MEDECK 673 P-Clinical Cardiology and Electrocardiography - Idaho (8)

Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. (Four weeks).

Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 673](#)

MEDECK 674 P-Clinical Dermatology - Idaho (8)

Participation in dermatology clinics and inpatient consultations. A continuing series of teaching seminars and weekly dermatopathology conferences. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 674](#)

MEDECK 675 P-Clinical Allergy and Immunology - Boise, ID (4)

Clinical experience seeing a combination of new and recheck patients with allergy, asthma and immunology disorders for example but not limited to, seasonal allergies, allergic rashes, asthma, chronic cough, chronic sinusitis, contact dermatitis, bee sting allergy, and food allergy. Prerequisite: Medicine Clerkship and 4th year standing.

[View course details in MyPlan: MEDECK 675](#)

MEDECK 676 P-Critical Gastroenterology - Boise, ID (8)

Clerkship in clinical gastroenterology in Boise, ID. Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff, plus directed tutorial work.

[View course details in MyPlan: MEDECK 676](#)

MEDECK 677 P-Clinical Hematology/Oncology - Idaho (8)

Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 677](#)

MEDECK 678 P-Clinical Infectious Diseases - Idaho (8)

Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 678](#)

MEDECK 679 P-Nephrology and Fluid Balance - Idaho (8)

Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults, and work up patients in renal clinics. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 679](#)

MEDECK 680 P-Clinical Respiratory Disease and Critical Care Medicine - Idaho (8)

Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 680](#)

MEDECK 681 P-Clinical Aspects of Aging - Idaho (8)

Work with elderly patients as subintern with senior care program. Inpatient and ambulatory setting in nursing homes and patients' homes. Interdisciplinary approach. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 681](#)

MEDECK 682 P-critical Care Subinternship- Idaho (8)

Students function at the sub-intern level on the MICU service. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. (Four Weeks). Prerequisite: Third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 682](#)

MEDECK 683 P-Outpatient Clinical Cardiology Virginia Mason (8)

Four-week clerkship in clinical outpatient cardiology at Virginia Mason Heart Institute. Covers ECG interpretation, stress testing, coronary angiography, stenting EP procedures, and echo cardiography. Prerequisite: third-year required Internal Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 683](#)

MEDECK 684 Subinternship in Hospital Medicine and Hematology/Oncology - Seattle, WA (8)

Intensive experience in hospital medicine in which the student acts as an intern for the Medicine O service.

[View course details in MyPlan: MEDECK 684](#)

MEDECK 686 P-Advanced Clinical Dermatology Clinic - Idaho (8)

Advanced clinical dermatology clerkship. (Four weeks). Prerequisite: third-year required Medicine clerkship; either MEDECK 604, MEDECK 634, MEDECK 644, MEDECK 664, or MEDECK 674. Offered: AWSpS.

[View course details in MyPlan: MEDECK 686](#)

MEDECK 690 P-General Internal Medicine - Shiprock (8)

Clerkship located at the Northern Navajo Medical Center in Shiprock, New Mexico. Students are involved in all aspects of patient care, including home visits, ambulatory care, and hospital stays. (Four weeks). Prerequisite: third-year required Medicine clerkship. Offered: AWSpS.

[View course details in MyPlan: MEDECK 690](#)

MEDECK 691 P-Medicine Special Electives - Seattle (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

[View course details in MyPlan: MEDECK 691](#)

MEDECK 692 P-Medicine Special Electives - Washington (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

[View course details in MyPlan: MEDECK 692](#)

MEDECK 693 P-Medicine Special Electives - Wyoming (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

[View course details in MyPlan: MEDECK 693](#)

MEDECK 694 P-Medicine Special Electives - Alaska (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

[View course details in MyPlan: MEDECK 694](#)

MEDECK 695 P-Medicine Special Electives - Montana (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

[View course details in MyPlan: MEDECK 695](#)

MEDECK 696 P-Medicine Special Electives - Idaho (*, max. 24)

By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

[View course details in MyPlan: MEDECK 696](#)

MEDECK 697 P-Medicine Special Electives - Away (*, max. 24)

Special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least three months before preregistration. (Two, four, six, or twelve weeks). Prerequisite: permission of department.

[View course details in MyPlan: MEDECK 697](#)

MEDECK 701 P-Occupational and Environmental Medicine (8)

Overview of Occupation and Environmental Medicine subspecialty. Introduction to Washington Worker's Compensation system and diagnosis and treatment of occupational injuries and illness. Students complete special projects in OEM aligning with student interest, participate in worksite visits, and attend conferences.

[View course details in MyPlan: MEDECK 701](#)

MEDECK 704 P-Intro to Clinical Dermatology (2 Wks) (4)

Students develop a basic approach to diagnosis and management of common skin conditions. Students see patients in dermatology resident under the supervision of dermatology faculty. (2-weeks) Offered: AWSpS.

[View course details in MyPlan: MEDECK 704](#)

MEDECK 711 P-Introduction to Community Internal Medicine Subspecialty Practice (4)

Introduction to the outpatient Medicine specialty clinics of Endocrinology, Gastroenterology (GI), and Rheumatology in the Olympia medical community. Two weeks. Offered: Sp.

[View course details in MyPlan: MEDECK 711](#)

MEDECK 713 P-Intro to Clinical Nutrition (2 Wks) (4)

Develop a basic approach to the assessment of nutritional status and management of nutrition across a variety of disease states. Mix of hands-on patient centered learning, interactive didactic based teaching sessions and independent learning. Exposure to inpatients and outpatients. Prerequisite: Completion of Foundation Curriculum. Offered: Sp.

[View course details in MyPlan: MEDECK 713](#)

MEDECK 724 P-Interprofessional Hospital Medicine (4)

Introduction to inpatient internal medicine focusing on interprofessional hospital services. Students work as a member of Hospitalist service, managing 1-2 patients, under direction of an attending physician with afternoons dedicated to rounding with other interprofessional services.

[View course details in MyPlan: MEDECK 724](#)

MEDECK 744 P-Intro to Clinical Dermatology (2 Wks) - Sheridan, WY (4)

Students develop a basic approach to diagnosis and management of common skin conditions. Students see patients in dermatology clinic while paired with a PA and attending dermatologist. Prerequisite: Completion of Foundation Curriculum. Offered: AWSpS.

REQUIRED CLERKSHIPS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MEDRCK 601 P-Clinical Clerkship (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 601](#)

MEDRCK 610 P-Clinical Clerkship Seattle-Shelton, WA (24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experiences emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time). Offered: AWSpS.

[View course details in MyPlan: MEDRCK 610](#)

MEDRCK 612 P-Clinical Clerkship - Seattle-Madigan (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 612](#)

MEDRCK 614 P-Clinical Clerkship - Seattle-Montesano (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 614](#)

MEDRCK 616 P-Clinical Clerkship Seattle-Olympia (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-

hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. ³¹⁷⁵
 rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 616](#)

MEDRCK 617 P-Clinical Clerkship Seattle-Port Townsend (*, max. 24) *Paauw*

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 617](#)

MEDRCK 618 P-LIC Clinical Clerkship (24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experiences emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (38-44 week integrated clerkship, full-time). Offered: AWSpS.

[View course details in MyPlan: MEDRCK 618](#)

MEDRCK 621 P-Clinical Clerkship - Spokane (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. Some students can schedule outpatient time in Pullman, WA. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 621](#)

MEDRCK 624 P-Clinical Clerkship - Seattle-Wenatchee (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 624](#)

MEDRCK 625 Clinical Clerkship Seattle - Moses Lake, WA (24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time).

[View course details in MyPlan: MEDRCK 625](#)

MEDRCK 630 P-Write Medicine Clinical Clerkship (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (18-22 week integrated clerkship, full-time.)

[View course details in MyPlan: MEDRCK 630](#)

MEDRCK 632 P-Clinical Clerkship - Seattle-Jackson (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 632](#)

MEDRCK 633 P-Clinical Clerkship Seattle- Gillette (1-24, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. (Twelve weeks, full-time).

Offered: AWSpS.

[View course details in MyPlan: MEDRCK 633](#)

MEDRCK 634 P-Clinical Clerkship - Seattle-Sheridan (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 634](#)

MEDRCK 636 P-Clinical Clerkship - Seattle-Douglas (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 636](#)

MEDRCK 638 P-Clinical Clerkship - Seattle-Lander (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 638](#)

MEDRCK 652 P-Clinical Clerkship - Seattle-Anchorage (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 652](#)

MEDRCK 653 P-Clinical Clerkship Seattle- ANMC (1-24, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. (Twelve weeks, full-time).

Offered: AWSpS.

[View course details in MyPlan: MEDRCK 653](#)

MEDRCK 654 P-Clinical Clerkship - Seattle-Soldotna (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 654](#)

MEDRCK 672 P-Clinical Clerkship - Seattle-Billings (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 672](#)

MEDRCK 673 P-Clinical Clerkship Seattle-Great Falls (*, max. 24) *Paauw*

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time). Offered: AWSpS.

[View course details in MyPlan: MEDRCK 673](#)

MEDRCK 674 P-Clinical Clerkship - Seattle-Dillon (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 674](#)

MEDRCK 675 P-Clinical Clerkship Boise- Billings (1-24, max. 24)

Third -year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full time) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 675](#)

MEDRCK 676 P-Clinical Clerkship - Seattle-Missoula (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 676](#)

MEDRCK 678 P-Clinical Clerkship - Seattle-Bozeman (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

[View course details in MyPlan: MEDRCK 678](#)

MEDRCK 691 P-Clinical Clerkship - Boise (*, max. 24)

Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

SCHOOL OF MEDICINE

HUMAN BIOLOGY

MEDICAL SCIENCE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MEDSCI 500 Research Methods (6)

Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: AWSp.

[View course details in MyPlan: MEDSCI 500](#)

MEDSCI 501 P-Independent investigative Inquiry (6)

Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: Sp.

[View course details in MyPlan: MEDSCI 501](#)

MEDSCI 502 Foundations of Clinical Medicine (4-)

Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: AWSp.

[View course details in MyPlan: MEDSCI 502](#)

MEDSCI 503 P-Clinical Skills (2) *Isaac, McDonough*

Instruction in communication skills, interviewing techniques, physical examination, documentation, and clinical reasoning. Includes hospital-based patient encounters and developing comfort and introduction to the physician role. Pass/Fail only. Offered: AWSp.

[View course details in MyPlan: MEDSCI 503](#)

MEDSCI 504 Foundations of Clinical Medicine (-4-) *J. CAWSE-LUCAS*

Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics

covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: W.

[View course details in MyPlan: MEDSCI 504](#)

MEDSCI 506 Foundations of Clinical Medicine (-4) *J. CAWSE-LUCAS*

Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Recommended: Offered: W.

[View course details in MyPlan: MEDSCI 506](#)

MEDSCI 508 Foundations of Clinical Medicine (4)

Intro to continuity of care by working with practicing physicians and coinciding with instruction in communication skills, interviewing techniques, physical examinations, documentation, and clinical reasoning. Includes hospital-based patient encounters with an introduction to the development of the physician role. Topics covered in primary and preventative care, geriatrics, rehabilitation, palliative care, behavioral health, and pain management. Offered: A.

[View course details in MyPlan: MEDSCI 508](#)

MEDSCI 510 P-Molecular and Cellular Basis of Disease (11)

Introduces cell physiology and cell biology; genetics and genetic diseases; and genes. Topics includes membrane physiology; sensory receptors; muscle energetics and contractibility; autonomic nervous system; tissue response to disease; pharmacodynamics and pharmacokinetics; genetic disorders; and pharmacogenetics. Incorporates relevant fundamental principles in anatomy, pathology, and pharmacology. Pass/Fail only. Detwiler, Horwitz, Merz Offered: A.

[View course details in MyPlan: MEDSCI 510](#)

MEDSCI 511 Independent Study Molecular Cellular Basis of Disease Remediation (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Molecular and cellular Basis of Diseases block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission. Offered: AWSpS.

[View course details in MyPlan: MEDSCI 511](#)

MEDSCI 515 Ecology of Health & Medicine- Foundations 1 (1) *A. KOST*

This course integrates School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.

[View course details in MyPlan: MEDSCI 515](#)

MEDSCI 520 P-Invaders and Defenders (10) *Lynch, Pottinger, Torgerson, Voyich*

Covers the immune system; microbial biology; infectious diseases; inflammation and repair; and skin and connective tissue. Topics include the pathogenesis and immunity of infectious disease, immunodeficiencies, hypersensitivity, autoimmunity, and the basis of immunologic diagnostics. Includes relevant fundamental scientific principles in anatomy, pathology, and pharmacology. Pass/Fail only. Offered: A.

[View course details in MyPlan: MEDSCI 520](#)

MEDSCI 521 Independent Study Invaders and Defenders Remediation (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Invaders and Defenders block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund knowledge. Prerequisite: Department permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 521](#)

MEDSCI 525 Ecology of Health & Medicine- Foundations 2 (1)

This course integrates School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only.

[View course details in MyPlan: MEDSCI 525](#)

MEDSCI 530 P-Circulatory Systems (16)

Interdisciplinary approach to cardiovascular, respiratory, and renal-urinary medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Includes cardiac electrophysiology and cardiac muscle mechanics; myocardial infarction and cardiac repair; thoracic and pulmonary anatomy; ventilation mechanics; obstructive, restrictive, and pulmonary-vascular diseases; renal function; and common kidney diseases. Pass/Fail only. Offered: W.

[View course details in MyPlan: MEDSCI 530](#)

MEDSCI 531 Independent Study Circulatory Remediation (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Circulatory block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 531](#)

MEDSCI 535 Ecology of Health & Medicine- Foundations 3 (1)

This course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.

[View course details in MyPlan: MEDSCI 535](#)

MEDSCI 540 P-Blood and Cancer (5) *Harris, Richard*

Familiarizes students with the basic pathophysiologic mechanism leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems, with an emphasis on pathophysiology. Includes relevant fundamental scientific principles in anatomy, pathology, and pharmacology. Pass/Fail only. Offered: W.

[View course details in MyPlan: MEDSCI 540](#)

MEDSCI 541 Independent Study Blood and Cancer Remediation (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Blood and cancer block offered during the preclinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 541](#)

MEDSCI 545 Ecology of Health & Medicine- Foundations 4 (1)

This course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.

[View course details in MyPlan: MEDSCI 545](#)

MEDSCI 550 P-Energetics and Homeostasis (10) *DeSantis, Silverstein*

Covers metabolism, nutrition, obesity, diabetes, gastrointestinal/liver physiology, and endocrinology. Topics include physiology and pathology of digestion and hepatic function; principles and practice of clinical nutrition; the endocrine integration of metabolism; and clinically important endocrine pathophysiology. Includes anatomy,

pathology, and pharmacology of the endocrine and GI systems. Pass/Fail only. Offered: Sp.

[View course details in MyPlan: MEDSCI 550](#)

MEDSCI 551 Independent Study Energetics Remediation (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Energetics block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 551](#)

MEDSCI 555 Ecology of Health & Medicine- Patient Care 1 (1)

This Patient Care course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.

[View course details in MyPlan: MEDSCI 555](#)

MEDSCI 560 P-Mind, Brain, and Behavior (14)

Explains the foundational principles of the organization and function of the head, neck, and central nervous system with a focus on clinical application of this knowledge to systematically approach the differential diagnosis and management of major neurologic, psychiatric, and behavioral disorders. Covers current therapeutic approaches to disease including pharmacological, behavioral, surgical, and other therapies. Pass/Fail only. Offered: A.

[View course details in MyPlan: MEDSCI 560](#)

MEDSCI 561 Independent Study Mind, Brain and Behavior Remediation (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Mind, Brain and Behavior block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 561](#)

MEDSCI 565 Ecology of Health & Medicine- Patient Care 2 (1)

This Patient Care course applies School of Medicine thematic content with an emphasis on core concepts needed for clinical practice in the changing healthcare environment. Students will explore areas related to humanism in medicine including the themes of diversity, health equity, ethics, professionalism, and determinants of health. Pass/Fail only. Offered: AWSp.

[View course details in MyPlan: MEDSCI 565](#)

MEDSCI 570 P-Lifecycle and Reproduction (8)

Covers normal and abnormal human development reproductive functions including formation and maturation of ova and sperm, menstruation, normal pregnancy, and labor and delivery. Provides information concerning infertility, family planning techniques, urinary disorders, and reproductive aging and demography of human population. Includes relevant fundamental scientific principles in pelvic anatomy, pathology, histology, imaging, and pharmacology. Offered: A.

[View course details in MyPlan: MEDSCI 570](#)

MEDSCI 571 Independent Study Lifecycle Remediation (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Lifecycle block offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 571](#)

MEDSCI 575 Ecology of Health & Medicine- Explore and Focus (1)

This Explore & Focus Phase course provides students with a deep understanding of systems that constitute health care are fundamental to becoming a successful physician. The course encourages reflections from clinical clerkships experiences and requires the completion of a capstone project. Pass/Fail only. Offered: AWSp.

[View course details in MyPlan: MEDSCI 575](#)

MEDSCI 580 P-Consolidation & Transition (11)

Reinforces content in the UWSOM foundations phase. Learning experiences will address key content areas which need further review identified throughout terms 1 and 2, with specific sessions developed as indicated; faculty/staff and peer educators will provide sessions for this basic science review as well as preparation for clerkships. Offered: W.

[View course details in MyPlan: MEDSCI 580](#)

MEDSCI 584 Independent Study Foundations of Clinical Medicine Remediation (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Foundations of Clinical Medicine offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master knowledge & skills. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 584](#)

MEDSCI 585 Independent Study Epidemiology and Biostatistics Term 1 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Epidemiology and Biostatistics Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 585](#)

MEDSCI 586 Independent Study Epidemiology and Biostatistics Term 2 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Epidemiology and Biostatistics Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Offered: AWSpS.

[View course details in MyPlan: MEDSCI 586](#)

MEDSCI 587 Independent Study Epidemiology and Biostatistics Term 3 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Epidemiology and Biostatistics Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Offered: AWSpS.

[View course details in MyPlan: MEDSCI 587](#)

MEDSCI 588 Independent Study Human Form & Function Term 1 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Human Form & Function Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 588](#)

MEDSCI 589 Independent Study Human Form & Function Term 2 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Human Form & Function Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered:

AWSpS.

[View course details in MyPlan: MEDSCI 589](#)

MEDSCI 590 Independent Study Human Form & Function Term 3 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Human Form & Function Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 590](#)

MEDSCI 591 Independent Study Pathology Term 1 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 591](#)

MEDSCI 592 Independent Study Pathology Term 2 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 592](#)

MEDSCI 593 Independent Study Pathology Term 3 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Pathology & Histology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. The course title includes terms to identify which quarter the course is being offered. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 593](#)

MEDSCI 594 Independent Study Pharmacology Term 1 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Offered: AWSpS.

[View course details in MyPlan: MEDSCI 594](#)

MEDSCI 595 Independent Study Pharmacology Term 2 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 595](#)

MEDSCI 596 Independent Study Pharmacology Term 3 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required Pharmacology Thread offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 596](#)

MEDSCI 597 Indep Study USMLE Step 1 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required USMLE Step 1 licensing examination offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 597](#)

MEDSCI 598 Indep Study USMLE Step 2 (1-24, max. 24)

Designed for medical students required to complete additional study related to the required USMLE Step 2 licensing examination offered during the pre-clinical foundation phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. The course title includes terms to identify which quarter the course is being offered. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 598](#)

MEDSCI 599 Indep Study or Research (1-24, max. 24)

Designed for medical students who elect a special or research related to the required foundation phase pre-clinical courses. Prerequisite: Department Permission Offered: AWSpS.

[View course details in MyPlan: MEDSCI 599](#)

MEDSCI 602 Adolescent Health in Low-Resource Settings (1)

Highlights issues for adolescents in resource limited settings with an initial focus on what makes adolescents unique. Topic-based seminars, readings, discussions, and cases will include: adolescent development; physical and psychological trauma; nutrition; illicit activities; adolescent-focused research; adolescent-friendly health services; and reproductive and sexual health.

[View course details in MyPlan: MEDSCI 602](#)

MEDSCI 603 Introductory Hands-On Cardiac Ultrasound (1)

Acquire cardiac ultrasound images at three acoustic windows, identify cardiac anatomy in standard views, and recognize key pathologies: left and right ventricular dysfunction and dilatation and pericardial effusion. Following a course introduction, students will work self-paced, alone or in pairs, on a mannequin-based simulator.

[View course details in MyPlan: MEDSCI 603](#)

MEDSCI 604 Introduction to Chronic Pain (1)

Medical students will be paired with a pain specialist for three morning sessions in an outpatient chronic pain clinic. Students will be exposed to musculoskeletal, neuropathic, and visceral pain conditions while learning about various management options. A 1-2 page reflection on a patient or pain topic will be required. Offered: SpS.

[View course details in MyPlan: MEDSCI 604](#)

MEDSCI 605 From Electrons to the Emergency Department: The Cell Biology of Poisons (1)

This course will describe how various poisons (naturally occurring or following overdose) interrupt molecular pathways to produce toxicity. Concepts will be introduced in a base-based manner before describing in depth the metabolic pathway affected. Examples include electron transport chain poisons, sodium channel poisons, and free poisons (iron).

[View course details in MyPlan: MEDSCI 605](#)

MEDSCI 606 Emergency Medicine Point-of-Care Ultrasound (1) A. ADEDIPE, B. BACKLUND, M. VRABLIK

Introduction to point-of-care ultrasound. This elective will help students become comfortable with using bedside ultrasound by teaching ultrasound machine operation, image acquisition, and providing hands-on training in both simulated and patient care settings. The elective is designed to be interactive and will incorporate

classroom didactic, procedure simulation and clinical application. Offered: WSp.

[View course details in MyPlan: MEDSCI 606](#)

MEDSCI 607 Science and Practice of Empathy and Compassion Cultivation in Medicine (1)

This course will aim at helping students develop the ability to face suffering and pain with empathy, kindness, and compassion. Emphasis will be on cultivating a non-judgmental and curious attitude, self-compassion, appreciation of common humanity and acknowledging that suffering is universal to the human condition, and the practice of compassion. Offered: AS.

[View course details in MyPlan: MEDSCI 607](#)

MEDSCI 608 Ethical Issues in Solid Organ Transplantation and Allocation (1) *A. WIGHTMAN*

Explore the ethical issues that underlie some of the major controversies in transplantation through brief readings (including selections from the press, canonic texts, and academic articles) and case-based discussion. Students will be evaluated based on participation and a written response to a case. Offered: W.

[View course details in MyPlan: MEDSCI 608](#)

MEDSCI 609 Ethics in emergency Medicine Workshop (1)

Learn how to consider and evaluate the ethical issues surrounding various real-life, frequently encountered medical situations. Discuss various approaches to ethical reasoning and decision-making, then implement in case evaluation. Students will be encouraged to both participate in and lead discussions of each case.

[View course details in MyPlan: MEDSCI 609](#)

MEDSCI 610 Food, Health, and the Environment (1)

A multi-modal session comprised of interactive presentations, documentaries, guest speakers, and small group discussions covering major nutrition topics, such as: nutrition and effects on health, the American food industry and the environment, changing eating behaviors on individual, community, and national levels, as well as food insecurities and health disparities.

[View course details in MyPlan: MEDSCI 610](#)

MEDSCI 611 Intersection of Genetics with Patient Care (2)

Create hypothesis-driven clinical inquiry in an interactive learning environment. Employ peer-review sessions and team-based analysis of genetics case scenarios. Apply your science and clinical knowledge towards solving your patient's specific healthcare need. A team experienced clinicians and researchers will give support and feedback.

[View course details in MyPlan: MEDSCI 611](#)

MEDSCI 612 Introduction to Humanitarian Emergencies (1)

The course provides an introduction to health related issues faced by acutely displaced populations, including refugees and internally displaced persons, in developing countries, in the setting of humanitarian emergencies. Challenges in planning, implementing, and evaluating health programs for these populations will be discussed through case studies of recent humanitarian emergencies.

[View course details in MyPlan: MEDSCI 612](#)

MEDSCI 613 Mind Body Medicine: Mind Body Skills for Medical Students (2) *L. ERLANGER, C. SCOTT*

This seminar course will provide scientific background and foundational self-care skills for stress management through mindfulness and mutual support. Students will be encouraged to develop self-care and related pt care philosophy statement. Includes highly interactive, short didactic sessions, practice with experiential activities, and sharing reflections with group members.

[View course details in MyPlan: MEDSCI 613](#)

MEDSCI 614 Theoretical and Clinical Aspects of Pain (1)

The course will introduce pain and pain neurobiology with a close look into nociceptive, neuropathic and visceral pain and treatments to pain and addiction. The course will be a combination of articles, lecture, videos of real patients with chronic pain, and discussion.

[View course details in MyPlan: MEDSCI 614](#)

MEDSCI 615 Community Engagement and the School of Medicine Pathways (1)

The interactive and engaging Pathways intersession will cover the following topic area: determinants of health, the built environment, health equity and advocacy, structural competency, narrative medicine and additional topics related to working effectively with underserved, vulnerable and marginalized communities. Open to all WWAMI medical students.

[View course details in MyPlan: MEDSCI 615](#)

MEDSCI 616 The Physician Online: Mindful Use of Digital Media (1) *A. BROWN, A. CHIPMAN, M. JACKSON, J. JAUREGUI, J. RIDDELL*

This course explores the use of social media in medicine by exploring online identity, interactions, consumption and creation of content, and reflection. The goal is to equip students to use digital media mindfully while leveraging it to collaborate intelligently, teach more efficiently, and learn for a lifetime.

[View course details in MyPlan: MEDSCI 616](#)

MEDSCI 617 Prison/Jail Health Care, Part 1 (1) *M. STERN, L. STRICK*

This 2-day course serves as an introduction to correctional healthcare. The instructors will provide a short overview of the US correctional system and why and how health care is delivered in jails and prisons. The class will tour a busy county jail on Day 1 and a state prison on Day 2. Offered: AW.

[View course details in MyPlan: MEDSCI 617](#)

MEDSCI 618 Prison/Jail Health Care, Part 2 (1) *M. STERN, L. STRICK*

This course will explore the unique ethical challenges of correctional medicine through case-based discussions. There will be an opportunity to better understand some of those challenges first hand through a guided visit to a prison caring for the state's most seriously mentally ill. Offered: S.

[View course details in MyPlan: MEDSCI 618](#)

MEDSCI 619 Refugee and Immigrant Health (1)

This is a weeklong UWSOM intersession course familiarizing students with various aspects of immigrant and refugee health care. There will be an emphasis on the social context of clinical care and the importance of effective teamwork and collaboration.

[View course details in MyPlan: MEDSCI 619](#)

MEDSCI 620 Rheumatology Foundations (1) *H. EMERY, K. HAYWARD, M. THAPA, T. TORGERSON*

This course reviews pathology, clinical presentation, initial evaluation and management of patients with musculoskeletal complaints and common rheumatologic disorders. The in-class sessions include interactive lectures, case-based small groups and a volunteer patient panel that allow students to synthesize knowledge from earlier Foundations blocks and prepare for transition into clinical clerkships. Offered: Sp.

[View course details in MyPlan: MEDSCI 620](#)

MEDSCI 621 Basic Skills in Emergency Resuscitation (1)

Impart the critical skills needed to evaluate and manage common emergencies that medical students will encounter during their clinical clerkships and internship.

[View course details in MyPlan: MEDSCI 621](#)

MEDSCI 622 Topics in Global Infectious Diseases (1)

This course will combine didactic sessions presented by local topic experts on global infectious diseases with interactive case-based learning. Small groups will tackle cases that explore epidemiology, diagnosis and management of significant global infections. The course will conclude with a career panel of speakers highlighting various global health career paths.

[View course details in MyPlan: MEDSCI 622](#)

MEDSCI 623 Introduction to Toxicology: The Intersection of Natural Toxins and Human Physiology (1)

This is a didactic-based course illustrating the pathophysiology of natural toxins. Toxins from multiple organ systems including central nervous system, hepatic, hematologic, immunologic, and renal toxins will be covered. Specific examples include: shellfish poisonings, plant and mushroom poisonings, and envenomations from

jellyfish, snakes, scorpions, and spiders.

[View course details in MyPlan: MEDSCI 623](#)

MEDSCI 624 Medical Students as Advocates: Practical Skills for Effective Advocacy (1)

Students will develop tangible, hands on skills for moving beyond witnessing health disparities to upstream action that is rooted in effective and community-centered advocacy. Through a cycle of interactive learning, research, action and reflection, this course both explores and develops the role of medical students and future physicians as advocates. Credit/no-credit only.

[View course details in MyPlan: MEDSCI 624](#)

MEDSCI 625 Building a Framework for Effective Service-Learning, Health Equity, and Leadership (1)

This course hones student leadership skills for: cultivating strong teams, assessing community strengths and needs, building community partnerships, sustaining projects, transitioning leadership, and facilitating reflective practices rooted in an analysis of systemic inequalities and cultural humility. Students will emerge with renewed confidence and refined skills for developing or strengthening projects. Credit/no-credit only.

[View course details in MyPlan: MEDSCI 625](#)

MEDSCI 626 Foundations of Scholarship: Discovery (1)

Investigate different types of scholarship of discovery within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AW.

[View course details in MyPlan: MEDSCI 626](#)

MEDSCI 627 Foundations of Scholarship: Integration (1)

Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AWSp.

[View course details in MyPlan: MEDSCI 627](#)

MEDSCI 628 Foundations of Scholarship: Engagement (1)

Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AWSp.

[View course details in MyPlan: MEDSCI 628](#)

MEDSCI 629 Foundations of Scholarship: Teaching (1)

Investigate different types of scholarship of integration within medicine. Apply the concepts of clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique to while preparing a scholarly project. Offered: AWSp.

[View course details in MyPlan: MEDSCI 629](#)

MEDSCI 630 Procedures and Advanced Skills for Clinical Practice (1)

Explore common diagnostic and therapeutic clinical procedures through a hands-on approach. Experience more advanced skills needed for clinical practice in a mentored environment. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: MEDSCI 630](#)

MEDSCI 631 Skills and Strategies for Personal and Professional Development (1)

Teach skills and strategies required to sustain lifelong personal and professional growth. Equip students with resources and strategies that will improve their studying and learning skills. Topics will include time management, stress management, adult learning and organizational skills. Guest presenters will include professionals in the fields of health and education. Offered: W.

[View course details in MyPlan: MEDSCI 631](#)

MEDSCI 632 Clinical Global Health and Social Medicine (1) *P. DRAIN*

Applying clinical global health and social medicine principles are critical to providing excellent medical care. In

this intersession, students will learn and discuss elements of clinical global health and social medicine through interactive case-based lectures, group discussions, and independent reading. Students will be graded (pass/fail) on participation and an essay. Offered: W.

Microbiology

[Display as tabs](#)

Department Overview

K-335A Health Sciences

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

Undergraduate Program

Adviser

K-335A Health Sciences, Box 357242

(206) 543-2572

advmicro@uw.edu

The Department of Microbiology offers the following programs of study:

- The Bachelor of Science degree with a major in microbiology
- A minor in microbiology

Bachelor of Science

Suggested First- and Second-Year Courses: PHYS 114, PHYS 115, PHYS 116, or PHYS 121, PHYS 122, PHYS 123; one of the following: MATH 112, MATH 124, MATH 144, Q SCI 381, or STAT 311.

MICROM 410, the first microbiology course for majors, is taken after completion of BIOL 200 and organic chemistry (CHEM 223 or CHEM 237). To graduate in four years, a student must complete introductory biology and organic chemistry before autumn quarter of the junior year.

MICROM 101, MICROM 301, and MICROM 302, offered to non-majors, serve as introductory courses, but cannot be used to fulfill graduation requirements for a major in microbiology. MICROM 301 is a prerequisite for students applying to nursing, physical therapy, or dental school.

Department Admission Requirements

1. Minimum 75 credits applicable to graduation, with a minimum 2.00 overall cumulative GPA.
2. Completion of the following prerequisite courses with a minimum 2.25 cumulative GPA : BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223 or CHEM 237.

Major Requirements

Minimum 90 credits (including microbiology courses) in the biological, physical, and mathematical sciences, as follows:

1. BIOL 180, BIOL 200, BIOL 220, or equivalent (15 credits/one year)
2. *Inorganic chemistry*: CHEM 142, CHEM 152, CHEM 162 (16 credits) (or CHEM 145, CHEM 155); *organic chemistry*: CHEM 223, CHEM 237, or CHEM 335
3. *Core Courses (8 credits)*: MICROM 402; MICROM 410; MICROM 496
4. *Distribution*: 15 credits from the following, to include at least one course in each distribution group and a minimum of two courses with a laboratory component.
 - a. *Medical Microbiology*: IMMUN 441, MICROM 442, MICROM 443, or MICROM 444.
 - b. *Virology*: MICROM 445 or MICROM 450
 - c. *Diversity and Ecology*: MICROM 412 or MICROM 435
 - d. *Genetics and Molecular Biology*: MICROM 411, MICROM 431, and GENOME 361 or GENOME 371
5. 13 credits of approved electives. See adviser for approved list. Approved electives may include any of the above courses not taken as a distribution requirement.
6. PHYS 114, PHYS 115 (8 credits) (or PHYS 121, PHYS 122) (PHYS 116 or PHYS 123 recommended)
7. Either MATH 112, MATH 124, MATH 144, Q SCI 381, or STAT 311 (5 credits)
8. BIOC 405, BIOC 406 (6 credits) (or BIOC 440, BIOC 441, BIOC 442)
9. For all required and elective microbiology courses used toward graduation, a minimum 2.25 cumulative GPA and a minimum 1.8 grade in each course
10. Transfer students must complete at least 20 of the required and elective microbiology credits through the UW.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the [department website](#).

Minor

Minor Requirements: 29 credits as follows:

1. 14 credits to include BIOL 200; one of CHEM 152, CHEM 155, CHEM 162, or CHEM 165; one of CHEM 223, CHEM 237, or CHEM 355.

2. 15 credits from the following: MICROM 410; one from MICROM 302, MICROM 402, MICROM 431, or MICROM 443; and approved 400-level, graded microbiology courses to reach 29 credits. See adviser for approved list.
3. Minimum cumulative 2.00 GPA for all courses counted toward the minor

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The department's objective is to provide a major with the best instruction possible in broad areas of microbiology so students qualify for a wide variety of positions with a terminal BS degree or qualify to pursue advanced degrees in graduate or professional schools.

Microbiology offers students an excellent education in the biology of microorganisms, namely bacteria, fungi, protozoa, and viruses. Through learning about the biology of these microorganisms and viruses, students more fully understand the pivotal position they occupy in establishing and maintaining our biosphere, their effects on human, animal, and plant life, and how the biological properties of certain microbes are exploited for certain purposes. Microorganisms are important in drinking water, wastewater and sewage treatment, production and spoilage of foods, production of antibiotics, bioremediation of toxic compounds, and genetic engineering of organisms having unique characteristics. Students gain insight into strategies used by microorganisms and viruses to cause disease and the mechanisms used by their host to defend themselves.

Graduates have found research positions in biotechnology and pharmaceutical companies, as well as in state and government positions hiring microbiologists. Students interested in a health profession or graduate program benefit from this program.

- *Instructional and Research Facilities:* Microbiology courses are taught using state-of-the-art facilities in the teaching wing of the Health Sciences building. Research labs are located in the Health Sciences, Fred Hutchinson Cancer Research Center, NW Regional Primate Research Center, and UW Rosen building.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* MICROM 499, undergraduate laboratory research, is offered for credit. See adviser for details.
- *Department Scholarships:* The department offers four awards each year. More information is available at the department's website.
- *Student Organizations/Associations:* The Microphiles Club is open to all students. The club sponsors field trips to local biotech companies, speakers on topics such as research and career opportunities, graduate school, and peer teaching.

Graduate Program

Graduate Program Coordinator
K335A Health Sciences, Box 357242

(206) 543-2572
advmicro@uw.edu

The Department of Microbiology offers a graduate program leading to the doctor of philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

Admission Requirements

Students can be admitted to the PhD program with a background in any biological science discipline. Selection is based on the evaluation of a student's undergraduate record for indications of the ability to excel in independent, creative research. The department strongly recommends that undergraduate preparation include courses in biochemistry, physics, general and organic chemistry, microbiology, molecular biology and cell biology. To be competitive with the applicant pool, prospective students are also strongly advised to seek opportunities to carry out undergraduate research.

Required background courses (generally satisfied prior to entry into the graduate program):

1. A one-year course in biochemistry (equivalent to BIOC 440, BIOC 441, and BIOC 442)
2. A course in classical and molecular genetics (equivalent to GENOME 371 or GENOME 372)
3. A course in general microbiology (equivalent to MICROM 410)
4. A course in medical microbiology and basic immunology is recommended for those considering research in the area of medical microbiology or virology

Degree Requirements

90 credits minimum, as follows:

1. **Conjoint Courses (6 credits):** 6 credits from the following conjoint courses: CONJ 524, CONJ 531, CONJ 532, CONJ 533, CONJ 534, CONJ 535, CONJ 537, CONJ 538, CONJ 539, CONJ 541, CONJ 543, CONJ 544, CONJ 545, CONJ 546, CONJ 547, CONJ 548, CONJ 549 (1.5 credits each). It is recommended that students take additional conjoint courses or choose one or more of the genome sciences modules: GENOME 551, GENOME 552, GENOME 553, GENOME 554, GENOME 555, GENOME 556, GENOME 559 (1.5 credits each).
2. **Virology and Bacteriology Courses (6-7 credits):** Three of the following courses; one virology and one bacteriology course must be among those selected: MCB 532, MCB 542, MICROM 441, MICROM 450, MICROM 510, MICROM 530, MICROM 553
3. **Faculty Research Presentations** for first-year students: MICROM 599
4. **Laboratory Rotation:** MICROM 500, minimum three quarters
5. **Journal Club:** MICROM 522, continuous enrollment
6. **Seminar:** MICROM 520 seminar series or attendance at Fred Hutchinson seminars. Students at Fred Hutchinson are also encouraged to attend the Microbiology seminars. To be taken every quarter unless a conflict with teaching exists.
7. **Research Discussion Groups:** taken every quarter. Students register for the appropriate course number for credit.

8. Additional requirements:

- a. Be a teaching assistant in at least two laboratory courses for undergraduates (usually satisfied in the first and/or second year).
- b. Give at least two formal lectures in an undergraduate course (third or fourth year).
- c. Be first author on multiple papers related to thesis research which are published or accepted for publication in refereed journals. Under some circumstances, one first-author publication satisfies this requirement.

9. General examination, dissertation, final examination

MICROBIOLOGY (MEDICINE)

MICROBIOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MICROM 101 Microbes and Society (5) NW

Intended for liberal arts majors and students not majoring in the biological sciences. Focuses on activities of bacteria, viruses, and other microorganisms, and their influence on humans. Microbe-related topics include disease, bioterrorism, food, biotechnology, and ecology. Examines the nature of scientific inquiry, along with major biological concepts.

[View course details in MyPlan: MICROM 101](#)

MICROM 301 General Microbiology (3) NW *D. ANDERSON, R. BUMGARNER*

Acquaints students with microorganisms and their activities. Topics include microbial cell structure and function, metabolism, microbial genetics, and the role of microorganisms in disease, immunity, and other selected applied areas. Prerequisite: either CHEM 120, CHEM 140, CHEM 142, or CHEM 145. Offered: ASpS.

[View course details in MyPlan: MICROM 301](#)

MICROM 302 General Microbiology Laboratory (2) NW

Laboratory course primarily for students taking MICROM 301. Covers a variety of microbiological techniques, with experiments designed to illustrate major concepts of bacteriology, virology, and immunology. No auditors. Offered: ASpS.

[View course details in MyPlan: MICROM 302](#)

MICROM 402 Fundamentals of General Microbiology Laboratory (3) NW

Isolation of a broad range of nonpathogenic bacteria from natural sources, using selective and enrichment techniques, with microscopic, biochemical, and molecular identification. Related exercises include genetics, physiology, quantitation, and growth energetics. Prerequisite: BIOL 200. Offered: ASp.

[View course details in MyPlan: MICROM 402](#)

MICROM 410 Fundamentals of General Microbiology I (3) NW

Survey of the microbial world, metabolism, biosynthesis, regulation, growth, structure, and function. Required for students majoring in microbiology; recommended for students majoring in biology. Prerequisite: minimum grade of 2.3 in BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Instructors: Parsek, Traxler Offered:

A.

[View course details in MyPlan: MICROM 410](#)**MICROM 411 Bacterial Genetics (4) NW**

Molecular genetics: description of fundamental genetic processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focuses on prokaryotic organisms. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: W.

[View course details in MyPlan: MICROM 411](#)**MICROM 412 Prokaryotic Diversity (3) NW**

Structure, biochemical properties, and genetics of the major groups of prokaryotes. Prerequisite: BIOL 200.

Instructors: Greenberg, Leigh Offered: Sp.

[View course details in MyPlan: MICROM 412](#)**MICROM 413 Special Topics in Microbiology (1, max. 3)**

Examines current subjects in microbiology. Credit/no-credit only.

[View course details in MyPlan: MICROM 413](#)**MICROM 431 Prokaryotic Recombinant DNA Techniques (3) NW**

Laboratory course emphasizing concepts and techniques/methodologies in recombinant DNA research employing bacteria and their viruses. Topics and experiments/demonstrations include genomic and plasmid DNA isolation, restriction mapping, cloning, transposon mutagenesis, sequencing, and Western and Southern blotting. No auditors. Prerequisite: either BIOL 200 or MICROM 301. Offered: W.

[View course details in MyPlan: MICROM 431](#)**MICROM 435 Microbial Ecology (3) NW**

Consideration of the various roles that microorganisms, particularly bacteria and cyanobacteria, play in environmental processes. The interrelationships among microorganisms and the effects of the physical, chemical, and biological properties of their environment are discussed and assessed. Prerequisite: BIOL 180.

Instructors: Stahl

[View course details in MyPlan: MICROM 435](#)**MICROM 442 Medical Bacteriology (3) NW**

Medically important bacterial pathogens are discussed in terms of the clinical, therapeutic, and epidemiological aspects of diseases caused by them, molecular mechanisms of pathogenesis and their identification in the clinical laboratory. Laboratory course, MICROM 443 coordinates. Prerequisite: BIOL 200. Instructors: Cookson Offered: W.

[View course details in MyPlan: MICROM 442](#)**MICROM 443 Medical Bacteriology Laboratory (3) NW**

Required for medical technology students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. No auditors.

Prerequisite: BIOL 200. Offered: AW.

[View course details in MyPlan: MICROM 443](#)**MICROM 445 Medical Virology (3) NW**

Introduces medical virology emphasizing basic understanding of the pathogenesis and replication of medically important viruses including the spread, diagnosis, epidemiology, treatment, and prevention of human viral diseases. Prerequisite: either BIOL 180 or BIOL 200; Sp. Instructors: Lagunoff, Smith

[View course details in MyPlan: MICROM 445](#)**MICROM 450 Molecular Biology of Viruses (3) NW**

Introduction to the molecular biology of viruses and virus-host relationships. Designed for advanced undergraduates and graduate students in the biological sciences. Coverage includes bacterial and animal viruses, with an emphasis on the molecular mechanisms of viral gene expression and regulation. Prerequisite: BIOL 200.

Instructors: Champoux Offered: W.

[View course details in MyPlan: MICROM 450](#)

MICROM 460 Medical Mycology and Parasitology (3) *D. ANDERSON, M. CHANDLER, C. FISHER, S. MURPHY*

Examines medically important fungi and parasites in terms of the symptoms, diagnosis, epidemiology, and therapy of the diseases they cause as well as their mechanisms of pathogenesis. The laboratory course MICROM 461 complements this lecture course but is not required. Prerequisite: BIOL 200 or MICROM 301 Offered: Sp.

[View course details in MyPlan: MICROM 460](#)

MICROM 461 Medical Mycology and Parasitology Laboratory (2) *D. ANDERSON, M. CHANDLER*

Hands-on practice to identify medically important fungi and parasites, using live, preserved, and stained samples. Demonstrations along with limited procedures are used to illustrate important features used to distinguish organisms. Prerequisite: Prerequisite: MICROM 460, which may be taken concurrently. Offered: Sp.

[View course details in MyPlan: MICROM 461](#)

MICROM 482 Peer Teaching Assistants in Microbiology (1-5, max. 10)

Direct experience in teaching a microbiology laboratory class. Peer TA's attend concurrent accompanying lecture course, meet weekly to coordinate, give introductory lab remarks, supervise the execution of lab exercises, and assist in preparing/grading of quizzes/exams. Training in teaching techniques, approaches. Student evaluation provided. Prerequisite: MICROM 402; MICROM 410. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MICROM 482](#)

MICROM 495 Honors Undergraduate Research (*-) Leigh

Specific problems in microbiology or immunology. Offered: AWSpS.

[View course details in MyPlan: MICROM 495](#)

MICROM 496 Undergraduate Library Research (2)

An introduction to library research techniques and to microbiological literature. Staff assign a topic and supervise the project. Offered: AWSpS.

[View course details in MyPlan: MICROM 496](#)

MICROM 499 Undergraduate Laboratory Research (*-, max. 35) Leigh

Specific problems in microbiology or immunology. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MICROM 499](#)

MICROM 500 Introduction to Research (*, max. 20)

Introduction to research areas of the faculty and the techniques employed in their investigations. Prerequisite: graduate standing in microbiology or permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MICROM 500](#)

MICROM 520 Seminar (1, max. 30) Fang

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MICROM 520](#)

MICROM 522 Current Research in Microbiology (1, max. 30)

Weekly student and faculty seminar presentations based on the current literature. Prerequisite: graduate standing in microbiology. Instructors: Harwood, Merrikh, Parsek Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MICROM 522](#)

MICROM 526 Research of Cell Surface Problems (1, max. 30)

Weekly research seminar and discussion of scientific literature pertaining to the process of membrane protein biogenesis. Prerequisite: permission of instructor. Instructors: Traxler Credit/no-credit only.

[View course details in MyPlan: MICROM 526](#)

MICROM 529 Mechanisms of Bacterial Pathogenesis (1, max. 30)

Student and faculty seminar presentations based on current research pertaining to mechanisms of bacterial pathogenesis at the molecular and cellular levels. Prerequisite: graduate standing in microbiology. Instructors: Fang Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: MICROM 529](#)

MICROM 532 Methanogenesis Research Meeting (1, max. 30)

Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Prerequisite: MICROM 410, permission of instructor. Instructors: Leigh Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MICROM 532](#)

MICROM 533 Herpesvirus Research Meeting (1, max. 30)

Weekly research seminar and discussion of scientific literature pertaining to the study of molecular virology of Kaposi's Sarcoma-associated herpesvirus. Prerequisite: permission of instructor. Instructors: Lagunoff Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MICROM 533](#)

MICROM 534 Research Seminar in Salmonella Pathogenesis (1, max. 30) Fang

Provides a formal group setting for discussion and evaluation of a student's research progress. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MICROM 534](#)

MICROM 540 Virology (3)

Introduces new approaches and technologies being used in modern virology laboratories to provide a better understanding of the fields of virology and virus-host interactions. Covers topics in bio-defense, viral genomics and proteomics, and systems biology as it pertains to virus/host infection. Prerequisite: permission of instructor. Instructors: Katze

[View course details in MyPlan: MICROM 540](#)

MICROM 553 Molecular Interactions of Bacteria with their Hosts (3)

The processes bacteria employ to shape interactions with their hosts will be explored in molecular detail through selected examples in the literature. Prerequisite: One year of undergraduate cellular and molecular biology. ; recommended: An introductory course in microbiology is recommended. Offered: A, odd years.

[View course details in MyPlan: MICROM 553](#)

MICROM 554 Seminar in Molecular and Medical Microbiology (1, max. 15)

Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented and discussed critically. Prerequisite: permission of instructor. Instructors: Cookson Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: MICROM 554](#)

MICROM 555 Advanced Clinical Microbiology (2.5)

Attendance at daily plate rounds of the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Prerequisite: MICROM 443 and permission of instructor. Instructors: Butler-Wu, Fang Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: MICROM 555](#)

MICROM 560 Research and Journal Club in Retrovirology (1, max. 30)

Weekly research seminar and discussion of literature in areas of retroviral replication and transformation. Prerequisite: graduate standing or permission of instructor. Instructors: Linial Offered: AWSpS.

[View course details in MyPlan: MICROM 560](#)

MICROM 562 Oncogene and Retrovirus Research Seminar (1, max. 30)

Weekly discussions of ongoing research related to retroviral replication, retroviral oncogeneses and pathology.

Prerequisite: graduate standing or permission of instructor. Instructors: Linial, Overbaugh Offered: AWSpS.
[View course details in MyPlan: MICROM 562](#)

MICROM 585 Research in Cell and Molecular Biology (1, max. 30)

Weekly research seminar. Prerequisite: permission of instructor. Instructors: Champoux Credit/no-credit only.
Offered: AWSpS.

[View course details in MyPlan: MICROM 585](#)

MICROM 588 Research in Applied Microbiology (1, max. 30)

Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Prerequisite: permission of instructor. Instructors: Lidstrom Credit/no-credit only. Offered: jointly with CHEM E 588; AWSpS.

[View course details in MyPlan: MICROM 588](#)

MICROM 599 Research Presentations (2)

Current research review. Credit/no-credit only.

[View course details in MyPlan: MICROM 599](#)

MICROM 600 Independent Study or Research (*-)

Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MICROM 600](#)

MICROM 700 Master's Thesis (*-)

Credit/no-credit only.

[View course details in MyPlan: MICROM 700](#)

MICROM 800 Doctoral Dissertation (*-)

Credit/no-credit only. Offered: AWSpS.

Neurological Surgery

[Display as tabs](#)

Department Overview

325 9th Avenue, Harborview Medical Center

askuwns@uw.edu

The Department of Neurological Surgery is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction in this area is provided for medical students and postgraduate physicians.

The department's medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, University of Washington Medical Center, Veterans Affairs Puget Sound Health Care Center, and Seattle Children's hospital. The department also has several course offerings correlating research and clinical problems of the nervous system, including the research seminars in neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.

Selected medical students also may elect research experience within the Department of Neurological Surgery. The department research facilities are housed in the Medical Research Tower of the University of Washington Medical Center, at Harborview Research and Training Building, and at Veterans Affairs Puget Sound Health Care System. Investigations are under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year program emphasizes preparation for a career in academic neurosurgery.

NEUROLOGICAL SURGERY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

NEUR S 498 Undergraduate Thesis (*, max. 35) *D' Ambrosio, Ellenbogen, Hevner, Horner, MacDonald, Mourad, Morrison, Ojemann, Ramirez*

Offered: AWSpS.

[View course details in MyPlan: NEUR S 498](#)

NEUR S 499 Undergraduate Research (*, max. 35)

Investigation of special problems as an intimate member of the research team in the neurological surgery laboratories. Research to lead to a thesis, if desired. List of projects available on request. Prerequisite: permission of instructor. Instructors: D' Ambrosio, Ellenbogen, Ferreira, Hevner, Horner, MacDonald, Mourad, Morrison, Ojemann, Ramirez, Rostomily, Silber Offered: AWSpS.

[View course details in MyPlan: NEUR S 499](#)

NEUR S 505 P-Preceptorship in Academic Neurosurgery (1, max. 12)

Opportunity for first- and second-year medical students to observe the research, teaching, and patient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Instructors: Chestnut, Ellenbogen, Ferreira, Hofstetter, Kim, Lee, Ojemann, Rostomily, Sekar, Silbergeld, Zhang Offered: AWSpS.

[View course details in MyPlan: NEUR S 505](#)

NEUR S 655 P-Clinical Neurosurgery Clerkship- Spokane WA (1-8, max. 8)

Provides the medical student with exposure to common neurologic and neurosurgical problems such as trauma, hydrocephalus, stroke, back pain, bleeds in the head, and tumors. Satisfies the requirement of the Neurology clerkship requirement. For third- and fourth-year medical students. Offered: AWSpS.

[View course details in MyPlan: NEUR S 655](#)

NEUR S 665 P-Clinical Neurosurgery Clerkship (8) *Ellenbogen, Lee*

Provides the medical student with exposure to common neurologic and neurosurgical problems such as trauma, hydrocephalus, stroke, back pain, bleeds in the head, and tumors. Satisfies the requirement of the Neurology clerkship requirement. For third- and fourth-year medical students.

[View course details in MyPlan: NEUR S 665](#)

NEUR S 680 P-Neurological Surgery Clerkship (*, max. 8)

Student serves clinical clerkship as an intimate member of the staff, participating in inpatient and outpatient

care, both preoperative and postoperative, involving neurological surgery patients. University of Washington²²⁰¹ Medical Center or a University-affiliated hospital may be selected, subject to approval of the department. (Four weeks). Prerequisite: HUBIO 563. Instructors: Ellenbogen, Lee Offered: AWSpS.

[View course details in MyPlan: NEUR S 680](#)

NEUR S 697 P-Neurological Surgery Special Electives (*, max. 24)

By specific arrangement, for qualified students, special clerkship, externship, or research opportunities made available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Instructors: Ellenbogen Offered: AWSpS.

[View course details in MyPlan: NEUR S 697](#)

NEUR S 699 P-WWAMI Neurological Surgery Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Instructors: Ellenbogen

Neurology

[*Display as tabs*](#)

Department Overview

RR650 University of Washington Medical Center

neurolog@uw.edu

Neurology, previously a division of the Department of Medicine, became an independent department at the University of Washington School of Medicine in autumn of 1995. The four-year residency program (including an internship) offers superb training in all facets of neurology in a setting of great institutional strength in fundamental neuroscience research. In addition, the Department of Neurology offers exceptional training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical-clerkship program provides basic training in neurology patient care. The Neurology Department is active in teaching, research, and patient care at the University of Washington Medical Center, Seattle Veterans Affairs Medical Center, Harborview Medical Center, Seattle Children's hospital, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

[View course details in MyPlan: NEURL 653](#)

NEURL 654 P-Introduction to Neurology - Dr. Greeley, Spokane (8)

Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. David Greeley in Spokane, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 654](#)

NEURL 655 P-Introduction to Neurology - Spokane (8)

Provides the medical student with a general understanding of basic clinical neurology in Spokane, Washington. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

[View course details in MyPlan: NEURL 655](#)

NEURL 656 P-Introduction to Neurology - Wenatchee (8)

Provides the medical student with a general understanding of basic clinical neurology at Wenatchee Valley Medical Center in Wenatchee, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 656](#)

NEURL 657 P-Introduction to Neurology - Yakima (8)

Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Richard Sloop in Yakima, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 657](#)

NEURL 658 P-Introduction to Neurology - Olympia Neurology (8)

Provides the medical student with a general understanding of basic clinical neurology at Olympia Neurology in Olympia, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 658](#)

NEURL 659 P-Introduction to Neurology - NW Neurology, Lakewood (8)

Provides the medical student with a general understanding of basic clinical neurology at Northwest Neurology, a Franciscan Medical Group clinic, in Lakewood, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 659](#)

NEURL 660 P-Introduction to Neurology - Madigan (8)

Provides the medical student with a general understanding of basic clinical neurology at Madigan Army Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 660](#)

NEURL 661 P-Introduction to Neurology - Tacoma/Puyallup Multicare (8)

Provides the medical student with a general understanding of basic clinical neurology at Neurology and Neurosurgery Associates in Tacoma and Puyallup, Washington. Students spend time at both clinics. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 661](#)

NEURL 662 P-Introduction to Neurology - Group Health, Tacoma (8)

Provides the medical student with a general understanding of basic clinical neurology at Group Health Tacoma Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 662](#)

NEURL 663 P-Introduction to Neurology - Group Health, Eastside (8)

Provides the medical student with a general understanding of basic clinical neurology at Group Health Eastside Specialty Center in Redmond, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 663](#)

NEURL 664 P-Introduction to Neurology - Burien (8)

Provides the medical student with a general understanding of basic clinical neurology at South Seattle Neurology Associates in Burien. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 664](#)

NEURL 665 P-Introduction to Neurology- UWMC (8)

Provides the medical student with a general understanding of basic clinical neurology, at UWMC. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Instructors: Kraus
Offered: AWSpS.

[View course details in MyPlan: NEURL 665](#)

NEURL 666 P-Introduction to Neurology - HMC (8)

Provides the medical student with a general understanding of basic clinical neurology at Harborview Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 666](#)

NEURL 667 P-Introduction to Neurology - VA (8)

Provides the medical student with a general understanding of basic clinical neurology at the VA Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 667](#)

NEURL 668 P-Introduction to Neurology - Northwest Hospital (8)

Provides the medical student with a general understanding of basic clinical neurology at Northwest Hospital in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 668](#)

NEURL 669 P-Introduction to Neurology - Virginia Mason (8)

Provides the medical student with a general understanding of basic clinical neurology at Virginia Mason Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 669](#)

NEURL 670 P-Introduction to Neurology - Minor and James (8)

Provides the medical student with a general understanding of basic clinical neurology at Minor and James Medical in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 670](#)

NEURL 671 P-Introduction to Neurology - Swedish (8)

Provides the medical student with a general understanding of basic clinical neurology at Swedish Medical Center I in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 671](#)

NEURL 672 P-Introduction to Neurology - Group Health, Seattle (8)

Provides the medical student with a general understanding of basic clinical neurology at Group Health Capitol Hill Campus in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

[View course details in MyPlan: NEURL 672](#)

NEURL 673 P-Introduction to Neurology - Renton, Valley Medical Center (8)

Provides the medical student with a general understanding of basic clinical neurology in Renton, WA. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics.

[View course details in MyPlan: NEURL 673](#)

NEURL 674 P-Introduction to Neurology- Bellingham (8)

Provides the medical student with a general understanding of basic clinical neurology at Peace Health in Bellingham, Washington. Prerequisite: Completion of one required clerkship in medicine, family medicine, surgery or pediatrics. Offered: AWSpS.

[View course details in MyPlan: NEURL 674](#)

NEURL 681 P-Seizure Clinic Clerkship (2.5)

Evaluation and follow-up of patients with seizure disorders. Limited contact with inpatients. Prerequisite: MED 665 and permission of instructor. Instructors: A. Wilensky Offered: AWSpS.

[View course details in MyPlan: NEURL 681](#)

NEURL 685 Epilepsy and Clinical Electroencephalography (4/8, max. 8) *Miller*

Introduction into epilepsy and the use and interpretation of the electroencephalogram and other clinical studies used to assess it, under the direct supervision of several of the faculty epileptologists and clinical neurophysiologists. Offered: AWSpS.

[View course details in MyPlan: NEURL 685](#)

NEURL 686 P-Clinical Neurology (8) *Swanson*

Clerkship including both inpatient and outpatient experiences and didactic sessions on neurological subjects. Student assigned to one of the affiliated hospitals and supervised by neurology residents and full-time staff. Offered: AWSpS.

[View course details in MyPlan: NEURL 686](#)

NEURL 687 Advanced Clerkship in Child Neurology (4, max. 8)

Advanced course in neurology dealing with neurological disease in children. Supervision by child neurology residents and attending. Prerequisite: NEURL 665, third- and fourth-year medical students. (Limit: one student.) Instructors: Gospe Offered: AWSpS.

[View course details in MyPlan: NEURL 687](#)

NEURL 697 Neurology Away Elective (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions outside the WWAMI region. Students obtain special assignment form from the dean's office at least one month

prior to preregistration. Prerequisite. permission of department adviser. Offered: AWSpS.

SCHOOL OF MEDICINE

OBSTETRICS AND GYNECOLOGY

OBSTETRICS & GYNECOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

OB GYN 498 Undergraduate Thesis (*, max. 30)

By arrangement.

[View course details in MyPlan: OB GYN 498](#)

OB GYN 499 Undergraduate Research (*, max. 30)

[View course details in MyPlan: OB GYN 499](#)

OB GYN 505 P-OB GYN Preceptorship (1, max. 12)

Provides an opportunity for first- and second-year medical students to gain direct obstetrics and gynecology experience with a variety of clinical faculty members in diverse patient-care settings. Includes opportunities to observe labor and delivery, gynecologic surgery in the operating room, ambulatory obstetrics and gynecology in clinic, and family planning.

[View course details in MyPlan: OB GYN 505](#)

OB GYN 550 P-Voluntary Pregnancy Termination: An Overview of Medical and Social Issues (2) *Prager*

A flexible curriculum which allows the medical student to observe in an abortion clinic, read articles and a textbook on abortion. Can be used by medical student as elective credit.

[View course details in MyPlan: OB GYN 550](#)

OB GYN 551 Perinatal Care Elective (1)

Provide an introduction and overview of perinatal care for first- or second-year medical students with emphasis on late third trimester, labor and delivery, and postpartum. Opportunity to observe the patient-provider relationship. Optional labor and delivery observation. Offered: AWSp.

[View course details in MyPlan: OB GYN 551](#)

OB GYN 579 P-Obstetric and Gynecologic Investigation (*)

The investigation may cover any one of the following fields: normal and complicated pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.

[View course details in MyPlan: OB GYN 579](#)

OB GYN 598 P-OB/GYN Independent Study and Remediation (*, max. 8)

Designed for medical students required to complete additional study related to the required Obstetrics and Gynecology clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSp.

[View course details in MyPlan: OB GYN 598](#)

OB GYN 630 P-WRITE Obstetrics and Gynecology Clinical Clerkship (6-12)

Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: Completion of Foundations Phase curriculum; acceptance to the WRITE program. Offered: AWSpS.

[View course details in MyPlan: OB GYN 630](#)

OB GYN 631 P-Introduction to Obstetrics and Gynecology, NWHMC (*, max. 12)

See OB GYN 665. Offered at Northwest Hospital, Seattle, WA. (Six weeks, full-time). Prerequisite: HUBIO series, 3rd year medical students.

[View course details in MyPlan: OB GYN 631](#)

OB GYN 632 P-Introduction to Obstetrics and Gynecology - Bellingham (*, max. 12)

See OB GYN 665.

[View course details in MyPlan: OB GYN 632](#)

OB GYN 633 P-Introduction to Obstetrics and Gynecology- Spokane Rockwood (12)

Clerkship equivalent to OB GYN 665 offered in Spokane, WA. (Six weeks, full time) Offered: AWSpS.

[View course details in MyPlan: OB GYN 633](#)

OB GYN 638 P-Gynecology Planned Parenthood- Spokane, WA (4)

Clinical elective in family planning at Planned Parenthood in Spokane, WA. Exposure to contraceptive and options counseling. Experience in evaluating patients for sexually transmitted infections and appropriate therapies. May participate in first trimester ultrasound, medical and surgical abortions. Prerequisite: Basic OB GYN clerkship. Offered: AWSpS.

[View course details in MyPlan: OB GYN 638](#)

OB GYN 639 P-Introduction to Obstetrics and Gynecology, St. Alphonsus (*, max. 12)

See OB GYN 665. Offered at St. Alphonsus, Boise, ID. (Six weeks, full-time). Prerequisite: HUBIO series, 3rd year medical students.

[View course details in MyPlan: OB GYN 639](#)

Ophthalmology

[Display as tabs](#)

Department Overview

RR801 University of Washington Medical Center

The Department of Ophthalmology is responsible for the instructional and research programs in diseases of the eye and visual system and its adnexae.

Medical-student instruction is provided, including multiple electives in the clinical years. Graduate physicians are provided with three years of residency training at the affiliated hospitals. An optional internship is available in ophthalmology. A two-year ophthalmic plastics and orbit fellowship, and a two-year surgical retina fellowship, are offered. Patient care is provided under the supervision of full- and part-time faculty physicians at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Medical Center, and Seattle Children's hospital.

Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/physiology of the orbit. Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact Ingrid Noe at ingrid@uw.edu. For more information on medical student clerkships, contact Dorrie Quirante at dorrieq@uw.edu.

OPHTH 501 P-Ophthalmology Preceptorship (1, max. 12)

Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Student observes activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- and second-year medical student standing and permission of instructor. Instructors: Francis Offered: AWSpS.

[View course details in MyPlan: OPHTH 501](#)

OPHTH 600 Independent Study or Research (*)

Prerequisite: Permission of instructor.

[View course details in MyPlan: OPHTH 600](#)

OPHTH 681 P-Ophthalmology Clerkship - HMC/Eye Institute (4/8, max. 12)

Students gain experience in the diagnosis and treatment of common ocular disorders. Basic examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. Offered: AWSpS.

[View course details in MyPlan: OPHTH 681](#)

OPHTH 683 P-Pediatric Ophthalmology Clerkship - Seattle Children's (4)

Student examines and observes treatment of children with ocular diseases and learns to differentiate trivial from potentially blinding disorders. Furnishes programmed text in general ophthalmology. Prerequisite: completion of human biology series. Offered: WS.

[View course details in MyPlan: OPHTH 683](#)

OPHTH 685 P-Ophthalmology Clerkship - VAPSHCS (4)

Participation in diagnosis and treatment of medical and surgical ocular disease. Outpatient examinations, inpatient surgery, as well as neuro-ophthalmologic, retinal, and glaucoma consultations. Basic techniques involved in tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

[View course details in MyPlan: OPHTH 685](#)

OPHTH 686 P-Ophthalmology Clerkship - Kaiser Permanente (4)

Diagnosis and treatment of ocular disease in outpatients. Weekly assignments to Kaiser Permanente ophthalmologist responsible for the care of walk-in and urgent patients, demonstrating findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

[View course details in MyPlan: OPHTH 686](#)

OPHTH 688 P-Ophthalmology Clerkship - Anchorage (8)

Four-week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slit-lamp biomicroscopy, tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisite: completion of human biology series, MED 665, and SURG 665; fourth-year medical students only. Offered: AWSpS.

[View course details in MyPlan: OPHTH 688](#)

OPHTH 689 P-Ophthalmology Clerkship - Spokane (4)

Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

[View course details in MyPlan: OPHTH 689](#)

OPHTH 690 P-Ophthalmology Clerkship - Missoula (4)

Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

[View course details in MyPlan: OPHTH 690](#)

OPHTH 691 P-Ophthalmology Clerkship - Nampa (4)

Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, neuro-ophthalmology, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

[View course details in MyPlan: OPHTH 691](#)

OPHTH 695 P-Ophthalmology Advanced Clerkship - HMC (4)

Students gain advanced experience in the diagnosis, evaluation, and treatment of inpatient and emergency department ophthalmology consults, including emergency surgeries. Prerequisite: completion of human biology series; prior ophthalmology clerkship. Offered: AWSpS.

[View course details in MyPlan: OPHTH 695](#)

OPHTH 697 P-Ophthalmology Special Electives (*, max. 24)

By specific arrangement, for qualified students, special clerkship, externship, or research opportunities are at times made available at institutions or clinics other than the UW. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Instructors: Francis Offered: AWSpS.

[View course details in MyPlan: OPHTH 697](#)

OPHTH 699 P-WWAMI Ophthalmology Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

Orthopaedics

[*Display as tabs*](#)

Department Overview

BB1043 University of Washington Medical Center

The Department of Orthopaedics is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the Master of Science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

SCHOOL OF MEDICINE ORTHOPEDICS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ORTHP 498 Undergraduate Thesis (*, max. 30) Eyre

Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the area of orthopaedics, and develops a thesis for recognition. Offered: AWSpS.

[View course details in MyPlan: ORTHP 498](#)

ORTHP 499 Undergraduate Research (*, max. 90) Eyre

Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Offered: AWSpS.

[View course details in MyPlan: ORTHP 499](#)

ORTHP 505 P-Preceptorship in Orthopaedic Surgery (1, max. 12)

Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community. Students observe general aspects of private practice from a longitudinal perspective. Prerequisite: permission of department. Offered: AWSpS.

[View course details in MyPlan: ORTHP 505](#)

ORTHP 585 P-Sports Medicine (2)

Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes nutritional concerns, biomechanics of certain sports injuries, and cardiovascular, pulmonary, and musculoskeletal concerns. Prerequisite: second-year medical student standing.

Instructors: O' Kane Offered: Sp.

[View course details in MyPlan: ORTHP 585](#)

ORTHP 643 P-General Orthopedic Clerkship - Cody, WY (8)

Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students.

[View course details in MyPlan: ORTHP 643](#)

ORTHP 644 P-General Orthopaedic Clerkship - Jackson (*, max. 8)

Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO

series; third- and fourth-year students. Enrollment limited to three a year. Instructors: Khoury Offered: AWSpS.
[View course details in MyPlan: ORTHP 644](#)

ORTHOP 650 P-General Orthopaedic Clerkship - Billings (*, max. 8)

Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three a year. Instructors: Shenton Offered: AWSpS.

[View course details in MyPlan: ORTHP 650](#)

ORTHOP 655 P-General Orthopaedic Clerkship - Boise (*, max. 8)

Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternative in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Instructors: Scheffel

[View course details in MyPlan: ORTHP 655](#)

ORTHOP 662 P-General Orthopaedic Surgery-Casper, WY (8)

Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: Third or fourth year medical student.

[View course details in MyPlan: ORTHP 662](#)

ORTHOP 668 P-Pediatric Orthopaedics - Spokane (*, max. 8)

Acquaints students with all aspects of musculoskeletal problems in childhood. Includes didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Shriners Hospital for Children in Spokane. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Instructors: Caskey Offered: AWSpS.

[View course details in MyPlan: ORTHP 668](#)

ORTHOP 669 P-General Orthopaedic Clerkship - Spokane (*, max. 8)

Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students. Instructors: Scott Offered: AWSpS.

[View course details in MyPlan: ORTHP 669](#)

ORTHOP 675 P-Preceptorship in Orthopaedics (*, max. 4)

Student spends full time with the preceptor during all his or her working day in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private orthopaedic practice. (Two weeks, full-time). Prerequisite: SURG 665 or HUBIO 553 and permission of department. Offered: AWSpS.

[View course details in MyPlan: ORTHP 675](#)

ORTHOP 676 P-Pediatric Orthopaedics - Seattle Children's (*, max. 8)

Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Seattle Children's Hospital, and correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Instructors: Burton, Dales, Jinguji, Krengel, Lindberg, Mosca, Schmale, Steinman, White Offered: AWSpS.

[View course details in MyPlan: ORTHP 676](#)

ORTHOP 677 P-Musculoskeletal Trauma (*, max. 8)

Harborview Medical Center. Emergency room, wards, operating room, and outpatient clinics. Instruction in general and special clinics, including hand, hip, foot, and fracture, with emphasis placed on physical examination of the patient. Students take correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665, HUBIO 553. Instructors: Barei, Beingessner, Bellabarba, Bransford, Dunbar, Firoozabadi, Henley, Kleweno, Nork, Taitzman Offered: AWSpS.

[View course details in MyPlan: ORTHP 677](#)

ORTHP 678 P-Musculoskeletal Oncology (8/12)

In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, staging, treatment, and postoperative follow-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Instructors: Conrad, Davidson Offered: AWSpS.

[View course details in MyPlan: ORTHP 678](#)

ORTHP 680 P-General Orthopaedic Clerkship - VAMC (*, max. 8)

Veterans' Administration Hospital: structured to provide a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Instructors: Chansky Offered: AWSpS.

[View course details in MyPlan: ORTHP 680](#)

ORTHP 681 P- Sports Medicine Orthopaedic Clerkship (8)

Orthopaedic subspecialty clerkship at University of Washington Medical Center. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care. Students work primarily in one subspecialty area and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Instructors: Green, Larson, O' Kane, Twaddle Offered: AWSpS.

[View course details in MyPlan: ORTHP 681](#)

ORTHP 682 P-Outpatient Orthopaedics (8)

Outpatient orthopaedic experience at University of Washington Medical Center. Emphasis on physical exam, diagnosis, radiographic evaluation, and non-operative treatment. Rotation through general orthopaedics as well as all subspecialty areas. For students who plan careers in primary care. Prerequisite: completion of HUBIO series. Instructors: Conrad, Davidson, Manner, Matsen, Wagner, Warne Offered: AWSpS.

[View course details in MyPlan: ORTHP 682](#)

ORTHP 684 P-Disorders of the Spine (8)

Evaluation and assessment strategies of spinal disorders for patients of all ages and wide variety of clinical conditions including trauma, deformity, degenerative disorders, metabolic, and inflammatory diagnoses. Outpatient, surgical, and conference-based teaching sessions aimed at all experience levels and individualized for practitioners with interest in medical specialties, emergent care, radiology, physiatry, intervention pain management. Offered: AWSpS.

[View course details in MyPlan: ORTHP 684](#)

ORTHP 685 P-Adult Reconstruction: Total Joint Service (8) *Manner*

Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Students work with faculty in the Total Joint Service which specializes in lower extremity adult reconstructive surgery, including: complex primary hip/knee arthroplasty; less invasive approaches to hip/knee arthroplasty; revision hip/knee arthroplasty; periacetabular and proximal femoral osteotomy; osteotomy about the knee; and hip arthroscope. Offered: AWSpS.

[View course details in MyPlan: ORTHP 685](#)

ORTHP 686 P-Sports Medicine - Boise, ID (*, max. 8) *G. SCHMALE*

Orthopaedic clinical clerkship in Boise, ID. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care focused on the treatment and rehabilitation of foot and ankle injuries. Students work primarily in one subspecialty area (foot and ankle) and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.

[View course details in MyPlan: ORTHP 686](#)

ORTHP 687 P-Shoulder and Elbow (8) *Matsen, Warme*

Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with the faculty in the Shoulder and Elbow Service, which provides comprehensive evaluation and management for a wide range of shoulder and elbow problems, including: arthritis, dislocation or instability, fractures, rotator cuff/tendon tears, joint stiffness, and unsuccessful previous surgery. Offered: AWSpS.

[View course details in MyPlan: ORTHP 687](#)

ORTHP 688 P-Sports Medicine- Spokane, WA (4-8)

Orthopedic clinical clerkship in sports medicine. Students participate in care of patients with sports-related injuries. Emphasis on physical examination and determining appropriate operative interventions and rehabilitation. Offered: AWSpS.

[View course details in MyPlan: ORTHP 688](#)

ORTHP 697 P-Orthopaedic External Elective (*, max. 24)

Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities or at large orthopaedic institutes. Prerequisite: HUBIO 553 and permission of department. Offered: AWSpS.

[View course details in MyPlan: ORTHP 697](#)

ORTHP 699 P-WWAMI Orthopedics Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Otolaryngology -- Head and Neck Surgery

[*Display as tabs*](#)

Department Overview

BB1165 University of Washington Medical Center

The Department of Otolaryngology - Head and Neck Surgery provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major portion of departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

University of Washington Course Descriptions

gencat@u.washington.edu

Modified: May 30, 2017

Pathology

[Display as tabs](#)

Department Overview

C516 Health Sciences

Pathology is the study of disease; its causes, mechanisms, and effects on the body. Pathology is both a basic biological science and a specialty of medicine. As a medical specialty, practiced by MDs, it includes the laboratory evaluation of organs, tissues, and fluids to assist other physicians in reaching a diagnosis. As a basic science, practiced by PhDs, pathology focuses on the experimental investigation of the molecular processes of disease, using techniques of cell and organ culture, biochemistry, molecular biology, and genetics.

The Department of Pathology offers graduate training in experimental pathology, with an emphasis on the cellular and molecular biological basis of disease, leading to the Doctor of Philosophy degree in cellular and molecular pathology. The primary goal of the graduate program is to train individuals for careers as practicing scientists in biomedical research, investigating basic disease mechanisms. Emphasis is on development of skills in hypothesis generation and testing, including the design, accomplishment, and critical interpretation of experiments. Experimental pathology uses the full range of biomedical research techniques (including biochemistry, molecular biology, cell biology, animal modeling) to attempt to elucidate the mechanisms underlying human disease. Graduates of the program usually continue research careers at biotechnology companies or universities/research institutes.

[Course Descriptions](#)

Graduate Program

Graduate Program Adviser
C516 Health Sciences, Box 357470
(206) 616-7551

Doctor of Philosophy

Admission Requirements

1. Copy of the Graduate School Application
2. Official transcripts
3. Official GRE scores. The department also recommends that applicants take the Subject Test in Biology or related area.
4. Statement of purpose and research interests
5. Three or more letters of recommendation

6. Personal statement that addresses the relationship between personal background and aspirations

Special Requirements

Prospective candidates should have taken undergraduate courses in the sciences, and have acceptable scores on the Graduate Record Examination, including advanced biology or chemistry. Some experience in a research laboratory is strongly recommended. Those wishing to matriculate toward both the MD and PhD degrees must gain admission to both the Graduate School and the School of Medicine.

Degree Requirements

90 credits, to include:

1. *Required coursework:* PATH 500, PATH 501, PATH 507, PATH 512), PATH 513, PATH 515, PATH 516, PATH 551; BIOS 511; CONJ 538, CONJ 539
2. *Research before the general examination:* PATH 600
3. *Research after the general examination:* PATH 800
4. *Recommended courses:* CONJ 531, CONJ 532
5. General examination
6. Dissertation
7. Final examination

Financial Aid

Funding for students is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

Research Facilities

The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of disease in mammalian species. Special facilities exist for training in electron microscopy; cell, tissue, and organ culture; recombinant DNA techniques; histochemistry and cytochemistry; analytical biochemistry; immunology; and molecular and cell biology.

Residency Training Program

The department supervises a residency-training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Subspecialty training is also available through clinical fellowships. Persons who complete the residency program are eligible for certification by the American Board of Pathology. For additional information, contact the Resident Program Director, Department of Pathology, Box 356100, or visit the residency program [website](#).

PATH 512 Molecular Basis of Disease: Death and Repair (1.5)

First in a series designed to introduce students to medically important diseases and physiologic processes and experimental approaches to elucidating the cellular processes underlying these diseases. Covers basic cell/tissue processes that underlie normal homeostasis and most disease and, including apoptosis, necrosis, stem cells, inflammation, granulation tissue, tissue regeneration, repair and fibrosis.

[View course details in MyPlan: PATH 512](#)

PATH 513 Mechanisms of Neurodegeneration (1.5)

Introduction to the cellular and molecular mechanisms that underlie neurodegenerative diseases, including introduction to the normal development and anatomy of the central nervous system, a review of epidemiologic, genetic, and clinical research tools used in the investigation of these diseases, and a systematic review of the major neurodegenerative diseases.

[View course details in MyPlan: PATH 513](#)

PATH 516 Molecular Basis of Human Genetic Disease (3)

Introduces the underlying mechanisms in human genetic disorders, ranging from the single nucleotide, through genomic instability, and chromosomal rearrangements. Includes tissue and organ specific examples of the manner in which these disorders provide insights into human biology. Offered: Sp.

[View course details in MyPlan: PATH 516](#)

PATH 517 The Biology and Pathology of Aging (3/4) *M. KAEBERLEIN*

Surveys the biology and pathologies of the aging phenomena in multiple species and at multiple organismal levels from whole animals to molecules. Prerequisite: coursework in biology, biochemistry, molecular biology, and genetics. Offered: Sp.

[View course details in MyPlan: PATH 517](#)

PATH 520 Experimental Pathology Seminar (1)

Review of current research in various areas of experimental pathology by members of the department and visiting scientists. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: PATH 520](#)

PATH 521 Anatomy and Autopsy (1)

Students view an autopsy, and learn how autopsy can diagnose disease, determine cause of death, and improve patient care. Requirements include orientation session, autopsy, and a clinical-autopsy conference. Participants must be free at least one morning per week to attend an autopsy at UWMC. Prerequisite: UW medical students only. Instructors: Fligner Offered: WSp.

[View course details in MyPlan: PATH 521](#)

PATH 522 Hematopathology Seminar (2) *Wood*

Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with LAB M 522; W, even years.

[View course details in MyPlan: PATH 522](#)

PATH 530 Human Cytogenetics (*, max. 4)

Sources and methods of preparation and identification of human chromosomes. Molecular structure and mapping of chromosomes. Human cytogenetic pathology: karyotype-phenotype interactions, chromosome breakage, and cancer cytogenetics. Prerequisite: permission of instructor. Instructors: Disteche Offered: Sp.

[View course details in MyPlan: PATH 530](#)

PATH 535 Innate Immunity and Immunopathology (1.5) *I. CRISPE, K. SMITH*

Explores the relationship between the innate immune system and disease processes, using a student-led seminar format. Students analyze, present, and critique primary research literature, and use the knowledge gained to develop a sophisticated insight into the mechanisms of immunopathology. Offered: Sp.

[View course details in MyPlan: PATH 535](#)

PATH 540 Translational Research Topics (1) *Horwitz*

First and second year students in the M.D./Ph.D. program present and discuss current papers from the biomedical literature in journal club format, and describe their own research in seminar format. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: PATH 540](#)

PATH 544 General and Systemic Pathology ([2-3]-, max. 5) *W. MAHONEY*

Basic pathologic processes that underlie disease, including cell alterations, genetic and developmental pathology, environmental pathology, neoplasia, immunopathology, inflammation, infection, and systemic diseases. Correlates gross, functional, and biochemical alterations. For first-year dental students and graduate students. Requires reasonable grounding in biological and chemical sciences. Prerequisite: for nondental students: permission of instructor.

[View course details in MyPlan: PATH 544](#)

PATH 550 Mechanisms of Disease (3) *Conrad-Liles, Rendi*

Examines the mechanisms of inflammation, cell injury, death, repair, immunity, and neoplasia as well as diseases of various organ systems. Systems covered include the cardiovascular, pulmonary, gastrointestinal, neurologic, endocrine, and genitourinary/renal systems. Topics presented through lecture, primary literature, and small-group discussion. Offered: A.

[View course details in MyPlan: PATH 550](#)

PATH 551 Experimental and Molecular Pathology (2-5, max. 20)

Introduction to experimental pathology. A tutorial course designed to introduce a graduate student (medical, dental) or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: Pathology PhD student; permission of instructor Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: PATH 551](#)

PATH 555 Environmental Pathology (3)

Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisite: PATH 410 or PATH 444 or HUBIO 520. Instructors: Monnat Offered: Sp, even years.

[View course details in MyPlan: PATH 555](#)

PATH 560 Molecular Analysis of Human Disease (*, max. 10)

Review and discussion of contemporary research on molecular basis of human disease. Focus on mutational mechanisms, genetic instability, AIDS, and cancer. Students participate in weekly group discussion and work with faculty to select, develop, and present discussion topic. Prerequisite: medical, graduate, or professional standing and permission of instructor. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: PATH 560](#)

PATH 580 Mitochondria and Metabolism in the Pathogenesis of Human Disease (1.5) *Hawkins, Tian*

Explores the fundamentals of mitochondrial biology, bioenergetics, and cellular metabolism. Includes topical lectures and literature reviews introducing students to advanced metabolic concepts within the context of human disease. Offered: A.

[View course details in MyPlan: PATH 580](#)

PATH 590 Patient-Centered Translational Research (1) *Horwitz*

MSTP students preparing to return to clerkships are partnered with a senior MD/PhD medical student or house

office, preview the medical or surgical ward team environment, select a patient-focused translation research²²³⁵ topic based on their clinical experience, and prepare a plan for refreshing introductory clinical skills. Offered: WSp.

[View course details in MyPlan: PATH 590](#)

PATH 600 Independent Study or Research (*-)

Prerequisite: Pathology PhD student. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PATH 600](#)

PATH 667 P-Renal Pathology Laboratory (*, max. 6)

Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students earn 1 credit for one-hour seminar per week. May be taken concurrently with MED 693. Prerequisite: permission of instructor.

[View course details in MyPlan: PATH 667](#)

PATH 676 P-Diagnostic Pathology Clerkship - Spokane (*, max. 24)

Medical student participation in dissection and study of autopsy and surgical pathology cases at Sacred Heart Medical Center in Spokane. Can be taken for either two or four weeks.

[View course details in MyPlan: PATH 676](#)

PATH 677 P-Neuropathology Clerkship - HMC (*, max. 16)

Includes participation in dissection and study of neuropathology cases. Students work up cases under senior staff including dissection, microscopic examination, and literature review.

[View course details in MyPlan: PATH 677](#)

PATH 678 P-Diagnostic Pathology Clerkship - Medical Examiner's Office, Alaska (*, max. 24)

Medical student participation in dissection and study of autopsy and forensic pathology cases at the Anchorage Medical Examiner's Office.

[View course details in MyPlan: PATH 678](#)

PATH 680 P-Diagnostic Pathology Clerkship - University of Washington Medical Center (*, max. 24)

Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year medical student standing. Instructors: Swanson

[View course details in MyPlan: PATH 680](#)

PATH 681 P-Diagnostic Pathology Clerkship - Harborview Medical Center (*, max. 24)

[View course details in MyPlan: PATH 681](#)

PATH 682 P-Diagnostic Pathology Clerkship - Veterans' Administration Hospital (*, max. 24)

[View course details in MyPlan: PATH 682](#)

PATH 683 P-Diagnostic Pathology Clerkship - Medical Examiner's Office (*, max. 24) *Raven*

[View course details in MyPlan: PATH 683](#)

PATH 687 P-Diagnostic Pathology Clerkship - Seattle Children's Hospital (*, max. 24)

[View course details in MyPlan: PATH 687](#)

PATH 688 P-Diagnostic Pathology Clerkship - Madigan Army Medical Center (*, max. 24)

[View course details in MyPlan: PATH 688](#)

PATH 690 P-Diagnostic Pathology Clerkship - Northwest Medical Center (*, max. 24)

[View course details in MyPlan: PATH 690](#)

PATH 691 P-Diagnostic Pathology Clerkship - General Hospital of Everett (*, max. 24)

[View course details in MyPlan: PATH 691](#)

PATH 697 P-Pathology Special Electives (*, max. 24)

By specific arrangement, students have clerkships, externships, or research opportunities at institutions other than the University of Washington. Prospective students obtain special assignment forms from the dean's office at least one month before advance registration. Prerequisite: permission of instructor.

[View course details in MyPlan: PATH 697](#)

PATH 699 P-WWAMI Pathology Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

[View course details in MyPlan: PATH 699](#)

PATH 700 Master's Thesis (*-)

[View course details in MyPlan: PATH 700](#)

PATH 800 Doctoral Dissertation (*-)

Prerequisite: Pathology PhD student. Offered: AWSpS.

Pediatrics

[Display as tabs](#)

Department Overview

RR314 Health Sciences

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 20 electives, in addition to the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives as well as the traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Seattle Children's hospital, University of Washington Medical Center, and Harborview Medical Center.

SCHOOL OF MEDICINE

PEDIATRICS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PEDS 498 Undergraduate Thesis (*, max. 35)

For medical students. Offered: AWSpS.

[View course details in MyPlan: PEDS 498](#)

PEDS 499 Undergraduate Research (*, max. 35)

Participation in various clinical or basic research programs in progress, specifically: child development, developmental biology, human embryology and teratology, medical genetics, infectious diseases, neonatology, neuroembryology, cardiology, endocrinology and metabolism, immunology, respiratory disease. Offered: AWSpS.

[View course details in MyPlan: PEDS 499](#)

PEDS 505 P-Preceptorship in Pediatrics (1, max. 12)

To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatricians by being stationed with carefully selected clinical faculty members in their offices. Enrollment limited. Coordinator: Department of Pediatrics. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PEDS 505](#)

PEDS 530 P-Homeless Youth and Their Medical Care (1)

Seminar and interview practice; students learn how to deal with special health problems and other related problems of "street kids" through interviews and observations. Credit/no-credit only. Offered: W.

[View course details in MyPlan: PEDS 530](#)

PEDS 598 P-Pediatrics Independent Study and Remediation (*, max. 8)

Designed for medical students required to complete additional study related to the required Pediatrics Clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission Offered: AWSpS.

[View course details in MyPlan: PEDS 598](#)

PEDS 600 Independent Study or Research (*)

Facilitates and promotes mentored independent study/scholarship related to the care of children. Students participate in projects that promote individual, self-directed and creative scholarly activity with appropriate

supervision, oversight, and mentorship with an emphasis on the process of scholarship.

[View course details in MyPlan: PEDS 600](#)

PEDS 611 P-Country Doctor Free Teen Clinic (*, max. 24)

Participation in a free clinic for out-of-home youth, either Monday or Tuesday evenings. Clinical services include general medical care, with a focus on reproductive health, STD evaluations/treatment, and the impact of a homeless lifestyle on general health. (Limit per rotation: two students.) Offered: AWSpS.

[View course details in MyPlan: PEDS 611](#)

PEDS 619 P-Introduction to Care of the Newborn Infant (4)

2-week clinical elective at Overlake Hospital. Students participate in the women's and baby follow-up clinic and neonatal nutrition clinic. Students attend rounds in the neonatal ICU, attend deliveries and participate as able in delivery room resuscitations. Offered: AWSpS.

[View course details in MyPlan: PEDS 619](#)

PEDS 622 P-Pediatric Child Abuse and Neglect - Boise (4/8, max. 24)

Exposes future clinicians to the most common issues relating to child abuse and neglect. Prerequisite: fourth-year medical students; core pediatrics rotation. (Limit: one student; by departmental permission). Offered: AWSpS.

[View course details in MyPlan: PEDS 622](#)

PEDS 623 P-Pediatrics Child Abuse - Spokane, WA (4-8, max. 8)

Exposes future clinicians to the most common issues relating to child abuse and neglect. (Limit: one student). Prerequisite: fourth-year medical students who have completed their core pediatrics rotation; permission of department. Offered: AWSpS.

[View course details in MyPlan: PEDS 623](#)

PEDS 624 Pediatric Emergency Medicine - Spokane (8)

Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: PEDS core clerkship; by departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 624](#)

PEDS 625 Pediatric Emergency Medicine (8)

Elective in Pediatric Emergency Department at Seattle Children's Hospital. Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills.

Prerequisite: fourth-year medical students. Offered: AWSpS.

[View course details in MyPlan: PEDS 625](#)

PEDS 629 P-Neonatal Pediatrics- Missoula, MT (1-24, max. 24)

Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. Offered: AWSpS.

[View course details in MyPlan: PEDS 629](#)

PEDS 630 P-WRITE Pediatrics Clinical Clerkship (*, max. 24)

Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: PEDS 665, inpatient only; acceptance in the WRITE program.

[View course details in MyPlan: PEDS 630](#)

PEDS 631 P-LIC Pediatrics Clinical Clerkship (12)

Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: acceptance into LIC program.

[View course details in MyPlan: PEDS 631](#)

PEDS 635 P-Pediatric Cardiology - Boise, ID (*, max. 24)

Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student; by departmental permission). Offered: AWSpS.

[View course details in MyPlan: PEDS 635](#)

PEDS 636 P-Pediatric Cardiology - Spokane (*, max. 24)

Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 636](#)

PEDS 637 P-Pediatric Cardiology - Anchorage (*, max. 24)

Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 637](#)

PEDS 640 P-Pediatric Gastroenterology - Boise (4/8, max. 24)

Elective rotation where students see clinical pediatric gastrointestinal problems, participate in inpatient gastroenterology consultations, outpatient clinic evaluations for new and follow-up patients, and (observe) endoscopic and therapeutic gastrointestinal procedures. (Limit: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 640](#)

PEDS 647 P-Pediatric General Clerkship- Lewiston, ID (1-24, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time) Offered: AWSpS.

[View course details in MyPlan: PEDS 647](#)

PEDS 648 Pediatric General Clerkship - Everett, WA (12)

General introductory pediatric clerkship. One half in hospital setting; one half in outpatient department, clinic, or private office. Open to all third- and fourth year students. (Six weeks, full-time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 648](#)

PEDS 649 P-Pediatric General Clerkship - Centralia/Olympia, WA (12)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 649](#)

PEDS 650 P-Pediatric General Clerkship - Moses Lake, WA (12)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 650](#)

PEDS 651 P-Pediatric General Clerkship - Bozeman, MT (12, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students).

Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 651](#)

PEDS 652 P-Pediatric General Clerkship - Idaho Falls, ID (*, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students).

Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 652](#)

PEDS 653 P-Pediatric General Clerkship - Helena, MT (*, max. 24)

General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in Helena, MT.

[View course details in MyPlan: PEDS 653](#)

PEDS 655 P-Pediatric General Clerkship - Jackson, WY (*, max. 24)

General introductory inpatient and outpatient pediatric clerkship. Takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities, including access to a community hospital with nursery, pediatric beds, and physician-staffed emergency room. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSp.

[View course details in MyPlan: PEDS 655](#)

PEDS 656 P-Pediatric General Clerkship - Wenatchee (*, max. 24)

General introductory inpatient and outpatient pediatric clerkship. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 656](#)

PEDS 657 P-Pediatric General Clerkship - Missoula (*, max. 24)

General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at Community Medical Center. (Six weeks, full time. Limit per rotation: one or two students.) Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 657](#)

PEDS 658 P-Pediatric General Clerkship - Boise (*, max. 24)

General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at St. Luke's Medical Center. (Six weeks, full time. Limit per rotation: one or two students). Prerequisite: HUBIO 563. Offered: AWSp.

[View course details in MyPlan: PEDS 658](#)

PEDS 659 Pediatric General Clerkship - Billings, MT (*, max. 24)

General introductory inpatient and outpatient pediatric clerkship. Exposes students to diverse settings where children receive health services. The six-week experience takes place primarily in two active pediatric group practices with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit: per rotation: one student.) Offered: AWSp.

[View course details in MyPlan: PEDS 659](#)

PEDS 660 Pediatric General Clerkship - Cheyenne, WY (*, max. 24)

Introductory inpatient and outpatient pediatric clerkship that exposes students to environments in settings where children receive medical and health services. The six-week experience takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 660](#)

PEDS 661 P-Pediatric General Clerkship - Anchorage (*, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three students). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 661](#)

PEDS 663 P-Pediatric General Clerkship - Mary Bridge (*, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three or four students). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 663](#)

PEDS 664 P-Pediatric General Clerkship - Pocatello, ID (*, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 664](#)

PEDS 665 P-Pediatric General Clerkship - Seattle (*, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: ten students). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 665](#)

PEDS 666 P-Pediatric General Clerkship - Great Falls, MT (*, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 666](#)

PEDS 667 P-Pediatric General Clerkship - Madigan (*, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSp.

[View course details in MyPlan: PEDS 667](#)

PEDS 668 P-Pediatric General Clerkship - Spokane (*, max. 24)

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two or three students). Prerequisite: HUBIO 563. Offered: AWSpS.

[View course details in MyPlan: PEDS 668](#)

PEDS 669 P-Neonatal Pediatrics - Clerkship (*, max. 24)

Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. (Limit per rotation: one or two students). Prerequisite: PEDS and OB GYN core clerkships. Offered: AWSpS.

[View course details in MyPlan: PEDS 669](#)

PEDS 670 P-Pediatric Infectious Diseases (*, max. 24)

Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; fourth-year medical student standing. Offered: AWSpS.

[View course details in MyPlan: PEDS 670](#)

PEDS 671 Pediatric Endocrinology (*, max. 24)

Focuses on the evaluation of the normal progression of hormone mediated processes in children and the recognition, diagnosis, and management of a variety of endocrine problems. Includes participation in clinics, impatient endocrine rounds, and a variety of conferences at Seattle Children's Hospital. (Limit per rotation: one student.) Prerequisite: PEDS core clerkship. Offered: AWSpS.

[View course details in MyPlan: PEDS 671](#)

PEDS 672 P-Office Practice - Spokane (*, max. 12)

Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 672](#)

PEDS 673 P-Office Practice (*, max. 12)

Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 673](#)

PEDS 674 P-Pediatric Genetics - Spokane (*, max. 24)

Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Two or four weeks. Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 674](#)

PEDS 675 P-Clinical Elective in Complementary and Alternative Medicine (4/8, max. 8)

Clinical elective for students interested in a better understanding of CAM. Students arrange different clinical placements with selected CAM providers in the community: naturopathic physician, chiropractor, acupuncturist, and massage therapist. Students are expected to arrange their own schedule and must be prepared to do so at least four weeks in advance of the start of the rotation. (Limit per rotation: one or two students). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 675](#)

PEDS 677 P-Pediatric Intensive Care (8)

Students manage patients with the supervision of the Pediatric Critical Care attending or fellow at Seattle Children's Hospital. Includes the opportunity to manage patients with complex multisystem disease and learn key elements of acute resuscitation in the intensive-care setting. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 677](#)

PEDS 678 P-Pediatric Infectious Diseases - Boise (*, max. 24)

Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; third- or fourth-year medical student standing; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 678](#)

PEDS 679 P-Clinical Problems in Developmental Disabilities (*, max. 12)

Experience in multidisciplinary evaluation and management of the handicapped child. Student performs pediatric evaluations, obtains appropriate consultations, observes additional professional assessments (e.g., psychological testing), and plans rehabilitation program. Opportunity to provide parent counseling. (Limit per

rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

[View course details in MyPlan: PEDS 679](#)

PEDS 681 P-Medical Genetics (*, max. 24)

Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

[View course details in MyPlan: PEDS 681](#)

PEDS 683 P-Pediatric Nephrology (8)

Four-week elective clerkship at Seattle Children's Hospital. Students participate in nephrology and transplant rounds, consult with renal fellows and attendings, and work up patients in renal clinics. Participation in seminars; special course in fluid balance. (Limit per rotation: one student). Prerequisite: third- or fourth-year medical student; PEDS and MED core clerkships; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 683](#)

PEDS 684 P-Pediatric Pulmonary Medicine (8)

Respiratory disorders, diagnostic techniques, and treatments unique to children in the inpatient, intensive care, and outpatient settings. Application of principles of pulmonary physiology to clinical problems. Students conduct consultations under the supervision of the attending and present a topic of choice. Inpatient rounds and clinics. (Limit per rotation: one student). Prerequisite: PEDS core clerkship, fourth-year medical student standing. Offered: AWSpS.

[View course details in MyPlan: PEDS 684](#)

PEDS 685 P-Pediatric Hematology and Oncology (*, max. 24)

One-on-one teaching plus four weekly didactic sessions. Specific training in techniques and interpretation of bone marrow aspirations, intravenous chemotherapy, transfusions, and laboratory techniques of hematologic evaluation. Self-learning programs available. (Two or four weeks, full-time. Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

[View course details in MyPlan: PEDS 685](#)

PEDS 686 P-Pediatric Cardiology (*, max. 24)

Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

[View course details in MyPlan: PEDS 686](#)

PEDS 688 Pediatric Rheumatology (8)

Exposes students to a wide range of pediatric rheumatologic diseases and provides them with the opportunity to evaluate new patients, help work up and manage inpatients with complex multisystem disease, and learn key elements of evaluation and treatment of childhood rheumatic diseases. Open to 4th year medical students.

Prerequisite: completion of core pediatrics rotation; interest in rheumatology.

[View course details in MyPlan: PEDS 688](#)

PEDS 689 P-Advanced Rural Pediatrics - Ft. Washakie, WY (8)

Student functions at the sub-intern level to care for patients with acute pediatric illness, provide well child care, and provide follow up care to patients seen in the newborn nursery, Level II Neonatal ICU, hospitalizations, and previous clinic visits. Students interested should make arrangements well in advance of registration.

Prerequisite: required clerkship in Pediatrics, Obstetrics and Gynecology, Internal Medicine, and Surgery.

[View course details in MyPlan: PEDS 689](#)

PEDS 690 P-Advanced Pediatric Clerkship - Boise (*, max. 24)

Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis,

and care at St. Lukes Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; 2245 departmental permission. Offered: AWSpS.
[View course details in MyPlan: PEDS 690](#)

PEDS 691 P-Advanced Pediatric Clerkship - Seattle (*, max. 24)

Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care as Seattle Children's. (Limit per rotation: three students). Prerequisite: PEDS core clerkship. Offered: AWSpS.

[View course details in MyPlan: PEDS 691](#)

PEDS 692 P-Advanced Pediatric Clerkship - Spokane (*, max. 24)

Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at Sacred Heart Children's Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship; departmental permission. Offered: AWSpS.

[View course details in MyPlan: PEDS 692](#)

PEDS 693 P-Advanced Pediatric Subinternship - Mary Bridge (*, max. 24)

Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. (Limit per rotation: one student). Prerequisite: Core Clerkship in PEDS, OB/GYN, I-Med, Surgery; departmental permission.

[View course details in MyPlan: PEDS 693](#)

PEDS 694 P-Pediatric Adolescent Medicine (8)

Elective in Adolescent Medicine at Seattle Children's Hospital. Open to 4th year medical students who have completed their Core pediatrics Rotation. Students will be expected to manage patients with the supervision of attending physicians. Students will have the opportunity to manage adolescent patients in the outpatient setting and learn key elements of subspecialty care of adolescents.

[View course details in MyPlan: PEDS 694](#)

PEDS 697 P-Pediatric Special Electives (*, max. 24)

By specific arrangement, for qualified students, special clerkship externship or research opportunities at institutions other than University of Washington. The faculty can advise of possible opportunities. Obtain special assignment form from the Department of Pediatrics at least one month before preregistration. Prerequisite: permission of department and the away site. Offered: AWSpS.

[View course details in MyPlan: PEDS 697](#)

PEDS 698 Pediatric Advanced Therapeutics/Pediatric Boot Camp (4)

Focuses on what is needed on day one of internship to care for children through hands-on experience, simulation, group problem solving, role-playing, didactics, and supplemental reading material. Emphasizes the acquisition and practice of core skills. Themes include communication, procedural competency, and medical decision making pertinent to both inpatient and outpatient pediatrics. (Two weeks.) Prerequisite: fourth-year standing; departmental approval. Offered: Sp.

[View course details in MyPlan: PEDS 698](#)

PEDS 699 P-WWAMI Pediatrics Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be within the WWAMI region. Prerequisite: permission of department and the away site. Offered: AWSpS.

[View course details in MyPlan: PEDS 699](#)

Pharmacology

[Display as tabs](#)

Department Overview

E401 Health Sciences

Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

(206) 685-9252
phcoladm@uw.edu

The Department of Pharmacology offers the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirement

A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, pharmacy, physics, physiology, psychology, or zoology. Students are selected from the applicant pool based on several criteria, including academic records, recommendations, and previous research experience.

Graduation Requirements

Minimum 90 credits, to include:

1. PHCOL 510, PHCOL 511, PHCOL 512, and PHCOL 513 with a minimum 2.7 grade for each class. Enrollment in PHCOL 507 throughout graduate school; PHCOL 514 in the first, second, and third years of graduate study.
2. PHCOL 519 (laboratory rotations) for autumn, winter, and spring quarters of the first year acquainting the student with various areas of pharmacology and research under investigation within the department. During each quarter, the student carries out a research project in the laboratory of a faculty member. At the end of the quarter, the student gives a presentation on the rotation research project that is evaluated by the faculty, using the criteria of scientific content, delivery, knowledge of the subject, and organization of material. The student receives a grade and academic credit for PHCOL

519. Students entering the PhD program with an MS degree or equivalent may petition to enroll in only one quarter of PHCOL 519 before selecting a laboratory. Rotations may occur outside the department by special permission only.

3. Four advanced 2-3 credit graded elective courses in pharmacology in addition to the PHCOL 510 through PHCOL 513 series. Nine graded credits (non-seminar) in graduate-level courses in physiology, biochemistry, molecular biology, immunology, cell biology, or other relevant areas. The courses should strengthen the foundation of the student's thesis proposal.
4. Creditable passage of the general examination consisting of a comprehensive take-home written examination on general pharmacology, taken during summer quarter of the second year, followed by preparation of a grant proposal on the thesis project, and an oral examination, given by the Supervisory Committee during the first quarter of the third year of study. The student is evaluated on the proposed dissertation research and on his or her knowledge of the major disciplines important to the research. Based on the student's performance, the committee recommends approval and candidacy for the PhD degree, further work and subsequent reexamination, or termination.
5. After successful completion of the general examination, the student devotes most of his or her time to thesis research in the third and subsequent years of study. Students are expected to finish all degree requirements and complete their thesis research within a six-year time period from matriculation.
6. The research project for the Ph.D. dissertation is chosen by the candidate and faculty sponsor and approved by the candidate's Supervisory Committee. Research must represent a worthy and fundamental contribution showing originality in concept and implementation.

When the candidate has concluded the research project and prepared a complete copy of the dissertation, the sponsor obtains approval of the Graduate School and sets a date for the final examination. The final examination is concerned principally with the subject matter of the dissertation, but may include the background and origins of the dissertation problem as well as its practical applications and extrapolations.

Financial Aid

Financial support is offered to students who maintain satisfactory academic progress. Tuition and stipends are provided by National Institutes of Health training grants, University of Washington teaching assistantships, individual research grants, and fellowships from private sources.

SCHOOL OF MEDICINE

PHARMACOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PHCOL 401 General Pharmacology I (2-4, max. 4) Wang

Principles governing drug-receptor interactions, dose-response relationships, desensitization, and tolerance. Drug toxicity, allergy, mutagenesis, and carcinogenesis. Pharmacogenomics and DNA/RNA therapies. General pharmacology of drugs acting on the endocrine and vascular systems. For pharmacy students and other undergraduates. Offered: A.

[View course details in MyPlan: PHCOL 401](#)

PHCOL 402 General Pharmacology II (3/4)

General pharmacology of drugs acting on the autonomic, cardiovascular, and central nervous systems. For Pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Instructors: Storm Offered: W.

[View course details in MyPlan: PHCOL 402](#)

PHCOL 434 General Pharmacology (2) Grubbs

Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.

[View course details in MyPlan: PHCOL 434](#)

PHCOL 435 General Pharmacology (2) Grubbs

Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: W.

[View course details in MyPlan: PHCOL 435](#)

PHCOL 498 Undergraduate Thesis (*, max. 35)

Offered: A.

[View course details in MyPlan: PHCOL 498](#)

PHCOL 499 Undergraduate Research (*, max. 35)

Participation in departmental research projects. Offered: AWSpS.

[View course details in MyPlan: PHCOL 499](#)

PHCOL 507 Pharmacology Seminar (1, max. 30)

Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance.

Research progress reports, and reports on results of completed research. Prerequisite: permission of instructor.²²⁴⁹
Offered: AWSp.

[View course details in MyPlan: PHCOL 507](#)

PHCOL 510 Drug Discovery and Emerging Therapeutics (2)

Consideration of the general principles and current approaches involved in modern drug discovery and development, with an emphasis on basic concepts in drug action, delivery, and metabolism. Discussion of novel drug discovery techniques and emerging non-standard therapeutics. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Instructors: Zheng Offered: W.

[View course details in MyPlan: PHCOL 510](#)

PHCOL 511 Autonomic/Cardiovascular Pharmacology (2.5)

Consideration of the pharmacology of the cardiovascular and autonomic nervous systems. Emphasizes the mechanisms of neurotransmitter, hormone, drug action at autonomic synapses, and the molecular basis for physiology and pathophysiology of the cardiovascular system. Lectures, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Instructors: Nathanson Offered: W.

[View course details in MyPlan: PHCOL 511](#)

PHCOL 512 Neuropharmacology (2) *Bajjalieh*

Consideration of the neurobiological basis of drug action on the central nervous system, including mechanism of action and therapeutic use in psychiatric disorders; neurodegeneration/neuroinflammation; control of neuronal excitability and pain; and drug abuse and addiction. Lecture, group discussion, and analysis of recent research. Offered: Sp.

[View course details in MyPlan: PHCOL 512](#)

PHCOL 513 Endocrine Pharmacology and Chemotherapeutics (2)

Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glycoprotein hormones/growth factors, peptide and steroid hormones. Basic principles of chemotherapy of endocrine and other cancers, as well as viral and microbial diseases. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Instructors: McKnight Offered: Sp.

[View course details in MyPlan: PHCOL 513](#)

PHCOL 514 Current Topics in Pharmacology (1, max. 30)

Current research related to the mechanisms of drug action presented in a seminar format. Presentations include relevant background material as well as detailed experimental results taken from current research articles.

Prerequisite: permission of instructor. Instructors: Gardner Offered: AWSp.

[View course details in MyPlan: PHCOL 514](#)

PHCOL 515 General Pharmacology Laboratory (*, max. 9)

Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.

[View course details in MyPlan: PHCOL 515](#)

PHCOL 519 Introduction to Laboratory Research in Pharmacology (4) *Storm*

On a rotation basis students carry out individual research projects in the laboratories of different faculty members. At the end of each quarter students make formal presentations of their work. For first-year graduate students in pharmacology. Offered: AWSpS.

[View course details in MyPlan: PHCOL 519](#)

PHCOL 527 Drug Metabolism (4) *A. RETTIE, K. THUMMEL*

Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Includes reaction mechanisms, ultrastructural considerations, induction mechanisms, methodology, kinetics of

inhibition and activation, steroid and amine metabolism. Offered: jointly with MEDCH 527; W, odd years²²⁵⁰.

[View course details in MyPlan: PHCOL 527](#)

PHCOL 529 Ion Channel Pharmacology (2)

Current topics in ion channel structure, function, genetics, and pharmacology, including consideration of role in electrical signaling in cell membranes and information transfer and processing in nervous system, inherited diseases of ion channels, and sites and mechanisms of action of drugs and toxins. Prerequisite: CONJ 532 and CONJ 536 or permission of instructor. Instructors: Catterall, Tempel Offered: A, odd years.

[View course details in MyPlan: PHCOL 529](#)

PHCOL 530 Neuronal Signaling Pathways (2)

Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Emphasizes roles played by signal transduction pathways in regulation of synaptic plasticity, memory formation, neuronal apoptosis, and developmental neurobiology. Prerequisite: UCONJ 532 or permission of instructor. Instructors: Beavo, Hague, Storm, Xia Offered: W, even years.

[View course details in MyPlan: PHCOL 530](#)

PHCOL 531 Genetic Analysis of Signaling Systems (3)

Current topics involving signal transduction are discussed with an emphasis on genetic analysis of multicellular systems and creative experimental design. Prerequisite: 9 credits of graduate-level courses in molecular and cellular biology, biochemistry, or genetics, or permission of instructor. Instructors: McKnight, Moon Offered: Sp, odd years.

[View course details in MyPlan: PHCOL 531](#)

PHCOL 534 Molecular Basis of Addictive Drug Action (2)

Advanced consideration and discussion of current literature addressing the basis of opiate, psychostimulant, and cannabinoid effects on signal transduction events, electrical activity of neurons, and drip-motivated behaviors in animal models of human drug abuse. Prerequisite: PHCOL 512 or permission of instructor. Instructors: Chavkin, Phillips, Stella Offered: A, even years.

[View course details in MyPlan: PHCOL 534](#)

PHCOL 535 Transcriptional Control in Human Disease (3)

Advanced consideration and discussion of the mechanisms regulating transcription/gene expression and of aberrant transcription factors which disrupt this process found in cancer and other human diseases. Prerequisite: PHCOL 512 or permission of instructor. Instructors: Bomsztyk, Wang Offered: Sp, even years.

[View course details in MyPlan: PHCOL 535](#)

PHCOL 550 An Overview of Faculty Research (1)

Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Prerequisite: first-year student standing in pharmacology. Instructors: Wang Credit/no-credit only. Offered: A.

[View course details in MyPlan: PHCOL 550](#)

PHCOL 560 Regulation of Cell Function by Cyclic Nucleotide Phosphodiesterases (1)

Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on practical problem solving, data analysis, and presentation of methods important to understanding published data and designing new experiments in this area of research. Prerequisite: permission of instructor. Instructors: Beavo Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 560](#)

PHCOL 561 Molecular Properties of Ion Channels (1)

Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of sodium and calcium channels and the mechanism of action of drugs on them. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Catterall Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 561](#)

PHCOL 562 Molecular Basis for Motivated Behavior (1)

Discussion of research strategies and methodologies involved in the regulation of motivated behavior by understanding signal transduction and synaptic physiology. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Instructors: Chavkin Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 562](#)

PHCOL 563 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1)

Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Instructors: Storm Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 563](#)

PHCOL 564 Cellular Regulation by Protein Kinases (1)

Analysis of research problems, techniques, and emerging concepts in the study of the function of protein kinases. Emphasis on critical evaluation of research and development of presentation skills. Prerequisite: permission of instructor. Instructors: McKnight Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 564](#)

PHCOL 565 Intercellular Signaling in Development (1)

Molecular genetic approaches to dissecting the roles and mechanisms of intracellular signaling during development. Emphasis on vertebrate genes related to Drosophila segment polarity genes. Prerequisite: permission of instructor. Instructors: Moon Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 565](#)

PHCOL 566 Molecular Pharmacology of Neurotransmitter and Neurokinin Receptors (1)

Discussion of research strategies and methodologies in the areas of molecular neurobiology and signal transduction of muscarinic receptors, G-proteins, and neurokinin receptors. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Prerequisite: permission of instructor. Instructors: Nathanson Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 566](#)

PHCOL 567 Mechanisms of Carcinogenesis (2)

Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis.

Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with ENV H 567; A, even years.

[View course details in MyPlan: PHCOL 567](#)

PHCOL 569 Molecular Genetics of Potassium Channel Function (1)

Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of potassium channel genes and their role in behavior as studied in mutant mice. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Tempel Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 569](#)

PHCOL 571 Molecular Mechanisms of Neurosecretion (1)

Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Bajjalieh Credit/no-credit only.

[View course details in MyPlan: PHCOL 571](#)

PHCOL 572 Transcriptional Regulation of Growth Control Genes (1)

Discussion of research strategies, methodologies, and literature relating to proliferative growth control, cellular differentiation, and gene expression. Emphasis on practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Wang Credit/no-credit only.

[View course details in MyPlan: PHCOL 572](#)

PHCOL 573 Signaling Systems Linked to Neuroinflammation (1)

Discussion of research strategies, methodologies, and literature related to neuroinflammation, microglial cell activation, and the cannabinoid signaling pathway. Emphasis on solving practical problem, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Stella Offered: AWSpS.

[View course details in MyPlan: PHCOL 573](#)

PHCOL 575 Structural Biology of Ubiquitination (1)

Discussion of research strategies, methodologies and literature concerning the structure, function, and regulation of ubiquitin-protein ligases and the mechanism underlying ubiquitination and ubiquitin-dependent proteolysis. Emphasis on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Zheng Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 575](#)

PHCOL 576 Pharmacological, Molecular, and Functional Characterization of G-protein Coupled Receptors (1)

Discusses research strategies, methodologies, and literature relating to the pharmacological characterization, molecular biology, and functional coupling of GPCRs. Emphasizes practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Hague Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 576](#)

PHCOL 577 Regulatory Roles of Ubiquitin in the Nucleus (1)

Focuses on the design and implementation of research aimed at understanding the nuclear functions of the small protein modifier ubiquitin. Strongly emphasizes the understanding of current literature, experimental design and troubleshooting, data analysis, and presentation of experimental results. Prerequisite: permission of instructor. Instructors: Gardner Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 577](#)

PHCOL 578 A-Kinase Anchoring Proteins in Cell Signaling Research (1) *Scott*

Focuses on the design and implantation of research A-Kinase anchoring proteins in cell signaling. Emphasizes understanding experimental design and troubleshooting, data analysis, and presentation of experimental results. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 578](#)

PHCOL 579 Genetic Regulation of Emotional Behavior (1) *Zweifel*

Provides background in the materials and methods used in the study of the genetic basis of learning and memory and neural circuit function achieved through discussion of current literature, data acquisition and analysis, and experimental design. Offered: AWSpS.

[View course details in MyPlan: PHCOL 579](#)

PHCOL 580 Proteomics for Cellular Systems (1) *Ong*

Discusses and reviews literature for proteomics and other genome-wide approaches to study cellular systems. Trains students to integrate knowledge from existing literature with ongoing laboratory research to enhance data analysis and experimental design. Offered: AWSpS.

[View course details in MyPlan: PHCOL 580](#)

PHCOL 600 Independent Study or Research (*-)

Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 600](#)

PHCOL 700 Master's Thesis (*-)

Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHCOL 700](#)

PHCOL 800 Doctoral Dissertation (*-)

Pharmacology graduate students only. Credit/no-credit only. Offered: AWSpS.

Physiology and Biophysics

[Display as tabs](#)

Department Overview

G424 Health Sciences

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences anatomy, molecular biology, immunology, biochemistry, pharmacology, pathology, and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

Graduate Program

Graduate Program Coordinator
G424 Health Sciences, Box 357290
(206) 685-0519
pbio@uw.edu

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the M.S. degree are rarely accepted. Students pursuing a PhD degree in physiology and biophysics may emphasize molecular and cellular physiology, biophysics, neurobiology, respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years to complete. The first year is spent acquiring a broad knowledge of physiology via a sequence of courses and laboratory rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter years are spent pursuing the area in depth and completing an original research project.

Individuals with graduate degrees in physiology and biophysics often pursue careers in teaching and research in colleges and universities and in biotech industries. The department participates in interdisciplinary PhD degree programs in neurobiology and behavior and in molecular and cellular biology. The department also participates in the medical scientist training program, and the biological physics structure and design program.

Master of Science

The Master of Science degree is normally granted as part of the path of study leading to the Doctor of Philosophy degree. Students are normally admitted only to the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirements

To apply for admission, a student must provide academic transcripts, Graduate Record Examination (GRE) scores, four letters of recommendation, and a statement of purpose. Because of the broad scope and interdisciplinary nature of the graduate program, there are no specific prerequisites for admission. However, most students have backgrounds in the physical and/or biological sciences. These include majors in biology, physics, mathematics, engineering, computer science, chemistry, and psychology. The most important requirement is a strong motivation and excitement about doing science.

Degree Requirements

90 credits minimum, as follows:

Due to the broad nature of research interests in the department and the diversity of graduate-student backgrounds, formal course requirements are kept to a minimum and are completed in the first year. Students are encouraged to shape their own graduate education, as they choose the majority of their coursework and the scientific direction for their research. Courses available include those offered by other departments, both in the Medical School and elsewhere on campus. Electives may be chosen from a list of mini-courses whose topics reflect the current interests of faculty and students. Students are required to take at least six mini courses.

Required Courses:

1. CONJ 531, CONJ 532, P BIO 532, NEUBEH 501, NEUBEH 502, P BIO 508, must be taken three times); P BIO 513, P BIO 519
2. Six departmental mini-courses, to be completed prior to the general examination, from the following: P BIO 509, P BIO 545, P BIO 550, P BIO 551, P BIO 552, P BIO 553, P BIO 554, P BIO 555, P BIO 556, P BIO 557, P BIO 559.
3. P BIO 600 (before general examination)
4. P BIO 800 (after general examination)
5. Note: P BIO 503 is highly recommended, but not required

General Examination

The general examination must be taken by the last day of autumn quarter of the third year. After passing the general examination the student is advanced to candidacy for the doctoral degree. The student then registers for P BIO 800 and continues working on thesis research.

Final Examination

The culmination of the program is the submission of a written doctoral thesis and the presentation of this work in a public lecture attended by members of the department and the University.

Research Facilities

The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, respiratory physiology, muscle biophysics, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.

Offered: AWSpS.

[View course details in MyPlan: P BIO 499](#)

P BIO 504 Biophysics of Nerve, Muscle, and Synapse (3) *Sullivan*

Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function.

Offered: jointly with NEURO 504.

[View course details in MyPlan: P BIO 504](#)

P BIO 505 Human Physiology (4-) *Binder*

Provides an introduction to the study of human physiology. Covers the physiology of excitable cells, muscle physiology, renal physiology, gastrointestinal physiology, and the physiology of the central nervous system.

Offered: A.

[View course details in MyPlan: P BIO 505](#)

P BIO 506 Human Physiology (-4)

Provides an introduction to the study of human physiology. Covers cardiovascular physiology, respiratory physiology, acid base balance, neuroendocrinology, and reproductive physiology. Prerequisite: P BIO 505, or equivalent with permission of instructor. Instructors: Wordeman Offered: W.

[View course details in MyPlan: P BIO 506](#)

P BIO 508 Introduction to Laboratory Research in Physiology (1-5, max. 15)

Students participate in the performance of ongoing projects in designated research laboratories. Emphasis is on experimental design, methodology, and techniques. For first- and second-year graduate students in physiology and biophysics to provide a basis for future independent research. Offered: AWSpS.

[View course details in MyPlan: P BIO 508](#)

P BIO 509 Neuroendocrinology (3)

Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: BIOL 220; BIOC 442 or permission of instructor. Instructors: Steiner Offered: jointly with NEURO 541; W, even years.

[View course details in MyPlan: P BIO 509](#)

P BIO 513 Practicum in Teaching Physiology and Biophysics (4)

Students undertake instructional material development, presentation of materials, and develop problem-solving techniques. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: P BIO 513](#)

P BIO 519 Membrane and Muscle Biophysics Seminar (1)

Lectures on current research topics in cell membrane function and muscle contraction. Prerequisite: permission of instructor. Instructors: Hille Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: P BIO 519](#)

P BIO 520 Physiology Seminar (*)

Selected topics in physiology. Prerequisite: permission of instructor.

[View course details in MyPlan: P BIO 520](#)

P BIO 521 Biophysics Seminar (*)

Selected topics in biophysics. Prerequisite: permission of instructor.

[View course details in MyPlan: P BIO 521](#)

P BIO 522 Selected Topics in Respiratory Physiology (1-3, max. 3)

Advanced seminar on selected topics, including pulmonary mechanics, gas exchange, lung fluid balance, regulation of breathing, pulmonary circulation, respiration in the neonate, liquid breathing, airway dynamics, lung structure and development, cardiopulmonary interactions, exercise physiology. Prerequisite: permission of instructor. Instructors: Hildebrandt Offered: AWSpS.

[View course details in MyPlan: P BIO 522](#)

P BIO 523 Heat Transfer and Temperature Regulation (2-5, max. 5)

Thermal exchange between the body surface and the environment. Heat production and distribution within the body. Properties of cutaneous and deep temperature receptors. Neural integration and homeothermy.

Prerequisite: permission of instructor. Instructors: Brengelmann Credit/no-credit only.

[View course details in MyPlan: P BIO 523](#)

P BIO 525 Readings in Advanced Physiology and Biophysics (*)

Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A.

[View course details in MyPlan: P BIO 525](#)

P BIO 526 Readings in Advanced Physiology and Biophysics (*)

Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: W.

[View course details in MyPlan: P BIO 526](#)

P BIO 527 Readings in Advanced Physiology and Biophysics (*)

Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: SpS.

[View course details in MyPlan: P BIO 527](#)

P BIO 540 Molecular Mechanisms of Cardiac Remodeling and Heart Failure (1)

The mini-course discusses recent progress on novel molecular mechanisms underlying cardiac hypertrophy, myocardial remodeling, and heart failure development. Novel methodologies in basic and translational cardiovascular research will also be discussed.

[View course details in MyPlan: P BIO 540](#)

P BIO 545 Quantitative Methods in Neuroscience (3)

Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection, and information theory. Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Instructors: Rieke Offered: jointly with NEURO 545.

[View course details in MyPlan: P BIO 545](#)

P BIO 548 Molecular Mechanisms of Synaptic Plasticity (2) *Barria*

Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with NEURO 548; Sp, even years.

[View course details in MyPlan: P BIO 548](#)

P BIO 550 Biophysics of Calcium Signaling (1)

Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531. Instructors: Hille, Santana Offered: jointly with NEURO 550; Sp, odd years.

[View course details in MyPlan: P BIO 550](#)

P BIO 554 Motor Learning: Cellular and Network Mechanisms (1) *Fetz, Perlmutter*

Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with NEURO 554.

[View course details in MyPlan: P BIO 554](#)

P BIO 555 Sensory Receptors (1) *Detwiler, Rieke*

Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with NEURO 555.

[View course details in MyPlan: P BIO 555](#)

P BIO 556 Axon Pathfinding Mechanisms (1) *Bothwell*

Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with NEURO 556.

[View course details in MyPlan: P BIO 556](#)

P BIO 557 Ion Channel Gating (1) *Zagotta*

Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with NEURO 557.

[View course details in MyPlan: P BIO 557](#)

P BIO 558 Concepts and Mechanisms in Mitosis (2) *Asbury, Wordeman*

Examines how the mitotic spindle organizes and separates duplicated chromosomes during cell division. Overview of spindle components and key mechanistic concepts. Discusses recent or classic papers from the primary literature.

[View course details in MyPlan: P BIO 558](#)

P BIO 559 Neurobiology of Disease (3)

Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/NEURO 559.

[View course details in MyPlan: P BIO 559](#)

P BIO 561 From Biophysics to Neural Computation (2)

Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Offered: jointly with NEURO 561; Sp.

[View course details in MyPlan: P BIO 561](#)

P BIO 600 Independent Study or Research (*-)

Offered: AWSp.

[View course details in MyPlan: P BIO 600](#)

P BIO 700 Master's Thesis (*-)

Offered: AWSpS.

Psychiatry and Behavioral Sciences

[Display as tabs](#)

Department Overview

BB1644 Health Sciences

pbsci@uw.edu

The department offers coursework, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

[Course Descriptions](#)

Graduate Program

The Medical School curriculum is divided into a core (basic) curriculum and an elective curriculum. Within its core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning theory, cognition, memory, perception, neuropharmacology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsychiatry and behavioral medicine, as well as training in interviewing skills and assessment techniques. Its elective program includes a variety of clinical experiences and advanced didactics and seminars designed to further the knowledge and skills developed within the basic curriculum. In addition, the department encourages research and other scholarly pursuits by students in areas of interest to them. Stipends are available for research studies.

Residency Training in Psychiatry

A four-year residency for medical school graduates and a three-year post-internship residency prepares physicians for Specialty Board Certification in Psychiatry. Clinical rotations on inpatient, outpatient, emergency, and consultation/liaison services are augmented by individual supervision and didactic lectures. With the program's integrative orientation, residents become proficient in psychotherapy, psychopharmacology, and community liaison with patients of all ages. Fellowships in child, geriatric, addiction, community, forensic and consultation-liaison psychiatry, and psychiatric neuroscience are available.

Clinical Psychology Internship Program

The one-year internship in clinical psychology, accredited by the American Psychological Association, offers advanced clinical training to candidates for the doctorate in clinical psychology from graduate programs accredited by the American Psychological Association. Training tracks with the internship in general adult, general child, rehabilitation and health psychology, and public behavioral health and justice policy (adult and child). Advanced research skills training is also available as part of an INH-funded training grant for selected internship participants.

Postdoctoral Fellowship Training

Postdoctoral fellowships for advanced clinical and research training in behavioral medicine, broadly construed, are also offered.

SCHOOL OF MEDICINE

PSYCHIATRY & BEHAVIORAL SCIENCES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PBSCI 498 Undergraduate Thesis (*, max. 15)

Opportunity to complete work on psychiatric research projects or to pursue a specific psychiatric topic in depth, for instance, through library research. Offered: AWSpS.

[View course details in MyPlan: PBSCI 498](#)

PBSCI 499 Undergraduate Research (*, max. 15)

Opportunities are available for participation in a wide variety of ongoing research in the behavioral sciences and clinical psychiatry, or for the development of an individual investigative project under the supervision of a faculty sponsor. Offered: AWSpS.

[View course details in MyPlan: PBSCI 499](#)

PBSCI 505 P-Psychiatry Preceptorship (1, max. 12)

Opportunity for first- and second-year medical students to gain direct experience with clinical faculty members in psychiatry. Includes opportunities to observe different areas of psychiatry including addiction, child, geriatrics, community, crisis, and consultation. Prerequisite: permission of department. Instructors: Combs
Offered: AWSp.

[View course details in MyPlan: PBSCI 505](#)

PBSCI 525 P-Psychiatry and the Law (3) *E. GOLDENBERG, J. PIEL*

Explores issues at the interface of law and psychiatry through didactic curriculum and research. Trainees develop an individualized research project with the assistance of their faculty mentors. Covers topics in civil and criminal forensic psychiatry, research ethics, research design, grantsmanship, and mental health law. Offered: Sp.

[View course details in MyPlan: PBSCI 525](#)

PBSCI 546 Psychiatric Epidemiology (3) *A. VANDER STOEP*

Using epidemiological methods to study mental illness. Topics include contributions of mental illness to global disease burden; major population-based studies of mental illness; measurement of psychopathology; culture and mental illness; role of neurodevelopment, genetics, social and physical environment in etiology of mental disorders; mental health services research. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Credit/no-credit only. Offered: jointly with EPI 546.

[View course details in MyPlan: PBSCI 546](#)

PBSCI 580 Applied Research in Behavioral Health and Justice Policy (2)

Direct experience working with community agencies to build research capacity. Emphasized child welfare, children's mental/behavioral health, and juvenile justice. Seminars cover translational research, community-based research, and communicating research to program and policy audiences. For graduate students, psychiatric residents, and graduate psychology, psychosocial nursing, social work, and public health students. Offered: AW.

[View course details in MyPlan: PBSCI 580](#)

PBSCI 598 P-Psychiatry Independent Study and Remediation (*, max. 8)

Designed for medical students required to complete additional study related to the required Psychiatry Clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

[View course details in MyPlan: PBSCI 598](#)

PBSCI 600 Research in Psychiatry ([1-15]-)

Independent laboratory research under the guidance and supervision of research scientists in the Psychiatry Department. Faculty permission required.

[View course details in MyPlan: PBSCI 600](#)

PBSCI 630 P-WRITE Psychiatry Clinical Clerkship (*, max. 24)

Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

[View course details in MyPlan: PBSCI 630](#)

PBSCI 631 P-Basic Psychiatry Clerkship - Juneau, AK (12)

Basic psychiatry clerkship in Juneau, Alaska. Fulfills graduation requirements for clerkship in psychiatry.

[View course details in MyPlan: PBSCI 631](#)

PBSCI 632 P-LIC Psychiatry Clinical Clerkship (1-12, max. 12)

Basic clinical clerkship for students enrolled in the LIC program. Prerequisite: acceptance into LIC program.

[View course details in MyPlan: PBSCI 632](#)

PBSCI 637 P-Basic Psychiatry Clerkship - Fairfax - Kirkland, WA (12)

Basic psychiatry clerkship in Kirkland, Washington. Fulfills graduation requirements for clerkship in psychiatry.

[View course details in MyPlan: PBSCI 637](#)

PBSCI 639 P-Basic Psychiatry Clerkship - Olympia (12)

Basic psychiatry clerkship at Olympia, WA. Fulfills graduation requirement for clerkship in psychiatry.

[View course details in MyPlan: PBSCI 639](#)

PBSCI 640 P-Basic Psychiatry Clerkship - Pocatello (12)

Basic psychiatry clerkship at in Pocatello, ID. Fulfills graduation requirement for clerkship in psychiatry.

[View course details in MyPlan: PBSCI 640](#)

PBSCI 641 P-Basic Psychiatry Clerkship - Orofino, ID (12)

Basic psychiatry clerkship in Orofino, ID. Fulfills graduation requirement for clerkship in psychiatry. Offered: AWSpS.

[View course details in MyPlan: PBSCI 641](#)

PBSCI 649 P-Basic Psychiatry Clerkship-Eastern State Hospital-Spokane (12)

Basic psychiatry clerkship at Eastern State Hospital in Spokane, WA. Fulfills graduation requirement for clerkship in psychiatry. Offered: AWSpS.

[View course details in MyPlan: PBSCI 649](#)

PBSCI 655 P-Basic Psychiatry Clerkship - Cheyenne (12)

Basic psychiatry clerkship in Cheyenne, WY. Fulfills graduation requirement for clerkship in psychiatry.

[View course details in MyPlan: PBSCI 655](#)

PBSCI 660 P-Basis Psychiatry Clerkship-Bozeman (12)

Basic psychiatry clerkship in Bozeman, MT. Fulfills graduation requirement for clerkship in psychiatry. Offered: AWWSpS.

[View course details in MyPlan: PBSCI 660](#)

PBSCI 661 P-Basic Psychiatry Clerkship - Helena (12)

Basic psychiatry clerkship in Helena, MT. Fulfills graduation requirement for clerkship in psychiatry.

[View course details in MyPlan: PBSCI 661](#)

PBSCI 662 P- Basic Psychiatry Clerkship - Missoula (12)

Students work at St. Patrick Hospital with adult and adolescent inpatients and in the emergency room for emergent-care exposure. Students have outpatient experience through the adult intensive outpatient program, Pain Treatment Center, and in faculty outpatient practices. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. Prerequisite: completion of the HUBIO series; third and fourth year students.

[View course details in MyPlan: PBSCI 662](#)

PBSCI 663 P- Basic Psychiatry Clerkship - Billings (12)

Students work at South Center Regional Mental Health Center and Behavioral Sciences Clinic with adult and adolescent inpatients, in the emergency room for emergent care exposure. Outpatient experience including consultations at the community mental health center, Indian reservation, and prison. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. A vehicle is needed by students at this site. Prerequisite: completion of the HUBIO series; third and fourth year students.

[View course details in MyPlan: PBSCI 663](#)

PBSCI 665 P-Basic Clinical Clerkship (*, max. 24)

Inpatient clerkship in psychiatry. Students have primary responsibility under direction of attending psychiatrists and residents for diagnosis and care of patients at UW Medical Center, Harborview Medical Center, or Veterans Administration Hospital. Emergency room, crisis intervention, consultation to patients with psychiatric dysfunction. Familiarity with psychopharmacology and short-term hospitalization emphasized. (Six weeks, full-time.)

[View course details in MyPlan: PBSCI 665](#)

PBSCI 666 P-WWAMI Psychiatry and Behavioral Sciences Clerkship (12)

Rotation aims to increase student's skills in basic psychiatry, social psychiatry, transcultural psychiatry, and community psychiatry. Orientation is around the diagnosis, treatment, and clinical management of white, Aleut, Indian, and Eskimo children and adults in outpatient, inpatient, and community settings. Third-, fourth-year medical students. (Limit: Two or three students). Prerequisite: HUBIO 563.

[View course details in MyPlan: PBSCI 666](#)

PBSCI 667 P-Basic Psychiatry Clerkship - Boise (12)

Basic psychiatry clerkship at Veterans' Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in psychiatry.

[View course details in MyPlan: PBSCI 667](#)

PBSCI 668 P-Psychiatry Clerkship - Spokane (12)

Students work on adult, geriatric, and adolescent inpatient psychiatric units of Sacred Heart Medical Center, following patients after transfer to partial hospitalization or outpatient clinic. Didactics include basic psychiatric diagnosis, treatment, and pharmacotherapy. (Limit: two or three students). Prerequisite: completion of HUBIO series; third and fourth-year medical students.

[View course details in MyPlan: PBSCI 668](#)

PBSCI 669 P-Basic Psychiatry Clerkship - Casper, Wyoming (12)

Students work in the Wyoming Behavioral Institute with adult, adolescent, and child inpatients. Students have some outpatient experience and emergent care assessment experience at the Wyoming Medical Center. Didactics and discussion include topics such as psychopharmacology, emergent care and assessment, diagnosis, and substance abuse issues.

[View course details in MyPlan: PBSCI 669](#)

PBSCI 670 P-Clerkship in Consultation/Liaison Psychiatry - UWMC (*, max. 24)

Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. (Limit: one student; two or four weeks.) Prerequisite: satisfactory completion of required psychiatry clerkship.

[View course details in MyPlan: PBSCI 670](#)

PBSCI 671 P-Clerkship in Consultation/Liaison Psychiatry - HMC (*, max. 24)

Students receive organized instruction and supervised clinical experience in the evaluation of psychiatric and/or behavioral problems in patients on medical and surgical services, and in effectively consulting with their health care providers regarding their clinical management. Includes evaluation of (non-financial) decisional competency. (Limit: two students). Prerequisite: satisfactory completion of required psychiatry clerkship.

[View course details in MyPlan: PBSCI 671](#)

PBSCI 672 P-Elective Clerkship in Primary Care Psychiatry - Boise, VAMC (8/12)

Assessment and treatment of patients with acute psychiatric problems in a primary care/rural setting. Consultation work on general medicine and surgery; assessment and dealing with outpatient psychiatric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisite: satisfactory completion of required psychiatry clerkship (Four weeks; visiting students interested in the Boise Psych Residency Track allowed.)

[View course details in MyPlan: PBSCI 672](#)

PBSCI 673 P-Outpatient Psychiatry Elective (*, max. 24)

Offered at Harborview Outpatient Center. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending at Psychopharmacology Clinic. (Four to six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.

[View course details in MyPlan: PBSCI 673](#)

PBSCI 674 P-Elective in Therapeutic Communication (4) *J. CARR, H. COMBS*

Students participate in diverse, interdisciplinary clinical encounters while being supervised by advanced psychotherapists. Includes multidisciplinary chemical dependency evaluations, cognitive assessments, cognitive-behavioral training, and hypnosis. Students complete a holistic patient assessment and are introduced to the complexities of therapeutic communication and improvement methods.

[View course details in MyPlan: PBSCI 674](#)

PBSCI 676 P-Inpatient Clerkship in Psychiatry - American Lake VA (8/12)

For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the evaluation, management, and treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship. Instructors: Johnston

[View course details in MyPlan: PBSCI 676](#)

PBSCI 677 P-Alcohol and Drug Treatment Clerkship - American Lake VA (8/12)

Student assists in every phase of the substance-abuse treatment, including admission interviews, patient evaluation, problem identification, group and individual psychotherapy, assertiveness training, anger control, human sexuality, medical evaluation and treatment, couples therapy, discharge and aftercare planning. Experience primarily clinical. Prerequisite: satisfactory completion of required psychiatry clerkship. (Four or six

weeks, full-time). Instructors: Lim
[View course details in MyPlan: PBSCI 677](#)

PBSCI 678 P-Clerkship in Psychiatric Long-Term Care and Rehabilitation (*, max. 12)

Two- to six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington's, organic brain syndrome) is such that physical rehabilitation is not an emphasis. Prerequisite: HUBIO 563; satisfactory completion of required psychiatry clerkship. Instructors: Johnston

[View course details in MyPlan: PBSCI 678](#)

PBSCI 680 P-Clerkship in Emergency Psychiatry (*, max. 24)

Emphasis on clinical evaluation, acute management, and treatment planning for individual patients. Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship. Instructors: Pasic

[View course details in MyPlan: PBSCI 680](#)

PBSCI 682 P-Addiction Medicine - Rock Spring WY (4)

Students identify, assess, diagnose, and treat addiction disorders in inpatient and outpatient settings through hospital rounds, inpatient hospital consults, and observation of intensive outpatient groups. 2 weeks.

[View course details in MyPlan: PBSCI 682](#)

PBSCI 685 P-Geriatric Psychiatry Clerkship (*, max. 12)

Two- to six-week elective (four weeks highly recommended). Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a variety of settings. Emphasis on improving clinical skills regarding diagnosis and treatment of common behavioral problems in the elderly. Prerequisite: satisfactory completion of required psychiatry clerkship, vehicle required for this rotation.

[View course details in MyPlan: PBSCI 685](#)

PBSCI 688 P-Subinternship in General Psychiatry (*, max. 16)

Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship; permission of instructor.

[View course details in MyPlan: PBSCI 688](#)

PBSCI 695 P-Advanced Clerkship in Child Psychiatry - CSTC (*, max. 24)

Provides an opportunity to participate in evaluation and treatment of children and adolescents in Lakewood, WA. Prerequisite: satisfactory completion of required psychiatry clerkship; fourth year medical student status. 2/4/6 weeks.

[View course details in MyPlan: PBSCI 695](#)

PBSCI 696 P-Advanced Clerkship in Child Psychiatry (*, max. 24)

Provides students an opportunity to participate in evaluation and treatment. Experiences in specialized clinics are also available. (Four or six weeks, full-time. Limit: one student). Prerequisite: satisfactory completion of required psychiatry clerkship.

[View course details in MyPlan: PBSCI 696](#)

PBSCI 697 P-Psychiatry Special Electives (*, max. 24)

By special arrangement, clerkships, externships, and research opportunities can be taken at other institutions. Students obtain permission from Dr. Combs before contacting the dean's office one month before advance registration. Students contact affiliating institutions. Does not fulfill the requirement for a basic clerkship in

psychiatry.

[View course details in MyPlan: PBSCI 697](#)

PBSCI 699 P-WWAMI Psychiatry and Behavioral Sciences Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

University of Washington Course Descriptions

gencat@u.washington.edu

Modified: May 30, 2017

Radiation Oncology

[*Display as tabs*](#)

Department Overview

NN106 University of Washington Medical Center

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the Department of Radiation Oncology are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work, particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

Radiology

[Display as tabs](#)

Department Overview

RR215 University of Washington Medical Center

Diagnostic radiology is that branch of clinical medicine that specializes in the interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology's major subspecialties, radionuclides are employed for both diagnostic and therapeutic purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The Department of Radiology consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both divisions are ably supported by technologists and faculty members in the field of radiation physics. Instruction in radiology is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each of the hospitals affiliated with the University.

SCHOOL OF MEDICINE

RADIOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

RADGY 498 Undergraduate Thesis (*, max. 30)

Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. Offered: AWSpS.

[View course details in MyPlan: RADGY 498](#)

RADGY 499 Undergraduate Research (*, max. 35)

Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic and/or nuclear medicine. Offered: AWSpS.

[View course details in MyPlan: RADGY 499](#)

RADGY 505 P-Preceptorship in Radiology (1-, max. 24)

Opportunity for medical students to gain experience with faculty in clinical and academic environments. Students observe general aspects of diagnostic radiology, interventional radiology, or nuclear medicine, including clinical problems, the different relationships in clinic between physician and patient, and research aspects of the department. Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: RADGY 505](#)

RADGY 508 Physical Aspects of Medical Imaging (4)

Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound, and Doppler ultrasound.

[View course details in MyPlan: RADGY 508](#)

RADGY 580 P-Nuclear Medicine Technique, Physics, and Instrumentation (2.5)

Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. Discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor. Offered: S.

[View course details in MyPlan: RADGY 580](#)

RADGY 600 Independent Study or Research (*-)

Prerequisite: permission faculty sponsor. Offered: AWSpS.

[View course details in MyPlan: RADGY 600](#)

RADGY 686 P-Introduction to Diagnostic Radiology - Idaho Falls (4)

Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies.

[View course details in MyPlan: RADGY 686](#)

RADGY 687 P-Introduction to Diagnostic Radiology - Casper (4)

Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

[View course details in MyPlan: RADGY 687](#)

RADGY 688 P-Introduction to Diagnostic Radiology - Boise (4)

[View course details in MyPlan: RADGY 688](#)

RADGY 689 P-Introduction to Diagnostic Radiology - Billings (4)

Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

[View course details in MyPlan: RADGY 689](#)

RADGY 690 P-Introduction to Diagnostic Radiology - Nampa (4)

Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

[View course details in MyPlan: RADGY 690](#)

RADGY 691 P-Introduction to Diagnostic Radiology - Alaska (4)

Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

[View course details in MyPlan: RADGY 691](#)

RADGY 692 P-Introduction to Diagnostic Radiology - Spokane (4)

Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

[View course details in MyPlan: RADGY 692](#)

RADGY 694 P-Advanced Radiology Clerkship (8) *G. REDDY*

Clerkship for third- or fourth-year medical students providing a more in depth experience in diagnostic or interventional radiology. Prerequisite: RADGY 695. Offered: AWSpS.

[View course details in MyPlan: RADGY 694](#)

RADGY 695 P-Radiology Elective Clerkship (*, max. 8)

Clinical rotations for third- or fourth-year medical students in one to four subspecialty areas of radiology at University of Washington and affiliated hospitals for those who have not previously completed a radiology clerkship. Offered: AWSpS.

[View course details in MyPlan: RADGY 695](#)

RADGY 696 P-Nuclear Medicine Clerkship (*, max. 12)

Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching

conferences of the division. Four- and six-week clerkships can be preplanned in areas such as pulmonary, cardiovascular, renal, bone, computer analysis. Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: RADGY 696](#)

RADGY 697 P-Radiology Special Electives (*, max. 24)

Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct communication between the student and the education coordinator in Radiology. A written outline from a preceptor at the intended site required. Prerequisite: permission of radiology education coordinator. Offered: AWSpS.

[View course details in MyPlan: RADGY 697](#)

RADGY 699 P-WWAMI Radiology Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Rehabilitation Medicine

[Display as tabs](#)

Department Overview

BB928 Health Sciences

The Department of Rehabilitation Medicine provides education for medical students, interns, residents, and allied health students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.

The department offers curricula leading to the following degrees: Master of Occupational Therapy, Doctor of Physical Therapy, Master of Prosthetics and Orthotics, and a PhD in rehabilitation science.

Occupational Therapy

Head

Janet M. Powell

The profession of occupational therapy appeals to people who enjoy thinking creatively and flexibly to solve problems, and who want to help people with disabilities perform activities important in their daily lives. Occupational therapists provide services related to occupational performance (activities) in everyday life in the areas of self-care, work, education, or play and leisure. They work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventive strategies to enhance health and well-being; and with people in all age groups from diverse cultural and ethnic groups and socioeconomic levels.

Occupational therapists help people with impairments or limitations live as productive and as high quality of life as possible. Services focus on increasing independence, enhancing development, providing compensatory strategies, and minimizing or preventing disability. Therapists adapt activities and environments, select therapy activities meaningful to clients, and provide client, family, and caregiver education. For example, an occupational therapist may teach adaptive dressing techniques to a client who has lost use of a hand following a stroke, help a child with autism interact with peers, or modify a computer for a young adult with a spinal cord injury returning to work.

