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MEDEX 401 Introduction to Paramedicine (8)

Introduces the history of paramedicine and role of the paramedic, as well as medical concepts and technical skills relevant to its practice. Prerequisite: Seattle/King County paramedic students only. Offered: A.

[View course details in MyPlan: MEDEX 401](#)

MEDEX 402 Airway Management (3)

Teaches cognitive and psychomotor skills critical to basic and advanced airway management. Includes enhanced techniques of rapid sequence intubation. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

[View course details in MyPlan: MEDEX 402](#)

MEDEX 403 Patient Assessment (4)

Teaches patient assessment and total patient care management. Provides didactic and laboratory exposure necessary to perform complete and thorough patient exams. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

[View course details in MyPlan: MEDEX 403](#)

MEDEX 404 Medical Emergencies I (5)

Studies the pathophysiology and treatment of medical emergencies encountered in cardiopulmonary, neurovascular, endocrine, renal, and obstetric patients. Introduces the pharmacology of neurovascular and cardiopulmonary medications. Prerequisite: MEDEX 403. Offered: W.

[View course details in MyPlan: MEDEX 404](#)

MEDEX 405 Trauma Emergencies (5)

Emphasizes advanced pre-hospital management of the critical trauma patient. Teaches the pathophysiology and treatment of burns and trauma to the head, chest, and abdomen. Includes advanced techniques in surgical airway. Prerequisite: MEDEX 403 which may be taken concurrently. Offered: W.

[View course details in MyPlan: MEDEX 405](#)

MEDEX 406 Medical Emergencies II (3)

Studies the pathophysiology and treatment of alcoholism, environmental disorders, infections and

communicable diseases, hematology, toxicology, and psychiatric emergencies. Prerequisite: MEDEX 403.
Offered: Sp.

[View course details in MyPlan: MEDEX 406](#)

MEDEX 407 Special Considerations for Paramedicine (4)

Emphasizes the care and treatment of pediatric, geriatric, and bariatric patients. Reviews special considerations encountered in scenarios such as multiple casualty, confined space, and extrication incidents. Prerequisite: MEDEX 406 which may be taken concurrently. Offered: Sp.

[View course details in MyPlan: MEDEX 407](#)

MEDEX 408 Advanced Certifications (5)

Instruction in PEPP, PALS, ACLS, ATLS, and National Registry curricula and certifications. Prerequisite: MEDEX 407. Credit/no-credit only. Offered: S.

[View course details in MyPlan: MEDEX 408](#)

MEDEX 414 Paramedic Clinical Practicum I (3)

Participation in all aspects of patient care in the HMC-ER and OR with a primary focus on patient assessment and examination, as well as proficiency in IV cannulation and airway management. Prerequisite: MEDEX 401 which may be taken concurrently; Seattle/King County paramedic students only. Credit/no-credit only. Offered: A.

[View course details in MyPlan: MEDEX 414](#)

MEDEX 415 Paramedic Field Practicum I (6)

Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes aspects of scene management and total patient care competence. Prerequisite: MEDEX 401 which may be taken concurrently. Credit/no-credit only. Offered: A.

[View course details in MyPlan: MEDEX 415](#)

MEDEX 424 Paramedic Clinical Practicum II (3)

Participation in patient care in the HMC-ER with a focus on patient assessment, examination, IV cannulation, and airway management. Emphasizes the critical care of patients in the cardiovascular intensive care unit. Prerequisite: MEDEX 414. Credit/no-credit only. Offered: W.

[View course details in MyPlan: MEDEX 424](#)

MEDEX 425 Paramedic Field Practicum II (7)

Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes scene management and total patient care competence. Prerequisite: MEDEX 415. Credit/no-credit only. Offered: W.

[View course details in MyPlan: MEDEX 425](#)

MEDEX 434 Paramedic Clinical Practicum III (4)

Participation in patient care in the CHRMC-ER and OR with a focus on pediatric patient assessment, examination, and proficiency in IV cannulation and airway management. Emphasizes the care of expectant mother and newborn through rotations in the UW Labor and Delivery department. Prerequisite: MEDEX 424. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: MEDEX 434](#)

MEDEX 435 Paramedic Field Practicum III (8)

Consists of regularly scheduled ride time with Seattle Medic One. The student assumes graduated responsibility for patient care and scene management while being closely evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes the field care of the pediatric patient and expectant mother. Prerequisite: MEDEX 425. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: MEDEX 435](#)

MEDEX 444 Paramedic Clinical Practicum IV (3)

Participation in patient care in the HMC Emergency Department, Neurology Clinic, Pulmonary Clinic, and Cardiology Clinic. Focuses on trauma management, extrication, MCI, and search/rescue. Includes observation of a minimum of three autopsies with the medical examiner. Prerequisite: MEDEX 434. Credit/no-credit only. Offered: S.