Today's occupational therapists practice in rehabilitation centers, outpatient rehabilitation clinics, schools, hospitals, mental health facilities, private practice, skilled nursing facilities, home healthcare, and community health programs. The most common work settings for occupational therapists are school systems, hospitals, and long-term care facilities. The current and future job outlook for occupational therapists is excellent. The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) located at 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449. ACOTE's telephone number, c/o AOTA, is (301) 652-2682 and its web address is www.acoteonline.org. Standards comply with the U.S. Department of Education criteria for recognition of accrediting agencies. Graduates of the program are eligible to sit for the national certification examination for occupational therapists. The National Board for Certification in Occupational Therapy (NBCOT) is the certifying agency responsible for development and implementation of this examination. All states currently require state licensure in order to practice.

Master of Occupational Therapy

Admission Requirements

1. Bachelor's degree in any major and Graduate Record Examination (GRE) taken within the past five years. Seven prerequisite courses as shown below. Volunteer or work experience in at least two practice areas of occupational therapy. Admission is once a year for entry autumn quarter; applications are due December 15.
2. Specific prerequisite courses at the UW. (Students who have attended schools other than the UW must take comparable courses.)
 - a. *Natural Sciences*: BIOL 118; B STR 301; CHEM 120; EDPSY 490
 - b. *Social Sciences*: PSYCH 305; PSYCH 306; SOC 110 or ANTH 202
3. *Requirements to Apply*: Completion of five prerequisite courses, including three courses in the natural sciences; 3.00 minimum GPA in prerequisite courses with no single course graded less than 2.7. Applicants must have a cumulative college-level grade point average of at least a 3.00 (B) to be considered for admission. This includes all baccalaureate and post-baccalaureate courses. Admission is based on academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information are available by consulting the program's website at rehab.washington.edu/education/degree/ot/, by emailing ot@uw.edu, or by calling (206) 598-5764.

Degree Requirements

Courses: To be completed in the scheduled sequence, beginning autumn quarter only, at the UW: REHAB 510, REHAB 520, REHAB 522, REHAB 533, REHAB 541, REHAB 542, REHAB 543, REHAB 544, REHAB 545, REHAB 548, REHAB 551, REHAB 564, REHAB 570, REHAB 571, REHAB 572, REHAB 574, REHAB 575, REHAB 576, REHAB 577, REHAB 578, REHAB 579, REHAB 580, REHAB 581, REHAB 582, REHAB 584, REHAB 585, REHAB 591, and REHAB 594.

GPA Requirement: cumulative 3.00 GPA in all required professional coursework to retain satisfactory standing and to graduate. Detailed scholastic requirements are available on the program's website at rehab.washington.edu/education/degree/ot/.

Continuation Policy: If at any point the OT curriculum cumulative GPA falls below 3.00, the student is placed on academic probation and must raise the GPA to 3.00 by the end of two subsequent quarters. Students unable to remove their probation status are subject to dismissal from the program. If a student receives a grade below 2.7 in a required course, continuation in the program is reviewed and determined by the Occupational Therapy Advisory and Evaluation Committee.

Fieldwork Placement: The student must satisfactorily complete all academic coursework before taking the two required Level II Fieldwork placements (REHAB 594). Both fieldwork placements must be satisfactorily completed within 24 months following completion of the academic portion of the program in order to graduate.

For more information on the Master of Occupational Therapy program, visit the department's website at rehab.washington.edu/education/degree/ot/.

Physical Therapy

Interim Head

Sarah Westcot McCoy

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal or neuromuscular conditions.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is rebuilding self-confidence and creating a desire to return to a normal, active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.

As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, evaluate, and direct patient care in outpatient clinics, rehabilitation centers, health maintenance organizations, developmental centers, home-health agencies, schools, extended-care facilities, voluntary health programs, industry, and private practices. The physical therapist may be found anywhere quality healthcare is needed. Increasingly, physical therapists are becoming involved in basic and clinical research, such as the academic community, either as full-time faculty members or as supervisors of clinical education, and as consultants in local, state, and federal health-planning activities.

Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. The steps to licensure as a physical therapist vary slightly from state to state, but all physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including an emphasis on physical and social sciences. The physical therapist evaluates the patient's problem by testing such factors as range of joint motion, muscle strength, posture and gait, pulmonary function, sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Intervention procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and assisted ambulation training.

As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formal mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.

The University of Washington program in physical therapy is accredited by the American Physical Therapy Association Commission on Accreditation in Physical Therapy Education. For complete program details visit rehab.washington.edu/education/degree/pt.

Doctor of Physical Therapy

Admission Requirements

1. Enrollment is limited to 44 students each year and admission is competitive.
2. Application is restricted to those who are U.S. citizens or U.S. permanent residents by the autumn program entrance date.
3. Applicants are required to submit scores from the General Test portion of the Graduate Record Examinations (GRE).
4. Prior to the application deadline of December 15, the student must have met the following academic requirements:
 - a. Minimum 3.00 GPA on all college-level courses
 - b. Minimum 3.00 GPA on PT prerequisite courses
 - c. Minimum 2.0 (C) grade on each PT prerequisite course
 - d. Half (50%) of PT prerequisite courses completed.For a list of PT prerequisite course descriptions, see the program Website at depts.washington.edu/rehab/pt/eligibility.asp#prereq
5. Minimum requirements above must be maintained until program entrance and all prerequisite courses must be finished at that time. Applicants must complete a bachelor's degree before they start the program.
6. Most clinical internship placement sites require potential trainees to undergo a criminal history background check for crimes against vulnerable populations. To ensure that all students offered positions in the PT program have no such history and therefore are able to finish the clinical portion of the curriculum, the completion of a criminal background check process is required of applicants accepting admission.

Degree Requirements

157 credits, as follows:

1. *Year One*
 - a. *Autumn Quarter*: REHAB 504, REHAB 509, REHAB 517, REHAB 521, REHAB 522, REHAB 541, REHAB 544
 - b. *Winter Quarter*: REHAB 506, REHAB 517, REHAB 533, REHAB 542, REHAB 545, REHAB 551
 - c. *Spring Quarter*: REHAB 507, REHAB 517, REHAB 525, REHAB 533, REHAB 536, REHAB 543, REHAB 548
 - d. *Summer Quarter*: REHAB 500, REHAB 508, REHAB 517, REHAB 537, REHAB 538, REHAB 540

2. Year Two

- a. *Autumn Quarter*: REHAB 510, REHAB 511, REHAB 523, REHAB 547, REHAB 566
- b. *Winter Quarter*: REHAB 502, REHAB 512, REHAB 527, REHAB 529
- c. *Spring Quarter*: REHAB 502, REHAB 503, REHAB 531, REHAB 566, REHAB 569
- d. *Summer Quarter*: REHAB 505, REHAB 514, REHAB 535, REHAB 515, REHAB 567, REHAB 801

3. Year Three

- a. *Autumn Quarter*: REHAB 595, REHAB 801
- b. *Winter Quarter*: REHAB 595, REHAB 801
- c. *Spring Quarter*: REHAB 595, REHAB 801

Prosthetics and Orthotics

Division Director

Ann Yamane

The prosthetist-orthotist is a member of the rehabilitation healthcare team, which also includes physicians, surgeons, physical and occupational therapists, psychologists, vocational rehabilitation counselors, and other appropriate specialists. The interdisciplinary rehab team works with physically challenged individuals to increase their functional abilities, enhance their daily life, and help them to participate in activities they enjoy.

Certified Prosthetists Orthotists (CPOs) provide direct patient care and management. CPOs work in conjunction with physicians, surgeons, and therapists to evaluate the prosthetic or orthotic needs of the patient. Prostheses replace or substitute for a missing limb or part of a limb, and orthoses help with the control of motion and the support of a weakened body segment. Before designing a specific device, the prosthetist-orthotist examines a patient to find any conditions that might affect the future success of that device. Following the evaluation, the prosthetist-orthotist obtains an impression of the affected segment along with the appropriate measurements. A technician fabricates the prosthesis or orthosis, and the prosthetist-orthotist assesses the fit and function of the device and follows up with the patient, as necessary. To evaluate the fit and function, the prosthetist-orthotist must have a detailed knowledge of anatomy and kinesiology, joint range of motion, muscle strength, human locomotion, material science, and the human-device interaction.

Graduate Program Coordinator
BB808 Health Sciences Center
(206) 543-6763
pando96@uw.edu

The prosthetics and orthotics division offers the following program of study:

- The Master of Prosthetics and Orthotics degree

Master of Prosthetics and Orthotics**Admission Requirements**

1. Bachelor's degree in any major from a regionally accredited U.S. college or university
2. Minimum 3.00 cumulative GPA
3. Prior to the start of the program, all prerequisites must be completed, including one course each in the areas of biology* (or other life science), statistics, and chemistry*; a two-course series in the areas of (1) anatomy and physiology and (2) physics*, and two courses in psychology (to include a general psychology course as well as either a developmental or abnormal psychology course). Laboratories must be taken with courses marked with an asterisk*.
4. Minimum 3.00 cumulative prerequisite GPA. No single course graded less than 2.0. Grades lower than 2.0 are not accepted.
5. GRE general test scores. Test must be taken within the past five years.
6. Volunteer or work experience in a prosthetics-orthotics clinic is strongly encouraged
7. Admission is competitive based on scholastic achievement, written skills, references, and involvement in activities or experiences related to the health professions.
8. Admission occurs once a year for entry autumn quarter; applications are evaluated starting December 15.
9. International applicants must meet several requirements in addition to those required of U.S. applicants to be admitted to the UW Graduate School. Consult the FAQs on the UW Graduate School website for more information.

See program [website](#) for complete details on admissions requirements.

Degree Requirements

112 credits as follows:

1. *Courses:* To be satisfactorily completed in a specific sequence beginning autumn quarter of entry year, and only at the UW: REHAB 522, REHAB 544, REHAB 541, REHAB 504, REHAB 509, RHB PO 511, RHB PO 501, REHAB 533, REHAB 545, REHAB 542, REHAB 551, REHAB 506, RHB PO 515, REHAB 548, REHAB 543, RHB PO 512, RHB PO 581, RHB PO 541, RHB PO 502, RHB PO 521, RHB PO 522, RHB PO 523, REHAB 580, RHB PO 561, REHAB 510, RHB PO 524, RHB PO 525, RHB PO 526, RHB PO 527, RHB PO 581, RHB PO 582, RHB PO 562, RHB PO 528, RHB PO 529, RHB PO 583, RHB PO 563, RHB PO 530, RHB PO 531, RHB PO 534, RHB PO 558, RHB PO 584, RHB PO 564.
2. *Grade Requirements:* A student must maintain a minimum 3.00 cumulative program GPA, and receive "credit" grades in all courses graded credit/no credit only, to maintain good standing in the program and be eligible for graduation.
3. *Continuation Policy:* If at any point the cumulative GPA in the curriculum courses falls below 2.70, the student is placed on academic probation. In order to be removed from probation, the student must achieve a cumulative GPA of 3.00 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his or her probation status, he or she is subject to dismissal from the program.

Post-Professional Programs

Doctor of Philosophy in Rehabilitation Science

Director

Deborah Kartin

Rehabilitation science is an interdisciplinary field that focuses on human function and disability. Basic and applied research from health sciences, social sciences, engineering, and related fields is directed toward (1) enhancing physical and psychosocial functioning, participation in life situations, and quality of life for people with disabilities; and (2) informing relevant social and healthcare policy.

The program targets students from diverse backgrounds in rehabilitation-related fields including occupational therapy, physical therapy, speech and language pathology, rehabilitation counseling, medicine, nursing, prosthetics and orthotics, and engineering.

The goal of the PhD program in rehabilitation science is to prepare future researchers, educators, and leaders in the area of rehabilitation science. Graduates contribute to the field of rehabilitation science, working in settings such as academic and research institutions, service delivery systems (e.g., hospitals, public schools), government agencies, and the private sector. These individuals are prepared to address research, education, service delivery, and policy issues from an interdisciplinary perspective.

1. Demonstrate advanced knowledge and productivity in rehabilitation science specific to research, education, service delivery, and/or policy.
2. Demonstrate leadership in interdisciplinary collaboration for the purpose of optimizing research, education, service delivery, and/or policy.
3. Generate and extend knowledge that is innovative and rigorously tested within a focused area of rehabilitation science.

Admission Requirements

1. Baccalaureate degree from a college or university of recognized rank
2. Copy of current professional certification/licensure to practice (as appropriate)
3. Letters of recommendation from three persons knowledgeable about the individual's potential for doctoral-level work in rehabilitation science
4. Letter of application
5. Resume/CV
6. Official university transcripts
7. Official Graduate Record Examination (GRE) General Test Scores

Degree Requirements

100 credits minimum, as follows:

Core course series (21 credits): coursework and practicum experiences in teaching (minimum 5 credits), and coursework in statistics and research methods (minimum 18 credits). In addition, each student must complete three cognates (minimum 6 credits each) specific to the student's goals. The student's committee and the core faculty in the rehabilitation science doctoral program must approve the entire course of study.

General requirements: In addition to meeting all requirements of the UW Graduate School, all students are expected to meet the following general requirements.

1. Minimum 3.00 cumulative and quarterly GPA.
2. 100 credits minimum, of which 27 are dissertation credits.
3. Completion of at least one teaching practicum (3-credit minimum).
4. Satisfactory completion of a research and scientific inquiry day manuscript and presentation.
5. Satisfactory completion of general examinations.
6. Dissertation.
7. Final examination.

For more information on the PhD program in rehabilitation science, visit the program's website at rehab.washington.edu/education/degree/rehabsci/.

SCHOOL OF MEDICINE

REHABILITATION MEDICINE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

REHAB 300 Introduction to Occupational Therapy (1)

Introduction to occupational therapy profession. Provides historical perspectives, theoretical foundations, and clinical case studies in various practice arenas. Credit/no-credit only.

[View course details in MyPlan: REHAB 300](#)

REHAB 496 Special Topics in Rehabilitation (1-9, max. 14)

Guided opportunity for in-depth study in specific areas of rehabilitation. Topics vary.

[View course details in MyPlan: REHAB 496](#)

REHAB 498 Undergraduate Thesis (*, max. 15)

[View course details in MyPlan: REHAB 498](#)

REHAB 499 Undergraduate Research (*, max. 15)

Opportunity to design, perform, and analyze research investigation in problem areas in rehabilitation medicine. These include clinical and basic research problems in, for example, head and spinal injury, chronic disease, pain neurophysiology, electrodiagnosis, communication, and bioengineering.

[View course details in MyPlan: REHAB 499](#)

REHAB 500 Clinical Clerkship in Physical Therapy (4) *Robinson*

Observation, instruction, and supervised practice in treatment of patients in diverse clinical settings. Emphasis is given to the application of previously learned material and skills to specific clinical problems. Required for physical therapy students. Credit/no-credit only.

[View course details in MyPlan: REHAB 500](#)

REHAB 502 Pediatric Physical Therapy (4-, max. 8) *C. KERFELD*

Provides foundational knowledge in development and an overview of pediatric physical therapy practice for children with atypical development. Presents examination, evaluation, and development of physical therapy plans of care for children with various disabilities within the frameworks of family-centered care and disablement models.

[View course details in MyPlan: REHAB 502](#)

REHAB 503 Lifespan III: Geriatric Physical Therapy (3) *Matsuda*

Theory and principles of exercise procedures used when treating the geriatric patient. Includes a discussion of age related changes in the systems essential to movement control; factors contributing to physical disability and frailty with aging; adaptation of assessment and treatment procedures to the geriatric patient. Lectures and laboratories.

[View course details in MyPlan: REHAB 503](#)

REHAB 504 Procedures I: Basic Physical Examination of the Extremities (2) *Maitland*

Develops technical skills and theoretical foundations in the examination of patients from a neuromusculoskeletal perspective. Special emphasis on examination of the extremities, including applied anatomy, posture, screening tests, special tests, and scanning exams.

[View course details in MyPlan: REHAB 504](#)

REHAB 505 Introduction to Pharmacology (2) *D. MACK*

Pharmacological survey of drugs commonly prescribed for clients seen in a physical therapy practice setting. Presentations on basic principles. Additional data search and group reports. Overview of medical emergencies.

[View course details in MyPlan: REHAB 505](#)

REHAB 506 Procedures II: Basic Physical Examination of the Spine (2) *Bennett*

Develops technical skills and theoretical foundations in the examination of patients from a neuromusculoskeletal perspective. Emphasizes examination of the spine including applied anatomy, posture, screening tests, special tests, and scanning exams.

[View course details in MyPlan: REHAB 506](#)

REHAB 507 Physical Therapy Procedures III: Modalities (3-4) *McGough*

Principles and practice of physical therapy clinical treatment procedures utilizing therapeutic modalities. Lecture and laboratory format.

[View course details in MyPlan: REHAB 507](#)

REHAB 508 Principles of Therapeutic Exercise (5) *E. MCGOUGH*

Theory, principles, and practice of exercise procedures used for treatment purposes in physical therapy, including motor learning, variables of motor performance, and exercise prescription. Lectures and laboratories. Simulated patient problems.

[View course details in MyPlan: REHAB 508](#)

REHAB 509 Rehabilitation Procedures: Functional Skills Assessment (1) *Robinson*

Development of clinical competence in assessment and training of basic patient functional skills, including handling techniques, transfers, and assisted ambulation.

[View course details in MyPlan: REHAB 509](#)

REHAB 510 Rehabilitation Psychology (2) *Patterson*

Focuses on understanding assimilation of disability, participation in rehabilitation, management of behavior, and maintenance of performance from both the practitioner and patient perspective. Focuses on the role of the psychologist in the rehabilitation team. Includes case study and case conference materials.

[View course details in MyPlan: REHAB 510](#)

REHAB 511 Musculoskeletal IV: Clinical Management (5) *Bennett*

Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper quadrant anatomy. Lecture and laboratory format.

[View course details in MyPlan: REHAB 511](#)

REHAB 512 Musculoskeletal V: Clinical Management (3-4, max. 8)

Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper and lower extremity musculoskeletal conditions. Lecture, laboratory and simulation learning

format.

[View course details in MyPlan: REHAB 512](#)

REHAB 513 Special Studies in Physical Therapy (1-5, max. 15)

Theory and practice in specialized areas of physical therapy. Includes organization and administration of specialized programs, advanced evaluation and treatment techniques, role of the consultant. Credit/no-credit only.

[View course details in MyPlan: REHAB 513](#)

REHAB 514 Systems Review for Physical Therapists (3) *Maitland*

Development of advanced physical assessment skills to provide students with the ability to determine if a patient's disorder is within the scope of practice for physical therapy or requires referral to another healthcare provider. Lectures and laboratory format, with an emphasis on the lab component. Credit/no-credit only.

[View course details in MyPlan: REHAB 514](#)

REHAB 515 Advanced Neuromusculoskeletal Interventions in Physical Therapy (3) *Bennett*

Advanced neuromusculoskeletal treatment techniques. Emphasis on review of manual therapy, exerciser and modality interventions in case studies across lifespan and continuum of care. Credit/no-credit only.

[View course details in MyPlan: REHAB 515](#)

REHAB 516 Medical Information for Rehabilitation Counselors (3)

Lectures in medical science field regarding the etiology, prognosis, and physical restoration of common disabling conditions. Case studies are used extensively, and major emphasis is placed on vocational implications of physical disability. Prerequisite: permission of instructor. Instructors: Johnson

[View course details in MyPlan: REHAB 516](#)

REHAB 517 Physical Therapy Seminar (2-, max. 12) *D. KARTIN, S. MCCOY, K. MCQUADE*

Focuses on physical therapy topics pertaining to transcurricular and professional practice issues.

[View course details in MyPlan: REHAB 517](#)

REHAB 519 P-Preceptorship in Rehab Medicine (1, max. 12) *McNalley*

Explores the field of physical medicine and rehabilitation. Students observe a physiatrist one half day each week, and gain understanding of the management of acute injuries, chronic disease, and disabilities. Offered: AWSpS.

[View course details in MyPlan: REHAB 519](#)

REHAB 520 Seminar (1-5, max. 12)

Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics for graduate students, residents, and postdoctoral fellows in rehabilitation medicine. Lectures, discussion, and laboratory work in selected aspects appropriate to elected area of study for applicants for master-level degree.

[View course details in MyPlan: REHAB 520](#)

REHAB 521 Survey of Pathophysiology for Rehabilitation (2-3, max. 6) *Kerfeld*

Uses a systems approach overview of the disease process and the impact it has on the rehabilitation process. Provides a foundation for understanding how dysfunction of major systems can influence a person's ability to move. Discusses risk reduction and prevention strategies surrounding diseases. Credit/no-credit only.

[View course details in MyPlan: REHAB 521](#)

REHAB 522 Neurophysiological Topics in Rehabilitation Medicine (2) *Kinney*

Reviews traditional neurophysiological concepts related to the nervous, musculoskeletal, and cardiopulmonary systems as a foundations for rehabilitation practice. Includes recent advances in research and applicable case studies.

[View course details in MyPlan: REHAB 522](#)

REHAB 523 Neuroscience III: Applied Neurology (4) Matsuda

Theory and principles of advanced exercise procedures used when treating patients with neurologic pathology. Includes the application of principles of motor learning and control; facilitation and inhibition of variables affecting functional motor performance; adaptation of assessment and treatment procedures to patients with different types of neurologic impairments. Lectures and laboratories.

[View course details in MyPlan: REHAB 523](#)

REHAB 525 Exercise Physiology for Rehabilitation (3) Moritz

Provides systems approach to exercise physiology, including cardiovascular and musculoskeletal response to exercise training, and the impact it has on the rehabilitation process. Reviews common disease processes that effect ability and tolerance, and may benefit from rehabilitation interventions.

[View course details in MyPlan: REHAB 525](#)

REHAB 527 Neuroscience IV: Special Topics in Neurologic Rehabilitation (3) Kelly

Critical analysis and application of physical therapy assessment and treatment techniques to problems related to specific adult neurological disorders. Neurological disorders to be covered include stroke, spinal cord injury, traumatic brain injury, and multiple sclerosis.

[View course details in MyPlan: REHAB 527](#)

REHAB 528 International Clinical Clerkship (2) Robinson

Short-term clinical education experience outside the United States. Participants work in a mentored relationship as part of a multi-disciplinary rehabilitation team providing direct clinical services and consultation to patients and their care-givers. Sponsored sites selected and screened by clinical coordinator. Students may choose area of clinical focus. Credit/no-credit only.

[View course details in MyPlan: REHAB 528](#)

REHAB 529 Professional and Practice Issues in Physical Therapy (2) K. MCQUADE

Augments the student's understanding of the profession and current issues in healthcare. Includes healthcare delivery, scope of practice, professional organization, political activism, specialist certification, licensure, collaboration, therapeutic relationships, disclosure, privacy, and informed consent. Credit/no-credit only.

[View course details in MyPlan: REHAB 529](#)

REHAB 530 Medical Aspects of Vocational Counseling (2-3)

Introduction to vocational implications of physical and emotional disabilities. Methods, counseling techniques, therapeutic modalities, community resources used in producing vocational assistance for persons with disabilities. Prerequisite: resident standing in rehabilitation medicine or permission of instructor. Instructors: Johnson

[View course details in MyPlan: REHAB 530](#)

REHAB 531 Critical Thinking Skills in Physical Therapy (3) K. MCQUADE

Introduces students to structured critical thinking for discussion and analysis of selected musculoskeletal approaches. Interactive small groups explore key papers with controversial or novel assertions, or that address commonly used treatment techniques. Credit/no-credit only.

[View course details in MyPlan: REHAB 531](#)

REHAB 532 Clinical Affiliation for Rehabilitation Counselors (5-6)

Under preceptorship of rehabilitation counseling staff, students counsel and evaluate patients with severe physical, emotional, or social problems; administer vocational testing; obtain placement on job stations; work with community resources for vocational/educational placement; and develop activity-oriented schedules. Prerequisite: permission of instructor. Instructors: Johnson

[View course details in MyPlan: REHAB 532](#)

REHAB 533 Diseases and Diagnosis in Rehabilitation (2-, max. 4)

Provides an introduction to medical diagnoses and diseases having high rates of referral to rehabilitation services

in order to promote comprehensive patient care.

[View course details in MyPlan: REHAB 533](#)

REHAB 535 Physical Therapy Administration Issues (2) *S. MCCOY*

In-depth discussion of administrative issues overarching physical therapy practice, including economic trends, operational policy, budgeting, reimbursement, staffing, business structure, and entrepreneurship. Required for physical therapy students. Credit/no-credit only.

[View course details in MyPlan: REHAB 535](#)

REHAB 536 Patient Evaluation and Clinical Decision Making (1-2, max. 8) *Robinson*

General principles and practice of physical therapy patient evaluation and use of the clinical decision-making models. The application of patient management principles through examination techniques and documentation strategies. Lecture and laboratory format.

[View course details in MyPlan: REHAB 536](#)

REHAB 537 Functional Mobility Skills (2) *Pradhan*

Principles and practice of physical therapy interventions related to functional mobility skills, including transfer training, wheelchair fitting, wheelchair mobility, gait training, and caregiver training. Lecture and laboratory format.

[View course details in MyPlan: REHAB 537](#)

REHAB 538 Integumentary, Edema Management, and Circulatory Screening for PT (2) *Robinson*

Principles and practice of physical therapy evaluation and interventions related to wound care, burn care, edema management, circulatory screening, and splinting applications. Lecture and laboratory format.

[View course details in MyPlan: REHAB 538](#)

REHAB 539 Communication Disorders in Rehabilitation Medicine (1) *Yorkston*

Overview of communication disorders secondary to central and peripheral nervous system impairment. Emphasis on facilitating identification of speech/language disorders with discussion of implications for rehabilitation.

[View course details in MyPlan: REHAB 539](#)

REHAB 540 Acute Care Practice in Physical Therapy (3, max. 6) *E. MCGOUGH, C. ROBINSON*

Provides an in-depth analysis of the role of the physical therapist in the acute care setting. Lectures frame care-based problem solving and experiential learning. Consequences of recumbent positioning and reduced activity examined using a systems-based approach. Develop entry-level knowledge for delivery of acute care PT services within a multidisciplinary team.

[View course details in MyPlan: REHAB 540](#)

REHAB 541 Gross Anatomy Laboratory - Extremities (1) *Guthrie, Rollinger*

Uses cadavers to study the musculoskeletal, peripheral-vascular, and peripheral-nervous systems. Focuses on the extremities. Uses primarily prospected material, but provides some opportunity for independent dissection. Credit/no-credit only.

[View course details in MyPlan: REHAB 541](#)

REHAB 542 Gross Anatomy Laboratory - Spine (1) *Guthrie, Rollinger*

Studies the musculoskeletal, peripheral-vascular, and peripheral-nervous systems from cadavers. Focuses on the spine. Uses primarily prospected material, but includes some opportunity for independent dissection. Credit/no-credit only.

[View course details in MyPlan: REHAB 542](#)

REHAB 543 Rehabilitation Kinesiology Laboratory (1) *Robinson, Rollinger*

Provides instruction and focus on practical experience and clinical problem solving in kinesiology by exploring and developing proficiency in a framework for observation, analysis, and description of human movement on

the normal pathological spectrum. Credit/no-credit only.

[View course details in MyPlan: REHAB 543](#)

REHAB 544 Functional Anatomy for Rehabilitation of the Extremities (4-) *Goldstein, Guthrie*

Covers the functions of the musculoskeletal system as applied by professionals in the practice of clinical rehabilitation. Focuses on anatomy and of the upper and lower extremities, including associated peripheral-vascular and peripheral-nervous systems. Intended to enhance functional assessment and to improve diagnosis and treatment through greater understanding of underlying anatomy.

[View course details in MyPlan: REHAB 544](#)

REHAB 545 Functional Anatomy for Rehabilitation of the Spine (-3) *Goldstein, Guthrie*

Covers functions of the musculoskeletal system as applied by professionals in the practice of clinical rehabilitation. Focuses on the anatomy of the spine, including associated vascular and nervous systems. Enhances functional assessments and the improvement of diagnosis and treatment through greater understanding of underlying anatomy.

[View course details in MyPlan: REHAB 545](#)

REHAB 546 Teaching Practicum in Rehabilitation (1-3, max. 15)

Integration of knowledge and skills in teaching through teaching in the classroom or presentation of a minicourse, workshop, or in-service training series. Prerequisite: permission of instructor.

[View course details in MyPlan: REHAB 546](#)

REHAB 548 Kinesiology for Rehabilitation (3) *Guthrie*

Advanced study of joint motion and muscle function in relation to both the normal and abnormal state. Focuses on principles of kinesiology as they are applied to human movement and disability. Analyzes specific techniques and interventions employed in the field of rehabilitation medicine.

[View course details in MyPlan: REHAB 548](#)

REHAB 550 Neuropsychology in Rehabilitation (2) *J. HOFFMAN*

Examination and management of patients with brain lesions, as well as an understanding of the consequences of such conditions. Prerequisite: graduate standing in rehabilitation medicine.

[View course details in MyPlan: REHAB 550](#)

REHAB 551 Neurobiology for Rehabilitation (5) *Kinney, Pradhan*

In-depth analysis of human neuroanatomical structure and neurophysiological function as a basis for rehabilitation practice.

[View course details in MyPlan: REHAB 551](#)

REHAB 554 Perspectives in Interprofessional Practice (0/1, max. 1)

Distributed over seven consecutive quarters, this course integrates diverse interprofessional perspectives to prepare graduate and professional students for effective practice as collaborative team members. Offered: AWSpS.

[View course details in MyPlan: REHAB 554](#)

REHAB 555 P-Neuromuscular Electrodiagnosis (2.5)

Demonstration of fundamentals of electromyography and peripheral nerve stimulation followed by participation in clinical electrodiagnosis examinations. Develops awareness of knowing when such procedures are indicated for patients and interpreting results rather than developing proficiency in performing these examinations. Prerequisite: permission of instructor. Instructors: Kraft

[View course details in MyPlan: REHAB 555](#)

REHAB 556 Foundations of Rehabilitation Science (3)

Overview of rehabilitation science and social constructs of disability emphasizing bio-psycho-social-environmental models of the enabling-disabling process across the lifespan. Lays the philosophical and theoretical foundations for the study of rehabilitation as a science and is designed to promote interdisciplinary

thinking. Prerequisite: instructor permission. Instructors: Johnson, Kartin, Yorkston

[View course details in MyPlan: REHAB 556](#)

REHAB 557 Evidence-Based Rehabilitation (3)

Addresses frameworks for evaluating the evidence in rehabilitation science; asking answerable questions, using advanced search strategies; critically appraising literature; understanding the systematic review process; conducting and interpreting meta-analyses; developing evidence-based practice guidelines; communicating the evidence to stakeholders; and translating evidence into rehabilitation practice. Prerequisite: permission of instructor. Instructors: Kartin, Yorkston

[View course details in MyPlan: REHAB 557](#)

REHAB 558 Rehabilitation Research Methods (3)

Provides an orientation and critical analysis of current practices in disability and rehabilitation research by appraising methodologies and strategies used to investigate consequences of human function, activity performance, and social participation. Topics include introduction to qualitative and quantitative methodologies with respect to rehabilitation research. Prerequisite: permission of instructor. Instructors: Johnson, Kartin, Yorkston

[View course details in MyPlan: REHAB 558](#)

REHAB 560 Defining and Measuring Outcomes in Rehabilitation Research (3)

Introduces the importance, methods, and challenges of outcomes research in rehabilitation. Addresses definitions and importance of outcomes research; behaviors measurement, functional abilities, quality of life, and consumer satisfaction; outcomes measurement for diverse populations across lifespan; research outcomes design; and challenges specific to outcomes research. Prerequisite: permission of instructor. Instructors: Amtmann

[View course details in MyPlan: REHAB 560](#)

REHAB 561 Epidemiological and Health Services Approaches to Rehabilitation Research (3)

Introduces the application of principles and methods from the fields of epidemiology and health services to rehabilitation research. Provides an overview of epidemiological research methods applicable to rehabilitation research, health services approaches, ethics, and use of research to inform disability policy. Prerequisite: permission of instructor. Instructors: Ciol, Hoffman

[View course details in MyPlan: REHAB 561](#)

REHAB 562 Neuroscience in Rehabilitation (3)

Develops knowledge related to neural control of movement; movement dysfunction from neurologic pathology; and methodological approaches to investigating neural control of movement. Includes concepts in motor control; motor learning; and neural plasticity relating to movement dysfunction in people with neurologic pathology and to rehabilitation science. Prerequisite: permission of instructor. Instructors: Kelly, Yorkston

[View course details in MyPlan: REHAB 562](#)

REHAB 564 Practice Skills for Occupational Therapy (1, max. 3)

Provides an introduction to physical assessments and interventions with a focus on physical management of clients, management of medical and adaptive equipment, splint fabrication, and maintenance of therapist and client safety. The therapeutic skills covered serve as a foundation for more advanced technical and professional competencies in subsequent courses and fieldwork. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: REHAB 564](#)

REHAB 566 Special Topics in Rehabilitation (1-9, max. 14)

Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

[View course details in MyPlan: REHAB 566](#)

REHAB 567 Practicum in Rehabilitation (1-12, max. 24)

Specialized practicum experience in environment providing rehabilitation services. Practicum arrangements and

permission by instructor.

[View course details in MyPlan: REHAB 567](#)

REHAB 568 Biophysics as Applied to Physical Medicine (2)

Propagation and absorption characteristics of physical forms of energy used for treatment in physical medicine. Physiologic effects basic to prescription of the physical therapy modalities. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Instructors: Esselman

[View course details in MyPlan: REHAB 568](#)

REHAB 569 Prosthetics and Orthotics for Physical Therapists (2)

Introduces the principles and designs of orthoses and prostheses, using a clinical problem-solving approach to determine functional deficits to create joint rehabilitation goals between physical therapy and prosthetics and orthotics in regards to the prosthesis and orthosis. Emphasizes team medicine and collaboration in rehabilitation.

[View course details in MyPlan: REHAB 569](#)

REHAB 570 Foundations of Occupational Therapy (5) *Powell*

An overview of the practice of occupational therapy, emphasizing the role of occupational performance in context, frames of reference, clinical reasoning, and purposeful activity. Introduces the diversity of occupational therapy practice environments through didactic and clinical experiences.

[View course details in MyPlan: REHAB 570](#)

REHAB 571 Occupational Performance through the Life Span (4)

Overview of human development as it relates to occupational performance and functional adaptation in the ages and stages of life from infancy through old-old age. Emphasis on environmental influences, activity, and occupational roles, tasks, and component behaviors as they relate to individuals in different ages and stages.

[View course details in MyPlan: REHAB 571](#)

REHAB 572 Occupational Therapy Theory and Practice in Psychosocial Dysfunction I (1-7, max. 7)

Fogelberg

An overview of bodies of knowledge in psychosocial practice as related to occupational performance. Learning topics include major frames of reference, effects of psychosocial disorders on occupational performance (life activities), and occupational therapy evaluation and intervention skills. Lectures, reading, class discussions, role-playing, problem-based learning, and fieldwork comprise the learning experiences.

[View course details in MyPlan: REHAB 572](#)

REHAB 574 Occupational Therapy Theory and Practice in Physical Disabilities I (6)

Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches.

[View course details in MyPlan: REHAB 574](#)

REHAB 575 Occupational Therapy Theory and Practice in Physical Disabilities II (5) *Powell*

Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches.

[View course details in MyPlan: REHAB 575](#)

REHAB 576 Occupational Therapy Theory and Practice in Pediatrics (1-7, max. 7)

Provides knowledge and skills necessary for providing occupational therapy evaluation, intervention, and transition services focused on occupational performance (life activities) for children and teens with disabilities and their families.

[View course details in MyPlan: REHAB 576](#)

REHAB 577 Occupational Therapy Theory and Practice in Geriatrics (5) *Powell*

Occupational therapy evaluation and intervention with older adults. Covers psychology, physiology, and socio-

demographics of aging. Emphasis on interaction skills with the elderly and occupational performance (life activities). Laboratory experiences and fieldwork in the practice setting enhance didactic coursework.

[View course details in MyPlan: REHAB 577](#)

REHAB 578 Occupational Performance Analysis (3) *Rollinger*

Skills in the analysis, adaptation, and sequencing of therapeutic and functional activities as they apply to occupational performance. Analysis focuses on performance components (sensorimotor, cognitive, psychosocial, psychological), temporal aspects (chronological, developmental), and environmental aspects (physical, social, cultural).

[View course details in MyPlan: REHAB 578](#)

REHAB 579 Therapeutic Communication (3)

Introduces basic principles and skills of effective interpersonal communication in dyadic interactions and in groups. Emphasis on effective listening, interviewing, and principles and concepts of occupational therapy groups. Lectures, readings, class discussions, role playing, and in-class exercises comprise the learning experiences.

[View course details in MyPlan: REHAB 579](#)

REHAB 580 Introduction to Research in Rehabilitation (3)

Evaluation of rehabilitation research literature and design of research studies relevant to rehabilitation.

[View course details in MyPlan: REHAB 580](#)

REHAB 581 Application of Measurement Systems (3) *Jirikowic*

Provides basis for critically evaluating and using tests and measurements in occupational therapy evaluation. Focus on reliability, validity, norms, test development process, statistics relevant to tests and measurement, and ethical implications of testing. Critical evaluation of selected standardized test used in occupational therapy.

[View course details in MyPlan: REHAB 581](#)

REHAB 582 Assistive Technology in Rehabilitation (3) *T. JIRIKOWIC*

Overview of the field of assistive technology as it impacts occupational performance in self-care, work, and leisure activities. Covers interface devices, computer applications, environmental controls, augmentative communications, power mobility, seating and positioning systems, and sensory enhancements.

[View course details in MyPlan: REHAB 582](#)

REHAB 583 Exploring Disability (1)

Explores multiple aspects of disability including social, mental, physical, and financial factors. Provides skills for working with people with disabilities and exposure to a multidisciplinary team approach to overcoming healthcare barriers. Utilizes interactive didactic with patient participation and introduction to community resources for people with disabilities.

[View course details in MyPlan: REHAB 583](#)

REHAB 585 Leadership and Management in Occupational Therapy (5) *T. MROZ*

Focuses on occupational therapy leadership and management in healthcare delivery systems. Includes theoretical and professional competencies focuses on healthcare access, health policy laws, service delivery settings, reimbursement, regulation, political advocacy. Management topics include leadership, program planning, budgeting, personnel, and outcome measurement.

[View course details in MyPlan: REHAB 585](#)

REHAB 588 Fieldwork II Seminar (1) *Rollinger*

Supports a successful transition from academic work to the full-time Fieldwork II clinical experiences by reinforcing the integration and application of acquired technical and professional competencies needed for REHAB 594, Fieldwork II. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: REHAB 588](#)

REHAB 591 Graduate Project (1-4, max. 10)

Graduate project focuses on practice, administration, education, policy, research, or other scholarly or creative work. Required of entry-level occupational therapy students.

[View course details in MyPlan: REHAB 591](#)

REHAB 592 Principles of Orthotic Use in Rehabilitation (2) *Crane*

General principles and clinical applications of orthoses in patient management, with exposure to research issues in orthotic design.

[View course details in MyPlan: REHAB 592](#)

REHAB 593 Principles of Prosthetic Use in Rehabilitation (2) *Morgenroth*

General principles of prevention of amputation, prosthetic design, biomechanics, and clinical applications of upper and lower extremity prostheses.

[View course details in MyPlan: REHAB 593](#)

REHAB 594 Clinical Fieldwork in Occupational Therapy (10, max. 30) *Rollinger*

12-week, full-time fieldwork, delivering occupational therapy services to clients focusing on application of meaningful occupation under direct supervision. Exposure to varied clients across the lifespan and in various settings reflective of current practice. Students must complete a minimum of two 12-week placements.

Credit/no-credit only.

[View course details in MyPlan: REHAB 594](#)

REHAB 595 Clinical Affiliation in Physical Therapy ([2-10]-, max. 30) *Robinson*

Clinical practice of physical therapy techniques under supervision in community-based clinics. Credit/no-credit only.

[View course details in MyPlan: REHAB 595](#)

REHAB 596 Electromyography and Clinical Neurophysiology (4)

Didactic course covering electromyography and clinical neurophysiology. First part covers basic neurophysiology and second covers electromyography, nerve conduction studies, somatosensory-evoked potentials, residual- and auditory-evoked potentials, single fiber EMG, late response, quantitative analysis, and macro EMG. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

Instructors: Kraft

[View course details in MyPlan: REHAB 596](#)

REHAB 597 Electromyography and Electrodiagnosis Laboratory (1-)

Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Instructors: Kraft Credit/no-credit only.

[View course details in MyPlan: REHAB 597](#)

REHAB 598 Electromyography and Electrodiagnosis Laboratory (-1-)

Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Instructors: Kraft Credit/no-credit only.

[View course details in MyPlan: REHAB 598](#)

REHAB 599 Electromyography and Electrodiagnosis Laboratory (-1)

Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor. Instructors: Kraft Credit/no-credit only.

[View course details in MyPlan: REHAB 599](#)

REHAB 600 Independent Study or Research (*-)

Credit/no-credit only.

[View course details in MyPlan: REHAB 600](#)

REHAB 683 P-Rehabilitation medicine Clerkship- Pediatric, Boise, ID (8)

Incorporates material of REHAB 685 and expands into disabling pediatric disease. School planning, family counseling, community support services included. Four week, full time clerkship permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics. Prerequisite: Third year medical student standing.

[View course details in MyPlan: REHAB 683](#)

REHAB 684 Rehabilitation Elective - Boise, ID (8)

Students work directly with the physician, seeing a variety of patients with musculoskeletal diagnoses as outlined in the objectives for the course, as well as working as a member of a multidisciplinary rehab team. They also observe procedures such as EMGs, nerve conduction studies, and a variety of peripheral and central injections. Students participate in care of injured workers and their return to work. (Four weeks).

[View course details in MyPlan: REHAB 684](#)

REHAB 685 P-Chronic Disease and Disability (4)

Structured clinical experience on rehabilitation medicine services. Differences between acute and chronic medicine, identification of disability problems, and therapeutic techniques for removing disability. Hospitals are within University system, local area, and WWAMI area. Prerequisite: third-year medical student standing. Instructors: McNalley

[View course details in MyPlan: REHAB 685](#)

REHAB 686 P-Rehabilitation Medicine Clerkship - Pediatrics (8/12)

Incorporates material of REHAB 685 and expands into disabling pediatric disease. School planning, family counseling, community support services included. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics. Prerequisite: third-year medical student standing. Instructors: McNalley

[View course details in MyPlan: REHAB 686](#)

REHAB 687 P-Rehabilitation Medicine Clerkship (8/12)

Incorporates material of REHAB 685 and expands into disability problems. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for careers in family medicine, internal medicine, rheumatology, cardiology, neurology, geriatrics, orthopedic surgery, neurosurgery, and cardiovascular surgery. Prerequisite: third-year medical student standing. Instructors: McNalley

[View course details in MyPlan: REHAB 687](#)

REHAB 689 P-Spinal Cord Injury (8/12)

Introduction to diagnosis, management, rehabilitation of patients with spinal-cord injuries. Interaction with rehabilitation team, psychiatrists, and subspecialists in urology, neurosurgery, and plastic surgery. Performance at subintern level expected. Veterans' Administration Medical Center only. Prerequisite: MED 665, SURG 665. Instructors: McNalley

[View course details in MyPlan: REHAB 689](#)

REHAB 697 P-Rehabilitation Medicine Special Elective (*, max. 24)

Equivalent to REHAB 686, REHAB 687, or REHAB 688. Student arranges with another university, using the "special assignment form." Students qualify after review, similar experience at another university. Prerequisite: permission of instructor. Instructors: McNalley

[View course details in MyPlan: REHAB 697](#)

REHAB 699 P-WWAMI Rehabilitation Medicine Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

[View course details in MyPlan: REHAB 699](#)

REHAB 700 Master's Thesis (*-)

Credit/no-credit only.

[View course details in MyPlan: REHAB 700](#)

REHAB 800 Doctoral Dissertation in (*-)

Offered: AWSpS.

[View course details in MyPlan: REHAB 800](#)

REHAB 801 Practice Doctorate Project/Capstone ([1-4]-, max. 12)

Credit/no-credit only. Offered: AWSpS.

SCHOOL OF MEDICINE

REHABILITATION MEDICINE

REHAB MED - PROSTHETICS & ORTHOTICS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

RHB PO 501 Prosthetics and Orthotics Skills (1)

Emphasizes the development of psychomotor skills for the application of contemporary technology uses. Practice and discussion of material and design theories related to durability, weight, and ease of fabrication to encourage problem-solving skills for independent practice. Credit/no-credit only. Offered: A.

[View course details in MyPlan: RHB PO 501](#)

RHB PO 502 Professional and Practice Issues (1)

Provides an overview of professional and practice issues in prosthetics and orthotics. Includes discussion of healthcare, policy, and systems; introduction to reimbursement, Medicare and Medicaid rules and regulations; practice management; bioethics; professional organizations; legislative issues; and medical ethics and compliance. Offered: Sp.

[View course details in MyPlan: RHB PO 502](#)

RHB PO 511 Upper Limb Prosthetics I (4)

Covers upper limb prosthetics providing students with background knowledge of rehabilitation planning and principles of below elbow prosthetic management and prescription consideration. With direct patient contact, students assess and then formulate, implement, and evaluate a prosthetic treatment plan. Offered: A.

[View course details in MyPlan: RHB PO 511](#)

RHB PO 512 Upper Limb Prosthetics II (4)

Integrates principles from upper limb prosthetics I, focusing on above-elbow prosthetic management. Encourages critical thinking and appropriate clinical decision-making through discussions and case study exercises that include body-powered, externally-powered, and hybrid systems. Offered: Sp.

[View course details in MyPlan: RHB PO 512](#)

RHB PO 515 Upper Limb Orthotics (3)

Focuses on the integration of information acquired in previous foundational courses in anatomy and patient evaluation procedures with knowledge and skills of orthotic principles and theories related to upper limb orthotic interventions and patient management.

[View course details in MyPlan: RHB PO 515](#)

RHB PO 521 Lower Limb Prosthetics and Orthotics I: Theory and Application (5)

Integrates prior core foundational knowledge (anatomy, kinesiology, medical science, gait analysis, patient evaluation procedures, and functional skills) with new knowledge of prosthetic and orthotic theory, patient evaluation, and clinical practice. Analyzes, evaluates, and synthesizes principles and theories in developing intervention plans for individuals with lower limb dysfunction or amputation. Offered: S.

[View course details in MyPlan: RHB PO 521](#)

RHB PO 522 Lower Limb Prosthetics I: Clinical Practice (4)

Explains and applies biomechanical principles of prosthetic gait and alignment to treatment of individuals with amputations below the knee. Students develop individualized treatment plans that demonstrate analysis of client needs, application of transtibial socket design, prescription principles, and components. Integrates knowledge of available research and protocols into the planning process. Offered: S.

[View course details in MyPlan: RHB PO 522](#)

RHB PO 523 Lower Limb Orthotics I: Clinical Practice (4)

Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: S.

[View course details in MyPlan: RHB PO 523](#)

RHB PO 524 Lower Limb Prosthetics and Orthotics II: Theory and Application (5)

Integrates prior foundational knowledge acquired in RHB PO 521 with new knowledge and skills of prosthetic and orthotic theory and practice. Students actively analyze, evaluate, and synthesize principles and theories in the development of prosthetics/orthotics intervention plans for individuals with lower limb dysfunction or amputation. Prerequisite: RHB PO 521. Offered: A.

[View course details in MyPlan: RHB PO 524](#)

RHB PO 525 Lower Limb Prosthetics II: Clinical Practice (3)

Includes advanced instruction in concepts and skills developed in Lower Limb Prosthetics I. Offered: A.

[View course details in MyPlan: RHB PO 525](#)

RHB PO 526 Lower Limb Orthotics II: Clinical Practice (3)

Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate, develop, and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: A.

[View course details in MyPlan: RHB PO 526](#)

RHB PO 527 Pediatric Prosthetics and Orthotics (2)

Focuses on the integration of information from previous coursework focusing on specific pediatric medical conditions and interventions. Includes discussion of pathology/pathophysiology, etiology, clinical presentation, natural history, and surgical and medical management. Discusses implications of various medical interventions and their functional considerations based on the available literature. Offered: ASp.

[View course details in MyPlan: RHB PO 527](#)

RHB PO 528 Lower Limb Prosthetics III: Theory and Application (5)

Develops individualized prosthetic treatment plans based on a comprehensive knowledge of prosthetic gait, alignment, transfemoral socket design, and component principles. Develops support treatment plans by integrating knowledge of available research and treatment protocols into the decision-making process. Offered: W.

[View course details in MyPlan: RHB PO 528](#)

RHB PO 529 Lower Limb Prosthetics III: Clinical Practice (6)

Advanced instruction in application of biomechanical principles of prosthetic gait and alignment to treatment of

individuals with amputations above the knee. Includes obtaining histories, assessing physical function, and taking residual limb impressions and measurements to prove prosthetic care. Offered: W.

[View course details in MyPlan: RHB PO 529](#)

RHB PO 530 Lower Limb Orthotics III: Theory and Application (4)

Integrates knowledge and competencies from prior courses with new knowledge of orthotics management of the lower limb involving the knee and hip. Students acquire knowledge of components and design options for dysfunction of the hip and knee. Offered: WSp.

[View course details in MyPlan: RHB PO 530](#)

RHB PO 531 Lower Limb Orthotics III: Clinical Practice (4)

Integrates prior knowledge of design principles, material science, and fabrication process; acquires knowledge of components and design options; and analyzes efficacy of orthotic treatment plans in achieving desired biomechanical goals and outcomes. Offered: WSp.

[View course details in MyPlan: RHB PO 531](#)

RHB PO 532 Spinal Orthotics (5) *Yamane*

Integrates competencies gained from core foundational courses with additional theories and principles of orthotic management of spinal pathologies including scoliosis, trauma, and congenital and degenerative etiologies. Offered: Sp.

[View course details in MyPlan: RHB PO 532](#)

RHB PO 533 Spinal Orthotics I (2)

Integrates prior knowledge (anatomy, physiology, patient evaluation skills) obtained in the foundational courses with knowledge and skills of orthotic theory and practice related to trauma and degenerative etiologies. Learning is achieved through lectures, discussion, and laboratory experiences. Offered: AWSp.

[View course details in MyPlan: RHB PO 533](#)

RHB PO 534 Spinal Orthotics II (3)

Integrate prior knowledge of anatomy, physiology, and clinical evaluation with knowledge and skills of orthotic theory and practice related to scoliosis and kyphosis. Learning is achieved through lectures, discussion, and laboratory experiences.

[View course details in MyPlan: RHB PO 534](#)

RHB PO 541 Engineering Concepts (2)

Solves problems based on principles of mechanics, strength of materials, force analyses, and fatigue that are related to prosthetic and orthotic design. Applies basic science to component failure. Discusses fiber reinforced materials, thermoforming plastics and hydraulic knee units. Offered: Sp.

[View course details in MyPlan: RHB PO 541](#)

RHB PO 561 Clinical Rotation I (2)

Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: S.

[View course details in MyPlan: RHB PO 561](#)

RHB PO 562 Clinical Rotation II (1)

Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: A.

[View course details in MyPlan: RHB PO 562](#)

RHB PO 563 Clinical Rotation III (1)

Students actively participate in the provision of prosthetics and orthotics treatment services and develop clinical patient care skills under the mentorship of clinical preceptors. Offered: W.

[View course details in MyPlan: RHB PO 563](#)

RHB PO 564 Clinical Rotation IV (1)

Students actively participate in the provision of prosthetics and orthotics treatment services and refine clinical patient care, decision-making, and problem-solving skills under the mentorship of clinical preceptors. Offered: Sp.

[View course details in MyPlan: RHB PO 564](#)

RHB PO 581 Outcome Measures for the Prosthetics and Orthotics Clinic (2)

Examines development and use of health-related outcome measures. Focuses on the relationship between measurement constructs and patient populations as well as psychometric properties. Students select, implement, and critically evaluate patient outcome measures. Offered: Sp.

[View course details in MyPlan: RHB PO 581](#)

RHB PO 582 Critical Evaluation of the Prosthetics and Orthotics Literature (1)

Examines and applies appropriate methods of analyzing prosthetics/orthotics literature. Offered: A.

[View course details in MyPlan: RHB PO 582](#)

RHB PO 583 Evidence Based Practice I (3)

Focuses on the use and critical evaluation of evidence to answer clinical problems. Encourages students to become consumer of evidence by developing an understanding of how to acquire and incorporate evidence into routine clinical practice. Offered: W.

[View course details in MyPlan: RHB PO 583](#)

RHB PO 584 Evidence Based Practice II (3)

Covers developing a treatment plan based on theory, evidence, and experience; and proposing a quantitative and qualitative assessment strategy to evaluate the developed treatment. Encourages students to become consumers of evidence to answer clinically relevant questions. Offered: Sp.

Surgery

[*Display as tabs*](#)

Department Overview

BB487 University of Washington Medical Center

The Department of Surgery carries out instruction during all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency-room clerkship is also a required part of the curriculum. The department offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department's clinical activities, including but not limited to trauma, cardiothoracic surgery, plastic surgery, vascular surgery, transplantation, surgical critical care, pediatric surgery, and the management of burn patients.

SCHOOL OF MEDICINE

SURGERY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

SURG 498 Undergraduate Thesis (*, max. 35)

Offered to those students who have engaged in undergraduate research in general surgery. (Full- or part-time.)

[View course details in MyPlan: SURG 498](#)

SURG 499 Undergraduate Research (*, max. 35)

Provides an opportunity to participate in ongoing research projects or carry out an independent research project under supervision of Department of Surgery faculty. Practical experience in experimental design and execution is provided under direct supervision of selected faculty members. (Full- or part-time.)

[View course details in MyPlan: SURG 499](#)

SURG 505 P-Preceptorship in Surgery (1, max. 12)

Opportunity for first- and second-year medical students to gain personal experience with clinical faculty members in the community. Students observe general aspects of private practice, including clinical problems seen; practice limitation; doctor-doctor, doctor-patient, and doctor-nurse relationships in the office and hospital. Prerequisite: permission of department.

[View course details in MyPlan: SURG 505](#)

SURG 598 P-Surgery Independent Study and Remediation (*, max. 8)

Designed for medical students required to complete additional study related to the required Surgery clerkship offered during the patient care phase of the School of Medicine curriculum. Intended for students in remedial or extended programs to master fund of knowledge. Prerequisite: department permission. Offered: AWSpS.

[View course details in MyPlan: SURG 598](#)

SURG 600 Independent Study or Research (*-)

[View course details in MyPlan: SURG 600](#)

SURG 602 P-Clinical Clerkship - Coeur D'Alene, ID (*, max. 24)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

[View course details in MyPlan: SURG 602](#)

SURG 603 P-Clinical Clerkship - Spokane VAMC (*, max. 24)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating room.

[View course details in MyPlan: SURG 603](#)

SURG 604 P-Clinical Clerkship - Bozeman, MT (*, max. 24)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

[View course details in MyPlan: SURG 604](#)

SURG 605 P-Clinical Clerkship - Swedish Medical Center (12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

[View course details in MyPlan: SURG 605](#)

SURG 606 P-Clinical Clerkship - Anchorage, AK (12)

Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

[View course details in MyPlan: SURG 606](#)

SURG 630 P-WRITE Surgery Clinical Clerkship (*, max. 24)

Basic clinical clerkship for students enrolled in the WRITepProgram. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

[View course details in MyPlan: SURG 630](#)

SURG 631 P-LIC Surgery Clinical Clerkship (12)

Basic clinical clerkship for students enrolled in LIC program. Prerequisite: Acceptance into LIC program. Offered: AWSpS.

[View course details in MyPlan: SURG 631](#)

SURG 638 P-Rural Surgery - Lewistown, MT (8)

Learn to identify and describe the most common surgical problems presenting in the particular community to which you are assigned. Prerequisite: Surgery require clerkship Offered: AWSpS.

[View course details in MyPlan: SURG 638](#)

SURG 639 P-Rural Surgery - Polson, MT (8)

Evaluate and diagnose surgical referrals; do pre-op evaluations and counseling/discussion of surgical procedures. Evaluation of post operative patients in the hospital and clinic. Assessment of acute care surgical patients in the ED and hospital. Trauma resuscitations. Prerequisite: Surgery and Medicine required clerkships Offered: AWSpS.

[View course details in MyPlan: SURG 639](#)

SURG 640 P-Rural Surgery- Dillon, MT (8)

Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department. Offered: AWSpS.

[View course details in MyPlan: SURG 640](#)

SURG 641 P-Rural Surgery- Glasgow, MT (8)

Designed to supplement basics learned in SURG 665. opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery

required clerkship and permission of department. Offered: AWSpS.

[View course details in MyPlan: SURG 641](#)

SURG 642 P-Rural Surgery Clerkship - Pullman, WA (8)

Designed to supplement basics learned in surgery required clerkship. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Highly suggested for student entering primary care. Prerequisite: required surgery clerkship; medicine clerkship.

[View course details in MyPlan: SURG 642](#)

SURG 644 P-Rural Surgery Clerkship - Lewiston, ID (8)

Designed to supplement basics learned in surgery required clerkship. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Highly suggested for student entering primary care. Prerequisite: required surgery clerkship; medicine clerkship.

[View course details in MyPlan: SURG 644](#)

SURG 646 P-Rural Surgery Clerkship - Gillette (8)

Designed to supplement basics learned in surgery required clerkship. Provides an excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery clerkship; medicine clerkship; permission of the department.

[View course details in MyPlan: SURG 646](#)

SURG 647 P-Rural Surgery Clerkship - Powell (8)

Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

[View course details in MyPlan: SURG 647](#)

SURG 648 P-Rural Surgery Clerkship - Libby (8)

Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

[View course details in MyPlan: SURG 648](#)

SURG 649 P-Rural Surgery Clerkship - Lewistown (8)

Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

[View course details in MyPlan: SURG 649](#)

SURG 650 P-Rural Surgery Clerkship - Twin Falls (8)

Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

[View course details in MyPlan: SURG 650](#)

SURG 651 P-Community Surgery Clerkship - Rock Springs, WY (8)

Designed to supplement basics learned in Surgery 665. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Encouraged for students entering primary care. Prerequisite: completed required Surgery and Medicine clerkships.

[View course details in MyPlan: SURG 651](#)

SURG 652 P-Plastic Surgery - Spokane (8)

Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities.

Prerequisite: surgery and medicine required clerkships.

[View course details in MyPlan: SURG 652](#)

SURG 653 P-Pediatric Surgery - Spokane (8)

Student functions as a subintern directly assisting on the services and is an integral part of the team. Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 653](#)

SURG 654 P-Cardiothoracic Surgery - Spokane (4-8)

The student functions as a subintern and directly assists on the service and is an integral part of the team.

Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 654](#)

SURG 656 P-Trauma/Acute Care Surgery - Boise (8)

The student functions as a subintern and directly assists on the service and is an integral part of the team at St. Alphonsus Trauma Services. (Four weeks).

[View course details in MyPlan: SURG 656](#)

SURG 657 P-Vascular Surgery - Spokane (4/8)

Student spends two or four weeks at the Vascular Institute in Spokane. The student functions as a subintern and directly assists on the service and is an integral part of the team.

[View course details in MyPlan: SURG 657](#)

SURG 658 P-Ambulatory Surgery Clerkship - Mary Bridge (4)

Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

[View course details in MyPlan: SURG 658](#)

SURG 659 P-Ambulatory Surgery Clerkship - Madigan (4-8, max. 12)

Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

[View course details in MyPlan: SURG 659](#)

SURG 660 P-Ambulatory Surgery Clerkship - Group Health (4)

Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

[View course details in MyPlan: SURG 660](#)

SURG 661 P-Surgical Intensive Care Unit Sub-Internship - VA (8)

Designed to augment experience gained in SURG 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 661](#)

SURG 662 P-Community Surgery Clerkship - Longview (8)

Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

[View course details in MyPlan: SURG 662](#)

SURG 663 P-Subinternship in General Surgery - Virginia Mason (*, max. 16)

Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 663](#)

SURG 664 P-Subinternship in General Surgery - VAMC (*, max. 16)

Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 664](#)

SURG 665 P-Clinical Clerkship - UWMC (*, max. 24)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

[View course details in MyPlan: SURG 665](#)

SURG 666 P-Clinical Clerkship - Boise (12)

Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

[View course details in MyPlan: SURG 666](#)

SURG 667 P-Clinical Clerkship - Spokane (12)

Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

[View course details in MyPlan: SURG 667](#)

SURG 668 P-Clinical Clerkship - Casper (12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

[View course details in MyPlan: SURG 668](#)

SURG 669 P-Clinical Clerkship - Billings (12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

[View course details in MyPlan: SURG 669](#)

SURG 670 P-Clinical Clerkship - Missoula (12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

[View course details in MyPlan: SURG 670](#)

SURG 671 P-Clinical Clerkship - Madigan (12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision-making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

[View course details in MyPlan: SURG 671](#)

SURG 672 P-Clinical Clerkship - HMC (*, max. 12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

[View course details in MyPlan: SURG 672](#)

SURG 673 P-Clinical Clerkship - VA (*, max. 12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

[View course details in MyPlan: SURG 673](#)

SURG 674 P-Clinical Clerkship - Virginia Mason (*, max. 12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.

[View course details in MyPlan: SURG 674](#)

SURG 675 P-Clinical Clerkship - Caldwell, ID (*, max. 12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

[View course details in MyPlan: SURG 675](#)

SURG 676 P-Pediatric Cardiothoracic Surgery (8)

Students will learn about the technical and physiological aspects of cardiopulmonary treatments. Prerequisite: Surgery required clerkship Offered: AWSpS.

[View course details in MyPlan: SURG 676](#)

SURG 677 P-Clinical Clerkship - Sheridan, WY (*, max. 12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

[View course details in MyPlan: SURG 677](#)

SURG 678 P-Clinical Clerkship - Kalispell, MT (12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

[View course details in MyPlan: SURG 678](#)

SURG 679 P-Clinical Clerkship - Wenatchee, WA (12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

[View course details in MyPlan: SURG 679](#)

SURG 680 P-Clinical Clerkship - Northwest Hospital (1-12, max. 12)

Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Offered: AWSpS.

[View course details in MyPlan: SURG 680](#)

SURG 681 P-Peripheral Vascular Disease (4/8, max. 8)

Peripheral arterial and venous problems, including methods of clinical evaluation; new diagnostic procedures; and the available methods of treatment. Patient workup, performance of diagnostic studies, and presentation of case material to the staff. Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 681](#)

SURG 682 P-Clinical Burn Care (*, max. 12)

Offered on the burn unit of Harborview Medical Center. Exposure to the care of patients with thermal injury, including management of severe metabolic and septic problems and opportunity to participate in surgical procedures. Exposure to plastic and reconstructive surgery. Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 682](#)

SURG 683 P-Pediatric Surgery Externship (8/12)

Surgical conditions peculiar to the particular age group with a preponderance of congenital and neoplastic conditions that are amenable to surgical treatment. Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 683](#)

SURG 684 P-Pediatric Surgery Clerkship- Boise (8)

Student functions as a subintern directly assisting on the services and is an integral part of the team. Held in Boise, ID. Offered: AWSpS.

[View course details in MyPlan: SURG 684](#)

SURG 685 P-Cardiothoracic Surgery Externship (*, max. 12)

Serve as subintern, participate in patient care while learning cardiopulmonary hemodynamics of cardiac and thoracic surgery. Observe a wide variety of both cardiac and thoracic disease entities. Participate in the open-heart procedures in the operating room. Opportunity to gain additional understanding of physiology of cardiopulmonary bypass.

[View course details in MyPlan: SURG 685](#)

SURG 686 P-Plastic Surgery Clerkship and Preceptorship (*, max. 12)

Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities.

Prerequisite: surgery and medicine required clerkships.

[View course details in MyPlan: SURG 686](#)

SURG 687 P-Transplantation Surgery Clerkship (8)

Clerkship is in the University regional multi-organ transplantation center. Student participates fully in the care of all transplant patients, on twice daily multidisciplinary rounds, in pre-operative conference, and in the operating room and on the donor harvest team. Weekly didactic teaching sessions. Prerequisite: surgery and medicine required clerkships.

[View course details in MyPlan: SURG 687](#)

SURG 688 P-Subinternship in General Surgery (*, max. 12)

Offered on the general surgery wards of the University-affiliated hospitals. Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff.

Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 688](#)

SURG 689 P-Community Surgery Clerkship - Coeur d' Alene (8)

Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.

[View course details in MyPlan: SURG 689](#)

SURG 690 P-Alaska Native Medical Center Surgery Sub-Internship (8/12)

Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a specialized population of patients. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.

[View course details in MyPlan: SURG 690](#)

SURG 691 P-Surgical Intensive Care Unit Sub-Internship - HMC (8)

Designed to augment experience gained in SURG 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery required clerkship.

[View course details in MyPlan: SURG 691](#)

SURG 692 P-Ambulatory Surgery Clerkship - Seattle Children's (4)

Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

[View course details in MyPlan: SURG 692](#)

SURG 693 P-Rural Surgery Clerkship - Buffalo (8)

Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

[View course details in MyPlan: SURG 693](#)

SURG 694 P-Rural Surgery Clerkship - Riverton (8)

Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

[View course details in MyPlan: SURG 694](#)

SURG 695 Vascular Surgery (8/12)

The student spends four weeks on the vascular surgery at Harborview Medical Center. The student functions as a subintern and directly helps the residents manage all patients on the service and is an integral part of the OR team.

[View course details in MyPlan: SURG 695](#)

SURG 696 P-Breast Surgery - Spokane (4/8)

Two or four weeks at the Breast Center in Spokane. Student functions as a subintern directly assisting on the service and is an integral part of the team.

[View course details in MyPlan: SURG 696](#)

SURG 697 P-Surgery Special Electives (*, max. 24)

Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: surgery required clerkship and permission of department.

[View course details in MyPlan: SURG 697](#)

SURG 698 P-Clinical Clerkship - Fairbanks (*, max. 24)

Includes the diagnosis and management of surgical problems. Focuses on the physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.

[View course details in MyPlan: SURG 698](#)

SURG 699 P-WWAMI Surgery Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

Urology

[Display as tabs](#)

Department Overview

BB1115 Health Sciences

Urology is the surgical discipline concerned with diseases of the urinary tract in males and females, and the genital system in the male. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal diseases, reproductive biology, neuropathology, renal stone formation, and transplantation.

Clinically the field encompasses a large variety of technical skills including real-time imaging and manipulation, endoscopy, laparoscopy and robotics, and open surgery. Medical diagnosis and treatment are a large part of the discipline.

The department is actively involved in patient care, instruction, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses, and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator at (206) 731-3205 for further information.

SCHOOL OF MEDICINE

UROLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

UROL 498 Undergraduate Thesis (*, max. 35)

Provides an opportunity for medical students to write in the area of urology.

[View course details in MyPlan: UROL 498](#)

UROL 499 Undergraduate Research (*, max. 35)

The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students.

[View course details in MyPlan: UROL 499](#)

UROL 501 P-Urology Preceptorship (1, max. 12)

Individual experiences with one or more of the full-time department faculty members covering research, teaching, and patient care. Students observe activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- or second-year medical student standing; permission of instructor.

[View course details in MyPlan: UROL 501](#)

UROL 675 P-Urology Preceptorship (*, max. 8)

Student follows a private practice preceptor in all of his or her work. Becomes acquainted with the office management of urological problems. (Two or four weeks). Prerequisite: UROL 680, HUBIO 562.

[View course details in MyPlan: UROL 675](#)

UROL 679 P-Urology Clerkship - Boise VA (*, max. 8)

Two or four week rotation. Full activities of clinical service. Emphasizes basic principles of urology. Prerequisite: HUBIO 562.

[View course details in MyPlan: UROL 679](#)

UROL 680 P-Urology Clerkship (*, max. 8)

Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562. Instructors: Dalkin, Grady, Krieger, Lendvay, Porter, Voelzke, Wessells, Yang

[View course details in MyPlan: UROL 680](#)

UROL 681 P-Female Urology (4)

Observation of cases of lower urinary tract disorders specific to women, emphasizing behavioral management

and multidisciplinary care. Ninety-five percent of cases observed are women. Not intended as the only exposure²³¹¹ to urology for students considering urology as career choice. Prerequisite: third- or fourth-year standing and permission of instructor. Instructors: J. Miller

[View course details in MyPlan: UROL 681](#)

UROL 682 P-Urology Clerkship - Spokane (8)

Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562.

[View course details in MyPlan: UROL 682](#)

UROL 683 P-Urology Clerkship - Boise (*, max. 8)

Full activities of clinical service. Basic principles of urology emphasized. (Two or four weeks). Prerequisite: HUBIO 562.

[View course details in MyPlan: UROL 683](#)

UROL 684 P-Urology Clerkship - Billings (*, max. 8)

Two or four week rotation. Includes full activities of clinical service. Emphasizes basic principles of urology. Prerequisite: HUBIO 562.

[View course details in MyPlan: UROL 684](#)

UROL 685 P-Urology Sub-Internship (*, max. 12)

Subintern is responsible for patient workups and for preoperative and postoperative care and participates in the operating room. Prerequisite: MED 665 or pediatrics basic clerkship, or permission of instructor. Instructors: Dalkin, Grady, Krieger, Lendvay, Porter, Voelzke, Wessells, Yang

[View course details in MyPlan: UROL 685](#)

UROL 690 P-Urology Specialties (*, max. 8)

For those who wish further exposure to a specific aspect of urology. Students spend time with one attending at University of Washington Medical Center, Harborview Medical Center, Seattle Children's Hospital, or Veterans' Administration Hospital studying oncology, infections, infertility, stone disease, impotence, or other aspects of urology. Prerequisite: UROL 680 and permission of instructor.

[View course details in MyPlan: UROL 690](#)

UROL 697 P-Urology Special Electives (*, max. 24)

Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor.

[View course details in MyPlan: UROL 697](#)

UROL 699 P-WWAMI Urology Special Electives (*, max. 24)

By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

School Overview

T301 Health Sciences

Dean

Azita Emami

Associate Deans

Basia Belza, Interim Associate Dean for Academic Affairs Joie Whitney, Associate Dean for Research

Nancy Woods, Interim Associate Dean for Diversity, Equity, and Inclusion

Nurse professionals are members of interdisciplinary teams in clinics, hospitals, and community settings, and work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. Nurse practitioners fill critical healthcare needs in both urban and rural settings, often for portions of the population who have not received adequate healthcare. Nurse scientists conduct important research about a variety of health problems and how best to promote health, prevent disease, and care for people who are ill. Nurses also teach in colleges and universities throughout the world.

(206) 543-8736

sonas@uw.edu

The School of Nursing offers the following programs of study:

- Bachelor of Science in Nursing degree with eligibility to take the licensure examination to become a registered nurse.
- An accelerated Bachelor of Science in Nursing option for candidates with an existing bachelor's degree. This option provides eligibility to take the licensure examination to become a registered nurse.
- A four-quarter modification of the basic curriculum is available for the registered nurse. This BSN Completion (RN to BSN) program is available at UW Bothell and UW Tacoma, and prepares graduates go on for advanced degrees in nursing.

Bachelor of Science in Nursing

Suggested First- and Second-Year College Courses: See below, under Admission Requirements.

Admission Requirements

Admission to the nursing major occurs once a year, for autumn quarter, with an application deadline of January 15. Selection is competitive.

Application Requirements

1. Cumulative 2.00 GPA or higher
2. To be considered for admission, applicants must satisfy one of the following requirements at time of application.
 - a. Three out of the total prerequisite science courses completed with a minimum 3.00 GPA.
 - b. Four out of the total prerequisite science courses with a minimum 2.80 GPA.

The science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students, two quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 (plus MICROM 302 for UW students; non-UW applicants must take a separate microbiology laboratory if laboratory is not included in the general microbiology course); NUTR 300.

3. Together with the application and college transcript(s), applicants submit a personal statement; a resume outlining volunteer/paid health-care experience, community service, and cultural awareness; and a recommendation from a health care provider (employer or volunteer coordinator).
4. Applicants are expected to have 100 hours of health care experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application. The majority of applicants present health care experiences of several hundred hours for nine months or more.
5. After an initial review of all applications, some applicants are asked to attend a proctored essay session. The proctored essay dates are published in the admissions publication. Eligible applicants are invited via email.

Entrance Requirements: Prior to beginning the nursing program in the autumn, students must meet the following requirements:

1. A minimum of 90 credits to include the following courses:
 - a. *Written communication (10 credits):* English composition and W-courses
 - b. *Problem-solving (8 credits):* one QSR course, chosen from MATH 107, MATH 111, MATH 112, MATH 120, MATH 124, MATH 134, MATH 144, PHIL 115, PHIL 120, PHIL 470, or Q SCI 291. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490
 - c. *Visual, Literary, & Performing Arts (VLPA) (15 credits)*
 - d. *Individuals & Societies (I&S) (15 credits):* to include NURS 201 or equivalent
 - e. *Natural World (NW) (26-33 credits):* to include CHEM 120, CHEM 220, CHEM 221 (three quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 (plus MICROM 302 for

UW students; non-UW applicants must take a separate microbiology laboratory if laboratory not included in general microbiology course); NUTR 300

f. Electives to complete 90 credits

2. A minimum 2.00 cumulative GPA, and a minimum 2.0 grade for each prerequisite course. Because admission is competitive, the GPA for admission is usually significantly higher.
3. All applicants must be exempted from all English language proficiency requirements at UW in order to start the program. If offered admission the applicant is required to pay for a background check to be run by a company specified by the School of Nursing.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, nursing.uw.edu. To contact the School of Nursing Office of Academic Services, call (206) 543-8736 or 1 (800) 759-NURS or email sonas@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, visit nursing.uw.edu/admissions/info-sessions/.

Major Requirements

Students need a minimum of 180 credits to graduate with a bachelor's degree from the University of Washington. The required credits in the nursing curriculum total 94; thus 86 credits must be earned through general education, nursing prerequisites, and elective courses.

94 credits as follows:

1. *Nursing Foundations (52 credits)*: NURS 301, NURS 303, NURS 304, NURS 308, NURS 309, NURS 310, NURS 401, NURS 404, NURS 405, NURS 407, NURS 410, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420
2. *Clinical Nursing (39 credits)*: NCLIN 302, NCLIN 306, NCLIN 403, NCLIN 407, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418
3. *Nursing Research and Methods (3 credits)*: NMETH 403

Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

Accelerated Bachelor of Science in Nursing option

Admission Requirements

Admission occurs once a year, for summer quarter, with an application deadline in preceding autumn quarter. Selection is competitive.

Application Requirements

1. Cumulative 2.80 college-level GPA or higher.
2. At least four of the total prerequisite science courses completed with a minimum 3.0 grade in each course, and a cumulative 3.30 GPA or higher in these courses. Science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter

chemistry series for UW students; two quarter sequence -- one general chemistry and one organic -- for non-UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non-UW applicants must take a separate microbiology lab if lab is not included in the general microbiology course); NUTR 300.

3. Together with the application and college transcript(s), applicant submits a series of personal statements; a resume outlining volunteer/paid healthcare experience, community service, and cultural awareness; and a recommendation from a healthcare provider (employer or volunteer coordinator).
4. Applicants are expected to have 100 hours of healthcare experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application. The majority of applicants present healthcare experiences of several hundred hours for nine months or more.
5. All applicants are asked to attend a proctored essay session.

Entrance Requirements:

Prior to beginning the nursing program in summer, students must meet the following requirements:

1. Bachelor's degree in a non-nursing field.
2. Completion of a lifespan growth and development course -- NURS 201 or equivalent.
3. Completion of one statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490.
4. Completion of all Natural World courses: CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non UW applicants must take a separate microbiology laboratory if laboratory not included in general microbiology course.); NUTR 300. Minimum 3.30 cumulative GPA in these courses.
5. Minimum 3.00 cumulative GPA, and minimum 3.0 grade for each prerequisite course.
6. All applicants must be exempted from all English language proficiency requirements at UW in order to start the program. If offered admission the applicant is required to pay for a background check to be run by a company specified by the School of Nursing,

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, nursing.uw.edu. To contact the School of Nursing Office of Academic Services, call (206) 543-8736 or 1 (800) 759-NURS or email sonas@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, visit nursing.uw.edu/admissions/info-sessions/.

Major Requirements

94 credits, as follows:

1. *Nursing Foundations (52 credits)*: NURS 301, NURS 303, NURS 304, NURS 308, NURS 309, NURS 310, NURS 401, NURS 404, NURS 405, NURS 407, NURS 410, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420
2. *Clinical Nursing (39 credits)*: NCLIN 302, NCLIN 306, NCLIN 403, NCLIN 407, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418
3. *Nursing Research and Methods (3 credits)*: NMETH 403

Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: The School of Nursing prepares its graduates to function as generalists in professional nursing practice and to collaborate with other health-care providers. The BSN/ABSN undergraduate curriculum emphasizes theory and clinical practice to ensure critical thinking, human caring, and clinical expertise. Clinical experiences are provided in institutional and community settings for preventive and acute care. For the ten goals of the BSN degree program, visit nursing.uw.edu/admissions/bsn/curriculum/.
- *Instructional and Research Facilities*: Learning Laboratory
- *Honors Options Available*: With College Honors (Completion of Honors core curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research Internships and Service Learning*: Students complete eight clinical courses during the BSN program beginning with the first quarter of the program. Each student experiences placements in medical-surgical nursing, pediatric, family nursing, psychosocial mental health, and community-based nursing. Clinical hours per course range from six hours/week during the first quarter to 24 hours/week during the final quarter.
- *Department Scholarships*: Limited scholarships based on student need established by FAFSA. Students are invited to apply after they have been admitted to the program by completing the School of Nursing Financial Aid application.
- *Student Organizations/Associations*: Students may join the Professional Organization of Nursing Students (PONS) after admission to the program. PONS' involvement spans all aspects of the undergraduate program: recruitment, orientation, education, fund raising, and social events.

Graduate Program

Graduate Program Coordinator
T301 Health Sciences, Box 357260
(206) 543-8736
sonas@uw.edu

The School of Nursing offers graduate study leading to the degrees of Master of Nursing (MN), Master of Science (MS), Doctor of Nursing Practice (DNP) and Doctor of Philosophy in nursing science (PhD). The DNP program admits RNs interested in advanced clinical practice. The PhD program prepares students for roles as scientists,

scholars, and educators. Neither the MS nor the PhD program requires RN licensure for admission.

The School of Nursing offers an MN degree with a focus in community health systems nursing. A thesis or scholarly project is required for the MN degree. A concurrent MN/MPH degree is also available.

The MS degree is in [Clinical Informatics and Patient-Centered Technologies \(CIPCT\)](#). A thesis or scholarly project is required for the MS degree.

The Doctor of Nursing Practice (DNP) program admits postbaccalaureate or post-graduate students for either advanced practice registered nursing or advanced systems and population systems health. The following tracks are available (subject to change; visit School of Nursing website): adult gerontology primary care nurse practitioner; community health-systems nursing; family nurse practitioner; pediatric nurse practitioner; pediatric clinical nurse specialist; neonatal clinical nurse specialist; neonatal nurse practitioner; nurse midwifery; perinatal nurse specialist; and psychiatric mental health nurse practitioner. Applicants who already have a MN degree may apply to earn a DNP degree in their same specialty. The DNP program of study culminates in a capstone clinical investigative project.

The PhD in nursing science is a research-based degree program that trains students to create knowledge that influences and alters the health of individuals, groups, and populations, using current theories of nursing science. PhD students work closely with faculty to create their own research-based programs of study. These programs of study are based on applicants' research interests as they intersect with the current research interests of School of Nursing faculty. The PhD in nursing science program also offers an optional concentration in statistics in partnership with the Center for Statistics and the Social Sciences. All PhD students must successfully defend a dissertation at the end of their program of study.

The School of Nursing also offers a Graduate Certificate Program in Advanced Practice Nursing (GCPAPN), with sub-tracks as follows: adult nurse practitioner; psychiatric mental health nurse practitioner; advanced practice environmental health; infant mental health; pediatric nurse practitioner; nurse midwifery; neonatal clinical nurse specialist; and neonatal nurse practitioner. (See School's website for updated information.) Admission criteria vary slightly based on focus of the graduate certificate. Some graduate certificate options require an RN license and a graduate degree in nursing. All options require completion of or concurrent enrollment in a graduate degree and a minimum 3.00 GPA in the last 90 quarter (60 semester) graded credits. Admission and program requirements for these certificates are the same as requirements for the umbrella degree in which the student is enrolled.

Part-time study is available for some graduate degree programs. Coursework may be started prior to formal admission to a program as a graduate nonmatriculated student (GNM). GNM status allows the student to take non-clinical courses and to earn up to 12 graduate-level credits that may be applied to a graduate program if the student is later admitted. Time limits for acceptance of courses taken as a GNM student are six years for a master's degree and ten years for a doctoral degree from the first course to completion of the degree.

Master of Nursing

Admission Requirements

1. Baccalaureate degree from a nationally accredited nursing program with a minimum 3.00 GPA on a 4.00 scale for the last 90 graded quarter credits,
- OR -
Associate of Arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing, acceptable to the UW. In addition, RNs with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
2. A 3-credit basic course in descriptive and inferential statistics with a minimum 2.0 grade
3. An active, unrestricted United States RN license at the time of application. If the applicant does not have a Washington State license, the applicant must obtain one prior to beginning the UW Master of Nursing program.
4. Proof of English Language Proficiency. All applicants to the DNP program whose native language is not English must demonstrate English language proficiency unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
5. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admission process
6. Three letters of recommendation: one academic, one clinical, and one additional recommendation of either type. Recommendations may be submitted online through the Graduate School.
7. Admission essays relevant to the MN program objectives
8. One official transcript from each collegiate institution attended, mailed to the School of Nursing along with other application materials
9. If admitted to the MN program, the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

Degree Requirements

38-41 credits, as follows:

Nursing science and professional foundations (15 credits); clinical practice (6 credits); scholarly inquiry (11 credits with scholarly project or 14 credits with thesis); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

Master of Nursing/Master of Public Health Concurrent Degree Program (MN/MPH)

Admission Requirements

See admission requirements for MN and MPH individual degrees. Students must apply separately to, and be accepted by, each school. Students already enrolled in one school may apply for admission to the other and to the concurrent degree track. Students are encouraged to complete up to one year of study in one school before entering the other.

Degree Requirements

See MN and MPH individual degree requirements; common requirements are as follows:

At least 18 quarter credits for the master's degree in each program numbered 500 and above. Numerical grades in at least 18 quarter credits of coursework for each degree and all required courses taken graded. Up to 12 credits taken in one school can be counted toward the other school's total credit requirements, if approved by both programs. Electives for each School's program can be fulfilled by taking the required courses of the other School's program.

One thesis is required. The 9 required thesis credits can be taken in either School, which then becomes the "home" School and the source of the thesis committee chair as well as the program authorized to approve the thesis. Each School agrees to accept the other School's thesis as meeting its thesis requirement. Faculty from each School should be involved in development of the thesis and sit on the thesis committee.

Master of Science

Admission Requirements

A baccalaureate degree in any discipline from a regionally accredited institution of higher learning with a minimum 3.00 GPA on a 4.00 scale for the last 90 graded quarter credits by date of enrollment. Applicants to the Master of Science need not have a previous degree in nursing.

1. A 3-credit basic course in descriptive and inferential statistics with a minimum 2.0 grade. Visit the School of Nursing website for a list of approved statistics courses.
2. Proof of English Language Proficiency. All applicants to the MS program whose native language is not English must demonstrate English language proficiency unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that the previous degree instruction was in English. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
3. Three letters of recommendation, two from persons qualified to comment on the applicant's academic abilities and one from a person who can provide work-related (practice) information.
4. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admission process.
5. Resume describing relevant work, professional, and volunteer experiences.
6. Admission essays relevant to the MS degree program objectives.
7. If admitted to the MS program, the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.
8. For students planning to take clinical nursing courses as part of their program of study, an active, unrestricted Washington RN license is required. Other applicants to the Master of Science program are not required to have an active RN license or to have a previous degree in nursing.

Degree Requirements

46-49 credits, as follows:

Nursing science (15 credits); professional foundations (3 credits); theory development (5 credits); modes of inquiry (11 credits); scholarly project (6 credits) or thesis (9 credits); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

Doctor of Nursing Practice

Admission Requirements

1. Baccalaureate degree from a nationally accredited nursing program with a minimum 3.00 GPA on a 4.00 scale for the last 90 graded quarter credits. Applicants with a master's degree from a nationally accredited nursing program are also welcome to apply and must have a minimum 3.00 GPA on a 4.00 scale for the last 90 graded credits of the master's degree.
- OR -
Associate of Arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing, is acceptable. In addition, RNs with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
2. If an applicant has not completed a master's degree, a 3-credit basic course in descriptive and inferential statistics with a minimum 2.0 grade, taken within five years of matriculation.
3. Proof of English Language Proficiency. All applicants to the DNP program whose native language is not English must demonstrate English language proficiency unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
4. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admission process
5. Three letters of recommendation, one academic, one clinical, and one additional recommendation of either type. Recommendations may be submitted online through the Graduate School.
6. Response to three admission questions
7. Resume describing relevant work, professional, and volunteer experiences.
8. BSN equivalency, if applicable
9. One official transcript from each collegiate institution attended, mailed to the School of Nursing along with other application materials.
10. All applicants to the Doctor of Nursing Practice program must have an active, unrestricted United States RN license at the time of application. If the applicant does not have a Washington State RN license, the applicant must obtain one prior to beginning the UW Doctor of Nursing Practice program.
11. If admitted to the DNP program the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

Degree Requirements

93 credits minimum, as follows:

1. Advanced Practice (minimum 45 credits)
2. Leadership (minimum 15 credits)
3. Practice Inquiry (minimum 30 credits)

Doctor of Philosophy

Admission Requirements

1. A baccalaureate degree from a college or university of recognized rank. Although the majority of applicants have a master's degree in nursing, neither a nursing background nor RN licensure is required for admission.
2. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admission process
3. Proof of English Language Proficiency. All applicants to the PhD program whose native language is not English must demonstrate English language proficiency unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English. For questions about proof of English language proficiency, visit <http://nursing.uw.edu/node/310>, or contact the School of Nursing.
4. A scholarly writing sample (25 pages or less) providing an example of an applicant's current skills in scholarly writing. The sample should analyze a current clinical problem or professional issue using appropriate references to making an argument and supporting that position. The paper must be solely authored by the applicant. It is evaluated on multiple factors, including clarity, logical consistency, insight, and creativity or innovation. These are not accepted. If an editor is used, copies of both the edited and non-edited versions should be submitted for review.
5. Letters of recommendation from three persons knowledgeable about the individual's potential for a research career in nursing.
6. Statement of goals and research interests in response to specific questions listed on the application related to the pursuit of doctoral studies. The statement is used to evaluate the applicant's ability in written self-expression and the congruency of goals and research interests with the program objectives.
7. If admitted to the PhD program the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

Degree Requirements

93 credits minimum, as follows:

1. *Theory and Domain of Knowledge (minimum 41 credits)*: Coursework in this category provides grounding in science and nursing science fundamental to examination of more specific issues in the relationship of human health and nursing.
2. *Scholarly Inquiry (minimum 52 credits)*: Coursework deals with means of developing knowledge. Exposure to variety of approaches with encouragement to develop advanced skills is at least one methodology. Includes 27 dissertation credits.

Financial Aid

A limited number of nurse traineeships are available for pre-master's study. Other financial aid is available on a limited basis. Teaching assistantships and research assistantships are available to a limited number of students. Priority for these appointments is given to pre-doctoral students.

Additional Information

For additional information on current graduate program content, admission criteria, deadlines, as well as application forms, visit the School of Nursing website at <http://nursing.uw.edu>. To contact the Office of Academic Services, School of Nursing, call (206) 543-8736 or 1- (800) 759-NURS or email sonas@uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T310, and an information session podcast is available.

SCHOOL OF NURSING

NURSING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

NSG 432 Infants and Children: Risk and Resilience (5) I&S *C. DILLON, M. HIRSCHSTEIN, S. SPIEKER*

Provides a survey of infant and early childhood development, including prenatal and neonatal factors, and social/societal influences, using an infant mental health framework. Emphasizes how risk and protective factors can impact social-emotional, physical, and cognitive growth. Includes research-based principles and approaches to supporting families, teachers, and caregivers of young children. Offered: SpS.

[View course details in MyPlan: NSG 432](#)

NSG 505 Applied Occupational Health and Safety (3)

Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered: jointly with ENV H 559/IND E 567; Sp, even years.

[View course details in MyPlan: NSG 505](#)

NSG 506 Occupational Safety Management (4)

Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with ENV H 560; Sp.

[View course details in MyPlan: NSG 506](#)

NSG 507 Technical Aspects of Occupational Safety (3)

Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, student receive an OSHA 510 30-hour Construction Safety and Health certificate. Offered: jointly with ENV H 562; W.

[View course details in MyPlan: NSG 507](#)

NSG 508 Introduction to Ergonomics (3)

Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human

physiology or permission of instructor. Offered: jointly with ENV H 566/IND E 566; W.

[View course details in MyPlan: NSG 508](#)

NSG 511 Prevention Issues in Community Health (3)

An interdisciplinary overview of community health prevention approaches focusing on the social determinants of health and health disparity reduction among vulnerable populations. Analysis of community and population preventive strategies across the life course. Roles of advanced community health nurses as prevention leaders and consumers of prevention information are emphasized. Offered: Sp.

[View course details in MyPlan: NSG 511](#)

NSG 512 Prevention Critique in Community Health (3)

Critical examination of community health prevention programs that build community health capacity and show promise in facilitating long-term health equity among vulnerable populations. Focuses on the leading health disparities among U.S. racial and ethnic people of color, and how to be a critical program consumer, adopter, and adapter. Offered: A.

[View course details in MyPlan: NSG 512](#)

NSG 513 Psychopharmacology for Children and Adolescents (1) *Tyson, Walsh*

Reviews pertinent issues in prescribing psychoactive medications to children and adolescents. Emphasizes empirical neuroendocrine bases, and nursing management relevant to these interventions. Examines legal and ethical issues pertaining to prescribing for children and adolescents. Credit/no-credit only. Offered: S.

[View course details in MyPlan: NSG 513](#)

NSG 516 Physiological Aspects of Aging (3) *B. COCHRANE*

Focuses on biological theories of aging, major physiological and pathophysiological changes that occur in human body systems with aging. Also addresses health considerations and individual adaptations based on current research. Offered: A.

[View course details in MyPlan: NSG 516](#)

NSG 526 Introduction to Person Centered and Interprofessional Palliative Care (5)

Introduces fundamental concepts in narrative and person centered communication and interprofessional practice. Presents foundations for learning to apply an interdisciplinary approach to palliative care. Offered: A.

[View course details in MyPlan: NSG 526](#)

NSG 527 Advanced Topics in Person Centered and Interprofessional Palliative Care (5)

Interprofessional course presenting advanced concepts in narrative and person centered communication and interprofessional practice.

[View course details in MyPlan: NSG 527](#)

NSG 528 Palliative Care: Quality Metrics and System Integration (5)

Prepares students to integrate team based palliative care into a larger system, introduces community engagement, and palliative care policy issues. Specific content includes building palliative care service, engaging leadership to support palliative care, and using quality metrics to leverage and support quality care. Offered: A.

[View course details in MyPlan: NSG 528](#)

NSG 530 Leadership, Communication, and Professional Identity (3)

Analyzes professional identity, transition to new roles and responsibilities, leadership approaches, and inter-professional teamwork skills needed to provide effective, efficient and patient/community-centered care. Covers advanced, multi-modal communication strategies specific to professional role certification, conflict resolution, professional communication, inter-professional teamwork and leadership using interactive, skills-based learning. Offered: A.

[View course details in MyPlan: NSG 530](#)

NSG 537 Development and Psychopathology: Parents and Infants (3) *Spieker*

Provides an overview of typical social and emotional development and psychopathology in children ages three and younger. Demonstrates attachment relationships with parents and family to infant's development and psychopathology. Core course of Infant Mental Health Certificate program. Offered: W.

[View course details in MyPlan: NSG 537](#)

NSG 539 Assessment and Management of Common Psychosocial and Biophysical Conditions in the Perinatal Period (1-3, max. 3)

Teaches assessment and management of psychosocial and biophysical adaptation of child-bearing women and families during the perinatal period, with emphasis on parenthood transition including common stressors, parent-infant interactions, and community-based support models. Included is adaptation of the neonate and the continuum from prenatal to pediatric care.

[View course details in MyPlan: NSG 539](#)

NSG 540 Telehealth Systems and Applications (4) *G. DEMIRIS*

Prepares consumers, managers, and researchers of telehealth systems through guided exploration into the components of such systems. Introduces challenges and opportunities facing designers and managers of telehealth and remote healthcare delivery networks. Offered: jointly with BIME 581.

[View course details in MyPlan: NSG 540](#)

NSG 548 Basic Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2)

Covers the theory and practice of basic arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, as well as selected pharmacologic and electrical management. Content is appropriate for primary care, and provides foundation for advanced interpretation for students in acute/critical care.

[View course details in MyPlan: NSG 548](#)

NSG 549 Complex Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2)

Covers the theory and practice of complex arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, as well as selected pharmacologic and electrical management. Appropriate for acute/critical care. Prerequisite: NSG 548, or satisfactory pretest of basic ECG interpretation.

[View course details in MyPlan: NSG 549](#)

NSG 550 Seminar on Professional Issues in Nursing Education (3)

Seminar on role and related professional issues in nursing education. Prerequisite: either NSG 545, B NURS 513, or T NURS 513; either NSG 546, B NURS 511, or T NURS 511. Offered: jointly with B NURS 550/T NURS 550.

[View course details in MyPlan: NSG 550](#)

NSG 551 Health Politics and Policy (3)

Critically analyzes the politics of health policy in the United States. Examines leadership and advocacy in influencing politics and policy to address and influence health outcomes. Offered: W.

[View course details in MyPlan: NSG 551](#)

NSG 552 Social Determinants of Health and Health Equity (3)

Examines fundamental concepts, emerging theory, research, and intervention strategies regarding the influence and putative mechanisms of environment and societal factors on health at population, community, and individual levels. Emphasizes an interdisciplinary, multi-level socio-ecological perspective on health and illness with consideration of principles of equity and justice in societal contexts. Offered: W.

[View course details in MyPlan: NSG 552](#)

NSG 553 Foundations of Health Systems and Health Economics (3)

Examines health systems and care delivery in the context of principles of business, finance, and economics. Concepts applied in the design of cost and care effectiveness system-level health improvements. Prerequisite:

either NMETH 536, which may be taken concurrently, or permission of instructor. Offered: Sp.

[View course details in MyPlan: NSG 553](#)

NSG 554 Occupational Health Nursing: Practice Issues (3)

Examination of current, emerging occupational health and safety topics affecting worker populations. Includes discussion of workforce groups, work environments, and socio-political contexts; introduces prevalent health matters resulting from occupational exposures; applies theoretical concepts to the prevention of work-related injuries and illnesses; and identifies issues affecting advanced professional practice and leadership roles.

[View course details in MyPlan: NSG 554](#)

NSG 555 Perspectives on Implementing Research in Advanced Nursing Practice (3) *Boutain, Landis*

Provides an overview of contemporary multidisciplinary perspectives, models and research approaches for advanced practice nursing. Focuses on understanding and applying science to practice, and practice to science. Emphasizes ethical practice, scientific responsibility, research curiosity and use. Offered: A.

[View course details in MyPlan: NSG 555](#)

NSG 556 Program Planning and Health Systems and Multicultural Communities (4) *Chrisman, Strickland, Tsai*

Explores culture as it related to the program planning process, methods, theories, attitudes, and skills in health promotion and disease prevention through community engagement. Offered: W.

[View course details in MyPlan: NSG 556](#)

NSG 557 Physiology and Pathophysiology Across the Life Span (4)

Analyzes disordered physiologic responses in individuals within the context of lifespan physiology. Examines pathophysiologic principles and responses, using case studies as exemplars for selected concepts, and the relationship between physiologic and pathophysiologic principles and the evidence basis for current practice. Offered: A.

[View course details in MyPlan: NSG 557](#)

NSG 558 Occupational Health Nursing: Advanced Practice and Leadership in Program Development (3)

Examination of advanced professional practice and leadership in the context of occupational health and safety programs. Focuses on assessment, development, implementation, and evaluation of programs involving workplace health surveillance, case management, workers' compensation, and health promotion in consideration of political, economic, legal, ethical issues, and application of current research.

[View course details in MyPlan: NSG 558](#)

NSG 559 Prevention Effectiveness in Community Health (1)

Focuses on increasing effectiveness of organization- and community-level health promotion and prevention programs with multicultural communities. Includes web-based tool-kits pertaining to: cross-cultural adaptations of health promotion programs; mental health promotion in communities; institutional readiness to sustain prevention policies; and community engagement in health promotion efforts. Credit/no-credit only.

[View course details in MyPlan: NSG 559](#)

NSG 560 Pediatric Case Studies (2)

Focuses on integration and application of pediatric history-taking, diagnostic reasoning, behavioral and developmental assessment, health promotion, and management of common pediatric conditions in case-based scenarios. Prerequisite: NCLIN 502; NURS 518; NURS 529, any of which may be taken concurrently, or permission of instructor. Credit/no-credit only. Offered: W.

[View course details in MyPlan: NSG 560](#)

NSG 561 Community Health Systems for Equity (3)

Defines, evaluates, and synthesizes how community health systems promote health equity. Emphasizes how various systems, such as care, public health, governmental, tribal, family, and social-kin, nonprofit, faith-based, and business, inhibit or promote communal health. Highlights advanced practice, practice inquiry, and

leadership implications. Offered: A.

[View course details in MyPlan: NSG 561](#)

NSG 562 Management of Adults I (2-3)

Focuses on evidence-based clinical-decision making and management of common adult health problems, emphasizing episodic and acute concerns. Emphasizes concepts of health promotion and patient/family focuses care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care.

[View course details in MyPlan: NSG 562](#)

NSG 563 Management of Adults II (3)

Focuses on evidence-based clinical-decision making and management of common adult health problems, emphasizing episodic and acute concerns. Emphasizes concepts of health promotion and patient/family focuses care. Provides a theoretical and conceptual foundation for clinical decision-making and critical appraisal of data to determine diagnosis and comprehensive, cost-effective plan of care. Offered: Sp.

[View course details in MyPlan: NSG 563](#)

NSG 564 Management of the Adult III (3)

Focuses on evidence-based patient-centered care of older adults with multiple chronic conditions across the continuum from outpatient to acutely or critically ill, including prevention and management of geriatric syndromes. Explores strategies for optimal transition across care settings and across the health continuum.

[View course details in MyPlan: NSG 564](#)

NSG 565 Primary Care Management Across the Lifespan (1)

Clinical application of theories of health promotion and chronic disease management in complex patients across lifespan, utilizing evidence-based approaches to health promotion, assessment, differential diagnosis and disease management. Emphasizes clinical decision-making, considering the chronic care model, coordination of care, poly-drug therapy, and information systems. Prerequisite: NCLIN 518, which must be taken concurrently; permission of instructor. Credit/no-credit only. Offered: A.

[View course details in MyPlan: NSG 565](#)

NSG 566 Pediatric Pharmacology (1-2, max. 2)

Focuses on clinical application of pharmacologic management in pediatric acute and chronic illnesses. Emphasizes pediatric pharmacotherapeutics including selection of therapeutic agents, indications, efficacy, therapeutic and adverse effects, monitoring parameters, and dosing principles. Includes didactic as well as case-based learning strategies. Offered: Sp.

[View course details in MyPlan: NSG 566](#)

NSG 567 Advanced Pharmacotherapeutics in Complex Case Management (1)

Uses a case-based method to examine an evidence-based approach to pharmacotherapeutic management of complex chronic conditions across the lifespan. Incorporates examination of both pharmacologic factors and patient-related factors, such as age, socioeconomic status, and behavioral aspects that support the selection of commonly used drugs for patients of all ages across multiple settings. Prerequisite: PHARM 514; permission of instructor. Offered: A.

[View course details in MyPlan: NSG 567](#)

NSG 568 Infant Observation (1-, max. 4) C. DILLON, S. SPIEKER

Includes observing an infant and parent in the first year of life and reflecting on observations. GCPAPN-IMH core course. Four quarter sequence begins each Autumn. Offered: AWSpS.

[View course details in MyPlan: NSG 568](#)

SCHOOL OF NURSING

NURSING

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

NURS 201 Growth and Development Through the Life Span (5-6) I&S

Focuses on human growth and development throughout the life span. Emphasizes influence of growth and development theory and research on achievement of health and health promotional efforts directed toward persons of various ages and life styles. Optional service learning component. Open to nonmajors. Offered: AWS.

[View course details in MyPlan: NURS 201](#)

NURS 204 Learning Wellness: Healthy Ways to Respond to Stressful Student Life (3)

Examines the intimate connections of body, mind, spirit, as well as how stress challenges personal health. Provides overview of methods that respond to stress in health-producing ways, including time management, making healthy choices, and practicing wellness. Discusses evidence for each method and provides experiential components. Credit/no-credit only.

[View course details in MyPlan: NURS 204](#)

NURS 205 Nursing as a Career in Contemporary Society (1)

Introduces an accurate description of nursing career, educational requirements and rationale, including advanced degree career possibilities. Explores breadth of nursing roles in promoting health to individuals, groups, and populations. Links historical development with contemporary practice. Explores factors that promote student and professional success in nursing. Credit/no-credit only.

[View course details in MyPlan: NURS 205](#)

NURS 301 Clinical Applications of Anatomy and Physiology (3)

Application of anatomic and physiologic concepts to selected clinical phenomena. Focuses on integrated responses and functional health patterns. Exemplars of developmental and lifespan factors are identified. Includes experiential activities to enhance integration of content. Offered: AS.

[View course details in MyPlan: NURS 301](#)

NURS 303 Foundations of Professional Nursing (2-3)

Exploration of the profession of nursing, including past and present work of nurses, the experience of being ill and seeking healthcare, and the U.S. healthcare system.

[View course details in MyPlan: NURS 303](#)

NURS 304 Human Responses I (3)

Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: A.

[View course details in MyPlan: NURS 304](#)

NURS 308 Human Responses II (3)

Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: W.

[View course details in MyPlan: NURS 308](#)

NURS 309 Pharmacotherapeutics in Nursing Practice I (2-)

Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. First of a two-quarter sequence. Offered: A.

[View course details in MyPlan: NURS 309](#)

NURS 310 Pharmacotherapeutics in Nursing Practice II (-[2-3])

Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. Second of a two-quarter sequence. Offered: W.

[View course details in MyPlan: NURS 310](#)

NURS 401 Care in Illness I (5)

Introduces major concepts relevant to the experience of acute and chronic illness, including physiological, pathophysiological, behavioral and experimental human responses, assessment of functional health status and interdisciplinary therapeutics in common alteration across the lifespan. First of a two-quarter sequence. Offered: W.

[View course details in MyPlan: NURS 401](#)

NURS 404 Gerontological Nursing (2)

Focuses on concepts and issues relevant to the nursing care of older adults across the care continuum. Major course themes include nursing assessment of the older adult, health promotion, patient safety, geriatric syndromes, gerontechnology and influence of payer systems on care for older adults. Prerequisite: NURS 310.

[View course details in MyPlan: NURS 404](#)

NURS 405 Care in Illness II (5)

Continuation of NURS 401, further examining selected psychopathologic and pathophysiologic alterations in health of individuals in context of families across life span. Emphasizes assessing functioning in psychosocial, cultural, person-environment relationships, and healthcare resources to plan nursing strategies for acutely/chronically ill individuals of all ages.

[View course details in MyPlan: NURS 405](#)

NURS 407 Culture, Diversity, and Nursing Practice (3)

Analyzes the impact of cultural, social, and global factors on the health of multicultural and diverse groups at the individual, population, and systems levels. Students gain knowledge and skills to effectively respond to the healthcare needs of multicultural societies through non-discriminatory and culturally appropriate nursing care practice. Offered: Sp.

[View course details in MyPlan: NURS 407](#)

NURS 410 Legal and Ethical Issues in Clinical Practice (3)

Identification of ethical and legal issues and the ensuing dilemmas relevant to the profession of nursing and nurses as health professionals and citizens. Selected problems and dilemmas affecting nurses, nursing, and the

delivery of healthcare analyzed using specific moral-ethical perspectives. Offered: AW.

[View course details in MyPlan: NURS 410](#)

NURS 412 Healthcare Systems (3)

Introduction to analysis of healthcare systems with emphasis on political economy of health, access and utilization, disparities in health, public and private health insurance and reimbursement issues. Comparison of U.S. and other national healthcare systems. Offered: Sp.

[View course details in MyPlan: NURS 412](#)

NURS 415 Nursing of Families: Childbearing and Childrearing (5)

Applies family concepts to nursing of childbearing and childrearing families. Focuses on family as context for care of individuals. Emphasizes use of physiological, psychological, developmental, cultural, and environmental theories for health promotion, disease prevention, and nursing therapeutics. Offered: AW.

[View course details in MyPlan: NURS 415](#)

NURS 417 Psychosocial Nursing in Health and Illness (3)

Examines psychosocial disorders/issues of life transitions from integrated perspective of biological, social sciences, nursing, and humanities. Emphasizes utilizing psychosocial nursing and interpersonal therapeutics for assessment, intervention, health promotion with individuals/families/groups at risk for experiencing psychosocial disorders. Prerequisite: NCLIN 418, which may be taken concurrently. Offered: AW.

[View course details in MyPlan: NURS 417](#)

NURS 419 Transition to Professional Practice (3)

Focuses on critical examination, synthesis, and evaluation of professional nursing care. Emphasizes mastery, synthesis, and application of theory, research, and practice in relation to nursing management, leadership, and nursing care of individual clients or groups of clients and populations. Offered: SpS.

[View course details in MyPlan: NURS 419](#)

NURS 420 Promoting Community and Public Health (3) DIV

Covers community and public health nursing theory focusing on populations. Includes a synthesis of theory, research, and practice in relation to community/public health, informed by a social justice framework, social determinants of health, community partnerships, and culturally appropriate population-based community/public health nursing. Corequisite: NCLIN 409.

[View course details in MyPlan: NURS 420](#)

NURS 445 Topics in Nursing (1-10, max. 10)

Guided survey and discussion of current literature on major topics in physiological nursing. Seminar/lecture with analysis and discussion of selected topics and readings. May have clinical component. Implications for nursing practice and healthcare emphasized.

[View course details in MyPlan: NURS 445](#)

NURS 499 Special Electives (1-4, max. 15)

Seminars on selected nursing issues of clinical problems, with independent study option, under supervision of nursing faculty. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NURS 499](#)

NURS 500 Child Management II: Chronic Conditions (3) *Kieckhefer, Magyary*

Focuses on approaches to caring for children and adolescents with chronic physical, neurobiological, developmental, or psychosocial conditions. Emphasizes evidence-based, culturally-competent, family-centered, interdisciplinary, and comprehensive assessment, referral, management, and care-coordination strategies.

Offered: S.

[View course details in MyPlan: NURS 500](#)

NURS 501 Child Mental Health Assessment and Interventions (3)

Developmentally based assessment and therapeutic approaches relevant for children with psychosocial health

problems. Consideration to matching therapeutic approaches with specific nature of symptomatology and other child, family, cultural, and environmental characteristics, including social and educational systems. Individual and group evaluation research emphasized.

[View course details in MyPlan: NURS 501](#)

NURS 505 Selected Topics in Psychosocial and Community Health Nursing (2-10, max. 10)

In-depth exploration of the major theoretical issues in psychosocial nursing. Seminar with analysis and discussion of selected topics and readings and implications for research and healthcare.

[View course details in MyPlan: NURS 505](#)

NURS 507 Older Adult Mental Health Assessment and Intervention (2)

Examines the dynamics of mental health research and practice in normal, optimal, and pathological aging. Focuses on psychosocial and environmental influences on mental health of older adults. Topics include: models of aging, cognitive impairment, depression, severe mental illness, and successful strategies to enhance mental health in older adults.

[View course details in MyPlan: NURS 507](#)

NURS 509 Issues in Violence and Aggression for Health Professionals (3)

Focuses on research and theory of violent/aggressive behavior. Perspectives of victim, offender, family, community, society examined. Focus is recognition of violence against women. Designed to challenge students to clarify beliefs, values related to topics such as rape, homicide, domestic violence. Prerequisite: graduate nursing student or permission of instructor.

[View course details in MyPlan: NURS 509](#)

NURS 514 Physiologic Adaptations in Women and Children: Physiologic Adaptations During Pregnancy and Postpartum (1-3, max. 6) Blackburn

Analyzes the physiologic adaptations in the maternal-fetal-neonatal unit, fetal development, and developmental adaptations in children from infancy to adolescence. Implications of normal and altered physiologic functions for nursing practice and examination of the basis for selected nursing intervention strategies.

[View course details in MyPlan: NURS 514](#)

NURS 515 Common Adolescent Health Problems (2-3)

Focuses on assessment, clinical decision making, and management of common adolescent problems. Concepts and theories of health promotion, adolescent development, and intervention strategies are explored to provide a broad framework for caring for adolescents in primary settings.

[View course details in MyPlan: NURS 515](#)

NURS 517 Pediatric Pulmonary Anatomy, Physiology, and Pathophysiology: Clinical Applications (2)

Content includes normal pediatric lung development infancy through adolescence and explores evidence for diagnosis, management, and follow up of commonly encountered respiratory problems. Emphasizes coordination of care with multiple disciplines when diagnosing and treating children with special health care pulmonary needs and family centered care and professional leadership role. Prerequisite: permission of instructor. Offered: Sp.

[View course details in MyPlan: NURS 517](#)

NURS 518 Child Management I: Acute Conditions (3)

Focuses on use of clinical decision making framework to develop theoretically and empirically sound individualized management plans for the young child, with physical and behavioral symptoms of common pediatric illness, in the primary care setting. Prerequisite: PNP or FNP specialty, or permission of instructor.

[View course details in MyPlan: NURS 518](#)

NURS 520 Evaluation of Clinical Performance in Nursing (3)

For graduate students preparing for faculty or staff development positions in nursing. Theory and principles of evaluation. Instruments to appraise clinical nursing performance developed as part of course requirements.

Prerequisite: graduate standing or permission of instructor.

[View course details in MyPlan: NURS 520](#)

NURS 524 Conceptual Foundations for Care Systems Management (3)

Critical analysis of nature and theoretical bases of care systems management practice. Concepts of nursing and organization science foundations to person-provider transaction management and leadership in context of economic, political, and social environments and health outcomes. Prerequisite: graduate standing.

[View course details in MyPlan: NURS 524](#)

NURS 525 Managing Clinical Effectiveness Within Care Systems (3)

Optimizing person-provider clinical therapeutic transactions at multiple levels of care systems, complexity, and population aggregation. Emphasis on designing, managing and evaluating clinical effectiveness and efficiency within care systems.

[View course details in MyPlan: NURS 525](#)

NURS 526 Managing Organizational Effectiveness Within Care Systems (3)

Analysis of management strategies for attaining effective and efficient organizational structures and processes within healthcare systems. Prerequisite: NURS 524 or permission of instructor.

[View course details in MyPlan: NURS 526](#)

NURS 527 Managing Effective Access and Utilization Within Care Systems (3-4)

In-depth inquiry into healthcare access and resource utilization patterns among diverse populations, with emphasis on management strategies for establishing effective population-system fit. Additional credit for exploring access and utilization patterns within specific populations.

[View course details in MyPlan: NURS 527](#)

NURS 529 Childhood Common Developmental and Behavior Issues (2)

Focus on common developmental and behavioral issues presented by children and their families in primary care setting. Emphasis on the developmental, family, and cultural aspects of assessment and management of the common issues.

[View course details in MyPlan: NURS 529](#)

NURS 534 Aging and Health in Contemporary Society (3)

Explores demographic, cultural, psychological, theoretical, political, and ethical context of aging and health in contemporary society. Content is based on empirical data and policy statements on aging. Analyzes healthcare delivery at an individual, community, and systems level to support optimal functioning across the health continuum for older adults. Offered: Sp.

[View course details in MyPlan: NURS 534](#)

NURS 537 Symptom Management in Cancer Care and Serious Illness (3)

Focuses on assessment, integration of research findings into clinical decision-making, diagnostic reasoning, and management of common symptoms experienced by adult patients with cancer and/or serious illness. Explores individual and family responses to serious illness and malignant processes. Emphasizes concepts of prevention, tailored patient/family education, management and evaluation strategies. Offered: Sp.

[View course details in MyPlan: NURS 537](#)

NURS 539 Management of Patients with Acute/Critical Illness and Injury ([2-4]-, max. 6)

Systematic inquiry into pathophysiology and management of the acute/critically ill or injured across the lifespan. Emphasizes evidence-based assessment, management and evaluation strategies including therapeutics and use of technology to support care. Highlights multidisciplinary approach to management.

[View course details in MyPlan: NURS 539](#)

NURS 541 Women's Healthcare: Diagnosis and Management (1-3, max. 3)

Examines advanced practice women's healthcare issues including unique health issues for women, health maintenance, contraceptive care, diagnosis, and treatment of women's health problems across the lifespan.

Prerequisite: permission of instructor.

[View course details in MyPlan: NURS 541](#)

NURS 542 Theoretical Foundations of Advanced Practice Nursing: Childbearing I (1-4, max. 4)

Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to the normal childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of pregnant client within the context of the individual, family, socio-cultural environment, and healthcare system.

[View course details in MyPlan: NURS 542](#)

NURS 543 Theoretical Foundations of Advanced Practice Nursing: Childbearing II (3)

Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to at-risk childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of at-risk pregnant client within the context of the individual, family, socio-cultural environment, and healthcare system.

[View course details in MyPlan: NURS 543](#)

NURS 546 Interpersonal Therapeutics in Advanced Psychiatric Mental Health Nursing: Current Perspectives (3)

Selected theories in relation to psychosocial development and adaptation across life span for individuals, families, and small groups and as explanatory models of major psychosocial disabilities. General and psychosocial nursing models evaluated for heuristic value for research and practice. Prerequisite: graduate standing or permission of instructor.

[View course details in MyPlan: NURS 546](#)

NURS 547 Neuroscience Basis of Advanced Practice Psychiatric/Mental Health (3)

Analysis of biological processes influencing psychosocial behavior in response to internal and external stimuli. Research and theory of neuroendocrine mechanisms in psychosocial disabilities. Analysis of nursing management and evaluation of biopsychosocial modalities used in modification of behavior. Prerequisite: graduate standing in nursing or permission of instructor.

[View course details in MyPlan: NURS 547](#)

NURS 548 Frameworks in Infant Mental Health (3) *Spieker*

Review infant mental health (IMH) and early development from a developmental interdisciplinary perspective. Pays special attention to brain development, sensory integration, early communication, and emotion regulation. Offered: A.

[View course details in MyPlan: NURS 548](#)

NURS 549 Assessment in Psychosocial Nursing (3)

Conceptual and clinical approaches to advanced-level data collection and diagnostic reasoning in psychiatric/psychosocial disorders. Synthesizes knowledge from psychosocial nursing and multiple allied fields to enhance learners' cognizance of principles for establishing accurate and comprehensive data bases and sound multifaceted diagnostic formulations. Emphasizes DSM diagnostic scheme.

[View course details in MyPlan: NURS 549](#)

NURS 552 Wellness, Health Promotion, and Disease Prevention (3)

Covers theoretical perspectives and evidence for wellness, health promotion, disease prevention, and risk reduction through the lifespan for advanced practice nursing. Examines issues impacting individual, family, population, and community health related to context and culture. Includes strategies for health promotion and behavior change at individual, family, population, and community levels. Offered: A.

[View course details in MyPlan: NURS 552](#)

NURS 554 Management of Psychiatric Disorders: Adult and Adolescent (3-4)

Focuses on advanced nursing management strategies for psychiatric disorders and primary mental health conditions. Emphasizes the synthesis and integration of scientific evidence to formulate psychiatric diagnoses,

and select appropriate interventions for individuals, families, and communities. Measures outcomes through practice inquiry at both system and policy levels. Prerequisite: NURS 549.

[View course details in MyPlan: NURS 554](#)

NURS 555 Relationship Based Mental Health Assessment of Infant and Toddlers (3)

Focuses on multi-disciplinary, diagnostic mental health assessments of infants and toddlers within the context of their primary relationships. Core course of Infant Mental Health Certificate Program. Prerequisite: permission of instructor. Instructors: Dillon Offered: Sp.

[View course details in MyPlan: NURS 555](#)

NURS 556 Addictions and Substance Abuse: Biopsychosocial Perspectives (3)

Psychosocial and pathophysiological aspects of substance use examined for their effects on individuals and families throughout life span. Theories and empirical findings serve as basis for evaluating preventive and therapeutic nursing approaches to substance use disorders, including those related to target populations. Prerequisite: basic course in biological sciences.

[View course details in MyPlan: NURS 556](#)

NURS 557 Health, Culture, and Community (3) *Chrisman*

A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with HSERV 576; W.

[View course details in MyPlan: NURS 557](#)

NURS 560 Dynamics of Community Health Practice (3)

Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with HSERV 508.

[View course details in MyPlan: NURS 560](#)

NURS 561 Selected Topics in Comparative Nursing Care Systems (2/3, max. 10)

In-depth examination of the literature pertinent to major theoretical issues in cross-cultural nursing and healthcare systems. Seminar with analysis and discussion of selected topics and readings. Implications for research and healthcare stressed.

[View course details in MyPlan: NURS 561](#)

NURS 562 Clinically Applied Anthropology (3)

Anthropology as it relates to interdisciplinary delivery of culturally relevant healthcare. Cultural variation in illness beliefs and behavior, types of healing practices, illness prevention, social support networks. Prerequisite: graduate standing, permission of instructor. Offered: jointly with ANTH 562.

[View course details in MyPlan: NURS 562](#)

NURS 564 Biological Intervention in Advanced Practice Psychiatric/Mental Health Nursing (3-4)

Biological and pharmacological interventions pertinent to practice of psychosocial nursing, including psychopharmacology, electroconvulsive therapy, and phototherapy. Emphasis on empirical neuroendocrine bases and then nursing management issues pertaining to these interventions. Legal and ethical issues pertaining to advanced practice and putative neurological mechanism are examined. Prerequisite: NURS 547 or permission of instructor.

[View course details in MyPlan: NURS 564](#)

NURS 566 Work Stress and Health (3)

Delineates our understanding of the relationship between work-related stressors and worker health. Theoretical models of job-stress are considered and methodological issues examined. Uses social justice framework to

explore worker stress and health disparities in immigrants and other disadvantaged populations. Offered: Sp. ²³³⁵
[View course details in MyPlan: NURS 566](#)

NURS 569 Observation and Assessment of Relationships (2) *C. DILLON, S. SPIEKER*

Culminating course in the GCPAPN-Infant Mental Health. Focuses on reflective practice, consultation, and supervision, a core features of practice across disciplines that are providing services to infants, toddlers, and their families. Prerequisite: NURS 548; NSG 537; NURS 555. Offered: Sp.

[View course details in MyPlan: NURS 569](#)

NURS 573 Foundational Seminar in Advanced Practice Nursing (1)

Explores specific advanced practice nursing roles and populations within the healthcare system. Links historical development and analysis of health care trends with contemporary specialty practice. Exploration of current issues and trends in the specialty. Credit/No Credit only. Prerequisite: NP student nearing program completion or permission. Credit/no-credit only. Offered: A.

[View course details in MyPlan: NURS 573](#)

NURS 576 Assessment and Collaboration with Communities and Systems (3)

Examines, critiques, and applies theory in assessing communities, populations, and systems cross-culturally. Focuses on advanced practice, executive leadership/policy, and practice inquiry; broad definition of community includes organizations. Emphasizes team work in assessment implementation, i.e., survey, interview, focus groups, observation/participant observation to advance understanding of social determinants of health.

[View course details in MyPlan: NURS 576](#)

NURS 579 Transcultural Nursing Practices (3)

Seminars examine four decades of nursing practice literature and other disciplines related to appropriate and competent care of diverse and multicultural populations. Concepts and methods from anthropology and other behavior sciences are considered in relationship with current health practice guidelines. Graduate standing or instructor permission.

[View course details in MyPlan: NURS 579](#)

NURS 580 Current Issues in Occupational and Environmental Medicine (2, max. 12)

Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with ENV H 596; AWSp.

[View course details in MyPlan: NURS 580](#)

NURS 581 Study of International Health (2-3)

International health based on the concept of health ecology. Assigned readings, discussions, and analysis of different perspectives, strategies, systems, and the wide range of conditions and forces affecting global and local health and illness. Emphasizes roles of healthcare providers. Credit/no-credit only.

[View course details in MyPlan: NURS 581](#)

NURS 582 Culture, Society, and Genomics (3) *B. MCGRATH*

Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/PHG 521; Sp.

[View course details in MyPlan: NURS 582](#)

NURS 583 Emotions and Mental Health: From Adversity to Adaptation (3-4) *Betrus, Elmore*

Provides an understanding of nature and function of emotions as well as relationship of emotion to mental health/illness. Emphasizes adversity arising from individual and community sources and its impact on emotional health. Addresses implications for interpersonal and social policy interventions.

[View course details in MyPlan: NURS 583](#)

NURS 584 Critical and Interdisciplinary Approach to Health Policy (3)

Advanced seminar to critically analyze various public health policies from a social justice framework.

[View course details in MyPlan: NURS 584](#)

NURS 587 Role Transition Seminar (2)

Emphasizes the transition to doctoral study and eventual post-graduate roles. Includes information to clarify expectations and skills to facilitate success: various forms of scholarly and interpersonal communication, principles of scholarly collaboration, giving and receiving critiques, development of a program of study, and other topics developed by participants. Prerequisite: Enrolled in PhD program in Nursing Science. Credit/no-credit only.

[View course details in MyPlan: NURS 587](#)

NURS 588 Philosophical Basis of Nursing Inquiry (3)

Overview and critical analysis of historical and contemporary views of knowledge development and of science, with particular emphasis on the ways these views influence approaches to nursing inquiry. Emphasis on analyzing the underlying epistemological and ontological assumptions and implications of diverse approaches to knowledge generation in nursing.

[View course details in MyPlan: NURS 588](#)

NURS 589 Theoretical Perspectives in Nursing (3)

Critical analysis of theory development, including evaluation of relationships among theories, evidence, and explanation. Diverse approaches used to appraise historical and contemporary milestones in the development and evaluation of nursing knowledge. Emphasis on process and implications of theory development for nursing research, practice, education, and systems. Prerequisite: NURS 588. Offered: W.

[View course details in MyPlan: NURS 589](#)

NURS 590 Ecology of Human Health (5)

Provides conceptual foundation for the study of human health ecology within nursing science. Frameworks for understanding human health as an outcome of individual, family, and group interactions and transactions with environments are applied. Provides the basis for evaluation and developing therapeutic approaches to improve health.

[View course details in MyPlan: NURS 590](#)

NURS 592 The Science of Therapeutics: Theoretical Foundations (4)

Addresses the state of the science of nursing therapeutics. Students examine the practices of nursing to promote, maintain, and restore human health from an ecological perspective. Therapeutics considered from the perspectives of the individual, family, and community systems. Prerequisite: NURS 590 or equivalent with permission of instructor.

[View course details in MyPlan: NURS 592](#)

NURS 595 Synthesis of Nursing Science (3)

Advanced seminar for critical analysis, integration, and synthesis of material for a research proposal. Focus includes discussion of research integrity and ethics, including scientific conduct, risk management related to scientific misconduct and negligence. Prerequisite: NURS 587; NURS 588; NURS 589; NURS 590; NURS 592; NMETH 579; NMETH 580; and NMETH 591; any of which may be taken concurrently. Credit/no-credit only.

[View course details in MyPlan: NURS 595](#)

NURS 597 Health in the Context of Culture (5-6, max. 24)

Provides basic overview of health and healthcare challenges and opportunities in other countries. Examines socio-cultural, environmental, economic, political, and ecological factors that influence, health, health promotion, illness, disability, and death. Address responses to health issues both within and outside the health sector. May include study abroad.

[View course details in MyPlan: NURS 597](#)

NURS 599 Selected Readings in Nursing Science (1-3, max. 18)

Analysis of synthesis of selected readings with faculty mentor. Prerequisite: permission of instructor. Credit/no-credit only.

SCHOOL OF NURSING

NURSING

NURSING CLINICAL

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

NCLIN 302 Practicum: Health Assessment (1-5, max. 5)

Lecture and lab emphasize nursing skills in communication, interviewing, functional and physical health assessment. Includes: basic communication skills, beginning physical and psychosocial assessment of the individual across the lifespan, and family assessment. Offered: AS.

[View course details in MyPlan: NCLIN 302](#)

NCLIN 306 Practicum: Basic Skills of Nursing Practice (4)

Practicum in communication, interviewing, health assessment, identification of threats to health in clinical settings. Explores risk, vulnerability identification, communication, physical/psychosocial assessment of individuals across lifespan, nursing care planning, documentation, psychomotor skills development.

Prerequisite: NCLIN 302, which may be taken concurrently. Credit/no-credit only.

[View course details in MyPlan: NCLIN 306](#)

NCLIN 403 Practicum: Pediatric Nursing (4)

Provides supervised acute/chronic illness nursing care to pediatrics clients. Emphasizes beginning skills in systematic health and developmental assessment, including person/environment fit, basic competency in selected nursing therapies, and developing role as care agent for pediatrics clients and their families.

Prerequisite: NURS 401, may be taken concurrently. Credit/no-credit only. Offered: WSp.

[View course details in MyPlan: NCLIN 403](#)

NCLIN 407 Practicum: Nursing Care of Ill Adults (5)

Provides supervised nursing care to ill adults and their families. Emphasizes systematic assessment, including person/environment fit, developing competency in selected nursing therapies, and developing a role as a professional nurse. Prerequisite: NURS 401, which may be taken concurrently. Credit/no-credit only.

[View course details in MyPlan: NCLIN 407](#)

NCLIN 409 Partnerships in Community Health (4)

Analysis, application, and evaluation of community partnership process for health. Analysis of nursing role in community/public health, including community building, collaboration, policy. Development and formulation of community interventions to maintain/promote biopsychosocial health, and to promote health/prevention of

injury and disease. Credit/no-credit only.

[View course details in MyPlan: NCLIN 409](#)

NCLIN 411 Transition to Clinical Practice (9)

Focuses on critical examination, synthesis, and evaluation of professional nursing care with individual clients or groups reflecting diverse settings, ages, and ethnic communities. Emphasizes mastering theoretical concepts, applying research findings, improving skill competency, and developing clinical leadership capabilities.

Credit/no-credit only.

[View course details in MyPlan: NCLIN 411](#)

NCLIN 416 Practicum: Nursing of Families: Childbearing and Childrearing (4)

Provides the opportunity for supervised nursing of childbearing and childrearing families and individuals.

Emphasizes expanding nursing process skills, especially health promotion, with individuals and families during childbearing and childrearing. Prerequisite: NURS 415, which may be taken concurrently. Credit/no-credit only.

Offered: AW.

[View course details in MyPlan: NCLIN 416](#)

NCLIN 418 Practicum: Psychosocial Nursing (4)

Provides supervised psychosocial nursing care to individuals/families/groups/communities with threats to or alterations in psychosocial health. Emphasizes increasing skill in systematic assessment, developing competency in selected psychosocial nursing interventions, and evaluation of treatment outcomes. Prerequisite: NURS 417, which may be taken concurrently. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: NCLIN 418](#)

NCLIN 490 Special Laboratory Elective (1-4, max. 4)

Provides supervised laboratory experience to enhance and document clinical skills and decision making.

Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NCLIN 490](#)

NCLIN 499 Clinical Practicum Elective (1-5)

Provides opportunities to develop nursing skills in the care of individuals, groups, communities, or care-systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: NCLIN 302; NCLIN 306; NCLIN 402; NCLIN 406.

[View course details in MyPlan: NCLIN 499](#)

NCLIN 500 Comprehensive Health Assessment (3)

Uses didactic and experimental learning to develop evidence-informed advanced assessment skills including systematic collection, organization, interpretation, and communication of data reflecting the health status of adolescents/adults/older adults. Emphasizes a holistic analysis of developmental, familial, physiological, psychosocial, occupational, environmental, functional, nutritional, and cultural aspects of health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWS.

[View course details in MyPlan: NCLIN 500](#)

NCLIN 501 Diagnostic Health Assessment (1-5, max. 5)

Examines evidence-informed clinical decision-making in the advanced assessment of symptoms experienced by adolescents/adults/older adults. Uses didactic and experimental learning in the systematic collection, integration, analysis, interpretation, and communication of focuses subjective and objective data, including formulation of diagnostic hypotheses. Prerequisite: NCLIN 500, which may be taken concurrently. Credit/no-credit only.

Offered: AWS.

[View course details in MyPlan: NCLIN 501](#)

NCLIN 502 Pediatric Diagnostic Health Assessment ([1-2]-, max. 2)

Uses didactic and experimental learning to develop evidence informed advanced assessment skills including systematic collection, organization, interpretation, integration, and communication of data reflecting health status of children from birth to adolescence. Emphasizes holistic analysis of development, familial,

physiological, psychosocial, environmental, functional, nutritional, and cultural aspects of health. Prerequisite: permission of instructor. Credit/no-credit only. Offered: A.

[View course details in MyPlan: NCLIN 502](#)

NCLIN 503 Advanced Fieldwork Community Health Nursing (2-6, max. 12)

Guided experience in delineating nursing roles in community settings. Development of a philosophy of community health nursing. Application of core concepts pertaining to health, ethics, care, and community. A minimum of four hours of guided experience weekly. Prerequisite: graduate standing and permission of instructor.

[View course details in MyPlan: NCLIN 503](#)

NCLIN 505 Diagnostic Management and Decision Making (2-5) P. CHRISTIANSON

Examines diagnostics pertinent to adult and geriatric illnesses from individual and population perspectives in the context of evidence, risk/benefits, equity, cost, access and care quality. Case analyses integrate health assessment and differential diagnoses into selection of appropriate tests. Includes didactic and laboratory/simulation components. Prerequisite: NCLIN 501 or equivalent. Offered: W.

[View course details in MyPlan: NCLIN 505](#)

NCLIN 508 Seminar in Group Treatment (1)

Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

[View course details in MyPlan: NCLIN 508](#)

NCLIN 510 Group Work with High-Risk Youth (3-6, max. 6)

Theory and application course in group counseling for high-risk youth. Central theme is group leader effectiveness in helping young people increase school performance, decrease drug involvement, and increase emotional well-being. Open to graduate students in nursing, education, and related human services professions.

[View course details in MyPlan: NCLIN 510](#)

NCLIN 512 Advanced Practicum in Family and Child Nursing I (2-12, max. 35)

Clinical seminar and practicum provide opportunities to develop advanced nursing practice competencies in the care of women, families, children, and/or adolescents. Focuses on the application of theory and principles when providing direct patient care, patient education, and the collaboration of care with individuals and/or groups. Credit/no-credit only.

[View course details in MyPlan: NCLIN 512](#)

NCLIN 514 Seminar in Home Care for Chronic Illness (3)

Home-care services as component of community health nursing. Understanding effects of direct nursing functions on care of chronically ill persons and their families. Selected field study experiences in community health settings. Prerequisite: NURS 563, graduate standing, and permission of instructor.

[View course details in MyPlan: NCLIN 514](#)

NCLIN 516 Advanced Clinical Practicum I (4-5)

Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals and groups. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: NCLIN 516](#)

NCLIN 517 Advanced Clinical Practicum II (5-7)

Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Credit/no-credit only. Offered: S.

[View course details in MyPlan: NCLIN 517](#)

NCLIN 518 Advanced Clinical Practicum III (5-7)

Clinical practicum and seminar providing opportunities to develop advanced nursing practice competencies with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Credit/no-credit only. Offered: A.

[View course details in MyPlan: NCLIN 518](#)

NCLIN 519 Newborn Assessment for Advanced Practice (1)

Develops knowledge and skills to obtain and evaluate health histories and perform systematic physical assessment on newborns and young infants using diagnostic reasoning process and evidence-based approach. Analyzes data to develop different diagnoses and management plans. Prerequisite: nurse-midwifery and perinatal nurse specialist students or permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NCLIN 519](#)

NCLIN 520 Clinical Reasoning and Assessment Across the Lifespan (2)

Provides the framework to begin evidence-informed clinical decision-making in the advanced assessment of patients across the lifespan. Includes didactic and experiential learning in systematic collection, integration, analysis, interpretation, and communication of focused subjective and objective data, including formulation of diagnostic hypotheses. Emphasizes a holistic approach. Credit/no-credit only. Offered: A.

[View course details in MyPlan: NCLIN 520](#)

NCLIN 521 Diagnostic Decision Making and Clinical Skills Laboratory (2)

Designed to enhance student's knowledge, performance, and interpretation of various diagnostic tests and clinical procedures in multiple settings. Includes skills across the age span. Skill demonstration and validation occur in the lab classroom. Co-requisite: NCLIN 516; permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NCLIN 521](#)

NCLIN 532 Advanced Practice in Community Health Systems Nursing: Overview (3)

Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to social determinants of health and social justice. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: A.

[View course details in MyPlan: NCLIN 532](#)

NCLIN 533 Advanced Practice in Community Health Systems Nursing: Culture (3)

Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to cultural issues affecting the health of individuals, populations, and communities. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.

[View course details in MyPlan: NCLIN 533](#)

NCLIN 534 Advanced Practice in Community Health Systems Nursing: Assessment (3)

Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to the assessment and appraisal of communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: NCLIN 534](#)

NCLIN 535 Advanced Practice in Community Health Systems Nursing: Policy (4)

Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to health-related organizational and public policy that promotes health equity. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: A.

[View course details in MyPlan: NCLIN 535](#)

NCLIN 536 Advanced Practice in Community Health Systems Nursing: Health Systems (4)

Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to systems-level models of practice to service delivery among communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.

[View course details in MyPlan: NCLIN 536](#)

NCLIN 540 Infant Mental Health Practice: Parent Child Relationships and Intervention ([3-6]-, max. 18)

Focuses on reflective practice, relationship-based consultation, and therapeutic interventions with infants/toddlers and caregivers. Students complete required clinical practicum at assigned community sites for three quarters. Prerequisite: admission to Infant Mental Health certificate program. Credit/no-credit only.

Offered: AWSp.

[View course details in MyPlan: NCLIN 540](#)

NCLIN 541 Advanced Practice Specialist Clinical Practicum (1-10, max. 10)

Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Emphasis is on specialization and role development. Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NCLIN 541](#)

NCLIN 542 Advanced Practice Specialist Clinical Practicum II (1-10, max. 10)

Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork emphasizes greater depth/complexity/independence in specialization and role development. Seminars emphasize critical analysis of role-related issues. Capstone experience for clinical practicum. Prerequisite: NCLIN 541. Credit/no-credit only.

[View course details in MyPlan: NCLIN 542](#)

NCLIN 543 Advanced Practice Specialist Clinical Practicum III (1-10, max. 10)

Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Role development within specialty context. Emphasis is on critical analysis of leadership-related issues. For students in final clinical, serves as capstone. Prerequisite: NCLIN 542. Credit/no-credit only.

[View course details in MyPlan: NCLIN 543](#)

NCLIN 544 Advanced Practice Specialist Clinical Practicum IV (1-10, max. 20)

Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork serves as capstone experience. Seminar emphasis is on consultation and collaboration. Prerequisite: NCLIN 543. Credit/no-credit only.

[View course details in MyPlan: NCLIN 544](#)

NCLIN 549 Nurse Practitioner Clinical Practicum I: Adults/Older Adults (1-10, max. 10)

Clinical fieldwork and seminar in advanced nursing practice with individual/groups. Students practice under clinical preceptor supervision. Focuses on data collection/critical thinking related to health status and threats to health, incorporating knowledge from the biological, behavioral, and social sciences. Prerequisite: permission of instructor, or NCLIN 501 or equivalent. Credit/no-credit only.

[View course details in MyPlan: NCLIN 549](#)

NCLIN 550 Nurse Practitioner Clinical Practicum II: Adults/Older Adults (1-10, max. 10)

Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 549, emphasizing critical thinking related to the differential diagnosis/management of health problems and human responses. Students practice under clinical preceptor supervision. Addresses selected role issues in advanced practice nursing. Prerequisite: NCLIN 549 or permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NCLIN 550](#)

NCLIN 551 Advanced Practice Nursing Clinical Practicum III: Adults/Older Adults (1-10, max. 10)

Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 550, emphasizing the integration and application of previous learning in the care of people with multiple health problems. Students practice under preceptor supervision. Addresses selected role issues in advanced practice nursing. Prerequisite: NCLIN 550 or permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NCLIN 551](#)

NCLIN 552 Nurse Practitioner Clinical Practicum IV: Adults/Older Adults (1-10, max. 10)

Intensive clinical experience in which students integrate previous learning to assume responsibility for care of older adults and/or adults with multiple health problems. Students practice as an advanced practice nurse supervised by a preceptor, assuming increasing responsibility for planning/implementing therapies and for documenting/evaluating outcomes. Prerequisite: NCLIN 551. Credit/no-credit only.

[View course details in MyPlan: NCLIN 552](#)

NCLIN 562 Professional Interpersonal Styles of Communication with Families to Enhance Health Outcomes (3)

Complex communication processes evaluated and applied to the family as unit of interaction within interdisciplinary context. Empirical based communication practices analyzed considering family variables adherence, satisfaction, health outcomes, and cost effectiveness. Engagement in experiential learning through challenging clinical scenarios. Emphasizes cultural competencies. Prerequisite: DNP nursing student or permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NCLIN 562](#)

NCLIN 567 Advanced Practice Clinical Practicum (2-6, max. 22)

Practicum used to expand, deepen, or enrich advanced practice skills relevant to area of specialty preparation. Uses clinical activities to reflect an integration of advanced practice, leadership, and practice inquiry. Emphasizes self-directed learning, in-depth clinical skill building and decision-making, continuity of care, and inter professional collaboration. Prerequisite: permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NCLIN 567](#)

NCLIN 599 Independent Study Clinical Practicum (1-12, max. 25)

Clinical practicum to develop advanced-practice nursing skills in care of individuals, groups, communities, or care systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: matriculated MN, DNP students, or post-master's student, and permission of academic adviser and instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: NCLIN 599](#)

NCLIN 798 Tripartite Immersion Practicum ([1-5]-, max. 5)

Practicum to synthesize and expand knowledge and skills in application of tripartite role of advanced practice, inquiry, and leadership. Analysis of practice issues including reflective practice, collaboration, health systems, technology, ethics, and policy. Prerequisite: permission of instructor and Supervisory Committee. Credit/no-credit only.

[View course details in MyPlan: NCLIN 798](#)

NCLIN 801 Advanced Clinical Practicum Immersion (9)

Immersion clinical practicum and seminar providing opportunities to integrate advanced nursing practice competencies, leadership, professional role, and collaboration with targeted populations. Focuses on the application of theory and principles when providing care, education, and collaboration with individuals, groups, and systems. Offered: A.

SCHOOL OF NURSING

NURSING

NURSING METHODS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

NMETH 403 Introduction to Research in Nursing (3)

Organization of the structure of nursing knowledge through research. Concepts and processes of research utilized in the investigation of nursing science.

[View course details in MyPlan: NMETH 403](#)

NMETH 416 Methods for Research and Inquiry in Nursing I (2)

Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on appraising literature and methods for generating evidence. Offered: A.

[View course details in MyPlan: NMETH 416](#)

NMETH 417 Methods for Research and Inquiry in Nursing II (2)

Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on searching evidence, appraising evidence, and classifying different types/levels of evidence. Offered: W.

[View course details in MyPlan: NMETH 417](#)

NMETH 418 Methods for Research and Inquiry in Nursing III (2)

Explores the generation of new knowledge and evidence base for nursing practice in health and illness. Focuses on identifying gaps in the literature/evidence, and formulating a plan to conduct research. Offered: Sp.

[View course details in MyPlan: NMETH 418](#)

NMETH 419 Application of Methods for Research and Inquiry in Nursing (2)

Apply methods for contributing to evidence relevant to nursing. In small groups identify, implement, and disseminate a plan for generating, evaluating, synthesizing, or translating evidence around health, healthcare, and/or nursing practice. Offered: Sp.

[View course details in MyPlan: NMETH 419](#)

NMETH 499 Undergraduate Research (1-5, max. 12)

Supervised individual scholarly inquiry on a specific nursing problem. Credit/no-credit only.

[View course details in MyPlan: NMETH 499](#)

NMETH 520 Scholarly Inquiry for Nursing Practice (5)

Analyzes conceptual, theoretical, ethical, and empirical knowledge as a basis for posing nursing research questions, identifying research designs, selecting sampling and data collection strategies, and proposing analytic methods to answer a research question, and evaluate completed research for its scientific adequacy and applicability to practice. Offered: AWSpS.

[View course details in MyPlan: NMETH 520](#)

NMETH 522 Data Management for Research Professionals (4)

Surveys industrial strength data management, using techniques applicable to multi-center, longitudinal research trials with survey instruments. Involves challenges research professionals face as they graduate from a student project to a study with hundreds of cases, variables, multiple survey instruments and a staggered, repeated sampling protocol. Credit/no-credit only.

[View course details in MyPlan: NMETH 522](#)

NMETH 523 Project Management and System Analysis for Health Informatics (3) *Masuda*

Overview of information technology project management principles as contained within the Project Management Body of Knowledge (PMBOK) and the Systems Development Life Cycle within formal Systems Analysis. Offered: A.

[View course details in MyPlan: NMETH 523](#)

NMETH 524 Healthcare Information Systems and the Electronic Health Records (3) *Masuda, Murphy*

Overview and analysis of healthcare informatics issues, including patient safety and Information Technology (IT), infrastructure, clinical systems, definitions and functions of EHR systems, IT leadership in healthcare organizations, informatics change management, including key user roles evaluating EHR and workflow changes. Offered: W.

[View course details in MyPlan: NMETH 524](#)

NMETH 526 Patient-Centered Interactive Health Communication Technologies (3)

Overview of current and emerging consumer-centric eHealth tools and technologies. Researchers and practitioners from multiple disciplines present theories, concepts, and principles from health, information, cognition, and human-factors sciences as they relate to the development and use of these tools and technologies.

[View course details in MyPlan: NMETH 526](#)

NMETH 527 Introduction to Health Informatics and Systems Thinking (3) *Masuda, Oyler*

Examines how informatics aids in the transformation of healthcare delivery and how to most effectively use the theories and best practices in informatics toward building and deploying informatics solutions. Offered: A.

[View course details in MyPlan: NMETH 527](#)

NMETH 528 Computing Concepts: From Theory to Application (3) *Johnson*

Survey of conceptual and applied computing concepts. Conceptual topics include a global survey of hard/software, networking, information systems analysis/design, and programming. The applied component emphasizes desktop system management skills and the creative use of spreadsheets to enhance personal productivity. Offered: W.

[View course details in MyPlan: NMETH 528](#)

NMETH 529 Database Concepts and Applications in Clinical Informatics (3)

Introduction to relational database theory and technology from a health informatics perspective. Focuses on transactional database theory, architecture, and implementation in a socio-technical context. Analyzes database applications used in clinical environments. Introduces knowledge bases and data warehouses. Prerequisite: NMETH 528. Instructors: Oyler Offered: Sp.

[View course details in MyPlan: NMETH 529](#)

NMETH 530 Proposal and Project Development (3/5)

Focuses on the application of methods of inquiry to develop a scholarly proposal through faculty-guided small group discussion and individual composition. Students select project option to complete the conceptual phase

and most activities to fulfill their plan. Offered: AWSpS.

[View course details in MyPlan: NMETH 530](#)

NMETH 533 Appraisal and Translation of Evidence for Practice (5)

Designed to enhance use of methods to critically appraise literature, design, and implement processes to evaluate outcomes of practice, and promote patient-centered care. Applies relevant findings to improve practice, develop guidelines, and use information technology and research methods. Includes dissemination of findings.

Prerequisite: either NMETH 535 or permission of instructor. Offered: Sp.

[View course details in MyPlan: NMETH 533](#)

NMETH 535 Nursing Inquiry to Support Evidence-Based Practice (5)

Works to understand and apply conceptual, ethical, and practical aspects of quantitative and qualitative research methods by design, sampling, data collection, measurement, and analysis, as a basis for evaluating and generating evidence for nursing practice. Develops skills in data management and statistical analysis to utilize in practice-based inquiry. Prerequisite: either NGS 555 or permission of instructor. Instructors: Cochrane, Ward
Offered: W.

[View course details in MyPlan: NMETH 535](#)

NMETH 536 Methods of Program Evaluation and Quality Improvement (4)

Teaches principles and practice of program evaluation and quality assurance. Emphasizes current practices in designing, managing, evaluating, and disseminating finding for use in a variety of healthcare contexts. Includes content on use of informatics to improve healthcare delivery effectiveness, efficiency, and safety. Prerequisite: either NMETH 535, which may be taken concurrently, or permission of instructor. Instructors: Jarrett, Walsh
Offered: Sp.

[View course details in MyPlan: NMETH 536](#)

NMETH 570 Seminar in Clinical Research in Nursing (3)

Philosophy, problems of design; use of criterion measures in terms of patient care.

[View course details in MyPlan: NMETH 570](#)

NMETH 575 Methodological Issues in Family Research (3)

Emphasizes research with the family as unit of analysis. Examines patterns of family functioning in relation to responses to heal situations. Reviews family units from generational and intergenerational perspectives. Critiques methods assessing dyadic and triadic relationships and therapeutic interventions on family outcomes. Prerequisite: permission of instructor.

[View course details in MyPlan: NMETH 575](#)

NMETH 579 Research Design and Methods in Nursing Science (4)

Focuses on elements of rigorous research designs and methods commonly used in nursing science; including descriptive, explanatory, predictive, and experimental and quasi-experimental designs, concepts of validity and reliability, and integration of design with analytical approaches for clinical research.

[View course details in MyPlan: NMETH 579](#)

NMETH 580 Methodological Perspectives in Nursing Inquiry (3)

Allows students to translate philosophical and theoretical perspectives into research methodologies. Foci include the relationship of theoretical perspectives to methodologies; the methodological issues among and between varying schools of thought such as interpretive/postmodern, critical/feminist, and contemporary empiricist; and how the methodologies influence choices of research design and methods. Prerequisite: NURS 588 or permission of instructor.

[View course details in MyPlan: NMETH 580](#)

NMETH 581 Observational Research Methods (2-6, max. 6)

Examines observational methods for conducting verbal and nonverbal behavioral research. Emphasizes critical analysis and rigor in research question formulation, measurement decisions, coding scheme development, data collection, and analysis and interpretation of data. In-depth application of observational method optional.

Prerequisite: graduate standing and basic research methods course or permission of instructor. Offered: W.²³⁴⁷
[View course details in MyPlan: NMETH 581](#)

NMETH 584 Methods: Physiologic Measures (4)

Exploration of the measurement of physiologic functioning in human and animal models. Examples include biochemical and biophysical measure. Students develop beginning skills with one physiologic measure.

Prerequisite: physiology and chemistry and permission of instructor.

[View course details in MyPlan: NMETH 584](#)

NMETH 590 Special Topics in Nursing Research (2-5, max. 9)

Examination of a specific research method, with evaluation of appropriateness, efficiency, rigor of measurement, and potential for inference for nursing research. Prerequisite: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

[View course details in MyPlan: NMETH 590](#)

NMETH 591 The Science of Therapeutics: Design and Outcomes (4)

Synthesizes advanced strategies to evaluate the short- and long-term outcomes of clinical therapeutics with special emphasis on feasibility, pilot studies, and randomized control trials. Includes analysis of completed studies as well as the design of a randomized control trial of a clinical therapeutic. Prerequisite: NMETH 579, NURS 592, or permission of instructor.

[View course details in MyPlan: NMETH 591](#)

NMETH 592 Clinical Outcome Research II (2-4, max. 4)

Application and evaluation of philosophical, methodological, and analytical concepts and issues examined in NMETH 591. Two modules are offered: a) case study and small-n studies and b) large-n studies. Students demonstrate application of decision-making process involved in development of clinical outcome study.

Prerequisite: permission of instructor.

[View course details in MyPlan: NMETH 592](#)

NMETH 598 Special Projects ([1-12]-, max. 12)

Fulfills the requirements of the non-thesis option for Master's students in nursing. Projects involve scholarly inquiry with in-depth focused analysis, culminating in a written product/report for dissemination. Prerequisite: NMETH 520 or permission of instructor. Credit/no-credit only.

[View course details in MyPlan: NMETH 598](#)

NMETH 600 Independent Study or Research (*-)

Credit/no-credit only.

[View course details in MyPlan: NMETH 600](#)

NMETH 700 Master's Thesis (*-)

Credit/no-credit only.

[View course details in MyPlan: NMETH 700](#)

NMETH 800 Doctoral Dissertation (*-)

Prerequisite: permission of Supervisory Committee chairperson or Graduate Program Coordinator. Credit/no-credit only.

[View course details in MyPlan: NMETH 800](#)

NMETH 801 Practice Doctorate Project/Capstone (3-, max. 6)

Addresses a clinical or systems problem using an evidence-based, practice relevant approach. Students engage in self-reflection, collaborative partnership building, and use of leadership strategies. Analyzes implications of project for future practice and practice inquiry activities. Culminates in written and oral reports for dissemination. Credit/no-credit only. Offered: AW.

School of Pharmacy

[Display as tabs](#)

School Overview

Dean

Sean D. Sullivan

Associate Deans

Nanci L. Murphy

Stanley S. Weber

Established in 1894, the UW School of Pharmacy is proud of its strong commitment to excellence and the recognition given to its faculty, students, and graduates for their outstanding educational, research, and service activities. The School's Dean's Office and three departments - Medicinal Chemistry, Pharmaceutics, and Pharmacy - are located in the H-Wing of the Health Sciences Building and the South Campus Center. The School is a member of the American Association of Colleges of Pharmacy and its programs are accredited by the Accreditation Council on Pharmacy Education.

[School Web Page](#)

[School Faculty](#)

[Course Descriptions](#)

Doctor of Pharmacy Program

The School of Pharmacy offers a four-year program leading to the Doctor of Pharmacy (PharmD) degree. The curriculum of the PharmD program is designed to provide students the scientific background and clinical skills necessary to take the North American Pharmacist Licensure Examination (NAPLEX) and the Multistate Pharmacy Jurisprudence Examination (MPJE) to enter professional practice.

Limited class enrollment allows for individualized attention from instructors while students still enjoy the benefits of attending a large university. Instructional methods emphasize the critical thinking, problem-solving, and clinical skills necessary to provide rational drug therapy, reduce medication-related problems, promote healthy lifestyles and disease prevention, optimize health outcomes, enhance patient adherence, and render care in a changing health-care system. The School fosters a commitment to life-long learning and provides an environment where students develop the knowledge, attitudes, and skills consistent with the profession's high standards.

Admission

Admission is for autumn quarter only. Applicants who are current UW students or who are considered admissible to UW are not assured admission. Admission is competitive, based on a number of factors including cumulative and prerequisite GPAs, PCAT scores, written communication skills as demonstrated in application essays, interview results, and review of

all application materials. Competitiveness varies from year to year, depending on size and strength of the applicant pool.

Because of limits on enrollment, the School cannot admit all qualified applicants. On average, over 600 students apply each year for 100 generally available positions. Admission is contingent upon satisfactory completion of all prerequisites, eligibility to obtain a Washington State Pharmacy Intern Certificate, and satisfactory results on the Criminal Background Check and Conviction/Criminal History Information Form. Accepted students are required to meet the University and health sciences immunization requirements.

After a preliminary assessment of the applicant pool, based on completeness of the application, review of all application materials, prerequisite and cumulative GPA thresholds and PCAT score thresholds, the most qualified applicants are invited for an interview in Seattle with members of the PharmD Admissions Committee. Residents from states participating in the Western Interstate Commission for Higher Education (WICHE) Pharmacy Student Exchange Program (Alaska and Nevada) are encouraged to apply. Applicants who meet or exceed GPA and PCAT minimum thresholds are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool during each annual admission cycle.

Further information on admission requirements, application procedures, and program content is available from the School of Pharmacy Office of Academic and Student Programs or at sop.washington.edu/school-of-pharmacy/pharmd-admissions/applications-to-pharmd-program.html.

Graduate Programs

Graduate Program Coordinator
H375 Health Sciences, Box 357630
(206) 616-1383

The Department of Pharmacy offers graduate study leading to a PhD degree in pharmaceutical outcomes research and policy. Emphasis of this program is on the health and cost outcomes of pharmaceuticals and pharmaceutical services and policies. Graduate training in this program prepares students for career opportunities in teaching and research in universities, safety and economic evaluation of products in the pharmaceutical industry, policy analysis of governmental agencies, and drug use management within healthcare delivery and financing organizations.

Also offered is a track in the PharmD/MS program in pharmaceutical outcomes research and policy, which provides an opportunity for one-to-two students currently completing their PharmD training at the UW to enter the graduate program in their fourth year of training. The program requires completion of 64 credit hours, a written thesis, and a quarter of practicum in a managed care, government, industry, or other appropriate setting. At the end of this training, students may elect to receive a master's degree, or continue on toward a PhD degree.

The UW's biomedical regulatory affairs Master of Science program, offered by the UW School of Pharmacy in partnership with UW Educational Outreach, addresses a growing need for well-trained professionals in the regulatory field. The degree serves those who wish to advance their careers in the medical products industry or those entering the field from related areas.

Deadline for application for the PhD and the PharmD/MS programs is December 31. Applicants are notified of acceptance or rejection by March 30. Refer to the application deadline for the biomedical regulatory affairs master-of-science program posted at: www.biomedreg.uw.edu/admissions/deadlines.asp.

Application materials and additional information are available in the Department of Pharmacy or at program websites listed below:

sop.washington.edu/porpp/graduate-program/phd-program27.html.

sop.washington.edu/porpp/graduate-program/concurrent-pharmdms-degree-in-pharmaceutical-outcomes-research-a-policy.html.

www.biomedreg.uw.edu.

Residency and Fellowship Programs

The Department of Pharmacy offers several postdoctoral fellowships in pharmacotherapeutics and pharmaceutical outcomes, and advanced community residency programs, primarily intended for PharmD graduates. Additional information is available on the department's website: sop.washington.edu/pharmacy/about/fellowship-a-residency-opportunities.html.

Clinical and Affiliate Faculty

In addition to the School of Pharmacy's full- and part-time faculty listed above, a large number of practicing pharmacists contribute to the School's academic programs. Over 500 pharmacists throughout the Pacific Northwest are members of the clinical and affiliate faculty, representing a variety of pharmacy practice settings such as community, hospital, nursing home, government, and industry. Information on the names, addresses and practice settings of these faculty members is available from the Office of Professional Pharmacy Education.

Medicinal Chemistry

[Display as tabs](#)

Department Overview

The Department of Medicinal Chemistry offers programs of graduate study leading to the degree of doctor of philosophy. The degree includes didactic and research-based learning with faculty who are leaders in several areas of modern biomedical research.

Graduates of the program acquire the skills necessary to develop quantitative and qualitative methodologies necessary for the study of biochemical processes that occur at the cellular and subcellular levels. These include the elucidation of biochemical transformations and interactions using techniques such as protein engineering, and a broad array of supportive spectroscopic techniques including mass spectrometry and NMR.

One major area of research interest is the role of biotransformation processes in the toxification and detoxification of drugs and environmental contaminants. A second area of interest is the determination of protein and small ligand structure and function using NMR, mass spectroscopy, and other biophysical techniques. Issues of biomedical importance include elucidation of mechanisms of drug-induced cell toxicity, drug-drug and drug-herbal interactions, identification of enzyme attributes that dictate substrate specificity and catalytic mechanism, pharmacogenetics, proteomics, and mechanisms of viral assembly.

Most students proceed directly to the doctoral degree program. Successful completion of a series of cumulative examinations and at least two quarters of teaching experience are among the requirements for completion of the doctoral program.

medchem@uw.edu

Admission Requirements

Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted for graduate study in medicinal chemistry. Undergraduates who plan to pursue graduate study are encouraged to expedite their programs by selection of pertinent electives. Although the choice of electives varies with the student's ultimate goals, graduate study in medicinal chemistry requires an adequate background in biological and physical sciences.

Degree Requirements

Doctor of Philosophy

90 credits minimum, to include:

Proficiency in organic, medicinal and physical chemistry, pharmacology, biochemistry, and molecular biology. Most coursework is completed in the first two years. The program is flexible and easily adaptable to meet individual interests and needs.

In the first year, students rotate through the laboratories of at least two faculty members. At the end of the first year, the student chooses a faculty sponsor and a dissertation research project.

1. *First year:* CHEM 530, CHEM 531, CHEM 532; MEDCH 501, MEDCH 502, MEDCH 503; MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
2. *Second year:* BIOC 530; MEDCH 527 MEDCH 541; PHCOL 510, PHCOL 511; MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
3. *Third year:* MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600 (7 credits each quarter)
4. *Fourth year:* MEDCH 800

Financial Aid

Financial support in the form of research assistantships and fellowships may be available to students in good standing throughout their graduate careers. Availability of financial support varies from year to year, and prospective applicants should contact the Graduate Program Coordinator for additional information.

SCHOOL OF PHARMACY

MEDICINAL CHEMISTRY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

MEDCH 400 Fundamental Concepts in Medicinal Chemistry (3)

Principles of physical organic chemistry; chemical bonding, stereochemistry, acids/bases, and reaction mechanisms relevant to processes such as drug distribution, specificity, and metabolism. Prerequisite: either CHEM 239 or CHEM 337. Instructors: Nelson Offered: A.

[View course details in MyPlan: MEDCH 400](#)

MEDCH 495 Special Studies in Medicinal Chemistry (*, max. 6)

Opportunity to expand the breadth and depth of understanding in specific areas. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDCH 495](#)

MEDCH 499 Independent Study/Research (*, max. 24)

Research problems in medicinal chemistry. Prerequisite: cumulative GPA of 2.50 and permission of instructor. Offered: AWSpS.

[View course details in MyPlan: MEDCH 499](#)

MEDCH 520 Seminar (1, max. 30) A. NATH

Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with PCEUT 520.

[View course details in MyPlan: MEDCH 520](#)

MEDCH 521 Advanced Medicinal Chemistry (3)

Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction of drugs with enzyme systems, and recent advances in drug design. Prerequisite: CHEM 457, CHEM 531, and BIOC 442, or permission of instructor. Instructors: Atkins, Nelson Offered: Sp.

[View course details in MyPlan: MEDCH 521](#)

MEDCH 527 Drug Metabolism (4) A. RETTIE, K. THUMMEL

Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Includes reaction mechanisms, ultrastructural considerations, induction mechanisms, methodology, kinetics of

inhibition and activation, steroid and amine metabolism. Offered: jointly with PHCOL 527; W, odd years.²³⁵⁵
[View course details in MyPlan: MEDCH 527](#)

MEDCH 528 Biophysical Enzymology and Biopharmaceuticals (2) *Atkins, Catalano*

Covers in-depth treatment of chemical catalysis and transition state theory as related to enzyme mechanisms; thermodynamics and kinetics of protein-ligand interactions, protein-protein-interactions and protein-lipid interactions, and methods for their study. Discusses therapeutically relevant examples, including viruses, therapeutic antibodies, and drug targets. Offered: W, even years.

[View course details in MyPlan: MEDCH 528](#)

MEDCH 529 Advanced Medicinal Chemistry (4) *Atkins, Kunze, Nelson, Rettie, Totah*

Covers the fundamental aspects of contemporary medicinal chemistry. Discusses the chemical characteristics of drugs and drug targets, pharmaceutical properties of drugs, drug metabolism, toxicology, and pharmacogenetics. Focuses on various drug classes; their biochemistry, pharmacology, mechanism of action, and toxicology. Offered: W.

[View course details in MyPlan: MEDCH 529](#)

MEDCH 530 Integrated Pharmacology (1) *Atkins, Beavo, Rettie*

Students present and discuss primary literature that integrates aspects of medicinal chemistry and pharmacokinetics with the physiology, pharmacology, and genetics of therapeutic drug targets. Examples of targets discussed include ion channels and enzymes relevant to cardiovascular disease, and neurodegenerative disease. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: MEDCH 530](#)

MEDCH 531 Laboratory Methods in Protein Therapeutics (3)

Hands-on experience with laboratory methods and data analysis used to characterize biophysical properties of therapeutic antibodies. Students measure functional protein interactions and stability of constructs currently used for anti-body-based therapeutics. Background lectures from industry and government scientists highlight the role of these analyses in development of protein-based therapeutics.

[View course details in MyPlan: MEDCH 531](#)

MEDCH 535 Diagnostic Medicinal Chemistry (3) *Catalano, Kunze*

Examination of clinical diagnostic tests with regard to the chemical or biochemical rationale of the testing method, interpretation of test results, and major factors influencing test values with special emphasis on the effects of medications. Clinical laboratory data from patients considered in light of these factors. Offered: W.

[View course details in MyPlan: MEDCH 535](#)

MEDCH 541 Biological Mass Spectrometry (3)

Covers the basics of modern ionization methods and mass analyzers; small molecule structure assignment, quantitative assay development by LC-MS and metabolomics; quantitative discovery-based proteomics and validation methods; and peptide sequence determination, post-translational modification mapping, and protein structure determination methods. Prerequisite: permission of instructor. Instructors: Whittington Offered: Sp.

[View course details in MyPlan: MEDCH 541](#)

MEDCH 551 Flavin and Heme-Containing Monooxygenases (1)

Discussion of research strategies and methodologies concerning the structure, function, and polymorphic expression of human monooxygenases, especially the cytochrome P450s and flavin-containing monooxygenases. Emphasis placed on experimental problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Rettie Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDCH 551](#)

MEDCH 552 Medicinal Chemistry Aspects of Drug Action and Drug Metabolism (1)

Discussion of research strategies, methodologies, and literature concerning the mechanisms of drug action and drug metabolism, particularly as these apply to opiate drugs and beta blockers. Emphases placed on problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Instructors: Nelson Credit/no-

credit only. Offered: AWSpS.

[View course details in MyPlan: MEDCH 552](#)

MEDCH 553 Structure and Function of Macromolecular Protein Assemblies (1)

Discussion of research strategies, methods, and current literature concerning macromolecular self-assembly processes and protein-protein interactions as they relate to biological specificity. Emphasis on experimental approaches used in current literature. Prerequisite: permission of instructor. Instructors: Atkins Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDCH 553](#)

MEDCH 554 Biophysical and Structural Virology (1) *Lee*

Discusses current topics in virus research and literature. Weekly sessions led by all participating members of the research group. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDCH 554](#)

MEDCH 555 Biophysics and Pharmacology of Dynamic Proteins (1)

Discusses current topics in protein dynamics, focusing on intrinsically disordered proteins and drug-metabolizing enzymes. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor. Instructors: Nath Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDCH 555](#)

MEDCH 556 Clinical and Mechanistic Aspects of Drug Metabolism (1)

Discussion of research methodologies and new approaches to elucidate chemical mechanisms and enzymology of reactions catalyzed by cytochrome P-450. Emphasis on clinical applications and predicting in vivo drug behavior and toxicity. Prerequisite: permission of instructor. Instructors: Totah Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDCH 556](#)

MEDCH 558 Human Cytochrome P-450 Biochemistry (1)

Presentation and discussion of research strategies and methodologies related to current problems in human drug metabolism by cytochrome P-450 enzymes. Emphasis on hypothesis testing and experimental problem solving in the areas of enzyme kinetics and mechanism. Prerequisite: permission of instructor. Instructors: Kunze Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDCH 558](#)

MEDCH 559 Biosynthesis, Metabolism, and Analysis of Lipids (1) *L. XU*

Covers recent advanced on oxidative metabolism of lipids, lipid biosynthesis, and application of advanced mass spectrometry to the analysis of lipids and oxidized lipids. Weekly sessions led by all participating members of the research group. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: MEDCH 559](#)

MEDCH 561 Immunizing and Antimicrobial Agents (4) *Black, Lee, Totah*

Mechanisms of action, spectrum of coverage, resistance patterns, toxicity, and therapeutic applications of antibiotics, antifungals, and antivirals. Also covering chemical and biologic properties of agents used to prevent or treat infectious diseases, including diagnostic, prophylactic, and therapeutic uses of immunizing agents. Prerequisite: MICROM 301, MICROM 302, MEDCH 570, or equivalent, PharmD major, or permission of instructor. Offered: Sp.

[View course details in MyPlan: MEDCH 561](#)

MEDCH 562 Medicinal Chemistry (3) *W. ATKINS, K. KUNZE, D. PORUBEK, A. RETTIE*

Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: A.

[View course details in MyPlan: MEDCH 562](#)

MEDCH 563 Medicinal Chemistry (3)

Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Instructors: Nelson, Rettie
Offered: W.

[View course details in MyPlan: MEDCH 563](#)

MEDCH 564 Medicinal Chemistry (3)

Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Instructors: Atkins, Nelson
Offered: Sp.

[View course details in MyPlan: MEDCH 564](#)

MEDCH 570 Medicinal Biochemistry (4) *Catalano, Kunze*

Covers advanced topics in medical biochemistry directly related to understanding disease and drug therapy in pharmacy practice. Areas of study include enzymes of drug metabolism, metabolic control of disease states, signal transduction, virology, coagulation and complement cascades, cellular transport, and DNA replication/transcription. Offered: W.

[View course details in MyPlan: MEDCH 570](#)

MEDCH 582 Topics in Medicinal Chemistry (1, max. 30)

Discussion of pertinent articles from current literature. Credit/no-credit only. Offered: AWSp.

Pharmaceutics

[Display as tabs](#)

Department Overview

The Department of Pharmaceutics offers a program of study leading to the Doctor of Philosophy degree.

Program Description

The doctoral degree program in pharmaceutics trains research scholars in the fundamental aspects of drug delivery, drug disposition, and drug action in animals and man. Drug disposition includes the facets of drug absorption, distribution, and elimination. Pharmacokinetics is the study of the time course of these processes and the time course of pharmacological effects. Drug delivery includes targeting of drugs and modulation of xenobiotic and drug transporters to tissues or specific cell types to improve their therapeutic effect. For further information, visit: sop.washington.edu/pharmaceutics/about/what-is-pharmaceutics.html.

Typically graduates interact with clinicians, medicinal chemists, biochemists, pharmacologists, analytical chemists, and physiologists. This is possible because their training is highly interdisciplinary at the didactic and research levels.

A wide range of career paths is available to graduates. Opportunities include research in the pharmaceutical industry; research in hospitals, institutes, and foundations; teaching and research in academic institutions; and positions with government regulatory agencies.

pceut@uw.edu

Doctor of Philosophy

Admission Requirements

1. One copy of official transcripts in a sealed envelope from each college attended
2. Official GRE score report
3. All foreign students must take the TOEFL and TSE test and send in the official score report

4. Statement of personal goals describing applicant's background, academic interests, and career objectives
5. A resume; or curriculum vitae listing educational and employment history
6. Three letters of recommendation from persons in a position to evaluate the applicant's potential for graduate school.

Degree Requirements

Minimum 90 credits of coursework, to include:

1. *Credits and Scholarship*: Minimum 41 credits of coursework, exclusive of thesis and non thesis research. 3.00 GPA in all numerically graded courses numbered 400 and 500. Minimum passing grade in any given course is 2.7, except required pharmaceutics courses (PCEUT 501, PCEUT 502, PCEUT 503, PCEUT 506) in which a passing grade is 3.0. Credits earned for a master's degree may apply towards the doctoral degree.
2. *Teaching Experience*: Minimum two quarters of teaching assistant experience. Students are not asked to assist more than one class an academic quarter (less than 12 contact hours/week). Most students complete this requirement during the first three years in the program.
3. *Examinations and Progress Evaluation*: A series of preliminary, cumulative (written) examinations; a general examination (oral) for advancement to PhD candidacy; a final examination (defense of the thesis). See Appendix A, "Progression Steps in Relation to the Doctoral Degree," for an overview. Appendix B describes the cumulative examination, which precedes the general exam. Appendix C provides details about formation of a doctoral Supervisory Committee and its role in the general exam and thesis defense. Appendix D provides details about the structure and conduct of the general exam.
4. *Master's Degree Bypass*: Students who qualify for continuation to the PhD degree may be allowed to bypass the M.S. degree. See Appendix A for petition procedure.
5. *Seminars*: All students must present a minimum of two and a maximum of four seminars while in the doctoral program (PCEUT 520). In addition, a presentation of papers from current literature is required twice a year, starting at the beginning of the second year until defense of the thesis (PCEUT 583). See Appendix E, "Training in Oral Communication through Seminars and Journal Club" for additional details.
6. *Didactic*: Coursework for the doctoral program is divided into four components: (a) prerequisites which define the level of entry into the program; (b) a required core program which is analogous to the major; (c) elective courses, which are not required but are encouraged; (d) seminars and literature review.

a. Prerequisites:

- MATH 124
- MEDCH 400

Applicants with a PharmD degree should have fulfilled the medicinal chemistry requirement. MEDCH 400 can be taken in autumn quarter of the first year. Candidates are accepted on condition that any deficiencies in course requirements are rectified by the end of the first academic year.

b. Core Program:

- PCEUT 506
- PCEUT 501
- PCEUT 502
- PCEUT 503
- PCEUT 510, PHCOL 511, PHCOL 512, PHCOL 513
- BOST 511
- BOST 512
- HCDE 509
- PCEUT 600, PCEUT 800

Students entering with previous graduate-level coursework in the required areas may have some of the above courses waived. In addition, all students must attend the following training sessions, preferably during the first academic year: chemical safety, biological safety, and bioethics training. Radiation safety and animal care may also be required, if relevant to the student's thesis research.

c. Directed Electives:

Electives are not required. However, students are encouraged to take elective courses that might benefit their thesis project and career goals. Courses that might be of interest can be found in the disciplines of biotransformation/biochemistry, biologics/drug delivery, pharmacology/cell biology, and physiological modeling/biostatistics.

d. Seminars and Literature Review:

- PCEUT 520 (1 credit/quarter; 3 quarters/year until graduation)

Beginning the second year, students make one presentation each year, with a maximum of four presentations. A general topic seminar is presented in the second year; research presentations in subsequent years.

- PCEUT 583 (1 credit/quarter; 3 quarters/year until graduation)

Beginning the second year, students make two presentations each year until graduation. Journal club presentation is waived in the quarter during which the student is scheduled to make a PCEUT 520 seminar presentation.

7. Research:

- PCEUT 600, PCEUT 800

Students complete three research laboratory rotations (PCEUT 600), one per quarter, starting autumn quarter of their first year. A student may opt to complete a rotation in summer quarter, before the initiation of classes. This involves an early appointment in the department and, thus, decisions must be made at the time they accept the offer to enroll. Matching of available labs with each incoming student is facilitated by the first year graduate adviser. Student preferences are given due consideration.

Students must choose a thesis adviser by the end of spring quarter in their first academic year (See Appendix A for additional details).

Students must begin research in the lab of their adviser by summer quarter at the end of their first academic year (PCEUT 600). Most students may find that after-class and off-hours are the best and most productive time for laboratory research (See Appendix A1b for additional details).

After successful completion of the master's bypass requirements (see Appendix A for details), students sign up for PCEUT 800, until the defense of their thesis.

8. *Cumulative Examination*

Students begin taking cumulative exams in autumn quarter of their second academic year, and continue taking them at every offering until completion of pass requirements or until they take the maximum of eight exams. A total of eight exams are offered, two each in autumn, winter, spring, and summer quarters. For each exam, there two questions. Students must pass four of eight exams to complete the cumulative requirement. Students who do not achieve this goal are given the option of completing requirements for a terminal master's degree or withdrawal from the program.

Financial Aid

All students in the program receive financial support in the form of research assistantships, Public Health Service predoctoral training fellowships, and other fellowships such as the William E. Bradley Graduate Fellowship or those from the American Foundation for Pharmaceutical Education or from several pharmaceutical companies.

SCHOOL OF PHARMACY PHARMACEUTICS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PCEUT 499 Undergraduate Research (1-6, max. 12)

Research problems in drug disposition, drug targeting, and drug development. Prerequisite: cumulative GPA of 2.50 and permission of instructor.

[View course details in MyPlan: PCEUT 499](#)

PCEUT 501 Advanced Pharmacokinetics I (4) Y. LIN, B. PRASAD, J. UNADKAT

Drug absorption, distribution, excretion, metabolism, and pharmacological effects in mammalian systems. Compartmental and physiologically-based pharmacokinetic models as well as non-compartmental approaches examined. Drug disposition studied in a physiologically realistic context taking nonlinear events into account. Aimed at development of innovative methods for data analysis and evaluation in biological systems. Prerequisite: either PCEUT 506 or permission of instructor. Offered: even years.

[View course details in MyPlan: PCEUT 501](#)

PCEUT 502 Pharmacokinetics of Drug Metabolism (4)

Advanced study of drug metabolism pharmacokinetics. Topics emphasize linear and nonlinear metabolic clearance kinetics, drug-drug interaction mechanisms and kinetics, metabolite kinetics, in vitro-in vivo predictions, pharmacogenetics and other sources of inter-individual variability. Prerequisite: PCEUT 506 or permission of instructor. Instructors: Isoherranen, Thummel Offered: odd years.

[View course details in MyPlan: PCEUT 502](#)

PCEUT 503 Drug Transport and Delivery (5)

Provides advance knowledge of the physico-chemical and biological concepts underlying in vivo transport and delivery of drugs. Prerequisite: PCEUT 506. Instructors: Ho, Hu, Mao, Shen, Unadkat, Wang

[View course details in MyPlan: PCEUT 503](#)

PCEUT 505 Concepts in Pharmaceutical Sciences I (2) R. HO

Provides the student with foundational knowledge of drug properties and interaction with physiology upon administration in vivo, and an understanding of pharmaceutical formulation which is a key disciplinary area within the pharmaceutical sciences and its application to small molecules and protein-based therapeutics. Offered: A.

[View course details in MyPlan: PCEUT 505](#)

PCEUT 506 Concepts in Pharmaceutical Sciences II (4) Y. LIN

Covers the fundamentals of pharmacokinetics. Includes lectures and laboratory exercises on the key concepts in pharmacokinetics, including compartmental kinetics, clearance, clinical pharmacokinetics, and an introduction to pharmacokinetic software. Prerequisite: PCEUT 505; PCEUT 532, which may be taken concurrently, or permission of instructor. Offered: W.

[View course details in MyPlan: PCEUT 506](#)

PCEUT 510 Drug Interactions (3)

Covers common pharmacokinetic mechanisms underlying clinically important interactions between drugs, and patient- and drug-related factors that predispose a patient to adverse drug effects. Includes case-based discussion of approaches to identification, clinical evaluation, and clinical management of drug-drug interaction risk. Prerequisite: PHARM 558; PHARM 559; PHARM 560; PHARM 561; PHARM 563; PHARM 564, and PHARM 565. Instructors: Lin and Horn.

[View course details in MyPlan: PCEUT 510](#)

PCEUT 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) K. THUMMEL

Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PHG 513; W.

[View course details in MyPlan: PCEUT 513](#)

PCEUT 520 Seminar (1, max. 30) A. NATH

Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with MEDCH 520.

[View course details in MyPlan: PCEUT 520](#)

PCEUT 531 Pharmaceutical Formulation: Principles and Dosage Forms (4) Lee, Mao, Shen

Physiochemical principles involved in formulating stable dosage forms suitable for human administration. Hands-on laboratory experience with formulating extemporaneous preparations routinely encountered in community and hospital pharmacies. Routes of drug administration.

[View course details in MyPlan: PCEUT 531](#)

PCEUT 532 Clinical Pharmacokinetics (4)

Covers basic principles of pharmacokinetics and their application to the clinical setting, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, and the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Prerequisite: PCEUT 531. Instructors: Anderson, Isoherranen, Unadkat, Wang

[View course details in MyPlan: PCEUT 532](#)

PCEUT 533 Biopharmaceutics, Drug Delivery and Therapeutic Response (3) R. HO, S. HU, K. THUMMEL

Provides basic principles of biopharmaceutics, drug delivery and therapeutic response, and their application to traditional and biotherapeutics, including oral and non-oral routes of drug administration. Discussion include fundamental principles related to assessment of bioavailability, bioequivalence, and genetic basis for drugs. Offered: Sp.

[View course details in MyPlan: PCEUT 533](#)

PCEUT 570 Advanced Research Topics (1, max. 15)

Combines a discussion of the practical aspects and experimental techniques used to address the questions relating to drug disposition with comprehensive theoretical treatment of pharmacokinetic principles. Prerequisite: permission of the instructor. Credit/no-credit only.

[View course details in MyPlan: PCEUT 570](#)

PCEUT 583 Topics in Pharmaceutics (1, max. 30) *N. KLATT, K. THUMMEL*

Discussion of pertinent articles from current literature and recent laboratory results. Credit/no-credit only.

[View course details in MyPlan: PCEUT 583](#)

PCEUT 584 Pharmacokinetic Discussion Group (2) *Lin*

Student initiated discussions of pharmaceutics concepts in relation to current literature. Preparatory to departmental cumulative examinations. Credit/no-credit only.

[View course details in MyPlan: PCEUT 584](#)

PCEUT 586 Biotechnology and Biopharmaceutics (2-3) *Ho, Hu, Kelly, Thummel*

Current topics in pharmaceuticals and biotechnology focusing on transforming small molecules, proteins, and genes into therapeutic products. Includes new drug therapies, drug design, pharmacogenomics, molecular modeling, high throughput screen, production and stability considerations, and delivery systems of protein and gene therapeutics in relation to pharmacokinetic and therapeutic responses.

[View course details in MyPlan: PCEUT 586](#)

PCEUT 587 Introduction to Biopharmaceutical Product Development (3)

Provides a framework of the drug development process and its regulation. Prerequisite: ENV H 405 or ENV H 514, ENV H 515, and ENV H 516, or PCEUT 501, PCEUT 502, and PCEUT 503; or equivalent, or instructor permission. Offered: jointly with ENV H 587; A, even years.

[View course details in MyPlan: PCEUT 587](#)

PCEUT 598 Independent Research (*, max. 24)

Basic and clinical research problems in drug disposition and effect. Prerequisite: minimum grade of 2.50 GPA and permission of instructor.

[View course details in MyPlan: PCEUT 598](#)

PCEUT 599 Cumulative Exams for Pharmaceutics (1-, max. 3) *Isoherranen*

Quarterly cumulative examinations for graduate students.

Pharmacy

[Display as tabs](#)

Graduate Program

Graduate Program Coordinator
H375 Health Sciences, Box 357630
(206) 616-1383

The Department of Pharmacy offers graduate study leading to a PhD degree in pharmaceutical outcomes research and policy. Emphasis of this program is on the health and cost outcomes of pharmaceuticals and pharmaceutical services and policies. Graduate training in this program prepares students for career opportunities in teaching and research in universities, safety and economic evaluation of products in the pharmaceutical industry, policy analysis of governmental agencies, and drug use management within healthcare delivery and financing organizations.

Also offered is a track in the PharmD/MS program in pharmaceutical outcomes research and policy, which provides an opportunity for one-to-two students currently completing their PharmD training at the UW to enter the graduate program in their fourth year of training. The program requires completion of 64 credit hours, a written thesis, and a quarter of practicum in a managed care, government, industry, or other appropriate setting. At the end of this training, students may elect to receive a master's degree, or continue on toward a PhD degree.

The UW's biomedical regulatory affairs Master of Science program, offered by the UW School of Pharmacy in partnership with UW Educational Outreach, addresses a growing need for well-trained professionals in the regulatory field. The degree serves those who wish to advance their careers in the medical products industry or those entering the field from related areas.

Deadline for application for the PhD and the PharmD/MS programs is December 31. Applicants are notified of acceptance or rejection by March 30. Refer to the application deadline for the biomedical regulatory affairs master-of-science program posted at: www.biomedreg.uw.edu/admissions/deadlines.asp.

Application materials and additional information are available in the Department of Pharmacy or at program websites listed below:

sop.washington.edu/porpp/graduate-program/phd-program27.html.

sop.washington.edu/porpp/graduate-program/concurrent-pharmdms-degree-in-pharmaceutical-outcomes-research-a-policy.html.

www.biomedreg.uw.edu.

[Graduate Program](#)

[Professional Program](#)

[Time Schedule](#)

[Departmental Web Page](#)

[Departmental Faculty](#)

[Course Descriptions](#)

Residency and Fellowship Programs

The Department of Pharmacy offers several postdoctoral fellowships in pharmacotherapeutics and pharmaceutical outcomes, and advanced community residency programs, primarily intended for PharmD graduates. Additional information is available on the department's website: sop.washington.edu/pharmacy/about/fellowship-a-residency-opportunities.html.

Clinical and Affiliate Faculty

In addition to the School of Pharmacy's full- and part-time faculty listed above, a large number of practicing pharmacists contribute to the School's academic programs. Over 500 pharmacists throughout the Pacific Northwest are members of the clinical and affiliate faculty, representing a variety of pharmacy practice settings such as community, hospital, nursing home, government, and industry. Information on the names, addresses and practice settings of these faculty members is available from the Office of Professional Pharmacy Education.

Professional Program

Doctor of Pharmacy

A four-year professional program leading to the Doctor of Pharmacy (PharmD) degree, the curriculum is designed to provide students the scientific background and clinical skills necessary to render pharmaceutical care in various healthcare settings. Individuals who wish to practice pharmacy in the United States must earn a Doctor of Pharmacy (PharmD) degree from an accredited college or school of pharmacy, complete required internship hours, pass licensing examinations, and meet other state-specific licensing requirements.

Admission Requirements

Consideration for admission to the professional program requires a minimum three years of pre-pharmacy training. An applicant who is admissible to the University is not assured admission to the School of Pharmacy. Admission is competitive, based on a number of factors. Academic preparedness, motivation, oral and written communication skills, critical-thinking ability, and decision-making skills are among the criteria used to determine a candidate's aptitude for the program. Following a preliminary assessment of the applicant pool, the most qualified applicants are selected for an interview in Seattle. A writing assessment is also conducted at that time. Further details on admission requirements, application procedures, and program content are available from the School's Office of Academic and Student Programs or its website.

1. Applicants to the UW School of Pharmacy PharmD program must **both** complete an on-line PharmCAS Application and submit a supplemental application to the UW School of Pharmacy, Office of Academic and Student Programs. Potential applicants should consult the School of Pharmacy website, sop.washington.edu/school-of-pharmacy/pharmd-admissions/applications-to-pharmd-program.html for additional admission requirements and the most current information regarding the PharmD program.
2. Please refer to the School's website for current entry-level Doctor of Pharmacy program information at sop.washington.edu/students/.

3. Pharmacy College Admission Test (PCAT) must be taken within two years of application. The UW School of Pharmacy accepts no other admission test (e.g., MCAT, GRE) in place of the PCAT.
4. Applicants who have completed all prerequisite (pre-pharmacy) coursework prior to application and those who have earned a prior bachelor's degree or higher are given preference in the process of screening for offer of interview. The admissions committee has established minimum cumulative and prerequisite (pre-pharmacy) GPA thresholds and PCAT scores for screening for offer of interview. Applicants who meet or exceed these minimums are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool.
5. Interview is required as part of the UW School's PharmD admission process. After a preliminary assessment of the applicant pool, the most-qualified applicants are invited for an interview in Seattle with members of the PharmD admissions committee. Admission preference is given to residents of Washington State and residents from states participating in the Western Interstate Commission for Higher Education (WICHE).
6. It is important for applicants to research carefully the pharmacy profession and the attributes, skills, and abilities essential for pharmacists in the provision of care. Although relevant experience is not required, applicants are strongly encouraged to gain pharmacy experience, either as a volunteer or employee.
7. Non-U.S. Citizens: Applicants who hold "Permanent Resident" or "Refugee/Asylee" visa status and international students with F-1 Visa status are eligible to apply. F-1 Visa students must take the TOEFL within two years of application. Please refer to the School's website for more information at sop.washington.edu/school-of-pharmacy/pharmd-admissions/international-applicants-eligibility-to-apply.html.
8. International Transcripts: All transcripts for coursework completed at foreign colleges or universities must be translated and evaluated course-by-course by one of the following certified agencies: the Education Credential Evaluators, World Education Services, Inc, or Educational-Perspectives.

Degree Requirements

Current degree requirements for entering classes are reflected in the graduating class of 2015 and later. (Graduating classes of 2014 and earlier have different course sequences as a result of this revision.) Below are the current degree requirements:

1. *Year 1 (47 core, 5 elective credits):* CONJ 401, CONJ 402, CONJ 403; MEDCH 561 , MEDCH 570; PCEUT 531, PCEUT 532, PCEUT 533; PHARM 500; PHARM 558; PHARM 584, PHARM 585, PHARM 586; PHARMP 511, PHARMP 512; 5 elective credits; MEDCH 400 is required for students who do not pass the MEDCH qualifying exam, which if taken, can be credited as a professional elective.
2. *Year 2 (46 core, 5 elective credits):* MEDCH 562, MEDCH 563, MEDCH 564; PHCOL 401, PHCOL 402; PHARM 509; PHARM 537; PHARM 539; PHARM 543, PHARM 543; PHARM 559; PHARM 563; PHARM 592, PHARM 593, PHARM 594; PHARMP 513, PHARMP 514; PHARMP 531; 5 elective credits
3. *Year 3 (33 core, 18 elective credits):* PCEUT 510 (3); PHARM 541; PHARM 560; PHARM 561, PHARM 562); PHARM 564, PHARM 565); PHARMP 532, PHARMP 533, PHARM 541; 18 elective credits
4. *Year 4:* Nine required clinical rotations (6 credits each) for a total of 54 credits

PharmD/PhD Concurrent Program

PharmD/PhD Program Coordinator
H272 Health Sciences, Box 357610
(206) 543-0819

The accelerated dual-degree program is intended for outstanding students committed to earning the PharmD degree and a PhD degree in either Pharmaceutics or Medicinal Chemistry. Students are equipped to enter academic careers that require competence in clinical practice, teaching, and research. They will possess the breadth and depth of knowledge necessary to work with colleagues across multiple disciplines essential to performing integrated and translational medical and pharmaceutical research. Many of our trainees have worked in research and developed an interest in public health and pharmaceutical sciences through that experience.

Students admitted to the concurrent degree program are able to complete the requirements for both degrees in about eight academic years, rather than the nine years normally required to receive both degrees.

Admission to the PharmD/PhD program is based on the recommendation of the admission committees of the professional degree program, the graduate program, and the PharmD/PhD program. For additional admission criteria, see respective programs.

Admission Requirements

Applicants must complete admission requirements of both the PharmD and PhD programs. Consideration for the PharmD/PhD program is contingent upon completion of a PharmD application, Graduate School application, and PharmD/PhD application (available online at: sop.washington.edu/school-of-pharmacy/degree-programs/concurrent-degree-opportunities.html).

1. PharmD program application is composed of (a) verified completion of all application materials by the deadline as stated on the school website, (b) PCAT scores, (c) prerequisite and cumulative GPA, (d) ability to complete prerequisite courses by the end of spring term prior to School of Pharmacy matriculation. For details, see PharmD admission requirements.
2. Graduate School application for medicinal chemistry or pharmaceutics includes (a) undergraduate degree in chemistry, biochemistry, pharmacy, biology, or a closely related field, (b) statement of purpose, (c) GRE scores, (d) prior research experience, (e) three letters of recommendation. Graduate School application deadline as stated on the school website.
3. In addition, applicants are required to submit information requested in the PharmD/PhD concurrent program application checklist, available on the above stated website.

Financial Aid

Financial support in the form of research assistantships, teaching assistantships, and fellowships may be available to prospective and continuing students. Availability of financial aid is limited, typically to the first and second academic year. Prospective students should contact the Graduate Program Coordinator for more information on financial support.

SCHOOL OF PHARMACY

SCHOOL OF PHARMACY

PHARMACY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PHARM 301 Medications and Health: It's Not All About Drugs (3) NW/I&S *Dawson, Odegard, Weber*
Covers personal health promotion, treatment of illness, and health care. Explores several medication-related topics, provides insight on drug development and efficacy, and serves as introduction to students contemplating careers in health sciences, especially in pharmacy. Credit/no-credit only.

[View course details in MyPlan: PHARM 301](#)

PHARM 500 Profession of Pharmacy (1)

Introduces the new student to the profession of pharmacy. Provides both an historical and a modern context that assists student pharmacists begin to participate in the profession. Provides an overview of career opportunities.

Prerequisite: professional PharmD class 1 student. Instructors: Kedzierski , Weber Credit/no-credit only.

Offered: A.

[View course details in MyPlan: PHARM 500](#)

PHARM 501 Alternative and Complementary Medicines (2) *Anderson*

Studies popular alternative and complementary medicines used in the United States. Focuses on herbal products with some coverage of other non-nutritional dietary supplements. Open to professional and graduate students in the Schools of Pharmacy, Nursing, Medicine, Dentistry, and Public Health, or by permission of instructor.

Credit/no-credit only. Offered: AW.

[View course details in MyPlan: PHARM 501](#)

PHARM 503 Senior Care Introductory Pharmacy Practice Experience (2)

Under faculty supervision, provides clinical services for senior patients in various settings. Includes reviewing charts, interviewing patients, collaborating with other health care providers, and making recommendations on medication therapies to providers and patients. All students participate in an orientation/seminar workshop and in a weekly (for five weeks) clinical pearls workshop. Prerequisite: either successful completion of the first five quarters of the PharmD curriculum or permission of instructor. Instructors: Murphy, Plein Credit/no-credit only.

Offered: Sp.

[View course details in MyPlan: PHARM 503](#)

PHARM 509 Principles of Evidence Based Medicine III: Critical Evaluation of Published Evidence (1) ²³⁷¹ T. O'SULLIVAN

Provides a critical evaluation of medical literature. Prerequisite: permission of School of Pharmacy.

[View course details in MyPlan: PHARM 509](#)

PHARM 510 Contemporary Concepts in Clinical Nutrition Support (1)

Addresses current topics and concepts in clinical nutrition support. Topics include assessment and management of patients requiring specialized nutrition support, enteral nutrition, and parental nutrition. Recommended: biochemistry, anatomy and physiology, or permission of instructor. Offered: A.

[View course details in MyPlan: PHARM 510](#)

PHARM 513 Medical Devices for Home Healthcare (3) D. DOWNING

Study of medical devices commonly provided by pharmacists to their patients, including their selection and adaptation for specific patient needs. Lectures include display and demonstration of actual devices.

[View course details in MyPlan: PHARM 513](#)

PHARM 514 Pharmacotherapeutics for Advanced Nursing Practice (3) Hertig

Application of principles of pharmacology as foundation for clinical decision making by advanced practice nurses for individuals and populations. Incorporates pharmacotherapy into advanced nursing therapeutics by addressing pharmacokinetics, pharmacodynamics, pharmacogenetics as well as patient-related factors that support selection of commonly used drugs. Selected drugs within categories are compared/contrasted.

[View course details in MyPlan: PHARM 514](#)

PHARM 515 Pharmacotherapeutics for Acute/Critical Illness (3)

Analysis of issues that impact the assessment, prescription, and evaluation of pharmacotherapeutic regimens for patients with acute/critical illness or injury. Current evidence together with pharmacotherapeutic principles are considered within the clinical context as the basis for decision-making in acute/critical care clinical practice. Prerequisite: either PHARM 514 or equivalent. Offered: Sp.

[View course details in MyPlan: PHARM 515](#)

PHARM 516 Introduction to Biomedical Regulatory Affairs (3) Hazlet

Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production; and responsibilities of a regulatory affairs specialist in the regulatory setting.

[View course details in MyPlan: PHARM 516](#)

PHARM 517 Product Development and Manufacturing Systems (3) Hazlet

Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production.

[View course details in MyPlan: PHARM 517](#)

PHARM 518 Product Testing, Evaluation, and Post-Market Issues (3) Hazlet

Medical product post-marketing requirements; reporting and enforcement actions; inspections (internal and by regulators) preparation, conduct, and follow-up actions; surveillance and studies, reimbursement, and economics.

[View course details in MyPlan: PHARM 518](#)

PHARM 519 Pharmacotherapeutics for Infectious Disease and Infection (2) Black, Simpson

Analysis of pharmacotherapeutics to control infection and manage infectious disease through seminar discussion of cases, critical analysis of a pharmacotherapeutic regimen, and development of references to enhance students' clinical expertise. Emphasis on principles of anti-infective therapy, problem solving clinical cases with complex medication regimes, and identifying judicious pharmacotherapeutic plans.

[View course details in MyPlan: PHARM 519](#)

PHARM 520 Introduction to Pharmacoeconomics and Outcomes Research (2) *Veenstra*

Provides an introduction to economic evaluation and outcomes research related to pharmaceuticals and other healthcare technologies. Covers the methods of cost-effectiveness analysis and quality of life evaluation, and their use in real-world decision-making.

[View course details in MyPlan: PHARM 520](#)

PHARM 521 Pharmacy Teaching Practicum (1-3, max. 6) *R. ALLEN, D. DOWNING, A. ELLSWORTH, T. HAZLET*

Allows students the opportunity to apply learning about education in a mentored experiences. Students serve as assistant instructors in existing pharmacy courses or engage in other approved educational experiences.

Prerequisite: PHARM 586, instructors permission. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: PHARM 521](#)

PHARM 522 The Nature of Scientific Truth (2) *Hansten*

Drawing on the wisdom of scientists and philosophers, discussion of the nature and limitations of scientific truth, using examples from the practice of pharmacy whenever possible. Emphasizes reasoning errors that are common in science, particularly those that involve the application of scientific information to clinical practice. Credit/no-credit only.

[View course details in MyPlan: PHARM 522](#)

PHARM 525 Advanced Compounding Skills (1)

Prepares the student to create unique, patient-specific pharmaceutical dosage forms used in contemporary pharmacy practice. Includes pre-readings and assignments, a didactic session and a laboratory session, and is offered over a weekend. Prerequisite: PCEUT 531. Instructors: Lawhorn, Needham Credit/no-credit only.

[View course details in MyPlan: PHARM 525](#)

PHARM 529 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) *F. WOLF*

Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/EPI 541/HSERV 529.

[View course details in MyPlan: PHARM 529](#)

PHARM 532 Methods in Pharmaceutical Policy Analysis (4) *Garrison, Hazlet*

Introduction to the tools used in and the framework and dominant contexts for pharmaceuticals policy development and analysis. Methods reviewed in a series of sessions presenting a specific method and case analyses involving pharmaceuticals development. Project and in-class presentation required.

[View course details in MyPlan: PHARM 532](#)

PHARM 533 Pharmacoepidemiology (3)

Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513. Offered: jointly with EPI 533.

[View course details in MyPlan: PHARM 533](#)

PHARM 534 Economic Evaluation in Health and Medicine (3)

Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Instructors: Garrison, Veenstra Offered: jointly with HSERV 583.

[View course details in MyPlan: PHARM 534](#)

PHARM 535 Assessing Outcomes in Health and Medicine (3)

Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Instructors: Devine, Edwards Offered: jointly with HSERV 584; W.

[View course details in MyPlan: PHARM 535](#)

PHARM 536 Advanced Methods in Economic and Outcomes Evaluation in Health and Medicine (3)

Covers advanced methods and techniques for evaluating costs, outcomes, and cost-effectiveness of health, medical, and pharmaceutical interventions. Topics include: network meta-analysis, Markov modeling, probabilistic sensitivity analysis, value of information analysis, utility mapping, conjoint analysis, and budget impact analysis. Prerequisite: either PHARM 534 and PHARM 535 or permission of instructor. Instructors: Carlson Offered: Sp.

[View course details in MyPlan: PHARM 536](#)

PHARM 537 Chemical Dependency Concepts (2) *Kedzierski*

Examines the development of therapeutic frame for working with patients with addictions. Includes the genesis of addiction harm reduction strategies, legal and ethical considerations, medication management in the substance-abusing population, impaired pharmacist rehabilitation, detection and dealing with substance abuse issues in pharmacy practice, community resources. Course offered to professional PharmD, class 2. Credit/no-credit only. Offered: A.

[View course details in MyPlan: PHARM 537](#)

PHARM 538 Chemical Dependency Issues in Practice (3)

Emphasis on drug classes, pharmacologic management of abstinence and withdrawal, drug testing, drug use in pregnancy, treatment options and recovery, codependency and legal and ethical considerations. Prerequisite: PHARM 537. Instructors: Kedzierski Credit/no-credit only. Offered: W.

[View course details in MyPlan: PHARM 538](#)

PHARM 539 Principles of Professional Practice Management (3) *Downing, Somani*

Emphasizes the major issues and barriers of providing pharmaceutical care in institutional and community pharmacies. Topics include evaluating workflow and facility design, complying with legal and safety standards, managing drug distribution services, payment for pharmacist services, human resource management and marketing pharmaceutical care services.

[View course details in MyPlan: PHARM 539](#)

PHARM 541 Pharmacy, Healthcare, and Society (3) *Sullivan*

Introduction to health services and pharmacy practice designed for future healthcare practitioners. Examines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student's ability to adopt a broad perspective across healthcare disciplines and traditional boundaries.

[View course details in MyPlan: PHARM 541](#)

PHARM 542 Managed Care Pharmacy: Principles and Practice (3) *Fullerton, Penna*

Surveys the activities, tactics, and strategies used by managed care to deliver pharmacy services to their members. Includes: formulary development, clinical improvement programs, quality improvement measures, regulatory activities, contracting with pharmaceutical manufacturers, network management, financial issues, sales and marketing, and provider relations. class 2, 3, and 4 PharmD students.

[View course details in MyPlan: PHARM 542](#)

PHARM 543 Pharmacy Laws and Ethics ([2-3]-, max. 5) *Hazlet*

Studies the laws governing the practice of pharmacy, approaches to legal, and ethical dilemmas in the delivery of pharmaceutical care, and methods of statutory and regulatory reform.

[View course details in MyPlan: PHARM 543](#)

PHARM 544 Survey of Pharmacy Laws (1) *Hazlet*

Prepare, discuss, and present responses to assigned questions developed by faculty regarding laws governing pharmacy practice in the course of reviewing for the Multistate Pharmacy Jurisprudence Examination. Class meets for two consecutive Saturdays in February and March. Email and web access required. Open to fourth-year PharmD students; non-matriculated students by permission only. Credit/no-credit only.

[View course details in MyPlan: PHARM 544](#)

PHARM 549 Pharmacotherapeutics for Older Adults (3-4)

Applies pharmacologic knowledge to the assessment, individualized selection of therapy, and monitoring of treatment in older adults with multiple comorbidities; and age-related changes in pharmacokinetics and pharmacodynamics with emphasis on problem solving, using case examples. Prerequisite: either PHARM 561; PHARM 565 or permission of the School of Pharmacy. Instructors: Murphy Offered: Sp.

[View course details in MyPlan: PHARM 549](#)

PHARM 550 Seminar in Geriatrics ([0-1]-, max. 1) *L. MIKE*

Students facilitate a discussion with students/faculty about the management of an older adult with complex medication regimen. In addition, students critically review and appraise primary literature relevant to contemporary issues related to geriatric pharmacotherapy. Prerequisite: PHARM 549; permission of the instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARM 550](#)

PHARM 552 Practice-Based Leadership and Project Development (2) *J. Arnold, N. Murphy*

Strengthen skills necessary to develop, implement, and evaluate innovated programs that improve health, healthcare delivery, and the patient experience. In addition to actively participating in class discussions and group work, students are responsible for submitting weekly assignments, a final reflection paper, and a project proposal. Credit/no-credit only. Offered: W.

[View course details in MyPlan: PHARM 552](#)

PHARM 557 Pharmacotherapeutics II (3)

Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge toward the management of common diseases. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of school. Offered: Sp.

[View course details in MyPlan: PHARM 557](#)

PHARM 558 Pharmacotherapeutics I - Pharmacotherapy with Non-prescription (OTC) Drugs (3)

Ellsworth

Overview of common classes of nonprescription drug therapeutics with an emphasis on case examples, patient assessment, non-drug adjunct therapy, product selection, and patient advice. Oral presentation required. Computer (Internet) case discussion mandatory. Enrollment restricted to first-year PharmD students.

[View course details in MyPlan: PHARM 558](#)

PHARM 559 Pharmacotherapeutics III (4)

Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: Sp.

[View course details in MyPlan: PHARM 559](#)

PHARM 560 Pharmacotherapeutics IV (6)

Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy Offered: A.

[View course details in MyPlan: PHARM 560](#)

PHARM 561 Pharmacotherapeutics V (7)

Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related

knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy Offered: W.

[View course details in MyPlan: PHARM 561](#)

PHARM 562 Pharmacotherapeutics VI (6)

Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge towards the management of common disease. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy Offered: Sp.

[View course details in MyPlan: PHARM 562](#)

PHARM 563 Applied Pharmacotherapeutics I (2) L. MIKE

Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care.

Prerequisite: permission of School of Pharmacy. Offered: Sp.

[View course details in MyPlan: PHARM 563](#)

PHARM 564 Applied Pharmacotherapeutics II (2) L. MIKE

Develops a foundation of skills that enables a pharmacist to practice collaborative patient specific care.

Prerequisite: permission of School of Pharmacy. Offered: A.

[View course details in MyPlan: PHARM 564](#)

PHARM 565 Applied Pharmacotherapeutics III (2) L. MIKE

Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care.

Prerequisite: permission of School of Pharmacy. Offered: W.

[View course details in MyPlan: PHARM 565](#)

PHARM 566 Applied Pharmacokinetics (2)

Pharmacokinetics of specific drugs. Influence of age, weight, sex, and disease states on patient-specific dosage regimens emphasized. Advanced kinetic concepts are discussed and put into applied context. Prerequisite:

PCEUT 532. Instructors: Bauer

[View course details in MyPlan: PHARM 566](#)

PHARM 567 Cancer Pharmacotherapeutics (2)

Pharmacotherapy of cancer, covering supportive care therapeutics (antibiotics, antiemetics, analgesics,) to the antineoplastic agents. The pathophysiology, staging, and treatment of different cancers is discussed. Specialists from the different oncology practice areas serve as guest lecturers. Prerequisite: either PHARM 561; PHARM 565, or permission of the School of Pharmacy. Instructors: Gibson, Kwok, McQuary, Vincent Offered: Sp.

[View course details in MyPlan: PHARM 567](#)

PHARM 568 Health Economics (3)

Applies microeconomics principles and models to understand the nature of healthcare markets and systems.

Includes a wide range of health sector activities and policy issues studied by applying rigorous economic analytical tools coupled with review of key econometric and empirical analysis. Prerequisite: introductory coursework in microeconomic principles and basic statistics. Instructors: Garrison Offered: W.

[View course details in MyPlan: PHARM 568](#)

PHARM 569 Fluid and Electrolytes and Parenteral Nutrition (2) Chan

Focuses on the principles of fluid electrolyte and nutritional management in patients requiring parenteral nutrition (PN) and infusion therapy. Topics include acid-base balance, macro- and micro-nutrient requirements, nutritional assessment, complications of PN and compounding and compatibility of PN solutions. Discusses consideration in special populations (e.g., ICU). Prerequisite: either PHARM 561; PHARM 565, or permission of the School of Pharmacy.

[View course details in MyPlan: PHARM 569](#)

PHARM 570 Critical Care Pharmacotherapeutics (2)

Overviews pharmacotherapeutic topics for patients in the critical care setting. Discusses principles in

hemodynamic monitoring, respiratory management, concepts in pathophysiology related to critical illnesses²³⁷⁶, and other timely topics reflecting current clinical practice. Prerequisite: third-year PharmD student, or approval of instructor. Instructors: Mike

[View course details in MyPlan: PHARM 570](#)

PHARM 571 Current Topics in Acute Care Pharmacotherapy (1)

Increases understanding and stimulates discussion in current topics related to acute care pharmacotherapy. Reviews the management of patients in the acute care setting through current cases presented by instructors. May be taken alone or concurrently with PHARM 570. Prerequisite: either PHARM 561 ;PHARM 565, or permission of the School of Pharmacy. Instructors: Chan

[View course details in MyPlan: PHARM 571](#)

PHARM 572 Pharmacist Advocacy I: Legislative and Grassroots Affairs (1, max. 3)

Increases student awareness and knowledge of local, state, and national healthcare issues that affect pharmacists and their patients. Prepares pharmacy students to knowledgeably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Credit/no-credit only. Offered: A.

[View course details in MyPlan: PHARM 572](#)

PHARM 573 Pharmacist Advocacy II: Legislative and Grassroots Affairs (1, max. 3) Downing

Prepares pharmacy students to knowledgeably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Students actively participate in off-campus legislative and advocacy activities while the Washington State legislature is in session. Credit/no-credit only. Offered: W.

[View course details in MyPlan: PHARM 573](#)

PHARM 579 Current Topics in Pharmacy (1, max. 3) Black, Murphy

Provides a forum for discussing late-breaking topics that impact current and future pharmacy research and practice. Credit/no-credit only. Offered: AW.

[View course details in MyPlan: PHARM 579](#)

PHARM 581 Global Health Pharmacy: Medicines, Practice, and Policy (2) J. BABIGUMIRA, A. STERGACHIS

Introduces the critical role of pharmaceutical in addressing major diseases (such as HIV/AIDS, malaria, tuberculosis) affecting persons in resource-limited settings. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoeconomics, financing, intellectual property, and drug trade policies. Prerequisite: Prerequisite: satisfactory completion of the 1-credit lecture/discussion component.

[View course details in MyPlan: PHARM 581](#)

PHARM 582 Special Topics in Global Health Pharmacy and Medical Products ([1-3]-, max. 6)

Babigurmira, Garrison

Provides in-depth instruction on selected special topics relating to the use, access to, and impact of pharmaceuticals, vaccines, and diagnostics/medical devices in global health. Credit/no-credit only.

[View course details in MyPlan: PHARM 582](#)

PHARM 584 Pharmacy Practice I - Introduction to Community Pharmacy Practice I (3) R. ALLEN, J. BACCI, K. DAWSON

Introduction to development and practice of skills in drug information resources; prescription processing and problem solving; pharmaceutical calculations and compounding; patient information and counseling on over-the-counter and compounded medications. Offered: A.

[View course details in MyPlan: PHARM 584](#)

PHARM 585 Pharmacy Practice II (3) R. ALLEN, J. BACCI, K. DAWSON

Continued development and practice of skills in drug information resources; prescription problem solving;

pharmaceutical calculations; and patient information and counseling. Emphasizes use of commonly prescribed prescription medication as well as patient-specific characteristics that impact their care. Prerequisite: PHARM 584. Offered: W.

[View course details in MyPlan: PHARM 585](#)

PHARM 586 Pharmacy Practice III: Applications of Public Health Practice (3) *R. ALLEN, J. BACCI, K. DAWSON*

Develops skills that enable public health screening and health promotion in community-based settings: administration of vaccines to adults and adolescents; practical application of community-based health screenings, counseling, and referral; and teaching self-monitoring techniques to patients. Emphasizes communication with members of special populations. Prerequisite: PHARM 585. Offered: Sp.

[View course details in MyPlan: PHARM 586](#)

PHARM 587 Diabetes Prevention (2)

Provides students with knowledge/skills to serve as Diabetes Prevention lifestyle coaches. The knowledge/skills developed can be applied to promote health/wellness in the community. Prerequisite: PHARM 563. Instructors: Danielson, McKennon, Odegard Credit/no-credit only. Offered: A.

[View course details in MyPlan: PHARM 587](#)

PHARM 588 Diabetes Care (2)

Further develops foundations in the principles of diabetes management and provides practice in application of diabetes-care principles. Develops knowledge and ability to assess, manage, educate, and monitor patients with diabetes. Prerequisite: either PHARM 560; PHARM 564, or permission of the School of Pharmacy. Instructors: Danielson, Odegard Credit/no-credit only.

[View course details in MyPlan: PHARM 588](#)

PHARM 591 Community Collaborations in Healthcare Practicum (2, max. 8)

Collaboration with representatives from the Salvation Army Adult Rehabilitation Center and other community sites to improve health literacy and health outcomes of men and women beneficiaries (residents) in addiction treatment and recovery. Prerequisite: permission of instructor. Instructors: Kedzierski Credit/no-credit only. Offered: ASp.

[View course details in MyPlan: PHARM 591](#)

PHARM 592 Pharmacy Practice IV: Design and Analysis of Medical Studies (3)

Introduces the basic biostatistical concepts used in the medical literature, and the various study designs. Develops students' skills in critically evaluating the medical literature, with the goal of applying these skills to clinical practice. Prerequisite: PHARM 584; PHARM 585; PHARM 586. Instructors: Devine Offered: A.

[View course details in MyPlan: PHARM 592](#)

PHARM 593 Pharmacy Practice V: Institutional Pharmacy Practice (3) *Somani*

Includes discussion and skill development related to contemporary institutional pharmacy practice. Focuses on health information technology, the quality improvement process, MUE and cost management, medication order processing, counseling and medication reconciliation, interpersonal teamwork, and patient-oriented services. Students create and present mock proposals for new guidelines and practice protocols. Prerequisite: PHARM 592. Offered: W.

[View course details in MyPlan: PHARM 593](#)

PHARM 594 Pharmacy Practice VI: Medication Quality and Safety (2)

Introduces topics related to medication safety and quality improvement. Describes the role of information technology and the importance of organizational leadership and teamwork in improving safety. Introduces topics of collaborative drug therapy management and managed care pharmacy practice. Prerequisite: PHARM 593. Offered: Sp.

[View course details in MyPlan: PHARM 594](#)

PHARM 595 Special Studies in Pharmacy (1-6, max. 24)

Special studies of professional topics in pharmacy. An opportunity to expand the breadth and depth of understanding in specific pharmaceutical areas. Students may undertake independent study under the individual direction of a faculty member.

[View course details in MyPlan: PHARM 595](#)

PHARM 596 Seminars in Pediatric Pharmacotherapy (2)

Explores therapeutic topics pertinent to the pediatric population. Emphasizes ambulatory pediatrics.

Prerequisite: third-year PharmD student or permission of instructor. Instructors: Harvey Credit/no-credit only.

Offered: W.

[View course details in MyPlan: PHARM 596](#)

PHARM 597 Graduate Seminar (1, max. 24)

Interactive discussion of topical issues, methods, or analytic techniques. Topics vary. Prerequisite: graduate program student. Credit/no-credit only.

[View course details in MyPlan: PHARM 597](#)

PHARM 599 Independent Study/Research (1-6, max. 24)

Applied pharmaceutical research problems. Credit/no-credit only.

[View course details in MyPlan: PHARM 599](#)

PHARM 600 Independent Study or Research (*-)

Credit/no-credit only.

[View course details in MyPlan: PHARM 600](#)

PHARM 700 Master's Thesis (*-)

Credit/no-credit only.

[View course details in MyPlan: PHARM 700](#)

PHARM 800 Doctoral Dissertation (*-)

Credit/no-credit only.

SCHOOL OF PHARMACY

PHARMACY PRACTICE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PHARMP 511 Introductory Pharmacy Practice Experience in Community Pharmacy I (1)

Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Orients students to community practice, fulfills requirements for entering patient care, and sets expectations for the course series. First in a series of four. Prerequisite: PHARM 584. Credit/no-credit only. Offered: W.

[View course details in MyPlan: PHARMP 511](#)

PHARMP 512 Introductory Pharmacy Practice Experience in Community Pharmacy II (1)

Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Emphasizes legal requirements for practice, fulfills requirements for entering patient care, and exposes student to leaders in community pharmacy practice. Second in a series of four. Prerequisite: PHARMP 511. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: PHARMP 512](#)

PHARMP 513 Introductory Pharmacy Practice Experience in Community Pharmacy III (1)

Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes patient safety, involvement in health/wellness screening, and exposes students to leaders in community pharmacy. Third in a series of four. Prerequisite: PHARMP 512. Credit/no-credit only. Offered: A.

[View course details in MyPlan: PHARMP 513](#)

PHARMP 514 Introductory Pharmacy Practice Experience in Community Pharmacy IV (1)

Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes reflection on and documentations of professional competency. Fourth in a series of four. Prerequisite: PHARMP 513. Credit/no-

credit only. Offered: W.

[View course details in MyPlan: PHARMP 514](#)

PHARMP 521 Foundations of Interprofessional Practice I ([0-1]-, max. 1) *J. DANIELSON*

Team-based training and experiential immersion in healthcare team functioning for PY2 pharmacy students. Work with medical, nursing, physician assistant, social work, dental and dietetics students in patient care situations to apply evidence-based practice and quality improvement principles. Focuses on development of intra- and inter-professional roles and professional identity. Credit/no-credit only.

[View course details in MyPlan: PHARMP 521](#)

PHARMP 522 Foundations of Interprofessional Practice II ([0-1]-, max. 1) *J. DANIELSON, P. ODEGARD*

Team-based training and experiential immersion in healthcare team functioning for PY3 pharmacy students. Work with medical, nursing, physician assistant, social work, dental, and dietetic students in patient care situations to apply evidence-based practice and quality improvement principles. Focuses on development of intra and interprofessional roles and professional identity. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: PHARMP 522](#)

PHARMP 531 Introductory Pharmacy Practice Experience in Institutional Pharmacy I (1)

Introduces institutional pharmacy practice. The role of pharmacists in the inpatient settings, participation in product distribution, provision of drug information, and exposure to quality assurance activities in hospitals. Orients students to institutional practice, exposes student to leaders in hospital practice, and introduces expectations for quality assurance activities. First in a series of three. Prerequisite: PHARMP 514. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 531](#)

PHARMP 532 Introductory Pharmacy Practice Experience in Institutional Pharmacy II (1)

Introduces institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Quality assurance in hospital practice, reflects on medication reconciliation, and orients students to subsequent IPPE coursework. Second in a series of three. Prerequisite: PHARMP 531. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 532](#)

PHARMP 533 Introductory Pharmacy Practice Experience in Institutional Pharmacy III (1) *J. DANIELSON*

Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient setting, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion, and progress assessment. Third in a three-part series. Prerequisite: PHARMP 532. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 533](#)

PHARMP 541 Introductory Pharmacy Practice Experience in Clinical Skills (1)

Students interview and assess a patient in the practice setting, present the patient case and an oral seminar in a small group setting, and complete other requirements for beginning advanced pharmacy practice experience. Prerequisite: PHARMP 533. Instructors: O'Sullivan Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: PHARMP 541](#)

PHARMP 571 Advanced Pharmacy Practice Experience in Inpatient/Acute Care General Medicine (6, max. 36) *O'Sullivan*

Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 571](#)

PHARMP 572 Advanced Pharmacy Practice Experience in Hospital or Health-System Pharmacy (6, max. 36) ²³⁸¹ O'Sullivan

Advanced pharmacy practice experience focusing on providing patient-centered care to patients in an acute care or other inpatient setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 572](#)

PHARMP 573 Advanced Pharmacy Practice Experience in Ambulatory Care (6, max. 36) O'Sullivan

Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a clinic-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and provide drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 573](#)

PHARMP 574 Advanced Pharmacy Practice Experience in Community Pharmacy (6, max. 36) O'Sullivan

Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a community-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 574](#)

PHARMP 575 Advanced Pharmacy Practice Experience in Patient Care (6, max. 30) O'Sullivan

Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a non-required setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 575](#)

PHARMP 576 Advanced Pharmacy Practice Experience in Non-Patient Care (6, max. 24) O'Sullivan

Advanced pharmacy practice experience focusing on providing pharmacy services in a variety of non-patient care settings. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 576](#)

PHARMP 577 Advanced Pharmacy Practice Experience in Senior Care (6, max. 12) O'Sullivan

Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a senior or geriatric care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

[View course details in MyPlan: PHARMP 577](#)

PHARMP 578 Advanced Pharmacy Practice Experience Elective (1-6, max. 12) O'Sullivan

Advanced pharmacy practice experience in patient or non-patient care settings. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: PHARMP 578](#)

PHARMP 580 Preparation for Global Health Experience in Low-resource Countries (3)

Prepares students to safely and fully engage in clinical healthcare experiences in low-resource countries. Helps students understand common barriers to healthcare access and to appreciate the communicable and non-communicable health issues that individuals and communities experience in these countries. Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: PHARMP 580](#)

PHARMP 581 Advanced Pharmacy Practice Experience in Inpatient/Acute Care General Medicine (9, max. 36) O'Sullivan

Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

[View course details in MyPlan: PHARMP 581](#)

PHARMP 582 Advanced Pharmacy Practice Experience in Hospital or Health-System Pharmacy (9, max. 36) O'Sullivan

Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in an acute care or other inpatient setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 583 Advanced Pharmacy Practice Experience in Ambulatory Care (9, max. 36) O'Sullivan

Six week advanced pharmacy practice experience focusing on providing patient-centered care in a clinic-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

[View course details in MyPlan: PHARMP 583](#)

PHARMP 584 Advanced Pharmacy Practice Experience in Community Pharmacy (9, max. 36) O'Sullivan

Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in community-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

[View course details in MyPlan: PHARMP 584](#)

PHARMP 585 Advanced Pharmacy Practice Experience in Patient Care (9, max. 27) O'Sullivan

Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a non-required setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

[View course details in MyPlan: PHARMP 585](#)

PHARMP 586 Advanced Pharmacy Practice Experience in Non-Patient Care Settings (9, max. 18) O'Sullivan

Six week advanced pharmacy practice experience focusing on providing pharmacy services in a variety of non-patient care settings. Offered: AWSpS.

[View course details in MyPlan: PHARMP 586](#)

PHARMP 587 Advanced Pharmacy Practice Experience in Senior Care (9, max. 18) O'Sullivan

Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a senior or geriatric care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PHRMRA 524 Introduction to Clinical Trials (3) *Hammond, Hayashi, Jonlin*

Introduces the major concepts under which clinical trials are designed to run. Focuses on the phases of clinical trials, the role of the Food and Drug Administration, Institutional Review Boards, the Code of Federal Regulations and ethical principles. Addresses study design and statistical concepts. Offered: A.

[View course details in MyPlan: PHRMRA 524](#)

PHRMRA 525 Implementation and Conduct of Clinical Trials (3) *Hammond, Hayashi, Jonlin*

Outlines the work of carrying out a clinical trial including the complex work of study initiation, issues of site and data managements, preparation of the final report and study close out, as well as the details that control the study conduct. Offered: W.

[View course details in MyPlan: PHRMRA 525](#)

PHRMRA 526 Project Management and the Business of Clinical Trials (3) *Hammon, Hayashi, Jonlin*

Addresses the business dimension of clinical trials, including the principles of project management, planning, analysis, contingency and follow-up within the context of clinical trials that involve a large number of tasks and people responsible for parts of the overall study. Offered: Sp.

[View course details in MyPlan: PHRMRA 526](#)

PHRMRA 527 International Regulatory Affairs (3)

Develops an understanding of international differences in the regulation of design, manufacture, and post-marketing surveillance of medical products relative to U.S. Food and Drug Administration requirements. Prerequisite: PHARM 504. Instructors: Hammond Offered: A.

[View course details in MyPlan: PHRMRA 527](#)

PHRMRA 528 Medical Risk Analysis and Management (3) *Karp*

Examines the principles and application of risk management methods in the design, manufacture, and marketing of medical products. Offered: A.

[View course details in MyPlan: PHRMRA 528](#)

PHRMRA 536 Skills for the Regulatory Affairs Professional (2) *Rose*

Covers essential skills in regulatory affairs and includes an overview of local medical products companies.

Offered: A.

[View course details in MyPlan: PHRMRA 536](#)

PHRMRA 545 Statistical Topics for Biomedical Regulatory Affairs Professionals (3)

Applies statistical techniques to meet medical product regulatory commitments including biosimilars, product comparability, design and continued process verification. Prerequisite: Introductory statistics. Offered: W.

[View course details in MyPlan: PHRMRA 545](#)

PHRMRA 546 Technical Writing for the Medical Products Industries (3) *Teal*

Presents up-to-date information and strategies for effective technical communication within the medical product industries. Addresses the appropriate and correct use of the English language, information design, and the use of computer technology in producing professional documents. Emphasizes communicating technical information to a variety of stakeholders. Offered: A.

[View course details in MyPlan: PHRMRA 546](#)

PHRMRA 547 Advanced Topics in Medical Products Regulation (2, max. 6) *Feagin*

Addresses essential topics in medical products regulation. Employs a combination of lecture presentations, case studies, and participants' small group discussion to achieve practical outcomes for regulatory professionals.

Offered: W.

[View course details in MyPlan: PHRMRA 547](#)

PHRMRA 548 Biomedical Regulatory Affairs Practicum ([1-9]-, max. 9) *Feagin*

Provides a practical experience to ensure that participants are able to shepherd new medical products (drug, device, biologic) through regulatory, clinical, and quality assurance aspects. Includes a project and final report.

Offered: AWSpS.

[View course details in MyPlan: PHRMRA 548](#)

PHRMRA 550 Advanced Technical Writing for Biomedical Regulatory Affairs (2)

Further examines communications with attention to best written practices. Provides an intensive review of common editing and advanced strategies for crafting highly reliable and effective documentation. Prerequisite: PHRMRA 546 or permission of instructor. Instructors: Teal Credit/no-credit only. Offered: Sp.

[View course details in MyPlan: PHRMRA 550](#)

PHRMRA 554 Advanced Medical Products Regulation I (2) *Hammond*

Provides an in-depth exploration of regulatory issues primarily related to non-clinical and clinical aspects of medical product development. Offered: W.

[View course details in MyPlan: PHRMRA 554](#)

PHRMRA 555 Advanced Medical Products Regulation II (2) *Feagin*

Provides an in-depth exploration of regulatory issues primarily related to manufacturing, post-marketing concerns, and FDA interactions. Offered: W.

[View course details in MyPlan: PHRMRA 555](#)

PHRMRA 560 Short Course in Multinational Biomedical Regulatory Affairs (2, max. 30) *Hazlet*

Presents three medical products registration countries or groupings (for instance, European Union, World Health Organization). Locale based on program impact, unique features, or recent or controversial regulatory issues.

[View course details in MyPlan: PHRMRA 560](#)

PHRMRA 595 Special Topics in Regulation (1-6, max. 24)

Daniel J. Evans School of Public Policy and Governance

[Display as tabs](#)

School Overview

Dean

Sandra O. Archibald
208E Parrington Hall

Associate Deans

Leigh Anderson

Joaquin Herranz

Robert Plotnick

The Daniel J. Evans School of Public Policy and Governance is a graduate professional school providing education and research for current and future leaders in pursuing challenging public-service careers in government, nonprofit, or private-sector organizations. To address the educational needs and professional interests of individuals at different stages of their careers, the school offers the Master of Public Administration (MPA), the Executive Master of Public Administration (Executive MPA), Peace Corps Master's International (PCMI), and the PhD in Public Policy and Management.

Master's-level programs enable students to acquire the policy analysis techniques, management knowledge, problem-solving skills, and political acumen required for effective leadership across sector boundaries and in regional, national, and international policy. MPA graduates hold leadership positions such as mayors and city managers; local and regional government administrators; foreign service officers; senior military and public safety positions; assistants to elected officials; analysts with budget offices, legislative staff units, and city councils; directors of social service agencies; leaders and managers of nonprofit organizations; and administrators of arts organizations. In addition, a number of alumni are employed in private sector positions involving substantial contact with public agencies.

The PhD program focuses on research that prepares students with a strong interdisciplinary perspective and a solid foundation of theory and methodology in policy analysis and management. The PhD program prepares students for successful careers as faculty in university programs in public policy and management, and in research positions in the public and nonprofit sectors.

Master of Public Administration

Evans School MPA Program

Evans School MPA is designed for present and future leaders of the public, private, and nonprofit sectors, emphasizing broad-based public policy analysis and management knowledge. Degree requirements for the program are flexible and can be tailored for students who are early in their careers, as well as those who have additional years of progressively responsible work experience. While most students enroll full-time and generally take two years to complete their degree, flexible evening and part-time options are also available.

Degree Requirements

72 credits, with a minimum 60 credits from within the Evans School, as follows:

1. *Core Curriculum (36 credits):*
 - a. Managing Politics and the Policy Process (PB AF 511)
 - b. Managing Organizational Performance (PB AF 512)
 - c. Public Policy Analysis (PB AF 513)
 - d. Microeconomics (PB AF 516, PB AF 517)
 - e. Public Budgeting and Financial Management (PB AF 522)
 - f. Program Evaluation (PB AF 526)
 - g. Quantitative Analysis (PB AF 527, PB AF 528)
2. Concentrated study in a field of specialization, three courses minimum (12 credits)
3. Public affairs electives, two-course minimum (8 credits)
4. An internship (minimum 400 non-credit work hours)
5. 8-credit degree project (PB AF 608) or Public Service Clinics (PB AF 606, PB AF 607)

For full program details, visit evans.washington.edu/courses-degrees/mpa/

Executive MPA Program

The Executive MPA program is a cohort-based, modular program designed to meet the needs of senior-level managers and executives with 10 or more years of progressively responsible, professional experience (typically directors, senior managers in or near leadership positions, and high-level technical staff). Students must successfully complete 45 credits of coursework within a specially designed curriculum combining one intensive week, several weekend modules and numerous online assignments. Intensive learning emphasizes a variety of critical concepts in executive leadership, including: performance management and accountability; change management; communication skills; ethics and leadership; executive decision making; human resource management; strategic financial management; and strategic leadership.

Emphasis is on decision making, practical application, and integration of learning with experience. The program relies on a cohort model, so entering students must begin their studies with a seven-day residential retreat. Students complete the program in approximately 18 months.

Degree Requirements

45 credits, as follows:

1. One "Foundation Week" in Strategic Leadership and Performance Challenges: PA EX 501
2. Twelve three-day weekend core modules in Executive Decision Making (PA EX 502), Strategic Financial Management (PA EX 503, PA EX 505), Executive Economics (PA EX 504), Mission Integrity (PA EX 506), Values and Personal Integrity (PA EX 507), Leading for Human Development (PA EX 508), Leading Across Boundaries (PA EX 509), Negotiation and Mediation (PA EX 510), and Strategic Communication (PA EX 511), Strategic Policy Making (PA EX 512), and Leading for a Legacy (PA EX 513)
3. Online assignments
4. Degree project not required

For full program details, visit evans.washington.edu/executive-education/mpa.

Peace Corps Master's International

Peace Corps Master's International (PCMI) students must successfully complete 51 credits of coursework along with two years of Peace Corps service in international nongovernmental organization development and a degree project. PCMI students generally complete all core courses in three quarters prior to leaving for Peace Corps service; upon returning to UW, students complete their coursework and a final degree project in one or two quarters. While on assignment overseas, students remain in touch with their faculty adviser and a returned volunteer from the Evans School. PCMI students generally create a plan of study focused on international nongovernmental management or other international management and policy issues, such as environmental or health policy. Students complete the program in approximately three to three-and-a-half years.

Degree Requirements

51 credits, as follows:

1. *Core curriculum*:
 - a. Managing Politics and the Policy Process (PB AF 511)
 - b. Managing Organizational Performance (PB AF 512)
 - c. Public Policy Analysis (PB AF 513)
 - d. Microeconomics (PB AF 516, PB AF 517)
 - e. Public Budgeting and Financial Management (PB AF 522)
 - f. Program Evaluation (PB AF 526 or PB AF 536)
 - g. Quantitative Analysis (PB AF 527, PB AF 528)
2. Electives (including 9 credits of restricted electives: 3 credits each in economics, analysis, and values) (17 credits)

3. Two years of Peace Corps service
4. 6-credit degree project related to Peace Corps fieldwork

For full program details, visit evans.washington.edu/courses-degrees/mpa/peace-corps.

Doctor of Philosophy

The PhD in public policy and management is a research program that prepares its graduates for careers as faculty in university programs in public policy and management, and for research positions in the public and non-profit sectors. The interdisciplinary curriculum draws broadly on theoretical and methodological foundations in policy analysis and management. Substantive policy areas reflect such diverse faculty research agendas as education and social policy, environmental policy, international development, nonprofit management, and urban policy.

This highly competitive and selective program admits three to five excellent applicants each year, and provides funding and mentoring to help them succeed. The program aims to be one of the top programs in the field of public policy and management, serving not only the Pacific Northwest, but the national and the global market for scholars in this field.

Degree Requirements

90 credits, as follows:

Two years, or six full-time academic quarters, of coursework and examinations, research, and the writing of a dissertation beyond the two years.

The first-year core curriculum prepares doctoral students to undertake independent scholarship in public policy and management: Research Design (PPM 502), Institutional Perspectives on Management and Leadership (PPM 504), Microeconomics (PPM 506), Public Policy Processes (PPM 508), Policy Analysis and Evaluation (PPM 510), Quantitative Methods Sequence (SOC 505 and SOC 506 or ECON 580 and ECON 581), and a qualifying examination.

Second year doctoral students increase their analytic and methodological skills. Requirements include Data Analysis Practicum (PPM 512) at least one qualitative methods and one additional quantitative methods course, proposed by the student and approved by the PhD Program Coordinator. Students are encouraged to consider obtaining a statistics certificate from CSSS. At least three courses in a substantive policy field or in management studies are required.

Beyond the second year, requirements include: a general examination/dissertation proposal (advancing to candidacy), preparation of a dissertation of original research, and a final examination (dissertation defense).

Students are expected to complete the degree in four to five years, depending on the individual student. Prior coursework in calculus is expected before matriculation.

For full program details, visit: evans.washington.edu/courses-degrees/phd

Concurrent Degree Programs

The Evans School offers the MPA degree concurrently with the following five programs: Master of Urban Planning (MUP), Master of Arts in International Studies (MAIS), Master of

Public Health (MPH), Master of Science in Forest Resources (MS), Juris Doctor (JD). Concurrent degree applicants must apply through, and be accepted into, both programs. Admission criteria are those of each individual program.

Admission Requirements

Admission to the Evans School is highly competitive and selective, and is based primarily on the applicant's demonstrated ability to complete the graduate program while sustaining a high level of achievement. The School's Admissions Committee reviews previous undergraduate or graduate (if applicable) coursework, grades and GRE test scores, and gives considerable weight to professional experience, previous academic awards or scholarships, volunteer work, letters of recommendation, and the applicant's writing skills as demonstrated in a personal essay. The School admits students annually for autumn quarter.

General Requirements

Applicants must hold a baccalaureate degree from an accredited college or university in the United States, or its equivalent from a foreign institution, and have achieved a minimum 3.0 GPA in the last 90-quarter (or 60 semester) credits of undergraduate work.

Graduate Record Examination (GRE) general test scores are required for admission to all programs except the Executive Master of Public Administration. TOEFL scores are required for international students only.

Visit evans.washington.edu/courses-degrees/mpa/concurrent for specific requirements of each program.

Application Deadlines

Because of class-size limitations in the competitive programs, applicants are encouraged to submit applications as early as possible.

Application materials to the MPA program and to the Peace Corps Master's International program must be received online and postmarked by January 15 for priority consideration. Applications received after this date are accepted for review on a space available basis until March 1.

Application materials for the Executive MPA degree program must be received online and postmarked by May 1. Applications received after this date are accepted for review on a space-available basis until July 1.

Application materials for the PhD program in public policy and management must be submitted and postmarked by February 1. Applications postmarked after February 1st are not reviewed.

Applicants to all programs must also apply to the UW Graduate School by the specific program deadlines above.

Financial Aid

For further information, visit: evans.washington.edu/prospective-students/financial-aid.

Evans School Fellowships

The Evans School offers several fellowships to entering students each year from the School's endowed fellowship funds. These typically consist of \$4000-\$5000 stipends awarded primarily on the basis of academic achievement and/or excellence in public service. Applicants interested in school fellowships must submit the Evans School Financial Aid Form with their Evans School application.

- *Daniel J. Evans Endowment for Excellence in Public Service*: Fellowships support students aspiring to excellence in public service.
- *Nancy Bell Evans Endowment for Excellence in Nonprofit Service*: Fellowships support students who aspire to excellence in nonprofit service and philanthropy.
- *Jon Brock Endowed Fellowship*: Supports outstanding master's students studying conflict resolution and management in public and nonprofit sectors.
- *Elaine Chang Endowed Fellowship*: Provides support to outstanding students pursuing studies in international peace and development.
- *Brewster C. Denny Endowed Fellowship*: Supports students committed to excellence in public service.
- *Robert J. and Micki E. Flowers Endowed Fellowship*: Provides support to outstanding students from diverse backgrounds pursuing careers in public and nonprofit service.
- *Margaret T. Gordon Endowed Fellowship*: Supports outstanding Evans School students.
- *Henry M. Jackson Endowed Fellowship*: Supports students pursuing careers in environmental policy and natural resources management.
- *Morton Kroll Endowed Fellowship*: Provides support to top students pursuing arts management internships.
- *Robert J. Lavoie Fellowship*: Provides funds to outstanding students preparing to work in public service.
- *Governor Gary Locke Endowed Fellowship*: Supports Asian/Pacific Islander students pursuing studies in public service and politics.
- *Hubert G. Locke Endowed Fellowship*: Provides support for students pursuing internships in nonprofit organizations devoted to social justice issues.
- *George A. Shipman Endowed Fellowship*: Supports outstanding students pursuing careers in public service.
- *Evans School Alumni Endowed Fellowship*: Supports recruiting of outstanding students.
- *Home Street Bank Fellowship*: Supports an outstanding graduate student pursuing a career in public affairs.
- *Scottish Rite Scholarship Foundation of Washington PCMI Fellowship*: Provides a stipend to an entering student accepted to the Peace Corps Master's International degree program.
- *William Shelton Fellowships*: Funded by the Scottish Rite Scholarship Foundation of Washington to promote better government through education.

Assistantships

The Evans School offers many research, teaching, and staff assistantship positions each year. Typically 10 to 20 hours per week, these positions include a monthly stipend, benefits, paid

tuition, and health insurance. Hiring is competitive. Most announcements are posted in the spring, or as positions become available, on the Evans School Intranet.

Research assistantships are open to first- and second-year MPA students and to PhD students. First-year MPA students are eligible to apply upon acceptance. Students typically work on grant-funded studies, special conferences, and public policy colloquia series sponsored by the school's research centers. Research assistants are exposed to a wide range of policy issues, including regional growth management, international trade, state and federal entitlement programs, health-and-human-services delivery, and education reform. In addition, some research fellowships are offered each year to highly qualified applicants during the admission process. These fellowships guarantee a paid research assistantship for the first year of study and tuition support.

Teaching and staff assistantships are reserved for second year students and PhD students. Teaching assistants are hired for most core courses. Staff assistantships include such positions as coordinators for international programs, peer advisers, public service clinic/career services coordinators, and computer lab managers.

Work-Study Status

When hiring for hourly positions, the school often gives preference to students possessing work-study status. Work-study positions have included research assistance for faculty and grants, and staff support for the school's centers. Work-study status is one of several forms of aid granted by the University of Washington Financial Aid Office.

Facilities

Research Facilities

The school promotes the application of research to real-world policy contexts and its integration with the teaching enterprise. In addition to supporting the independent research of faculty members, the school houses several research and policy centers focusing on regional development, family and child welfare, poverty alleviation, nonprofit management and leadership, international development, consensus building and conflict resolution, and education reform.

These centers shape students' educational experiences by offering research assistantships, special events, career networking, degree-project advising, teaching, and guest lecturing in classes taught by center faculty. The availability of research assistantships is based on current projects.

Human Services Policy Center (HSPC)

The center pairs applied analytic research, preventive approaches, and promotion of comprehensive policies to improve the lives of children, families, and communities, especially those who are disadvantaged. Public communications and strategic partnerships ensure that the HSPC's research affects policy. Core programs include educating and caring for young children; communicating about policies for children and families; and profiling child well being (Washington Kids Count).

Marc Lindenberg Center for Humanitarian Action, International Development, and Global Citizenship

The Lindenberg Center prepares students and faculty for life and work in a global society through partnerships that expand teaching, research, and service opportunities in humanitarian action, international development, and global citizenship. The center's programs enable students to understand connections between poverty, hunger, health, and human security, and equip them with the skills and knowledge to create a better, more humane world. In partnership with international organizations, the center conducts research and multi-disciplinary academic training programs that prepare students for work in emergency and humanitarian relief and international development. The center also promotes responsible global citizenship through exchanges with developing countries, internationalization of curriculum, and collaboration with K-12 schools to change the way students see the world and think about global issues.

Nancy Bell Evans Center on Nonprofit Leadership and Philanthropy

The center enhances the understanding and vitality of the nonprofit sector through research, education, and community engagement. The center conducts research of importance to scholars, policy-makers, and practitioners. It also strives to connect scholars doing research with practitioners in the field. A special research focus is the changing service and policy roles of nonprofit organizations, particularly in the context of devolution, privatization, and globalization. The center serves as the hub of nonprofit studies across the UW campus and, in conjunction with the Cascade Center for Public Service, provides growth and learning opportunities for senior-level nonprofit professionals in the Pacific Northwest.

The William D. Ruckelshaus Center

The William D. Ruckelshaus Center, formerly known as the Policy Consensus Center, is a joint venture between the UW and WSU. The center draws together representatives from a wide network of agencies, advocacy groups, businesses, agribusiness, tribal governments, university researchers, and others to find long-term solutions to policy conflicts in Washington State, enhancing the region's capacity for effective, sustainable policy making and problem solving. Policy areas range from natural resources and economic development to labor issues in the business community and elsewhere. The center's activities focus on four major areas: providing an objective forum for conflict resolution or policy enhancement; building capacities through assessment, training, and consulting to broaden stakeholders' perspectives and improve collaboration; researching and disseminating best practices in conflict resolution and policy problem solving; and closing the gap between science and policy.

West Coast Poverty Center

This center serves as a regional hub for research, education, and policy analysis on the causes and consequences of poverty in the west coast states. At the UW, the center is a collaborative venture of the Evans School, the School of Social Work, and the College of Arts and Sciences, and is the newest of three regional poverty centers funded by the U.S. Department of Health and Human Services. The center fosters opportunities for cross-disciplinary exchanges and collaboration among poverty researchers and practitioners. It supports research on a broad range of poverty-related topics, such as labor market changes and consequences for economic security and social well-being; new patterns of work and family life, including transformations in family formation, employment, and care-giving arrangements for parents and children; and demographic trends and implications for poverty and public policy. Key activities include awarding grants to established and emerging poverty scholars and doctoral

students; hosting seminars and research conferences on poverty and public policy; conducting outreach, dissemination, and dialogue with policymakers and practitioners; and mentoring the next generation of poverty scholars and practitioners.

Executive Training, Civic Engagement, and Outreach

Cascade Center for Public Service and Leadership

The Cascade Center, a public and nonprofit leadership training unit, provides executive and mid-level public and nonprofit sector leaders professional development opportunities to strengthen their management skills. A diverse complement of two-day, three-day, and five-day management courses, as well as a two-week executive program, helps meet a wide range of management training needs in the Northwest and the United States.

Cascade Center courses are offered at the UW campus in Seattle. With prior permission, traditional and mid-career MPA students may apply for a maximum of 12 elective credits to be waived from their degree requirements upon completion of Cascade courses, with approval from their adviser. Executive MPA students may apply for up to nine elective credits to be waived from their degree program, with approval from their adviser. Cascade courses are not graded and participants do not earn academic credits. Rather, the Evans School may accept completed Cascade coursework in lieu of required elective credit hours.

Civic Engagement

An important convener of public policy deliberations in the Puget Sound region, the Evans School provides a neutral forum in which leading scholars and practitioners can talk about practical solutions to emerging policy issues. Groups wanting a university partner in public events often turn to the Evans School. Through strategic alliances, the school attracts many people to engage in dialogue with faculty, students, and the greater policy community. Public lectures, conference, symposia, and panel discussions help students enrich their policy studies beyond the classroom. These include the Daniel J. Evans Lessons in Leadership Seminars, the Dael L. Wolfle Memorial Lecture in Science and Public Policy, the Betty Jane Narver Lecture on Women in Public Policy, the Civic Engagement for the Twenty-First Century Seminar Series, the Forum at the Evans School, and the quarterly Dean's Forum.

In addition, through service on commissions, organizational boards, and other means, Evans School professors and students actively assist governments, NGOs, nonprofits, community organizations, and companies to improve society in the United States and abroad. Whether through public service clinics or internships, trainings, or volunteer service projects, students can actively engage their knowledge in serving the public good.

Electronic Hallway

The Electronic Hallway, hallway.evans.washington.edu, is an internationally recognized, online resource for public affairs teaching and curriculum development. It supports the Evans School teaching mission and distributes cases and skill exercises to educators in public policy and management.

EVANS SCHOOL OF PUB POL & GOV

PUBLIC POLICY AND GOVERNANCE

PUBLIC POLICY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PUBPOL 201 Introduction to Public Policy and Governance (5) I&S

Provides an introduction to policy analysis, governance, and public service. Students learn how individuals organize for common purposes, and design, implement, analyze, and evaluate policy. Students examine how policy decisions emerge and how the values of public, nonprofit, and private sector leaders and institutions affect decisions and implementation.

[View course details in MyPlan: PUBPOL 201](#)

PUBPOL 313 Evidence-Based Policy Implementation (5) I&S

Explores the multidimensional challenge of turning policy and program intentions into valued results on the ground. Understanding why implementation can fall short of expectation requires an understanding of how public/nonprofit organizations work; including their mission, resources, collaborators, and results measurement. Examines the role that evidence can play in service of democratic governance and policy effectiveness.

Recommended: PUBPOL 201

[View course details in MyPlan: PUBPOL 313](#)

PUBPOL 355 Special Topics in Nonprofits (3-4, max. 12)

Covers various topics regarding nonprofit essentials.

[View course details in MyPlan: PUBPOL 355](#)

PUBPOL 403 Professional Leadership (4)

Cultivates practical skills required to lead within various organizational contexts: managerial strategies for public, nonprofit, and business organizations are developed through case studies and guest speakers. Focuses on analytical and ethical approaches to problem solving and the communication skills needed for effective leadership in any career.

[View course details in MyPlan: PUBPOL 403](#)

PUBPOL 499 Topics in Public Policy (3-5, max. 6) I&S

Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered:

jointly with POL S 404.

[View course details in MyPlan: PUBPOL 499](#)

PUBPOL 501 Legislative Relations (3/4)

Studies role of legislative bodies in American public policy making. Builds on case studies and focuses on tactics, constraints, and options involved in working within a legislative process to achieve public policy goals.

[View course details in MyPlan: PUBPOL 501](#)

PUBPOL 503 Executive Leadership (3/4)

Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its constituencies and communities.

[View course details in MyPlan: PUBPOL 503](#)

PUBPOL 504 Leadership Ethics in the Public Interest (3/4)

Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership as well as strategies to build strong institutional cultures and support ethical practices in institutions.

[View course details in MyPlan: PUBPOL 504](#)

PUBPOL 505 The Law of Public Administration (3)

Legal framework of public administrative action in the United States, emphasizing constitutional requirements; operation of the administrative process; management of personnel, funds, and contracts; and judicial review of administrative activity.

[View course details in MyPlan: PUBPOL 505](#)

PUBPOL 506 Ethics and Public Policy (3/4)

Teaches students to identify moral issues in public life. Special focus on the integration of moral concerns into public discussion in a manner which contributes to good policy and does not polarize issues. Discusses moral and political theory by focusing on contemporary cases and issues.

[View course details in MyPlan: PUBPOL 506](#)

PUBPOL 507 Mediation and Negotiation as Instruments of Public Management and Policy-Making (3/4)

Possibilities offered by mediation and negotiation methods using a mixture of cases, readings, discussions, lectures, and guest speakers. Use of negotiation and mediation techniques to resolve disputes and disagreements over public-policy issues.

[View course details in MyPlan: PUBPOL 507](#)

PUBPOL 508 Management Approaches to Service Delivery (3-4)

[View course details in MyPlan: PUBPOL 508](#)

PUBPOL 509 Managing People in Public and Nonprofit Agencies (3/4)

Emphasizes the role of the program manager rather than that of the personnel officer. Managing people within a variety of programmatic, bureaucratic, and political settings. Case studies form basis of class discussion, assignments.

[View course details in MyPlan: PUBPOL 509](#)

PUBPOL 510 Foundations of American Democracy (4)

Examines the fundamental values such as equality, liberty, dignity, freedom, and autonomy that individuals justify and shape American political culture and institutions. Focuses upon the philosophical and religious foundations of these values and examines the relations among them as well as how they influence American political culture, institutions, and conflict.

[View course details in MyPlan: PUBPOL 510](#)

PUBPOL 511 Managing Politics and the Policy Process (4)

Examines broad aspects of organizational life and orients students to key internal and external challenges and

opportunities of managing public and nonprofit organizations. Main topics include organizational mission, values, communication, culture, organizational environment and the policy process, legislative-executive relations, interest group advocacy, and media relations.

[View course details in MyPlan: PUBPOL 511](#)

PUBPOL 512 Managing Organizational Performance (4)

Addresses questions of organizational design, personnel, and operations management to equip students with skills to perform effectively in mission-driven organizations. Core topics include organizational design, inter-organizational networks, human resources and staff management, improving service delivery and production flows, measuring and managing for performance, and ethical leadership.

[View course details in MyPlan: PUBPOL 512](#)

PUBPOL 513 Public Policy Analysis (4)

Production and use of analysis to support public policy decisions. Defining problems, devising alternative solutions, clarifying stakes in choices, predicting impacts of choices. Skills developed by working on specific policy problems. Assumes familiarity with statistics, microeconomic theory, and institutions and processes of American government. Prerequisite: either PUBPOL 516 or permission of instructor.

[View course details in MyPlan: PUBPOL 513](#)

PUBPOL 514 Psychology for Policy Analysis (3/4)

Examines basic concepts in social psychology, judgment and decision making, and behavioral economics. Explores how these concepts can be applied to the design, implementation, and evaluation of successful policy.

[View course details in MyPlan: PUBPOL 514](#)

PUBPOL 515 Decision Making for Public Managers (3)

Considers decision making from normative, prescriptive, and descriptive perspectives. Emphasizes individual decision making, with some discussion of organizational decision practice. Focuses on decision analysis; presents tools for structuring decisions; and considers the role of analysis as a basis for negotiation.

[View course details in MyPlan: PUBPOL 515](#)

PUBPOL 516 Economics for Policy Analysis and Management I (4)

Ways in which microeconomic analysis can contribute to the analysis of public sector issues. Supply and demand, consumer and firm behavior, competitive and monopoly markets, income distribution, market failure, government intervention. Policy applications of theory. Prerequisite: elementary economics.

[View course details in MyPlan: PUBPOL 516](#)

PUBPOL 517 Economics for Policy Analysis and Management II (4)

Serves to deepen student understanding of microeconomic theory and develop skills in applying it to public policy and management issues. Prerequisite: PUBPOL 516.

[View course details in MyPlan: PUBPOL 517](#)

PUBPOL 518 Applied Cost Benefit Analysis (3/4)

Develops familiarity through problems and applications. Stresses techniques of use.

[View course details in MyPlan: PUBPOL 518](#)

PUBPOL 519 Law and Economics (2-4, max. 4)

Offered: jointly with LAW A 561.

[View course details in MyPlan: PUBPOL 519](#)

PUBPOL 520 Intergovernmental Relations (4)

Comparative study of the issues involved in implementing government programs across multiple jurisdictions. Issues of accountability, feasibility, politics, and constitutional limits are examined by focusing upon various methods used to implement programs across federal, state, regional, and international jurisdictions.

[View course details in MyPlan: PUBPOL 520](#)

PUBPOL 522 Financial Management and Budgeting (4)

An introduction to financial and management accounting, and an overview of public and nonprofit budgeting systems. Covers tools and techniques for budget analysis and the use of financial information in managerial decision making.

[View course details in MyPlan: PUBPOL 522](#)

PUBPOL 523 Advanced Budgeting in the Public Sector (3-4)

Covers more advanced topics in governmental budgeting. Provides an overview of the functions, expenditures, and revenues of federal, state, and local governments. Prerequisite: PUBPOL 522.

[View course details in MyPlan: PUBPOL 523](#)

PUBPOL 524 Public Sector Financing (3-4) D. DIVELEY

Covers financial management in public agencies, with the primary focus on state and local government. Prerequisite: PUBPOL 522.

[View course details in MyPlan: PUBPOL 524](#)

PUBPOL 525 Qualitative Field Methods and Analysis (3-4)

Provides a review of qualitative field research methods, exposure to writing from the field, and opportunities to try practicing fieldwork. Emphasizes study design, case selection, and field notes. Addresses coding, analysis, writing, and presenting findings.

[View course details in MyPlan: PUBPOL 525](#)

PUBPOL 526 Program Evaluation (3/4)

Theory, practice, and politics of evaluation, from simple feedback mechanisms to evaluation of large-scale ongoing programs and social experiments. Emphasis on applications of experimental and quasi-experimental evaluation. Case studies illustrate various types of evaluation. Prerequisite: PUBPOL 527.

[View course details in MyPlan: PUBPOL 526](#)

PUBPOL 527 Quantitative Analysis I (4)

Two-quarter sequence explores how to formulate research questions, gain experience with conducting research, and learn how to assess which statistical tools or research methods are appropriate to answer different types of policy or management questions. Covers probability, descriptive statistics, hypothesis testing, and confidence intervals. Prerequisite: graduate status in School of Public Affairs or permission of instructor.

[View course details in MyPlan: PUBPOL 527](#)

PUBPOL 528 Quantitative Analysis II (4)

Second quarter of a two-quarter sequence aimed at helping students become informed users and critical consumers of research and statistical analysis. Combines material on research design and data collection methods with tools for multivariate analysis. The multivariate analysis methods include correlation and an introduction to multivariate regression. Prerequisite: PUBPOL 527.

[View course details in MyPlan: PUBPOL 528](#)

PUBPOL 529 Advanced Multivariate Analysis (3/4)

[View course details in MyPlan: PUBPOL 529](#)

PUBPOL 530 International Affairs (3)

Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with JSIS B 534/POL S 534.

[View course details in MyPlan: PUBPOL 530](#)

PUBPOL 531 Development Management in the Twenty-First Century (3/4)

Addresses organization, administration and evaluation in governmental and non-governmental agencies involved in development efforts. Examines development strategies, alternative management approaches, and

management skills such as budgeting, finance, human resource development and program evaluation. Also covers communication, expatriate/local power imbalances, decentralization, community involvement, culture, and personnel issues.

[View course details in MyPlan: PUBPOL 531](#)

PUBPOL 532 International Development Capstone (2/4)

Examines different policy environments leaders must address to achieve policy in comparative and international settings. Includes strategies, tactics, and frameworks needed to initiate and sustain policy dealing with authoritarian, democratic, liberal, and one-party states. Focuses on pressures from the international system and issues such as globalization.

[View course details in MyPlan: PUBPOL 532](#)

PUBPOL 533 Economics of International Development (3/4)

Introduction to sustainable international development and its physical, human, social, and natural capital components. Students examine the new growth theories and evidence, and their relationship to democracy, trade, and other policies and institutions. Topics include income distribution, poverty, and the environment.

[View course details in MyPlan: PUBPOL 533](#)

PUBPOL 534 Food and Agricultural Policy in Developing Countries (4)

Provides an understanding of the role of agriculture in economic development. Examines frontier policy issues in developing countries related to food security and agricultural production. Emphasizes developing a nuanced understanding of contemporary food and agricultural policy issues, with a firm grounding in theory and history.

[View course details in MyPlan: PUBPOL 534](#)

PUBPOL 535 Seminar in American Foreign Policy (3-)

Examines how the U.S. foreign policy process works, emphasizing formation, content, and implementation of post-Cold War U.S. foreign and national security policy, with emphasis on current foreign and national security policy.

[View course details in MyPlan: PUBPOL 535](#)

PUBPOL 536 Program Evaluation in the Developing World (-[3/4]) M. GUGERTY

Provides an overview of issues in the analysis and evaluation of development projects focusing on the developing world with three themes: understanding and analyzing development programs; understanding and using the logic of impact assessment; identifying practical, field-based tools for monitoring and evaluation in low resource environments.

[View course details in MyPlan: PUBPOL 536](#)

PUBPOL 537 Topics in International Affairs (3-5, max. 12)

Examines topics of interest and import in foreign policy and international affairs. Focuses on the in-depth analysis of issues and the integration of economic, institutional, and political dimensions.

[View course details in MyPlan: PUBPOL 537](#)

PUBPOL 538 International Organizations and Ocean Management (3)

Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with SMEA 507.

[View course details in MyPlan: PUBPOL 538](#)

PUBPOL 539 Values in International Development (4)

Examines and clarifies international development values, including underlying theories of justice on which they seem to be built, the ways in which they are justified to stakeholders, the general public, and impacts they have upon people, especially the poorest and most vulnerable.

[View course details in MyPlan: PUBPOL 539](#)

PUBPOL 541 The Role of Nongovernmental Organizations in International Development (4) 2400

Explores some of the major issues faced by nongovernmental organizations (NGOs) working on development issues worldwide. Examines organizational forms, NGO-state relationships, inter-organizational relationships, and the relationship of NGOs to beneficiaries.

[View course details in MyPlan: PUBPOL 541](#)

PUBPOL 547 Water Resource Economics (4)

Explores the economics of water resources, including static and dynamic efficiency for consumers and producers and other topics concerned with water quality. Explores effects of climate change on water resources, and economic approaches to mitigate these effects.

[View course details in MyPlan: PUBPOL 547](#)

PUBPOL 548 Management and Public Capital Markets (4)

Explores the new debt management environment for financial managers of public organizations, and the meaning and value of active public debt management, including the analytical tools and accountability issues that characterize responsible management.

[View course details in MyPlan: PUBPOL 548](#)

PUBPOL 550 Management of Nonprofit Organizations (3/4)

Focuses upon the roles played by nonprofit organizations in meeting the public good. Examines internal management issues such as structure, budget, and operations; and external issues such as board functions, legal status, marketing, media relations, and fund-raising.

[View course details in MyPlan: PUBPOL 550](#)

PUBPOL 551 Measuring Social Impact: Advanced Program Design and Evaluation (3/4)

Explores the means through which nonprofit organizations establish strategies to expand their impact, sustain their organizations, and shape the future, and the steps through which they develop effective new programs to implement those strategies.

[View course details in MyPlan: PUBPOL 551](#)

PUBPOL 552 Philanthropy and Society (4)

Provides students a holistic background of the philanthropic sector. Begins with an in-depth analysis of history and context and ends with a discussion of current strategies and approaches to giving by foundations. Builds in sequence: history, context, sub-sectors, accountability, and results.

[View course details in MyPlan: PUBPOL 552](#)

PUBPOL 553 Nonprofit Financial Management (3/4)

Provides an understanding of the financial framework on nonprofit organizations. Focuses on the financial principles of management of nonprofits, with an emphasis on financial reporting, strategic financial planning, managerial decision-making and budgeting.

[View course details in MyPlan: PUBPOL 553](#)

PUBPOL 554 Nonprofit Organizations and Public Policy (3)

Examines the changing role of nonprofit organizations in American society. Selected policy topics include privatization, for-profit/nonprofit competition, public-private partnerships, tax policy, and new sources of revenues.

[View course details in MyPlan: PUBPOL 554](#)

PUBPOL 555 Topics in Nonprofit Management (3-5, max. 12)

Examines various topics of public importance in nonprofit management. Integrates the political, managerial, and economic dimensions of these issues.

[View course details in MyPlan: PUBPOL 555](#)

PUBPOL 556 Public-Private Partnerships (3-4)

Provides a comprehensive overview and examination of partnerships and their implications for public policy and

nonprofit and public management. Examines the diverse array of partnerships in the UW and abroad and the management challenges involved in the development and implementation of different partnership strategies.

[View course details in MyPlan: PUBPOL 556](#)

PUBPOL 557 Management and Public Capital Markets (4)

Covers the institutions and dynamics of the public capital market; how the structure of that market shapes managers' choices about how to design, sell, and manage debt obligations; and the analytical tools managers and investors use to evaluate those choices and their potential consequences.

[View course details in MyPlan: PUBPOL 557](#)

PUBPOL 558 Collaboration and Management Across Sectors (4)

Organizations from different sectors (public, business, nonprofit) increasingly work together to achieve unique, collaborative outcomes. Managing cross-sector relationships presents dynamic process and governance challenges that go well beyond the difficulties of managing within an organization. Explores the opportunities and risks involved in working across organizational boundaries.

[View course details in MyPlan: PUBPOL 558](#)

PUBPOL 559 Quadruple Bottom Line Performance (4)

Examines the Quadruple Bottom Line as a conceptual framework and emerging set of tools for a more comprehensive and balanced accounting of organizational and institutional behavior and outcomes related to economic efficiency, social equity, environmental sustainability, and creative cultural vitality.

[View course details in MyPlan: PUBPOL 559](#)

PUBPOL 560 Inequality, Governance, and Policy in the Metropolitan Region (3/4)

Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with URBDP 560.

[View course details in MyPlan: PUBPOL 560](#)

PUBPOL 561 Urban Economics and Public Policy (3/4, max. 12)

Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PUBPOL 516 or equivalent. Offered: jointly with URBDP 561.

[View course details in MyPlan: PUBPOL 561](#)

PUBPOL 562 Immigration Policy (4)

Builds foundational knowledge of American immigration policy, providing students with the conceptual and analytical tools required to critically evaluate any and all arguments made in current policy debates, and to move toward making unique and original contributions to those debates.

[View course details in MyPlan: PUBPOL 562](#)

PUBPOL 563 Intergroup Relations and Public Policy (4)

Explores how social psychological research on intergroup relations is pertinent to various aspects of public policy. Includes historical and current perspectives. Examines how the literature describes how individuals perceive, judge, and feel about individuals from various social groups. The groups discussed ranges from minimal groups to classic social groups.

[View course details in MyPlan: PUBPOL 563](#)

PUBPOL 564 Housing and Social Policy (4)

Focuses on the problem of affordable housing and its interrelationships with social problems in the United States.

[View course details in MyPlan: PUBPOL 564](#)

PUBPOL 565 Topics in Urban Affairs (3-5, max. 12)

Examines various topics of public importance in urban policy. Integrates the political, managerial, and economic dimensions of these issues.

[View course details in MyPlan: PUBPOL 565](#)

PUBPOL 566 Community Economic Development (3/4)

Explores the relationship between local community economic development, environmental sustainability, cultural vitality, and trend in regional and national economics, with specific focus on how to make community and economic investments that yield development outcomes that contribute to economic, equitable, environmental, and cultural vitality.

[View course details in MyPlan: PUBPOL 566](#)

PUBPOL 567 Community Engagement and Urban Governance (3/4)

Investigates interactions between citizen participation and efforts to measure and improve policy and program performance in large cities. Develops analytic frameworks and practical strategies for sustaining and enhancing participation and performance.

[View course details in MyPlan: PUBPOL 567](#)

PUBPOL 568 Social Justice and Public Policy (3/4)

Examines the values of social justice that motivate action in the public arena; thinks about how those values create concerns and solutions; and explores issues of equity and liberty, of balancing the rights of the individual, the common good, and redistribution.

[View course details in MyPlan: PUBPOL 568](#)

PUBPOL 569 Race and Public Policy (3-4)

Analyzes the way in which the persistent problem of race is expressed in the formation and implementation of social and public policy.

[View course details in MyPlan: PUBPOL 569](#)

PUBPOL 570 Foundations of Social Policy (3)

Examines major institutions and programs in social policy including: income maintenance, social services, education, and healthcare. Focuses on American social policy with some attention to comparative welfare state development. Includes extensive discussion of different policy strategies to address social policy problems.

[View course details in MyPlan: PUBPOL 570](#)

PUBPOL 571 Education, The Workforce, and Public Policy (3, max. 6) *W. ZUMETA*

Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, underutilized workers, race and gender discrimination issues, and the role of education and training in economic development. Offered: jointly with EDLPS 563.

[View course details in MyPlan: PUBPOL 571](#)

PUBPOL 572 Higher Education and Public Policy (3)

Explores the nature of public policies affecting higher education, how these policies are made and influenced at both the federal and state levels, and the role of policy research and analysis, and several of the major current public policy problems and policy responses.

[View course details in MyPlan: PUBPOL 572](#)

PUBPOL 573 Topics in Education and Social Policy (3-5, max. 12)

Examines various issues of public importance in the areas of education and social policy. Focuses on in-depth analysis of relevant issues and the integration of the economic, administrative, and political dimensions of these issues.

[View course details in MyPlan: PUBPOL 573](#)

PUBPOL 574 Economics of Race and Inequality in the United States (3/4)

Covers the history of racial inequality over the past century, theories of the causes, wage determination and discrimination in employment and pay, inequalities in education and human capital development, and residential segregation and its consequences. Discusses the effectiveness and limitations of policy response to racial inequality.

[View course details in MyPlan: PUBPOL 574](#)

PUBPOL 575 Economics of Education Policy (4)

Introduces economic theory applications and econometric analysis to educational policy issues. Covers supply and demand, consumer behavior, and production theory. Discusses educational investment incentives, school behavior, and governmental intervention. Uses econometric methods to infer education policies' effects and make predictions. Addresses educational attainment, school resources, teacher labor markets, and accountability.

[View course details in MyPlan: PUBPOL 575](#)

PUBPOL 576 Poverty and Anti-Poverty in the United States (3/4)

Examines the nature and extent of poverty in the United States, its causes and consequences, and the antipoverty effects of public policies.

[View course details in MyPlan: PUBPOL 576](#)

PUBPOL 577 Economics of Health Policy (4)

Uses an economic perspective to examine a variety of issues related to the provision of medical care in the United States. Topics include medical care demand, the role of health insurance, the health and financial consequences of being without insurances, health care spending, and the Affordable Care Act.

[View course details in MyPlan: PUBPOL 577](#)

PUBPOL 578 Asset Building for Low Income Families (3/4)

Explores assets and finances for low income families primarily in the United States. Identifies programs and policies targeted toward asset building and looks at evidence of their efficacy. Uses a multi-disciplinary perspective to examine the economic, social, and political contexts for these policies.

[View course details in MyPlan: PUBPOL 578](#)

PUBPOL 579 Child Well-being and Public Policy (4)

Covers the contexts of child well-being, the arguments for government intervention during childhood, and 4-5 specific topics in child policy. We will integrate theory and knowledge from Developmental Psychology, Economics, Sociology, and Social Neuroscience. Focusing on US Federal, state, and local policies.

[View course details in MyPlan: PUBPOL 579](#)

PUBPOL 582 Communicating Climate Change (4)

Surveys climate change communications and the role in achieving climate change policy goals. Assesses climate change communication in light of scientific evidence as well as student reactions. Explores theories and frameworks to evaluate and improve climate change communications. Examines the role of climate change communication as a policy tool.

[View course details in MyPlan: PUBPOL 582](#)

PUBPOL 583 Science, Technology, and Public Policy (4)

Examines the relationship between the advancement of technical knowledge, the pace of technological change, and public policies designed to induce or respond to these development. Issues of policy formulation, administrative design, and future trends; applications include biotechnology, energy, information technology, global warming, robotics, national security, homeland security, and space exploration.

[View course details in MyPlan: PUBPOL 583](#)

PUBPOL 585 Topics in Science, Technology, and Public Policy (3-5, max. 12)

Examines relationship between advancement of technical knowledge and pace of technological change, and public policies to induce or respond to these trends. Generic issues of government research, development, and personnel training programs are addressed. Applications of policy issues involving biomedical, communications,

energy, environmental, transportation, and weapons technologies.

[View course details in MyPlan: PUBPOL 585](#)

PUBPOL 586 International Science and Technology Policy (3)

Seminar is designed: first, to analyze the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries; second, to deal with the international implications of particular technologies as countries try to make policy for them in regional and global organizations. Includes examples of specific technologies.

[View course details in MyPlan: PUBPOL 586](#)

PUBPOL 587 Water and Sanitation Policy in Economically Developing Countries (3/4)

Examines the policy dimensions of providing water supply and sanitation services in developing countries.

[View course details in MyPlan: PUBPOL 587](#)

PUBPOL 588 Environmental Risk Analysis (4)

Examines a variety of frameworks and models of risk with respect to regulation, policy, and decision-making.

[View course details in MyPlan: PUBPOL 588](#)

PUBPOL 589 Risk Assessment for Environmental Health Hazards (3/4)

Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/ENV H 577; A.

[View course details in MyPlan: PUBPOL 589](#)

PUBPOL 590 Environmental Policy Processes (3-4)

Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with SEFS 592.

[View course details in MyPlan: PUBPOL 590](#)

PUBPOL 591 Seminar in Resource Policy and Management (1)

Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the School of Environmental and Forest Sciences. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with SEFS 591.

[View course details in MyPlan: PUBPOL 591](#)

PUBPOL 592 Resource Policy and Administration (4)

Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with SEFS 571.

[View course details in MyPlan: PUBPOL 592](#)

PUBPOL 593 Climate Change and Energy Policy (3-4)

Energy policy formulation and implementation with emphasis on post-1973 developments. Energy conservation programs; changing roles of oil, coal, gas, nuclear, and solar energy; institutional, environmental, and equity considerations; government research and development programs.

[View course details in MyPlan: PUBPOL 593](#)

PUBPOL 594 Economic Approaches to Environmental Management (3/4) Layton

Examines the economic tools relevant to natural resource and environmental management. Tools are developed in the context of a series of resource problems, with an eye towards building intuition useful for addressing complex policy problems that do not fit neatly into textbook examples.

[View course details in MyPlan: PUBPOL 594](#)

PUBPOL 595 Topics in Environmental Policy and Management (3-5, max. 12)

Examines various topics of public importance in environmental policy and management. Integrates the political, managerial, and economic dimensions of these issues.

[View course details in MyPlan: PUBPOL 595](#)

PUBPOL 596 Ethics and Values in Environmental and Natural Resource Policy (3)

Explores environmental values and ethics and their relationship to the policy process. Includes content on value foundation of economic efficiency and its relationship to fairness, legal entitlements, duty to other creatures, and incommensurabilities in valuing goods. Current policy controversies are addressed.

[View course details in MyPlan: PUBPOL 596](#)

PUBPOL 597 Role of Scientific Information in Environmental Decisions (3/4) A. CULLEN

Examines how science contributes to decisions that involve the natural environment; how science and scientists help frame debates and decisions; how scientific findings are incorporated into decision-making processes; how scientists and non-scientists deal with uncertainty about scientific questions.

[View course details in MyPlan: PUBPOL 597](#)

PUBPOL 598 Administrative and Policy Skills Workshop (1-3, max. 6)

Teaches practical administrative, leadership, and analytic skills commonly required of managers and analysts in the public and nonprofit sectors. The workshops emphasize hands-on problem resolution, simulations, and actual practice. Credit/no-credit only.

[View course details in MyPlan: PUBPOL 598](#)

PUBPOL 599 Special Topics (1-6, max. 15)

Study and analysis of special topics in public affairs. Topics vary each quarter depending on curricular needs and interests of students and faculty.

[View course details in MyPlan: PUBPOL 599](#)

PUBPOL 600 Independent Study or Research (*-)

[View course details in MyPlan: PUBPOL 600](#)

PUBPOL 605 Degree Project ([1-8]-, max. 8)

[View course details in MyPlan: PUBPOL 605](#)

PUBPOL 606 Public Service Clinic ([3/4]-) Carlson

Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

[View course details in MyPlan: PUBPOL 606](#)

PUBPOL 607 Public Service Clinic (-[3/4]) Carlson

Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

[View course details in MyPlan: PUBPOL 607](#)

PUBPOL 608 Capstone Project Seminar ([3-4]-, max. 9)

Meets the degree project requirements as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to complete individual degree projects.

PUBLIC POLICY AND GOVERNANCE

PUBLIC AFFAIRS EXECUTIVE MPA

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PA EX 502 Executive Decision Making (3)

Examines multiple ways in which analysis can support good decision making by leaders. Examines the normal heuristics managers and leaders use and looks at the role of data analysis, modeling, and expert judgment in management and leadership.

[View course details in MyPlan: PA EX 502](#)

PA EX 503 Strategic Financial Management I (4)

Introduction to state and local public finance and nonprofit financial management and analysis; political context and economic forces causing fundamental shift in resources and types of financing for public service; fundamental concepts of financial statements, their nature, and use in the public and nonprofit sectors.

[View course details in MyPlan: PA EX 503](#)

PA EX 504 Executive Economics (3)

Explores basic principles of economics needed by executives to become critical consumers of economic analysis, recognizing when and how it is pertinent to decision-making.

[View course details in MyPlan: PA EX 504](#)

PA EX 505 Strategic Financial Management II (4)

Focuses on strategic financial management; alternative forms of organizational financial structure; analytic skills and managerial applications of financial accounting and budgeting, techniques of financial analysis, performance budgeting, and debt management; strategic finance linked to contracting, multiple forms of privatization, social enterprise, and managing multiple revenue streams.

[View course details in MyPlan: PA EX 505](#)

PA EX 506 Improving Organizational Performance (3)

Integrates organizational mission with the culture using effective communications, outcomes assessments, and other tools for a citizen-oriented approach that relies on modern marketing methods.

[View course details in MyPlan: PA EX 506](#)

PA EX 507 Values and Integrity (3)

Provides a personal and value context from which to use the framework and methods to sustain a personal and institutional mission. Examines ranges of intelligence and learning styles to create a foundation of self understanding for leadership strength and integrity.

[View course details in MyPlan: PA EX 507](#)

PA EX 508 Managing People (3)

Focuses on how to build a humane and fair workplace consistent with the laws that govern modern employment. Examines critical moments of building a strong culture through evaluation, promoting, firing, discrimination, work force succession, and intergenerational leadership.

[View course details in MyPlan: PA EX 508](#)

PA EX 509 Leading Across Boundaries (3)

Examines the modern challenges of leading across complex networks of institutions and stakeholders, examining institutional, national, sectoral, and cultural boundaries. Examines these challenges in the context of globalization and the emergence of multi-sectoral and multi-cultural networks of governance.

[View course details in MyPlan: PA EX 509](#)

PA EX 510 Negotiation and Mediation (4)

Explores a theoretical framework for negotiations with an equal emphasis on developing negotiation skills through role-plays. Focuses on techniques and nuances of negotiation that are most useful for a manager working in a complex, dynamic environment with multiple stakeholders.

[View course details in MyPlan: PA EX 510](#)

PA EX 511 Strategic Communication (3)

Focuses on effective communication, highlighting the advocacy and motivation facet of leadership. In order to understand elements of persuasive communication, emphasizes concepts of negotiation analysis; power and dependence, perceptions of conflict, and finding mutual gains.

[View course details in MyPlan: PA EX 511](#)

PA EX 512 Strategic Policy-Making (3)

Examines how managers can expertly function at the intersection of politics, policy, and the wishes of the public.

[View course details in MyPlan: PA EX 512](#)

PA EX 513 Leading for a Legacy (3)

Explores the nature of human culture and values and how they relate to human legacy by impacting the quality of humans in an organization and how legacy grows from the values of the trusteeship and stewardship.

EVANS SCHOOL OF PUB POL & GOV

PUBLIC POLICY AND GOVERNANCE

PUBLIC POLICY AND MANAGEMENT

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

PPM 500 Proseminar in Public Policy and Management (1)

Engages students with faculty to discuss research in public policy and management. Provides an effective means to become familiar with research agendas and opportunities in this field, and other aspects of socialization into the academic process, including teaching, grant writing, and publishing. Credit/no-credit only.

[View course details in MyPlan: PPM 500](#)

PPM 502 Research Design (4) *Khagram, Thomas*

Provides a rigorous foundation for interdisciplinary research design. Introduces iconic types of theory (predictive, interpretive, and explanatory) and the philosophical foundations underlying these. Reviews a range of methodological approaches to research: experimental and quasi-experimental, statistical and quasi-statistical, comparative case-study, ethnographic, and triangulation. Offered: A.

[View course details in MyPlan: PPM 502](#)

PPM 504 Institutional Perspectives on Management (4)

Prepares doctoral students for careers in research and teaching public policy, management, and leadership. Examines essential responsibilities that policy makers, managers, and other kinds of leaders must address to succeed in public service through competing theories of institutional design and action. Offered: A.

[View course details in MyPlan: PPM 504](#)

PPM 506 Advanced Microeconomics for Policy Analysis (4)

Reviews standard individual choice models and newer perspectives from behavioral and institutional economics that inform public policy analysis. Topics include: models of individual choice, constrained and unconstrained optimization, information and uncertainty, intertemporal decision making, transaction costs and property rights, externalities, and public goods. Prerequisite: multivariate calculus; intermediate microeconomic theory. Offered: A.

[View course details in MyPlan: PPM 506](#)

PPM 508 Public Policy Processes (4)

Political science frameworks, approaches, and theories concerning development and implementation of public policies within American political systems. Governmental behaviors and processes, including rational, political,

and bureaucratic models of governmental decision making; agenda-building processes; and normative²⁴⁰⁹ perspectives concerning role of governmental entities.

[View course details in MyPlan: PPM 508](#)

PPM 510 Public Policy Analysis (4)

Reviews public policy analysis and evaluation building on prior study of microeconomics, policy processes, research design, and statistics. Covers theoretical and interdisciplinary frameworks and applications of empirical methods to policy problems and solutions, and considers regularities in incidence, and effects of the use of alternative policy tools.

[View course details in MyPlan: PPM 510](#)

PPM 512 Data Analysis Practicum (4)

Develops the methodological capacity to undertake independent research. Includes reading, critiquing, and replicating portions of selected empirical papers from a range of scholarly areas. Provides opportunities to deal with issues of research design, data limitations, measurement, model specification, and interpretation.

[View course details in MyPlan: PPM 512](#)

PPM 514 Organizations, Management, and Theory (4)

Key theories of organizations as they apply to public and nonprofit management; building on the required course PPM 504 Institutional Perspectives. Students wishing to take the course who have not taken PPM 504 will be required to do some additional reading prior to taking this course. Recommended: PPM 504

[View course details in MyPlan: PPM 514](#)

PPM 599 Topics in Public Policy and Management (1-6, max. 16)

Examines various research topics of importance in public policy and management.

[View course details in MyPlan: PPM 599](#)

PPM 600 Independent Study or Research (*)

[View course details in MyPlan: PPM 600](#)

PPM 601 Teaching Mentorship (2)

Credit/no-credit only.

School of Public Health

[Display as tabs](#)

School Overview

Dean
Howard Frumkin

F350 Health Sciences

The UW School of Public Health provides education to prepare outstanding, innovative, and diverse public health leaders and scientists; research to advance public health science and policies; and service to promote the health and well-being of communities locally, nationally, and globally. The School of Public Health emphasizes strong discipline-oriented academic programs, as well as programs that emphasize interdisciplinary collaboration.

The School has five departments: Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Services -- plus interdisciplinary programs that include health services administration, maternal and child health, nutritional sciences, pathobiology, and public health genetics.

Within these departments and program, the school offers the following degrees: Master of Public Health (MPH); Master of Science (MS); Master of Health Administration (MHA); Doctor of Philosophy (PhD); and bachelor's degrees in public health, environmental health (also a minor), and health informatics and health information management (HIHIM).

Concurrent degree programs with Anthropology, Dentistry, Foster School of Business, International Studies, Law, Medicine, Molecular and Cellular Biology, Nursing, Public Administration, and Social Work are also available.

Graduate certificate programs are offered in basic or advanced clinical research methods (Epidemiology), emergency preparedness and response (Health Services), global health (Global Health), health management (Health Services), health policy (Health Services), HIV and STIs (Global Health), maternal and child health (Health Services), public health practice (Health Services Executive MPH program), public health genetics (Public Health Genetics), and statistical genetics (Biostatistics).

For more information, see the school's academic catalog at sph.washington.edu/publications/catalog.asp or visit the homepage at sph.washington.edu.

[Course Descriptions](#)

Undergraduate Program

Adviser
F-332 Health Sciences, Box 357230
(206) 221-4561
phmajor@uw.edu

The School of Public Health offers a Bachelor of Science or a Bachelor of Arts with a major in public health.

The Department of Environmental and Occupational Health Sciences offers a minor and a Bachelor of Science with a major in environmental health. The Department of Health Services offers a Bachelor of Science in Health Informatics and Health Information Management degree, as well as a baccalaureate certificate, through the UW Evening Degree Program. A minor in global health is offered by the Department of Global Health. A minor in nutritional sciences is offered by the Nutritional Sciences Program.

General Education

The School of Public Health general education requirements, which apply to all degree programs mentioned above, are as follows:

Basic Skills

1. English Composition (C) – 5 credits
2. Additional Writing (W) – 10 credits
3. Quantitative and Symbolic Reasoning (QSR) – One course (minimum 4 credits)

Areas of Knowledge

1. Visual, Literary, & Performing Arts (VLPA) – 10 credits*
2. Individuals & Societies (I&S) – 10 credits
3. Natural World (NW) – 20 credits
4. Additional Areas of Knowledge – 25 credits

*Although School of Public Health students are not required to study a foreign language, they are encouraged to do so by substituting first-year language courses for the VLPA requirement. Completion through the third quarter is required for VLPA credit.

Suggested First- and Second-Year Courses: anthropology, political science, psychology, sociology; distribution of general education and Areas of Knowledge courses as well as coursework that develops critical and analytical thinking, communication skills, and an understanding of public health.

Admission Requirements

1. Admission to the major is competitive. Applicants must complete prerequisite coursework (see below) and an application to be considered. Completing the prerequisites and submitting an application do not guarantee admission.
2. Admission is offered twice a year for autumn and winter quarters. Applications for autumn are due the third Friday of spring quarter and applications for winter are due the third Friday of autumn quarter. The application is available from the public health major website at sph.washington.edu/uph. Transfer students must also apply

for admission to the UW for autumn or winter quarter, following the admission process, policies, and deadlines found at admit.washington.edu.

3. The program evaluates applications based on overall academic record, grades in major relevant coursework, selection of and preparation for appropriate BA or BS path, ability to make satisfactory progress toward the degree, and understanding of and potential fit with the major as demonstrated in the personal statement.
4. Applicants are strongly encouraged to attend an information session before submitting an application.
5. Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Consult the UW Equivalency Guide or a UW adviser to verify transferability of coursework.

Early Admission

The early admission option is for a select group of students, already enrolled at the UW, who have discovered the major early in their academic career and want to begin developing stronger connections to the school and related opportunities. Students apply to the early admission option during spring of their first year for entry in autumn of their second year or during autumn of their second year for entry in winter of their second year.

Applicants must complete the following by the application deadline to be considered for admission:

1. Minimum 30 college credits
2. Minimum 3.00 cumulative GPA
3. English composition (5 credits)
4. Minimum 3.0 grade in one introductory public health course from the following: ENV H 111, EPI 201, G H 101, HSERV 100, NUTR 300, PHG 200
5. Minimum 3.0 grade in one introductory science from the following: BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or MICROM 301/MICROM 302

Upper Division Admission

The upper division admission option is typical for most students both at the UW and transferring from other institutions.

Applicants must complete the following by the application deadline to be considered for admission:

1. Minimum 60 college credits
2. Minimum 2.50 cumulative GPA
3. English composition (5 credits)
4. Minimum 2.5 grade in one introductory public health course from the following: ENV H 111, EPI 201, G H 101, HSERV 100, NUTR 300, PHG 200, or one 5-credit course from any of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), or Sociology (SOC)
5. For BA path students, minimum 2.5 grade in one introductory science from the following: BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or

MICROM 301/MICROM 302

6. For BS path students, minimum 2.5 grades in at least two courses of a year-long sequence in introductory science, with laboratories, or mathematics, chosen from: biology (BIOL 180, BIOL 200, BIOL 220); chemistry (CHEM 142, CHEM 152, CHEM 162); organic chemistry (CHEM 237, CHEM 238, CHEM 239 CHEM 241, CHEM 242); physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119, or PHYS 121, PHYS 122, PHYS 123); or mathematics (MATH 124, MATH 125, MATH 126)

Bachelor of Arts**Major Requirements**

108-109 credits, as follows:

1. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
2. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (3 credits), EPI 320
3. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
4. *Social and Behavioral Sciences (20 credits)*: One 5-credit course from each of the following departments: Anthropology (ANTH only), Political Science, Psychology, and Sociology; minimum 15 credits at the 200 level or above.
5. *Natural Science (10 credits)*:
 - a. 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302.
 - b. 5 credits from CHEM 120, CHEM 142, CHEM 145
6. *Bachelor of Arts (BA) Selectives (20 credits)*: Courses identified to address competency areas in advocacy, community dynamics, communication, economics, education, ethics, health promotion, law, policy, social justice, and writing. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
7. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in public health. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Capstone (5 credits)*: minimum 2.0 grade in each of SPH 491 and SPH 492 (minimum 2.0 grade)
9. Minimum 2.00 cumulative GPA for courses applied to the major

In addition to the major requirements shown above, students must complete the general education requirements for the School of Public Health.

Bachelor of Science**Major Requirements**

108-120 credits, as follows:

1. *Integrated Core (20 credits)*: minimum 2.00 cumulative GPA with no grade below 1.7 in SPH 380, SPH 381, SPH 480, SPH 481
2. *Public Health Foundation (8-9 credits)*: statistics (4-5 credits) from BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381; epidemiology (3 credits), EPI 320
3. *Social and Behavioral Sciences Breadth (25 credits)*: one 5-credit course from each of the following departments: Anthropology (ANTH only), Geography (GEOG), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 20 credits at the 200 level or above
4. *Social and Behavioral Sciences (20 credits)*: One 5-credit course from each of the following departments: Anthropology (ANTH only), Political Science (POL S), Psychology (PSYCH), and Sociology (SOC); minimum 15 credits at the 200 level or above.
5. *Natural Science (10 credits)*:
 - a. 5 credits from BIOL 118, BIOL 180, MICROM 301/MICROM 302.
 - b. 5 credits from CHEM 120, CHEM 142, CHEM 145
6. *Bachelor of Science (BS) Selectives (30-32 credits)*: two year-long sequences of introductory science, with laboratories, or mathematics, chosen from biology (BIOL 180, BIOL 200, BIOL 220); chemistry (CHEM 142, CHEM 152, CHEM 162); organic chemistry (CHEM 237, CHEM 238, CHEM 239, CHEM 241 CHEM 242); physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119, or PHYS 121, PHYS 122, PHYS 123); or mathematics (MATH 124, MATH 125, MATH 126)
7. *Public Health Electives (20 credits)*: 300- and 400-level courses to build competency areas in public health. See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
8. *Public Health Capstone (5 credits)*: Minimum 2.0 grade in SPH 491 and SPH 492
9. Minimum 2.00 cumulative GPA for courses applied to the major

In addition to the major requirements shown above, students must complete the general education requirements for the school of Public Health.

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes*: Public Health is a school-wide liberal arts major, leading to a Bachelor of Arts or Bachelor of Science, which uses public health questions, concepts, and tools to teach critical thinking skills. Students learn to ask questions, challenge assumptions, and explore answers to promote the health and well-being of communities, locally, nationally, and globally. By integrating the diverse areas of public health, students are introduced to the determinants of health, emerging diseases, access to health care and modes of health-care delivery, the geography of health, and the effects of environment on health and disease. The major provides undergraduates with [competencies](#) in health, ethics and social justice, social science, natural science, policy and politics, and environment with particular

emphasis on collaboration, communication, and critical thinking across these domains. An undergraduate degree in public health provides a grounding in science, values, passion, and commitment which is valuable for a range of career and educational options across multiple disciplines.

- *Instructional and Research Facilities:* The School of Public Health has five departments -- Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Services -- as well as interdisciplinary programs such as the Public Health major, Maternal and Child Health, Nutritional Sciences, Pathobiology, and Public Health Genetics. The School has over 30 research centers, including Institute for Public Health Genetics, Northwest Center for Public Health Practice, Center for Public Health Nutrition, Institute for Health Metrics and Evaluation, and the Health Promotion Research Center. Administration and teaching are primarily in the Magnuson Health Sciences Center.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Majors are encouraged to engage in experiential learning. See adviser for details.
- *Department Scholarships:* See adviser for details.
- *Student Organizations/Associations:* Undergraduate Student Public Health Association (USPHA). Public Health Dawgs (PhDs).

Graduate Program

The School of Public Health (SPH) offers graduate programs leading to the degrees of Master of Public Health (MPH), Master of Health Administration (MHA), Master of Science (MS), and Doctor of Philosophy (PhD). Admission requirements vary by degree and field and are described in the sections for each department.

Master of Public Health Degree: The MPH is a professional degree that provides broad training in public health. Each program provides additional training in a particular area. Graduates pursue careers in public health practice settings, academia, or research. The MPH degree is offered in all SPH departments. Students earning the MPH may choose from several areas including biostatistics; community-oriented public health practice; environmental and occupational health; epidemiology; Executive MPH program; health metrics and evaluation; health services; health systems and policy; global health (in Epidemiology or Global Health); leadership, policy, and management; maternal and child health (in Epidemiology or Health Services); nutritional sciences; occupational and environmental medicine; public health genetics; or Peace Corps Master's International. The Executive MPH degree program is a three-year, part-time program that allows mid-career public health professionals to pursue the MPH degree in community practice, environmental health, global health, health education, or maternal and child health while continuing their employment.

Master of Health Administration Degree: The MHA degree is offered by the interdisciplinary graduate programs in health services administration in the Department of Health Services under the auspices of the Graduate School, either as a full-time, in-residence program or a part-time executive program. The MHA program prepares students for careers in management, planning, and policy analysis in a variety of settings in the

healthcare field. The purpose of the curriculum is to integrate the knowledge, skills, and experience that encompass health services management, planning, and policy analysis. Students develop knowledge and skills that enable them to better understand and manage change, analyze information and make decisions, and manage organizations and the people in them. The Executive MHA program is a part-time program designed for mid-career health services professionals, including physicians and other experienced clinicians, who wish to continue their employment while pursuing the MHA degree. Both programs provide a balance of theory and practical management skills.

Master of Science and Doctor of Philosophy Degrees: The MS and PhD programs in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, and Health Services prepare students for academic or research careers. The MS and PhD in the Nutritional Sciences and the Pathobiology programs, and the PhD program in the Institute for Public Health Genetics are administered in the school, although the degrees are awarded through the Graduate School's interdisciplinary group structure.

The MS programs in biostatistics, environmental health (general, occupational and environmental exposure sciences, and toxicology tracks), epidemiology (general, global, or clinical research tracks), health services (healthcare and population health), nutrition, pathobiology, and genetic epidemiology offer focused research training in specific disciplines. Graduates of these programs often assume positions as senior technical staff in laboratories or other organizations and as research project coordinators, or pursue further graduate training. The MS program differs from the PhD program in that more of the courses emphasize the concepts underlying methodological approaches rather than the ability to independently design a major research program.

The PhD programs in biostatistics (general or statistical genetics tracks), environmental and occupational health sciences (environmental & occupational hygiene and toxicology tracks), epidemiology, health services, nutritional sciences, pathobiology, and public health genetics, train future academicians as highly qualified independent investigators and teachers, and as well-trained practitioners. The doctoral programs are distinct from the MS programs by the addition of advanced coursework and the nature and scope of the dissertation research project.

Concurrent Degree Programs: The School of Public Health MPH program encourages students to take full advantage of the University's unique position as a leading education, research, and service institution and to consider one of the many concurrent degree programs available with the MPH. Enrollment in a concurrent degree program at the University permits a student to proceed in a coordinated way towards sequential completion of both degrees in a shortened period of time. Some of the options available are not formal concurrent programs, but the degrees listed can be pursued in parallel with the Global Health MPH. In some cases, agreements are reached between the two programs to allow for sharing of some credits and/or projects. Most concurrent degrees begin with a successful application to the other school, followed by an application to the MPH during the first year of study in the first program.

Residency Programs: The SPH offers a residency in occupational and environmental medicine (MPH). Physicians may apply to any of the school's other graduate programs.

Certificate and Graduate Certificate Programs: The SPH offers several graduate certificate programs, including: basic or advanced clinical research methods (Epidemiology); emergency preparedness and response (Health Services); global health (Global Health); global health of women, adolescents, and children (Global Health); global injury and violence prevention (Global Health); health economics and outcomes research (with the School of Pharmacy); health management (Health Services); health policy

(Health Services); HIV and STIs (Global Health); maternal and child health (Health Services); public health practice (Health Services Executive MPH program); public health genetics (Public Health Genetics) and statistical genetics (Biostatistics).

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

SPH 380 History and Practice of Public Health (5) *T. KWAN-GETT, S. PAK-GORSTEIN*

Provides a historical overview of public health as a framework to understand organization of contemporary public health and key issues faced today. Offered: AW.