[View course details in MyPlan: MEDEX 444](#)

MEDEX 445 Paramedic Field Practicum IV (11)

Consists of regularly scheduled ride time with Seattle Medic One paramedics. The student assumes all responsibilities for scene management and patient care. Evaluations determine completion of the program. Prerequisite: MEDEX 435. Credit/no-credit only. Offered: S.

[View course details in MyPlan: MEDEX 445](#)

MEDEX 450 Basic Science in Clinical Medicine (6)

Review of important basic science concepts that include relevant topics for a healthcare clinician. Prerequisite: permission of the MEDEX program. Offered: WS.

[View course details in MyPlan: MEDEX 450](#)

MEDEX 451 Anatomy and Physiology in Clinical Medicine (6)

Uses an organ system approach to human anatomy and physiology relevant for a healthcare clinician. Offered: AS.

[View course details in MyPlan: MEDEX 451](#)

MEDEX 452 Pathophysiology for Primary Care (6)

Basic pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Pathophysiology studied per organ system. Offered: A.

[View course details in MyPlan: MEDEX 452](#)

MEDEX 453 Basic Clinical Skills (5)

Provides the student with mastery of a screening history and physical examination and thoroughness in data-collection skills. Offered: ASp.

[View course details in MyPlan: MEDEX 453](#)

MEDEX 454 Adult Medicine I (7)

Problem-oriented approach to the diagnosis and management of common primary care conditions. Introduction to relevant laboratory and radiological procedures. Organ system approach. Offered: W.

[View course details in MyPlan: MEDEX 454](#)

MEDEX 456 Maternal and Child Health for the MEDEX Practitioner I (3)

Designed to acquaint students with principles of prenatal care and primary-care pediatrics. Offered: W.

[View course details in MyPlan: MEDEX 456](#)

MEDEX 457 Behavioral Medicine I (2)

Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: A.

[View course details in MyPlan: MEDEX 457](#)

MEDEX 458 Behavioral Medicine (2)

Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: W.

[View course details in MyPlan: MEDEX 458](#)

MEDEX 459 Behavioral Medicine (2)

Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional

problems in a clinical setting. Offered: Sp.
[View course details in MyPlan: MEDEX 459](#)

MEDEX 460 Principles of Patient Management (3)

Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: W.

[View course details in MyPlan: MEDEX 460](#)

MEDEX 461 Principles of Patient Management (3)

Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: Sp.

[View course details in MyPlan: MEDEX 461](#)

MEDEX 462 Maternal and Child Health for the MEDEX Practitioner II (3)

Continuation of MEDEX 456. Emphasis on diagnosis and treatment of common pediatric problems. Offered: Sp.

[View course details in MyPlan: MEDEX 462](#)

MEDEX 463 Clinical Clerkships I (19)

Full-time clinical clerkship spent in institution-based or specialty practice settings with the supervision of licensed health care providers. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 463](#)

MEDEX 465 Clinical Clerkships II (19)

Continuation of clinical clerkships spent in institution-based or specialty practice settings with supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 465](#)

MEDEX 466 Family Practice Clerkship for the MEDEX Practitioner I (19) *Ballweg*

Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of patient encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 466](#)

MEDEX 467 Family Practice Clerkship for the MEDEX Practitioner II (19) *Ballweg*

Further experience in primary-care practice with emphasis on independent patient management by the student supervised by family practitioners. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 467](#)

MEDEX 468 Emergency Medicine I for the MEDEX Practitioner (2)

Approach to the diagnosis and management of common emergency conditions for primary-care physician assistants. Organ system approach. Offered: W.

[View course details in MyPlan: MEDEX 468](#)

MEDEX 469 Emergency Medicine II for the MEDEX Practitioner (2)

Continuation of MEDEX 468. Approach to diagnosis and management of common emergency conditions for primary-care physician assistant. Organ system approach. Offered: Sp.

[View course details in MyPlan: MEDEX 469](#)

MEDEX 470 Professional Role Development (1)

Explores professional role development, health access issues, licensing issues, healthcare quality,

interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.

[View course details in MyPlan: MEDEX 470](#)

MEDEX 471 Professional Role Development (1)

Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.

[View course details in MyPlan: MEDEX 471](#)

MEDEX 472 Professional Role Development (1)

Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.

[View course details in MyPlan: MEDEX 472](#)

MEDEX 473 Technical Skills (1)

Introduces clinical skills and procedures through hands-on experiences. Offered: A.

[View course details in MyPlan: MEDEX 473](#)

MEDEX 474 Technical Skills (1)

Introduces clinical skills and procedures through hands-on experiences. Offered: W.

[View course details in MyPlan: MEDEX 474](#)

MEDEX 475 Technical Skills (1)

Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

[View course details in MyPlan: MEDEX 475](#)

MEDEX 499 Special Field Projects/Independent Study (1-19, max. 19)

Clinical clerkships and independent study activities. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 499](#)

MEDEX 510 Healthcare for Rural and Medically Underserved Populations (5)

Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations for practicing clinicians. Prerequisite: EMCHS students only. Offered: S.