[View course details in MyPlan: SPH 380](#)

SPH 381 Science and Public Health (5) *M. AVERILL, D. LEHMAN, J. LINGAPPA, G. ONSTAD*

Provide an overview and introduction to the ways different scientific disciplines are used to address public health goals. Prerequisite: minimum grade of 1.7 in SPH 380; either BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or both MICROM 301 and MICROM 302. Offered: WSp.

[View course details in MyPlan: SPH 381](#)

SPH 480 Research Methods in Public Health (5) *J. SLYKER*

Applies concepts and research methods to real public health problems. Prerequisite: EPI 320; minimum grade of 1.7 in SPH 381. Offered: AW.

[View course details in MyPlan: SPH 480](#)

SPH 481 Ethics, Social Justice, and Policy in Public Health (5) *S. MACKENZIE*

Integration of prior learning and consideration of public health decision from an ethics and justice perspective. Prerequisite: minimum grade of 1.7 in SPH 480. Offered: WSp.

[View course details in MyPlan: SPH 481](#)

SPH 489 Undoing Racism in Public Health (1) *DIV*

Introduction to and exploration of institutional and structural racism in a public health context. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: SPH 489](#)

SPH 490 Selected Topics in Public Health (1-5, max. 15)

In depth study of current public health topics. Offered: AWSpS.

[View course details in MyPlan: SPH 490](#)

SPH 491 Public Health Capstone I (2-)

Part one of integrative experience bringing together students' knowledge and skills acquired in the public health

major. Prerequisite: SPH 380, SPH 381, or SPH 480. SPH 480 may be taken concurrently.

[View course details in MyPlan: SPH 491](#)

SPH 492 Public Health Capstone II (-3)

Part two of integrative experience bringing together students' knowledge and skills acquired in the public health major. Prerequisite: SPH 491.

[View course details in MyPlan: SPH 492](#)

SPH 493 Public Health Capstone (5)

Students complete a final self-directed paper on public health topic of interest integrating the knowledge and skills acquired during their time in the public health major. Offered: AWSpS.

University of Washington Course Descriptions

gencat@u.washington.edu

Modified: May 30, 2017

Biostatistics

[Display as tabs](#)

Department Overview

Founded in 1970, the Department of Biostatistics is a leader in statistical sciences. Its faculty include members of the United States National Academy of Sciences, the Institute of Medicine, and fellows of the American Statistical Association. Alumni hold leadership roles in academia, government, and industry worldwide. The department is a center for development and application of statistical methodology across the health sciences, and has collaborative partnerships with Fred Hutchinson Cancer Research Center, Seattle Children's hospital Research Institute, Group Health Cooperative, and the Veterans' Administration. To complement research, the department recently established the Center for Biomedical Statistics to provide consulting and collaborative services.

[Academic Planning Worksheet](#)

Graduate Program

Graduate Program Coordinator
H655 Health Sciences, Box 357232
(206) 543-1044
bioadmit@uw.edu

The Department of Biostatistics offers Master of Science, Master of Public Health, and doctor of philosophy degrees in quantitative methods applied to the medical and biological sciences. Biology, medicine, and health sciences are undergoing major changes in their development as quantitative sciences. As technological advances generate huge quantities of information, biostatistical tools and concepts are critical for the analysis of these data. The techniques and viewpoints of mathematics and statistics, traditionally peripheral to biology and medicine, are now woven into the fabric of the life sciences, thereby providing new opportunities in research and teaching.

Many universities have instituted programs relating mathematics or statistics to one particular biological field. The goal of the biostatistics graduate program is to equip students to develop and apply the quantitative techniques of mathematics, statistics, and computing appropriate to medicine, biology, and other health-science disciplines.

Because of faculty involvement in diverse statistical applications, the department produces graduates at all levels. Students are recruited from programs in mathematics, statistics, and biology and are selected on the basis of quantitative ability.

Master of Public Health

Combines broad training in public health with specific training in biostatistics. Includes core courses in biostatistics, environmental health, epidemiology, health services, and social and behavioral sciences. In addition, successful candidates are required to complete a public health practicum and write a research-based master's thesis. The degree is designed for individuals who anticipate careers as data analysts in public health research or practice and for individuals who plan doctoral work in public health or biomedical field, but who want more methodological training than those PhD programs offer.

Admission Requirements

Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

To be considered for admission to the Biostatistics MPH pathway, a candidate must hold a doctoral-level degree in another field (e.g., MD, PhD, JD) or be currently working on such a doctoral degree. Candidates who have not yet been awarded a doctoral degree are not awarded the biostatistics-pathway MPH until they are awarded their doctoral degree. All other prerequisites and required materials are the same for MS, MPH, and PhD applicants.

Degree Requirements

63 credits, as follows:

1. *Biostatistics Core Courses*: BIOST 514, BIOST 515; BIOST 524; BIOST 536, BIOST 537; BIOST 580; BIOST 590. BIOST 514, BIOST 515, BIOST 524, BIOST 536, and BIOST 537 must be taken for a numerical grade, with a 3.0 minimum grade in each course.
2. *Non-biostatistics Core Courses*: EPI 512, EPI 513; HSERV 510, HSERV 511; ENV H 511; G H 515. All non-biostatistics core courses must be taken for a numerical grade, with a minimum 2.7 grade in each non-biostatistics core course and a minimum 3.00 cumulative GPA.
3. *Biostatistics Elective Courses*: 6 credits of any approved biostatistics MS elective, or STAT 512 or STAT 513
4. *Biostatistics MPH Practicum*: BIOST 595 (3). Three credits in an organization or agency that provides planning or services relevant to public health.
5. *Master's Thesis*: 9 credits of BIOST 700.

See [department website](#) for further information on degree requirements.

Master of Science

The Master of Science program offers advanced training in biostatistics. The program includes coursework in biostatistics, statistics, and one or more biomedical fields. In addition, successful candidates are required to pass a master's theory examination and write a research-based master's thesis. The degree is designed for individuals who anticipate a career as a data analyst in public health or biomedical research or practice and for individuals who plan doctoral work in a public health or biomedical field, but want more methodological training than those PhD programs offer.

Admission Requirements

Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential MS students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (including multivariate calculus), one course in linear algebra, and one course in probability theory.

Degree Requirements

63 credits minimum, as follows:

1. *Required Courses:* BIOST 514, BIOST 515, BIOST 536, BIOST 537, BIOST 580, BIOST 590, STAT 512, STAT 513. Minimum 3.0 grade in each required course (except BIOST 580 and BIOST 590). At faculty discretion, required courses may be waived based on prior coursework, and the minimum 3.0 grade requirement in selected courses may also be waived when subsequent performance on a relevant qualifying examination is excellent.
2. *Elective Credits:* 12 elective credits, including at least 6 credits with a methodology emphasis, and 6 credits with a biology or public health emphasis (See department for elective-credit lists.)
3. *Examinations:* Students who enroll in STAT 512 and STAT 513 must take the MS theory examination the following summer, and if failed, must be passed the following year.
4. *Master's Thesis:* 18 credits of BIOST 700. Can be waived for students who have passed all PhD qualifying examinations at a level appropriate for PhD students. In place of the 18 credits of BIOST 700 and the 8 credits of BIOST 536 and BIOST 537, the student must take and pass all required coursework for the PhD degree, including BIOST 533, BIOST 570, STAT 581, STAT 582, STAT 583 and, depending on the pathway, BIOST 571 and BIOST 572, or BIOST 550, BIOST 551, and BIOST 552.

See [department website](#) for further information on degree requirements.

Doctor of Philosophy

Trains future leaders, highly qualified as independent investigators and teachers, who are well trained practitioners of biostatistics. Includes coursework in biostatistics, statistics, and one or more public health or biomedical fields. In addition, successful candidates must pass PhD applied and theory examinations, complete a biology project, and write a dissertation that reports the results of new biostatistical research undertaken by the candidate.

Admission Requirements

Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential PhD students may enter the graduate program in biostatistics from programs in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in

mathematics and statistics to include two years of calculus (including multivariate calculus), one course in linear algebra, and one course in probability theory. The two pathways (standard or statistical genetics) are shown below.

Degree Requirements

Minimum 103 credits, as follows:

Standard Pathway

1. *Required Courses:* BIOST 514; BIOST 515; BIOST 533; BIOST 570; BIOST 571; BIOST 572; BIOST 580, BIOST 590, BIOST 800; MATH 576, or equivalent; STAT 512, STAT 513; STAT 581, STAT 582, STAT 583
2. Minimum 3.0 grade in each required course (except BIOST 580, BIOST 590, or BIOST 800). A placement examination may be taken to waive STAT 512 and STAT 513. At faculty discretion, required courses may be waived based on prior coursework, and the minimum 3.0 grade in selected courses may also be waived when subsequent performance on a relevant qualifying examination is excellent.
3. *Elective Credits:* 15 elective credits, consisting of at least 6 credits with a methodology emphasis and 9 credits with a biology or public health emphasis. (See department for elective-credit lists.) (Minimum 2.7 grade for elective courses).
4. *Examinations:* A PhD student who enrolls in STAT 512 and STAT 513 must take the MS theory examination the following summer for advisory purposes. PhD students must also take and pass the PhD statistical theory examination within two years following first-time completion of STAT 581, STAT 582, STAT 583; take and pass the PhD applied examination within two years following first-time completion of BIOST 570; and pass the general and final examinations.
5. *Teaching Assistant:* PhD students must serve as a TA for at least one quarter.

Statistical Genetics Pathway

1. *Prerequisites:* familiarization with the statistical genetics program; GENOME 371 (or equivalent course from another institution); GENOME 372, GENOME 453, or GENOME 465 (or equivalent class from another institution)
2. *Required Courses:* BIOST 514, BIOST 515, BIOST 533, BIOST 550, BIOST 551, BIOST 552, BIOST 570, BIOST 581, BIOST 590, BIOST 800; STAT 512, STAT 513, STAT 581, STAT 582, STAT 583; MATH 576 (or equivalent); GENOME 540 or GENOME 541; GENOME 562
3. Minimum 3.0 grade in each of the required courses (except BIOST 581, BIOST 590, or BIOST 800). A placement examination may be taken to waive STAT 512 and STAT 513. At faculty discretion, required courses may be waived based on prior coursework, and the requirement for obtaining a minimum 3.0 grad in selected courses may also be waived when subsequent performance on a relevant qualifying examination is excellent.
4. *Elective Credits:* at least 4 credits of elective courses with a methodology emphasis. (See department for elective-course list.) Minimum 2.7 grade required.
5. *Examinations:* A PhD student who enroll in STAT 512 and STAT 513 must take the MS theory examination the following summer for advisory purposes. PhD students must also pass the PhD statistical theory examination within two years following first-time completion of STAT 581, STAT 582, STAT 583; take and pass the PhD applied examination within two years following first-time completion of BIOST 570; and pass the general and final examinations.

6. *Teaching Assistant:* PhD students must serve as a TA for at least one quarter.

SCHOOL OF PUBLIC HEALTH BIOSTATISTICS

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

BIOST 111 Lectures in Applied Statistics (1) NW

Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Credit/no-credit only. Offered: jointly with STAT 111; Sp.

[View course details in MyPlan: BIOST 111](#)

BIOST 290 Introduction to Biomedical Research: Study Design and Interpretation (3) NW

Introduces biostatistical concepts necessary for the interpretation, evaluation, and communication of biomedical research. Includes biomedical study design, randomization, graphical data displays, control bias, variability, confounding, interaction, and ethics of human experimentation. Students participate in group and individual projects, group discussions, and oral presentations. Offered: AWSp.

[View course details in MyPlan: BIOST 290](#)

BIOST 302 Forensic Genetics (3) I&S/NW, QSR B. WEIR

Introduces the field of forensic genetics through discussion of genetic and statistical issues emerging since the introduction of DNA profiling. Students develop the skills to interpret the evidence of matching genetic profiles; to perform calculations relevant for parentage determination; the identification of remains; and to consider the implications of familial searching of DNA databases. Prerequisite: either BIOST 310, STAT 220, STAT 221/CS&SS 221/SOC 221, STAT 311, Q SCI 381, or Q METH 201. Offered: jointly with PHG 302; W.

[View course details in MyPlan: BIOST 302](#)

BIOST 310 Biostatistics for the Health Sciences (4) QSR Hughes

Introduction to statistical methods for students planning on majoring in health sciences. Uses case studies and examples from popular and scientific literature to introduce topics such as data description, study design, screening, estimation hypothesis testing, categorical data analysis, and regression. Emphasizes concepts and interpretation rather than computation or theory. Offered: AWSp.

[View course details in MyPlan: BIOST 310](#)

BIOST 311 Regression Methods in the Health Sciences (4) QSR

Introduces regression methods for analysis of continuous, binary, and time-to-event (survival) data. Covers linear regression; logistic regression; and proportional hazards regression, all at an introductory level. Makes use of examples drawn from the biomedical and health sciences literature. Prerequisite: BIOST 310.

[View course details in MyPlan: BIOST 311](#)

BIOST 405 Introduction to Health Data Analytics (3)

Covers the process of and tools used in evaluating data using analytical and logical reasoning to examine each component of the health data. Offered: jointly with HIHIM 405.

[View course details in MyPlan: BIOST 405](#)

BIOST 406 Research Design and Statistics for HIHIM (3)

Explores healthcare and research statistics. Addresses hospital statistics, used to calculate usage levels of healthcare resources and outcomes of clinical operations, and research statistics, used to summarize and describe significant characteristics of a data set, and to make inferences about a population based on data collected from a sample. In addition, principles of research are described, including the Institutional Review Board process.

Offered: jointly with HIHIM 425/STAT 406.

[View course details in MyPlan: BIOST 406](#)

BIOST 425 Introduction to Nonparametric Statistics (3) NW

Overview of nonparametric methods, such as rank tests, goodness of fit tests, 2 x 2 tables, nonparametric estimation. Useful for students with only a statistical methods course background. Prerequisite: STAT 390/MATH 390. Offered: jointly with STAT 425.

[View course details in MyPlan: BIOST 425](#)

BIOST 499 Undergraduate Research (1-10, max. 30)

Supervised reading programs; library and field research; special projects.

[View course details in MyPlan: BIOST 499](#)

BIOST 502 Introduction to Statistics in Health Sciences (4)

Description and examples of common concepts in biostatistics. Probability, point and confidence interval estimation, hypothesis testing including two-sample and paired t and chi-square tests, introduction to simple linear regression. Emphasizes applications in health sciences. Offered: W.

[View course details in MyPlan: BIOST 502](#)

BIOST 503 Application of Statistics to Health Sciences ([0-3]-, max. 3)

Standard statistical techniques presented with examples drawn from the health sciences literature. Critical interpretation of research results, and introduction to the computer for data processing and statistical analysis. Prerequisite: BIOST 502 or equivalent. Offered: A.

[View course details in MyPlan: BIOST 503](#)

BIOST 508 Biostatistical Reasoning for the Health Sciences (4)

Provides a broad overview of biostatistical methods. Students are introduced to the data summaries and presentation, statistical inference (including hypothesis testing, p-values, and confidence intervals), sample size calculation, and modeling approaches such as linear regression analysis. Includes hands-on data analysis.

Prerequisite: EPI 511 or instructor's permission Offered: W.

[View course details in MyPlan: BIOST 508](#)

BIOST 509 Introduction to R for Data Analysis in the Health Sciences (2)

Introduction to R for data analysis. Covers installing R; scripts; reading in data and writing output; using help files; using functions; writing functions; graphics; R packages; data manipulation; loops; permutation tests; bootstrapping; and fitting models. Prerequisite: upper-division course in statistics or permission of instructor.

[View course details in MyPlan: BIOST 509](#)

BIOST 510 Biostatistics in Dentistry (3)

Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Instructors: Spiekerman Offered: jointly with DPHS 568; S.

[View course details in MyPlan: BIOST 510](#)

BIOST 511 Medical Biometry I (4)

Presents the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Examples from the biomedical literature, and real data sets are analyzed by the students after a brief introduction to the use of standard statistical computer packages. Statistical techniques covered include description of samples, comparison of two sample means and proportions, simple linear regression and correlation. Offered: A.

[View course details in MyPlan: BOST 511](#)

BIOST 512 Medical Biometry II (4)

Multiple regression, analysis of covariance, and an introduction to one-way and two-way analyses of variance: including assumptions, transformations, outlier detection, dummy variables, and variable selection procedures. Examples drawn from the biomedical literature with computer assignments using standard statistical computer packages. Prerequisite: either BOST 511 or BOST 517, or equivalent. Offered: W.

[View course details in MyPlan: BOST 512](#)

BIOST 513 Medical Biometry III (4)

Analysis of categorical data including two sample methods, sets of 2 x 2 tables, R x C tables, and logistic regression. Classification and discrimination techniques. Survival analysis including product limit estimates and the Cox proportional hazards model. Prerequisite: BOST 512 or permission of instructor. Offered: Sp.

[View course details in MyPlan: BOST 513](#)

BIOST 514 Biostatistics I (4)

Presentation of principles and methods of data description; graphics; point, confidence interval estimation; hypothesis testing; relative risk; odds ratio; Mantel-Haenszel; chi-square test. Examples drawn from biomedical literature; real-data sets analyzed using statistical computer packages. Prerequisite: biostatistics majors or permission of instructor. Offered: A.

[View course details in MyPlan: BOST 514](#)

BIOST 515 Biostatistics II (4)

Introduction to linear models; multiple regression, correlation; residual analysis; dummy variables; analysis of covariance; one-, two-way analysis of variance; randomized blocks; fixed, random effects (repeated measure, factorial designs); multiple comparisons. Real biomedical data sets analyzed. Prerequisite: BOST 514, biostatistics major, or permission of instructor. Offered: W.

[View course details in MyPlan: BOST 515](#)

BIOST 516 Statistical Methods in Genetic Epidemiology (3)

Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BOST 513 or BOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with EPI 535/PHG 519.

[View course details in MyPlan: BOST 516](#)

BIOST 517 Applied Biostatistics I (4)

Introduction to the analysis of biomedical data. Descriptive and inferential statistical analysis for discrete, continuous, and right-censored random variables. Analytic methods based on elementary parametric and non-parametric models for one sample; two sample (independent and paired), stratified sample, and simple regression problems. Offered: A.

[View course details in MyPlan: BOST 517](#)

BIOST 518 Applied Biostatistics II (4)

Multiple regression for continuous, discrete, and right-censored response variables, including dummy variables, transformations, and interactions. Introduction to regression with correlated outcome data. Model and case diagnostics. Computer assignments using real data and standard statistical computer packages. Prerequisite: BOST 517 or permission of instructor. Offered: W.

[View course details in MyPlan: BOST 518](#)

BIOST 519 Advanced Epidemiologic Methods I (3) *B. GUTHRIE, A. HAJAT*

First in a series of 2 courses. Increases knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 514; and either BIOST 513, or BIOST 518. Offered: jointly with EPI 515.

[View course details in MyPlan: BIOST 519](#)

BIOST 520 Advanced Epidemiologic Methods II (4) *B. GUTHRIE*

Second of a series of 2 courses whose objective is to deepen students' knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 515. Offered: jointly with EPI 516.

[View course details in MyPlan: BIOST 520](#)

BIOST 524 Design of Medical Studies (3)

Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for graduate students in biostatistics and for research-oriented graduate students in other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of BIOST 513, BIOST 518, STAT 421, STAT 423, STAT 512, or EPI 512; or permission of instructor. Offered: jointly with STAT 524; Sp.

[View course details in MyPlan: BIOST 524](#)

BIOST 527 Nonparametric Regression and Classification (3)

Covers techniques for smoothing and classification including spline models, kernel methods, generalized additive models, and the averaging of multiple models. Describes measures of predictive performance, along with methods for balancing bias and variance. Prerequisite: either STAT 502 and STAT 504 or BIOST 514 and BIOST 515. Instructors: Minin, Raftery, Richardson, Wakefield Offered: jointly with STAT 527; Sp.

[View course details in MyPlan: BIOST 527](#)

BIOST 529 Sample Survey Techniques (3)

Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent; or permission of instructor. Offered: jointly with CS&SS 529/STAT 529.

[View course details in MyPlan: BIOST 529](#)

BIOST 531 Statistical Methods for Analysis with Missing Data (3) *Chan*

Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM algorithm and Gibbs' sampler. Covers both ignorable and non-ignorable missing-data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with EPI 531.

[View course details in MyPlan: BIOST 531](#)

BIOST 532 Ethical Issues for Biostatisticians (2)

Exposes students to ethical issues in the conduct of biomedical research, particularly the computation, interpretation, and communication of statistics. Provides the knowledge and resources needed to practice statistics ethically in this domain. Helps students formulate justified responses to ethical challenges, and nurtures a sense of professional responsibility to take action. Credit/no-credit only.

[View course details in MyPlan: BIOST 532](#)

BIOST 533 Theory of Linear Models (3)

Examines model structure; least squares estimation; Gauss-Markov theorem; central limit theorems for linear regression; weighted and generalized least squares; fixed and random effects; analysis of variance; blocking and stratification; and applications in experimental design. Prerequisite: STAT 421 or STAT 423 or BIOST 515; and STAT 513; and a course in matrix algebra. Offered: jointly with STAT 533; Sp.

[View course details in MyPlan: BIOST 533](#)

BIOST 534 Statistical Computing (3)

Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 534; Sp.

[View course details in MyPlan: BOST 534](#)

BIOST 536 Categorical Data Analysis in Epidemiology (4)

Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity with available software programs gained by analysis of bona fide data and critiques of published analyses appearing in literature. Prerequisite: BOST 515; EPI 513 and either BOST 513 or BOST 518; or permission of instructor. Offered: jointly with EPI 536; A.

[View course details in MyPlan: BOST 536](#)

BIOST 537 Survival Data Analysis in Epidemiology (4)

Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic and health sciences studies. Familiarity with interpretation and available software computer programs gained by analysis of bona fide sets of data and critiques of published analyses appearing in the literature. Prerequisite: BOST 536 or EPI 536. Offered: jointly with EPI 537; W.

[View course details in MyPlan: BOST 537](#)

BIOST 540 Longitudinal and Multilevel Data Analysis (3)

Introduction to regression modeling of longitudinal and clustered data from epidemiology and health sciences. Interpretation and familiarity with software gained by analysis of data and critiques of published analyses. Prerequisite: either BOST 513, BOST 515, BOST 518, BOST 536, or permission of instructor. Offered: Sp.

[View course details in MyPlan: BOST 540](#)

BIOST 544 Introduction to Biomedical Data Science (4)

Provides an introduction to biomedical data science with an emphasis on statistical perspectives, inducing the process of collecting, organizing, and integrating information toward extracting knowledge from data in public health, biology, and medicine. Prerequisite: either BOST 511 or equivalent; either BOST 509 or equivalent; or permission of instructor.

[View course details in MyPlan: BOST 544](#)

BIOST 545 Biostatistical Methods for Big Omics Data (3)

This "hands-on" course introduces statistical methods for high-dimensional omics data, as well as the R programming language and the Bioconductor project as tools to extract, query, integrate, visualize, and analyze real world omics data sets. Prerequisite: BOST 512, 514, or 517. Offered: jointly with GENOME 545/PHG 545.

[View course details in MyPlan: BOST 545](#)

BIOST 546 Machine Learning for Biomedical and Public Health Big Data (3)

Provides an introduction to statistical learning for biomedical and public health data. Intended for graduate students in SPH/SOM. Prerequisite: BOST 511 or BOST 512 and familiarity with R. Offered: Sp.

[View course details in MyPlan: BOST 546](#)

BIOST 550 Statistical Genetics I: Mendelian Traits (3)

Mendelian genetic traits. Population genetics; Hardy-Weinberg, allelic variation, subdivision. Likelihood inference, information and power; latent variables and EM algorithm. Pedigree relationships and gene identity. Meiosis and recombination. Linkage detection. Multipoint linkage analysis. Prerequisite: STAT 390 and STAT 394, or permission of instructor. Offered: jointly with STAT 550; Sp.

[View course details in MyPlan: BOST 550](#)

BIOST 551 Statistical Genetics II: Quantitative Traits (3)

Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with STAT 551; A.

[View course details in MyPlan: BIOST 551](#)

BIOST 552 Statistical Genetics III: Design and Analysis (3)

Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENOME 371; or permission of instructor. Offered: jointly with STAT 552; W.

[View course details in MyPlan: BIOST 552](#)

BIOST 555 Statistical Methods for Spatial Epidemiology (3)

Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with EPI 555.

[View course details in MyPlan: BIOST 555](#)

BIOST 556 Introduction to Statistics and Probability (5)

Overview of probability; conditional probability and independence; Bayes Theorem; discrete and continuous random variables including jointly distributed; key distributions including the normal and its spin offs; properties of expectation and variance; conditional expectation; covariance and correlation; Central Limit Theorem; law of large numbers; Parameter Estimation. Offered: jointly with DATA 556/STAT 556; A.

[View course details in MyPlan: BIOST 556](#)

BIOST 557 Applied Statistics and Experimental Design (5)

Inferential statistical methods for discrete and continuous random variables including tests for difference in means and proportions; linear and logistic regression; causation versus correlation; confounding; resampling methods; study design. Prerequisite: STAT/BIOST/DATA 556 or instructor's permission. Offered: jointly with DATA 557/STAT 557; W.

[View course details in MyPlan: BIOST 557](#)

BIOST 558 Statistical Machine Learning for Data Scientists (5)

Bias-variance trade-off; training versus test error; overfitting; cross-validation; subset selection methods; regularized approaches for linear/logistic regression: ridge and lasso; non-parametric regression: trees, bagging, random forests; local regression and splines; generalized additive models; support vector machines; k-means and hierarchical clustering; principal components analysis. Prerequisite: STAT/BIOST/DATA 557, or permission of instructor. Offered: jointly with DATA 558/STAT 558; Sp.

[View course details in MyPlan: BIOST 558](#)

BIOST 561 Computational Skills for Biostatistics I (1)

Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: biostatistics and statistics graduate student. Credit/no-credit only. Offered: A.

[View course details in MyPlan: BIOST 561](#)

BIOST 562 Computational Skills for Biostatistics II (1)

Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in statistical analysis. Prerequisite: either BIOST 561 or permission of instructor. Credit/no-credit only. Offered: W.

[View course details in MyPlan: BIOST 562](#)

BIOST 563 Computing and Research (2)

Provides an introduction to statistical computing with R. Emphasizes good programming techniques useful in

statistical analysis. Prerequisite: either BIOST 562 or permission of instructor. Credit/no-credit only. Offered: S. ²⁴³¹
[View course details in MyPlan: BIOST 563](#)

BIOST 565 Statistical Evaluation of Biomarkers (3)

Covers evaluation of biomarkers for diagnosis; decision-theoretic assessment tools; measures of the incremental value of a new biomarker; evaluation of risk prediction models; evaluation of biomarkers for prognosis or for guiding therapy; statistical learning for developing a diagnostic/prognostic score; and clinical trial designs for biomarker guided decisions. Prerequisite: BIOST 515; either BIOST 518 or both BIOST 512 and BIOST 513; or equivalent.

[View course details in MyPlan: BIOST 565](#)

BIOST 570 Advanced Regression Methods for Independent Data (3)

Covers linear models, generalized linear and non-linear regression, and models. Includes interpretation of parameters, including collapsibility and non-collapsibility, estimating equations; likelihood; sandwich estimations; the bootstrap; Bayesian inference: prior specification, hypothesis testing, and computation; comparison of approaches; and diagnostics. Prerequisite: STAT 512 and STAT 513; BIOST/STAT 533 or STAT 421/STAT 502 and STAT 423/STAT 504; a course in matrix algebra. Offered: jointly with STAT 570; A.

[View course details in MyPlan: BIOST 570](#)

BIOST 571 Advanced Regression Methods for Dependent Data (3)

Covers longitudinal data models, generalized linear and non-linear mixed models; marginal versus conditional models; generalized estimating equations, likelihood-based inference, REML, BLUP, and computation of integrals; Bayesian inference: Markov chain Monte Carlo; covariance models, including models for split plot designs; comparison of approaches; and diagnostics. Prerequisite: BIOST570/STAT 570. Offered: jointly with STAT 571; W.

[View course details in MyPlan: BIOST 571](#)

BIOST 572 Advanced Regression Methods: Project (3)

Student presentations and discussion on selected methodological research articles focusing on regression modeling. Prerequisite: STAT 571. Offered: jointly with STAT 572; Sp.

[View course details in MyPlan: BIOST 572](#)

BIOST 576 Statistical Methods for Survival Data (3)

Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either BIOST 515, STAT 473, or equivalent. Offered: jointly with STAT 576.

[View course details in MyPlan: BIOST 576](#)

BIOST 578 Special Topics in Advanced Biostatistics (*, max. 30)

Advanced-level topics in biostatistics offered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with STAT 578; AWSpS.

[View course details in MyPlan: BIOST 578](#)

BIOST 579 Data Analysis and Reporting (2, max. 8)

Analysis of real data to answer scientific questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics or permission of instructor. Offered: jointly with STAT 579; AWSp.

[View course details in MyPlan: BIOST 579](#)

BIOST 580 Seminar in Biostatistics (*, max. 30)

Presentation and discussion of special topics and research results in biostatistics. Speakers include resident faculty, visiting scientists, and advanced graduate students. Offered: AWSp.

[View course details in MyPlan: BIOST 580](#)

BIOST 581 Statistical Genetics Seminar (1, max. 30)

Presentations and discussion of special topics and research results in statistical genetics. Students, posdocs, and faculty present their work and papers from the literature. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: BIOD 581](#)

BIOST 582 Student Seminar (1, max. 30)

Student seminar series for collaboration, exchange of ideas, and exposure to different stages of performing independent research. Encourages both students and faculty to give presentations including RA work, extended class projects, master's theses, dissertation progress, data analysis, practice talks, and journal articles. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: BIOD 582](#)

BIOST 590 Biostatistical Consulting (3, max. 6)

Training in consulting on the biostatistical aspect of research problems arising in the biomedical field. Students, under the supervision of a faculty member, participate in discussions with investigators leading to the design and/or the analysis of a quantitative investigation of a problem. With experience, independent associations of student and research worker are encouraged, with subsequent review by faculty of resulting design and analysis. Prerequisite: permission of instructor. Offered: AWSpS.

[View course details in MyPlan: BIOD 590](#)

BIOST 595 Biostatistics Master's Practicum (1-12, max. 12)

Supervised practice experience providing students an opportunity to learn how biostatistics is applied in a public health setting and in the formation of public health policy. Prerequisite: BIOD 514; BIOD 515; BIOD 536; BIOD 537.

[View course details in MyPlan: BIOD 595](#)

BIOST 598 Techniques of Statistical Consulting (1)

Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with STAT 598; ASp.

[View course details in MyPlan: BIOD 598](#)

BIOST 600 Independent Study or Research (*-)

Offered: AWSpS.

[View course details in MyPlan: BIOD 600](#)

BIOST 700 Master's Thesis (*-)

Offered: AWSpS.

[View course details in MyPlan: BIOD 700](#)

BIOST 800 Doctoral Dissertation (*-)

Offered: AWSpS.

Environmental and Occupational Health Sciences

[Display as tabs](#)

Department Overview

F461 Health Sciences

Environmental health focuses on identifying, evaluating, and controlling environmental conditions that may have an adverse impact on human health. Examples of problem areas requiring environmental health expertise are assuring adequate quality and quantity of food and drinking water, safe treatment and disposal of domestic and industrial waste materials, limiting or reducing air and noise pollution, limiting occupational exposure to hazardous substances and unsafe conditions, assuring safe and healthful housing, controlling the spread of insect- and rodent-borne illness, proper selection and use of pesticides, and understanding the effects of global changes in climate and the atmosphere on human health.

Undergraduate Program

Adviser

F461D Health Sciences, Box 357234
(206) 543-4207
ehug@uw.edu

The Department of Environmental and Occupational Health Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in environmental health
- A minor in environmental health

Bachelor of Science

Suggested First- and Second-Year College Courses: chemistry, organic chemistry, biology, calculus, statistics, English composition

Department Admission Requirements

1. Admission to the major is competitive. Applicants must complete prerequisite coursework and an application to be considered. Completing the prerequisites and submitting an application do not guarantee admission. Applicants are admitted in two groups: Early Admission and Upper-Division Admission.

[Course Descriptions](#)

2. Applications are due the third Friday of autumn, winter, spring, and summer quarters. Applications can be downloaded from the Environmental Health undergraduate program website at deohs.washington.edu/undergraduate.
3. Prospective students should apply during the quarter they plan to complete prerequisites for entry the following quarter. Ideally, students enter the major by or before the beginning of their junior year.
4. Applications are evaluated on overall grades; performance in math, science, and composition courses; demonstrated writing ability; and understanding of and potential fit with the major.
5. Applicants are strongly encouraged to meet with the program manager before submitting an application.
6. Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Consult UW Equivalency Guide or UW adviser to verify transferability of coursework.

Early Admission

Applicants must complete the following, with a minimum 2.0 grade in each course, to be considered for early admission:

1. Minimum cumulative 3.00 GPA
2. Minimum 30 college credits
3. 5 credits English composition
4. CHEM 142, CHEM 152, CHEM 162
5. Either MATH 124 or MATH 144 or Q SCI 291 (MATH 112 does not satisfy this requirement)

Upper-Division Admission

Applicants must complete the following, with a minimum grade of 2.0 in each course, to be considered for admission:

1. Minimum cumulative 2.50 GPA
2. 5 credits English composition
3. BIOL 180, BIOL 200, BIOL 220
4. CHEM 142, CHEM 152, CHEM 162; and CHEM 237, CHEM 238, CHEM 239 or CHEM 223, CHEM 224
5. Either MATH 124, MATH 144, or Q SCI 291 (MATH 112 does not satisfy this requirement)

Degree Requirements

180 credits, as follows:

General Education Requirements

See School of Public Health requirements

Major Requirements

126-131 credits, as follows:

1. *Environmental Health Supporting Science (57-61 credits):*
 - a. Either MATH 124, MATH 144, or Q SCI 291 (5 credits)
 - b. Either BIOST 310 (recommended), STAT 220, STAT 311, or Q SCI 381 (4-5 credits)
 - c. BIOL 180, BIOL 200, BIOL 220 (15 credits)
 - d. CHEM 142, CHEM 152, CHEM 162 (15 credits)
 - e. Either CHEM 237, CHEM 238, CHEM 239, or CHEM 223, CHEM 224 (8-11 credits)
 - f. PHYS 114/PHYS 117, PHYS 115/PHYS 118 (10 credits)
2. *Environmental Health Core (minimum 36 credits):* ENV H 311, ENV H 320, ENV H 405, ENV H 431, ENV H 432, ENV H 433, ENV H 472, ENV H 482 (2 credits minimum), EPI 320, MICROM 301, MICROM 302
3. *Environmental Health Selectives (12-13 credits):* Minimum four courses chosen from ENV H 310, ENV H 406, ENV H 417, ENV H 439, ENV H 440, ENV H 441, ENV H 442, ENV H 443, ENV H 444, ENV H 445, ENV H 446, ENV H 447, ENV H 448, ENV H 451, ENV H 452, ENV H 453, ENV H 460, and ENV H 462
4. 21 additional credits of approved electives. See adviser for approved list.
5. Minimum 2.0 grade in each course required for the major

Minor

Minor Requirements: 27 credits as follows:

1. *Core (3 credits):* either ENV H 111 or ENV H 311.
2. *Approved Selectives (9 credits):* three courses chosen from ENV H 431, ENV H 440, ENV H 445, ENV H 448, ENV H 451, ENV H 453, ENV H 472
3. Minimum 15 credits of approved ENV H electives
4. Minimum 14 credits in upper-division courses

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* In the Bachelor of Science program in environmental health, students learn to utilize tools of scientific inquiry to identify, prevent, and control environmental factors that can damage human health. As part of their training, students are introduced to basic principles of risk assessment, microbiology, epidemiology, sampling, and toxicology, and can choose to focus in one of three interest areas: biomedical sciences, health and environmental science, and environmental public health practice.
- *Instructional and Research Facilities:* The department houses thirteen centers and institutes and twenty labs.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.

- *Research, Internships, and Service Learning:* The department operates an internship program in cooperation with government agencies and private employers throughout the state. Each student intern works under the supervision of an experienced employee, with guidance from a faculty member. Internship placements are available throughout the year for variable amounts of academic credit.
- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* UW Student Environmental Health Association

Graduate Program

Graduate Program Coordinator
F461 Health Sciences, Box 357234
(206) 543-3199

The Department of Environmental and Occupational Health Sciences offers three graduate degrees: Master of Science, Master of Public Health, and Doctor of Philosophy. The areas of emphasis are environmental and occupational hygiene (PhD), industrial hygiene and safety occupational and environmental exposure sciences (MS), environmental toxicology (PhD/MS), environmental health (MS), and occupational and environmental medicine or environmental and occupational health (MPH).

The PhD in environmental and occupational hygiene option focuses on the assessment of exposures, health effects, and control strategies in community and work environments. The program emphasizes expertise in exposure assessment to evaluate human health risks from chemical, physical, and biological agents. Research opportunities include: laboratory and field investigations of environmental exposures and health outcomes; air, soil and water pollution monitoring; ambient, indoor, and personal exposure modeling; evaluation of biomechanical stress factors and organization of the work environment; development of new instruments, biomarkers, and novel methods for assessing human exposures; and evaluation of effective control strategies for the prevention or reduction of illness and injury.

The MPH in environmental and occupational health provides an opportunity for students to focus on the recognition, assessment, and control of environmental and occupational hazards, the impact of these hazards on health and society, and approaches to regulations, enforcement, and policy development. It emphasizes development of skills essential to science-based public health practice. In addition to coursework, students complete a field practicum and research in any of the department's research facilities or in a field setting.

The MPH in occupational and environmental medicine is for individuals with an earned doctorate. The goal of the program is to provide training in the public health sciences with a focus on occupational and environmental health. The program provides didactic instruction and participation in field studies. Research efforts focus on understanding, preventing, and managing environmental and occupational disease, injury, and disability. Physicians also have the option of applying for a concurrent fellowship or residency in occupational and environmental medicine.

The concurrent MPH/MPA or MS/MPA degree programs with the Daniel J. Evans School of Public Affairs seek to educate students who bring substantive public health knowledge and a strong policy and management orientation to their professional careers. With several courses that satisfy degree requirements in both programs, students are able to earn the two

degrees in a shorter period of time than if the degrees were taken separately. Applicants must apply to both programs.

Admission Requirements for All Degrees

Prerequisites for admission to the MS occupational and environmental exposure sciences, environmental toxicology, and environmental health programs and the MPH environmental and occupational health program include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors are considered if the prerequisite courses have been completed. Competitive applicants typically have strong grades and Graduate Record Examination scores, a statement of personal goals consistent with the program, and supportive letters of reference.

Prerequisites for admission to the MPH occupational and environmental medicine program include a doctoral degree (MD, DO or equivalent) with prior coursework in physics, chemistry, calculus, and biology. Concurrent UW residency applicants must satisfy additional prerequisites including graduation from a Class A medical school (United States, Canada, or equivalent) and completion of one year of approved internship. Three years in primary care specialty is also encouraged.

Prerequisites for admission to the PhD environmental and occupational hygiene and environmental toxicology programs include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. A master's degree in a related field is recommended for Ph.D. environmental and occupational hygiene applicants. Selection of an applicant is also based upon an honors-level GPA, a statement of personal goals consistent with the program, supportive letters of reference, and high scores on the Graduate Record Examination.

International applicants are also required to submit official scores for the Test of English as a Foreign Language (TOEFL). TOEFL scores of 580 (237 computer) or higher are required for admission to the MS, MPH, and PhD programs.

Master of Public Health, Environmental and Occupational Health

Focuses on the recognition, assessment, and control of environmental and occupational hazards; the impact of these hazards on public health and society; and approaches to regulations, enforcement, and policy development. Nurses with a BN can opt for a special emphasis MPH track to train in the delivery of health and safety services to worker populations and communities.

Degree Requirements

63 credits, as follows:

1. *Core Requirements*: EPI 511 (or EPI 512, EPI 513), BOST 511 (or BOST 517). MPH/MPA students are also required to take BOST 512 (or BOST 518), HSERV 510, and HSERV 511.
2. *Required Courses*: ENV H 505 (or ENV H 514, ENV H 515, and ENV H 516), ENV H 453 (or ENV H 553 or ENV H 551), ENV H 570, ENV H 577 (or ENV H 572 or ENV H 543), ENV H 446 (or ENV H 490, or ENV H 541, or ENV H 545, or ENV H 552, or ENV H 548). Courses in environmental health not chosen can be taken as electives to satisfy course requirements. Students have a choice of either completing a thesis (ENV H 700) or a project (ENV H 598B).

3. *Electives (varies by track)*

- a. *Thesis Track*: At least two additional 400- or 500-level departmental courses (minimum 6 credits) required to fulfill elective requirements.
- b. *Project Track*: Students who take 6-8 credits of ENV H 598A must take 3 additional 400-500 classes. Students who take 9 or more ENV H 598A credits must take two additional 400-500 level elective credits.

4. *Practicum*: ENV H 599 (at least 120 hours)

Master of Public Health, Occupational and Environmental Medicine

Gives physicians a better understanding of the clinical and scientific principles in environmental and occupational health. Training focuses on epidemiology, occupational and environmental hygiene, biostatistics, health services, and environmental toxicology. A concurrent residency/fellowship program is available.

Degree Requirements

64 credits

Master of Science, Environmental Health

Students learn to identify sources of contamination in air, water, food, and soil, and on surfaces; how contamination is spread; strategies to prevent or control effects on human health or environmental quality; and the means of communicating risk information to the public and health professionals.

Degree Requirements

64 credits, as follows:

1. *Core Courses*: ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517 or higher), EPI 511
2. *Required Courses*: ENV H 505, ENV H 453, ENV H 541, ENV H 543 (or ENV H 577), ENV H 552, ENV H 594, ENV H 445 (or ENV H 446), ENV H 548, ENV H 545
3. *Representative Electives*: 9 graded elective credits, approved by the student's academic adviser.

Master of Science, Occupational and Environmental Exposure Sciences

Students learn to quantify and manage human exposures to chemicals, air pollutants, aerosols, and physical agents found in a wide variety of community and occupational settings. The program emphasizes rigorous academic training, internships, career guidance, and practical skills needed for graduates to establish long-term careers as environmental health and safety professionals. A flexible curriculum offers options for either a thesis or professional portfolio alternative.

Degree Requirements

63 credits, as follows:

1. *Core Courses*: ENV H 580, ENV H 581, ENV H 583, ENV H 700 (or appropriate section of ENV H 598, and ENV H 559, and appropriate section of ENV H 599) BIOST 512 (or BIOST 518, or higher), EPI 511. Higher level biostatistics and epidemiology courses can be substituted for BIOST 511 or BIOST 517, and for EPI 511. Students completing a project are required to take only BIOST 511 and are not required to take ENV H 583, but are required to complete an internship (ENV H 599).
2. *Required Courses*: ENV H 551, ENV H 553, ENV H 557
3. *Learning Emphasis Required Courses*:
 - *Occupational Hygiene*: ENV H 505, ENV H 555, ENV H 557, ENV H 560, ENV H 570
 - *Ergonomics and Human Factors*: ENV H 537, ENV H 549, ENV H 560, ENV H 566, ENV H 596
 - *Health and Safety Management and Policy*: ENV H 560, ENV H 577, ENV H 584, ENV H 599
 - *Exposure Biomarkers*: ENV H 505, ENV H 506, ENV H 554, ENV H 570, P BIO 506
4. *Electives*: Electives must be taken to satisfy the degree requirement of 63 total credits.

Master of Science, Environmental Toxicology

Focuses on understanding the mechanisms of action of environmental chemicals and their effects on human health and in the environment. Research areas include chemical effects on organ systems (neurological, hepatic, renal, cardiovascular, reproductive, and respiratory) and also developmental toxicology, environmental carcinogenesis, and dietary chemoprotection. The program also offers a strong focus on human risk assessment as well as in toxicological issues that cross ecological and human health disciplines.

Degree Requirements

63 credits, as follows:

1. *Core Courses*: ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511.
2. *Required Courses*: ENV H 514, ENV H 515, ENV H 516, ENV H 552, ENV H 577; BIOC 405, BIOC 406 (or BIOC 440, BIOC 441, BIOC 442); ENV H course in industrial hygiene or occupational medicine.
3. *Representative Electives*: Toxicology students who take the two-quarter biochemistry series (BIOC 405, BIOC 406) must have an additional 9 graded elective credits. Students who choose the three-quarter biochemistry series (BIOC 440, BIOC 441, BIOC 442) must have an additional 3 graded elective credits. Electives must be approved by the student's academic adviser. Electives may include ENV H 511, ENV H 512, ENV H 531, ENV H 532, ENV H 533, ENV H 550, ENV H 553, ENV H 555, ENV H 567, ENV H 570, ENV H 584, ENV H 591, BIOL 411, BIOST 521, C MED 407, C MED 590, MICROM 441, MICROM 442, MICROM 518, PATH 444, PATH 544, PATH 555, P BIO 500-level courses, P BIO 505, P BIO 506, P BIO 507, PHCOL 401, PHCOL 402.

Doctor of Philosophy, Environmental and Occupational Hygiene

Students in this program learn to identify, evaluate, and manage health risks found in a wide variety of community and occupational settings, obtaining advanced research training in exposure assessment and control methods.

Degree Requirements

92 credits minimum, as follows:

1. *Core Sciences (11-12 credits)*: Sequence of three courses in one area, to be approved by adviser. Typical core choices are biochemistry, chemistry, engineering, applied mathematics, epidemiology, microbiology, or physiology.
2. *Biostatistics (3 credits)*: BIOST 512 (or BIOST 518 or higher)
3. *Epidemiology (4 credits)*: EPI 511 (or higher)
4. *Environmental and Occupational Health Seminar (6 credits)*: ENV H 580
5. *Dissertation (27 credits)*: ENV H 800
6. *Laboratory Rotations (6-9 credits)*: ENV H 595
7. *Required courses*:
 - a. *Industrial Hygiene (6 credits)*: ENV H 553 and ENV H 555
 - b. *Toxicology (3 credits)*: ENV H 405 (or more advanced)
 - c. *Environmental Chemistry (3 credits)*: ENV H 552
 - d. *Occupational and Environmental Epidemiology (3 credits)*: ENV H 570
 - e. *Electives (20 credits)*: 10 elective credits are unspecified and 10 must be in courses taught by occupational and exposure sciences or environmental health program faculty.

Doctor of Philosophy, Environmental Toxicology

Focuses on understanding the mechanisms of the action of environmental chemicals and their effects on human health and in the environment. Research areas include chemical effects on organ systems (neurological, hepatic, renal, cardiovascular, reproductive, and respiratory) as well as developmental toxicology, environmental carcinogenesis, and dietary chemoprotection. The program also offers a strong focus on human risk assessment and toxicological issues that cross ecological and human health disciplines.

Degree Requirements

104 credits minimum, as follows:

1. *Core Sciences (11-12 credits)*: Sequence of three courses in biochemistry.
2. *Biostatistics (3 credits)*: BIOST 512 (or BIOST 518 or higher)
3. *Epidemiology (4 credits)*: EPI 511 (or higher)
4. *Environmental and Occupational Health Seminar (6 credits)*: ENV H 580
5. *Dissertation (27 credits)*: ENV H 800
6. *Laboratory Rotations (6-9 credits)*: ENV H 595
7. *Required courses*:
 - a. *Toxicology (9 credits)*: ENV H 514, ENV H 515, ENV H 516

- b. *Toxicology Seminar (9 credits)*: Of the 9 credits (minimum) of current topics courses, at least six credits must be in ENV H 591. The other credits can be chosen among other current topics courses offered by the Department of Environmental Health or other departments, with approval of student's advisory committee.
 - c. *Advanced Toxicology*: 6 credits from approved list
 - d. *Physiology*: 3 credits from approved list
8. *Electives (20 credits)*: Of the four (minimum) required electives, two must be departmental courses and two may be taken outside the department. The two departmental courses must be from two different non-toxicology programs. All elective credits must be approved by the student's advisory committee.

Financial Aid

Support is available for many students in the form of traineeships or research assistantships, which include tuition. This support comes from federal and private sources awarded to the department or School.

Research Facilities

Specialized laboratories exist for research in industrial hygiene chemistry, optical remote sensing of chemicals, industrial ventilation, ergonomics, trace organics and heavy metals, environmental microbiology, electron microscopy, controlled exposure to environmental agents, and toxicology (including toxicogenomics and analytical cytology). Field research is facilitated through an extensive consultation-service program conducted by this department for labor and industry in Washington State.

ENVIRONMENTAL & OCCUPATIONAL HEALTH SCI

ENVIRONMENTAL HEALTH

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ENV H 105 Toxic Tales: Building Skills for Academic Success through the Study of Poisons (2) T. MAR

Designed to help first-year undergraduate students develop the study skills necessary for success through an exploration of the environmental health sciences and toxicology. Through a series of lectures, readings, case studies, group discussions, and student presentations, students are introduced to, master, and demonstrate a variety of learning strategies. Offered: Sp.

[View course details in MyPlan: ENV H 105](#)

ENV H 111 Exploring Environment and Health Connections (3) I&S T. BURBACHER

Introduction to environmental health concepts. Examines current events to illustrate and better appreciate the relationship between environment and health and to explore whether an environmental condition is or is not an important threat to health. Emphasizes the roles of environmental scientists and related professionals. Offered: AW.

[View course details in MyPlan: ENV H 111](#)

ENV H 205 Environmental Health in Media (3) I&S

Explores how the perspective of filmmakers and documentaries can influence the public's interpretation of environmental health issues, and examines the science and cultural norms that support both sides of the argument. Offered: Sp.

[View course details in MyPlan: ENV H 205](#)

ENV H 220 Global Environmental Change and Public Health (3) I&S K. EBI, J. HESS

Humans are the primary drivers of global environmental changes that are changing the planet on the scale of geological forces. Students will be introduced to these changes and their consequences for human health and well-being, with a focus on climate change and its consequences. Offered: jointly with G H 220.

[View course details in MyPlan: ENV H 220](#)

ENV H 305 Environmental Poisons and Public Health (3) I&S/NW

Introduces concepts and tools that help students think critically about how environmental toxicants can impact

human health. Covers basic principles and core concepts from toxicology, epidemiology, exposure assessment²⁴⁴³, risk assessment and risk management through a case-based approach that focuses on a selection of representative toxicants of current public health relevance. Offered: A.

[View course details in MyPlan: ENV H 305](#)

ENV H 310 Green Chemicals, Green Products, Green Processes: Crafting a Less Toxic World (3)
I&S/NW D. KALMAN

Presents green chemistry in the context of social impact and public health. Focuses on the relationship between the science and application of chemistry, and the conditions of life that affect everyone's health, particularly in the developed world. Prerequisite: CHEM 142 or CHEM 120; recommended: either CHEM 220 or CHEM 237; either one ENV H or SPH course.

[View course details in MyPlan: ENV H 310](#)

ENV H 311 Introduction to Environmental Health (3) I&S/NW

Relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Offered: ASp.

[View course details in MyPlan: ENV H 311](#)

ENV H 320 Introduction to Technical Communication in Environmental Health (5)

Written and oral communication for environmental health professionals. Principles of effective writing for technical articles, proposals, and reports with attention to structure, clarity, style, and language usage. Students learn to translate complex technical information for broader audiences. Offered: W.

[View course details in MyPlan: ENV H 320](#)

ENV H 405 Toxic Chemicals and Human Health ([0-3]-, max. 3)

Examines the basic principles of toxicology and the effects of chemicals on human health. Includes mechanisms; dose/response relationships; toxicity testing, disposition in the body; modifiers of response; chemicals and cancer; birth defects; exposures in the home, workplace, and environment; and risk assessment and government regulation. Prerequisite: minimum grade of 2.0 in BIOL 220; either 2.0 in CHEM 224, 2.0 in CHEM 239, or 2.0 in CHEM 337. Offered: Sp.

[View course details in MyPlan: ENV H 405](#)

ENV H 406 Disasters and Public Health (3) I&S/NW

Introduces students to the public health and environmental health consequences of common domestic disasters, and the role of public health agencies and practitioners. Students will describe and evaluate the public health community's role in preparing for and responding to disasters through case studies, discussions, debates, course lectures and readings. Offered: A.

[View course details in MyPlan: ENV H 406](#)

ENV H 417 Case Studies in Children's Environmental Health Disparities (3) DIV

Introduces students to the ways in which children are disproportionately affected by environmental health hazards. Through a series of engaging case studies, student learn the core scientific concepts of children's environmental health while exploring the social, cultural, regulatory, political, and economic factors that lead to children's health disparities. Offered: Sp.

[View course details in MyPlan: ENV H 417](#)

ENV H 418 Understanding and Managing the Health Risks of Climate Change (3) K. EBI, J. HESS

The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with G H 418.

[View course details in MyPlan: ENV H 418](#)

ENV H 431 Environmental and Occupational Sampling and Analysis I (3) NW

Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: CHEM 162 ; PHYS 114 ; and ENV H 311, may be taken concurrently. Offered: A.

[View course details in MyPlan: ENV H 431](#)

ENV H 432 Environmental and Occupational Sampling and Analysis II (4) NW

Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: ENV H 431. Offered: W.

[View course details in MyPlan: ENV H 432](#)

ENV H 433 Environmental and Occupational Sampling and Analysis III (4) NW

Laboratory and lecture related to the evaluation of water quality. The identification and analysis of microorganisms in water, food, and air. Prerequisite: MICROM 301; MICROM 302. Offered: Sp.

[View course details in MyPlan: ENV H 433](#)

ENV H 439 One Health: Human and Animal Health in a Changing Environment (3) I&S/NW P. RABINOWITZ

Case based exploration of the One Health concept, connecting human, animal, and environmental health. Topics include emerging zoonotic infectious diseases transmitted between humans and animals, animals as sentinels of environmental hazards, the human-animal bond, and the comparison of spontaneous diseases between human and animals. Includes two optional field trips. Prerequisite: BIOL 180. Offered: Sp.

[View course details in MyPlan: ENV H 439](#)

ENV H 440 Water, Wastewater, and Health (3)

Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

[View course details in MyPlan: ENV H 440](#)

ENV H 441 Food Protection (3)

Study of identification and characteristics of chemicals and biological agents implicated in foodborne disease outbreaks and conditions or circumstances by which food contamination occurs. Examination of food protection activities conducted by local and state government at the retail level. Prerequisite: either CHEM 120, CHEM 142, MICROM 301, or MICROM 410. Offered: W.

[View course details in MyPlan: ENV H 441](#)

ENV H 442 Zoonotic Diseases and Their Control (3)

Examines the transmission and control of zoonotic and vector-borne diseases of public health importance in the United States and globally. Pays attention to identification, surveillance, and control methods. Prerequisite: minimum grade of 2.0 in BIOL 220. Offered: W.

[View course details in MyPlan: ENV H 442](#)

ENV H 443 Housing and Health (3) I&S/NW C. TRESER

Explores healthy and safe homes as a crucial element in public health. Review of federal, state and local approaches to housing-related programs under the banner of healthy homes. Students completing this course will understand the relationship between housing and human health and well-being. Offered: A.

[View course details in MyPlan: ENV H 443](#)

ENV H 444 Antibiotic Resistant Bacteria/Genes Impact on the Environment and Public Health (4) M. ROBERTS

Explores how the global use and abuse of antibiotics has profound consequences on the health of humans, animals, and the environment. Addresses issues of antibiotic resistant bacteria and genes through an interdisciplinary "One Health" approach that integrates human, animal, and environmental health. Prerequisite:

either EPI 320, BIOL 220, or MICROM 301. Offered: A.

[View course details in MyPlan: ENV H 444](#)

ENV H 445 Solid Waste Management (3)

Examination of the public health, environmental, economic, and materials conservation aspects of solid wastes management; amounts and sources of solid wastes, waste reduction and recycling, methods of storage, transportation and disposal, integrated waste management, identification of present problems and future needs.

Offered: Sp.

[View course details in MyPlan: ENV H 445](#)

ENV H 446 Hazardous Waste and Public Health (3)

Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Prerequisite: CHEM 152 or CHEM 220; and MATH 124 or Q SCI 291. Offered: W.

[View course details in MyPlan: ENV H 446](#)

ENV H 447 Environmental Change and Infectious Disease (3) *G. CANGELOSI*

Uses multidisciplinary approach to address the impacts of environmental change (including climate change) on infectious disease. Concepts include categories of environmental change; infectious disease emergence/re-emergence; environmental aspects of infectious disease exposure, acquisition, and progression; pathogen growth/survival in the environment; historical and societal perspectives; surveillance; and strategies for control.

Offered: Sp.

[View course details in MyPlan: ENV H 447](#)

ENV H 448 Community Air Pollution (3)

Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Offered: Sp.

[View course details in MyPlan: ENV H 448](#)

ENV H 451 Ecology of Environmentally Transmitted Microbiological Hazards (3)

Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

[View course details in MyPlan: ENV H 451](#)

ENV H 452 Detection and Control of Environmentally Transmitted Microbiological Hazards (3)

Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and detection for infectious microorganisms.

Provides coverage of engineered controls and disinfection/decontamination processes for infectious microorganisms. Offered: W.

[View course details in MyPlan: ENV H 452](#)

ENV H 453 Industrial Hygiene (3)

Introduction to the principles and scientific foundation of industrial hygiene. Examines the anticipation, recognition, evaluation, and control of work place hazards to health and safety. Focuses on the first three functions, but includes some consideration of control methods. Prerequisite: BIOL 200; CHEM 224; either PHYS 115 or PHYS 122. Offered: A.

[View course details in MyPlan: ENV H 453](#)

ENV H 460 Occupational Safety Management (3)

Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates issues related to industrial safety and health such as responsibility for safety,

dependency on safe practice, and hierarchy of prevention. Offered: Sp.

[View course details in MyPlan: ENV H 460](#)

ENV H 461 Air-Pollution Control (4)

Fundamental concepts of air pollution Control including emission sources, atmospheric dispersion, ambient concentrations, and emission standards, with emphasis on processes and equipment for controlling emissions.

Offered: jointly with CEE 490; ASp.

[View course details in MyPlan: ENV H 461](#)

ENV H 462 Technical Aspects of Occupational Safety (3)

Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, students receive an OSHA 510 30-hour Construction Safety and Health certification. Offered: W.

[View course details in MyPlan: ENV H 462](#)

ENV H 472 Environmental Risk and Society (3) I&S

Examines scientific determinations of environmental risks and explores how such determinations are evaluated by affected communities and society. Employs risk analysis to integrate technical knowledge in hazard identification and exposure assessment to provide a more rational basis for environmental policies. Role of public participation in risk-based decision making discussed. Offered: A.

[View course details in MyPlan: ENV H 472](#)

ENV H 473 Environmental Health Policy and Practice (3) I&S

Explores how environmental health problems are controlled in the United States. Examines both the policies and practices of environmental health. Looks at how various government programs are established, organized, and operated to prevent or control hazards in the community. Also examines the legal and regulatory framework. Offered: Sp.

[View course details in MyPlan: ENV H 473](#)

ENV H 480 Undergraduate Seminar (1, max. 6)

Covers career exploration and planning within the environmental health major through presentation of current environmental and occupational health issues. Offered: A.

[View course details in MyPlan: ENV H 480](#)

ENV H 482 Environmental Health Internship (2-15, max. 15)

Assignment to an environmental health or environmental protection agency for supervised observation and experience in environmental health technology, program planning, and utilization of community resources.

Prerequisite: minimum grade of 2.5 in ENV H 311. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ENV H 482](#)

ENV H 490 Selected Topics in Environmental Health (1-6, max. 20)

In-depth study of a current environmental health topic. Offered: Sp.

[View course details in MyPlan: ENV H 490](#)

ENV H 497 Environmental Health Special Electives (*, max. 35)

Offered: Sp.

[View course details in MyPlan: ENV H 497](#)

ENV H 499 Undergraduate Research (*, max. 35)

Individual research on a specific topic in environmental health upon which specific conclusions, judgments, or evaluation can be made or upon which facts can be presented. Offered: AWSpS.

[View course details in MyPlan: ENV H 499](#)

ENV H 501 Foundations of Environmental Health (4) *W. DANIELL*

Provides an overview of environmental and occupational health, examining representative hazards and environmental media, with local and global examples. Students apply systems thinking and contextual evaluation to evaluate social context, population vulnerability, and cumulative implications for health. Students also explore evidence-based opportunities and barriers to achieve health-favorable change, sustainability, and equity. Offered: A.

[View course details in MyPlan: ENV H 501](#)

ENV H 505 Fundamentals of Environmental and Occupational Toxicology (4)

Basic principles governing the behavior and effects of toxic chemicals on biological systems. Focuses on human health impacts of chemicals in the context of public health. Designed for non-toxicology majors. Prerequisite: 2 quarters of biology; 2 quarters of chemistry, or permission of instructor. Offered: Sp.

[View course details in MyPlan: ENV H 505](#)

ENV H 506 Disasters and Public Health (3) *I&S/NW*

Introduces students to the public health and environmental health consequences of common domestic disasters, and the role of public health agencies and practitioners. Students will describe and evaluate the public health community's role in preparing for and responding to disasters through case studies, discussions, debates, course lectures and readings. Offered: A.

[View course details in MyPlan: ENV H 506](#)

ENV H 510 Global Environmental and Occupational Health (4)

Provides an overview of environmental and occupational health, with major focus on developing countries. Examines a variety of environmental hazards and influential factors, interactions with human health and well-being, and relevance to public health. Considers workplace, community, home, regional, and global problems. Offered: W.

[View course details in MyPlan: ENV H 510](#)

ENV H 511 Environmental and Occupational Health (4-) *J. HESS*

Provides a graduate-level overview of the multidisciplinary field of environmental and occupational health. Environmental, occupational, and nutritional problems in different settings (e. g. the workplace, community, and home) and at varying scaled (local, regional, and global) are considered, with special emphasis on considerations related to food systems and nutrition. Offered: Sp.

[View course details in MyPlan: ENV H 511](#)

ENV H 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) *K. THUMMEL*

Addresses current technologies for DNA sequencing, genotyping, RNA and epigenetic analysis and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause variability in drug treatment responses, as well as diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with PCEUT 513/PHG 513; W.

[View course details in MyPlan: ENV H 513](#)

ENV H 514 Fundamentals of Toxicology (3)

Covers major fundamentals and core areas of toxicology, including dose response, absorption, distribution, metabolism, and excretion of toxicants, toxicity testing, interpretation of toxicological data; and biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses. Also explores mechanisms and fate of chemical interaction with biological systems. Prerequisite: BIOL 212, BIOC 405, or permission of instructor. Offered: A.

[View course details in MyPlan: ENV H 514](#)

ENV H 515 Organ System Toxicology (3) *T. KAVANAGH*

Focuses on organ system toxicology. Emphasizes the pathophysiology of toxicant-induced organ injury, including adaptive responses to toxicant exposure, inflammation, and tissue repair pathways. Prerequisite: ENV

H 514 or permission of instructor. Offered: W.

[View course details in MyPlan: ENV H 515](#)

ENV H 516 Toxic Agents: Effects and Mechanisms (3)

Focuses on the toxic effects and the underlying mechanisms of the principal classes of toxicants: pesticides, metals, solvents, air pollutants, persistent organic pollutants, radiation, as well as on food safety and occupational/clinical/eco toxicology. Prerequisite: ENV H 515 or permission of instructor. Offered: Sp.

[View course details in MyPlan: ENV H 516](#)

ENV H 517 Children's Environmental Health (3)

Discussion of environmental health issues as they pertain to children's health. Topics include historical perspective of public health research and policies directed at protecting children's health and emerging scientific and public health issues such as the risks and benefits of seafood consumption during pregnancy; use of pesticides on food and in the home; air pollution and childhood asthma, and childhood injuries and the built environment. Offered: Sp.

[View course details in MyPlan: ENV H 517](#)

ENV H 518 Understanding and Managing the Health Risks of Climate Change (3) *K. EBI, J. HESS*

The health risks of climate change are multiple and range across the public health space. Addresses current and projected health risks of climate change and the policies and measures to manage these risks as the climate continues to change. Offered: jointly with G H 518.

[View course details in MyPlan: ENV H 518](#)

ENV H 520 Advanced Technical Communication in Public Health (3)

Covers written and oral communication for environmental health and public health professionals, with particular emphasis on three main areas: conveying information more effectively to technical audiences, translating that information for general audiences in the public arena, and crafting effective commentary relating to topics of professional interest.

[View course details in MyPlan: ENV H 520](#)

ENV H 530 Research Proposal Preparation for Biological Sciences (3)

Provides first-hand experience for doctoral students in the biological sciences on proposal writing and the review process. Focuses on hypothesis-driven, laboratory bench-work based research following the NIH pre-doctoral fellowship format, and aims to prepare students for their pre-doctoral fellowship submissions and general qualifying exams. Offered: A.

[View course details in MyPlan: ENV H 530](#)

ENV H 531 Neurotoxicology (3)

Advanced discussions of the principles and methodological approaches to neurotoxicology (including behavioral toxicology), classes of neurotoxic agents, types and mechanisms of neurotoxic effects, as well as the role of neurotoxicology in toxicology and public health. Prerequisite: ENV H 514, ENV H 515, ENV H 516 or ENV H 405 or permission of instructor. Offered: W, even years.

[View course details in MyPlan: ENV H 531](#)

ENV H 532 Reproductive and Developmental Toxicology (3)

Investigates chemicals that can induce adverse reproductive and developmental outcomes. Discussion topics include identification and characterization of specific classes of toxic agents, mechanisms of action of these agents at the molecular and cellular level, and risk assessment and regulatory issues. Prerequisite: ENV H 514 and ENV H 515 or ENV H 405 or permission of instructor. Offered: S, even years.

[View course details in MyPlan: ENV H 532](#)

ENV H 533 Molecular Toxicology (3)

Advanced discussion of molecular mechanisms whereby chemical and biological agents produce their harmful effects on biological tissues. Topics include the role of xenobiotic biotransformation enzyme expression in chemical susceptibility, toxicogenomics, chemical-induced oxidative stress, alternative models, species

differences, and dietary anti-carcinogens. Prerequisite: prior coursework in toxicology and biochemistry²⁴⁹, or permission of instructor. Offered: Sp, odd years.

[View course details in MyPlan: ENV H 533](#)

ENV H 534 Biochemical Toxicology of the Puget Sound (3)

Advanced discussion of effects of pollutants on aquatic organisms at the molecular, biochemical, and physiological levels, and in the context of Puget Sound case studies. Topics include assessing toxicant-induced cell injury in aquatic organisms, biotransformation and detoxification pathways, toxicogenomics, assessing chemical diseases in fish, biomarkers, and zebrafish models. Prerequisite: prior coursework in toxicology and biochemistry or permission of instructor. Offered: W, even years.

[View course details in MyPlan: ENV H 534](#)

ENV H 536 Health Impact Assessment (2)

Examines the use of Health Impact Assessment as a public health tool for informing decision-makers about the potential health impacts of proposed projects and policies. Students learn the steps for conducting HIAs, review case studies, and conduct an HIA of a current local proposed project. Offered: jointly with URB DP 536.

[View course details in MyPlan: ENV H 536](#)

ENV H 537 Introduction to Manufacturing Systems (3) *A. BANERJEE, J. HEIM*

Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with IND E 537; A.

[View course details in MyPlan: ENV H 537](#)

ENV H 538 Public Health and the Built Environment (2)

Examines how the design of communities and land use and transportation decision have positive and adverse effects on health. Considers built environment impacts on physical activity, obesity, air quality, injuries, mental health, social capital, and environmental justice; and explores interventions to promote healthy community design. Offered: jointly with URB DP 538.

[View course details in MyPlan: ENV H 538](#)

ENV H 539 One Health: Human and Animal Health in a Changing Environment (3) *P. RABINOWITZ*

Case based exploration of the One Health concept, connecting human, animal, and environmental health. Topics include emerging zoonotic infectious diseases transmitted between humans and animals, animals as sentinels of environmental hazards, the human-animal bond, and the comparison of spontaneous diseases between human and animals. Includes two optional field trips. Offered: Sp.

[View course details in MyPlan: ENV H 539](#)

ENV H 540 Food Safety and Health (3)

Presentation of emerging issues in food safety, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods. Offered: jointly with NUTR 545; W.

[View course details in MyPlan: ENV H 540](#)

ENV H 541 Ecology of Environmentally Transmitted Microbial Hazards (3)

Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

[View course details in MyPlan: ENV H 541](#)

ENV H 542 Detection and Control of Environmentally Transmitted Microbial Hazards (3)

Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and detection for infectious microorganisms.

Provides coverage of engineered controls and disinfection/decontamination processes for infectious organisms.

Offered: W.

[View course details in MyPlan: ENV H 542](#)

ENV H 543 Quantitative Microbial Risk Assessment (3)

Focuses on the principles of quantitative risk assessment as applied to infectious microorganisms. Covers hazard identification, exposure assessment, health effects assessment, risk characterization, and risk communication.

Offered: Sp, even years.

[View course details in MyPlan: ENV H 543](#)

ENV H 544 Antibiotic Resistant Bacteria/Genes Impact on the Environment and Public Health (4) *M. ROBERTS*

Explores how the global use and abuse of antibiotics has profound consequences on the health of humans, animals, and the environment. Addresses issues of antibiotic resistant bacteria and genes through an interdisciplinary "One Health" approach that integrates human, animal, and environmental health. Prerequisite: either EPI 320, BIOL 220, or MICROM 301. Offered: A.

[View course details in MyPlan: ENV H 544](#)

ENV H 545 Water, Wastewater, and Health (4)

Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

[View course details in MyPlan: ENV H 545](#)

ENV H 546 Hazardous Waste and Public Health (3)

Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Offered: W.

[View course details in MyPlan: ENV H 546](#)

ENV H 547 Environmental Change and Infectious Disease (3) *G. CANGELOSI*

Uses multidisciplinary approach to address the impacts of environmental change (including climate change) on infectious disease. Concepts include categories of environmental change; infectious disease emergence/re-emergence; environmental aspects of infectious disease exposure, acquisition, and progression; pathogen growth/survival in the environment; historical and societal perspectives; surveillance; and strategies for control. Offered: Sp.

[View course details in MyPlan: ENV H 547](#)

ENV H 548 Community Air Pollution (3)

Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Prerequisite: SPH graduate student or permission. Offered: Sp.

[View course details in MyPlan: ENV H 548](#)

ENV H 549 Human Factors in Engineering Design (3) *L. BOYLE*

Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations. Covers traditional human factors material with a project-based focus/emphasis. Offered: jointly with IND E 549; Sp.

[View course details in MyPlan: ENV H 549](#)

ENV H 550 Occupational and Environmental Disease (3/4) *J. SPECTOR*

A case-based introduction to occupational and environmental diseases, focusing on disease epidemiology, pathophysiology, diagnostic testing basics, and aspects of population management such as disease surveillance, policy development, and health protection programs. A four credit option offered to clinically-oriented students

additionally covers diagnostic test interpretation, differential diagnosis, and clinical management. Offered: Sp.
[View course details in MyPlan: ENV H 550](#)

ENV H 551 Human Exposure to Environmental Contaminants (4)

Exposure science plays a critical role in risk assessment, epidemiology, and health interventions. This course introduces techniques such as pathway analysis, fate and transport modeling, statistical exposure estimation, exposure biomarkers, and energetics used to characterize chemical, biological and physical hazards in both occupational and community environments. Prerequisite: CHEM 162; MATH 124. Offered: A.

[View course details in MyPlan: ENV H 551](#)

ENV H 552 Environmental Chemistry of Pollution (4)

Chemical and physical processes determining distribution and fate of chemical hazards, detection of low levels of hazardous compounds, and environmental evaluation and prediction. Fundamental chemical concepts and measurable properties of individual compounds to interpret and relate measurements. Prerequisite: admission to graduate program or permission of instructor. Offered: W.

[View course details in MyPlan: ENV H 552](#)

ENV H 553 Environmental Exposure Monitoring Methods (4)

Provides an in-depth understanding of current monitoring methods for occupational, residential, and community exposures to hazardous chemical agents. Examines the technical basis for sampling strategies and sampling and analytical methods for chemicals in air, water, food, and soil, and for biological markers of exposure and effect in humans and other biota. Prerequisite: ENV H 453 or permission of instructor. Offered: W.

[View course details in MyPlan: ENV H 553](#)

ENV H 554 Biological Monitoring for Chemical Exposure (2)

Advanced seminar on biological monitoring for assessment of chemical exposure and health risks from environmental agents. Considers applications and interpretation of results from analysis of biological specimens taken from persons exposed to chemicals in the work place and the general environment. Prerequisite: ENV H 551 or permission of instructor. Credit/no-credit only. Offered: Sp, odd years.

[View course details in MyPlan: ENV H 554](#)

ENV H 555 Instrumental Methods for Industrial Hygiene Measurement: Laboratory (3)

Utilizes typical instrumental techniques and analytical methods for the evaluation of potential occupational exposures. Prerequisite: ENV H 453 and ENV H 553 or permission of instructor. Offered: Sp.

[View course details in MyPlan: ENV H 555](#)

ENV H 556 Quantitative Occupational Exposure Analysis (3)

Exploration of industrial hygiene data to understand nature of airborne exposures in the occupational environment, and their interpretation for human health. Focus on reading and discussion of primary exposure assessment literature and statistical analysis of real dataset. Prerequisite: one quarter of statistics or biostatistics and basic industrial hygiene. Offered: W, odd years.

[View course details in MyPlan: ENV H 556](#)

ENV H 557 Exposure Controls (3/4)

Presents engineering concepts for selecting exposure controls for chemical, physical, and biological agents. Topics include regulatory mandates, hazard rating strategies, protective clothing, respiratory protection, chemical safety management, building ventilation, local exhaust ventilation, chemical and biohazards controls, airflow measurements, and ventilation troubleshooting. Offered: W.

[View course details in MyPlan: ENV H 557](#)

ENV H 559 Applied Occupational Health and Safety (3)

Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting,

project reporting, and presentation. Offered: jointly with IND E 567/NSG 505; Sp, even years.

[View course details in MyPlan: ENV H 559](#)

ENV H 560 Occupational Safety Management (4)

Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with NSG 506; Sp.

[View course details in MyPlan: ENV H 560](#)

ENV H 562 Technical Aspects of Occupational Safety (3)

Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, student receive an OSHA 510 30-hour Construction Safety and Health certificate. Offered: jointly with NSG 507; W.

[View course details in MyPlan: ENV H 562](#)

ENV H 564 Recognition of Health and Safety Problems in Industry (2)

Develops skills in occupational health and safety hazard recognition in a variety of important Northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with IND E 564; A.

[View course details in MyPlan: ENV H 564](#)

ENV H 566 Introduction to Ergonomics (3)

Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with IND E 566/NSG 508; W.

[View course details in MyPlan: ENV H 566](#)

ENV H 567 Mechanisms of Carcinogenesis (2)

Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis.

Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with PHCOL 567; A, even years.

[View course details in MyPlan: ENV H 567](#)

ENV H 569 Occupational Biomechanics (4)

Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with IND E 569; Sp, even years.

[View course details in MyPlan: ENV H 569](#)

ENV H 570 Occupational and Environmental Epidemiology (3)

Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment.

Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with EPI 570.

[View course details in MyPlan: ENV H 570](#)

ENV H 571 Neuroepidemiology and Environmental Risk Factors (3) W. KUKULL

Focuses on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders.

Discussion of NIH grantsmanship. Guest experts present some topics. Psychiatric disorders e.g. schizophrenia, autism spectrum disorders, and depression will not be discussed. Offered: jointly with EPI 571.

[View course details in MyPlan: ENV H 571](#)

ENV H 572 Environmental Risk and Society (3)

Examines environmental health risk assessments and explores how such assessments are viewed by affected communities. Reviews scientific risk assessment methods, risk perception, risk communication, and public participation processes. Examines the influence of advocacy and special-interest publications on risk assessment debates. Offered: A.

[View course details in MyPlan: ENV H 572](#)

ENV H 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3)

Schwartz

Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with EPI 573.

[View course details in MyPlan: ENV H 573](#)

ENV H 574 Probabilistic Exposure Analysis (3)

Examination of probabilistic (in contrast to deterministic) approaches to prediction of human exposure to environmental contaminants including explicit separation of population variability from uncertainty due to ignorance. Discussion of data needs, pitfalls, policy ramifications, and current state of development and regulatory acceptance. Examples from real world. Student project required. Offered: Sp, odd years.

[View course details in MyPlan: ENV H 574](#)

ENV H 576 Clinical Occupational Medicine (2)

For clinicians in training, comprehensive overview of occupational disease principles, occupational history-taking, and the provider's role in workers' compensation. Epidemiologic evidence and pathophysiologic basis for occupational diseases reviewed, emphasizing organ system approach to diagnosis and management.

Prerequisite: occupational medicine or preventive medicine residents/fellows, nursing students, or permission of instructor. Offered: S.

[View course details in MyPlan: ENV H 576](#)

ENV H 577 Risk Assessment for Environmental Health Hazards (3/4)

Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/PUBPOL 589; A.

[View course details in MyPlan: ENV H 577](#)

ENV H 580 Environmental and Occupational Health Sciences Seminar (1, max. 6)

Presentation of current environmental and occupational health research and issues. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: ENV H 580](#)

ENV H 581 Environmental Health Reading (1)

Critical reading of selected basic and applied research publications on environmental health problems and programs.

[View course details in MyPlan: ENV H 581](#)

ENV H 583 Thesis Research Proposal Preparation (1)

Includes reviewing components of research proposals and practicing writing and developing effective aims, hypotheses, background materials, and analytic strategies for writing theses and presenting at scientific meetings. Offered: Sp.

[View course details in MyPlan: ENV H 583](#)

ENV H 584 Occupational and Environmental Health: Policy and Politics (3)

Provides an understanding of the policy process and policy issues in occupational and environmental health and safety, including exploring the relationships between science, values, and politics in the process of setting public policy. Offered: Sp.

[View course details in MyPlan: ENV H 584](#)

ENV H 586 Current Issues in Occupational Health at the Human Animal Interface (2, max. 8)

Problem-based seminar about the occupational health issues faced by workers with animal contact, including animal agriculture workers, veterinary workers, wildlife workers, and laboratory animal workers. Anchoring course for trainees in the Occupational Health at the Human Animal Interface (OHAI) training grant.

[View course details in MyPlan: ENV H 586](#)

ENV H 587 Introduction to Biopharmaceutical Product Development (3)

Provides a framework of the drug development process and its regulation. Prerequisite: ENV H 405 or ENV H 514, ENV H 515, and ENV H 516, or PCEUT 501, PCEUT 502, and PCEUT 503; or equivalent, or instructor permission. Offered: jointly with PCEUT 587; A, even years.

[View course details in MyPlan: ENV H 587](#)

ENV H 590 Selected Topics (1-6, max. 20)

In-depth study of a current environmental health topic.

[View course details in MyPlan: ENV H 590](#)

ENV H 591 Current Topics in Toxicology (2, max. 12) T. KAVANAGH, Z. XIA

Provides in-depth examination of current topics in environmental and occupational toxicology taken from journal articles and seminars. Consists of presentations led by outside speakers, students, post-doctoral fellows, and faculty. Students expected to participate actively in discussion. Assigned weekly readings given according to the schedule of seminar speakers and topics.

[View course details in MyPlan: ENV H 591](#)

ENV H 592 Current topics in Occupational Health Sciences (1/3)

Weekly discussion of current research on a broad range of topics relevant to occupational and environmental health including exposure assessment, occupational epidemiology, occupational hygiene, and control of environmental hazards. Presentations and discussion sessions designed to help students organize and prepare a critical analysis of research findings. Credit/no-credit only. Offered: A.

[View course details in MyPlan: ENV H 592](#)

ENV H 593 Current Topics in Risk Assessment (1, max. 6)

Examines current topics in risk assessment and risk communication with a focus on issues in environmental health. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: ENV H 593](#)

ENV H 594 Current Topics in Environmental Health (1, max. 2)

Critical review and discussion of current scientific literature of particular relevance to the Environmental Health program. Primary presentations rotate among faculty and students. Credit/no-credit only. Offered: W.

[View course details in MyPlan: ENV H 594](#)

ENV H 595 Research Rotation (3, max. 9)

Research laboratory rotation for pre-doctoral graduate students. Students commit at least 10 hours per week to a laboratory research project aimed at introducing the student to current methods of laboratory research, and to familiarize the student with specific faculty research interests. Prerequisite: graduate standing and permission of program director.

[View course details in MyPlan: ENV H 595](#)

ENV H 596 Current Issues in Occupational and Environmental Medicine (2, max. 12)

Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with NURS 580; AWSp.

[View course details in MyPlan: ENV H 596](#)

ENV H 597 Case Studies in Environmental and Occupational Health (1, max. 12)

Discusses clinical cases, recent journal articles, and global environmental health scenarios relevant to the clinical practice of environmental and occupational health. Explores collaborative management of environmental and occupational health-related illnesses and navigation of complex environmental health scenarios through real-world cases and critical analysis of published literature. Offered: AWSp.

[View course details in MyPlan: ENV H 597](#)

ENV H 598 Degree Program Project/Portfolio ([1-9]-, max. 18)

Supervised project work on a topic related to student's concentration in graduate study that results in a project paper. Offered: AWSpS.

[View course details in MyPlan: ENV H 598](#)

ENV H 599 Field Studies (2-6, max. 6)

Assignment to an environmental research or service program to develop field research and evaluation skills. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: ENV H 599](#)

ENV H 600 Independent Study or Research (*-)

Prerequisite: permission of departmental adviser. Offered: AWSpS.

[View course details in MyPlan: ENV H 600](#)

ENV H 700 Master's Thesis (*-)

Prerequisite: permission of departmental adviser. Offered: AWSpS.

[View course details in MyPlan: ENV H 700](#)

ENV H 800 Doctoral Dissertation (*-)

Prerequisite: permission of departmental adviser. Credit/no-credit only. Offered: AWSpS.

Epidemiology

[Display as tabs](#)

Graduate Program

Epidemiology Program Office
F262 Health Sciences, Box 357236
(206) 543-6302 or (206) 543-8226
epiapply@uw.edu
depts.washington.edu/epidem

The Department of Epidemiology offers the following three graduate degrees: Doctor of Philosophy, Master of Science, and Master of Public Health, for individuals intending to become academicians, highly qualified research specialists, or well-trained public health practitioners, respectively. The department also offers a number of degree tracks within the master's degree programs, as well as several graduate certificates.

Admission Requirements for All Degrees

Admission to all graduate programs is highly competitive and is based on the following:

1. Background in epidemiology or other health-related fields (such as medicine, health or biological sciences, mathematics, quantitative social sciences), including prior areas of study and work experience, especially quantitative public health research
2. Undergraduate and graduate grades (if applicable)
3. GRE scores (exceptions are often made for master's degree applicants with a prior PhD, MD, DO, DDS, DVM, or equivalent health-related degree from a U.S. university; MD/MPH applicants at UW; and MD/PhD applicants funded by the Medical Scientist Training Program at UW. No exceptions to GRE requirement are made for PhD program applicants.).
4. TOEFL or IELTS score from international applicants, unless bachelor's degree taught entirely in English
5. Applicant interests that are aligned with those of Department of Epidemiology faculty. (It is not expected that applicants locate a faculty mentor in advance.)
6. Compelling motivation for pursuing training in epidemiology as demonstrated through a well-written goal statement
7. Letters of reference

The Master of Public Health (MPH) degree in epidemiology requires coursework in health services and environmental health, in addition to epidemiology and biostatistics, as well as a thesis and a practicum as preparation for a career in public health practice or as a prelude to the PhD program. Three tracks are available: the general track, which is selected by most students and allows specialization via the choice of electives and thesis topic; the global

Helpful links

[Graduate Program](#)

[Time Schedule](#)

[Academic Planning Worksheet](#)

[Departmental Web Page](#)

[Departmental Faculty](#)

[Course Descriptions](#)

health track (GH); and the maternal and child health track (MCH). The global health track requires approximately two years of prior health science work experience in a developing country, although some of the two years may be health-related work with immigrant or underserved groups in the United States. (The epidemiology global health track is not the same as the MPH general track through the Global Health Department in that it focuses on epidemiology and biostatistics rather than on health services-oriented training, but it does incorporate some of the same classes.) Applicants without the requisite experience may apply to both the Epidemiology general track and the global health graduate certificate (listed below) which combined offer equivalent training. The MCH track expects prior U.S. MCH experience for admission. Applicants without this experience may apply to both the general track and the MCH graduate certificate (listed below) which combined offer the similar training.

Formal concurrent degree programs involving the epidemiology MPH include the following: Doctor of Medicine (MD), Doctor of Philosophy (PhD) in Anthropology, Master of Arts in International Studies (MAIS), and Master of Public Affairs (MPA). A master's or doctorate from another department at the UW may be combined with the MPH with the approval of both programs.

The Master of Science (MS) degree in epidemiology requires concentration on courses and research in epidemiology and biostatistics as preparation for a research specialization or as a prelude to the PhD program. It also requires electives from the School of Public Health. Two tracks are available, the general track, which allows specialization via the choice of electives and thesis topic and the clinical research track (CR). The MS CR is intended chiefly for professionals who have already completed clinical training, and who plan to conduct research with patients in healthcare settings as a significant part of their future careers.

A formal concurrent degree program combines the epidemiology general track MS with the PhD in molecular and cellular biology. A master's or doctorate from another department at the UW may be combined with the MS with the approval of both programs.

Applicants interested in an MS in genetic epidemiology, administered by the Institute for Public Health Genetics (a School of Public Health program that is not part of the Department of Epidemiology), should visit <http://depts.washington.edu/phgen/programs/msge.html>.

The Doctor of Philosophy is designed to produce academics who are highly qualified as independent investigators, teachers, and practitioners. The requirements for the PhD degree in epidemiology differ from the MS program requirements primarily in the scope and complexity of research for the dissertation. Coursework includes a core series in epidemiology and biostatistics, as well as epidemiology electives and other electives from the School of Public Health.

Admission Requirements Specific to the PhD

1. Master's degree in epidemiology or other health-related field, including mathematics and quantitative social sciences.
 - a. A prior doctorate without a health-related master's degree is not acceptable.
 - b. An applicant with a doctorate only and no master's degree should apply to the MS or MPH first.
 - c. All courses and credits from the MS or MPH in epidemiology at the UW count directly toward the PhD in epidemiology.
2. GRE from all applicants, including those who hold a U.S. doctorate, except MSTP MD students at UW.

The Epidemiology Department and other School of Public Health departments offer several graduate certificate programs open to any qualified graduate student at the University (sph.washington.edu/prospective/edprograms.asp#cert). Some certificate programs are open to Graduate Non-Matriculated students, if indicated on the certificate websites. Following is a partial listing of certificate programs:

- *Advanced Clinical Research Methods:*
depts.washington.edu/epidem/Certificates/acrc.shtml (May not be combined with an epidemiology PhD degree at UW)
- *Basic Clinical Research Methods:*
depts.washington.edu/epidem/Certificates/bcrc.shtml (May not be combined with an epidemiology PhD degree at UW)
- *Global Health Graduate Certificates:*
globalhealth.washington.edu/academics/certificates-and-fellowships
 - *General Global Health*
 - *Global Health of Women, Adolescents, and Children*
 - *Global Injury and Violence*
 - *HIV and Sexually Transmitted Infections*
- *Maternal and Child Health:* depts.washington.edu/mchprog/certificate/
- *Public Health Genetics:*
depts.washington.edu/phgen/certificateprogram/Certificate.shtml
- *Statistical Genetics:* www.stat.washington.edu/statgen/index.php?page=certificate
(Offered by the Biostatistics department)

Master of Public Health

Degree Requirements

Minimum 63 credits, as follows:

1. 45 to 49 class credits
2. *Core Courses:* 33 graded credits, including EPI 512, EPI 513, EPI 514, BHOST 511, BHOST 512, BHOST 513, either ENV H 510 or ENV H 511, HSERV 510, HSERV 511. BHOST 517-BHOST 518 may be substituted for BHOST 511, BHOST 512, BHOST 513
3. EPI 510, a prerequisite for EPI 514, is required for students without substantial SAS and Stata programming experience
4. *Electives:* 6 credits of EPI course electives of 2 or more credits each (See acceptable electives in the on the courses webpage at depts.washington.edu/epidem/courses/)
5. 3 to 6 credits (120 to 240 hours) in a field-based practicum (EPI 595)
6. 9 to 18 thesis (EPI 700) credits
7. Students may enroll in additional elective courses in epidemiology and other courses with substantial public health content with departmental approval, and for independent study (EPI 600) to bring the total to 63 credits. Public health-related 400-level courses taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework without substantial public health content, and at the 300-level or below, does not count toward the degree.

MPH Specialized Program Options: The MPH degree offers specialized tracks as listed below. They have additional course, practicum and thesis requirements detailed on the program websites.

- *Global Health Track:* Requires additional coursework specific to international health. More information about this track is at depts.washington.edu/epidem/program/globalhealth.shtml.
- *Maternal and Child Health Track:* Requires additional coursework related to maternal and child health in the U.S. More information about this track is at depts.washington.edu/mchprog/academic/.

Master of Science

Degree Requirements

60 credits, to include:

- 36 to 40 class credits
- *Core Courses:* 24 graded credits, including EPI 512, EPI 513, EPI 514, BOST 511, BOST 512, BOST 513. BOST 517-BOST 518 may be substituted for BOST 511, BOST 512, BOST 513.
- EPI 510, a prerequisite for EPI 514, is required for students without substantial SAS and Stata programming experience.
- *Electives:* 6 credits of EPI course electives of 2 or more credits each. (See acceptable electives on the courses webpage at depts.washington.edu/epidem/courses)
- *School of Public Health Electives:* Two additional 500-level courses (2 or more credits each) in any department of the School of Public Health (including Epidemiology) or other UW courses with significant public-health content. (See acceptable electives in the appropriate degree requirements checklist at depts.washington.edu/epidem/CurrentStudents.)
- 9 to 18 thesis credits (EPI 700)

Students may enroll in additional elective courses in epidemiology and other relevant departments, and for independent study (EPI 600) to bring the total to 60 credits. Public health-related 400-level coursework taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework unrelated to public health and at the 300-level or below does not count toward the degree.

MS Specialized Program Options:

- *MS Clinical Research Track:* Requires specific coursework in place of most of the electives for the MS General Track. For specific requirements, visit the program website at depts.washington.edu/epidem/program/cr.shtml.

Doctor of Philosophy

The curriculum includes courses on epidemiologic methods, and biostatistics. Electives in substantive disease and exposure areas, as well as research methods, are required. Requisite general electives from the School of Public Health are also part of the curriculum.

Degree Requirements

Minimum 90 total credits:

1. Minimum reduced to 60 credits for students with a prior relevant master's degree (All course requirements must be satisfied even if more than 60 credits are needed to do so.)
2. 54 to 66 class credits
3. *Core Courses*: 32 graded credits including EPI 512, EPI 513, EPI 514, EPI 515, EPI 536 EPI 537, BIOST 517, BIOST 518. BIOST 511, BIOST 512, BIOST 513 may be substituted for BIOST 517-BIOST 518.
4. EPI 510, a prerequisite for EPI 514, is required for students without substantial SAS or Stata programming experience.
5. *Required Non-graded Courses*: EPI 528 (3), two quarters of EPI 584, EPI 588
6. Minimum three required epidemiology electives (minimum 2 credits each). (See acceptable electives in the appropriate degree checklist at depts.washington.edu/epidem/CurrentStudents/.)
7. 7. Three additional electives (minimum 2 credits each) from any department of the School of Public Health, including Epidemiology, or other UW courses with significant public health content
8. Students are encouraged to take EPI 583 (1) each quarter of the first year and EPI 591 (1) each quarter after the first year.
9. *Dissertation*: 27 credits of EPI 800
10. The student's supervisory committee may require additional courses, including English language courses, to ensure that the student has adequate training in the area of epidemiology he or she is pursuing.
11. Additional epidemiology courses and EPI 800 credits, independent study (EPI 600), and courses with substantial public health content offered by other departments or schools (with permission), may be applied to the total PhD credits. Public health-related, 400-level coursework taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework unrelated to public health, and at the 300-level or below does not count toward the degree.

Financial Aid

Research assistantships (RA) for work on various projects provide salary and tuition waivers for students working 20 hours a week. Although funding is not guaranteed with admission, many new PhD and a few master's students find a research assistantship by the start of their first autumn quarter. Most doctoral students have found an RA by their second or third quarter in the program, and many master's students do so by their second year, when they have more of the skills that faculty supervisors need. Research training stipends with partial tuition support are available on a limited basis, especially for more advanced doctoral students. Teaching assistantships are available competitively for second-year and higher-level students. More information is at <http://depts.washington.edu/epidem/funding/index.shtml>.

Research Facilities

University facilities include an excellent library system and access to computers. Many varied opportunities for field research and practica are provided in Seattle and elsewhere in the state and nation, at institutions such as Seattle Children's hospital, Fred Hutchinson Cancer Research Center, Group Health Research Institute, Harborview Medical Center, the

Center for AIDS and STD, Public Health: Seattle-King County, Washington State Department of Health, VA Puget Sound Healthcare Systems, and many other local health institutions. Cooperating organizations focusing on global health also are available in Seattle and internationally. Additional, but not exhaustive, lists of cooperating agencies are at depts.washington.edu/epidem/research/Other_Institutions.shtml. A partial list of agencies and funding related to international health are listed at <http://globalhealth.washington.edu/ghrc/funding-and-fieldwork>.

SCHOOL OF PUBLIC HEALTH EPIDEMIOLOGY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

EPI 201 Outbreak Investigation and Response (5) I&S/NW, QSR J. BASEMAN

Provides an introduction to infectious disease outbreaks of both domestic and global significance. Students learn about outbreak detection, investigation and response activities and methodologies through a combination of lecture, case studies, homework, and popular media. Offered: Sp.

[View course details in MyPlan: EPI 201](#)

EPI 220 Sexually Transmitted Infections: Causes and Consequences (5) I&S/NW, QSR L. MANHART

Examines the causes and consequences of sexually transmitted infections (STI). Discusses strategies to prevent STI with a focus on sexual and reproductive health. Explores new advances in STI epidemiology, treatment, and public health control. Offered: A.

[View course details in MyPlan: EPI 220](#)

EPI 221 Maternal and Child Health-a Population Health Approach (5) NW D. ENQUOBAHRIE, V. HOLT

Provides a public health perspective of maternal and child health. Includes information on indicators of maternal, infant, and child health; risk factors for pregnancy complications, infant and child morbidity and mortality; and impact of maternal and child health on life course disease risk. Offered: A.

[View course details in MyPlan: EPI 221](#)

EPI 320 Introduction to Epidemiology (4) NW J. GOLDBERG

For the undergraduate student wishing to devote only one quarter to a course in epidemiologic methods. Description of ways in which variation in disease occurrence is documented and how that variation is studied to understand causes of disease. Prerequisite: either BIOST 310, QMETH 201, Q SCI 381, STAT 220, STAT/CS&SS/SOC 221, or STAT 311, any of which may be taken concurrently. Offered: WSp.

[View course details in MyPlan: EPI 320](#)

EPI 360 Exploring the HIV/AIDS Pandemic (5) I&S/NW, QSR J. BALKUS, S. HAWES

Presents a comprehensive overview of the historical, public health, clinical, and biological aspects of HIV infection. Covers impact of AIDS on community and global health care and prospects for prevention and control. Offered: W.

[View course details in MyPlan: EPI 360](#)

EPI 494 Field Epidemiology: Student Epidemic Action Leaders Team (1-2, max. 8) I&S/NW, QSR²⁴⁶³J. BASEMAN

Introduces applied epidemiology in public health practice, specifically in areas of outbreak investigation, public health preparedness and response. Includes fieldwork opportunities.

[View course details in MyPlan: EPI 494](#)

EPI 499 Undergraduate Research (*)

Offered: AWSpS.

[View course details in MyPlan: EPI 499](#)

EPI 502 Physical Activity in Health and Disease (3)

Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Recommended: human physiology. Offered: jointly with NUTR 505.

[View course details in MyPlan: EPI 502](#)

EPI 505 Preventing Healthcare Associated Infections (1)

Multidisciplinary approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Credit/no-credit only. Offered: jointly with MED 540.

[View course details in MyPlan: EPI 505](#)

EPI 506 Surveillance Systems and Decision Making in Public Health (2) J. BASEMAN

This course will introduce students to public health surveillance systems and decision-making based on surveillance data. A range of surveillance system types will be covered (e.g. foodborne illness, newborn screening, lead, emerging infectious diseases). Credit/no-credit only.

[View course details in MyPlan: EPI 506](#)

EPI 510 Epidemiologic Data Analysis (3) J. DELANEY, R. WINER

Intended for students planning to take EPI 514. Introduces concepts and programming skills necessary to analyze data sets for case-control and cohort studies. Provides students hands-on experience in using epidemiologic data sets for stratified analyses with SAS and Stata. Prerequisite: EPI 511 or EPI 512. Credit/no-credit only. Offered: W.

[View course details in MyPlan: EPI 510](#)

EPI 511 Introduction to Epidemiology (4) Kukull

Epidemiologic methods for non-epidemiology majors. Focuses on research designs and methods to describe distribution and determinants of disease and health events in populations; uses quantitative and biomedical information to infer whether causal relationships exist between potential causes and disease in populations.

Offered: A.

[View course details in MyPlan: EPI 511](#)

EPI 512 Epidemiologic Methods I (4) A. PHIPPS, A. ROWHANI-RAHBAR, N. WEISS

Considers principles and methods of epidemiology. Covers measures of disease frequency, descriptive epidemiology, overview of study designs, measures of excess risk, causal inference, screening, measurement error, misclassification, effect modification, and confounding. First in a two course sequence. Prerequisite: BIOS 511, which may be taken concurrently, or equivalent. Offered: A.

[View course details in MyPlan: EPI 512](#)

EPI 513 Epidemiologic Methods II (4) A. PHIPPS, A. ROWHANI-RAHBAR, N. WEISS

Considers how epidemiologic studies may be designed to maximize etiologic inference. Covers infectious disease epidemiologic studies, randomized controlled trials, cohort studies, case-control studies, cross-sectional studies, ecological and multilevel studies, and selected topics such as meta-analysis. Second in a two course sequence. Prerequisite: EPI 512. Offered: W.

[View course details in MyPlan: EPI 513](#)

EPI 514 Application of Epidemiologic Methods (5) *S. HAWES, A. LITTMAN*

Practical experience in analysis of data. Students analyze data sets currently on file using contemporary epidemiologic methods as taught in EPI 512 and EPI 513. Prerequisite: EPI 510 or experience in statistical programming; EPI 512, EPI 513, and epidemiology major. Offered: Sp.

[View course details in MyPlan: EPI 514](#)

EPI 515 Advanced Epidemiologic Methods I (3) *B. GUTHRIE, A. HAJAT*

First in a series of 2 courses. Increases knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 514; and either BIOST 513, or BIOST 518. Offered: jointly with BIOST 519.

[View course details in MyPlan: EPI 515](#)

EPI 516 Advanced Epidemiologic Methods II (4) *B. GUTHRIE*

Second of a series of 2 courses whose objective is to deepen students' knowledge of epidemiological principles by introducing methodological approaches to handling common problems in epidemiologic research that extend beyond the scope of traditional methods. Prerequisite: EPI 515. Offered: jointly with BIOST 520.

[View course details in MyPlan: EPI 516](#)

EPI 517 Genetic Epidemiology (3) *B. WEIR*

Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENOME 371, or equivalent. Offered: jointly with PHG 511.

[View course details in MyPlan: EPI 517](#)

EPI 519 Epidemiology of Cardiovascular Disease (3)

Principles, methods, and issues in the epidemiology of cardiovascular disease. Focuses on coronary heart disease and its major risk factors; also covers other topics such as stroke and sudden death. The format includes informal lectures and discussions of the current literature. Prerequisite: EPI 511 or EPI 512, EPI 513.

[View course details in MyPlan: EPI 519](#)

EPI 520 Epidemiology of Infectious Diseases (3) *C. KHOSROPOUR, L. MANHART*

Infectious diseases from a public health perspective. Topics include analytic methods, study design, outbreak investigations, surveillance, vaccine evaluations, global eradication, screening, modeling, and infectious causes of chronic diseases. Homework and discussion based on current examples from the published literature.

Prerequisite: EPI 511, EPI 512, or permission of instructor.

[View course details in MyPlan: EPI 520](#)

EPI 521 Epidemiology of Maternal and Child Health Problems ([3-4]-) *D. ENQUOBAHRIE*

Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with HSERV 542.

[View course details in MyPlan: EPI 521](#)

EPI 522 Reproductive Epidemiology (3)

Focuses on female reproductive system conditions and diseases, non-birth pregnancy outcomes, and impact of pregnancy on later health. Presentation of current epidemiologic knowledge and discussion of methodologic issues on topics including the menstrual cycle; contraception; infertility; spontaneous and induced abortion; and uterine and ovarian disease. Prerequisite: either EPI 511, both EPI 512 and EPI 513, or permission of instructor.

[View course details in MyPlan: EPI 522](#)

EPI 524 Cancer: Epidemiology and Biology (3) *M. MADELEINE*

Explores the epidemiology of major cancers (infection-related, breast, prostate, lung, colon, melanoma), with an emphasis on milestones in cancer mechanisms (such as tumor viruses, cell cycle, DNA repair, and metastasis).

Integrates knowledge from different fields of cancer research, with guest lectures from experts in epidemiology and cancer biology. Prerequisite: either EPI 511 or EPI 512; either undergraduate biology coursework or instructor permission. ²⁴⁶⁵

[View course details in MyPlan: EPI 524](#)

EPI 527 Vaccines (3) *A. WALD*

Overview of issues in vaccine development, clinical trials, implementation of vaccination programs, and the role of vaccines in the control of infectious diseases. Emphasizes current issues and real-world challenges in the vaccine field and features critical reading of the literature.

[View course details in MyPlan: EPI 527](#)

EPI 529 Emerging Infections of International Public Health Importance (3-)

Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with HSERV 536.

[View course details in MyPlan: EPI 529](#)

EPI 530 AIDS: A Multidisciplinary Approach (2) *C. FARQUHAR*

Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections; the impact of HIV/AIDS on community and global healthcare; and prospects for prevention and control. Credit/no-credit only. Offered: jointly with G H 562/MED 530.

[View course details in MyPlan: EPI 530](#)

EPI 531 Statistical Methods for Analysis with Missing Data (3) *Chan*

Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM algorithm and Gibbs' sampler. Covers both ignorable and non-ignorable missing-data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with BIOST 531.

[View course details in MyPlan: EPI 531](#)

EPI 532 Epidemiology of Infectious Diseases in Resource-Limited Countries (3) *McClelland*

A review of major infectious disease problems of the developing world, including AIDS, malaria, tuberculosis, measles, and diarrhea, with an emphasis on public health control strategies.

[View course details in MyPlan: EPI 532](#)

EPI 533 Pharmacoepidemiology (3)

Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513. Offered: jointly with PHARM 533.

[View course details in MyPlan: EPI 533](#)

EPI 535 Statistical Methods in Genetic Epidemiology (3)

Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/PHG 519.

[View course details in MyPlan: EPI 535](#)

EPI 536 Categorical Data Analysis in Epidemiology (4)

Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity

with available software programs gained by analysis of bona fide data and critiques of published analyses²⁴⁶⁶ appearing in literature. Prerequisite: BIOS 515; EPI 513 and either BIOS 513 or BIOS 518; or permission of instructor. Offered: jointly with BIOS 536; A.

[View course details in MyPlan: EPI 536](#)

EPI 537 Survival Data Analysis in Epidemiology (4)

Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic and health sciences studies. Familiarity with interpretation and available software computer programs gained by analysis of bona fide sets of data and critiques of published analyses appearing in the literature. Prerequisite: BIOS 536 or EPI 536. Offered: jointly with BIOS 537; W.

[View course details in MyPlan: EPI 537](#)

EPI 538 Nutritional Epidemiology (3) *Beresford, Kratz*

Application of epidemiological methods to studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to design studies and read the literature in nutritional epidemiology.

Prerequisite: EPI 511 or EPI 512 or instructor permission. Offered: jointly with NUTR 538.

[View course details in MyPlan: EPI 538](#)

EPI 539 Research and Evaluation Methods in Global Health (3-4) *Mock, O'Malley*

Provides an overview of a range of evaluation and research designs used in global health. Students learn practical methodologies to obtain, validate, and analyze information regarding health status, services, and programs. Discusses usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, and qualitative methods. Offered: jointly with G H 531.

[View course details in MyPlan: EPI 539](#)

EPI 541 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) *F. WOLF*

Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/HSEV 529/PHARM 529.

[View course details in MyPlan: EPI 541](#)

EPI 542 Clinical Epidemiology (2) *Weiss*

Principles and methods involved in studying the outcome of illness. Prerequisite: EPI 511, or EPI 512 and EPI 513.

[View course details in MyPlan: EPI 542](#)

EPI 546 Psychiatric Epidemiology (3) *A. VANDER STOEP*

Using epidemiological methods to study mental illness. Topics include contributions of mental illness to global disease burden; major population-based studies of mental illness; measurement of psychopathology; culture and mental illness; role of neurodevelopment, genetics, social and physical environment in etiology of mental disorders; mental health services research. Prerequisite: either EPI 511, EPI 512, HSEV 591, or permission of instructor. Credit/no-credit only. Offered: jointly with PBSCI 546.

[View course details in MyPlan: EPI 546](#)

EPI 547 Social Determinants of Population Health and Health Disparities (3)

Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students.

Prerequisite: HSEV 511, permission of instructor. Offered: jointly with HSEV 514.

[View course details in MyPlan: EPI 547](#)

EPI 548 Research Methods for Social and Contextual Determinants of Health (3) *A. HAJAT, N. SMITH*

Explores study-design, measurement, analytic, and interpretation issues applicable to research on social and

contextual determinants of health and health disparities. This lecture/seminar course is offered to graduate students with knowledge of epidemiologic and biostatistical principles who are interested in understanding complex relationships between social/contextual factors and health. Prerequisite: EPI 511 or EPI 512/513; and BIOST 511/512/513 or BIOST 517/518. ; recommended: Credit/no-credit only. Offered: jointly with HSERV 548; W.

[View course details in MyPlan: EPI 548](#)

EPI 549 HIV/STI Prevention Research Methods (3) *J. BAETEN, R. HEFFRON*

Focuses on current research and implementation of HIV/STI prevention including biomedical, behavioral, and public health interventions. Includes analyzing strength of research evidence to support novel interviews, understanding key features of study design, and applying interventions that are most appropriate and feasible for specific settings and populations. Offered: jointly with G H 563.

[View course details in MyPlan: EPI 549](#)

EPI 554 Introduction to Epidemic Modeling for Infectious Diseases (3) *R. BARNABAS*

Covers the basic tools for building and analyzing mathematical models of infectious disease epidemics. Model types include deterministic and stochastic models, compartmental and individual-based models. Laboratory provides hands-on model building experience in Excel, Stella, and R.

[View course details in MyPlan: EPI 554](#)

EPI 555 Statistical Methods for Spatial Epidemiology (3)

Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with BIOST 555.

[View course details in MyPlan: EPI 555](#)

EPI 570 Occupational and Environmental Epidemiology (3)

Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with ENV H 570.

[View course details in MyPlan: EPI 570](#)

EPI 571 Neuroepidemiology and Environmental Risk Factors (3) *W. KUKULL*

Focuses on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Psychiatric disorders e.g. schizophrenia, autism spectrum disorders, and depression will not be discussed. Offered: jointly with ENV H 571.

[View course details in MyPlan: EPI 571](#)

EPI 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3) *Schwartz*

Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with ENV H 573.

[View course details in MyPlan: EPI 573](#)

EPI 582 Design and Analytic Strategies to Enhance the Validity of Epidemiologic Studies (2) *Weiss*

Discusses the issues that led to specific methodologic developments during the past 30 years, along with a characterization of these developments and the consequences of their application. Prerequisite: EPI 512; EPI 513. Credit/no-credit only.

[View course details in MyPlan: EPI 582](#)

EPI 583 Epidemiology Seminar (1, max. 12) *S. DAVIS*

Presentation of current epidemiologic research and application of epidemiologic research in the practice of public health. Offered: AWSp.

[View course details in MyPlan: EPI 583](#)

EPI 584 Doctoral Dissertation Seminar (1, max. 2) *A. FITZPATRICK, N. WEISS*

Forum for Epidemiology doctoral students to obtain information for doctoral research, including: project ideas; forming a committee; developing a proposal; conducting the project; and presenting results. Prerequisite: EPI 512 and EPI 513, admission to the PhD program, successful completion of the preliminary examination, or second-year status. Credit/no-credit only.

[View course details in MyPlan: EPI 584](#)

EPI 585 Injury and Violence: A Public Health Approach (3)

Focuses on broad concepts including a conceptual model, surveillance, research methods, control and prevention of injuries. Topics include unintentional injuries from motor vehicle crashes, falls, drowning, sports injuries and intentional injuries from youth violence, intimate partner violence, homicide and suicide.

[View course details in MyPlan: EPI 585](#)

EPI 586 Responsible Conduct of Research: Global and Local (3) *A. DRAKE, C. FARQUHAR*

Prepares international and U.S. students to develop research proposals; conduct international and domestic field research; and present scholarly work. Credit/no-credit only. Offered: jointly with G H 532.

[View course details in MyPlan: EPI 586](#)

EPI 588 Preparing, Writing, and Critiquing Scientific Research Proposals (2-3) *A. FITZPATRICK, L. KESSLER*

Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Credit/no-credit only. Offered: jointly with HSERV 578.

[View course details in MyPlan: EPI 588](#)

EPI 590 Selected Topics in Epidemiology or International Health (1-6, max. 6)

Tutorials arranged for a small number of students for in-depth examination of an area of epidemiology or international health, usually of current nature. Seminar format. Prerequisite: EPI 511. Also a special summer format presenting introductory material. May be offered with ENV H 590 and/or HSERV 590. For more information and permission, consult department program adviser.

[View course details in MyPlan: EPI 590](#)

EPI 591 Current Literature in Epidemiology (1, max. 15) *N. WEISS*

Articles pertaining to epidemiology and related subjects selected from the current literature to be distributed and read by all participants. Faculty members and enrolled students alternate being responsible for conducting sessions and choosing articles to read. Prerequisite: EPI 513. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: EPI 591](#)

EPI 592 Program Seminars (1-6, max. 16)

Graduate seminars organized to address specific educational needs of students in various specialized programs within the Department of Epidemiology (i.e., Maternal and Child Health). Prerequisite: permission of instructor.

[View course details in MyPlan: EPI 592](#)

EPI 593 Cancer Prevention Research Laboratory (3, max. 24) *White*

Research experience for pre- and post-doctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: EPI 593](#)

EPI 594 Field Epidemiology: Student Epidemic Action Leaders Team (1-2, max. 8) *J. BASEMAN*²⁴⁶⁹

Introduces applied epidemiology in public health practice, specifically in areas of outbreak investigation, public health preparedness and response. Includes fieldwork opportunities. Offered: AWSpS.

[View course details in MyPlan: EPI 594](#)

EPI 595 Epidemiology Master's Practicum (1-6, max. 6)

Supervised practice experience providing students an opportunity to learn how epidemiology is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: EPI 512 and BIOS 511 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: EPI 595](#)

EPI 600 Independent Study or Research (*-)

Prerequisite: permission of independent study supervisor. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: EPI 600](#)

EPI 700 Master's Thesis (*-)

Prerequisite: permission of thesis chair. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: EPI 700](#)

EPI 800 Doctoral Dissertation (*-)

Prerequisite: permission of dissertation chair. Credit/no-credit only. Offered: AWSpS.

Health Services

[Display as tabs](#)

Department Overview

H664 Magnuson Health Sciences Center
Box 357600

The mission of the Department of Health Services is to work with partners in public health and healthcare to prepare leaders, design solutions, and conduct innovative research that translates into practice and policy. The department offers rigorous academic preparation that integrates learning, service, and research opportunities, emphasizing practical experience and student-faculty collaboration. Through this approach, students master competencies needed for success.

The department offers rigorous academic preparation that integrates learning, service, and research opportunities, emphasizing practical experience and student-faculty collaboration. Through this approach, students master competencies needed for success.

Bachelor's and master's degrees are available in public health, health services administration, health information management, and health services research. Additionally, doctorate and post-doctoral opportunities are available in health services research.

hihim@uw.edu
depts.washington.edu/hihim

Health Informatics and Health Information Management (HIHIM) offers both a Bachelor of Science degree and a postbaccalaureate certificate. Both the degree and certificate program require 65 credits, which may be completed in either one or two academic years.

Bachelor of Science

Suggested First- and Second-Year College Courses: Human anatomy and physiology (laboratory course); statistics; medical terminology; English composition; technical writing; interpersonal communication; public speaking; and distribution of general education and Areas of Knowledge courses

Admission Requirements

Admission is competitive. Admission is for summer quarter.

Early Admission

1. Application for early admission submitted between November and February 15
2. All courses required for admission must be completed at the time of application:
 - a. Statistics
 - b. Human anatomy and physiology (laboratory preferred)
 - c. Medical terminology: Available at various community colleges. (UW students who take CLAS 205 must contact the HIHIM Department for completion information.)
3. Minimum 90 transfer or UW credits completed at time of application
4. Transfer applicants apply to UW Admissions for summer quarter and also submit the HIHIM application to the HIHIM Department.
5. Current UW students submit the HIHM application to the HIHIM Department.
6. Returning UW students (one or more quarters of non-enrollment) submit the returning student application to the UW Registrar's Office and the HIHIM application to the HIHIM Department.
7. Acceptance to the one-year schedule is competitive.
 - a. Minimum 115 earned UW or transferable credits
 - b. Basic skills and Areas of Knowledge completed by the start of summer quarter
8. Grades
 - a. Minimum cumulative 2.50 overall GPA
 - b. Minimum cumulative 2.50 GPA in courses required for admission
 - c. Minimum 2.0 grade in each course required for admission

Regular Admission

1. Application for regular admission submitted mid-January to April 15
2. Priority given to applicants with all courses completed at time of application:
 - a. Statistics
 - b. Human anatomy and physiology (laboratory preferred)
 - c. Medical terminology: Available at various community colleges. (UW students who take CLAS 205 must contact the HIHIM Department for completion information.)
3. Minimum 90 transfer or UW credits completed at time of application
4. Transfer applicants apply to UW Admissions for summer quarter and also submit the HIHIM application to the HIHIM Department.
5. Current UW students submit the HIHM application to the HIHIM Department.
6. Returning UW students (one or more quarters of non-enrollment) submit the returning student application to the UW Registrar's Office and the HIHIM application to the HIHIM Department.
7. Acceptance to the one-year schedule is competitive.
 - a. Minimum 115 earned UW or transferable credits

b. Basic skills and Areas of Knowledge completed by the start of summer quarter

8. Grades

- a. Minimum cumulative 2.50 overall GPA
- b. Minimum cumulative 2.50 GPA in courses required for admission
- c. Minimum 2.0 grade in each course required for admission

Major Requirements

65 credits

1. HIHIM 407, HIHIM 408 , HIHIM 409, HIHIM 410, HIHIM 412, HIHIM 413, HIHIM 420, HIHIM 421, HIHIM 450, HIHIM 454, HIHIM 455, HIHIM 460, HIHIM 462, HIHIM 470, HIHIM 480
2. Minimum 2.0 cumulative and minimum 2.0 grade in all courses applied to the major

In addition to major requirements shown above, students complete the general education requirements for the School of Public Health.

For additional information on application and program completion requirements, visit the [Health Informatics and Health Information Management program website](#).

Continuation Policy

All students must make satisfactory academic progress in the major. Failure to do so results in probation, which can lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Postbaccalaureate Certificate

Admission Requirements

Admission is competitive. Admission is for summer quarter.

Early Admission

1. Baccalaureate degree from an accredited college or university with a minimum 2.50 cumulative GPA.
2. Application submitted between November and February 15
3. Courses, as indicated below, completed at the time of application
 - a. Human anatomy and physiology (laboratory course)
 - b. Statistics (any discipline)
 - c. Medical terminology

Requisite professional knowledge and skills pertaining to human anatomy and physiology; basic computer applications such as spreadsheets, data bases, word processing, or introductory programming; principles of management; statistics (any discipline); and medical terminology may be considered on a case-by-case basis.

4. Grades

- a. Minimum overall 2.50 cumulative GPA
- b. Minimum 2.0 grade in each course required for admission

c. Minimum 2.50 cumulative GPA in courses required for admission

Regular Admission

1. Baccalaureate degree from an accredited college or university with a minimum 2.50 cumulative GPA.
2. Application submitted mid-January to April 15
3. Courses required for admission. (Priority given to applicants with all courses completed at the time of time of application.)
 - a. Human anatomy and physiology (laboratory course)
 - b. Statistics (any discipline)
 - c. Medical terminology

Requisite professional knowledge and skills pertaining to human anatomy and physiology; basic computer applications such as spreadsheets, data bases, word processing, or introductory programming; principles of management; statistics (any discipline); and medical terminology may be considered on a case-by-case basis.

4. Grades
 - a. Minimum overall 2.50 cumulative GPA
 - b. Minimum 2.0 grade in each course required for admission
 - c. Minimum 2.50 cumulative GPA in courses required for admission

Certificate Requirements

65 credits

1. HIHIM 407, HIHIM 408, HIHIM 409, HIHIM 410, HIHIM 412, HIHIM 413, HIHIM 420, HIHIM 421, HIHIM 450, HIHIM 454, HIHIM 455, HIHIM 460, HIHIM 462, HIHIM 470, HIHIM 480
2. Minimum 2.0 cumulative and minimum 2.0 grade in all courses applied to the certificate

For additional information, visit the [Health Informatics and Health Information Management website](http://www.washington.edu/students/gencat/academic/hserv.html).

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The bachelor's degree program is designed to prepare individuals for careers in the management and use of healthcare information, and prepares students for the Registered Health Information Administrator (RHIA) national certifying examination of the American Health Information Management Association. The program gives students the tools to work in a wide variety of healthcare positions upon graduation, including health information management, health informatics with emphasis on electronic health records, healthcare quality improvement, decision support analysis, research, health insurance, and consulting. Graduates pass a national credential examination, with a majority working within the health information management field.
- *Instructional and Research Facilities:* None
- *Honors Options Available:* None

- *Research, Internships, and Service Learning:* Students complete two internships, one of which is the capstone project.
- *Department Scholarships:* None
- *Student Organizations/Associations:* Students are invited to join the health information management professional association at reduced rates.

Graduate Program

Graduate Program Coordinator
(206) 616-2926
hservmph@uw.edu

The Department of Health Services offers a two-year graduate program in health services leading to the Master of Public Health or Master of Science degree. The MPH degree prepares future health practitioners, managers, and researchers to conduct the unfinished work of improving the well being of communities in the United States and throughout the world. Graduates take jobs in health system management, health program design and evaluation, health promotion, public health practice, and policy analysis. Among other options, the department offers an MPH in community-oriented public health practice (COPHP). This program uses problem-based learning methods, and integrates classroom instruction and experiential fieldwork to prepare students to work in community and public health practice settings. Students may also pursue any of the MPH specialty options. The department also offers a three-year extended degree program in community health management, leading to the MPH degree for employed professionals working fulltime.

The department also maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). In addition, an executive version of the traditional MHA degree, designed for mid-career healthcare professionals, is offered. The MHA degree provides full academic preparation for careers in management and policy positions in health systems, hospitals, medical groups, health plans, and other types of healthcare organizations.

The department, in conjunction with UW Professional and Continuing Education, offers a fee-based master's degree in Health Informatics and Health Information Management.

The department offers a PhD in health services and participates in the training of doctoral fellows.

Master of Public Health

For current listings of MPH options and their requirements, see the [MPH program website](#).

Admission Requirements

1. One set of official transcripts from all institutions of higher learning
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)
3. Test of English as a Foreign Language (TOEFL) scores, if applicable.

4. Written statement, including a description of the applicant's professional background, career goals, and educational objectives
5. Three recent letters of recommendation, preferably from former supervisors and teachers.
6. An in-person or telephone interview with a Health Services faculty person is highly recommended. Complete applicaiton details can be viewed at depts.washington.edu/hservmph/admission.

Degree Requirements

63 credits for each program (specialty option) listed below. For detailed requirements, see depts.washington.edu/hservmph.

Community-Oriented Public Health Practice Program

63 credits, to include:

1. Problem-based learning (PBL) core curriculum - 36 credits
2. Integrated fieldwork - 6 credits (first year)
3. Seminars - 6 credits
4. Capstone project - 9 credits (second year)
5. Electives - 6 credits from School of Public Health and Community Medicine and other schools/colleges at the UW, as appropriate

Health Systems and Policy

63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 credits are from Health Services courses.
2. 3 credits - practicum
3. Thesis or capstone project: 9 credits

Maternal and Child Health

63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 credits are from Health Services courses.
2. Practicum: 3 credits
3. Thesis: 9 credits

Social and Behavioral Sciences

63 credits, to include:

1. At least 30 credits from graduate-level-in-classroom courses of which at least 18 credits are from Health Services courses.

2. Practicum: 3 credits

3. Thesis: 9 credits

Master of Health Administration

See UW General Catalog listing at

www.washington.edu/students/gencat/academic/health_services_administration.html.

Master of Science

Admission Requirements

For current information, see the [MS program website](#).

1. One set of official transcripts from all institutions of higher learning
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)
3. Test of English as a Foreign Language (TOEFL) scores, if applicable
4. Written statement, including a description of the applicant's professional background, career goals, and educational objectives
5. Three recent letters of recommendation, preferably from former supervisors and teachers
6. An in-person or telephone interview with a Health Services faculty person is highly recommended

Degree Requirements

Minimum 63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 are from Health Services courses
2. Participation in a program research seminar Either HSERV 587, HSMGMT 513, or HSMGMT 514
3. Thesis: 9 credits

Master in Health Informatics and Health Information Management

The Master of Health Informatics and Health Information Management (MHIHIM) program prepares individuals for leadership in health informatics and technology, enterprise information management, and health administration. The curriculum pairs advanced health informatics and health information management courses with master of health administration courses.

The program trains professionals from the fields of health information management, health administration, business, information technology, and healthcare, to strategically lead, develop, and direct health information initiatives and systems. Graduates are prepared to take on senior management roles in this rapidly growing segment of the industry. The program prepares graduates for work in diverse healthcare delivery systems, such as hospitals, clinics, consulting and vendor organizations, and government agencies.

The MHIHIM program develops professionals who understand and assess the delivery system landscape and the growing role of enterprise information governance, technology drivers, and changing requirements for sharing health and patient information through exchange practices.

The curriculum enables students to build and enhance current strengths and acquire new skills. Students study comprehensive management strategies and apply practical methods in planning, analyzing, and manipulating health data to meet institutional needs and resource management. Students address data and technology management policies and tools. They learn to market, design, sponsor, and apply problem solving techniques to complex situations. In addition, students expand their collaboration and communication skills to participate in, and lead, high level leadership teams. Team-based learning, capstone projects, and involvement from healthcare community leaders, are all program hallmarks.

MHIHIM classes convene in Bellevue, Washington, for a three-day period (Thursday through Saturday) once each month for 21 months. Additionally once each week faculty lead students in a web-based session, ideal for practicing professionals who plan to continue their careers while gaining a graduate degree.

The program operates under a fee-based structure and is administered in collaboration with UW Professional & Continuing Education. Complete application details can be viewed at <http://www.health-informatics.uw.edu/admissions/application-details/>.

Financial Aid

Students are eligible for federal financial aid, as well as most other types of financial support that are not funded by state tuition revenues. When exploring financial aid options, students should emphasize they are applying for a fee-based program. Financial aid questions should be directed to the UW Office of Student Financial Aid (206) 543-6101, osfa@uw.edu.

Doctor of Philosophy

For the most current information, visit the [PhD program website](#).

Admission Requirements

Admission priority is given to applicants who have graduated from a master's program with high academic standing. Applicants who have a bachelor's, master's, or professional degree in a field related to health services are given preferential review. Students with only a bachelor's degree are occasionally admitted. Applicants with relevant research experience and publications are the most competitive.

Students admitted to the program generally have GRE scores in or above the 75th percentile.

International applicants must submit the results of the Test of English as a Foreign Language (TOEFL), unless they meet UW criteria for waiving the requirement. Scores must show high English language proficiency. A minimum score of 580 (paper based) or 237 (computer based) on the TOEFL is required to be considered for admission to the UW.

Degree Requirements

100 credits minimum, as follows:

1. *Required core competencies (35 credits)*: HSERV 512, HSERV 513, HSERV 514, HSERV 523, HSERV 524, HSERV 525; one of the following: HSMGMT 514, HSERV 587, or ECON 500; HSERV 522; BIOST 517, BIOST 518, or BIOST 511, BIOST 512, BIOST 513, or BIOST 514, BIOST 515; EPI 512, EPI 513
2. *Area of emphasis*: Five courses or 15 credits in an area of emphasis. Suggested areas of emphasis: economics or finance; health behavior and health promotion; occupational health; cancer prevention and control; evaluation sciences; population health - the social determinants; global health; maternal and child health; sociology/demography; bioinformatics. For a customized area of emphasis, specific courses taken are selected by the student and the adviser, based on the student's past coursework, experience, proposed dissertation topic, and future career goals.
3. Doctoral courses in advanced theory and methods in health services: 50 credits, including a minimum of 30 dissertation credits
4. Written preliminary examination
5. Written and oral general examinations
6. Dissertation
7. Dissertation defense (final examination)

Financial Aid

Every attempt is made to ensure that students admitted are not prevented from pursuing graduate studies because of inadequate finances. Some fellowships, assistantships, scholarships, and loans are available each year.

Research Facilities

In addition to using University facilities, the program has extensive links with community healthcare delivery systems and agencies for research and training.

Executive MPH

Graduate Program Coordinator
H674 Health Sciences, Box 357660
(206) 685-7580

For current information, see the [Extended MPH program website](#).

The Executive MPH degree program is a part-time, partial distance learning program delivered through a combination of intensive four-week summer sessions on the University campus, directed independent study, and four intensive weekend seminars during the academic year. The program is designed for mid-career public and community health professionals with three or more years of experience related to public health. The program provides knowledge and skills required at mid- and upper-level practice and management positions for health professionals. In addition to the core courses in health services, epidemiology, biostatistics, and environmental health, the prescribed coursework includes a broad exposure to the health-care system plus specific management training in budgets, finance, personnel management, economics, organization theory, and program planning

and evaluation. Pathways are available in health education, maternal and child health, public health practice, and oral health.

The Executive MPH degree program provides training in developing skills in the scientific base of public health, analytic methods, management and communication, and policy and advocacy, as well as training in cross-cutting issues. Graduates apply their skills directly to their careers.

Admission Requirements

1. Current employment in a public health-related agency preferred
2. Minimum three years experience in community, public, or environmental health-related field
3. Baccalaureate degree from an accredited college or university
4. Minimum 3.00 GPA in the last graded 90 quarter/60 semester hours
5. Graduate Record Examination (GRE) scores, taken within 6 years. (Applicants with MD, DO, or PhD degrees from an accredited U.S. college or university may waive the GRE requirement.)

Degree Requirements

63 credits minimum, as follows:

1. *Year 1 Required Courses:* BOST 502, EPI 511, HSERV 501, HSERV 516, HSERV 520, HSMGMT 560
2. *Year 2 Required Courses:* BOST 503, ENV H 511, HSERV 504, HSERV 522, HSMGMT 514, HSMGMT 563
3. *Year 3 Required Courses:* HSMGMT 566 (3), HSMGMT 572 (3)
4. *Thesis or Project Option:* HSERV 700 (master's thesis) or HSERV 598 (project); EPI 600/ENV H 600
5. *Practicum (required):* focus based on pathway choice
6. *Elective or Pathway Credits (required):* pathway courses may be spread out over two years. Electives may be taken at any time.

SCHOOL OF PUBLIC HEALTH HEALTH SERVICES

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

HSERV 100 Personal and Public Health (3) I&S

Provides an overview of the key components of health and wellness. Presents a balance between individual responsibility and social determinants of public health, emphasizing a holistic preventative model. Incorporates self-assessment and considers the impact of personal, family, social, cultural, and environmental factors on health.

[View course details in MyPlan: HSERV 100](#)

HSERV 204 Communicating about Health: Current Issues and Perspectives (3)

Provides an overview of health communication topics and perspectives for students who are interested in pursuing careers in the health industry and those with a research interest in health communication such as caregivers, health care administrators, marketing and public relations professionals, media planners, public health promoters, and educators, researchers and others. Offered: WSp.

[View course details in MyPlan: HSERV 204](#)

HSERV 290 Special Topics (1-6, max. 12) I&S

Explores current or evolving areas of interest in public health.

[View course details in MyPlan: HSERV 290](#)

HSERV 343 Health Behavior and Health Promotion (5)

Introduction to health behavior change and health promotion. The course will cover theoretical foundations of health behavior and health promotion, as well as how to apply theory and evidence in health promotion practice. It will also introduce strategies for implementing and evaluating health promotion programs. Offered: A.

[View course details in MyPlan: HSERV 343](#)

HSERV 346 Using Economics to Solve Today's Healthcare Problems (4) I&S

Health economics is a growing field and an important aspect of public policy. Introduces health economics and the tools economists use to analyze current issues in health care. Furthers the understanding of economics and how it is used in current debates. Prerequisite: ECON 200. Offered: jointly with ECON 346; A.

[View course details in MyPlan: HSERV 346](#)

HSERV 415 War and Health (4) I&S A. HAGOPIAN, E. KANTER

Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease,

malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with G H 419; Sp.

[View course details in MyPlan: HSERV 415](#)

HSERV 475 Perspectives in Medical Anthropology (5) I&S J. TAYLOR

Introduction to medical anthropology. Explores the relationships among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with ANTH 475.

[View course details in MyPlan: HSERV 475](#)

HSERV 476 Introduction to Applied Ethnographic Methods in Public Health (4)

Introduces practical methods of gathering ethnographic data. Students investigate a local culture, including such diverse groups as graffiti artists and dumpster divers.

[View course details in MyPlan: HSERV 476](#)

HSERV 479 Black Lives and Police Violence: Racism and the Public's Health (4) I&S, DIV C. SPIGNER

The effects of racism on health are profound and multi-dimensional. Critically analyzes theories of human behavior in relation to epidemiological concepts of race, against the backdrop of the current Black Lives Matter movement in the United States. Offered: Sp.

[View course details in MyPlan: HSERV 479](#)

HSERV 482 The Health of Populations (4) I&S, DIV

Explores what makes a population healthy or unhealthy. Examines why the United States is less healthy than all other rich countries, despite being one of the healthiest fifty years ago. Offered: jointly with G H 482.

[View course details in MyPlan: HSERV 482](#)

HSERV 488 Dark Empire: Race, Health, and British Society - Abroad (5)

Explores factors responsible for the well-being and health of black and other racial/ethnic minorities in Britain. Addresses: the National Health Service; ethnic diaspora, anti-immigration laws; urban riots; inequality, and the rise of Muslim fundamentalism and Islamophobia. Conducted in Britain.

[View course details in MyPlan: HSERV 488](#)

HSERV 490 Advanced Topics (1-6, max. 12) I&S

Explores current or evolving public health problems. Offered: W.

[View course details in MyPlan: HSERV 490](#)

HSERV 499 Independent Study in Health Services (1-12, max. 12)

Individual library or field study project selected in consultation with a faculty adviser.

[View course details in MyPlan: HSERV 499](#)

HSERV 504 Health Promotion and Behavior Change Communication ([1-3]-, max. 3)

Overview of the theory and practice of designing, producing, and evaluating public health communication campaigns, including the use of mass media. Develops greater capacity for critical judgment about the use of communication strategies for achieving public health goals.

[View course details in MyPlan: HSERV 504](#)

HSERV 507 Health Communication and Marketing for Health Promotion: Theory and Practice (3)

Discusses health communication theories and applications at the individual level (persuasion), interpersonal level (motivational) interviewing), and population level (mass media). Examines marketing principles for health promotion. Develops a health communication campaign for clients. Investigates adaptation frameworks of communication campaign cutting across cultures.

[View course details in MyPlan: HSERV 507](#)

HSERV 508 Dynamics of Community Health Practice (3)

Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with NURS 560.

[View course details in MyPlan: HSERV 508](#)

HSERV 509 Public Health and Informatics (3) A. TURNER

Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either BIME 530 or permission of instructor. Offered: jointly with BIME 533; W.

[View course details in MyPlan: HSERV 509](#)

HSERV 510 Society and Health (3)

Provides an overview of three core areas in the social and behavioral sciences of public health practice and research: social determinants of individual and population health, health promotion and disease prevention, and cultural competency and community collaboration.

[View course details in MyPlan: HSERV 510](#)

HSERV 511 Introduction to Health Services and Public Health (3-4)

History, organization, and effectiveness of U.S. healthcare and public health systems. Determinants of health, need, and utilization. Public and private financing. Supply and provision of personal and public health services. Managed care. Government and private sector roles. Prerequisite: graduate standing or permission of instructor.

[View course details in MyPlan: HSERV 511](#)

HSERV 512 Health Systems and Policy (3)

Students review and examine selected topics from literature. Includes need and access to care; theory and effects of health insurance; private and public insurance programs; managed care; costs/expenditures; availability and organization of health resources; and quality assessment and improvement. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511.

[View course details in MyPlan: HSERV 512](#)

HSERV 513 Health Policy Research (3)

Extends students' understanding of the nature of health policy and health policy development in the context of a market-based economy. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor.

[View course details in MyPlan: HSERV 513](#)

HSERV 514 Social Determinants of Population Health and Health Disparities (3)

Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor. Offered: jointly with EPI 547.

[View course details in MyPlan: HSERV 514](#)

HSERV 515 War and Health (4) A. HAGOPIAN, E. KANTER

Explores the health consequences of war (injury, infectious diseases, mental health, chronic disease, malnutrition, infrastructure) and the role of health professionals and others in preventing war (advocacy, measurement and application of epidemiology methods, promotion of social equity). Offered: jointly with G H 519; Sp.

[View course details in MyPlan: HSERV 515](#)

HSERV 516 Introduction to Health Services ([3-4]-)

Provides overview of healthcare system, exposes students to current issues and developments affecting organization and delivery of health services, helps students develop ability to frame and analyze questions and

issues related to health services. Prerequisite: registration in Extended MPH degree program.

[View course details in MyPlan: HSERV 516](#)

HSERV 517 Qualitative Research Methods: An Introduction (3)

Introduction to research skills to discern how and why humans behave relative to their health. Emphasizes planning, design, evaluation, using qualitative research procedures. Students gain an understanding of qualitative research techniques by articulating a phenomenon of interest, identifying a target population, employing proper data collection strategies, and rigorous verifying results. Offered: S.

[View course details in MyPlan: HSERV 517](#)

HSERV 518 Social and Ethical Issues (2-4, max. 4)

Presents introduction to ethical issues in public health policy and practice. Additional one credit option focuses on health administration/managed care. Coursework designed to train students in basic skills of ethical analysis and increase competency in recognizing, researching, and analyzing issues arising in public health and health services delivery.

[View course details in MyPlan: HSERV 518](#)

HSERV 519 Study Design and Causal Inference (1)

Increases depth of knowledge about causal inference in impact evaluation. Applies the elements of causal inference to impact study design and statistical analysis, including the concept of statistical conclusion validity, internal validity, construct validity, and external validity. Credit/no-credit only. Offered: A.

[View course details in MyPlan: HSERV 519](#)

HSERV 520 Methods in Applied Community Research ([0-4]-, max. 4)

Skills/knowledge necessary to conduct orderly investigation of specific problems in preparation for MPH thesis or project. Includes problem identification, posing research questions, literature review, consideration of theoretical/practical context, choosing study design, data collection, protection of human subjects, and recognizing potential errors. Prerequisite: registration in Extended MPH degree program. Credit/no-credit only.

[View course details in MyPlan: HSERV 520](#)

HSERV 521 Advanced Qualitative Methods in Anthropology and Public Health (5) *J. PFEIFFER*

Provides students with both a theoretical foundation in qualitative approaches to research in anthropology and public health and in-depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame research questions, design, appropriate research strategies that incorporate qualitative methods, and analyze data. Offered: jointly with ANTH 519/G H 538; Sp, even years.

[View course details in MyPlan: HSERV 521](#)

HSERV 522 Health Program Evaluation ([1-5]-, max. 5)

Politics, theory, methods of evaluation, from simple health programs to evaluation of large-scale interventions. Emphasizes experimental and quasi-experimental designs to estimate program impacts, as well as evaluation of program implementation. Case studies drawn from health field illustrate various types of evaluations.

Prerequisite: background in introductory statistics.

[View course details in MyPlan: HSERV 522](#)

HSERV 523 Advanced Health Services Research Methods I: Large Public Databases; Big Data (4-5)

Introduces the new big data of health services research, health claims, and survey databases. Discusses the promises and pitfalls of the data and models for analyzing the correlates of health care costs and utilization.

Prerequisite: either HSERV 511, BIOST 511/BIOST 512/BIOST 513, BIOST 517/BIOST 518, or EPI 511/EPI 512, and permission of instructor.

[View course details in MyPlan: HSERV 523](#)

HSERV 524 Advanced Health Services Research Methods II: Hierarchical and Incomplete Data (4-5)

Introduces advanced biostatistical techniques for analyzing incomplete data in population health research.

Examines a wide range of topics including: missing data and potential outcome framework for causal inference, propensity score and multiple imputation, multilevel random effect linear and logistic models, and empirical

Bayes prediction Prerequisite: either HSERV 523 or permission of instructor.

[View course details in MyPlan: HSERV 524](#)

HSERV 525 Advanced Health Services Research Methods III: Casual Inference Using Observational Data ([4-5]-)

Focuses on reviewing statistical methods developed for "micro" (individual-level) data on behavior (choices or exposures) and outcomes in order to make casual inference about the role of a choice or an exposure on outcomes. Prerequisite: either HSERV 523, BIOST 511, BIOST 512, BIOST 513, or permission of instructor.

[View course details in MyPlan: HSERV 525](#)

HSERV 527 Survey Research Methods (4) A. MOKDAD

Provides students with skills in questionnaire development and survey methods. Students develop a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511/HSERV 513; BIOST 517/BIOST 518; or EPI 512/EPI 513, which may be taken concurrently, or permission of instructor. Students should have a survey project in mind. Offered: jointly with CS&SS 527/G H 533.

[View course details in MyPlan: HSERV 527](#)

HSERV 528 Critically Appraising and Applying Evidence in Healthcare (3) F. WOLF

Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with BIME 540; W.

[View course details in MyPlan: HSERV 528](#)

HSERV 529 Introduction to Systematic Reviews and Meta-Analysis of Evidence (3) F. WOLF

Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: either introductory level courses in statistics, epidemiology, or biostatistics or permission of instructor. Offered: jointly with BIME 541/EPI 541/PHARM 529.

[View course details in MyPlan: HSERV 529](#)

HSERV 531 COPHP Population Health (3)

Considers the elements that determine a population's health including the social determinants of health. Groups are challenged to question their innate views of health and what produces it by comparing the United States with other rich and poor countries, considering structural factors affecting health. Offered: A.

[View course details in MyPlan: HSERV 531](#)

HSERV 532 COPHP Community Development (3)

Provides an introduction to understanding and working with communities on health related issues. Students work directly with community members, community advocates, and community-based service organizations to address health issues. Students learn how to employ methods of community engagement to build on local assets to address health issues. Offered: A.

[View course details in MyPlan: HSERV 532](#)

HSERV 533 COPHP Quantitative Methods (6)

Acquaints students with methods of epidemiology and biostatistics used in conceptualizing, collecting, analyzing, and interpreting quantitative data on health outcomes and risk factors with quantitative methods for evaluating programs or treatments that address health concerns in populations. Expands skills in communicating quantitative aspects of public health, using writing, tables, and graphs. Offered: W.

[View course details in MyPlan: HSERV 533](#)

HSERV 534 COPHP Environmental Health (2)

Provides an overview of the fundamental scientific principles and practices utilized in environmental public health. Examines, via case study methodologies, the occurrence of diseases resulting from environmental and occupational exposures and how they can be modified, reduced, or eliminated by incorporating various control practices. Offered: Sp.

[View course details in MyPlan: HSERV 534](#)

HSERV 535 COPHP Health Behavior and Health Promotion (4)

Provides an overview of the theory and practice of planning, designing implementing, and evaluating public health promotion problems. Helps public health professionals apply sound judgment when making decisions about identification, audience segmentation, and intervention selection. Offered: Sp.

[View course details in MyPlan: HSERV 535](#)

HSERV 536 Emerging Infections of International Public Health Importance (3-)

Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with EPI 529.

[View course details in MyPlan: HSERV 536](#)

HSERV 537 COPHP Health Policy (6)

Covers concepts and analytic tools for health policy analysis, development, and advocacy, while exploring factors affecting public health policy, including science and community values. Student write a policy statement for an advocacy organization, teach a lay audience about an issue, and arrive at policy conclusions based on quantitative data.

[View course details in MyPlan: HSERV 537](#)

HSERV 538 COPHP Program Evaluation (2)

Covers the basic concepts and approaches for program evaluation in public health. Uses one case during the quarter, which includes a final assignment requiring students to work as a team to design, not conduct, an evaluation. Offered: W.

[View course details in MyPlan: HSERV 538](#)

HSERV 539 COPHP Organizing Communities for Health (4)

Synthesizes the accumulated skills and knowledge a public health professional uses to work with communities to advance public health. Integrates a broad array of skills to bring together the perspectives of the many players and interest groups that interact in dynamic community settings. Offered: W.

[View course details in MyPlan: HSERV 539](#)

HSERV 540 COPHP Management and Leadership (6)

Explores the principles of leadership and management within the context of public health organizations. Explores the distinction between management and leadership and examines the management functions of planning, organizing, directing, and controlling the use of human and financial resources to accomplish the goals of the organization.

[View course details in MyPlan: HSERV 540](#)

HSERV 541 Topics in Maternal and Child Health I (3-)

Provides an overview of the historical and legislative basis for the major MCH health and social service policies and programs. Uses the life-course perspective to examine the social determinants of health and development of women, children, and adolescents. Pays special attention to racial inequities on the health of families.

[View course details in MyPlan: HSERV 541](#)

HSERV 542 Epidemiology of Maternal and Child Health Problems ([3-4]-) D. ENQUOBAHRIE

Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child

growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with EPI 521.

[View course details in MyPlan: HSERV 542](#)

HSERV 544 Maternal and Child Health in Low and Middle Income Countries (3) *D. DENNO*

Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with G H 544; W.

[View course details in MyPlan: HSERV 544](#)

HSERV 548 Research Methods for Social and Contextual Determinants of Health (3) *A. HAJAT, N. SMITH*

Explores study-design, measurement, analytic, and interpretation issues applicable to research on social and contextual determinants of health and health disparities. This lecture/seminar course is offered to graduate students with knowledge of epidemiologic and biostatistical principles who are interested in understanding complex relationships between social/contextual factors and health. Prerequisite: EPI 511 or EPI 512/513; and BIOST 511/512/513 or BIOST 517/518. ; recommended: Credit/no-credit only. Offered: jointly with EPI 548; W.

[View course details in MyPlan: HSERV 548](#)

HSERV 551 Public Health Law (2)

Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public health officers and healthcare industry administrators. Offered: jointly with LAW H 512.

[View course details in MyPlan: HSERV 551](#)

HSERV 552 Health Policy Development (3-)

Uses primarily case- and problem-based learning and small-group projects to focus on factors that influence public policy development concerning health services in the U.S., with some global health content. Examines the roles of science and stakeholder interests in the structure of and changes to a nation's health system. Offered: A.

[View course details in MyPlan: HSERV 552](#)

HSERV 555 Health Disparities (2)

Focuses on health disparities and health inequity in the United States. Course will cover both theoretical and empirical approaches to understanding patterns of health across social groups, with a focus on designing research and public health programs to addressing health disparities. Offered: W.

[View course details in MyPlan: HSERV 555](#)

HSERV 556 Tobacco Related Health Disparities (1/2)

Integrates multiple disciplinary perspectives to address the pressing issue of disproportionate tobacco use and related diseases among marginalized populations, including those defined by socioeconomic status, race/ethnicity, and sexual orientation. Explores links between, and intervention strategies for, smoking and mental illness, social stress, acculturation processes, and genetics. Offered: jointly with FAMED 559.

[View course details in MyPlan: HSERV 556](#)

HSERV 558 Tobacco and Public Health: Prevention, Treatment, Policy, and Social Change (1-3, max. 3)

Integrates multiple disciplinary perspectives to provide a comprehensive overview of the history, health effects, policy, prevention, and treatment of tobacco use. Utilizes readings, stimulates discussions, and hosts renowned experts to provide students with the foundation to understand and address the local, national, and global epidemic of tobacco use.

[View course details in MyPlan: HSERV 558](#)

HSERV 559 Public Policy and the Public's Health ([0-3]-, max. 3) *Watts*

Explores the factors that affect health policy and the interaction of policy, markets, and the legal system through

public health examples. Examines how science and community values intertwine in policy development²⁴⁸⁷, and how context influences the structure of and changes to a nation's health system.

[View course details in MyPlan: HSERV 559](#)

HSERV 560 Adult Learning: Theory and Practice (3)

Designed to help students apply Popular Education theory and practice to preparation, presentation, and evaluation of health education. Students design, teach, and evaluate four separate teaching sessions (one between each seminar) using theory and principles of Popular Education learned to date. Prerequisite: graduate standing or permission of instructor.

[View course details in MyPlan: HSERV 560](#)

HSERV 561 Introduction to Health Promotion Planning and Evaluation ([0-3]-, max. 3)

Links practice to theory between the planning, implementation, and evaluation of health promotion intervention and behavior change theory. Uses PRECEDE/PROCEED planning model by Green and Kreuter as framework.

[View course details in MyPlan: HSERV 561](#)

HSERV 568 Health Economics (3)

Applies microeconomics principles and models to understand the nature of health care markets and systems. Includes a wide range of health sector activities and policy issues by applying rigorous economic analytical tools coupled with review of key econometric and empirical analysis. Prerequisite: introductory coursework in microeconomic principles and basic statistics. Offered: W.

[View course details in MyPlan: HSERV 568](#)

HSERV 571 Cultural Competency for Public Health Practice ([1-4]-, max. 4)

Application of cultural competency to clinical practice, healthcare management, and health services research when working with culturally diverse populations. Methodological orientation is qualitative, historical, and ethnographic. Lecture, narratives, discussions, guest presentations, film, video. Interdisciplinary perspective appropriate for graduate students in public health, health administration, nursing, social work, and anthropology.

[View course details in MyPlan: HSERV 571](#)

HSERV 575 Cancer Prevention and Control (3)

Provides an overview of research in cancer prevention and control for students training for a career in this field. Students identify major areas of prevention and control research, conduct an analysis of data in cancer prevention and control, and learn to prepare a research project grant. Prerequisite: permission of instructor.

[View course details in MyPlan: HSERV 575](#)

HSERV 576 Health, Culture, and Community (3) *Chrisman*

A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with NURS 557; W.

[View course details in MyPlan: HSERV 576](#)

HSERV 577 Health Behavior and Preventative Medicine ([2/4]-, max. 4)

Focuses on psychosocial and cultural factors related to health, preventive health behavior, illness perception, and behavior; theoretical basis for prevention; the interaction of consumers and providers in the delivery of healthcare services; and clinic and community based applications.

[View course details in MyPlan: HSERV 577](#)

HSERV 578 Preparing, Writing, and Critiquing Scientific Research Proposals (2-3) *A. FITZPATRICK, L. KESSLER*

Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Prerequisite: second-year graduate student (PhD)

recommended), or PhD or MD in health-related field. Credit/no-credit only. Offered: jointly with EPI 588.

[View course details in MyPlan: HSERV 578](#)

HSERV 580 Foundations of Health Behavior and Social Determinants of Health (2)

Provides an overview of core areas of health behavior and social determinates of health, including: social determinants of health; population health and health disparities; community engagement; and working effectively in diverse communities. Offered: A.

[View course details in MyPlan: HSERV 580](#)

HSERV 581 Strategies of Health Promotion (4)

Assessment of health promotion planning, implementation, and evaluation strategies for their strengths, weaknesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influencing their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities. Prerequisite: HSERV 511.

[View course details in MyPlan: HSERV 581](#)

HSERV 583 Economic Evaluation in Health and Medicine (3)

Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Instructors: Garrison, Veenstra Offered: jointly with PHARM 534.

[View course details in MyPlan: HSERV 583](#)

HSERV 584 Assessing Outcomes in Health and Medicine (3)

Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Instructors: Devine, Edwards Offered: jointly with PHARM 535; W.

[View course details in MyPlan: HSERV 584](#)

HSERV 585 Seminar in Medical Geography (5, max. 10) Mayer

Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with GEOG 581.

[View course details in MyPlan: HSERV 585](#)

HSERV 586 Medical Geography (3)

Geography of disease, consideration in health systems planning. Analysis of distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research; health-related issues. Instructors: Mayer Offered: jointly with GEOG 580.

[View course details in MyPlan: HSERV 586](#)

HSERV 587 Health Policy Economics (3)

Applies economic theory to selected topics in healthcare, including information, risk and insurance, industry organization, government regulation, and public health issues. Emphasizes policy implications of these applications. Offered: jointly with ECON 547.

[View course details in MyPlan: HSERV 587](#)

HSERV 589 Community Based Participatory Research and Health (3)

Begins with a research topic of importance to the community with the aim of combining knowledge and action for social change. Provides an understanding of principles and strategies, and appreciate of its advantages and limitations, and skills for participating effectively.

[View course details in MyPlan: HSERV 589](#)

HSERV 590 Selected Topics in Health Services (*-, max. 30)

Explores current or evolving public health problems. Prerequisite: permission of instructor.

[View course details in MyPlan: HSERV 590](#)

HSERV 591 Community Oriented Public Health Practice (1-6, max. 42)

Seven-quarter integrated sequence covers public health aspects of community assessment, biostatistics, epidemiology, health promotion/disease prevention, behavior change, environmental health, community development, policy development and analysis, and program planning and management. It is taught in a problem-based format. Prerequisite: enrollment in the COPHP program.

[View course details in MyPlan: HSERV 591](#)

HSERV 592 Program Seminars (1-6, max. 20)

Graduate seminars organized to address specific educational needs of students in various fellowships, residencies, and other specialized programs within the Department of Health Sciences (i.e., maternal and child health, international health, preventive medicine, social and behavioral sciences). Prerequisite: permission of instructor.

[View course details in MyPlan: HSERV 592](#)

HSERV 595 Practicum/Field Work in Community Medicine ([1-12]-, max. 12)

Experience in variable time blocks in community health activities in agencies delivering and planning health services. Sites include neighborhood clinics, health planning bodies, medical practice settings, public health agencies, special problem clinics and facilities, environmental programs and services. Prerequisite: master's student in health services and permission of instructor.

[View course details in MyPlan: HSERV 595](#)

HSERV 598 Extended Degree Program Project Option (*, max. 9)

Supervised project work on a selected topic related to student's concentration in graduate study. Includes survey of literature, development of approach, and written paper on conclusions. Prerequisite: registration in extended MPH degree program and satisfactory completion of the first summer's coursework.

[View course details in MyPlan: HSERV 598](#)

HSERV 599 Capstone Project (*-)

Applies and extends the public health skills learned to other settings, develops new skills, expands a professional network, and provides specialized knowledge that can be used to advance the student's future career and effectiveness in public health.

[View course details in MyPlan: HSERV 599](#)

HSERV 600 Independent Study or Research (*-)

Prerequisite: permission of instructor.

[View course details in MyPlan: HSERV 600](#)

HSERV 700 Master's Thesis (*-)

Prerequisite: permission of instructor.

[View course details in MyPlan: HSERV 700](#)

HSERV 800 Doctoral Dissertation (*-)

SCHOOL OF PUBLIC HEALTH

HEALTH SERVICES

HEALTH SERVICES MANAGEMENT

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

HSMGMT 500 Risk and Insurance Seminar (3)

Presents the principles and practices of health insurance and risk. Emphasizes healthcare financing arrangements in the United States, including both private and government-sponsored (public) programs. Discusses comparisons with other developed countries.

[View course details in MyPlan: HSMGMT 500](#)

HSMGMT 501 Epidemiology/Critical Evidence Appraisal (2-4, max. 4)

Basic knowledge about methods used in epidemiology and their application to critical appraisal of clinical, epidemiological, and health administration literature for evidence-based management of healthcare organizations, improvement of delivery of health services, and for creating health policies.

[View course details in MyPlan: HSMGMT 501](#)

HSMGMT 503 Population Health Management (2)

Provides health administration students with an introduction to managing the health of defined populations. Examples include: the population within the catchment area of a hospital, the members of a health maintenance organization, the persons served by an accountable care organization, and the population employed in an workplace.

[View course details in MyPlan: HSMGMT 503](#)

HSMGMT 505 Managing Healthcare Organizations (2-4)

Introduces healthcare organizations and organizational management concepts. Develops a broad perspective by integrating conceptual, strategic, and systemic frameworks using four knowledge themes; the management role, organizational theory, management economics, and theory and practice of systemic organizational change within overall strategic management and systemic contexts.

[View course details in MyPlan: HSMGMT 505](#)

HSMGMT 506 Introduction to Clinical Care (2)

Introduces the world of clinical care. Discovers through readings, discussion, and direct experience, the people and processes of clinical care and how they relate to healthcare administration.

[View course details in MyPlan: HSMGMT 506](#)

HSMGMT 507 Group Dynamics and Team Leadership ([1-4]-, max. 4)

Focuses on theories and observations of team behaviors and techniques with emphasis on the individual as a team member; introduces team management/leadership models, theories, and skills. Students develop self-awareness, knowledge, and skills associated with building interpersonal relationships. Credit/no-credit only.

[View course details in MyPlan: HSMGMT 507](#)

HSMGMT 510 Organizational Behavior (3-4)

Application of organizational behavior theory to explore the factors that affect behavior, performance, and job satisfaction of people working in organizations. Provides a body of knowledge and skills needed to successfully manage and lead healthcare organizations. Focuses on "best practices" for managing individuals, teams, and organizations.

[View course details in MyPlan: HSMGMT 510](#)

HSMGMT 513 Seminar in Healthcare Finance (3-4)

Focuses on case studies and modern theory in managerial finance relevant to health services. Students prepare group presentations and individual case study analyses of health services finance problems. Builds on accounting and finance principles.

[View course details in MyPlan: HSMGMT 513](#)

HSMGMT 514 Health Economics (3/4)

Uses economic concepts and tools to examine range of issues pertaining to healthcare, delivery of healthcare services. Includes demand analysis, production of health services, expenditure growth, markets for hospital and physician services, externalities. Emphasis on using economics to examine issues and solve problems. Prior economics courses not required.

[View course details in MyPlan: HSMGMT 514](#)

HSMGMT 515 Advanced Economics - Decision Analysis ([1-3]-, max. 3)

Develops skills to become informed consumers of economic evaluations of health programs. Develops skills necessary to conduct economic analyses of public health and health service programs.

[View course details in MyPlan: HSMGMT 515](#)

HSMGMT 518 Ethical Issues in Health Services (2-3)

Presents an introduction to ethical issues that arise in management of health services organizations. Covers clinical and organizational ethics.

[View course details in MyPlan: HSMGMT 518](#)

HSMGMT 523 Informatics in Healthcare Management (3)

Medical informatics concerns the representation, organization, and manipulation of biomedical information and knowledge. Exposes students to a high-level understanding of informatics and its healthcare applications. Discussion of successes and failures in implementing information technology focuses on gaining leadership and management knowledge that embraces informatics.

[View course details in MyPlan: HSMGMT 523](#)

HSMGMT 531 Systems Modeling Frameworks for Healthcare (3)

Focuses on methodologies to support strategic decision making in a systems context, considering the material, patients, providers, information, and resource dependencies of most healthcare organizations. Includes optimization models and basic alternative evaluation methods for the applications of capacity planning, policy investigation, and design and planning decisions. Offered: W.

[View course details in MyPlan: HSMGMT 531](#)

HSMGMT 532 Quantitative Methods for Health Systems Design and Analysis (3)

Focuses on the method and application of operations research in health systems design and analysis. Covers a variety of topics in healthcare management and decision making. Healthcare decision making touches areas in resource allocation, scheduling, staffing, capacity planning, cost-effectiveness analysis, and assessment of

medical technologies. Offered: W.

[View course details in MyPlan: HSMGMT 532](#)

HSMGMT 545 Capstone Integrative Seminar ([1-4]-, max. 4)

Designed to assist students in the transition from theory to practice. Emphasis on sharpening analytical and intuitive leadership practices through the use of interactive case studies, team building exercises, and field projects. Prerequisite: second-year MHA students.

[View course details in MyPlan: HSMGMT 545](#)

HSMGMT 550 Medical Practice Quality Measurement and Management (3)

Provides an overview of healthcare industry themes regarding cost, access, and quality. Concentrates on definition, measurement, and improvement of quality. Shows how quality measurements and specifications; the concept of value, guidelines, and pathway; and the evidence-based medicine movement interconnect. Utilizes examples of cutting edge programs to apply and promote improvement.

[View course details in MyPlan: HSMGMT 550](#)

HSMGMT 552 Health Administration and Business Law (4)

Studies numerous interrelated legal topics pertinent to healthcare organizations, typically including contracts, medical malpractice, legal and ethical obligations to provide healthcare, privileging, medical decision-making, tax-exemption, antitrust, fraud, and health information management. Encourages discussion of how the law supports or hinders current efforts to improve healthcare delivery systems.

[View course details in MyPlan: HSMGMT 552](#)

HSMGMT 553 Healthcare Marketing Strategy (2)

Provides an understanding of wholesale and retail markets in the healthcare sector. Examines market research and the application of marketing strategies and tactics to support an organization's core strategies. Applies the concepts of market segmentation, targeting, and positioning to decisions about design, distribution, pricing, and promotion of health services.

[View course details in MyPlan: HSMGMT 553](#)

HSMGMT 554 Entrepreneurship (2)

Focuses on developing students' resourcefulness, know how, and decision support skills needed to critically identify, evaluate, and develop new healthcare ventures. Topics include anatomy of startup ventures; new venture creation and innovation, business plan development and assessment, financing, marketing, and growth strategies; and corporate venturing.

[View course details in MyPlan: HSMGMT 554](#)

HSMGMT 560 Management Practice in Healthcare and Public Health Organizations (1-4, max. 4)

Introduction to leadership and management, focusing on effective strategies for creating a productive work environment. Organizational structure and strategy introduced. Case studies and other problem-solving methods, using health services applications, are utilized in order to apply theoretical material. Prerequisite: graduate student.

[View course details in MyPlan: HSMGMT 560](#)

HSMGMT 562 Strategic Management of Healthcare Organizations (3-5)

Management of goals, strategy, and structure in healthcare organizations. Design of external relationships and internal structures., strategy-formulation, decision-making, and change. Integration of professional, social, and organizational values. Theory, student and practitioner experience, and case studies used to enhance repertoire of management approaches and skills. Prerequisite: HSERV 511 and HSMGMT 560 or equivalent.

[View course details in MyPlan: HSMGMT 562](#)

HSMGMT 563 Personnel Management for Health Professionals ([1-3]-, max. 3)

Designed for midcareer health services professionals developing strategies and skills in human resource management. Focuses on policy and practice issues important to handling day-to-day personnel problems-selection, promotion, performance appraisal, discipline, grievances. Prerequisite: registration in Extended MPH

degree program or permission of instructor; non-business majors.

[View course details in MyPlan: HSMGMT 563](#)

HSMGMT 566 Decision Support Models for Health Services (3)

Management science and approaches developed as applied to problems in public health. Emphasizes conceptual understanding of processes/application of systematic and rational approach to managerial problem solving, including cost-benefit, cost effectiveness analysis. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH degree program; non-business majors.

[View course details in MyPlan: HSMGMT 566](#)

HSMGMT 567 Clinical Systems Management (3)

Introduces the management of clinical systems and their underlying cultures. Focuses on quality improvement, change management, governance, and clinical leadership development of physician-administrator partnerships in complex medical care settings.

[View course details in MyPlan: HSMGMT 567](#)

HSMGMT 568 Quality Process Management (3-4)

Provides a thorough understanding of the main concepts of operations management with a focus on total quality management techniques, along with key integrative frameworks that provide the foundation for successful applications of these approaches, as applied to healthcare organizations.

[View course details in MyPlan: HSMGMT 568](#)

HSMGMT 570 Quantitative Methods (3-4)

Concentrates on fundamental concepts of statistics and their application to healthcare management. Approaches statistics from two different perspectives that benefit leaders in healthcare: that of biostatistics and evidence based medicine, and that of management statistics for process improvement.

[View course details in MyPlan: HSMGMT 570](#)

HSMGMT 571 Healthcare Financial Management (3)

Focuses on the tools and analytic frameworks that healthcare managers use to make prospective forward-looking decisions. Problems worked in-class and assigned as homework to ensure that participants develop competencies and confidence in applying the analytic tools and frameworks. Prerequisite: HSERV 511 and ACCTG 500 or ACCTG 501 or permission of instructor. Offered: W.

[View course details in MyPlan: HSMGMT 571](#)

HSMGMT 572 Financial Management for Health Professionals (3)

Intensive review of basic accounting principles/terminology and an introduction to financial management/managerial accounting, including budgeting for managerial control, planning, cost accounting, financing health programs. Managerial accounting, program costing, rate setting, budget preparation. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH degree program or permission of instructor; non-business majors.

[View course details in MyPlan: HSMGMT 572](#)

HSMGMT 574 Financial Management I (3-4)

Prepares clinical professionals for participating intelligently in, and contributing to, financial decisions of healthcare organizations. Learn the language and fundamental concepts of accounting and finance, and become comfortable with what is required in formal financial analysis.

[View course details in MyPlan: HSMGMT 574](#)

HSMGMT 576 Capital Planning (2)

Emphasizes preparing clinical executives for managerial and leadership in healthcare organizations. Key concepts include capital cycle, creditworthiness, financial planning, cost of capital, capital structure, and capital allocation.

[View course details in MyPlan: HSMGMT 576](#)

HSMGMT 577 Environment of Care (2)

Addresses the basic issues of the "environment of care." Explores the physical environments in which care is provided to patients, JCAHO standards provide the core structure. Uses real world experiences and examples.

[View course details in MyPlan: HSMGMT 577](#)

HSMGMT 578 Project Management (2)

Introduces need for, concepts of, and tools and techniques used in contemporary project management. Builds upon prior courses and experience in leadership, management, planning, and team development. Focuses on difference between management of ongoing operations and of projects, and the need for a disciplined approach when planning and executing projects.

[View course details in MyPlan: HSMGMT 578](#)

HSMGMT 579 Accounting for Health Service Managers (3)

Emphasis on preparing graduate students for management and leadership roles in their healthcare organizations. Covers financial accounting including the accounting equation, journal entries, and processes of accounting.

[View course details in MyPlan: HSMGMT 579](#)

HSMGMT 590 Select Topics (1-6, max. 12)

By arrangement, students and faculty members develop a program of reading and conference appropriate to the selected topic. Topic chosen is within the special competence of the participating faculty member, in the area of health services management.

[View course details in MyPlan: HSMGMT 590](#)

HSMGMT 592 Health Management Program Seminar (1-6, max. 6)

[View course details in MyPlan: HSMGMT 592](#)

SCHOOL OF PUBLIC HEALTH HEALTH SERVICES HEALTH INFORMATICS & HLTH INFORMTN MGMT

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

HIHIM 405 Introduction to Health Data Analytics (3)

Covers the process of and tolls used in evaluating data using analytical and logical reasoning to examine each component of the health data. Offered: jointly with BIOS 405.

[View course details in MyPlan: HIHIM 405](#)

HIHIM 407 Foundations for Healthcare Vocabularies (3)

Focuses on health concepts, documentation, healthcare taxonomies, and clinical vocabularies, terminologies, classifications, and nomenclatures required for health data analysis, clinical coding, and clinical systems associated with the electronic health record.

[View course details in MyPlan: HIHIM 407](#)

HIHIM 408 Management Concepts with HIM Applications (4)

Covers management principles from a health information management perspective and core management functions of planning, organizing, staffing, delegating, leading, and controlling; theories of management, both traditional and contemporary; leadership concepts in HIM; change management; human resource management; employment law; performance management, and HIM organizational structure.

[View course details in MyPlan: HIHIM 408](#)

HIHIM 409 Disease Concepts for Managers (4)

Develops a methodology for understanding and communicating dimensions of disease states as all health state that a person might experience. Presents clear, effective ways to describe the diversity of health conditions and focuses on disease from a health information systems perspective.

[View course details in MyPlan: HIHIM 409](#)

HIHIM 410 Foundations in Health Information Management (4)

Focuses on the basic of health information through study of the creation and maintenance of health records, access to and retention of health information, accreditation, licensure and professional standards in acute care

hospitals and alternate care facilities.

[View course details in MyPlan: HIHIM 410](#)

HIHIM 411 Health Data Management (3)

Addresses the governance and management of healthcare data through exploration of data assets and linking the assets to standards and quality.

[View course details in MyPlan: HIHIM 411](#)

HIHIM 412 Healthcare Coding (5)

Covers healthcare coding principles for International Classification of Diseases (ICD) and Current Procedural Terminology (CPT) code sets used in diagnosis and procedure code assignments for research and reimbursement by healthcare providers in all settings. Prerequisite: HIHIM 409.

[View course details in MyPlan: HIHIM 412](#)

HIHIM 413 Revenue Cycle Management (3)

Covers the revenue cycle management of health information administration.

[View course details in MyPlan: HIHIM 413](#)

HIHIM 414 ICD, Clinical Documentation and Revenue Management (3)

In depth study of ICD code sets for diagnosis and procedure coding, clinical documentation to support ICD code assignment, and reimbursement methodologies which use the ICD code set to determine payment models.

[View course details in MyPlan: HIHIM 414](#)

HIHIM 415 CPT/HCPCS, Clinical Documentation and Revenue Management (5)

in depth study of CPT/HCPCS code sets for procedure coding, clinical documentation to support CPT/HCPCS code assignment, and reimbursement methodologies which use the CPT/HCPCS code sets to determine payment models.

[View course details in MyPlan: HIHIM 415](#)

HIHIM 420 Healthcare Computer Systems and Electronic Health Records (5)

Current health information systems and the role of health informatics; technology infrastructure and health informatics standards, electronic health records, definitions, functions, issues, and barriers; hospitals, ambulatory care, home health and long-term care and computer applications. Prerequisite: HIHIM 410; HIHIM 411.

[View course details in MyPlan: HIHIM 420](#)

HIHIM 421 Health Information Systems Analysis (5)

Examines lifestyle systems development process and tools, project management and team coordination, analysis of health information systems, and user requirements. Prerequisite: HIHIM 420.

[View course details in MyPlan: HIHIM 421](#)

HIHIM 425 Research Design and Statistics for HIHIM (3)

Explores healthcare and research statistics. Addresses hospital statistics, used to calculate usage levels of healthcare resources and outcomes of clinical operations, and research statistics, used to summarize and describe significant characteristics of a data set, and to make inferences about a population based on data collected from a sample. In addition, principles of research are described, including the Institutional Review Board process. Offered: jointly with BIOS 406/STAT 406.

[View course details in MyPlan: HIHIM 425](#)

HIHIM 450 Healthcare Delivery and Policy (3)

Addresses the organization of healthcare services across the spectrum of healthcare delivery systems - both governmental (federal, state, local) and private. Financing of healthcare services and related policy issues are explored.

[View course details in MyPlan: HIHIM 450](#)

HIHIM 454 Finance Concepts for Healthcare Managers (4)

Covers financial concepts applied to today's healthcare environment, financial management tools, and budgeting.

[View course details in MyPlan: HIHIM 454](#)

HIHIM 455 Professionalism and Leadership (4)

Professional development, leadership assessment and ethics, interpersonal skills and effective communication, and human resource management requirements.

[View course details in MyPlan: HIHIM 455](#)

HIHIM 456 Quality Assurance and Research in Healthcare (5)

Quality improvement, risk management, and utilization management in healthcare; design and analysis of quality improvement systems, including use of data systems in quality assurance and research; health data retrieval, analysis and presentation, and review of relevant healthcare informatics research. Prerequisite: statistics; medical terminology.

[View course details in MyPlan: HIHIM 456](#)

HIHIM 460 Professional Pathways (3)

Explores the development of management skills and competencies, and a seminar through site experience in healthcare facilities with campus and clinical faculty. Prerequisite: HIHIM 410

[View course details in MyPlan: HIHIM 460](#)

HIHIM 461 Professional Development and Networking (2)

Addresses the professional portfolio and mentoring, and preparation for the national credentialing examination for Registered Health Information Administrator (RHIA).

[View course details in MyPlan: HIHIM 461](#)

HIHIM 462 Capstone Project (5)

Explores applied management using a formal capstone project in a healthcare setting. Prerequisite: HIHIM 460.

[View course details in MyPlan: HIHIM 462](#)

HIHIM 470 Legal Concepts for Health Fields (3)

Examines principles of law as applied to the health field, with reference to health information management.

[View course details in MyPlan: HIHIM 470](#)

HIHIM 480 Management, Problem-Solving, and Decision-Making (5)

Provides the tools and experiences useful at a management level for problem-solving and decision-making in health information administration.

[View course details in MyPlan: HIHIM 480](#)

HIHIM 490 Special Topics (1-5, max. 15)

[View course details in MyPlan: HIHIM 490](#)

HIHIM 499 Independent Study (1-5, max. 5)

[View course details in MyPlan: HIHIM 499](#)

HIHIM 508 Health Information Management systems and Leadership (3)

Provides a high level framework of health informatics and health information management practice. Covers practice related systems with emphasis on enterprise information governance, patient record organization, content and structure, and associated enterprise business functions and processes to provide foundation for understanding the practice. Offered: A.

[View course details in MyPlan: HIHIM 508](#)

HIHIM 510 Enterprise Systems and Electronic Health Records (3)

Covers industry drivers, development, compliance framework, and certification of electronic health record

systems status and operations addressed through strategic decision making and leadership: data movement²⁴⁹⁸ among enterprise clinical, business, administrative systems to legal health record; and barrier and benefit assessment within major institutional culture and technology initiative changes. Offered: A.

[View course details in MyPlan: HIHIM 510](#)

HIHIM 520 Law, Policy, and Ethics in Health Informatics and Health Care (3)

Explores the laws, policies, and issues involved in oversight and management of health data and health information systems. Defines the legal health record and the requirements, role, and uses. Covers the legal and ethical framework, issues and concepts, and the role of e-discovery on the emerging health data environment. Offered: W.

[View course details in MyPlan: HIHIM 520](#)

HIHIM 525 Database Concepts and Applications in Health Informatics (3)

Provides an overview of data models, architecture platforms, and relational database theory and technology. Covers design and uses of databases in patient record systems, registries and indexes, and health databases, security, privacy and ethical issues, database design, data integrity, field properties, tables, reports, queries, and data retrieval. Offered: Sp.

[View course details in MyPlan: HIHIM 525](#)

HIHIM 530 Privacy and Security in Electronic Environments (3)

Covers the laws, regulations, policies, and practice related to the confidentiality, privacy, and security of health information in an electronic environment. Federal and state laws and regulations require specific performance in the acquisition, use, storage, and maintenance of health information. Examines systems and practices. Offered: Sp.

[View course details in MyPlan: HIHIM 530](#)

HIHIM 535 Clinical Vocabularies, Terminologies, Classifications, and Mapping (3)

Covers clinical terminologies, classifications, and mapping, which provides information on taxonomies and metadata, information objects, and classification theory in organizing information in an electronic system. Includes current initiatives in terminologies and data mapping in electronic health record systems. Offered: S.

[View course details in MyPlan: HIHIM 535](#)

HIHIM 540 Consumer Health Informatics (3)

Covers community and consumer health informatics associated with health services provides; electronic health records that address internal and external standards; accreditation and regulatory requirements needed to provide quality care; and health information exchange from policy to implementation. Offered: A.

[View course details in MyPlan: HIHIM 540](#)

HIHIM 550 Healthcare Data Management - Health Record to Enterprise (3)

Covers the conceptualization, design, and management of data initiatives and knowledge needed by the healthcare enterprise. Reviews data integrity principles and guidelines to determine methodology for evaluation development and management of internal and external information requirements. Offered: W.

[View course details in MyPlan: HIHIM 550](#)

HIHIM 555 EHR/Hi Systems Operations and Improvement (3)

Addresses leadership and management of an organization's health information assets that are required as the nation transitions to interoperable health information systems. Offered: A.

[View course details in MyPlan: HIHIM 555](#)

HIHIM 556 Environment of Care (3)

Explores the current healthcare environment related to healthcare safety issues. Examines an overview of major health and safety challenges and responses; focusing on the impact of the issues in improving health and safety in healthcare and information resources needed. Offered: Sp.

[View course details in MyPlan: HIHIM 556](#)

HIHIM 560 Special Topics in Health Informatics (3)

Presents problem solving opportunities on health industry information issues, strategies and unmet challenges. Topics reflect the current state, progress, and future expectations faced by healthcare and health information managers.

[View course details in MyPlan: HIHIM 560](#)

HIHIM 598 Project Management (3)

Focuses on applying leadership readiness at the enterprise level; informatics and information governance challenges; research and project management resources; communication management strategies; and the impact of technology from management oversight to health services delivery. Offers an opportunity to practice a key role of leadership: transforming organizational culture by effective implementation of change. Offered: W.

[View course details in MyPlan: HIHIM 598](#)

HIHIM 599 Capstone Project (3)

Provides a practice-based problem solving experience that draws on health informatics and information management; health industry knowledge; leadership and management strategies; and applies project management skills to design, plan, and implement a management project in healthcare and healthcare related organizations. Offered: S.

Modified: May 30, 2017

Reserve Officer Training Corps Programs

Aerospace Studies

[Display as tabs](#)

Department Overview

104 Clark Hall

The Air Force Reserve Officer Training Corps program (AFROTC) at the UW produces leaders ready to lead in any environment. AFROTC molds students by exposing them to a rigorous training program that grooms each student from a role of followership into a future leader.

Undergraduate Program

Detachment 910
114 Clark Hall
Box 353830
(206) 543-2360
afrotc@uw.edu

General Program Requirements

All aerospace studies courses are available to cadets exclusively. Additionally any students may join the AFROTC program as cadets and enroll in the 100- and 200-level general military courses so long as they meet the minimum entrance requirements. Aerospace Studies 100- and 200-level courses count as credit toward graduation. The general military courses are prerequisites to entry into the professional officer courses (300-and 400-level courses) and seeking a commission in the Air Force is on a controlled, selective basis. Contact the Recruiting Flight Commander in the Department of Aerospace studies (AFROTC) for more information.

Commissioning Requirements

Students must successfully complete the AFROTC program and receive an academic degree from the University. Upon program and degree completion, cadets are offered commissions as second lieutenants in the Air Force.

General Military Courses

The 100- and 200-level courses for AFROTC cadets consist of one classroom hour, two hours of leadership laboratory, and two hours of physical fitness per week during the

Helpful links

[Department Overview](#)

[Undergraduate Program](#)

[Minor](#)

[Time Schedule](#)

[Departmental Web Page](#)

[Course Descriptions](#)

freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn, winter, or spring quarter. Sophomore students may enter at the start of autumn or winter quarter and take the freshman- and sophomore-level courses concurrently. A four-week field-training course, normally taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students receive pay and travel costs for field training.

Except for sophomore cadets on AFROTC scholarship, students incur no active-duty service commitment by taking general military courses and may drop the courses at any time within the limits of University course-drop policies.

Professional Officer Courses

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive a tax-free monthly subsistence stipend. They are furnished texts and uniforms. Junior- and senior-level classes consist of three hours of academic classes, two hours of leadership-laboratory and two hours of physical fitness per week.

Financial Assistance

The Air Force offers many types of scholarships to college students. AFROTC scholarships pay tuition, certain fees, and textbook reimbursement. In addition, scholarship winners receive a monthly subsistence allowance. Cadets are eligible for one of these scholarships and should contact the Recruiting Flight Commander in the Department of Aerospace Studies (AFROTC), (206) 543-2360 or at afrotc@uw.edu.

Minor

Minor Requirements:

29 credits, to include the following:

1. 24 credits of air and space studies coursework
2. 5 credits in a foreign language beyond the first-year level
3. Minimum 18 upper-division credits in air and space studies coursework
4. Minimum 24 credits in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor.

INTERSCHOOL OR INTERCOLLEGE PROGRAMS AEROSPACE STUDIES AEROSPACE STUDIES (AIR FORCE ROTC)

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

A S 101 Foundations of the United States Air Force I (1)

Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

[View course details in MyPlan: A S 101](#)

A S 102 Foundations in the United States Air Force II (1)

Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

[View course details in MyPlan: A S 102](#)

A S 103 Foundations in the United States Air Force III (1)

Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: Sp.

[View course details in MyPlan: A S 103](#)

A S 211 The Evolution of Air and Space Power I (1)

Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: A.

[View course details in MyPlan: A S 211](#)

A S 212 The Evolution of Air and Space Power II (1)

Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: W.

[View course details in MyPlan: A S 212](#)

A S 213 The Evolution of Air and Space Power III (1)

Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, any of which may be taken concurrently. Offered: Sp.

[View course details in MyPlan: A S 213](#)

A S 250 Aerospace Studies Leadership Laboratory (0-1, max. 10)

Evaluates the challenges of team leadership in complex contemporary environments. Students apply critical thinking skills using scenarios that emulate real-life Air Force issues and environments. Evaluates Air Force leadership attributes, skills, and activities. Focuses on advanced leadership development. Corequisite: any A S course. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: A S 250](#)

A S 331 Aerospace Studies 300 (3)

Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: A.

[View course details in MyPlan: A S 331](#)

A S 332 Aerospace Studies 300 (3)

Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: W.

[View course details in MyPlan: A S 332](#)

A S 333 Aerospace Studies 300 (3)

Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: Sp.

[View course details in MyPlan: A S 333](#)

A S 431 Aerospace Studies 400 (3) I&S

Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: A.

[View course details in MyPlan: A S 431](#)

A S 432 Aerospace Studies 400 (3) I&S

Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for

cadets, but not special students. Prerequisite: A S 333. Offered: W.

[View course details in MyPlan: A S 432](#)

A S 433 Aerospace Studies 400 (3) I&S

Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: Sp.

Reserve Officer Training Corps Programs

Military Science

[Display as tabs](#)

Department Overview

104 Clark Hall

The ROTC program provides students an opportunity to learn and practice the art of leading people. Recognizing there is a great difference between cognition and volition, the program is structured to give the student practical experience in leading and managing resources.

The Army ROTC (AROTC) program enables the student to learn about the military profession and the role it plays in our democratic system of government. Courses enable such knowledge to be acquired on campus without serving in the military forces.

Army ROTC electives enrich the student's course of study. Such courses also open up an additional career option, enabling the student to earn a commission and to serve in the Army as an officer, or in the Reserves or National Guard while pursuing a civilian career. Officers serve in a wide variety of career paths, including infantry, human resources, aviation, intelligence, automation, and hospital administration.

Army ROTC provides the student membership in a close-knit fraternal organization.

ROTC programs on college campuses ensure that the influences of higher education are transferred into the military services - a mandatory requirement in a democracy.

A minor in military science and leadership is available to any student at the UW. Requirements are shown below.

For information on the programs described below, contact the following:

Enrollment and Scholarship Officer
105 Clark, Box 353820
(206) 543-9010

Traditional Four-Year Program

Open to freshman and sophomore men and women. Academic studies include courses in military history, principles of leadership, techniques of instruction, management and staff procedures, logistics, physical conditioning, and military law. Extracurricular activities include such options as Ranger Company, color guard, training exercises, field trips, and related activities. A non-scholarship student incurs no obligation of any kind during the first two years of the four-year AROTC program.

[Department Overview](#)

[Undergraduate Program](#)

[Minor](#)

[Time Schedule](#)

[Departmental Web Page](#)

[Course Descriptions](#)

Placement credit toward completion of AROTC courses may be given for prior ROTC or military training. Veterans routinely receive full credit for the first two years of AROTC and may enter the advanced course when they are academic juniors. All military textbooks and uniform items are furnished without charge. Students in the advanced course receive tax-free monthly subsistence of \$350 per month as an academic junior and \$400 per month as an academic senior. In the advanced course, cadets are required to participate in the leadership-development program, which is a practicum of skills and principles taught during the previous two years. Between their junior and senior years, cadets attend a five-week summer camp during which they receive varied and challenging training and for which they are paid both for the time at camp and for travel expenses to and from the camp location. Upon entering the advanced course, students agree to complete the program, accept a commission upon graduation, and serve a minimum of four years if scholarship (three years if non-scholarship) and be on active-duty commitment. If the cadet chooses to go into the Reserves or National Guard, then he or she serves a minimum of eight years.

Four-Year Scholarship Program

Application to this program should be made while the student is still in high school. Selection of students is made on a nationwide competitive basis. This program may lead to a commission in the Active Army, the Army Reserve, or the Army National Guard. All tuition, a flat rate for books and laboratory expenses, and uniform items, plus monthly tax-free stipends, are provided by the Army. The program requires four years of academic study on campus, as well as a five-week advanced camp training period between the junior and senior years, for which the cadet is paid for both time and travel expense to and from the camp location. Academic studies are identical to those of the traditional four-year program. The student must sign a contract wherein the student agrees to complete this program, along with a chosen academic program, to accept a commission, and to serve on active duty or in the reserve forces after commissioning.

Three-Year Scholarship Program

Open to qualified students already on campus. The scholarship provides financial assistance during the remaining years of the student's enrollment. Each scholarship pays for tuition and a flat rate for books and laboratory expenses and provides tax-free monthly stipends of \$350 for academic juniors and \$400 for academic seniors. All other advantages and obligations are the same as those of the four-year scholarship program.

Two-Year or Lateral Entry Program

Open to qualified undergraduate and graduate students who have at least two years remaining in school and who have completed at least 81 credits. Students may qualify for entrance into the advanced course under this program in two ways.

1. They may participate as qualified veterans who receive placement credit for the first two years of AROTC. Veterans are also eligible to compete for two- and three-year scholarships while receiving their educational benefits. Members of the Reserves and National Guard may also be eligible to participate in AROTC and receive their commission upon graduation.
2. Requires attendance at the Leader's Trainers course for five weeks at Fort Knox, Kentucky. Completion of this training also qualifies students for direct entry into the advanced course. While at camp, students receive pay plus travel expenses to and from the camp location, and they may compete for two-year scholarships, provided scholarships are available.

Undergraduate Program

Enrollment and Scholarship Officer
105 Clark, Box 353820
(206) 543-9010

The Army ROTC program offers a minor in military science and leadership.

Minor

Minor requirements

27 credits, to include the following:

1. M SCI 401, M SCI 402, M SCI 403 (9 credits)
2. Additional military science coursework (18 credits)
3. Minimum 18 credits of military science completed at the upper-division level
4. Minimum 18 credits of military science completed in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor

INTERSCHOOL OR INTERCOLLEGE PROGRAMS MILITARY SCIENCE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

M SCI 101 Military Science and Leadership Development (3)

Introduction to challenges and competences critical for effective leadership. Examines how critical thinking, goal setting, time management, and stress relate to leadership. Develops knowledge and comprehension of leadership dimensions. Lessons include history and mission of the Army and leadership, personal development, values and ethics, and tactics and techniques discussions. Offered: A.

[View course details in MyPlan: M SCI 101](#)

M SCI 102 Military Science and Introduction to Tactical Leadership (3)

Overviews leadership fundamentals of problem solving, listening skills, briefings, providing feedback, and effective writing. Explores dimensions of leadership values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises. Introduction of effective oral communication. Develops skills in map reading, land navigation, and tactical maneuvering at team levels. Offered: W.

[View course details in MyPlan: M SCI 102](#)

M SCI 103 Military Science and Introduction to Applied Basic Leadership (3)

Final introductory series on leadership. Applies leadership fundamentals emphasizing attributes, skills, and actions. Students assess capabilities simultaneously, considering their personal leadership. Lessons apply leadership to military tasks of map reading, navigation, and tactics. Offered: Sp.

[View course details in MyPlan: M SCI 103](#)

M SCI 110 Military Science Leadership Laboratory (0.5, max. 3)

Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on leadership development. Credits do not count toward graduation. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: M SCI 110](#)

M SCI 201 Military Science and Innovative Team Leadership (3)

Explores dimensions of innovative tactical leadership strategies and styles. Practices personal motivation and team building through planning, preparing, and executing group exercises. Develops knowledge of leadership

values and attributes through an understanding of Army leadership examples. Lessons include leadership, personal development, values and ethics, officership, and tactics and techniques. Offered: A.

[View course details in MyPlan: M SCI 201](#)

M SCI 202 Military Science and Foundations of Tactical Leadership (3)

Explores creative and innovative tactical leadership strategies and styles by examining team dynamics and leadership theories. Examines challenges of leading teams in complex contemporary environments. Practical exercises focus on dimensions of terrain analysis, patrolling, operation orders, and cultural awareness. Lessons include fundamentals of leadership, personal development, and tactics and techniques. Offered: W.

[View course details in MyPlan: M SCI 202](#)

M SCI 203 Military Science and Transformational Leadership (3)

Continues study of the theoretical basis of Army leadership and framework and dynamics of transformational leadership in the context of military operations. Develops greater self-awareness by assessing leadership styles and practices oral and written communication skills. Enables progress to applied and advanced tactical leadership study. Offered: Sp.

[View course details in MyPlan: M SCI 203](#)

M SCI 301 Military Science and Tactical Leadership (3)

Studies, practices, and evaluates adaptive leadership skills. Develops self-awareness and critical thinking skills using challenging scenarios related to small unit operations. Analyzes and evaluates leadership values, attributes, skills, and actions. Lessons focuses on leadership, land navigation, oral and written presentations, tactics, and physical fitness. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: A.

[View course details in MyPlan: M SCI 301](#)

M SCI 302 Military Science and Applied Leadership (3)

Continues adaptive approach to leadership applying situations necessary to build skills required in complex scenarios. Develops proficiency in evaluating, decision-making, persuading, and motivating peers through practical exercises. Students evaluate individual leadership values, attributes, skills, and actions, and receive specific feedback on their leadership abilities based on written and oral presentations. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: W.

[View course details in MyPlan: M SCI 302](#)

M SCI 303 Military Science and Advanced Tactical Leadership (3)

Finalizes M SCI 301 and M SCI 302 leadership skills that are necessary to successfully lead others while solving complex problems. Explores, evaluates, and develops decision-making skills required in contemporary environments. Reviews critical aspects of combat, specifically stability and support operations. Provides specific leadership feedback and prepares for advanced leadership and management. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: AWSp.

[View course details in MyPlan: M SCI 303](#)

M SCI 305 Practicum-Techniques of Military Instructions (1-3, max. 3)

Analysis, review of techniques used in military training and instructions. Students plan, rehearse, deliver, provide written critique on block of military instruction from the Military Qualification Skills Manual. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher.

[View course details in MyPlan: M SCI 305](#)

M SCI 310 Military Science Advanced Leadership Laboratory (1, max. 6)

Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on advanced leadership development. Prerequisite: M SCI 110.

Offered: AWSp.

[View course details in MyPlan: M SCI 310](#)

M SCI 401 Military Science and Developmental Leadership (3) I&S

Develops proficiency in planning, executing, and assessing complex problems, functioning as a staff member, and providing leadership-performance feedback. Explores situational opportunities assessing values, risk, and ethical decisions. Performance measured by abilities to give and receive systematic, specified feedback on 16 leadership attributes, skills, and actions focusing on advanced leadership development. Prerequisite: M SCI 301; M SCI 302. Offered: A.

[View course details in MyPlan: M SCI 401](#)

M SCI 402 Military Science IV: Advanced (3) I&S

Explores dynamics of leading in complex situations of contemporary environments. Examines differences in customs and courtesies, military law, principles of war, and rules of engagement. Lessons review aspects of interacting with nongovernmental organizations, civilians, and host nation support with case studies examining complex ethical and practical demands of leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received grade of 2.0 or higher. Offered: W.

[View course details in MyPlan: M SCI 402](#)

M SCI 403 Military Science and Advanced Leadership (3) I&S

Completes fundamental learning of advanced leadership attributes, skills, and actions that effectively prepare students for careers in military or civilian leadership. Examines Army modularity, unit organization, joint operations, and the role of junior leaders. Focuses on case studies, situational exercises, student presentations, and battlefield analysis to develop insights on leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received grade of 2.0 or higher. Offered: Sp.

INTERSCHOOL OR INTERCOLLEGE PROGRAMS NAVAL SCIENCE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

N SCI 101 The Naval Service (3)

General introduction to the U.S. Navy and Marine Corps, with emphasis on organization, missions, roles, tasks, assets, and operations. Offered: A.

[View course details in MyPlan: N SCI 101](#)

N SCI 102 History of U.S. Sea Power I (3) I&S

A study of the U.S. Navy and Marine Corps as they fit into the history of the United States, from the American Revolution to the outbreak of World War II. Prerequisite: N SCI 101. Offered: W.

[View course details in MyPlan: N SCI 102](#)

N SCI 103 History of U.S. Sea Power II (3) I&S

A study of the U.S. Navy and Marine Corps as they fit into the history of the United States, from World War II to the present day. Prerequisite: N SCI 102. Offered: Sp.

[View course details in MyPlan: N SCI 103](#)

N SCI 110 Naval Science Laboratory (*, max. 12)

Evaluates the challenges of leading teams in complex contemporary environments. Topics vary. Required each quarter for NROTC students. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: N SCI 110](#)

N SCI 201 Naval Leadership and Management (3) I&S

Introduction of the theory and techniques of naval leadership based on principles of behavioral science pertinent to understanding individual and group behavior of adults. Introduces the management process and the relationship of management functions to leadership. Stresses acceptance of a traditional deep sense of moral responsibility on the part of the aspiring leader. Prerequisite: minimum 2.0 grade in N SCI 101. Offered: A.

[View course details in MyPlan: N SCI 201](#)

N SCI 202 Navigation I (3) NW

The science and practice of maritime coastal navigation, including visual fixing, dead reckoning, and piloting

methods. Computation of tides and currents and nautical rules of the road. Prerequisite: N SCI 101. Offered: W. ²⁵¹²
[View course details in MyPlan: N SCI 202](#)

N SCI 203 Navigation II (3) NW

Basic theory and practice of celestial and electronic navigation. Relative motion theory and contact coordination practice in a multiple ship environment. Prerequisite: N SCI 202. Offered: Sp.

[View course details in MyPlan: N SCI 203](#)

N SCI 301 Naval Ship Systems I (3)

Study of fundamental principles of energy transfer and thermodynamics. An introduction to nuclear propulsion, gas turbines, and auxiliary power systems. Offered: A.

[View course details in MyPlan: N SCI 301](#)

N SCI 302 Naval Ship Systems II (3)

Study of ship characteristics, ship design, hydrodynamic forces, stability, damage control, and shipboard electrical systems. Includes introduction to engineering documentation, electrical safety, preventative maintenance, and personnel qualifications. Prerequisite: N SCI 301. Offered: W.

[View course details in MyPlan: N SCI 302](#)

N SCI 303 Naval Weapon Systems (3)

Study of fundamental principles of sensor, tracking, weapon delivery subsystems, and current naval weapons. Includes techniques of linear analysis of ballistics and weapons, and dynamics of basic components of weapon-control systems. Prerequisite: N SCI 302. Offered: Sp.

[View course details in MyPlan: N SCI 303](#)

N SCI 322 Evolution of Warfare (3) I&S

Focuses on critical thinking on how and why warfare has changed. Explores how warfare and technology have evolved over time, their relationship, and how innovations promulgate. Topics include maneuver warfare, fourth generational warfare, and various military strategy strategist theories. Designed for future Marine Corps Officers, but open to all students.

[View course details in MyPlan: N SCI 322](#)

N SCI 323 USMC Leadership and Administration of Justice I (3)

Concepts, objectives, characteristic qualities, and practical techniques of leadership as exercised by the Marine Corps officer. Emphasizes leadership and management role of the junior officer in the Fleet Marine Forces. Intensive physical activities and outdoor projects to test an individual's physical and mental endurance.

Prerequisite: N SCI 110; N SCI 421. Offered: Sp.

[View course details in MyPlan: N SCI 323](#)

N SCI 401 Naval Operations (3)

Introduction to naval operations, the employment of naval forces, naval tactics, formulation of operations plans and orders, employment of detection equipment, and meteorology. Prerequisite: N SCI 101. Offered: A.

[View course details in MyPlan: N SCI 401](#)

N SCI 402 Naval Leadership and Ethics (3) I&S

Study of leadership and ethics within a military context using applicable case studies. Examines the Law of Armed Conflict and Code of Conduct; the importance of integrity, moral courage, and ethical behavior to effective leadership; and the interrelationship between authority, responsibility, and accountability. Offered: W.

[View course details in MyPlan: N SCI 402](#)

N SCI 403 Naval Organization and Management (3)

Study of organization, systems, and techniques employed in the Navy for management of its human, material, and financial resources. Some work relates to the administration of discipline in the Navy under the Uniform Code of Military Justice. Emphasis on the leadership and management role of the junior officer in the fleet.

Prerequisite: minimum 2.0 grade in N SCI 402. Offered: Sp.

[View course details in MyPlan: N SCI 403](#)

N SCI 421 Amphibious Warfare (3) I&S

Provides basic knowledge of evolution of amphibious warfare from premodern era to present. Strategic, operational, and tactical considerations in planning specific operations and amphibious landings. Prerequisite: either N SCI 321 or minimum two POL S or JSIS courses. Offered: A, even years.

Reserve Officer Training Corps

Naval Science

[Display as tabs](#)

Department Overview

202 Clark

Naval Science offers University students an opportunity to engage in study that leads to a commission in the U.S. Navy or Marine Corps while working toward a baccalaureate degree. The Naval Reserve Officer Training Corps (NROTC) unit functions in conjunction with Naval Science. An NROTC student may select an academic major within certain limitations (e.g., some programs that normally lead to immediate graduate education, such as architecture, are not consistent with the mission of the NROTC program).

In addition to their University curricula, NROTC students take naval science courses in history and customs, naval engineering/weapons systems, navigation, naval operations, and leadership/management. In addition, each student must attend one naval science laboratory session and one physical training session per week. During the summer, students may have a four-to-six-week training cruise to put into practice their earlier classroom training.

Two NROTC programs are offered, as outlined below. In addition, any University student may take a naval science course without enrolling in the NROTC program, or may complete a minor in naval science, requirements for which are shown below.

Navy-Marine Scholarship Program

Each year students are accepted for scholarship status in the four-year, three-year alternate, and two-year NROTC scholarship programs. Eligibility for the three- and four-year programs is based upon nationwide competition and selection by a central selection committee. Application must be made by December 1 of the academic year preceding appointment as a midshipman. Those selected are provided educational benefits, including subsidy by the Navy of all tuition, fees, and uniforms. In addition, there is a textbook stipend each quarter and a monthly subsistence pay which ranges between \$250 and \$400.

For the two-year scholarship program, applications from current sophomores, or juniors enrolled in five-year programs of study, must be received by March. Those chosen by a central selection committee attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies these students for enrollment in the advanced courses in the NROTC program. All scholarship students are appointed as midshipmen, USNR-R, and upon graduation are commissioned as officers in the Navy or Marine Corps Reserve, after which they serve on active duty for a minimum of four years.

[Course Descriptions](#)

Navy-Marine College Program

Each year, men and women are accepted for four- and two-year non-scholarship college programs. Applications for the two-year program are accepted from current sophomores in community colleges or four-year colleges and must be received prior to March of their sophomore year (or third year, if in a five-year program).

Those students selected for the two-year program attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies students for enrollment in the advanced course in the NROTC program. Students in the NROTC college program pay their own college expenses but receive monthly subsistence pay during their junior and senior years. The Navy furnishes all uniforms and textbooks used in naval science courses.

All college-program students are eligible for a scholarship after completing one academic term, with scholarship awards based on academic grades and participation within the midshipman battalion. The two-year college-program students also may win a scholarship for superior performance at NSI. Upon graduation, college-program students are commissioned in the Navy Reserve or Marine Corps Reserve and serve on active duty for three years.

Minor

Minor requirements

25 credits, to include the following:

1. N SCI 201; N SCI 402 (6 credits)
2. Additional naval science coursework (19 credits)
3. Minimum 12 naval science credits completed at the upper-division level
4. Minimum 12 naval science credits completed in residence through the UW
5. Minimum 2.5 grade in each course presented for the minor

School of Social Work

[Display as tabs](#)

School Overview

Dean

Edwina Uehara

210 Social Work/Speech and Hearing Sciences

The School of Social Work offers two professional programs, one at the undergraduate level and one at the graduate level, as well as a PhD program. The Bachelor of Arts in Social Welfare (BASW) program prepares students for entry-level generalist practice. The graduate professional program prepares students for advanced practice within a field of concentration; students earn a Master of Social Work degree. Both the BASW. and MSW. programs are accredited by the Council on Social Work Education. The School also offers a Doctor of Philosophy degree in social welfare that prepares students for careers in research and education. Consistent with University policy, no credit is granted on the basis of life experience or previous employment. All three programs are housed in the Social Work/Speech and Hearing Sciences Building, 4101 Fifteenth Avenue Northeast, Seattle, WA 98105-6299.

In addition, the School offers two concurrent degree programs – one with the School of Public Health leading to the MSW and MPH degrees, and a second with the Evans School of Public Affairs, leading to MSW and MPA degrees.

The School of Social Work offers the following program of study

- The Bachelor of Arts degree with a major in social welfare

The program includes upper-division courses in social welfare, with prerequisites in human biology, economics, psychology, statistics, and sociology. Social welfare courses include content on social welfare history, policy and services, human behavior and the social environment, social welfare research, and cultural diversity. These academic courses prepare students for the senior year three-quarter practicum experience, which involves a

total of 480 hours of direct social services under the supervision of a practicum instructor approved by the School.

Bachelor of Arts Program

Suggested First- and Second-Year College Courses: SOC WF 101, SOC WF 200; SOC WF 201; prerequisites in psychology, sociology, economics/political science, and human biology (see below); also, courses in American ethnic studies, sociology, psychology, and gender, women, and sexuality studies.

Department Admission Requirements

Pathways for admission to the social welfare major:

- A. Approximately 36 juniors are admitted each year. Admission, which is for autumn quarter only, is competitive and completion of requirements listed below does not guarantee acceptance. April 1 is the application deadline. To be considered for admission, applicants must meet the following criteria by the time they begin classes in the social welfare program:
 1. Minimum 65 credits completed
 2. Five prerequisite courses, four of which must be completed prior to beginning the program in autumn (minimum 2.0 grade required in each). Courses in the areas of psychology, sociology, economics/political science, and human biology must be completed before beginning the required SOC WF courses. An introductory statistics class may be taken as late as spring quarter of the junior year, but is a required prerequisite of senior-year courses and is recommended prior to admission. See for list of acceptable courses and more information.
 3. A minimum 2.00 cumulative GPA
 4. Have some paid or volunteer social service experience
 5. Completed application, admission essay, resume, and copies of college transcripts
- B. Approximately eight freshmen and sophomores are admitted through early admission. Applicants may apply either in spring quarter of their freshman year or autumn quarter of their sophomore year. Application deadlines are April 15 and October 31. Applicants must meet the following criteria:
 1. Minimum 30 credits completed
 2. Completion of or enrollment in at least one of five prerequisite courses, three more of which must be completed prior to beginning the program degree requirements in autumn of the junior year (minimum 2.0 grade required in each). Courses in psychology, sociology, economics/political science, and human biology must all be completed prior to beginning required SOC WF courses. An introductory statistics class may be taken as late as spring quarter of the junior year, but is a required prerequisite of senior-year courses and is recommended prior to admission. See School website for list of acceptable courses and more information.
 3. Minimum 3.00 cumulative GPA
 4. Fifty community service/student leadership hours in college and high school
 5. Completed application, admission essay, resume, personal disclosure statement, and official copies of all college transcripts

6. One letter of recommendation

7. Preference given to students who have completed a social welfare premajor offering (see School website for more information)

A group interview with the program director and faculty/staff is scheduled after completed applications are submitted.

Application forms and a detailed description of the social welfare major are available at the School's website, socialwork.uw.edu/. A student may discuss the program in person by contacting the Director of Admissions, (206) 543-5676, sswadmin@uw.edu. Students accepted to the major complete a change-of-college form and transfer their academic file to the School's Student Services Office. Students not accepted may contact the Director of Admissions to discuss alternatives to the social welfare major, or the appeal process.

Major Requirements

67 credits as follows:

1. Core Courses (2.0 minimum grade required in each course): SOC WF 200; SOC WF 310; SOC WF 311; SOC WF 312; SOC WF 315; SOC WF 320; SOC WF 390; SOC WF 402; SOC WF 404; SOC WF 405; SOC WF 410, SOC WF 415; SOC WF 460 or SOC WF 442 or SOC WF 443; SOC WF 465; and SOC WF 435
2. 2.00 cumulative UW GPA
3. 2.50 cumulative GPA in SOC WF required courses

Continuation Policy

All students must make satisfactory academic progress in the major and meet outlined standards of professional behavior. Failure to do so may result in probation or referral to the student review committee, either of which could lead to dismissal from the major. For the complete continuation policy, contact the departmental adviser or refer to the department website.

Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The BASW program produces beginning-level social work practitioners and is accredited by the Council on Social Works Education. Students become generalist social work professionals able to work with individuals, families, groups, communities, and organizations in enhancing the health, well being, and empowerment of disadvantaged communities across the lifespan. Graduates may pursue social work practice jobs, or graduate education in social work, or a range of other fields (e.g., law, medicine, public policy, international development). Students receive an interdisciplinary liberal arts education, drawing on a range of social science courses which prepare them to promote human welfare and deal with complex social problems. Students are involved in both academic coursework (gaining intellectual knowledge and critical thinking skills) and a field placement experience ("lived" or "on the ground" experience).

The following outcomes define the BASW program:

1. Preparation of entry-level baccalaureate social workers for generalist practice in a multicultural context.

2. Education and training of generalist social workers who are informed, engaged, and responsive practitioners, able to understand and take action in enhancing human welfare and in promoting social and economic justice.
3. Education of students within the context of an interdisciplinary liberal arts education, to foster a comparative and critical examination of social welfare and social work through the study of its history, policies, research, and practice interventions.
4. Preparation for graduate education.

- In addition, the School of Social Work houses a number of centers and projects. For more information on these research activities, visit socialwork.uw.edu/research/research-centers.
- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Contact the adviser for information.
- *Department Scholarships:* A limited number of financial-aid opportunities are available to students. Applicants are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Inquiries may be directed to the chair of the scholarship committee, School of Social Work.
- *Student Organizations/Associations:* Organization of Student Social Workers (OSSW)

Master of Social Work

The School of Social Work offers a Master of Social Work degree with three options: a two-year full-time program; a one-year advanced-standing program for qualified students with a degree in social work/social welfare from a Council on Social Work Education accredited undergraduate program; and a three-year part-time extended degree program.

All program options prepare students for advanced professional practice with a culturally diverse range of at-risk populations in publicly funded social services. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation, and opportunities for advanced content in areas of policy, services, and methods.

The professional foundation provides instruction in the basic knowledge and skills required for effective, generalist social work practice, as well as socialization to the profession, its value orientation, ethics, and history.

The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in the social work profession. The advanced curriculum is being revised. Check the School's website, socialwork.uw.edu for current information.

Admission Requirements

Formal admission to the Graduate School as well as to the School of Social Work. Bachelor's degree, strong academic background, and social-service experience. Official transcripts from all colleges and universities attended, references, application forms, résumé, and an admission essay to be considered for autumn-quarter entry. January 15 is the closing date for receipt of applications and materials. Admission is competitive and selection is based on a review of the applicant's submitted materials. Current application materials can be obtained from the School's Admissions Office website at socialwork.uw.edu/admissions/.

Degree Requirements

Minimum 46 credits (advanced standing program); 75 credits (day and extended degree programs), as follows:

1. Completion of required professional foundation and advanced curriculum credits and demonstrated competence in both academic and field practicum work.
2. *Human Biology Requirements*: BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), or SSW Continuing Education course "Human Biology" taken within 10 years of admission to the MSW program. Students must complete the requirement prior to beginning the advanced curriculum (including practicum). Credit may not be applied to the MSW degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
3. *Basic Statistics Requirement*: An introductory course in statistics (any discipline) is a prerequisite for SOC W 505/SOC W 506.
4. *Professional Foundation Courses Required for the Day and Extended Degree Program*: SOC W 500, SOC W 501, SOC W 504), SOC W 505, SOC W 506, SOC W 510, SOC W 511, SOC W 512, SOC W 513, SOC W 523, 3 credits of electives, SOC W 524. All foundation courses must be completed before beginning the advanced curriculum.
5. *Advanced Curriculum for the MSW Day Program*: Specialization in an advanced methods area or field of practice. Current areas of concentration include policy and administrative practice; health and mental health practice; community-centered integrative practice; practice with children, youth, and families; and multigenerational practice. Students enter the second year with an individualized learning plan (developed by winter quarter of their foundation year) that sets out a coherent program of advanced study. Identified in the learning plan is a policy/services course, an advanced methods area, an advanced field practicum, and proposed choices for methods and elective courses that support the student's overall area of concentration.

Programs of study vary slightly by concentration, but a typical program of study includes:

- a. One policy/services course (3 credits), consistent with the student's second year specialization

- b. Two advanced methods (6 credits) in the student's primary method area or across methods with the approval of the faculty adviser and practicum coordinator
 - c. Elective course offerings (9 credits) to include courses related to the policy/services areas, and advanced HBSE and theory courses, with the primary focus on development of knowledge and skills in intervention. One elective course from outside the School. Elective courses range from 1 to 3 credits.
 - d. Advanced practicum (SOC W 525, 18 credits) aligns with the student's policy/services course and with the student's primary intervention method area.
6. *Advanced Curriculum for the MSW Extended Degree Program:* Students select one of two specializations within the Interpersonal/Direct Social Work Practice concentration: Integrative Health-Mental Health Advanced Practice, or Multigenerational Practice with Children, Families, and Elders. Advanced curriculum consists of policy/services course, a two-quarter advanced practice methods sequence, SOC W 571, 6 credits of electives, and a 720-hour advanced practicum.
7. *MSW Electives:* Courses may be selected from curriculum offerings related to particular fields of practice, intervention theories, intervention modalities, social problems, populations, and research methods. Students may take advanced methods courses in areas other than the student's primary methods area and relevant courses in other graduate programs and professional schools of the University. Three credits of external coursework may be included.

Financial Aid

A limited number of financial-aid opportunities are available. Applicants to the MSW program are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Departmental funding is limited and typically requires a department-specific application be submitted by April 1. Inquiries may be directed to the Admissions Office, School of Social Work. Information on available tuition awards may also be reviewed on the Social Work admissions website, socialwork.uw.edu/admissions.

Master of Social Work/Master of Public Health Concurrent Degrees

Concurrent degrees prepare professionals who function at the interface of both fields in practice, research, planning, administration, and policy development. Students develop (1) competence in social work practice in community health; (2) understanding of the organization and functioning of the health and social service delivery systems; and (3) basic analytical skills necessary to conduct research and to perform competently in a variety of public health social work roles. Students also have an opportunity for in-depth study of particular issues related to their special interests and career goals.

Application

Students who matriculate into the full time program in either Social Work or Public Health are eligible. Students admitted to Social Work with advanced standing should apply for

both programs simultaneously. Students in the part-time evening degree program in either Social Work or Public Health are not eligible for the program.

1. Students must apply to and be accepted by both schools.
2. Students are strongly encouraged to complete up to one year of studies in Social Work before entering the Public Health program. Applications for entry are due in both schools by January 15. Typically students apply to Social Work in January and enter the MSW program in September. They then apply to Public Health the following January and begin the MPH program the next September. Staggered entry permits students to complete all requirements of both degrees within three years.

Degree Requirements

115-125 credits (depending on number of electives taken)

1. Two separate sets of at least 36 credits each
2. At least 18 numerically graded credits for each degree in courses numbered 500 through 599. All required courses in the MPH program must be taken for a grade.
3. Up to 12 credits taken in one school may be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.
4. The MPH requires a thesis.

Doctor of Philosophy

The PhD program in social welfare prepares students to contribute to the advancement of knowledge and practice in the field of social welfare and the profession of social work for the promotion of social justice. Students acquire both the substantive and methodological competence to contribute theoretical formulations and empirical research that inform effective social work practice and advance scholarship in social welfare.

After the first year of required courses, each student's program of study is individually designed and focuses on well-defined substantive and interventive areas of research relevant to the field of social welfare. In the basic core of required courses, which includes teaching and research practice, students have an opportunity to pursue their particular interests with faculty members in the School of Social Work and in other schools and departments.

During the first two years, students define and develop the specialized areas that are the focus of their general examination and, typically, their subsequent dissertation research. Selected areas must have clear significance for the development of practice, programs, or policies in social work and social welfare.

The general examination for advancement to candidacy generally occurs at the end of the second year or during the third year. After advancement to candidacy, students devote themselves full time to completion of their dissertation research. The last step before the degree is the final examination, defense of the dissertation. Students are strongly encouraged to remain in residence at the University until the dissertation is accepted. The PhD program takes approximately four years, although academic excellence in learning and performance is always the first criterion for degree progress.

Admission Requirements

Admission is highly selective and students are admitted for autumn-quarter entry only. Applicants must have a master's degree in social work or a closely related field.

The Council on Social Work Education requires that faculty who teach practice courses in accredited programs have two years of supervised practice experience. Thus, obtaining such experience is highly important for those who seek academic positions following graduation.

Applicants selected for admission are those whose scholastic achievements, previous experience, and aptitude for social welfare research, scholarship, and teaching indicate the greatest promise for achieving the objectives of the program. In addition, an effort is made to maintain a balanced student group reflecting the range of concerns in social welfare and of faculty resources. The deadline for receipt of admission material is December 15. For more information, call (206) 685-1680, or email phdmhpr@uw.edu.

Degree Requirements

90 credits minimum, to include:

- *Required Courses:* Must include content on diverse populations, including the disadvantaged and oppressed. Includes content on people of color, women, gay men and lesbians, and persons with disabilities. Specific type or nature of the content (e.g., readings, exemplars, exercises) and how it is introduced and integrated likely differs across courses. In all cases, content on diversity must be in accord with course objectives and be visibly present in the course syllabus.

All required coursework (with the exception of 800-level tutorials) must be completed before or during the quarter in which the oral section of the general examination takes place.

Courses required must be taken on a graded basis unless offered credit/no-credit only (i.e., they cannot be taken on a satisfactory/not-satisfactory basis).

1. Introduction to Advanced Research Methods and Design. Two quarters during first year.
2. Fundamentals of Statistics. Two quarters during first year through other departments (primarily Sociology or Biostatistics).
3. Research Issues and Priorities in Social Welfare. Two quarters during first year.
4. Social Welfare Policy. Two quarters during first year (contemporary policy and international and global policy).
5. Research Practicum. Two quarters; to be completed by the end of second year (credit/no-credit only).
6. Teaching Practicum. One quarter; to be taken after successful completion of first year (credit/no-credit only).
7. Career Planning Seminar. One-credit seminar offered quarterly (credit/no-credit only). Focus is on professional development issues and skills with emphasis on academic and research careers.
8. Teaching Preparation. One quarter in the second year.
9. Minimum two (3+ credit) courses in advanced graduate research methods (typically 500-level courses offered in other departments) relevant to the

student's anticipated research in a substantive or interventive area. Coursework beyond the minimum is encouraged.

10. Minimum two (3+ credit) graduate social science theory courses (500 level or above), designed to provide strong theoretical foundations. Students often use these courses to develop a "minor" in one of the social sciences. Offered in the College of Arts and Sciences or one of the professional schools, they are related to the substantive or interventive content of the student's program. Coursework beyond the minimum is encouraged for greater depth of interdisciplinary theoretical training.
11. Dissertation Tutorials (SOC WL 800). Taken after the student has successfully completed the oral general examination and has been advanced to candidacy for the PhD. Students must complete a total of 27 credits over at least three quarters to satisfy the Graduate School requirement

- *Elective Courses in the School of Social Work*

1. Qualitative Methods in Social Work Research. One or two quarters, offered alternate years.
2. Analytical Perspectives on Social Welfare Policy. One quarter, offered annually.
3. Advanced Topics in Data Analysis. One quarter, offered annually, covering advanced quantitative methods.
4. Social Movements and Participatory Action Research Methods. One quarter, offered alternate years.
5. Psychosocial Scale Construction and Measurement. One quarter, offered alternate years.
6. Interdisciplinary Prevention Science: Children and Adolescents. Overview of developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21), 3-credit course (credit/no-credit only).
7. Promoting Well-Being among At-Risk Groups. Guidance for Health Promotion/Prevention Research.

- *Additional Course Expectations:* Students may take tutorials (SOC WL 600) with faculty members while completing advanced coursework and writing the integrative paper (prior to the oral general examination). These tutorials should include one or more written products.

Students are also encouraged to take additional courses that bear on their substantive areas of interest. Courses may be taken in any department or school of the University but should ordinarily be at the 500 level or above.

- *Prevention Research Training Program Courses:* (Trainee requirements in addition to all PhD program courses)

1. Seminar in Prevention Science. One-credit seminars taken autumn, winter, and spring quarters each year of the traineeship. Credit/no-credit only.
2. Promoting Well-Being among At-Risk Groups: Interdisciplinary Guidance for Health Promotion/Prevention Research. One quarter, 3 credits, introduction to prevention research.
3. Two additional graduate level (500+) courses, one social science theory and one research methods, related to the prevention research area of study.

Financial Aid

The School of Social Work ensures that all students have some means of financial support during the nine-month school year for the first three years in the program and is frequently able to continue support beyond this point. In each of the first three years, the PhD program director assists students in obtaining funding from the School, other UW sources, or external federal and private granting agencies. Each year, awards of stipends, fellowships, and research and teaching assistantships are made on the basis of resources available and match with areas of student interest. An award of a particular stipend or assistantship in one academic year does not carry a commitment for that same award in another year because both the grant situation and the applicant pool change. Advanced teaching and research positions are available on a competitive basis. Students are encouraged to begin their efforts to secure dissertation research support early and to stay in communication with the PhD program directors and associate deans, who oversee assistantship assignments in consultation with the School administration.

SCHOOL OF SOCIAL WORK

SOCIAL WORK

SOCIAL WORK (MSW)

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

SOC W 500 Intellectual and Historical Foundations of Professional Social Work Practice (3)

Intellectual, historical, and ethical foundations of the social work profession. Engagement with crucial aspects of the profession's history; contemporary issues, problematics, and directions; and key concepts and theoretical frameworks. Students develop personal, professional, and intellectual foundations for practicing social work built on the central values of plurality and social justice.

[View course details in MyPlan: SOC W 500](#)

SOC W 501 Poverty and Inequality (3)

Analysis of poverty and inequality in United States. Analytic and descriptive focus on measurement, processes of production and perpetuation, and public policy responses. Examines causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, disability, age, sexual orientation, and family structure.

[View course details in MyPlan: SOC W 501](#)

SOC W 504 Social Work for Social Justice: Developing a Personal-Professional Stance (3)

Focuses on personal and professional development toward social work practice for social justice. Employs critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globalization.

[View course details in MyPlan: SOC W 504](#)

SOC W 505 Foundations of Social Welfare Research (3)

Overview of research process/methods in social work, with focus on consuming and performing practice-related research and evaluating one's own practice. Emphasis on critical understanding of empirical literature, development of useful and appropriate questions about social work practice, and strategies and techniques for doing research and applying findings to practice. Offered: Sp.

[View course details in MyPlan: SOC W 505](#)

SOC W 506 Social Welfare Research and Evaluation (3)

Second of a two-quarter research sequence. Introduces a range of methods for informing evidenced-based social

work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and techniques for conducting practice-relevant research, including data collection and analysis. Prerequisite: minimum 2.5 grade in SOC W 505.

[View course details in MyPlan: SOC W 506](#)

SOC W 507 Advanced Standing Social Welfare Research and Evaluation (5)

Introduces a range of methods for informing evidence-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and technique for conducting practice-relevant research, including data collection and analysis. Prerequisite: advanced standing students.

[View course details in MyPlan: SOC W 507](#)

SOC W 510 Practice I: Introduction to Social Work Practice (3)

Foundation knowledge and skills for direct practice with individuals, families, and groups. Assists students toward mastery of interviewing and relationship building skills and knowledge of cross-cultural communication and practice issues and of social work values and ethics. Provides opportunity to develop beginning level skills in assessment. Offered: ASp.

[View course details in MyPlan: SOC W 510](#)

SOC W 511 Practice II: Intermediate Direct Service Practice (3)

Foundation knowledge and skills for direct practice with individuals, families, and groups. Course assists students toward mastery in assessment, development of treatment plans based on theory and assessment information, goalsetting skills, and selection of appropriate interventions. Offered: AW.

[View course details in MyPlan: SOC W 511](#)

SOC W 512 Practice III: Organizational Practice (3)

Provides frame of reference and skills for community-based social work practice. Theories of social change are examined with examples drawn from community organizing and policy advocacy. Offered: W.

[View course details in MyPlan: SOC W 512](#)

SOC W 513 Practice IV: Community Change Practice (3)

Focuses on ways in which management activities contribute to service effectiveness for clients and quality of conditions for staff. Various managerial roles, functions, and skills examined. Impact of agency structure, culture, and mission on staff, clients, and organizational outcomes discussed with emphasis on ways social work managers influence change. Offered: Sp.

[View course details in MyPlan: SOC W 513](#)

SOC W 516 Research Base for Prevention Science (3)

Introduces the transdisciplinary field of prevention science; enhances understanding of the developmental epidemiology of risk, protection and outcome and how prevention interventions are conceptualized and evaluated; critiques research on preventive interventions and practice; and outlines the role of prevention science in advancing health and well-being over the life course.

[View course details in MyPlan: SOC W 516](#)

SOC W 517 Promoting Individual, Family, School, and Community Risk Prevention (3)

Covers existing evidence-based practices in prevention science that have demonstrated effects on reducing risks and promoting positive development in youth. Emphasizes practice skills, topic include promotion of healthy development in childhood/adolescence; prevention of child abuse and neglect, early pregnancy, violence and delinquency, substance abuse, school misbehavior, and mental health disorders.

[View course details in MyPlan: SOC W 517](#)

SOC W 518 Macro Practice in Health and Prevention (3)

Students engage in the translation of research, advocacy, and the sustainability and dissemination of prevention initiatives and programs. Includes skill development in policy analysis, community organizing, and media/legislative advocacy. Covers current issues in prevention, the policy context surrounding them, and skills

to propel prevention forward as a priority in or society.

[View course details in MyPlan: SOC W 518](#)

SOC W 519 Policy/Services: Health/Mental Health (3)

Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

[View course details in MyPlan: SOC W 519](#)

SOC W 520 Policy/Services: Multigenerational (3)

Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

[View course details in MyPlan: SOC W 520](#)

SOC W 521 Child and Family Inequalities: Policy/Services Platform (3)

Advanced study of policy and services relevant to practice with children, adolescents, and families. Applies social justice framework to understanding policy context and organization of services responses to child and family inequalities, especially for historically oppressed and marginalized populations. Examines social construction of policies in historical, political, and comparative context.

[View course details in MyPlan: SOC W 521](#)

SOC W 522 Advanced Standing Preparation for Advanced Professional Practice (1-8, max. 8)

Prepares advanced standing students to enter graduate-level, concentration-specific practicum settings. Builds upon content and skills acquired through generalist undergraduate (micro, mezzo, macro practice levels) social work education and focuses on preparation for successful advanced professional practice at all levels. Covers critical issues related to practicum. Includes first 40 practicum hours. Credit/no-credit only.

[View course details in MyPlan: SOC W 522](#)

SOC W 524 Foundation Practicum (0-10, max. 14)

Agency-based practicum with emphasis on development of knowledge, perspectives, and skills needed for practice with individuals, families, groups, organizations, and communities. Prerequisite: social work major. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: SOC W 524](#)

SOC W 525 Advanced Practicum (1-10, max. 24)

Agency-based advanced practicum. Prerequisite: completion of foundation courses and practicum. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: SOC W 525](#)

SOC W 526 Multigenerational Policy-Services Platform: A Feminist, Multicultural Lens (3)

Builds social workers' competencies to analyze, critique, and advocate for policies and processes that support growing numbers of multigenerational families. Presents a feminist, multicultural, and multigenerational perspective to analyze how historical and current service structures, policies, and regulations support or undermine families across the lifespan.

[View course details in MyPlan: SOC W 526](#)

SOC W 527 Global and Local Inequalities: Critical Analyses of the Processes and Policies of Globalization (3)

Discussion of the health of the planet, economic and cultural globalization, the enduring legacies of imperialism and colonialism in this global era, and their local impacts. Foci include international agreements, UN conventions, immigration, and refugee policies.

[View course details in MyPlan: SOC W 527](#)

SOC W 528 Healthcare Inequalities: Policy/Services Platform (3)

Examines the organization, policies, and services of U.S. healthcare system from a social justice framework. Topics include the U.S. healthcare system's historical development, differential access to health and healthcare, healthcare system reform, and the analysis of healthcare policy from contrasting ideological perspectives.

[View course details in MyPlan: SOC W 528](#)

SOC W 529 Mental Health Inequalities: Policy/Services Platform (3)

Mental health policy trends and organization of services at national, state, and local levels reflected in legislative, regulatory, and institutional policies. Provides historical perspective on the development of U.S. mental health policies and services. Discusses specific areas of intersystem linkages in terms of equitable access and empowerment.

[View course details in MyPlan: SOC W 529](#)

SOC W 530 Advanced Practice with Diverse Children and Families (3)

Builds on foundation frameworks and competencies to develop specialized knowledge and skills for working with vulnerable children and families. An ecological framework informs family- and community-centered assessment and intervention that is empowering, culturally responsive, and clinically relevant. Foci include resilience, violence, attachment, loss, substance abuse, and disability.

[View course details in MyPlan: SOC W 530](#)

SOC W 531 Advanced Practice with Diverse Children and Families: Focus on Child Mental Health (3)

Develops specialized knowledge and skills for practice with children with mental health concerns and their families. Emphasis on child and family mental health assessment and interventions that are culturally relevant, collaborative, and strength-promoting. Topics include culture and mental health, system of care, psychotropic medication, ADHD, and depression.

[View course details in MyPlan: SOC W 531](#)

SOC W 532 Advanced Practice with Diverse Children and Families: Focus on Child Welfare (3)

Develops advanced knowledge and skills for culturally relevant child welfare practice across a range of settings including child protection, foster care, and adoption. Topics include family dynamics around child maltreatment; trauma and its impact on children; separation, loss, and identity development; and self-care in child welfare practice.

[View course details in MyPlan: SOC W 532](#)

SOC W 533 Advanced Practice with Diverse Children, Youth, and Families: Community Settings (3)

Focuses on the critical role of neighborhoods and communities as settings for child and family social work intervention. Provides the theoretical, empirical, and practical foundations for engaging with, implementing, and designing effective programs and services with and for children, youth, and families in diverse community settings.

[View course details in MyPlan: SOC W 533](#)

SOC W 534 Praxis of Intergroup Dialogue (3)

Students design, plan, implement, and evaluate intergroup dialogue sessions as peer facilitators. Students facilitate intergroup dialogue in conjunction with SOC W 504. Focuses on intensive in-vivo instruction, consultation, and supervision of facilitators.

[View course details in MyPlan: SOC W 534](#)

SOC W 535 Special Topics in Interpersonal/Direct Practice (2-3, max. 9)

Examines current substantive topics in direct/interpersonal practice.

[View course details in MyPlan: SOC W 535](#)

SOC W 536 Social Movements and Organizing: People, Power, and Praxis (3)

Focuses on social, economic, and political problems from an organizer's perspective, and strategies, tactics, and skills necessary to engage in organizing activities. Emphasizes principles common to community, electoral, union, and issue organizing. Addresses why people organize, how organizing works, and what it takes to be a

good organizer.

[View course details in MyPlan: SOC W 536](#)

SOC W 537 Empowerment Practice with Refugees (3)

Empowerment practice with refugees and immigrants across a transnational continuum of forced migration, including flight, internal displacement, asylum seeking, repatriation, and resettlement. Instruction includes classroom activities, workshops with local service providers, and agency-based projects. Addresses implications for strengths-based social services, policy, and practice skills.

[View course details in MyPlan: SOC W 537](#)

SOC W 538 Critical Empowerment Practice with Multi-ethnic Communities (3)

Principles of empowering practice, critical analyses of models of multiculturalism and paradigms of knowledge and practice proven problematic in our increasingly diverse society. Assists students in developing empowering practice values, knowledge, and skills for work in multi-ethnic communities.

[View course details in MyPlan: SOC W 538](#)

SOC W 539 Ethnographic Interviewing (3)

Facilitates empowering and culturally sensitive practice, while providing an understanding of the other from his/her own perspective. Addresses power in worker-client relationships, clients as experts, communication across cultures, the uses and presentation of data to effect social change, ethical issues, and specific ethnographic interviewing techniques.

[View course details in MyPlan: SOC W 539](#)

SOC W 540 Advanced Social Work Practice in Health Settings I (3)

Teaches theory and strengths-based practice within interprofessional health care settings from bio-psychosocial, family systems, multi-cultural, contextual, and lifespan perspectives. Advances skills in conducting assessments and interventions to support individuals and families experiencing pain and loss associated with trauma and acute or chronic illness.

[View course details in MyPlan: SOC W 540](#)

SOC W 541 Advanced Social Work Practice in Health Settings II (3)

Teaches health care theory and practice skills relevant to working with adults and children in a variety of health care settings, using biopsychosocial, contextual, multicultural, interdisciplinary, and lifespan perspectives. Advances skills in adherence assessment, ethical decision-making, discharge planning, cross-cultural and cross-professional practice, and counseling regarding life-threatening illness.

[View course details in MyPlan: SOC W 541](#)

SOC W 542 Recovery-Oriented Social Work Practice in Community Mental Health (3)

Emphasizes recovery-oriented practice with adults with severe and persistent mental illness and persons with co-occurring mental illness and substance disorders. Trains for generalist social work practice in most community mental health settings: community mental health centers, psychiatric hospitals, residential programs, jails, homeless shelters, on-the-streets, client's homes, etc.

[View course details in MyPlan: SOC W 542](#)

SOC W 543 Social Work Practice in Community Mental Health II (3)

Focuses on social work practice with persons with severe mental illness. Emphasizes recovery, supported housing, supported employment, integrated treatment of co-occurring disorders. Covers practice with diverse populations: multicultural, developmentally disabled, geriatric, and gay/lesbian. Examines partnering with family members and working with Social Security. Complements SOC W 542, but may be taken free-standing.

[View course details in MyPlan: SOC W 543](#)

SOC W 544 Clinical Social Work with Individuals I: Theory and Practice (3)

First quarter of a two-quarter sequence on the theory and practice of clinical social work. Focuses on key concepts underlying direct practice. Topics include the therapeutic relationship, therapeutic listening, the ground rules, transference, counter transference, psychological defenses, resistance, phases of treatment, transference,

countertransference, and vicarious trauma.

[View course details in MyPlan: SOC W 544](#)

SOC W 545 Clinical Social Work With Individuals II: Theory and Practice (3)

Second of a two-quarter sequence on the theory and practice of clinical social work. Focuses on the use of interpretation, obstacles to treatment, intervention techniques, case formulations that link assessment and intervention, monitoring client progress, and on selected theories of therapy.

[View course details in MyPlan: SOC W 545](#)

SOC W 546 Addressing Trauma and Recovery in Multi-Generational Advanced Practice (3)

Multigenerational perspective on clinical interventions for various traumas: childhood sexual abuse, battering at any age, chemically dependent parents, elders with abusive adult children, and a range of losses throughout the lifespan. Recovery process explicated in terms of family strengths across the generations and through state-of-the-art techniques for healing trauma.

[View course details in MyPlan: SOC W 546](#)

SOC W 547 Multigenerational Integrative Seminar (1-3, max. 3)

Designed to foster the integration of classroom learning and field education. Taken concurrently with advanced practicum, provides support for addressing challenges in professional settings, development of leadership skills, and preparing for future work in the field of multigenerational practice. Credit/no-credit only.

[View course details in MyPlan: SOC W 547](#)

SOC W 548 Advanced Practice I: Multigenerational (3)

First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual assessment from micro to macro levels.

[View course details in MyPlan: SOC W 548](#)

SOC W 549 Advanced Practice II: Multigenerational (3)

Second quarter of a two-quarter sequence. Highlights program planning, supervision, and intervention across all levels of practice.

[View course details in MyPlan: SOC W 549](#)

SOC W 550 Strategic Program Management and Change Leadership in Human Services (3)

Examines tools and techniques required for leadership, program planning, implementation, and program change. Topics include strategic planning, logic modeling, agency-bound relations, work-group facilitation, and diversity-promoting management. Lecture, discussion, and exercises. Required for SSW administration concentrators; open to others with permission of instructor.

[View course details in MyPlan: SOC W 550](#)

SOC W 551 Human Resource Management in the Human Services (3)

Theories and techniques for 1) designing human services workplaces that support employees' performance and well-being, and 2) managing diverse, satisfied, and high-performing human service staffs. Topics include job quality analyses; job descriptions; employee interviewing, supervision and performance evaluation; models of negotiation and conflict resolution; and strategies for working with volunteers.

[View course details in MyPlan: SOC W 551](#)

SOC W 552 Financial Management of Human Services Programs (3)

Covers key financial management components of human service programs, including development and use of business plans, budgets, and financial statements. Helps students to demonstrate an understanding of financial management through budget preparation, financial statement analysis, new project cost projections, audits, and presentations using computer-based spreadsheets and presentation software.

[View course details in MyPlan: SOC W 552](#)

SOC W 554 People, Place, Equity (3)

Introduces empirical, theoretical, and applied knowledge on place as a key dimension of social work practice. Examines how people-place relationships differentially affect social opportunities such as health and wellness, employment, and housing. Provides intellectual and practical foundations for incorporating spatial analyses and collaborative place-making interventions in practice.

[View course details in MyPlan: SOC W 554](#)

SOC W 555 Global Perspectives in Social Work Practice (3)

Focuses on contemporary social issues of global importance: poverty; HIV/AIDS; population growth; gender inequality; and war, conflict, and displacement, with specific focus on these issues in the global south. Examines sociocultural, economic, and political processes that shape these issues, and entwined perspective of human rights and development.

[View course details in MyPlan: SOC W 555](#)

SOC W 556 Family Healing: A Cross-Generational Approach (3) *Lustbader*

Explores how to respond to multi-generational dynamics within the entire extended family and examines how bow difficulties and strengths are passed from one generation to another. Emphasizes cultural differences as well as issues pertaining to the impact of chemical dependency, mental illness, and disability across generations.

[View course details in MyPlan: SOC W 556](#)

SOC W 557 Caring for Persons with Life-Limiting Illness: A Lifespan Approach (3)

Focuses on multi-systemic social work practice with seriously ill people with a life-limiting condition. Examines how families care for a critically ill loved one, and the differences that occur when the seriously ill person is a child, adolescent, a mid-aged adult, or an elder at the end of life.

[View course details in MyPlan: SOC W 557](#)

SOC W 558 Gender, Gender Identity, and Sexuality (3)

Anti-oppression focus on social work practice with lesbian, gay, bisexual, transgender, two-spirit, intersexed, and queer communities. Emphasizes cultural, social, and political context within which such practice occurs as well as an examination of the diversity and heterogeneity within these communities. Enhances students' micro and macro practice skills.

[View course details in MyPlan: SOC W 558](#)

SOC W 559 Child Development (3)

Provides students with a basic understanding of child development theory and research as well as specific knowledge about the development of children from infancy through adolescence. Emphasizes developmental approach to assessment and intervention with children and families. Particular emphasis placed on developmentally-based child welfare practice.

[View course details in MyPlan: SOC W 559](#)

SOC W 560 Policy Processes, Institutions, and Influences (3)

Focuses on the process and institutions through which social policies are developed, adopted, and implemented, with special attention to the implications of these processes for social justice. Develops practice skills in analyzing and influencing the policy process, including social problem definition, policy design, policy adaptation, and policy implementation.

[View course details in MyPlan: SOC W 560](#)

SOC W 561 Concepts and Methods of Policy Analysis (3)

Engages students in the concepts and applied practice of policy analysis and evaluation. Prepares students to address two generic policy questions: Given an identified problem, what policy or program should be selected? Given a particular policy or program, how do we evaluate effectiveness? Particular attention paid to social justice implications.

[View course details in MyPlan: SOC W 561](#)

SOC W 562 Advanced Practice I: Health/Mental Health (3)

First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual assessment from micro to macro levels.

[View course details in MyPlan: SOC W 562](#)

SOC W 563 Advanced Practice II: Health/Mental Health (3)

Second quarter of a two-quarter sequence. Highlights program planning, supervision, and intervention across all levels of practice.

[View course details in MyPlan: SOC W 563](#)

SOC W 565 Special Topics in Policy Practice (2-3)

Examination of current substantive topics in policy practice. Content varies according to recent developments in the field and the interests of the instructor.

[View course details in MyPlan: SOC W 565](#)

SOC W 570 Anti-racist Organizing for Social and Economic Change (3)

Applies an institutional analysis of racism and white privilege to the strategies of community organizing by communities of color and indigenous peoples. Examines anti-racist organizational transformation, intersectionality of oppressions and privileges, white allies in anti-racist struggles, and the role of social workers in maintaining and combating institutional racism.

[View course details in MyPlan: SOC W 570](#)

SOC W 571 Assessment of Mental Disorders (3)

Provides basic knowledge and skills to assess mental disorders and improve critical thinking concerning assessment and diagnosis. Emphasizes the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV) for its system of symptom description and classification. Examines challenges of methodological implications of mental health assessment across race, gender, and ethnicity.

[View course details in MyPlan: SOC W 571](#)

SOC W 572 Understanding Addiction, Pharmacology of Drugs, and Treatment Methods (3)

Provides students with the knowledge and basic skills to recognize and understand the dynamics of chemical dependency in the lives of individuals, how to assess the presence of this disorder, and what the issues are in referring individuals to treatment for this disorder.

[View course details in MyPlan: SOC W 572](#)

SOC W 573 Child Welfare and Permanency Planning (3)

Focuses on social work interventions within the public child welfare system for children who have been abused and neglected. Includes practice models to ensure safety and permanency for children, federal and state mandates for permanency, cultural determinants, juvenile court dependency system, and research findings pertaining to permanency planning outcomes.

[View course details in MyPlan: SOC W 573](#)

SOC W 574 Collaborative Community-Based Program Evaluation (3)

Focuses on carrying out a formative and process evaluation of a community program in conjunction with program staff and clients. In addition to learning about program theory, measurement construction, study design, and data analysis, students develop consultative and presentation skills needed in utilization-focused evaluation.

[View course details in MyPlan: SOC W 574](#)

SOC W 575 Domestic Violence Policy and Intervention (3, max. 6)

Examines policy, theory, research, and intervention in field of intimate partner violence with emphasis on historical, cultural, and political contexts. Advanced study of structural contributors, policy parameters, and service delivery and cross-systems necessary to effective practice and leadership in the field locally, nationally, and globally.

[View course details in MyPlan: SOC W 575](#)

SOC W 576 Empowerment Practice with Persons with Disabilities (3)

Provides background in theories and models of disability that contribute to empowerment-oriented intervention techniques. Emphasizes direct practice skills for working with people with disabilities and their families. Emphasizes understanding how disability studies and the disability movement influence social work practice.

[View course details in MyPlan: SOC W 576](#)

SOC W 577 Maintaining Quality Social Work Practice: Ethics, Self-care, and Risk Management (2-3)

Develops models for managing ethical and legal obligations to clients and others; managing risk; and maintaining ethical, responsible, and self-sustaining practice over a professional career. Examines competing ethical frameworks and material on essential values underlying ethical principles and the basis for ethical and legal regulation of practice.

[View course details in MyPlan: SOC W 577](#)

SOC W 578 Evidence-Based Practice in Child Mental Health (3)

Critically examines the program components and empirical research base of selected child mental health treatment program models designed to serve children and youth who present with severe emotional or behavioral disorders. Focuses on treatment models that reflect a "systems care philosophy" and which offer alternatives to traditional services.

[View course details in MyPlan: SOC W 578](#)

SOC W 579 Faith Matters and Mental Health Practice: Conflict vs Integration (3)

Examines the complex interrelation between faith matters and the practice of mental health professions, including approaches to definitions and assessments.

[View course details in MyPlan: SOC W 579](#)

SOC W 580 Grant Writing and Fund Development (3)

Prepares students to participate and provide leadership in grant writing and fundraising for community-based human services. Opportunity to practice skills required for developing a successful grant proposal and planning a successful fundraising program. Identify, cultivate, and develop sources of funding. Students assist in writing a complete grant proposal as final project.

[View course details in MyPlan: SOC W 580](#)

SOC W 581 Historical Trauma and Healing (3)

Provides specialized knowledge and skills for practice with communities experiencing historical trauma. Covers emerging theories of historical trauma, impact of historical trauma on families and communities, and culturally relevant interventions to promote healing. Builds upon the concepts of empowerment practice and indigenous models of social work.

[View course details in MyPlan: SOC W 581](#)

SOC W 582 Interpersonal Violence and Trauma (3)

Examines trauma theory, nature of interpersonal violence, psychodynamic concepts, cognitive behavioral theory, treatment of victims and offenders. Psychological trauma, abuse-specific psychotherapy, multidisciplinary and cognitive behavioral interventions with victims and offenders, effects of interpersonal violence, and counter-transference reactions. Includes lecture, discussion, case presentations, and presentations by community experts.

[View course details in MyPlan: SOC W 582](#)

SOC W 583 Multicultural and Multigenerational Approaches to Healing Grief and Loss (3)

Uses critical analysis to expand Western symptom-oriented grief and loss theory to include multicultural approaches, exploring new constructionist models of meaning-making, narrative biography, and cultural tradition through case studies. Assessment and intervention exercises include journaling, art, and ritual, allowing students to explore how their own grief affects practice.

[View course details in MyPlan: SOC W 583](#)

SOC W 584 Multicultural Mental Health Practice (3)

Advanced-practice course that builds upon foundation content in HUB, micro- and macro-practice/HBSE

sequences, policy, diversity, and research. Grapples with complex mental health service design and delivery issues often informed by ethnocentric paradigms of knowledge and practice that have proven problematic in their general application in our increasingly diverse society.

[View course details in MyPlan: SOC W 584](#)

SOC W 585 Advanced Group Work (3)

Overview of group work and major theorist in the field. Examines differential applicability of methods across diverse populations. Emphasis on developing powers of observation of group process (as opposed to content) and on ability to intervene at the group level (as opposed to individual level). Prerequisite: Group work experience.

[View course details in MyPlan: SOC W 585](#)

SOC W 586 Policy Advocacy (1-3, max. 3)

Focuses on involvement in the policy-making process. Students design projects to influence public policy in local, state, and federal levels. Readings based on policy materials (proposed and final laws, regulations, budgets, advocacy documents). Credit/no-credit only.

[View course details in MyPlan: SOC W 586](#)

SOC W 587 Spirituality in Healthcare (2)

Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/FAMED 547; Sp.

[View course details in MyPlan: SOC W 587](#)

SOC W 588 Social Work in Schools (3)

Meets professional standards for Washington State Educational Staff Associate certification. Explores social work role within organizational and legal contexts of school systems. Addresses evidence-informed and multi-level social work practice relative to national, state and local trends in education. Examines school reform, truancy, homelessness, diversity, violence, student support and special education.

[View course details in MyPlan: SOC W 588](#)

SOC W 589 Social Work Practice with Families (3)

Philosophical, theoretical, and practice issues relevant to family-centered social work. Presents family systems theory and a generalized model of engagement, assessment, and treatment. Clinical applications with particular client populations and their presenting problems, such as couples, family crisis, child behavioral problems, and affective disorders.

[View course details in MyPlan: SOC W 589](#)

SOC W 590 Social Work Supervision and Consultation (3)

Provides knowledge and skills involved in the role of social worker as supervisor and team leader; supervision as a leadership function, power and authority, professional boundaries, staff recruitment, selection, performance evaluation, and addressing staff-related performance problems.

[View course details in MyPlan: SOC W 590](#)

SOC W 591 Social Work Practice in Long-Term Care Across the Lifespan (3)

Applies a multigenerational framework to introduce values, skills, and knowledge necessary for social work practice in long-term care settings across all age groups. Meets at a nearby continuing care community and provides regular opportunities to interact with persons requiring long-term care, their families, and formal caregivers.

[View course details in MyPlan: SOC W 591](#)

SOC W 592 Social Work Practice with African-American Families (3)

Introduces the study of African-American families from a historical, socio-cultural, and political perspective. Presents various theories for understanding African-American families and addresses an Afrocentric framework for intervention.

[View course details in MyPlan: SOC W 592](#)

SOC W 593 Social Work Practice with Chemically Dependent Adults: Understanding Assessment, Evaluation, and Counseling (3)

2526

Teaches skills in four contexts: (1) incorporating questions concerning alcohol/drug use in an assessment of new clients, (2) conducting a comprehensive alcohol/drug assessment when a problem has been identified, (3) offering a brief motivational enhancement intervention to ambivalent clients, and (4) delivering cognitive-behavioral counseling focusing on overcoming dependence.

[View course details in MyPlan: SOC W 593](#)

SOC W 594 Gender and Inequalities in the Global Context (3)

Examines issues of gender, globalization, and inequality through a gender lens. Topics include global movements of capital (the global factory) and labor (migration, trafficking, etc.), disruption/creation of family forms and gender roles (domestic violence), social welfare, private/public policies, international frames (human rights), resistance, and response.

[View course details in MyPlan: SOC W 594](#)

SOC W 595 Co-Occurring Addiction and Mental Health Disorders (3)

Provides students with the knowledge and skills to understand the dynamics of co-occurring addiction and mental health disorders (COD) in the lives of individuals. Students learn how to assess the presence of COD and what the issues are in referring individuals to treatment or providing them treatment for COD.

[View course details in MyPlan: SOC W 595](#)

SOC W 596 Statistics in Social Work (1-3, max. 3)

Introductory foundation in descriptive statistics, probability theory, statistical inference, and bivariate statistics commonly used in evaluations of social program and clinical practice. Conceptual emphasis on understanding the logic of measurement and statistical inference. Understanding reinforced by hand calculations involving high school algebra. Fulfills SOC W 505 prerequisite.

[View course details in MyPlan: SOC W 596](#)

SOC W 597 Graduate Study Abroad in Social Work (1-15, max. 15)

For graduate students in a UW study abroad program. Specific content varies and must be individually evaluated.

[View course details in MyPlan: SOC W 597](#)

SOC W 598 Integrative Seminar (1-5, max. 12)

Integrates specialized knowledge in social work settings. Offered: AWSp.

[View course details in MyPlan: SOC W 598](#)

SOC W 599 Independent Study in Social Work (1-10, max. 10)

Prerequisite: approval of a well-specified plan by an instructor and program director, including learning objectives and activities. Credit/no-credit only.

[View course details in MyPlan: SOC W 599](#)

SOC W 600 Independent Study or Research (1-10, max. 10)

An independent research project. Prerequisite: approval of a well-specified plan by an instructor and program director, including learning objectives and activities included on the SOC W 600 form.

[View course details in MyPlan: SOC W 600](#)

SCHOOL OF SOCIAL WORK

SOCIAL WORK

SOCIAL WELFARE (BASW)

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

SOC WF 101 Social Work in Action: Bridging the Gap From Science to Service (5) I&S

Explores current social work practice and research applied to major societal problems. Lectures and discussions by leading faculty introduce students to the evidence-based perspective underlying program planning and practice innovation. Topics include: juvenile delinquency, child maltreatment, domestic violence, foster care reform, mental health, school violence, substance abuse, and poverty. Offered: A.

[View course details in MyPlan: SOC WF 101](#)

SOC WF 120 International Responses to Human Needs: Social Welfare Policies and Services (5)

Focuses on major global social services such as poverty, immigration, and health that are reshaping social welfare policies and services throughout the world. Provides a comparative overview of social welfare policies and programs in the United States and selected other countries.

[View course details in MyPlan: SOC WF 120](#)

SOC WF 200 Introduction to Social Welfare Practice (5) I&S

Introduction to the field of social work, including the theoretical concepts and institutional framework that guide practice. Overview of social work profession and social welfare system within which it operates. Lectures supplemented by exercises, films, guest lectures, and class discussions. Offered: A.

[View course details in MyPlan: SOC WF 200](#)

SOC WF 201 Advances in Prevention Science: Bridging the Gap from Science to Service (5) I&S

Investigates the potential for preventing major social problems (child abuse and neglect, alcohol misuse, and interpersonal violence). Critically examines the state of prevention science, includes dialogue about ways to enhance the exchange of ideas between research and practice communities, and explores implications for social policy.

[View course details in MyPlan: SOC WF 201](#)

SOC WF 215 Intergroup Dialogues (3) DIV

Explores issues of social identities, differences, and inequalities to build understanding, skills, and values for bringing about greater social justice using dialogic communication.

[View course details in MyPlan: SOC WF 215](#)

SOC WF 250 Writing for Social Welfare (2)

Focuses on producing short essays, paragraphs, and individual sentences. Discusses writing conventions and students' questions and challenges; analyzes writing samples; and practices short writing to develop greater ease with writing well and writing frequently. Credit/no-credit only.

[View course details in MyPlan: SOC WF 250](#)

SOC WF 297 Study Abroad in Social Work (1-15, max. 15)

For participants in a UW study abroad program. Specific content varies and must be individually evaluated.

[View course details in MyPlan: SOC WF 297](#)

SOC WF 310 Social Welfare Practice I (5)

Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Offered: A.

[View course details in MyPlan: SOC WF 310](#)

SOC WF 311 Social Welfare Practice II (5)

Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Prerequisite: SOC WF 310. Offered: W.

[View course details in MyPlan: SOC WF 311](#)

SOC WF 312 Social Welfare Practice III (5)

Focus on macro systems in a diverse society using the generalist perspective. The implications of system resources and configurations for meeting human needs are considered. The role and function of generalist social workers to understand and advocate for system development and change is emphasized. Prerequisite: SOC WF 311. Offered: Sp.

[View course details in MyPlan: SOC WF 312](#)

SOC WF 315 Community Service Learning (1-5, max. 6)

Opportunity for students to apply social work theory to practice, to advocate for social justice, and to be involved in community service. Students learn by connecting classroom theory and community-based experience through the completion of community-based projects in social work-type agencies. Majors only.

[View course details in MyPlan: SOC WF 315](#)

SOC WF 320 Social Welfare Policy (5) I&S

Emphasizes policy and program development in social welfare with emphasis on the context, making, and unmaking of social policy. Covers policy formulation as well as current and emerging policies in social welfare. Prerequisite: SOC WF 200. Offered: WSp.

[View course details in MyPlan: SOC WF 320](#)

SOC WF 390 Introduction to Social Welfare Research (5)

Introduction to logic of the scientific method as applied to social work and social welfare practice, to the design and conduct of a research study, and to data collection and summarization. Skill development in critical consumption of social welfare research. Prerequisite: either STAT 220 or QMETH 201. Offered: A.

[View course details in MyPlan: SOC WF 390](#)

SOC WF 402 Human Behavior and Social Environment I (5) I&S

Focuses on understanding human development across the lifespan. Integrates biological, psychological, structural, environmental, political, global, and socio-cultural perspectives. Explores the relationship between the person and the environment including families, groups, organizations, communities, and institutions.

[View course details in MyPlan: SOC WF 402](#)

SOC WF 404 Cultural Diversity and Justice (5) I&S, DIV

History and culture of disadvantaged and oppressed groups served by social welfare generalist practitioners. Offered: Sp.

[View course details in MyPlan: SOC WF 404](#)

SOC WF 405 Fieldwork Seminar (1-4, max. 9)

Integrates social work practicum experiences with prior and concurrent coursework in social sciences, social work, and research. Includes discussion of class presentations and simulations or practice situations that combine knowledge and skill utilization. Student logs provide a basis for individual goal identification and achievement. Required of social welfare seniors. Offered: AWSp.

[View course details in MyPlan: SOC WF 405](#)

SOC WF 410 Evidence-Based Practices in Social Welfare (3)

Focuses on interface between social work research and practice, with attention to origins and defining features of evidence-based practice (EBP) and approaches to intervention consistent with EBP framework. Integrates content on research and practice priorities, and provides students with knowledge and skills to promote use of theory-driven, empirically-supported interventions.

[View course details in MyPlan: SOC WF 410](#)

SOC WF 415 Beginning Field Instruction (1-12, max. 12)

Students are placed in selected social service agencies and accept beginning social service assignments under the supervision of competent agency personnel. Credit/no-credit only. Offered: AWSp.

[View course details in MyPlan: SOC WF 415](#)

SOC WF 435 Skills for Social Welfare Practice (1)

Builds on first-year generalist practice content. Provides skill building in one or two areas of social work practice relevant to many practice settings. Topic chosen by students and faculty. Credit/no-credit only.

[View course details in MyPlan: SOC WF 435](#)

SOC WF 442 Building Competencies for Intergroup Dialogue Facilitation (5) VLPA/I&S, DIV

Focuses on both knowledge and skills development for peer facilitators. Topics include philosophy and principles of dialogic education and dialogic communication; intergroup communication; social identity development; principles of working with conflict; group dynamics, observation, and facilitation; team building among co-facilitators; and creating a support system among instructors and facilitators.

[View course details in MyPlan: SOC WF 442](#)

SOC WF 443 Facilitating Intergroup Dialogue (5) VLPA/I&S, DIV

Practicum seminar providing instruction, consultation, and supervision of peer group facilitators. Focuses on comparison of facilitation experiences and consultations, trouble-shooting with other facilitators, co-facilitator team building, and planning for dialogues. Exploration of specific, current intergroup issues, such as affirmative action and immigration. Continuation of team-building work begun in SOC WF 442.

[View course details in MyPlan: SOC WF 443](#)

SOC WF 445 Special Topics in Social Work Practice Methods (3, max. 6)

Examines roles, skills, and methods in designated areas of social work practice. Content builds on foundation practice methods.

[View course details in MyPlan: SOC WF 445](#)

SOC WF 450 Integrative Seminar: Poverty Analysis (5)

Critical analysis of poverty both in the United States and from a global perspective. Analytical and descriptive focus on measurement, processes of production and perpetuation, and theoretical perspectives that lead to different social and economic policy responses.

[View course details in MyPlan: SOC WF 450](#)

SOC WF 460 Chemical Dependency: Assessment and Treatment (3)

Provides students the knowledge and basic skills needed to recognize and understand the dynamics of chemical dependency in the lives of individuals. Students learn how to assess the presence of this disorder and what the issues are in referring individuals to treatment.

[View course details in MyPlan: SOC WF 460](#)

SOC WF 465 Social Welfare Capstone Seminar (1)

Students demonstrate and reflect on mastery of core competencies and respective practice behaviors foundational to generalist practice. Studies analyze and synthesize data from their experiences in the BASW program and integrate this understanding with their new identity as a professional social worker. Credit/no-credit only.

[View course details in MyPlan: SOC WF 465](#)

SOC WF 490 Independent Research in Social Welfare (1-15, max. 15)

Individual work with faculty member to assist with current research project(s). Students trained and supervised in some or all of the following research tasks: literature review, data analysis, record-keeping, interviewing, report writing, data entry and coding, data collection, and other tasks commonly found in research problems in social welfare. Credit/no-credit only.

[View course details in MyPlan: SOC WF 490](#)

SOC WF 491 Honors Seminar (1, max. 3)

Three quarter seminar for students admitted into the BASW Honors Program. Guides students through stages of research conceptualization and proposal writing, IRB application, data collection and analysis, and dissemination. Includes feedback and discussion with instructor and peers. Credit/no-credit only.

[View course details in MyPlan: SOC WF 491](#)

SOC WF 492 Honors Thesis I (3-)

Part one of a two quarter series for BASW Honors students writing their honors thesis. Students carry out an individual project of their choosing under the guidance of a faculty member. Focuses on data collection, management, and preliminary analysis.

[View course details in MyPlan: SOC WF 492](#)

SOC WF 493 Honors Thesis II (-3)

Part two of a two quarter series for BASW Honors students writing their honors thesis. Students carry out an individual project of their choosing under the guidance of a faculty member. Focuses on data analysis, research writing, and presentation of results.

[View course details in MyPlan: SOC WF 493](#)

SOC WF 495 Special Topics in Generalist Social Welfare (1-5, max. 15)

Readings, lectures, and discussions pertaining to significant topics of special and current interest to social workers.

[View course details in MyPlan: SOC WF 495](#)

SOC WF 497 Advanced Study Abroad in Social Work (1-15, max. 15)

For participants in a UW study abroad program. Specific content varies and must be individually evaluated.

[View course details in MyPlan: SOC WF 497](#)

SOC WF 499 Independent Study in Social Welfare (1-15, max. 15)

Independent reading or independent study. Includes written paper. Not open to graduate or non-matriculated students.

SCHOOL OF SOCIAL WORK

SOCIAL WORK

SOCIAL WELFARE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

SOC WL 515 Community Service Practicum (3, max. 6)

Development of skills on working in partnership with community institutions in the role of researcher or scholarly collaborator, through ongoing reflection and consultation with a faculty member. Uses a learning contract to focus specific activities. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: SOC WL 515](#)

SOC WL 552 Seminar in Contemporary Social Welfare Policy (3)

Critical review of contemporary American income maintenance and related social welfare policies, and the economic, political, and social factors that affect their development, implementation, and effectiveness. Evaluation of their effects on poverty, income inequality, and related social outcomes, including international comparisons. Assessment of proposals for reform. Closely linked to SOC WL 553.

[View course details in MyPlan: SOC WL 552](#)

SOC WL 553 Policy Implementation and Organizations (3)

Examines diverse organization theories relevance to policy implementation, translational research, and practice interventions within health and human service settings. Emphasizes multilevel models and integrative frameworks that take into account individual, group, and organizational factors, recognizing outcomes as embedded phenomenon nested within organization, community, and societal contexts. Offered: Sp.

[View course details in MyPlan: SOC WL 553](#)

SOC WL 554 Analytical Perspectives on Social Welfare Policy (3)

Broad overview of the social welfare policy process, including epistemological issues, content on social problem construction and definition, policy agendas and case study methodology. Introduction to analytical tools and concepts needed to take a proactive role in policy development, advocacy, implementation, and policy research.

[View course details in MyPlan: SOC WL 554](#)

SOC WL 556 West Coast Poverty Center Seminar Series (1, max. 15)

Presents cutting-edge research on poverty, inequality, and public policy. Offered: AWSp.

[View course details in MyPlan: SOC WL 556](#)

SOC WL 557 Dissertation and Career Seminar (1, max. 20)

Orients advanced PhD students to three main tasks: dissertation, job market, and entering teaching and research careers. Offered: AWSp.

[View course details in MyPlan: SOC WL 557](#)

SOC WL 559 Preparing to Teach: Instructional Theory and Practice (3)

Teaching conceptualized as professional practice. Focuses on integration of theory, research and educational strategies, techniques, and skills into students' practice as educators. Classroom discussions and activities promote reflection, exploration, critical analysis, and experimentation.

[View course details in MyPlan: SOC WL 559](#)

SOC WL 577 Promoting Well-Being among At-Risk Groups through Prevention Research (3)

Interdisciplinary overview of major concepts and methods in health promotion and prevention research, with emphasis on at-risk populations. Attentive to health disparities, collaboration with diverse communities and biobehavioral advances in addition to application of theory and prevention-science framework. Encourages interdisciplinary participation and supporting students in articulating their research perspectives.

[View course details in MyPlan: SOC WL 577](#)

SOC WL 578 Seminar in Special Topics for Prevention Research (1, max. 30)

Interdisciplinary overview of major concepts in promotion of mental health and prevention of mental distress with prevention science as framework. Provides conceptual foundations for advanced study in specialized aspects of mental health prevention research. Credit/no-credit only.

[View course details in MyPlan: SOC WL 578](#)

SOC WL 579 Interdisciplinary Approaches to Prevention Science: Children and Adolescents (3)

Overview of theory, research, and practice in prevention science. Developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21). Designed for interdisciplinary dialogue, and includes guest faculty from around the University who are specialists in course topics. Credit/no-credit only.

[View course details in MyPlan: SOC WL 579](#)

SOC WL 580 Quantitative Research Methods and Design (3)

Logic, terminology, and methods of quantitative social science approaches to correlational, experimental, quasi-experimental, survey, and program evaluation research. Components of the research process (problem definition, concept explication, ethical evaluating, and designing defensible quantitative research studies).

[View course details in MyPlan: SOC WL 580](#)

SOC WL 581 Qualitative Research Methods and Design (3)

Theoretical and methodological foundations of a range of qualitative methods relevant to social welfare and social science research. Fundamentals of qualitative research design and implementation, including framing research questions, sampling, data collection, analytical methods, and quality criteria. Focus on ethics, cultural sensitivity, and community-based research with vulnerable populations.

[View course details in MyPlan: SOC WL 581](#)

SOC WL 582 Research Practicum (3-)

Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.

[View course details in MyPlan: SOC WL 582](#)

SOC WL 583 Research Practicum (-3)

Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.

[View course details in MyPlan: SOC WL 583](#)

SOC WL 584 Teaching Practicum (3)

Supervised teaching of a required course or teaching as a co-instructor with a faculty member. Learning contract used to target specific teaching competencies, e.g., assessing and evaluating student outcomes, identifying class session goals and objectives, tailoring instruction methods to diverse learning styles. Credit/no-credit only.

Offered: AWSpS.

[View course details in MyPlan: SOC WL 584](#)

SOC WL 585 Qualitative Methods in Social Work Research I (3)

The first in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

[View course details in MyPlan: SOC WL 585](#)

SOC WL 586 Qualitative Methods in Social Work Research II (3)

The second in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

[View course details in MyPlan: SOC WL 586](#)

SOC WL 589 Multivariate Data Analysis for the Social Sciences (4, max. 8) E. EROSHEVA

Multivariate analysis aims to summarize and describe patterns among multiple observed characteristics.

Explores theoretical introduction and practical skills to carry out multivariate analysis methods such as cluster analysis, principal components, factor analysis, and latent class analysis. Prerequisite: SOC 504, SOC 505, or SOC 506. Offered: jointly with CS&SS 589; A.

[View course details in MyPlan: SOC WL 589](#)

SOC WL 590 Topics in Advanced Research Methods (3)

Special topics in social and behavioral research design for advanced graduate students. Topics vary and focus on community-based research methods and measurement construction for culturally diverse populations.

Prerequisite: doctoral student in social welfare or related discipline; advanced master's level students by permission of instructor.

[View course details in MyPlan: SOC WL 590](#)

SOC WL 591 Seminar on Topics in Social Welfare (1-5, max. 15)

[View course details in MyPlan: SOC WL 591](#)

SOC WL 598 Theory and Metatheory in Social Research (3)

Explores the nature and role of theory in social research, theoretical and metatheoretical foundations of major social science research paradigms, and interdisciplinary perspectives on the socially constructed nature of theory and definitions of social "problems." Encourages critical, collaborative reflection on the role of theory in contemporary interdisciplinary research environments.

[View course details in MyPlan: SOC WL 598](#)

SOC WL 599 Theory Development for Social Research (3)

Assists students in applying theory in building an original conceptual model. Emphasizes critical and integrative thinking derived from a social justice framework. Encourages students to examine the ideological, political, methodological, and ethical principles shaping theories, models, and concepts in contemporary social science and social welfare research. Open to interdisciplinary students with instructor permission. Prerequisite: admission to social welfare PhD program or permission of instructor.

[View course details in MyPlan: SOC WL 599](#)

SOC WL 600 Independent Study or Research (*-)

Prerequisite: approval of a well-specified plan by the instructor and program director. Includes a written product. Credit/no-credit only. Offered: AWSpS.

[View course details in MyPlan: SOC WL 600](#)

SOC WL 800 Doctoral Dissertation (*-)

Offered: AWSpS.

Arctic Studies

[Display as tabs](#)

Program Overview

The minor in arctic studies is sponsored jointly by the [Jackson School of International Studies](#) within the College of Arts and Sciences and the [School of Oceanography](#) in the College of the Environment. This interdisciplinary academic program links the natural, social sciences, and humanities in an integrated program of study. The purpose of the Arctic Studies minor is for undergraduates to have an opportunity to gain skills relevant to addressing major science and policy issues in the Arctic.

- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

ARCTIC 101 Elementary Inuktitut: Inuit Language (3) S. MALLON

Fundamentals of oral and written modern Inuktitut, the Inuit language, including an introduction to the elements of Inuit culture. Offered: AS.

[View course details in MyPlan: ARCTIC 101](#)

ARCTIC 102 Elementary Inuktitut (Inuit Language) (3) S. MALLON

Continues the process of laying the groundwork for communicative work in Inuktitut, begun in ARCTIC 101. Offered: W.

[View course details in MyPlan: ARCTIC 102](#)

ARCTIC 200 Indigenous Diplomacies and International Relations in the Arctic (3) I&S Fabbi

Provides an overview of current issues and geopolitics in the Arctic including those of the eight Arctic nation-states, six Permanent Participants (indigenous organizations) on the Arctic Council, and other non-Arctic nation-state interests. Offered: A.

[View course details in MyPlan: ARCTIC 200](#)

ARCTIC 387 Study Abroad: Arctic Studies (1-5, max. 15)

Relates Arctic geopolitics, indigenous internationalism, the arts, and/or natural sciences to the regions and peoples of the circumpolar world. Equivalency for upper division Arctic minor of Jackson School course work taken on UW study abroad or direct exchange. Specific content varies and is evaluated on an individual basis.

[View course details in MyPlan: ARCTIC 387](#)

ARCTIC 391 Climate Change - An International Perspective: Science, Art, and Activism (5) I&S/VLPA R. PAVIA

Explores climate change science in the context of geographic, social, and political constraints, considering the role of art, activism, and Arctic indigenous peoples in communicating impacts and mitigation. Students gain knowledge in key atmospheric and ocean science principles along with the role of science in society Offered: jointly with JSIS B 391; Sp.

[View course details in MyPlan: ARCTIC 391](#)

ARCTIC 400 Integrating Policy and Science in Arctic Studies (3) I&S/NW Gallucci, Hellmann ²⁵⁴⁸

Introduces Arctic resources and access from physical, biological, and political perspectives, focusing on the latter. Emphasizes political alliances among nation states as well as initiatives by indigenous peoples that involve mutual needs for access to Arctic resources for mining, transport, and food. Offered: Sp.

[View course details in MyPlan: ARCTIC 400](#)

ARCTIC 401 Current Issues Concerning the Arctic Region (3, max. 9) I&S

Addresses current issues impacting the Arctic region from the perspective of visiting scientists, social scientists, practitioners, and Arctic indigenous leaders. Offered: Sp.

[View course details in MyPlan: ARCTIC 401](#)

ARCTIC 498 Special Topics in Arctic Studies (1-5, max. 10)

Content varies by instructor.

B507 Padelford
(206) 616-2352
elsminor@uw.edu

Minor

The minor in education, learning, and society, jointly sponsored by the College of Education and the College of Arts and Sciences, provides a strong background in how human beings learn, and how society, environment, and culture shape learning.

Minor Requirements:

31 credits, to include:

1. Learning and Development: one from PSYCH 206 (prerequisite, PSYCH 101), PSYCH 306, NURS 201, EDPSY 302, EDPSY 406 (5 credits)
2. Schooling and Society: one from AES 340, CHID 210, EDUC 305, EDUC 310, SOC 292 (5 credits).
3. Field Experience: any combination of EDUC 260, EDUC 360, EDUC 361, EDUC 369, GEN ST 346, and GEN ST 470 (with ELS adviser approval, student may substitute one of the following: GEN ST 350, ECFS 303, ECFS 304, ECFS 305, ECFS 454, ECFS 455, ECFS 456, EDC&I 499, EDPSY 499, EDSPE 499, CHID 497, or other related courses) (5 credits).
4. EDUC 299 (1 credit).
5. Electives: 15 credits from an approved list. For list, see adviser or College website.
6. Up to 15 credits of the minor may overlap with a student's major and up to 5 credits may overlap with another minor.

Undergraduate students from outside the College of Education may take courses offered to help them explore the field of education and prepare for graduate study. Fieldwork courses in local schools or social service agencies give students opportunities to make informed career and academic choices. Students may also complete prerequisites for graduate programs. Further, requirements to meet endorsement (subject) guidelines for secondary teaching may be completed by undergraduates.

PHILOSOPHY

VALUES IN SOCIETY

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

VALUES 207 Issues of Global Justice (5) I&S, DIV *M. BLAKE, J. MAYERFELD, W. TALBOTT*

Introduces issues of global justice. Topics include: global poverty and aid, immigration, transnational governance, gender in global relations, climate change, and cultural relativism. Offered: jointly with PHIL 207/POL S 207.

[View course details in MyPlan: VALUES 207](#)

VALUES 291 Ethics in Science (5) I&S

Provides an introduction to ethics and research ethics issues in the non-medical sciences. Possible topics include: publication and peer review, intellectual property, and the social responsibilities of scientists. Offered: jointly with PHIL 291.

[View course details in MyPlan: VALUES 291](#)

VALUES 495 Ethics in Practice (2) M. BLAKE, S. GARDINER, S. GOERING

Culmination of the values-in-society minor. Synthesizes training in ethics with primary discipline. Includes a project of positive social engagement (service learning or research project with fieldwork). Limited to undergraduates completing the minor in values and society. Credit/no-credit only.

[View course details in MyPlan: VALUES 495](#)

VALUES 511 Ethics Matters: An Exploration of Some Moral Qualities (5) S. GOERING

Asks what we fundamentally require of ourselves and others if we are to live together in morally acceptable ways by discussing moral qualities as they appear in various arenas. Topics include: autonomy, respect, integrity, and trust.

[View course details in MyPlan: VALUES 511](#)

VALUES 512 Justice Matters: An Exploration of Justice as a Social Ideal (5) S. GARDINER

Asks what makes social policies and institutions morally acceptable, primarily through a discussion about justice and injustice. Topics include: relativism, the sources of competing conceptions of justice and equality, cost-benefit analysis, distributive justice, and beneficence.

[View course details in MyPlan: VALUES 512](#)

VALUES 513 Capstone Workshop (2) *M. BLAKE, S. GARDINER, S. GOERING*

Collaborative research workshop. Capstone course for the values-in-society graduate certificate program.

Prerequisite: VALUES 511 or VALUES 512. Offered: Sp.

[View course details in MyPlan: VALUES 513](#)

VALUES 591 Ethics Matters in Science: Research Questions as Moral Questions (3)

Aims to introduce graduate and professional students from a wide range of primarily non-medical scientific backgrounds to some common moral questions that arise in the course of doing scientific research, and to provide a basic philosophical framework for thinking about related issues that arise within their own disciplines or fields.

Honors

[Display as tabs](#)

Program Overview

211 Mary Gates Hall

uwhonors@uw.edu

The four-year University Honors Program features an interdisciplinary Honors core curriculum with a focus on experiential learning and reflection, Honors academic advising, foreign study programs and exchanges, and opportunities for independent study. It provides an academic community and educational opportunities to those students who are willing to take academic risks, think across disciplinary boundaries, and engage in experiential learning (e.g., research, leadership, community and/or international engagement).

To be considered for admission to the University Honors Program at entrance, students must apply to the Honors Program when they submit their Application for Undergraduate Admission to the University. "Selection is based on a student's demonstrated engagement with interdisciplinary learning, high school record, essay responses, a letter of recommendation, and fit for the program." Students also may seek admission based on academic performance during spring quarter of their freshman year at the University via the late admission process.

Students who are accepted into the University Honors Program in their freshman year and complete the Honors Core Curriculum alone graduate "With Interdisciplinary Honors." When students complete both the Core Curriculum and the Departmental Honors requirements in their chosen major, they graduate "With College Honors in *Name of Major*." Students who do not participate in or complete the Honors Core Curriculum but are admitted into and complete the Honors Program in their chosen major will receive a degree "With Honors in *Name of Major*." By special arrangement it may be possible for students to complete a degree "With College Honors" in departments, schools, or programs that do not offer a formal Departmental Honors option as well as Departmental Honors by itself.

Core Curriculum

47 credits as follows:

1. HONORS 100 (1 credit)
2. One Honors-prefix social science course (HONORS 23x) (I&S; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
3. One Honors-prefix arts/humanities course (HONORS 21x/HONORS 24x) (VLPA; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.

Helpful links

[Time Schedule](#)

[Program Web Page](#)

[Course Descriptions](#)

4. One Honors-prefix science course (HONORS 22x) (NW; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
5. One Honors-prefix interdisciplinary course (HONORS 205, HONORS 345, HONORS 38x, or HONORS 391, HONORS 392, HONORS 393, HONORS 394) (NW; 5 credits). This requirement cannot be completed by courses with multiple Areas of Knowledge designations.
6. Combination of any five additional 4- or 5- credit HONORS courses. May be HONORS-prefix or non-HONORS-prefix courses. (VLPA, I&S, NW)
7. HONORS 496 (1 credit)
8. Courses applying towards Departmental Honors may not be applied toward the HONORS core curriculum.
9. Students may fulfill no more than 15 credits of HONORS core requirements by completing HONORS 499 (independent study), graduate-level courses, or ad hoc projects in non-HONORS courses or by way of a non-HONORS study abroad program. These credits may fulfill only a student's additional five HONORS courses requirement; they may not count towards HONORS-prefix social science, arts/humanities, science, or interdisciplinary requirements.
10. Minimum cumulative 3.30 GPA in all courses completed through the UW.

Departmental Honors

Students may apply to Departmental Honors in their major(s) after they have been admitted to the major, typically in their junior year. Each department at the UW has a unique set of Departmental Honors requirements. For links to specific information about each department, see the Honors Program website.

intsci@uw.edu

The Integrated Sciences program offers the following program of study:

- The Bachelor of Arts degree with a major in integrated sciences

Bachelor of Arts

Department Admission Requirements

Admission to this program is suspended through summer 2016.

Major Requirements

All majors must satisfy the College of Arts and Sciences general education requirements.

96-108 credits as follows:

1. *Basic Science and Mathematics* (50-60 credits): to include 15* credits from two disciplines below, a minimum 10 credits from each of the other three, and a minimum 2.00 cumulative GPA in each discipline.
 - a. BIOL 180 and BIOL 200; BIOL 220
 - b. Chemistry: one of the following sequences
 - i. CHEM 142 and CHEM 152; CHEM 162
 - ii. CHEM 145 and CHEM 155*; CHEM 165
 - c. Earth and Space Sciences: ESS 211 and ESS 213; ESS 212
 - d. Mathematics: one of the following sequences
 - i. MATH 124 and MATH 125; either MATH 126 or STAT 311
 - ii. MATH 134 and MATH 135*; MATH 136
 - iii. Q SCI 291 and Q SCI 292; Q SCI 381 (only for students pursuing Aquatic and Fishery Sciences and Environmental Science and Terrestrial Resource Management disciplinary tracks; recommended for those tracks)
 - e. Physics: one of the following sequences
 - i. PHYS 114/PHYS 117 and PHYS 115/PHYS 118; PHYS 116/PHYS 119
 - ii. PHYS 121 and PHYS 122; PHYS 123
 - iii. PHYS 210 and PHYS 211; PHYS 212

Helpful links

[Undergraduate Program](#)

[Time Schedule](#)

* Note: The 10-credit Honors general chemistry sequence (CHEM 145 and CHEM 155), and the Honors accelerated calculus sequence (MATH 134 and MATH 135), may be substituted for the 15-credit non-Honors sequences.

2. *Disciplinary Tracks* (18-20 credits): including a minimum two courses taken in residence at the UW and a minimum cumulative 2.00 GPA.
 - a. *Aquatic and Fishery Sciences (minimum 18 credits)*: 18 credits from FISH 310, FISH 311, FISH 312, FISH 323, FISH 324, FISH 330, and FISH 473. Laboratory classes may be taken with permission of adviser.
 - b. *Astronomy (minimum 18 credits)*: ASTR 321, ASTR 322, ASTR 323; minimum 9 additional credits from approved astronomy and physics courses.
 - c. *Atmospheric Sciences (minimum 18 credits)*: ATM S 301; minimum 13 credits from ATM S 321, ATM S 340, ATM S 341, ATM S 358, ATM S 370, AND ATM S 431.
 - d. *Biology (minimum 18 credits)*: Two courses from BIOL 350, BIOL 354, BIOL 355, and BIOL 356; minimum 12 additional credits of approved upper-division biology course.
 - e. *Chemistry (minimum 19-20 credits)*: Either CHEM 237, CHEM 238, and CHEM 239 or CHEM 355, CHEM 336, and CHEM 337; minimum 8-9 additional credits from CHEM 165 or CHEM 312; CHEM 241 or CHEM 346; CHEM 242 or CHEM 347; CHEM 436, CHEM 452, CHEM 453, CHEM 456, BIOC 405, and BIOC 406.
 - f. *Earth and Space Sciences (minimum 18 credits)*: Two courses from ESS 311, ESS 312, ESS 313, ESS 314, ESS 315; minimum 8 additional credits from this list or approved 400-level ESS courses.
 - g. *Environmental Science and Terrestrial Resource Management (minimum 18 credits)*: Either ESRM 315 OR ESRM 323; ESRM 350; either ESRM 403 or ESRM 470; remaining credits from ESRM 311, ESRM 362, ESRM 415, ESRM 425, ESRM 441, ESRM 465, ESRM 472, or ESRM 473.
 - h. *Oceanography (minimum 18 credits)*: OCEAN 200; OCEAN 201; OCEAN 210; one of OCEAN 400, OCEAN 410, OCEAN 420, or OCEAN 430; minimum 3 credits of approved 300- or 400-level OCEAN courses; minimum 3 additional credits of approved 400-level OCEAN courses.
 - i. *Physics (minimum 18 credits)*: either PHYS 224, PHYS 231, PHYS 248, PHYS 334, and two of PHYS 335, PHYS 431, PHYS 433, and PHYS 434; or PHYS 407, PHYS 408, and PHYS 409 plus one of any of the previously listed courses.
3. *Integrated Sciences Core* (13 credits): minimum 2.00 cumulative GPA in INTSCI 301, INTSCI 401, INTSCI 402, and INTSCI 403.
4. *Integrated Sciences Capstone* (minimum 15 credits): minimum 2.00 cumulative GPA in INTSCI 491, INTSCI 492, and INTSCI 493; minimum 6 credits of either ASTR 499, ATM S 499, BIOL 499, CHEM 499, ESRM 499, ESS 499, FISH 499, OCEAN 499, PHYS 499, or other approved undergraduate research course.

Student Outcomes and Opportunities

- *Honors Options Available*: See program adviser for details.

COLLEGE OF ARTS & SCIENCES

INTEGRATED SCIENCE

Detailed course offerings (Time Schedule) are available for

- [Spring Quarter 2017](#)
- [Summer Quarter 2017](#)
- [Autumn Quarter 2017](#)

INTSCI 197 Special Topics in Integrated Sciences (1-5, max. 15) NW

Selected topics in integrated sciences.

[View course details in MyPlan: INTSCI 197](#)

INTSCI 200 Controversies in Science and Society (3) I&S/NW

Exploration of controversies in science and society that benefit from an integrated sciences perspective. Topics vary from quarter to quarter, but may include cases from science communication, science education, science policy, and science research.

[View course details in MyPlan: INTSCI 200](#)

INTSCI 301 Integrated Sciences Careers Seminar (1, max. 3)

Introduces students to scientists and science educators who are actively engaged in careers that require an integrative science perspective. Classroom guests vary from quarter to quarter, but may include individuals working in formal and informal science education, science organizations, science writing, and science policy.

[View course details in MyPlan: INTSCI 301](#)

INTSCI 401 Integrated Sciences Practicum (2-4, max. 6) I&S

Exploration of professions in formal or informal science education, science writing, science policy, and other areas that require an integrated science perspective. Examples include weekly visits to a science classroom, organization, or museum. Analysis of practicum experiences through discussion of scientific communication, human learning, and classroom engagement and equity.

[View course details in MyPlan: INTSCI 401](#)

INTSCI 402 Nature of Science (5) NW

Case study examination of scientific methods and elements of scientific practice including observation, data, statistics, interpretations, hypothesis, theory, and law. Asks how does science change; how does data support theories; and how are theories verified, falsified, or modified?

[View course details in MyPlan: INTSCI 402](#)

INTSCI 403 Science in Context (5) I&S/NW

Case study examination of how science operates within broad social, political, and ethical contexts. Considers the growth of multidisciplinary and interdisciplinary research, societal impacts, ethical responsibilities,

censorship, complex mechanisms of funding, and the power inherent in claims to knowledge.

[View course details in MyPlan: INTSCI 403](#)

INTSCI 491 Introduction to Research (2) NW

Preparation for intensive "hands-on" science experience. Discussion of what constitutes scientific research; development of a research proposition; meeting with potential research supervisors; signed agreement with supervisor and capstone instructor on scope and details of research

[View course details in MyPlan: INTSCI 491](#)

INTSCI 492 Reflections on Research (2, max. 6) NW

Reflections on an on-going science research experience through discussion, short papers, and oral presentations, with emphasis on the challenges and dilemmas that arise in data collection and analysis. Offered: AWSp.

[View course details in MyPlan: INTSCI 492](#)

INTSCI 493 Communicating Research (3) NW

Preparation of oral and written presentations of research, under guidance of the capstone instructor. Presentation on research in class and in another venue, such as a scientific meeting or an on-campus symposium.

Prerequisite: minimum of four credits of INTSCI 492. Offered: AWSp.

[View course details in MyPlan: INTSCI 493](#)

INTSCI 498 Independent Study (1-5, max. 10)

Faculty-supervised independent study on a topic related to integrated sciences.

Marine Biology

[Display as tabs](#)

Program Overview

The minor in marine biology is sponsored jointly by the College of the Environment and the College of Arts and Sciences, and is designed to immerse students in the study of marine organisms and ecosystems, starting in the freshman year. Because the experience of marine sciences cannot be taught entirely within the classroom, the minor is structured to provide ample opportunity for field work and research within the coursework.

Undergraduate Program

Adviser
116 Fishery Sciences Building, Box 355020
206-543-7426
marbiol@uw.edu

Minor

Minor Requirements: 35 credits, as follows:

1. *Introductory Courses (19 credits):* FISH 250/OCEAN 250/BIOL 250; OCEAN 210; BIOL 180; Q SCI 381.
2. *Integrative Experience (3 credits):* See adviser for approved list of courses.
3. *Electives (13 credits):* Selected from an approved list available from a program adviser. Additional courses may be approved by program adviser. (A minimum of one elective course must be taken from each of the following units: aquatic and fisheries sciences; oceanography; and biology or Friday Harbor Laboratories biology - FHL prefix.)
4. Up to 17 credits may overlap with credits applied to a student's major and up to 5 credits may overlap with credits applied to another minor.
5. Minimum 15 credits in upper-division courses.
6. Minimum 2.00 cumulative GPA in courses presented for the minor.

Paleobiology

[Display as tabs](#)

Program Overview

The minor in paleobiology is sponsored by the Department of Biology and is designed to provide students a solid foundation in the evolution and ecology of life in deep geologic time. In addition to classwork in paleontology, geobiology, astrobiology, and paleoanthropology, the minor provides opportunities for fieldwork and independent research.

Undergraduate Program

Adviser
318 Hitchcock Hall, Box 355320 206-543-9120
bioladv@uw.edu

Minor

Paleobiology

Minimum 30 credits, as follows:

1. BIOL 354
2. *Electives*: Two from the paleobiology core content area and one from each of the three other content areas, selected from a list of approved courses available on the paleobiology website.
3. BIOL 483
4. *Integrative experience in paleobiology*: Minimum 3 credits from one of BIOL 475 or BIOL 499, ESS 499 or BIO A 499, at the discretion of the instructor
5. Remaining credits from any of the above or BIO A 369, BIO A 491, or an adviser-approved elective
6. Minimum 2.00 cumulative GPA for courses presented for the minor
7. Minimum 18 credits from outside the student's major.
8. Minimum 15 credits completed through the UW.

Faculty

Entries include appointment to the Graduate School faculty (indicated by *); year of appointment to the University; graduate or professional degree(s), date(s) and institution(s). Faculty are listed only under their primary appointing department.