[View course details in MyPlan: MEDEX 510](#)

MEDEX 511 Healthcare Administration and Public Health (5)

Applies the basic principles of healthcare administration and public health to specific communities and practices. Prerequisite: EMCHS students only. Offered: S.

[View course details in MyPlan: MEDEX 511](#)

MEDEX 512 Academic Medicine and Specialty Practice for Practicing Clinicians (5)

Overview for practicing clinicians of primary care as well as medical and surgical specialty practice within the academic medicine environment. Prerequisite: admission to the program. Offered: S.

[View course details in MyPlan: MEDEX 512](#)

MEDEX 513 Global Health for Practicing Clinicians (5)

Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Prerequisite: admission to the program. Offered: S.

[View course details in MyPlan: MEDEX 513](#)

MEDEX 521 Capstone Project I (3)

Includes capstone project introduction, literature review, critical reading, research design and proposals, ethics, IRB, research writing, and results presentation. (Two weeks on the Seattle campus, six weeks online).

Prerequisite: EMCHS students only. Credit/no-credit only. Offered: S.

[View course details in MyPlan: MEDEX 521](#)

MEDEX 522 Capstone Project II (3)

Details students' choice of capstone project and preparation of a detailed proposal including the timeline for completion. Prerequisite: MEDEX 521. Credit/no-credit only. Offered: A.

[View course details in MyPlan: MEDEX 522](#)

MEDEX 523 Capstone Project III (3)

Students work on capstone projects. Prerequisite: MEDEX 522. Credit/no-credit only. Offered: W.

[View course details in MyPlan: MEDEX 523](#)

MEDEX 524 Capstone Project IV (3)

Continuation of work on the capstone project. Prerequisite: MEDEX 523. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: MEDEX 524](#)

MEDEX 525 Capstone Project V (5)

Completion of the capstone project, preparation of final drafts, submission of finished project to faculty mentors, and presentation of project. Prerequisite: MEDEX 524. Credit/no-credit only. Offered: S.

[View course details in MyPlan: MEDEX 525](#)

MEDEX 528 Investigative Skills for Practicing Clinicians (5)

Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Applications critically appraise the public health and biomedical literatures drawing examples from current scientific literature and existing data. Prerequisite: admission to EMCHS program. Offered: S.

[View course details in MyPlan: MEDEX 528](#)

MEDEX 531 Clinical Residencies I (3)

Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 531](#)

MEDEX 532 Clinical Residencies II (3)

Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 532](#)

MEDEX 533 Clinical Residencies III (3)

Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Prerequisite: EMCHS students only. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 533](#)

MEDEX 536 Health Policy for Practicing Clinicians (4)

Overview of United States health policy issues including payment structures, quality, disparities, workforce and legislative impact. Prerequisite: EMCHS students only. Offered: W.

[View course details in MyPlan: MEDEX 536](#)

MEDEX 537 Leadership for Practicing Clinicians (4)

Leadership skills for clinical practice, community, the profession, and organizations. Prerequisite: EMCHS students only. Offered: A.

[View course details in MyPlan: MEDEX 537](#)

MEDEX 538 The Physician Assistant Profession (4)

Overview of the physician assistant profession, focusing on the history of the profession, education, economics, legal, political, and professional aspects of the physician assistant profession, current and future physician assistant roles, and hot topics. Prerequisite: EMCHS students only. Offered: Sp.

[View course details in MyPlan: MEDEX 538](#)

MEDEX 540 Healthcare for Rural and Underserved Populations (5)

Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations. Offered: S.

[View course details in MyPlan: MEDEX 540](#)

MEDEX 541 Healthcare Administration and Public Health (5)

Application of the basic principles of healthcare administration and public health to specific communities and practices. Offered: S.

[View course details in MyPlan: MEDEX 541](#)

MEDEX 542 Academic Medicine and Specialty Practice (5)

Overview of primary care as well as medical and surgical specialty practice within the academic medicine environment. Offered: S.

[View course details in MyPlan: MEDEX 542](#)

MEDEX 543 Global Health (5)

Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Offered: S.

[View course details in MyPlan: MEDEX 543](#)

MEDEX 550 Basic Science in Clinical Medicine (6)

Intensive review of important basic scientific concepts relevant to clinical medicine. Prerequisite: MEDEX Northwest students only. Offered: S.

[View course details in MyPlan: MEDEX 550](#)

MEDEX 551 Anatomy and Physiology (6)

Overview and review of human anatomy and physiology by organ system. Prerequisite: MEDEX students only. Offered: S.

[View course details in MyPlan: MEDEX 551](#)

MEDEX 552 Pathophysiology for Primary Care (6)

Examines pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Studies pathophysiology per organ system. Offered: A.