College of Arts and Sciences

American Ethnic Studies

Professors

ALEXIE JR, SHERMAN J., 2003; BA, 1991, Washington State University

FLORES, LAURO H, 1980

GAMBOA, ERASMO, 1976; MA, 1973, University of Washington

KASHIMA, TETSUDEN * 1987; PhD, 1975, University of California (San Diego); MA, 1968, San Francisco State

SUMIDA, STEPHEN H., 1998; PhD, 1982, University of Washington; MA, 1970, Columbia University

WALTER, JOHN C * 1989; PhD, 1971, University of Maine; MA, 1968, University of Bridgeport

Associate Professors

BONUS, ENRIQUE C., 1998; PhD, 1997, University of California (San Diego); MA, 1990, California State University, Fresno

NOMURA, GAIL M., 2000; PhD, 1978, University of Hawaii; MA, 1971, University of California (Berkeley)

RETMAN, SONNET H., 2002; PhD, 1997, University of California (Los Angeles)

SALAS, ELIZABETH, 1987; PhD, 1987, University of California (Los Angeles); MA, 1977, California State University, Los Angeles

Assistant Professors

CORDOVA, DOROTHY L., 2000; BA, 1976, Western Washington University

LEVY, LATASHA, 2016; PhD, 2013, Northwestern University; MPS, 2006, Cornell University

PINEDO-TURNOVSKY, CAROLYN, 2009; PhD, 2006, City University of New York; MA, 2003, City University of New York

PITTMAN, LASHAWNDA, 2013; PhD, 2010, Northwestern University; MA, 2000, University of Connecticut

SCHLEITWILER, VINCENT J, 2001; PhD, 2008, University of Washington-Seattle Campus; MA, 2003, University of Washington-Seattle Campus

SHINOZUKA, JEANNIE N., 2016; PhD, 2009, University of Minnesota-Twin Cities; MA, 2002, University of California-Los Angeles

VU, THUY, 2000; PhD, 1973, Michigan State University; MA, 1972, Michigan State University

Senior Lecturer

SO, CONNIE C., 1990; PhD, 2000, University of California-Berkeley; MPA, 1989, Princeton University

Lecturers

ATIENZA, RICHARD, 2006; MAE, 2008, St. Joseph's College; MS, 2005, Centro Escolar University Manila Mendiola

SISAY, BRUKAB, 2007; MS, 2013, University of California-Berkeley; MS, 2013, University of California-Berkeley

WAITA, JACQUELINE N., 2010; MBA, 2000, Seattle Pacific University

American Indian Studies

Professors

HARMON, ALEXANDRA J, 1991; PhD, 1995, University of Washington; JD, 1972, Yale University; MA, 1990, University of Washington
 HART, DANIEL, 1999; MFA, 1984, Temple University
 OLIVER, MARVIN E, 1998; MFA, 1973, University of Washington
 TEUTON, CHRISTOPHER, 2014; PhD, 2003, University of Wisconsin (Madison); MA, 1995, University of Wisconsin (Madison)
 WITHERSPOON, GARY J. * 1987; PhD, 1970, University of Chicago; MA, 1969, University of Chicago

Associate Professors

COTE, CHARLOTTE, 2001; PhD, 2002, University of California (Berkeley); MA, 1996, University of California (Berkeley)
 FRYBERG, STEPHANIE A, 2013; PhD, 2002, Stanford University; MA, 1999, Stanford University
 MILLION, DIAN L., 2002; PhD, 2004, University of California (Berkeley); MA, 1998, University of California (Berkeley)

Anthropology

Professors

ANAGNOST, ANN S., 1990; PhD, 1985, University of Michigan; MA, 1977, University of Michigan
 ANDERSON, EUGENE N., 2006; PhD, 1967, University of California (Berkeley)
 CLOSE, ANGELA E., 1995; PhD, 1976, Cambridge University (UK); MA, 1974, Cambridge University (UK)
 DUNCAN, BETTINA SHELL, 1995; PhD, 1994, Pennsylvania State University; MS, 1988, University of Wisconsin
 GRAYSON, DONALD K, 1975; PhD, 1973, University of Oregon; MA, 1969, University of Oregon
 HARRELL, STEVAN, 1974; PhD, 1974, Stanford University; MA, 1971, Stanford University
 HUNN, EUGENE S, 1981; PhD, 1973, University of California (Berkeley); MA, 1969, University of California (Berkeley)
 KAHN, MIRIAM * 1999; PhD, 1980, Bryn Mawr College; MA, 1974, Bryn Mawr College
 KEYES, CHARLES F * 1981; PhD, 1965, Cornell University
 LAPE, PETER V, 2000; PhD, 2000, Brown University; MA, 1995, San Francisco State
 LEONETTI, DONNA, 1991; PhD, 1976, University of Washington; MA, 1967, University of Washington
 NASON, JAMES * 1985; PhD, 1970, University of Washington; MA, 1967, University of Washington
 NEWELL, LAURA L * 1981; PhD, 1967, University of Washington; MA, 1957, Northwestern University
 NUTE, PETER E * 1995; PhD, 1969, Duke University
 OTTENBERG, SIMON * 1990; PhD, 1957, Northwestern University
 PENA, DEVON G, 1999; PhD, 1983, University of Texas (Austin); MA, 1978, University of Texas (Austin)
 RHODES, LORNA A * 1990; PhD, 1973, Cornell University; MA, 1971, Cornell University
 SMITH, ERIC A, 1980; PhD, 1980, Cornell University; MA, 1976, Cornell University
 SPAIN, DAVID H * 1999; MA, 1962, Ohio State University
 STEIN, JULIE K, 1980; PhD, 1980, University of Minnesota; MA, 1976, University of Minnesota
 TAYLOR, JANELLE S, 1999; PhD, 1999, University of Chicago; MA, 1990, University of Chicago
 WINANS, EDGAR V * 1998; PhD, 1959, University of California (Los Angeles); MA, 1954, University of California (Los Angeles)

Associate Professors

AMRUTE, SAREETA BIPIN, 2008; PhD, 2007, University of Chicago; MA, 2001, University of Chicago
 BILANIUK, LAADA M., 1997; PhD, 1998, University of Michigan; MA, 1991, University of Michigan
 CHAPMAN, RACHEL R, 2004; PhD, 1998, University of California (Los Angeles); MA, 1991, University of California (Los Angeles)
 ECK, GERALD G * 1981; PhD, 1977, University of California (Berkeley); MA, 1974, University of California (Berkeley)
 FEATHERS, JAMES K, 1983; PhD, 1990, University of Washington; MA, 1985, University of Washington
 FITZHUGH, J.BEN, 1997; PhD, 1996, University of Michigan; MA, 1992, University of Michigan
 GOODREAU, STEVEN M., 2001; PhD, 2001, Pennsylvania State University; MA, 1998, Pennsylvania State University
 HAAKANSON, SVEN D, 2013; PhD, 2000, Harvard University; MA, 1996, Harvard University
 HOFFMAN, DANIEL J, 2004; MD, 2004, Duke University; MA, 2001, Duke University
 HOLMAN, DARRYL J., 1999; PhD, 1996, Pennsylvania State University; MS, 1990, University of Wisconsin

JOLLES, CAROL Z, 2000; PhD, 1990, University of Washington; MA, 1985, University of Washington
 KRAMER, PATRICIA, 1993; PhD, 1998, University of Washington
 LIEBOW, EDWARD B., 2000; PhD, 1986, Arizona State University; MA, 1978, Arizona State University
 LLOBERA, MARCOS, 2004; DPhil, 1999, University of Oxford (UK); MSC, 1993, University of Leicester (UK)
 LOWE, CELIA, 1999; PhD, 2000, Yale University; MPHIL, 1996, Yale University
 MARWICK, BENJAMIN, 2008; PhD, 2008, Australian National University; MA, 2002, University of West Australia
 MESSINGER, SETH DAVID, 2015; PhD, 2003, Columbia University in the City of New York; MA, 1996, New York University
 WILLSON, MARGARET E., 2008; PhD, 1989, London School of Economics (UK); MPHIL, 1985, London School of Economics (UK)

Assistant Professors

DENNISON, JEAN M, 2015; PhD, 2008, University of Florida; MA, 2004, University of Florida
 EISENBERG, DANIEL T. A., 2012; PhD, 2012, Northwestern University
 ETNIER, MICHAEL A., 2003; PhD, 2002, University of Washington; MA, 1997, University of Washington
 GONZALEZ, SARA L, 2013; PhD, 2011, University of California (Berkeley); MA, 2006, University of California (Berkeley)

 GALE, ANN E, 1995; MFA, 1991, Yale University
 GARVENS, ELLEN J., 1994; MFA, 1987, University of New Mexico
 GATES, MARY GARDNER, 2000; PhD, 1981, Yale University
 GOLDSMITH, LAYNE * 1988; MFA, 1979, Cranbrook Academy of Art
 GOTTLER, CHRISTINE E., 2000; PhD, 1991, University of Zurich (Switzerland)
 GOVEDARE, PHILIP B., 1991; MFA, 1984, Tyler School of Art
 HOLM, BILL * 1989; MFA, 1951, University of Washington
 HU, MARY L * 1981; MFA, 1967, Southern Illinois University
 HURLEY, DENZIL, 1994; MFA, 1979, Yale University
 ISHIKAWA, CHIYO L, 2002; PhD, 1989, Bryn Mawr College
 JONES, ROBERT C * 1995; MS, 1959, Rhode Island School of Design
 KARTSONIS, ANNA D., 1983; PhD, 1982, New York University
 KEHL, RICHARD L. * 1989; MFA, 1961, Kansas City Art Institute
 KINGSBURY, MARTHA, 1981; PhD, 1969, Harvard University
 LIN, ZHI, 2001; MFA, 1992, University of Delaware
 LUNDIN, NORMAN K * 1982; MFA, 1963, University of Cincinnati
 MANCHANDA, CATHARINA, 2015; PhD, 2005, City University of New York
 MARSHALL, JOHN C * 1981; MFA, 1968, Syracuse University
 NAGY, HELEN, 2006; PhD, 1978, University of California (Los Angeles)
 OPPERMAN, HAL N * 1998; PhD, 1972, University of Chicago
 O'TOOLE, HELEN J., 1996; MFA, 1989, The School of Art Institute of Chicago
 OZUBKO, CHRISTOPHER, 1981; MFA, 1981, Cranbrook Academy of Art
 PAWULA, KENNETH J, 1981; MA, 1962, University of California (Berkeley)
 SPAFFORD, MICHAEL C * 1994; MA, 1960, Harvard University
 TAKAMORI, AKIO, 1988; MFA, 1978, New York State College of Ceramics
 TAYLOR, NORMAN J * 1990; MA, 1967, University of Iowa
 WADDEN, DOUGLAS J. * 1982; MFA, 1970, Yale University
 WALKER, JAMIE, 1989; MFA, 1983, Rhode Island School of Design
 WARASHINA, M PATRICIA, 1970; MFA, 1964, University of Washington
 WHITEHILL-WARD, JOHN * 1986; MS, 1974, Chicago Institute of Design & Technology
 WOLF, SYLVIA, 2008; MFA, 1986, Rhode Island School of Design
 WRIGHT, ROBIN K, 1983; PhD, 1985, University of Washington
 YOUNG, JOHN T * 1986; MFA, 1978, Rhode Island School of Design

Associate Professors

AHN, SANG-GYEUN, 2006; MFA, 2002, University of Illinois
 BROTHERTON, BARBARA I., 2004; PhD, 1994, University of Washington
 CABEEN, LOUISE, 1993; MFA, 1989, The School of Art Institute of Chicago
 FOCKE, ANNE, 2016; BA, 1967, University of Washington-Seattle Campus
 GOULD, ANNABELLE K, 2003; MFA, 1999, Cranbrook Academy of Art
 HIRSCH, EDWARD, 2011; PhD, 2008, Massachusetts Institute of Technology; MA, 2000, Carnegie Mellon University
 JECK, DOUGLAS A., 1996; MFA, 1989, The School of Art Institute of Chicago
 JOHNSON, EIRIK ANDERS, 1997; MFA, 2003, San Francisco Art Institute
 KHULLAR, SONAL, 2009; PhD, 2009, University of California (Berkeley)
 LABITZKE, CURT W, 1984; MFA, 1984, University of Notre Dame
 LAIRD, MARGARET L, 2004; PhD, 2002, Princeton University
 LINGO, ESTELLE C, 2006; PhD, 1999, Brown University
 LINGO, STUART P, 2006; PhD, 1998, Harvard University
 MATTHEWS, KRISTINE, 1989; MA, 1997, Royal College of Art (UK)
 MCNEEL, AMIE L., 2007; MFA, 1990, University of California (Berkeley)
 PRACZUKOWSKI, EDWARD * 1995; MFA, 1965, Cranbrook Academy of Art

PROCTOR, RICHARD M * 1992; MA, 1962, Michigan State University
 ROESLER, AXEL, 2005; PhD, 2005, Ohio State University; Diploma, 2000, Burg Giebichenstein (Germany)
 SCHEIER, SHIRLEY E., 1986; MFA, 1985, University of Wisconsin (Madison)
 WANG, HAICHENG, 2008; PhD, 2007, Princeton University
 WIECZOREK, MAREK K., 1997; PhD, 1997, Columbia University; MA, 1990, University of Amsterdam (Netherlands)
 WU, XIAOJIN, 2015; PhD, 2011, Princeton University
 ZIRPEL, MARK, 2008; MFA, 1989, San Francisco Art Institute

Assistant Professors

BROWN, KATHERINE E, 2011; MA, 1997, SUNY College at Buffalo
 BUNN-MARCUSE, KATHRYN, 1997; PhD, 2007, University of Washington
 DORMAN, NICHOLAS J, 2007; MA, 1992, University of Northumbria
 DRPIC, IVAN, 2011; PhD, 2011, Harvard University
 GERMANY, JASON O., 2009; MFA, 2010, University of Washington
 HUSHKA, ROCK L., 2000; MA, 1994, University of Wisconsin
 JAMISON, AARON FLINT, 2015; MFA, 2006, San Francisco Art Institute
 JUNKER, PATRICIA, 2015; MA, 1980, University of Michigan
 MCCAIN, GEORGE L, 2002; BA, 1969, University of Washington
 NORLEN, LINDA C, 2006; MFA, 2007, Goucher College
 ROUNTHWAITE, VANESSA, 2015; PhD, 2013, University of Minnesota
 SWAINE, MICHAEL EDWARD, 2015; MA, 2011, University of California (Berkeley)
 TRAVER, ANNE M, 2002; BFA, 1975, University of Washington
 YODER, ROBERT E., 2007; MFA, 1987, University of Washington

Senior Lecturers

MUREN, DOMINIC L, 2008; MA, 2007, The University of the Arts
 TIHANYI, TIMEA, 2001; MD, 1993, Semmelweis Medical University (Hungary)

Lecturers

COWIE, CLAIRE M., 1998; MFA, 1999, University of Washington
 FREEMAN, JULIA E., 2006; MA, 2007, University of Washington
 HAMACHER, JUSTIN R, 2014; MS, 2013, University of Washington
 HANSEN, MORTEN, 2016; PhD, 2002, Johns Hopkins University
 MILHOAN, JASON T., 2007; MFA, 2009, University of Washington
 PAZ, DANIELLE, 2016; MFA, 2009, University of Chicago
 RICE, KOLYA., 1994; MA, 1993, Rice University
 ROBERTS, SARAH K, 2016; MFA, 2015, New York State College of Ceramics
 SMITH, MICHAEL P, 2005; MLIS, 2006, University of Washington
 WEATHERLY, RYAN, 2011; MFA, 2013, University of Washington

Asian Languages and Literature

Professors

ATKINS, PAUL S, 2002; PhD, 1999, Stanford University; MA, 1994, Stanford University
 BOLTZ, WILLIAM, 1981; PhD, 1974, University of California (Berkeley); MA, 1969, University of California (Berkeley)
 COX, COLLETT D., 1985; PhD, 1983, Columbia University; MPHIL, 1976, Columbia University
 KNECHTGES, DAVID R, 1972; PhD, 1968, University of Washington; MA, 1965, Harvard University
 PAUWELS, HEIDI R., 1990; PhD, 1994, University of Washington; MA, 1986, Catholic University of Leuven (Belgium)
 SALOMON, RICHARD G. * 1993; PhD, 1975, University of Pennsylvania
 SHAPIRO, MICHAEL, 1970; PhD, 1973, University of Chicago; MA, 1970, University of Chicago
 YUE-HASHIMOTO, ANNE O, 1980; PhD, 1966, Ohio State University; MA, 1963, University of Texas

Associate Professors

BHOWMIK, DAVINDER L., 1987; PhD, 1997, University of Washington; MA, 1993, University of Washington
 BRANDAUER, FREDERICK P * 1997; PhD, 1973, Stanford University; MA, 1965, University of Pittsburgh
 HAMM, JOHN C., 1999; PhD, 1999, University of California (Berkeley); MA, 1994, University of California (Berkeley)
 HANDEL, ZEV, 1998; PhD, 1998, University of California (Berkeley); MA, 1992, University of California (Berkeley)
 MACK, EDWARD T, 2002; PhD, 2002, Harvard University; MA, 1996, Columbia University
 OHTA, AMY, 1990; PhD, 1993, University of California (Los Angeles); MA, 1990, University of California (Los Angeles)

Assistant Professors

CHO, HEEKYOUNG, 2010; PhD, 2010, University of Chicago; MA, 1999, Yonsei University (Korea)
 DUBROW, JENNIFER E., 2006; PhD, 2011, University of Chicago; MA, 2002, University of Chicago
 JESTY, JUSTIN C., 2011; PhD, 2010, University of Chicago; MA, 2010, University of Chicago
 LU, CHAN, 2016; PhD, 2009, Carnegie Mellon University; MA, 2005, Beijing Language and Culture University
 WANG, PING, 2000; PhD, 2006, University of Washington; MA, 2000, University of Colorado (Boulder)

Senior Lecturers

AHMAD, JAMEEL, 2004; PhD, 2011, Jawaharlal Nehru University (India); MPHIL, 1998, Jawaharlal Nehru University (India)
 BI, NYAN-PING, 2000; MA, 1988, Indiana University
 LENZ, TIMOTHY J., 1989; PhD, 1999, University of Washington; MA, 1994, University of Washington
 MATSUDA-KIAMI, IZUMI, 1996; MA, 1992, University of Wisconsin (Madison)
 NGUYEN, KIM O, 1984; PhD, 1973, University of California (Los Angeles); MA, 1967, University of California (Los Angeles)
 NISHIKAWA, ITSUKO, 2005; MA, 1999, Columbia University
 OHTA, KAORU, 1989; PhD, 1994, University of California (Los Angeles); MA, 1987, University of California (Los Angeles)
 PAHLAJRAI, PREM, 2002; PhD, 2013, University of Washington; MA, 2005, University of Washington
 SANDJAJA, DESIANA P., 2004; MA, 2000, Ohio University
 YU, LIPING, 2004; MA, 1998, Louisiana State University; MA, 1988, Tsinghua University (China)

Lecturers

CAO, YU QING, 1988; PhD, 2001, University of Washington; MA, 1992, University of Washington
 CHANDEKAR, AMRUTA M., 2009; PhD, 2015, University of Washington; MA, 2011, University of Washington; MA, 2006, University of Pune (India)
 CHAPMAN, IAN D, 2012; PhD, 2007, Princeton University; MA, 2003, Princeton University
 IWATA, AKIKO, 2004; MA, 2002, Columbia University; MA, 2001, University of Minnesota
 KESAVATANA-DOHRS, WIWORN, 1989; PhD, 1989, University of Michigan; MA, 1984, University of Detroit
 KIM, HYEIN, 2013; PhD, 2016, University of Washington-Seattle Campus; MA, 2011, Yonsei University
 KIM, WOOJOO, 2010; MA, 2012, University of Washington
 TURNER, BICH NGOC, 2014; PhD, 2011, University of Hawaii; MA, 2003, University of Hawaii
 WON, EUNYOUNG, 2010; MA, 2004, Michigan State University

Astronomy

Professors

AGOL, ERIC, 2003; PhD, 1997, University of California (Santa Barbara)
 ANDERSON, SCOTT, 1988; PhD, 1985, University of Washington; MA, 1980, University of California (Los Angeles)
 BALICK, BRUCE * 1981; PhD, 1971, Cornell University
 BOHM-VITENSE, ERIKA H * 1993; PhD, 1951, University of Kiel (Germany)
 BROWNLEE, DONALD E * 1981; PhD, 1971, University of Washington
 CONNOLLY, ANDREW J., 2006; PhD, 1993, University of London, UK
 DALCANTON, JULIANNE, 1998; PhD, 1995, Princeton University
 GOVERNATO, FABIO, 1996; PhD, 1996, University of Rome (Italy)
 HAWLEY, SUZANNE, 1999; PhD, 1989, University of Texas (Austin); MA, 1984, University of Texas (Austin)
 HODGE, PAUL W. * 1981; PhD, 1960, Harvard University

IVEZIC, ZELIKO, 2004; PhD, 1995, University of Kentucky
 KING, IVAN R., 2002; PhD, 1952, Harvard University; MA, 1947, Harvard University
 LINNELL, ALBERT P., 2002; PhD, 1950, Harvard University
 LUTZ, JULIE H., 1998; PhD, 1972, University of Illinois; MS, 1968, University of Illinois
 MEADOWS, VICTORIA S, 2007; PhD, 1994, University of Sydney (Australia)
 QUINN, THOMAS R., 1993; PhD, 1986, Princeton University
 SULLIVAN, WOODRUFF T * 1986; PhD, 1971, University of Maryland
 SZKODY, PAULA * 1993; PhD, 1975, University of Washington; MS, 1972, University of Washington
 WALLERSTEIN, GEORGE * 1998; PhD, 1958, California Institute of Technology

Associate Professors

CLARK, JOANNE, 2006; PhD, 1988, Queen Mary College (UK)
 JURIC, MARIO, 2014; PhD, 2006, Princeton University

Assistant Professors

BARNES, RORY K, 1998; PhD, 2004, University of Washington; MS, 1999, University of Washington
 DEBATTISTA, VICTOR P., 2004; PhD, 1998, Rutgers University
 LEVESQUE, EMILY M, 2015; PhD, 2010, University of Hawaii; MS, 2008, University of Hawaii
 MCQUINN, MATTHEW J, 2012; PhD, 2009, Harvard University; MA, 2006, Harvard University
 MURPHY, THOMAS W., 2000; PhD, 2000, California Institute of Technology; MS, 1996, California Institute of Technology
 TUTTLE, SARAH E, 2016; PhD, 2010, Columbia University; MS, 2007, Columbia University
 WERK, JESSICA K., 2016; PhD, 2010, University of Michigan
 WILLIAMS, BENJAMIN F, 1997; PhD, 2002, University of Washington; MS, 1998, University of Washington

Senior Lecturers

LARSON, ANA M., 1987; PhD, 1996, University of Victoria (Canada)
 LAWS, CHRISTOPHER S, 1998; PhD, 2004, University of Washington; MS, 2001, University of Washington
 SMITH, TOBY R., 1988; PhD, 1995, University of Washington; MS, 1990, University of Washington

Lecturers

FRASER, OLIVER J., 1997; PhD, 2008, University of Washington; MS, 2003, University of Washington
 KELLY, NICOLE M., 2003; PhD, 2002, Florida Institute of Technology; MS, 1997, Florida Institute of Technology

Biology

Professors

AMEMIYA, CHRIS T, 2004; PhD, 1987, Texas A&M University
 AMMIRATI, JOSEPH, 1979; PhD, 1972, University of Michigan; MA, 1967, San Francisco State
 BALIGA, NITIN, 2005; PhD, 2000, University of Massachusetts; MSC, 1994, Goa University (India)
 BENDICH, ARNOLD J, 1983; PhD, 1969, University of Washington
 BERGSTROM, CARL T, 2001; PhD, 1998, Stanford University
 BLISS, LAWRENCE C * 1994; PhD, 1956, Duke University; MSC, 1953, Kent State University
 BOERSMA, P DEE, 1974; PhD, 1974, Ohio State University
 BOSMA, MARTHA, 1987; PhD, 1986, University of California (Los Angeles)
 BRADSHAW, HARVEY D, 1984; PhD, 1984, Louisiana State University
 BRAINERD, ELIZABETH L., 2004; PhD, 1991, Harvard University
 CARRINGTON, EMILY, 2005; PhD, 1992, Stanford University
 CATTOLICO, ROSE A., 1986; PhD, 1973, State University of New York (Stony Brook); MA, 1968, Temple University
 CLELAND, ROBERT E. * 1981; PhD, 1957, California Institute of Technology
 CLONEY, RICHARD A * 1995; PhD, 1959, University of Washington; MA, 1954, Humboldt State University
 DANIEL, THOMAS L., 1984; PhD, 1982, Duke University; MS, 1978, University of Wisconsin
 DE LA IGLESIA, HORACIO O., 2003; PhD, 1997, University of Massachusetts; MA, 1991, University of Buenos Aires (Argentina)

DEL MORAL, ROGER, 1983; PhD, 1968, University of California (Santa Barbara); MA, 1966, University of California (Santa Barbara)

DETHIER, MEGAN N, 1985; PhD, 1981, University of Washington

DUNWIDDIE, PETER W, 2000; PhD, 1983, University of Washington; MS, 1976, University of Wisconsin

EBREY, THOMAS, 2000; PhD, 1968, University of Chicago

FOE, VICTORIA, 1984; PhD, 1975, University of Texas (Austin)

GRAUBARD, KATHERINE * 2000; PhD, 1973, University of Washington

HALL, BENJAMIN D, 1981; PhD, 1959, Harvard University; MA, 1956, Harvard University

HALPERIN, WALTER * 1995; PhD, 1965, University of Connecticut; MS, 1961, Southern Connecticut State University

HASKINS, EDWARD F * 1994; PhD, 1965, University of Minnesota; MS, 1962, University of Minnesota

HILLE RIS LAMBERS, JANNEKE, 2006; PhD, 2001, Duke University

HILLE, MERRILL * 1981; PhD, 1965, Rockefeller University

HUEY, RAYMOND B * 1998; PhD, 1975, Harvard University; MA, 1969, University of Texas (Austin)

KENAGY, GEORGE JAMES * 1981; PhD, 1972, University of California (Los Angeles)

KERR, BENJAMIN B, 2005; PhD, 2002, Stanford University

KINGSOLVER, JOEL * 1986; PhD, 1981, Stanford University; MS, 1978, University of Wisconsin

KLICKA, JOHN T, 2012; PhD, 1999, University of Minnesota; MS, 1994, Texas A&M University

KOHN, ALAN J * 1998; PhD, 1957, Yale University

KOZLOFF, EUGENE N * 1986; PhD, 1950, University of California (Berkeley); MA, 1946, University of California (Berkeley)

LAIRD, CHARLES D * 1982; PhD, 1966, Stanford University

LEOPOLD, ESTELLA B * 1981; PhD, 1955, Yale University

MOENS, CECILIA B * 2000; PhD, 1993, University of Toronto (Canada)

MOODY, WILLIAM J, 1982; PhD, 1977, Stanford University

NEMHAUSER, JENNIFER L, 2006; PhD, 2000, University of California (Berkeley)

ODELL, GARRETT M., 1985; PhD, 1972, Johns Hopkins University

OLMSTEAD, RICHARD G., 1996; PhD, 1988, University of Washington

ORIAN, GORDON H * 1995; PhD, 1960, University of California (Berkeley)

PALKA, JOHN M * 1981; PhD, 1965, University of California (Los Angeles)

PARICHY, DAVID M, 2005; PhD, 1997, University of California (Davis)

PEICHEL, CATHERINE L., 2003; PhD, 1998, Princeton University

PERKEL, DAVID J, 2000; PhD, 1992, University of California (San Francisco)

RIDDIFORD, LYNN M * 1981; PhD, 1961, Cornell University

ROHWER, SIEVERT A * 1982; PhD, 1971, University of Kansas; MA, 1970, University of Kansas

RUESINK, JENNIFER, 1990; PhD, 1996, University of Washington; MPHIL, 1991, Cambridge University (UK)

SEBENS, KENNETH, 2005; PhD, 1977, University of Washington

SIDOR, CHRISTIAN A, 2005; PhD, 2000, University of Chicago; MS, 1997, University of Chicago

STRATHMANN, RICHARD R * 1981; PhD, 1970, University of Washington; MS, 1966, University of Washington

SUMMERS, ADAM P., 1995; PhD, 1999, University of Massachusetts; MS, 1992, New York University

SWALLA, BILLIE J., 1999; PhD, 1988, University of Iowa; MS, 1983, University of Iowa

TORII, KEIKO * 2000; PhD, 1993, University of Tsukuba (Japan); MS, 1989, University of Tsukuba (Japan)

TRUMAN, JAMES W * 1981; PhD, 1970, Harvard University; MA, 1969, Harvard University

TSUKADA, MATSUO * 1981; PhD, 1961, Osaka City University (Japan); MSC, 1958, Osaka City University (Japan)

VAN VOLKENBURGH, ELIZABETH, 1982; PhD, 1980, University of Washington

WAALAND, J ROBERT, 1983; PhD, 1969, University of California (Berkeley)

WAKIMOTO, BARBARA T, 1984; PhD, 1981, Indiana University

WARD, PETER D., 1984; PhD, 1976, McMaster University (Canada); MS, 1973, University of Washington

WASSER, SAMUEL K., 1982; PhD, 1981, University of Washington; MS, 1976, University of Wisconsin

WILLOWS, ARTHUR O * 1981; PhD, 1967, University of Oregon

WINGFIELD, JOHN C. * 1996; PhD, 1973, University College of North Wales (UK)

Associate Professors

BAKKEN, AIMEE * 1981; PhD, 1970, University of Iowa

BORBOROGLU, PABLO GARCIA, 2009; PhD, 2003, Univ Nacional Del Comahue (Argentina)

BUCKLEY, LAUREN, 2013; PhD, 2005, Stanford University

COOPER, MARK S * 1997; PhD, 1985, University of California (Berkeley)
 DISTILIO, VERONICA SANDRA, 2003; PhD, 1998, University of Massachusetts
 IMAIZUMI, TAKATO, 2008; PhD, 2001, Tokyo Metropolitan University; MS, 1998, Tokyo Metropolitan University
 LEACHE, ADAM D., 2010; PhD, 2008, University of California (Berkeley); MS, 2000, San Diego State University
 PARKHURST, SUSAN M., 2000; PhD, 1985, Johns Hopkins University
 PARRISH, JAY Z, 2010; PhD, 2002, University of Colorado (Boulder)
 PRIESS, JAMES R. * 2000; PhD, 1983, University of Colorado (Boulder)
 RIFFELL, JEFFREY A, 2010; PhD, 2004, University of California (Los Angeles)
 RODRIGUEZ, RUSSELL, 2000; PhD, 1983, Oregon State University
 STROMBERG, CAROLINE A., 2007; PhD, 2003, University of California (Berkeley); MSC, 1997, University of Lund (Sweden)
 WILSON, GREGORY, 2007; PhD, 2004, University of California (Berkeley)

Assistant Professors

BRUNTON, BINGNI W, 2012; PhD, 2012, Princeton University
 CABERNARD, CLEMENS C, 2015; PhD, 2004, University of Basel (Switzerland); MS, 2000, University of Basel (Switzerland)
 HOEKSTRA, JONATHAN M., 2001; PhD, 2001, University of Washington; MS, 1993, Stanford University
 MILLS, CLAUDIA E, 2000; PhD, 1982, University of Victoria (Canada); MS, 1976, Florida State University
 PAREDEZ, ALEXANDER R., 2012; PhD, 2006, Stanford University; MS, 1999, University of California (San Diego)
 SANTANA MATA, SHARLENE E., 2012; PhD, 2010, University of Massachusetts; MSC, 2004, Universidad de Los Andes (Venezuela)
 SHOU, WENYING, 2008; PhD, 2001, California Institute of Technology

Senior Lecturers

BUCHWITZ, BRIAN JOSEPH, 1997; PhD, 2004, University of Washington
 DOHERTY, JENNIFER HELEN, 2014; PhD, 2009, University of Pennsylvania
 HERRON, JON, 1987; PhD, 1996, University of Washington
 KENNEDY, MICHAEL L, 2002; PhD, 1994, Arizona State University; MS, 1980, Central Washington University
 NICOTRI, MARY E, 2000; PhD, 1974, University of Washington
 O'CONNOR, EILEEN, 2000; MS, 1976, University of Washington
 PETERSEN, KAREN E., 1990; PhD, 1983, University of New Mexico; MS, 1977, University of New Mexico
 SCHIVELL, AMANDA E, 1994; PhD, 2000, University of Washington
 ZEMAN, LESLIE B., 2000; DVM, 1975, Michigan State University

Lecturers

DOOLEY, FREDERICK DANIEL, 2009; BA, 2009, University of Washington
 DRAPER, MOON, 2014; PhD, 2005, University of Texas (Austin)
 LIEPKALNS, JUSTINE, 2016; PhD, 2012, Emory University; MS, 2005, Tufts University
 SELF, CASEY J, 2007; PhD, 2015, University of Washington; MA, 2007, University of Florida
 WAALAND, KATHRYN SUSAN D., 2000; PhD, 1969, University of California (Berkeley)

Chemistry

Professors

ANDERSEN, NIELS, 1968; PhD, 1967, Northwestern University
 BAER, DONALD R., 2004; PhD, 1974, Cornell University
 BORDEN, WESTON T * 1982; PhD, 1968, Harvard University; MA, 1966, Harvard University
 BURGESS, LLOYD W., 1999; PhD, 1984, Virginia Polytechnic Institute and State University; MS, 1979, Syracuse University
 CALLIS, JAMES B * 1986; PhD, 1970, University of Washington
 CAMPBELL, CHARLES T., 1989; PhD, 1979, University of Texas (Austin)
 CHIU, DANIEL T., 2000; PhD, 1998, Stanford University
 CHRISTIAN, GARY D * 1981; PhD, 1964, University of Maryland; MS, 1962, University of Maryland
 DALTON, LARRY R., 1998; PhD, 1971, Harvard University; MA, 1971, Harvard University

DAVIDSON, ERNEST, 2002; PhD, 1961, Indiana University
DROBNY, GARY P, 1981; PhD, 1981, University of California (Berkeley)
DUNNING JR, THOMAS HAROLD, 2013; PhD, 1970, California Institute of Technology
ENGEL, THOMAS, 1980; PhD, 1969, University of Chicago
FLOSS, HEINZ G. * 1987; PhD, 1961, Technical University of Munich (Germany); MS, 1959, Technical University of Berlin (Germany)
GAMELIN, DANIEL R., 2000; PhD, 1997, Stanford University
GAMMON, RICHARD H, 1985; PhD, 1970, Harvard University; MA, 1966, Harvard University
GELB, MICHAEL H., 1985; PhD, 1982, Yale University
GINGER JR, DAVID S., 2003; PhD, 2001, University of Cambridge (UK)
GOLDBERG, KAREN, 1995; PhD, 1988, University of California (Berkeley)
GOUTERMAN, MARTIN * 1999; PhD, 1958, University of Chicago; MS, 1955, University of Chicago
GRATE, JAY W., 2004; PhD, 1983, University of California (San Diego); MS, 1980, University of California (San Diego)
HEINEKEY, DENNIS M., 1991; PhD, 1982, University of Alberta, Canada
HENDRICKSON, H. STEWART, 1999; PhD, 1962, University of Illinois
HOPKINS, PAUL B, 1982; PhD, 1982, Harvard University
KELLER, SARAH L., 2000; PhD, 1995, Princeton University
KOVACS, JULIA A., 1988; PhD, 1986, Harvard University
KWIRAM, ALVIN L * 1981; PhD, 1963, California Institute of Technology
LI, XIAOSONG, 2005; PhD, 2003, Wayne State University
MALY, DUSTIN JAMES, 2006; PhD, 2002, University of California (Berkeley)
MC COY, ANNE BOWEN, 2015; PhD, 1992, University of Wisconsin
NORMAN, JOSEPHUS G * 1982; PhD, 1972, Massachusetts Institute of Technology
QUINN, PATRICIA K, 2000; PhD, 1988, University of Washington
RATHOD, PRADIPSINH K., 2001; PhD, 1982, Oregon Health Sciences University
RAUCHER, STANLEY * 1989; PhD, 1973, University of Minnesota
REID, PHILIP J., 1995; PhD, 1992, University of California (Berkeley)
REINHARDT, WILLIAM P. * 1991; PhD, 1968, Harvard University; AM, 1966, Harvard University
ROBINSON, BRUCE H, 1980; PhD, 1975, Vanderbilt University
ROSE, NORMAN J * 1998; PhD, 1960, University of Illinois
RUZICKA, JAROMIR * 1987; PhD, 1963, Technical University of Prague (Czech); MSC, 1959, Technical University of Prague (Czech)
SASAKI, TOMIKAZU, 1989; PhD, 1985, Kyoto University (Japan); MS, 1981, Kyoto University (Japan)
SCHUBERT, WOLFGANG M * 1990; PhD, 1947, University of Minnesota
SCHURR, J MICHAEL * 1981; PhD, 1965, University of California (Berkeley)
SHERWOOD, PETER MILES ANSO, 2012; ScD, 1995, University of Cambridge (UK); PhD, 1970, University of Cambridge (UK)
SPIRO, THOMAS, 2007; PhD, 1960, Massachusetts Institute of Technology
SYNOVEC, ROBERT E., 1986; PhD, 1986, Iowa State University
TURECEK, FRANTISEK, 1990; PhD, 1977, Charles University (Czech Republic); MSC, 1973, Charles University (Czech Republic)
VANDENBOSCH, ROBERT * 1998; PhD, 1957, University of California (Berkeley)
VARANASI, USHA S, 2000; PhD, 1968, University of Washington; MS, 1964, California Institute of Technology
VARANI, GABRIELE, 2001; PhD, 1987, University of Milan (Italy)
WALDOW, DEAN, 2012; PhD, 1989, University of Wisconsin (Madison)
WOODMAN, DARRELL J * 1981; PhD, 1965, Harvard University; MA, 1965, Harvard University
ZOLLER, WILLIAM H * 1984; PhD, 1969, Massachusetts Institute of Technology

Associate Professors

BOYDSTON, ANDREW JACKSON, 2010; PhD, 2007, University of Texas (Austin); MS, 2002, University of Oregon
KAMINSKY, WERNER, 1999; PhD, 1990, University of Cologne (Germany)
KHALIL, MUNIRA, 2006; PhD, 2004, Massachusetts Institute of Technology
LALIC, GOJKO, 2008; PhD, 2004, Harvard University
MACKLIN, JOHN W * 1981; PhD, 1969, Cornell University
MASIELLO, DAVID, 2004; PhD, 2004, University of Florida
MICHAEL, FORREST, 2004; PhD, 2001, Harvard University; MA, 1998, Harvard University

SIMON, JULIAN A. * 2000; PhD, 1991, Columbia University; MPHIL, 1986, Columbia University
 ZHANG, BO, 2008; PhD, 2006, University of Utah; MS, 2002, Peking University (China)

Assistant Professors

BERTHIER, ERWIN, 2016; PhD, 2010, University of Wisconsin (Madison); ME, 2006, University of Canterbury (New Zealand)
 BUSH, MATTHEW FRANCIS, 2011; PhD, 2008, University of California (Berkeley)
 CHATTERJEE, CHAMPAK, 2010; PhD, 2005, University of Illinois; MSC, 1999, India Institute of Technology
 COSSAIRT, BRANDI MICHELLE, 2012; PhD, 2010, Massachusetts Institute of Technology
 FU, DAN, 2015; PhD, 2009, Princeton University
 MAIBAUM, LUTZ GERRIT, 2011; PhD, 2005, University of California (Berkeley); Diploma, 2001, University of Dusseldorf, Germany
 NELSON, ALSHAKIM, 2015; PhD, 2004, University of California (Los Angeles)
 SCHLENKER, CODY W, 2011; PhD, 2010, University of Southern California
 STOLL, STEFAN, 2011; PhD, 2003, Eidgenössische Technische Hochschule (Switz); MA, 2001, University of Music and Performing Arts Graz (Austria)
 THEBERGE, ASHLEIGH, 2016; PhD, 2011, University of Cambridge (UK)
 VAUGHAN, JOSHUA CHARLES, 2013; PhD, 2005, Massachusetts Institute of Technology
 ZALATAN, JESSE GEORGE, 2014; PhD, 2008, Stanford University

Senior Lecturers

BRYANT, JASMINE R., 1998; PhD, 2002, University of Washington; MA, 1997, Seattle University
 CARROLL, ANDREA D., 1998; PhD, 2003, University of Washington; MS, 2001, University of Washington
 CRAIG, COLLEEN, 2001; PhD, 2006, University of Washington; MS, 2004, University of Washington

Lecturers

GOLDMAN, LAWRENCE MICHAEL, 2014; PhD, 2010, Cardiff University, Wales
 O MALLEY, KEVIN MATTHEW, 2006; PhD, 2013, University of Washington

Classics

Professors

BLIQUEZ, LAWRENCE J * 1981; PhD, 1968, Stanford University
 BLONDELL, RUBY, 1985; PhD, 1984, University of California (Berkeley); MA, 1981, Oxford University (UK)
 CLAUSS, JAMES J, 1984; PhD, 1983, University of California (Berkeley); MA, 1976, Fordham University
 CONNORS, CATHERINE M., 1990; PhD, 1989, University of Michigan; MA, 1986, University of Michigan
 GOWING, ALAIN M., 1988; PhD, 1988, Bryn Mawr College; MA, 1981, Bryn Mawr College
 HARMON, DANIEL P. * 1990; PhD, 1968, Northwestern University; MA, 1965, Northwestern University
 HINDS, STEPHEN E., 1992; PhD, 1985, St. Johns College (UK); MA, 1983, Trinity College (Ireland)

Associate Professors

HOLLMANN, ALEXANDER J, 2001; PhD, 1998, Harvard University; MA, 1990, University of Colorado (Boulder)
 KAMEN, DEBORAH E., 2007; PhD, 2005, University of California (Berkeley); MA, 2000, University of California (Berkeley)
 LEVANIQUK, OLGA, 2001; PhD, 2000, Harvard University; MA, 1994, University of Colorado
 STROUP, SARAH C, 2000; PhD, 2000, University of California (Berkeley); MA, 1994, University of California (Berkeley)
 TOPPER, KATHRYN R., 2008; PhD, 2007, Harvard University

Assistant Professors

LEVIN-RICHARDSON, SARAH, 2014; PhD, 2009, Stanford University; MA, 2006, Stanford University
 TANASI, DAVIDE, 2016; PhD, 2007, University of Trieste (Italy)

Lecturer

GINSBERG, ARTHUR H, 1977; MD, 1969, McGill University (Canada); MFA, 2010, Pacific University

Communication

Professors

BALDASTY, GERALD J, 1974; PhD, 1978, University of Washington; MA, 1974, University of Wisconsin (Madison)
 BEAM, RANDAL A, 2006; DPhil, 1988, University of Wisconsin; MA, 1976, Syracuse University
 CARTER, RICHARD FREMONT * 1999; PhD, 1957, University of Wisconsin (Madison); MA, 1954, University of Wisconsin
 CECCARELLI, LEAH M., 1996; PhD, 1995, Northwestern University; MA, 1992, Northwestern University
 DOMKE, DAVID S., 1998; PhD, 1996, University of Minnesota; MA, 1992, California State University, Fullerton
 FOOT, KIRSTEN A, 2001; PhD, 1999, University of California (San Diego); MA, 1990, Wheaton College
 GIFFARD, CHARLES A * 1981; PhD, 1968, University of Washington; MA, 1964, University of Washington
 HOWARD, PHILIP EDWARD, 2002; PhD, 2002, Northwestern University; MA, 1994, London School of Economics (UK)
 JASINSKI, JAMES A, 2004; PhD, 1986, Northwestern University; MA, 1980, Northern Illinois University
 LANG, GLADYS ENGEL * 1990; PhD, 1954, University of Chicago; MA, 1942, University of Washington
 LANG, KURT * 1993; PhD, 1953, University of Chicago; MA, 1952, University of Chicago
 MANUSOV, VALERIE L., 1993; PhD, 1989, University of Southern California; MA, 1984, Michigan State University
 MOY, PATRICIA, 1998; PhD, 1998, University of Washington; MS, 1993, Cornell University
 PARKS, MALCOLM R, 1978; PhD, 1976, Michigan State University; MA, 1975, Michigan State University
 PEMBER, DON R * 1981; PhD, 1969, University of Wisconsin (Madison); MA, 1966, Michigan State University
 PHILIPSEN, GERRY F, 1978; PhD, 1972, Northwestern University
 RIVENBURGH, NANCY, 1989; PhD, 1991, University of Washington; MS, 1982, Boston University
 SCHEIDEL, THOMAS * 1996; PhD, 1958, University of Washington; MA, 1955, University of Washington
 SIMPSON, ROGER A * 1981; PhD, 1973, University of Washington; MS, 1961, University of Wisconsin
 STAMM, KEITH R * 1981; PhD, 1968, University of Wisconsin (Madison); MS, 1965, University of Wisconsin
 UNDERWOOD, DOUGLAS M, 1987; MA, 1974, Ohio State University

Associate Professors

BOWEN, LAWRENCE * 1981; PhD, 1974, University of Wisconsin (Madison); MA, 1971, University of Wisconsin
 BOWES, JOHN E * 1981; PhD, 1971, Michigan State University; MS, 1965, Syracuse University
 CRANSTON, PATRICIA * 1990; MA, 1954, University of Texas (Austin)
 FEARN-BANKS, KATHLEEN A., 1990; MS, 1965, University of California (Los Angeles)
 HAROLD, CHRISTINE L, 2007; PhD, 2003, Pennsylvania State University; MA, 1999, Pennsylvania State University
 JOSEPH, RALINA L, 2005; PhD, 2005, University of California (San Diego); MA, 2001, University of California (San Diego)
 KIELBOWICZ, RICHARD B, 1984; PhD, 1984, University of Minnesota; MA, 1978, University of Minnesota
 NEFF, GINA S, 2005; PhD, 2004, Columbia University; MPHIL, 2001, City University of New York
 NISHIME, LEILANI, 2008; PhD, 1997, University of Michigan; MA, 1991, University of Michigan
 POST, ROBERT M * 1981; PhD, 1961, Ohio University; MA, 1958, Ohio University

Assistant Professors

CROWLEY, JOHN P., 2008; PhD, 2012, University of Washington; MA, 2006, San Diego State University
 GONZALEZ, CARMEN, 2015; PhD, 2013, University of Southern California; MA, 2009, University of Southern California
 HILL, BENJAMIN C., 2013; PhD, 2013, Massachusetts Institute of Technology; SM, 2007, Massachusetts Institute of Technology
 PEARCE, KATY E., 2012; PhD, 2011, University of California (Santa Barbara); MA, 2006, University of London, UK
 POWERS, MATTHEW J., 2013; PhD, 2013, New York University; MA, 2005, Simon Fraser University, B.C. (Canada)

Senior Lecturers

CROFTS, ANITA, 1996; MPA, 2002, University of Washington
 NYQUIST, JODY D, 2000; MA, 1967, University of Washington

Lecturers

BAKER, KRAIG LM, 2002; JD, 1995, University of Washington
 COOK, CALEY K., 2013; MA, 2007, University of Southern California

GARLAND, PHILIP A., 2015; PhD, 2008, Stanford University; MA, 2007, Stanford University
 HOLMBERG, DAVID T., 2008; PhD, 2012, University of Washington; MA, 2005, University of Montana
 MAYO, JUSTIN, 2014; MJ, 1998, University of Missouri
 OTANEZ, ANDREA K., 2013; MA, 1990, University of Utah
 PARTNOW, JESSICA, 2009; BA, 2006, City University of New York
 SALKOWITZ, ROBERT, 2011; BA, 1989, Columbia University
 SCHILLER, CAROL, 2015; MIA, 1994, Columbia University
 SOUDERS, MICHAEL C., 2013; PhD, 2011, University of Kansas; MA, 2005, Eastern New Mexico University
 STONEHILL, ALEXANDER M., 2009; BA, 2003, New School University
 STUTEVILLE, SARAH R., 2009; BA, 2006, Hunter College
 VANNINI, SARA, 2014; PhD, 2014, University of Lugano (Switzerland); MA, 2006, University of Bologna (Italy)
 YASIN, EKIN, 2013; MA, 2008, Columbia University; MA, 2008, Columbia University

Comparative Literature

Professors

ADAMS, HAZARD S * 1996; PhD, 1953, University of Washington; MA, 1949, University of Washington
 AMES, ERIC C., 2000; PhD, 2000, University of California (Berkeley); MA, 1993, University of Washington
 BORCH-JACOBSEN, MIKKEL, 1986; DrE, 1981, University of Strasbourg (France)
 BRAESTER, YOMI, 2000; PhD, 1998, Yale University; MA, 1992, Yale University
 BROWN, MARSHALL J., 1988; PhD, 1972, Yale University; MPHIL, 1969, Yale University
 HANDWERK, GARY J., 1984; PhD, 1984, Brown University
 STEELE, CYNTHIA, 1986; PhD, 1980, University of California (San Diego); MA, 1979, University of California (San Diego)
 WANG, CHING-HSIEN, 1982; PhD, 1971, University of California (Berkeley); MA, 1969, University of California (Berkeley)

Associate Professors

BEAN, JENNIFER M., 1998; PhD, 1998, University of Texas (Austin)
 KOGOJ-KAPETANIC, BREDA * 1990; LITTD, 1966, University of Zagreb (Croatia); Diploma, 1954, University of Zagreb (Croatia)
 KONICK, WILLIS * 1984; PhD, 1964, University of Washington; MA, 1954, University of Washington
 MAHADEVAN, SUDHIR, 2008; PhD, 2009, New York University; MA, 2000, New York University
 TWEEDIE, JAMES, 2004; PhD, 2002, University of Iowa; MA, 1999, University of Iowa

Assistant Professors

BENITEZ, JOSE FRANCISCO, 2004; PhD, 2004, University of Wisconsin (Madison); MA, 1996, University of Wisconsin (Madison)
 GROENING, STEPHEN F., 2014; PhD, 2008, University of Minnesota; MA, 2001, Claremont Graduate School

Lecturers

COOPER, TAMARA, 2007; MA, 1998, Carleton University (Canada); MA, 1998, Carleton University (Canada)

Dance

Professors

KNAPP, JOAN S * 1989; MA, 1964, University of Illinois
 WILEY, HANNAH, 1984; MA, 1981, New York University

Associate Professors

COUPE, JAMES, 2004; PhD, 2007, University of Washington; MA, 1999, University of Edinburgh (UK)
 MCMAINS, JULIET, 2006; PhD, 2003, University of California (Riverside)
 SALK, JENNIFER, 2002; MFA, 1994, Ohio State University

Assistant Professors

LINCOLN, RACHAEL, 2013; MFA, 2009, University of California (Los Angeles)
 MCCORMICK, BRUCE, 2013; MFA, 2015, University of Washington
 PSARRA, AFRODITI, 2016; PhD, 2014, University of Madrid, Spain

Lecturers

CINOTTO, RHONDA M., 1994; BA, 1997, University of Washington
 HAIM, MARK, 2002; MFA, 2006, Hollins College (Virginia)
 REARDON, MARY, 2012; BFA, 1977, University of Cincinnati

Drama

Professors

BOND, TIMOTHY J, 2016; MFA, 1983, University of Washington
 CLAY, JACK D. * 1992; MA, 1956, Northwestern University
 COLE, CATHERINE M, 2016; PhD, 1996, Northwestern University
 COMTOIS, MARY ELIZABETH * 1993; PhD, 1970, University of Colorado (Boulder)
 CURTIS-NEWTON, VALERIE, 1993; MA, 1996, University of Washington
 DAHLSTROM, ROBERT A * 1981; MA, 1967, University of Illinois
 JOHNSON, DAVID ODAI, 1998; PhD, 1994, University of Texas (Austin)
 KORF, GEOFFREY L, 2002; MFA, 1991, Yale University
 LONDON, TODD, 2014; PhD, 1985, American University
 LYNCH, THOMAS, 2005; MFA, 1979, Yale University
 POSTLEWAIT, THOMAS E, 2007; PhD, 1976, University of Minnesota
 WITHAM, BARRY B * 1994; PhD, 1968, Ohio State University

Associate Professors

BRYANT-BERTAIL, SARAH * 2000; PhD, 1986, University of Minnesota
 FORRESTER, WILLIAM D * 1981; MFA, 1969, Yale University
 FRACE, JEFFREY H., 2008; MFA, 1997, Columbia University
 MAGELSEN, SCOTT, 2013; PhD, 2002, University of Minnesota
 TROUT, DEBORAH L, 1994; BA, 1994, Yale University
 TSAO, ANDREW H, 2006; MFA, 1990, California Institute of the Arts
 VALENTINETTI, AURORA, 1992; MA, 1949, University of Washington

Assistant Professors

MIHAYLOVA, STEFKA G, 2011; PhD, 2008, Northwestern University; MA, 2000, Sofia University
 WOLCOTT, JOHN R * 1998; PhD, 1967, Ohio State University

Senior Lecturers

BRAUN, NATHAN A, 2016; MFA, 1988, New York University
 CONNORS, BRIDGET, 2016; MFA, 1989, California Institute of the Arts
 HAFSO, SCOTT, 1992; MMus, 1999, University of Washington
 JONES, ZANE, 2012; MFA, 1994, University of Southern California
 MERCIER, GEORGE W, 2015; MFA, 1983, Yale University
 SHAHN, JUDITH * 2000; BFA, 1977, Carnegie Mellon University

Lecturers

ALM, GEOFFREY E., 1998; BA, 1976, Evergreen State College
 FRANZ-KNIGHT, KIRA A., 1995; MFA, 1998, University of Washington
 PLATT, MYRA M, 2008; BS, 1984, Northwestern University
 RICHLOVSKY, JANE F., 1993; BA, 1991, Columbia College

SKORSTAD, DEBORAH, 2003; AB, 1980, Seattle Central Community College
SMITH, ANDREW D., 2003; MFA, 2005, University of Washington

Economics

Professors

BAJARI, PATRICK L, 2011; PhD, 1997, University of Minnesota
BARZEL, YORAM * 1981; MBA, 2009, Purdue University; MA, 1956, Hebrew University (Israel)
BROWN, GARDNER * 1981; MSC, 2010, Concordia University
BRUCE, NEIL * 1991; MS, 2006, National Taiwan University; MA, 1969, Queen's University At Kingston (Canada)
DUNCAN, GREGORY, 2012; MA, 2011, Freie University of Berlin (Germany); MA, 1973, University of California (Berkeley)
EICHER, THEO S., 1994; PhD, 1994, Columbia University; MPHIL, 1993, Columbia University
FAN, YANQIN, 2013; PhD, 1990, University of Western Ontario (Canada); MA, 1987, University of Western Ontario (Canada)
GEWEKE, JOHN, 2015; MPH, 2008, Emory University
GHIRONI, FABIO P, 2013; PhD, 1999, University of California (Berkeley); MA, 1994, Bocconi University (Italy)
HALVORSEN, ROBERT F, 1972; PhD, 1973, Harvard University; MPA, 1968, Harvard University
HARTMAN, RICHARD C * 1981; MA, 2009, Johns Hopkins University; MA, 1971, University of California (Berkeley)
KHALIL, FAHAD A., 1991; PhD, 1991, Virginia Polytechnic Institute and State University; MA, 1988, Virginia Polytechnic Institute and State University
KIM, CHANG JIN, 1985; PhD, 1989, University of Washington
LAWARREE, JACQUES P., 1990; PhD, 1990, University of California (Berkeley)
LUNDBERG, SHELLY * 1989; MA, 2006, University of Chicago
MC GEE, JOHN S, 1991; MA, 2011, Portland State University
NELSON, CHARLES R * 1994; PhD, 1969, University of Wisconsin (Madison); MA, 1967, University of Wisconsin
PARKS, RICHARD * 1981; PhD, 1966, University of California (Berkeley); MA, 1964, University of California (Berkeley)
SILBERBERG, EUGENE, 1981; PhD, 1964, Purdue University
STARTZ, RICHARD * 1994; PhD, 1978, Massachusetts Institute of Technology
THORNTON, JUDITH A, 1961; PhD, 1960, Radcliffe; MA, 1958, Radcliffe
TURNOVSKY, STEPHEN J, 1987; PhD, 1968, Harvard University; MA, 1963, Victoria University of Wellington (New Zealand)
WEN, QUAN, 2013; PhD, 1991, University of Western Ontario (Canada); MA, 1988, University of Western Ontario (Canada)
WONG, KAR-YIU, 1983; PhD, 1983, Columbia University; MPHIL, 1981, Columbia University
ZIVOT, ERIC W, 1993; PhD, 1992, Yale University

Associate Professors

BROCK, PHILIP L, 1991; PhD, 1982, Stanford University
CHEN, YU-CHIN, 2003; PhD, 2002, Harvard University; MA, 1996, Harvard University
KOCHIN, LEVIS A, 1972; PhD, 1975, University of Chicago
RAO, JUSTIN M, 2016; MSC, 2008, London School of Hygiene and Tropical Medicine (UK)
ROSE, ELAINA, 1993; PhD, 1993, University of Pennsylvania; MA, 1987, University of Pennsylvania
THOMAS, ROBERT P, 1983; PhD, 1964, Northwestern University

Assistant Professors

EUN, DONG JAE, 2016; MSC, 2009, University of Montreal (Canada)
HEATH, RACHEL M, 2011; PhD, 2012, Yale University; MPHIL, 2008, Yale University
LARIVIERE, JACOB S, 2013; MA, 2006, University of Utah; MA, 2006, University of California (San Diego)
LEUKHINA, OKSANA M, 2010; PhD, 2005, University of Minnesota; MA, 2003, University of Minnesota
TAN, XU, 2013; MS, 2011, Stanford University
TAO, JING, 2015; MA, 2006, St. John's College (New Mexico); MS, 2011, University of Wisconsin (Madison)
YANG, MUJEUNG, 2012; MA, 2011, University of Washington; Diploma, 2006, University of Bonn (Germany)

Lecturers

KNOX, MELISSA A, 2009; MA, 2016, University of Michigan-Ann Arbor
O'DEA, DENNIS C, 2012; MS, 2008, Tsinghua University (China); MA, 2007, University of Illinois (Urbana)

English

Professors

ABRAMS, ROBERT, 1979; PhD, 1973, Indiana University
 ALEXANDER, EDWARD * 1981; PhD, 1963, University of Minnesota; MA, 1959, University of Minnesota
 ALLEN, CAROLYN, 1972; PhD, 1972, University of Minnesota; MA, 1966, Claremont Graduate School
 ALLEN, CHADWICK, 2015; PhD, 1997, University of Arizona; MFA, 1990, Washington University
 BAWARSHI, ANIS, 1999; PhD, 1999, University of Kansas; MA, 1995, University of Kansas
 BIERDS, LINDA L, 1981; MA, 1971, University of Washington
 BLAKE, KATHLEEN * 1981; PhD, 1971, University of California (San Diego); MA, 1967, University of California (Los Angeles)
 BOSWORTH, DAVID L, 1984; BA, 1969, Brown University
 CHERNIAVSKY, EVA, 2005; PhD, 1990, University of California (Berkeley)
 CHRISMAN, LAURA H, 2005; DPhil, 1992, University of Oxford (UK)
 CHUDE-SOKEI, LOUIS ORT, 2010; PhD, 1995, University of California (Los Angeles)
 COLDEWEY, JOHN C * 1981; PhD, 1972, University of Colorado (Boulder); MA, 1969, Northern Illinois University
 DILLON, GEORGE L. * 1986; PhD, 1969, University of California (Berkeley); MA, 1966, University of California (Berkeley)
 DUNN, RICHARD J. * 1997; PhD, 1964, Case Western Reserve University; MA, 1961, Case Western Reserve University
 ELBOW, PETER, 2015; PhD, 1969, Brandeis University; MA, 1964, Excelsior College
 FOSTER, RONALD THOMAS, 2005; PhD, 1990, University of Wisconsin; MA, 1984, University of Texas (Austin)
 FREY, CHARLES HUBBARD * 1982; PhD, 1971, Yale University; JD, 1960, Harvard University
 GUERRA, JUAN C, 1990; PhD, 1992, University of Illinois; MA, 1983, University of Illinois
 JEFFORDS, SUSAN E., 1985; PhD, 1981, University of Pennsylvania; MA, 1977, University of Pennsylvania
 JOHNSON, CHARLES R * 1983; PhD, 1988, State University of New York (Stony Brook); MA, 1973, Southern Illinois University
 KAPLAN, SYDNEY J, 1971; PhD, 1971, University of California (Los Angeles); MA, 1966, University of California (Los Angeles)
 KAUP, MONIKA, 2000; PhD, 1991, Ruhr Universität Bochum; MA, 1988, Ruhr Universität Bochum
 KENNEY, RICHARD L, 1987; BA, 1970, Dartmouth College
 LOCKWOOD, THOMAS FRANK * 1981; PhD, 1967, Rice University
 MATCHETT, WILLIAM H, 1954; PhD, 1957, Harvard University; MA, 1950, Harvard University
 MC CRACKEN, J DAVID * 1983; PhD, 1966, University of Chicago; MA, 1962, University of Chicago
 MC ELROY, COLLEEN J * 1983; PhD, 1973, University of Washington; MA, 1963, Kansas State University
 MC HUGH, HEATHER, 1982; MA, 1972, University of Denver
 MODIANO, RAIMONDA, 1978; PhD, 1973, University of California (San Diego); Diploma, 1968, University of Bucharest (Romania)
 REED, BRIAN, 2000; PhD, 2000, Stanford University
 REMLEY, PAUL G, 1988; PhD, 1990, Columbia University; MPHIL, 1987, Columbia University
 ROSE, CHRISTINE, 2002; PhD, 1985, Tufts University; AM, 1977, Boston College
 SALE, ROGER H * 1981; PhD, 1957, Cornell University; MA, 1954, Cornell University
 SEARLE, LEROY F, 1977; PhD, 1970, University of Iowa; MA, 1968, University of Iowa
 SHIELDS, DAVID, 1988; MFA, 1980, University of Iowa
 SHULMAN, ROBERT * 1982; PhD, 1959, Ohio State University; MA, 1959, Ohio State University
 SILBERSTEIN, SANDRA V, 1982; PhD, 1982, University of Michigan; MA, 1971, University of Michigan
 SONENBERG, MAYA, 1993; MA, 1984, Brown University
 STATEN, HENRY J., 1998; PhD, 1978, University of Texas (Austin)
 STEVICK, ROBERT D * 1998; PhD, 1956, University of Wisconsin (Madison); MA, 1951, University of Tulsa
 STREITBERGER, WILLIAM R, 1973; PhD, 1973, University of Illinois; MA, 1971, University of Illinois
 STYGALL, GAIL, 1990; PhD, 1989, Indiana University
 TOLLEFSON, JAMES W * 1984; PhD, 1978, Stanford University; MA, 1973, Purdue University
 VAUGHAN, MICEAL F * 1981; PhD, 1973, Cornell University; MA, 1973, Cornell University
 WAGONER, DAVID R * 1981; MA, 1949, Indiana University
 WONG, SHAWN H, 1984; MA, 1974, San Francisco State
 WOODWARD, KATHLEEN, 2000; PhD, 1976, University of California (San Diego)

Associate Professors

BURSTEIN, JESSICA L., 1998; PhD, 1998, University of Chicago; MA, 1990, University of Chicago
 BUTWIN, JOSEPH M, 1978; PhD, 1971, Harvard University; MA, 1966, Harvard University
 CROUSE, DAVID J, 2016; MFA, 1994, University of Alaska Fairbanks
 CUMMINGS, KATHERINE, 1985; PhD, 1985, University of Wisconsin (Madison); MA, 1979, Montclair State University
 FELD, ANDREW E, 2006; MFA, 1998, University of Houston
 GRIFFITH, JOHN W, 1968; PhD, 1969, University of Oregon
 HARKINS, GILLIAN H, 2002; PhD, 2002, University of California (Berkeley)
 IBRAHIM, HABIBA, 2006; PhD, 2005, State University of New York (Albany)
 KNIGHT, JEFFREY T, 2011; PhD, 2009, Northwestern University; MPHIL, 2007, Cambridge University (UK)
 LAGUARDIA, ERIC HENRY * 1981; PhD, 1961, University of Iowa; AM, 1955, Columbia University
 LAPORTE, CHARLES P, 2005; PhD, 2004, University of Michigan; MA, 1997, University of Virginia
 LONGYEAR, CHRISTOPHER R * 1999; PhD, 1961, University of Michigan; MA, 1955, University of Michigan
 MOORE, COLETTE V, 2005; PhD, 2004, University of Michigan
 MOTH, MARY N, 2008; PhD, 2004, University of Maryland; MED, 1995, University of Maryland
 MUSSETTER, SALLY ANN * 1982; PhD, 1975, Cornell University; MA, 1962, Ohio State University
 PALOMO, DOLORES J * 1995; PhD, 1972, State University of New York (Buffalo); MA, 1966, Wayne State University
 PATTERSON, MARK R, 1981; PhD, 1981, Princeton University
 RAI, CANDICE S, 2008; PhD, 2008, University of Illinois; MA, 2001, University of Illinois
 REDDY, CHANDAN C., 2001; PhD, 2004, Columbia University; MPHIL, 1999, Columbia University
 SHIELDS, JULIET D, 2008; PhD, 2004, University of Pennsylvania; MA, 1999, University of Pennsylvania
 SIMPSON, CAROLINE CHUNG, 1994; PhD, 1994, University of Texas (Austin); MA, 1989, University of Houston
 SMITH, EUGENE H, 1958; PhD, 1963, University of Washington; MA, 1954, University of Washington
 STANTON, ROBERT B, 1956; PhD, 1953, Indiana University; MA, 1950, University of Missouri (Kansas City)
 TRIPLETT, PIMONE E, 2006; MFA, 1990, University of Iowa
 VANDENBERG, SARA J. * 1987; PhD, 1969, Yale University; MPHIL, 1967, Yale University
 WEBSTER, JOHN M, 1972; PhD, 1974, University of California (Berkeley); MA, 1969, University of California (Berkeley)
 WEINBAUM, ALYS E., 1998; PhD, 1998, Columbia University; MA, 1992, Columbia University

Assistant Professors

BOU AYASH, NANCY, 2013; PhD, 2013, University of Louisville; MA, 2006, American University of Beirut (Lebanon)
 BUCKROYD, PETER, 2014; PhD, 1974, McMaster University (Canada); MA, 1970, McMaster University (Canada)
 CHANEY, EVE CHRISTINE, 1991; PhD, 1998, University of Washington; MA, 1993, University of Washington
 CLARE, STEPHANIE, 2016; PhD, 2011, Rutgers University; MA, 2005, University of Victoria (Canada)
 GRIFFITH, MALCOLM A * 1966; PhD, 1966, Ohio State University; MA, 1962, Ohio State University
 MALONE, ERIN C., 2000; MFA, 1996, University of Washington
 NORAKO, LEILA K, 2016; PhD, 2012, University of Rochester; MA, 2009, University of Rochester
 SANDHU, PRITI, 2010; PhD, 2010, University of Hawaii; MA, 2003, Lancaster University (UK)
 SCHRADER-VILLEGAS, JULIE E, 1986; PhD, 1997, University of Washington; MA, 1990, University of Washington
 TAYLOR, JESSE OAK, 2013; PhD, 2010, University of Wisconsin (Madison); MA, 2005, University of Wisconsin (Madison)

Senior Lecturers

LAUFENBERG, HENRY J, 2003; PhD, 2001, University of California (Riverside); MA, 1996, San Francisco State
 LIU, MICHELLE S., 2001; PhD, 2003, Yale University; MA, 1996, Yale University
 MATTHEWS, CARRIE R, 2008; PhD, 2007, University of North Carolina; MA, 2001, University of North Carolina
 MCCUE, FRANCES A, 1991; EdD, 2001, Columbia University; MED, 1996, Columbia University
 O'NEILL, JOHN, 1985; MA, 1986, University of Washington
 POPOV, NIKOLAI B., 1985; PhD, 1994, University of Washington
 TARANATH, ANUPAMA, 2000; PhD, 2002, University of California (San Diego)
 WACKER, NORMAN J., 1989; PhD, 1986, University of Washington; MA, 1976, University of Washington

Lecturers

BARR CLINGAN, NICOLAAS, 2002; PhD, 2012, University of California (Berkeley); MA, 2006, University of California (Berkeley)
 BROWN, ELIZABETH C, 2008; PhD, 2016, University of Washington; MA, 2010, University of Washington

CALLOW, MEGAN, 2015; MA, 2006, St. John's College (New Mexico)
 COOPERMAN, ELIZABETH G, 2009; MFA, 2010, University of Washington
 HELTERBRAND, RYAN M, 2008; MA, 2011, University of Washington
 MALEY, STEPHEN N., 2002; PhD, 2013, University of Washington; MPH, 2009, University of Washington; MS, 2004, University of Washington
 OGLE, KATHARINE, 2015; MFA, 2010, University of Washington
 OTTINGER, AARON J, 2010; PhD, 2016, University of Washington; MA, 2008, De Paul University
 SOKOLOVA, VERA, 1995; PhD, 2002, University of Washington; MA, 1996, University of Washington
 STANSBURY, HEATHER L., 2001; PhD, 2008, University of Washington; MA, 2003, University of Washington

French and Italian Studies

Professor

DELCOURT, DENYSE, 1990; PhD, 1987, University of Montreal (Canada); MA, 1980, University of Montreal (Canada)

Associate Professors

COLLINS, DOUGLAS P, 1980; PhD, 1978, University of Missouri; MA, 1972, University of Missouri
 GAYLARD, SUSAN L, 2005; PhD, 2004, University of California (Berkeley); MA, 1999, University of California (Berkeley)
 MACKENZIE, LOUISA, 2001; PhD, 2001, University of California (Berkeley); MA, 1997, University of California (Berkeley)
 SBRAGIA, ALBERT J, 1989; PhD, 1988, University of California (Berkeley); MA, 1983, University of California (Berkeley)
 TURNOVSKY, GEOFFREY, 2006; PhD, 2001, Columbia University; MA, 1995, Columbia University
 WATTS, RICHARD HENRY, 2009; PhD, 1998, Yale University; MPHIL, 1994, Yale University

Assistant Professors

ARDUINI, BEATRICE, 2012; PhD, 2008, Indiana University; MA, 2005, Indiana University
 SMITH, MAYA A, 2013; PhD, 2013, University of California (Berkeley); MA, 2005, New York University

Senior Lecturers

LEPORACE, GIUSEPPE, 1987; MA, 1989, University of Washington
 MAZZOLA, CLAUDIO, 2000; PhD, 1986, University of Washington; MA, 1982, University of Washington
 VILAVELLA, HELENE, 1984; PhD, 1996, University of Washington; MA, 1986, University of Washington; MA, 1983, University of Paris (France)
 YOWELL, DONNA LYNNE * 2000; PhD, 1987, University of California (Berkeley); MA, 1982, University of California (Berkeley)

Lecturers

BARABOI, OTILIA G., 2001; PhD, 2010, University of Washington; MA, 2003, University of Washington
 GIACHETTI, LORENZO, 2015; PhD, 2015, Stanford University; MA, 2010, Stanford University
 MITCHELL, WILLIAM C., 2003; PhD, 2011, University of Washington; MA, 2005, University of Washington
 SHAW, AIMIE MAUREEN, 2010; PhD, 2014, McGill University (Canada); MA, 2007, University of Victoria (Canada)
 TARADEL, RUGGERO M., 2003; BA, 1992, University of Rome (Italy)
 TASSONE, GIUSEPPE, 1997; BA, 1997, University of Washington
 TATTA, SABRINA, 1995; MA, 1997, University of Washington
 ZAMBIANCHI, PATRICK D, 2007; PhD, 2014, University of Washington

Gender, Women, and Sexuality Studies

Professors

JACOBS, SUE-ELLEN * 1981; PhD, 1970, University of Colorado
 RAMAMURTHY, PRITI, 1997; PhD, 1995, Syracuse University; MBA, 1978, Indian Institute of Management, India
 YEE, SHIRLEY J., 1988; PhD, 1987, Ohio State University

Associate Professors

GINORIO, ANGELA B * 1999; PhD, 1979, Fordham University
 HABELL-PALLAN, MICHELLE, 1998; PhD, 1997, University of California (Santa Cruz); MA, 1993, University of California (San Diego)
 KEATING, CHRISTINE, 2016; PhD, 2002, University of Washington; MA, 1993, George Washington University
 ROSS, LUANA K., 1999; PhD, 1992, University of Oregon
 SWARR, AMANDA L, 2005; PhD, 2003, University of Minnesota
 WELLAND, SASHA, 2004; PhD, 2005, University of California (Santa Cruz)

Assistant Professors

ADEYEMI, ADEKEMI, 2016; PhD, 2016, Northwestern University
 BARBAS, SAMANTHA, 2006; PhD, 2000, University of California (Berkeley)
 BASU, SUTAPA, 1993; PhD, 1998, Fielding Institute
 FRACZEK, CLAIRE, 2002; PhD, 2011, University of Washington
 JUDD, BETTINA A, 2016; PhD, 2014, University of Maryland
 POPE-LEVISON, PRISCILLA, 2007; PhD, 1989, University of St. Andrews (UK)
 SEGALL, KIMBERLY, 2006; PhD, 2000, Northwestern University

Lecturers

BRIGHT, CLARE, 1989; PhD, 1979, University of Washington
 BUSHNELL, JEANETTE, 1986; MN, 1979, University of Washington
 LEE, REGINA Y, 2014; PhD, 2013, University of California (Riverside)
 NOVOTNY, PATRICIA S., 1996; JD, 1983, University of Washington

Geography

Professors

BEYERS, WILLIAM B * 1974; PhD, 1967, University of Washington
 BRADEN, KATHLEEN, 1999; PhD, 1981, University of Washington; MA, 1974, University of Washington
 BROWN, MICHAEL P., 1997; PhD, 1994, University of British Columbia (Canada); MA, 1990, University of British Columbia (Canada)
 CHAN, KAM WING, 1991; PhD, 1988, University of Toronto (Canada); MSC, 1983, University of Hong Kong
 ELLIS, JOHN MARK, 1999; PhD, 1988, Indiana University; MA, 1984, Indiana University
 ELWOOD-FAUSTINO, SARAH A., 2006; PhD, 2000, University of Minnesota; MA, 1996, University of Minnesota
 ENGLAND, KIM V.L., 1999; PhD, 1988, Ohio State University; MA, 1984, Ohio State University
 HERBERT, STEVEN K, 2000; PhD, 1995, University of California (Los Angeles); MA, 1987, University of Minnesota
 JAROSZ, LUCY A., 1990; PhD, 1990, University of California (Berkeley); MA, 1979, University of Wisconsin
 KRUMME, GUNTER * 1970; PhD, 1966, University of Washington
 LAWSON, VICTORIA A., 1986; PhD, 1986, Ohio State University; MA, 1982, Ohio State University
 MAYER, JONATHAN D, 1977; PhD, 1977, University of Michigan; MA, 1975, University of Michigan
 MITCHELL, KATHARYNE, 1993; PhD, 1993, University of California (Berkeley); MA, 1989, University of California (Berkeley)
 MORRILL, RICHARD L * 1997; PhD, 1959, University of Washington; MA, 1957, University of Washington
 NYERGES, TIMOTHY L., 1985; PhD, 1980, Ohio State University; MA, 1976, Ohio State University
 SPARKE, MATTHEW, 1995; PhD, 1996, University of British Columbia (Canada); MA, 1991, University of British Columbia (Canada)
 ZUMBRUNNEN, CRAIG, 1979; PhD, 1973, University of California (Berkeley); MS, 1968, California Institute of Technology

Associate Professors

CHANG, KUEI-SHENG * 1987; PhD, 1955, University of Michigan; MA, 1950, University of Michigan
 CONWAY, RICHARD S, 2000; PhD, 1976, University of Pennsylvania; MA, 1972, University of Pennsylvania
 GALLARDO, GABRIEL, 1984; PhD, 2000, University of Washington; MA, 1993, University of Washington
 KAKIUCHI, GEORGE H * 1990; PhD, 1957, University of Michigan; MA, 1953, University of Michigan

WITHERS, SUZANNE D, 1997; PhD, 1992, University of California (Los Angeles); MA, 1988, Queen's University At Kingston (Canada)

Assistant Professors

AGGARWAL, SUNIL K, 2016; MD, 2010, University of Washington-Seattle Campus; PhD, 2008, University of Washington-Seattle Campus

BERGMANN, LUKE R, 2011; PhD, 2012, University of Minnesota; MA, 2006, University of Minnesota

BIERMANN, CHRISTINE P, 2014; PhD, 2014, Ohio State University; MS, 2009, University of Tennessee

DUNBAR, MATTHEW D, 2008; PhD, 2010, University of Kansas; MA, 2005, University of Kansas

HANNAH, JOSEPH, 1992; PhD, 2007, University of Washington; MA, 1989, Cornell University

HAYES, MICHAEL V, 2000; PhD, 1989, McMaster University (Canada); MSC, 1986, McMaster University (Canada)

YBARRA, MEGAN, 2014; PhD, 2010, University of California (Berkeley)

Lecturers

AGUIRRE, ROBERT W., 2010; PhD, 1999, Louisiana State University; MA, 1995, University of Texas (Austin)

Germanics

Professors

AMMERLAHN, HELLMUT H * 1998; PhD, 1965, University of Texas (Austin); MA, 1960, University of Vermont

BANSLEBEN, MANFRED, 1988; PhD, 1979, Vienna University of Technology

BARRACK, CHARLES M * 1996; PhD, 1969, University of Washington; MA, 1966, University of Washington

BEHLER, DIANA I * 1982; PhD, 1970, University of Washington; MA, 1966, University of Washington

BROWN, JANE K, 1988; PhD, 1971, Yale University; MPHIL, 1969, Yale University

GRAY, RICHARD T, 1991; PhD, 1981, University of Virginia; MA, 1976, University of Cincinnati

PRUTTI, BRIGITTE, 1991; PhD, 1991, University of California (Irvine); DPhil, 1988, University of Graz (Austria)

VOYLES, JOSEPH B. * 1981; PhD, 1965, Indiana University; MA, 1962, Indiana University

WILKE, SABINE, 1988; PhD, 1986, University of Mainz (Germany)

Associate Professors

BLOCK, RICHARD, 2004; PhD, 1998, Northwestern University

BRANDL, KLAUS K, 1991; PhD, 1991, University of Texas (Austin); MA, 1987, University of Texas

MCLEAN, SAMMY K * 1990; PhD, 1963, University of Michigan; MA, 1957, University of Michigan

Assistant Professors

CANFIELD-BUDDE, DAVID A., 1995; PhD, 2004, University of Washington; MA, 1997, University of Washington

GROVES, JASON, 2015; PhD, 2012, Yale University; MA, 2006, Johns Hopkins University

OEHME, ANNEGRET, 2016; MA, 2011, Freie University of Berlin (Germany)

SIMON, BRITTA, 1993; PhD, 1998, University of Washington; MA, 1992, Albert Ludwig Universität (Germany)

TILGHMAN, HEIDI R., 1988; PhD, 1989, University of Washington; MA, 1989, University of Washington

WIGGINS, ELLWOOD, 2012; PhD, 2011, Yale University; MA, 2006, Johns Hopkins University

Lecturers

SLIZYK, ALMUT, 2016; MA, 2014, University of Wurzburg (Germany)

TERRASI, SHAYNA K, 2014; PhD, 2011, University of California (Los Angeles); MA, 2004, San Francisco State

History

Professors

ALDEN, DAURIL * 1981; PhD, 1959, University of California (Berkeley); MA, 1952, University of California (Berkeley)

BACHARACH, JERE L * 1990; PhD, 1967, University of Michigan; MA, 1962, Harvard University

BAILKIN, JORDANNA, 2001; PhD, 1998, Stanford University; MA, 1994, Stanford University
 BARLOW, TANI E. * 1997; PhD, 1985, University of California (Davis); MA, 1979, University of California (Davis)
 BEHLMER, GEORGE K, 1979; PhD, 1977, Stanford University; MA, 1972, Stanford University
 BERGQUIST, CHARLES W * 1989; PhD, 1973, Stanford University; MA, 1968, Stanford University
 CONLON, FRANK F * 1981; PhD, 1969, University of Minnesota; MA, 1963, University of Minnesota
 EBREY, PATRICIA B., 1997; PhD, 1975, Columbia University; MA, 1970, Columbia University
 FELAK, JAMES R, 1989; PhD, 1989, Indiana University; MA, 1985, Indiana University
 FERRILL, ARTHUR L * 1981; PhD, 1964, University of Illinois; MA, 1961, University of Illinois
 FINDLAY, JOHN M, 1987; PhD, 1982, University of California (Berkeley); MA, 1978, University of California (Berkeley)
 FOWLER, WILTON B * 1981; PhD, 1966, Yale University; MA, 1962, Yale University
 GIL, CARLOS * 1983; PhD, 1975, University of California (Los Angeles); MA, 1963, Georgetown University
 GLENN, SUSAN A, 1993; PhD, 1983, University of California (Berkeley); MA, 1975, University of California (San Diego)
 GREGORY, JAMES N, 1993; PhD, 1983, University of California (Berkeley); MA, 1977, University of California (Santa Barbara)
 GUY, R KENT, 1980; PhD, 1981, Harvard University; MA, 1974, Harvard University
 HANKINS, THOMAS L * 1981; PhD, 1964, Cornell University; MAT, 1958, Harvard University
 HUFBAUER, KARL G, 2000; PhD, 1970, University of California (Berkeley)
 JOHNSON, RICHARD R * 1997; PhD, 1972, University of California (Berkeley); MA, 1965, University of California (Berkeley)
 JONAS, RAYMOND A., 1985; PhD, 1985, University of California (Berkeley); MA, 1980, University of California (Davis)
 JOSHEL, SANDRA R., 1993; PhD, 1977, Rutgers University; MA, 1970, Rutgers University
 KIRKENDALL, RICHARD S * 1998; PhD, 1958, University of Wisconsin (Madison); MS, 1953, University of Wisconsin (Madison)
 LEVY, FRED J * 1981; PhD, 1960, Harvard University; AM, 1956, Harvard University
 POIGER, UTA G. * 2000; PhD, 1995, Brown University; MA, 1990, Brown University
 RAFAEL, VICENTE L., 2003; PhD, 1984, Cornell University; MA, 1982, Cornell University
 RORABAUGH, WILLIAM J, 1976; PhD, 1976, University of California (Berkeley); MA, 1970, University of California (Berkeley)
 SCHMIDT, BENJAMIN, 1996; PhD, 1994, Harvard University; MA, 1988, Harvard University
 SEARS, LAURIE J, 1989; PhD, 1986, University of Wisconsin (Madison); MA, 1977, University of Arizona
 STACEY, ROBERT C., 1988; PhD, 1983, Yale University; MPHIL, 1979, Yale University
 STACEY, ROBIN C, 1988; PhD, 1986, Yale University; MPHIL, 1983, Yale University; MA, 1979, Yale University
 TAYLOR, QUINTARD, 1995; PhD, 1977, University of Minnesota; MA, 1971, University of Minnesota
 THOMAS, CAROL G * 1981; PhD, 1965, Northwestern University; MA, 1961, Northwestern University
 THOMAS, LYNN M., 1997; PhD, 1997, University of Michigan; MA, 1993, Northwestern University; MA, 1989, Johns Hopkins University
 TOEWS, JOHN E * 1983; PhD, 1973, Harvard University; MA, 1968, Harvard University
 ULLMAN, JOAN CONNELLY, 1966; PhD, 1963, Bryn Mawr College; MA, 1953, Bryn Mawr College
 WAUGH, DANIEL CLARKE * 1981; PhD, 1972, Harvard University; MA, 1965, Harvard University
 YOUNG, GLENNYS J., 1992; PhD, 1989, University of California (Berkeley); MA, 1983, University of California (Berkeley)

Associate Professors

CAMPBELL, ELENA, 2007; PhD, 1999, Russian Academy of Sciences (Russia); MA, 1996, European University
 DHAVAN, PURNIMA, 2005; PhD, 2003, University of Virginia; MA, 1998, University of Virginia
 HEVLY, BRUCE W, 1989; PhD, 1987, Johns Hopkins University
 JUNG, MOON-HO, 2001; PhD, 2000, Cornell University; MA, 1995, Cornell University
 NASH, LINDA L, 1993; PhD, 2000, University of Washington; MS, 1989, University of California (Berkeley)
 O'MARA, MARGARET PUGH, 2007; PhD, 2002, University of Pennsylvania; MA, 2002, University of Pennsylvania
 O'NEIL, MARY R, 1983; PhD, 1982, Stanford University; MA, 1971, Stanford University
 REID, JOSHUA L, 2015; PhD, 2009, University of California (Davis); MA, 2005, University of California (Davis)
 RODRIGUEZ SILVA, ILEANA M., 2004; PhD, 2004, University of Wisconsin (Madison); MA, 1997, University of Wisconsin (Madison)
 SMALLWOOD, STEPHANIE E, 2006; PhD, 1999, Duke University
 THURTL, PHILLIP S, 1998; PhD, 1999, Stanford University; MA, 1994, Stanford University
 WALKER, JOEL T, 1997; PhD, 1998, Princeton University; MA, 1994, Princeton University
 WARREN, ADAM W, 2004; PhD, 2004, University of California (San Diego); MA, 2000, University of California (San Diego)
 WERRETT, SIMON R. E., 2002; PhD, 2000, Cambridge University (UK); MPHIL, 1996, Cambridge University (UK)

Assistant Professors

BET-SHLIMON, ARBELLA H, 2006; PhD, 2012, Harvard University; AM, 2008, Harvard University
 MARHOEFER, LAURA T, 2016; PhD, 2008, Rutgers University
 MOSCA, MATTHEW W, 2015; PhD, 2008, Harvard University; AM, 2002, Harvard University
 SPAFFORD, DAVID, 2007; PhD, 2006, University of California (Berkeley); MA, 2006, University of California (Berkeley)

Senior Lecturer

URBANSKI, CHARITY L., 2008; PhD, 2007, University of California (Berkeley); MA, 1999, University of California (Berkeley)

Lecturers

GREEN, MIRA, 2006; MA, 2006, University of Utah
 HASEGAWA, KAZUMI, 2015; PhD, 2013, Emory University; MA, 2001, Ohio State University
 MCNALLY, DEBORAH COLLEEN, 2004; PhD, 2013, University of Washington
 MYERS, POLLY M, 2014; PhD, 2008, University of Minnesota; MA, 2003, Western Washington University
 O'DONNELL, WILSON E., 2003; MA, 1982, State University of New York (Cooperstown)
 OSBORN, JULIE ANNETTE RIGG, 2007; PhD, 2013, University of Washington; MA, 2007, University of Hawaii

International Studies

Professors

ALOISI, JONATHAN, 2009; MA, 1998, National War College
 ANCHORDOGUY, MARIE C, 1989; PhD, 1986, University of California (Berkeley)
 BACHMAN, DAVID M, 1991; PhD, 1984, Stanford University
 BALAAM, DAVID NORMAN, 2011; PhD, 1978, University of California (Santa Barbara)
 BARZILAI, GAD, 2004; PhD, 1988, Hebrew University (Israel)
 BUTOW, ROBERT J C * 1990; PhD, 1953, Stanford University
 BUTTERWORTH, ROBERT, 2015; PhD, 1973, University of California (Berkeley)
 CHIROT, DANIEL, 1974; PhD, 1973, Columbia University
 CURRAN, SARA R, 2005; PhD, 1994, University of North Carolina
 DONG, WONMO, 2001; PhD, 1965, Georgetown University
 DONG, YUE, 1996; PhD, 1996, University of California (San Diego); MA, 1989, Beijing University (China)
 ELLINGS, RICHARD J., 2002; PhD, 1983, University of Washington
 FULLER, JAMES L., 2005; PhD, 1975, University of Florida
 GODOY, ANGELINA SNODGRASS, 2002; PhD, 2001, University of California (Berkeley)
 GRAHAM, THOMAS JR, 2003; JD, 1961, Harvard University
 HA, YONG-CHOO, 2003; PhD, 1985, University of California (Berkeley)
 HAMILTON, GARY G., 1994; PhD, 1975, University of Washington
 HANLEY, SUSAN B * 1984; PhD, 1971, Yale University
 HELLMANN, DONALD C * 1981; PhD, 1964, University of California (Berkeley)
 HOLMES-EBER, PAULA, 1999; PhD, 1992, Northwestern University
 JAFFEE, MARTIN S., 1987; PhD, 1980, Brown University
 JOHNSON, DARRYL NORMAN, 2005; BA, 1960, University of Washington
 KASABA, RESAT, 1985; PhD, 1986, State University of New York (Binghamton)
 LACEY, MICHAEL, 2002; PhD, 1979, George Washington University
 LAVELY, WILLIAM R., 1985; PhD, 1982, University of Michigan
 LEGTERS, LYMAN H * 1990; PhD, 1958, Freie University of Berlin (Germany)
 MEEKER, MICHAEL E., 2006; PhD, 1970, University of Chicago
 MIGDAL, JOEL S, 1980; PhD, 1972, Harvard University
 MINES, MATTISON, 2007; PhD, 1969, Cornell University
 NOVETZKE, CHRISTIAN L., 2007; PhD, 2002, Columbia University
 PEKKANEN, ROBERT J., 2004; PhD, 2002, Harvard University
 PEKKANEN, SAADIA, 2004; PhD, 1996, Harvard University; MA, 1988, Columbia University
 PYLE, KENNETH B, 1964; PhD, 1965, Johns Hopkins University

ROUYER, ALWYNN R, 2003; PhD, 1971, Tulane University
 SAKATA, HIROMI LORRAINE, 2005; PhD, 1976, University of Washington
 SORENSEN, CLARK W., 1989; PhD, 1981, University of Washington
 UNDEM, HALVOR A, 2011; PhD, 1985, Air Force Institute of Technology
 WALL, PHILIP, 2009; MBA, 1978, University of Washington
 WEBB, EUGENE * 1982; PhD, 1965, Columbia University
 WELLMAN, JAMES K., 1997; PhD, 1995, University of Chicago
 WILLIAMS, MICHAEL A, 1976; PhD, 1977, Harvard University
 WOODS, RONALD E., 1999; BSFS, 1961, Georgetown University
 YAMAMURA, KOZO * 1999; PhD, 1964, Northwestern University
 YANG, ANAND A, 2002; PhD, 1976, University of Virginia

Associate Professors

CALLAHAN, MARY P., 1999; PhD, 1996, Cornell University; MSC, 1984, London School of Economics (UK)
 FRIEDMAN, KATHIE, 1987; PhD, 1992, State University of New York (Binghamton); MA, 1979, State University of New York (Binghamton)
 GARCIA, MARIA E, 2008; PhD, 2001, Brown University
 GIEBEL, CHRISTOPH, 1998; PhD, 1996, Cornell University; MA, 1989, Cornell University
 JONES, CHRISTOPHER D, 1984; PhD, 1975, Harvard University
 KALE, SUNILA S., 2007; PhD, 2007, University of Texas (Austin)
 LANG, SABINE, 2002; PhD, 1997, Free University Berlin
 LUCERO, JOSE A, 2008; PhD, 2002, Princeton University
 NAAR, DEVIN E, 2011; PhD, 2011, Stanford University
 NAM, HWASOOK BERGQUIST, 1993; PhD, 2003, University of Washington
 PIANKO, NOAM, 2004; PhD, 2004, Yale University
 PORTER, DEBORAH, 2002; PhD, 1989, Princeton University
 RADNITZ, SCOTT B., 2007; PhD, 2006, Massachusetts Institute of Technology
 ROBINSON, CABEIRI DEBERGH, 2003; PhD, 2005, Cornell University
 WARREN, JONATHAN W., 1996; PhD, 1997, University of California (Berkeley)
 WILLIAMS, NATHALIE E, 2012; PhD, 2009, University of Michigan

Assistant Professors

AHUVIA, MIKA, 2014; PhD, 2014, Princeton University
 BESSNER, DANIEL M, 2014; PhD, 2013, Duke University
 FREIJE, VANESSA GRACE, 2014; PhD, 2015, Duke University
 HATCH, WALTER F, 2000; PhD, 2000, University of Washington
 WENDLER, FRANK, 2012; PhD, 2004, University of Gottingen (Germany)

Senior Lecturers

LORENZ, FREDERICK M., 1999; JD, 1971, Marquette University
 TOKUNO, KYOKO, 2001; PhD, 1994, University of California (Berkeley)

Lecturers

ARAI, ANDREA G., 1994; PhD, 2004, Columbia University
 BASIC, DENIS, 2012; PhD, 2006, University of Washington
 BEGUN, JEFFREY C, 2003; PhD, 2009, University of Washington
 BEYER, JESSICA, 1994; PhD, 2011, University of Washington; MA, 2000, University of Bath (United Kingdom)
 KALANGES, KRISTINE, 2016; PhD, 2008, Georgetown University; MA, 2005, Georgetown University
 KLAPAKI, NEKTARIA, 2010; PhD, 2006, University of London, UK
 LAGOS, TASO, 1999; PhD, 2004, University of Washington
 LYSENKO, VOLODYMYR, 2005; PhD, 2011, University of Washington; MS, 1991, National Taras Shevchenko University of Kyiv (Ukraine)
 MONTGOMERY, SCOTT, 2002; MS, 1978, Cornell University
 PANAGIOTIDES, HERACLES S, 1988; PhD, 1996, University of Washington

Law, Societies and Justice

Professor

BECKETT, KATHERINE A, 2000; PhD, 1994, University of California (Los Angeles)

Associate Professor

OSANLOO, ARZOO, 2002; PhD, 2002, Stanford University

Assistant Professor

MEYERS, STEPHEN, 2015; PhD, 2014, University of California (San Diego); MTh, 2002, Harvard University

Lecturer

WOIAK, JOANNE D, 2001; PhD, 1998, University of Toronto (Canada)

Linguistics

Professors

BENDER, EMILY R. MENON, 2003; PhD, 2000, Stanford University; MA, 1997, Stanford University

CITKO, BARBARA, 2005; PhD, 2000, Stony Brook University

CONTRERAS, HELES * 1998; PhD, 1961, Indiana University; MA, 1959, Indiana University

HARGUS, SHARON, 1985; PhD, 1985, University of California (Los Angeles); MA, 1981, University of California (Los Angeles)

HERSCHENSOHN, JULIA R., 1985; PhD, 1976, University of Washington; MA, 1970, University of California (Santa Barbara)

HOARD, JAMES E, 2000; PhD, 1967, University of Washington; MA, 1966, University of Washington

KAISSE, ELLEN, 1983; PhD, 1977, Harvard University

KLAUSENBURGER, JURGEN, 1995; PhD, 1969, University of Michigan; MA, 1966, University of Michigan

NEWMAYER, FREDERICK * 1982; PhD, 1969, University of Illinois; MA, 1967, University of Rochester

TARLINSKAYA, MARINA * 1999; DPhil, 1976, Moscow Institute of Foreign Languages; PhD, 1967, Moscow Institute of Foreign Languages

WRIGHT, RICHARD A., 1998; PhD, 1996, University of California (Los Angeles); MA, 1993, University of California (Los Angeles)

XIA, FEI, 2005; PhD, 2001, University of Pennsylvania; MS, 1997, University of Pennsylvania

ZAGONA, KAREN T, 1987; PhD, 1982, University of Washington

Associate Professors

ALDRIDGE, EDITH, 2007; PhD, 2004, Cornell University; MA, 1992, Sophia University (Japan)

EVANS, BETSY E, 2007; PhD, 2001, Michigan State University; MA, 1992, Kent State University

LEVOW, GINA-ANNE, 2010; PhD, 1998, Massachusetts Institute of Technology; SM, 1993, Massachusetts Institute of Technology

OGIHARA, TOSHIYUKI, 1991; PhD, 1989, University of Texas; MA, 1983, Sophia University (Japan)

WASSINK, ALICIA BECKFORD, 1998; PhD, 1999, University of Michigan

Assistant Professors

AOKI, PAUL K, 1988; PhD, 1981, University of Washington; MA, 1976, University of Washington

KAHN, JEREMY GILLMOR, 2016; PhD, 2010, University of Washington-Seattle Campus; MA, 2005, University of Washington-Seattle Campus

LEWIS, WILLIAM D., 2005; PhD, 2002, University of Arizona; MA, 1999, University of Arizona

OMAKI, AKIRA, 2016; PhD, 2010, University of Maryland; MA, 2005, University of Hawaii

ROZELLE, LORNA, 2004; PhD, 2003, University of Washington; MA, 1992, University of Washington

SOLTI, IMRE, 2007; PhD, 2006, Virginia Commonwealth University; MD, 1992, Albert Szent-Gyorgyi Medical University

TJALVE, MICHAEL, 2009; PhD, 2007, University of London, UK; MA, 1999, University of Copenhagen (Denmark)

TOUTANOVA, KRISTINA, 2010; PhD, 2005, Stanford University

Senior Lecturers

FORSHAY, LANCE, 2007; MS, 1998, Southern Christian University

MCGARRITY, LAURA WILBUR, 2004; PhD, 2003, Indiana University; MA, 1999, Indiana University

Lecturers

COOPER, MICHAEL, 2015; MA, 2014, Gallaudet University; MS, 2014, Gallaudet University

FAN, ZHENZHEN, 2016; Mtech, 2004, National University of Singapore

WINTER, KRISTI G, 2010; MA, 2008, Gallaudet University

Mathematics

Professors

BILLEY, SARA, 2002; PhD, 1994, University of California (San Diego); MA, 1991, University of California (San Diego)

BROWNELL, FRANCIS H * 1987; PhD, 1949, Princeton University; MS, 1947, Yale University

BUBE, KENNETH P., 1986; PhD, 1978, Stanford University; MS, 1976, Stanford University

BURDZY, KRZYSZTOF, 1988; PhD, 1984, University of California (Berkeley); MA, 1979, Maria Curie-Skłodowska University

BURKE, JAMES V., 1985; PhD, 1983, University of Illinois

CHEN, ZHEN-QING, 1998; PhD, 1992, Washington University; MS, 1987, East China Normal University

COLLINGWOOD, DAVID, 1987; PhD, 1983, University of Utah

CURJEL, CASPAR R * 1998; ScD, 1960, Eidgenössische Technische Hochschule (Switz); Diploma, 1954, Eidgenössische Technische Hochschule (Switz)

CURTIS, EDWARD B * 1981; PhD, 1962, Harvard University; MA, 1962, Harvard University

DUCHAMP, THOMAS E., 1984; PhD, 1976, University of Illinois; MS, 1969, University of Illinois

DUMITRIU, IOANA, 2006; PhD, 2003, Massachusetts Institute of Technology

ERICKSON, KENT B * 1981; PhD, 1970, University of Wisconsin; MS, 1966, Georgia Institute of Technology

FOLLAND, GERALD B. * 1981; PhD, 1971, Princeton University; MA, 1970, Princeton University

GANGOLLI, RAMESH A * 1997; PhD, 1961, Massachusetts Institute of Technology

GOLDSTEIN, ALLEN A. * 1989; PhD, 1954, Georgetown University; MA, 1952, Georgetown University

GOODEARL, KENNETH R. * 2000; PhD, 1971, University of Washington; MS, 1969, University of Washington

GRAHAM, C. ROBIN, 1984; PhD, 1981, Princeton University

GREENBERG, RALPH, 1978; PhD, 1970, Princeton University

GRUNBAUM, BRANKO * 1981; PhD, 1957, Hebrew University (Israel); MA, 1954, Hebrew University (Israel)

HOFFMAN, CHRISTOPHER, 1999; PhD, 1996, Stanford University; MS, 1994, Stanford University

IRVING, RONALD S, 1981; PhD, 1977, Massachusetts Institute of Technology

KAS, ARNOLD, 1995; PhD, 1966, Stanford University

KOBLITZ, NEAL I, 1979; PhD, 1974, Princeton University

KOVACS, SANDOR J, 2000; PhD, 1995, University of Utah; MS, 1990, Eotvos Lorand University (Hungary)

LAUTER, KRISTIN, 2008; PhD, 1996, University of Chicago; MS, 1991, University of Chicago

LEE, JOHN M, 1986; PhD, 1982, Massachusetts Institute of Technology

LIEBLICH, MAX, 2009; PhD, 2004, Massachusetts Institute of Technology

LIND, DOUGLAS A * 1984; PhD, 1973, Stanford University; MA, 1971, Stanford University

MARSHALL, DONALD E, 1976; PhD, 1976, University of California (Los Angeles); MA, 1972, University of California (Los Angeles)

MCGOVERN, WILLIAM M, 1990; PhD, 1987, Massachusetts Institute of Technology

MITCHELL, STEPHEN A., 1985; PhD, 1981, University of Washington

MORROW, JAMES ALLEN, 1969; PhD, 1967, Stanford University

NAMIOKA, ISAAC * 1999; PhD, 1956, University of California (Berkeley); MA, 1953, University of Kansas; EE, 1948, Kobe Technical College

NOVIK, ISABELLA, 2001; PhD, 1999, Hebrew University (Israel); MS, 1996, Hebrew University (Israel)

PALMIERI, JOHN, 1999; PhD, 1991, Massachusetts Institute of Technology

PEVTSOVA, JULIA, 2005; PhD, 2002, Northwestern University

POLLACK, DANIEL, 1996; PhD, 1991, Stanford University; MS, 1986, University of Pennsylvania

RAGOZIN, DAVID * 1981; PhD, 1967, Harvard University; MA, 1963, Harvard University

ROCKAFELLAR, R T * 1982; PhD, 1963, Harvard University; MS, 1959, Marquette University

ROHDE, STEFFEN, 1998; PhD, 1989, Technical University of Berlin (Germany); MS, 1987, Technical University of Berlin (Germany)

SEGAL, JACK * 1999; PhD, 1960, University of Georgia; MS, 1957, University of Miami (Florida)
 SMITH, HART F, 1991; PhD, 1989, Princeton University
 SMITH, SHOLTO PAUL, 1986; PhD, 1981, University of Leeds (UK); MSC, 1978, University of London, UK
 STEIN, WILLIAM A, 2006; PhD, 2000, University of California (Berkeley)
 STOUT, EDGAR L * 1981; PhD, 1964, University of Wisconsin; MA, 1961, University of Wisconsin
 SULLIVAN, JOHN B, 1973; PhD, 1971, Cornell University
 SYLVESTER, JOHN, 1987; PhD, 1980, New York University; MS, 1977, New York University
 THOMAS, REKHA R., 2000; PhD, 1994, Cornell University; MS, 1992, Cornell University
 TORO, TATIANA, 1996; PhD, 1992, Stanford University; MS, 1989, Stanford University
 TUNCCEL, SELIM, 1986; PhD, 1982, University of Warwick (UK); MSC, 1979, University of Warwick (UK)
 UHLMANN, GUNTHER A., 1984; PhD, 1976, Massachusetts Institute of Technology
 WARNER, GARTH, 1966; PhD, 1966, University of Michigan
 WESTWATER, MICHAEL * 1981; PhD, 1967, Cambridge University (UK)
 YUAN, YU, 2001; PhD, 1998, University of Minnesota; MS, 1993, Academia Sinica (China)
 ZHANG, JIAN JAMES, 1994; PhD, 1991, Massachusetts Institute of Technology; MS, 1985, Fudan University (China)

Associate Professors

ARMS, JUDITH M, 1980; PhD, 1977, University of California (Berkeley); MA, 1974, University of California (Berkeley)
 ATHREYA, JAYADEV S, 2015; PhD, 2006, University of Chicago; MSC, 2001, University of Chicago
 DEVINATZ, ETHAN S, 1991; PhD, 1985, Massachusetts Institute of Technology
 HOLROYD, ALEXANDER, 2007; PhD, 2000, University of Cambridge (UK); MA, 1999, University of Cambridge (UK)
 KING, JAMES RICHARD * 1981; PhD, 1969, University of California (Berkeley); MA, 1967, University of California (Berkeley)
 LUBETZKY, EYAL, 2008; PhD, 2008, Tel Aviv University (Israel)
 MONK, GEORGE STEPHEN * 1998; PhD, 1966, University of Minnesota
 MOORE, ROBERT T * 1981; PhD, 1964, Princeton University
 PAL, SOUMIK, 2008; PhD, 2006, Columbia University; MS, 2002, Indian Statistical Institute
 WILSON, DAVID B., 2000; PhD, 1996, Massachusetts Institute of Technology

Assistant Professors

CHIRVASITU, ALEXANDRU LEON, 2014; PhD, 2014, University of California (Berkeley); MSC, 2009, Ecole Normale Supérieure
 Bucharest
 CHOU, CHIH-CHI, 2014; MS, 2006, National Taiwan University
 DRUSVYATSKIY, DMITRIY, 2014; PhD, 2013, Cornell University; MS, 2010, Cornell University
 KLEE, STEVEN R., 2013; PhD, 2010, University of Washington; MS, 2009, University of Washington
 MCGONAGLE, MATTHEW W, 2014; MA, 2009, Johns Hopkins University
 MONTALTO CRUZ, CARLOS R, 2014
 MUNOZ, FRANCISCO F, 2015; PhD, 2015, Yale University; MS, 2008, Ohio State University
 NACHMIAS, ASAF, 2011; PhD, 2008, University of California (Berkeley); MSC, 2004, Tel Aviv University (Israel)
 OZOLS, VILNIS * 1981; PhD, 1967, University of California (Berkeley); MA, 1965, University of California (Berkeley)
 RAYMOND, ANNIE, 2014
 ROTHVOSS, THOMAS, 2014; PhD, 2009, Ecole Polytechnique Fédérale De Lausanne; Diploma, 2006, University of Dortmund
 TEWARI, VASU VINEET, 2015; MM, 2011, University of British Columbia (Canada)
 VIRAY, BIANCA, 2014; PhD, 2010, University of California (Berkeley)
 WANG, YIRAN, 2015; PhD, 2015, Purdue University; MS, 2009, Chinese University of Hong Kong
 WANG, ZHENAN, 2015; PhD, 2015, Northwestern University

Senior Lecturers

CONROY, MATTHEW, 2001; PhD, 1997, University of Colorado (Boulder); MS, 1990, University of Lowell
 NICHIFOR, ALEXANDRA, 1997; MSC, 1997, Syracuse University
 PERKINS, PATRICK, 1995; PhD, 1988, University of Washington

Lecturers

BEKYEL, EBRU, 2005; PhD, 2002, Brown University
 OSTROFF, JONAH K, 2013; PhD, 2013, Brandeis University

PEZZOLI, ELENA, 2000; PhD, 1998, Stanford University; MS, 1997, Stanford University

Music

Professors

BERNARD, JONATHAN W, 1987; PhD, 1977, Yale University; MA, 1973, Yale University
 BOZARTH, GEORGE S, 1982; PhD, 1978, Princeton University
 CAMPBELL, PATRICIA S., 1989; PhD, 1981, Kent State University
 CARLSEN, JAMES C * 1992; PhD, 1962, Northwestern University
 COLLIER, THOMAS W, 1980; BA, 1971, University of Washington
 DEMPSTER, STUART R * 1998; MA, 1967, San Francisco State
 DISSANAYAKE, ELLEN, 2002; MA, 1970, University of Maryland
 DURAND, JOEL-FRANCOIS, 1991; PhD, 1988, State University of New York (Stony Brook)
 GROSSMAN, ARTHUR * 1968; Diploma, 1955, Curtis Institute of Music
 KAPLAN, ABRAHAM * 1977; Diploma, 1957, Juilliard School; Diploma, 1953, Juilliard School

 SIKI, BELA * 1993; Diploma, 1948, Conservatoire De Musique (Switzerland)
 SMITH, BILL O * 1988; MA, 1952, University of California
 STARR, LAWRENCE, 1977; PhD, 1973, University of California (Berkeley)
 STORCH, LAILA * 1993; BA, 1964, Wilkes College
 TERRY, CAROLE R, 1979; DMA, 1977, Stanford University
 THOME, DIANE * 1989; PhD, 1973, Princeton University; MA, 1966, University of Pennsylvania
 WATRAS, M. MELIA, 2004; MM, 1995, Indiana University

Associate Professors

BENSHOOF, KENNETH, 1991; MA, 1963, San Francisco State
 BOERS, GEOFFREY PAUL, 1996; DMA, 1987, University of Arizona
 DUDLEY, SHANNON K., 1996; PhD, 1997, University of California (Berkeley)
 HARPER, THOMAS, 1998; MM, 1976, University of Arkansas
 HODGE, HUCK J, 2008; DMA, 2008, Columbia University
 JUSSILA, CLYDE F, 1986; MS, 1951, Kansas State University
 MICHAELIAN, PATRICIA, 1984; Diploma, 1971, Curtis Institute of Music
 PAMPIN, JUAN C., 1999; DMA, 2000, Stanford University; MA, 1995, National Conservatory of Music, France
 RUMPH, STEPHEN C, 2002; PhD, 1997, University of California (Berkeley)
 SCHUYLER, PHILIP D, 1999; PhD, 1979, University of Washington
 SHIN, DONNA YOUNG, 2007; MM, 1999, New England Conservatory of Music
 SUNARDI, CHRISTINA, 2007; PhD, 2007, University of California (Berkeley)
 TARICANI, JOANN, 1980; PhD, 1986, University of Pennsylvania
 VU, CUONG, 2007; BM, 1993, New England Conservatory of Music
 WYERS, GISELLE E, 2006; PhD, 2000, University of Arizona

Assistant Professors

ANDERSON, JOSEPH L, 2013; PhD, 2003, University of Birmingham (UK)

COREY, CHARLES, 2014; PhD, 2011, University of Pittsburgh
 DEUEL, THOMAS, 2011; MD, 2006, Harvard Medical School
 SERCOMBE, LAUREL, 2013; PhD, 2001, University of Washington

Lecturers

BERRIOS-MIRANDA, MARISOL, 2000; PhD, 1999, University of California (Berkeley); MA, 1985, San Jose State University
 HANFORD, JOHN C, 2006; PhD, 2003, University of Washington
 JONES, CLAIRE A., 1992; PhD, 2006, University of Washington
 ROBERTS, JOHN CHRISTOPHER, 1992; PhD, 2012, University of Washington

Near Eastern Languages and Civilization

Professors

ANDREWS, WALTER G, 2000; PhD, 1970, University of Michigan; MA, 1965, University of Michigan
 CIRTAUTAS, ILSE D * 1987; PhD, 1958, University of Hamburg (Germany); Abitur, 1944, Gymnasium, Treuburg (East Prussia)
 DEYOUNG, TERRI LYNN, 1991; PhD, 1988, University of California (Berkeley); MA, 1981, American University in Cairo
 HEER, NICHOLAS L. * 1990; PhD, 1955, Princeton University
 NOEGEL, SCOTT B., 1995; PhD, 1994, Cornell University; MA, 1993, Cornell University
 REID, DONALD M., 2006; PhD, 1969, Princeton University
 SOKOLOFF, NAOMI B., 1985; PhD, 1980, Princeton University; MA, 1979, Princeton University

Associate Professors

BROWN, JONATHAN, 2006; PhD, 2006, University of Chicago
 ELKHAFAIFI, HUSSEIN M., 2004; PhD, 1985, University of Utah; MA, 1977, University of Utah
 KURU, SELIM SIRRI, 1999; PhD, 2000, Harvard University; MA, 1993, Bogazici University (Istanbul)

Assistant Professors

ALAVI, SAMAD, 2013; MA, 2006, University of Chicago
 MAHMOOD, HAMZA, 2013; PhD, 2014, Cornell University; MA, 2011, Cornell University
 SELOVER, STEPHANIE, 2014; PhD, 2015, University of Chicago; MA, 2008, University of Chicago

Senior Lecturer

MARTIN, GARY D., 2001; PhD, 2007, University of Washington; MA, 2003, University of Washington

Lecturers

AHMED, KHALID A, 2013; BA, 1994, Sana'a University
 BENSON, SUSAN, 2005; MA, 1983, University of Utah
 KHAZZAM-HOROVITZ, HADAR, 2006; PhD, 2012, University of Washington; LLM, 2007, University of Washington
 MAWKANULI, TALANT, 2008; PhD, 1999, Indiana University; MA, 1988, Xinjiang University (China)
 ROMANO, TOVI, 2009; BED, 1990, Levinski College of Education (Israel)
 SHAMS, SHAHRZAD, 2009; MA, 1985, California State University, Fullerton
 YUCEL, MELIKE, 2012; MA, 2011, Portland State University

Philosophy

Professors

BLAKE, MICHAEL I., 2005; PhD, 1998, Stanford University
 BONJOUR, LAURENCE A, 1977; PhD, 1969, Princeton University
 CLATTERBAUGH, KENNETH C. * 1981; PhD, 1966, Indiana University
 COBURN, ROBERT * 1981; PhD, 1958, Harvard University
 COHEN, S MARC * 1981; PhD, 1967, Cornell University

FINE, ARTHUR I, 2001; PhD, 1963, University of Chicago
 GARDINER, STEPHEN M., 2004; PhD, 1999, Cornell University
 HANKINSON NELSON, LYNN, 2002; PhD, 1987, Temple University
 KEYT, DAVID * 1981; PhD, 1955, Cornell University
 MARKS, CHARLES * 1981; PhD, 1972, Cornell University
 MOORE, RONALD M * 1981; PhD, 1971, Columbia University
 POTTER, KARL H * 1998; PhD, 1955, Harvard University
 ROBERTS, JEAN VALERIE, 1991; PhD, 1982, University of Pittsburgh
 ROSENTHAL, MICHAEL, 2002; PhD, 1996, University of Chicago
 TALBOTT, WILLIAM J., 1989; PhD, 1976, Harvard University
 WYLIE, MARGARET ALISON, 2005; PhD, 1982, State University of New York (Binghamton)

Associate Professors

GOERING, SARA L., 2003; PhD, 1998, University of Colorado (Denver)
 LEE, CAROLE J, 2008; PhD, 2006, University of Michigan, Ann Arbor
 LONE, JANA MOHR, 2000; PhD, 1996, University of Washington
 MANCHAK, JOHN, 2009; PhD, 2009, University of California (Irvine)
 MISHALANI, JAMES K * 1999; PhD, 1961, Brown University
 SMITH, ANGELA, 2000; PhD, 1999, Harvard University
 WELLER, CASS J, 1990; PhD, 1983, University of Pittsburgh
 WOODY, ANDREA I., 1997; PhD, 1997, University of Pittsburgh

Assistant Professors

FEINTZEIG, BENJAMIN H., 2016; PhD, 2016, University of California (Irvine)
 FOURIE, CARINA, 2015; PhD, 2006, University College London
 KEYT, CHRISTINE M, 2000; PhD, 1980, University of Washington
 KLEIN, ERAN, 2012; MD, 2004, Georgetown University
 LUCIAN, MIRIAM L, 2000; PhD, 1970, Harvard University
 MARSHALL, COLIN ROBERT, 2013; PhD, 2010, New York University
 MAYO-WILSON, CONOR, 2014; PhD, 2012, Carnegie Mellon University
 NICHOLS, LAUREN HARTZELL, 2009; PhD, 2009, Stanford University
 SPECKER-SULLIVAN, LAURA, 2015; PhD, 2015, University of Hawaii

Lecturers

FRANCO, PAUL L., 2012; PhD, 2011, University of Pennsylvania
 SCHNEE, IAN PAUL, 2015; PhD, 2010, University of California (Berkeley)
 SHAPIRO, DAVID, 1994; MA, 2001, University of Washington

Physics

Professors

ADELBERGER, ERIC G, 1972; PhD, 1967, California Institute of Technology
 ALBERG, MARY ANN, 2000; PhD, 1974, University of Washington
 ALLENDER, DAVID, 2005; PhD, 1975, University of Illinois
 ANDREEV, ANTON, 2004; PhD, 1996, Massachusetts Institute of Technology
 ASNER, DAVID M, 2015; PhD, 2000, University of California (Santa Barbara)
 BAKER, MARSHALL * 1981; PhD, 1958, Harvard University
 BALANTEKIN, AKIF BAHA, 2002; PhD, 1982, Yale University
 BARDEEN, JAMES M * 1982; PhD, 1965, California Institute of Technology
 BARRETT, BRUCE R., 2000; PhD, 1967, Stanford University
 BEANE, SILAS R, 2013; PhD, 1994, University of Texas (Austin)
 BERTSCH, GEORGE F * 1992; PhD, 1965, Princeton University
 BICHSEL, HANS, 2000; PhD, 1951, University of Basel (Switzerland)

BOULWARE, DAVID G * 1982; PhD, 1962, Harvard University
 BOWLES, THOMAS J., 2000; PhD, 1978, Princeton University
 BOYNTON, PAUL * 1981; PhD, 1967, Princeton University
 BROWN, LOWELL S * 1981; PhD, 1961, Harvard University
 BULGAC, AUREL, 1993; PhD, 1977, Leningrad Nuclear Physics Inst (Russia)
 BURNETT, THOMPSON H * 1986; PhD, 1968, University of California (San Diego)
 CHALOUPKA, VLADIMIR, 1981; PhD, 1975, University of Geneva (Switzerland)
 CLEVELAND, BRUCE T., 2001; PhD, 1970, Johns Hopkins University
 COBDEN, DAVID, 2001; PhD, 1992, Cambridge University (UK)
 COOK, VICTOR * 1985; PhD, 1962, University of California (Berkeley)
 CRAMER, JOHN G * 1981; PhD, 1961, Rice University
 DEHMELT, HANS G * 1996; PhD, 1950, University of Gottingen (Germany)
 DEN NIJS, MARCEL P, 1981; PhD, 1979, Katholieke University (Netherlands)
 DOE, PETER J., 1994; PhD, 1977, University of Durham (UK)
 ELLIOTT, STEVEN R * 1999; PhD, 1987, University of California (Irvine)
 ELLIS, STEPHEN D * 1987; PhD, 1971, California Institute of Technology
 FORTSON, E. NORVAL * 1981; PhD, 1964, Harvard University
 FRIEDMAN, WILLIAM A., 2004; PhD, 1966, Massachusetts Institute of Technology
 GARCIA, ALEJANDRO, 1986; PhD, 1991, University of Washington
 GOUSSIOU, ANNA, 2007; PhD, 1995, University of Wisconsin (Madison)
 GUNDLACH, JENS, 1984; PhD, 1990, University of Washington
 HALPERN, ISAAC * 1994; PhD, 1948, Massachusetts Institute of Technology
 HASTINGS, MATTHEW, 2014; PhD, 1997, Massachusetts Institute of Technology
 HAXTON, WICK C. * 1998; PhD, 1976, Stanford University
 HEATH, JENNIFER T, 2016; PhD, 2002, University of Oregon
 HECKEL, BLAYNE, 1983; PhD, 1981, Harvard University
 HENLEY, ERNEST M * 1987; PhD, 1952, University of California (Berkeley)
 HERON, PAULA, 1995; PhD, 1995, University of Western Ontario (Canada)
 HERTZOG, DAVID, 2008; PhD, 1983, College of William and Mary
 HIME, ANDREW, 2005; PhD, 1991, Oxford University (UK)
 INGALLS, ROBERT L * 1981; PhD, 1962, Carnegie Institute of Technology
 KAMMEL, PETER, 2002; PhD, 1982, University of Vienna, Austria
 KAPLAN, DAVID B., 1994; PhD, 1985, Harvard University
 KARCH, ANDREAS, 2002; PhD, 1998, Humboldt University (Germany)
 LEVANYUK, ARKADY, 2013; ScD, 1977, Academy of Science (USSR)
 LUBATTI, HENRY J, 1969; PhD, 1966, University of California (Berkeley)
 MAGIERSKI, PIOTR, 2002; PhD, 1995, Technical University of Warsaw (Poland)
 MANDULA, JEFFREY E., 2006; PhD, 1966, Harvard University
 MCDERMOTT, LILLIAN C, 1971; PhD, 1959, Columbia University
 MCLERRAN, LARRY D., 1996; PhD, 1975, University of Washington
 MILLER, GERALD, 1975; PhD, 1972, Massachusetts Institute of Technology
 NELSON, ANN E, 1994; PhD, 1984, Harvard University
 NORDTVEDT, KENNETH, 2003; PhD, 1964, Stanford University
 OLMSTEAD, MARJORIE A, 1991; PhD, 1985, University of California (Berkeley)
 REDDY, SANJAY K., 1998; PhD, 1998, State University of New York (Stony Brook)
 REHR, JOHN J * 1985; PhD, 1972, Cornell University
 RIEDEL, EBERHARD K. * 2000; PhD, 1966, Technical University of Munich (Germany)
 ROBERTSON, R. G. HAMISH, 1994; PhD, 1971, McMaster University (Canada)
 ROSENBERG, LESLIE, 2005; PhD, 1985, Stanford University
 ROTHBERG, JOSEPH E * 1981; PhD, 1963, Columbia University
 SAVAGE, MARTIN J., 1996; PhD, 1990, California Institute of Technology
 SCHICK, MICHAEL, 1981; PhD, 1967, Stanford University
 SEIDLER, GERALD T., 1996; PhD, 1993, University of Chicago
 SHAFFER, PETER S., 1985; PhD, 1993, University of Washington

SHARPE, STEPHEN R., 1986; PhD, 1983, University of California (Berkeley)
 SNOVER, KURT ALBERT * 1999; PhD, 1969, Stanford University
 SORENSEN, LARRY B, 1983; PhD, 1979, University of Illinois
 SPIVAK, BORIS, 1991; PhD, 1978, Leningrad Polytechnic Institute (Russia)
 STORM, DEREK, 1994; PhD, 1970, University of Washington
 STRASSLER, MATTHEW, 2002; PhD, 1993, Stanford University
 STUBBS, CHRISTOPHER * 1998; PhD, 1988, University of Washington
 THOULESS, DAVID * 1988; PhD, 1958, Cornell University
 TRAINOR, THOMAS A * 1999; PhD, 1973, University of North Carolina
 VAN BIBBER, KARL, 2007; PhD, 1976, Massachusetts Institute of Technology
 VAN DYCK, ROBERT S * 1987; PhD, 1971, University of California (Berkeley)
 VAN KOLCK, UBIRAJARA L., 2002; PhD, 1993, University of Texas
 VILCHES, OSCAR E * 1981; PhD, 1966, National University of Cuyo (Argentina)
 WATTS, GORDON T., 1999; PhD, 1995, University of Rochester
 WEITKAMP, WILLIAM G. * 1995; PhD, 1965, University of Wisconsin (Madison)
 WETTLAUER, JOHN S, 2000; PhD, 1991, University of Washington
 WILKERSON, JOHN F. * 1994; PhD, 1982, University of North Carolina
 WILKES, RICHARD JEFFREY, 1974; PhD, 1974, University of Wisconsin (Madison)
 WILLIAMS, ROBERT W * 1990; PhD, 1948, Massachusetts Institute of Technology
 WITTEN, EDWARD, 2014; PhD, 1976, Princeton University
 YAFFE, LAURENCE G, 1988; PhD, 1980, Princeton University

Associate Professors

BLINOV, BORIS B., 2005; PhD, 2000, University of Michigan
 ENOMOTO, SANSHIRO, 2009; PhD, 2005, Tohoku Imperial University (Japan)
 GUPTA, SUBHADEEP, 2003; PhD, 2003, Massachusetts Institute of Technology
 MORALES, MIGUEL, 2008; PhD, 2002, University of California (Santa Cruz)
 ROCHE, KENNETH J, 2008; MS, 2002, University of Tennessee
 TAULU, SAMU JUHANA, 2014; ScD, 2008, Helsinki University of Technology
 WIGGINS, PAUL A, 2010; PhD, 2005, California Institute of Technology
 XU, XIAODONG, 2010; PhD, 2008, University of Michigan

Assistant Professors

CHERMAN, ALEKSEY, 2015; PhD, 2010, University of Maryland
 CHU, JIUN-HAW, 2015; PhD, 2012, Stanford University
 DETWILER, JASON, 2012; PhD, 2005, Stanford University
 FERTL, MARTIN C, 2014; PhD, 2014, Swiss Federal Institute of Technology
 FORBES, MICHAEL MCNEIL, 2004; PhD, 2005, Massachusetts Institute of Technology
 FU, KAI-MEI, 2010; PhD, 2007, Stanford University
 HOFERICHTER, MARTIN, 2015; PhD, 2012, Rheinische Friedrich Wilhelm University of Bonn
 HOLT, JEREMY W, 2012; PhD, 2008, Stony Brook University
 HSU, SHIH-CHIEH, 2012; PhD, 2008, University of California (San Diego)
 KAS, JOSH J., 1999; PhD, 2009, University of Washington
 KASPAR, JAROMIR, 2008; PhD, 2008, Czech Technical University
 MEHTAR-TANI, YACINE, 2014; PhD, 2006, University of Paris Sud-Orsay
 MILLER, MICHAEL L., 2006; PhD, 2004, Yale University
 MUELLER, PETER, 2012; PhD, 2003, Johannes Gutenberg University, Germany
 PARNO, DIANA M S, 2011; PhD, 2011, Carnegie Mellon University
 RYBKA, GRAY, 2007; PhD, 2007, Massachusetts Institute of Technology
 SCHAARSCHMIDT, JANA, 2016; PhD, 2010, Technische Universität Dresden
 SCHLICHTING, SOEREN, 2012; PhD, 2013, Ruprechts Karl University
 SCHWENK, ACHIM, 2003; PhD, 2002, State University of New York (Stony Brook)
 VENKATESWARA, KRISHNA RAI, 2010; PhD, 2010, University of Maryland
 WALKER, DEVIN G E, 2015; PhD, 2006, Harvard University

WHITE, SUZANNE M, 2016; PhD, 2014, Rutgers University
 WINTER, PETER, 2010; PhD, 2005, University of Bonn (Germany)
 WLAZLOWSKI, GABRIEL, 2011; PhD, 2010, Warsaw University of Technology (Poland)

Senior Lecturers

PENGRA, DAVID B., 1986; PhD, 1991, University of Washington
 ROBERTSON, CHARLES E, 2000; MS, 1981, University of Washington

Lecturers

AL-BINNI, USAMA A, 2016; PhD, 2011, The University of Tennessee
 EFIMOV, VITALY, 2000; PhD, 1966, Physico-Technical Institute (Russia)
 MESSINA, DONNA L, 1994; MED, 1988, Seattle University
 ZIRUL, JEFFREY W, 2002; MS, 2003, University of Washington

Political Science

Professors

BENNETT, WALTER LANCE, 1974; PhD, 1974, Yale University
 BRASS, PAUL R * 1999; PhD, 1964, University of Chicago
 CAPORASO, JAMES A, 1988; PhD, 1968, University of Pennsylvania
 FRAGA, LUIS R., 2007; PhD, 1984, Rice University
 GILL, ANTHONY J, 1994; PhD, 1994, University of California (Los Angeles)
 GOLDBERG, ELLIS, 1985; PhD, 1983, University of California (Berkeley)
 GORE, WILLIAM J * 1989; PhD, 1952, University of Southern California
 LEVI, MARGARET * 1987; PhD, 1974, Harvard University
 LOVELL, GEORGE I, 2001; PhD, 1997, University of Michigan
 MAJESKI, STEPHEN J, 1984; PhD, 1981, Indiana University
 MAY, PETER J. * 1986; PhD, 1979, University of California (Berkeley)
 MAYERFELD, JASON, 1991; PhD, 1992, Princeton University
 MC CANN, MICHAEL W, 1982; PhD, 1983, University of California (Berkeley)
 MC CRONE, DONALD J. * 1982; PhD, 1966, University of North Carolina
 MERCER, JONATHAN L., 1996; PhD, 1993, Columbia University
 PARKER, CHRISTOPHER S, 2006; PhD, 2001, University of Chicago
 PRAKASH, ASEEM, 2002; PhD, 1997, Indiana University
 SMITH, MARK A., 1997; PhD, 1997, University of Minnesota
 TAYLOR, MICHAEL JOHN * 1985; PhD, 1976, University of Essex (UK)
 WILKERSON, JOHN D, 1990; PhD, 1991, University of Rochester

Associate Professors

ADOLPH, CHRISTOPHER A, 2004; PhD, 2005, Harvard University
 CICHOWSKI, RACHEL A, 2001; PhD, 2001, University of California (Irvine)
 DI STEFANO, CHRISTINE, 1985; PhD, 1984, University of Massachusetts
 KIER, ELIZABETH L., 1998; PhD, 1992, Cornell University
 LITFIN, KAREN T, 1991; PhD, 1992, University of California (Los Angeles)
 MENALDO, VICTOR A., 2009; PhD, 2009, Stanford University
 THORPE, REBECCA U, 2010; PhD, 2009, University of Maryland
 TURNER III, JACK, 2007; PhD, 2006, Princeton University
 WALLACE, GEOFFREY P, 2016; PhD, 2010, Cornell University
 WALLACE, SOPHIA J, 2016; PhD, 2010, Cornell University
 WHITING, SUSAN H., 1994; PhD, 1995, University of Michigan

Assistant Professors

AINSLEY, CAITLIN T, 2016; PhD, 2016, Emory University
 ARNOLD, JEFFREY B., 2014; PhD, 2014, University of Rochester
 FRANCIS, MEGAN M, 2014; PhD, 2008, Princeton University
 LONG IV, JAMES D, 2012

Psychology

Professors

AYLWARD, ELIZABETH H., 2000; PhD, 1982, Cornell University
 BAER, JOHN S., 1985; PhD, 1986, University of Oregon
 BARASH, DAVID P, 1975; PhD, 1970, University of Wisconsin (Madison)
 BASSOK, MARIA, 1997; PhD, 1984, Hebrew University (Israel)
 BEECHER, MICHAEL D, 1978; PhD, 1970, Boston University
 BERNSTEIN, ILENE L * 1986; PhD, 1972, University of California (Los Angeles)
 BOYNTON, GEOFFREY M, 2006; PhD, 1994, University of California (Santa Barbara)

 STONE, WENDY L, 2009; PhD, 1981, University of Miami (Florida)
 ZOELLNER, LORI A, 2000; PhD, 1997, University of California (Los Angeles)

Associate Professors

BEAUCHAINE, THEODORE P, 2000; PhD, 2000, State University of New York (Stony Brook)
 BRICKER, JONATHAN B., 2005; PhD, 2003, University of Washington
 BROWN, JONATHAN D, 1989; PhD, 1986, University of California (Los Angeles)
 CHERYAN, SAPNA, 2007; PhD, 2007, Stanford University
 COFFMAN, SANDRA J, 2000; PhD, 1978, University of Washington
 DORSEY, SHANNON, 2007; PhD, 2003, University of Georgia
 FALLON, MARY PAT, 2000; PhD, 1983, University of Washington
 FEHRENBACH, PETER A, 2000; PhD, 1981, University of Missouri
 FLAHERTY, BRIAN P, 2005; PhD, 2003, Pennsylvania State University
 HA, RENEE L., 1992; PhD, 1999, University of Washington
 JOSLYN, SUSAN L., 1988; PhD, 1995, University of Washington
 KANTER, JONATHAN W, 1995; PhD, 2002, University of Washington
 KENNEY, NANCY J, 1976; PhD, 1974, University of Virginia
 KERR, F BETH * 1984; PhD, 1974, University of Oregon; MS, 1968, University of North Carolina
 KING, KEVIN M, 2007; PhD, 2007, Arizona State University
 KUSCHE, CAROL A, 2000; PhD, 1984, University of Washington
 MCLAUGHLIN, KATIE A, 2012; PhD, 2008, Yale University
 MIYAMOTO, JOHN M., 1984; PhD, 1985, University of Michigan
 MURRAY, SCOTT O., 2005; PhD, 2002, University of California (Davis)
 OLSON, KRISTINA R, 2012; PhD, 2008, Harvard University
 PAIGE, ALBERT B, 1999; PhD, 1962, University of Kansas
 PRAT, CHANTEL, 2010; PhD, 2004, University of California (Davis)
 REPACHOLI, BETTY M, 2001; PhD, 1996, University of California (Berkeley)
 ROSE, RICHARD M * 1991; PhD, 1964, University of Pennsylvania
 TRACY, JAMES J, 2000; PhD, 1971, University of Connecticut

Assistant Professors

ALLMON, DOUGLAS J., 2000; PhD, 1981, University of Washington
 AMBINDER, MICHAEL S, 2010; PhD, 2008, University of Illinois
 BENTSON, KATHLEEN L, 2007; PhD, 1997, University of Washington
 BERNSTEIN, DANIEL M, 2001; PhD, 2001, Simon Fraser University, B.C. (Canada)
 BREWER, DEVON, 2000; PhD, 1994, University of California (Irvine)
 CATZ, SHERYL L., 2003; PhD, 1997, Louisiana State University
 CLANCY, STEPHEN L, 2000; PhD, 1981, University of Washington
 CROCKETT, CAROLYN M, 2000; PhD, 1971, University of Washington
 DAVIS, MARTHA WHITFIELD, 1998; PhD, 1988, Vanderbilt University
 ELLIS, BEATRICE B., 1990; PhD, 1990, University of Minnesota
 FINOCCHIO, DOM V, 1999; PhD, 1954, University of Pittsburgh
 GIRE, DAVID HENRY, 2014; PhD, 2009, University of Colorado (Denver)
 HERMAN-DUNN, RUTH A., 2000; PhD, 1993, University of Florida
 HILL, DEBORAH L., 2000; PhD, 1992, University of Washington
 HORIKE, JANIS T, 2000; PhD, 1976, Rutgers University
 KUO, JANICE R, 2013; PhD, 2007, University of Washington
 LEICHMAN, GLENN A, 2000; PhD, 1976, London School of Economics (UK)

LEONESIO, R. JACOB, 1987; PhD, 1993, University of Washington
 LEU, JANXIN, 2006; PhD, 2004, University of Michigan
 MALAHY, LORI WU SZ-HWEI, 2015; PhD, 2012, University of Washington
 MANGELSDORF, CAROLYN, 2000; PhD, 1993, University of Minnesota
 MARMOR, LISA KAHAN, 1994; PhD, 1986, University of California (Los Angeles)
 MARSHALL, KAROL A, 2000; PhD, 1973, University of Washington
 MCCURRY, CHRISTOPHER, 2000; PhD, 1994, University of Nevada
 NYMAN, BARRY A, 2000; PhD, 1965, University of Washington
 OLSON, BRUCE A., 2001; PhD, 1981, California School of Professional Psychology
 PETERSON, GERALD L, 2000; PhD, 1971, Louisiana State University
 PLAKS, JASON E., 2001; PhD, 2000, Columbia University
 RADANT, SUSAN C, 2000; PhD, 1985, California School of Professional Psychology
 REYNOLDS, SARAH K, 1999; PhD, 1999, University of Iowa
 SALUSKY, SHEPPARD A, 2000; PhD, 1984, University of Washington
 SEDLINS, MARA P, 2013; PhD, 2012, University of Washington
 SNYDER-MACKLER, NOAH, 2016; PhD, 2012, University of Pennsylvania
 STOCCO, ANDREA, 2010; PhD, 2005, University of Trieste (Italy)
 TENG, LI NEAL, 2000; PhD, 1982, University of Washington
 WOOD, JASON D, 2007; PhD, 2003, University of California (Davis)
 WORLEIN, JULIE M., 1986; PhD, 1993, University of Washington
 WRIGHT, PRISCILLA W., 2000; PhD, 1987, State University of New York (Stony Brook)

Senior Lecturers

CHUN, DEBORAH Y, 1987; PhD, 1993, University of Washington
 PASSER, MICHAEL W, 1977; PhD, 1977, University of California (Los Angeles)

Lecturers

BOLDAN, JOSEPH, 2003; BA, 1974, University of Washington
 CULLIGAN, ANN E., 1999; PhD, 2006, University of Washington
 GRAHAM, LAUREN KATHLEEN, 2006; PhD, 2012, University of Washington
 LOESCHE, PATRICIA, 1979; PhD, 1991, University of Washington
 MCNICHOLS, NICOLE K, 2004; PhD, 2009, University of Washington
 NELSON, DANA C, 1993; PhD, 2005, University of Washington
 SPECTOR, JACQUELINE, 1993; PhD, 2005, University of Washington
 TUROWSKI, TABITHA KIRKLAND, 2016; PhD, 2015, Ohio State University-Main Campus

Scandinavian Studies

Professors

GAVEL ADAMS, ANN-CHARLOTTE, 1986; PhD, 1990, University of Washington
 HJORT, METTE, 2008; PhD, 1989, Ecole des Hautes Etudes en Sciences Sociales, Paris
 INGEBRITSEN, CHRISTINE, 1992; PhD, 1993, Cornell University
 KELERTAS, VIOLETA KRISTINA, 2008; PhD, 1984, University of Wisconsin (Madison)
 LEIREN, TERJE I, 1977; PhD, 1978, North Texas State University
 NESTINGEN, ANDREW, 1997; PhD, 2001, University of Washington
 ROSSEL, SVEN H * 2000; PhD, 1968, University of Copenhagen (Denmark)
 SJAVIK, JAN * 1982; PhD, 1979, Harvard University
 STECHER, MARIANNE T, 1988; PhD, 1990, University of California (Berkeley)
 STEENE, BIRGITTA * 1990; PhD, 1966, University of Uppsala (Sweden)

Associate Professors

BERGUSON, CLAUDIA J., 2014; PhD, 2003, University of Washington
 GRADEN, LIZETTE, 2012; PhD, 2003, University of Stockholm (Sweden)

HANSON, KATHERINE J., 1999; PhD, 1978, University of Washington
 REES, ELLEN R., 2014; PhD, 1995, University of Washington
 SEHMSDORF, HENNING K * 1994; PhD, 1968, University of Chicago
 SMIDCHENS, GUNTIS I., 1993; PhD, 1996, Indiana University

Assistant Professors

GARBES, HEATHER M., 2016; DMA, 2008, University of Washington
 GUNN, OLIVIA N, 2014; PhD, 2012, University of California (Irvine)
 LARSON, KATHERINE LOUISE, 2014; PhD, 2011, University of Washington
 LUND, JENS, 2000; PhD, 1983, Indiana University
 MAGNUSSON, BRIAN, 2000; PhD, 1988, University of Wisconsin (Madison)
 NORLEN, PAUL R, 2000; PhD, 1995, University of Washington
 PURS, ALDIS, 2006; PhD, 1998, University of Toronto (Canada)
 STOLEN, MARIANNE, 2000; PhD, 1990, University of Washington

Senior Lecturer

DUBOIS, IA G, 1989; PhD, 1991, University of Washington

Lecturers

GRINBERGA, IVETA, 2004; MS, 2000, University of Latvia
 IVASKA, ILMARI T., 2010; MA, 2009, University of Turku, Finland
 JENNER, LARS B., 1988; PhD, 1999, University of Pennsylvania

Slavic Languages and Literatures

Professors

AUGEROT, JAMES E., 1982; PhD, 1968, University of Washington
 CRNKOVIC, GORDANA, 1993; PhD, 1993, Stanford University
 DIMENT, GALYA, 1989; PhD, 1987, University of California (Berkeley)
 DZIWIWREK, KATARZYNA A., 1993; PhD, 1991, University of California (San Diego); MA, 1984, University of Illinois
 KAPETANIC, DAVOR * 1993; PhD, 1972, University of Zagreb (Croatia)

Associate Professors

ALANIZ, JOSE, 2003; PhD, 2003, University of California (Berkeley)
 COATS, HERBERT S * 1981; PhD, 1970, University of Illinois
 EKELTCHIK, SERGUEI, 2009; PhD, 2000, University of Alberta, Canada
 HENRY, BARBARA J, 2003; DPhil, 1997, Oxford University (UK)
 WEST, JAMES D, 1972; PhD, 1970, University of Cambridge (UK)

Senior Lecturers

HOLDSWORTH, NORA, 1999; BA, 1965, University of Washington
 POLACK, ZOYA M, 1973; MA, 1975, University of Washington
 ZAITSEVA, VALENTINA A, 2005; PhD, 1992, Harvard University

Lecturers

ABRAMOVA, SVETLANA, 2012; PhD, 2007, Moscow Pedagogical Institute
 CHILDS, MARY, 2000; PhD, 2012, University of Washington
 SOLDANOVA, JAROSLAVA M., 2000; MA, 1977, Palackeho University, Czech Republic

Sociology

Professors

BURSTEIN, PAUL * 1985; PhD, 1974, Harvard University
 CAMPBELL, FREDERICK L * 1982; PhD, 1967, University of Michigan
 COSTNER, HERBERT L * 1996; PhD, 1960, Indiana University
 CROWDER, KYLE, 1988; PhD, 1997, State University of New York (Albany)
 CRUTCHFIELD, ROBERT D * 1998; PhD, 1980, Vanderbilt University
 GUEST, AVERY * 1982; PhD, 1970, University of Wisconsin (Madison)
 HARGENS, LOWELL L, 2002; PhD, 1971, University of Wisconsin (Madison)
 HARRIS, ALEXES, 1995; PhD, 2002, University of California (Los Angeles)
 HECHTER, MICHAEL N. * 1999; PhD, 1972, Columbia University
 HERTING, JERALD R., 1996; PhD, 1987, University of Washington
 HIRSCHMAN, CHARLES, 1987; PhD, 1972, University of Wisconsin (Madison)
 HOWARD, JUDITH A, 1982; PhD, 1982, University of Wisconsin (Madison)
 KISER, EDGAR VANCE, 1988; PhD, 1987, University of Arizona
 LASLETT, BARBARA, 2004; PhD, 1969, University of Washington
 MARX, GARY T., 2000; PhD, 1966, University of California (Berkeley)
 MATSUEDA, ROSS L., 1998; PhD, 1984, University of California (Santa Barbara)
 MORRIS, WANDA MARTINA, 2000; PhD, 1989, University of Chicago
 OPP, KARL-DIETER, 2003; PhD, 1967, University of Cologne (Germany)
 PFAFF, STEVEN J., 1999; PhD, 1999, New York University
 RESKIN, BARBARA F, 2002; PhD, 1973, University of Washington
 SCHMITT, DAVID R * 1981; PhD, 1963, Washington University
 SCHWARTZ, PEPPER J, 1972; PhD, 1974, Yale University
 SCOTT, JOSEPH W * 1985; PhD, 1963, Indiana University
 STOVEL, KATHERINE W., 1997; PhD, 1999, University of North Carolina
 TOLNAY, STEWART E, 2000; PhD, 1981, University of Washington
 VAN DEN BERGHE, PIERRE * 1998; PhD, 1960, Harvard University; MA, 1953, Stanford University
 WAGER, L WESLEY * 1993; PhD, 1959, University of Chicago
 WEIS, JOSEPH G * 1987; DCrim, 1974, University of California (Berkeley)

Associate Professors

BRINES, JULIE E., 1993; PhD, 1990, Harvard University
 LEE, HEDWIG E, 2009; PhD, 2009, University of North Carolina
 ROSENFELD, JAKE H, 2007; PhD, 2007, Princeton University
 ZAGHENI, EMILIO, 2014; PhD, 2010, University of California (Berkeley)

Assistant Professors

AGNONE, JON-JASON M, 2015
 BURT, CALLIE, 2015; PhD, 2009, University of Georgia
 CUBBINS, LISA, 2001; PhD, 1992, University of Washington
 DECHTER, AIMEE, 2008; PhD, 1991, University of Pennsylvania
 EGER, MAUREEN A., 2006; PhD, 2010, University of Washington
 FLORES, RENE D, 2016; PhD, 2014, Princeton University
 GONZALES, ROBERTO, 2008; PhD, 2008, University of California (Irvine)
 JACKSON, J. ELIZABETH, 2013; PhD, 2010, University of Washington
 MAROTO, MICHELLE, 2012; PhD, 2012, University of Washington
 MELBER, BARBARA, 2000; PhD, 1974, University of Chicago
 MULCAHY, MICHAEL J., 2007; PhD, 2004, University of Arizona; MA, 1993, Ruhr Universität Bochum (Germany)
 QUINN, SARAH L, 2010; PhD, 2010, University of California (Berkeley)
 SCHOENBERG, RONALD J., 2000; PhD, 1975, University of Washington

Senior Lecturer

PITCHFORD, SUSAN, 1987; PhD, 1994, University of Washington

Lecturer

DILLARD, KARA N., 2014; PhD, 2011, Kansas State University

Spanish and Portuguese Studies

Professors

ANDERSON, FARRIS FURMAN * 1981; PhD, 1968, University of Wisconsin

GEIST, ANTHONY L, 1987; PhD, 1978, University of California (Berkeley)

O'HARA, EDGAR, 1989; PhD, 1989, University of Texas

RAFTERY, ANA M, 2012; PhD, 1991, University of California (Berkeley)

Associate Professors

FERNANDEZ DOBAO, ANA M., 2007; PhD, 2005, University of Santiago, Spain

GILBERT, DONALD W., 2002; PhD, 1997, University of California (Berkeley)

MERCER, LEIGH K., 2005; PhD, 2004, Boston University

PETERSEN, SUZANNE HELEN, 1973; PhD, 1976, University of Wisconsin (Madison)

SHIPLEY, GEORGE A * 1967; PhD, 1967, Harvard University

Assistant Professor

ROBLES RIVERA, JOSE F., 2016; PhD, 2012, El Colegio de Mexico (Colmex)

Senior Lecturer

RANEDA CUARTERO, MARIA I., 1997; MA, 1994, University of Wisconsin (Madison)

Lecturers

BODDEN, RODNEY V., 1996; PhD, 1969, University of Wisconsin (Madison)

FOX, JOAN H., 1999; MA, 1973, University of British Columbia (Canada)

GONZALEZ, JORGE, 1988; MA, 1986, University of Wisconsin

JAFFEE, SAMUEL J, 2013; PhD, 2013, University of California (Irvine)

MEDIAVILLA, MARIA, 2006; MA, 2000, University of Madrid, Spain

RUEDA MESA, ANTONIO, 2016; PhD, 2012, Tulane University

SILVA, EDUARDO VIANA DA, 2015; PhD, 2014, University of California (Santa Barbara)

SPANNAGEL, SABRINA, 2006; MA, 1995, University of Montana

VILLANUEVA CHAVEZ, JUDITH, 2014; PhD, 2009, University of California (Irvine)

Speech and Hearing Sciences

Professors

COGGINS, TRUMAN E, 1974; PhD, 1976, University of Wisconsin (Madison)

EADIE, TANYA L, 2003; PhD, 2003, University of Western Ontario (Canada)

ESTES, ANNETTE M, 1991; PhD, 1998, University of Washington

FOLSOM, RICHARD C, 1976; PhD, 1979, University of Washington

IMADA, TOSHIAKI, 2002; PhD, 1976, University of Tokyo (Japan)

KENDALL, DIANE L., 2008; PhD, 1999, University of Pittsburgh

KUHL, PATRICIA K., 1976; PhD, 1973, University of Minnesota

LUSCHEI, ERICH S, 2005; PhD, 1968, University of Washington

MINIFIE, FRED D * 1998; PhD, 1963, University of Iowa

OLSWANG, LESLEY B. * 1985; PhD, 1978, University of Washington

PRINS, DAVID * 1992; PhD, 1961, University of Michigan
 STOEL-GAMMON, CAROL, 1983; PhD, 1974, Stanford University
 TREMBLAY, KELLY L, 1998; PhD, 1998, Northwestern University
 WERNER, LYNNE A., 1986; PhD, 1980, Loyola University
 WILSON, WESLEY * 1994; PhD, 1969, University of Washington

Associate Professors

BIERER, JULIE A, 2005; PhD, 2001, University of Michigan
 BURNS, EDWARD M. * 1986; PhD, 1977, University of Minnesota
 CARPENTER, ROBERT L * 1981; PhD, 1969, Northwestern University
 COOKER, HARRY S * 1993; PhD, 1963, University of Iowa
 LEE, ADRIAN K, 2011; DSc, 2007, Massachusetts Institute of Technology
 MAX, LUDO, 2009; PhD, 2000, Kent State University
 MOON, CHRISTINE M., 2000; PhD, 1985, Columbia University
 SHAPLEY, JAMES L, 1986; PhD, 1954, University of Iowa
 SPENCER, KRISTIE, 1999; PhD, 2003, University of Washington

Assistant Professors

KOVER, SARA T, 2014; PhD, 2012, University of Wisconsin (Madison)
 LOCKE, JILL J, 2015; PhD, 2010, University of California (Los Angeles)
 MADDEN, ELIZABETH B, 2013; MS, 2009, Vanderbilt University
 PACE, AMY E, 2016; PhD, 2013, University of California (San Diego)
 PETER, BEATE, 2007; PhD, 2006, University of Washington; MA, 1981, Justus-Liebig University (Germany)
 POMPON, REBECCA, 2008; PhD, 2013, University of Washington
 SILKES, JOANN P., 2004; PhD, 2009, University of Washington
 WINN, MATTHEW B, 2015; PhD, 2011, University of Maryland
 YEATMAN, JASON, 2014; PhD, 2014, Stanford University

Senior Lecturers

DOWDEN, PATRICIA A, 1981; PhD, 1992, University of Washington
 DUNLAP, JULIE A., 1992; MS, 1995, University of Washington
 HARNEY, MARTHA L., 1988; MS, 1984, University of Washington
 ILLICH, LISA L, 2006; MS, 1992, University of Montana
 LABIAK, JAMES M, 1999; MA, 1971, University of Washington
 MILLER, ROBERT M, 1982; PhD, 1976, University of Washington
 NEVDAHL, MARTIN, 1993; MS, 1984, University of Washington
 SANBORN, E SUE, 1988; PhD, 1971, University of Washington
 STONE-GOLDMAN, JUDITH R, 2000; PhD, 1986, University of Washington

Lecturers

ANDERSON, SUSAN J, 2007; Artist Diploma, 2005, Pennsylvania College of Optometry
 BURNS, MICHAEL I, 2008; PhD, 2013, University of Washington
 GRAY, JENNIFER, 2011; AuD, 2009, Arizona School of Health Sciences
 MILLER, CHRISTI W., 2007
 SNOW, LAURA A., 1995; PhD, 2007, University of Washington
 THORNE, JOHN C, 2003; PhD, 2010, University of Washington; MA, 1989, New Mexico State University

Statistics

Professors

BOOKSTEIN, FRED L, 2005; PhD, 1977, University of Michigan
 DRTON, MATHIAS, 2001; PhD, 2004, University of Washington

GNEITING, TILMANN J., 2000; PhD, 1997, Bayreuth University (Germany)
 GOTTARDO, RAPHAEL, 2010; PhD, 2005, University of Washington
 GUTTORP, PETER, 1980; PhD, 1980, University of California (Berkeley)
 HANDCOCK, MARK S., 2000; PhD, 1989, University of Chicago
 HOFF, PETER D, 2000; PhD, 2000, University of Wisconsin
 LONGINI, IRA M., 2006; PhD, 1977, University of Minnesota
 MASON, DAVID M, 2000; PhD, 1977, University of Washington
 MEEK, CHRISTOPHER, 2010; PhD, 1996, Carnegie Mellon University

 CHING, FRANCIS D.K, 1985; BArch, 1966, University of Notre Dame
 FINROW, JERRY V. * 1995; MArch, 1968, University of California (Berkeley)
 HILDEBRAND, GRANT, 1976; MArch, 1964, University of Michigan
 JACOBSON, PHILLIP L, 1991; MArch, 1969, Finnish Institute of Technology
 KASPRISIN, RONALD J. * 1995; MUP, 1968, University of Washington
 KOLB, KEITH R, 1990; MArch, 1950, Harvard University
 LOVELAND, JOEL E., 1986; MArch, 1980, University of California (Los Angeles)
 LOVETT, WENDELL H, 1981; MArch, 1948, Massachusetts Institute of Technology
 MILLER, DAVID E., 1989; MArch, 1972, University of Illinois
 MILLET, MARIETTA * 1983; MArch, 1972, Massachusetts Institute of Technology
 OCHSNER, JEFFREY K, 1987; MArch, 1976, Rice University
 OSHIMA, KEN T, 2005; PhD, 2003, Columbia University; MPHIL, 1998, Columbia University
 PRAKASH, VIKRAMADITYA, 1996; PhD, 1994, Cornell University; MA, 1989, Cornell University
 PYATOK, MICHAEL * 1990; MArch, 1967, Harvard University
 SMALL, ROBERT, 1965; MArch, 1955, University of Oregon
 STREISSGUTH, DANIEL M, 1955; MArch, 1949, Massachusetts Institute of Technology
 SUTTON, SHARON E. * 1998; PhD, 1982, City University of New York; MA, 1982, City University of New York; MArch, 1973, Columbia University