[View course details in MyPlan: MEDEX 552](#)

MEDEX 553 Basic Clinical Skills (5)

Provides the student with mastery of history-taking and physical examination skills, thoroughness in data collection, medical record-keeping, and verbal presentation skills. Offered: A.

[View course details in MyPlan: MEDEX 553](#)

MEDEX 554 Adult Medicine I (7)

Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: W.

[View course details in MyPlan: MEDEX 554](#)

MEDEX 555 Adults Medicine II (7)

Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: Sp.

[View course details in MyPlan: MEDEX 555](#)

MEDEX 556 Maternal Child Health I (3)

Examines the principles of prenatal care and primary-care pediatrics. Offered: W.

[View course details in MyPlan: MEDEX 556](#)

MEDEX 557 Behavioral Medicine I (2)

Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: A.

[View course details in MyPlan: MEDEX 557](#)

MEDEX 558 Behavioral Medicine II (2)

Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: W.

[View course details in MyPlan: MEDEX 558](#)

MEDEX 559 Behavioral Medicine III (2)

Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: Sp.

[View course details in MyPlan: MEDEX 559](#)

MEDEX 560 Principles of Patient Management I (3)

Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: W.

[View course details in MyPlan: MEDEX 560](#)

MEDEX 561 Principles of Patient Management II (3)

Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: Sp.

[View course details in MyPlan: MEDEX 561](#)

MEDEX 562 Maternal Child Health II (3)

Emphasizes the diagnosis and treatment of common pediatric problems. Prerequisite: MEDEX 556. Offered: Sp.

[View course details in MyPlan: MEDEX 562](#)

MEDEX 563 Clinical Clerkships I (19)

Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 563](#)

MEDEX 565 Clinical Clerkships II (19)

Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Prerequisite: MEDEX 563. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 565](#)

MEDEX 566 Family Practice Clerkship I (19)

Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 566](#)

MEDEX 567 Family Practice Clerkship II (19)

Further experience in primary-care practice with an emphasis on independent patient management by the student supervised by family practitioners. Prerequisite: MEDEX 566. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 567](#)

MEDEX 568 Emergency Medicine I (2)

Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system

approach. Offered: W.

[View course details in MyPlan: MEDEX 568](#)

MEDEX 569 Emergency Medicine II (2)

Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: Sp.

[View course details in MyPlan: MEDEX 569](#)

MEDEX 570 Professional Role Development I (1)

Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.

[View course details in MyPlan: MEDEX 570](#)

MEDEX 571 Professional Role Development II (1)

Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: W.

[View course details in MyPlan: MEDEX 571](#)

MEDEX 572 Professional Role Development III (1)

Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.

[View course details in MyPlan: MEDEX 572](#)

MEDEX 573 Technical Skills I (1)

Introduces clinical skills and procedures through hands-on experiences. Offered: A.

[View course details in MyPlan: MEDEX 573](#)

MEDEX 574 Technical Skills II (1)

Introduces clinical skills and procedures through hands-on experiences. Offered: W.

[View course details in MyPlan: MEDEX 574](#)

MEDEX 575 Technical Skills III (1)

Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

[View course details in MyPlan: MEDEX 575](#)

MEDEX 580 Homelessness in Seattle (2)

Multi-disciplinary course developing knowledge and skills in the area of acute and chronic homeless health problems, understanding the history and social constructs as well as the services and disparities facing this population.

[View course details in MyPlan: MEDEX 580](#)

MEDEX 588 Investigative Skills for Entry-Level Clinicians (5)

Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Application appraise the public health and biomedical literatures drawing on examples from current scientific literature and existing data. Offered: S.

[View course details in MyPlan: MEDEX 588](#)

MEDEX 599 Independent Study (1-19, max. 19)

Supervised clinical clerkship or independent study activities to meet specific needs. Prerequisite: permission of the MEDEX program. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDEX 599](#)

Department Overview

RR512 University of Washington Medical Center

domchair@uw.edu

Active programs in teaching, research, and patient care are carried on at the University of Washington Medical Center, Veterans' Administration Puget Sound Health Care System (VAPSHCS), Harborview Medical Center, Pacific Medical Center, the Puget Sound Blood Center, the Northwest Kidney Center, and the Fred Hutchinson Cancer Research Center. Major affiliations for clinical teaching also exist with Providence Medical Center and Swedish Hospital Medical Center. There are many additional affiliations with community hospitals in Seattle, the state of Washington, and the WWAMI region. Medical students, interns, medical residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

SCHOOL OF MEDICINE

SCHOOL OF MEDICINE

EMERGENCY MEDICINE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MED EM 501 P-Emergency Medicine Preceptorship (1, max. 12)

Provides opportunities for first- and second-year medical students to gain experience working in an emergency setting. Students shadow faculty in emergency medicine during their shifts. Includes learning about common conditions seen in the emergency department and the opportunity to work on history taking and physical exam skills. Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: MED EM 501](#)

MED EM 550 P-Introduction to Emergency Medicine (1)

Presentation of common medical and surgical emergencies and their urgent management, especially within the framework of rapid patient assessment and stabilization. Lecture topics include chest pain and myocardial infarction, basic arrhythmia management, and burn and wound care. Credit/no-credit only.