Associate Professors

ALBRECHT, ROBERT G * 1996; MSCE, 1960, Massachusetts Institute of Technology
 ANDERSON, ALEX THOMAS, 1998; PhD, 1997, University of Pennsylvania; MS, 1995, University of Pennsylvania
 BORYS, ANN MARIE, 2006; PhD, 1998, University of Pennsylvania; MArch, 1988, Syracuse University
 COHAN, PETER SCOTT, 1989; MArch, 1984, University of Washington; MFA, 1977, Northern Illinois University
 CORSER, ROBERT J, 2008; MADes, 2003, Harvard University; MArch, 1993, University of Virginia
 DEINES, KATRINA, 1985; MArch, 1979, University of Washington; MA, 1975, University of Minnesota
 DONNETTE, JAMES J * 1997; MArch, 1969, University of Washington
 GRIGGS, JAMES KIMO SAFFORD, 2008; MArch, 1984, Yale University
 HEERWAGEN, DEAN REESE, 1975; MArch, 1971, Massachusetts Institute of Technology; MS, 1967, Massachusetts Institute of Technology
 HEERWAGEN, JUDITH, 2000; PhD, 1982, University of Washington
 HUBER, NICOLE, 2005; MArch, 2001, Universität Der Künste, Berlin
 HUPPERT, ANN C, 2008; PhD, 2001, University of Virginia; MA, 1992, University of Virginia
 IAROCCHI, LOUISA M, 2004; PhD, 2003, Boston University; MA, 1994, Washington University
 INANICI, MEHLIKA, 2005; PhD, 2004, University of Michigan; MSC, 2002, University of Michigan
 JOHNSON, BRIAN ROBERT, 1978; MArch, 1981, University of Washington
 JONES, SUSAN H., 1991; MArch, 1988, Harvard University
 LATOURELLE, ELAINE DAY * 1981; MArch, 1964, Yale University
 LEBERT, EDGAR A, 1981; MS, 1967, University of Washington
 MCLAREN, BRIAN, 2001; PhD, 2001, Massachusetts Institute of Technology; MSC, 1986, Columbia University
 MEEK, CHRISTOPHER, 2001; MArch, 2002, University of Washington
 MERLINO, KATHRYN ROGERS, 1999; MArch, 1999, University of Virginia

MINAH, GALEN F, 1970; MArch, 1968, University of Pennsylvania
 MOHLER, RICHARD ERNEST J, 1986; MArch, 1984, University of Pennsylvania
 PENA, ROBERT BERNARD, 2007; MArch, 1987, University of California (Berkeley)
 PROKSCH, GUNDULA, 2008; MArch, 2000, Cornell University; DipArch, 1997, Tech University of Braunschweig(Germany)
 SASANOFF, ROBERT * 1997; MCP, 1968, University of California (Berkeley)
 SIMONEN, KATHRINA L, 2009; MArch, 1992, University of California (Berkeley); MS, 1991, University of California (Berkeley)
 SRDAR, BORIS, 2015; MDS, 1990, Harvard University

Assistant Professors

BURPEE, HEATHER, 2005; MArch, 2008, University of Washington
 GOLDEN, ELIZABETH M, 2009; MSActg, 1994, Columbia University
 HUTCHISON, ROBERT, 1995; MArch, 1996, University of Washington
 SPRAGUE, TYLER S, 2004; PhD, 2013, University of Washington; MS, 2006, University of Washington
 STRAUSS, DAVID M., 1991; PhD, 1999, University of Pennsylvania; MS, 1992, University of Pennsylvania

Senior Lecturers

NICHOLLS, JAMES KEITH, 1995; BArch, 1986, University of British Columbia (Canada)
 ONOUE, BARRY S * 2000; MSCE, 1969, University of Washington
 VANAGS, ANDRIS, 1999; BFA, 1968, University of Washington
 ZUBERBUHLER, DOUGLAS, 2000; MArch, 1968, University of Washington

Lecturers

BARADARAN MOHAJERI, SHIMA, 2014; PhD, 2013, Texas A&M University; MSC, 2003, Islamic Azad University (Tehran)
 DEE, JENNIFER, 1982; MArch, 1984, University of Washington
 GREGGA, KAILIN, 2000; MArch, 2007, Parsons School of Design
 HUDACEK, DAVID J, 1985; MArch, 1988, University of Washington
 MILLER, JESSICA L, 2008; MA, 2009, University of Washington
 PHAM, NGON KIM, 1990; MArch, 1987, University of Washington
 RISKE, CASEY J, 2011; BArch, 1984, North Dakota State University
 STETTLER, DANIEL D, 2004; MA, 1993, University of Oregon
 WEST, PENELOPE, 1995; MArch, 2001, University of Washington
 WONG, GAIL, 1991; MArch, 1987, University of Washington

Construction Management

Professors

BENDER, WILLIAM J, 2014; PhD, 2000, University of Maryland; MSCE, 1989, Oregon State University
 DANIALI, SAEED, 1997; PhD, 1975, University of Lille (France); MSCE, 1972, Strasbourg School for Water and Environment Engineering (France)
 DOSSICK, CARRIE S, 2005; PhD, 2001, Columbia University; MS, 1998, Columbia University
 SCHAUFELBERGER, JOHN E., 1994; PhD, 1971, University of Illinois; MSCE, 1970, University of Illinois

Associate Professors

ABDEL AZIZ, AHMED, 2002; PhD, 2000, University of British Columbia (Canada); MSC, 1992, Zagazig University (Egypt)
 GOLDBLATT, STEVEN M, 1982; JD, 1977, Golden Gate University
 KIM, YONG-WOO, 2007; PhD, 2002, University of California (Berkeley); MS, 1999, University of California (Berkeley)
 LIN, KEN-YU, 2008; PhD, 2005, University of Illinois (Urbana); MS, 1999, National Taiwan University
 MIGLIACCIO, GIOVANNI C, 2010; PhD, 2007, University of Texas (Austin); MS, 2007, University of Texas (Austin)
 NEMAT, KAMRAN M., 1998; PhD, 1994, University of California (Berkeley); MCP, 1989, University of California (Berkeley); MS, 1982, University of California (Irvine)
 TORRENCE, GERARD R, 1988; MS, 1950, Massachusetts Institute of Technology

Assistant Professors

EL-ANWAR, OMAR HOSSAM, 2009; PhD, 2009, University of Illinois (Urbana); MSC, 2005, Cairo University (Egypt)
LEE, HYUN WOO, 2016; PhD, 2012, University of California (Berkeley); MSEN, 2004, University of California (Berkeley)

Senior Lecturer

HOLM, ARNOLD L., 1993; MSC, 2005, University of Washington

Lecturers

BJORK, LARRY D, 2011; BS, 1969, University of Washington
NYROP, KARIN, 1997; JD, 1984, University of Puget Sound
SHAIMAN, JAMES L, 2005; MS, 2007, University of Washington

Landscape Architecture

Professors

BUCHANAN, ROBERT T * 1990; MLA, 1956, Harvard University
HAAG, RICHARD, 1997; MLArch, 1952, Harvard University
HOU, JEFFREY, 2001; PhD, 2001, University of California (Berkeley); MArch, 1994, University of California (Berkeley)
JONES, GRANT R, 2003; MLA, 1966, Harvard University
ROTTLE, NANCY D, 2001; MLA, 1987, University of Oregon
SCHAUMAN, SALLY * 1991; MS, 1971, University of Michigan
STREATFIELD, DAVID C * 1981; MLA, 1965, University of Pennsylvania; DipArch, 1956, Brighton College of Arts
WAY, THAISA, 2007; PhD, 2005, Cornell University; MArch, 1991, University of Virginia
WINTERBOTTOM, DANIEL M., 1993; MLA, 1988, Harvard University

Associate Professors

HELAND-MITTELETTE, LAURE, 2015; PhD, 2008, Institut National Polytechnique, (France); MS, 1994, University of Paris Sud XI (France)
HORNER, RICHARD R. * 2000; PhD, 1978, University of Washington; MD, 1966, University of Pennsylvania
JOHNSON, JULIE M, 1995; MCP, 1988, Massachusetts Institute of Technology
MANZO, LYNNE C, 2001; PhD, 1994, City University of New York; MA, 1988, City University of New York
ROBERTSON, IAIN M, 1982; MLA, 1975, University of Pennsylvania
SPENCER, BENJAMIN R, 2008; MLA, 2004, University of Virginia
YOCOM, KENNETH P, 2000; PhD, 2007, University of Washington; MLA, 2002, University of Washington

Assistant Professors

BICKNELL, LYLE T, 2014; BA, 1987, University of Washington
DIERS, JAMES ALAN, 2003; BA, 1975, Grinnell College
GASTIL, RAYMOND W, 2010; MArch, 1991, Princeton University
WATSON, JERRY A., 2012; MLA, 2002, University of Washington

Senior Lecturer

PARRETT, JULIE L, 2002; MLA, 1997, University of Pennsylvania

Lecturers

CONGDON, ROARK T, 2009; MS, 2013, University of Washington; MFA, 2005, Washington State University
FLECKENSTEIN, JAMES A, 1999; BLArch, 2000, University of Washington
LEWIS, MICHAEL A, 2009; MLA, 2010, University of Washington
UMBANHOWAR, ELIZABETH A, 2000; MLA, 2007, University of Washington

Urban Design and Planning

Professors

ALBERTI, MARINA, 1996; PhD, 1992, Massachusetts Institute of Technology
 BELL, EARL J * 1999; PhD, 1965, University of California (Berkeley)
 BLANCO, HILDA J. * 1996; PhD, 1989, University of California (Berkeley)
 DANNENBERG, ANDREW, 2009; MD, 1979, Stanford University
 DERMISI, SOFIA, 2014; PhD, 2002, Harvard University; Diploma, 1998, University of Thessaly (Greece)
 LINDELL, MICHAEL K, 2014; PhD, 1975, University of Colorado (Boulder)
 LUDWIG, RICHARD L * 1981; PhD, 1971, University of Pittsburgh
 MILLER, DONALD H, 1970; PhD, 1972, University of California (Berkeley)
 MUGERAUER, ROBERT, 2000; PhD, 1973, University of Texas (Austin)
 PURCELL, MARK H., 1999; PhD, 1998, University of California (Los Angeles)
 SHEN, QING, 2009; PhD, 1993, University of California (Berkeley)
 STEVENSON, SIMON A W, 2016; PhD, 1997, University College of Dublin (Ireland)
 UNTERMANN, RICHARD K, 1997; MLA, 1967, Harvard University
 VERNEZ-MOUDON, ANNE * 1985; ScD, 1987, Ecole Polytechnique Federale De Lausanne
 WAGNER, FREDRICK W., 2001; PhD, 1974, University of Washington

Associate Professors

ABRAMSON, DANIEL B, 2001; PhD, 1998, Tsinghua University (China); MCP, 1992, Massachusetts Institute of Technology
 BAE, CHRISTINE, 1996; PhD, 1994, University of Southern California
 BORN, BRANDEN M, 2003; PhD, 2003, University of Wisconsin (Madison)
 CHALANA, MANISH, 2004; PhD, 2005, University of Colorado; MArch, 1995, School of Planning & Architecture (India)
 ROLFE, GEORGE R, 1987; MArch, 1968, University of Pennsylvania
 RYAN, DENNIS M * 1981; PhD, 1976, University of Pennsylvania
 TOVAR, JOSEPH W, 2003; MUP, 1979, University of Washington
 TURNER, RONALD C, 2005; BA, 1953, Pratt Institute
 WESTERLUND, FRANK, 1971; PhD, 1977, University of Washington
 WHITTINGTON, JANICE M, 2005; PhD, 2008, University of California (Berkeley)
 WOLFE, CHARLES R., 1999; JD, 1984, University of Oregon

Assistant Professors

BERNEY, RACHEL E., 1992; PhD, 2008, University of California (Berkeley)
 CURRY, MARTY, 2004; MUP, 1973, University of Washington
 GROVER, HIMANSHU, 2014; PhD, 2010, Texas A&M University
 HURVITZ, PHILIP M., 1992; PhD, 2010, University of Washington
 MEISNER, JENNIFER A., 2001; MArch, 1994, University of Washington

Senior Lecturers

CAMPBELL, CHRISTOPHER D, 2000; PhD, 2002, University of California (Los Angeles)
 FREITAG, ROBERT C, 1999; MUP, 1969, University of Washington

School of Business

Accounting

Professors

BOWEN, ROBERT M, 1978; MBA, 1971, Washington University

BURGSTAHLER, DAVID C, 1980
 DUKES, ROLAND E * 1981; MBA, 1970, Stanford University
 HEATH, LOYD C * 1998; MBA, 1953, Northwestern University
 HODGE, FRANK D, 2000; MBA, 1996, Indiana University
 JIAMBALVO, JAMES, 1977; MAS, 1973, University of Illinois
 JOLLINEAU, SUSAN JANE, 1998; MBA, 1977, University of Alberta, Canada
 MATSUMOTO, DAWN A., 1993
 MCVAY, SARAH E, 2012
 MUELLER, GERHARD G * 1996; MBA, 1957, University of California (Berkeley)
 NOREEN, ERIC W * 1981; MBA, 1974, Stanford University
 PALMROSE, ZOE-VONNA, 2011; MBA, 1978, University of Washington
 RAMANATHAN, K V * 1982; MBA, 1962, Northwestern University
 SEFCIK, STEPHAN E, 1986; MAS, 1976, University of Illinois
 SHEVLIN, TERRENCE J, 1996; MA, 1981, Monash University (Australia)
 SUNDEM, GARY L * 1981; MBA, 1969, Stanford University

Associate Professors

GE, WEILI, 2006; MBA, 2001, Washington University
 SHORES, DONNA J, 1986; MS, 1980, University of Wisconsin (Madison)

Assistant Professors

BLACKBURNE, TERRENCE P, 2014; MA, 2003, Stanford University
 CURTIS, ASHER B, 2012; MCom, 2003, University of New S. Wales (Australia)
 DEHAAN, EDUARD, 2008; MA, 2008, San Francisco State
 DEMERJIAN, PETER R, 2013; MBA, 2002, College of William and Mary
 GRANT, STEPHANIE, 2016
 PATRICK, PAIGE H, 2013
 QUINN, PHILLIP J, 2014
 SHAIKH, SARAH, 2015; MA, 2005, Ohio State University

Senior Lecturers

GILLICK, JAMES V., 1986
 PHILLIPS, THOMAS E., 1991
 RESLER, WILLIAM M, 1982; LLM, 1973, New York University
 RICE, STEVEN J, 2000; MS, 1971, Oklahoma State University
 WELLS, WILLIAM L., 2000; MBA, 1973, Syracuse University

Lecturers

JOHNSON, RICHARD L, 2012; LLM, 2009, University of Washington
 NICHOLS, CHRISTINA, 2016
 PAPERMAN, JOSEPH B., 1995; MS, 1984, Purdue University
 PASTERNAK, NANCY, 2015
 REICH, JANE M, 2003
 WEBER, ELIZABETH L, 2007
 WEEDE, ROBERT, 2013
 WOLCOTT, SUSAN K., 2003; MS, 1985, Northwestern University

Finance and Business Economics

Professors

BESSEMBINDER, HENDRIK, 2003; PhD, 1986, University of Washington; MBA, 1978, Washington State University
 BOND, ALAN P, 2013; PhD, 1999, University of Chicago; MA, 1999, University of Chicago

BRADFORD, WILLIAM D, 1994; PhD, 1972, Ohio State University; MBA, 1968, Ohio State University
 BROWN, STEPHEN, 2009; PhD, 1976, University of Chicago; MBA, 1974, University of Chicago
 CONRAD, JENNIFER S., 2015; PhD, 1986, University of Chicago; MBA, 1983, University of Chicago
 DUCHIN, RAN, 2012; PhD, 2008, University of Southern California; MBA, 2003, Hebrew University (Israel)
 FROST, PETER A * 1982; PhD, 1966, University of California (Los Angeles); MA, 1961, University of California (Los Angeles)
 HALEY, CHARLES * 1981; PhD, 1968, Stanford University; MBA, 1964, Stanford University
 HARMON, JARRAD, 2001; PhD, 1998, University of Rochester; MS, 1995, University of Rochester
 HESS, ALAN C. * 1981; PhD, 1969, Carnegie Institute of Technology; MS, 1967, Carnegie Institute of Technology
 HIGGINS, ROBERT C * 1981; PhD, 1969, Stanford University; MBA, 1965, Harvard University
 KAMARA, AVRAHAM, 1984; PhD, 1986, Columbia University; MPHIL, 1981, Columbia University
 KARPOFF, JONATHAN M, 1983; PhD, 1982, University of California (Los Angeles); MA, 1980, University of California (Los Angeles)
 MALATESTA, PAUL H, 1980; PhD, 1982, University of Rochester; MS, 1976, University of Rochester
 SCHALL, LAWRENCE D, 1968; PhD, 1969, University of Chicago; MA, 1967, University of Chicago

Associate Professors

DEWENTER, KATHRYN L, 1992; PhD, 1993, University of Chicago; MA, 1985, Stanford University
 KOSKI, JENNIFER LYNCH, 1991; PhD, 1991, Stanford University; MBA, 1987, Harvard University
 RICE, EDWARD M, 1979; PhD, 1978, University of California (Los Angeles); MBA, 1973, University of Rochester
 SIEGEL, STEPHAN, 2005; PhD, 2006, Columbia University; MPHIL, 2002, Columbia University

Assistant Professors

BROGAARD, JONATHAN A., 2011; PhD, 2012, Northwestern University
 GILBERT, THOMAS, 2008; PhD, 2008, University of California (Berkeley); MS, 2005, University of California (Berkeley)
 HRDLICKA, CHRISTOPHER M, 2010; PhD, 2010, University of Chicago; AM, 2005, Washington University
 SCHULZ, FLORIAN, 2014; PhD, 2014, University of California (Los Angeles); MSC, 2008, London Business School (UK); Diploma, 2005, Johann Wolfgang Goethe Universität, Frankfurt am Main (Germany)
 STATHOPOULOS, ANDREAS, 2014; PhD, 2009, Columbia University; MS, 2003, University of Warwick (UK)
 STERN, LEA H, 2016; MSC, 2009, University of Montreal (Canada)
 WESTERFIELD, MARK M, 2012; PhD, 2004, Massachusetts Institute of Technology
 ZENG, YAO, 2016; PhD, 2016, Harvard University; MA, 2013, Harvard University

Senior Lecturers

GLASSMAN, DEBRA A, 1989; PhD, 1980, University of Wisconsin (Madison); MS, 1979, University of Wisconsin
 SESLEN, TRACEY, 2012; PhD, 2003, Massachusetts Institute of Technology
 YOUNG, LANCE A, 2003; PhD, 2005, University of Rochester; MS, 1999, University of Rochester

Lecturers

LEGG, DIANE, 2008; MBA, 1999, Seattle University
 MALARKEY, SUSANNAH, 2016; MS, 1982, University of Oregon
 MALOY, FRANCES, 1986; PhD, 1999, University of Washington; MA, 1985, Southern Illinois University
 MARIN, MONICA, 2013; PhD, 2008, University of South Carolina; MBA, 2004, Augusta State University
 MC MURRAY, JOHN P., 2012; MS, 1997, Massachusetts Institute of Technology; MBA, 1982, University of Texas (San Antonio)
 PERRINA, GINO, 2003; PhD, 1999, Texas Technological University; MBA, 1993, Clemson University

Management and Organization

Professors

AVOLIO, BRUCE, 2008; PhD, 1981, University of Akron; MA, 1978, University of Akron
 BOEKER, WARREN, 1998; PhD, 1987, University of California (Berkeley)
 CHEN, XIAO-PING, 1999; PhD, 1998, University of Illinois; MA, 1992, University of Illinois
 HENNING, DALE A * 1981; PhD, 1954, University of Illinois; MBA, 1949, University of Pennsylvania

HILL, CHARLES WILLIAM L, 1988; PhD, 1983, University of Manchester (UK)
 HUBER, VANDRA LEE, 1987; DBA, 1982, Indiana University; MBA, 1981, Indiana University
 JONES, THOMAS M, 1981; PhD, 1977, University of California (Berkeley); MBA, 1970, University of Washington
 KAST, FREMONT E, 1978; DBA, 1956, University of Washington; MBA, 1949, Stanford University
 KOTHA, SURESH, 1996; PhD, 1988, Rensselaer Polytechnic Institute; MS, 1986, Rensselaer Polytechnic Institute; MArch, 1982, Rensselaer Polytechnic Institute
 LEE, THOMAS W, 1983; PhD, 1984, University of Oregon; MA, 1977, Bowling Green State University
 MITCHELL, TERENCE R. * 1982; PhD, 1969, University of Illinois; MA, 1967, University of Illinois
 MOXON, RICHARD W, 1971; DBA, 1973, Harvard University; MS, 1964, Stanford University
 NEWELL, WILLIAM T * 1999; PhD, 1962, University of Texas; MBA, 1955, University of Denver
 NOLAN, RICHARD L, 2004; PhD, 1966, University of Washington; MBA, 1963, University of Washington
 REYNOLDS, SCOTT J., 2002; PhD, 2002, University of Minnesota; MA, 1995, Brigham Young University
 SAXBERG, BORJE O * 1982; PhD, 1958, University of Illinois; MS, 1953, University of Illinois
 SHANSBY, GARY, 2016; BA, 1959, University of Washington
 STEENSMA, HARVEY K., 2000; PhD, 1996, Indiana University; MBA, 1988, Washington State University
 VESPER, KARL H * 1974; PhD, 1969, Stanford University; MS, 1966, Stanford University

Associate Professors

BARNES, CHRISTOPHER, 2013; PhD, 2009, Michigan State University; MBA, 2003, Webster University
 BIGLEY, GREGORY, 2000; PhD, 1995, University of California (Irvine); MBA, 1991, University of California (Irvine)
 BUCK, VERNON E * 1999; PhD, 1963, Cornell University; MS, 1960, Cornell University
 JOHNSON, MICHAEL D., 2006; PhD, 2006, Michigan State University; MA, 1999, University of Phoenix
 KIENAST, PHILIP K * 1994; PhD, 1972, Michigan State University; MLIR, 1966, Michigan State University
 SIRMON, DAVID G., 2012; PhD, 2004, Arizona State University; MBA, 1997, University of Montana
 STRONG, DENNIS FULTON * 1991; PhD, 1959, University of Washington
 UMPHRESS, ELIZABETH, 2011; PhD, 2003, Tulane University
 WICKMAN, JAMES A, 1953; DBA, 1961, University of Washington; MBA, 1954, University of Washington

Assistant Professors

FEHR, RYAN, 2010; PhD, 2010, University of Maryland; MA, 2007, University of Maryland
 GUPTA, ABHINAV, 2015
 HALLEN, BENJAMIN L, 2014; PhD, 2007, Stanford University; MS, 2002, University of Virginia
 OLSON, DANIEL M., 2016; JD, 2004, Harvard University
 PAHNKE, EMILY, 2010; PhD, 2010, Stanford University; MA, 2010, Stanford University
 SCHABRAM, KIRA, 2016; MSC, 2010, Concordia University
 TAN, DAVID, 2013; PhD, 2009, Emory University
 ZHANG, CRYSTAL FARH, 2015; PhD, 2012, University of Maryland

Lecturers

BERGSTROM, TOD, 1999; JD, 1988, University of Washington; MA, 1985, Stanford University
 BETTIN, PATRICK J, 1988; PhD, 1983, University of Washington; MS, 1978, Long Island University
 BREYSSE COX, MOLLY, 2015; MA, 2008, Antioch University
 CORMICK, GERALD W, 1975; PhD, 1971, University of Michigan; MBA, 1965, University of Michigan
 HUWE, RUTH A, 1990; PhD, 1995, University of Washington; MA, 1990, San Diego State University
 LEONG, ALAN, 1995; MSE, 1977, University of Washington
 MCCORMACK, TIMOTHY B., 2014; JD, 1997, University of Oregon
 MCPHERSON, RICHARD S., 2005; MBA, 1997, University of Denver
 RAKHRA, RANJIT SINGH, 1999; MPA, 1984, University of Montana
 SHAO, LIAN, 2012; PhD, 2011, Cornell University; MS, 2002, Concordia University

Information Systems and Operations Management

Professors

CHIU, JOHN S Y * 1994; PhD, 1960, University of Illinois; MS, 1955, University of Kentucky
 DEY, DEBABRATA, 1997; PhD, 1994, University of Rochester; MS, 1992, University of Rochester
 FAALAND, BRUCE H * 1982; PhD, 1971, Stanford University; MS, 1968, Stanford University
 KLASTORIN, THEODORE, 1974; PhD, 1973, University of Texas (Austin)
 MOINZADEH, KAMRAN, 1984; PhD, 1985, Stanford University; MS, 1982, Stanford University
 SIEGEL, ANDREW F, 1983; PhD, 1977, Stanford University; MS, 1975, Stanford University
 TAMURA, HIROKUNI * 1981; PhD, 1967, University of Michigan; MS, 1961, University of Michigan
 TAN, YONG, 1987; PhD, 2000, University of Washington; PhD, 1993, University of Washington
 ZHOU, YONGPIN, 2000; PhD, 2000, University of Pennsylvania; MA, 1997, University of Pennsylvania

Associate Professors

FAN, MING, 2002; PhD, 1999, University of Texas (Austin); MA, 1991, University of Akron
 HILLIER, MARK S., 1993; PhD, 1994, Stanford University; MS, 1991, Stanford University
 JAIN, APURVA, 1999; PhD, 1999, Purdue University; MS, 1989, National Inst Training Engin (Bombay)
 MAMANI, HAMED, 2008; PhD, 2008, Massachusetts Institute of Technology
 SCHMITT, THOMAS G * 1985; DBA, 1979, Indiana University; MBA, 1974, University of Cincinnati

Assistant Professors

CHEN, SHI, 2013; MS, 2008, Tsinghua University (China)
 HWANG, HYEUNJUNG, 2015; PhD, 2015, Carnegie Mellon University; MBA, 2008, University of California (Los Angeles)
 IRAVANI, FOAD, 2012; PhD, 2012, University of California (Los Angeles); MSC, 2007, University of Toronto (Canada)
 SHUNKO, MARIA, 2015; PhD, 2011, Carnegie Mellon University; MS, 2007, Carnegie Mellon University
 WAGNER, MICHAEL, 2012; PhD, 2006, Massachusetts Institute of Technology; MEng, 2001, Massachusetts Institute of Technology
 WU, JIANQING, 2014; MBA, 2009, Purdue University

Senior Lecturers

BURROWS, WILLIAM E, 2000; MBA, 1972, University of Washington
 OU, SHAOSONG, 2007; PhD, 2006, University of Southern California; MA, 1999, University of Illinois
 PARAMESWARAN, MANOJ, 2010; PhD, 1999, University of Texas (Austin); Mtech, 1994, Indian Institute of Science (India)
 PILCHER, MARTHA G, 1987; PhD, 1985, Georgia Institute of Technology; MS, 1978, Georgia Institute of Technology
 RACHAMADUGU, RAM-MOHAN, 2016; PhD, 1982, Carnegie Mellon University; MS, 1980, Carnegie Mellon University
 SIRICHAKWAL, ISSARIYA, 2006; PhD, 2013, University of Washington; MS, 2012, University of Washington
 STUDER-ELLIS, ERICH, 2009; PhD, 1996, Duke University; MBA, 1986, Indiana University

Lecturer

FREYHOLTZ, SEAN, 2010; MIMEP, 2013, University of Washington

Marketing and International Business

Professors

AGRAWAL, NIDHI, 2011; PhD, 2006, New York University; MBA, 1999, Mudra Institute of Communications (India)
 ERICKSON, GARY * 1994; PhD, 1978, Stanford University; MBA, 1973, Stanford University
 ETCHESON, WARREN W * 1989; PhD, 1956, State University of Iowa; MA, 1951, State University of Iowa
 FOREHAND, MARK ROBECK, 1997; PhD, 1997, Stanford University
 JAIN, SHAILENDRA P., 2008; PhD, 1995, New York University; MPHIL, 1992, New York University
 MACLACHLAN, DOUGLAS * 1978; PhD, 1971, University of California (Berkeley); MA, 1970, University of California (Berkeley)
 MIZIK, NATALIE, 1996; PhD, 2002, University of Washington; MS, 1995, Moscow State Institute of International Relations (Russia)

MOINPOUR, REZA * 1981; PhD, 1970, Ohio State University; MBA, 1966, Ohio State University
 NARVER, JOHN C * 2000; PhD, 1965, University of California (Berkeley); MBA, 1960, University of California (Berkeley)
 PALMATIER, ROBERT W, 2007; PhD, 2004, University of Missouri; MBA, 1989, Georgia Institute of Technology
 SCHLOSSER, ANN E., 2000; PhD, 1997, University of Illinois; MA, 1995, University of Illinois
 SPRATLEN, THADDEUS H * 1981; PhD, 1962, Ohio State University; MA, 1957, Ohio State University
 SULLIVAN, JEREMIAH J * 1981; PhD, 1970, New York University; MBA, 1975, University of Washington
 YALCH, RICHARD F, 1971; PhD, 1974, Northwestern University; MS, 1970, Carnegie Mellon University

Associate Professors

RUTZ, OLIVER, 2011; PhD, 2007, University of California (Los Angeles); MBA, 2003, University of California (Los Angeles)
 SHULMAN, JEFFREY D, 2006; PhD, 2006, Northwestern University

Assistant Professors

BORAH, ABHISHEK, 2013; PhD, 2013, University of Southern California; MA, 2005, University of Delhi (India)
 DUNN, LEA H, 2014; PhD, 2014, University of British Columbia (Canada)
 MUMMALANENI, NARASIMHA, 2016; PhD, 2016, Northwestern University; MS, 2012, Northwestern University
 SAYEDI ROSH KHAR, SEYED AM, 2014; PhD, 2012, Carnegie Mellon University; MSC, 2009, Carnegie Mellon University
 YOGANARASIMHAN, HEMA, 2014; PhD, 2009, Yale University; MPHIL, 2008, Yale University
 ZHANG, ZAOZAO, 2010; PhD, 2011, Columbia University; MPHIL, 2007, Columbia University

Senior Lecturers

BEARD, OLETA, 1995; MBA, 1980, University of Washington
 STEARNS, ELIZABETH P., 1995; MBA, 1978, New York University

Lecturers

DIMEO, MICHAEL, 2005; MS, 1977, Wichita State University
 EGUCHI, MICHAEL S., 2004; MBA, 1978, Seattle University
 GIAMBATTISTA, MICHELE D., 1995; MBA, 1969, Harvard University
 GOETHALS, CATHERINE M, 1988; MFA, 1989, University of Washington
 HAGEN-LUKENS, DEBORAH, 2006; BA, 1983, Iowa State University
 HOCHBERG, LEE E., 2008; MA, 1980, Stanford University
 MATTHEWS, MARTHA N., 1992; PhD, 1994, University of North Carolina, Chapel Hill; MA, 1986, University of Central Florida
 ODEGAARD, MARY ANN, 1995; PhD, 1980, Stanford University; MBA, 1971, Stanford University
 POLLACK, ROBERT D, 2015; MBA, 1978, New York University
 RHODES, JOHN H., 1998; BA, 1961, University of Washington
 SHEKLETON, PHILLIP R., 1993; MA, 1999, University of Washington
 WHELAN, JOHN F., 1985; MA, 1977, Yale University

School of Dentistry

Professors

ABOLOFIA, JEFF S, 1999; DDS, 1975, University of Washington
 ALBRIGHT, STEVEN J., 1996; DDS, 1978, Marquette University
 BARRETT, ERNEST E, 1983; DDS, 1969, University of Washington
 BASSETT, KATHY B, 2014; MED, 1997, Lesley College; MS, 1980, Eastern Washington University
 BECKER, WILLIAM, 2000; DDS, 1961, Marquette University
 BEIRNE, OWEN ROSS, 1985; PhD, 1976, University of California (San Francisco); DMD, 1972, Harvard University
 BELL, RICHARD BRYAN, 2005; MD, 1998, University of North Carolina; DDS, 1995, Creighton University
 BERG, JOEL H., 2000; DDS, 1983, University of Iowa; MS, 1985, University of Iowa
 BHUTA, PRAKASH H., 2008; PhD, 1976, University of Louisiana; MS, 1970, Maharaja Sayajirao University, India
 BOLENDER, CHARLES L * 1981; DDS, 1956, University of Iowa
 BOLLEN, ANNE-MARIE, 1990; PhD, 1990, University of Michigan; DDS, 1984, University of Brussels (Belgium)

BORDIN, SANDRA * 2000; PhD, 1966, University of Ferrara (Italy)
 BRUDVIK, JAMES S * 1998; DDS, 1957, University of Minnesota
 BUTSON, TIMOTHY J., 1999; DMD, 1982, University of Pennsylvania
 CAMERON, CHERYL A, 1979; JD, 1994, Seattle University; PhD, 1986, University of Washington
 CASE, JUDD ALAN, 2008; PhD, 1986, University of California (Riverside); MS, 1980, Humboldt State University
 CHAN, DANIEL C. N., 2008; DDS, 1988, University of Iowa
 CHEN, SSU-KUANG, 1989; PhD, 1993, University of Washington; DDS, 1986, National Taiwan University
 CHUNG, KWOK-HUNG, 2006; PhD, 1987, Northwestern University
 CHUNG, WHASUN O., 1994; PhD, 1999, University of Washington; MA, 1989, Maranantha Baptist College
 COHENCA, NESTOR, 2005; DDS, 1990, National Univ of Asuncion (Paraguay)

 ZIAD, TAKISH, 2013; BDentS, 2001, University of Salahaddin (Iraq)

Senior Lecturers

ANDERSON, J MARTIN, 1981; DDS, 1965, University of Washington
 PHILLIPS, SANDRA L., 1988; MPA, 1985, University of Washington
 RAFFERTY, KATHERINE L., 1997; PhD, 1996, Johns Hopkins University; MA, 1991, New York University

Lecturers

CHIGURUPATI, KAVITA, 2000; MSD, 2001, University of Washington
 JEFFREY, SUSANNE KOLARE, 2005; PhD, 1990, Karolinska Institute (Sweden); DDS, 1984, Karolinska Institute (Sweden)
 KONG, NINGHUA, 2016; MS, 2007, Peking University (China)
 MARASHI, AHMAD A., 2000; DDS, 2001, University of Washington
 NEWMAN, JAMES E. JR., 2004; DDS, 1977, West Virginia University
 SPEED-MCINTYRE, POLLENE, 2004; DDS, 1980, University of Washington

STEWART, DOROTHY J, 2007; DDS, 1982, University of Washington
 STRAND, HARVEY A, 1997; DDS, 1957, University of Washington
 TOWNSEND, JOHN D, 1977; DDS, 1967, McGill University (Canada)

College of Education

Professors

ABBOTT, ROBERT D, 1975; PhD, 1970, University of Washington; MS, 1968, University of Washington
 AFFLECK, JAMES Q * 1998; EdD, 1968, Columbia University; MA, 1963, San Francisco State
 BANKS, JAMES A, 1969; PhD, 1969, Michigan State University; MA, 1967, Michigan State University
 BEADIE, NANCY ELIZABETH, 1993; PhD, 1989, Syracuse University; MS, 1987, Syracuse University
 BELL, PHILIP L, 1998; PhD, 1998, University of California (Berkeley); MA, 1996, University of California (Berkeley)
 BERNINGER, VIRGINIA WISE, 1986; PhD, 1981, Johns Hopkins University; MED, 1970, University of Pittsburgh
 BILLINGSLEY, FELIX F, 1981; PhD, 1974, University of Washington; MA, 1966, Western Washington College
 BOLTON, DALE LEROY * 1990; PhD, 1958, University of Wisconsin (Madison); MS, 1953, Oklahoma State University
 BRAMMER, LAWRENCE M * 1989; PhD, 1950, Stanford University; MA, 1948, Stanford University
 BRANSFORD, JOHN D, 2003; PhD, 1970, University of Minnesota
 BROWN, SHARAN E, 1987; EdD, 1991, University of Washington; JD, 1984, University of Puget Sound; MA, 1979, Seattle University
 BURGESS, CHARLES O * 1992; PhD, 1962, University of Wisconsin (Madison); MS, 1958, University of Wisconsin
 CHENEY, DOUGLAS A., 1989; PhD, 1992, University of Washington; MS, 1975, University of Oregon
 DAVIS, CAROL, 1998; EdD, 1992, University of Houston; MED, 1989, University of Houston
 DRISCOLL, JOHN P * 1985; PhD, 1957, Pennsylvania State University; MS, 1950, University of California (Los Angeles)
 EDGAR, EUGENE BAYARD, 1983; PhD, 1972, George Peabody College; MA, 1968, George Peabody College
 EVANS, ELLIS D * 1995; EdD, 1964, Indiana University; MEd, 1962, Indiana University
 FORSTER, JERALD R. * 1982; PhD, 1966, University of Minnesota
 FREDRIKSEN, JOHN R, 2001; PhD, 1966, Princeton University; MA, 1966, Princeton University
 GAY, GENEVA, 1989; PhD, 1972, University of Texas (Austin); MA, 1969, University of Akron
 GEHRKE, NATHALIE J, 1983; PhD, 1976, Arizona State University; MA, 1972, Northwestern University
 GLENN, ALLEN D., 1989; PhD, 1970, University of Michigan; MA, 1970, University of Michigan; MS, 1968, Kansas State Teacher's College
 HARING, NORRIS GROVER * 1993; EdD, 1956, Syracuse University; MA, 1950, University of Nebraska
 HERRENKOHL, LESLIE R., 1996; PhD, 1995, Clark University; MA, 1991, Clark University
 HERTZOG, NANCY, 2010; PhD, 1995, University of Illinois (Urbana); MA, 1981, University of Connecticut
 HUNE, SHIRLEY, 2007; PhD, 1979, George Washington University
 HUNKINS, FRANCIS PETER * 1981; PhD, 1966, Kent State University; MED, 1963, Boston University
 JENKINS, JOSEPH R, 1981; PhD, 1967, University of Minnesota
 JONES, DIANE CARLSON, 1996; PhD, 1980, Wayne State University; MA, 1977, Wayne State University; MA, 1969, University of Texas
 KAZEMI, ELHAM, 1999; PhD, 1999, University of California (Los Angeles); MA, 1997, University of California (Los Angeles)
 KERDEMAN, DEBORAH, 1990; PhD, 1991, Stanford University; MA, 1988, Stanford University; MA, 1981, Hebrew Union College; MEd, 1981, University of Southern California
 KERR, DONNA H, 1990; PhD, 1973, Columbia University
 KERR, STEPHEN T, 1985; PhD, 1975, University of Washington; MA, 1969, Columbia University
 KLOCKARS, ALAN J, 1963; PhD, 1967, University of Washington; MA, 1963, Oregon State University
 KNAPP, MICHAEL S., 1990; PhD, 1981, Stanford University; MA, 1979, Stanford University; MEd, 1976, Harvard University
 LOWENBRAUN, SHEILA * 1993; PhD, 1969, Columbia University; MA, 1962, Columbia University
 MADSEN, DAVID L * 1994; PhD, 1961, University of Chicago; MA, 1954, University of Chicago
 MAZZA, JAMES J., 1996; PhD, 1993, University of Wisconsin (Madison); MS, 1990, University of Wisconsin (Madison)
 MC CARTIN, ROSEMARIE E, 1969; PhD, 1964, University of Southern California; MA, 1960, Immaculate Heart College, Ca
 MCCUTCHEN, DEBORAH ELAINE, 1986; PhD, 1985, University of Pittsburgh; MA, 1978, University of Pittsburgh
 MIZOKAWA, DONALD T, 1981; PhD, 1974, Indiana University; MED, 1969, University of Hawaii

MORISHIMA, JAMES K * 1999; PhD, 1967, University of Washington
 NERAD, MARESI, 2001; PhD, 1988, University of California (Berkeley); MA, 1973, Darmstadt University of Tech, Germany
 NOLEN, SUSAN B., 1990; PhD, 1986, Purdue University; MED, 1976, Lewis and Clark College
 OLSTAD, ROGER G * 1995; PhD, 1963, University of Minnesota; MA, 1959, University of Minnesota
 OLSWANG, STEVEN G, 1990; PhD, 1977, University of Washington; JD, 1971, University of Illinois
 PARKER, WALTER C, 1985; PhD, 1982, University of Washington; MA, 1978, University of Colorado (Denver)
 PECK, CHARLES A, 2003; PhD, 1984, University of California (Santa Barbara); MA, 1976, Sonoma State University
 PECKHAM, PERCY D * 1997; PhD, 1968, University of Colorado (Denver); MA, 1955, University of Denver
 PLECKI, MARGARET L, 1994; PhD, 1991, University of California (Berkeley); MS, 1976, University of Illinois
 RYCKMAN, DAVID B * 1981; EdD, 1966, University of Illinois; AM, 1961, University of Chicago
 SANDALL, SUSAN R., 1996; PhD, 1986, University of Washington; MS, 1977, University of Oregon
 SCHWARTZ, ILENE SHARON, 1991; PhD, 1989, University of Kansas; MA, 1986, University of Kansas
 SEBESTA, SAM L * 1995; EdD, 1963, Stanford University; MA, 1960, Northwestern University
 STANDAL, TIMOTHY, 1981; PhD, 1976, University of Minnesota; MED, 1974, Western Washington College
 STOWITSCHKE, JOSEPH JAMES, 1986; EdD, 1973, Utah State University; MS, 1969, Oregon College of Education (Monmouth)
 TAYLOR, CATHERINE S., 1991; PhD, 1986, University of Kansas; MSE, 1978, University of Kansas
 TAYLOR, EDWARD, 1990; PhD, 1994, University of Washington; MA, 1983, Gonzaga University
 THOMPSON, MARIE D, 1995; PhD, 1970, University of Washington; MA, 1968, University of Washington
 TOSTBERG, ROBERT E * 1989; PhD, 1960, University of Wisconsin (Madison); MA, 1958, University of Wisconsin
 TUAN, MIA, 2015; PhD, 1996, University of California (Los Angeles); MA, 1992, University of California (Los Angeles)
 VALENCIA, SHEILA DENISE W, 1987; PhD, 1978, University of Colorado (Boulder); MED, 1976, State University of New York (Buffalo)
 WASLEY, PATRICIA A, 2000; EdD, 1989, University of Washington; MA, 1982, Western Washington University
 WILLIAMS, DONALD T * 1997; PhD, 1963, Stanford University; MA, 1957, Stanford University
 WILLIAMS, RICHARD C. * 1998; PhD, 1966, University of Minnesota; MA, 1963, University of Minnesota
 WILLIAMSON-LOTT, JOY ANN, 2007; PhD, 1998, University of Illinois (Urbana); MA, 1995, University of Illinois (Urbana)
 WINDSCHITL, MARK A, 1996; PhD, 1995, Iowa State University; MS, 1993, Iowa State University
 ZEICHNER, KENNETH, 2009; PhD, 1976, Syracuse University; MA, 1970, Syracuse University

Associate Professors

BANG, MEGAN, 2011; PhD, 2009, Northwestern University
 BEAL, JACK L * 1998; PhD, 1972, University of Nebraska; MS, 1962, University of Kansas
 BROWN, ROBERT LEWIS * 1994; EdD, 1961, University of Arkansas; MED, 1956, Trinity University, Texas
 COHEN, MARILYN, 1987; PhD, 1975, University of Washington; MED, 1967, University of Washington
 ELFERS, ANN M., 1995; PhD, 2000, University of Washington; MA, 1993, University of Belgrade (Serbia)
 FINK, STEPHEN, 2000; EdD, 1982, Brigham Young University; MA, 1978, California State University, Northridge
 FREY, KARIN S., 1983; PhD, 1978, University of Washington
 GALLUCCI, CHRYSAN J., 2003; PhD, 2002, University of Washington; MED, 1988, University of Washington
 GRAY, CAROL A * 1995; PhD, 1971, University of Washington; MED, 1968, Western Washington State College
 HANSEN-KRENING, NANCY M * 1981; PhD, 1974, University of Oregon; MED, 1973, University of Oregon
 HOFFMAN, JENNIFER L, 1989; PhD, 2006, University of Washington; MA, 1998, Seattle University
 HONIG, MEREDITH I., 2006; PhD, 2001, Stanford University
 HUDSON, ROXANNE, 2006; PhD, 2002, University of Florida; MED, 1994, Western Washington University
 JACKSON, KARA, 2013; PhD, 2010, University of Pennsylvania; MA, 2005, University of Pennsylvania
 JEGATHEESAN, BRINDA I., 2006; PhD, 2005, University of Illinois; MED, 2000, University of Hawaii
 JONES, JANINE, 2002; PhD, 1999, University of Texas (Austin); MA, 1994, University of Southern California
 JOSEPH, GAIL, 2007; PhD, 2001, University of Washington; MED, 1995, Western Washington University
 LENGES, ANITA K, 1994; PhD, 2004, University of Washington; MED, 1994, University of Washington
 LI, MIN, 2001; PhD, 2002, Stanford University; MA, 1997, Beijing Normal University (China)
 LOTT, JOE, 2007; PhD, 2005, Louisiana State University; MPA, 2000, Louisiana State University
 MCDONALD, MORVA A., 2006; PhD, 2003, Stanford University; MA, 1999, Stanford University
 MINSTRELL, JAMES, 2002; PhD, 1978, University of Washington; MS, 1966, University of Pennsylvania
 MISSALL, KRISTEN, 2015; PhD, 2002, University of Minnesota; MA, 1999, University of Minnesota
 SMITH, JOHN P * 1998; EdD, 1969, Stanford University; MED, 1963, University of Missouri

THOMPSON, JESSICA J, 1992; PhD, 2006, University of Washington; MED, 2001, University of Washington
 VARGHESE, MANKA M., 2000; PhD, 2000, University of Pennsylvania; MS, 1994, University of Pennsylvania
 WEST, ELIZABETH A., 1998; PhD, 2003, University of Washington; MED, 1994, University of Washington

Assistant Professors

BARAJAS, FILIBERTO, 2010; PhD, 2009, University of California (Los Angeles); MA, 2001, Claremont Graduate School
 BASHEY, HUSAIN ISMAIL, 1981; PhD, 1975, University of Oregon; MA, 1960, Macmurray College; MA, 1955, University of Bombay
 DABACH, DAFNEY BLANCA, 2010; PhD, 2009, University of California (Berkeley); MA, 2001, University of California (Berkeley)
 HEBARD, HEATHER, 2010; PhD, 2010, Stanford University; MA, 1999, Santa Clara University
 ISHIMARU, ANN, 2012; EdD, 2011, Harvard University; EdM, 2008, Harvard University; MA, 1994, Stanford University
 KAUERZ, KRISTIE, 2011; EdD, 2009, Columbia University; MA, 1995, American University
 LAU, WON-FONG, 2014; PhD, 2013, University of California (Santa Barbara); MED, 2010, University of California (Santa Barbara)
 LEWIS, JEFFREY L, 2003; PhD, 1986, University of Rochester; MA, 1983, University of Rochester
 LEWIS, KATHERINE, 2013; PhD, 2011, University of California (Berkeley); MA, 2007, University of California (Berkeley); MSC, 2003, Trinity College (Ireland)
 MEEKER, KATHLEEN, 2013; PhD, 2010, Vanderbilt University; MED, 2003, Ohio State University
 OH, SOOJIN, 2015; EdD, 2015, Harvard University; MED, 2010, Harvard University; MEd, 2004, University of Pennsylvania
 RIGBY, JESSICA, 2014; PhD, 2012, University of California (Berkeley); MA, 2006, Stanford University
 ROBERTS, CARLY, 2015; PhD, 2013, University of Wisconsin (Madison); MED, 2010, University of Alaska
 SANDERS, ELIZABETH, 2004; PhD, 2011, University of Washington; MED, 2004, University of Washington
 SCHINDLER, HOLLY S, 2012; PhD, 2007, Boston College
 SUITE, DENZIL J, 2013; PhD, 2002, University of Southern California; MA, 1988, University of Vermont
 SUN, MIN, 2014; PhD, 2011, Michigan State University; MA, 2006, Beijing Normal University (China)
 TAYLOR, KATHERINE, 2015; PhD, 2013, Vanderbilt University
 TRAWEEK, DEAN T., 2000; PhD, 1993, University of Washington; MAT, 1976, Northwestern University

Senior Lecturers

BEITLERS, ANNE, 2014; PhD, 2014, New York University; MAT, 1999, University of Washington
 BRENNAN, CAROLYN, 2008; PhD, 2013, University of Washington
 CLEVINGER-BRIGHT, MARY, 2004; PhD, 2009, University of Washington; MS, 1981, Iowa State University
 DIETRICH, LYNN, 2015; PhD, 2000, University of Maryland; MED, 1995, University of Maryland
 HALVERSON, THOMAS J, 1992; PhD, 1996, University of Washington; MED, 1990, Western Washington University
 KIMBALL, KATHLEEN L., 1987; EdD, 1993, University of Washington; MED, 1972, University of Utah
 LOPEZ, SARA L., 2000; MED, 2003, University of Washington
 MACGREGOR, ROBERT R, 2006; EdD, 2012, University of Washington; MED, 1987, Central Washington University
 MASSEY, DIXIE DICK, 2004; PhD, 2003, University of North Carolina; MA, 2000, University of North Carolina
 MISNER, PETER MICHAEL, 2011; MAT, 1999, City University (Bellevue)
 NEWMAN, JODI, 1999; PhD, 2010, University of Washington; MED, 2001, University of Washington
 O'DOHERTY, ANN, 2012; EdD, 2007, University of Texas (Austin); MED, 1992, University of Texas (Austin)
 POWELL, SELMA, 2014; PhD, 2012, University of Central Florida; MA, 1999, University of South Florida
 ROSENBERG, NANCY E, 2003; MS, 1987, Stanford University
 SPAULDING, SCOTT, 2009; PhD, 2001, West Virginia University; MA, 1997, West Virginia University

Lecturers

BAGLEY, SYLVIA, 2012; PhD, 2007, University of California (Los Angeles); MA, 2004, University of California (Los Angeles)
 FRIZELLE, THOMAS K, 2014; PhD, 2012, University of Washington; MS, 2003, Iowa State University
 HOWELL, MARTIN T, 2005; PhD, 2002, University of Georgia; MED, 1995, Oregon State University

College of Engineering

Aeronautics and Astronautics

Professors

AHN, JUNGHYUN, 2016; PhD, 1999, University of Michigan; MS, 2008, Massachusetts Institute of Technology; MS, 1996, University of Michigan
 BRAGG, MICHAEL B, 2013; PhD, 1981, Ohio State University
 BREIDENTHAL, ROBERT E, 1980; PhD, 1978, California Institute of Technology
 BRUCKNER, ADAM, 1972; PhD, 1972, Princeton University
 CHRISTIANSEN, WALTER H * 1995; PhD, 1961, California Institute of Technology
 DECHER, REINER * 1988; PhD, 1968, Massachusetts Institute of Technology; SM, 1962, Massachusetts Institute of Technology
 FYFE, IAN M * 1994; PhD, 1957, Stanford University; MME, 1954, University of Delaware; ArtC, 1950, Royal College of Science and Technology (Glasgow)
 HERMANSON, JAMES C., 1986; PhD, 1985, California Institute of Technology
 HILL, KRISTI MORGANSEN, 2002; PhD, 1999, Harvard University
 HOFFMAN, ALAN LOWELL, 1989; PhD, 1967, California Institute of Technology
 HOLSAPPLE, KEITH A, 1965; PhD, 1965, University of Washington; MS, 1964, University of Washington
 JARBOE, THOMAS R., 1989; PhD, 1974, University of California (Berkeley)
 KUROSAKA, MITSURU, 1987; PhD, 1968, California Institute of Technology
 LIN, KUEN-YUAN, 1984; PhD, 1970, Princeton University; MA, 1967, Princeton University; MSC, 1963, National Taiwan University
 LIVNE, ELI, 1990; PhD, 1990, University of California (Los Angeles)
 MCLEAN, HARRY S, 2016; PhD, 1990, University of California (Berkeley)
 MESBAHI, MEHRAN, 2002; PhD, 1996, University of Southern California; MS, 1995, University of Southern California; MS, 1991, University of Southern California
 MILROY, RICHARD D., 1998; PhD, 1978, University of Alberta, Canada
 PARMETER, R REID * 1999; PhD, 1963, California Institute of Technology; MS, 1959, California Institute of Technology
 RUSSELL, DAVID A * 1981; PhD, 1961, California Institute of Technology; MSC, 1957, California Institute of Technology
 SHUMLAK, URI, 1994; PhD, 1992, University of California (Berkeley)
 SPALART, PHILIPPE ROLAND, 2015; PhD, 1982, Stanford University; MS, 1979, Stanford University
 VAGNERS, JURIS * 1981; PhD, 1967, Stanford University; MS, 1963, Stanford University
 WAAS, MODERAGE ANTHONY, 2015; PhD, 1988, California Institute of Technology
 YANCEY, ROBERT NEIL, 2016; PhD, 1997, University of Dayton

Associate Professors

ACIKMESE, BEHCET, 2016; PhD, 2002, Purdue University
 DABIRI, DANA, 2002; PhD, 1992, University of California (San Diego)
 FERRANTE, ANTONINO, 2008; PhD, 2004, University of California (Irvine); MS, 1997, von Karman Institute for Fluid Dynamics
 KNOWLEN, CARL, 1983; PhD, 1991, University of Washington
 MATTICK, ARTHUR T. * 1991; PhD, 1975, Massachusetts Institute of Technology; MS, 1971, Massachusetts Institute of Technology
 MOHAGHEGH, MICHAEL, 1989; PhD, 1972, University of Washington
 MURPHY, SUSAN E., 2008; MS, 2003, City University (Bellevue)
 SLOUGH, JOHN T. * 1999; PhD, 1981, Columbia University

Assistant Professors

GOLINGO, RAYMOND P., 1989; PhD, 2003, University of Washington
 LUM, CHRISTOPHER W. M., 2001; PhD, 2009, University of Washington

NARANG, ANSHU, 2013; PhD, 2012, Texas A&M University
 SALVIATO, MARCO, 2015; PhD, 2012, University of Padova, Italy
 WILLIAMS, OWEN JAMES, 2016; PhD, 2014, Princeton University; MA, 2009, Princeton University; MEng, 2008, Imperial College
 YANG, JINKYU, 2013; PhD, 2005, Stanford University
 YOU, SETTHIVOINE, 2008; PhD, 2002, Imperial College; MSC, 1997, Imperial College

Lecturer

MALAKOUTIAN, MOHAMMAD, 2008; PhD, 2012, University of Washington

Chemical Engineering

Professors

BANEYX, FRANCOIS, 1992; PhD, 1991, University of Texas (Austin)
 BERG, JOHN C., 1964; PhD, 1964, University of California (Berkeley)
 BOWEN, J RAY * 1981; PhD, 1963, University of California (Berkeley); MS, 1957, Massachusetts Institute of Technology
 CASTNER, DAVID G., 1986; PhD, 1979, University of California (Berkeley)
 DAVIS, E JAMES * 1983; PhD, 1960, University of Washington
 FINLAYSON, BRUCE A * 1982; PhD, 1965, University of Minnesota; MS, 1963, Rice University
 GRABSTEIN, KENNETH H., 2000; PhD, 1982, University of California (Berkeley)
 HEIDEGGER, WILLIAM J * 1995; PhD, 1959, Princeton University; MSE, 1955, Princeton University
 HILLHOUSE, HUGH, 2010; PhD, 2000, University of Massachusetts; MS, 1999, University of Massachusetts
 HOMOLA, JIRI, 1999; PhD, 1993, Academy of Science (USSR); MS, 1988, Technical University of Prague (Czech)
 JENEKHE, SAMSON A., 2000; PhD, 1985, University of Minnesota; MA, 1981, University of Minnesota
 JIANG, SHAOYI, 1999; PhD, 1993, Cornell University; MS, 1988, Nanjing University of Technology (China)
 KOCH, MELVIN V., 1997; PhD, 1967, University of Iowa; MS, 1964, University of Iowa
 LIDSTROM, MARY E., 1990; PhD, 1977, University of Wisconsin (Madison); MS, 1975, University of Wisconsin (Madison)
 MUNDY, CHRISTOPHER, 2016; PhD, 1992, Dominican University of California
 OVERNEY, RENE M, 1996; PhD, 1992, University of Basel (Switzerland); MS, 1989, University of Basel (Switzerland)
 RIBE, FRED L * 1989; PhD, 1951, University of Chicago
 RICKER, NEIL L * 1991; PhD, 1978, University of California (Berkeley); MS, 1972, University of California (Berkeley)
 SCHWARTZ, DANIEL T., 1991; PhD, 1989, University of California (Davis); MS, 1985, University of California (Davis)
 SLEICHER, CHARLES A * 1991; PhD, 1955, University of Michigan; MS, 1949, Massachusetts Institute of Technology
 STUVE, ERIC M, 1985; PhD, 1983, Stanford University; MS, 1979, Stanford University
 SUBRAMANIAN, VENKAT, 2014; PhD, 2001, University of South Carolina
 VAN SCHALKWIJK, WALTER A., 2001; PhD, 1983, University of Ottawa (Canada); MSC, 1977, Carleton University (Canada)
 WOODRUFF, GENE L * 1998; PhD, 1966, Massachusetts Institute of Technology; MS, 1963, Massachusetts Institute of Technology

Associate Professors

ADLER, STUART B., 2001; PhD, 1993, University of California (Berkeley); MS, 1989, University of California (Berkeley)
 DUDGEON, DOUGLAS, 2009; PhD, 1995, University of Washington
 HOLT, BRADLEY R, 1984; PhD, 1984, University of Wisconsin
 KRIEGER-BROCKETT, BARBARA * 1982; PhD, 1975, Wayne State University; MS, 1972, Wayne State University
 PFAENDTNER, WALTER JAMES, 2009; PhD, 2007, Northwestern University
 POZZO, LILO D., 2007; PhD, 2006, Carnegie Mellon University; MS, 2006, Carnegie Mellon University
 TYLER, BONNIE J., 2006; PhD, 1992, University of Washington
 YU, QIUMING, 2000; PhD, 1995, Cornell University; MS, 1989, Nanjing University (China)

Assistant Professors

BECK, DAVID, 2000; PhD, 2006, University of Washington
 CAROTHERS, JAMES, 2012; PhD, 2005, Harvard University
 CARSTENS, JASON, 2011; PhD, 1997, University of California (Berkeley)
 DEFOREST, COLE ALEXANDER, 2013; PhD, 2011, University of Colorado (Boulder)

HAYES, BRIAN * 2000; PhD, 1997, University of Washington
 HOLMBERG, VINCENT, 2015; PhD, 2011, University of Texas (Austin); MSEN, 2010, University of Texas (Austin)
 HOMA, ARTHUR, 2011; PhD, 1981, Case Western Reserve University
 JARVI, THOMAS D., 2001; PhD, 1998, University of Washington
 NANCE, ELIZABETH, 2015; PhD, 2012, Johns Hopkins University
 NELSON, JEFFREY B., 2007; PhD, 2007, University of Washington
 NGUYEN, FELIX NHANCHAU, 2007; PhD, 2007, University of Washington
 RAMBSBORG, CHRISTOPHER, 2011; PhD, 2005, Northwestern University
 SUBRAMANIAN, SELVAM, 2008; PhD, 2008, University of Madras (India); MSC, 2002, University of Madras (India)
 SUNKEL, JORGE, 2009; PhD, 1998, University of Washington; MS, 1992, University of California (Berkeley)
 WEIDNER, MARCUS TOBIAS, 2007; PhD, 2006, University of Kassel (Germany); Diploma, 2002, University of Kassel (Germany)
 WHITAKER, JOHN D., 2006; PhD, 2003, University of Washington

Lecturer

KIM, ANTHONY, 2014; PhD, 2002, University of Washington; MS, 1993, University of California (Davis)

Civil and Environmental Engineering

Professors

ARDUINO, PEDRO, 1997; PhD, 1996, Georgia Institute of Technology; MSCE, 1996, Georgia Institute of Technology
 BENJAMIN, MARK M * 1981; PhD, 1979, Stanford University; MS, 1973, Stanford University
 BOGAN, RICHARD H * 1995; DSc, 1954, Massachusetts Institute of Technology; MS, 1952, Massachusetts Institute of Technology
 BRETT, MICHAEL T., 1997; PhD, 1990, University of Uppsala (Sweden); MSC, 1985, University of Maine
 BURGESS, STEPHEN J * 1981; PhD, 1970, Stanford University; MS, 1968, Stanford University
 CARLSON, DALE A., 1955; PhD, 1960, University of Wisconsin (Madison); MSCE, 1951, University of Washington
 CHANG, YU-JUNG, 2000; PhD, 1996, University of Washington; MSCE, 1992, University of Washington
 CHEN, QIUZI, 2009; PhD, 2001, University of California (Davis); MS, 1995, New Jersey Institute of Technology
 EBERHARD, MARC O., 1989; PhD, 1989, University of Illinois; MS, 1986, University of Illinois
 EIKUM, ARILD, 2000; PhD, 1973, University of Washington; MSCE, 1967, University of Washington
 ELIAS, ZIAD * 1999; DSc, 1963, Massachusetts Institute of Technology
 EVANS, ROGER J * 1990; PhD, 1965, University of California (Berkeley); MSC, 1959, Brown University
 HAWKINS, NEIL M, 2002; PhD, 1961, University of Illinois; MS, 1959, University of Illinois
 HOLTZ, ROBERT DEAN * 1988; PhD, 1970, Northwestern University; MSCE, 1962, University of Minnesota
 JACOBY, JEAN M. * 2000; PhD, 1986, University of Washington; MS, 1981, University of Washington
 JESSUP, ANDREW T., 1990; PhD, 1990, Massachusetts Institute of Technology; MSE, 1988, Massachusetts Institute of Technology
 KINNEY, THOMAS C., 2001; PhD, 1979, University of Illinois (Urbana); MS, 1966, University of Washington
 KORSHIN, GREGORY, 1991; PhD, 1983, Chemical Engineering Institute (Russia)
 KRAMER, STEVEN, 1984; PhD, 1984, University of California (Berkeley); MEng, 1979, University of California (Berkeley)
 LARSON, TIMOTHY, 1970; PhD, 1976, University of Washington; MS, 1972, University of Washington
 LEHMAN, DAWN E, 1998; PhD, 1998, University of California (Berkeley); MSEN, 1992, University of California (Berkeley)
 LETTENMAIER, DENNIS P * 1991; PhD, 1975, University of Washington; MS, 1973, George Washington University
 LOWES, LAURA N, 2000; PhD, 1999, University of California (Berkeley); MS, 1999, University of California (Berkeley)
 MAHONEY, JOE PAUL, 1978; PhD, 1979, Texas A&M University; MSCE, 1970, Texas A&M University
 MALCOLM, DAVID JOHN, 2013; PhD, 1973, University of Calgary (Canada); MSC, 1969, McGill University (Canada)
 MARSHALL, JULIAN, 2015; PhD, 2005, University of California (Berkeley); MS, 2002, University of California (Berkeley)
 MILLER, GREGORY, 1983; PhD, 1984, Northwestern University; MSCE, 1981, Northwestern University
 NECE, RONALD E * 1996; DSc, 1958, Massachusetts Institute of Technology; MS, 1951, Lehigh University
 NIEMEIER, DEBBIE A., 2012; PhD, 1994, University of Washington; MSCE, 1991, University of Maine
 NIHAN, NANCY L * 1985; PhD, 1970, Northwestern University
 PALMER, RICHARD * 1990; PhD, 1979, Johns Hopkins University; MS, 1973, Stanford University
 PAVLOVEC, BRIAN, 2012; BS, 1982, Iowa State University

PILAT, MICHAEL J * 1982; PhD, 1967, University of Washington; MS, 1963, University of Washington
 REED, DOROTHY, 1983; PhD, 1980, Princeton University; MSE, 1977, Princeton University
 REIBER, STEVE H., 2000; PhD, 1983, University of Utah; ME, 1977, University of Michigan
 ROEDER, CHARLES W., 1977; PhD, 1977, University of California (Berkeley); MS, 1971, University of Illinois
 RUTHERFORD, G. SCOTT, 1981; PhD, 1974, Northwestern University; MSCE, 1968, Washington State University
 SCHNEIDER, JERRY * 1996; PhD, 1966, University of Pennsylvania; MCP, 1961, University of California
 STAHL, DAVID A, 2000; PhD, 1978, University of Illinois (Urbana); MS, 1975, University of Illinois (Urbana)
 STANTON, JOHN, 1978; PhD, 1978, University of California (Berkeley); MSCE, 1975, Cornell University
 STENSEL, H. DAVID, 1983; PhD, 1971, Cornell University; ME, 1968, Cornell University
 TAWRESEY, JOHN G, 1985; MBA, 1975, University of Washington; MS, 1968, Cornell University
 TAYLOR, ANDREW WARREN, 2005; PhD, 1990, University of Texas (Austin); MSCE, 1985, University of Washington
 THOMPSON, PHILLIP L., 2001; PhD, 1997, University of Iowa; MS, 1992, University of Iowa
 WADDELL, PAUL A, 1997; PhD, 1989, University of Texas (Dallas); MS, 1981, University of Texas (Houston)
 WANG, YINHAI, 1998; PhD, 1998, University of Tokyo (Japan); MSCE, 1991, Tsinghua University (China)
 WELCH, EUGENE B * 1997; PhD, 1967, University of Washington; MS, 1959, Michigan State University
 WIGMOSTA, MARK S., 2015; PhD, 1991, University of Washington; MS, 1983, University of Washington
 WOOD, ERIC F., 2000; DSc, 1974, Massachusetts Institute of Technology; MS, 1972, Massachusetts Institute of Technology
 YANG, ZHAOQING, 2015; PhD, 1998, College of William and Mary; MS, 1992, University of Rhode Island
 YEARSLEY, JOHN R., 1996; PhD, 1989, University of Washington; MS, 1968, Massachusetts Institute of Technology
 YEH, HARRY H * 1995; PhD, 1983, University of California (Berkeley); MS, 1977, Washington State University

Associate Professors

BAN, XUEGANG, 2016; PhD, 2005, University of Wisconsin (Madison); MS, 2003, University of Wisconsin (Madison)
 BERMAN, JEFFREY WILLIAM, 2006; PhD, 2006, State University of New York (Buffalo); MS, 2003, State University of New York (Buffalo)
 DAVIDSON, SEANA K, 2001; PhD, 1999, University of California (San Diego)
 DODD, MICHAEL, 2009; PhD, 2008, Swiss Federal Institute of Technology; MSEE, 2003, Georgia Institute of Technology
 GONZALEZ, DAVID, 2009; MBA, 2007, University of Washington; MSCE, 1998, University of Illinois (Urbana)
 GOODCHILD, ANNE V., 2005; PhD, 2005, University of California (Berkeley); MS, 2002, University of California (Berkeley)
 HORNER-DEVINE, ALEXANDER, 2004; DPhil, 2003, Stanford University; MEng, 1998, Stanford University
 HOSSAIN, FAISAL, 2014; PhD, 2004, University of Connecticut; MEng, 1999, National University of Singapore
 ISTANBULLUOGLU, ERKAN, 2009; PhD, 2003, Utah State University; MS, 1998, University of Uludag (Turkey)
 JANSSEN, DONALD J., 1985; PhD, 1985, University of Illinois; MS, 1980, University of Illinois
 KENT, JOSEPH C * 1990; PhD, 1952, University of California (Berkeley); MS, 1948, Stanford University
 KEOUGH, WILLIAM M, 2011; MFA, 1994, University of Houston
 LUNDQUIST, JESSICA D., 2006; PhD, 2004, University of California (San Diego); MS, 2000, University of California (San Diego)
 MACKENZIE-HELNWEIN, PETER, 2003; PhD, 1997, Vienna University of Technology; Diploma, 1991, Vienna University of Technology
 MCCORMACK, EDWARD D, 1985; PhD, 1997, University of Washington; MS, 1985, University of Washington
 MORRIS, ROBERT DUBOIS, 2005; MD, 1991, Medical College of Wisconsin; PhD, 1986, University of Wisconsin (Milwaukee); MS, 1982, University of Wisconsin (Milwaukee)
 MUENCH, STEPHEN T, 1990; PhD, 2004, University of Washington; MSCE, 1998, University of Washington
 NIJSSEN, BART, 1994; PhD, 2000, University of Washington; MSC, 1991, Wageningen University (The Netherlands)
 SPYRIDAKIS, DIMITRIS * 1996; PhD, 1965, University of Wisconsin (Madison); MS, 1959, University of Wisconsin
 STULL, DANIEL G, 1987; MBA, 1989, University of Washington
 SWANSON, DAVID B., 2007; MSCE, 1991, University of Washington
 THOMSON, JAMES M., 2006; PhD, 2008, Massachusetts Institute of Technology
 WANG, HUA, 2011; PhD, 2004, Harbin Institute of Technology (China); MS, 2000, Harbin Institute of Technology (China)
 WARTMAN, JOSEPH, 2010; PhD, 1999, University of California (Berkeley); MEng, 1996, University of California (Berkeley)

Assistant Professors

AHMED, KAMAL M., 1993; PhD, 1999, University of Washington; MSC, 1988, Cairo University (Egypt)
 AVERY, RYAN P., 2002; PhD, 2008, University of Washington; MSCE, 2005, University of Washington
 BASSOK, ALON, 2009; PhD, 2009, University of Washington; MUP, 2004, University of Washington

CAI, ZHENXIAO, 2006; PhD, 2011, University of Washington; MS, 2008, University of Washington
 CALVI, PAOLO, 2015; PhD, 2014, University of Toronto (Canada); MSC, 2010, University of Pavia (Italy)
 CHANG, KEVIN N., 2006; PhD, 2005, University of Washington; MSCE, 1997, University of Washington
 CHICKADEL, C. CHRISTOPHER, 2006; PhD, 2007, Oregon State University; MS, 2003, Oregon State University
 CRESWELL, JOEL, 2012; PhD, 2011, University of Wisconsin (Madison); MS, 2006, Yale University
 DEVRIES, PAUL E., 2000; PhD, 2000, University of Washington; MSE, 1994, University of Washington
 GOUGH, HEIDI LOIS, 2004; PhD, 2004, Northwestern University; MS, 1998, Northwestern University
 JOHANNESSEN, ERIK, 2015; PhD, 2012, Norwegian Univ of Science & Tech(Norway); MSCE, 2005, University of Washington
 KAINZ, MARTIN, 2008; PhD, 2001, Universite du Quebec; MSC, 1995, University of Vienna, Austria
 KAMINSKY, JESSICA A, 2014; PhD, 2013, University of Colorado (Boulder)
 KIM, AMY AHIM, 2014; PhD, 2014, Texas A&M University; MS, 2008, Illinois Institute of Technology

Associate Professors

AGARWALA, ASEEM, 2006; PhD, 2006, University of Washington; MS, 2002, University of Washington
 BALAZINSKA, MAGDALENA, 2006; PhD, 2005, Massachusetts Institute of Technology; MS, 1999, Ecole Polytechnique De Montreal (Canada)
 BENALOH, JOSH, 2000; PhD, 1987, Yale University; MPHIL, 1985, University of Chicago
 CEZE, LUIS HENRIQUE DE BAR, 2007; PhD, 2007, University of Illinois; MEng, 2002, University of San Paulo (Brazil)
 FOGARTY, JAMES A, 2006; PhD, 2006, Carnegie Mellon University; MS, 2005, Carnegie Mellon University
 GOLDMAN, DANIEL, 2012; PhD, 2007, University of Washington; MSC, 1995, Stanford University
 GUESTRIIN, CARLOS E, 2012; PhD, 2003, Stanford University; MSC, 2000, Stanford University
 GULWANI, SUMIT, 2012; PhD, 2005, University of California (Berkeley)
 HEER, JEFFREY M, 2013; PhD, 2008, University of California (Berkeley); MS, 2004, University of California (Berkeley)
 JONES, MICHAEL B, 2002; PhD, 1992, Carnegie Mellon University; MS, 1988, Carnegie Mellon University
 KENDALL, CLYDE JAKE, 2016; PhD, 2008, University of California (Santa Cruz)
 KIMURA, GARY D., 2002; PhD, 1984, University of Washington; MS, 1981, University of Washington
 LAMACCHIA, BRIAN A, 2001; PhD, 1996, Massachusetts Institute of Technology; MS, 1991, Massachusetts Institute of Technology
 LAMARCA, ANTHONY, 2001; PhD, 1996, University of Washington; MS, 1992, University of Washington
 LARUS, JAMES R., 2000; PhD, 1989, University of California (Berkeley); MS, 1982, University of California (Berkeley)
 LI, YANG, 2004; PhD, 2002, Chinese Academy of Sciences (China); MA, 1999, Northwest University (China)
 OSKIN, MARK H., 2001; PhD, 2001, University of California (Davis); MS, 2000, University of California (Davis)
 PARIKH, TAPAN S, 2007; PhD, 2007, University of Washington; MSC, 1999, University of Washington
 PATEL, SHWETAK NARAN, 2008; PhD, 2008, Georgia Institute of Technology
 POPOVIC, JOVAN, 2008; PhD, 2001, Carnegie Mellon University; MS, 1999, Carnegie Mellon University
 QADEER, SHAZ, 2005; PhD, 1999, University of California (Berkeley); MS, 1997, University of California (Berkeley)
 RAO, ANUP, 2010; PhD, 2007, University of Texas (Austin)
 SMITH, JOSHUA R., 2005; PhD, 1999, Massachusetts Institute of Technology; MA, 1997, University of Cambridge (UK)
 SMITH, NOAH A, 2014; PhD, 2006, Johns Hopkins University; MS, 2004, Johns Hopkins University
 ZETTLEMOYER, LUKE S, 2010; PhD, 2009, Massachusetts Institute of Technology; MS, 2003, Massachusetts Institute of Technology
 ZITNICK, CHARLES LAWRENCE, 2011; PhD, 2003, Carnegie Mellon University

Assistant Professors

AGARWAL, SAMEER, 2006; PhD, 2006, University of California (San Diego); MS, 2000, Indian Institute of Technology (India)
 AGRAWALA, MANEESH, 2002; PhD, 2002, Stanford University
 BACON, DAVE M, 2006; PhD, 2001, University of California (Berkeley)
 BIRD, CHRISTIAN ALMA, 2011; PhD, 2010, University of California (Davis); MS, 2008, University of California (Davis)
 BO, LIE FENG, 2010; PhD, 2007, Xidian University (China)
 BRUNSKILL, EMMA P., 2013; PhD, 2009, Massachusetts Institute of Technology; MSC, 2002, Oxford University (UK)
 CAKMAK, MAYA, 2013; PhD, 2012, Georgia Institute of Technology; MSC, 2007, Middle East Technical University (Turkey)
 CHEUNG, ALVIN K, 2015
 CHOI, YEJIN, 2014; PhD, 2010, Cornell University; MS, 2009, Cornell University
 DEKEL, OFER, 2011; PhD, 2007, Hebrew University (Israel); MSC, 2003, Hebrew University (Israel)
 FARHADI, ALI, 2012; PhD, 2011, University of Illinois (Urbana)
 GIRSHICK, ROSS BROOK, 2016; PhD, 2012, University of Chicago; MS, 2009, University of Chicago
 GOLLAKOTA, SHYAMNATH V, 2012; PhD, 2013, Massachusetts Institute of Technology; SM, 2008, Massachusetts Institute of Technology

GREENSTEIN, BENJAMIN MORRI, 2008; PhD, 2006, University of California (Los Angeles); MS, 1999, Temple University
 HALPERIN, DANIEL C, 2012; PhD, 2012, University of Washington; MS, 2008, University of Washington
 HARROW, ARAM WETTROTH, 2010; PhD, 2005, Massachusetts Institute of Technology
 HEIMERL, KURTIS L., 2002; PhD, 2013, University of California (Berkeley); MSCE, 2009, University of California (Berkeley)
 HERTZMANN, AARON PHILLIP, 2001; PhD, 2001, New York University; MS, 1998, New York University
 JUNG, JAEYEON, 2007; PhD, 2006, Korea Advanced Inst of Science and Tech; MS, 1998, Korea Advanced Inst of Science and Tech
 KEMELMAHER, IRENA, 2009; PhD, 2009, Weizmann Institute For Science (Israel); MSC, 2004, Weizmann Institute For Science (Israel)
 KIM, BEEN, 2015; PhD, 2015, Massachusetts College of Art; MA, 2010, Massachusetts College of Art
 LEE, SU-IN, 2010; PhD, 2010, Stanford University
 LEVINE, SERGEY V, 2016; PhD, 2014, Stanford University; MS, 2009, Stanford University
 LIU, YUN-EN, 2015; PhD, 2015, University of Washington; MA, 2011, University of Washington
 LIVSHITS, BENJAMIN, 2009; PhD, 2006, Stanford University; MS, 2001, Stanford University
 MAHAJAN, RATUL, 2010; PhD, 2005, University of Washington; MS, 2001, University of Washington
 MAUSAM,, 2007; PhD, 2007, University of Washington; MS, 2004, University of Washington
 MORRIS, MEREDITH JUNE, 2008; PhD, 2006, Stanford University; MS, 2003, Stanford University
 NEWCOMBE, RICHARD ANDREW, 2012; PhD, 2014, Imperial College; MSC, 2005, University of Essex (UK)
 OVEIS GHARAN, SHAYAN, 2015; PhD, 2013, Stanford University
 PHILIPOSE, MATTHAI, 2009; PhD, 2005, University of Washington; MS, 1995, University of Washington
 PORTS, DANIEL ROBERT KENNE, 2012; PhD, 2012, Massachusetts Institute of Technology; MEng, 2007, Massachusetts Institute of Technology
 REINECKE, KATHARINA, 2015; PhD, 2010, University of Zurich (Switzerland); MSC, 2006, Universitat Koblenz Landau
 REN, XIAOFENG, 2010; PhD, 2006, University of California (Berkeley); MS, 2000, Stanford University
 ROESNER, FRANZISKA, 2009; PhD, 2014, University of Washington; MS, 2011, University of Washington
 RUSSELL, BRYAN C, 2012; PhD, 2008, Massachusetts Institute of Technology
 SINGH, MOHIT, 2014; PhD, 2008, Carnegie Mellon University; MS, 2005, Carnegie Mellon University
 STRAUSS, KARIN, 2007; PhD, 2007, University of Illinois (Urbana); MEng, 2002, University of Sao Paulo
 TATLOCK, ZACHARY L, 2013
 TORLAK, EMINA, 2014; PhD, 2009, Massachusetts Institute of Technology; MEng, 2004, Massachusetts Institute of Technology
 WANG, XI, 2014; PhD, 2014, Massachusetts Institute of Technology; ME, 2008, Tsinghua University (China)
 WANG, YULIANG, 2016; PhD, 2013, University of Illinois at Urbana-Champaign; MS, 2013, University of Illinois at Urbana-Champaign
 ZIMMERMANN, THOMAS M J, 2011; PhD, 2008, University of Saarlandes (Germany); MS, 2004, University of Passau (Germany)

Senior Lecturers

MONES, BARBARA, 1999; MFA, 1979, Rhode Island School of Design
 PERKINS, JOHN H. JR., 1998; MS, 1982, Cornell University

Lecturers

ANDERSON, RUTH ELIZABETH, 1991; PhD, 2006, University of Washington; MS, 1994, University of Washington
 BLANK, ADAM DAVID, 2014; MS, 2014, Carnegie Mellon University
 EVANS, SUSAN R, 2011; MS, 2016, University of Washington-Seattle Campus
 FUNG, ZORAH LEA, 2011; MS, 2015, University of Washington
 HSIA, JUSTIN EZEKIEL, 2016; PhD, 2015, University of California (Berkeley); MS, 2011, University of California (Berkeley)
 HUNT, DAVID G., 2000; BA, 2000, University of Washington

Electrical Engineering

Professors

ACERO, ALEJANDRO, 2000; PhD, 1990, Carnegie Mellon University; ME, 1987, Rice University
 AFROMOWITZ, MARTIN * 1989; PhD, 1969, Columbia University; MS, 1966, School of Engr and Applied Science (Ny)
 ALBRECHT, ROBERT W * 1981; PhD, 1961, University of Michigan; MS, 1958, University of Michigan
 ALEXANDRO, FRANK J * 1981; DSc, 1964, New York University; MSEE, 1959, New York University

ALLSTOT, DAVID, 1999; PhD, 1979, University of California (Berkeley); MSEE, 1974, Oregon State University
 AMINDAVAR, HAMIDREZA, 2013; PhD, 1991, University of Washington; MSC, 1992, University of Washington
 AMIRPARVIZ, BABAK, 2003; PhD, 2001, University of Michigan; MS, 2001, University of Michigan
 ANANTRAM, MANJERI, 2008; PhD, 1995, Purdue University; MSC, 1989, University of Poona, India
 ANDERSEN, JONNY * 1981; PhD, 1965, Massachusetts Institute of Technology; MSEE, 1962, Massachusetts Institute of Technology
 ATAL, BISHNU, 2002; PhD, 1968, Polytechnic Institute of Brooklyn
 ATLAS, LES EUGENE, 1983; PhD, 1984, Stanford University; MS, 1978, Stanford University
 BERNARD, GARY D * 2000; PhD, 1965, University of Washington; MSEE, 1960, University of Washington
 BILMES, JEFFREY A., 1999; PhD, 1999, University of California (Berkeley); MS, 1993, Massachusetts Institute of Technology
 BOHRINGER, KARL F., 1998; PhD, 1997, Cornell University; MS, 1992, Cornell University
 CAMPOSANO, RAUL, 2012; PhD, 1981, Technische Universität (Germany); MSEE, 1978, Universidad de Chile
 CHIZECK, HOWARD JAY, 1998; DSc, 1982, Massachusetts Institute of Technology; MS, 1976, Case Western Reserve University
 CWIK, THOMAS A., 2000; PhD, 1986, University of Illinois; MSEE, 1981, University of Illinois
 DAMBORG, MARK J * 1985; PhD, 1969, University of Michigan; MSEE, 1963, University of Michigan
 DANIELS, PATRICIA D., 2000; PhD, 1973, University of California (Berkeley)
 DARLING, ROBERT B, 1985; PhD, 1985, Georgia Institute of Technology; MS, 1982, Georgia Institute of Technology
 DENG, LI, 2000; PhD, 1986, University of Wisconsin; MSC, 1984, University of Wisconsin
 DING, KUNG-HAU, 2006; PhD, 1989, University of Washington; MS, 1985, University of Washington
 DOW, DANIEL G * 1995; PhD, 1958, Stanford University; MS, 1953, University of Michigan
 DUNHAM, SCOTT T., 1999; PhD, 1985, Stanford University; MSEE, 1980, Stanford University
 EHRENBERG, JOHN E * 2000; PhD, 1973, University of Washington; MSEE, 1968, Massachusetts Institute of Technology
 EL-SHARKAWI, MOHAMED A., 1980; PhD, 1980, University of British Columbia (Canada); MS, 1977, University of British Columbia (Canada)
 GOLDSTEIN, EVAN, 2003; PhD, 1989, Columbia University; MS, 1986, Columbia University; MA, 1977, Columbia University
 GOODSON, ANTHONY P., 1999; PhD, 1998, University of Washington; MS, 1994, University of Washington
 HANNAFORD, BLAKE, 1989; PhD, 1985, University of California (Berkeley); MS, 1982, University of California (Berkeley)
 HARALICK, ROBERT M * 1986; PhD, 1969, University of Kansas; MSEE, 1967, University of Kansas
 HASSAN, AMER, 2001; PhD, 1988, University of Michigan, Ann Arbor; MSEE, 1984, University of Kansas
 HAUCK, SCOTT, 1990; PhD, 1995, University of Washington; MS, 1992, University of Washington
 HE, XIAODONG, 2012; PhD, 2003, University of Missouri (Columbia); MS, 1999, Chinese Academy of Sciences
 HENDERSON, THOMAS R, 2002; PhD, 1999, University of California (Berkeley)
 HUANG, XUEDONG * 2000; PhD, 1989, University of Edinburgh (UK); MS, 1984, Tsinghua University (China)
 HWANG, JENQ-NENG, 1989; PhD, 1988, University of Southern California; MSEE, 1983, National Taiwan University
 ISHIMARU, AKIRA, 1953; PhD, 1958, University of Washington
 JACKSON, DARRELL R, 1976; PhD, 1977, California Institute of Technology; PhD, 1966, University of Washington
 JANDHYALA, VIKRAM, 2000; PhD, 1998, University of Illinois (Urbana); MSEE, 1995, University of Illinois (Urbana)
 KIRCHHOFF, KATRIN, 1999; PhD, 1999, Universität Bielefeld (Germany); MA, 1996, Universität Bielefeld (Germany)
 KIRSCHEN, DANIEL SADI, 2011; PhD, 1985, University of Wisconsin (Madison); MSC, 1980, University of Wisconsin (Madison)
 KLAVINS, ERIC, 2003; PhD, 2001, University of Michigan; MS, 1998, University of Michigan
 KUGA, YASUO, 1991; PhD, 1983, University of Washington; MS, 1979, University of Washington
 LAURITZEN, PETER O * 1999; PhD, 1961, Stanford University; MS, 1958, Stanford University
 LI, MIKE P., 2010; PhD, 1991, University of Alabama; MSE, 1991, University of Alabama
 LIN, LIH-YUAN, 2003; PhD, 1996, University of California (Los Angeles); MS, 1996, University of California (Los Angeles)
 LIU, HUI, 2000; PhD, 1995, University of Texas (Austin); MS, 1992, Portland State University
 LIU, ZICHENG, 2012; PhD, 1996, Princeton University; MS, 1989, Chinese Academy of Sciences
 LUO, FA-LONG, 2016; PhD, 1992, Xidian University (China); MS, 1989, Xidian University (China)
 MACMILLEN, DONALD B., 2012; PhD, 1979, University of Rochester; MS, 1976, University of Rochester
 MALVAR, HENRIQUE S., 2000; PhD, 1986, Massachusetts Institute of Technology; MSEE, 1979, Universidade Federal do Rio de Janeiro (Brazil)
 MAMISHEV, ALEXANDER V, 1999; PhD, 1999, Massachusetts Institute of Technology; MS, 1994, Texas A&M University
 MORITZ, WILLIAM E * 1997; PhD, 1969, Stanford University; MS, 1966, Stanford University
 NELSON, BRIAN A., 1987; PhD, 1987, University of Wisconsin (Madison); MS, 1983, University of Wisconsin
 OSTENDORF, MARI, 1999; PhD, 1985, Stanford University; MSEE, 1981, Stanford University

PEDEN, IRENE CARSWELL * 1994; PhD, 1962, Stanford University; MS, 1958, Stanford University
 POOVENDRAN, RAADHAKRISHNAN, 2000; PhD, 1999, University of Maryland; MSEE, 1991, University of Michigan, Ann Arbor
 PORTER, ROBERT P * 1998; PhD, 1970, Northeastern University
 RAHNAMAI, KOUROSH, 2012; PhD, 1985, Wichita State University; MS, 1981, Wichita State University
 RAMON, CEON, 1989; PhD, 1973, University of Utah
 RISKIN, EVE A, 1990; PhD, 1990, Stanford University; MS, 1986, Stanford University; MSEE, 1984, Stanford University
 RITCEY, JAMES A., 1985; PhD, 1985, University of California (San Diego); MS, 1980, Syracuse University
 ROY, SUMIT, 1998; PhD, 1988, University of California (Santa Barbara); MA, 1985, University of California (Santa Barbara)
 SAHR, JOHN D., 1991; PhD, 1990, Cornell University
 SHI, CHUAN JIN, 1998; PhD, 1994, University of Waterloo (Canada); MAS, 1991, University of Waterloo (Canada)
 SIGELMANN, RUBENS A * 1991; PhD, 1963, University of Washington; MS, 1961, University of Washington
 SLANEY, MALCOLM, 2012; PhD, 1985, Purdue University; MS, 1981, Purdue University
 SOMA, MANI, 1982; PhD, 1980, Stanford University; MSEE, 1977, Stanford University
 SPINDEL, ROBERT C., 1987; PhD, 1971, Yale University; MPHIL, 1968, Yale University
 SUN, MING-TING, 1996; PhD, 1985, University of California (Los Angeles); MS, 1981, University of Texas (Arlington)
 TASHEV, IVAN JELEV, 2012; PhD, 1990, Technical University of Sofia (Bulgaria); MS, 1984, Technical University of Sofia (Bulgaria)
 TSANG, LEUNG * 1986; PhD, 1976, Massachusetts Institute of Technology; MS, 1973, Massachusetts Institute of Technology
 VENKATA, SUBRAHMANYAM S, 2000; PhD, 1971, University of South Carolina; MSEE, 1966, Indian Institute of Technology (India)
 WILSON, DENISE M, 1999; PhD, 1995, Georgia Institute of Technology; MSEE, 1989, Georgia Institute of Technology
 WU, FENG, 2008; PhD, 1999, Harbin Institute of Technology (China); MS, 1996, Harbin Institute of Technology (China)
 YEE, SINCLAIR S, 1981; PhD, 1965, University of California (Berkeley); MS, 1961, University of California (Berkeley)
 ZHANG, ZHENGYOU, 2006; PhD, 1990, University of Paris Sud XI (France); MS, 1987, University of Nancy (France)
 ZICK, GREGORY L, 1984; PhD, 1974, University of Michigan; MS, 1972, University of Michigan

Associate Professors

ARABSHAHI, PAYMAN, 1996; PhD, 1994, University of Washington; MS, 1990, University of Washington
 BASKARAN, RAJASHREE, 2006; PhD, 2003, University of California (Santa Barbara); MS, 2000, Cornell University
 BRAUNISCH, HENNING, 2009; PhD, 2001, Massachusetts Institute of Technology; MS, 1996, University of Hannover (Germany)
 BUSHNELL, LINDA, 2000; PhD, 1994, University of California (Berkeley); MA, 1989, University of California (Berkeley)
 CHRISTIE, RICHARD DUNSTAN, 1989; PhD, 1989, Carnegie Mellon University; MSEE, 1974, Rensselaer Polytechnic Institute
 FALK, ROBERT AARON, 1995; PhD, 1979, University of Washington; MS, 1974, University of Washington
 FAZEL SARJOU, MARYAM, 2007; PhD, 2002, Stanford University; MS, 1997, Stanford University
 FERIS, ROGERIO SCHMIDT, 2008; PhD, 2006, University of California (Santa Barbara); MSC, 2001, University of Sao Paulo
 GIRI, JAY * 2000; PhD, 1977, Clark University; MS, 1971, State University of New York (Stony Brook)
 HELMS, WARD J * 1981; PhD, 1968, University of Washington; MS, 1963, University of Washington
 KROUT, DAVID W., 2001; PhD, 2006, University of Washington
 LIGER, MATTHIEU, 2011; PhD, 2006, California Institute of Technology; MS, 2001, California Institute of Technology
 LIND, FRANK D, 2011; PhD, 1999, University of Washington
 LING, FENG, 2008; PhD, 2001, University of Illinois; MSEE, 1996, Nanjing University of Technology (China)
 MIGUEL, AGNIESZKA C., 2002; PhD, 2001, University of Washington; MS, 1996, Florida Atlantic University
 NIKITIN, PAVEL, 2002; PhD, 2002, Carnegie Mellon University; MS, 1998, Utah State University
 OTIS, BRIAN P, 2005; PhD, 2005, University of California (Berkeley); MS, 2002, University of California (Berkeley)
 PITTON, JAMES W, 1989; PhD, 1994, University of Washington; MSEE, 1986, University of Michigan
 REYNOLDS, MATTHEW STEPHEN, 2013; PhD, 2003, Massachusetts Institute of Technology; MEng, 1999, Massachusetts Institute of Technology
 ROSEN, JACOB, 1999; PhD, 1997, Tel Aviv University (Israel); MSC, 1993, Tel Aviv University (Israel)
 RUDELL, JACQUES CHRISTOPHE, 2009; PhD, 2000, University of California (Berkeley); MSEE, 1994, University of California (Berkeley)
 SEELIG, GEORG, 2009; PhD, 2003, University of Geneva (Switzerland); Diploma, 1999, University of Basel (Switzerland)
 SELTZER, MICHAEL, 2012; PhD, 2003, Carnegie Mellon University; MS, 2000, Carnegie Mellon University
 SHMULEVICH, ILYA, 2006; PhD, 1997, Purdue University; MS, 1993, Purdue University
 VENEMA, STEVEN C., 2007; PhD, 1999, University of Washington; MSEE, 1994, University of Washington
 WANG, XUDONG, 2008; PhD, 2003, Georgia Institute of Technology; PhD, 1997, Shanghai Jiaotong University

ZHANG, YAO-JIANG, 2015; PhD, 1999, Beijing Medical University (China); ME, 1994, University of Science and Technology of China

Assistant Professors

ALOMAIR, BASEL SALEH, 2012; PhD, 2011, University of Washington; MS, 2003, University of Wisconsin
 BARKER, THERESA J., 2010; PhD, 2010, University of Washington; MIE, 2005, University of Washington
 BONDE, PRAMOD, 2012; MBBS, 1993, University of Bombay; MS, 1996, University of Bombay
 BURDEN, SAMUEL A., 2004; PhD, 2014, University of California (Berkeley)
 CHAKRABORTY, SWAGATO, 2005; PhD, 2005, University of Washington; MS, 2005, University of Washington
 CHARLES, CAMERON, 2012; PhD, 2006, University of Washington; MS, 2004, University of Utah
 COOPER, EMILY, 2011; PhD, 2003, Massachusetts Institute of Technology; MEng, 2000, Massachusetts Institute of Technology
 EGURO, KENNETH, 2009; PhD, 2008, University of Washington; MS, 2002, University of Washington
 FARQUHARSON, GORDON, 2009; PhD, 2005, University of Massachusetts; MSC, 1999, University of Capetown (South Africa)
 GHOSH, CHITTABRATA, 2009; PhD, 2009, University of Cincinnati; MS, 2004, Indian Institute of Technology (India)
 GOPE, DIPANJAN, 2008; PhD, 2005, University of Washington; MS, 2003, University of Washington
 GRAY, ANDREW A., 2001; PhD, 2000, University of Southern California; MS, 1997, Johns Hopkins University
 GUO, HSIU-WU, 2010; PhD, 2008, University of Washington; ME, 2003, University of Washington
 HAJISHIRZI, HANNANEH, 2012; PhD, 2011, University of Illinois (Urbana); MSC, 2011, University of Illinois (Urbana)
 HESSAR, FARZAD, 2016; PhD, 2015, University of Washington; MSC, 2010, Sharif University of Technology (Iran)
 HOCHBERG, MICHAEL, 2007; PhD, 2006, California Institute of Technology; MA, 2005, California Institute of Technology
 KANNAN, SREERAM, 2014; PhD, 2012, University of Illinois; ME, 2008, Indian Institute of Science (India)
 KAPLAN, DAVID LEON, 2004; MS, 1978, University of California (Berkeley)
 KIM, YOON SANG, 2000; PhD, 1999, Sungkyunkwan University (Korea); MS, 1995, Sungkyunkwan University (Korea)
 LAHDESMÄKI, ILKKA J., 2013; PhD, 1999, University of Washington; MSC, 1993, Abo Akademi University
 LOUIE, HENRY, 2009; PhD, 2008, University of Washington; MS, 2004, University of Illinois
 MAJUMDAR, ARKA, 2013; PhD, 2012, Stanford University; MS, 2009, Stanford University
 MODAYUR, BHARATH KUMAR R., 2013; PhD, 1995, University of Washington; MSEE, 1991, University of Washington
 MURUGAN, RAJEN MANICON, 2012; PhD, 1999, University of Manitoba (Canada); MSC, 1995, University of Leeds (UK)
 NAGEL, NICHOLAS J., 2012; PhD, 1998, University of Wisconsin; MS, 1996, University of Wisconsin
 NGUYEN, THO THI-HUYNH, 2015; PhD, 2009, University of Washington; MS, 2005, University of Washington
 ORSBORN, AMY, 2016; PhD, 2013, University of California-Berkeley
 ORTEGA VAZQUEZ, MIGUEL A, 2012; PhD, 2006, University of Manchester (UK); MSC, 2001, Autonoma of Nuevo Leon University, Mexico
 PARKER, HSING-YEH, 2015; PhD, 1985, University of Oregon
 PUTNAM, ANDREW R, 2012; PhD, 2009, University of Washington; MS, 2006, University of Washington
 RATLIFF, LILLIAN JANE, 2015; PhD, 2015, University of California (Berkeley); MSEE, 2010, University of Nevada
 REINHARDT, COLIN NORRIS, 2005; PhD, 2010, University of Washington
 RYDEN, OLOF FREDRIK, 2013; PhD, 2013, University of Washington; MS, 2012, University of Washington
 SATHE, VISVESH, 2013; PhD, 2007, University of Michigan, Ann Arbor; MS, 2003, University of Michigan, Ann Arbor
 SCHNEIDER, KEVIN P, 2010; MSEE, 2002, University of Washington
 STEWART, ANDREW R, 2011; PhD, 2012, Princeton University; MA, 2008, Princeton University
 SWIERC, AGATA ANNA, 2016; PhD, 2015, Silesian University of Technology; MSC, 2010, Silesian University of Technology
 THOMAS, JOHN R., 2006; PhD, 2006, University of Washington; MSEE, 1998, University of Washington
 WEISS, DIRK NICOLAS, 2010; PhD, 2000, Max Planck Institute (Berlin)
 WILLIAMS, KRESIMIR, 2013; PhD, 2013, University of Washington; MS, 2002, Auburn University
 XIAO, LIN, 2012; PhD, 2004, Stanford University; ME, 1997, Beijing University of Aeronautics and Astronautics
 YAPICI, MURAT KAYA, 2016; PhD, 2009, Texas A&M University
 ZHANG, BAOSAN, 2015; PhD, 2013, University of California (Berkeley)

Lecturers

BONACI, TAMARA, 2009; DPhil, 2015, University of Washington; MS, 2012, University of Washington
 CHEN, TAI-CHANG, 1991; PhD, 1997, University of Washington; MS, 1993, University of Washington
 ECKER, ALLAN C., 2003; MSEE, 2005, University of Washington
 POTTER, WILLIAM W, 1990; MSEE, 1959, Us Naval Postgraduate School

Human Centered Design and Engineering

Professors

ARAGON, CECILIA, 2010; PhD, 2004, University of California (Berkeley); MS, 1987, University of California (Berkeley)
 ATMAN, CYNTHIA J., 1998; PhD, 1990, Carnegie Mellon University; MS, 1983, Ohio State University
 BEREANO, PHIL * 1988; JD, 1965, Columbia University; MRP, 1971, Cornell University
 CONEY, MARY B, 1976; PhD, 1973, University of Washington; MA, 1963, University of Illinois
 FARKAS, DAVID K * 1997; PhD, 1976, University of Minnesota; MA, 1969, University of Chicago
 HASELKORN, MARK P, 1985; PhD, 1977, University of Michigan; MA, 1980, University of Michigan
 KOLKO, BETH E, 2000; PhD, 1994, University of Texas (Austin); MA, 1991, University of Texas (Austin)
 MCDONALD, DAVID W, 2002; PhD, 2000, University of California (Irvine); MS, 1995, University of California (Irvine)
 RAMEY, JUDITH A, 1983; PhD, 1983, University of Texas; MA, 1971, University of Texas
 SPYRIDAKIS, JAN, 1982; PhD, 1986, University of Washington; MAT, 1972, University of Washington
 TSUTSUI, MICHIO * 1993; PhD, 1984, University of Illinois; MA, 1980, University of Illinois
 TURNS, JENNIFER A., 1999; PhD, 1999, Georgia Institute of Technology; MS, 1990, University of Virginia
 WIXON, DENNIS, 2006; PhD, 1981, Clark University; MA, 1975, Clark University
 ZACHRY, MARK R, 2006; PhD, 1998, Iowa State University; MA, 1992, Arizona State University

Associate Professors

AVRAHAMI, DANIEL, 2010; PhD, 2007, Carnegie Mellon University; MSC, 2002, Carnegie Mellon University
 KIENTZ, JULIE A, 2008; PhD, 2008, Georgia Institute of Technology
 LEE, CHARLOTTE P, 2008; PhD, 2004, University of California (Los Angeles); MA, 1997, San Jose State University
 RIBES, DAVID, 2015; PhD, 2006, University of California (San Diego); MA, 2000, McGill University (Canada)

Assistant Professors

BIETZ, MATTHEW J., 2010; PhD, 2008, University of Michigan, Ann Arbor; MIE, 2000, University of Michigan, Ann Arbor
 BOYD, SUZANNE M, 2002; MA, 2000, University of Washington
 CONSOLVO, SUNNY, 2010; PhD, 2008, University of Washington
 HANAFLI, ZAKIYA, 2012; PhD, 1991, Stanford University; MA, 1987, University of British Columbia (Canada)
 HSIEH, GARY, 2013; PhD, 2010, Carnegie Mellon University
 MONROY-HERNANDEZ, ANDRES, 2014; PhD, 2012, Massachusetts Institute of Technology; MS, 2007, Massachusetts Institute of Technology
 MORRIS, MARGARET, 2015; PhD, 1998, University of New Mexico
 MUNSON, SEAN A, 2010
 ROSNER, DANIELA K, 2013; PhD, 2008, University of California (Berkeley); MS, 2006, University of Chicago
 SHOBE, MATTHEW, 2010; MS, 1996, University of Washington
 STARBIRD, CATHARINE E, 2012
 SULLIVAN, KENT D, 2007; BA, 1989, Purdue University

Senior Lecturers

CRAFT, BROCK R, 2015; PhD, 2007, University College London; MS, 2001, De Paul University
 DAVIDSON, ANDREW H., 2006; MSE, 1982, University of Pennsylvania
 SANOCKI, ELIZABETH, 1988; PhD, 1994, University of Washington
 WAGNER, LINDA E, 2013; MS, 1998, Illinois Institute of Technology

Lecturers

ELRIF, PAUL M, 2015; PhD, 1984, Tufts University; MA, 1982, University of Dayton
 FOX, TYLER STEVEN, 1998; PhD, 2015, Simon Fraser University, B.C. (Canada); MFA, 2004, University of Auckland (New Zealand)
 GRAZEWSKI, MICHAEL, 2013; MA, 2014, University of Washington
 JENKINS, MARY-COLLEEN, 2010; MA, 1992, Ohio University
 KAYES, JEREMY, 2015; BA, 2000, Virginia Commonwealth University

KIM, DANIELLA, 1999; PhD, 2007, University of Washington; MS, 1999, University of Texas (Dallas)
 LOUCKS-JARET, CHRISTINE M., 1997; MS, 1999, University of Washington
 MARTIN-EMERSON, ROBIN, 2015; MS, 1993, University of Illinois (Urbana)
 MOBRAND, KATHRYN A, 2005; MS, 2003, University of Washington
 SPYRIDAKIS, IRINI K, 2007; MS, 2010, University of Washington
 WRENN, STEVEN C, 2016; MA, 1995, University of Virginia
 ZEILER, TELLE L, 2014; MS, 2011, University of Washington
 ZUBEREC, SARAH E, 2014; MS, 1993, University of Toronto (Canada)

Industrial and Systems Engineering

Professors

BOYLE, LINDA T., 1992; PhD, 1998, University of Washington; MS, 1994, University of Washington
 FURNESS, THOMAS A., 1989; PhD, 1981, University of Southampton (UK)
 KAPUR, KAILASH C. * 1992; PhD, 1969, University of California (Berkeley); MS, 1967, University of California (Berkeley)
 KOHN, WOLF, 2002; PhD, 1978, Massachusetts Institute of Technology; MSEE, 1974, Massachusetts Institute of Technology
 LEE, JOHN DAVIDSON, 2011; PhD, 1992, University of Illinois; MS, 1989, University of Illinois
 LIU, CHEN-CHING, 1991; PhD, 1983, University of California (Berkeley); MSEE, 1978, National Taiwan University
 STORCH, RICHARD * 1985; PhD, 1978, University of Washington; MS, 1968, Massachusetts Institute of Technology
 ZABINSKY, ZELDA, 1985; PhD, 1985, University of Michigan; MS, 1984, University of Michigan

Associate Professors

BRAYMAN, VLADIMIR M., 2003; PhD, 2003, University of Washington; MS, 1996, University of Washington
 DRUI, ALBERT B * 1999; MS, 1957, Washington University
 GHATE, ARCHIS VIJAY, 2006; PhD, 2006, University of Michigan; MS, 2003, Stanford University
 KUCUKYAVUZ, SIMGE, 2016; PhD, 2004, University of California-Berkeley; MS, 2000, University of California-Berkeley
 MASTRANGELO, CHRISTINA M., 2002; PhD, 1993, Arizona State University; MS, 1990, Arizona State University
 ZAK, YEVGENIY J., 2001; PhD, 1981, Moscow Inst of Physics & Tech (Russia); MS, 1976, Moscow State University (Russia)

Assistant Professors

BANERJEE, ASHIS G, 2015; PhD, 2009, University of Maryland; MME, 2006, University of Maryland
 CARSON, RONALD S, 2016; PhD, 1983, University of Washington
 CHOE, YOUNGJUN, 2016; MA, 2016, University of Michigan-Ann Arbor
 HUANG, SHUAI, 2014; PhD, 2012, Arizona State University
 LIU, SHAN, 2013; PhD, 2013, Stanford University; SM, 2008, Massachusetts Institute of Technology
 MONTGOMERY, STEPHEN W, 2009; PhD, 2000, Purdue University; MBA, 2008, University of Washington
 YEN, JOYCE WEN-HWEI, 2000; PhD, 2000, University of Michigan, Ann Arbor; MS, 1997, University of Michigan, Ann Arbor

Lecturer

BUCHANAN, PATRICIA CECILIA, 2016; PhD, 2014, University of Central Florida

Materials Science and Engineering

Professors

AUTUMN, KELLAR, 2010; PhD, 1995, University of California (Berkeley)
 BORDIA, RAJENDRA KUMAR * 1998; PhD, 1986, Cornell University; MS, 1981, Cornell University
 BROWNING, NIGEL D., 2015; PhD, 1992, University of Cambridge (UK)
 CAO, GUOZHONG, 1996; PhD, 1991, Eindhoven University of Technology(Neth); MS, 1985, Shanghai Institute of Ceramics (China)
 CHAMBERS, SCOTT A., 2000; PhD, 1977, Oregon State University

DAS, K BHAGWAN, 2000; PhD, 1971, University of Washington; MME, 1963, University of Illinois; MSC, 1956, Osmania University (India)

DE YOREO, JAMES J., 2013; PhD, 1985, Cornell University

DOGAN, FATIH * 1998; PhD, 1989, Technische Universität (Germany); MS, 1984, Technische Universität (Germany)

FISHER, ROBERT M * 2000; PhD, 1962, Cambridge University (UK)

HENAGER, CHARLES H, 2000; PhD, 1983, University of Washington

HINDS, BRUCE JACKSON III, 2014; PhD, 1996, Northwestern University; MS, 1992, Northwestern University

INOUE, KANRYU * 2000; PhD, 1977, Osaka University (Japan); MS, 1971, Osaka University (Japan)

JEN, ALEX K-Y., 1999; PhD, 1984, University of Pennsylvania

KOIKE, YASUHIRO, 2009; PhD, 1982, Keio University (Japan); MSE, 1979, Keio University (Japan)

KRISHNAN, KANNAN, 2001; PhD, 1984, University of California (Berkeley); MS, 1980, State University of New York (Stony Brook)

MAYER, GEORGE, 2000; PhD, 1967, Massachusetts Institute of Technology; MME, 1963, University of Oklahoma

OHUCHI, FUMIO, 1992; PhD, 1981, University of Florida; MS, 1974, Sophia University (Japan)

POLONIS, DOUGLAS H * 1995; PhD, 1955, University of British Columbia (Canada); MA, 1953, University of Toronto (Canada)

RAO, Y KRISHNA, 1976; PhD, 1965, University of Pennsylvania

SARIKAYA, MEHMET, 1984; PhD, 1982, University of California (Berkeley); MS, 1979, University of California (Berkeley)

SNEAD, MALCOM L., 2011; PhD, 1981, University of Chicago; DDS, 1977, Loyola University (Chicago)

STOEBE, THOMAS GAINES * 1996; PhD, 1965, Stanford University; MS, 1963, Stanford University

ZHANG, MIQIN, 1999; PhD, 1999, University of California (Berkeley); MAS, 1994, University of Victoria (Canada)

Associate Professors

AROLA, DWAYNE D, 1991; PhD, 1996, University of Washington; MS, 1991, University of Washington

BRUSH, LUCIEN N, 1990; PhD, 1988, Carnegie Mellon University; ME, 1984, Carnegie Mellon University

FLINN, BRIAN D., 1991; PhD, 1991, University of California (Santa Barbara); MS, 1986, Colorado School of Mines

LUSCOMBE, CHRISTINE K., 2006; PhD, 2005, University of Cambridge (UK); MA, 2003, University of Cambridge (UK); MSC, 2000, University of Cambridge (UK)

MA, HONG, 2000; PhD, 1997, Nankai University (China); MS, 1994, Nankai University (China)

MACKENZIE, JOHN DEVIN, 2015; PhD, 1998, University of Florida; MSC, 1997, University of Florida

MILLER, ALAN D * 1995; PhD, 1967, University of Washington

ROLANDI, MARCO, 2008; PhD, 2005, Stanford University; MS, 2000, University of London, UK

STANG, ROBERT GEORGE * 1981; PhD, 1972, Stanford University; MS, 1965, University of California (Los Angeles)

TAMERLER-BEHAR, CANDAN, 2002; PhD, 1997, Bogazici University (Istanbul)

YANG, JIHUI, 2011; PhD, 2000, University of Michigan, Ann Arbor; MS, 1993, Wayne State University

Assistant Professors

CHIKYOW, TOYOHIRO, 2000; PhD, 1989, Waseda University (Japan); MS, 1985, Waseda University (Japan)

PAUZAUSKIE, PETER JOHN, 2010; PhD, 2007, University of California (Berkeley)

Mechanical Engineering

Professors

BALISE, PETER * 1992; MS, 1950, Massachusetts Institute of Technology

CHALUPNIK, JAMES * 1995; PhD, 1964, University of Texas (Austin); MS, 1960, University of Texas

CLARK, WILLIAM RICHARD, 2016; MD, 1986, Indiana University; MS, 1994, Purdue University

COOPER, JOYCE S., 1998; PhD, 1996, Duke University; MS, 1992, Duke University

DAHL, PETER H., 1989; PhD, 1989, Massachusetts Institute of Technology; MS, 1982, University of Washington

DALY, COLIN H. * 1981; PhD, 1966, University of Strathclyde (UK)

DEPEW, CREIGHTON A * 1995; PhD, 1960, University of California (Berkeley); MS, 1957, University of California (Berkeley)

DEVASIA, SANTOSH, 2000; PhD, 1993, University of California (Santa Barbara); MS, 1990, University of California (Santa Barbara)

DORRI, BIJAN, 2014; PhD, 1983, University of Washington; MS, 1978, University of Washington

EMERY, ASHLEY F, 1961; PhD, 1961, University of California (Berkeley); MS, 1958, University of California (Berkeley)

FABIEN, BRIAN C., 1993; PhD, 1990, Columbia University; MPHIL, 1990, Columbia University

FIREY, JOSEPH C, 1985; MME, 1941, University of Wisconsin

GALLE, KURT R * 1986; PhD, 1951, Purdue University; MME, 1949, Purdue University
 GANTER, MARK, 1986; PhD, 1985, University of Wisconsin (Madison); MS, 1981, University of Wisconsin
 GAO, DAYONG, 2004; PhD, 1991, Concordia College
 GARBINI, JOSEPH, 1979; PhD, 1977, University of Washington; MS, 1973, University of Washington
 GESSNER, FREDERICK B * 1981; PhD, 1964, Purdue University; MME, 1960, Purdue University
 HASHISH, MOHAMED AHMED, 2005; PhD, 1977, Concordia University
 HOMSY, GEORGE MITCHEL, 2013; PhD, 1969, University of Illinois; MS, 1967, University of Illinois
 HYMAN, BARRY * 1981; PhD, 1965, Virginia Polytechnic Institute and State University; MS, 1961, St Louis University
 KOBAYASHI, ALBERT S * 1997; PhD, 1958, Illinois Institute of Technology; MS, 1952, University of Washington
 KRAMLICH, JOHN C., 1991; PhD, 1980, Washington State University; MS, 1975, Washington State University
 KUMAR, VIPIN, 1988; PhD, 1988, Massachusetts Institute of Technology; MBA, 1974, University of Rhode Island
 LI, JIANGYU, 2006; PhD, 1998, University of Colorado (Boulder); MS, 1998, University of Colorado (Boulder)
 MALTE, PHILIP C, 1979; PhD, 1971, University of Michigan; MSE, 1966, University of Michigan
 MAMIDALA, RAMULU, 1978; PhD, 1982, University of Washington; Mtech, 1976, Indian Institute of Technology (India)
 MC CORMICK, NORMAN J. * 1989; PhD, 1965, University of Michigan; MS, 1961, University of Illinois
 PRATT, DAVID T * 1997; PhD, 1968, University of California (Berkeley); MS, 1962, University of California (Berkeley)
 REINHALL, PER G, 1982; PhD, 1982, California Institute of Technology; MS, 1978, California Institute of Technology
 RILEY, JAMES J, 1983; PhD, 1971, Johns Hopkins University
 SAITO, MAKOTO, 2012; PhD, 1998, Nagoya University (Japan); MS, 1973, Osaka University (Japan)
 SANDERS, DANIEL GORDON, 2011; PhD, 2008, University of Washington; MS, 2002, Central Washington University
 SEIBEL, ERIC J., 1988; PhD, 1996, University of Washington; MS, 1984, University of California (Berkeley)
 SHEN, I-YEU, 1993; PhD, 1991, University of California (Berkeley); MS, 1986, National Taiwan University
 SIDLES, JOHN ARTHUR, 1998; PhD, 1982, University of Washington
 SILVERSTEIN, FRED, 2000; MD, 1967, Columbia University
 STORTI, DUANE W, 1983; PhD, 1983, Cornell University; MS, 1981, Cornell University
 TAGGART, RAYMOND * 1991; PhD, 1956, Queen's University (UK)
 TAYA, MINORU, 1986; PhD, 1977, Northwestern University; MS, 1973, Northwestern University
 TUTTLE, MARK E, 1985; PhD, 1984, Virginia Polytechnic Institute and State University; MS, 1978, Michigan Technological University
 WILSON, WILLIAM R.D. * 1999; PhD, 1967, Queen's University of Belfast (Ireland)
 ZHAO, GANG, 2014; PhD, 2004, University of Science and Technology of China

Associate Professors

ADEE, BRUCE H. * 1981; PhD, 1972, University of California (Berkeley); MS, 1968, University of California (Berkeley)
 ALISEDA, ALBERTO, 2006; PhD, 2004, University of California (San Diego); MSC, 2000, University of California (San Diego)
 BAILEY, MICHAEL R., 1996; PhD, 1997, University of Texas (Austin); MME, 1994, University of Texas (Austin)
 BERG, MARTIN C., 1986; PhD, 1986, Stanford University; MME, 1978, University of Washington
 BODOIA, JOHN R * 1991; PhD, 1959, Carnegie Institute of Technology; MS, 1957, Carnegie Institute of Technology
 CHEN, MING, 2016; PhD, 1991, Colorado State University; MS, 1985, Univ. of Science and Technology (China)
 CHING, RANDAL PRESTON, 1986; PhD, 1992, University of Washington; MME, 1988, University of Washington
 CHUNG, JAEHYUN, 2005; PhD, 2004, Northwestern University; MS, 1997, Sungkyunkwan University (Korea)
 COBB, CORIE, 2016; PhD, 2008, University of California-Berkeley; MME, 2004, Stanford University
 EINSTEIN, DANIEL R, 2003; PhD, 2002, University of Washington
 FORSTER, FRED * 1987; PhD, 1972, Stanford University; MS, 1968, Stanford University
 FRIED, AMY SHEN, 2008; PhD, 2000, University of Illinois (Urbana); MS, 1996, University of Illinois
 HOLT, RICHARD, 1947; MS, 1957, University of Washington
 KIELING, WILLIAM C * 1985; MME, 1959, University of Washington
 KINTNER-MEYER, MICHAEL, 2013; PhD, 1993, University of Washington; MME, 1985, Rheinisch Westfaelische Technische Hochschule, Germany
 KLUTE, GLENN K., 2000; PhD, 1999, University of Washington; MS, 1990, Pennsylvania State University
 LIU, JONATHAN, 2014; PhD, 2005, Stanford University; MS, 2000, Stanford University
 MASON, GREGORY, 2000; PhD, 1992, University of Washington; MME, 1984, Georgia Institute of Technology
 MESCHER, ANN M., 1996; PhD, 1995, Ohio State University; MS, 1992, Ohio State University
 MULLEN, RUTH ANN, 2000; PhD, 1984, University of Southern California; MSEE, 1981, University of Southern California

OCHOA, JORGE ALEXANDER, 2006; PhD, 1991, Purdue University; MME, 1987, Purdue University
 POLAGYE, BRIAN L, 2002; PhD, 2009, University of Washington; MME, 2005, University of Washington
 POSNER, JONATHAN D, 2011; PhD, 2001, University of California (Irvine); MS, 1998, University of California (Irvine)
 SCHEIBE, ROBERT, 2000; PhD, 1996, University of Washington; MME, 1982, University of Wisconsin
 SHUMAN, TEODORA RUTAR, 2000; PhD, 2000, University of Washington; MME, 1994, University of Washington
 SNIADOCKI, NATHAN JOHN, 2007; PhD, 2003, University of Maryland; MS, 2003, University of Maryland
 VERESS, ALEXANDER, 2003; PhD, 2000, Ohio State University; MS, 1995, Ohio State University
 WANG, JUNLAN, 2008; PhD, 2002, University of Illinois; MS, 1997, Univ. of Science and Technology (China)
 WANG, WEI-CHIH, 2000; PhD, 1996, University of Washington; MSEE, 1992, University of Washington
 XU, CHUNYE, 2000; PhD, 1998, Nara Women's University (Japan); MSC, 1990, Northwest Institute of Textile Science and Technology (China)

Assistant Professors

AUBIN, PATRICK M., 2014; PhD, 2010, University of Washington; MS, 2006, University of Washington
 BOECHLER, NICHOLAS S., 2012; PhD, 2011, California Institute of Technology; MS, 2008, California Institute of Technology
 BRUNTON, STEVEN L., 2012; PhD, 2012, Princeton University
 CANTON, MARIA DE GADOR, 2006; PhD, 2004, University of California (San Diego); MS, 2001, University of California (San Diego)
 CRAWFORD, ANTHONY, 2015; MD, 2008, Oregon Health Sciences University
 FULLER, SAWYER BUCKMINSTER, 2015; PhD, 2011, California Institute of Technology; MME, 2004, Massachusetts Institute of Technology
 IAQUINTO, JOSEPH M., 2012; PhD, 2010, Virginia Commonwealth University; MS, 2006, Virginia Commonwealth University
 IHN, JEONG-BEOM, 2007; PhD, 2003, Stanford University; MS, 1998, Stanford University
 JOHNSTON, SCOTT R., 2006; PhD, 2000, University of Washington; MS, 1998, University of Missouri
 KARALUS, MEGAN F., 2014; PhD, 2013, University of Washington; MS, 2009, University of Washington
 LEE, KYONG-HOON, 2010; PhD, 1999, University of Tokyo (Japan); MS, 1994, Seoul National University (Korea)
 MOTTO, DAVID GEORGE, 2014; MD, 1996, University of Iowa; PhD, 1996, University of Iowa
 MUNDON, TIMOTHY ROY, 2015; PhD, 1984, University of Southern California; MS, 1981, University of Southern California
 NELSON, LEONARD Y., 2010; PhD, 1969, University of California (Berkeley)
 NEUMANN, THOMAS, 2000; MD, 1994, University of Hale
 NOVOSSELOV, IGOR, 1999; PhD, 2006, University of Washington; MME, 2002, University of Washington
 PICONE, RICO ALLAN RUSSELL, 2014; PhD, 2014, University of Washington; MSC, 2010, University of Washington
 PROCTOR, JOSHUA L, 2015; PhD, 2011, Princeton University; MA, 2008, Princeton University
 ROMBOKAS, ERIC SCOTT, 2012; PhD, 2012, University of Washington; MS, 2001, Rice University
 SCHOWENGERDT, BRIAN T., 2012; PhD, 2004, University of California (Davis); MA, 1999, University of California (Davis)
 STEELE, KATHERINE M., 2012; PhD, 2012, Stanford University; MS, 2009, Stanford University
 VIJLEE, SHAZIB Z., 2014; PhD, 2014, University of Washington; MME, 2006, University of Texas (Austin)
 WELLER, JOHN E, 2009; PhD, 1996, University of Washington; MME, 1991, University of Washington

Senior Lecturer

JONES, JULIA H., 1989; MME, 1991, University of Washington

College of the Environment

Aquatic and Fishery Sciences

Professors

ANDERSON, JAMES J, 1969; PhD, 1977, University of Washington
 ARMSTRONG, DAVID A. * 1981; PhD, 1978, University of California (Davis)
 BAILEY, KEVIN, 2000; PhD, 1981, University of Washington
 BEAUCHAMP, DAVID A., 1999; PhD, 1987, University of Washington
 CHEW, KENNETH K * 1983; PhD, 1962, University of Washington

CLARKE, ELIZABETH, 2006; PhD, 1984, Scripps Oceanographic Institution
 CONQUEST, LOVEDAY L * 1997; PhD, 1975, University of Washington
 DAVIS, JONATHAN, 2000; PhD, 1994, University of Washington
 DICKHOFF, WALTON W * 1991; PhD, 1976, University of California (Berkeley)
 ELSTON, RALPH A, 2000; PhD, 1980, Cornell University
 ESSINGTON, TIMOTHY E., 2003; PhD, 1999, University of Wisconsin (Madison)
 FRANCIS, ROBERT C, 1983; PhD, 1970, University of Washington
 FRIEDMAN, CAROLYN, 2001; PhD, 1990, University of California (Davis)
 GALLUCCI, VINCENT, 1976; PhD, 1971, North Carolina State University
 GUNDERSON, DONALD R, 1978; PhD, 1975, University of Washington
 HARD, JEFFREY J., 2008; PhD, 1991, University of Oregon
 HARVELL, CATHERINE, 2010; PhD, 1985, University of Washington
 HAUSER, LORENZ, 2002; PhD, 1996, University of Wales (U.K.); MSC, 1989, University of Vienna, Austria
 HILBORN, RAY, 1987; PhD, 1974, University of British Columbia (Canada)
 HOLLAND, DANIEL S., 2013; PhD, 1998, University of Rhode Island
 HOLLOWED, ANNE, 2000; PhD, 1990, University of Washington
 HORNE, JOHN K., 1999; PhD, 1995, Memorial University of Newfoundland
 HUNT, GEORGE L, 2004; PhD, 1971, Harvard University
 IANELLI, JAMES N., 2005; PhD, 1993, University of Washington
 KARP, WILLIAM A., 2000; PhD, 1982, University of Washington
 KARR, JAMES * 1991; PhD, 1970, University of Illinois
 KOCAN, RICHARD M * 1991; PhD, 1967, Michigan State University
 LEAMAN, BRUCE M., 2003; PhD, 1988, University of British Columbia (Canada)
 LISTON, JOHN * 1989; PhD, 1955, University of Aberdeen (UK)
 LIVINGSTON, PATRICIA, 2000; MPA, 1988, University of Washington
 MANTUA, NATHAN, 2000; PhD, 1994, University of Washington
 MATHEWS, STEPHEN B * 1998; PhD, 1967, University of Washington
 METHOT, RICHARD D, 2000; PhD, 1981, University of California (San Diego)
 MILLER, BRUCE S, 1971; PhD, 1969, University of Washington
 MOORE, SUE ELLEN, 2001; PhD, 1997, Scripps Oceanographic Institution
 NAIMAN, ROBERT J, 1988; PhD, 1974, Arizona State University
 NAISH, KERRY-ANN, 2000; PhD, 1993, University of Wales (U.K.)
 OLDEN, JULIAN D., 2006; PhD, 2004, Colorado State University
 PARRISH, JULIA, 1990; PhD, 1988, Duke University
 PIATT, JOHN F., 2005; PhD, 1987, Memorial University of Newfoundland
 PIETSCH, THEODORE * 1981; PhD, 1973, University of Southern California
 PLISETSKAYA, ERIKA * 1996; ScD, 1973, Academy of Science (USSR)
 PUNT, ANDRE, 2001; PhD, 1991, University of Capetown (South Africa)
 QUINN, THOMAS P., 1986; PhD, 1981, University of Washington
 RONI, PHILIP, 2005; PhD, 2000, University of Washington
 RUCKELSHAUS, MARY H, 2013; PhD, 1994, University of Washington
 SCHINDLER, DANIEL E., 1997; PhD, 1995, University of Wisconsin (Madison)
 SCHULTZ, IRVIN R., 2015; PhD, 1990, Washington State University
 SEEB, JAMES, 2007; PhD, 1987, University of Washington
 SEEB, LISA, 2007; PhD, 1986, University of Washington
 SIMENSTAD, CHARLES, 1969; MS, 1971, University of Washington
 SKALSKI, JOHN R., 1987; PhD, 1985, Cornell University; MS, 1976, Oregon State University
 SMITH, ANTHONY D., 2013; PhD, 1979, University of British Columbia (Canada)
 SMITH, LYNWOOD S * 1993; PhD, 1962, University of Washington
 SWANSON, PENNY, 2000; PhD, 1986, University of Washington
 SWARTZMAN, GORDON LENI * 2000; PhD, 1969, University of Michigan
 TAUB, FRIEDA B * 1981; PhD, 1959, Rutgers University
 WADE, PAUL R., 2000; PhD, 1994, University of California (San Diego)
 WAPLES, ROBIN S, 2000; PhD, 1986, Scripps Oceanographic Institution

WILLIAMS, JOHN G, 2000; PhD, 1978, University of Washington
 WINTON, JAMES, 2000; PhD, 1981, Oregon State University
 WISSMAR, ROBERT C * 1991; PhD, 1972, University of Idaho
 YOUNG, GRAHAM, 2004; PhD, 1980, University of Sheffield (UK)

Associate Professors

ANDERSON, CHRISTOPHER M., 2012; PhD, 2001, California Institute of Technology
 AYDIN, KERIM Y., 2000; PhD, 2000, University of Washington
 BENGTON, JOHN L., 2000; PhD, 1981, University of Minnesota
 BRANCH, TREVOR, 2000; PhD, 2004, University of Washington
 CANINO, MICHAEL, 2012; PhD, 2003, University of Washington
 DORN, MARTIN W., 2009; PhD, 1998, University of Washington
 ELLIOTT, DIANE G., 2000; PhD, 1985, University of Washington
 GALLARDO ESCARATE, CRISTIA, 2016; PhD, 2005, Centro de Investigación Científica y de Educación Superior de Ensenada (CICESE)
 GRUE, CHRISTIAN E * 1989; PhD, 1977, Texas A&M University
 HARE, STEVEN, 2011; PhD, 1996, University of Washington
 HELSER, THOMAS E., 2012; PhD, 1992, Louisiana State University
 HERSHBERGER, PAUL K, 1999; PhD, 1999, University of Washington
 HOLMES, ELIZABETH, 2001; PhD, 1995, University of Washington
 MATARESE KIERNAN, ANN M., 2000; PhD, 1990, University of Washington
 MCCLURE, MICHELLE M., 2014; PhD, 1998, Cornell University
 MELVIN, EDWARD F., 1990; MS, 1980, Humboldt State University
 NICHOLS, KRISTA M., 2013; PhD, 2002, Washington State University
 PAULEY, GILBERT B, 1998; PhD, 1971, University of California (Irvine)
 PURCELL, MAUREEN, 2013; PhD, 2005, University of Washington
 ROBERTS, STEVEN, 2006; PhD, 2002, University of Notre Dame
 SCHEUERELL, MARK D., 2002; PhD, 2002, University of Washington
 STEVENSON, DUANE E, 2007; PhD, 2002, University of Washington
 STROM, MARK S, 2000; PhD, 1992, University of Washington
 TRAINER, VERA L, 2004; PhD, 1990, University of Miami (Florida)
 VANBLARICOM, GLENN R. * 1993; PhD, 1978, University of California (San Diego)
 WARD, ERIC, 2006; PhD, 2006, University of Washington
 WARHEIT, KENNETH I, 2003; PhD, 1990, University of California (Berkeley)
 ZABEL, RICHARD, 2011; PhD, 1994, University of Washington

Assistant Professors

ADAMS, DAWN PAGE NOREN, 2009; PhD, 2002, University of California (Santa Cruz); MS, 1997, University of California (Santa Cruz)
 BUCKLEY, RAYMOND M, 2000; PhD, 1997, University of Washington
 CLARK, WILLIAM G, 2000; PhD, 1975, University of Washington
 DUFFY-ANDERSON, JANET, 2000; PhD, 1996, University of Delaware
 HALTUCH, MELISSA A., 2015; PhD, 2008, University of Washington
 HAMEL, OWEN S., 2015; PhD, 2001, University of Washington
 HANSON, BRADLEY, 2009; PhD, 2001, University of Washington
 HENDRIX, ALBERT N, 2010; PhD, 2003, University of Washington
 HOLTGRIEVE, GORDON W., 2003; PhD, 2009, University of Washington
 LAIDRE, KRISTIN L., 1997; PhD, 2003, University of Washington
 PADILLA GAMINO, JACQUELINE, 2016; PhD, 2011, University of Hawaii
 PESS, GEORGE R., 2001; PhD, 2009, University of Washington
 THORSON, JAMES T., 2015; MS, 2009, Virginia Polytechnic Institute and State University
 TORNABENE, LUKE M., 2016; PhD, 2014, Texas A & M University-Corpus Christi
 WOOD, CHELSEA L., 2016; PhD, 2013, Stanford University

Lecturers

BAKER, MATTHEW R, 2004; PhD, 2011, University of Washington
 JENSEN, GREGORY, 1984; PhD, 1990, University of Washington
 KOLMANN, MATTHEW A, 2016; PhD, 2016, University of Toronto
 MCDONALD, PATRICK S., 1998; PhD, 2006, University of Washington
 STRAUS, KRISTINA M, 2003; PhD, 2010, University of Washington
 TYLER, WILLIAM BRECK, 2004; MS, 1991, University of California (Santa Cruz)
 YANG, SYLVIA, 2005; PhD, 2011, University of Washington-Seattle Campus

Atmospheric Sciences

Professors

ACKERMAN, THOMAS P, 2002; PhD, 1976, University of Washington; MS, 1971, University of Washington
 BATTISTI, DAVID S, 1983; PhD, 1988, University of Washington; MS, 1981, University of Washington
 BITZ, CECILIA, 1988; PhD, 1997, University of Washington; MS, 1990, University of Washington
 BRETHERTON, CHRISTOPHER S., 1984; PhD, 1984, Massachusetts Institute of Technology
 BROWN, ROBERT A * 1999; PhD, 1969, University of Washington; MS, 1962, University of California (Berkeley)
 BUSINGER, JOOST A, 1958; PhD, 1954, University of Utrecht (Netherlands)
 CHARLSON, ROBERT J * 1998; PhD, 1964, University of Washington; MS, 1959, Stanford University
 CHEN, SHUYI S * 2000; PhD, 1990, Pennsylvania State University; MS, 1985, University of Oklahoma
 COVERT, DAVID S * 1999; PhD, 1974, University of Washington; MS, 1971, University of Washington
 DURRAN, DALE R, 1987; PhD, 1981, Massachusetts Institute of Technology; MS, 1975, University of California (Berkeley)
 FU, QIANG, 2000; PhD, 1991, University of Utah; MS, 1985, Peking University (China)
 GRENFELL, THOMAS C * 1999; PhD, 1972, University of Washington; MS, 1968, University of Chicago
 HAKIM, GREGORY J, 1999; PhD, 1997, University of Albany; MS, 1993, University of Albany
 HARTMANN, DENNIS L, 1977; PhD, 1975, Princeton University; MA, 1973, Princeton University
 HEGG, DEAN A * 1996; PhD, 1979, University of Washington; MS, 1976, University of Washington
 HOUZE, ROBERT A., 1972; PhD, 1972, Massachusetts Institute of Technology; MS, 1969, Massachusetts Institute of Technology
 JAEGLER, LYATT, 2000; PhD, 1996, California Institute of Technology; MS, 1992, California Institute of Technology
 MASS, CLIFFORD F, 1981; PhD, 1978, University of Washington
 OVERLAND, JAMES E * 1983; PhD, 1973, New York University; MS, 1971, University of Washington
 RADKE, LAWRENCE F. * 1964; MS, 1967, University of Washington
 RASCH, PHILIP, 2008; PhD, 1984, Florida State University; MS, 1979, Florida State University
 SARACHIK, EDWARD * 1993; PhD, 1966, Brandeis University; MS, 1963, Brandeis University
 THORNTON, JOEL A., 2004; PhD, 2002, University of California (Berkeley)
 TILLMAN, JAMES E., 1999; MS, 1961, Massachusetts Institute of Technology
 WALLACE, JOHN M * 1982; PhD, 1966, Massachusetts Institute of Technology
 WARREN, STEPHEN G * 1994; PhD, 1973, Harvard University; MA, 1969, Harvard University
 WOOD, ROBERT, 2001; PhD, 1997, University of Manchester (UK)

Associate Professors

BATES, TIMOTHY S, 1990; PhD, 1988, University of Washington; MS, 1978, University of Washington
 BOND, NICHOLAS A, 1980; PhD, 1986, University of Washington
 COLMAN, BRADLEY R., 2000; DSc, 1984, Massachusetts Institute of Technology
 ECKEL, F. ANTHONY, 2010; PhD, 2003, University of Washington; MS, 1998, Air Force Institute of Technology
 FRIERSON, DARGAN M, 2007; PhD, 2005, Princeton University; MS, 2002, Princeton University
 HARRISON, HALSTEAD * 1998; PhD, 1960, Stanford University
 LIGHT, BONNIE, 1990; PhD, 2000, University of Washington; MS, 1990, University of Maryland
 MARCHAND, ROGER T, 2007; PhD, 1997, Virginia Polytechnic Institute and State University
 MOTE, PHILIP W, 2002; PhD, 1994, University of Washington
 SUESS, BECKY ALEXANDER, 2004; PhD, 2002, University of California (San Diego)

Assistant Professors

KIM, DAEHYUN, 2014; PhD, 2010, Seoul National University (Korea)

SWANN, ABIGAIL, 2012; PhD, 2010, University of California (Berkeley); MA, 2005, Columbia University

Senior Lecturer

MC MURDIE, LYNN A, 1988; PhD, 1989, University of Washington; MS, 1983, University of Washington

Lecturer

WARNER, MICHAEL DAVID, 2006; PhD, 2014, University of Washington; MS, 2010, University of Washington

Earth and Space Sciences

Professors

ADAMS, JOHN B * 1998; PhD, 1961, University of Washington; MS, 1958, University of Washington

ANDERSON, PATRICIA M, 2000; PhD, 1982, Brown University; MA, 1976, Brown University

ATWATER, BRIAN F * 2000; PhD, 1980, University of Delaware; MS, 1974, Stanford University

BAKER, MARCIA * 1996; PhD, 1971, University of Washington; MS, 1960, Stanford University

BERGANTZ, GEORGE W, 1988; PhD, 1988, Johns Hopkins University; MS, 1985, Georgia Institute of Technology

BODIN, PAUL A, 2006; PhD, 1992, University of Colorado (Boulder); MA, 1981, Humboldt State University

BOOKER, JOHN R, 1981; PhD, 1968, University of California (San Diego); MS, 1965, University of California (San Diego)

BOOTH, DEREK B, 1980; PhD, 1984, University of Washington; MS, 1980, Stanford University

BOURGEOIS, JOANNE * 1986; PhD, 1980, University of Wisconsin (Madison)

BROWN, J. MICHAEL, 1984; PhD, 1980, University of Minnesota; MS, 1978, University of Washington

BUICK, ROGER, 2001; PhD, 1986, University of West Australia

CATLING, DAVID C., 2001; DPhil, 1994, Oxford University (UK)

CHENEY, ERIC S. * 1985; PhD, 1964, Yale University

CONWAY, HOWARD B, 1987; PhD, 1986, University of Canterbury (New Zealand)

COWAN, DARREL S, 1974; PhD, 1972, Stanford University

CREAGER, KENNETH C, 1986; PhD, 1984, University of California (San Diego)

CROSSON, ROBERT S, 1981; PhD, 1966, Stanford University; MS, 1963, University of Utah

ELAM, WM. TIMOTHY, 2001; PhD, 1979, University of Maryland; MS, 1977, University of Maryland

EVANS, BERNARD W * 1981; PhD, 1959, Oxford University (UK)

GHIORSO, MARK S * 1999; PhD, 1980, University of California (Berkeley); MA, 1978, University of California (Berkeley)

GILLESPIE, ALAN R., 1997; PhD, 1982, California Institute of Technology; MS, 1977, California Institute of Technology

GOMBERG, JOAN, 2006; PhD, 1986, University of California (San Diego)

GONZALEZ, FRANK IGNACIO, 2005; PhD, 1974, University of Hawaii

GREENE, MOTT T, 2000; PhD, 1978, University of Washington; MA, 1974, University of Washington

HALLET, BERNARD, 1980; PhD, 1975, University of California (Los Angeles)

HOLZWORTH, ROBERT, 1982; PhD, 1977, University of California (Berkeley); MA, 1974, University of California (Berkeley)

HOUSTON, HEIDI B, 2006; PhD, 1987, California Institute of Technology; MS, 1980, University of Wisconsin (Madison)

IRVING, ANTHONY J * 1999; PhD, 1972, Australian National University

IVERSON, RICHARD M * 2000; PhD, 1984, Stanford University; MS, 1981, Stanford University

JOUGHIN, IAN R., 1990; PhD, 1995, University of Washington; MS, 1990, University of Vermont

LANCASTER, NICHOLAS, 2015; PhD, 1977, Cambridge University (UK); MA, 1975, Cambridge University (UK)

MALONE, STEPHEN, 1972; PhD, 1972, University of Nevada

MATSUOKA, KENICHI, 2002; PhD, 2002, Hokkaido University (Japan); MS, 1997, Hokkaido University (Japan)

MAYKUT, GARY * 1999; PhD, 1969, University of Washington

MC CALLUM, IAN S * 1981; PhD, 1968, University of Chicago

MERCER, JAMES A, 1968; PhD, 1983, University of Washington

MERRILL, RONALD T, 1981; PhD, 1967, University of California (Berkeley); MS, 1961, University of Michigan

MONTGOMERY, DAVID R, 1991; PhD, 1991, University of California (Berkeley)

NELSON, BRUCE K., 1986; PhD, 1985, University of California (Los Angeles); MS, 1980, University of Kansas

OWEN, LEWIS ANDREW, 2015; PhD, 1988, University of Leicester (UK)

PARKS, GEORGE K * 1982; PhD, 1966, University of California (Berkeley)

 GARDNER, BETH ANN, 2016; PhD, 2006, Cornell University
 GAYALDO, PERRY R, 2002; PhD, 2002, University of Washington
 GERSONDE, ROLF, 2006; PhD, 2003, University of California (Berkeley)
 GIRVETZ, EVAN, 2007; PhD, 2007, University of California (Davis)
 GURARIE, ELIEZER, 2011; PhD, 2008, University of Washington
 HARVEY, BRIAN J, 2016; PhD, 2015, University of Wisconsin-Madison
 HAUGO, RYAN D, 2010; PhD, 2010, University of Washington
 HOLUB, SCOTT MONTGOMERY, 2016; PhD, 2002, Oregon State University
 KANE, VAN R, 2004; PhD, 2010, University of Washington
 KEARNEY, ANNE, 1998; PhD, 1996, University of Michigan, Ann Arbor
 KERTSON, BRIAN, 2012; PhD, 2010, University of Washington
 KIM, HYUN-SEOK, 2016; PhD, 2009, Duke University; MS, 1995, Seoul National University (Korea)
 KNOTH, JENNY LEIGHANN, 2016; PhD, 2012, University of Washington
 LITKE, WILLIS R, 2000; PhD, 1982, University of Washington
 LONG, ROBERT ARMAND, 2014; PhD, 2006, University of Vermont
 LUTZ, JAMES A, 2008; PhD, 2008, University of Washington; MBA, 1985, Massachusetts Institute of Technology; MS, 1985, Massachusetts Institute of Technology
 MCKENZIE, DONALD, 2002; PhD, 1998, University of Washington; MFA, 1979, University of California (Los Angeles)
 MCRAE, BRADNER HEARN, 2011; PhD, 2004, Northern Arizona University
 NEWSOME, THOMAS MALCOLM, 2016; PhD, 2011, University of Sydney
 PACHECO DE RESENDE, FERNAN, 2011; PhD, 2009, University of Michigan, Ann Arbor; MS, 2003, State University of Campinas (Piracicaba)
 PETRUNCIO, MARKIAN D., 2000; PhD, 1994, University of Washington
 PRUGH, LAURA RYANNE, 2015; PhD, 2005, University of British Columbia (Canada)
 RESTANI, MARCO, 1998; PhD, 1997, Utah State University
 ROCHEFORT, REGINA M, 2001; PhD, 1995, University of Washington
 SCHUMAKER, NATHAN H., 2009; PhD, 1995, University of Washington
 SMITH, DANIEL B., 2000; PhD, 1991, University of Idaho
 SUNTANA, ASEP, 2012; PhD, 2011, University of Washington
 TOBIN, PATRICK C, 2014; PhD, 2002, Pennsylvania State University
 TORGERSEN, CHRISTIAN E., 2006; PhD, 2002, Oregon State University
 VAN PELT, R, 2000; PhD, 1995, University of Washington
 ZOBRIST, KEVIN W, 2004; MS, 2001, University of Washington

Lecturers

BILLO, TIMOTHY, 2001; PhD, 2011, University of Washington
 EWANICK, SHANNON M, 2007; PhD, 2012, University of Washington
 KHAN, ZAREEN, 2005; PhD, 2004, Jawaharlal Nehru University (India)
 LANGE, SARAH E., 2013; MPH, 2016, University of Washington-Seattle Campus
 LECOMPTE-MASTENBROOK, JOYC, 2006; PhD, 2015, University of Washington-Seattle Campus
 SORENSEN, DANIEL G, 2014; MS, 2016, University of Washington-Seattle Campus
 STACEY, LIAM, 1990; PhD, 2011, University of Washington
 WHEAT, ELIZABETH E, 2004; PhD, 2011, University of Washington

Marine and Environmental Affairs

Professors

ALLISON, EDWARD HUGH, 2013; PhD, 1993, University of Liverpool (UK)
 ARON, WILLIAM I, 1982; PhD, 1960, University of Washington
 CHRISTIE, PATRICK JOHN, 1999; PhD, 1999, University of Michigan, Ann Arbor
 DOLSAK, NIVES, 2002; PhD, 2000, Indiana University
 HUPPERT, DANIEL D., 1987; PhD, 1975, University of Washington
 KLINGER, TERRIE, 1993; PhD, 1988, University of California (San Diego)
 LESCHINE, THOMAS M, 1988; PhD, 1975, University of Pittsburgh
 MILLER, MARC, 1979; PhD, 1974, University of California (Irvine)
 POLLNAC, RICHARD, 2013; PhD, 1972, University of Missouri
 WHITE, ALAN T., 2010; PhD, 1984, University of Hawaii

Associate Professors

BAKER, MARY CAMPBELL, 2012; PhD, 2000, University of Washington
 COPPING, ANDREA * 2000; PhD, 1982, University of Washington
 DALTON, PENELOPE, 2005; MS, 1987, University of Maryland
 DICKS, DAVID, 2013; JD, 1999, University of California (Berkeley)
 FLUHARTY, DAVID L, 1983; PhD, 1977, University of Michigan
 PAVIA, ROBERT, 2010; PhD, 1989, University of Washington
 SECORD, DAVID L, 2000; PhD, 1995, University of Washington
 SNOVER, AMY K., 1991