[View course details in MyPlan: MED EM 550](#)

MED EM 598 P-Emergency Medicine Independent Study and Remediation (*, max. 8)

Designed for medical students required to complete additional study related to the required Emergency Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission Offered: AWSpS.

[View course details in MyPlan: MED EM 598](#)

MED EM 600 Independent Study/Research (*)

Provides medical students the opportunity to participate in research as part of their medical education. Must obtain permission through submission of a proposal to department and securing a faculty sponsor.

[View course details in MyPlan: MED EM 600](#)

MED EM 605 P-Emergency Medicine - UWMC (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 605](#)

MED EM 606 P-Emergency Medicine - HMC/UWMC (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCI, PEDS; and SURG required clerkships.

[View course details in MyPlan: MED EM 606](#)

MED EM 607 P-Emergency Medicine - Madigan (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 607](#)

MED EM 608 P-Emergency Medicine - Swedish Cherry Hill (8)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCI; PEDS; and SURG required clerkships.

[View course details in MyPlan: MED EM 608](#)

MED EM 609 Emergency Medicine - Seattle Children's (8)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 609](#)

MED EM 617 P-Emergency Medicine - Olympia (8)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 617](#)

MED EM 624 P-Emergency Medicine - Shelton (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 624](#)

MED EM 625 P-Emergency Medicine - Spokane (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 625](#)

MED EM 626 P-Emergency Medicine - Spokane Deaconess (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 626](#)

MED EM 645 P-Emergency Medicine - Boise, St. Lukes (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 645](#)

MED EM 646 P-Emergency Medicine - Boise, Saint Alphonsus (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 646](#)

MED EM 656 P-Emergency Medicine - Juneau, AK (8)

Clerkship emphasized the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 656](#)

MED EM 657 P-Emergency Medicine - Fairbanks (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 657](#)

MED EM 658 P-Emergency Medicine - Anchorage (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 658](#)

MED EM 662 P-Emergency Medicine - Bozeman, MT (8)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 662](#)

MED EM 663 P-Emergency Medicine - Billings, MT (8)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 663](#)

MED EM 668 P-Emergency Medicine - Casper (*, max. 16)

Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 668](#)

MED EM 669 P-Emergency Medicine - Cheyenne, WY (8)

Clerkship emphasized the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

[View course details in MyPlan: MED EM 669](#)

MED EM 680 P-Emergency Medicine Subinternship - Madigan (8)

Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only; permission of department.

[View course details in MyPlan: MED EM 680](#)

MED EM 681 P-Emergency Medicine Subinternship - HMC/UWCR (*, max. 16)

Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only; permission of department.

[View course details in MyPlan: MED EM 681](#)

MED EM 683 Emergency Medicine Point-of-Care Ultrasound (4)

Introduction to point-of-care ultrasound in an emergency department setting. Students become comfortable with using bedside ultrasound by teaching ultrasound machine operation, image acquisition, and providing hands-on training in both simulated and patient care settings. Incorporates classroom didactics, procedure simulation and clinical application. Offered: WSp.

[View course details in MyPlan: MED EM 683](#)

MED EM 697 P-Emergency Medicine Special Electives (*, max. 24)

By specific arrangement, for qualified students, special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least one month before preregistration. (Two, four, six, or twelve weeks). Prerequisite: required EM clerkship; permission of instructor at away site and

department. Offered: AWSpS.

[View course details in MyPlan: MED EM 697](#)

MED EM 699 P-WWAMI Emergency Medicine Special Elective (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington, within the WWAMI region. Prerequisite: permission of department and away site.

SCHOOL OF MEDICINE

SCHOOL OF MEDICINE

MEDICINE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MED 498 Undergraduate Thesis (*)

[View course details in MyPlan: MED 498](#)

MED 499 Undergraduate Research (1-10, max. 25)

Case studies, with laboratory research. Available to undergraduates and medical students. Offered: AWSpS.

[View course details in MyPlan: MED 499](#)

MED 505 P-Preceptorship in Medicine (1, max. 12)

To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations by being stationed with carefully selected clinical faculty members in their offices.

Prerequisite: permission of department. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MED 505](#)

MED 507 HIV in Latinos (1-, max. 12)

Students shadow an attending physician, and participate in routine and acute visits for a primarily Spanish-speaking patient population. Includes Spanish-language health education and rapid HIV testing sessions, and encourages attendance at a community event targeting the Latino HIV community. Prerequisite: permission of instructor; conversational Spanish proficiency or FAMED 556. Credit/no-credit only.

[View course details in MyPlan: MED 507](#)

MED 510 Health Issues of Sexual Minorities (1)

Introduction to the special healthcare issues and barriers confronting persons identified as bisexual, gay, lesbian, or transgendered. Includes lectures, panels, and case presentations by faculty and community experts.

[View course details in MyPlan: MED 510](#)

MED 515 Medicine as Culture (1)

Examines the ways that medical practice, the medical profession, and ideas about sickness and health are embedded in society and culture, as a way of contextualizing biological phenomena and medical knowledge. Credit/no-credit only.

[View course details in MyPlan: MED 515](#)

MED 522 Introduction to Human and Medical Genetics (3)

Provides in-depth examination of current topics in human and medical genetics with an emphasis on clinical and molecular diagnosis of genetic conditions, approaches to therapy, research, and molecular genetic technology.

Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: MED 522](#)

MED 525 Introduction to Gerontology and Geriatric Medicine (1)

Introduces gerontology and geriatric medicine. Explores topics in geriatric medicine including: multidisciplinary care, dementia and delirium, falls, polypharmacy, urinary incontinence, fragility, and end-of-life care. Employs a combination of lectures, time spent interviewing and observing patients in hospital-based clinics, private homes, long term care and continuing retirement communities, and bedside teaching with a healthcare provider.

Credit/no-credit only.

[View course details in MyPlan: MED 525](#)

MED 530 AIDS: A Multidisciplinary Approach (2) C. FARQUHAR

Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/G H 562.

[View course details in MyPlan: MED 530](#)

MED 531 P-Human Genetics (*)

Weekly seminar dealing with a variety of topics in medical genetics given by faculty of the Division of Medical Genetics and related departments and divisions. Open to medical students with a good foundation in genetics.

[View course details in MyPlan: MED 531](#)

MED 533 P-Clinical Endocrinology (2)

Includes brief lectures followed by instructor-led interviews with patients to illustrate the clinical presentation, diagnosis, and treatment of the major endocrinopathies. Students gain a greater appreciation of the impact these disorders have on patients' lives. Prerequisite: second year medical students.

[View course details in MyPlan: MED 533](#)

MED 534 Wilderness Medicine (1)

Provides training in medical emergencies and clinical situations unique to wilderness settings where access to medical care is limited. Students gain experience in patient assessment, extrication, and the management of common wilderness situations including altitude illness, burns, trauma, diving injuries, hypo- and hyperthermia, and toxin exposures. Offered: Sp.

[View course details in MyPlan: MED 534](#)

MED 536 Introduction to Critical Care Medicine (1)

Uses a combination of didactics, time spent observing rounds and physicians on-call in the ICU as well as dedicated bedside teaching by a critical care attending physician to teach about core topics in pediatric and adult critical care medicine including shock, respiratory failure, sepsis, mechanical ventilation, and palliative care.

Offered: W.

[View course details in MyPlan: MED 536](#)

MED 540 Preventing Healthcare Associated Infections (1)

Multidisciplinary approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Credit/no-credit only. Offered: jointly with EPI 505.

[View course details in MyPlan: MED 540](#)

MED 546 Clinical Applications of Gene Therapy (2)

Overview of the current status of gene therapy. Discusses its role in the future practice of medicine. Lecture and literature reviews.

[View course details in MyPlan: MED 546](#)

MED 547 Quantitative Methods in Medical Genetics (2)

Computational methods of use for medical genetics. Review of problem sets. Topics range from basic probability to linkage analysis. Prerequisite: genetics and permission of instructor.

[View course details in MyPlan: MED 547](#)

MED 549 Clinical Medical Genetics (1)

Review of current clinical advances in medical genetics. Includes lectures and discussion of cases from medical genetics clinic. Prerequisite: genetics or human genetics and permission of instructor.

[View course details in MyPlan: MED 549](#)

MED 555 P-Mind, Body, and Pen: Writing and the Art of Becoming a Physician (1)

Provides forum for medical students to write about issues in medicine and medical education. Focuses on writing as a process for giving voice to the conflicting demands and dilemmas of becoming a physician. Explores personal narratives, dreams and disappointments, chronic illness and death, empathy and revulsion, authenticity and power. Offered: W.

[View course details in MyPlan: MED 555](#)

MED 556 Visual Thinking: How to Observe in Depth (1)

Uses visual thinking strategies to look at art and enhance diagnostic acumen. Expands observational and critical thinking skills, and encourages open-ended discussion. Skills applied in assessing patients. Combination of slide sessions and observation of original objects at Seattle museums. Credit/no-credit only. Offered: A.

[View course details in MyPlan: MED 556](#)

MED 557 Hispanic Health and Healthcare Disparities (1) *Acosta*

Covers Hispanic culture and language, history of Hispanics in the United States, Hispanic health status issues, and effective strategies for working across cultures and linguistic barriers. Designed to help the learner understand and respond better to the healthcare needs of the Hispanic community.