Assistant Professors

HAYNIE, ALAN C., 2006; PhD, 2005, University of Washington
 HIMES-CORNELL, AMBER H, 2012; PhD, 2005, University of Portsmouth, England
 JARDINE, SUNNY L., 2016; PhD, 2013, University of California (Davis)
 KELLY, RYAN P, 2013; JD, 2011, University of California (Berkeley); MPHIL, 2005, Columbia University; MA, 2003, Columbia University
 WOELFLE-ERSKINE, CLEO A., 2016; PhD, 2015, University of California-Berkeley

Lecturers

BRYANT, BETH C, 2002; JD, 1996, University of Washington
 WENG, YEN-CHU, 2013; PhD, 2011, University of Wisconsin (Madison)

Oceanography

Professors

AAGAARD, KNUT * 1998; PhD, 1966, University of Washington
 ALFORD, MATTHEW H., 2001; PhD, 1998, Scripps Oceanographic Institution

ANDERSON, GEORGE C, 1972; PhD, 1954, University of Washington
 ARMBRUST, E. VIRGINIA, 1996; PhD, 1990, Massachusetts Institute of Technology
 BAKER, EDWARD T, 1983; PhD, 1973, University of Washington
 BALISTRERI, LAURIE S, 2000; MS, 1977, University of Washington
 BANSE, KARL * 1995; DrE, 1955, University of Kiel (Germany)
 BAROSS, JOHN A, 1984; PhD, 1973, University of Washington
 CANNON, GLENN A. * 2000; PhD, 1969, Johns Hopkins University
 CARPENTER, ROY * 1981; PhD, 1968, University of California (San Diego)
 CRONIN, MEGHAN, 2000; PhD, 1993, University of Rhode Island
 D'ASARO, ERIC A., 1980; PhD, 1980, Massachusetts Institute of Technology; MS, 1976, Harvard University
 DELANEY, JOHN R., 1977; PhD, 1977, University of Arizona
 DEMING, JODY W, 1988; PhD, 1981, University of Maryland
 DEVOL, ALLAN, 1975; PhD, 1975, University of Washington
 EMERSON, STEVEN R., 1976; PhD, 1974, Columbia University
 ERIKSEN, CHARLES C, 1986; PhD, 1977, Massachusetts Institute of Technology
 EWART, TERRY E, 1956; PhD, 1965, University of Washington
 FEELY, RICHARD A * 2000; PhD, 1974, Texas A&M University
 FROST, BRUCE W * 1981; PhD, 1969, University of California (San Diego)
 GREGG, MICHAEL C * 1990; PhD, 1971, Scripps Institute of Technology
 GRUNBAUM, DANIEL, 1991; PhD, 1991, Cornell University
 HARRISON, DON EDMUNDS * 2000; PhD, 1977, Harvard University
 HEATH, G ROSS, 1984; PhD, 1968, Scripps Oceanographic Institution
 HICKEY, BARBARA M, 1973; PhD, 1975, University of California (San Diego)
 HOLMES, MARK L., 2000; PhD, 1975, University of Washington
 JOHNSON, GREGORY C * 2000; PhD, 1990, Massachusetts Institute of Technology
 JOHNSON, HARLAN PAUL, 1976; PhD, 1972, University of Washington
 KEIL, RICHARD G, 1991; PhD, 1991, University of Delaware
 KELLEY, DEBORAH S., 1992; PhD, 1990, Dalhousie University (Canada)
 KESSLER, WILLIAM S * 2000; PhD, 1989, University of Washington
 LEE, CRAIG M, 1987; PhD, 1995, University of Washington

 WARNER, MARK J, 1989; PhD, 1988, University of California (San Diego)
 WILLIAMS, KEVIN L., 1988; PhD, 1985, Washington State University
 WOODGATE, REBECCA A, 1999; PhD, 1994, University of Oxford (UK)

Assistant Professors

ALIN, SIMONE, 2003; PhD, 2001, University of Arizona
 ARMOUR, KYLE C., 2004; PhD, 2012, University of Washington
 BANAS, NEIL S., 2005; PhD, 2005, University of Washington; MA, 1998, University of Colorado (Boulder)
 DRUSHKA, KYLA R., 2014
 GAGNON, ALEXANDER C., 2012; PhD, 2010, California Institute of Technology
 GIRTON, JAMES B, 1994; PhD, 2001, University of Washington
 LAUER, JOHN WESLEY, 2009; PhD, 2006, University of Minnesota
 MCNEIL, CRAIG L., 2008; PhD, 1995, University of Victoria (Canada)
 MECKING, SABINE, 1994; PhD, 2001, University of Washington
 NEWTON, JAN A., 1981; PhD, 1989, University of Washington
 RIBALET, FRANCOIS, 2008; PhD, 2007, Open University (UK)
 RIGOR, IGNATIUS G, 1981; PhD, 2005, University of Washington
 ROLAND SAENGER, EMILY C., 2014; PhD, 2011, Massachusetts Institute of Technology
 SONNERUP, ROLF E, 1991; PhD, 1999, University of Washington
 YOUNG, JODI N, 2016; PhD, 2011, Oxford University (UK)

Lecturer

NUWER, MIKELLE, 1997; PhD, 2008, University of Washington

The Information School

Professors

BENNE, MAE M * 1988; MS, 1955, University of Illinois
 BRUCE, HARRY, 1998; PhD, 1996, University of New South Wales(Australia)
 CZERWINSKI, MARY P., 2000; PhD, 1988, Indiana University
 DUMAIS, SUSAN, 2002; PhD, 1979, Indiana University
 DURANTI, LUCIANA, 2011; PhD, 1975, Università di Roma
 EISENBERG, MICHAEL., 1998; PhD, 1986, Syracuse University
 FIDEL, RAYA, 1982; PhD, 1982, University of Maryland
 FISHER, KAREN E, 1999; PhD, 1997, University of Western Ontario (Canada)
 FRIEDMAN, BATYA, 1999; PhD, 1988, University of California (Berkeley)
 GRUDIN, JONATHAN T., 2000; PhD, 1981, University of California (San Diego); MS, 1973, Purdue University
 LEVY, DAVID M, 2000; PhD, 1979, Stanford University
 MARTIN, MICHELLE H, 2016; PhD, 1997, Illinois State University
 MASON, ROBERT M, 2005; PhD, 1973, Georgia Institute of Technology
 OH, SAM GYUN, 1994; PhD, 1995, Syracuse University
 PALMER, CAROLE L, 2014; PhD, 1996, University of Illinois (Urbana)
 PRATT, WANDA, 2002; PhD, 1999, Stanford University
 SCHOLL, HANS JOCHEN, 2003; PhD, 2002, State University of New York (Albany)

Associate Professors

ANNABI, HALA P, 2015; PhD, 2005, Syracuse University
 CARLYLE, ALLYSON, 1996; PhD, 1994, University of California (Los Angeles)
 CUTRELL, EDWARD BRYAN, 2011; PhD, 1999, University of Oregon
 GOMEZ, RICARDO J, 2007; PhD, 1997, Cornell University
 HENDRY, DAVID, 2002; PhD, 1996, The Robert Gordon University (Scotland)
 HOWE, WILLIAM GREGORY, 2009; PhD, 2007, Portland State University
 JANES, JOSEPH W., 1998; PhD, 1989, Syracuse University
 JOHNSON, RONALD A., 1986; MS, 1975, University of Southern California
 JONES, WILLIAM P., 2000; PhD, 1982, University of Pittsburgh
 KO, ANDREW J, 2008; PhD, 2008, Carnegie Mellon University
 LEE, JIN HA, 2009; PhD, 2008, University of Illinois
 METOYER, CHERYL, 2003; PhD, 1976, Indiana University
 MOORE, ADAM DANIEL, 2003; PhD, 1997, Ohio State University
 NAHON, KARINE, 2004; PhD, 2001, Tel Aviv University (Israel)
 SUTTON, STUART, 1999; PhD, 1991, University of California (Berkeley); MLS, 1987, University of California (Berkeley); LLM, 1982, University of California (Berkeley); MA, 1968, San Francisco State
 TEEVAN, JAIME, 2012; PhD, 2007, Massachusetts Institute of Technology
 TENNIS, JOSEPH T., 2001; PhD, 2005, University of Washington
 WOBBROCK, JACOB O, 2006; PhD, 2006, Carnegie Mellon University

Assistant Professors

ALAWADHI, SUHA, 2011; PhD, 2007, Loughborough University
 ALTHOUSE, BENJAMIN M, 2015; PhD, 2013, Johns Hopkins University
 DAHYA, NEGIN, 2014; PhD, 2014, York University (Canada)
 DAVIS, KATHARINE E., 2012; EdD, 2011, Harvard University; EdM, 2002, Harvard University
 FINN, MEGAN, 2014; PhD, 2012, University of California (Berkeley)
 GARRIDO, MARIA ISABEL, 1999; PhD, 2006, University of Washington
 HULLMAN, JESSICA, 2015; PhD, 2013, University of Michigan; MFA, 2006, Naropa Institute
 LEFTHAND-BEGAY, CLARITA, 2005; PhD, 2014, University of Washington

NELSON, JEROLD A * 1981; PhD, 1971, University of California (Berkeley)
 SEY, ARABA B, 2008; PhD, 2008, University of California (Los Angeles); MSC, 2000, University of Stirling, Scotland; MPhil, 1999, University of Ghana (Ghana)
 SNYDER, JAIME, 2015; PhD, 2012, Syracuse University
 SOPER, MARY E * 1996; PhD, 1972, University of Illinois
 SPIRO, EMMA STUART, 2013; PhD, 2013, University of California (Irvine)
 WEBER, NICHOLAS M, 2015; PhD, 2015, University of Illinois
 WEST, JEVIN D, 2005; PhD, 2010, University of Washington
 YIP, JASON, 2015; PhD, 2014, University of Maryland

Senior Lecturers

BARKER, SCOTT F, 1999; MS, 1987, Syracuse University
 BRUCE, LORRAINE, 1999; BS, 1977, Riverina College of Advanced Education, Australia
 HILL, TRENT G., 2000; PhD, 1994, Duke University; MA, 1988, Duke University
 LUKE, JESSICA, 2012; PhD, 2009, University of Maryland
 MCGANN, SEAN, 2015; PhD, 2004, Case Western Reserve University
 ROSS, JOEL, 2015; PhD, 2013, University of California (Irvine)
 SAXTON, MATTHEW, 2000; PhD, 2000, University of California (Los Angeles)
 STEARNS, DAVID L, 2013; PhD, 2008, University of Edinburgh (UK)
 WILLIAMS, HELENE C., 1995; MLS, 1989, Indiana University

Lecturers

BLANEY, JUSTIN, 2015; PhD, 2015, University of Maryland
 CARLSON, KATHERINE M., 2015; MBA, 1998, Simon Fraser University, B.C. (Canada)
 DOANE, MICHAEL, 2008; MLIS, 2005, University of Washington
 DUSHKES, LAURA, 2001; MLIS, 2002, University of Washington
 EISENBERG, ADAM, 1990; JD, 1992, University of Washington
 FARRICKER, JAMES T., 1987; MBA, 1989, City University (Bellevue)
 FLEMING, KEVIN M., 1997; BS, 2000, University of Washington
 FREEMAN, MICHAEL, 2010; MPH, 2013, University of Washington
 GOLDSMITH, ANNETTE, 2009; PhD, 2009, Florida State University
 HAY, GREGORY THOMAS, 2008; MSIM, 2007, University of Washington
 HINRICHS, RANDY J, 2008; MA, 1985, University of California (Los Angeles)
 HUNT, CHANCE, 2002; MLS, 1992, University of Washington
 JONES, ELISABETH, 2007; MIMEP, 2007, University of Michigan, Ann Arbor
 LARSON, ROBERT E., 1985; MBA, 1984, University of Washington
 LAWLER, JONATHAN H., 2015; MA, 2013, New York University
 LEVINE, JASON, 2012; BS, 1996, Santa Monica College
 MILLS, JARED L., 2013; MLIS, 2008, Drexel University
 MORRIS, JACOB A, 2003; MS, 2014, University of Washington
 MORRISSEY, KRISTINE A., 2007; PhD, 1989, Michigan State University
 NEWARD, THEODORE K, 2014; BA, 1995, University of California (Davis)
 NICKLAS, ROBERT, 2003; MA, 1977, University of Pittsburgh
 OSTERGREN, MARILYN J, 1990; PhD, 2013, University of Washington
 PARK, NAM HO, 2014; MArch, 1997, Columbia University
 SCHILDKRAUT, LAURA B., 1996; MBA, 1988, New York University
 SCHWALBE, DANIEL, 1997; BA, 2003, University of Washington
 SEARLE, MARGARET A, 2009; MA, 1968, University of Iowa
 SENAN, DAVID, 2014; BA, 1993, University of New Hampshire
 SUBRAMANIAM, ILANKO, 2011; MSC, 1991, Brunel University

Interschool and Intercollege Programs

Bioengineering

Professors

AUTH, DAVID C * 2000; PhD, 1969, Georgetown University; MS, 1966, Georgetown University

BASSINGTHWAIGHTE, JAMES, 1975; PhD, 1964, Mayo Medical School/Graduate School; MD, 1955, University of Toronto (Canada)

BLACK, ROY, 2012; PhD, 1982, University of Wisconsin (Madison); JD, 1974, Harvard University

BLYAKHMAN, FELIX A., 2000; ScD, 1996, Institute of Transplantation & Artificial Organs, Russia; PhD, 1986, Medical Academy, Krasnodar, Russia

BRYERS, JAMES D, 2004; PhD, 1980, Rice University; MSC, 1976, University of Idaho

BURKE, PAUL, 2012; PhD, 1992, Massachusetts Institute of Technology

CRUM, LAWRENCE A., 1992; PhD, 1967, Ohio University; MS, 1965, Ohio University

DAGGETT, VALERIE D., 1993; PhD, 1990, University of California (San Francisco)

DANLEY, DAVID L, 2012; PhD, 1973, Purdue University

FOSTER, DAVID M * 2000; PhD, 1969, University of British Columbia (Canada); MSC, 1965, San Diego State University

FRANZA, ROBERT B., 2000; MD, 1979, Georgetown University

GIACHELLI, CECILIA, 1982; PhD, 1987, University of Washington

HOFFMAN, ALLAN S, 1970; DSc, 1957, Massachusetts Institute of Technology; MS, 1955, Massachusetts Institute of Technology

HORBETT, THOMAS A, 1973; PhD, 1970, University of Washington

HSIEH, CHING-HO, 2011; PhD, 2003, University of Washington; MD, 1992, Kaohsiung Medical College, Taiwan

HUNTSMAN, LEE L, 1968; PhD, 1968, University of Pennsylvania

KWON, ICK CHAN, 2013; PhD, 1993, University of Utah; MS, 1984, Seoul National University (Korea)

LAI, HENRY C, 2000; PhD, 1977, University of Washington

MAKI, GARY, 2003; PhD, 1969, University of Missouri; MSEE, 1968, University of Missouri

MARTIN, ROY W, 1999; PhD, 1975, University of Washington; MS, 1970, University of Southern California

MARTYN, DONALD A, 1978; PhD, 1975, University of Southern California

MCCULLOCH, ANDREW D., 2000; PhD, 1986, University of Auckland (New Zealand); COP, 1983, University of Auckland (New Zealand)

NAKAMAE, KATSUHIKO, 2000; DrEng, 1967, Kyoto University (Japan); MS, 1962, Kyoto University (Japan)

O'DONNELL, MATTHEW, 2006; PhD, 1976, University of Notre Dame

POLLACK, GERALD H, 1968; PhD, 1968, University of Pennsylvania

POWERS, JEFFRY, 2012; PhD, 1980, University of Washington; MS, 1974, University of California (San Diego)

PUN, SUZIE H, 2003; PhD, 2000, California Institute of Technology; MS, 1998, California Institute of Technology

QUINTON, WAYNE E, 2003; BSME, 1959, University of Washington

RATNER, BUDDY D, 1972; PhD, 1972, Polytechnic Institute of Brooklyn

REGNIER, MICHAEL, 1995; PhD, 1991, University of Southern California; MS, 1983, Portland State University

REID, JOHN MITCHELL, 2000; PhD, 1965, University of Pennsylvania; MS, 1957, University of Minnesota

RENEMAN, ROBERT S., 2000; PhD, 1968, University of Utrecht (Netherlands); MD, 1959, University of Amsterdam (Netherlands)

REVIKINE, ILYA, 2015; PhD, 2000, University of Groningen (Netherlands)

SANDERS, JOAN ELIZABETH, 1985; PhD, 1991, University of Washington; MME, 1985, Northwestern University

SENER, PETER DANA, 2000; PhD, 1980, University of Illinois (Urbana); MS, 1976, North Carolina State University

SINGH, NARENDRA PAL, 2000; MBBS, 1972, King George's Medical College (India); MS, 1976, King George's Medical College (India)

SPELMAN, FRANCIS A * 1998; PhD, 1975, University of Washington; MSEE, 1968, University of Washington

STAYTON, PATRICK, 1992; PhD, 1989, University of Illinois; MS, 1989, University of Illinois
 SUYDAM, IAN, 2010; PhD, 2006, Stanford University
 VAN DER VUSSE, GER, 2000; PhD, 1975, Erasmus University (Netherlands); MS, 1971, University of Amsterdam (Netherlands)
 VERDUGO, PEDRO * 1982; MD, 1965, University of Chile
 WANG, RUIKANG, 2010; PhD, 1995, University of Glasgow (UK); MSC, 1990, Tianjin University (China)
 YAGER, PAUL, 1987; PhD, 1980, University of Oregon

Associate Professors

AVERKIOU, MICHALAKIS A, 1994; PhD, 1994, University of Texas, Austin; MS, 1989, University of Texas, Austin
 BURNS, DAVID H, 2000; PhD, 1984, University of Washington
 CHUDLER, ERIC H, 1991; PhD, 1985, University of Washington; MS, 1983, University of Washington
 FOLCH, ALBERT, 2000; PhD, 1994, University of Barcelona (Spain)
 GAMBLE, LARA J., 1991; PhD, 1996, University of Washington
 GAO, XIAOHU, 2005; PhD, 2004, Indiana University
 GARRISON, MICHAEL D, 2014; PhD, 1999, University of Washington; MSE, 1992, Duke University
 HILL, JOHN J., 2012; PhD, 1994, University of Illinois
 LAI, JR-IUAN, 2005; PhD, 2004, Polytechnic Institute of Brooklyn; MS, 2003, Polytechnic Institute of Brooklyn
 LUTZ, BARRY R., 1998; PhD, 2003, University of Washington
 MEDINA, JOHN J., 1999; PhD, 1988, University of Washington
 PRICE, NATHAN, 2011; PhD, 2005, University of California (San Diego)
 RATNER, DANIEL M., 1995; PhD, 2004, Massachusetts Institute of Technology
 SAURO, HERBERT M, 2007; PhD, 1986, Oxford University (UK); MSC, 1982, University of York (UK)
 SCATENA, MARTA, 1996; PhD, 1992, University of Padova, Italy
 SHERMAN, LAWRENCE, 2009; MD, 1979, University of Washington
 SPEER, YANFENG, 2000; PhD, 1999, University of Helsinki (Finland); MD, 1982, Tongji Medical University (China)
 THOMAS, WENDY, 1991; PhD, 2003, University of Washington; MS, 2003, University of Washington
 VICINI, PAOLO, 2000; PhD, 1996, Polytechnic of Milan (Italy)
 WEIGL, BERNHARD H, 2005; PhD, 1993, University of Graz (Austria); MSC, 1991, University of Graz (Austria)
 WOODROW, KIM A., 2009; PhD, 2006, Stanford University; MS, 2001, Stanford University

Assistant Professors

ANDERSON, JOSEPH C., 2003; PhD, 2001, University of Washington; MS, 1998, University of Washington
 BAKER, DANIEL R., 2000; PhD, 1993, University of Utah; MSE, 1986, University of Michigan
 BALDWIN, DAVID N, 2010; PhD, 1999, University of Washington
 BASIJI, DAVID A., 2002; PhD, 1997, University of Washington; MS, 1992, University of Washington
 BEARD, DANIEL A, 2001; PhD, 1997, University of Washington; MS, 1997, University of Washington
 BEDI, RAM L, 2008; PhD, 1989, University of Wales (U.K.); MBA, 2002, University of Washington
 BENSON, SHEILA MARIE, 2009; PhD, 1989, Northwestern University
 CONVERTINE, ANTHONY J, 2006; PhD, 2006, University of Southern Mississippi
 COREY, MICHAEL J., 1993; PhD, 1997, University of California (Berkeley); MA, 1978, Antioch University
 FIGUEROA, XAVIER A., 2003; PhD, 2003, University of Washington
 FU, ELAIN S., 2000; PhD, 1997, University of Maryland; MS, 1996, University of Maryland
 GOMBOTZ, WAYNE R, 2000; PhD, 1988, University of Washington; MS, 1985, University of Washington
 HESS, HENRY, 2000; PhD, 1999, Free University Berlin; MSC, 1996, Technische Universität (Germany)
 INTERLANDI, GIANLUCA, 2006; PhD, 2006, University of Zurich (Switzerland); MS, 2000, Institute for Atmospheric and Climate Science ETH (Zurich)
 JOHNSON, PAUL HICOCK, 2011; PhD, 1970, SUNY Roswell Park Cancer Institute
 KIM, DEOK-HO, 2011; PhD, 2010, Johns Hopkins University; MS, 2000, Seoul National University (Korea)
 KIM, KYUNG H., 1999; PhD, 2006, University of Washington; MS, 2001, University of Washington
 KUEH, HAO YUAN, 2016; PhD, 2008, Harvard University
 LAURSEN, ERIK D, 2011; MS, 1973, Technical Univ of Denmark (Denmark)
 LEACH, KATHLEEN J., 2000; PhD, 1996, Brown University
 MANAGULI, RAVI A., 1996; PhD, 2000, University of Washington; MS, 1996, University of Nevada (Las Vegas)
 MATULA, THOMAS J., 1993; PhD, 1993, Washington State University; MS, 1990, Washington State University

MOEHRING, MARK A., 2001; PhD, 1994, University of Washington; MSEE, 1989, University of Washington
 NEHILLA, BARRETT J, 2010; PhD, 2008, Boston University
 OVERBECK, JOHN R., 1998; MD, 1995, University of Washington; MSE, 1991, University of Washington
 PATHAK, SAYAN DEV, 2001; PhD, 2000, University of Washington; MS, 1997, University of Washington
 PELIVANOV, IVAN, 2010; PhD, 2000, Moscow State University (Russia); MS, 1998, Moscow State University (Russia)
 SELLERS, DREW L., 2002; PhD, 2001, Oregon State University
 STEVENS, KELLY R., 2003; PhD, 2008, University of Washington
 WONG, ROBERTA J, 2010; PharmD, 1983, University of California (San Francisco)
 ZHENG, YING, 2011; PhD, 2008, University of Michigan

Senior Lecturers

NEILS, CHRISTOPHER, 2001; PhD, 2000, University of Texas (Austin); MS, 1998, University of Texas (Austin)
 TAYLOR AMOS, ALYSSA, 2010; BS, 2003, University of California (Davis)

Lecturers

BLANK, MOLLY ANNEISE B., 2010; PhD, 2016, Carnegie Mellon University
 HENDRICKS, DIANNE G., 2013; PhD, 2010, Duke University
 THICKMAN, KAREN, 2015; PhD, 2006, Johns Hopkins University
 TO, RICHARD Y, 1983; PhD, 1982, Oregon State University

Global Health

Professors

AHMED, TAHMEED, 2014; PhD, 1996, University of Tsukuba (Japan)
 ALARCON, JORGE, 2009; MD, 1974, Univ.Nacional Mayor De San Marcos (Peru); MPH, 1998, University of Washington
 BAETEN, JARED, 1995; MD, 2003, University of Washington; PhD, 2001, University of Washington
 BAEZA, CRISTIAN C, 2014; MD, 1985, University of Chile; MPH, 1994, Johns Hopkins University; MS, 1987, Universidad Alberto Hurtado
 BERKLEY, JAMES, 2016; MD, 2003, University of Newcastle
 BERTOZZI, STEFANO, 2009; PhD, 1991, Massachusetts Institute of Technology; MD, 1991, University of California (San Diego)
 BRAUER, MICHAEL, 2014; DSc, 1990, Harvard University
 BURNETT, RICHARD THOMAS, 2014; PhD, 1982, Queens University; MSC, 1978, Queens University
 CAMPBELL, LEE ANN, 1985; PhD, 1982, Pennsylvania State University; MS, 1979, Pennsylvania State University
 CELUM, CONNIE L., 1987; PhD, 1989, University of Washington; MD, 1984, University of California (San Francisco)
 CHANDRA-MOULI, VENKATRAMAN, 2015; MD, 1980, Osmania University (India); MS, 1989, London Hospital Medical College (UK)
 CHILUNDO, BALTAZAR GONCALO, 2014; PhD, 2004, University of Oslo (Norway); MD, 1999, Universidad Eduardo Mondlane (Mozambique)
 CLIFF, JULIE, 2009; MSC, 1980, London School of Hygiene and Tropical Medicine (UK); Diploma, 1970, London School of Hygiene and Tropical Medicine (UK)
 COHEN, AARON JOSEPH, 2014; DSc, 1991, Boston University; MPH, 1985, Boston University
 DANDONA, LALIT, 2009; MBBS, 1987, All-India Institute of Medical Sciences; MD, 1987, All-India Institute of Medical Sciences
 DEGENHARDT, LOUISA JANE, 2013; PhD, 2001, University of New South Wales(Australia)
 DOWNER, ANN E., 1989; EdD, 1996, Seattle University; MS, 1984, University of Washington
 DUAN, LEILEI, 2015; MD, 1994, Hebei Medical University; MPH, 2002, Peking Union Medical College
 EBI, KRISTIE L, 2014; PhD, 1985, University of Michigan, Ann Arbor; MPH, 1983, University of Michigan, Ann Arbor
 ELIAS, CHRISTOPHER J., 2000; MD, 1983, Creighton University; MPH, 1990, University of Washington
 EZZATI, MAJID, 2008; PhD, 2000, Princeton University; MEng, 1995, McGill University (Canada)
 FARQUHAR, CAREY, 1994; MD, 1994, Harvard University; MPH, 2001, University of Washington
 FEIGIN, VALERY, 2014; PhD, 1992, Russian Academy of Medical Sciences, Moscow; MD, 1977, Novosibirsk State University (Russia); MSC, 1984, Novosibirsk State University (Russia)
 GAKIDOU, EMMANUELA, 2007; PhD, 2001, Harvard University; MSC, 1997, Harvard University
 GARCIA, PATRICIA J., 1999; MD, 1988, Universidad Peruana Cayetano Heredia; MPH, 1998, University of Washington

GARNETT, GEOFFREY P, 2014; PhD, 1990, University of Sheffield (UK); MSC, 1987, York University (UK)

GLOYD, STEPHEN S., 1985; MD, 1973, University of Chicago; MPH, 1983, Harvard University

HAKOMORI, SEN-ITIROH, 1981; DrMedSci, 1956, Tohoku Imperial University (Japan); MD, 1951, Tohoku Imperial University (Japan)

HAY, SIMON I, 2015; ScD, 2014, University of Oxford (UK); PhD, 1996, University of Oxford (UK)

HOFF, RODNEY, 2013; DSc, 1974, Harvard University; MSPH, 1972, Harvard University

HOLMES, KING K., 1967; PhD, 1967, University of Hawaii; MD, 1963, Cornell University

JAMISON, DEAN T, 2008; PhD, 1970, Harvard University; MS, 1967, Stanford University

JOHN STEWART, GRACE C., 1992; PhD, 2000, University of Washington; MD, 1987, University of Michigan

KAPPE, STEFAN H. I., 2004; PhD, 1998, University of Notre Dame; MS, 1991, University of Bonn (Germany)

KENNY, GEORGE E * 1981; PhD, 1961, University of Minnesota; MS, 1957, University of North Dakota

KIMERLING, MICHAEL E, 2008; MD, 1986, University of Alabama, Birmingham; MPH, 1995, University of Alabama, Birmingham

KURTH, ANN E., 2003; PhD, 2003, University of Washington; MN, 1990, Yale University

LAFTA, RIYADH, 2011; MBChB, 1984, Baghdad Medical College

LAMPE, PAUL D, 2000; PhD, 1984, University of Minnesota

LAXMINARAYAN, RAMANAN, 2012; PhD, 1999, University of Washington; MPH, 1999, University of Washington

LIM, STEPHEN SZE-PING, 2007; PhD, 2005, Monash University (Australia)

LINGAPPA, JAIRAM R., 1991; MD, 1991, University of California (San Francisco); PhD, 1987, Harvard University

LINGAPPA, JAISRI, 1999; MD, 1987, University of Massachusetts; PhD, 1985, Harvard University

LOPEZ, ALAN D, 2008; PhD, 1978, Australian National University; MS, 1974, Purdue University

LOZANO, RAFAEL, 2008; MD, 1979, Universidad Autonoma de Yucatan, Mexico

MANDALIYA, KISHORCHANDRA N, 2014; MBChB, 1976, University of Nairobi (Kenya)

MARTIN, ROBERT, 2009; DrPH, 1979, University of North Carolina, Chapel Hill; MPH, 1977, University of North Carolina, Chapel Hill

MOKDAD, ALI H., 2008; PhD, 1997, Emory University

MURRAY, CHRISTOPHER J, 2007; MD, 1991, Harvard University; DPhil, 1987, Oxford University (UK)

NAGHAVI, MOHSEN, 2007; PhD, 1996, Tehran University (Iran); MD, 1979, Tehran University (Iran)

NEUZIL, KATHLEEN M, 2000; MD, 1987, Johns Hopkins University; MPH, 1998, Vanderbilt University

NEWMAN, ROBERT D., 2000; MD, 1993, Johns Hopkins University; MPH, 1998, University of Washington

NOBLE, MICHAEL A., 2011; MD, 1972, University of Western Ontario (Canada)

ORENSTEIN, WALTER A., 2010; MD, 1972, Albert Einstein College of Medicine

PARISH, TANYA, 2007; PhD, 1993, National Inst For Medical Research (UK)

PARSONS, MARILYN * 2000; PhD, 1979, Stanford University

PFEIFFER, JAMES T., 2004; PhD, 1997, University of California (Los Angeles); MPH, 1997, University of California (Los Angeles)

RAMJEE, GITA, 2015; PhD, 1994, University of Natal, South Africa; MS, 1990, University of Natal, South Africa

REED, STEVEN G. * 1999; PhD, 1979, University of Montana

REYES, EDWARD MICHAEL, 2009; MD, 1986, University of California (Irvine)

SANCHEZ, JORGE L, 1999; MD, 1984, Univ.Peruana Cayetano Heredia (Peru); MPH, 1992, University of Washington

SEPULVEDA, JAIME, 2009; DPH, 1985, Harvard University; MD, 1978, Autonomous University, Mexico; MPH, 1980, Harvard University

SHERMAN, DAVID R. * 2000; PhD, 1987, Vanderbilt University

SMALL, PETER, 2003; MD, 1985, University of Florida

SMITH, DAVID L., 2015; PhD, 1998, Princeton University; MA, 1995, Princeton University

STAMATATOS, LEONIDAS, 2001; PhD, 1988, McGill University (Canada); MSC, 1983, University of Paris (France)

STEKETEE, RICHARD WALTER, 2012; MD, 1976, University of Cincinnati; MPH, 1983, Harvard University

STUART, KENNETH DANIEL * 1985; PhD, 1969, University of Iowa; MA, 1965, Wesleyan University

VOLLSET, STEIN EMIL, 2013; DrPH, 1989, University of California (Los Angeles); MD, 1981, University of Bergen (Norway)

VOS, ERIC THEO, 2013; PhD, 2006, Erasmus University (Netherlands); MD, 1978, University of Groningen (Netherlands)

WANG, HONG, 2015; PhD, 2002, University of Wisconsin (Madison); MD, 1986, Beijing Normal University (China)

WASSERHEIT, JUDITH N., 2001; MD, 1978, Harvard University; MPH, 1989, Johns Hopkins University

WEINER, BRYAN, 2016; PhD, 1994, University of Michigan-Ann Arbor; MA, 1992, University of Michigan, Ann Arbor

WHITEFORD, HARVEY A, 2013; PhD, 1999, University of Queensland (Australia)

ZHOU, MAIGENG, 2014; PhD, 2009, Chinese Center for Disease Control & Prevention (China); MSC, 2001, Chinese Center for Disease Control & Prevention (China)

ZHU, JUN, 2015; MBBS, 1985, Chongqing Jiaotong University (China); MA, 1988, Chongqing Jiaotong University (China)

Associate Professors

ABERRA, SISAY YIFRU, 2011; MD, 1994, Gondar College of Medicine and Health Sciences (Ethiopia)
 BASINGA, PAULIN, 2016; PhD, 2009, Tulane University; MS, 2005, Tulane University
 BATES, NICOLE K, 2014; DrPH, 2008, University of North Carolina, Chapel Hill; MPH, 2000, University of North Carolina, Chapel Hill
 BECKER, STEPHEN L., 2009; MD, 1976, State University of New York (Buffalo)

 MILLER, JENNIFER L, 2015; JD, 2001, Willamette University
 MORENO, PETER SHAWN, 2005; JD, 2008, University of Washington-Seattle Campus
 RAFANELLI, LARA ZAROWSKY, 2010; JD, 2007, University of Washington-Seattle Campus
 ROBBINS, DAVID B, 2016; JD, 1983, University of Washington-Seattle Campus
 ROSS, DOUGLAS C., 1999; JD, 1978, Columbia University
 SANCKEN, LAUREN ELIZABETH, 2008; JD, 2010, University of Washington
 TOLIN, ANNA M, 2011; JD, 1992, Cornell University
 VANA, JAMES LOCKHART, 2007; JD, 1993, Indiana University
 WILDERMUTH, TODD, 2011; PhD, 2008, University of Illinois
 WILLIAMS, BRENDA E, 1996; JD, 1997, University of Washington

School of Medicine

Anesthesiology

Professors

ANDERSON, CORRIE, 2001; MS, 1985, Boston University
 ARTRU, ALAN A, 1980; MD, 1975, Medical College of Wisconsin
 BASHEIN, GERARD, 1974; MD, 1974, University of New Mexico; PhD, 1969, Carnegie Mellon University
 BHAGWANJEE, SATISH, 2009; MBChB, 1983, University of Natal, South Africa
 BHANANKER, SANJAY M., 2002; MD, 1992, Goa University (India)
 BISHOP, MICHAEL J, 1979; MD, 1974, University of California (San Diego)

BOSENBERG, ADRIAN T, 2006; MBChB, 1973, University of Capetown (South Africa)
 BOWDLE, T. ANDREW, 1981; PhD, 1983, University of Washington; MD, 1980, University of Washington
 BYERS, MARGARET R * 2000; PhD, 1969, Harvard University
 CHENEY, FREDERICK W, 1982; MD, 1960, Tufts University
 CROWDER, CHARLES M, 2014; MD, 1989, Washington University; PhD, 1989, Washington University
 CULLEN, BRUCE F., 1984; MD, 1966, University of California (Los Angeles)
 CURATOLO, MICHELE, 2013; PhD, 1998, Aalborg University, Denmark; MD, 1984, University of Messina (Italy)
 DEEM, STEVEN A., 1999; MD, 1984, Southern Illinois University
 DOMINO, KAREN B., 1986; MD, 1978, University of Michigan; MA, 1974, University of New Mexico
 EDWARDS, WILLIAM T., 1990; MD, 1975, University of Massachusetts; PhD, 1968, Massachusetts Institute of Technology
 FITZGIBBON, DERMOT R., 1992; MBChB, 1983, University College (Ireland)
 FREUND, PETER, 1989; MD, 1975, Columbia University
 GEIDUSCHEK, JEREMY M, 1983; MD, 1983, Vanderbilt University
 GUNN, CHIT-CHAN, 2000; MBChB, 1956, University of Cambridge (UK); MA, 1956, University of Cambridge (UK)
 HABERKERN, CHARLES M., 1988; MD, 1974, Columbia University
 HORNBEIN, THOMAS F * 1981; MD, 1956, Washington University
 KRUEGER, JAMES M, 2013; MD, 2005, University of Szeged (Hungary); PhD, 1974, University of Pennsylvania
 LAM, ARTHUR M., 1987; MD, 1974, University of Western Ontario (Canada)
 LECKY, JOHN H., 1988; MD, 1965, University of Pennsylvania
 LOLLO, LORETO, 1997; MD, 1987, University of Rome (Italy)
 LYNN, ANNE, 1981; MD, 1975, Stanford University
 MACKENSEN, GEORG B, 2012; PhD, 2005, Technische Universität (Germany); MD, 1994, University of Hamburg (Germany)
 MARTIN, LYNN D, 1994; MD, 1982, University of Washington
 MICHALOWSKI, PIOTR, 2000; PhD, 1990, Medical Academy (Poland); MD, 1980, Medical Academy (Poland)
 MOORE, DANIEL C, 2000; MD, 1944, Northwestern University
 MORGAN, PHILIP G, 2008; MD, 1980, University of Colorado (Denver); MS, 1975, University of Colorado (Boulder)
 NATRAJAN, KRISHNA M., 2001; MBBS, 1971, University of Madras (India)
 NEAL, JOSEPH M., 2000; MD, 1978, West Virginia University
 OPP, MARK R, 2010; PhD, 1987, Washington State University; MS, 1983, Walla Walla College
 ORR, ROSEMARY J, 1975; MBChB, 1967, Queen's University of Belfast (Ireland)
 OXORN, DONALD C., 1998; MD, 1978, McGill University (Canada)
 PALERMO, TONYA M, 2010; PhD, 1998, Case Western Reserve University
 PAULDINE, RONALD W., 2008; MD, 1989, Case Western Reserve University
 PAVLIN, D JANET, 1975; MD, 1969, University of Manitoba (Canada); MSC, 1966, University of Manitoba (Canada)
 PAVLIN, EDWARD G, 1973; MD, 1968, University of Manitoba (Canada)
 POSNER, KAREN L., 1986; PhD, 1990, University of Washington; MA, 1980, University of Washington
 RAFTERY, MICHAEL D, 2012; PhD, 1991, University of California (Berkeley); MBA, 2004, University of Chicago
 RAPP, SUZANNE E, 1984; MD, 1981, University of Washington
 ROOKE, G. ALEC, 1982; PhD, 1985, University of Washington; MD, 1980, University of Washington
 ROSS, BRIAN K, 1983; MD, 1983, University of Washington; PhD, 1975, University of North Dakota
 SEDENSKY, MARGARET M, 2008; MD, 1980, University of Colorado (Denver); MS, 1975, University of Colorado (Boulder)
 SHARAR, SAMUEL R, 1983; MD, 1983, University of Washington
 SHARMA, DEEPAK, 2007; MD, 2003, University of Rajasthan
 SIVARAJAN, MURALI, 1974; MBBS, 1967, Jawaharlal Inst of Postgr Med Educ & Res
 SOUTER, KAREN J., 2002; MBBS, 1985, St. Bartholomew's Hosp Med School (UK); MS, 1999, University of East Anglia (UK)
 SOUTER, MICHAEL J., 2001; MBChB, 1984, University of Edinburgh (UK)
 STACEY, BRETT R, 2014; MD, 1986, University of Michigan
 TAUBEN, DAVID, 1985; MD, 1979, Tufts University
 TERMAN, GREGORY W., 1987; MD, 1987, University of Miami (Florida); PhD, 1985, University of California (Los Angeles)
 TIAN, RONG, 2009; PhD, 1992, University of Aarhus (Denmark)
 TURK, DENNIS C, 1996; PhD, 1978, University of Waterloo (Canada); MA, 1975, University of Waterloo (Canada)
 VAN NORMAN, GAIL, 1986; MD, 1981, University of Washington
 VAVILALA, MONICA S., 1994; MD, 1991, University of Texas (Houston)
 WALCO, GARY, 2009; PhD, 1984, Ohio State University; MA, 1982, Ohio State University

WARD, RICHARD J, 1990; MD, 1949, St Louis University

Associate Professors

BASTIEN, JOHN L., 2002; MD, 1994, Uniformed Services University of the Health Sciences
 BENTOV, ITAY, 2007; PhD, 2006, Tel Aviv University (Israel); MD, 1992, Hadassah Medical Center
 BOLLAG, LAURENT A., 2008; MD, 1999, University of Zurich (Switzerland)
 BRAMHALL, JOHN S., 1995; MD, 1991, University of California (San Diego); PhD, 1976, Aston University (England)
 CHADWICK, HEATHCLIFF S., 1988; MD, 1976, University of Oregon
 CLASS, URSULA, 2002; MD, 1981, Eberhard-Karls-University, Germany
 DAGAL, ARMAGAN H. C., 2008; MD, 1993, Dokuz Eylul University (Turkey)
 DAVIES, JOANNA M., 2001; MBBS, 1991, London Hospital Medical College (UK); FRCA, 1998, London Hospital Medical College (UK)
 DAWSON, TIMOTHY C., 2012; MD, 1998, Harvard University
 DEMBO, GREGORY, 2000; MD, 1978, First Leningrad Medical Institute, Russia
 DUNBAR, PETER J., 1998; MBChB, 1978, University of Aberdeen (UK)
 DZIERSK, JORG, 1998; MD, 1988, Ludwig-Maximilians University (Germany)
 EISSES, MICHAEL J., 1992; MD, 1995, University of Washington
 FLACK, SEAN H., 2004; MBChB, 1992, University of Capetown (South Africa)
 FUKAZAWA, KYOTA, 2014; MD, 1999, Tokyo Medical and Dental University
 GEMMA, CARMELINA, 2012; PhD, 1999, University of Milan (Italy); PhD, 1994, Mario Negri Institute
 GRABINSKY, ANDREAS, 2008; MD, 1995, University of Frankfurt (Germany)
 HECKER, JAMES G., 2010; MD, 1989, University of Virginia; PhD, 1982, University of Washington
 IRVING, GORDON A., 2000; MBBS, 1973, University of New Castle, England; MMed, 1990, University of Capetown (South Africa)
 IVASHKOV, YULIA, 2006; MD, 1989, Far Eastern State University (Russia)
 JARDINE, DAVID, 1987; MD, 1980, Johns Hopkins University
 JIMENEZ, NATHALIA, 2002; MD, 1994, Universidad Javeriana (Colombia)
 JOFFE, AARON M, 2010; DO, 1998, Midwestern University
 JOFFE, DENISE C, 2006; MD, 1986, McGill University (Canada)
 JOHNSON, MARTHA C., 2000; MD, 1989, Dartmouth Medical School
 JUDGE, LISA M., 2011; MD, 1990, University of Michigan
 KARL, HELEN W., 1990; MD, 1976, University of Virginia
 KENT, CHRISTOPHER D, 2005; MD, 1988, University of Saskatchewan (Canada)
 LANG, JOHN D, 2006; MD, 1988, American University of the Caribbean
 LATHAM, GREGORY J., 2009; MD, 2000, University of Kansas
 LELE, ABHIJIT, 2015; MD, 1998, BJ Medical College
 LESNIK, IVAN K, 2014; MD, 1990, University of Arizona
 LOLAND, VANESSA J, 2011; MD, 2002, New York Medical College
 MARTAY, KENNETH, 1999; MD, 1987, University of Freiburg (Germany)
 METZNER, IULIA IRINA, 2003; MD, 1986, Timisoara Univ of Med & Pharm (Romania)
 NAIR, BALA G., 2007; PhD, 1997, Ohio State University; MS, 1994, University of Kentucky
 NANDATE, KOICHIRO, 2008; PhD, 2006, University of Occupational and Environmental Health; MD, 1992, University of Occupational and Environmental Health
 NISHIO, ISUTA, 2004; PhD, 1997, Keio University (Japan); MD, 1986, Nara Medical University (Japan)
 OCAMPO, MA. CARMEN B., 2007; MD, 1985, University of the Philippines
 OGANESIAN, ANUSH, 1995; PhD, 1988, Institute of Element-Organic Compounds; MS, 1982, Yerevan State University (Armenia)
 OLIVAR, HERNANDO, 2003; MD, 1994, Universidad Nuestra Senora del Rosario, Colombia
 PANKOVICH, MARTHA B, 2005; MD, 1999, University of Navarra (Spain)
 PELLY, NICOLE WEBEL, 2002; MD, 1998, Southern Illinois University
 PITTAWAY, ANDREW J, 2002; MBBS, 1991, University of Nottingham (UK)
 POWERS, GLENN I., 2000; MD, 1988, Morehouse College; PharmD, 1982, University of California (San Francisco)
 RAMAIAH, RAMESH, 2006; MBBS, 1990, Jawaharlal Nehru University (India)
 RAMPERSAD, SALLY E., 1996; BM, 1986, University of Southampton (UK)
 RICHARDS, MICHAEL J., 2003; BM, 1993, University of Southampton (UK)

ROCHE, ANTHONY M, 2011; MBChB, 1993, University of Stellenbosch (So Africa); MMed, 2001, University of Capetown (South Africa)

ROZET, IRENA, 2002; MD, 1985, Academy of Medicine of Latvia

RUBENS, DANIEL D, 1999; MBBS, 1992, University of New South Wales(Australia)

RUPP, STEPHEN M., 2000; MD, 1978, University of Michigan

SIVARAJAN, GOURI K., 2003; MD, 1977, Jawaharlal Inst of Postgr Med Educ & Res

SOULAKVELIDZE, IRAKLI, 2008; PhD, 1987, Moscow State University (Russia); MD, 1979, Tbilisi State Medical Institute

VATER, YOURI L., 1999; PhD, 1988, Riga High Medical School (Israel); MD, 1977, Riga High Medical School (Israel)

VITIN, ALEXANDER A., 2003; PhD, 1985, Kharkov State Medical Univ (Ukraine); MD, 1981, Kharkov State Medical Univ (Ukraine)

VON HOMEYER, PETER, 2008; MD, 2001, Free University Berlin

WANG, WANG, 2010; PhD, 2002, Peking University (China); MD, 1997, Beijing Medical University (China)

WEISS, KAREN E, 2016; PhD, 2009, University of Maryland, Baltimore; MA, 2006, University of Maryland, Baltimore

WRIGHT, DAVID R, 2011; BM, 1990, University of Southampton (UK)

Assistant Professors

ADAMS, TREVOR L, 2013; MD, 2009, Eastern Virginia Medical School; MS, 2005, Old Dominion University

BEN-ARI, ALON Y, 2011; MD, 2000, Technion Israel Institute of Technology

BHALLA, PAUL I, 2011; MBChB, 2001, University of Bristol (UK)

BOLNICK, DAVID A, 2012; PhD, 1984, University of California (Davis)

BUDAC, STEFAN, 2008; MD, 2000, Ohio State University

CANLAS, BERNARD, 2016; MD, 1991, University of Santo Tomas (Philippines)

CHARD, RACHEL LINDSAY, 2011; MD, 2011, Oregon Health Sciences University; MPH, 2015, Johns Hopkins University

CHEMSIAN, RAFFI V, 2011; MD, 2004, Saint George'S University (Grenada)

CHIEM, JENNIFER LINH, 2015; MD, 2011, New York Medical College

CHIU, SHEILA C, 2010; DO, 2006, Kirksville College of Osteopathic Med; MS, 2002, University of British Columbia (Canada)

COLLINS, MICHAEL J, 2010; MBBS, 1999, Monash University (Australia)

COOPER, STEPHANIE, 2013; MD, 2012, University of Virginia-Main Campus

 KLEVIT, RACHEL E, 1983; DPhil, 1981, Oxford University (UK)
 KREBS, JOCELYN, 2002; PhD, 1997, University of California (Berkeley)
 MILLER, KURT W., 2001; PhD, 1982, Boston University
 MORRIS, DAVID R, 1981; PhD, 1964, University of Illinois
 PALMITER, RICHARD D * 1982; PhD, 1969, Stanford University
 PARSON, WILLIAM W * 1981; PhD, 1965, Case Western Reserve University
 PETRA, PHILIP H * 1993; PhD, 1966, Tulane University
 ROBERTS, JAMES MICHAEL * 1999; MD, 1984, Columbia University; PhD, 1984, Columbia University
 ROTH, MARK * 1999; PhD, 1988, University of Colorado (Boulder)
 RUOHOLA-BAKER, HANNELE, 1993; PhD, 1989, University of Helsinki (Finland)
 SHAPIRO, BENNETT M * 1999; MD, 1964, Jefferson Medical College
 STODDARD, BARRY L. * 1999; PhD, 1990, Massachusetts Institute of Technology
 TELLER, DAVID C, 1981; PhD, 1965, University of California (Berkeley)
 TSUKIYAMA, TOSHIO * 1999; PhD, 1991, University of Horishima (Japan); DVM, 1987, Obihiro University of Agriculture and Veterinary Medicine, Japan
 WALSH, KENNETH A * 1981; PhD, 1959, University of Toronto (Canada); MS, 1953, Purdue University
 WEINER, ALAN, 2000; PhD, 1973, Harvard University

YOUNG, ELTON, 1981; PhD, 1967, California Institute of Technology
 ZENG, HONGKUI, 2015; PhD, 1996, Brandeis University

Associate Professors

BRZOVIC, PETER S, 1993; PhD, 1991, University of California (Riverside)
 COLE, DOUGLAS G., 2003; PhD, 1990, Washington State University
 COPIE, VALERIE, 2003; PhD, 1990, Massachusetts Institute of Technology
 FAN, ERKANG, 1996; PhD, 1993, University of Pittsburgh
 GONEN, TAMIR, 2005; PhD, 2002, University of Auckland (New Zealand)
 LANGER, PAMELA, 2001; PhD, 1980, Massachusetts Institute of Technology
 MERRITT, ETHAN ALLEN, 1989; PhD, 1980, University of Wisconsin; MS, 1975, Stanford University
 MERZ, ALEXEY, 2004; PhD, 2000, Oregon Health Sciences University
 MULLER, ERIC D., 1988; PhD, 1981, Yale University
 ROBERTS, KENNETH P, 2008; PhD, 1989, Washington State University
 SCHIEF JR, WILLIAM R., 2000; PhD, 1999, University of Washington; MS, 1992, University of Washington
 STAYTON, MARK M., 2001; PhD, 1980, Iowa State University
 TEINTZE, MARTIN, 2000; PhD, 1981, University of California (San Diego)
 VERLINDE, CHRISTOPHE, 1992; PhD, 1988, Catholic University of Leuven (Belgium)

Assistant Professors

AILION, MICHAEL, 2011; PhD, 2000, University of Washington
 BAI, JIHONG, 2011; PhD, 2003, University of Wisconsin (Madison); MS, 1998, Tsinghua University (China)
 BRADLEY, PHILIP H., 2001; PhD, 2001, Massachusetts Institute of Technology
 CHAUVIN, THEODORE R, 2012; PhD, 2003, Washington State University; MS, 1999, Northern Illinois University
 DIMAIO, FRANK, 2007; PhD, 2007, University of Wisconsin (Madison)
 FORTUNATO, ELIZABETH A., 2001; PhD, 1995, University of California (San Diego)
 GU, LIANGCAI, 2015; PhD, 2008, University of Michigan, Ann Arbor; MS, 2002, Tsinghua University (China)
 HOPPINS, SUZANNE, 2013; PhD, 2005, University of Alberta, Canada
 KING, NEIL, 2010; PhD, 2010, University of California (Los Angeles)
 KOLLMAN, JUSTIN M, 2014; PhD, 2005, University of California (San Diego)
 KWON, YOUNG, 2015; PhD, 2008, Johns Hopkins University; MA, 1999, Yonsei University (Korea)
 MILLER, DANA L, 2010; PhD, 2003, Johns Hopkins University
 RANISH, JEFFREY A., 1999; PhD, 1999, University of Washington
 VEESLER, DAVID J, 2015; PhD, 2010, University of Aix-Marseille, France; MS, 2006, University of Aix-Marseille, France
 WILLS, ANDREA, 2015; PhD, 2009, University of California (Berkeley)

Lecturer

GILMORE, JOSHUA, 2016; PhD, 2007, University of California (Berkeley)

Bioethics and Humanities

Professors

BERRYMAN, JACK W * 1981; PhD, 1976, University of Maryland; MA, 1974, University of Massachusetts
 BOWEN, DEBORAH J, 1986; PhD, 1986, Uniformed Services University of the Health Sciences
 BOYER, BERT B, 2004; PhD, 1988, Louisiana State University
 BRADDOCK, CLARENCE H. * 2000; MD, 1981, University of Chicago; MPH, 1995, University of Washington
 BURKE, WYLIE, 1984; MD, 1978, University of Washington; PhD, 1974, University of Washington
 DUDZINSKI, DENISE M, 2001; PhD, 2001, Vanderbilt University; MS, 1993, Vanderbilt University
 EDWARDS, KELLY ALISON, 1993; PhD, 2000, University of Washington; MA, 1995, University of Washington
 HOLLAND, SUZANNE, 2002; PhD, 1997, Graduate Theological Union; MA, 1991, Louisville Seminary
 JECKER, NANCY A.S., 1982; PhD, 1986, University of Washington; MA, 1984, University of Washington; MA, 1982, Stanford University
 JONSEN, ALBERT R. * 1999; PhD, 1967, Yale University; STM, 1963, Santa Clara University

MENZEL, PAUL T., 2000; PhD, 1971, Vanderbilt University
 RISSE, GUENTER B, 2002; PhD, 1971, University of Chicago; MD, 1958, University of Buenos Aires (Argentina)
 TIMBERLAKE, DIANE MARIE, 1989; MD, 1985, University of Washington
 WHORTON, JAMES C. * 1982; PhD, 1969, University of Wisconsin (Madison)

Associate Professors

BLACKSHER, ERIKA A, 2010; PhD, 2007, University of Virginia; MA, 1996, University of Virginia
 FULLERTON, STEPHANIE MALIA, 2005; DPhil, 1995, University of Oxford (UK)
 STARKS, HELENE, 1989; PhD, 2004, University of Washington; MPH, 1989, University of California (Berkeley)

Assistant Professors

CAMPELIA, GEORGINA D, 2016; PhD, 2016, CUNY Graduate School and University Center; MPHIL, 2013, CUNY Graduate School and University Center
 FORSTER, DAVID, 2000; JD, 1996, University of Washington; MA, 1996, University of Washington
 GRANT, GEORGE H., 2001; PhD, 2001, Boston University
 KING, STEPHEN D, 2010; PhD, 1993, Vanderbilt University
 MILAM, STEVEN D., 2000; JD, 1969, University of Oregon
 TAUALII, MAILE M., 2013; PhD, 2009, University of Washington; MPH, 2004, University of Washington

Senior Lecturer

MC CORMICK, THOMAS R., 1974; DMin, 1976, Southern Methodist University; MDiv, 1960, Drake University

Biological Structure

Professors

ADMAN, ELINOR T * 1999; PhD, 1967, Brandeis University; MA, 1964, Brandeis University
 BAILEY, RAYMOND, 2008; PhD, 1973, Johns Hopkins University; MA, 1969, California State University, Long Beach
 BAJORATH, JURGEN, 2000; PhD, 1988, Free University Berlin
 BERMINGHAM-MCDONOGH, O, 1996; PhD, 1987, University of California (Los Angeles)
 BRINKLEY III, JAMES F., 1988; PhD, 1984, Stanford University; MD, 1974, University of Washington
 CLARK, JOHN I, 1982; PhD, 1974, University of Washington
 CUSICK, CATHERINE GRACE, 2011; PhD, 1979, University of Washington
 DACEY, DENNIS M., 1986; PhD, 1983, University of Chicago
 FARR, ANDREW G, 1982; PhD, 1975, University of Chicago
 GOODMAN, ANTHONY ALLEN, 2000; MD, 1965, Cornell University
 GRANEY, DANIEL O, 1981; PhD, 1965, University of California (San Francisco); MA, 1962, University of California (San Francisco)
 HENDRICKSON, ANITA E * 1982; PhD, 1964, University of Washington
 KOEHLER, JAMES K * 1998; PhD, 1961, University of California (Berkeley); MS, 1958, University of California (Berkeley)
 LEE, MINAKO Y * 1999; MD, 1963, Tokyo Women'S Medical College (Japan)
 QUINLAN, ROY A., 2009; PhD, 1981, University of Kent
 RAIBLE, DAVID W., 1995; PhD, 1989, University of Pennsylvania
 REH, THOMAS A., 1989; PhD, 1981, University of Wisconsin
 REUVENI, ZIPORA, 1979; PhD, 1979, University of Windsor (Canada); MSC, 1975, Weizmann Institute For Science (Israel)
 ROBINSON, FARREL R., 1986; PhD, 1982, Brown University
 ROSSE, CORNELIUS * 1981; ScD, 1983, University of Bristol (UK); MD, 1974, University of Bristol (UK)
 SHERK, HELEN, 1982; PhD, 1978, Massachusetts Institute of Technology
 STENKAMP, RONALD E, 1978; PhD, 1975, University of Washington; MS, 1971, University of Washington
 WONG, RACHEL O, 2006; PhD, 1986, Australian National University
 XU, WENQING, 1999; PhD, 1995, Massachusetts Institute of Technology; MS, 1988, Chinese Academy of Sciences (China)

Associate Professors

BAIR, WYETH DANIEL, 2011; PhD, 1996, California Institute of Technology

DE VITO, JUNE R * 1989; PhD, 1954, University of Washington; MA, 1949, University of British Columbia (Canada)
 DHAKA, AJAY K, 2009; PhD, 2001, University of California (Los Angeles)
 GADDUM-ROSSE, PENELOPE * 1996; PhD, 1965, University of Liverpool (UK)
 HARRIS, ROGER M * 1988; PhD, 1975, University of Washington
 KAPAS, LEVENTE SANDOR, 2009; MD, 1985, Medical University, Hungary
 PASUPATHY, ANITHA, 2006; PhD, 2001, Johns Hopkins University; MS, 1994, McGill University (Canada)
 PENG, HANCHUAN, 2015; PhD, 1999, Southeast University (China)
 PFEIFFER, DAVID C., 2004; PhD, 1997, University of British Columbia (Canada); MS, 1990, University of British Columbia (Canada)
 PITTACK, CATRIN, 2000; PhD, 1995, University of Washington
 PROTHERO, JOHN W * 1999; PhD, 1960, University of Western Ontario (Canada)
 STENKAMP, DEBORAH L., 2003; PhD, 1993, Johns Hopkins University
 SUNDSTEN, JOHN WALLIN, 1998; PhD, 1961, University of California (Los Angeles)

Assistant Professors

ALEXANDER, BRENDA MAE, 2010; PhD, 1999, University of Wyoming; MS, 1988, University of Wyoming
 BALEMBA, ONESMO BEGIRA, 2010; PhD, 2001, Royal Veterinary and Agricultural University, Denmark
 BROWN, RONALD LANE, 2012; PhD, 1991, Stanford University
 CETIN, ALI HAYDAR, 2014; PhD, 2008, University of Heidelberg (Germany); MS, 2004, University of Heidelberg (Germany)
 CONLEY, DAVID M., 2000; MS, 1987, Washington State University
 HARRIS, JULIE A., 2004; PhD, 2006, University of Washington
 HINTERBERGER, TIMOTHY J., 2000; PhD, 1987, University of Illinois (Urbana); MS, 1981, University of Illinois (Urbana)
 LAMPA, STEVEN JEFFREY, 2008; PhD, 2004, Washington State University; MS, 1994, Washington State University
 LEFCORT, FRANCES B., 2000; PhD, 1988, University of California (San Francisco)
 SEEGMILLER, JEFFREY G., 2008; EdD, 2003, Illinois State University; MS, 1996, Illinois State University
 SHAFER, GAVRIELA, 2002; PhD, 2002, Hebrew University (Israel); MSC, 1995, Tel Aviv University (Israel)
 SZENTIRMAI, EVA, 2009; MD, 2004, University of Szeged (Hungary)
 WANG, LIGUO, 2011; PhD, 2003, Cornell University
 WISOR, JONATHAN P., 2009; PhD, 1997, University of California (Los Angeles)

Biomedical Informatics and Medical Education

Professors

CARLINE, JAN D., 1977; PhD, 1979, University of Washington; MED, 1976, University of Washington
 FOSTER, JAMES A, 2003; PhD, 1990, Illinois Institute of Technology; MS, 1987, Illinois Institute of Technology
 FULLER, SHERRILYNNE, 1988; PhD, 1984, University of Southern California; MLS, 1968, Indiana University
 HECKERMAN, DAVID, 2006; MD, 1992, Stanford University; PhD, 1990, Stanford University; MS, 1979, University of California (Los Angeles)
 HORVITZ, ERIC J., 2000; MD, 1994, Stanford University; PhD, 1991, Stanford University
 JOYCE, PAUL J, 2003; PhD, 1988, University of Utah; MS, 1982, Montana State University
 KOLKER, EUGENE, 1999; PhD, 1996, Weizmann Institute For Science (Israel); MSC, 1986, Kishinev University, Ussr
 MASYS, DANIEL R, 2011; MD, 1974, Ohio State University
 MOONEY, SEAN D, 2015; PhD, 2001, University of California (San Francisco)
 MYLER, PETER J., 2000; PhD, 1982, University of Queensland (Australia)
 O'CARROLL, PATRICK W., 2000; MD, 1983, Johns Hopkins University; MPH, 1983, Johns Hopkins University
 ROBINS, LYNNE S, 1999; PhD, 1990, University of Michigan
 ROBINSON, TIMOTHY J, 2011; PhD, 1997, Virginia Polytechnic Institute and State University; MS, 1994, Virginia Polytechnic Institute and State University
 SCHAAD, DOUGLAS C., 1975; PhD, 1986, University of Washington; MED, 1974, University of Washington
 SCOTT, CRAIG S, 1979; PhD, 1973, University of Iowa; MA, 1970, California State University, Sacramento
 SHELBY, NANCY, 2010; PhD, 1993, University of Utah; MS, 1991, University of Utah
 TARCZY-HORNOCH, PETER, 1992; MD, 1989, Stanford University
 WETTER, THOMAS, 2011; PhD, 1984, University of Aachen (Germany); MSC, 1976, University of Aachen (Germany)

WILCOX, ADAM B, 2016; PhD, 2000, Columbia University; MPHIL, 1998, Columbia University
WOLF, FREDRIC M, 1997; PhD, 1980, Kent State University; MED, 1977, Kent State University

Associate Professors

ABERNETHY, NEIL F, 2008; PhD, 2005, Stanford University
CURIOSO, WALTER H., 2003; MD, 2002, Universidad Peruana Cayetano Heredia
GENNARI, JOHN H, 2002; PhD, 1990, University of California (Irvine); MS, 1985, University of Wisconsin
HAMMOND, KENRIC W., 2000; MD, 1974, University of California (San Diego)
LUO, GANG, 2016; PhD, 2004, University of Wisconsin-Madison
PUTNAM, ELIZABETH A, 2003; PhD, 1989, University of Texas (Houston)
ROSSINI, ANTHONY J, 2000; DSc, 1994, Harvard University
SABIN, JANICE, 1996; PhD, 2006, University of Washington; MSW, 2001, University of Washington
THAM, ERIC, 2016; MD, 2001, Northwestern University; MS, 2007, University of Pittsburgh
VANDERWENDE, LUCRETIA H, 2011; PhD, 1995, Georgetown University; MS, 1985, Georgetown University
YETISGEN, MELIHA, 2002; PhD, 2007, University of Washington; MS, 2000, Middle East Technical University (Turkey)

Assistant Professors

CAPURRO NARIO, DANIEL, 2013; PhD, 2012, University of Washington; MD, 2003, Pontificia Universidad Catolica De Chile
CHEN, ANNIE T, 2015; PhD, 2015, University of North Carolina, Chapel Hill; MS, 2010, University of North Carolina, Chapel Hill
CROSSLIN, DAVID R., 2009; PhD, 2009, Duke University; MS, 1998, North Carolina State University
FELLNER, B. JANE, 1982; MD, 1979, University of Washington
HALL, AMANDA K., 2013; PhD, 2013, University of Florida; MS, 2009, University of West Florida
KORNGIEBEL, DIANE M, 2008; DPhil, 2005, University of Oxford (UK); MA, 1999, University of Durham (UK)
MURRAY, KATHLEEN, 2002; MLS, 1976, University of Washington
NAGASAWA, PAMELA, 2000; PhD, 2010, University of Washington; MED, 2002, University of Washington
ROSE, ERIC, 2000; MD, 1993, Albert Einstein College of Medicine
WENRICH, MARJORIE, 1980; MPH, 1994, University of Washington

Lecturer

MASUDA, DAVID, 1997; MD, 1980, University of North Dakota; MS, 1996, University of Wisconsin (Madison)

Comparative Medicine

Professors

ANDERSON, DAVID M., 1988; DVM, 1989, Washington State University
BRABB, THEA L., 1992; PhD, 1999, University of Washington; DVM, 1985, University of Illinois
DENNIS, MELVIN B. * 1995; DVM, 1961, Washington State University
DI GIACOMO, RONALD F. * 1983; DVM, 1965, University of Pennsylvania; MPH, 1974, University of Washington
IRITANI, BRIAN M, 1992; PhD, 1997, University of Washington; DVM, 1988, Washington State University
KNOWLES, DONALD P, 2005; PhD, 1988, Washington State University; DVM, 1982, University of Illinois
LADIGES, WARREN C., 1982; DVM, 1971, Washington State University; MS, 1978, Washington State University
LIGGITT, H DENNY, 1989; PhD, 1979, Colorado State University; DVM, 1972, Colorado State University
MEADOR, VINCENT P, 2016; PhD, 1989, Iowa State University; DVM, 1981, Iowa State University
PRICE, LILLIAN M., 1984; PhD, 1983, University of Pennsylvania; DVM, 1972, University of Pennsylvania
VAN HOOSIER, GERALD * 1981; DVM, 1957, Texas A&M University
WARE, CAROL B., 1995; PhD, 1986, University College (Ireland)

Associate Professors

COLBY, LESLEY A, 2012; DVM, 1996, Virginia Polytechnic Institute and State University; MS, 1997, Virginia Polytechnic Institute and State University
FREVERT, CHARLES W, 1995; DSc, 1994, Harvard University; DVM, 1984, Iowa State University
HAJJAR, ADELINE M, 1988; PhD, 1995, University of Washington; DVM, 1988, University of Illinois

HARGIS, ANN M., 2000; DVM, 1973, Colorado State University; MS, 1976, Colorado State University
 JEROME, CHRISTOPHER P, 2009; PhD, 1983, University of California (Davis)
 MURNANE, ROBERT D, 2006; PhD, 1989, Washington State University; DVM, 1985, University of California (Davis)
 PEKOW, CYNTHIA A, 2000; DVM, 1984, University of Illinois; MS, 1980, Stanford University
 RUDELL, MARGARET ALANNA, 2010; PhD, 1983, Case Western Reserve University
 TREUTING, PIPER, 1996; DVM, 1996, Louisiana State University; MS, 2000, University of Washington
 WAGGIE, KIMBERLY S., 2000; PhD, 1984, University of Missouri; DVM, 1980, Iowa State University
 WASHINGTON, IDA M, 2006; PhD, 1991, University of North Carolina; DVM, 1987, North Carolina State University

Assistant Professors

BENNETT, TRACY D, 2014; DVM, 1994, Washington State University
 BUETOW, BERNARD S., 1999; PhD, 2003, University of Washington; DVM, 1989, University of Illinois
 GRAHAM, JENNIFER E, 2004; DVM, 1999, Auburn University
 HAGAN, CATHERINE E, 2004; PhD, 2010, University of Washington; DVM, 2004, University of California (Davis)
 HSU, CHARLIE C, 2012; PhD, 2007, University of Missouri (Columbia); DVM, 2002, University of Pennsylvania
 IWATA, TERRI N, 2013; DVM, 2013, Cornell University; PhD, 2012, Cornell University
 KOSZDIN, KARI L., 1998; DVM, 1996, University of Wisconsin; MS, 1989, Albert Einstein College of Medicine
 KRAMER, ROBERT W., 2000; DVM, 1987, University of California (Davis)
 MEEKER, STACEY M, 2010; PhD, 2015, University of Washington; DVM, 2010, Ohio State University
 PAIK, JISUN, 1994; PhD, 2000, University of Washington; MS, 1994, University of Michigan
 PRITCHETT-C, KATHLEEN R, 2000; DVM, 1993, Washington State University
 RAMIREZ, JULITA A, 2012; DVM, 2008, Colorado State University; PhD, 2007, Colorado State University
 RUNSTADLER, JONATHAN A, 2006; PhD, 2003, University of California (Davis); DVM, 1999, University of California (Davis)
 SNYDER, JESSICA M, 2011; DVM, 2001, Virginia-Maryland Regional College of Veterinary Medicine; MS, 2014, University of Washington
 WILEY, JESSE C, 2003; PhD, 2003, University of Washington; MS, 2003, University of Washington

Lecturers

DOWLING, SUSAN C., 1997; DVM, 1986, Washington State University
 LUCAS, MOLLY K, 2005; DVM, 2003, University of California (Davis); MS, 1997, University of Hawaii
 SANDERS, GEORGE E., 1997; DVM, 1997, Louisiana State University; MS, 2001, University of Washington

Family Medicine

Professors

ALLEN, SUZANNE M., 2000; MD, 1992, George Washington University; MPH, 1995, George Washington University
 BAINES, DAVID RAY, 2000; MD, 1982, Mayo Medical School/Graduate School
 BAKER, RICHARD, 2000; MD, 1965, Case Western Reserve University

 SIBLEY, CAROL HOPKINS, 1976; PhD, 1974, University of California (San Francisco); MS, 1970, University of Rochester
 SMITH, GERALD R * 2000; PhD, 1970, Massachusetts Institute of Technology
 STAMATOYANNOPOULOS, JOHN A, 2005; MD, 1995, University of Washington
 SWANSON, WILLIE J, 2002; PhD, 1998, University of California (San Diego)
 THOMAS, JAMES H, 1988; PhD, 1985, Massachusetts Institute of Technology
 TRASK, BARBARA J * 1997; PhD, 1985, Leiden University (The Netherlands); MS, 1979, Leiden University (The Netherlands)
 WATERSTON, ROBERT H, 2002; MD, 1972, University of Chicago; PhD, 1972, University of Chicago

Associate Professors

BORENSTEIN, ELHANAN A, 2009; PhD, 2007, Tel Aviv University (Israel)
 BRADLEY, ROBERT K, 2011; PhD, 2008, University of California (Berkeley)
 BREEDEN, LINDA, 2000; PhD, 1981, University of Colorado (Boulder)
 DUNHAM, MAITREYA J, 2008; PhD, 2003, Stanford University
 MALIK, HARMIT S, 2004; PhD, 1999, University of Rochester; MS, 1999, University of Rochester
 PADDISON, PATRICK J, 2013; PhD, 2004, Watson School of Biological Sciences (Cold Spring Harbor, NY)
 QUEITSCH, CHRISTINE H, 2007; PhD, 2001, University of Chicago; MSC, 1993, Martin Luther Univ Halle-Wittenberg
 VENTURA, MARIO, 2007; PhD, 2003, University of Bari (Italy)

Assistant Professors

DUDLEY, AIMEE M, 2008; PhD, 1999, Harvard Medical School
 FOWLER, DOUGLAS M, 2007; PhD, 2007, The Scripps Research Institute

MACPHERSON, DAVID, 2015; PhD, 2005, Massachusetts Institute of Technology
 NUNN, BROOK L., 1998; PhD, 2004, University of Washington; MS, 2000, University of Washington
 SUBRAMANIAM, ARVIND, 2016; PhD, 2008, University of Chicago; MS, 2007, University of Chicago
 TRAPNELL, BRUCE C, 2014; PhD, 2010, University of Maryland
 VILLEN, JUDIT, 2010; PhD, 2003, University of Barcelona (Spain); MSC, 1999, University of Barcelona (Spain)
 WOLF YADLIN, ALEJANDRO M, 2010; PhD, 2007, Massachusetts Institute of Technology; MS, 2001, University of Chile

Lecturers

CHEONG, KA YAN, 2011; PhD, 2010, Johns Hopkins University
 MUNN, MAUREEN M., 1993; PhD, 1986, University of California (San Francisco)
 PAUL, ANNE S, 1980; MS, 1994, University of Washington

Immunology

Professors

ADEREM, ALAN A. * 1996; PhD, 1979, University of Capetown (South Africa)
 BEVAN, MICHAEL J. * 1990; PhD, 1972, National Inst For Medical Research (UK); MSC, 1968, University of London, UK
 FINK, PAMELA J., 1990; PhD, 1981, Massachusetts Institute of Technology
 GALE, MICHAEL J, 1983; PhD, 1994, University of Washington
 GOVERMAN, JOAN M, 1992; PhD, 1981, University of California (Los Angeles)
 HOOD, LEROY E. * 2000; PhD, 1968, California Institute of Technology; MD, 1964, Johns Hopkins University
 JUTILA, MARK A., 2002; PhD, 1986, Washington State University; MS, 1984, Washington State University
 MAIZELS, NANCY, 2000; PhD, 1974, Harvard University
 NEPOM, GERALD T * 2000; MD, 1978, University of Washington; PhD, 1977, University of Washington
 PERLMUTTER, ROGER M. * 2000; MD, 1979, Washington University; PhD, 1979, Washington University
 STRONG, ROLAND K * 2000; PhD, 1990, Harvard University
 ZIEGLER, STEVEN F. * 2000; PhD, 1984, University of California (Los Angeles)

Associate Professors

CAMPBELL, DANIEL, 2004; PhD, 1998, University of California (Berkeley)
 HAMERMAN, JESSICA A., 2007; PhD, 2001, University of Washington
 LACY-HULBERT, ADAM, 2014; PhD, 1995, Cambridge University (UK)
 STETSON, DANIEL B, 2008; PhD, 2002, University of California (San Francisco)
 URDAHL, KEVIN B., 1999; MD, 1995, University of Minnesota; PhD, 1993, University of Minnesota

Assistant Professors

BETTELLI, ESTELLE, 2009; PhD, 2001, Universite of Paris VII; MS, 1996, Universite of Paris VII
 GERNER, MICHAEL Y, 2015; PhD, 2009, University of Minnesota
 KNALL, CINDY, 2006; PhD, 1994, University of Colorado (Denver)
 LOO, YUEH-MING, 2007; PhD, 2003, State University of New York (Buffalo)
 OBERST, ANDREW A, 2012; PhD, 2005, Univ of Pierre & Marie Curie (France); PhD, 2005, University of Rome Tor Vergata (Italy)
 PEPPER, MARION, 2011; PhD, 2006, University of Pennsylvania
 SAVAN, RAM, 2011; PhD, 2004, Kagoshima University; MSC, 2001, University of Agricultural Sciences (India)
 VON MOLTKE, JAKOB, 2016; PhD, 2012, University of California (Berkeley); MA, 2007, Columbia University

Laboratory Medicine

Professors

ASTION, MICHAEL L. * 2000; MD, 1989, University of Pennsylvania; PhD, 1989, University of Pennsylvania
 CHANDLER, WAYNE L * 1998; MD, 1982, St Louis University
 CHATRIAN, GIAN E, 1981; MD, 1951, University of Naples (Italy)

CHOU, DAVID, 1998; MD, 1974, University of Pittsburgh; MS, 1979, University of Minnesota
 CLARRIDGE, JILL E., 2002; PhD, 1973, Purdue University; MS, 1962, University of Michigan
 COOKSON, BRAD T, 1991; MD, 1991, Washington University; PhD, 1991, Washington University
 COOMBS, ROBERT W, 1985; MD, 1981, Dalhousie University (Canada); PhD, 1977, Dalhousie University (Canada)
 COREY, LAWRENCE * 1982; MD, 1971, University of Michigan
 COYLE, MARIE B * 1981; PhD, 1965, Kansas State University; MS, 1963, St. Louis University
 DETTER, JAMES C * 1999; MD, 1962, University of Kansas
 FANG, FERRIC C., 2001; MD, 1983, Harvard University
 FINE, JAMES, 1977; MD, 1972, University of Minnesota; MS, 1977, University of Minnesota
 GIBB, ROBERT P, 2000; MD, 1948, Washington University
 HESS, JOHN R, 2012; MD, 1972, University of Washington; MPH, 1979, University of Hawaii
 JEROME, KEITH R, 1993; MD, 1993, Duke University; PhD, 1992, Duke University
 KENNY, MARGARET * 1997; PhD, 1968, University of Illinois
 MAGARET, AMALIA SOPHIA, 1997; PhD, 2001, University of Washington; MS, 1997, Western Michigan University
 MORROW, RHODA ASHLEY * 1990; PhD, 1977, University of California (Davis)
 PLORDE, JAMES J * 1998; MD, 1959, University of Minnesota
 POLYAK, STEPHEN J., 1993; PhD, 1993, McMaster University (Canada)
 RAINEY, PETRIE M., 2000; MD, 1980, University of North Carolina, Chapel Hill; PhD, 1973, University of California (Berkeley)
 RAISYS, VIDMANTAS A * 1982; PhD, 1969, State University of New York (Buffalo); MS, 1965, University of Illinois
 RUTLEDGE, JOE C. * 1989; MD, 1976, Vanderbilt University
 SCHMER, GOTTFRIED * 1998; MD, 1956, University of Vienna, Austria
 STEPHENS, KAREN G., 1989; PhD, 1982, Indiana University; MA, 1978, Indiana University
 TAIT, JONATHAN F, 1983; MD, 1983, Washington University; PhD, 1983, Washington University
 WENER, MARK H, 1980; MD, 1974, Washington University
 WOOD, BRENT L., 1990; MD, 1990, Loma Linda University; PhD, 1988, Loma Linda University
 ZIMRING, JAMES, 2013; MD, 1999, Emory University; PhD, 1999, Emory University

Associate Professors

BAIRD, GEOFFREY S, 2003; MD, 2003, University of California (San Diego); PhD, 2001, University of California (San Diego)
 BANKSON, DANIEL D, 1993; PhD, 1985, Massachusetts Institute of Technology; MS, 1981, Massachusetts Institute of Technology
 CHERIAN, SINDHU, 2005; MD, 2000, Emory University
 DE ROSA, STEPHEN C., 2004; MD, 1990, Stanford University
 DELANEY, COLLENE J * 1982; PhD, 1972, University of Illinois; MS, 1967, University of Illinois
 DELANEY, MEGHAN, 2009; DO, 2004, University of New England; MPH, 2010, University of Washington
 FROMM, JONATHAN R, 1998; MD, 1997, University of Iowa; PhD, 1997, University of Iowa
 HOFFMAN, NOAH G, 2005; MD, 2005, University of North Carolina; PhD, 2003, University of North Carolina
 HOOFNAGLE, ANDREW N, 2004; MD, 2004, University of Colorado (Denver); PhD, 2002, University of Colorado (Boulder)
 JACK, RHONA M., 2000; PhD, 1980, University of Maryland
 LAMPE, MARY F, 1988; PhD, 1984, University of North Carolina; MS, 1976, University of Washington
 LIBBY, STEPHEN JAMES, 2003; PhD, 1987, Iowa State University; MS, 1983, Iowa State University
 MORISHIMA, CHIHIRO, 1991; MD, 1988, Washington University
 NESTER, THERESA, 2001; MD, 1994, University of Rochester
 OPHEIM, KENT E * 1988; PhD, 1972, Cornell University
 PRITCHARD, COLIN C., 1996; MD, 2007, University of Washington; PhD, 2005, University of Washington
 QIN, XUAN, 2005; PhD, 1995, State University of New York (Albany)
 SABATH, DANIEL E., 1989; MD, 1989, University of Pennsylvania; PhD, 1989, University of Pennsylvania
 SCHILLER, HARVEY S, 1982; MD, 1966, Washington University
 TSUCHIYA, KAREN D., 2004; MD, 1990, University of Michigan
 WU, DAVID, 2008; MD, 2003, Harvard University; PhD, 2001, Massachusetts Institute of Technology
 ZHU, TUOFU, 1997; PhD, 1990, Peking Union Medical College (China); MD, 1984, Tiangxi (Jiangxi) Medical School (China)

Assistant Professors

BRYAN, ANDREW BEVAN BRODY, 2013; MD, 2013, University of Michigan; PhD, 2013, University of Michigan

CHEN, XUEYAN, 2011; PhD, 2003, Tufts University; MD, 1995, Beijing Medical University (China)
 CHISHOLM, KAREN M., 2015; MD, 2009, University of Washington; PhD, 2009, University of Washington
 DICKERSON, JANE A, 2010; PhD, 2010, University of Washington
 EDLEFSEN, KERSTIN, 1998; MD, 2002, University of Washington
 FINK, SUSAN L, 1999; MD, 2009, University of Washington-Seattle Campus; PhD, 2007, University of Washington-Seattle Campus
 GREENE, DINA NICOLE, 2014; PhD, 2008, Emory University
 KONNICK, ERIC Q, 2010; MD, 2010, University of Utah; MS, 2006, University of Utah
 KUSSICK, STEVEN J., 2000; MD, 1994, University of Washington; PhD, 1994, University of Washington
 LE CRONE, CAROL N * 1997; MS, 1966, Colorado State University
 LOCKWOOD, CHRISTINA M, 2014; PhD, 2007, University of Wisconsin (Madison)
 MATHIAS, PATRICK C, 2012; MD, 2012, University of Illinois (Chicago); PhD, 2010, University of Illinois (Urbana)
 METCALF, RYAN ADAMS, 2015; MD, 2010, University of California (Davis)
 MURPHY, SEAN C, 2008; MD, 2008, Northwestern University; PhD, 2006, Northwestern University
 PAGANO, MONICA BEATRIZ, 2009; MD, 1999, University of Buenos Aires (Argentina)
 PEREIRA, SHALINI, 2008; PhD, 1996, University of Rochester; MS, 1991, University of Rochester
 SALIPANTE, STEPHEN, 2003; MD, 2011, University of Washington; PhD, 2009, University of Washington
 SCHAPPERT, JOSEPH W., 2013; MD, 1980, University of Bologna (Italy)
 SHIRTS, BRIAN H, 2012; MD, 2008, University of Pittsburgh; PhD, 2006, University of Pittsburgh
 SOMA, LORINDA A, 2012; MD, 1998, University of Minnesota
 SWENSON, PAUL DAVID, 2000; PhD, 1979, Virginia Commonwealth University
 WHITTEN, RICHARD O, 2000; MD, 1982, University of Utah
 XU, MIN, 2005; PhD, 1993, Wayne State University; MD, 1986, Beijing Medical University (China)
 ZHOU, YI, 2013; PhD, 1995, Louisiana State University; MD, 1987, Beijing Medical University (China)
 ZHU, JIA, 2003; PhD, 1994, Chinese Academy of Sciences (China)

Lecturer

MULLINAX, LAURIANNE TARVER, 2002; MS, 2013, University of Washington

Medicine

Professors

ABKOWITZ, JANIS L, 1980; MD, 1977, Harvard University
 ABOULAFIA, DAVID M., 2000; MD, 1983, University of Michigan
 ABRASS, CHRISTINE K., 1984; MD, 1973, Case Western Reserve University
 ABRASS, ITAMAR B., 1986; MD, 1966, University of California (San Francisco)
 ABSON, KIM G., 2000; MD, 1986, University of Washington; MS, 1979, University of Washington
 AGUILAR-BRYAN, LYDIA, 2007; PhD, 1985, University of Texas (Houston); MD, 1975, U Nacional Autonoma De Mexico (Mexico)
 AHMAD, SUHAIL, 1986; MBBS, 1968, University of Allahabad (India)
 AITKEN, MOIRA L., 1982; MBChB, 1978, University of Edinburgh (UK)
 ALBERS, JOHN J., 1971; PhD, 1969, University of Illinois; MS, 1967, University of Illinois
 ALTMAN, LEONARD, 1974; MD, 1969, Harvard University
 AMORY, JOHN K., 1997; MD, 1994, University of California (San Francisco)
 ANAWALT, BRADLEY D, 1989; MD, 1989, University of California (Davis)
 APPELBAUM, FREDERICK R, 1983; MD, 1972, Tufts University
 ARNOLD, RICHARD W., 1985; MD, 1978, Northwestern University
 ARTERBURN, DAVID E, 2001; MD, 1997, University of Kentucky; MPH, 2003, University of Washington
 AU, DAVID H., 1999; MD, 1993, University of Chicago; MS, 1999, University of Washington
 AUBUCHON, JAMES P., 2008; MD, 1978, University of Michigan, Ann Arbor
 AYARS, GARRISON, 2000; MD, 1976, University of Washington
 BACK, ANTHONY L., 1984; MD, 1984, Harvard University

 ZHAO, XUE-QIAO, 1989; MD, 1983, Beijing University (China)
 ZUCKERMAN, NORMAN, 2000; MD, 1970, University of Bologna (Italy)

Associate Professors

AARONSON, BARRY, 2001; MD, 1991, George Washington University
 ADDISON, JOHN H, 2000; MD, 1979, University of Washington
 ADEDIPE, ADEYINKA, 2008; MD, 2001, University of Chicago
 AGOSTI, JAN M, 2000; MD, 1980, University of California (San Diego)
 AKOUM, NAZEM, 2015; MD, 2001, American University of Beirut (Lebanon); MS, 2011, University of Utah
 ALICIC, RADICA, 2005; MD, 1987, University of Sarajevo; MS, 1991, University of Sarajevo
 ALTEMEIER, WILLIAM A., 1992; MD, 1992, Vanderbilt University
 ANDERSON, ARTHUR E, 2005; MD, 1990, Rush Medical College
 ANDERSON, JEANNE E., 2001; MD, 1988, Stanford University
 ARGUINCHONA, HENRY L., 2000; MD, 1988, University of Washington
 ASHER, STEPHEN W, 2000; MD, 1971, University of Rochester
 BAEHR, PAUL H., 2000; MD, 1988, University of Illinois; MS, 1984, University of Illinois
 BAERNSTEIN, AMY, 1993; MD, 1993, Cornell University
 BATHINA, MURALI N., 2000; MD, 1992, Rush University
 BAUER, JOHN M., 2000; MD, 1975, University of Oregon
 BEDALOV, ANTONIO, 2000; ScD, 1998, University of Zagreb (Croatia); MD, 1989, University of Zagreb (Croatia)
 BELCHER, DONALD W * 1983; MD, 1962, University of Pennsylvania
 BENDER, WILLIAM IRA, 2000; MD, 1978, Chicago Medical School
 BENNION, SCOTT, 2001; MD, 1975, University of Utah; MS, 1972, University of Wyoming
 BERGER, SUSANNA CAROLINA, 2008; PhD, 1994, University of Hamburg (Germany); MD, 1993, University of Hamburg (Germany)
 BEST, JENNIFER ANN, 1993; MD, 2000, Northwestern University
 BEYMER, CHARLES H., 2000; MD, 1988, Uniformed Services University of the Health Sciences; PharmD, 1978, University of the Pacific
 BHATIA, SHAILENDER, 2005; MBBS, 2000, All-India Institute of Medical Sciences
 BHATTACHARYA, RENUKA, 2000; MD, 1997, University of Virginia

BLAU, SIBEL, 2000; MD, 1987, University of Istanbul (Turkey)

BLEVINS, JAMES E., 2000; PhD, 1997, Creighton University

BLOSSER, CHRISTOPHER D., 2013; MD, 2002, University of Kansas

BOCKOW, BARRY, 2000; MD, 1975, Case Western Reserve University

BOHORFOUSH, ANTHONY, 2016; MD, 1981, Creighton University

BONIG, HALVARD, 2002; MD, 1998, Heinrich-Heine University (Germany); MA, 1995, Heinrich-Heine University (Germany)

BOWMAN, WARREN D, 1997; MD, 1954, University of Pennsylvania

BRANCH, KELLEY R., 2001; MD, 1998, Thomas Jefferson University

BRESSLER, MARK F., 2000; MD, 1983, Pennsylvania State University

BRODKIN, KAYLA I, 2000; MD, 1982, State University of New York (Stony Brook)

BRYAN, JAMES KYLE, 2000; MD, 1986, Louisiana State University

BRYANT, AMY E., 2006; PhD, 1999, University of Idaho

BRYSON, CHRISTOPHER L., 2000; MD, 1997, University of Texas (Southwestern); MS, 2002, University of Washington

BURDICK, ROBERT E, 2000; MD, 1964, University of Washington

BUSCH, MARIA A., 1995; MD, 1995, University of California (San Francisco); MS, 1993, University of California (Berkeley)

BUSHYHEAD, JAMES B, 2000; MD, 1971, Washington University; MPH, 1977, University of Washington

CALDWELL, J. MICHAEL, 2000; MD, 1993, Temple University

CALDWELL, RUSSELL B., 2000; MD, 1975, Creighton University

CARKIN, JULIE L., 2000; MD, 1987, Boston University

CARLBOM, DAVID J, 2000; MD, 1997, University of Washington

CARLIN, JEFFREY, 2000; MD, 1975, New York University

CARLOS, TIMOTHY, 1986; MD, 1978, Georgetown University

CARLSON, MOLLY, 1999; MD, 2002, University of Washington

CARLSON, SCOTT E, 2000; MD, 1984, University of Colorado

CARSON, RICHARD W., 2000; MD, 1979, Medical College of Georgia

CARY, JEFFREY M, 2000; MD, 1972, University of Colorado

CENTURION LARA, GLABER A., 2000; MD, 1986, Univ.Nacional Mayor De San Marcos (Peru)

CHAMBERLAIN, JOEL R, 2001; PhD, 1997, University of Michigan

CHAUNCEY, THOMAS R., 1999; MD, 1985, Rush Medical College; PhD, 1981, University of Chicago

CHEN, MICHAEL A, 1999; MD, 1999, University of Michigan, Ann Arbor; PhD, 1995, University of Michigan, Ann Arbor

CHEN, PETER, 2002; MD, 1999, Baylor College of Medicine

CHEN, RU, 1993; PhD, 2002, University of Washington; MS, 1992, Central Michigan University

CHERRY, DEBRA C, 2013; MD, 1995, Texas Technological University; MS, 1999, Stephen F. Austin University

CHEUNG, MARIAN C., 2000; PhD, 1976, State University of New York (Buffalo)

CHEW, LISA D., 1993; MD, 1993, University of California (San Francisco)

CHIEN, ANDY J, 2000; MD, 1999, Northwestern University; PhD, 1999, Northwestern University

CHIEN, JASON W., 1999; MD, 1994, U of Medicine & Dentistry of New Jersey; MSC, 2005, University of Washington

CHILDS, MARIAN T * 1991; PhD, 1950, University of California (Berkeley)

CHIN, MICHAEL T, 2006; MD, 1991, University of Rochester; PhD, 1988, University of Rochester

CHIOREAN, ELENA G, 2012; BM, 1993, University of Medicine and Pharmacy of Cluj-Napoca (Romania)

CHOE, JOHN H, 2000; MD, 1997, New York University; MPH, 2002, University of Washington

CHOUDHURY, NEETILEKHA, 2003; MD, 1989, Gauhati University (India)

CHOW, LAURA QUAN MAN, 2010; MD, 1999, University of British Columbia (Canada)

CIRULLI, VINCENZINO, 2009; PhD, 1993, University of Geneva (Switzerland); MD, 1986, University of Rome (Italy)

Lecturers

EMERSON, JULIA C., 1996; MD, 1981, University of Virginia
 OGATA GROTHEN, BETH N., 1997; MS, 1998, University of Washington
 POLIFKA, JANINE E., 1988; PhD, 1985, University of Louisville
 POPE, CHRISTOPHER E., 2010; PhD, 2005, University of Otago (New Zealand)

Pharmacology

Professors

BAJJALIEH, SANDRA M., 1995; PhD, 1989, University of Wisconsin (Madison)
 BEAVO, JOSEPH A., 1977; PhD, 1970, Vanderbilt University
 BRIDGES, RICHARD J., 2003; PhD, 1984, Cornell University
 CATTERALL, WILLIAM A., 1977; PhD, 1972, Johns Hopkins University
 CHAVKIN, CHARLES, 1984; PhD, 1982, Stanford University
 HORITA, AKIRA * 1996; PhD, 1954, University of Washington

JUCHAU, MONT RAWLINGS * 1981; PhD, 1966, University of Iowa
 LOOMIS, TED A * 1987; MD, 1946, Yale University
 MCKNIGHT, G. STANLEY, 1979; PhD, 1976, Stanford University
 MOON, RANDALL T. * 1997; PhD, 1982, University of Washington
 NATHANSON, NEIL, 1979; PhD, 1975, Brandeis University
 SCHEUER, TODD, 2000; PhD, 1983, University of Rochester
 SCOTT, JOHN D, 2008; PhD, 1983, University of Aberdeen (UK)
 SLATTERY, JOHN T, 1978; PhD, 1978, State University of New York (Buffalo)
 STELLA, NEPHI, 1999; PhD, 1995, Ecole Polytechnique Federale De Lausanne
 STORM, DANIEL R, 1978; PhD, 1971, University of California (Berkeley)
 VINCENZI, FRANK F * 1981; PhD, 1965, University of Washington
 ZHENG, NING, 2002; PhD, 1997, University of Texas (Southwestern)

Associate Professors

GARDNER, RICHARD G., 2006; PhD, 2000, University of California (San Diego)
 HAGUE, CHRIS, 2005; PhD, 2002, Creighton University
 HINDS, THOMAS R, 1974; PhD, 1972, Oregon State University
 ONG, SHAO-EN, 2010; PhD, 2004, University of Southern Denmark
 WANG, EDITH H., 1996; PhD, 1991, Columbia University
 WESTENBROEK, RUTH E., 1984; PhD, 1987, University of Washington

Assistant Professors

BALET SINDREU, CARLOS, 2004; PhD, 2004, University of Barcelona (Spain)
 GAMALELDIN, TAMER, 2010; PhD, 2009, University of Zurich (Switzerland)
 KULLBERG, MAX P, 2016; PhD, 2010, University of Alaska Fairbanks
 LAND, BENJAMIN, 2003; PhD, 2009, University of Washington
 ROHN, TROY T., 2003; PhD, 1994, University of Washington
 YANG, LINGHAI, 2006; PhD, 2007, Chinese Academy of Sciences (China)

Physiology and Biophysics

Professors

ALMERS, WOLFHARD * 2000; PhD, 1971, University of Rochester
 ASBURY, CHARLES L, 2004; PhD, 1999, University of Washington
 BABCOCK, DONNER, 2000; PhD, 1971, Oregon State University
 BERGER, ALBERT J, 1982; PhD, 1976, University of California (San Francisco)
 BINDER, MARC D, 1978; PhD, 1974, University of Southern California
 BOTHWELL, MARK ALLEN, 1985; PhD, 1975, University of California (Berkeley)
 BRENGELMANN, GEORGE L * 1982; PhD, 1967, University of Washington
 BUCK, LINDA B., 2003; PhD, 1980, University of Texas
 BUFFALO, ELIZABETH A, 2013; PhD, 1999, University of California (San Diego)
 CARLSON, STEVEN S., 1985; PhD, 1975, University of California (Berkeley)
 COOK, DANIEL L, 1978; PhD, 1979, University of Washington
 DETWILER, PETER B, 1977; PhD, 1970, Georgetown University
 FAIRHALL, ADRIENNE L, 2004; PhD, 1997, Weizmann Institute For Science (Israel)
 FEIGL, ERIC O, 1969; MD, 1958, University of Minnesota
 FETZ, EBERHARD, 1975; PhD, 1966, Massachusetts Institute of Technology
 FROEHNER, STANLEY C, 2000; PhD, 1973, California Institute of Technology
 FUCHS, ALBERT F * 1981; PhD, 1966, Johns Hopkins University
 FURILLA, ROBERT A, 2011; PhD, 1986, University of British Columbia (Canada)
 GORDON, ALBERT M. * 1982; PhD, 1961, Cornell University
 GORDON, SHARONA E., 1993; PhD, 1993, Brown University
 HILDEBRANDT, JACOB, 1966; PhD, 1966, University of Washington

HILLE, BERTIL, 1968; PhD, 1967, Rockefeller University

 YU, CASSIE K, 2013; MD, 2010, Medical College of Virginia
 ZARKOWSKI, PAUL A., 2003; MD, 1997, SABA University School of Medicine (Netherlands)

Senior Lecturers

LEBLANG, JOSHUA, 2005; EdS, 1994, University of Florida
 SZOT, PATRICIA, 2000; PhD, 1987, Oregon State University

Lecturers

BACKUS, FRANK, 1997; MD, 1992, University of Washington
 WRIGHT, ROBERT G, 1992; MD, 1954, University of Rochester

Radiation Oncology

Professors

AUSTIN-SEYMOUR, MARY M., 1991; MD, 1978, University of Chicago
 CHO, PAUL S., 1999; PhD, 1989, University of California (Los Angeles)
 FORD, ERIC, 2003; PhD, 1997, Columbia University
 GROUDINE, MARK * 1982; PhD, 1976, University of Pennsylvania
 HUG, EUGEN BORIS, 2013; MD, 1986, Ludwig-Maximilians University (Germany)
 KOH, WUI-JIN, 1984; MD, 1984, Loma Linda University
 LARAMORE, GEORGE E, 1976; MD, 1976, University of Miami (Florida)
 LO, SIMON S, 2016; MBBCh, 1991, Chinese University of Hong Kong Tung Wah Group of Hospitals Community College
 MAYR, NINA A, 2013; MD, 1985, University of Munich (Germany)
 PHILLIPS, MARK H, 1991; PhD, 1982, University of Wisconsin (Madison)
 RUSSELL, KENNETH J., 1985; MD, 1979, Harvard University
 SANDISON, GEORGE A, 2008; PhD, 1987, University of Manitoba (Canada)
 WILBUR, D. SCOTT, 1986; PhD, 1978, University of California (Irvine)

Associate Professors

APISARNTHANARAX, SMITH, 2013; MD, 2002, Brown University
 BLOCH, CHARLES D, 2013; PhD, 1987, Michigan State University
 CHVETSOV, ALEXEI V, 2011; PhD, 1992, Moscow Institute of Engineering Physics
 JOHNSON, BARTON S., 1999; DDS, 1985, University of California (Los Angeles)
 KANE, GABRIELLE M, 2007; EdD, 2005, University of Toronto (Canada)
 KIM, EDWARD Y, 2010; MD, 2001, Case Western Reserve University

 PEREZ, FRANCISCO A., 2007; MD, 2007, University of Washington
 PORRINO, JACK A, 2010; MD, 2005, University of Nevada
 RANE, SWATI D, 2015; PhD, 2009, Georgia Institute of Technology

RIPLEY, BETH ANN, 2015; MD, 2010, University of California (San Diego)
 ROBINSON, JEFFREY D., 1996; MD, 1985, University of Minnesota
 RUSSELL, MAI T., 2002; MD, 2001, St. Louis University
 SANDSTROM, CLAIRE K., 2007; MD, 2006, Duke University
 SCHEEL, JOHN, 2012; MD, 2006, University of California (San Diego)
 SCHWARTZ, ALAN N, 2000; MD, 1977, Mt Sinai School of Medicine
 SHIELDS, ANDREW, 1993; MD, 1985, University of Washington
 SHIVARAM, GIRIDHAR M., 2008; MD, 2007, Stanford University
 STANESCU, ARTA LUANA, 2006; MD, 1994, Univ of Med and Pharm Carol Davila (Rom)
 TEEL, GORDON S., 2000; MD, 1990, University of Washington
 WANG, CAROLYN L, 2009; MD, 2003, University of Texas (Southwestern)
 WEAVER, KURT E., 2006; PhD, 2006, Oregon Health Sciences University
 WESSBECHER, FRANCIS W., 2000; MD, 1984, Johns Hopkins University
 WRIGHT, JASON NEAL NIXON, 2007; MD, 2006, Chicago Medical School
 ZHANG, FENG, 2008; PhD, 2006, Fudan University (China)

Rehabilitation Medicine

Professors

AMTMANN, DAGMAR, 1991; PhD, 2002, University of Washington
 ANDERSON, MARJORIE E. * 1984; PhD, 1969, University of Washington
 APKON, SUSAN D, 2009; MD, 1994, University of Vermont
 BECKER, BRUCE E., 2000; MD, 1969, Tulane University
 BOMBARDIER, CHARLES H., 1989; PhD, 1987, Washington State University
 BROCKWAY, JO A, 1975; PhD, 1975, University of Iowa
 CHILDERS, MARTIN K, 2012; PhD, 2002, University of Missouri (Columbia)
 CIOL, MARCIA A., 1990; PhD, 1991, University of Washington
 CZERNIECKI, JOSEPH M * 1995; MD, 1981, University of British Columbia (Canada)
 DE LATEUR, BARBARA J * 2000; MD, 1963, University of Washington
 DEITZ, JEAN L * 1992; PhD, 1976, University of Florida
 DIKMEN, SUREYYA S, 1974; PhD, 1973, University of Washington
 DREYFUSS, PAUL, 2003; MD, 1988, Ohio State University
 EHDE, DAWN M, 1991; PhD, 1992, University of North Dakota
 ESSELMAN, PETER C., 1986; MD, 1986, University of Washington
 FRASER, ROBERT T, 1976; PhD, 1976, University of Wisconsin
 GOLDBERG, MYRON, 1992; PhD, 1980, University of Miami (Florida)
 GOLDSTEIN, BARRY * 1998; MD, 1986, University of California (Los Angeles)
 HALAR, EUGEN M * 1999; MD, 1959, University of Zagreb (Croatia)
 HAMMOND, MARGARET C, 1979; MD, 1978, Medical College of Wisconsin
 HARRAST, MARK A., 1997; MD, 1996, Northwestern University
 HASELKORN, JODIE K. * 1997; MD, 1985, Louisiana State University
 HAYS, ROSS M. * 1992; MD, 1978, University of Washington
 HOFFMAN, JEANNE MARIE, 1999; PhD, 2000, Arizona State University
 JAFFE, KENNETH M, 1981; MD, 1975, Harvard University
 JENSEN, MARK, 1987; PhD, 1989, Arizona State University
 JOHNSON, KURT LEWIS, 1990; PhD, 1984, University of Wisconsin
 KARTIN, DEBORAH, 1984; PhD, 1996, University of Washington
 KRABAK, BRIAN J, 2007; MD, 1993, University of Buffalo
 KRAFT, GEORGE HOWARD, 1969; MD, 1963, Ohio State University
 LITTLE, JAMES WENDELL * 2000; MD, 1977, University of Chicago
 MASSAGLI, TERESA L. * 1997; MD, 1982, Yale University
 MCCOY, SARAH WESTCOTT, 1984; PhD, 1993, University of Washington
 PATTERSON, DAVID R., 1984; PhD, 1982, Florida State University

PEPPING, MARY, 1994; PhD, 1981, Washington State University
 ROBINSON, JAMES P., 1994; MD, 1978, University of California (Los Angeles)
 SHERMAN, JEFFREY J., 1997; PhD, 1998, University of Kentucky
 SHUMWAY-COOK, ANNE * 1999; PhD, 1983, University of Oregon
 SILVERMAN, DONALD R, 2000; ND, 1957, University of Nebraska
 SLIMP, JEFFERSON C, 1979; PhD, 1976, University of Wisconsin (Madison)
 STOLOV, WALTER C, 1999; MD, 1956, University of Minnesota
 TURNER, AARON P., 2001; PhD, 2001, University of Washington
 WARREN, C GERALD * 2000; MPH, 1971, University of Washington
 WILLIAMS, STEVE R, 2016; MD, 1994, Eastern Virginia Medical School
 YORKSTON, KATHRYN, 1975; PhD, 1975, University of Oregon

Associate Professors

BARR, KAREN P., 2001; MD, 1993, Northeast Ohio University College of Medicine
 BRITELL, CATHERINE WOLLEAT * 2000; MD, 1973, University of Southern California
 BROOKE, MARVIN MCCLATCHEY, 2000; MD, 1975, Emory University
 BURGESS, KATHLEEN H., 2000; MD, 1999, University of Washington
 BURNS, STEPHEN P., 1999; MD, 1992, Brown University
 DOUCETTE, MARGARET, 2001; DO, 1984, U of Osteopathic Medicine & Health Sciences
 FORMEA, GINA M, 1994; PhD, 1995, Washington State University
 FRIEDLY, JANNA L., 2001; MD, 2001, Oregon Health Sciences University
 GUTHRIE, MARK R., 1983; PhD, 1990, University of Washington
 HAFNER, BRIAN, 2006; PhD, 2003, University of Washington
 HAKIMI, KEVIN N., 2000; MD, 2000, Wayne State University
 HARNISS, MARK, 1998; PhD, 1996, University of Oregon
 HODAPP MACAULAY, JULIE A., 2001; MD, 2001, University of Notre Dame
 HOLDEFER, ROBERT N, 2009; PhD, 1985, Southern Illinois University
 JIRIKOWIC, TRACY L., 1993; PhD, 2003, University of Washington
 KANNY, ELIZABETH M * 1998; PhD, 1996, University of Washington
 KAUFMAN, MARLA S, 2002; MD, 2002, MCP Hahnemann School of Medicine
 KELLY, VALERIE E, 2003; PhD, 2003, Washington University
 KINNEY, GREGORY A., 1997; PhD, 1996, Northwestern University
 KUMAR, SANTOSH, 2000; MD, 1971, All-India Institute of Medical Sciences
 KUMAR, SHASHI, 2000; MBBS, 1969, University of Rajasthan
 MAITLAND, MURRAY E, 2006; PhD, 1996, University of Calgary (Canada)
 MC MILLAN, JO ANN * 1996; BS, 1953, North Texas State College
 MCPEAK, LISA A., 2007; MD, 1986, Hahnemann Medical College
 MCQUADE, KEVIN J, 2004; PhD, 1995, University of Iowa
 MOLTON, IVAN, 2005; PhD, 2006, University of Miami (Florida)
 MORITZ, CHET T, 2004; PhD, 2003, University of California (Berkeley)
 MULLENS, PAMELA A., 1999; PhD, 1991, University of Washington
 NUTTER, PAUL B, 2000; MD, 1982, University of Washington
 ODDERSON, IB R., 1985; MD, 1985, Vanderbilt University
 POWELL, JANET M., 1998; PhD, 2001, University of Washington
 REYES, MARIA, 2004; MD, 1992, Pennsylvania State University
 RODRIQUEZ, ARTHUR A. * 1999; MD, 1972, University of Wisconsin (Madison)
 SCHWARTZ, LAUREN, 1991; PhD, 1992, University of California (San Diego)
 SMITH, CHARLOTTE H, 2012; MD, 1986, Baylor College of Medicine
 SPANIER, DAVID E., 2001; MD, 1998, University of Cincinnati
 STIENS, STEVE A., 2000; MD, 1986, University of Cincinnati
 SURI, PRADEEP, 2003; MD, 2002, University of Michigan, Ann Arbor
 WALL, THOMAS W, 2000; PhD, 1974, University of Washington
 WASHINGTON, KATHLEEN A., 1982; PhD, 1996, University of Washington
 WIECHMAN, SHELLEY A, 1994; PhD, 2000, University of Washington

WILLIAMS, RHONDA M., 1999; PhD, 1999, Arizona State University

Assistant Professors

ALSCHULER, KEVIN N, 2010; PhD, 2010, Eastern Michigan University
 ASANZA, JUAN L, 2014; MD, 2002, University of Cincinnati
 ASHMAN, SHARON B., 2003; PhD, 2004, University of Washington
 BAYLOR, CAROLYN RAE, 1996; PhD, 2007, University of Washington
 BHATTI, OMAR M, 2013; MD, 2007, American University of the Caribbean
 BOLAND, ELIZABETH A., 2005; PhD, 2000, University of Wisconsin
 BRITTON, DEANNA, 2007; PhD, 2012, University of Washington
 BROWN, THEODORE ROSS, 2003; MD, 1989, Harvard University
 BROWNRIGG, SUSAN M., 2000; BS, 1977, University of Wisconsin
 BRYAN, BLACKSHEAR M, 2009; MD, 1989, Medical College of Virginia
 BUNNELL, AARON ELIJAH, 2008; MD, 2008, University of California (San Francisco)
 CAMPEA, SCOTT J, 2013; MD, 2003, University of Pennsylvania
 CANTINI, EVAN M., 2000; MD, 1980, Wright State University
 CHUNG, THOMAS T., 1999; MD, 1996, University of Michigan
 CLAWSON, DAVID R., 2000; MD, 1985, University of Kentucky
 COMERT, PIYALE, 2000; PhD, 1990, California School of Professional Psychology
 COX, RODDE DALE, 2000; MD, 1988, University of Utah
 CRANE, DEBORAH ANN, 2005; MD, 2005, Tulane University
 CUI, JIMMY YI, 2001; PhD, 1991, Peking Union Medical College (China)
 DEAN, BONNIE, 2009; MD, 1982, University of Cincinnati
 DELEON, ROBIN J, 2012; MD, 1992, Uniformed Services University of the Health Sciences
 FOGELBERG, DONALD J, 2010; PhD, 2008, University of Southern California
 FRIEDMAN, ANDREW, 2000; MD, 1991, University of Michigan
 FUENTES, MOLLY M, 2008; MD, 2008, University of Michigan
 GLASS, ROBIN P., 2000; BOccThy, 1974, Columbia University
 GOODMAN, STEVEN R., 2000; MD, 1984, State University of New York (Buffalo)
 GREENBERG, SHARON L, 1999; MS, 1978, University of Washington
 HANDLEY-MORE, DOROTHY S., 2002; MS, 1999, University of Washington
 HECKMAN, JEFFREY T, 2012; DO, 2006, University of New England
 HOU, GLORIA, 2015; MD, 2008, Harvard Medical School
 HOWARD, ILEANA M, 2005; MD, 2004, Harvard University
 JACKINS, SARAH, 1976; BA, 1971, University of Washington
 JOHNSON, STEPHEN C, 2011; MD, 2010, University of Toledo
 JONES, MARGARET W, 2011; MD, 2011, Tulane University
 JUNN, CHERRY C, 2014; MD, 2010, Boston University
 JUTTE, JENNIFER E, 2008; PhD, 2009, Washington State University
 KANNENBERG, KATHLEEN R, 1994; MA, 1986, California State University San Bernadino
 KERFELD, CHERYL, 1991; PhD, 2011, University of Washington
 KOPP, KAY, 1987; BS, 1981, University of Puget Sound
 KRAFFT, KEVIN R., 2000; MD, 1990, University of Washington
 KROLL, HEATHER R., 2000; MD, 1994, University of Washington
 LA HAIE, PATRICIA A., 2000; MD, 1981, University of Michigan
 LAM, NY-YING, 2015; MD, 2011, Emory University
 LEE, YUNG J, 2009; DO, 2002, Des Moines University
 LEVINE, LARRY A, 2000; MD, 1991, University of Nevada
 LI LUE, DENISE, 2013; MD, 2009, University of Miami (Florida)
 LIEM, BRIAN C, 2012; MD, 2008, New York University
 LIN, CINDY Y, 2016; MD, 2007, Harvard Medical School
 LINCOLN, RANDI K, 2002; PhD, 1999, University of Florida
 LOVELESS, MELINDA S, 2010; MD, 2010, University of Arkansas
 MACK, DAVID L, 2012; PhD, 2005, Indiana University

MARTINEZ, VICENTE, 2008; PhD, 2008, University of Michigan
 MATRONE, KATHLEEN F, 2003; PhD, 2003, Michigan State University
 MATSUDA, PATRICIA A, 1993; PhD, 2010, University of Washington
 MCGOUGH, ELLEN L., 1990; PhD, 2009, University of Washington-Seattle Campus
 MORGAN, SARA J., 2001; BS, 2004, University of Washington
 MORGENROTH, DAVID C, 2004; MD, 2003, Suny Brooklyn
 MROZ, TRACY M, 2014; PhD, 2013, Johns Hopkins University
 MUSNICK, DAVID J., 2000; MD, 1986, University of California (San Francisco)
 NEUFELD, JACOB, 2013; MD, 1993, Wake Forest University
 OSORIO, MARISA, 2012; DO, 2006, Ohio University
 PARRY, RICHARD W, 2014; MD, 2001, University of Washington
 PHAM, KELLY L, 2014; MD, 2010, Georgetown University
 PRADHAN, SUJATA, 2008; PhD, 2007, University of Pittsburgh
 QUESTAD, KENT A, 1999; PhD, 1982, University of Wisconsin
 RADKEVICH, KATERINA O, 2008; MD, 2004, Albert Einstein College of Medicine
 RAICHLE, KATHERINE A, 2004; PhD, 2004, University of Iowa
 RAST, MECHTHILD M., 2000; PhD, 1993, University of Washington
 REESE, RANDY G, 2009; PhD, 2004, Pacific Graduate School of Psychology
 RICKERSON, NANCY L., 1993; PhD, 2007, University of Washington
 RUNDELL, SEAN, 2009; PhD, 2014, University of Washington
 SANDHU, NEELWANT S, 2015; MD, 2005, Oregon Health Sciences University
 SEROUSSI, RICHARD, 2000; MD, 1991, Case Western Reserve University
 SETTLE, C. STEPHEN, 2000; MD, 1976, University of Cincinnati
 SINGH, VIRTAJ, 2006; MD, 2006, Baylor College of Medicine
 SLACK, DAVID P., 2003; MD, 2002, Drexel University
 SOARES, BOSCO F., 2002; MBBS, 1984, Sindh Medical College, Pakistan
 SONG, SHAWN H, 2011; MD, 2010, University of California (San Francisco)
 SOTO, PATRICK, 2011; DO, 2004, Philadelphia College of Osteopathic Med
 STEWART, KATHERINE B, 2004; MS, 1985, University of Washington
 SVIRCEV, JELENA N, 2005; MD, 2001, University of Wisconsin
 TACKETT, MEREDITH J., 2002; PhD, 1998, University of Denver
 TANTA, KARI JEANNE, 2002; PhD, 2002, University of Washington
 TSAO, ELAINE Y, 2009; MD, 2008, Medical College of Wisconsin
 WANG, LEILEI, 1990; MD, 1990, University of Pittsburgh
 WATLING, RENEE L., 2005; PhD, 2004, University of Washington
 WENDEL, SUSAN L., 1988; MS, 1989, Boston University
 WHITE, DAVID M * 2000; PhD, 1987, University of Alabama
 WOLF, LYNN, 1980; MOT, 1980, University of Washington
 WOODRUM, SUSAN CAMILLA, 2000; MS, 1984, University of Washington
 WOOTEN, KAREN M., 2000; MD, 1998, Bowman Gray School of Medicine
 ZUMSTEG, JENNIFER M, 2005; MD, 2005, University of Chicago

Senior Lecturers

HERTLING, DARLENE, 2000; BS, 1956, University of California (Berkeley)
 OKUMURA, RAMONA M., 1990; BS, 1981, University of Washington
 ROBINSON, CYNTHIA A., 1992; PhD, 2010, University of Washington
 YAMANE, ANN, 1979; BS, 1976, University of Washington

Lecturers

BENNETT, KIMBERLY D., 1996; PhD, 1974, University of California (Los Angeles)
 DRALLE, ALAN J, 1995; BS, 1968, University of Washington
 GILBERTSON, TOREY J, 2010; PhD, 2015, University of Washington
 ROLLINGER, BARBARA E, 1982; MS, 1988, University of Washington
 SPAULDING, SUSAN E, 2008; MS, 2007, University of Oregon

Surgery

Professors

ALDEA, GABRIEL S., 1998; MD, 1981, Columbia University
 ALLEN, MARGARET D., 1998; MD, 1974, University of California (San Diego)
 ANDERSEN, CHARLES A, 2000; MD, 1968, University of Utah
 ANDERSON, BENJAMIN O., 1994; MD, 1985, Albert Einstein College of Medicine
 ANDERSON, RICHARD P, 2000; MD, 1959, University of Washington
 ARBABI, SAMAN, 1992; MD, 1992, University of California (Davis)
 ASHBAUGH, DAVID G., 1993; MD, 1957, Ohio State University
 BARKER, DAVID T, 2000; MD, 1968, Indiana University
 BEACH, KIRK WATSON * 2000; MD, 1976, University of Washington; MSChE, 1968, University of California (Berkeley)
 BERNI, GEORGE A, 2000; MD, 1975, University of Washington
 BILLINGHAM, RICHARD P, 2000; MD, 1971, University of Rochester
 BULGER, EILEEN, 1992; MD, 1992, Cornell University
 BYRD, DAVID R., 1992; MD, 1982, Tulane University
 CHANG, WALLACE, 2000; MD, 1963, Duke University
 CHEN, JONATHAN MICHAEL, 2013; MD, 1994, Columbia University
 CUSCHIERI, JOSEPH, 2000; MD, 1994, Wayne State University
 DELLINGER, E PATCHEN, 1977; MD, 1970, Harvard University
 EADE, GILBERT G, 1996; MD, 1951, University of Washington

Senior Lecturers

ALBERT, MARILYNN L., 1989; MN, 1974, Boston University
 BOSQUE, ELENA MARIE, 2000; PhD, 1993, University of California (San Francisco); MS, 1984, University of California (San Francisco)
 CANTARINI, RENEE, 1990; MN, 1995, University of Washington
 CHRISTIANSON, PHYLLIS L., 1988; MN, 1990, University of Washington
 HOFFMAN, MARTHA A, 1978; MN, 1978, University of Washington
 JOHNSON, GAIL C., 1985; DNP, 2009, University of Washington
 KEARNES, DEBORAH R., 1988; MN, 1979, University of Washington
 KROENING, KATHLEEN M., 1990; MN, 1992, University of Washington
 LANDIS, SUSAN C, 2004; MN, 1982, University of Washington
 LAZARUS, JUDY, 1994; MN, 1988, University of California (San Francisco)
 LENART, JANET C, 1983; MPH, 1989, University of Washington; MN, 1984, University of Washington

Lecturers

CEA, RIZZA OLEGARIO, 2011; MN, 1998, New York University
 GRIFFIN, YVONNE L., 1997; MN, 2002, Case Western Reserve University
 HANSON, MARY I., 1990; MN, 2008, University of Washington
 JACKMAN, SHAY L., 2015; MA, 2007, College of St. Catherine
 JO, SINDY YOUN, 2001; MN, 2009, University of Washington
 KALKBRENNER, ANNE CLAIRE, 1997; MN, 1999, University of Washington
 MYERS, JULIE, 2006; MN, 2013, University of Washington
 O'CONNOR, JANE, 2003; MN, 2007, University of Washington
 OSHIO, SACHIKO, 1985; PhD, 1992, University of Washington; MS, 1981, Boston University
 PIPES, PEGGY L, 1996; MPH, 1966, University of Michigan; MA, 1952, Columbia University
 RASMUSSEN, SHERYL RUHLMAN, 1987; MN, 1993, University of Washington
 SUMMEROUR, MELANIE, 1995; MN, 1991, Emory University
 WADHWANI, ROINI MURAKI, 1999; MN, 2011, University of Washington
 ZIMMER, PHYLLIS A, 1983; MN, 1982, University of Washington

School of Pharmacy

Medicinal Chemistry

Professors

ATKINS, WILLIAM M., 1991; PhD, 1988, University of Illinois; MA, 1982, Harvard University
 ELMER, GARY W * 1999; PhD, 1970, Rutgers University; MS, 1967, University of Connecticut

KRUPSKI, EDWARD, 1983; PhD, 1949, University of Washington; MS, 1941, University of Washington
 NELSON, WENDEL, 1965; PhD, 1965, University of Kansas
 RETTIE, ALLAN E., 1984; PhD, 1983, University of Newcastle-On-Tyne (UK)

Associate Professors

KUNZE, KENT, 1989; PhD, 1981, University of California (San Francisco)
 LEE, KELLY K., 2009; PhD, 2001, Johns Hopkins University
 TOTAH, RHEEM A., 2002; PhD, 2002, University of Kansas; MS, 2000, University of Kansas

Assistant Professors

GUTTMAN, MIKLOS, 2010; PhD, 2009, University of California (San Diego)
 NATH, ABHINAV, 2003; PhD, 2008, University of Washington
 XU, LIBIN, 2014; PhD, 2007, University of Illinois (Chicago)

Pharmaceutics

Professors

DICKMANN, LESLIE, 2006; PhD, 2003, University of Washington
 HO, RODNEY J.Y., 1990; PhD, 1987, University of Tennessee
 HU, SHIU-LOK, 1988; PhD, 1978, University of Wisconsin (Madison)
 LEVY, RENE H, 1970; PhD, 1970, University of California (San Francisco)
 RAGUENEAU-MAJLESSI, ISABEL, 1999; MD, 1993, University of Paris VI
 SHEN, DANNY D, 1984; PhD, 1975, State University of New York (Buffalo)
 THUMMEL, KENNETH E., 1989; PhD, 1987, University of Washington
 UNADKAT, JASHVANT D, 1985; PhD, 1982, University of Manchester (UK)
 WANG, JOANNE, 2000; PhD, 1998, University of California (San Francisco)

Associate Professors

BRADLEY, RYAN D., 2012; ND, 2003, Bastyr University
 COLLINS, CAROL J, 2003; MD, 1991, Ohio State University
 ISOHERRANEN, NINA, 2003; PhD, 2003, Hebrew University (Israel)
 KELLY, EDWARD J, 1991; PhD, 1996, University of Washington
 LIN, YVONNE S., 1997; PhD, 2002, University of Washington
 MAO, QINGCHENG, 2002; PhD, 1995, University of Berne (Switzerland)
 PAINE, MARY F., 2014; PhD, 1997, University of Washington
 ROBINSON, RENEE, 2015; PharmD, 1998, University of Georgia
 WOODAHL, ERICA, 2005; PhD, 2004, University of Washington

Assistant Professors

KLATT, NICHOLE, 2012; PhD, 2009, Emory University
 PRASAD, BHAGWAT, 2011; PhD, 2011, National Institute of Pharmaceutical Education and Research (India)

Pharmacy

Professors

ALMGREN, JEFFREY D, 2000; BPharm, 1980, University of Washington
 ANDERSON, GAIL, 1981; PhD, 1987, University of Washington
 AWAN, ASAAD B., 2000; PharmD, 1992, University of Washington
 BARNES, ANDREW, 1992; PharmD, 1994, University of Washington
 BASU, ANIRBAN, 2011; PhD, 2004, University of Chicago
 BAUER, LARRY, 1980; PharmD, 1980, University of Kentucky

BEIER, MANJU, 2013; PharmD, 1981, University of Utah
 BURKHART, VINCENT D, 1999; MS, 1972, University of Maryland
 CHAN, LINGTAK-NEANDER, 1994; PharmD, 1996, University of Washington
 CHRISTENSEN, DALE B, 2004; PhD, 1977, University of Minnesota
 DOCKTER, DONNA M, 2000; BS, 1972, University of Washington
 DOWNING, DONALD F, 1982; BPharm, 1975, University of Washington
 ELLSWORTH, ALLAN J, 1981; PharmD, 1977, Philadelphia Coll of Pharmacy & Science
 ERICKSON, STEVEN H, 2000; BS, 1972, University of Washington
 FASSETT, WILLIAM E, 2000; PhD, 1992, University of Washington
 FULLERTON, DWIGHT S., 2000; PhD, 1971, University of California (Berkeley)
 GARDNER, JACQUELINE S., 1990; PhD, 1980, University of Washington
 GARRISON, LOUIS P, 2004; PhD, 1981, Stanford University
 GRAY, SHELLY L., 1995; PharmD, 1989, University of Michigan

HALL, CRYSTAL C, 2008; PhD, 2008, Princeton University
 HERRANZ JR, JOAQUIN, 2004; PhD, 2004, Massachusetts Institute of Technology; MCP, 1989, University of California (Berkeley)
 HILL, HEATHER D, 2014; PhD, 2007, Northwestern University; MPP, 1999, University of Michigan, Ann Arbor
 KIOKO, SHARON N, 2015; PhD, 2008, Indiana University; MPA, 2004, Indiana University
 KOSACK, STEPHEN, 2013; PhD, 2008, Yale University; MA, 2004, Yale University
 PAGE, STEPHEN B., 1999; PhD, 1999, Massachusetts Institute of Technology; SM, 1989, Massachusetts Institute of Technology
 SUAREZ, DAVID, 2013; PhD, 2006, Stanford University; MA, 2002, Stanford University

Assistant Professors

BRUNJES, BENJAMIN M, 2016; MPA, 2012, University of Georgia; MPA, 2012, University of Georgia
 DILLON, BRIAN M, 2013; MAIS, 2002, Arizona State University; MA, 2009, Cornell University
 FYALL, RACHEL, 2014; MS, 2013, University of California-Berkeley; MPA, 2006, George Washington University
 MAGALLANES REYES, JOSE M., 2015; MA, 2008, Columbia University; MS, 2000, Universidad Nacional De Ingeniera (Peru)
 PEREZ, MARIA D, 2012; MS, 2009, Universiti Putra Malaysia; MA, 2009, Stanford University

Senior Lecturers

BENSON, LARISA R, 1994
 BULLITT, DOROTHY C., 2009; MBA, 1988, University of Washington
 CUEVAS, CARLOS E., 2012; MS, 1977, Catholic University of Chile
 GALE, DIANA, 2002; MUP, 1969, University of Washington
 HARRISON, DAVID S., 1986
 TRAXLER, GREGORY J, 2014; MS, 1987, University of Minnesota
 VIGDOR, ELIZABETH R., 2014; MS, 1995, Harvard School of Public Health

Lecturers

BOURQUE, RENEE, 2009; MPH, 2008, Emory University
 REID, JAMES F, 1991; MSC, 2008, London School of Hygiene and Tropical Medicine (UK)

School of Public Health

Biostatistics

Professors

ANDERSON, GARNET L * 2000; PhD, 1989, University of Washington; MA, 1983, State University of New York (Binghamton)
 BARLOW, WILLIAM E. * 2000; PhD, 1986, University of Washington; MS, 1982, University of Washington
 BROWN, ELIZABETH, 2002; DSc, 2002, Harvard University; MS, 1998, University of Colorado (Denver)
 CHEN, YING QING, 2005; PhD, 1999, Johns Hopkins University
 DIEHR, PAULA K., 1992; PhD, 1970, University of California (Los Angeles); MS, 1967, University of California (Los Angeles)
 EMERSON, SCOTT S., 1995; PhD, 1988, University of Washington; MD, 1981, University of Virginia
 ETZIONI, RUTH B. * 2000; PhD, 1990, Carnegie Mellon University; MS, 1987, Carnegie Mellon University
 FEIGL, POLLY, 1999; PhD, 1961, University of Minnesota; MA, 1957, University of Minnesota
 FISHER, LLOYD D * 1999; PhD, 1966, Dartmouth College; MA, 1965, Dartmouth College
 FLEMING, THOMAS RICHARD, 1984; PhD, 1976, University of Maryland; MA, 1974, University of Maryland
 GILBERT, PETER B, 2002; PhD, 1996, University of Washington; MS, 1994, University of Washington
 HALLORAN, M. ELIZABETH, 2006; DSc, 1989, Harvard University; MD, 1983, Freie University of Berlin (Germany)
 HALLSTROM, ALFRED * 1991; PhD, 1968, Brown University; MSC, 1961, Brown University
 HEAGERTY, PATRICK J., 1995; PhD, 1995, Johns Hopkins University; MS, 1991, State University of New York (Albany)
 HSU, LI * 2000; PhD, 1994, University of Washington; MS, 1991, University of Washington
 HUGHES, JAMES P, 1981; PhD, 1993, University of Washington; MS, 1980, University of Washington
 INOUE, LURDES, 2002; PhD, 1999, Duke University; MS, 1998, Duke University

KOOPERBERG, CHARLES L * 2000; PhD, 1991, University of California (Berkeley); MA, 1985, Delft University of Technology (Netherlands)

KRONMAL, RICHARD A, 1964; PhD, 1964, University of California (Los Angeles)

LE BLANC, MICHAEL * 2000; PhD, 1989, University of Washington; MA, 1984, University of Waterloo (Canada)

LUMLEY, THOMAS S., 2000; PhD, 1998, University of Washington; MSC, 1994, University of Oxford (UK)

MCKNIGHT, BARBARA, 1981; PhD, 1981, University of Wisconsin (Madison); MS, 1979, University of Wisconsin (Madison)

NELSON, JENNIFER L., 2004; PhD, 1999, University of Washington; MS, 1996, University of Washington

PEPE, MARGARET * 2000; PhD, 1986, University of Washington; MS, 1984, University of Washington

PRENTICE, ROSS L * 1982; PhD, 1970, University of Toronto (Canada); MSC, 1968, University of Toronto (Canada)

RICHARDSON, BARBRA ANN, 1993; PhD, 1993, University of California (Los Angeles); MS, 1989, University of California (Los Angeles)

SELF, STEVEN G * 1991; PhD, 1981, University of Washington; MS, 1977, California State University, Long Beach

THOMPSON, MARY LOU, 1989; PhD, 1979, University of Gottingen (Germany)

WAHL, PATRICIA W * 1998; PhD, 1971, University of Washington

WANG, CHING-YUN, 2000; PhD, 1993, Texas A&M University; MS, 1985, National Taiwan University

WEIR, BRUCE SPENCER, 2006; PhD, 1968, North Carolina State University

ZHENG, YINGYE, 2003; PhD, 2002, University of Washington; MS, 1999, University of Washington

ZHOU, XIAO-HUA ANDREW, 2002; PhD, 1991, Ohio State University; MS, 1987, University of Calgary (Canada)

Associate Professors

BROWNING, SHARON R., 1995; PhD, 1999, University of Washington

BRUMBACK, LYNDIA C., 2001; PhD, 2001, University of Wisconsin (Madison); MS, 1996, University of Wisconsin (Madison)

CHAN, KWUN CHUEN GARY, 2008; PhD, 2008, Johns Hopkins University

COOK, ANDREA, 2007; PhD, 2005, Harvard University; MS, 2003, Harvard University

DAI, YU, 2010; PhD, 2007, University of Washington; MD, 1998, Peking University (China); MS, 2000, University of Pittsburgh

DI, CHONGZHI, 2010; PhD, 2009, Johns Hopkins University

EMOND, MARY JANE, 1987; PhD, 1993, University of Washington; MS, 1989, University of Washington

FONG, YOUYI, 2012; PhD, 2010, University of Washington; PhD, 2000, Indiana University

GRAFFELMAN, JAN, 2016; PhD, 2000, Universitat Politècnica de Catalunya

HOLTE, SARAH E., 2004; PhD, 1990, University of Oregon; MA, 1987, University of Oregon

HUANG, YING, 2012; PhD, 2007, University of Washington; MS, 2000, Iowa State University

HUBBARD, REBECCA A, 2002; PhD, 2007, University of Washington; MS, 2004, University of Washington; MSC, 2001, University of Edinburgh (UK)

JANES, HOLLY E., 2009; PhD, 2005, University of Washington; MA, 2000, University of Massachusetts

KERR, KATHLEEN F., 2001; PhD, 1999, University of Southern California; MS, 1998, University of Southern California

MAY, SUSANNE, 2008; PhD, 2000, University of Massachusetts; MS, 1994, Universität Karlsruhe, Germany

MCCLELLAND, ROBYN L., 1994; PhD, 2000, University of Washington; MS, 1994, McGill University (Canada)

POLISSAR, NAYAK LINCOLN * 2000; PhD, 1974, Princeton University; MA, 1968, Princeton University

RICE, KENNETH M., 2004; PhD, 2002, Cambridge University (UK)

SHOJAIE, ALI, 2010; PhD, 2010, University of Michigan; MS, 2010, University of Michigan; MSC, 2001, Amir Kabir University of Tech (Iran)

SHORTREED, SUSAN, 2013; PhD, 2006, University of Washington; MS, 2004, University of Washington

SZPIRO, ADAM A., 2006; PhD, 1999, Brown University

THORNTON, TIMOTHY A., 2009; PhD, 2005, University of Chicago

YANEZ III, NORBERT DAVID, 1993; PhD, 1993, Arizona State University; MS, 1989, Arizona State University

Assistant Professors

CARONE, MARCO, 2014; PhD, 2010, Johns Hopkins University

EDLEFSEN, PAUL, 2012; PhD, 2009, Harvard University; AM, 2005, Harvard University

HOERING, ANTJE, 2006; PhD, 1991, University of Heidelberg (Germany); MA, 1988, Oregon State University

OTHUS, MEGAN, 2011; PhD, 2009, Harvard University; AM, 2006, Harvard University

SIMON, NOAH, 2013; PhD, 2013, Stanford University

WU, MICHAEL, 2015; PhD, 2009, Harvard University; AM, 2006, Harvard University

Lecturer

GOGARTEN, JENNIFER, 2003; MSC, 2007, University of Washington

Environmental and Occupational Health Sciences

Professors

BURBACHER, THOMAS M, 1974; PhD, 1983, University of Washington
 BUSSIERE, JEANINE L., 2000; PhD, 1989, Washington State University; MS, 1986, Western Washington University
 CANGELOSI, GERARD A., 1985; PhD, 1983, University of California (Davis)
 CHECKOWAY, HARVEY, 1991; PhD, 1978, University of North Carolina; MPH, 1975, Yale University
 CIRONE, PATRICIA A., 2006; PhD, 1979, New York University; MS, 1975, New York University
 COSTA, LUCIO GUIDO, 1983; PharmD, 1977, University of Milan (Italy)
 EATON, DAVID L, 1979; PhD, 1978, University of Kansas
 ECHEVERRIA, DIANA, 2000; PhD, 1987, University of Michigan; MS, 1982, University of Michigan
 FAUSTMAN, ELAINE M., 1981; PhD, 1981, Michigan State University
 FENSKE, RICHARD A., 1990; PhD, 1984, University of California (Berkeley); MPH, 1978, University of California (Berkeley); MA, 1972, Columbia University
 FRANKLIN, GARY M. * 2000; MD, 1969, George Washington University; MPH, 1982, University of California (Berkeley)
 FRUMKIN, HOWARD, 2010; DrPH, 1993, Harvard University; MD, 1982, University of Pennsylvania
 GALLAGHER, EVAN P, 2004; PhD, 1991, Duke University; MA, 1986, Duke University
 GARLAND, JOHN, 2009; PhD, 1990, Oregon State University; MS, 1972, University of Minnesota
 GAUTOM, ROMESH K, 2004; PhD, 1987, Meerut University (India); MS, 1979, Punjab Agriculture University (India)
 GILBERT, STEVE * 2000; PhD, 1986, University of Rochester
 GILL, CHRISTOPHER, 2016; PhD, 1994, University of British Columbia (Canada)
 HOLLAND, JOHN P., 2000; MD, 1977, University of Nebraska, Omaha; MPH, 1986, University of Washington
 JOHNSON, PETER W, 2001; PhD, 1998, University of California (Berkeley); MS, 1998, University of California (Berkeley)
 KALMAN, DAVID A, 1978; PhD, 1978, University of Washington
 KAUFMAN, JOEL D., 1988; MD, 1986, University of Michigan; MPH, 1990, University of Washington
 KAVANAGH, TERRANCE J, 1985; PhD, 1985, Michigan State University; MS, 1980, Michigan State University
 KERR, SUSAN, 2015; PhD, 1995, Kansas State University; DVM, 1985, Cornell College
 KISSEL, JOHN C., 1990; PhD, 1985, Stanford University; MS, 1974, Harvard University
 KLAASSEN, CURTIS, 2014; PhD, 1968, University of Iowa; MS, 1966, University of Iowa
 KOENIG, JANE, 1993; PhD, 1963, University of Washington; MS, 1961, University of Washington
 LUCHTEL, D * 1982; PhD, 1969, University of Washington
 MEADOR, JAMES, 2014; PhD, 1988, University of Washington; MS, 1981, San Diego State University
 MESCHKE, JOHN SCOTT, 2002; PhD, 2001, University of North Carolina, Chapel Hill; JD, 1993, University of Kansas
 MORGAN, MICHAEL, 1998; DSc, 1972, Massachusetts Institute of Technology
 MUHM, JAMES MICHAEL, 2000; MD, 1974, University of California (Davis)
 OMENN, GILBERT S * 1997; PhD, 1972, University of Washington; MD, 1965, Harvard University
 OMIECINSKI, CURTIS J * 1993; PhD, 1980, University of Washington
 PAPPASIOANOU, MARGUERITE, 2016; PhD, 1982, University of California (Davis); DVM, 1972, Michigan State University
 PARKS, WILLIAM C, 2004; PhD, 1982, Medical College of Wisconsin
 ROBERTS, MARILYN C, 1981; PhD, 1978, University of Washington; MS, 1977, University of Washington
 ROBKIN, MAURICE A * 1997; PhD, 1961, Massachusetts Institute of Technology
 ROSENFELD, MICHAEL E., 1992; PhD, 1981, University of Wisconsin (Madison); MS, 1978, University of Vermont
 SEIXAS, NOAH S., 1992; PhD, 1990, University of Michigan; MS, 1982, Harvard University
 SHEPPARD, ELIZABETH A., 1989; PhD, 1992, University of Washington; MSC, 1985, Johns Hopkins University
 SILVERSTEIN, BARBARA A. * 2000; PhD, 1985, University of Michigan; MPH, 1982, University of Michigan
 SILVERSTEIN, MICHAEL A., 2000; MD, 1971, Stanford University; MPH, 1978, University of Michigan
 SIMPSON, CHRISTOPHER DAVID, 2000; PhD, 1997, University of British Columbia (Canada); MSC, 1992, University of Waikato
 SPRUGEL, KATHERINE, 2000; PhD, 1983, Michigan State University
 STEIN, JOHN, 2005; PhD, 1980, University of Washington
 TAKARO, TIMOTHY, 1999; MD, 1985, University of North Carolina; MS, 1996, University of Washington

VAN BELLE, GERALD, 1974; PhD, 1967, University of Toronto (Canada); MA, 1964, University of Toronto (Canada)
 VEDAL, SVERRE, 2004; MD, 1976, University of Colorado (Boulder); MSC, 1983, Harvard University
 WOODS, JAMES * 2000; PhD, 1970, University of Washington; MPH, 1978, University of North Carolina
 XIA, ZHENGUI, 1987; PhD, 1991, University of Washington; MS, 1985, Wuhan University (China)
 YOST, MICHAEL G., 1993; PhD, 1989, University of California (Berkeley); MS, 1984, University of California (Berkeley)
 ZARBL, HELMUT * 2000; PhD, 1983, McGill University (Canada); DCS, 1975, Marianopolis College, Canada

Associate Professors

AMMANN, HARRIET M., 2000; PhD, 1978, North Carolina State University; MS, 1965, New Mexico Highlands University
 BAO, STEPHEN S., 2000; PhD, 1995, Lulea University of Technology, Sweden; MSC, 1985, Shanghai University (China)
 BONAUTO, DAVID K., 1999; MD, 1993, Columbia University; MPH, 2000, University of Washington
 BOYLE, DAVID S., 2008; PhD, 1995, Edinburgh University, Scotland
 BRODKIN, CARL * 1999; MD, 1983, University of Colorado (Denver)
 CARLSTEN, CHRISTOPHER R., 2000; MD, 2000, Stanford University; MPH, 2006, University of Washington
 DANIELL, WILLIAM E * 1994; MD, 1979, Tufts University; MPH, 1986, University of Washington
 DOOLITTLE, THEUS LEE * 1991; PhD, 1963, University of Southern California; MS, 1955, University of California (Los Angeles)
 DUNCAN, PATRICK BRUCE, 2016; PhD, 1984, University of North Carolina
 DYKSTRA, ELIZABETH, 2016; PhD, 1997, Texas A&M University; MS, 1993, Texas A&M University

 WOOD, SUZANNE, 2015; PhD, 2006, Old Dominion University; MS, 2001, Old Dominion University
 YU, DIANA TAN, 2000; MD, 1981, University of Washington; MSPH, 1977, University of North Carolina

Senior Lecturers

BEZRUCHKA, STEPHEN A., 1988; MD, 1973, Stanford University; MPH, 1993, Johns Hopkins University

CAVE, SARAH, 2014; MHA, 1999, University of Washington
 CONDON, JAMES, 2014; EdD, 2013, Georgia Southern University; MS, 2002, Central Michigan University
 HANKEN, MARY A., 1991; PhD, 1989, University of Washington; MED, 1974, Seattle University
 HOUSE, PETER J., 1990; MHA, 1974, University of Michigan
 KRISHNASWAMY, ALARMEL G, 2011; MPH, 2012, University of Washington; MED, 2005, De Paul University
 KWAN-GETT, TAO SHENG C., 1991; MD, 1991, Harvard University; MPH, 1998, University of Washington
 MACKENZIE, SARA LOUISE, 1992; MD, 1992, University of California (Davis); MPH, 2005, University of Washington
 MURPHY, GRETCHEN C., 1992; MED, 1973, University of Washington
 O'BRIEN, KURT C., 2000; MA, 1997, University of San Francisco
 PETERSON, KATHLEEN, 1998; MS, 1994, Central Michigan University
 SAPPINGTON, JEREMY L., 1992; MPH, 1964, University of North Carolina
 SCONYERS, JEFFREY M, 1994; JD, 1982, Yale University
 STEELE, MARSHA C, 2006; MS, 1980, University of Washington
 STILLMAN, DENNIS, 1987; MHA, 1979, University of Washington

Lecturer

HARTFIELD, KAREN A., 1999; MPH, 1986, University of North Carolina

Reserve Officer Training Corps

Aerospace Studies

Professors

BIGGER, BRENT, 2014; MA, 2006, University of Chicago; MS, 1996, University of Oklahoma

Assistant Professors

DALY, SEAN, 2015; MA, 2011, Portland State University

MCCAMMON, NICOLE, 2016

MENGISTU, ISSEYAS H, 2013

WOODARD, KYLE, 2014

Military Science

Professors

FLOOD, TEVINA, 2014; MMAS, 2012, US Army Command and General Staff College

Assistant Professors

BEATTIE, TROY, 2014; MA, 2010, Naval Postgraduate School

TRISTAN, CARLOS, 2015; BBA, 2004, Saint Mary'S University of San Antonio

Naval Science

Professors

JOHNSON, MARK, 2015; MA, 1994, Naval Postgraduate School

Associate Professors

SLEDGE, CHRISTOPHER, 2016; MMAS, 2006, US Army Command and General Staff College

Assistant Professors

ARTHUR, ERIN, 2015; BS, 2009, United States Naval Academy
 HALL, ALVIS, 2014; BBA, 2009, University of West Georgia
 IRGENS, KATHERINE E., 2016; BS, 2011, Purdue University-Main Campus
 LEFF, STEPHEN M., 2014; BSE, 2008, University of Michigan, Ann Arbor
 STONE, STEPHEN, 2016; BS, 2012, Old Dominion University

School of Social Work

Professors

CATALANO, RICHARD F, 1979; PhD, 1982, University of Washington
 CONTE, JON, 1990; PhD, 1979, University of Washington
 COURTNEY, MARK, 2007; PhD, 1992, University of California (Berkeley); MA, 1987, John F. Kennedy University
 DE HAAN, BENJAMIN, 2010; PhD, 1997, Portland State University
 FREDRIKSEN GOLDSSEN, KAREN, 1993; PhD, 1993, University of California (Berkeley)
 GIDDENS, BRIAN C., 1995; MSW, 1984, University of Washington
 GILCHRIST, LEWAYNE D, 1981; PhD, 1981, University of Washington; MA, 1967, Stanford University
 GILLMORE, MARY LOUISE, 1977; PhD, 1983, University of Washington; MS, 1970, University of Michigan
 HAWKINS, JOHN D, 1976; PhD, 1975, Northwestern University
 HERRENKOHL, TODD, 1995; PhD, 1998, University of Washington
 HILL, KARL GORDON, 1994; PhD, 1991, Brandeis University
 HOOYMAN, NANCY, 1979; PhD, 1974, University of Michigan
 KEMP, SUSAN, 1994; PhD, 1994, Columbia University
 LEVY, RONA L, 1975; PhD, 1974, University of Michigan; MSW, 1972, University of Michigan
 LONGRES, JOHN F. * 1993; PhD, 1970, University of Michigan
 MARCENKO, MAUREEN, 1997; PhD, 1988, McGill University (Canada)
 MEYERS, MARCIA, 2001; PhD, 1992, University of California (Berkeley); MPA, 1987, Harvard University
 MORRISON, DIANE M, 1980; PhD, 1982, University of Washington
 NURIUS, PAULA S., 1984; PhD, 1984, University of Michigan; MSW, 1980, University of Hawaii
 PECORA, PETER, 1990; PhD, 1982, University of Washington
 RICHEY, CHERYL A * 1983; DSW, 1974, University of California (Berkeley)
 ROFFMAN, ROGER ALAN, 1995; DSW, 1983, University of California (Berkeley)