[View course details in MyPlan: MED 557](#)

MED 560 P-Advanced Global Health (2)

Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with G H 505.

[View course details in MyPlan: MED 560](#)

MED 561 Tropical Medicine (1) *F. BUCKNER, P. POTTINGER*

Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: jointly with G H 561; Sp.

[View course details in MyPlan: MED 561](#)

MED 565 P-The Healer's Art: Awakening the Heart of Medicine (1)

Encourages cultivation of human dimensions in practice of medicine while strengthening personal commitment to medicine as a life's work. Facilitates student recognition of commonality of personal concerns among peers and student response to the dimension of mystery in the experience of illness as well as development of the capacity for awe. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: MED 565](#)

MED 598 P-Medicine Independent Study and Remediation (*, max. 8)

Designed for medical students required to complete additional study related to the required Internal Medicine clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered:

AWSpS.

[View course details in MyPlan: MED 598](#)

MED 599 P-Transfusion Machine (3)

Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell serology/compatibility, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.

[View course details in MyPlan: MED 599](#)

MED 600 Independent Study or Research (*)

Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: MED 600](#)

SCHOOL OF MEDICINE

SCHOOL OF MEDICINE

ELECTIVE CLERKSHIPS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MEDECK 601 P-Ward Medicine Subinternship - Seattle (*, max. 24)

Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 601](#)

MEDECK 602 P-Primary Care - Seattle (8/12)

Four-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Roosevelt Clinic following a panel of patients in medicine, rheumatology, and virology clinics. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 602](#)

MEDECK 603 P-Clinical Cardiology and Electrocardiography - Seattle (8)

Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 603](#)

MEDECK 604 P-Clinical Dermatology - Seattle (8)

Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 604](#)

MEDECK 605 P-Clinical Endocrinology and Metabolism - Seattle (*, max. 12)

Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 605](#)

MEDECK 606 P-Clinical Gastroenterology - Seattle (8)

Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional

staff, plus directed tutorial work. Students are scheduled at one of three sites: UWMC, Harborview Medical Center, and Veterans' Administration hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 606](#)

MEDECK 607 P-Clinical Hematology/Oncology - Seattle (8)

Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 607](#)

MEDECK 608 P-Clinical Infectious Diseases - Seattle (8)

Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 608](#)

MEDECK 609 P-Nephrology and Fluid Balance - Seattle (8)

Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 609](#)

MEDECK 610 P-Clinical Respiratory Disease (8)

Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 610](#)

MEDECK 612 P-Clinical HIV Care - Seattle (8)

Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 612](#)

MEDECK 613 P-Clinical Nutrition - Seattle (8)

Instruction in nutritional assessment and care of both inpatients and outpatients. Students work with preceptors at a variety of hospital and clinic teaching sites, attend nutrition-related seminars, and practice interview skills on standardized patients. (Four weeks). Prerequisite: HUBIO 568; third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 613](#)

MEDECK 614 P-Oncology Subinternship (8)

Students participate in the oncology service in the inpatient oncology consult service at UWMC hospital, obtaining exposure to the management of patients with cancer, oncological complications and emergencies, oncological drug mechanisms of action, side effects, and interactions. Obtain basic understanding of principles of oncology care. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 614](#)

MEDECK 615 P-Rheumatology - Seattle (8)

Full-time inpatient-outpatient clerkship in rheumatology. Includes diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospitalized patients at the UW Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In

addition to patient contact, reading, seminars, and preceptorial sessions are the methods of instruction. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 615](#)

MEDECK 616 P-Advanced Dermatology Clinic - Seattle (8)

Advanced clinical dermatology clerkship at various sites including HMC, UWMC, VA Seattle, and Children's Hospital. Students choose from four tracks within the rotation: dermatopathology, pediatric dermatology, dermatologic surgery, and advanced medical dermatology. (Four weeks). Prerequisite: third-year required Medicine clerkship.; MEDECK 604. Offered: AWSpS.

[View course details in MyPlan: MEDECK 616](#)

MEDECK 617 P-Harborview Evening Clinic - Seattle (2)

A longitudinal elective for senior medical students who assume primary responsibility for a panel of medical patients in an outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students must apply to this program, and are expected to participate for the full academic year. Prerequisite: third-year required Medicine clerkship.

[View course details in MyPlan: MEDECK 617](#)

MEDECK 618 P-Medical Consultation - Seattle (8)

Full-time outpatient and inpatient elective in peri-operative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 618](#)

MEDECK 619 P-Management of Sexually Transmitted Diseases - Seattle (2, max. 12)

Instruction and clinical experience in diagnosis, treatment, management, and patient counseling of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of patients with STDs. Prior to the elective, each student must review a packet of didactic materials. (Two weeks). Prerequisite: third-year required Medicine, OB/GYN, and Surgery clerkships. Offered: AWSpS.

[View course details in MyPlan: MEDECK 619](#)

MEDECK 620 P-Critical Care Medicine Subinternship - Seattle (8)

Participating students function at the sub-intern level on the MICU service at either Harborview Medical Center, UWMC, or VAMC. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 620](#)

MEDECK 622 P-Clinical Medical Genetics (8)

Students see outpatients and attend a variety of outpatient clinics including subspecialty clinics in cancer genetics, connective tissue genetics, neurogenetics, Turner syndrome and dermatologic genetics, and pediatric general genetics clinics with an emphasis on dysmorphology, developmental delay, disorders of sexual differentiation, skeletal dysplasia, craniofacial anomalies, and neurogenetics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 622](#)

MEDECK 623 P-Clinical Wound Management (*)

Opportunity for medical student to be exposed to and learn wound care management in clinical setting. At end of rotation students should be able to diagnose cause of chronic ulcer or wound, outline the approach to the management of diabetic foot ulcer, peripheral artery disease ulcer and VLU, and initiate treatments such as sharp debridement, VAC, dressing, and Unna Boot placement. (Two weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 623](#)

MEDECK 624 Hospitalist Subinternship - Seattle, WA (8)

Intensive experience in hospital medicine. The student works primarily with an attending hospitalist or nocturnist.

[View course details in MyPlan: MEDECK 624](#)

MEDECK 625 Cardiology Subinternship - Seattle, WA (8)

Students serve as intern on the cardiology service under the supervision of senior resident and cardiology attending physicians.

[View course details in MyPlan: MEDECK 625](#)

MEDECK 626 P-Clinical Cardiology and Electrocardiography - Tacoma (8)

Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship.

[View course details in MyPlan: MEDECK 626](#)

MEDECK 627 P-Clinical Endocrinology and Metabolism - Tacoma (*, max. 12)

Clerkship in clinical endocrinology and metabolism. Combined inpatient and outpatient assignments at selected hospitals. (Four weeks). Prerequisite: third-year required Medicine clerkship.

[View course details in MyPlan: MEDECK 627](#)

MEDECK 628 P-Clinical Infectious Diseases - Tacoma (8)

Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 628](#)

MEDECK 629 P-Clinical Respiratory Disease and Critical Care - Tacoma (8)

Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 629](#)

MEDECK 630 P-Ward Medicine Subinternship - Tacoma (*, max. 24)

Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 630](#)

MEDECK 631 P-Ward Medicine Subinternship - Spokane (8)

Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 631](#)

MEDECK 633 P-Clinical Cardiology and Electrocardiography - Washington (8)

Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 633](#)

MEDECK 634 P-Clinical Dermatology - Washington (8)

Participation in dermatology clinics and inpatient consultations. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 634](#)

MEDECK 636 P-Clinical Gastroenterology - Washington (8)

Participation in consulting ward rounds, procedures, conferences, and selected clinics at Sacred Heart Hospital in Spokane. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 636](#)

MEDECK 637 Clinical Infectious Diseases - Yakima, WA (8)

Students participate in the clinic and consulting service at area hospitals. Includes patients with a range of community acquired and hospital acquired infectious diseases. Students participate in antibiotic stewardship discussions and infection control meetings.

[View course details in MyPlan: MEDECK 637](#)

MEDECK 638 Clinical Infectious Diseases - Spokane (8)

Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 638](#)

MEDECK 639 P-Nephrology and Fluid Balance - Washington (8)

Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 639](#)

MEDECK 640 Critical Care Medicine Subinternship - Washington (8)

Participating students function at the sub-intern level on the MICU. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 640](#)

MEDECK 644 P-Clinical Dermatology - Wyoming (8)

Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 644](#)

MEDECK 651 P-Ward Medicine Subinternship - Alaska (*, max. 24)

Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 651](#)

MEDECK 652 P-Infectious Disease Consults - Alaska (8)

Intensive four week experience caring for patients with complex infectious diseases and immune compromise. Outpatient management of HIV-infected patients, execution of antimicrobial stewardship program, and exposure to treatment of a wide range of infectious disease pathology seen in Alaska. Prerequisite: Required internal medicine clerkship.

[View course details in MyPlan: MEDECK 652](#)

MEDECK 653 P-Clinical Cardiology and Electrocardiography - Alaska (8)

Clerkship in clinical cardiology. Combined inpatient-outpatient assignments, ECG interpretation. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 653](#)

MEDECK 654 P-Clinical Dermatology - Alaska (8)

Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 654](#)

MEDECK 658 P-Clinical Infectious Diseases Alaska (8)

Students participate in clinic and in the consulting service throughout the hospital, attend ICU, antimicrobial stewardship rounds, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship; fourth-year standing. Offered: AWSpS.

[View course details in MyPlan: MEDECK 658](#)

MEDECK 660 P-Critical Care Subinternship - Alaska (8)

Participating students function at the sub-intern level on the MICU service at Alaska Native Medical Center. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four Weeks). Prerequisite: Third-year required Medicine clerkship.
